
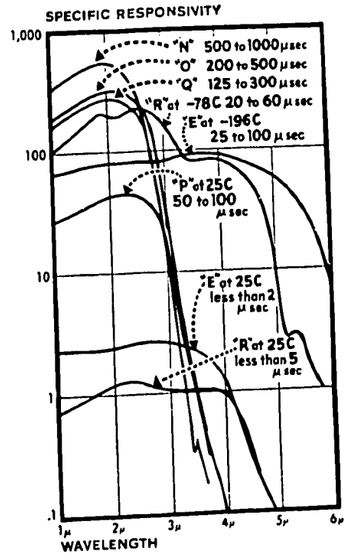
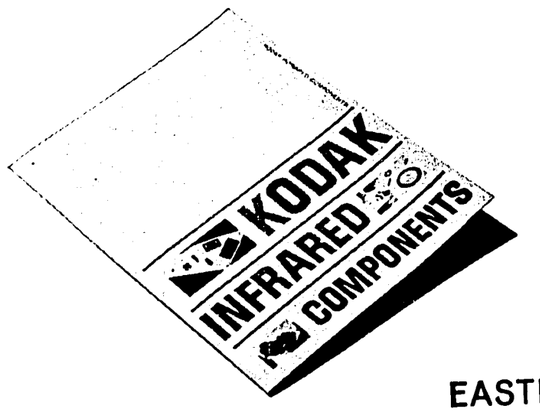
KODAK EKTRON DETECTORS

These photoconductive resistors are made by depositing lead sulfide or lead selenide. They provide a wide-open choice in spectral response and time constant, and a wide-open choice of physical forms—large, small, complex shapes, multiple arrays, "immersed," Dewar-housed.





SEND FOR THIS FACT-FOLDER

Kodak makes quite a few kinds of components for systems that detect, analyze, and otherwise respond to infrared radiation. In exchange for your name, address and company affiliation, we will gladly send you a folder full of our latest data sheets. (Things are moving too rapidly at present to permit the finality of a printed catalog.)

EASTMAN KODAK COMPANY
Apparatus and Optical Division
Rochester 4, N.Y.

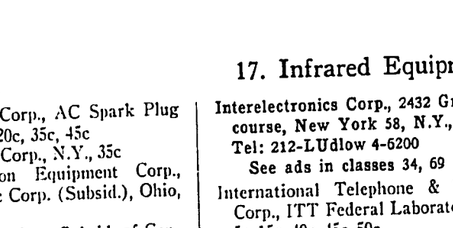
A Superior Detector for Infra-Red Spectroscopy



GOLAY PNEUMATIC DETECTOR*

Among the characteristics that render the Golay Detector superior to other types of detectors for use in infra-red spectroscopy are:

1. An effective sensitive area 1/2" in diameter.
2. Sensitivity of 6 x 10-11 watts RMSENI when used with "chopped beam" method and with recording time constant of 1.6 second.
3. Uniform sensitivity from the ultra-violet through the visible and the entire infra-red, and up to the micro-wave region.
4. Improved, drift-free, A. C. operated amplifier with step gain controls and four response periods.

*Fundamental and experimental aspects of this detector are discussed in the following publications: Rev. Sci. Inst. 18, 347 and 357 ('47); ibid. 20, 816 ('49); Proc. IRE 40, 1161 ('52).

IMAGE INSTRUMENTS, INC.

ELECTROSTORE

for

INSTANT "VIDEO" STORAGE AND RECALL

- Provides instant storage & recall, with high resolution, fast erasure, without film or tape.
- Splices into Video line between camera and monitor without disturbing Video level.
- Two Models. 207 for locations where both external drive and composite blanking signals are available. 206 for installations where only incoming Video signal is available.

Ask for information on your particular image-storage problem.

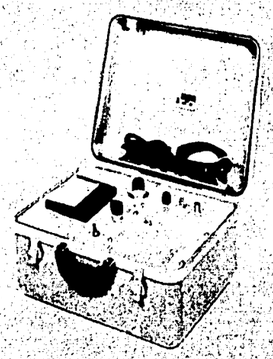
MODEL 15-2
ULTRA-SENSITIVE SCINTILLATION SURVEY METER



10,000 c.p.m. background (.01 mr/hr) up to 10,000,000 c.p.m. 7" diameter plastic scintillator, all transistorized

FRANKLIN SYSTEMS, INC.
POST OFFICE BOX 3250
WEST PALM BEACH, FLA.

For details, circle #152 on Reader Service Card

Safety in the Palm of Your Hand

SPARROW MINIATURE RADIATION ALARM
Low cost, feather weight, shirt pocket size. Operates 2 weeks on penlight batteries. Gives split-second startling audible warning when approaching danger areas.

RADIATION SURVEY METER
Portable alpha-beta-gamma accuracy of 15%. Flashlight battery operated transistor circuits. Built in loudspeaker and earphones.

WIDE RANGE SURVEY METER
For routine or disaster surveys. Illuminated dials. Extra wide range 5 mR to 500 R per hour. Automatic temperature compensation. Flashlight battery operated transistor circuits.

NUCLEAR AIR SAMPLER
Constant rate sampling. Records amount of air and running time. Operator's control board simplifies use. Built-in vacuum gauge, on-off switch, fuses, lights, and filterholder.

FOR YOUR OSCILLOSCOPE AND CATHODE RAY TUBE NEEDS

SYSTEMATS®—The up-to-date custom approach to multi-function monitoring. Any number of modules may be mixed or matched. Built to industrial or military standards and uses PANEL-SCOPES as building blocks.

PANELSCOPES®—Standard and custom designed panel mounted oscilloscopes in modular form of 5 1/16" x 5 1/4". Amplifiers from 2 1/2 mv/inch, up to 10 mc; triggered, repetitive or expanded sweeps; and automatic portrayal available. Rugged and military construction.

PANELPACKS®—Power supplies for PANEL-SCOPES and SYSTEMATS.

RAKSCOPES®—Standard and custom built rack mounted industrial and military type oscilloscopes.

PULSESCOPES®—A series of versatile pulse synchroscopes for Laboratory, Field and Airborne use.

CRAFTSCOPES®—A series of direct reading portable industrial oscilloscopes featuring 5-inch displays, small size (1/2 to 3/4 cu. ft.) and weights as low as 18 lbs.

POCKETSCOPES®—A series of extremely portable time-tested industrial oscilloscopes less than 1/4 cu. ft. and weight as low as 8 lbs. with wide performance specifications.

RAYONIC® CATHODE RAY TUBES—A complete line of 3-inch and 5-inch tubes made to EIA or MIL specs. with rectangular and round cross sections. Tube lengths: from 7 inches. P1, P2, P7, P11 and special phosphors available.

ACCESSORIES—Probes, Carrying Cases, Tube Mounting and Shielding Kits.

PRIMER-SCOPES®—A lightweight economical oscilloscope, ideal for experimenters, school training and industrial monitoring.

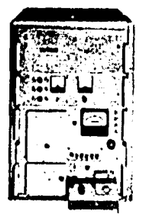
of transistors, diodes, circuits

WORLD'S FASTEST SAMPLING OSCILLOSCOPE

Lumatron Model 112

Bandpass to 2 KMC. Sweep rates to 0.05 ns/cm. Dual channels. Complete test systems available for pulse, transistor switching, and diode recovery measurements.

ACCURATE, DIRECT READING AUTOMATIC TEST SET



Lumatron Model 400

Automatically measures risetime, falltime, storage and delay characteristics from 0.5 ns to 2 usec. Accuracy 5%, or better. Up to 3600 tests per hour.

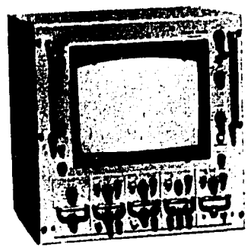
SCHWARZER
Oscilloscope for Industry & Medicine



- For research & monitoring
- Up to 10 phenomena simultaneously
- 15,000 cps frequency response
- Various plug-in preamplifiers
- High accuracy & stability

The SCHWARZER Oscilloscope is a highly qualified measuring tool—simple and economical in use.

SCHWARZER Company

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 81-226.

TRANSISTOR RECEIVING EQUIPMENT

LOW AND VERY LOW FREQUENCIES

- RECEIVERS
  Fixed and variable tuned, T.R.F. and superheterodyne, for both terrestrial and space environments.
- FOR PRECISION TIMING WITH VLF RELIABILITY

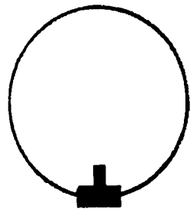
1. CALIVERTER

VLF to HF converter for reception of VLF timing signals on communications receiver. Output 5.000 mcs plus VLF frequency.

2. VLF-18

T.r.f. receiver with speaker and b.f.o. for phase coherent reception of NBA standard time and frequency transmission.

- FOR PRECISION FREQUENCY COMPARISON
  1. VLF servo loop system
  2. LF 100 kc Loran-C system
- Loop Antennas



Shielded, balanced, weather-proof for superior VLF and LF reception.

HIGH FREQUENCIES

- Riometers for studying ionospheric absorption
- WWV pre-amplifiers for remote antenna locations

These units are available from stock and can be easily modified to meet special requirements.

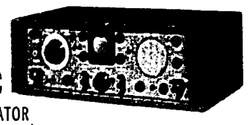
VLF PHASE COMPARATOR

provides 1000% better measurement accuracies than previously possible —

Complete system for making frequency comparisons between local standard oscillators and VLF standard broadcasts. Accuracies better than one part in 10^9 with short measurements. Longer periods give higher accuracies. Measurements may be displayed on strip-chart recorder. Available for frequencies from 15 to 60 KC. 3½"x 19"x 18", 28 lbs. Model **VLA $1490.**

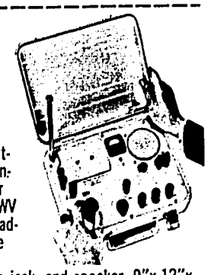


MODEL **WWVC** COMPARATOR

Highly sensitive (1 uv) crystal controlled receiver for utilizing WWV and WWVH transmissions in precision audio and radio frequency work and time interval measurements. 2" oscilloscope, 3" speaker. 5¼"x 19"x 9½" rack mount **$690;** cabinet model **$741.**

MODEL **SR7** WWV RECEIVER

Dual conversion type. S meter, phone jack and speaker. Noise limiter, antenna trimmer, and provision for oscilloscope or headphones. 3½"x 19"x 8½" rack mount or 3½"x 12"x 8½" bench model, **$285.**



MODEL **WWVT** WWV RECEIVER *transistorized*

Completely portable crystal controlled receiver for utilizing WWV and WWVH broadcasts in remote location work. S meter, phone jack, and speaker. 9"x 12"x 5", 9½ lbs. **$690.**

MODEL **WVTR** WWV RECEIVER

Rack mount version of model WWVT. 3½"x 19"x 5½". Battery powered $660; with AC power supply **$725.**

20 important features to consider

- ½% accuracy
- Standard 8½"x 11" graph paper
- Flat bed
- 7½ in/sec. pen speed
- Clip on pens for multicolor trace
- Unconditional one year warranty
- Drift free
- Continuously variable attenuators
- Each axis mechanically & electrically independent
- Critically damped response
- Rugged construction
- 120% zero offset
- Full chart visibility
- Floating inputs to 100 volts dc
- Interchangeable chopper stabilized amplifiers
- Inline simplified control panel
- 10 or 1 mv/in sensivity
- 10 k or potentiometric input
- Unobstructed paper loading
- Completely portable (35#—14" x 15" x 8")

MEC MODEL 1587
VERTICAL/HORIZONTAL
X-Y RECORDER

The MEC Model 1587 Vertical/Horizontal Plotting Board accurately and instantaneously presents four independent variables of analog or converted digital data as two simultaneous and permanent recordings. Both plots utilize the entire back lighted surface and may be shown as continuous curves, a series of points or symbols, or a combination of these.

This plotting capability is entirely unaffected by the attitude of the plotting surface, which may be vertical, horizontal or at any intermediate angular position.

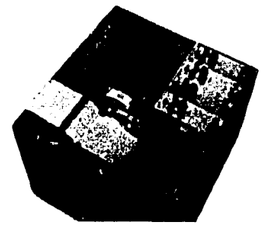
SCHWARZER
High-Frequency
Graphic Recorders



- Five basic sizes available
- 1 to 16 channels, more channels on request
- Plug-in, high-gain DC-AC preamplifiers
- Frequency response: up to 300 cps within 3 db
- Rectilinear, dry & permanent tracings with unique SCHWARZER carbon paper method
- Economical recording principle: cost is less than $2 per thousand feet per channel!

SCHWARZER Company
46 Salmi Road, Framingham, Mass.

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 81-276.

NEW!

Heat-sensitive

RECORDING CHARTS

Quality-Proven in Test after Test!

After lengthy research and extensive testing, GC brings you the best all purpose heat-sensitive oscillograph paper for a wide range of recorders and every industrial application.

GC heat-sensitive charts provide finer trace lines for accuracy in recording, outstanding dimensional stability, and greater resistance to abrasion in handling.

Through volume production, and with over 50 years of experience, the world's largest producer of recording charts can bring substantial savings to you for all your chart requirements.

Our new folder gives you the facts on GC heat-sensitive charts. Clip and mail the coupon for your copy.

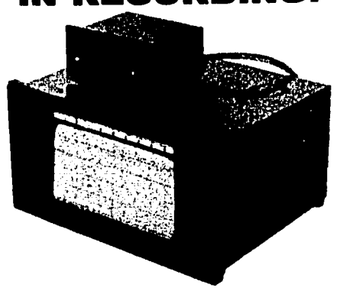
NEW CONCEPT IN RECORDING!



Westronics, Inc. proudly announces the introduction of the totally new UNIVERSAL RECORDER to its present recorder line. This new Universal Recorder can operate as a standard fixed-span recorder, or it can function with one or more EXTERNAL PLUG-IN Modules.

This "Family" of External Plug-In Modules, 24 in all, contain the circuitry necessary to allow this recorder to function as a Strain Gage, Adjustable Span & Zero, Resistance Bulb, Flow, Temperature, Pressure or Potentiometer Following recorder. These Modules, which feature convenient, calibrated controls, may be panel mounted or used as a table-top laboratory instrument. No re-wiring of the recorder is necessary to change from one module to another. Modules are available for almost any recording application you may have.

The Universal Recorder is available in both 5" and 11" strip chart sizes in single pen, dual pen and multipoint models. Consult the Westronics representative nearest you for more information.

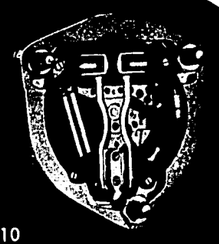
FREQ STDS.

AND PRECISION FORK UNITS 1 TO 40,000 CYCLES

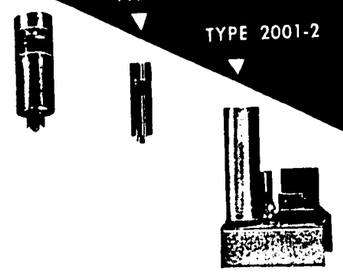


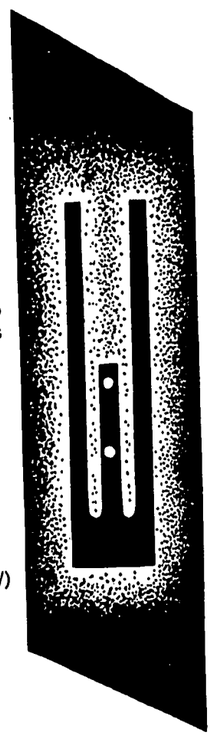
TYPE 10
$1\frac{3}{8}$" x $1\frac{3}{8}$" x $\frac{3}{8}$"

This frequency standard (360 or 400 cycles) is accurate to ± 50 parts per million at 10° to 35°C. Aging has been greatly minimized.

External power of 1.4 volts at 6 microamperes powers the unit.

TYPE 2007-6 ▼ TYPE 25 ▼ TYPE 2001-2 ▼





TYPE 2007-6 FREQUENCY STANDARD

Transistorized, Silicon type
Size, 1½" dia., x 3½" H., Wt., 7 oz.
Frequencies: 360 to 1000 cy.
Accuracies:
2007-6 ± 0.2% (−50° to +85°C)
R2007-6 ± .002% (+15° to +35°C)
W2007-6 ± .005% (−65° to +85°C)
Input: 10 to 30V DC at 6 ma.
Output: Multitap, 75 to 100,000 ohms

TYPE 2001-2 FREQUENCY STANDARD

Size, 3¾" x 4½" x 6" H., Wt., 26 oz.
Frequencies: 200 to 3000 cycles
Accuracy: ±.001% at +20° to +30°C
Output: 5V at 250,000 ohms
Input: Heater voltage, 6.3 - 12 - 28
B voltage, 100 to 300 V, at 5 to 10 ma.
Accessory Modular units are available to divide, multiply, amplify and power this unit.

TYPE K-5A FREQUENCY STANDARD

Size, 3½" x 3" x 1¾"
Weight, 1½ lbs.
Frequency: 400 cycles
Accuracy: .03%, −55° to +71°C
Input: 28V DC ±10%
Output: 400 cy. approx. sq. wave at 115V into 4000 ohm load (approx. 4W)

TYPE 25 PRECISION FORK

Size, ⅜" dia. x 2⅜"
Weight: 2 ounces
Frequencies: 200 to 1000 cy.
Accuracies:
R-25T and R-25V ± .002% (15° to 35°C)
25T and 25V ± .02% (−65° to 85°C)
For use with tubes or transistors.

INQUIRIES INVITED

For over 20 years we have made frequency standards and precision fork units for applications where consistent accuracy and rugged dependability are vital. Shown are just a few typical examples.

Some users integrate our products with instruments of their own manufacture. In other cases we develop complete assemblies to meet special needs.

You are invited to submit any problems within the area of our activity for study by our engineering staff.

PICKARD & BURNS, Inc.
Subsidiary of Gorham Corp.

Time:
- Complete time systems vlf
- VLF Time Signal Receivers
- VLF Clock Setting Units
- Loran-C Time Signal Receivers
- Loran-C Clock Setting Units

Frequency:
- RALOC Radio Locked Frequency Standards
- RALOC Precision Frequency Comparators
- VLF Phase Comparator Systems

New militarized, transistorized, modular units for a wide variety of frequency control applications.

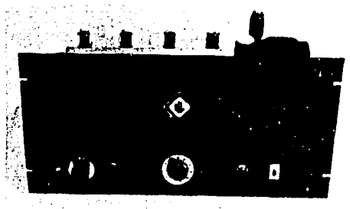
FREQUENCY STANDARDS — 50 DIFFERENT MODELS
ANY FREQUENCY • ANY POWER OUTPUT • ANY SIZE
Frequency Stability up to 5 parts in 10^{10}. Most models are kept in stock.



The picture shows the front panel of Model 67.

Specifications: Stability 1 part in 10^7. Input voltage 95 to 135 volts. 60 cps (Sola Power Transf.). Output voltage 50 volts across 10,000 ohms.

Model 71 is similar but has a 10-watt, 115 volts power output.

Specifications: Stability 1 part in 10^8. Input voltages 95 to 135 volts, 60 cps (Sola Power Transf.). Output 115 volts, 10 watts.

Model 304 Transistorized Frequency-Time Standard is provided with a time-of-day clock with hour hand, minute hand, and seconds hand. The required input is 24 volts d-c, 2 amps Output 115 volts, 25 watts

50 other models of FREQUENCY STANDARDS

1. SUBASSEMBLIES
Models 52, 54, 56, 124, 126 and many others not listed here.

2. GENERAL PURPOSE UNITS:
Models 61, 63, 65, 67, 128

3. MOTOR AMPLIFIERS:
Models 71, 101-6L8, 103, 104, 119, 140, 141, 200-IN, 201-IN.

4. FREQUENCY MEASUREMENT UNITS:
Models 105, 110, 111, 129, 138

5. TIME KEEPING UNITS:
Models 25L6B, 35L6B, 103, 104, 110, 111

6. FREQUENCY DIVIDERS:
107, 115, 117, 130

7. TRANSISTOR STANDARDS:
Models 73, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310

8. CRYSTAL CLOCKS FOR SIDERAL TIME

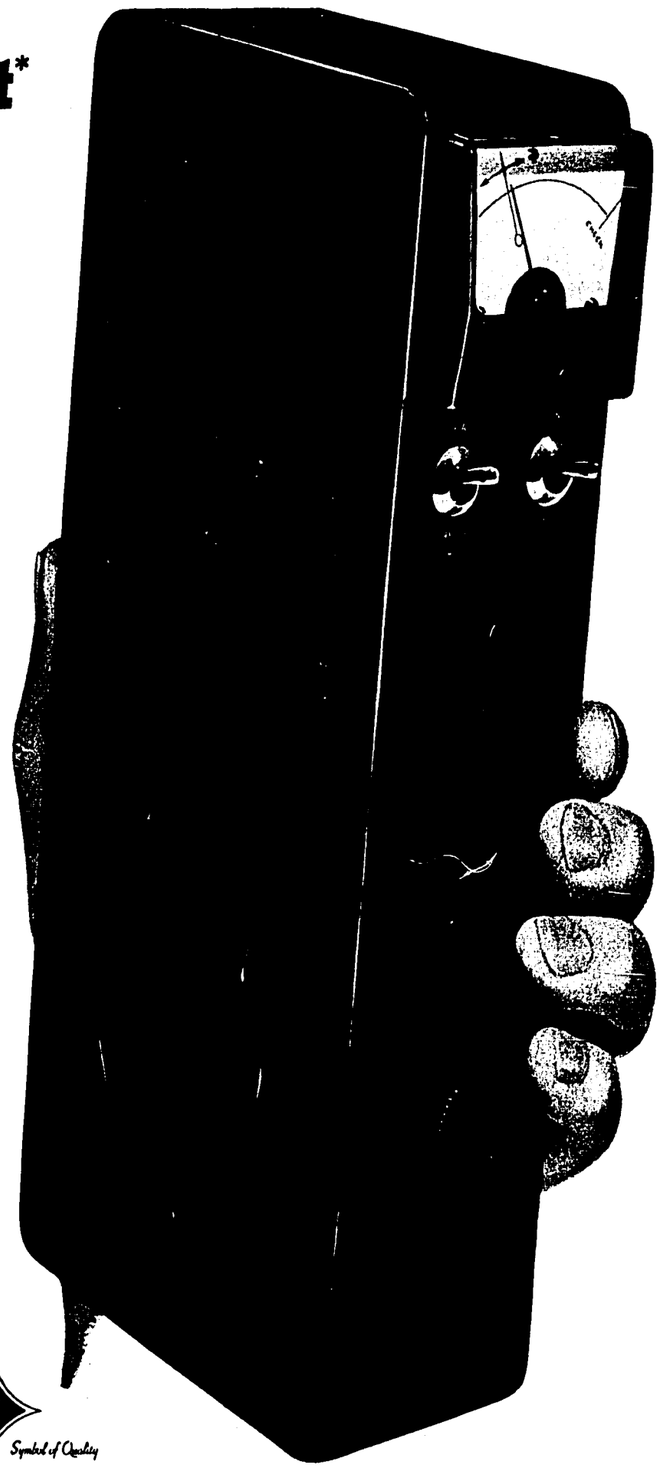
A new slant on making high accuracy DC measurements conveniently and economically!

The model PC

PocketPot*

(PHOTO ACTUAL SIZE)



SENSITIVE RESEARCH'S NEW MINIATURE DC POTENTIOMETER!

The Model PC "PocketPot," is a stable, completely self contained, high accuracy DC potentiometer, with internal galvanometer, reference standard source, and direct "in line" readout. It is ideally suited for use as an infinite impedance calibrator or measuring instrument. Additional voltage and current ranges can be obtained by using it in combination with the Model PC-S, a switch controlled, .05% accurate "plug in" unit of the same size. Both models, when used together, may be easily held and operated in the palm of the hand!*

PocketPot*

SPECIFICATIONS

ACCURACY: ± .05% of reading or ± .5 mv., whichever is greater.

RANGES: 0—5,100 v. When used with PC-S 0—500 v. and 0—1 amp.

SENSITIVITY: Infinite resistance at null. When used with PC-S, 2,000 Ω/v.

RESOLUTION: Continuous, 1 mv. divisions on slide wire.

BATTERY OPERATED: Does not require an external power source.

READOUT: Direct "in line."

SIZE: 9" x 4¼" x 1¾". **WT:** 3 lbs.

PRICE: Model PC, $325.00; Model PC-S $125.00. F.O.B., New Rochelle, N. Y.

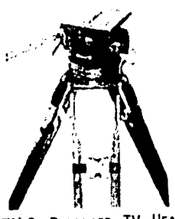
CECO offers you a variety of dependable equipment for

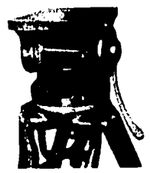
IMAGE ORTHICON VIDICON MICRO RELAY

IMAGE ORTHICON



TH-2 BALANCED TV HEAD MODEL C with adjustable center of gravity for Image Orth Cameras weighing up to 135 lbs. **$425.00**

MICRO RELAY



TH-3 MICRO RELAY TILT HEAD for mounting Parabola Beam Reflectors. **$285.00**

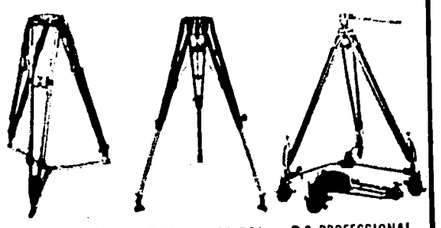
VIDICON

X-140 REMOTE CONTROL PAN & TILT HEAD with "Dialastop" for remotely panning and tilting Vidicon Cameras weighing up to 20 lbs. **$400.00**

X-141 CONTROL BOX for REMOTE HEAD **$40.00**

TR-6 PRO JR. SPRING BALANCED PAN & TILT HEAD for Vidicon Cameras weighing up to 35 lbs. (With Tripod) **$200.00**

TRIPODS



TR-19 PROFESSIONAL TYPE TRIPOD with wooden tripod legs for BALANCED TV Head and LARGE VIDICON HEAD. **$150.00**

TR-3 METAL TRIPOD for mounting MICRO RELAY TILT HEAD, LARGE VIDICON and BALANCED TV HEAD. **$200.00**

D-3 PROFESSIONAL SENIOR DOLLY for PRO JR., METAL and Professional Type Tripods. **$150.00**

TH-3-V LARGE VIDICON SPRING BALANCED PAN & TILT HEAD for Vidicon Cameras weighing up to 100 lbs. **$310.00**

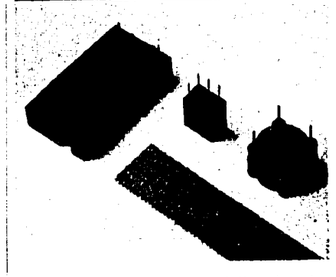
SHIFT REGISTERS



Forbes and Wagner specialize in the design and packaging of single and multiple bit magnetic memory type shift registers, gates and related devices. Several standard cases are available.

As a large scale producer of these units for computer manufacturers, Forbes and Wagner has developed skilled personnel in this field and is well equipped with specialized test facilities.

We will be glad to assist you with your problems in this area.

TELEMETRY
system

Applied Electronics Corporation of N J are producers of the most reliable solid state telemetry systems available today

Supplied for use on Titan, Minute Man, Sub Roc and other major missile programs with an outstanding record of operational performance. In addition to the company's standard line of PAM, PDM and PCM systems, a new family of satellite telemeters is being produced and supplied for

QUALIFIED.....

use on several satellite projects. These equipments are characterized by low power dissipation, small size and high accuracy. Technical Specifications are available to produce the most efficient and reliable completely solid state telemetry systems. Several of these are already in production

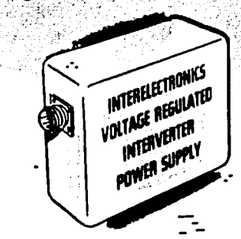
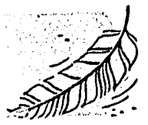
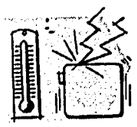
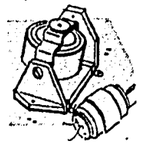
PROVEN RELIABILITY—
SOLID-STATE POWER INVERTERS
over 260,000 logged hours— voltage-regulated, frequency-controlled, for missile, telemeter, ground-support, 135°C all-silicon units available now—









Interelectronics all-silicon thyratron-like gating elements and cubic-grain toroidal magnetic components convert DC to any desired number of AC or DC outputs from 1 to 10,000 watts.

Ultra-reliable in operation (over 260,000 logged hours), no moving parts, unharmed by shorting output or reversing input polarity. Wide input range (18 to 32 volts DC), high conversion efficiency (to 92%, including voltage regulation by Interelectronics patented reflex high-efficiency magnetic amplifier circuitry).

Light weight (to 6 watts/oz.), compact (to 8 watts/cu. in.), low ripple (to 0.01 mv. p-p), excellent voltage regulation (to 0.1%), precise frequency control (to 0.2% with Interelectronics extreme environment magnetostrictive standards or to 0.0001% with fork or piezoelectric standards).

Complies with MIL specs. for shock (100G 11 mlsc.), acceleration (100G 15 min.), vibration (100G 5 to 5,000 cps.), temperature (to 150 degrees C), RF noise (I-26600).

AC single and polyphase units supply sine waveform output (to 2% harmonics), will deliver up to ten times rated line current into a short circuit or actuate MIL type magnetic circuit breakers or fuses, will start gyros and motors with starting current surges up to ten times normal operating line current.

Now in use in major missiles, powering telemeter transmitters, radar beacons, electronic equipment. Single and polyphase units now power airborne and marine missile gyros, synchros, servos, magnetic amplifiers.

Interelectronics—first and most experienced in the solid-state power supply field produces its own all-silicon solid-state gating elements, all high flux density magnetic components, high temperature ultra-reliable film capacitors and components, has complete facilities and know how —has designed and delivered more working KVA than any other firm!

For complete engineering data, write Interelectronics today, or call LUdlow 4-6200 in New York.

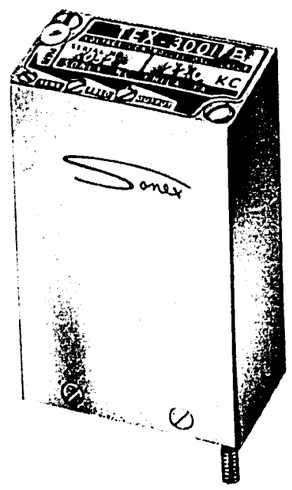
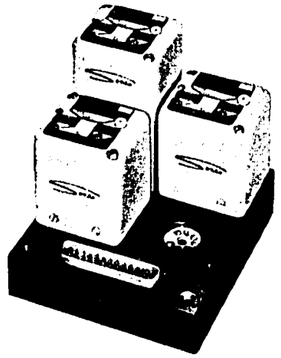
meeting the need
for utmost reliability in
FERRITE COMPONENTS
memory cores, planes & stacks ■ recording heads ■ pot cores ■ E, U & I cores ■ toroidal cores ■ light, temperature & voltage dependent resistive elements ■ "custom-tailored" ferrite parts.
WRITE FOR COMPLETE DETAILS INDICATING THE PRODUCT CATEGORY YOU ARE INTERESTED IN.
FOREMOST IN THE FIELD OF FERRITE
FERROXCUBE
CORPORATION OF AMERICA ■ SAUGERTIES, N. Y.
For details, circle #178 on Reader Service Card

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 81-226.



Superior quality **Sub-Carrier Oscillators** with both High (0-5 volts) and Low Level (0-20 millivolts) units available. Supplied to numerous Companies and Agencies concerned with Space and Defense operations. These Oscillators have excellent temperature characteristics being stable when plunged through a 100°C temperature range.



Complete **Sub-Carrier Oscillator Systems** can be supplied utilizing our universal Mount which has the property of omniplugability; that is, Oscillators (High and Low Level) and Mixer Amplifier can be mixed randomly at the user's discretion. The Mount Harness is a Printed Circuit, thus affording high reliability and ease of fabrication.

IS TELEMETERED DATA RECORDING & DISPLAY YOUR PROBLEM?

- Utilizing telemetered data, we have recently completed a device which exposes and processes 180 weather maps per hour on 12 in. wide photosensitive paper. We are currently building a recorder-processor and display system for satellite-telemetered pictorial data.
- PHOTOMECHANISMS can put the sensitivity and versatility of photography to work to solve your data capturing and displaying problems.
- The addition of RAPIDATA*, our fast and reliable photoprocessing technique, can reduce the delay between recording and utilization of data to mere seconds.
- If your interest is general, a postcard request will bring you our brochure. However, if you have a specific problem, your call or letter will receive our most thoughtful reply.

** Trademark for our rapid access photoprocessing technique.*

PHOTOMECHANISMS, Inc., 15 Stepar Place, Huntington Station, L. I., N. Y.

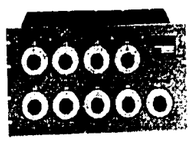
Audio Frequency Test Instrumentation

Model 349 Noise Generator and Octave Band Equalizer.



A controlled, calibrated audio noise source, as well as an octave band analyzer. 20-19,200 cycles. Unique continuously-variable passive filters of every type. Noise Generators, Octave-Band Equalizers, Band-Elimination Filter sets. Extremely high rejection, smooth flat-topped characteristics.

Wide Range
PULSE and SQUARE WAVE GENERATOR
PSG-1

Broad Range of Frequencies and Pulse Widths

- Frequency—1 cycle to 1 mc
- Pulse Width—.1 μsec. to .3 seconds
- Rise and Fall Time—.02 μsec. for 10 v, 100 ohm output
- Rise and Fall Time—.1 μsec. for 50 v, 500 ohm output

Price $690.00

DOUBLE PULSE ADAPTER • PSG-1/DG Price $135.00
Pulse and Square Wave Generator—Rack Mounted PSG-1/RM Price $740.00
Double Pulse Adapter—Rack Mounted PSG-1/DG/RM Price $145.00

Variable Width
PULSE GENERATOR
PG-10

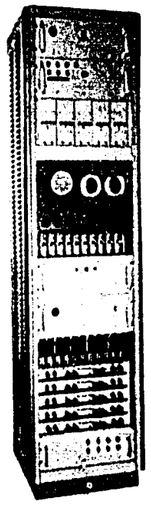
The Pulse Generator, PG-10, generates variable width pulses in the frequency range 1 megacycle per second to 20 megacycles per second. It is especially useful where high repetition rates and narrow pulses are required. Price $1250.00

- Frequency range: 1-20 mcps (3 overlapping ranges)
- Rise and fall time less than .006 μsec.
- Minimum pulse width approximately .02 μsec.
- Can be externally synchronized.

Very Low Frequency
SPECTRUM ANALYZER
SA-11

This analyzer system is designed for use wherever real time, accurate, high-resolution analysis of the very low frequencies is required. Some typical fields of application are:

- Seismology
- Underwater acoustics
- Heartbeat analysis
- Speech analysis
- Shock and vibration analysis



Frequency range—
0 to 5000 cps

Analysis time—
1 second for maximum selectivity

Resolution:
500 lines on all scales

Transistorized models SA-12 and SA-14 will provide frequency ranges up to 250,000 cps and, with GASL auxiliary equipment, offer power density and normal density capability

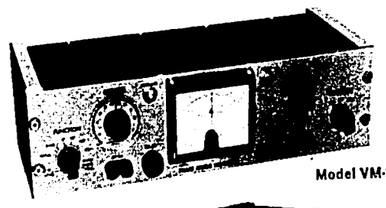
PHASE ANGLE & RATIO INSTRUMENTS

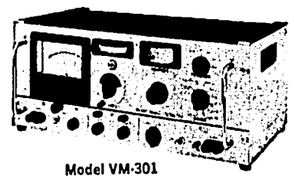
PHASE ANGLE VOLTMETERS

Provide direct reading of total, fundamental, in-phase and quadrature voltages; phase sensitive nulling of in-phase or quadrature components; direct reading of phase angle without ambiguity. Single-, three-frequency and broadband types, in bench, rack-mount and miniaturized models.



Model VM-202

Model VM-230



Model VM-301

Model VM-202 Single Frequency Voltmeter. 1 mv to 300 v in 12 ranges; accuracy ±2% of f.s. Phase accuracy: dial 1°, meter ±3% of f.s. degrees. Signal: 1 freq., 30 cps to 10 kc. Input impedance: 10 meg. Reference: 100k ohms, 0.25 v min. Nulling sensitivity: 2 uv, phase sensitive. Harmonic rejection (with filters): 55 db. Scale: 3-0-3, 10-0-10, linear. Phase dial: 4 scales, 90° (elec.) apart. Dimensions: 5¼" h. x 19" w. x 7⅛" d.

Model VM-204 Three Frequency Voltmeter. Similar to VM-202 but accommodates signals at any three specified frequencies. Choice of frequencies from 60 to 4500 cps in standard models, to 10 kc on special order. Dimensions as VM-202, but 2" deeper case.

Model VM-230 Transistorized Voltmeter. Miniaturized, ruggedized version of VM-202 for modular inclusion in ground support and other systems requiring small size, dependable performance in severe environments. Range down to 300 microvolts f.s. on order. Input impedance 1 meg. Voltmeter response 20 cps. to 20 kc.

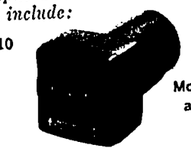
Model VM-301 Broadband Voltmeter. For applications where signals from 10 cps to 100 kc must be instrumented with highest accuracy. Phase shift accuracy 0.2° absolute, uniform over full 360°. Phase shift can be read while sweeping frequency in half-decade steps. Nulls unaffected by changes in signal level; harmonic effects eliminated by plug-in filters.

Complete data on any of these models will be forwarded on request

Model RB-503 (10 ppm) and RB-504 (1 ppm)

RATIO BOXES

Precision inductive AC voltage dividers to meet all range, accuracy and cost requirements. Rack, panel and portable bench models, deviation, binary ratio standards and automatic stepping types. Maintain accuracy over specified frequency range; feature in-line readout, high input and low series impedance. Range of characteristics available in this series include:



Model RB-520 and RB-521 (10 ppm)

Ratio Range	—.111110 to +1.111110
Frequency	30 cps to 10 kc
Accuracy	10 ppm to 1.0 ppm
Input Voltage	0.35f to 2.5f
Input Impedance	60 k to 1 megohm
Effective Series Impedance	7.5 ohms to 0.5 ohms

PHASE SENSITIVE AC-to-DC CONVERTERS

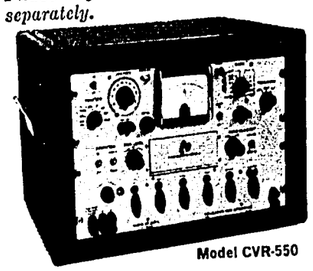
Compact, modular units meet requirements of ground checkout, production and other test systems for phase sensitive conversion of AC signals to proportional DC voltages. High linearity, sensitivity and fast response. Manual selection or remote relay programming of total, fundamental, in-phase and quadrature voltage functions. Half-panel rack mount models also available.

Model PSC-410

	PSC-410	PSC-420
Signal	single freq.	multiple freq.
Range	10 mv to 300 v	10 mv to 300 v
Frequency: Total	60 cps to 5 kc	30 cps to 10 kc
Phase Sens.	400 and 800 cps (60 cps to 2 kc special)	60 cps to 10 kc (3 per unit, max.)
Accuracy: Total	0.1% to 1/10 f.s.	0.1% to 1/10 f.s.
Phase Sens.	0.1% f.s.	0.1% f.s. to 5 kc 0.25% f.s. to 10 kc
Response	0.1 sec at 400 cps	0.1 sec at 400 cps
Output (10 k load)	0-10 v dc	0-10 v dc
Programming	range, function	range, function, freq.

COMPLEX VOLTAGE RATIOMETER

Single unit, integrated system includes all instrumentation, circuitry and accessories for measurement of phase angle, transformation ratio and related quantities. Direct reading of phase angles up to 0.5 radians, and transformation ratios to 0.001% unaffected by quadrature. Standard model accommodates any three specified frequencies from 60 cps to 3 kc, and includes both signal and reference channel filters. Phase angle voltmeter may be used separately.



Model CVR-550

Ratio Range	±1.111110
Ratio Accuracy (max)	± (0.001+ 0.0001/ratio) %
Outputs	Ratio on six-digit ratio box. Angle in both degrees and milliradians

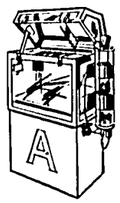
digital data reduction

SERVICE: Thirty thousand square foot main plant, plus New England and Florida laboratories, operating around the clock for your convenience.

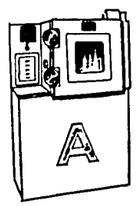
test chambers

All types, including:

Econ-O-Line Low-High Temperature Chambers, Liquified CO_2



Salt Spray Chambers, All Lucite Construction



Low-High Temperature Liquified CO_2 Chambers, Or Cascade Refrigeration

BETHLEHEM TESTING CHAMBERS

to further RELIABILITY of military and industrial products

We offer Testing Equipment created by an unmatched combination of comprehensive engineering capability and prime manufacturing facilities. Standard sizes or custom engineered to your testing requirements. Meet all military specifications.

ValuLine • ThermaLine

SPACE SIMULATION CHAMBERS
HIGH AND LOW TEMPERATURE CHAMBERS
HUMIDITY CHAMBERS
ALTITUDE AND HIGH VACUUM CHAMBERS
EXPLOSION CHAMBERS
SAND AND DUST CHAMBERS
SALT FOG
RAIN AND SUNSHINE
HIGH PRESSURE TEST EQUIPMENT
HIGH TEMPERATURE THERMAL SYSTEMS
LOW TEMPERATURE THERMAL SYSTEMS
HIGH IMPACT SHOCK TESTING MACHINES for light and medium weight equipment

WE FABRICATE PORTABLE SELF-CONTAINED CHAMBERS AND COMPLETE WALK-IN AND DRIVE-IN FACILITIES

Years of study and experience in pioneering advanced test facilities are at your disposal. Kindly address your inquiry to Mr. Bernard Friedman, Manager . . .

Environmental TEST CHAMBERS

Standard test chambers are expertly designed for accurate, reliable testing. Superior design and quality construction assure years of dependable service with a minimum of maintenance. Whatever the simulated condition desired, there is a Standard Cabinet designed specifically to do the job, guaranteed to give excellent performance.

Standard Cabinet Company, a recognized pioneer in the field, has an uninterrupted history of over 18 years under the same ownership and management. It has acquired a wealth of experience and skill in the design and construction of chambers of every description.

VIBRATION TEST EQUIPMENT

Complete systems from 175 to 5000 pounds force, featuring economical expandability, automatic control, minimum distortion or lateral motion, low gauss level at table, environmental models and limited random testing with minimum accessories.

DIAL-A-GAIN INSTRUMENTS

1. Low noise cathode follower of unique design
2. Up to 100 feet of shielded input signal cable
3. Precision calibrated adjustment of gain
4. Direct dialing of accelerometer sensitivity
5. Standardized data through normalized output
6. Usable with recording instruments
7. Direct indicating meter models
8. Simultaneous displacement, velocity and acceleration outputs

UNHOLTZ-DICKIE CORPORATION, 2994 Whitney Ave., Hamden 18, Conn.

POLARAD

MICROWAVE SPECTRUM ANALYZERS

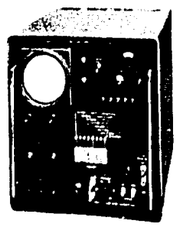
10 to 100,000 mc

FEATURING:

- 1 to 30 cps adjustable sweep rate
- Direct-reading UNIDIAL* tuning control, with no klystron modes to set
- High accuracy, resolution and sensitivity
- Frequency dial accuracy ±1%
- Non-contacting klystron cavity chokes for noiseless tuning
- Five-inch flat-face CRT
- Provision for use with Multi-pulse Spectrum Decoder (Model SD-1)

TRANSISTORIZED MULTI-BAND, SINGLE UNIT SPECTRUM ANALYZER

Complete Frequency Coverage, From 10 to 40,880 mc



Model SA-84T

Completely transistorized lightweight unit.

Dispersion: 500 kc to 25 mc, adjustable

Resolution: 20 kc at all frequencies

Internal Marker: ± 13 mc

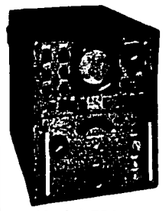
Power Input: 115/230 VAC, 50/60 cps or 12 VDC

Power consumption: when battery operated, 110 watts

Sensitivity: —50 to —105 dbm, depending on frequency.

Weight: 70 lbs. One half the weight of conventional vacuum-tube equivalent

Meets MIL-I-26600 for r-f interference



Model TSA

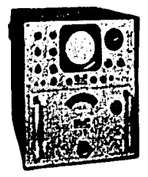
DIRECT READING SPECTRUM ANALYZER

10 to 44,000 mc in 5 Plug-In Tuning Units

To test missiles, radar, microwave components, telemetering and multi-pulse transmission

Features:

- Dispersion: 400 kc to 25 mc
- Resolution: 2 to 80 kc variable
- Attenuation: Continually variable
- Sensitivity: —50 to —95 dbm, depending on frequency
- Internal Marker: ± 14 mc



Model TSA-S

COMBINATION SYNCHROSCOPE-SPECTRUM ANALYZER

10 to 44,000 mc in 5 Plug-In Tuning Units

PROVIDES TIME AND FREQUENCY DISPLAYS

Time Display: Shows signal waveform

Frequency Display: Shows power vs. frequency

Bandwidth: 5 kc, 50 kc, 500 kc, 5 mc. Synchroscope sweep rate: 2, 10, 100, 1,000, 10,000 and 100,000 μsec per screen diameter. Dispersion, Sensitivity and Internal Marker same as TSA.

Model TSA-W

WIDE DISPERSION SPECTRUM ANALYZER

FOR NARROW AND WIDE PULSE ANALYSIS

10 to 44,000 mc in 5 Plug-In Tuning Units

Dispersion: 200 kc to 80 mc (2 ranges)

Resolution: 2 to 80 kc variable

Internal Marker: ±40 mc

Screen Display: Linear or log

80 mc dispersion displays pulses narrow as 0.1 μ sec. For wide pulses, dispersion may be adjusted down to 200 kc.

UNIVERSAL SPECTRUM ANALYZERS

Complete frequency coverage 10-40,880 mc in single self-contained units—no additional tuning units required. Expanded, direct-reading, slide rule dial

Model SA-84

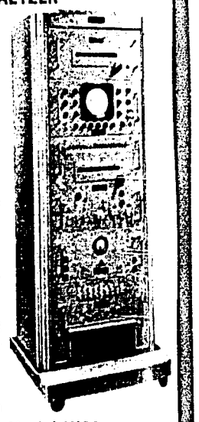
- **Dispersion:** 10 to 55 mc: 500 kc to 5 mc, adjustable 55 to 40,880 mc: 500 kc to 25 mc, adjustable
- **Resolution:** 20 kc :
- Internal Marker variable

Model SA-84W
Wide Dispersion

- **Dispersion:** 10 mc to 240 mc: 10 mc 240 mc to 40,800 mc: 80 mc
- **Resolution:** 2 kc to 80 kc variable
- **Crystal controlled markers from 10 to 40,880 mc**
- **Log-linear display**
- **Accurately calibrated IF attenuator**

WIDE BAND SPECTRUM ANALYZER

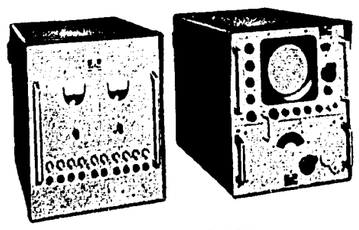
Self-Contained Unit Covers 10 to 40,000 mc in 20 Bands



Model WSA

- **Dispersion:** 1 mc to 25 mc in narrow band 50 mc to 4000 mc in wide band
- **Resolution:** 20 kc in narrow band 1.5 mc in wide band
- Rapid band selection by means of illuminated push-button switches.
- Frequency marker up to 4000 mc.
- End-markers indicate frequency limits of each band.
- Center-marker permits switching from wide to narrow bands without hunting for r-f signal.
- **Sensitivity:** —50 to —80 dbm, depending on frequency.

100 GC SPECTRUM ANALYZER



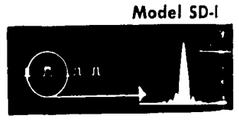
Model DA-70

Covers 50,000 mc to 100,000 mc in Three Bands

- **Dispersion:** Continuously adjustable from 50 mc to 1000 mc. Permits narrow pulse inspection.
- **Resolution:** 1 mc
- High intermediate frequency assures image rejection and prevents video detection.
- **Frequency marker:** for measuring frequency differences.
- **Dial frequency Accuracy:** ±1.0%
- **Nominal Sensitivity:** —50 dbm for entire frequency range.

MULTI-PULSE SPECTRUM SELECTOR

Model SD-I



Permits spectrum analysis of individual microwave pulses in a pulse group when used with any Polarad Spectrum Analyzer. Any pulse in a complex coded signal may be isolated for examination.

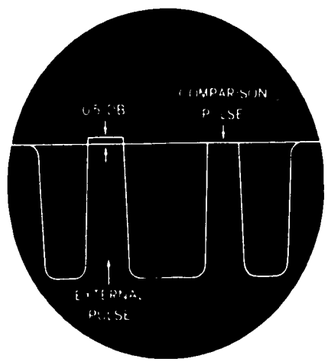
FREE LIFETIME SERVICE

DETERMINE

PEAK PULSE POWER WITHIN 0.5 DB



WITH MULTI-BAND FLEXIBILITY

The Series 5000 Pulse Power Calibrator is the only instrument that will give a final, direct reading of peak rf pulse power to this degree of accuracy . . . quickly, regardless of waveshape, and without introducing unknown errors. In addition, it provides multiple-band coverage, through the use of interchangeable rf heads.

RF Unit Model 5205, now available, covers the range from 8500 to 9600 mc. Other rf heads, in development, will cover further important bands. The display, essentially a notch wattmeter, permits comparative power discrimination within less than 0.1 db. Direct input power level range is approximately −5 to + 63 dbm.

WRITE TODAY for more information on this and other new GCC developments in microwave components, wavemeters, attenuators, oscillators and test equipment.

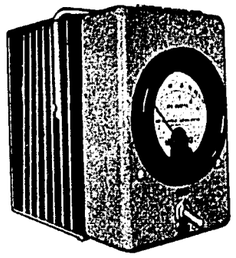
Average Reading R.F. POWER METERS

1. Calibrate these Power Meters in your plant or laboratory against low frequency power standards at power line frequencies. No need to ship to manufacturer for repair and recalibration.
2. No correction curves necessary.
3. Simple operation.



200 KC TO 500 MC GREATLY IMPROVED

- **Portable, Continuous Duty.**
- **Can be recalibrated anywhere with DC or Alternating Current Power against a low frequency standard.**

These broad band R.F. Power Meters are of the absorption-type consisting of an oil filled, air cooled, coaxial load resistor and a voltmeter calibrated to read watts. The power meter is suitable for use as a field or laboratory test instrument, is completely shielded and non-radiating, permitting transmitter testing and adjustment without interference. The meter box is easily detached, permitting location of the load resistor at a remote point. In cases where power measurements are not required the load resistor may be used as a dummy load. No correction curve is necessary to cover the frequency range. The spurious response usually associated with directional couplers and capacitative voltage dividers is absent in this purely resistive voltage divider. Since this is a resistive voltage divider which has the same voltage division at DC, 60 cycle AC, and at high radio frequencies, this instrument can be calibrated and its calibration can be checked frequently on 60 cycle supply voltages.

Model	Power Ranges In Watts	Dielectric	Max. Power Dissipation	Price
PM-3	60, 150	Oil	150 watts	$220.00
PM-4	.15, .6	Air	1 watt	95.00
PM-5	.6, 1.5	Air	1.5 watts	95.00
PM-6	1.5, 6	Air	10 watts	95.00

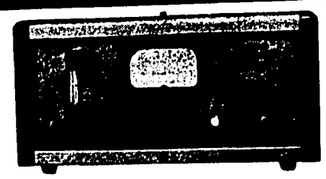
DIRECT READING

Calorimetric Power Meter

3% ACCURACY



ACCURACY: 3% (less load error)

These power meters are greatly simplified Calorimeters, which use an accurate metering pump of the gear type driven by an overpowered synchronous motor to keep the fluid flow constant. The instrument is fully self-contained, portable, self-cooled and requires only connection to the power line. It does not use any flow meters, thermometers or any other controls. There is only the "ON" & "OFF" switch for the operator to use on the front panel, when a measurement is to be made. A sensitive thermopile and microammeter measures the power dissipated in the R.F. load. The microammeter is calibrated in watts and is direct reading. These Calorimeters are available with either a coaxial or a waveguide load.

COAXIAL CALORIMETERS

Type	Full Scale Power	Freq. Range KMC	Price
CPM-10	10	DC-10	$950.00
CPM-50	50	DC-10	950.00
CPM-100	100	DC-10	950.00
CPM-500	500	DC-10	950.00
CPM-5000	5000	DC-1	1400.00
CPM-10000	10000	DC-1	2000.00
CPM-20000	20000	DC-1	3250.00

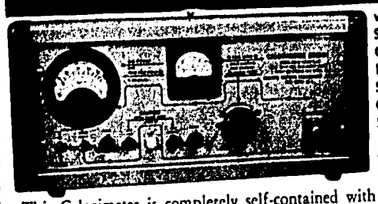
WAVEGUIDE CALORIMETERS

Type	Full Scale Power	Price
CPW-10	10	$850.00
CPW-50	50	800.00
CPW-100	100	800.00
CPW-500	500	800.00
CPW-5000	5000	1200.00
CPW-10000	10000	1750.00
CPW-20000	20000	2950.00

DIRECT READING

Calorimeter Bridge

2% ACCURACY



with Self-Contained Calorimeter Loads, Cooling System & Circulating System.

ACCURACY: 2% (less load error)

This Calorimeter is completely self-contained with its own circulating system, cooling system and the radio frequency dummy load and requires only connection to the regular power line. The R.F. power is read directly on a 4½" meter in watts. A single coaxial dummy load is available to cover the frequency range from DC to 10,000 Mc and for the power range from 1 to 1000 watts. The overall accuracy of this Calorimeter is 3%. However, this accuracy can be improved greatly by calibrating the Calorimeter by means of an external laboratory-type wattmeter.

Model	Range	Frequency	Price
CB-11	1 watt	DC-4 KMC	$900.00
CB-12	5 watts	"	900.00

Short Form Catalog of
MICROWAVE TEST EQUIPMENT
DELIVERY FROM STOCK

FXR offers the finest and most complete line of MICROWAVE TEST EQUIPMENT in the world! Craftsmanship and engineering know-how, housed in over 250,000 sq. ft. of modern facilities, are the keys to this quality FXR line.

Contact your nearest FXR representative for full information in these additional fields:

- Microwave System Components
- Microwave Transmitters
- High Power Electronics
- Electronic Instrumentation

(831) TEMPERATURE COMPENSATED POWER METER

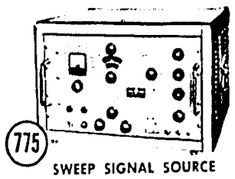
- Power Range, full scale −20DBM or 0.010 MW. to + 50BM or 3.00 MW.
- Type 218 Heads required

Model B831A • $335
Model B832F (Transistorized) • $450

(815) UNIVERSAL KLYSTRON POWER SUPPLY

- Beam: 200-3600V
  Grid: 0 to +150V; 0 to −300V
  Reflector: 0-1000V

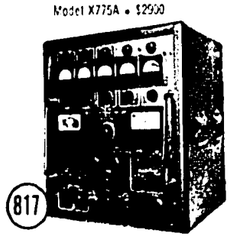
Model Z815B • $1350



(775) SWEEP SIGNAL SOURCE

- Freq. Range: 8200 12400 MC.
- Provisions for AGC

Model X775A • $2990



(817) UNIVERSAL MICROWAVE POWER SUPPLY

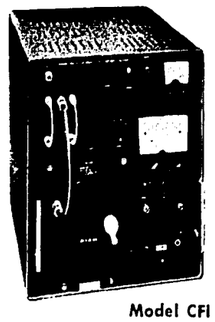
- Helix: 0-3500V • Filament: 0-15V D.C.
- Separate Grid Voltages #1, #2, #3, #4 plus Collector and Anode Voltages

Model Z817A • $2650

POLARAD

MICROWAVE RECEIVERS
400 to 84,200 mc

TRANSISTORIZED CALIBRATED FIELD INTENSITY RECEIVER



Model CFI

1,000 to 10,000 mc

Four Interchangeable Plug-In Tuning Units Cover All Frequencies.

Transistorized, low power drain, ruggedized field intensity receiver provides accurate measurements of frequency and absolute power level of conducted or radiated microwave energy. Combines a Field Intensity Calibrator, a Monitor and Power Unit and a Calibrated Antenna System. The Model CFI covers 950 to 11,260 mc when used as a microwave receiver.

FEATURES:

- Built-in power inverter for use with 12 volt DC source.
- Direct-reading frequency dial.
- Output level: read directly in db.
- Audio, video and recorder outputs.
- AM, FM, CW and PULSE reception.
- One third lighter than equivalent vacuum-tube Field Intensity Receiver.
- Calibrated antenna system includes an omni-directional band antenna and separate directional antennas to match each tuning unit.

Sensitivity: —90 dbm.

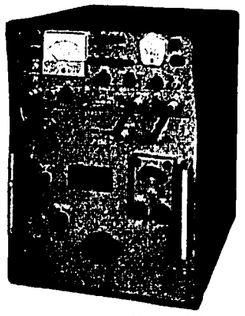
Frequency Dial Accuracy: ±1%

Maximum RF input: 3 volts

Impulse Bandwidth: 1 mc, 5 mc and 8 mc

Image and Spurious Response Rejection: Better than 60 db

CALIBRATED MICROWAVE FIELD INTENSITY RECEIVER



Model FIM

1,000 to 10,000 mc

Two compatible tuning units under development will extend frequency to 20,000 mc.

Indicates Absolute Power Level By Comparing Input Signal Against Internally Generated Signal In A Single Unit.

Four Interchangeable Plug-In Tuning Units Cover All Frequencies.

- Only Microwave Field Intensity Receiver with self-contained signal generator which calibrates entire system under test at any level.
- First single microwave test system to determine radiated r-f interference and susceptibility.
- Front-panel meter indicates average, peak, slide-back peak or quasi-peak value of r-f signals. Outputs for video, audio and recorder.
- Direct-indicating peak VTVM for ease of frequency location of impulse noise.
- Single UNIDIAL® tuning control tunes both the receiver and signal generator.
- Calibrated antenna system includes an omni-directional broad band antenna and separate directional antennas to match each tuning unit.

Frequency Dial Accuracy: ±1%

Maximum RF Input: 3 volts

Sensitivity: —80 dbm

Impulse Bandwidth: 5 mc

Image and Spurious Response Rejection: Better than 60 db

Attenuation: 0 to 80 db in steps of 1 db

TRANSISTORIZED MICROWAVE RECEIVER

Fully Transistorized Circuitry Ehsures Low Power Drain and Rugged Construction. One-third lighter than equivalent vacuum-tube receiver.

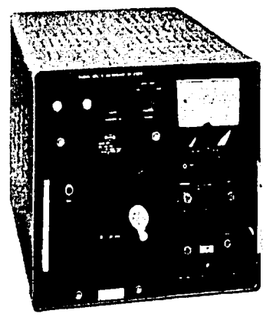
950 mc to 11,260 mc

Four Plug-In r-f Tuning Units Cover All Frequencies.

Four Instruments In One.

- AM, FM, CW, MCW, Pulse receiver
- Field intensity receiver
- Pulse, pulse-time or pulse-position demodulator
- Sensitive power meter

- Power consumption when battery operated, 180 watts. Built in power inverter for use with 12 volt DC battery source.
- AFC and AGC circuits.
- Audio, video and recorder outputs.
- Output level: read directly in db.



Model TR

Frequency Dial Accuracy: ±1%
Impulse Bandwidth: 1 mc, 5 mc, or 8 mc
Image Rejection: Better than 60 db
Video Bandwidth: 3.5 mc
Sensitivity: —90 dbm

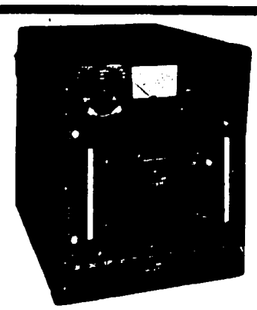
MICROWAVE RECEIVER

400 to 84,200 mc

Nine Interchangeable Plug-In Tuning Units Cover the Frequency Range.

Four Instruments In One.

- AM, FM, CW, MCW Pulse receiver
- Field intensity receiver
- Pulse, pulse-time or pulse-position demodulator
- Sensitive power meter



Model R

For quantitative analysis of microwave signals, and monitoring of all types of radio and radar communication.

Features: UNIDIAL® control with direct-reading frequency dial. AFC and AGC. Audio, video, recorder and trigger outputs. Output level read directly in db.

Frequency Dial Accuracy: ±1%
I-F Bandwidth: 3 mc
Video Bandwidth: 2 mc
Image Rejection: Greater than 60 db to 11,260 mc
Range of Linearity: With AGC, 60 db
Sensitivity: —55 to —90 dbm, depending on frequency

ANTENNA PATTERN TUNING UNIT 2,000 to 75,000 mc

Designed For Use With Model R Receiver

- External Mixer With Flexible Cable. May be located at or near antenna, any distance up to 75 feet from receiver.
- Internal electronic 1000 cps sweep allows direct operation into any standard make AC antenna pattern recorder.

Model RW-T

TRANSISTORIZED MICROWAVE IMPULSE GENERATOR

1,000 cps to 10,000 mc

Model IC-120

For use with microwave receivers when making field intensity measurements, as a signal source for spectrum analyzers, in noise measurements, and other applications. Generates 0.020 nanosecond pulses.

CALIBRATED ANTENNAS
1,000 to 10,000 mc
and
TEST ANTENNAS
1,000 to 40,000 mc

FREE LIFETIME SERVICE

READ
RF FREQUENCIES TO ±0.03%

WITHOUT TABLES

NOW you can get direct-reading convenience plus extreme precision of tuning plus broad frequency coverage . . . without using tables or calibration charts.

Only DATA-DIAL (patented) direct-reading wavemeters bring you these advantages. The tuning knob drives a long tape carrying a sloped frequency scale, which moves behind an index curve accurately drawn on a transparent window. As the cavity is tuned, the moving intersection point of these curves compensates for inherent variations, giving the frequency for each setting without further correction.

Model 3102 covers frequencies from 900 to 2100 mc, with a direct-reading accuracy of ±0.03% below 1700 mc and ±0.05% above that point. The cavity has an integral crystal detector output. Model 3103, in final development, covers frequencies from 2350 to 3750 mc. Other models will extend the range of this new line to further bands.

WRITE TODAY for more information on this and other new GCC developments in microwave components, pulse power calibrators, attenuators, oscillators and test sets.

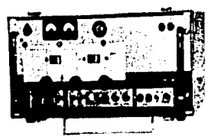
Lavoie INSTRUMENTS

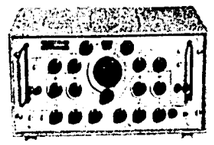
for precision measurement and analysis



LA-70A
FREQUENCY METER

The LA-70A offers exceptional accuracy, fine tuning stability, and portability. It is uniquely suited to meet FCC requirements for .0005% tolerance of fixed station transmitters in the 50-1000 Mc range. The companion LA-71 Deviation Meter provides rapid and accurate measurement of peak frequency deviation over a center frequency range of 5 Mc to 1000 Mc.

Price LA-70A $1,595.
LA-71 $ 490.



LA-593
PULSE GENERATOR

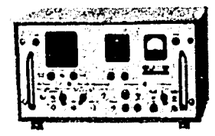
A versatile double-pulse generator with wide range control and excellent pulse shape. The amplitude of each pulse is separately adjustable. The LA-593 performs excellently in the testing of network transient response, checking delay lines, and in measuring AVC circuit recovery time.

Price..... $1,175.

LA-90
FREQUENCY STANDARD

A completely self-contained package, including power supply, this 5 Mc frequency standard provides exceptional stability of 1 part in 10^9 per day. A new approach to crystal oven regulation results in shifts of less than 0.01°C over several months of operation. Six standard output frequencies.

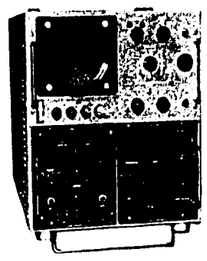
Price..... $1,950.



LA-800D
WWV FREQUENCY COMPARATOR

The LA-800D is the first to provide an accurate means for continuous monitoring of local frequency standards without frequency dividers or synchronous clock. Instantaneous accuracy is better than 1 part in 10^7. Receives either the 5.0 or 15.0 Mc WWV transmission.

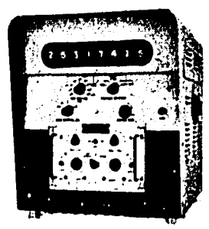
Price ..... $985.



LA-270
OSCILLOSCOPE

Incorporating new design concepts in sync systems and circuitry, the LA-270 features high sensitivity (.05 V/CM), DC to 70 Mc (down less than 3 db at 70 Mc), and full 6 CM vertical deflection. A rugged, militarized unit with all circuitry built into removable modular constructed assemblies.

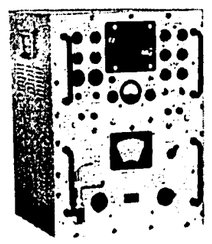
Basic Unit $1,985.
S-70 high Gain Pre-Amplifier Plug-in $ 175.
D-70 Dual Trace Pre-Amplifier Plug-in $ 285.



LA-80
ELECTRONIC COUNTER

The only 10 megacycle counter with directly coupled in-line readout. Binary conversion is eliminated by a true decade system. Time base stability is ±one part in 10^8 per day. Ten cycles to ten megacycles frequency range, with extended ranges available. The LA-80 offers outstanding reliability with minimum maintenance.

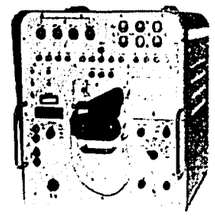
Price..... $2,250.



LA-18M
SPECTRUM ANALYZER

The bench-size LA-18M is one of a line of Lavoie spectrum analyzers featuring high stability and wide range in compact units. Unique detachable waveguide mixers provide versatility and adaptability at low cost. Range of the LA-18M is 10 Mc to 44,000 Mc.

Price..... $4,950.



LA-303
ROBOTESTER

High speed sampling and comparison reduce production line checkout and operational test time 80%. Pre-programmed acceptance standards guarantee exact measurements of resistance, insulation resistance, voltages AC and DC, and impedance. Accessories permit handling of complex problems and provide complete test systems built on Robotester capabilities.

Price..... $5,600.

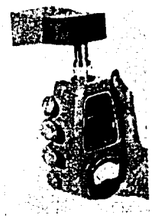
RAMCOR

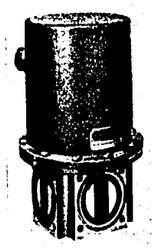


DENSIOMETER
MODEL 1200

Specifically engineered to detect unsafe levels of VHF, UHF, L, S, C and X-band energy from tubes and antennas. Battery-powered, direct reading, easily used by non-technical personnel.

WAVEGUIDE SWITCHES

Covering all frequency ranges, Isolation better than 60 db over entire band. Fully interlocked for magnetron protection. Switching time .05 seconds. Mechanical units and specials available.



WATTMETER
MODEL 1300

Panel mounted or portable. Designed for accuracy and ease of operation over a range 10 mc to 10,250 mc. Displayed in 3 ranges: 0-1, 0-5, 0-10 milliwatts.

Microwave System Components & Instrumentation

Power Meter Model 440 Portable, self-contained, gives direct readings of CW or pulse power. Rechargeable battery, fully transistorized.

Narda microwave equipment is well in advance of the field — operation over one to several octaves of frequency has been achieved in many components.

Bolometers, slotted lines, ferrite devices, directional couplers, echo boxes, magnetron modulators — complete lines of components and assemblies.

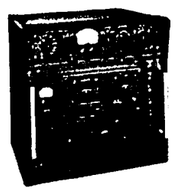
POLARAD

MICROWAVE SIGNAL GENERATION EQUIPMENT

500 to 50,000 mc

500 to 21,000 mc. Polarad signal generators in this range feature: Continuously variable attenuators calibrated directly in —dbm. Internal pulse, FM and square wave modulation, external pulse and multi-pulse modulation. Delayed and undelayed sync outputs. UNIDIAL* tuning. Direct-reading frequency dials accurate to ± 1%. High stability non-contacting klystron cavity chokes for noiseless tuning and accurate calibration.

UHF SIGNAL GENERATOR



Model PMR

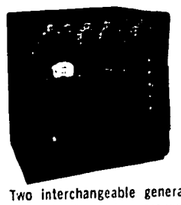
500 to 1,000 mc

Single unit covers entire frequency range.

Internal pulse (40-4,000 pps), and square wave modulation (10-10,000 pps.) Internal FM with interchangeable modulator.

Calibrated output: 0 dbm (1 mw) to —127 dbm.

MICROWAVE SIGNAL GENERATOR



10,000 to 21,000 mc

Model PMK

Two interchangeable generator units.

Internal pulse and square wave modulation (10-10,000 pps.) Output to 10 mw. DIGITAL frequency indicator.

Calibrated power output: +10 dbm (10 mw).

MICROWAVE SIGNAL SOURCE

1,050 to 11,000 mc

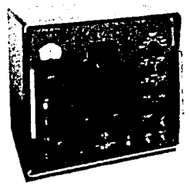
in 4 interchangeable tuning units.

Model KSS

A stable source of microwave energy at relatively high power output level. Internal square wave 10-10,000 pps. External pulse, square wave or FM modulation. Adjustable attenuator.

Power output: 14 to 400 mw, depending upon frequency.

ULTRA-BROADBAND MICROWAVE SIGNAL GENERATOR



4,200 to 11,000 mc

in one instrument

Model MSG-34

Internal pulse and square wave modulation (10-10,000 pps.) 0 to —127 dbm attenuator output.
DIGITAL frequency indicator.

MICROWAVE SIGNAL GENERATOR

4,450 to 11,000 mc

Model PMX

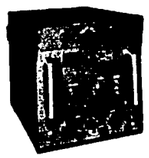
Two interchangeable r-f generator units.

Internal pulse and square wave modulation (10-10,000 pps.) 0 to —127 dbm attenuator output.

MICROWAVE SWEEP GENERATOR FOR INSTANTANEOUS MICROWAVE ANALYSIS 1,000 to 16,000 mc

At single frequency or over a wide range

in 5 interchangeable tuning units. Provides high-power microwave signal adjustable from single frequency to 2:1 frequency range. .001 to 100 cps sweep rate. Int. mod.: 1,000 cps and 456 kc square wave. Ext. mod.: square wave, FM and pulse.



Model CSG

RAPID SCAN RATIO SCOPE

Model VS-2A

Displays ratio of two input signals, gives visual plot of VSWR as function of frequency, at a single frequency or over an entire sweep range. Calibrated 7" CRT. For use with Model CSG.

MICROWAVE SIGNAL GENERATORS

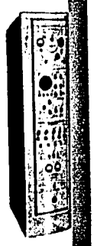
Model MSG

	Frequency	Calibrated Power Output	Internal Pulse Modulation: Internal Square Wave	Width in μ sec.	Pulse Repetition Rate in pps	Delay in μ sec.	FM deviation in mc minimum
MSG-1	950-2,400 mc	1 mw (0 dbm)	40- 4,000 pps	0.5-10	40- 4,000	2.5-300	±2.5
MSG-1P*	950-2,400 mc	10 mw (+10 dbm)	10-10,000 pps	0.2-10	10-10,000	2-2,000	±2.5
MSG-1R	950-2,400 mc	1 mw (0 dbm)	10-10,000 pps	0.3-10	10-10,000	2-2,000	±2.5
MSG-2A	2,000-4,600 mc	1 mw (0 dbm)	40- 4,000 pps	0.5-10	40- 4,000	2.5-300	±2.5
MSG-2R	2,000-4,600 mc	1 mw (0 dbm)	10-10,000 pps	0.3-10	10-10,000	2-2,000	±2.5
MSG-2P*	2,000-4,600 mc	10 mw (+10 dbm)	10-10,000 pps	0.2-10	10-10,000	2-2,000	±2.5

*Attenuator Accuracy: ±3 db between 0 and +10 dbm. ±2 db below 0 dbm.

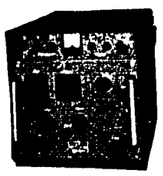
CODE MODULATED MULTI-PULSE MICROWAVE SIGNAL GENERATOR

950 to 10,750 mc **Model B**



in 4 interchangeable tuning units. Provides 5 independently adjustable pulse channels, each with variable pulse width and delay. Built-in precision oscilloscope.

EHF SIGNAL GENERATORS AND SOURCES



EHF Signal Generators and Sources

12,400 to 50,000 mc. Units in this range provide cw signals, 1,000 cps internal square wave, external modulation provisions, accurate frequency calibration.
EHF SIGNAL GENERATOR 18,000 to 39,700 mc, 7 plug-in units. Accurate power calibration. EHF SIGNAL SOURCE 18,000 to 50,000 mc, 9 plug-in units. High power output.

EHF SIGNAL GENERATOR Tuning Unit	Frequency Range	EHF SIGNAL SOURCE Tuning Unit
G1822-1	18,000 to 22,000 mc	S1822-1
G2225-1	22,000 to 25,000 mc	S2225-1
G2427-1	24,700 to 27,500 mc	S2427-1
G2730-1	27,270 to 30,000 mc	S2730-1
G3033-1	29,700 to 33,520 mc	S2933-1
G3336-1	33,520 to 36,250 mc	S3336-1
G3540-1	35,100 to 39,700 mc	S3540-1
	39,600 to 46,000 mc	S4046-1
	45,900 to 50,000 mc	S4650-1

Model SG-1218 Signal Generator and Model SS-1218 Signal Source. Available with a frequency range of 12,400 to 17,500 mc.

ROUNDING OUT ITS COMPLETE LINE OF MICROWAVE INSTRUMENTS, POLARAD ALSO OFFERS:

Model PJ-1 — Pulse Jitter Tester: displays jitter magnitude and jitter waveform.

Model SV-1 — Servo-Analyzer: frequency range:—.001 to 100 cps in 5 ranges.

Model MP-1A—Coded Multi-Pulse Generator: provides up to five independently adjustable pulse channels for generation of precise coded multi-pulse trains. Each pulse can be independently pulse-time modulated by means of an external signal.

Model N-1 — Precision Noise Generator: 1,000 cps to 500 mc — 1 to 20 db.

Model P-3—Transistorized Microwave Power Meter: 10 to 40,000 mc; measures absolute r-f power instantly.

All-Ceramic Reflex Klystron Tubes

Polarad Tube Type	Frequency Range
ZV 1012	500 to 3,000 mc
ZV 1010	700 to 3,000 mc
ZV 1010X	950 to 2,800 mc
ZV 1021X	1,000 to 4,000 mc
ZV 1009	1,500 to 6,000 mc
ZV 1009X	1,700 to 5,000 mc
ZV 1011	4,000 to 11,000 mc

Model K-200—Microwave Tube Tester: both internal cavity and external klystron tubes, pencil triodes, tubes and lighthouse tubes.

Model 150
Generator for K-Band

- Models available from L-Band to millimeter waves.
- Frequencies variable over wide ranges.
- Some models with octave bandwidth.
- New Model 400 covers X-Band from 8.2 to 12.4 Kmc.
- All models have extreme stability achieved by patented AFC discriminator and high-gain dc amplifier feedback.

BRC Precision Test Equipment is engineered and manufactured to the highest standards of the industry—standards that have made the BRC trademark a recognized symbol of precision and dependability throughout the world. Highly qualified representatives—specialists in electronic test equipment—stand ready to solve customer problems in every major foreign and domestic area. Write today for the illustrated BRC catalog.

Precision Electronic Instruments since 1934

Boonton Radio Corporation
BOONTON, NEW JERSEY, U.S.A.

A Subsidiary of Hewlett-Packard Company

For details, circle #205 on Reader Service Card

Improved High Power Pulsed Oscillator, PG-650-C

PG-650-C model has been further improved to include a ½ μsec pulse with 3 cycles rise and fall, and change of mode of operation for C.W. and as a gated amplifier. This high powered pulsed oscillator has become standard equipment in leading laboratories in the United States and Europe for research in ultrasonics, nuclear magnetic resonance and transient analysis.

R.F. Output voltage (min)
into 93 ohms .....0-300 p. to p.
0-600 Special order
Pulse length—continuous .....½—13 μsec
Rise and Fall times (max.) .....0.3 μsec
Pulse droop 5%
Noise output .....Therma. noise from termination
Harmonic output (mostly third) 10%
R. F. Leakage .....Negligible

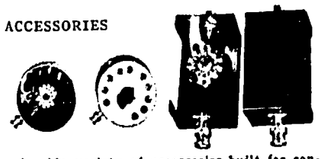
SPECIAL FEATURES
Pulse lengths available from ½ to 50 μsec.
Internal delay ranges from calibrated Helipot: 120, 1100, 11000 μsec.
Gate Output available for intensifying and blanking purposes.
External modulation of r.f. oscillator using varying pulse length and p.r.f.'s for Carr-Purcell method.
Double Pulse output
Fine controls on P.R.F. pulse length and Delay Time.
Special coils will extend coverage from 12KC to 200 MC.

PREAMPLIFIER, PA-620

This Preamplifier is a general purpose device for matching ultrasonic transducers with capacities as high as 100 pfd between 5 and 65 MC, and to provide a limited amount of gain with a good signal to noise ratio. Two of the three stages have variable bandwidth as well as center frequencies. An additional feature is a comparer stage with separate gain control low impedance input for attenuation measurements.

SPECIFICATIONS
Input impedances .....93 to 3200 ohms
Bandwidths .....0.5—17 MC
Low noise cascode input with 6922 tube
Three other tubes—6AK5
Gain .....35—50 db

ACCESSORIES



A wide variety of accessories built for convenience and accuracy are available—resistors, capacitors and resistances.
Single units or decade boxes are conveniently designed in series and parallel combinations.

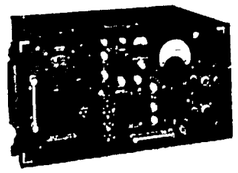
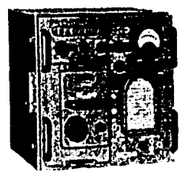
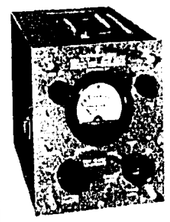
When Reliability is a must... specify EMPIRE



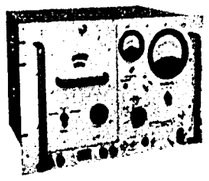
NOISE AND FIELD INTENSITY METER
Model NF-105 • 14 KC to 1000 MC
Use of five quick-change tuning heads avoids costly repetition of components common to all frequency ranges. Built-in impulse generator serves as calibrator. Carrier and peak reading VTVM. Fully regulated power supply.



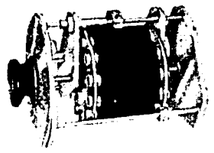
NOISE AND FIELD INTENSITY METER
Model NF-112 • 1 KMC to 10 KMC
Companion unit to NF-105. Four interchangeable tuning heads. Excellent shielding effectiveness. Calibration by means of built-in impulse generator. Compact. Simple to operate.



BROADBAND POWER DENSITY METER
Model NF-157
200 MC to 10 KMC
Personnel safety indicator. Average power from 0.1 mw/cm² to 2 w/cm². Complete with 3 pick-up probes. Portable. Self-contained.

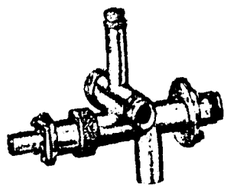


AM MODULATION METER
Model MM-120 • 15 KC to 1000 MC
Indicates modulation percentage of signal generators and transmitters. RF sensitivity 0.01 volts. Two plug-in tuning units.

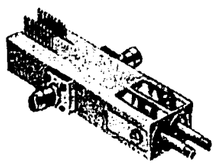


BROADBAND COAXIAL ATTENUATORS
DC to 4 KMC
Pads, 6 and 12 position step attenuators (manually and motor operated), attenuator panels. Many models, of 1 through 50 watts power dissipation. Large range of values. Low VSWR. Long term stability. Conservative power ratings.

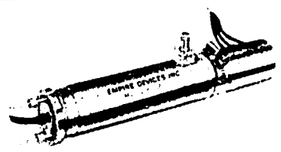
VARIABLE FREQUENCY POWER SUPPLIES
Models VP-410, VP-1000
400 VA, 1000 VA
Low distortion. Excellent regulation. Quick recovery. Wide frequency range.



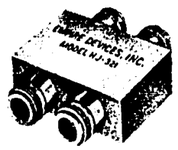
BROADBAND CRYSTAL MIXER
Model CM-107 • 225 MC to 5600 MC
Eight fixed tuned models. Low noise figure. Laboratory or production applications. Versatile.



MICROWAVE PRESELECTORS
Model CF-190
Tunable selection of desired signals from 850 to 11,000 MC by means of 4 models. Rejection of undesired signals from signal generators and other sources makes for accurate measurements and prevents receiver overload.



WIDE RANGE KLYSTRON OSCILLATORS
Model KL-280
Three models produce RF power from 1000 to 6000 MC with a minimum of unwanted radiation and spurious responses. Low noise and long service life are insured by non-contacting plungers. Available for CW and pulsed operation.



BROADBAND HYBRID JUNCTIONS
Model HJ-321
The entire range from 1000 to 8000 MC is covered by only 3 units. All four terminals are brought out for maximum flexibility. Excellent isolation between diagonally opposite terminals.

BROADBAND COAXIAL STUB TUNERS
200 MC to 10 KMC
Single, double and triple stub tuners of rugged construction. Locking nuts insure stable operation.

COAXIAL TERMINATION
Model TE-80 • DC to 10 KMC
Low VSWR throughout. Type "N" connector. Many special versions available.

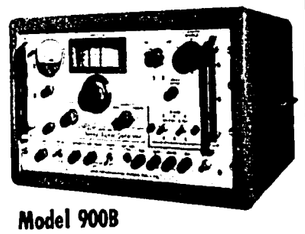
JERROLD® SWEEP GENERATORS

NEW!

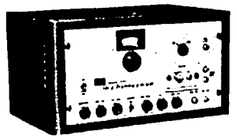


Model 900B

Very narrow to very wide sweep widths in one sweep SIGNAL generator

$1880.00

Unusual stability in sweep widths from 10 kc to 400 mc. Frequency range 500 kc to 1200 mc. Built-in crystal-controlled harmonic markers, direct coupled scope pre-amplifier, and attenuators. The ultimate instrument for your IF-VHF-UHF requirements.



Model 900A

Wide-band sweep generator

$1260.00

Center frequency: VHF, 0.5 to 400 mc; UHF, 275 to 1000 mc. Sweep widths from 100 kc up to 400 mc. Flatness: ±0.5 db over widest sweep.

Model 707

Ultra-flat sweep generator

$795.00

Featuring ±5/100 db flatness; plug-in oscillator heads*; variable sweep rates from 1/min. to 60/sec.; all electronic sweep fundamental frequencies; sweep width min. of 1% to 120% of C.F.

*Heads available within the spectrum 2 to 265 mc. Narrow-band heads on request.

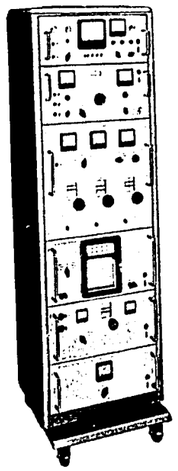
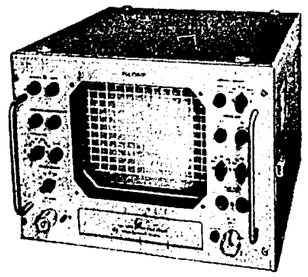
An Audio-Frequency Spectrograph



A Decade Frequency Measuring System



The Polyskop - - A Swept Frequency Generator

A SELECTED LINE OF UNIQUE INSTRUMENTS FOR ELECTRONIC MEASUREMENTS AND COMMUNICATION

MEASURING EQUIPMENT

- Frequency Synthesizers and Decade Frequency Measuring Systems 0-12.6 kmc
- Time Standards and Portable Crystal Clocks
- Impedance Measuring Devices - - Diagraphs
- Power Signal Generators
- Audio-Frequency Spectrograph
- Swept Frequency Generators and Indicators - Polyskop
- Wave Analyzers
- Capacitance, Inductance and Resistance Bridges
- Teraohmmeters
- Standard Attenuators
- Selective Voltmeters and Amplifiers
- Standard Capacitors
- Power Meters
- Equipment For Measurement of Dieletric Losses
- Field Intensity Meters

Communications Equipment

- Multicouplers 60 kc - 400 mc
- FM Relay Receivers
- Dummy Antennas
- Frequency Synthesizers and Exciters

Within its scope, this equipment represents some of the most refined and precise available. Each of the equipment groups is described in detailed special catalogs or leaflets which are available on request.

All the equipment offered is backed by high engineering competence and field experience. Skilled repair personnel and a generous reservoir of spare parts assure that all equipment sold by Rohde & Schwarz will meet warranties and give long years of service.

Write for literature covering your special areas of interest. Quotations promptly furnished.

U.S.A.(SIG. C.)

NM-40A (AN/URM-41)
30 cps to 15 kc

NM-10A (AN URM-6B)
14 kc to 250 kc

Stoddart RFI instrumentation is an approved standard of the services. It is designed to comply with the DOD's RFI Compatibility Program and Spectrum Signature Plan MIL-STD-449. This equipment is approved for interference measurements required by the following Military Specification series

MIL-I-6181
MIL-I-11748 (Sig. C.)
MIL-I-16910 (Ships)
MIL-I-26600 (U.S.A.F.)

Stoddart instrumentation is also approved for measurements in accordance with other Military Specifications, S.A.E. and F.C.C. requirements and can be supplied with C.I.S.P.R. recommended time constants

Equipments are portable, dripproof, dustproof and ruggedized for all-weather field use . . . precise and dependable for sensitive and selective laboratory measurements.

Precision measurements are assured by calibration methods using equipment with accuracies traceable to the National Bureau of Standards

(Instrumentation covering the range of 30 cps to 1000 mc available for immediate delivery from stock.)

There are

3 SPECIFIC WAYS

in which "Proceedings of the IRE" serves the advertiser differently and more effectively than other publications.

1. Pre-Specification Selling

Because "Proceedings of the IRE" publishes basic research and engineering application articles, it is closely studied by those design engineers who must "keep ahead of the market." Often, the research published leads the industry production by from two to six years! The alert engineer, who needs this amount of time for his own design applications and for tooling up and changing the production in his own factory, studies the "Proceedings of the IRE" carefully. Its articles keep him abreast with the changes that will inevitably come and make it possible for him to be ready for them. This is the time for you to sell the unknown engineer designing the never-dreamed-of-product "before it happens!" It is an insurance that you will be ahead of the market instead of behind it!

2. Personal Connection to the Individual

The Institute of Radio Engineers is an engineering society for individual engineers who must qualify on their own education, experience and engineering work. Thus, the magazine follows the reader as his private possession, wherever he goes. Wherever new engineering progress is developing, the work is done by individual engineers—and it is these men that must be sold! Only the engineer knows enough to specify and buy in a highly technical industry. Selling is a matter of reaching the minds of men because *a company cannot sign a purchase order.* Wherever radio engineering activity is the greatest, companies employ IRE members. An engineer moves into a new job in advance of production and with him goes "Proceedings of the IRE," with all the advertising you so urgently need to place where engineering activity is the greatest.

3. Economy

It is a specific purpose of the Institute of Radio Engineers that its advertising rates should benefit and help the industry grow, by being economical. Part of the economy of a tax-free organization is thus passed on to advertisers in the form of low-cost advertising to a high-quality audience. The page rate per thousand engineers of "Proceedings of the IRE" is the lowest in the radio-electronic industry by deliberate intent. Thus, the Institute finds an extra way that it can help the firms that hire its engineers to gain new business at lower costs.

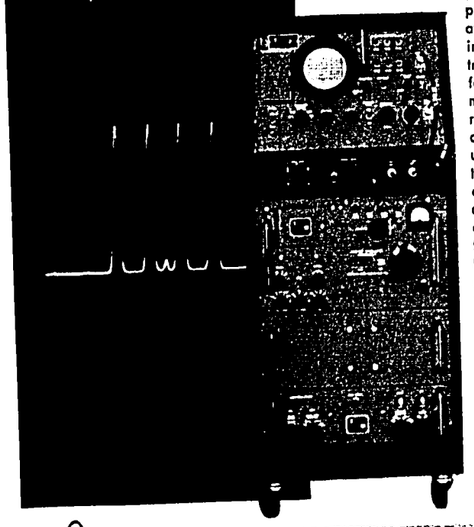
PTE-3
AN/GRM-33A

SINGLE SIDEBAND ANALYZER



The TMC Model PTE-3 (AN/GRM-33A) is a multi-purpose test instrument used at communication facilities, in laboratories, and in electronic production facilities for visual analysis of RF signals within the frequency range of 1.5 to 64.5 megacycles. The PTE-3 may be used for tuning and aligning transmitters, sideband exciters, RF filters, and for band occupancy studies. Detailed analysis of any portion of the selected spectrum for intermodulation distortion, harmonic distortion, sideband suppression, carrier suppression, spurious signals, hum, noise, and adjacent channel interference is made possible by a manual sweep control.

The PTE-3 contains a variable frequency oscillator with long term stability, a two tone RF generator for unit test and calibration, and a two tone audio generator for distortion analysis.

UNIQUE
PORTABLE, PLUG-IN SWEEP GENERATOR

the NEW MICRO-SWEEPER

Here's a small, lightweight sweep generator that attaches directly to your oscilloscope panel. No cables or batteries. Just plug in and operate. MICRO-SWEEPER sweeps speeds up to 2 microseconds/centimeter on your scope. Use it for IF alignment; wideband amplifier testing; filter studies; tv test work; field testing where portability is a must; classroom demonstrations.

And check these performance advantages!

- **Choose from 3 models:**
  Model 200 — .15 to 2mc
  Model 201 — 2.0 to 15mc
  Model 202 — 15.0 to 115mc
- **Output voltage:** 0.25 Volts rms into 600 ohms for Model 200.
  0.1 Volts rms into 50 ohms for Models 201 and 202.
- **Flatness:** ±0.5 db or better on all bands (±0.25 db on Model 200)
- **Over-all flatness, band-to-band:** ±1 db or less (±0.5 db on Model 200)
- **Easy maintenance, fully transistorized**

. . . Now — check the prices!

Model 200 $160.00 201 $160.00 202 $160.

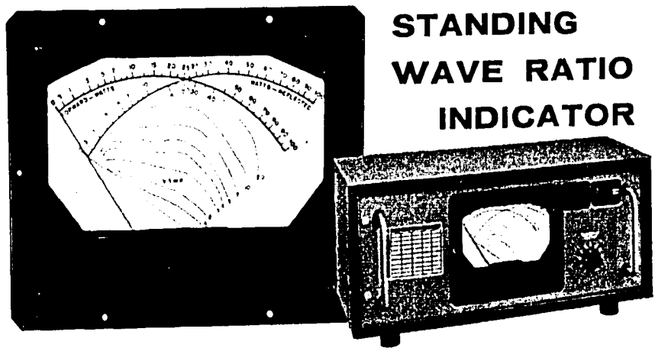
SWR-3000

STANDING WAVE RATIO INDICATOR



The TMC Model SWR-3000 is a multi-purpose instrument which will instantaneously provide visual indications of Forward Power, Reflected Power, and Voltage Standing Wave Ratio.

The SWR-3000 may be used in any 50 or 70 ohm unbalanced transmission system covering 2-30 MCS, with average powers up to 3000 watts.

The SWR-3000 is used as an operational and maintenance tool at transmitter stations, in electronic plants for production testing of transmitters, and laboratories for RF transmission system measurements.

For additional information about the SWR-3000 and other test equipment, please contact TMC Test Equipment Division, Mamaroneck, New York.

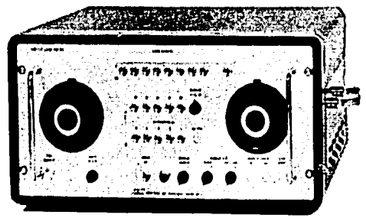
SWEEP GENERATORS

Telonic Industries, Inc.

- *Fast, accurate frequency response testing*
- *Ranges from 20 cps to 2500 mc*
- *Built in attenuation and frequency markers*



A Telonic Sweep Generator provides your laboratory or production line the quickest, most accurate means available for measuring frequency response of RF circuits.

Scanning the entire frequency range in one 60th of a second, a Telonic Sweep Generator completely eliminates time-consuming point-to-point response tests. Available in many models covering various portions of the RF range, they may be used to check response of filters, mixers, amplifiers and many other RF circuits.

Quantitative measurements are provided by integral, precision attenuators. Marker systems, both fixed and variable, are also available on many models.

Write for catalog 8-C.

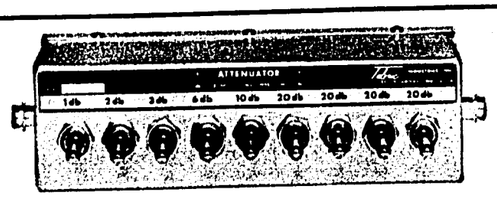
SERIES	RANGES	PRICES
HD	10 kc — 910 mc	$695.00 — 995.00
LD	3.5 — 140 mc	695.00
LR	3.4 — 140 mc	995.00
PLR	Plug-in oscillators for LR models	
SD	200 — 1260 mc	745.00
ED	975 — 2450 mc	1,495.00
PD	4.2 — 1010 mc	2,750.00
SV	VHF Channels	725.00 — 775.00

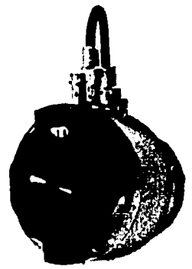
GENERAL SPECIFICATIONS

Flatness..... 5%
Zero Base Line..... Oscillator off during return sweep
Sweep Rate..... Line frequency (50-60 cps)
Horizontal Sweep..... 20 volts
Vernier Attenuation... 0-10 db.
Physical Description.. Panel—⅛" x 8¾" x 19" Chassis—2" x 14½" x 17"
Power..... 115 v. 50/60 cycle, approx. 120 watts
Display Linearity..... Better than 1.2:1
Radiation..... Less than 10 microvolts
Source VSWR..... Below 1.3:1
Markers..... Birdy-By-Pass Marker System
Variable Markers..... Available on LD, LR, SD & ED Models

R F ATTENUATORS

Telonic Industries Inc.





Turret and Toggle Switch Types

Telonic RF Attenuators are precision-built units designed to operate with long-term accuracy and low insertion loss.

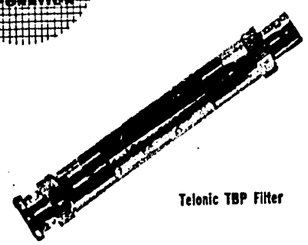
Toggle switch models are available with 6 or 9 steps of attenuation in 1 db increments from 0 to 42 or 0 to 102 db. Switches are silver-plated wiping contact types for continuous operation. Special versions can also be furnished to meet most operating requirements.

Telonic Turret Attenuators use self-cleaning knife type contacts to maintain reliable service. These attenuators are available as single units with steps of 1, 2, 5, or 10 db, tandem units to operate 2 circuits simultaneously, or the TAB (shown) providing 0 to 59 db attenuation in 1 db steps through a dual, concentric knob and dial.

TYPES	ATTENUATION (max.)	PRICE RANGE
Turrets	to 59 db	$65.00 — 225.00
Tandem Turrets	to 50 db	160.00 — 200.00
Multiple Turrets	to 110 db	325.00
Toggles	to 20 db	65.00 — 85.00

R F FILTERS

Telonic Engineering Corporation



Telonic TBP Filter

Miniature Band Pass and Low Pass

Telonic TLP-4 Low-Pass Filters are exceptionally rugged devices available with any cut-off frequency from 200 to 2000 mc in 5 mc increments. Inherent simplicity makes them ideal where low-cost dependable performance is required.

TBP Band-Pass Filters cover the frequency range from 200 mc to 2000 mc and may be set at any value between 2.5 and 25%. They are available in 2 or 4 sections depending on band pass and rejection requirements. Miniature construction makes them especially well suited for missile and aircraft applications.

TTF Tunable Band Pass Filters consist of 5 resonant line sections capacity loaded to tune over a 2:1 range. Insertion loss is less than 1.5 db. Standard units are available covering frequencies from 250 to 2500 mc.

TCF Cavity Band Pass Filters consist of machined aluminum cavities, capacity loaded, and are adjustable over a ± 25% range. Center frequencies are available from 200 to 2500 mc and are set to factory standards or to customer requirements.

317 Wide Band	10 cps-11 Mc	300 μV-300 V	10 MΩ shunted by 7 pF with probe; 2 MΩ shunted by 11 to 24 pF without probe	2% 20 cps-2 Mc 4% 10 cps-6 Mc 6% 10 cps-11 Mc	$495 with probe
320 True RMS	5 cps-500 kc	100 μV-320 V	10 MΩ shunted by 8 to 18 pF	3% 15 cps-150 kc; 5% elsewhere	$445
350 True RMS	50 cps-20 kc	0.1 V-1199.9 V	2 MΩ shunted by 15 to 45 pF	¼% 0.1 V-300 V, 100 cps-10 kc; ½% outside these limits	$720

ELECTRONIC TEST EQUIPMENT

DECADE AMPLIFIER
Model 220C
Battery-operated amplifier, 10x or 100x; 10 cps-150 kc; 5 MΩ input; 2% accuracy. $115

CALIBRATOR, Precision dc and ac
Model 420
Provides precise output, rms, peak-to-peak, or dc, from 0-10 V; accuracy ¼% with cal. chart. $365

CAPACITANCE METER, Direct-reading
Model 520
Direct-reading of capacitance 0.01 pF to 12 μF; accuracy 2% above 0.1 pF. $335

INVERTER, Sensitive dc to ac
Model 700
Inverts dc as low as 10 μV and up to 100 V, to ac to be measured on any of VTVM's listed. $365

CONVERTER, Linear ac to dc
Model 710
Converts ac to dc linearly over each decade, 1 mV-1000 V; 30 cps-250 kc; accuracy ¼% 50 cps-10 kc, ½% 30 cps-50 kc, 1% above 50 kc. $450

LABORATORY STANDARDS

A-T VOLTMETER
Model 390
10 Mc to 1000 Mc; as laboratory standard for high voltage. NBS calibration not included in price. $2,250

H-F TRANSFER VOLTMETER
Model 393
25 cps to 30 Mc; a transfer device for accurate measurement of voltages or calibration of voltmeters; each probe covers 2 to 1 voltage range, 1 V to 50 V. $550 Inc. one probe ($100 for each add. probe)

MICROPOTENTIOMETER
Model 440
0 to 900 Mc; as laboratory standard for 40 μV to 0.33 V. NBS calibration not included in price. Price includes one resistor-thermocouple combination. $250

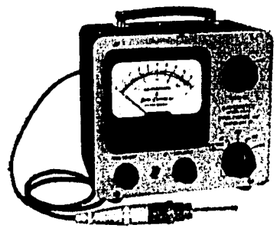
Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 81-226.

Select the transistorized **DYNA-EMPIRE** GAUSSMETER best suited to your needs

Completely transistorized Dyna-Empire gaussmeters accurately measure flux density and determine "flow" direction. Ideal for measuring and locating stray fields, plotting variations in strength and performing rapid comparisons of production lots against a standard. Easy-to-operate,—no jerk, pull, ballistic readings or circuit breaking required.



NEW TRANSISTORIZED GAUSSMETER MODEL D-874

Special Features:

FIVE RANGES: 300 gauss full scale, 1,000 gauss full scale, 3,000 gauss full scale, 10,000 gauss full scale, 30,000 gauss full scale.
LINEAR OVER ENTIRE OPERATING RANGE
PORTABLE, OPERATES FROM OWN SELF-CONTAINED BATTERIES
BATTERY LIFE—1,000 HOURS
REQUIRES NO EXTERNAL POWER SOURCE
INTERNAL CALIBRATION STANDARD
WEIGHT—4 LBS.
UNIVERSAL PROBE SUPPLIED IS 0.025" THICK BY 0.200" WIDE. ACTIVE AREA IS ONLY 0.0079 SQUARE INCHES LOCATED NEAR THE TIP OF THE PROBE.

Complete with Universal probe $195.

TRANSISTORIZED GAUSSMETER MODEL D-855

This quality precision built Gaussmeter reads flux densities to 30,000 Gauss full scale ±2.5%. It is a highly sensitive instrument and provides tremendous flexibility. Complete with two linear probes—one high sensitivity probe for measurement of low density fields and one probe for measurement of high density fields. Special probe available for reading 3 gauss full scale.

CIMRON
Digital Instrumentation

Model 6000 Digital Voltmeter. Basic unit, offering great accuracy and ease of operation in applications where printout is not required. Manual ranging and polarity.

A complete line of digital voltmeters and volt-ratio meters all of which may be extended in range or function by means of plug-in accessories — an exclusive Cimron development. AC-DC Converters, DC Preamplifiers, Input/Output accessories.

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 81-226.

PRECISION TEST & MEASURING EQUIPMENT

AIR & GAS SAMPLING

Automatic Tape Samplers
Automatic Sequential Samplers
Vacuum and Pressure Pumps
Bantam Samplers
Nuclear Air Samplers
Filterholders and Accessories

MEASURING & RECORDING EQUIPMENT

Ultrasensitive Micromanometers
Thermoanemometers
Precision Resistance Thermometers
Hydrographic Thermometers
Ultrasensitive Windvanes
Dual Chart Recorders

RADIATION DETECTORS

Pocket Radiation Alarms
Pocket Radiation Survey Meters
Wide Range Radiation Survey Meters
Nuclear Air Samplers

ANALYTICAL INSTRUMENTS

Gas Analyzers and Leak Detectors
Densitometers and Color Comparators
Spectrophotometers
Flame Photometers
Galvanometers
Analytical Equipment

SUBMICRON MEMBRANE FILTERS

Produce ultrapure air, gas, lubricants, solvents, and water quickly and easily. Control white room contamination.

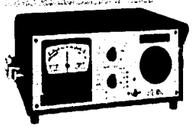
For details, circle #220 on Reader Service Card

SF Smith-Florence Inc.
A Modern Approach to Electronic Instrumentation



Model 951 Transistorized precision differential (potentiometric) microvoltmeter. Accuracy, 0.01%

An example of advanced engineering applied to general-purpose instrumentation: combining 100% solid state circuitry and the ultimate in component selection, Model 951 measures DC potentials from 1 μV to 1000 V with extreme accuracy and reliability. Ask about other S-F advanced designs in Precision Measuring Equipment, Cable Fault Finders, Precision HV Sources and VTVM's.

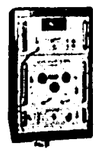
HOLT INSTRUMENT LABORATORIES
Laboratory-Standard AC Instrumentation

Model TV-1 Thermal Transfer Voltmeter NBS Certifiable 0.5 - 1200 v; .02% - 50 kc .004%/mm null sensitivity



New AC-DC transfer standard makes transfer measurements to a calibrated DC supply of the same voltage as the unknown AC being measured; eliminates ratio errors in high frequency multiplier resistors.

Regulators, Amplifiers, Oscillators, Reference Standards, Calibration and measuring devices for the entire audio spectrum.

HL LAB Holt INSTRUMENT LABORATORIES
Laboratory-Standard AC Instrumentation

Model TVT-1 Thermal Transfer Voltmeter NBS Certifiable 0.5 - 1200 v; .02% - 50 kc .004%/mm null sensitivity

New AC-DC transfer standard makes transfer measurements to a calibrated DC supply of the same voltage as the unknown AC being measured; eliminates ratio errors in high frequency multiplier resistors.

Regulators, Amplifiers, Oscillators, Reference Standards, Calibration and measuring devices for the entire audio spectrum.

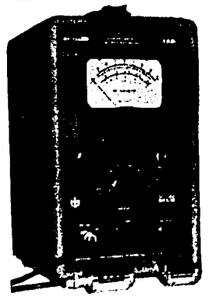
PRECISION LABORATORY INSTRUMENTS!

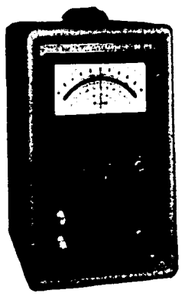
MODELS MV27D-L, MV-127A-L, MV111A-L and MV-07B are equipped with insulated high and low input.



ULTRA-SENSITIVE RF VOLTMETER

1mV-3V F.Sc., 50KC-260MC, 5% accy.; 30 KC-700MC, 10%. DC output 1.5V @ 1mA.

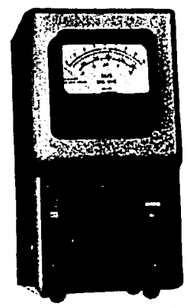
MODEL MV-28A ...$495
MODEL MV-38A ...$395
(Same as 28A except 3mV-3V)



ULTRA-SENSITIVE DC VOLT-AMMETER

10uV-1KV mid. sc., 10uuA-1mA mid. sc.; inp. Imp. 1-60 meg. DC output 1.25V @ 1mA. Basic accy. V-2%, A-3%.

MODEL MV-07B ...$495



ULTRA-SENSITIVE AC VOLTMETER

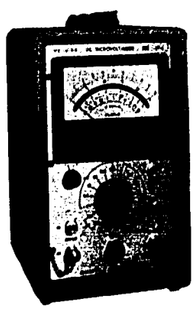
10uV-1KV F.Sc. Inp. Imp. 10K to 3.3 meg., Frvq. Resp. 10cps-150KC. Basic accy 2%, AC output 40db.

MODEL MV-45A ...$350

GENERAL PURPOSE DC VOLTMETER

250uV mid. sc. 1000V F.Sc., 6 to 60 meg., Inp. Imp., DC output 2.5V @ 1mA. 2% Basic accy.

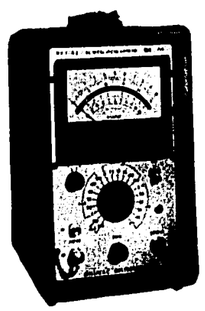
MODEL MV-27D-L ..$335



LABORATORY TYPE DC VOLTMETER

100uV-1000V F.Sc., 1 to 60 meg. Inp. Imp., DC output 2.5V @ 1mA. 1% Basic accy.

MODEL MV-127A-L .$395



LABORATORY TYPE DC AMMETER

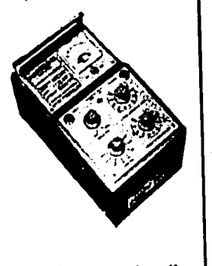
100uuA-250mA F.Sc., 1 meg to .004 ohm Input Shunt. DC output 2.5V @ 1mA. 1% Basic accy.

MODEL MV-111A-L .$420

ELECTRONIC WHEATSTONE BRIDGE

Measures 1 ohm to 1000 megs in 9 ranges. Max applied power to Rx 50 mw. Basic accy. .05%.

MODEL MV-276A ..$795



"Hushed Transistor" AMPLIFIER

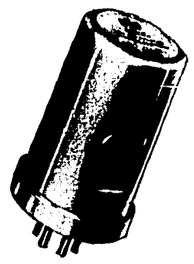
2 uV Noise Shorted Input, 10 KC Band Pass 10-80db gain, 10K or 100K Inp. Imp., 2 cps-180KC, HI & LO Pass filter.

MODEL VS-64A $395
MODEL VS-68A $495
(Same as 64A except 10 meg. tube input)

LINEAR SCALE OHMMETER

Direct reading, measures 1 ohm to 2.5 megs. F.Sc., 10mV drop across 1K. Basic accy. 1%.

MODEL MV-279B ..$465



DC MODULATORS

High qual. low noise chopper. Less than 2 uV drift. Dwell time —55%. Other dwell times avail. Guar. life 1 yr. 50-60 cps. Plug-in.

MODEL DCM-99K-1 ..$45

(For rackmount change MV to RM, or in case of VS model add R after type number, and add $25)

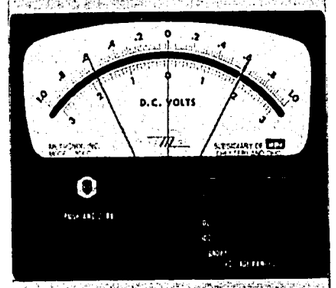
10 Megohms



PLUS Control

An electronic voltmeter with a meter-relay

This happy combination makes an extremely versatile and acute instrument.

It has critical measuring ability that goes with high input impedance, in space-saving panel-mounting style.

It also has the reliable, simple control of a locking contact meter-relay, with adjustable set points.

Many difficult functions can be easily controlled: conductivity cells, life testing of components or systems, production testing and sorting, automatic Go-No Go of missile circuits.

Ready When Needed

Metronix DC instruments such as Model 301-C-CMR (illustrated) have input resistances up to 10 megohms. AC input impedances go as high as 5 megohms. Like all Metronix panel-mounting electronic voltmeters (PMEV's), they are always connected—immediately available for continuous monitoring of critical parameters.

Send for data sheets describing Metronix PMEV's in single or multiple ranges, DC or AC, with either meter-relays or conventional indicating meters.

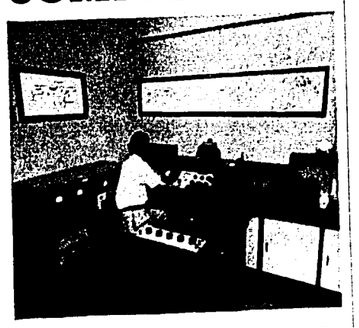
COMMERCIAL



ELECTRICAL

STANDARDS

LABORATORY

Physics Research Laboratories, Inc. offers, on a commercial basis, the facilities of a primary standards laboratory for the calibration of basic electric standards. For the first time, the testing and certification of precision electrical instruments, and such standards as resistors, cells and condensers are available from a commercial laboratory. All standards and instruments used at PRL in tests are directly traceable to the National Bureau of Standards. Complete detailed information relative to PRL's testing laboratory services is available on request to Dept. SA-1. Also request catalogs describing PRL's complete line of fine electrical instruments.

Digital Magnetic Test Equipment

Precision Voltage-Current Calibrator, Model 1082
Range: 0.01 - 10 V
Accuracy ±0.1%

Accurate reference for oscilloscope analysis of high speed waveforms. Wide input signal bandwidth. High speed digital and pulse equipment — core testers, memory plane testers, pulse generators and drivers, magnetic memories and sequential buffers, logic circuit plug-ins (LOGIX BLOCKS). One of the largest and most sophisticated lines in the field.

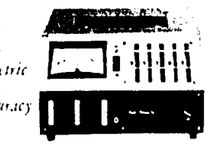
A Modern Approach to Electronic Instrumentation

Model 851 Solid State Potentiometric Voltmeter, .05% Accuracy



Another example of the S-F "max-min" concept in instrumentation. Widest range (1mv - 1kv), rugged design, greater stability, recorder output, reference voltage source, polarity reversal for negative voltages, in-line read-out plus many other features, for less money.

Ask about other S-F advanced designs in, Precision Low Level Measuring Instruments, General Purpose Test Equipment, VTVM's, Cable Fault Finders, High Voltage Power Supplies, and Nuclear Equipment.

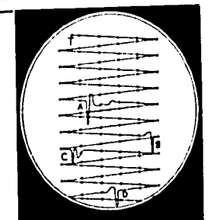
TIMING GENERATOR...
For Precision Timing One-Shot Events

Radionics Model TWM-2A Timing Generator provides waveforms for a zig-zag sweep with triangular waves and Z-axis marker dots—for high accuracy timing of one-shot, multiple-signal events. Extensively used in R & D on shock tubes, explosives, hypersonics, gas dynamics, and other fast events.



OTHER RADIONICS PRODUCTS:
- Focussed-ultrasound generators for biomedical research
- Ultrasonic analyzers
- Wide-range regulated power supplies, 0-2000 volts
- Instrument velocity servo amplifiers

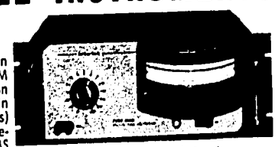
triolab

UNIQUE, VERSATILE INSTRUMENTS

0.25% ACCURACY RACK MOUNTING TRUE RMS VTVM MODEL 120-7

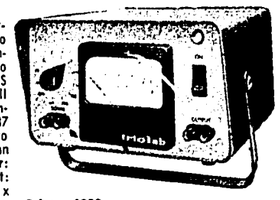


Exclusive from trio/lab: laboratory precision measurement of complex waves with VTVM versatility. Overcomes problems of distortion caused by harmonics and spikes (inherent in peak responding and average reading meters) through the use of special dynamometer movement which achieves direct-reading, true RMS values of both sine and complex waves with deflection directly proportional to the square of the current. **Range:** 15 ranges: from .01 to 500 RMS Volts full scale. **Sensitivity:** Needle deflection directly proportional to true RMS value of input signal. **Input Impedance:** 1 Megohm. **Frequency Response:** 50-2000 cps (usable to 4kc). **Accuracy** (above 50% electrical deflection): 0.25% of full scale at 400 cps; 0.50% all other frequencies. **Power:** 115 Volts, 50-400 cps. **Tube Complement:** 3-5751; 1-5687; 1-6V6; 1-5R4; 1-6AS7. **Dimensions:** 19" wide x 7" high. **Weight:** 26 lbs. **Price:** $985. Portable version—Model 120-1.

ALL TRANSISTOR DC VOLTAGE COMPARATOR MODELS 204-1 and 204-2

A ruggedized, sealed monitoring control device which compares an unknown voltage to a known input reference level, and operates a double pole, double throw relay when the reference level exceeds the known voltage by 1 millivolt or more. Response is less than 25 milliseconds in the 204-1, 100 milliseconds in the 204-2. Operation is unaffected by temperatures between —55°C and +55°C. It can be used for either high or low limit comparison by reversing the input leads. The most reliable technique for automatic, programmed accurate measurement with computer-speed. Applications include: military ground support devices, airborne instrumentation, production test equipment, alarm/control systems, and many data gathering and processing systems. Using printed circuitry and miniature components throughout, this compact (2-3/8" x 3-3/16" x 4-3/8") instrument meets applicable portions of MIL specs. **Power Requirements:** 204-1—115V, 400 cps ± 20 cps; 204-2—115V, 60 cps ± 2 cps. Both—1.5 watts with relay pull-in; 1.25 watts with relay dropout. **Input Impedance:** Both—1 megohm min. **Speed of Response:** 204-1—25 milliseconds (max); 204-2—100 milliseconds (max). **Temperature Range:** Both—operating: —55° to +55°C (with 20-minute operation at 71°C); **Storage:** —62° to +85°C. **Finish:** Both—semi-gloss black. **Weight:** 1 lb., 10 oz. **Terminal Connections:** Both—15-pin solder. Latch and inhibit facilities built-into both instruments. **Price:** $285 each.

PORTABLE AC VTVM MODEL 109-2

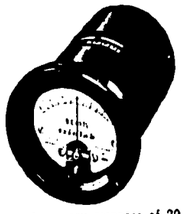


A superb laboratory instrument with signal circuits isolated from case and power circuits to provide floating measurements previously impractical, and accurate voltage measurements to 5 cps. **Ranges:** 12 ranges calibrated to RMS value of a sine wave: 0.001 to 300 VAC full scale. **Sensitivity:** (Lowest Range): 1 MV. **Input Impedance:** 10 Megohms shunted by 37 mmf from 0.001 to 0.3 volts; 23 mmf from 1 to 300 volts. **Accuracy:** 2% of full scale. Can measure accurately to 20 microvolts. **Power:** 105-125 VAC, 50-420 cps. **Tube Complement:** 4-7025, 1-6X5, 1-0A2. **Dimensions:** 6¼" high x 10¾" wide x 12" deep. **Weight:** 13 lbs. **Price:** $220.

1% ACCURACY PANEL MOUNTING PRECISION AC VTVM MODEL 130-1

Designed to provide all advantages of electronic measurement of AC voltages without exceeding the area required for its indicating meter. Circuit utilizes generous amounts of feedback to assure constant meter indication over a wide range of tube characteristics and operating voltages, while the possibility of oscillation is eliminated by carefully designed amplitude-phase characteristics. **Standard Ranges:** 10, 30, 100, 300 millivolts; 1, 3, 10, 100, 300 Volts. **Accuracy:** ± 1% of full scale. **Input Impedance:** 1 Megohm (0.5 megohms for ranges 51-99 millivolts). **Frequency Range:** 50-30,000 cps @ ± 1%. **Power Requirements:** 6.3V (AC or DC) at 0.5 amp, 200-250 VDC at 4.0 ma (max). **Weight:** 1 Pound. **Connections:** 5 Solder terminals: Input, Gnd, B+, 6.3V, 6.3V. **Tubs Complement:** 1-6AB4; 1-5751. **Color:** Black bakelite meter, black wrinkle dust cover.

RUGGEDIZED PANEL-MOUNTING SINGLE RANGE AC & DC TRANSISTOR VOLTMETERS



The AC instruments have standard ranges of 10, 30, 100, 300 MV; 1, 3, 10, 30, 100, 300 V. Power requirements are 115 V at 50-2000 cps. All are ruggedized per Mil-M-10304, and have accuracy of 2% of full range; input impedance 1 megohm (min). **MODEL 301-1,** AC, zero left, TRVM has a frequency response of 20 cps to 500 kc (contact factory for other ranges); weight is 1 lb., 2 oz. Size is 3½" round and connections are 5 double turret solder terminals. **Price: $250. MODEL 302-1,** AC, phase-sensitive, zero center, TRVM has a response of 380-2000 cps (signal & reference frequency must be the same). Weight is 1 lb., 12 oz. Size is 3½" round and connections are 7 double turret solder terminals. **PRICE: $275. MODEL 303-1,** AC, zero left, TRVM has a frequency response of 20 cps to 500 kc (for 10 MV range. Contact factory for other ranges); weight is 1 lb. Size is 2½" round and connections are 5 double turret solder terminals. **Price: $275. MODEL 304-1,** AC phase-sensitive, zero center, TRVM has a frequency response of 380-2000 cps (signal & reference frequency must be the same). Weight is 1 lb., 10 oz. Size is 2½" round and connections are 7 double turret solder teminals. **Price: $300. MODEL 305-1** (Zero Center) and **MODEL 305-2** (Zero Left) DC TRVM's have standard ranges of 1, 3, 10, 30, 100, 300 volts DC. The range of Model 305-1 also includes a 0.5 volts DC reading. Power requirements are 115 V, 400 cps, 2 watts (max). Weight is 1 lb., 5 oz. Size is 3½" round and connections are 5 double turret solder terminals. **Price: $225.**

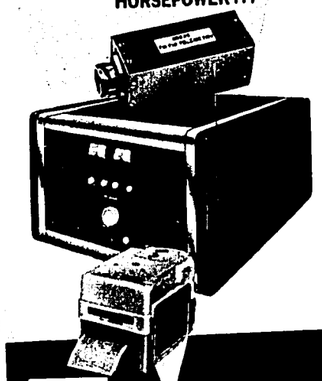
NEW

WIRELESS MEASURING SYSTEMS

FOR... PHYSICAL PARAMETERS, HORSEPOWER...



MIDAS

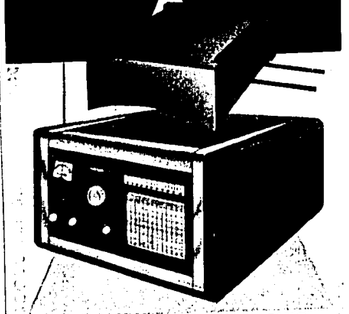
MIDAS provides reliable multi-channel data on stress, strain, pressure, physiological response, etc., without the use of slip rings.

Applications include continuous monitoring of helicopter blades, propellers, shafts, turbine physical parameters.

Three channel, FM FM solid-state transmitter measures only 1⅛" x 1¼" x 6". Complete system includes multi-channel receiver and recorder.

THOR

Thor provides a continuous indication and record of shaft horsepower, torque and RPM without the use of slip rings. Prevents shaft overload. Miniature, solid-state transmitter assures maintenance free operation and ease of installation. Less than six inches of space required for transmitter and sensors in typical marine application. System includes receiver-recorder.



NANOSECOND PHOTOGRAPHIC INSTRUMENTATION

Kerr Cell Shutter, Light Pulse Generator, Synchronizer, Catadioptric Light Screen, Shadowgraph and Schlieren Systems, Ballistic Range Instrumentation Systems.

Voltage Breakdown Tests

Bench HYPOT® Test Sets, a-c and d-c models, have outputs to 30 kv. Separate 4½" meters for test voltage and leakage current. Wide selection of models.
Model 424 Bench HYPOT® provides 0-5000 v d-c. For testing cables, condensers, coils, transformers, motors, and assemblies. Measures leakage current from 0.1 microampere to 100 microamperes over four scale ranges. Rapid testing of capacitors with output of 5 milliamperes under short circuit. Operates from 110-120 v 50/60 c outlet with long-life selenium high voltage supply.
Net complete.....$497.50

- **Insulation Materials Tester**
  Dielectric strength determined to laboratory precision. Interchangeable test fixtures for varnishes, porcelain, tape, acetate sheet, films, tubing and cloth. Write for Bulletin, Model 4501 HYPOT® Materials Tester.
- **Insulating Oils Tester**
  New portable design, only 42 lbs., for testing insulating oils at point of application as well as in the laboratory. Test potential variable from 0 to 35 kv, with 2 kva rating. Write for bulletin Model 4505 HYPOT® Oil Tester.
- **Measure Resistance to FIVE MILLION MEGOHMS**
  VIBROTEST® megohmmeters provide direct reading measurements to FIVE million megohms and higher with electronic power supply that eliminates tedious cranking. Write for bulletin "VIBROTEST".
- **Test Electrical Grounds**
  VIBROGROUND® measures resistance to ground of electronic, telephone, and power equipment. Direct reading. Operates from self-contained battery. Write for Bulletin "VIBROGROUND"®
- **Special Instruments**
  A. R. I. engineers have developed instrumentation to meet many specialized research, development, and production applications. Your inquiry for special equipment will receive prompt attention.

BARNES

TEST INSTRUMENTS for COMPONENTS

AUTOMATIC CAPACITOR TEST SETS

These instruments, with fully automatic null balancing and range switching, offer a speed advantage of 4 to 1 over manual balancing. Even non-technical help can make quick, accurate measurements. Visual, digital readout eliminates balancing and readout of vernier dials by operator and insures correct reading. Standard lab type capacitance bridges are used and the accuracy of the automatic set is the same as the basic bridge. Units are available for use with digital readout systems and adjustable tolerance limits can be provided for classification of components.

TYPE 15. BASIC BRIDGE: General Radio Type 716C. CAPACITANCE RANGE: 100 $\mu\mu$f to 1.1 μf. DISSIPATION FACTOR RANGE: 0 to 21%. TEST FREQUENCY: 1000 cps. DIRECT OR SUBSTITUTION MEASUREMENT.
TYPE 61. BASIC BRIDGE: General Radio Type 1611B. CAPACITANCE RANGE: 0.1 μf to 11,000 μf. DISSIPATION FACTOR RANGE: 0 to 60%. TEST FREQUENCY: 120 cps.
TYPE 63. BASIC BRIDGE: Boonton Electronics 75A. TEST FREQUENCY: 1 megacycle. CAPACITANCE RANGE: .01 $\mu\mu$f to 1000 μf.
CONDUCTANCE RANGE: .1 to 1000 μmhos.

DIGITAL DEVIATION BRIDGE

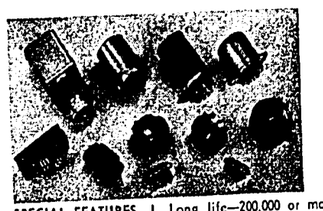
A servo driven "Null Balance" Bridge for comparing resistance of a sample resistor to a standard resistor of the same nominal value. Indicates deviation of sample from standard in percent of nominal value and is used for sorting, inspection, and matching of resistors, potentiometer linearity checking and resistor adjusting. Deviation indication is given by pointer on front of instrument and by an analog digital commutator for printout, recording or digital comparison. Can be used with a relay output system for automatic sorting and binning and will achieve production rates of 3000 pieces per hour or more.

SPECIFICATIONS. RANGE: Standard ± 2% and ± 20%. MEASUREMENT RANGE: 10 ohms to 30 megohms. ACCURACY: ± 0.5% of scale. POWER SUPPLY: Self-contained for D.C. bridge voltage 1—100 V. D.C.

SORTING MECHANISMS

BARNES Sorting and Test Systems are designed to handle, test and sort all types of electronic components, including axial lead, radial lead and disc types. Equipment is available for Resistors, Capacitors and Diodes. Sorting into 2 to 8 categories can be provided. Units can be furnished for semi-automatic and fully automatic operation and also for testing taped components. Speeds to 5000 pieces per hour are achieved depending on the handling method and number of categories. We can supply fully automatic models for sorting resistor blanks into 10 equiproportional categories at rates to 4000 pieces per hour.

TEST SOCKETS



Available in over 200 standard types and configurations for plug-in testing of solder-terminal components and hermetic seal headers. They are made for a wide variety of relays, switches, transformers, circuit modules, crystal-can components, etc. Sockets are available for all types of solder-terminals including solder hook, flattened and pierced, straight pins, turrets, etc.

SPECIAL FEATURES. 1. Long life—200,000 or more insertions. 2. Socket bodies in flexible materials for bench testing, high temperature materials or Teflon FEP for environmental tests. 3. Reliable, low-resistance connections—beryllium copper contacts, nickel and hard gold plated for long wear. Contact resistance less than .005 ohms per contact. 4. will not damage components—floating contacts allow for minor irregularities, headers cannot be inserted improperly. 5. Dual, mutually insulated contacts give separate voltage and current terminals for contact resistance measurements and dry circuit testing. 6. Single contact sockets available for economy. 7. All sockets are easily repairable.

Write, wire or phone for further information, prices and delivery.

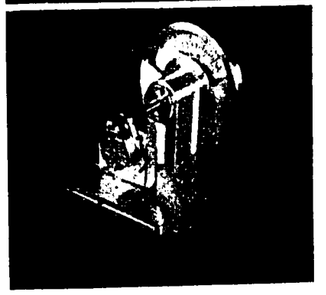
DYNAMIC TORQUE TESTER AND DYNAMOMETER



Determines the dynamic characteristics of systems under operating conditions

FEATURES TWO OPERATING CONDITIONS IN ONE UNIT

Torque Meter— measures torque while supplying power at variable speeds.

Dynamometer— measures torque while absorbing power at variable speeds.

A stable, rugged, mechanical instrument, where torque range may be varied by exchange of load cells.

Also: Torque Monitor, a Control instrument.

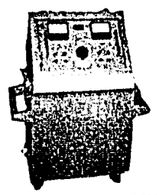
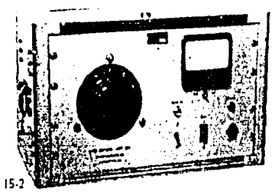
PESCHEL **HIGH VOLTAGE TEST EQUIPMENT**



DC OVERPOTENTIAL TESTERS

Models cover voltage ranges 0-50, 0-120, 0-150, 0-250 0-300 KV DC. Curret rating 5 ma.

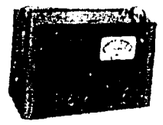
- Non-destructive quantitative testing
- Small size, light weight
- Rugged design for industrial use
- Selenium rectifiers for long life
- HV terminates in shielded cable
- Control cabinet stacks on top of HV section (may be separated for cont-ol)
- Fully instrumented control section



K 15-2

SERIES-K HIGH VOLTAGE AC TEST SETS

- High current capacity to ASTM standards
- Low waveform distortion, below 5%
- Dual-scale voltmeter directly across output
- Continuously adjustable output voltage
- Convenience and safety controls
- Zero-start interlock
- External interlock provision
- Surge protection on meters, relays and transformer primary
- High speed air circuit breaker to protect unit.



SENSITIVE HIPOT TESTERS, SERIES H

Models include H2-B, H5-B, H10, H20, H30. (0-2 to 0-30 KV DC)

- 5 microamp over-current meter relay, continuously adjustable to 5000 microamp deenergizes high-voltage (on DC)
- Non-destructive quantitative testing (on DC)
- Auxiliary AC output voltage available
- HV selenium rectifiers—no tubes
- Completely instrumented, with safety & convenience features

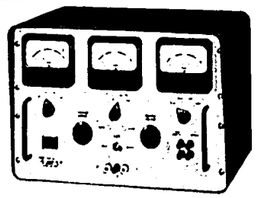
SEMICONDUCTOR TEST EQUIPMENT

To Accurately Evaluate Semiconductor Parameters

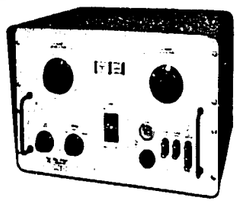
• Incoming Inspection • Production Test • Reliability Systems



20 AMPERE DYNAMIC RECTIFIER ANALYZER

- Forward current 0.5 1 2 5 10 20 amp. D.C. full scale
- Reverse voltage 250/1000V. peak
- Forward voltage drop 0-1, 0-5V.
- Reverse current from 1μa to 50ma. in four ranges
- Self-contained, no external load resistors
- Mirror scale 1% instruments
- Tests under actual operating conditions in accordance with Mil. Specs.

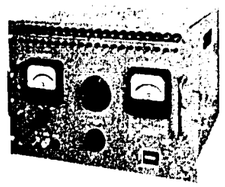
Model 170A Price $895.00 Delivery: Stock-2 Weeks



600 AMPERE SURGE TEST SET

- Provides surge current test for silicon rectifiers in accordance with Mil. S-19500-B
- Continually adjustable to 600 amp. peak
- Self-contained, portable
- Single half wave sinusoidal pulse
- 75, 2500 and 6000 amp. units available
- 1% monitoring accuracy
- Automatic programming available

Model 220 Price $1200.00 Delivery: Stock-2 Weeks

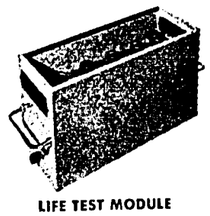


MODULAR DYNAMIC TEST POWER SUPPLY

- Forward current & reverse voltage adjusted independently
- Reduces operating costs by a factor of 50
- Capacity is 20 rectifiers 0.1 to 1 amp. or any combination up to 2 rectifiers, 10 amp. each
- Mirror scale 1% instruments

Model 154D Price $895.00 Delivery: 2 Weeks

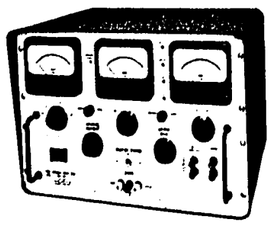
Model 154E -- Same as 154D, with provisions for reverse current measurement $995.00



LIFE TEST MODULE

- Self-contained switching module
- Simulator circuit
- Units may be set up in parallel for testing above 10 amp.
- Reduces operating costs by a factor of 50
- Plug-in rack adapters available for 3, 4, and 5 modules
- Forward drop equalizing resistors

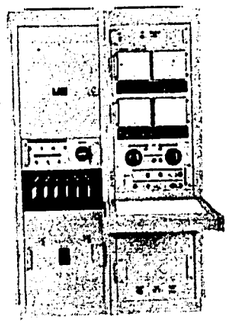
Model 180A Price $250.00 Delivery: Stock-2 Weeks



THERMAL RESISTANCE TEST INSTRUMENT

- Measures junction temperature rise
- Accuracy within 5% (under standard conditions)
- Heating current 0-.5/1/5/10 amps
- Centigrade ranges 0-50/150
- 1% instruments
- Measuring pulse 100-500μ sec
- ½ Wave or D.C. heating current

Model 222 Price $1800.00 Delivery: Stock-2 Weeks
Higher power units available



200 AMPERE DYNAMIC TEST SET

- Forward current 20/200 amp. D.C. full scale
- Reverse voltage 0/1500V. peak
- Forward voltage drop 0-5/10V. peak
- Reverse current from 2 μa to 250ma. in four ranges
- Self-contained, no external load resistors
- Mirror scale 1% instruments
- Tests under actual operating conditions in accordance with Mil. Specs.

Model 164 (Basic Unit) Price $11,525.00 Delivery 8-10 Weeks

Complete Reliability Evaluation Systems Available

1962 IRE DIRECTORY

Directory II Components

47 major groups 532 products

The products and services of the radio-electronics industry have been organized into three basic directories:

I. Complete Equipment

II. Components

III. Materials & Services

Within these three basic directories, 112 major product and service groups are numbered consecutively throughout. Under each of these 112 classes a further breakdown is given, showing in detail by a system of code numbers after each firm listed what specific products within the class are manufactured by that firm.

For a terminology cross-index listing the subproducts in alphabetical order, consult the pink section preceding page 1.

The first few times you use this EDGE INDEX

follow the "How to use" instructions slowly—one step at a time. After that you will be able to open easily and almost instantly to the section that you seek.

HOW TO USE

1. Bend the Directory almost double with the back cover page on the inside.
2. Hold in your right hand with your four fingers near to the bound edge and your right thumb near the middle of the open side of this page.
3. From the heavy or light line symbol adjacent to the subject you seek, run your eyes across the page edges until you reach the horizontally corresponding symbol.
4. OPEN THERE!

LICENSE NO. 25H
MACHOL EDGE INDEX PATENT #2680630

For complete list of products and services, arranged alphabetically for fast reference, see the pink section preceding page 1.

RF

components demonstrating exceptional performance characteristics

broadband amplifiers • low noise amplifiers
tunable amplifiers • bandpass filters
multicouplers • multiplexers • converters
coaxial attenuators • terminations
impedance matching transformers

Broadband RF Amplifiers

40-1500 mcps

Model HFW Amplifiers cover an octave of frequency. Their truly exceptional performance features low noise, high gain with low power drain.

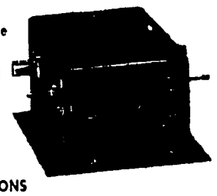
SPECIFICATIONS (condensed)

Freq range	40-1500 mcps
Z in/out	50 or 75 ohms
Noise figure	5-11 db
Gain	10-30 db or greater if desired

Bandpass Filters

30-2000 mcps

Model HFF and HFF-T Bandpass Filters are rugged, reversible in operation, remarkable in performance (which approximates theoretical expectations). Advanced filter designs are also available for antenna couplers and diplexers.



SPECIFICATIONS (condensed)

	HFF	HFF-T
F_o, mcps	30-1000	200-2000
Bandwidth	5-25% F_o	1-15% F_o
Insertion loss	≦1 db	≦1 db
VSWR	≦1.2 in passband	

Attenuators and Terminations

DC-2000 mcps

Impedances of 52.5 and 75 ohms
VSWR 1.2 maximum
Nominal attenuation from 1 to 20 db
BNC, TNC, or N connectors

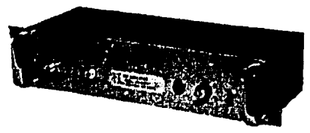
Impedance Transformers

DC to 1000 mcps
VSWR 1.2 maximum
Minimum loss
Matching any pair of 50, 75, 93 ohms
BNC connectors

Low Noise RF Amplifiers

30-300 mcps

Model UH-2(A)SP Amplifiers offer broadband response, high gain, and low noise figure, with additional advantages of simplicity, high reliability, ruggedness, small size and low weight.



SPECIFICATIONS (condensed)

Freq. range	F_o preset between 30 and 300 mcps
Gain	Greater than 20 db
Bandwidth	Up to 10% of F_o
Noise Figure	<1 db at 30 mcps to <3 db at 300 mcps

For details, circle #242 on Reader Service Card

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages a1-226.

WE'VE BEEN HIDING UNDER A BUSHEL BASKET

We've emerged from seven years' designing, engineering and producing some of the nation's most sophisticated electronic countermeasures systems.

Experience and knowledge gained has been applied in developing a line of IFI amplifiers that meet some pretty tough specifications at lower cost than you'll find elsewhere.

Available for immediate delivery.

Magamps

also: CURRENT TRANSFORMERS
PULSE TRANSFORMERS
CONTROL REACTORS
FILTERS
TOROIDS *to your specifications, or we will design them.*

DESIGN CAPABILITY: Specialized experience in high performance magnetics qualifies us to design your problem components. (Details of past achievements on request.)

PRODUCTION FACILITIES: Controlled environment areas for stick, bobbin and toroid winding, hermetic sealing, and encapsulation.

RELIABILITY: Proven production capability to meet Mil-T-27A airborne and missile requirements with tight quality control.

FAST DELIVERY

GENERAL MAGNETICS, INC.

2641 Louisiana Ave., Minneapolis 26, Minn.

For details, circle #244 on Reader Service Card

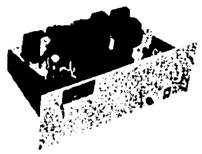
Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 81-226.

Interesting instruments

Model 759-6 $225.00

Practically-Priced DC Amplifier

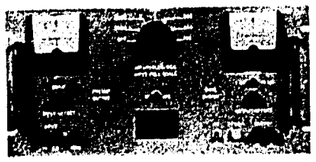
Now—a low-level DC amplifier costing less than $200.00, that has the features usually found in instruments costing twice as much. Model 759-6 accepts dc signals from 5 μv to 1 volt...has 5 meg input impedance...½% linearity...panel meter...is fully isolated from ground...with 0 to ± 1% recorder output.



Model 557-2B $1250.00

Computer for Ratios

This instrument computes, to ±1%, ratios of two independent low-level (to 1 mv full scale) variables. The Ratio Computer has a wide variety of uses in measurement or control of the process industries, thermal studies, medical instrumentation, and other modern circuits.



Model 557-1A $ 950.00

Rate of Change Computer

An accurate device for measuring slow changes in low-level DC potential as low as 10 μv/sec. Magnetic Instruments' Rate of Change Computer is used for measurement and/or study of temperatures, pressures, radiation, chemical concentration, and other physical phenomena.

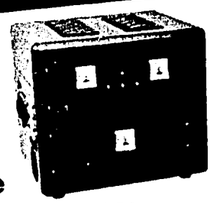
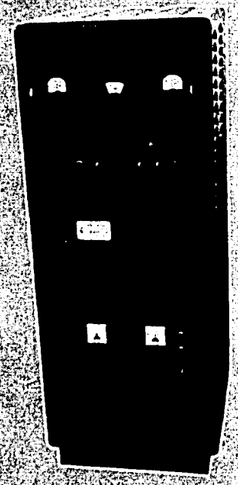
microwave instrumentation



Low noise TWT Amplifiers

- *Noise figures as low as 4.5 DB*
- *Frequency coverage 0.5 to 18.0 KMC*
- *Remote operation*

Ideal as antenna and low noise receiver pre-amplifiers. MPE Low Noise Amplifiers are designed for ease in system integration. TWT, solenoid and solenoid supply can be located up to 100 feet from the electrode supply. Remote control permits complete operation from electrode supply. High regulation, low ripple achieves maximum capabilities of low noise traveling wave tubes. Write for complete specifications.



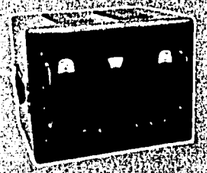
Power Leveling Systems

- *Constant output power*
- *Sweep frequencies of 0.01 to 100 CPS*
- *Six models cover 0.5 to 18.0 KMC*

The Microwave Power Leveling Systems find wide applications in the testing and development of microwave components and systems where a constant power, sweeping signal source is required. The system may also be used as a CW signal source. Provisions for amplitude, pulse and frequency modulation are included. Sweep speeds permit display on oscilloscope or recorder. Write for further details.

Special applications for TWT's

Although MPE offers the most complete line of TWT Amplifiers available, we have delivered many TWT Amplifiers and Electronically Swept Oscillators for special applications. Quotations for specific requirements will be prepared by our technical staff. MPE also supplies solenoids for all TWT's and BWO's. Write for complete catalog or send us your requirements.

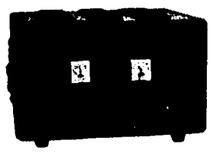


Electronically Swept Oscillators

0.5 to 18.0 KMC

- *Speed frequency response measurements on wideband microwave systems*
- *Reflectometer measurements*
- *Broadband antenna development*
- *ECM equipment design*
- *Modulated or CW signal source*

Direct reading of frequency and sweep width provide simplicity of operation in these wideband swept oscillators. Each model is a complete, self-contained unit capable of amplitude, pulse and frequency modulation. Six models provide complete coverage, 0.5 to 18.0 kmc. Sweep speeds continuously adjustable from 0.01 to 100 cps for display on oscilloscope or recorder. Single frequency (CW) operation also provided. Request Data Sheet for more details.



TWT Amplifiers

- *Broadband* (approximately octave bandwidths)
- *Full coverage* 0.25 to 18.0 kmc
- *Standard amplifiers provide up to 10 watts output*

MPE Broadband TWT Amplifiers provide wide bandwidth, high gain amplifier for laboratory use or system applications. Output power levels of 10mw, 1 watt and 10 watts are standard over most of the 0.25 to 18.0 kmc frequency range. Intermediate or higher powers are available in many frequency ranges. PM focused amplifiers are available where size, weight and power consumption are critical. Standard line includes amplifiers especially designed for pulse operation. Most amplifiers provide for grid modulation. 10 mw amplifiers provide for helix serrodyne modulation. Write for details.

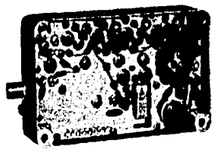
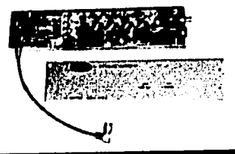
RS ELECTRONICS CORPORATION

Receiving & Transmitting Equipment: Command Receivers & Decoders, Radar Receivers, Beacons, Frequency Multipliers & Transmitters
Amplifiers: Intermediate Frequency Amplifiers, Distributed Amplifiers
Ground Equipment: Missile Check-Out Equipment, Ground Support Equipment
Instruments: FM Signal Generators (400 to 550 Mc), IF Noise Figure Measurement Equipment
Specifications of representative products follow:



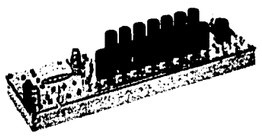
RSE COMMAND RECEIVER, TRANSISTORIZED, UHF: Model 2621 crystal controlled receiver. **Frequency:** Fixed tuned within ± .01% of desired frequency between 406 Mc and 549 Mc. **Frequency modulation:** ± 150 Kc. **Sensitivity:** 5 μv for 6 db $\frac{S+N}{N}$. **Interference:** To Mil-I-26600. **Limiting level:** 90% of max. output on 14 μv input. **Selectivity:** —60 db at ± 2 Mc from carrier. **Image rejection:** 60 db. **I-F bandwidth:** 400 Kc. **Disc. P-P separation:** 400 Kc. **Power input:** 1.2 watts at 29 ± 2 VDC. **Size:** 3" x 5" x 1¼". **Weight:** 16 oz. Used with Models 1801, 1802, 1803 Decoders.

RSE TRANSPONDER, UHF/L-BAND: Model 2611A/2703A includes subminiature tube receiver, transmitter, and power supply. **RECEIVER**—Fixed tuned to any frequency between 406 Mc and 549 Mc. **Sensitivity:** 10 μv for 6 db $\frac{S+N}{N}$. **Modulation:** FM ± 350 Kc. **Output:** 5 VRMS. **Image rejection:** 30 db. **Selectivity:** — 55 db at ± 2 Mc from carrier. **Output bandwidth:** 2.2 to 50 Kc. **TRANSMITTER—Frequency:** 1650 Mc to 1680 Mc. **Modulation:** FM ± 500 Kc. **Output:** 27 dbm. **Frequency stability:** ± 4 Mc. **FM ripple:** ± 20 Kc. **GENERAL—Input power:** 29 ± 2 VDC at 1.8 Amps. **Weight:** 4 lbs. **Size:** 3 1/16" x 6 13/16" x 7 7/8". **Temperature range:** —55° C to + 70° C. Used with Models 1801, 1802, 1803 Decoders.



RSE TRANSISTORIZED I-F AMPLIFIERS: Model 84201A is typical of others in RSE's line of transistorized amplifiers. **Center frequency:** 42 Mc. **Bandwidth:** 1.4 Mc. **Gain:** 120 db. **Source Impedance:** 300 ohms with 25 $\mu\mu$f. **Output impedance:** 35 ohms. **Noise figure:** 2.6 db. **Video output voltage:** + 15 volts. **Nominal pulse width:** 1 μsec. **Gain control provisions:** manual, automatic and sensitivity time control. **Temperature range:** —20° C to + 55° C. **Size:** 12" x 2½" x 1¼". **Weight:** 25 oz. **Power required:** 120 VDC at 30 ma, 6.3 VAC at .6 amps, 28 VDC at 70 ma.

RSE SERIES 2200 DISTRIBUTED AMPLIFIERS



Model	3db Bandpass	Input Impedance	Output Impedance	Voltage Gain	Dimensions (inches)	Application
2210	0.1 - 175 mc	200Ω	50Ω	18 db	15⅝" x 3¼" x 3¼"	Low noise preamplifier (noise figure 8 db)
2220	0.1 - 300 mc	50Ω	50Ω	20 db	15⅝" x 3¼" x 3¼"	General purpose voltage amplifier
2230	0.1 - 300 mc	50Ω	50Ω	18 db	15⅝" x 3¼" x 3¼"	Power amplifier (1 watt output)

RSE STANDARD SUBMINIATURE IF AMPLIFIERS

ANTENNAS
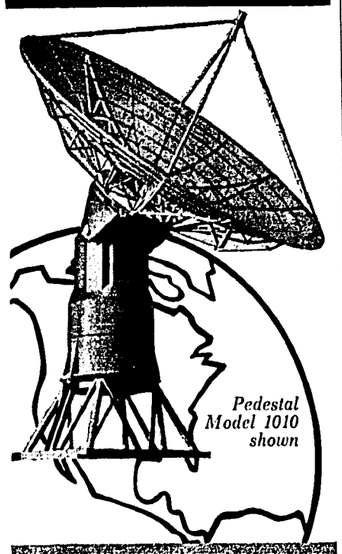
by
Ainslie
CORPORATION



NOW — available from Ainslie Corporation, a new remote control positioning pedestal capable of handling our antennas up to 18 feet in diameter in frequencies from 100 to 10,000 mc. Modifications available for a variety of tracking applications. Whatever your antenna or reflector requirements may be, contact us at our new facilities.

A·S

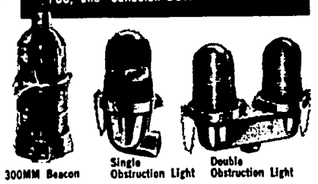
Antenna Systems, Inc., is devoted exclusively to the design, fabrication and installation of antenna systems in the fields of scatter communications, missile tracking, space tracking, radar and surveillance, radio astronomy, and special antenna products.
We invite your inquiry, whatever your antenna problem may be. Write for our folder.
ANTENNA SYSTEMS INC.
HINGHAM, MASS.
For details, circle #253 on Reader Service Card

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 81-226.

HUGHEY and PHILLIPS, INC.

Specialists in Obstruction Lighting Equipment and Controls

BEACON and OBSTRUCTION LIGHTS, designed to meet specifications of CAA, FCC, and Canadian DOT.



300MM Beacon — Single Obstruction Light — Double Obstruction Light

You'll find Hughey & Phillips have obstruction lights for every job. The engineering of each light offers maximum efficiency and simplified installation and maintenance. Whether you need bottom or side entrance conduit fitting types, there is a model to meet your requirements.

SPECIAL CAST ALUMINUM WATERTIGHT JUNCTION BOXES, offering a wide choice in types of terminals, cable support, and factory installed screw cap receptacles.

Box with terminals, cable support, and receptacle in cover. — Box with factory installed screw cap receptacles. — Box with special terminals and cable support.

Hughey & Phillips have pioneered in the use of adequate junction boxes with proper terminals, and built-in cable support to meet NEC requirements.

SPECIAL CONTROL UNITS, designed for both indoor and outdoor installation.

- Photo-Electric Control Units
- Beacon Flashers
- Combination Photo Control & Beacon Flashers
- Lamp Failure Indicator System
- Controls with Autotransformer system . . . pioneered by Hughey and Phillips for tall towers increases lamp life.

Photo control, flasher and Lamp Failure Alarm

TOWER LIGHTING ISOLATION TRANSFORMER

THREE SIZES . . . 750, 1750, 3500 WATTS

FEATURING:
- HIGHER EFFICIENCY
- IMPROVED REGULATION
- ADDITIONAL TAPS
- FIBER GLASS INSULATION
- EPOXY ENCASED
- VERSATILE MOUNTING

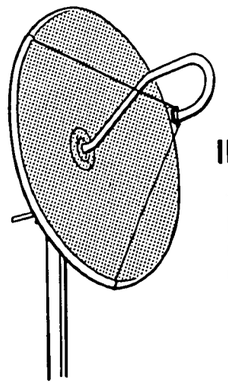
TACO

For Antennas and Antenna Equipment

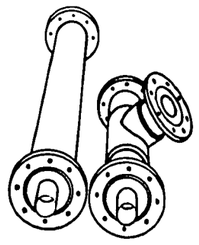


IN MICROWAVE

Taco now offers a complete line of microwave antennas, complete with feeds for all operational frequency ranges in sizes ranging from 4′ to 12′ in diameter. Mounts available for all requirements. Deicing equipment for all sizes.

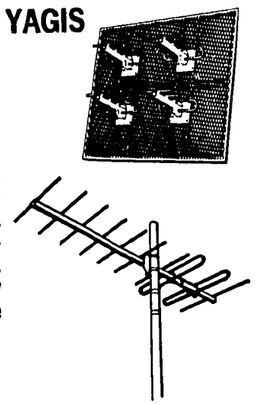
IN RIGID TRANSMISSION LINE

Rigid transmission line in both copper and aluminum. Complete systems including all accessory components for both EIA and Quick-Clamp connections. Sweeps, elbows, adaptors, switches, pressurization fittings, and all other fittings for 7/8", 1⅝", 3⅛" and 6⅛". 50-ohm and 75-ohm lines in appropriate sizes.



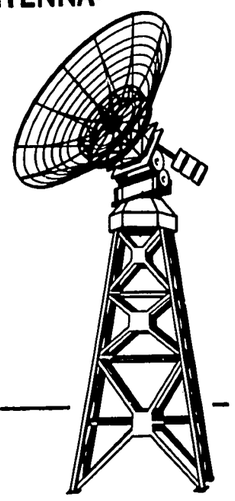
IN RUGGEDIZED YAGIS

All-aluminum, all-welded ruggedized yagis for use in 30 to 500 mc frequency ranges. Coaxial feed. Available in 4, 5, or 10 element designs with single or multiple drives. Also available with screen reflectors and multiple arrays. May be polarized vertically or horizontally. Complete mounting hardware.



IN COMPLETE ANTENNA-TOWER SYSTEMS

Complete antenna-tower systems ready to install. Available in sizes up to 24′ in diameter. With or without remote control mechanized mount. Feeds available upon special order. Systems come complete, requiring minimum installation time in the field.



IN ANTENNA DESIGN AND SPECIAL MANUFACTURING

Taco maintains the finest test range in the industry, together with an outstanding antenna laboratory staffed with experienced, competent personnel. These facilities are ready to meet with any antenna, or antenna system need of industry or the military.

In addition to the antennas listed, Taco manufactures a complete line of parabolic antennas up to 32′ in diameter, aircraft and submarine antennas, telemetering helical antennas, tracking antennas, and many other types. WRITE FOR COMPLETE TECHNICAL CATALOG...

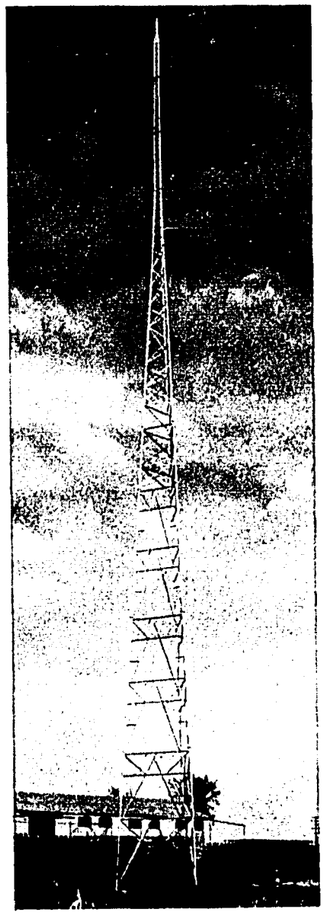
ROHN

SELF SUPPORTING

COMMUNICATION TOWER

NOW available up to 170 ft.!



★ Fully self-supporting in heights up to 170 ft.

★ Rated a true HEAVY-DUTY steel tower, suitable for communication purposes, such as radio, telephone, broadcasting, etc.

★ Complete hot-dipped galvanizing after fabrication.

★ Low in cost—does your job with BIG savings—yet has excellent construction and unexcelled design! Easily shipped and quickly installed.

FREE *details gladly sent on request. Representatives coast-to-coast.*

ARRA TT LINE

CONTINUOUSLY VARIABLE ATTENUATORS

ULTRA BROADBAND

New

Exclusive Features:

- Bandwidth: 1.0 to 9.0 KMC with a single unit
- Continuously variable for all values of attenuation
- VSWR: 1.5 max. at all frequencies for all values of attenuation
- Attenuation: 10 db min. at 1 KMC
- Insertion Loss: 0.5 db max.
- Power: 10 w. average, 5 KW peak
- Size: 5" diameter by 1" high
- Drive: micrometer or shaft
- Model 3-6414-10

PRICE $150

In addition, other standard models* available are

Model No.	Freq. KMC	Max. Atten.	Max. VSWR	Unit Price
1414-10	25-.50	10	1.5	$270.
2414-20	.50-1.0	20	1.5	$260.
2-3414-30	.8-2.5	30	1.5	$260.
3414-30	1.0-2.0	30	1.4	$240.
4414-30	2.0-4.0	30	1.3	$220.
4-5414-30	2.0-6.0	30	1.3	$230.
5414-30	4.0-7.0	30	1.3	$220.
6414-30	7.0-11.0	30	1.3	$220.

*Insertion Loss 0.2db Max.

ARRA 27 Bond St. Westbury, N.Y.

PRECISION MICROWAVE CALIBRATION EQUIPMENT

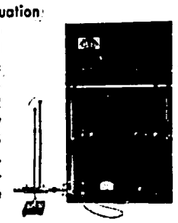
- All attenuators and terminations made with Weinschel Film Resistors for maximum stability
- All attenuators and terminations individually calibrated
- Certificate of calibration supplied with each attenuator
- All instruments 100% tested for all performance specifications

Modulated RF Sources—Models MS-8 to MS-13.

Exceptional amplitude and frequency stability for precision microwave measurements. Six RF Sources plug into common Power Supply-Modulator, cover frequency range of 50 to 10,500 MCS with true single-knob control. Modulator frequency is tuning fork stabilized.

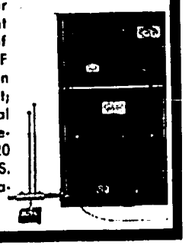
Single Channel Insertion Loss Test Set (Simple, Accurate)

Measure Attenuation directly up to 30 DB. Typical systems error: .1 DB. Resolution: about .02 DB. Frequency Range: 20 MCS to 90,000 MCS. Write for Application Note #1.



Dual Channel Insertion Loss Test Set (High Resolution)

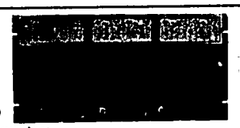
.02 DB precision for 20 DB measurement despite changes of .1 DB in level of RF source. Attenuation range: 20 DB, direct; 40 DB with partial RF substitution. Frequency range: 20 MCS to 90,000 MCS. Write for Application Note #4.



Available as a complete system 100 to 12,400 mc

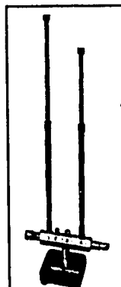
Standard Attenuator Comparator, Model VM-1 (Sensitive to —120 DBM)

For standards laboratories. Calibrates signal generator output attenuators or calibrates attenuators. 105 DB range. Direct reading accuracy between —21 and —81 DBM exceeds .02 DB/10 DB.



Step Attenuators

DC to 2 KMC. RF calibration accuracy: 1 to 10 DB: .02 DB; 20 to 50 DB: .02 DB/10 DB. Model 60: 2 drums, 0-60 DB in 1 DB steps. Model 64: 3 drums, 0-64 DB in .1 DB steps. Model 640: 3 drums, 0-110 DB in 1 DB steps. Switch repeatability: .01 DB.



Double Stub Tuners

Adjustable spacing between stubs for quick matching. Chart on base for optimum stub spacing versus frequency. Collets lock stubs. Adjustable height of connectors. Frequency Ranges: Model DS 109: .75 to 10 KMC; Model DS 109L: .4 to 4 KMC; Model DS 109LL: .2 to 2 KMC.

Coaxial Thermistor Mount, Model 675-A

100-4000 mc. Long thermal time constant of mount eliminates effects of ambient temperature variations. Calibration factor supplied at 400, 1000 and 1500 mc accurate to 2%.

Precision RF Power Bridge, Model PB-1

For standards laboratories requiring the highest possible accuracy in high frequency power measurements . . . capable of accuracies of .1% in the measurement of substituted DC power.

X-Band Power Standard Models 811, 813 and 815

Calibration factor supplied accurate to 1%. Thermostatically controlled constant temperature chamber and thermal isolator eliminate effects of ambient temperature changes. Can be used to measure power or standard power source.

10 Watt Power Pads, Model 10

Frequency: DC to 1.5 KMC. 50 ohms. Attenuation: 1 to 20 DB. Maximum VSWR: 1.30, bilateral. Stainless steel type N connectors. Stable under power.

Coaxial Attenuators, Models 50, 50-C, 50-SC

Frequency: DC to 3 KMC. 50 ohms. Attenuation: 1 to 80 DB. Maximum VSWR: 1.20 bilateral. Finish: Stainless steel (Type N connectors); nickel plated (Type C or SC connectors).

Coaxial Attenuators, 1 to 12.4 KMC—Models 210, 520, 540, 633, 663

Frequency: 1 to 12.4 KMC. 50 ohms. Attenuation: 1 to 20 DB. Finish stainless steel (Type N Connectors); nickel plated (Type C, BNC, TNC, SC connectors). Available also in ruggedized version to meet MIL-A-3933 and MIL-T-945A (Model 530).

Write for complete specifications.

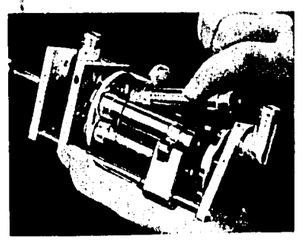
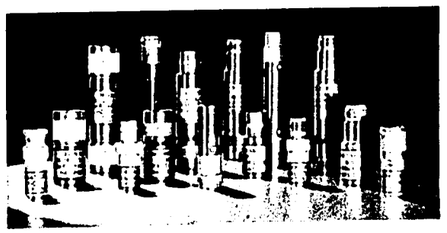
STODDART

WIDE RANGE COAXIAL ATTENUATORS 50 & 70-OHM TERMINATIONS

Manufactured using exclusive Stoddart film resistors for highly accurate and stable operation from dc thru 3000 mc; with special values from dc thru 10 kmc.



2, 6 and 10 position turret attenuators offer quick removal, replacement or rearrangement of single attenuator pads. Small and rugged, the Stoddart turrets operate with a "Pull-Turn-Push" sequence.



Stoddart attenuator pads are available in any value from 0 thru 60 db, including fractional values. Any conceivable combination of male and female, Type N and Type C connectors may be ordered. Pads with flanges for panel mounting can also be supplied.

10, 20, 40 and 60 db attenuators are available for operation from dc thru 10 kmc.

1 watt, 50-Ohm terminations can be selected for use from dc thru 7000 mc, in addition to those in the dc-3000 mc range. All 1 watt terminations can be supplied with either Type N or Type C connectors. ½ watt, 50 or 70-Ohm terminations with BNC or TNC connectors manufactured for use from dc thru 1000 mc.

Common db values available from stock.

Detailed literature upon request.

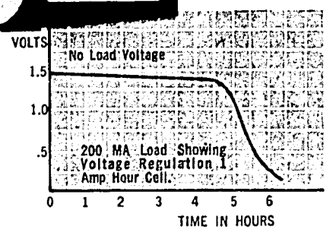
CALORI ++−− VOLT

BATTERIES

The newest development in batteries, these miniature units are capable of delivering large peak currents (10 amps/sq. in.). . . . May be recharged at 1 amp per sq. in. . . . Rapid depolarization. . . . Will withstand short circuits for sustained periods, recovering full potential in fraction of a second. Available in 5 sizes from ¼"D x ¼" to 2"D x ½" and from 300 to 6,000 MA hours.



DISCHARGE CURVE

Silver-Chloride, zinc, sea-water activated batteries also available . . . no gassing, no magnesium used.

We invite inquiries on special applications for unusual power source requirements.

For detailed information and literature . . . write

CALORI ++−− VOLT CORP.

BF SERIES

BF Series Transistor Battery Holder accommodates batteries and cells with diameters up to 1⅜" and lengths from 1¹¹⁄₆₄" to 7⅜" making it possible to use different battery combinations to obtain a wide selection of DC voltages. Batteries can be exchanged simply by unscrewing the holder cap. Designed for mounting up to a 1¼" diameter hole and ⅜" thick panel.

Inquiries for special battery holder length and diameters are invited.

300 SERIES: (B SERIES SHOWN) • Accommodates batteries ranging up to ¹¹⁄₁₆" diameter and lengths from 1.300 to 5.850.

400 SERIES: (F SERIES SHOWN) • Accommodates batteries ranging from 1" to 1⅛" diameter and lengths from 1¹¹⁄₁₆" to 6³⁄₁₆".

500 SERIES: (B SERIES SHOWN) • Accommodates batteries ranging from 1³⁄₁₆" to 1⅜" diameter and lengths from 2³⁄₁₆" to 7⅜".

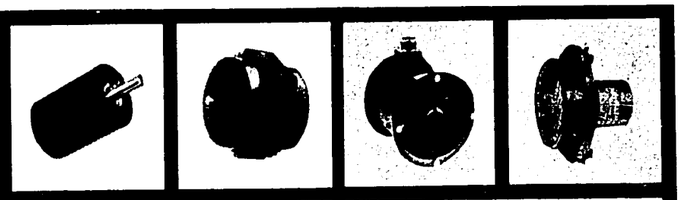
OUR FIELD ENGINEERS WILL GLADLY ASSIST YOU IN YOUR COOLING PROBLEMS



BLOWER AND FAN TYPES OFFERED

Centrifugal and Vane Axial Blowers, Blower Housings, Axial Flow Fans.

TYPES OF SUB-FRACTIONAL MOTORS MANUFACTURED:

Induction, Hysteresis Synchronous, Reluctance Synchronous, Servo, Gear and High Slip Induction.

BLOWERS

C F M	to 750 max.
Types	Single, double, inverted
Housings	2¼" to 11¼", vertical, overall
Mountings	Flange, foot, cone

MOTORS

Horsepower	1/500th to ½ h.p.
Speeds	3600 rpm max. at 60 cps 24,000 rpm max. at 400 cps Dual and Variable Speed Units
Frequency	Fixed . . . 50, 60 or 400 cps Variable . . . 50 to 450 cps, and 320 to 1,000 cps Special . . . as required
Voltage	Standard 115V and 230V Special . . . as required
Phase	1, 2 or 3 phase
Size	1" O.D. to 4¾" O.D.

FANS

C F M	to 1000 max
Types	Axial, vane axial, ALTIMATIC ®
Blades	2" to 12" dia.
Mountings	Venturi, foot.

Air Marine motors and cooling units have been designed and tested to meet the specifications of both the military and industry.

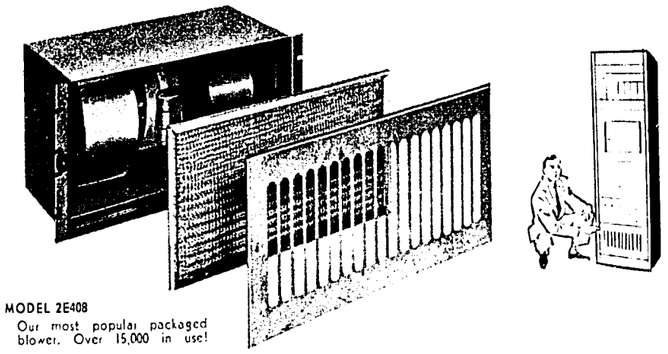
McLEAN

for the World's Finest and Largest Line of Electronic Fans and Blowers



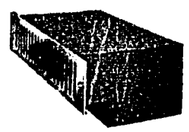
MODEL 2E408
Our most popular packaged blower. Over 15,000 in use!

McLean fans and blowers are compact, packaged units that pressurize the cabinet with cool, filtered air, preventing dust from entering through cracks or joints. The units are complete, and ready for use. No cutting or fitting is necessary . . . standard EIA notching is used. All units contain easily replaceable filters, Smart, stainless steel grilles eliminate the necessity of matching special finishes. All components provide long service-free life, reliability, long-term economy, maximum safety and quiet operation.

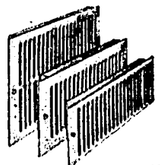
SPECIFICATIONS FOR 19" RACK MODELS

Panel Height	Model	CFM	Remarks	Type
3½"	2E300E	150	Case Height 5½" Recessed	Blower
5¼"	2E300A	150	Basic Model	Blower
5¼"	3E40B	180	For Low Rear Head Room	Propeller
5¼"	2E408E	300	Case Height 7" Recessed	Blower
7"	2E408A	300	Basic Model (Silent Operation)	Blower
7"	2E55B	250	Basic Model	Propeller
7"	M2E55B	300	400 Cycle Mil-Spec	Propeller
7"	2EB508E	500	Case Height 8¾" Recessed	Blower
8¾"	2EB508A	500	Basic Model	Blower
8¾"	2E80B	475	Basic Model	Propeller
8¾"	2EB610E	800	Case Height 10½" Recessed	Blower
10½"	2EB610A	800	Basic Model	Blower
10½"	2EB08S1	500	Basic Model	Propeller
10½"	1EB800	1000	Case Height 12¼" Recessed	Blower

Modifications of Above Models Can be Made to Other Width Racks



RECESSED MODELS
For maximum air delivery where panel space is limited.



FILTER GRILLE ASSEMBLIES
For cabinets lacking sufficient louvre area to permit an adequate air change.

RING AND PANEL FANS
Mount easily and quickly against bottom, top or sides of cabinet with shaft in any position.

SINGLE AND DUAL CENTRIFUGAL BLOWERS
For spot cooling, pressurizing or general purpose use where filtered air is not essential.

HALF PANEL WIDTH FANS AND BLOWERS
For narrow width panels or full width where space is a problem. Same high quality as full width units.

REVERSIBLE FANS
Easy to install, great mounting flexibility. Can be installed as blow or suck.

ARCO

Leader in

precision

FILM CAPACITORS

ARCO FIRSTS IN PLASTIC FILM CAPACITORS

- 0.05% TOLERANCE
- 0.05% STABILITY
- RELIABLE 100°C POLYSTYRENE
- CONTROLLED LINEAR TEMPERATURE COEFFICIENT
- ZERO TEMPERATURE COEFFICIENT
- 10^{12} OHM INSULATION RESISTANCE POLYSTYRENE
- MINIATURE CAPACITOR STANDARDS
- TEMPERATURE STABLE R-C NETWORKS

These achievements are fully documented and the listed characteristics uniformly reproducible. All Arco specifications are conservative limits which can be expected of each capacitor made. The expressions "typical" and "average" will never apply.

We solicit inquiries on special capacitor design problems and also engage in formulation and construction of stable, precise R-C networks and capacitor assemblies.

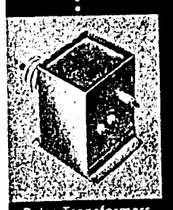
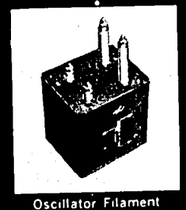
HIGH POWER MATCHED PULSE COMPONENTS

Pulse Forming Networks



Pulse Transformers

Charging Reactors



Oscillator Filament Transformers

FEATURES

- Stable performance at High Temperatures
- Widest Range and combination of Electrical parameters
- Oil filled units hermetically sealed in welded seam cases
- Designed to meet exact system requirements
- Meets and exceeds all Mil requirements

Axel Pulse components are designed for use in Industrial, Military and Research application where electronic equipments demand a specific energy impulse of accurate shape and duration. All Axel Pulse Components have a high reliability and are designed to meet minimum space and weight requirements.

Axel

AXEL ELECTRONICS, INC.
134-20 Jamaica Ave., Jamaica 18, N. Y.

High Voltage Capacitors, Pulse Magnetic Components, Pulse Networks, Pulse Packages, R.F. Suppression Filters.

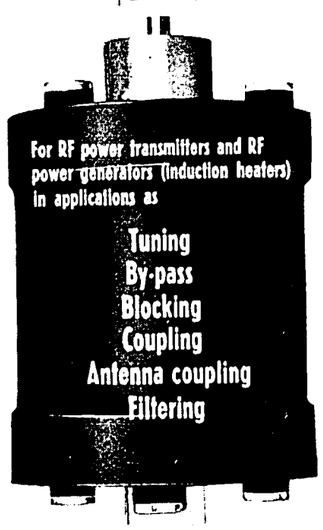
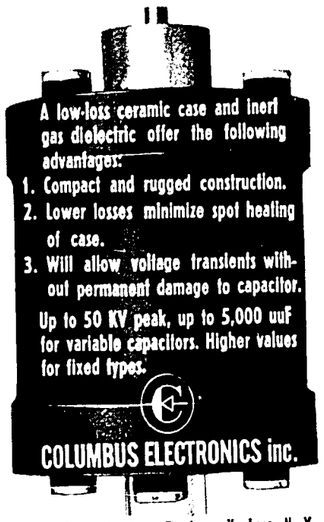
COLUMBUS ELECTRONICS

HIGH VOLTAGE VARIABLE AND FIXED R F CAPACITORS



For RF power transmitters and RF power generators (induction heaters) in applications as

Tuning
By-pass
Blocking
Coupling
Antenna coupling
Filtering



A low-loss ceramic case and inert gas dielectric offer the following advantages:

1. Compact and rugged construction.
2. Lower losses minimize spot heating of case.
3. Will allow voltage transients without permanent damage to capacitor.

Up to 50 KV peak, up to 5,000 uuF for variable capacitors. Higher values for fixed types.

COLUMBUS ELECTRONICS inc.

1000 Saw Mill River Road Yonkers, N. Y.
Tel: YOnkers 8-1221 TWX: Yonkers NY-1369

NOTED FOR EXCEPTIONAL PERFORMANCE CHARACTERISTICS

- HIGH TEMPERATURE (Teflon & metalized Teflon) to +250° C.
- PRECISION—STANDARD TYPES (Tol. 0.1%, max. Drift < .05%)
- PRECISION—CIRCUIT TYPES (Close Tol. & High Stability)
- HIGH STABILITY TYPES (< 0.1% Retrace)
- SUB-MINIATURE TYPES
- HIGH INSULATION RESISTANCE— (to 10^{14} ohms)
- LOW TEMPERATURE COEFFICIENT (< 100 ppm)
- LOW DISSIPATION FACTOR— (to .02%)
- LOW DIELECTRIC ABSORPTION— (to .02%)

Balco

SPECIALISTS in
HIGH TEMPERATURE and HIGH PRECISION CAPACITORS

Balco's capacitor division offers a variety of quality capacitor types for conventional and HI-TEMPERATURE application, manufactured under the most rigid standards of the industry.

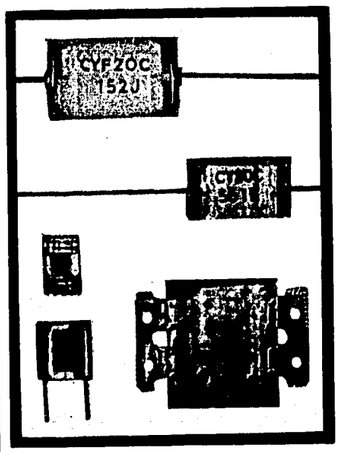
CORNING GLASS CAPACITORS

Most rugged, most compact capacitors you can specify. They're practically indestructible. Made by alternating layers of glass ribbon and aluminum foil and then fusing the mass under heat and pressure. They defy heat, moisture, and other environments.



CY • uuf for uuf, the smallest, most stable axial lead capacitor you can buy. After 2000 hours at 125°C with 150% of full rated voltage, capacitance change is less than 0.5%. MIL-C-11272B.

These range from 1 to 10,000 uuf.

There is also a medium-power style ranging up to 150,000 uuf.

CYF • Fusion-sealed CY capacitors with zero moisture absorption. You can boil these capacitors in salt water for days without affecting their performance. Guaranteed four times better than MIL specs for moisture resistance. From 1 to 5100 uuf.

W, WL • Wafers with or without leads. Smallest high stability capacitors made. Up to 10,000 uuf in 0.061 sq. in. of PCB area. Electrodes sealed to dielectric sheets in such a way that seal cannot be broken without destroying capacitor. Performance of MIL-C-11272A.

Write for data sheets.

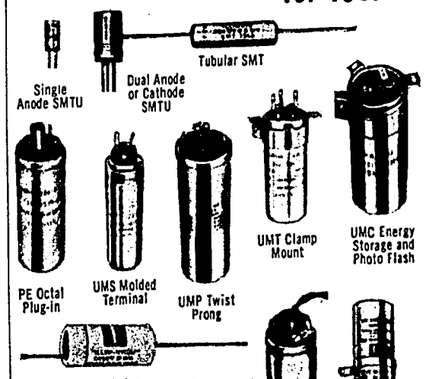
TYPE SMT Miniature

There is a "Time Tested Quality"

ILLINOIS Electrolytic Capacitor for YOUR APPLICATION!



Need electrolytic capacitors in volume, or a few highly specialized units? It's Illinois . . . your first choice source with more than 25 years of experience in research and development and millions of capacitors of "Time Tested Quality" serving industry throughout the world. Illinois Capacitors do the job better because they feature:

- **Wide range of capacities and voltages —from miniatures to heavy duty power pack and energy discharge types.**
- **Excellent low temperature characteristics**
- **Stable, low leakage, high temperature characteristics**
- **Rugged, excellent under severest operating conditions.**

We invite your inquiry.

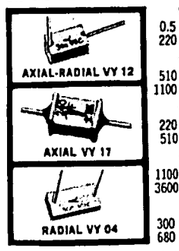
Vitramon® CAPACITORS
molded • bonded • dual lead configurations
high voltage • humidity resistant
wide temperature range

V T.M. solid state
PORCELAIN CAPACITORS
Conforms with MIL-C-11272B

STANDARD TYPES AND VALUES

All series A, AR and R are available in the following values from factory or distributor stocks in 10%, 5%, 2% and 1% tolerances.



VY 12C or VY 13C
0.5 to 200 mmf at 500 vdc
220 to 300 fmmf at 300 vdc

VY 21C or VY 22C
510 to 1000 mmf at 500 vdc
1100 to 2400 mmf at 300 vdc*

VY 16C or VY 17C
220 to 470 mmf at 500 vdc
510 to 1000 mmf at 300 vdc

VY 31C or VY 32C
1100 to 3300 mmf at 500 vdc
3600 to 6800 mmf at 300 vdc**

VY 05C
300 to 620 mmf at 100 vdc
680 to 1200 mmf at 50 vdc

VY 04C
0.5 to 22 mmf at 500 vdc 110 to 220 mmf at 100 vdc
24 to 100 mmf at 300 vdc 240 to 510 mmf at 50 vdc

*2200 and 2400 not available in - Axial Series
**6200 and 6800 not available in - Axial-Radial Series

The superior electrical and mechanical characteristics exhibited by Vitramon® capacitors are attributes of their solid state composition — fine silver electrodes molecularly fused within a solid block of high grade porcelain, forming a monolithic unit that requires no case or hermetic seal.

V K® micro-miniature
CERAMIC CAPACITORS
Conforms with MIL-C-11015/18 and /19

PLANET CAPACITORS ARE

• guaranteed for one year
• engineered for quality

Whether you are a distributor, design engineer or industrial purchasing agent, you will find that our product is good, our service friendly and dependable, and our prices reasonable.

NEW CATALOG SUMMARY

presenting...Jennings Vacuum Components, inherently qualified by their unique use of a vacuum dielectric, to help you solve many difficult design problems of high voltage in limited spaces.

A few minutes inspection of the wide range of vacuum components in this new product bulletin will reveal many design possibilities that ordinary electronic components cannot achieve. The bulletin contains valuable data and specifications on the latest types of Jennings Fixed and Variable Capacitors, Power Switches, Coaxial Relays, Triggered Spark Gaps, Transfer Relays and High Voltage Measuring Equipment.

The following examples illustrate some of the unusual capabilities of Jennings vacuum components:

R6G VACUUM SWITCH WITH MODEL E SWITCH MOUNT

Recommended max. load voltages for max. operating recovery voltage at 50 amps-rms	27 kv
Thermal current (for 30° C rise)	250 amps-rms
Max. interrupting current (10 times)	1500 amps-rms at 9 kv
Withstand voltage (60 cycle 1 min. dry)	36 kv-rms

RB1R VACUUM TRANSFER RELAY

Overall length	2¼ in.
Peak test voltage	18 kv
Continuous current	15 amps-rms
High speed	Over 100 cps
Long life	10,000,000 ops min.

UCSL VACUUM VARIABLE CAPACITOR

Capacity range	7-1000 mmfd
Overall length	7-9/16 in.
Peak voltage	5 kv
Continuous current	40 amps-rms

Send for your copy of this informative catalog today. No charge of course.

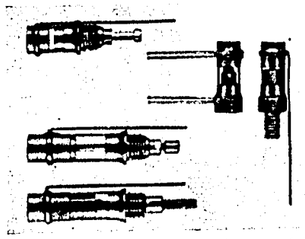
CORNING TRIMMER CAPACITORS AND INDUCTORS



CAPACITORS: Rotary • in three models for high-frequency tuned circuits. Standard: to 12.0 mmfd; split bushing: to 12.0 mmfd; precision: to 4.0 mmfd. Full rating from −55 to +125°C. TC: +50 ±50 ppm/°C. Nonporous silver plating for corrosion resistance available on request.

Direct Traverse • for linear tuning. Full rating from −55°C. to +125°C. TC: +50 ±50 ppm/°C.; 0.5 to 3.0 mmfd; 1.0 to 7.5 mmfd; 1.0 to 8.0 mmfd; 1.0 to 12.0 mmfd.

Mini-Trimmers • for ultrafine tuning. .40 uufA/turn. Fixed cavity tuning. Silver-plated hardware for highest Q and corrosion resistance. Zero derating at 125°C. No backlash. Complete circumference thread contact with direct traverse motion. Panel mount or printed board. 1 to 4 mmfd; 1 to 8 mmfd; 1 to 12 mmfd; 1 to 18 mmfd.

Precision Direct Traverse • When back-of-panel space is critical—other specs are same as for MINI-TRIMMERS, except there is a 1-30 mmfd model.

INDUCTORS: Delivered off the Shelf • 27 values ranging from 0.05 uh to 2.0 uh. High Q, 120 to 250. Frequency range from 10 MC to over 250 MC. High reliability under shock and vibration, since conductor is fired into glass; cannot shift. Low TC: 0 to +20 ppm/°C. Operation range from −55°C. to +125°C. No drift even under drastic dT. For panel or printed board mounting. Standard tolerance is ±10%. ±5% also available above 0.25 uh.

Kit for prototype work contains 10 different inductors with four tuning cores.

For data sheets write to 750 High Street, Bradford, Pa.

ALDEN BUILDING BLOCKS for ELECTRONICS

ALDEN plug-in components for electronic systems

From layout to finished equipment in just 3 steps!

All the convenience and ease of modular packaging . . . plus built-in maintainability and reliability

1. Unitize circuitry in compact, vertical planes with unique Alden Terminal Card Mounting System. Your circuitry is assembled in complete units, ready for housing.

Pre-punched terminal cards

Miniature terminals

Jumper strip (eliminates wiring)

Card mounting sockets

Complete circuits ready for plug-in package or chassis

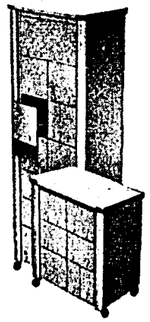
2. Mount cards in Alden Basic Chassis for tremendous flexibility and quick servicing. With spares, units are replaceable in 30 seconds!

Alden Basic Chassis

'Picture Frame Rack Adaptor — for mounting Alden Basic Chassis in any combination. Mounts in standard rack or Alden UniRack.

Alden plug-in packages: 4 sizes — 7, 9, 11, and 20 pin

3. Alden UniRacks for housing subassemblies give you a more compact, serviceable unit. Available in 2 basic heights — mobile or stationary. Easily accessible, front or rear.



ALDEN testing and sensing elements to spot trouble instantly

Miniature test jacks

Miniature indicator lights

Miniature Pan-i-lite switches for momentary contact

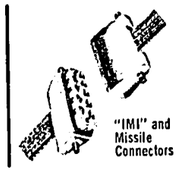
Stacking and patch cords

ALDEN plugs and connectors

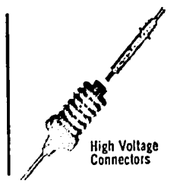
Save time, weight, space in volume production. Leads tailored to your specs, ready for quick assembly

Non Interchangeable Connectors — 2-11 contacts

Tube Cap Connectors



"IMI" and Missile Connectors



High Voltage Connectors

Miniature Signal Connectors

ALDEN electrical components

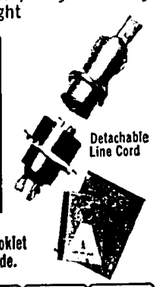
For volume production: combine quick, easy assembly with absolute minimum size and weight

Mini SpACe Convenience Outlets — smallest, most rugged UL-approved convenience outlets available

Mini SpACe Grounding Outlets

440 FH Series Safety Fuseholders

Miniature Indicator Fuseholders



Detachable Line Cord

ALDEN "Get-Started" Kits — For every engineer who wants to save time and money in layout, assembly and packaging. These basic assortments of Alden plug-in components are priced 40% below individual component cost to make it as easy as possible for you to evaluate Alden building block techniques. Individual kits priced from $11.50 to $249.50

Write today for new Alden Booklet and updated Quick-Order Guide.

DESIGN . PRODUCTION . ASSEMBLY

Completely Integrated Service

Printed Circuits for Military and Industrial Electronic Equipment

"Packaging" of circuits, from schematic diagram into Printed Circuit or Modular form.

Production in small or medium quantities — prototypes to a few thousand boards.

Secondary operations: Plating — Fabrication — Assembly — Dip Soldering — Encapsulation.

Rigid Inspection and Quality Control insure the production of High Reliability Printed Circuits to Exacting Specifications.

Ansley | PLUS | Module

Adds a third dimension to printed circuitry. It may answer your design problem. Ask us for details.

PRINTED ANSLEY CIRCUITS

PRINTED CIRCUIT DESIGN and PRODUCTION

ARTHUR ANSLEY MFG. CO.

NEW HOPE, PA. PHONE, AXTEL 7-5050

Write for our booklet . . . "Some Suggestions on Printed Circuit Layout and Design."

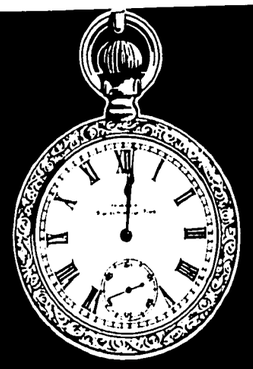
Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 81-226.



WHY DEFIANCE?

Because your two basic problems — production time and narrowing profit margins — are our primary considerations in the manufacture of printed circuits.

DEFIANCE
PRINTED CIRCUIT CORP.
144 COMMERCIAL ST., MALDEN, MASS.

Electralab Printed Electronics Corporation

EPEC

Printed circuitry by E P E C meets the rigid specifications of use in missiles, guidance systems, computers and quality instruments from *THREE Separate and Complete* facilities: plants in Needham Heights, Natick, Massachusetts and Encinitas, California.

These plants are producing today—

- **PRINTED WIRING & ASSEMBLY**
- **DIELOX—circuits on aluminum base**
- **CU-CON PLATED HOLES**
- **PROTOMAKA, the laboratory unit for 'do-it-yourself' processing of printed wiring boards.**

"World's Largest and Most Experienced Independent Manufacturer"

Photocircuits CORPORATION

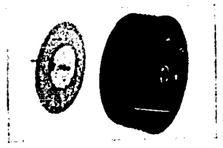
GLEN COVE, NEW YORK ORiole 6-8000
PHOTOCIRCUITS CORP. OF CALIF.
ANAHEIM, CALIFORNIA KEllogg 2-3338

PRODUCTION CAPACITY
complete job shop facilities

You can have the world's largest and most flexible printed-circuit manufacturer at your service. Whether it's 100 or 1,000,000 boards, IBM punched card scheduling, experienced production people and stringent quality control methods assure you dependable quality and reliability . . . on time.

TUF-PLATE HOLES
reliable thru-hole construction

PC's famous plated-thru holes are substantially more reliable than eyelets under experimental cycling. Will pass MIL-E-5272A without a failure. Plating is dense, ductile and fine grained. Tuf-Plate holes assure reliable dip soldering as a homogenous portion of your circuitry.

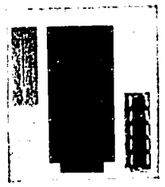


PRINTED DC SERVO MOTORS
provide direct drive

PMI permanent magnet dc motors feature a disc-type armature with no rotating iron. They are ideal for instrument applications requiring unusually low inertia, smooth torque, high pulse torque capability, and minimum inductance. Applications include positioning servos, tape reel drives, numerical positioning devices, and intermittent motion systems.

MINIFY
tested and proven miniaturization

Landless, plated thru-hole construction saves up to 80% of board space. Components are the size limiting factors, not the circuitry. Each board has the same Tuf-Plate reliability—production proven in thousands of military uses.



PHOTOELECTRIC TAPE READERS
whisper-quiet operation

Direct tape drive from the printed motor makes Photocircuits tape readers unusually quiet, reliable and maintenance-free. The absence of brakes, clutches and pinch rollers eliminates the usual difficulties encountered with conventional tape transports. Line-by-line reading at speeds up to 300 characters per second. All models completely transistorized.

Timely tech bulletins written for engineers and designers who wish to keep pace with the newest developments in printed circuitry. Bulletins give specifics on materials, layout, design, assembly, etc. To receive them contact your nearest PC field office.

TECHNICAL BULLETINS
up-to-the-minute literature

Streamlined prototype system puts finished boards in your hands quickly. From quote to shipment, your requirements are handled rapidly . . . in a matter of hours. Complete and separate from general production, the Proto-Circuits Division is staffed by experts to help you with money-saving pre-production boards.

PROTO-CIRCUITS DIVISION
fast service on prototypes

ENCAPSULAYER: a multiple layer printed sandwich allows high packaging densities through TUF-PLATE plated hole interconnections. Ideal for miniaturized back panel wiring.

CERAMICIRCUITS: provide ceramic-based printed circuits for applications requiring special mechanical and electrical stability.

NEW PRODUCT DEVELOPMENTS

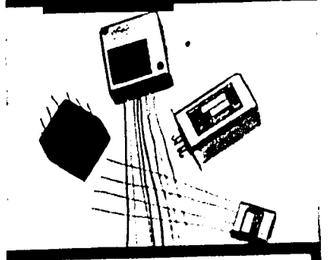
M F TRANSISTORIZED PACKAGES



We have made many types of transistorized packages engineered for the particular application. Examples are flip flops, binary, octal and decade dividers, multivibrators, oscillators and amplifiers.

We have also designed and made power supplies and inverters, which have met unique black box specs.

The next time you have a transistor application For base Specification, won't you let us give you a quote.

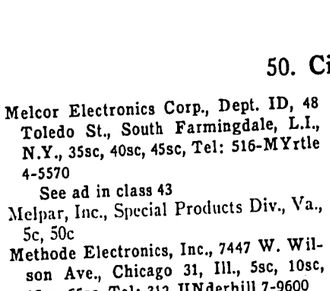
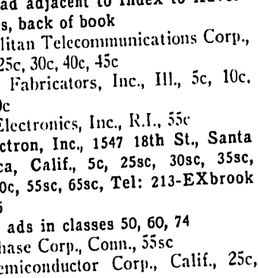
Premier's unique skills and facilities
HIT THE BULLSEYE
for both engineer and buyer



PRINTED CIRCUIT STRIPLINE FILTER



PRINTED CIRCUIT MIXER

ENGINEERS can depend upon Premier to meet the most exacting microwave component specifications and deliver complete uniformity and operating performance.

BUYERS find at Premier facilities geared to produce competively as well as design engineering which can often effect further economies through more accurate interpretation of performance requirements and improved working efficiency.

Whether a standard waveguide unit or an intricate new design, bring your problem to Premier . . . Premier will bring the answer to you.

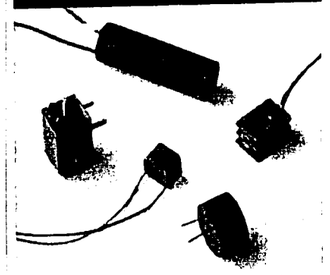
COILS



Designed and Produced by Forbes and Wagner
The F & W specially designed coils shown above have solved specific problems. We will be glad to put our coil experience to work for you.
Typical F & W Coils
Relay • R. F. Transformers and Chokes • Saturable Reactors • Variable Inductors • Toroidal
Available in open construction, encapsulated and hermetically sealed. F & W encapsulated units meet the requirements of MIL-C-15305.

The coil shown here was developed to supply a 2500 V pulse for triggering a flash lamp from a 30 V source. This unit is subject to 10 KV test.

Encapsulated Inductances

Millen DESIGNED for APPLICATION encapsulated coils provide another advance in the r-f inductor field. Modern application requires miniature, heat and cold resistant, hermetically sealed, and abrasion resistant r-f inductor assemblies. The James Millen Manufacturing Company has pioneered many advances in the r-f inductor field, including the now standard 4 pi r-f choke, the axial lead r-f choke, and the miniature r-f choke. Developments have now made possible another advance, the No. 34301 and No. J301 encapsulated inductors—hermetically sealed—miniature size. Ambient temperature minus 55 degrees to plus 100 degrees C.

NO. J301 MINIATURE ENCAPSULATED INDUCTANCES

DESIGNED for APPLICATION miniature inductances are: extremely small (see table at right)—hermetically sealed—wound on axial lead Carbonyl cores—color coded. Coils are available in EIA standard values plus 25, 50, 150, 250, 350, 500, and 2500 microhenries. Current rating 100 to 1450 milliamperes depending on coil size.

NO. 34301 STANDARD ENCAPSULATED INDUCTANCES

Encapsulated DESIGNED for APPLICATION axial lead phenolic form r-f inductances. Hermetically sealed—heat resistant—abrasion proof—color coded. 0.15 to 2500 microhenries available in EIA standard values plus 25, 50, 150, 250, and 350 microhenries. Inductance ± 5%. Values available in same progression as J301 coils listed in the table at the right. Current rating 250 to 2800 milliamperes, depending on coil size. Ambient temperature range—minus 55 degrees to plus 100 degrees Centigrade. Size 3/16 inches diameter × 9/16 inches long to 3/8" × 7/8".

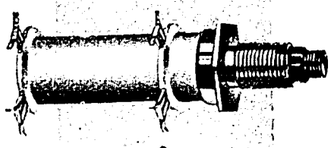
NEW



TERMINAL DESIGN

ON ALL THE

DELEVAN

DELEFORMS

- Each terminal has two rigid tabs for circuit connections.
- Completely safe as terminal is insulated from coil form by a fiberglass collar.
- Coil winding connections are made to base of terminal leaving tabs clean and free for attachments.
- Solder connections are easily made on the "Y" type terminal tabs.

ALSO *Introducing*

Two New Series to the Industry's Widest Range of Standard Molded Coils.

SERIES 200

TAPER-LOCK has a small taper nut, positively locking the insert core.

SERIES 220

TORK-TITE has a split coupling, which guarantees optimum torque, yet cannot bind or freeze.

These new Variable Coils are molded for maximum protection and reliability. The core design of each Series permits use for chassis mounting or for printed circuit applications. Standard values from .15uh to 36MH.

51. Coils.

Eitel-McCullough, Inc., 301 Industrial Way, San Carlos, Calif., 40c, 55c, Tel: 415-LYtell 1-1451
See ad on pages 29-32

El-Rad Mfg. Co., Ill., 5c, 10c, 20c, 25c, 30c, 40c, 60c, 65c

Electran Mfg. Co., 1901 N. Clybourn Ave., Chicago 14, Ill., 15c, 50c, Tel: 312-BIttersweet 8-4596
See ad in class 84

Electric Wave Filters, Inc., Puerto Rico, 20c, 60c

Electrical Windings, Inc., Ill., 5c, 15c, 25c, 40c, 45c, 50c, 55c

Electro Assemblies, Inc., Ill., 10c, 20sc, 25c

Electro-Craft Corp., Minn., 50c, 55c, 60c

Electro Development Corp., Wash., 5c, 10c, 15c, 50c

Electro Engineering Works, Calif., 15c, 25c, 35c, 40c, 50c

Electro Networks, Inc., & Caledonia Electronics & Transformer Corp., N.Y., 5c, 15c, 25c, 60c

Electro Winders Co., Inc., Calif., 5c, 10c, 15c, 20c, 25c, 35c, 40c, 45c, 50c, 55c, 60c, 65c

Electrodynamic Instrument Corp., Texas, 5c, 10c, 15c, 55c, 60c

Electron Arc Div., Ionics, Inc., 244 Broad St., Lynn, Mass., 5c, 20c, 25sc, 50c, 55c, Tel: 617-LYnn 8-2100
See ad in class 69

Electronic Coils, Inc., Mass., 10c, 20c, 40c, 45c, 50c, 55c, 60c

Electronic Components Corp., Ill., 15c

Electronic Production & Development, Inc., Calif., 60c

Electronic Research Associates, Inc., N.J., 5sc, 15sc, 25sc, 40sc, 50sc, 55sc, 60sc

Endicott Coil Co., Inc., 24 Charlotte St., Binghamton, N.Y., 40c, 45c, 55c, Tel: 607-SWarthmore 7-1263
See ad in this class

Engineering Specialties, Ohio, 60c

Ensign Coil Co., Ill., 5c, 25c, 45c, 55c

Epco Products, Inc., N.Y., 5c, 15c, 25c, 60c

Epsco, Inc., Mass., 50c

Erie Resistor Corp., 644 W. 12th St., Erie 6, Pa., 60sc, Tel: 814-GLendale 6-8592
See ad on pages 78-79

Espey Mfg. & Electronics Corp., N.Y., 5c, 10c, 15c, 20c, 25c, 30c, 40c, 45c, 50c, 55c, 60c

Fairfield Controls, Inc., Conn., 5c, 15c, 25c, 50c, 60c

Ferricore, Inc., N.J., 60c

Ferritronics, Ltd., Canada, 25sc, 65c

Ferro Magnetics Co., Calif., 5c, 10c, 15c, 20c, 25c, 30c, 60c

Ferrotran Electronics Co., Inc., N.Y., 5s, 10s, 15s, 20s

Fisher Engineering, Inc., Ind., 5c, 10c, 15c, 20c, 25c, 40c, 45c, 50c, 55c, 60c

Five Star Co., Inc., Conn., 40c, 45c, 55c

Forbes & Wagner, Inc., 350 Central Ave., Silver Creek, N.Y., 25c, 50c, 60c, Tel: 716-YEllowstone 4-2691
See ads in classes 33, 51, 57, 84

Forest Electric Co., Ill., 5c, 15c, 25c, 40c

Fortiphone, Ltd., Components & Transformer Divs., England, 5sc, 20c, 25c, 45c, 60c

Foster Transformer Co., Ohio, 5c, 15c, 25c

Freed Transformer Co., Inc., 1718 Weirfield St., Brooklyn 27, N.Y., 5sc, 15sc, 25sc, 50sc, 60sc, Tel: 212-EVergreen 6-1300
See ad in class 84

Friend Engineering (Albert W.), Pa., 35c, 40c, 55c, 60c

Fugle-Miller Laboratories, Inc., N.J., 10c, 15c, 20c, 25c, 40c, 45c, 50c, 55c, 60c, 65c

Fuji Communication Apparatus Mfg. Co., Ltd., N.Y., 70c

G C Electronics Co., Div. of Textron Electronics, Inc., Ill., 30s

Galbraith-Pilot Marine Corp., Div. of Marine Electric Corp., N.Y., 5c, 15c, 25sc

Gates Electronic Co., 2243 White Plains Rd., New York 67, N.Y., 15s, Tel: 212-TUlip 1-5900
See ad in class 69

Gates Radio Co., Ill., 5s, 10s, 15s, 20s, 65s

Gemco Electric Co., Mich., 50sc, 60sc

General Coil Products Corp., N.Y., 5c, 10c, 15c, 20c, 25c, 40c, 45c, 55c, 65c

General Dynamics/Electronics, N.Y., 45sc

General Electric Co., Apparatus Sales Dept., N.Y., 55s

General Instrument Corp., Automatic Mfg. Div., N.J., 10c, 20c

General Instrument Corp., Defense & Engineering Products Group, N.Y., 5c, 10c, 15c, 20c, 25c, 30c, 35c, 40c, 45c, 50c, 60c, 65c, 70c

General Instrument Corp., F.W. Sickles Div., 165 Front St., P.O. Box 330, Chicopee, Mass., 10c, 20c, 25c, 30c, 50c, 55c, 60c, 70c, Tel: 413-LYceum 4-4781
See ad in class 57

General Magnetics, Inc., 2641 Louisiana Ave., Minneapolis 26, Minn., 5c, 10c, 15c, 20c, 25sc, 50c, 55sc, 60c, Tel: 612-WEst 9-8571
See ad in class 43

General Motors Corp., Delco Radio Div., Ind., 5c, 10c, 20c, 25c

General Radio Co., 22 Baker Ave., West Concord, Mass., 15s, Tel: 617-EMerson 9-4400
See ad on Cover 4

General Time Corp., N.Y., 60c

General Winding Co., Inc., N.Y., 35c, 70c

Genistron, Inc., Calif., 20c, 25c

Geotronic Laboratories, Inc., Texas, 5c, 15c, 25c, 40c, 50c, 60c

Gilfillan Brothers, Inc., Calif., 20c, 25c, 30c, 60c

Gorman Machine Corp., 480 S. Main St., Randolph, Mass., 60c, Tel: 617-WOodlawn 3-7333
See ad in class 99

Gramer Halldorson, Ill., 5sc, 10sc, 15sc, 20sc, 25sc, 30sc, 35sc, 40sc, 50sc, 60sc, 70sc

Grand Coil Winders, Mich., 5c, 15c, 25c, 55c

Grand Tran, Inc., Mich., 5c, 15c, 25c, 40c, 45c, 55c

Grand Transformers, Inc., Mich., 5c, 15c, 25c, 40c, 45c, 50c, 55c

Green Rectifier Co., N.J., 15sc

Gresham Transformers, Ltd., England, 5sc, 15c, 50c, 60c

Guardian Electric Mfg. Co., 1572 W. Carroll Ave., Chicago 7, Ill., 40c, 45c, Tel: 312-CHesapeake 3-1100
See ad in class 73

Gudeman Co., Ill., 60c

Gudeman Co. of California, Inc., Calif., 60c

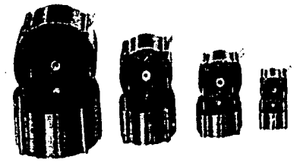
Gulow Transformer Co., Inc., N.J., 5s, 10s, 15s, 20s, 25s, 40s, 50s, 60s

Gulton Industries, Inc., N.J., 60sc

Hadley Co., Inc. (Robert M.), Calif., 5c, 15c, 25c, 50c, 55c, 60c, 65c

Hamilton Hall Resistor Corp., Wis., 20c

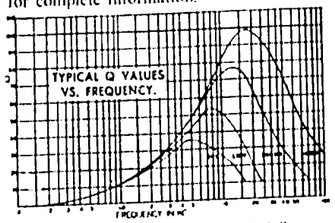
TOROIDUCTORS



STANDARD TOROIDAL INDUCTORS

VERSATILE DESIGN FOR WIRED CIRCUIT AND PRINTED CIRCUIT APPLICATIONS

Built to the highest standards of precision and quality. Inductance values from 3.3 MH to 33 H with DC Resistance and Distributed Capacity values to meet almost every requirement. Available in many core materials to meet your specifications. Write for complete information.



Toroiductors meet the requirements of MIL-T-27A

forbes and wagner, inc.

350 Central Avenue

Silver Creek, N. Y. • Phone YE 4-2691

For details, circle #309 on Reader Service Card

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 81-226.

OVITRON

SPECIALIZED SOLUTIONS TO DIFFICULT PROBLEMS!

STANDARD WINDING DIVISION

QUALITY WOUND COMPONENTS FOR MILITARY, INDUSTRIAL AND COMMERCIAL APPLICATIONS: Inductors RF and IF Coils • Telephone Repeater Coils • Transformers Choke Coils • Discriminators Solenoids • Mag Amps • Toroids • Filters • Electronic Sub-Assemblies.

HODGE CONTROLS DIVISION

ULTRA-PRECISION ROTATING COMPONENTS FOR HIGH-PERFORMANCE, HIGH-RELIABILITY SYSTEMS: Magnetic Iron Powder Clutches, Brakes and Clutch-Brakes, sizes 9, 11, 15 and 18. Exclusive Dry Magnetic Particle Designs • High-efficiency AC Micro-Motors, sizes 8 and 10 • Electromechanical Packages.

POWER CONTROLS DIVISION

SOLID-STATE POWER HANDLING EQUIPMENT UTILIZING SCR TECHNIQUES: Silicon Controlled Rectifier Triggers High output, steep wavefront, uniform firing • 60 cps, 400 cps • SCR Power Amplifiers Servo Amplifiers • Temperature Controllers • Lighting Dimmers • Motor Speed Controls • Static Switches • DC-AC Inverters • DC-DC Converters Line Voltage Regulators.

WHY

MAJOR C. R. TUBE MFGRS. RECOMMEND SYNTRONIC YOKES

Exceptional manufacturing uniformity. Achieved by unique pepperpot tube testing—the most comprehensive method known for precise measurement for spot uniformity . . . to attain extremely accurate focusing. For technical details, request ELECTRONIC INDUSTRIES reprint #6-57 from Syntronic Instruments, Inc.

TOROTRON

designers and manufacturers of a complete line of

• TOROIDAL INDUCTORS • TOROIDAL TRANSFORMERS • WAVE-FILTERS • MAGNETIC AMPLIFIERS • STATIC INVERTERS • DECADE INDUCTORS

Our complete catalog of Toroidal Components includes:

TOROIDAL INDUCTORS. A complete standard line of Toroidal Inductors covering the frequency range up to 10 Megacycles. High Q characteristics for size and weight requirements of portable and airborne equipment. Inductance to 50 henry. Size from ⅛" ID to 8" OD. Inductance Tolerance ± 1%. Availability of units, **Open, Hermetic cased and epoxy Molded.** All units except open type are made to MIL-T-27 specification.

TOROIDAL TRANSFORMERS. Covering frequency range up to 10 megacycles.

FILTERS. Telemetering band-pass filters available for every channel ranging from 400 cps to 70,000 cps. and various bandwidths between 15% and 40%.

MAGNETIC AMPLIFIERS. Torotron manufactures an extensive line of magnetic amplifiers ranging from saturable reactors to fast response servo amplifiers.

STATIC INVERTERS. Torotron makes available a line of static inverters DC to DC—DC to AC. **Construction:** 1. Hermetically sealed. 2. Form (open) modular.

DECADE INDUCTORS. Hi precision decade inductors. Inductance Tolerance ± .25%. Inductance range from 1 Mh steps to 10 Hy steps. Hi Q up to 300.

Dept. D

Torotron also offers qualified engineering assistance, in designing to customer specification.

ELECTRICALLY-VARIABLE INDUCTORS

VARI-L®

The accepted means for non-mechanical control of inductance, reactance, and resonant frequency

We have over seven years experience in this exclusive field. Let us assist you in the selection of a Vari-L unit suitable to your purpose.

STANDARD VARI-L CONFIGURATIONS illustrated here include approximately 30 tried-and-proven designs of broad utility. All are encapsulated and hermetically sealed, often meet customer requirements as is, and are carried in stock. Their characteristics are tabulated below. In addition we have tailored some 200 "specials" to exact and varied specifications, including subminiature and printed-circuit types.

Send us your specifications for evaluation without obligation.

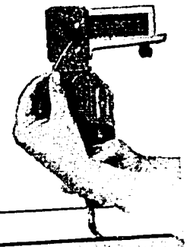
BURNDY READY REFERENCE CONNECTION SELECTOR CHART



Photographs of products are not to scale.	DEFINITIONS	TYPES	FEATURES
HYFEN®	Plug and receptacle connectors with crimp-type, snap-locked contacts.	Miniature rectangular, rack and panel, general purpose, modular, plug-in relay base, printed circuit—pin and edge type, coaxial—miniature and standard, BANTAM, round.	Tool-installed crimped contacts are individually or gang connected and disconnected. Extremely versatile and reliable. Quality materials used for inserts and contacts which are normally gold plated. Modular concepts.
STAPIN®	Solid shank, solid barrel taper pins for wire terminations in variety of receptacles.	Sealed, terminal blocks, modular frames and inserts, coaxial, console mount, bussed, stacking strips.	Rugged solid construction provides protection against repeated and rough handling. Tool-installed STAPIN quality-controlled by tooling.
UNIRING® • HYRING® 	Compression sheath connector for terminating and grounding shielded or coaxial cable.	one-piece UNIRING, two-piece HYRING, both in complete size ranges.	Tool-installed, eliminates possible heat damage to conductors, dielectric, and insulation. Both available preinsulated or uninsulated. Conforms to MS25311 and MS25312 (AER).
MODULOK® • CRABLOK® 	Quick-disconnect or permanently-connected terminal blocks.	2- or 4-tier MODULOK, 5- or 15-bay CRABLOK.	Extremely versatile modular design. Reliable electrical contact in both quick-disconnect or permanent connection position. Tool-installed crimp-type contact tips.
INSULUG® • HYLUG® 	Compression terminals, splices.	Round, fork, right angle, flag, high temperature insulated and uninsulated.	Hand, semi-automatic, and fully automatic tooling—with removable dies—provide up to 1000 quality-controlled connections per hour.
WIRING SPECIALTIES	Cable hangers, pigtail splices, strip terminals.	NYLOCLIP® BURCAP® FINGRIP®	Compression connections, tool controlled. NYLOCLIP strong, light, environmentally resistant.

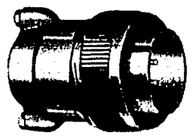
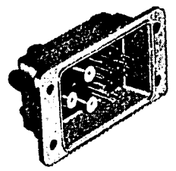
Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 81-226.

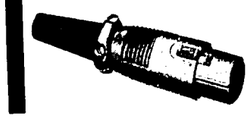
GENERAL CIRCUITRY AND QUICK DISCONNECT MS Series, MS Types, K Series. MS plugs meet MIL-C-5015; include environmental resistant types, and feature low cost, uniform quality, interchangeability, and wide variety of contact arrangements. A wide variety of shell sizes and types are available to meet all general-purpose applications. The K Series are lightweight, rugged, all-purpose plugs—have many of the features of the MS Series. The K line features a special Acme threaded coupling. Crimp snap-in contacts are available in some MS types.



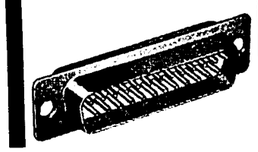
RACK/PANEL Dual panel rectangular plugs have a wide variety of contact arrangements and shell sizes. Rectangular shape increases insert area utilization, simplifies assembly, provides maximum flexibility for module or unit plug-in applications. Available in environmental resistant types; coaxial and high voltage contacts, solder or crimp snap-in.



AUDIO AND LOW LEVEL CIRCUITS P, XLR, XK, O, UA Series for all low level sound requirements. Full line of plugs for all requirements of microphone, radio, television, tape recorders, computers, control devices, and many other applications. In many shell sizes and contact layouts, coaxials. Latch-lock types, wall mounting, panel, locknut mounting, and adapter receptacles. Line includes the deluxe streamlined XLR Series.

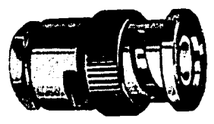


MINIATURE SERIES KQ/KR, KM, K-Miniature, DPA, DPX, Golden-D. *Circular Miniature Plugs* designed for aircraft, missile and other applications where space and weight are critical. Include environmental resisting, crimp snap-in contacts, quick-coupling devices, monobloc construction, hermetically sealed versions. *Miniature Rectangular Plugs* meet weight and space limitations in rack/panel installations. Range from lightweight sub-miniatures to small plugs of great strength. Coaxial layouts, hermetically sealed versions, crimp snap-in contacts.



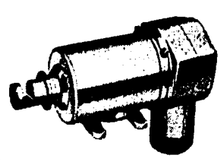
CANNON PLUGS FOR ANY APPLICATION OR ENVIRONMENT

HERMETICALLY SEALED Available in most popular plug lines. Includes the first Series approved to MIL-C-25955, which requires leakage rates of less than .001 micron cubic foot per hour (1.5×10^{-8} cc/sec.). Plugs for all hermetic applications—standard or custom designs, with some series designed to withstand extreme thermal shocks, temperatures from —100°F to 1000°F, pressures above 2000 psi.



COAXIAL RF SERIES Available in a wide variety of types from subminiatures to large cable applications. For use in thousands of military, industrial, and commercial applications. Meet extreme environmental conditions. Hermetically sealed versions, weight-saving aluminum versions available. Full line of RF plugs meets all requirements from ground based equipment through outer space.

UMBILICAL PLUGS AND PLUG/HARNESS SYSTEMS Designed for the specialized demands of missile launching; provides the utmost reliability in connections between complex electronic systems within a missile and a master control point or other ground systems. Compatible with any method of launching, any method of engagement or release. Plug/Harness systems are designed, manufactured, and tested as a unit under rigid, quality-controlled conditions in a separate, highly specialized facility. The ability to combine specified plugs and cables into one complete unit provides a single responsibility for performance of the complete plug/harness system—assures the highest reliability.



MAGNETIC DEVICES A wide range of magnetic actuating devices for military, industrial, and commercial applications. AC and DC solenoids; linear, rotary and reciprocating actuators for computers, business machines, environmental, and special design. Push, pull, Push-Pull; high temperature, potted, hermetically sealed. Broad power ranges, input voltages in 6, 12, 24, 36, 115, and 230 dc and ac.

For more than four decades Cannon has been solving critical plug problems for every conceivable military and industrial application. Our wide variety of plugs—more than 27,000 designs—are available to meet such problems of modern technology as *shock, vibration, acceleration, temperature, altitude, moisture,* and *miniaturization*...Cannon plugs are the standard of the industry for use in aircraft, missiles, ground support equipment, computers, data processing devices, business machines, radio, television, and many other standard and special applications. For additional information on the typical designs illustrated, or other types to meet your individual requirements, write to:

CANNON ELECTRIC COMPANY, 3208 Humboldt Street, Los Angeles 31, California

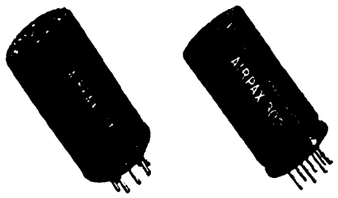
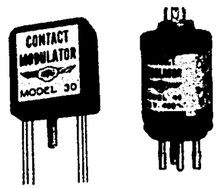
AIRPAX

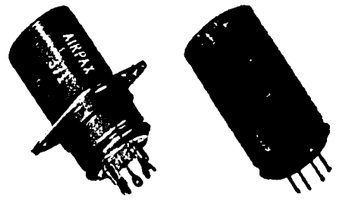
CHOPPERS
CIRCUIT BREAKERS
TELEMETRY SYSTEMS
MAGNETIC COMPONENTS



Miniature hermetically sealed electromechanical CHOPPERS for stabilized DC amplifiers used in computers, servos, bridges and control systems. TYPE 175 has 60 CPS drive; TYPE 300 uses 400 CPS drive.

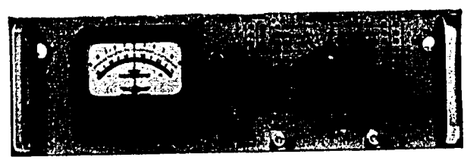


These tiny CHOPPERS have the same long-life reliability characteristics as their larger counterparts. MODEL 30 is for 60 CPS operation; MODEL 46 uses a 400 CPS drive.

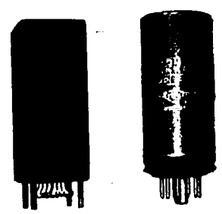


TYPE 371 uses center pivoted armature construction to permit operation under conditions of severe shock and vibration. TYPE 6025 is a transistor chopper with self contained drive transformer. Drive, 50 to 5000 CPS.

The MAGMETER® frequency detector delivers an output current directly proportional to input frequency with an accuracy of 0.1%.

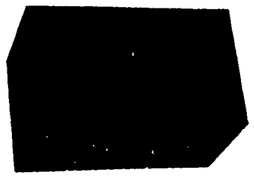


The CALIBRATOR series of frequency discriminators utilizes solid state components for long trouble-free life. Available in single and multi-channel units.

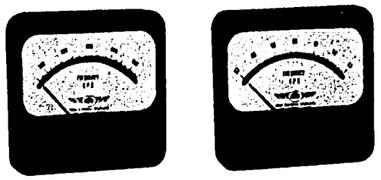


PREAC magnetic amplifiers are high sensitivity DC units with an extremely stable null. FERRAC instrument push-pull magnetic amplifiers have exceptional stability and linearity.

Miniature CIRCUIT BREAKERS of the magnetic type are available in ratings from 50 ma. to 15 amps.



Custom TRANSFORMERS are produced to exacting requirements. Rigid QC procedures assure highest reliability.



Expanded scale FREQUENCY METERS with an accuracy of 0.1% are completely self contained.

Illustrations are representative of the devices which Airpax produces. A complete line of choppers, both electromechanical and transistor types, cover every conceivable condition of use.

Telemetry equipment, employing solid state components, uses a single front panel switch in the multi-channel type to select each of the 23 IRIG information channels. The Airpax MAGMETER® frequency detector is the "heart" of these devices.

The circuit breaker line features both military and commercial types with or without isolated indicating circuits. Breakers are available in series, shunt and relay types and in ganged assemblies for 2 and 3 phase circuit protection.

ATR PRODUCTS FOR MODERN LIVING

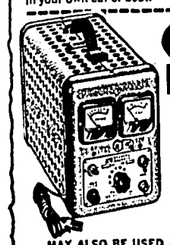
ATR PLUG-IN TYPE PORTABLE INVERTERS*

A.C. HOUSEHOLD ELECTRICITY Anywhere . . . in your own car!

Operates Standard A.C.
- Record Players
- Dictating Machines
- Small Radios
- Electric Shavers
- Heating Pads, etc.

In your own car or boat!

MODELS
6-RMF (6 volts) 60 to 80 watts. Shipping weight 12 lbs. DEALER NET PRICE $33.00
12T-RME (12 volts) 90 to 125 watts. Shipping weight 12 lbs. DEALER NET PRICE $33.00
*Additional Models Available



ATR "A" Battery ELIMINATOR

For Demonstrating and Testing Auto Radios—TRANSISTOR or VIBRATOR OPERATED!

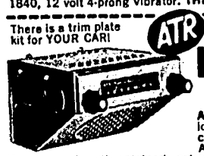
Designed for testing D.C. Electrical Apparatus on Regular A.C. Lines—Equipped with Full-Wave Dry Disc-Type Rectifier, assuring noiseless, interference-free operation and extreme long life and reliability.

MAY ALSO BE USED AS A BATTERY CHARGER
MODEL 610C-ELIF . . . 6 volts at 10 amps. or 12 volts at 6 amps. Shipping weight 22 lbs.
DEALER NET PRICE $49.95
MODEL 620C-ELIT . . . 6 volts at 20 amps. or 12 volts at 10 amps. Shipping weight 33 lbs.
DEALER NET PRICE $66.95

AUTO-RADIO VIBRATORS

By every test ATR Auto-Radio Vibrators are best! . . . and feature Ceramic Stack Spacers, Instant Starting, Large Oversized Tungsten Contacts, Perforated Reed, plus Highest Precision Construction and Workmanship and Quiet Operation!
There is an ATR VIBRATOR for every make of car!
Ask your distributor for ATR's Low Priced type 1400, 6 volt 4-prong Vibrator; and 1843, 12 volt 3-prong; or 1840, 12 volt 4-prong Vibrator. THE WORLD'S FINEST!

There is a trim plate kit for YOUR CAR!



ATR CUSTOMIZED KARADIO

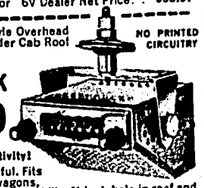
Vibrator-Operated with Tone Control

ATR KARADIO . . . is ideal for small import cars or compact American cars! Unit is completely self-contained—extremely compact! Powerful 8-tube performance provides remarkable freedom from engine, static, and road noises. The ATR Customized Karadio comes complete with speaker and ready to install. Can be mounted in-dash or under-dash—wherever space permits! No polarity problem. Neutral Gray-Tan, baked enamel finish. Overall size, 7" deep, 4" high, and 6½" wide. Shipping weight, radio set, 7 lbs.
Model K-1279—12 for 12V Dealer Net Price . $33.57
Model K-1279— 6 for 6V Dealer Net Price. . $33.57

Airplane Style Overhead Mounting under Cab Roof

NO PRINTED CIRCUITRY

ATR TRUCK KARADIO



Excellent Tone, Volume, and Sensitivity!

Compact, yet powerful. Fits all trucks, station wagons, most cars and boats. Just drill a ⅜ inch hole in roof and suspend the one-piece unit (aerial, chassis and speaker) in minutes. Watertight mounting assembly holds antenna upright. Yoke-type bracket lets you tilt radio to any angle.
Extra-sensitive radio has 6 tubes (2 double-purpose), over-size Alnico 5 PM speaker for full, rich tone. Big, easy-to-read illuminated dial. Fingertip tuning control. Volume and tone controls. 33-in. stainless steel antenna. Neutral gray-tan enamelled metal cabinet, 7 x 6½ x 4 in. high over-all. Shipping weight 10½ lbs.
Model TR-1279—12A for 12V Dealer Net Price $41.96
Model TR-1279— 6A for 6V Dealer Net Price $41.96

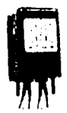
INSTRUMENT CHOPPERS

A component for every industrial and military application . . . mechanical, photo and solid state.

MICRO-SCAN RELAYS

Micro second switching of microvolt signals for data handling, transducer sampling and analogue computation.

INSTRUMENT TRANSFORMERS



A complete line of unique input and low power transformers designed for instrumentation circuits where accuracy, balance, precision with both electromagnetic and electrostatic shielding are required.

MINIATURE TRANSFORMER

Miniature and microminiature designs for all applications, industrial and military. Use the unique James transformer kits for design . . . the economical and convenient way to production models by James.

• TRANSFORMERS • CHOPPERS
• RELAYS • TRANSDUCERS

ACTUAL SIZE

GIANT IN PERFORMANCE – MIDGET IN SIZE

PERFORMANCE PROVED UNDER PEAK OPERATING CONDITIONS

Designed to meet modern high performance standards of the most sophisticated electronic systems — the highly versatile Spacetronics components* have these important features —

- hermetically sealed
- perfectly balanced
- wiping action on contacts
- low thermal EMF's
- good shock and vibration characteristics
- low noise
- sub miniature size

*Manufactured and sold under license from Rawco Instruments, Inc.

1. Type D - SPDT, 60 and 400 CPS Spacetronics Chopper—Noise less than 5μv or less than 1μv selected. Contact arrangement is BBM.
2. Type E - DPDT, 60 and 400 CPS Spacetronics Chopper—Same high standards of performance as Type D, as a DPDT unit in a grounded swinger operation.
3. Spacetronics Polar Relay—This unique computer device has a reaction time of approximately 500 microseconds closing and opening. There are no electrical connections for current to flow when it is in its de-energized position. Current may be passed in either direction.

FOR COMPLETE SPECIFICATIONS CONTACT: SPACETRONICS INC. • P. O. BOX 12325 • FORT WORTH 16, TEXAS

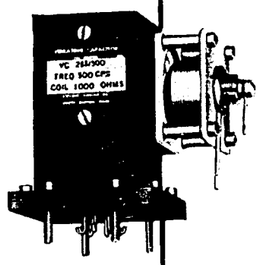
VIBRATING CAPACITORS

A vibrating-reed type capacitance modulator used to measure currents as low as 10^{-14} amperes. Drift never exceeds ±0.2 millivolts per day, noncumulative. Thus it is ideal where stable performance without recalibration is required for periods of a month or more.

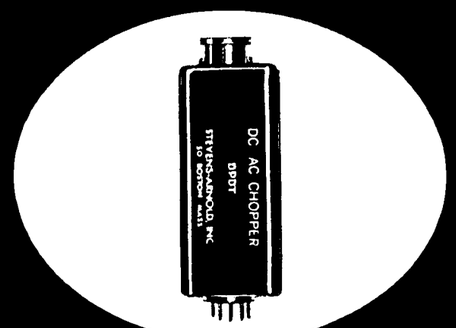
Please write for Catalog 523.



STEVENS
INCORPORATED
ARNOLD

QUALITY SINCE 1943

7 ELKINS ST., SO. BOSTON 27, MASS.



DC-AC CHOPPERS
For 50/60/94/120 C.P.S.

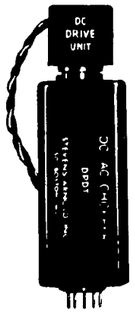
These miniature Choppers are outstanding. Long life and flawless performance are assured by the exclusive Stevens-Arnold twin contact feature. Noise level is less than 1 microvolt into 100,000 ohms. There are twenty-two types, both single and double pole, all built to meet rigid commercial specifications.

Please write for Catalog 515.

DC DRIVEN CHOPPERS

For portable and transistorized instruments. A modification of our service proven AC driven type, these have a 94 cycle chopping rate to eliminate offsets in DC amplifiers and null-seeking equipment. Drive Unit operates from 12 volts DC.

Please write for Catalog 554.



MILLISEC RELAYS

Amazingly fast, from 200 microseconds to 1 millisecond. Available in both commercial and military models, single-pole and double-pole, with shielded or unshielded coils. They are factory sealed and may be mounted in any position.

Please write for Catalog 337

OSCILLATOR STABILIZERS

TUNING FORK Oscillator Stabilizers afford precise and economical frequency stabilization of vacuum tube or transistorized oscillators to provide accurate control tones for the operation of Resonant Relays. Available in the range of 50 to 1000 cps.

Please write for catalog 563.

RESONANT RELAYS

For low cost selective calling or remote control, use Stevens-Arnold TUNING FORK Resonant Relays. They operate only when energized at rated frequency and permit individual control of thousands of functions at the end of a cable pair or radio channel. Now miniaturized, they can be furnished in any frequency from 50 to 1000 cps.

Please write for catalog 563.

GENERAL THERMOELECTRIC CORPORATION

GTC

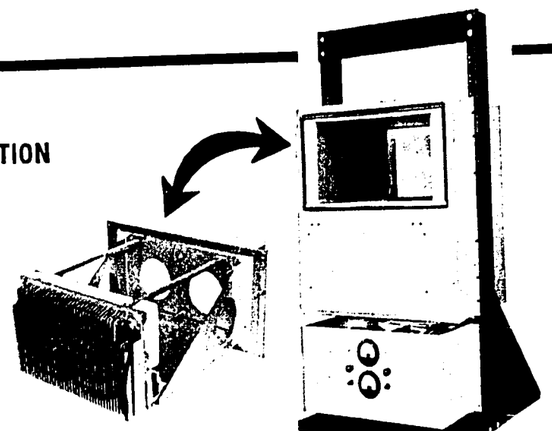
THE *BEST KNOWN* NAME IN

THERMOELECTRIC COOLING

• For Military Electronics • Industrial Systems

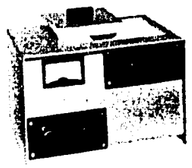
• Scientific Instrumentation and Specialized Commercial Use

TEMPERATURE STABILIZATION CHAMBERS



An original GTC development that's filling the bill for special electronic applications where a stabilized temperature must be maintained over prolonged periods even though the outside temperature is considerably above or below the control point. Standard Frigistors are incorporated as required. Ideal for use with temperature-sensitive high-frequency devices. Critical components can be held to temperature variations of 1°C or less.

CONSTANT TEMPERATURE CONTAINERS



A wide range of temperature-stabilized enclosures employing Frigistors which afford temperature ranges from 125°C to −30°C within a 2° accuracy. Suitable for control of the temperature of liquids and air in medical, industrial and military electronics.

THERMO-ELECTRIC BAFFLES

Completely solid state baffles employing GTC Frigistors. Available for use with existing vacuum systems. Eliminate the need for conventional mechanical refrigeration equipment. Noiseless . . . no moving parts . . . no major maintenance. Power consumption small compared with freon types. Sizes range from 2 inches to 32 inches in diameter. Lower cost than most conventional cooling systems.

WATER-COOLED HEAT SINKS

GTC water-cooled heat sinks provide efficiencies greatly superior to heat sinks rejecting heat to air. They are ideal for microtome freezers, industrial instrumentation and general laboratory use.

For details, circle #334 on Reader Service Card

FRIGISTORS

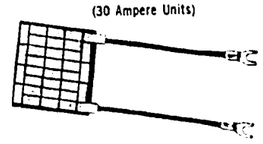
Frigistors are special TE modules developed by GTC engineers for the cooling of heat-sensitive electronic components. They are mechanically rigid, compact, lightweight, fully integrated units and are designed for rugged environmental applications. For less rugged requirements, special foamed Frigistors are available which provide somewhat higher operating characteristics than shown in the adjoining table.

GTC FRIGISTORS (15 Ampere Units) Minimum Ratings Shown Throughout

	F1	F4	F8	F32
COUPLES	1	4	8	32
△ T in air (no load)	56°C	55°C	55°C	50°C
Heat Pumping Capacity in Watts at 0△T	0.75	2.5	5	20

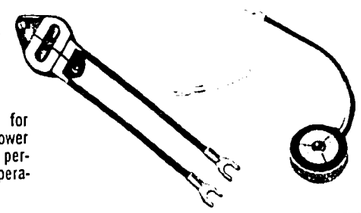
HIGH POWER FRIGISTORS

(30 Ampere Units)



GTC also has available 30 ampere units with a △ T in the air (no load) of 64°C or better. Various combinations of couples are available and are nominally rated at 2 watts per couple at 0 △ T.

SPOT COOLERS FOR TRANSISTORS AND DIODES

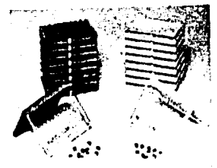


These special Frigistors are used for cooling stud-mounted diodes and power transistors. They add reliability and performance capability by extending temperature ranges by a wide margin.

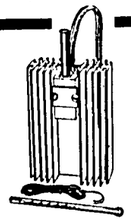
GTC SPOT COOLERS Minimum Ratings Shown Throughout

	F3 TC Transistor Cooler	F3 DC Diode Cooler
COUPLES	3	3
△ T in air (no load)	60°C	60°C
Heat Pumping Capacity in Watts at 0 △ T	4.25	4.25

NEELIUM/S



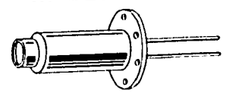
A unique GTC semiconductor material for TE cooling and heating. P and N types available from stock in 4 x 4 x 4 mm sizes and 6 x 6 x 7 mm sizes. Also available in a variety of sizes and shapes to specification and in cut or plate form. GTC P type material is sintered for rugged construction and easy handling. It can be machined and cut with ease. N type material is supplied in both zone-leveled and sintered forms. For maximum effective Z, a hybrid couple using sintered P and zone-leveled N material, is recommended. For rugged use where maximum Z is not critical, all sintered couples are available.



DEMONSTRATION UNITS

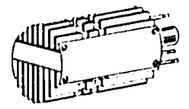
A basic scientific and educational tool for experimenters and students. Accelerates the understanding of semiconductor thermoelectric heating, cooling and power generation. A low-cost way to learn TE fundamentals. Completely self-contained! Power source — a 1½ volt battery! TE Demonstration Units for advanced experiments also available.

IR DETECTORS



Cool-down time approaches microseconds in these highly sensitive detectors. They're tiny, but rugged; withstand tremendous forces of acceleration; and require little power. Large quantity production available.

CRYSTAL COOLERS



These TE Crystal Coolers maintain a constant crystal temperature low enough to insure frequency stability and increased life. Extreme flexibility of design permits meeting any specification, and easy interchange of components makes the units ideal for field maintenance. Coolers for multiple crystals also available.

LARGEST LINE

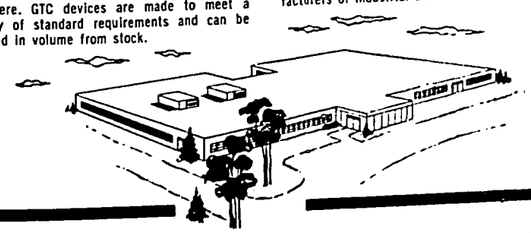
GTC's early start in the field has resulted in the largest and most diversified line of practical and efficient TE cooling units available anywhere. GTC devices are made to meet a variety of standard requirements and can be ordered in volume from stock.

MOST EXPERIENCE

GTC has pioneered thermoelectric cooling devices that are time-proven and currently in use by large military contractors and well-known manufacturers of industrial and commercial systems.

BEST ENGINEERING SKILL

GTC can custom-design thermoelectric cooling systems and devices that achieve the ultimate in performance. And you can ask for, and receive, sound engineering help . . . fast . . . free . . . accurate . . . with no strings attached.



LARGEST PRODUCTION FACILITIES

GTC occupies a large new plant in Princeton, equipped with R & D facilities . . . fast, modern manufacturing equipment and methods . . . highest quality control standards . . . and a large staff of TE engineers and technicians.

LEADER IN THERMOELECTRICS
MELCOR

THE FIRST AND MOST EXPERIENCED SUPPLIER OF HIGH EFFICIENCY THERMOELECTRIC MATERIALS FOR THERMOELECTRIC COOLING AND POWER GENERATION

- ✓ New Low Costs
- ✓ New High Efficiency
- ✓ Plus an even greater technical Assistance Program
- ✓ Immediate Shipment from Inventory

(ALL STANDARD RODS AND MODULES)

Melcor maintains the LARGEST INVENTORY of standard rods and modules in the industry and supplies the widest range of sizes.

For complete information and/or technical assistance write or call Robert A. Bernoff.

Magnetic Core LAMINATIONS

Motor laminations are produced to close specifications from both universal type and customer-owned dies of all types. Call for discussion of your requirements. Transformer laminations are available from stock in a wide variety of sizes and materials—including Supermu laminations with uniform magnetic characteristics and substantially higher permeability rejection levels.

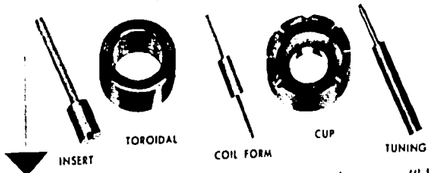
CUSTOM IRON CORES *to your specifications*



for Military, Micromodular and Special Applications

Never a problem in meeting Mil. Specs., when your "blue print" specifies Iron Cores from Permacor*.
Also, iron core environmental testing facilities available.

The Original **Engineered Economy Iron Cores** *for Commercial and Military Applications*

Ours alone . . . ENGINEERED ECONOMY® IRON CORES at low cost from stock. Over 14 types for most threaded and insert applications.
As the world's largest producers of iron cores, we have the biggest, most expert engineering staff for designing, producing and recommending those custom iron cores that are best for your jobs.

Complete Engineering Service . . .

BULOVA

SYNONYM FOR QUALITY, RELIABILITY AND STABILITY!

Frequency control SYSTEMS AND OSCILLATORS .3 cps to 100 mc

Bulova frequency control systems and oscillators are custom-engineered for the most exacting military and industrial applications.

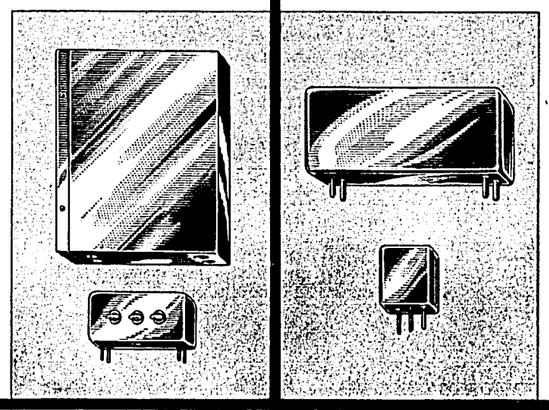
Bulova systems and oscillators span the frequency range from .3 cps to 100 mc and in stability ± 15 pp million without oven to ± 1 pp 10⁹ with proportional oven control ...are available in either tube type or transistor construction.

They graduate in size from the MB-100 (1" x 1" x 2") to complete systems. The MB-100 compensated crystal oscillator assures single frequency output with a stability of ± 15 pp million from −50° C. to +90° C. without oven control. Complete systems may include power supply, oscillator, gated and resetting circuitry, binary stage, voltage regulator and pulse or power amplifiers

Crystal FILTERS 7 kc to 20 mc

Bulova crystal filters are designed to solve filtering problems at center frequencies with bandwidths of 0.01% to 8% and slope factors of 60/6 db as steep as 1.4 to 1.

Bulova filters shave the frequency range from 7 kc to 20 mc, inclusive ...are available as bandpass, reject and single side band. They graduate in size from the 2E2 SM (1⅞" x 1⁵⁄₁₆" x 1⅛") for frequencies of 175 kc through 20 mc to the OE6 (5½" x 3¼" x 3⅝"), a single side band for frequencies of 7 kc through 500 kc.

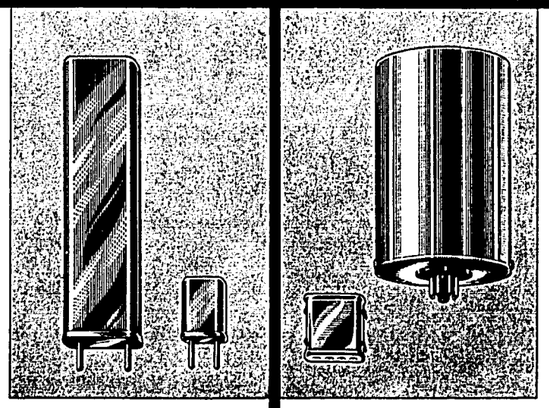


CRYSTALS 2 kc to 100 mc

Bulova crystals are designed and produced for use wherever reliable, close-frequency control is essential.

Bulova crystals assure exacting control from 2 kc through 100 mc with 100 g shock resistance and 30 g to 2000 cps vibration resistance in most frequencies. They graduate in size from the HC-13/U (1½" x ²⁵⁄₃₂" x 3") for 2 kc to the HC-18/U (.50" x .400" x .510") for 100 mc. The HC-18/U is now available to cover 450 kc through 1100 kc and 2 mc through 100 mc.

The majority of Bulova MIL Type crystals may be obtained in miniature holders.



OVENS

Bulova ovens are engineered to maintain ±.1° C. of operating temperatures so as to assure superior results in electrical stability of crystals, components and circuitry.

Bulova ovens graduate from the AM-100ED (external measurements: 3" diameter with a 7" maximum height; internal: 1.96" diameter with a 6" height) to the BHC-18-1 (external: 1³⁵⁄₆₄" x 1³¹⁄₃₂" x 1¼"; internal 1³¹⁄₃₂" x ½" x ³¹⁄₃₂"). The AM-100 maintains a temperature stability of ± .1° C. and is used for Bulova Type 74 glass crystal holders (Military Type HC-15/U), or complete systems. The BHC-18-1 holds temperature to ± 2° C. (−55° to +90° C. ambient) and has a capacity for a single HC-18/U plug-in type crystal holder or four crystal diodes, such as the IN658.

Complete information on all Bulova components and systems is available from your nearest Sales Representative, or by writing — *Department A-1376, Electronics Division, Bulova, 61-10 Woodside Ave., Woodside 77, New York.*

Bliley THE STANDARD OF QUALITY FOR OVER 30 YEARS

Packaged Crystal Oscillators

Bliley CCO units are crystal controlled packages, complete with transistorized oscillator circuit and constant temperature oven. These compact plug-in units provide a high precision reference for use in counters, signal generators, lab standards and master oscillator systems. Standard models at 100 kc, 1000 kc, and 5000 kc as shown.

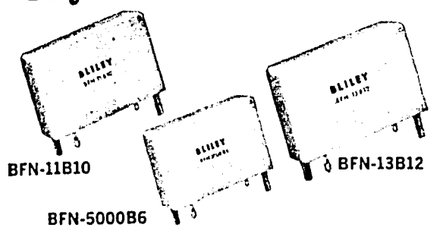
Bliley THE STANDARD OF QUALITY FOR OVER 30 YEARS

Crystal Filters 100 KC to 30 MC



BFN-11B10

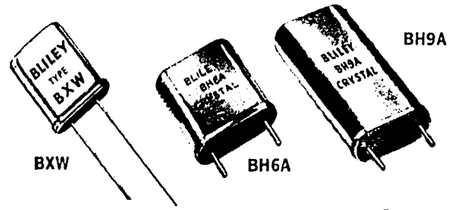
BFN-5000B6

BFN-13B12

Bliley crystal filters are custom engineered components that may be designed for a wide range of frequency and selectivity characteristics. Dependent upon shape factor and frequency range, bandwidths are obtainable from .01% to 8% of center frequency. Call upon Bliley for a qualified analysis and quotation on your crystal filter requirements. Some typical Bliley designs are shown in the following table.

TYPE	FREQ.	BANDWIDTH 6 db.	BANDWIDTH 60 db.	INSERTION Loss (Max)
BFN-0455B2	455 kc	4.4 kc	16 kc	5 db
BFN-2215B3	2215 kc	300 cycles	1100 cycles	3 db
BFN-2215B4	2215 kc	3 kc	12 kc	3 db
BFN-5000B6	5 mc	3.5 kc	12 kc	6 db
BFN-8998B7	8.998 mc	3.0 kc	7 kc	6 db
BFN-11B8	10.7 mc	4.2 kc	10 kc	8 db
BFN-11B9	10.7 mc	15 kc	30 kc	5 db
BFN-11B10	10.7 mc	30 kc	55 kc	6 db
BFN-13B11	13 mc	15 kc	27 kc	6 db
BFN-13B12	13 mc	30 kc	55 kc	6 db

General Communications Crystal Units



BXW

BH6A

BH9A

Bliley offers a complete selection of MIL type crystal units. Commercial equivalents and variations are available from 2kc to 150mc.

MIL HOLDER	BLILEY HOLDER	FREQUENCY RANGE
HC-6/U	BH6A	200kc-150mc
HC-13/U	BH9A	2kc-200kc
HC-18/U	BXW	3mc-150mc

Ultrasonic Delay Lines .75 to 4500 Microseconds

Bliley Ultrasonic Delay Lines for the range from .75 microseconds to 4500 microseconds are custom engineered for most applications. Exceptional performance characteristics such as low loss, low temperature coefficient, attenuation of spurious, and integral temperature control are factors resolved in the final design. Design parameters shown in the following tables are intended for general guidance:

DOUBLE ENDED RINGING LINE

TWO MATCHED DELAY LINE

SHORT DELAY LINES

Group	Freq. Range (mc)	Delay Time Range (Microseconds) Ringing Single Ended	Delay Time Range (Microseconds) Absorber Double Ended	Max. Temp. Coeff. (ppm/°C.)	Bandwidth as percent of carrier (with 93 ohm termination)	Loss level (db) with different termination 50 ohm	93 ohm	1000 ohm
A	5-60	.75-60	.75-30	–100	30		45	28
	60-100	.75-60	.75-30	–100	15		50	33
B	5-60	.75-40	.75-20	+85	35		43	27
	60-100	.75-40	.75-20	+85	15		48	31
C	5-60	.75-40	.75-20	+20	35		43	27
	60-100	.75-40	.75-20	+20	15		48	31
D	5-30	1.00-60	1.00-30	–100	40 (50 ohm term.)	12		
E	5-30	1.00-40	1.00-20	+20	40 (50 ohm term.)	12		

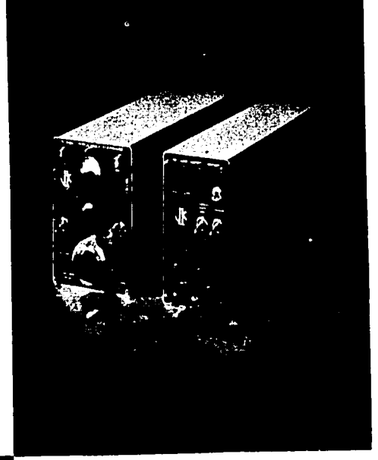
LONG DELAY LINES

Long Delay Lines may be specified with carrier frequencies in the range from 10 mc to 40 mc. Spurious signal attenuation shown in the following table applies only to frequency range 25-40 mc. *See footnote.*

GROUP	DELAY TIME RANGE (microseconds)	UNWANTED SIGNALS (db DOWN) Spurious	UNWANTED SIGNALS (db DOWN) 3rd Time	GROUP	DELAY TIME RANGE (microseconds)	UNWANTED SIGNALS (db DOWN)
A	30-400	50	40	D	500-1600	55
B	200-700	55	45	E	600-2000	55
C	300-1400	60	55	F	1000-2700	50
				G	600-3300	45
				H	1300-4500	45

Note: Best attenuation of spurious signals is achieved in medium delay time ranges and at higher carrier frequencies. Dependent upon loss level requirements, bandwidth may be estimated from 35% to 40% of carrier frequency. Loss and bandwidth characteristics are interdependent and are controlled by choice of terminations, carrier frequency and transducer capacity.

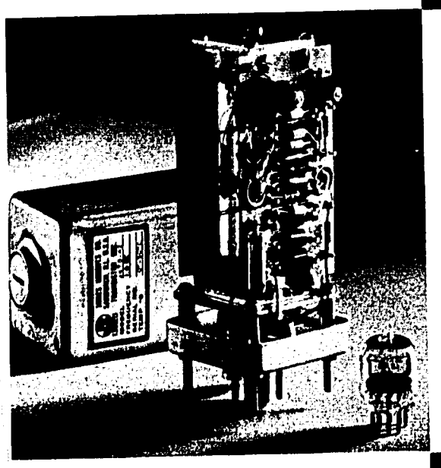
JK SULZER FREQUENCY STANDARDS



Fully-transistorized FS-1100T Frequency Standard: Normal output is 1.0 mc. and 100 kc. simultaneously with 1 volt available to 50 ohm loads. Provides minimum stability of 5 x 10^{-10} per day after initial aging. Features double proportional control oven.

Companion FS-1100TP Power Supply: Operates on 115 V. AC. Features internal nickel-cadmium battery for stand-by power up to 12 hours. Permits transport of operating unit.

Supplemental FS-1100TD Frequency Divider: All sub-harmonics, including the commonly used 1000 cycles, 400 cycles, 60 cycles, and down to as low as .01 pulse per second, have the same order of stability: 5 x 10^{-10}/Day or better.



JK OSCILLATORS

Compact, precision plug-in signal sources. 60 cps through 75 mc. Sine and square wave outputs. Stabilities 1 x 10^{-6}/Day to 5 x 10^{-9}/Day. Silicon transistors. A wide range of models including the following:

JKTO-43: For frequency stability of 5 x 10^{-9}/Day, under normal conditions. Transistorized proportional control oven, hermetically-sealed, shock and vibration resistant. 100 kc. to 50 mc.

JKTO-23: Meets applicable aircraft equipment specifications with maximum frequency deviation of 2-5 x 10^{-8}. Long-life oven. Hermetically-sealed. 800 kc. to 75 mc.

JKTO-9: Popular, compact, general-use, wide-range oscillator. 1 x 10^{-6}/Day class. 20 kc. to 10 mc.

JK CRYSTAL FILTERS

Compact, rugged, hermetically-sealed and stable: Frequency Range 1 kc. to 40 mc., available to 150 mc. Band widths as narrow as .01%, and up to as high as 10%, for certain frequencies.

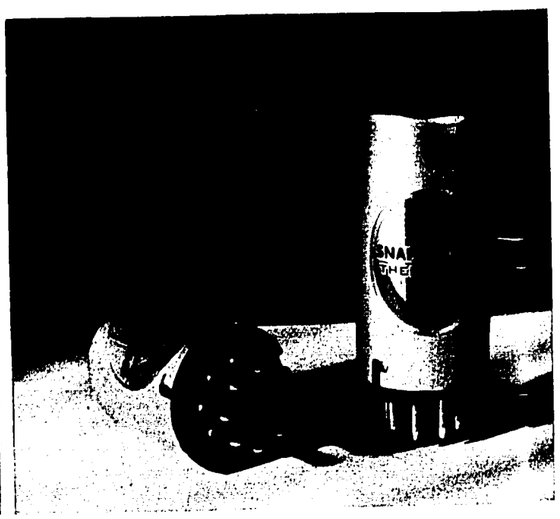
JK CRYSTALS

Precision Glasline Crystals: From 1 kc. to 150 mc. Designs for frequency standards available at 1 mc. to 5 mc. (with stabilities of 1 x 10^{9}) and at 100 kc. (with stability of 1 x 10^{8}).

Military Crystals: Meet all requirements outlined in specifications—MIL-C-3098B, MIL-C-16C, MIL-C-17167, etc.

Standard Crystals: Manufactured to a variety of specifications. Used as replacement crystals and as original equipment components.

Amateur and Citizens' Band Crystals: For transmitters, receivers, calibrators, etc.



JK THERMYSTALS

Precision-matched crystal-and-oven combinations featuring maximum stability, accurate calibration and high "Q". Types JK023T and JK026T available from 35 KC through 75 MC. Typical frequency tolerance in 25°C ambient:

At 100 KC = 0.25PPM
at 1000 KC = 0.10PPM

Write for Technical Literature

For details, circle #349 on Reader Service Card

JK CRYSTAL AND COMPONENT OVENS

Versatile, precise, compact: Available with snap-action or glass-sealed thermostats, or proportional control, depending on application. Wide range of sizes and shapes, for virtually any requirement.

mCoy

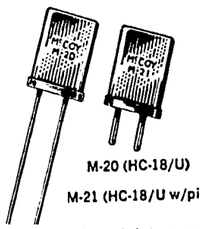
CRYSTALS & CRYSTAL FILTERS

Regardless of its size, type, or frequency any crystal bearing the name mCoy can be relied upon to deliver the ultimate in frequency control despite wide temperature variations and extreme conditions of shock and vibration.

M-1 (HC-6/U)

METAL ENCASED STANDARD SIZE AND MINIATURE CRYSTAL UNITS

shown actual size



M-20 (HC-18/U)

M-21 (HC-18/U w/pins)

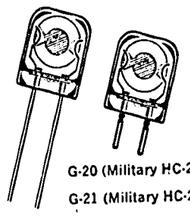
The crystals that made the name of McCoy a synonym for quality. Metal encased, HC-6/U size is available in frequencies from 500.0 kc to 200.00 mc.

Fills the need for miniature crystals in frequencies from 2.5 mc to 200.0 mc. Meets specs MIL-C-3098B and ARINC No. 401.

G-1 (Military HC-27/U)

ALL GLASS STANDARD SIZE AND MINIATURE CRYSTAL UNITS

shown actual size

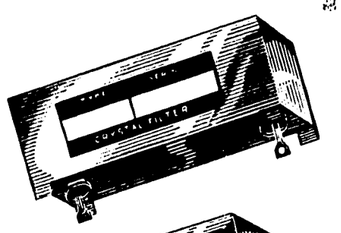


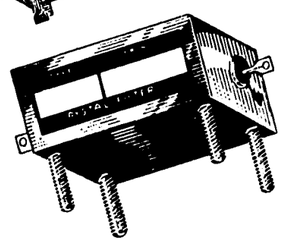
G-20 (Military HC-26/U)

G-21 (Military HC-29/U)

This vacuum sealed, hard glass crystal unit possesses all of the quality features for which the McCoy M-1 is so famous. It has long term frequency stability five times better than the conventional metal types. Available in frequencies from 500 kc to 200 mc.

This vacuum sealed, hard glass crystal unit meets the new CR-73/U and CR-74/U specifications. It has long term frequency stability five times better than the conventional metal type. Available in frequencies from 5000 kc to 200 mc.





CRYSTAL FILTERS

Our many years experience in designing and producing top quality oscillator crystals have enabled us to develop and produce filters of equal desirability. Current production includes filters in the 1.0 mc to 30 mc range, with bandwidths of .01% to 4.0% of center frequency. A number are available without costly design and prototype charges.

LET **SHEROLD** SOLVE YOUR CRYSTAL PROBLEMS

Complete, advanced engineering laboratory is at your disposal.

Whether your need is for one special frequency crystal—or thousands, you can be assured of quality manufacture and unexcelled performance when you specify Sherold . . . now one of the country's largest, exclusive producers of crystals for military and commercial requirements.

Write for complete data on your requirements.

ONE STOP COMPLETE SERVICE for Precision Fabrication

Special Apparatus Manufactured for the Semi-Conductor Field

- FUSED QUARTZ • LABORATORY WEAR
- GROUND JOINTS • BALL AND SOCKET JOINTS
- GRADED SEALS • BOATS & CRUCIBLES

(of highest quality fused quartz for use in manufacture of Germanium and Silicon)

PLUS

Hard Material Fabrication to Extremely Close Tolerance

- *FUSED QUARTZ • SAPPHIRE • OPTICAL PARTS*
- *FUSED ALUMINA-FIRED STATE*

Any materials drilled, machined, and shaped, and/or may be coated with silver to specifications.

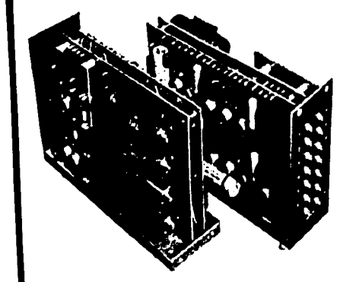
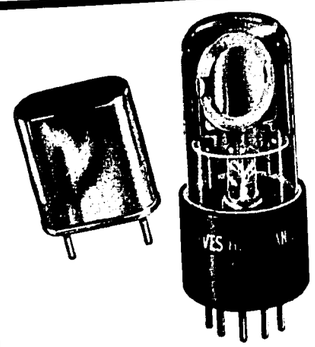
REEVES-HOFFMAN
FREQUENCY SOURCES, CRYSTALS, OVENS, FILTERS



PACKAGED OSCILLATORS

TRANSISTORIZED AND HARD TUBE TYPES of Reeves-Hoffman packaged oscillators are available in a frequency range from 100 cps to 100 mc. Stability is up to 1 part in 10^9. Packaged to your specifications.

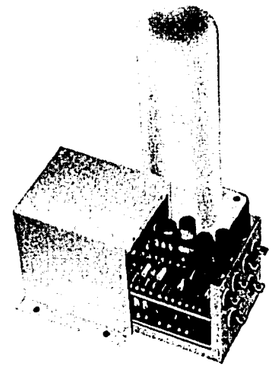
PRECISION FREQUENCY STANDARDS have a basic frequency of 5 mc and are available with auxiliary circuitry for division to 100 kc, 1 mc and 10 mc. Stability is up to 1 part in 10^9 per day. Packaged to your specifications.



CRYSTALS

STANDARD TYPES of Reeves-Hoffman crystals, for all commercial and military applications, are available in a frequency range from 1 kc to 100 mc. Hermetically sealed in metal holders.

PRECISION TYPES of Reeves-Hoffman crystals, for use in high precision oscillators and secondary frequency standards, are available in a frequency range from 1 kc to 5 mc. Hermetically sealed in glass holders with standard radio tube bases.



OVENS

OVENS for precise temperature control are available in three types:

PROPORTIONAL CONTROLLED, for precise frequency standards, hold within 1/100th of 1° C at any fixed ambient.

THERMOSTATICALLY CONTROLLED, for high reliability requirements, hold within 1/10 of 1° C at any fixed ambient.

SNAP-ACTION CONTROLLED, for rugged military requirements, hold within 1° C at any fixed ambient.

FILTERS CRYSTAL FILTERS are available in a frequency range from audio to 30 mc.

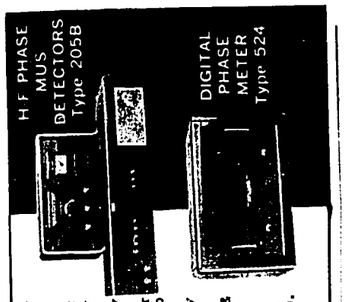
Compact, rugged and highly reliable Reeves-Hoffman components are available in standard types or will be designed and manufactured to your specifications.

Most units can be designed to withstand up to 10 g at 5 to 2000 cps. Write for complete details.

REEVES-HOFFMAN

DIVISION OF DYNAMICS CORPORATION OF AMERICA • CARLISLE, PENNSYLVANIA

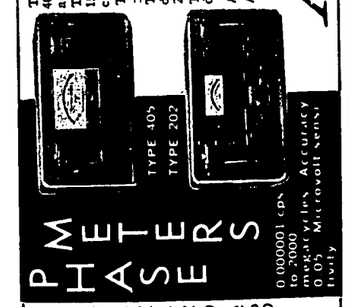
For details, circle #355 on Reader Service Card



Type 405H: 8 cps to 500 kc. Type 405: 8 cps to 100 kc. Type 405L: 1 cps to 20 kc. No amplitude adjustment; 0.25° relative accuracy.
Type 205A1-A2: 100 kc to 15 mc: Accuracy 0.05°. Type 205B1: 15 mc to 400 mc. Type 205B2-3: 15 mc up to 2000 mc. Accuracy ±0.05°.
Type 202: 20 cps to 40 kc. 1° full scale sensitivity. Accuracy ±0.02° or 2%.
Type 524 Digital Phase Meter: Digital readout in four digits. No amplitude or frequency adjustment. 20 cps to 20 kc.
Type 1002 Phase Angle Counter: Digital readout; frequency down to 0.0001 cps. Accuracy ±0.5°.

Miniature Pre-Amplifiers, Variable Bandpass Filters, & Magnetic Amplifier Relays available.

AD-YU ELECTRONICS LAB, INC.
249 Terhune Avenue, Passaic, New Jersey



CONTINUOUSLY VARIABLE DELAY LINES 500 Series: Rise time 4%; impedance 50 to 1500 ohms; total delay up to 30 us. 801 Series: Impedance 500 to 2500 ohms; total delay up to 200,000 us.
STEP VARIABLE DELAY LINES 602-3 Series: Equal input and output impedance 75 to 500 ohms. 11 different steps; total delay 0.2 to 2.5 us; impedance 75 to 500 ohms. TAPPED DELAY LINES 5T, 6T, 7T, 8T, 9T, 10T & 11T Series: Total delay 0.1 to 224,000 us; impedance 50 to 15,800 ohms.
MINIATURE DELAY LINES 6C, 7C Series: Total delay 0.082 to 1,284 us; impedance 75 to 4000 ohms.

Special delay lines built to meet MIL specifications.

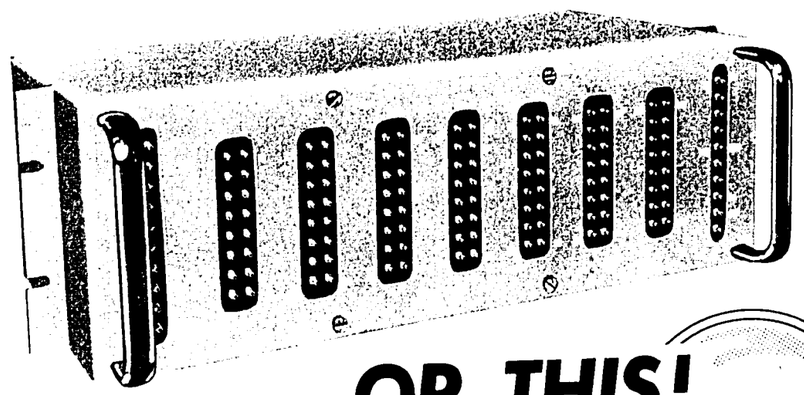
DELAY LINES

CAN LOOK LIKE THIS...



5000 μsec delay
Standard EIA Rack Mounted
19" x 5.25" x 10"

OR THIS!

.005 μsec delay
P. C. Mounted
.35" x .35" x 3.00"

...SICKLES makes both!

We also make what seem to be infinite variations in-between. We make thousands of some units daily; only a few each week of others; and there are still others of which we may make only one piece altogether.

As world largest mass producer of delay lines our prices reflect custom manufacture at mass production costs.

Let us solve your delay line problems involving . . .

PCA

MAGNETIC COMPONENTS

-designed for reliability

-built for reliability

-tested for reliability

Designed to meet the industry's most critical requirements for reliability, PCA's wide varieties of Delay Lines, Pulse Transformers and Filters are available from stock or may be obtained on special order, with a minimum of lead time, to meet the most stringent military or commercial applications.

Our staff of engineers, embracing some of the country's foremost experts in the field of pulse techniques, is at your disposal for the custom manufacturing of: distributed constant delay lines, lumped constant delay lines, pulse transformers, transistor transformers, toroids and filters.

Write us direct or see your nearest PCA representative.

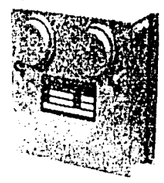
ULTRASONIC DELAY LINES



MICROSONICS Inc.

GENERAL—Delay .4 to 10,000 μsec at frequencies from 10 to 400 mc Wide bandwidth and low spurious response for excellent pulse reproduction and dynamic range.

SPECIAL DESIGN—Designs available for minimum size and weight using folded construction. Dual channel lines operating at different frequencies with separate input and output transducers. Tapped delay lines to provide trigger channels which precede the signal channel.

TEMPERATURE CONTROL—Various designs are available for temperature control to provide multiple delay lines matched to nanoseconds in accuracy.

MAGNETO-STRICTIVE—Featuring compact and reliable designs with delays from 5 to 10,000 μsec, for information storage up to 1 mc.

SYSTEMS USING MICROSONICS DELAY LINES:
ASR-2, 3, 4, 5; UPS-1; FPS-30; SPS-38; SPS-6; ARSR; CPN-18; HAWK; APQ-72; MPS-23 etc.

ADVANCED POWER SOURCES

THERMO ELECTRON, first in thermionic direct energy conversion has achieved noteworthy breakthroughs in this field. Typical of the thermionic generators in the development stage are:

- A 200-watt solar unit
- A 200-watt gas-heated unit
- An isotopic fueled unit
- A 45-watt gasoline heated unit

For further information regarding THERMO ELECTRON'S capability in research, development and manufacture of direct energy conversion systems contact Mr. Lawrence T. Sullivan, Business Manager.

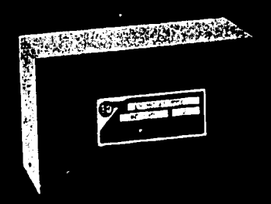
CONTROL ELECTRONICS' BUYERS' GUIDE

C.E.C. has for years been engaged in the design and production of quality components and systems for both military and industry. A member of our engineering group will be happy to meet with you on any problems you now face.

FILTERS & TOROIDS



BF-139

45 mc band pass filter—3 db bandwidth ≅ 2.5% center freq—40 db rejection at $2F_0$ and $0.5F_0$—Input and output impedance 1500Ω—Hermetically sealed in accordance with applicable MIL specifications—Dimensions 4½" x 2" x 2½"

LF-197

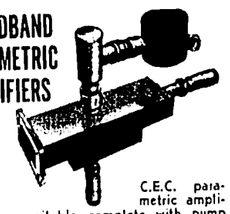
3000 cps low pass filter—3 db @ 3000 cps—40 db @ 4000 cps—Attenuation at other frequencies specified—Input and output impedance 10,000Ω—Dimensions 1¾" x 1¾" x 2¾"

BF-128

15 kc resonant circuit. Max 1 db bandwidth 45 cps. Extra package required. ... 3 db ... has Universal ... Input ... Output impedance 3 ... Ω Dimensions ...

MICROWAVE COMPONENTS AND INSTRUMENTS

BROADBAND PARAMETRIC AMPLIFIERS



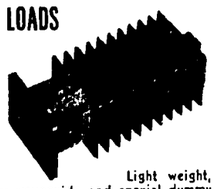
C.E.C. parametric amplifiers are available complete with pump A.F.C. and A.L.C. for application to your system at frequencies from U.H.F. to K_u Band.

Your particular requirements can be satisfied merely by minor modifications of our existing designs.

WAVEGUIDE AND COAXIAL LINE BANDPASS FILTERS

C.E.C. offers a large selection of standard waveguide and coaxial bandpass, low pass, and high pass filters. Frequencies range from 100 mc to 60,000 mc. Higher frequencies on special order. Custom designs can be made to your specifications.

DUMMY LOADS



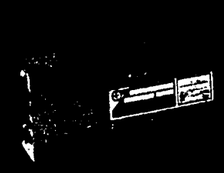
Light weight, high-power waveguide and coaxial dummy loads. Complete line available covering all waveguide and coaxial line sizes

C.E.C. also has available—

Rotary Vane Fixed Attenuators, Tunnel Diode Amplifiers, Mixers, Thermistor Mounts, Power Meters and Microwave Duplexers and Multiplexers.

A representative of our Microwave Division will be glad to discuss your specific requirements.

DELAY LINES



ILLUSTRATED: CODING TYPE 20 3..sec

LUMPED CONSTANT
FIXED & VARIABLE

5 millimicro sec to .1 secs
Impedance to 20,000
Bandwidth to 250 mc

DISTRIBUTED CONSTANT
FIXED & VARIABLE

Delays to 30 μ sec
Impedance to 10,000
Bandwidth to 20 mc

MAGNETOSTRICTIVE
FIXED & VARIABLE

2 10,000 sec

Also available are driver & output circuits for the reshaping of pulses

Numerous versions of the above models as well as a capability to meet all specifications enables C E C to consistently supply the needs of industry. Our engineering staff is always at your service. Write today for complete literature on our product line.

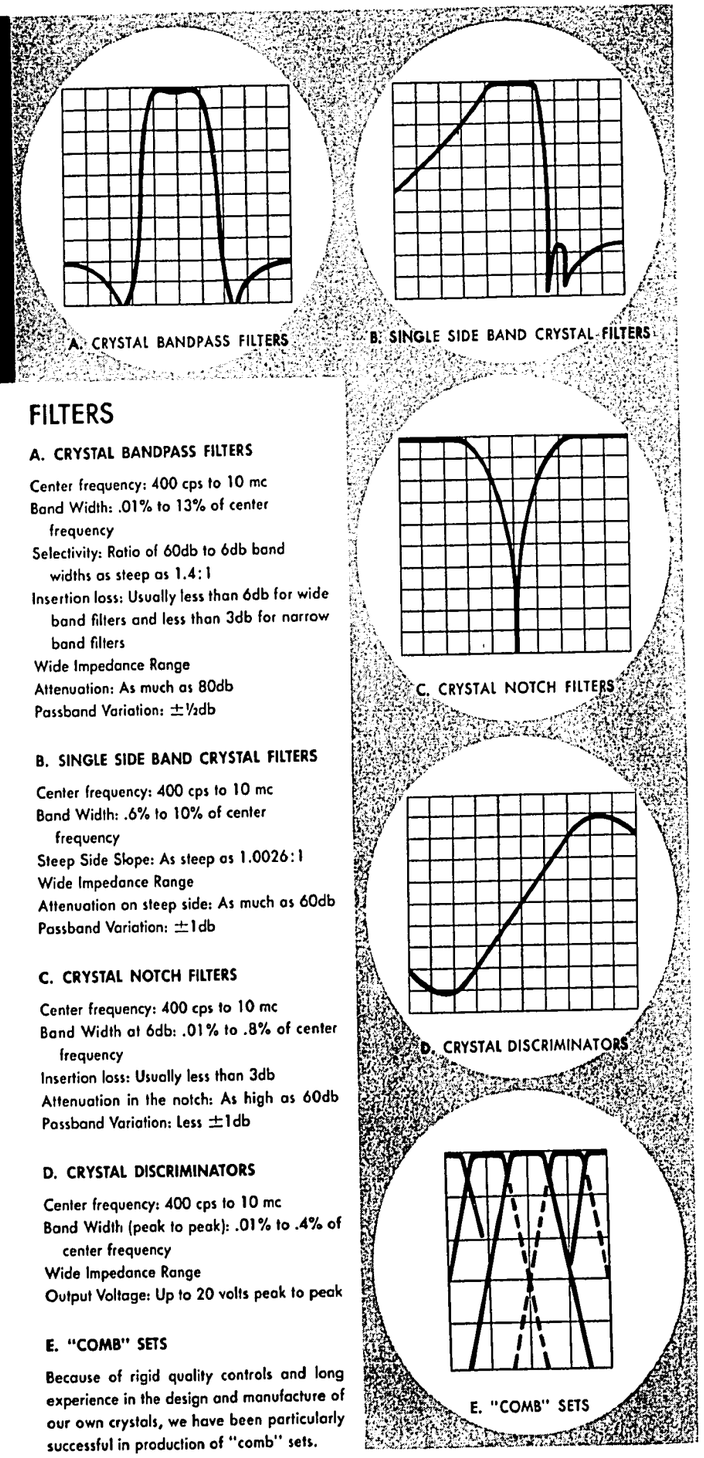
FROM CRYSTALS TO "BLACK BOXES" HEEMCO OFFERS 3-SIGMA RELIABILITY



The 3-sigma reliability for which Heemco products have long been recognized is available not only in crystals, but in filters and frequency sources as well as all types of associated circuitry and "black boxes".

CRYSTALS

Heemco crystal units, both standard and high vibration types, are available from 400 cps up, to fill a wide variety of commercial and military requirements.

FREQUENCY SOURCES

From standard designs, Hill Electronics custom designs and manufactures frequency sources to your particular requirements. Frequencies range from less than 1 cps to above 100 mc. Sizes range from ¾"x¾"x1½".

Specifications for a typical standard unit are:

FREQUENCY: from 150 cps up
OPERATING TEMPERATURE: −65 to +125°C
FREQUENCY ACCURACY: ±.001%
VIBRATION: 5 to 2000 cps at 20g
SHOCK: 100g
SIZE: 2"x2"x4"

ONE OF HILL ELECTRONIC'S RECENT DEVELOPMENTS IS A 3-PHASE FREQUENCY SOURCE, SPECIFICATIONS FOR WHICH ARE AVAILABLE UPON REQUEST.

FILTERS

A. CRYSTAL BANDPASS FILTERS

Center frequency: 400 cps to 10 mc
Band Width: .01% to 13% of center frequency
Selectivity: Ratio of 60db to 6db band widths as steep as 1.4:1
Insertion loss: Usually less than 6db for wide band filters and less than 3db for narrow band filters
Wide Impedance Range
Attenuation: As much as 80db
Passband Variation: ±½db

B. SINGLE SIDE BAND CRYSTAL FILTERS

Center frequency: 400 cps to 10 mc
Band Width: .6% to 10% of center frequency
Steep Side Slope: As steep as 1.0026:1
Wide Impedance Range
Attenuation on steep side: As much as 60db
Passband Variation: ±1db

C. CRYSTAL NOTCH FILTERS

Center frequency: 400 cps to 10 mc
Band Width at 6db: .01% to .8% of center frequency
Insertion loss: Usually less than 3db
Attenuation in the notch: As high as 60db
Passband Variation: Less ±1db

D. CRYSTAL DISCRIMINATORS

Center frequency: 400 cps to 10 mc
Band Width (peak to peak): .01% to .4% of center frequency
Wide Impedance Range
Output Voltage: Up to 20 volts peak to peak

E. "COMB" SETS

Because of rigid quality controls and long experience in the design and manufacture of our own crystals, we have been particularly successful in production of "comb" sets.

Hill Electronics specializes in the design and manufacture of "black boxes" which utilize frequency sources and/or filters.

SELECT FROM THE LARGEST AND MOST COMPLETE LINE OF CRYSTAL FILTERS IN THE INDUSTRY

ITEK CRYSTAL FILTERS AND DISCRIMINATORS

SYMMETRICAL BANDPASS

MODEL NO.	CENTER FREQUENCY	BANDWIDTH 6 DB	BANDWIDTH 60 DB
100KPA	100Kc	50cps	200cps
2215KA	2215Kc	2.8Kc	12Kc
2215KB	2215Kc	250cps	1000cps
9MA	9Mc	3Kc	13Kc
10MA	10.7Mc	30Kc	60Kc
10MB	10.7Mc	15Kc	30Kc
10ME	10.7Mc	6Kc	15Kc
10MF	10.7Mc	3.5Kc	10Kc
13MA	13Mc	30Kc	54Kc
13MB	13Mc	15Kc	27Kc
30MJ	30Mc	40Kc	125Kc
30MK	30Mc	25Kc	62Kc
30MP	30Mc	5Kc	15Kc

Itek Bandpass Crystal Filters are widely used in commercial and military mobile FM receivers, spectrum analyzers, doppler radar, FSK systems, TRF receivers and other equipment requiring high selectivity and stability.

SINGLE SIDEBAND

MODEL NO.	CENTER FREQ.	SIDEBAND	PASSBAND	MINIMUM ATTENUATION
100KUC	100Kc	upper	300 to 6000cps (2db)	60db
100KLC	100Kc	lower	300 to 6000cps (2db)	60db
3MUA	3.3Mc	upper	300 to 3000cps (2db)	40db
2MUA	2Mc	upper	300 to 6000cps (2db)	60db
2MLA	2Mc	lower	300 to 6000cps (2db)	60db

Itek Single Sideband Filters are recognized for their rapid carrier and adjacent sideband cut-off characteristics. These Crystal Filters simplify SSB generation by reducing the number of frequency conversions.

CRYSTAL DISCRIMINATORS

MODEL NO.	BANDWIDTH	CENTER FREQ.	IMPEDANCE OHMS
13M-DM	50Kc peak to peak	13Mc	Input 10K Output 500K
10M-DC	50Kc peak to peak	10.7Mc	Input 10K Output 500K

Itek Crystal Discriminators are used in the construction of high-frequency, low distortion FM detectors at the first IF. The extreme stability of crystal discriminators makes them ideal for use in high-frequency AFC circuits.

ITEK CUSTOM FILTERS

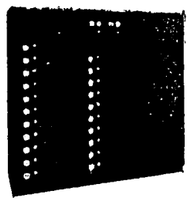
More Itek Crystal Filters of different models have been designed and produced than any other make. The experience acquired in producing tens of thousands of crystal filters can be used to your advantage. If your requirements differ from those met by Itek Stock Filters, send us your specifications for center frequency, bandwidth, selectivity, and impedance level. Our proposal will be submitted promptly.

ITEK NEWLY DEVELOPED CRYSTAL DEVICES

VOLTAGE CONTROLLED CRYSTAL OSCILLATORS

Itek "VCXO" Voltage Controlled Crystal Oscillator (Model 10MWA shown with cover off) provides greater stability, percentage deviation and linearity than similar devices offered in the past. These characteristics make VCXO especially suitable for FM generation and frequency control circuits.

SPECTRUM ANALYZERS



Itek Spectrum Analyzers with as many as 300 channels or more have been designed and produced. Operating in real time, these Analyzers can be used for precise audio analysis, missile tracking, and frequency monitoring. Built-in programmers control the rate and deviation of scan. Solid-state circuitry and parallel output channels insure maximum reliability.

OTHER ITEK ELECTRO-PRODUCTS

V.T. and Solid State **ULTRA STABLE OSCILLATORS** with guaranteed stability of 5 parts in 10^{10} per day, and V.T. and Solid State **FREQUENCY MULTIPLIERS** and **DIVIDERS.**

Custom Designed **FREQUENCY SYNTHESIZERS** for Transmitters and Receivers from 10KC to 50MC.

Ground, Airborne and IRIG **TIME CODE GENERATORS** for binary coded decimal timing signals.

Universal **MAGNETIC TAPE SEARCH UNIT** for automatic tape search on basis of time indices previously recorded.

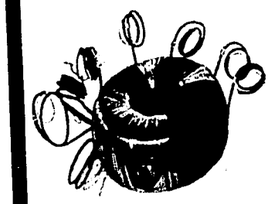
ORTHO COMPONENTS FOR DEFENSE AND INDUSTRY!

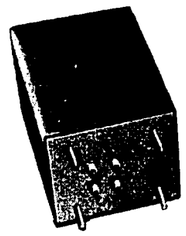
of Ortho Filter Corporation

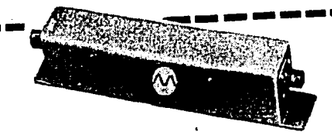


TOROIDS—In addition to standard toroid features, O.F.C. units have: • Winding to minimize distributed capacity. Coil may be used at higher frequencies with higher "Q" factors. • Winding to inductance value on self-calibrating winding equipment yielding 1% units as standard tolerance at no cost premium for core calibrating, etc. • Availability of waxed, encapsulated, encased or taped units • Complete line of stock core sizes. Fast delivery on special orders • Facilities for winding from #6 to #50 AWG wire.

VARIABLE RF ATTENUATORS—These rotary adjustable variable attenuators are extremely accurate over wide frequency range. Available as individual unmounted units or in various combinations on rack-mounted panels, featuring: • Gold contacts • Resistive networks that function from DC to 250 MC • Each resistor mounted in cavity. This eliminates reactive components over the unit's useful frequency range • Conservatively rated. Guaranteed for full year under normal conditions.
SWR at 100 MC 1.01 max. Available .01, .1, 1.0 and 10.0 db/step.

MAGNETIC AMPLIFIERS—Built to customer specifications, Ortho Filter's high voltage and high temperature units feature: • Use from microwatt to kilowatt ratings • Special test procedures to insure excellent balance and minimum null voltages • Tape wound toroids and cut cores stacked to facilitate low cost prototypes promptly • Controlled winding techniques that guarantee uniformity with respect to distributed capacity and leakage inductances.





ANTENNA FILTERS • Cutoff frequency range up to 450 MC • Attenuation of 40 to 90 db over stop band • Insertion loss less than 1.0 db over entire pass band • VSWR less than 1.5 over entire pass band • Designed to your size, weight, termination, power and impedance specifications • Slope of cutoff 60 db at 1.2 of cutoff frequency.

FILTERS AND NETWORKS — Complete line of passive and active filters for use from DC to 1000 MC. LC and crystal types manufactured to customer requirements. Advanced design methods permit rapid delivery of prototypes using minimum circuit elements. Construction in accordance with MIL-F-18327A.

om Ortho Magnetics Inc.

Transformers

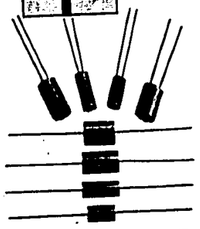
Complete facilities for all types of power and communication transformers. Ortho Magnetics specializes in balanced, hybrid, modulation and bridge transformers. Open frame, encapsulated and metal encased construction to all grades of MIL-T-27A. Provisions for in-plant testing.

orel Ortho Reliability Environmental Laboratories Inc. Test Facilities

Environmental test facilities for high and low temperature, shock, vibration and humidity. Life testing racks for resistors, capacitors and iron core components. Tests conducted in accordance with applicable military specifications.

opr Ortho Precision Resistors Inc.

Wire Wound Resistors



Specializing in the production of stable, reliable, precision wire wound resistors. Resistance change of only a few parts per million per year. High reliability with accuracies from 0.001% to 1.00% are available. Stock resistors are available with either axial or radial leads. Special terminals upon request.

RESISTANCE RANGE——0.1 ohm to 5 megohms
WATTAGE RANGE——0.1 watt to 2 watts
STANDARD T. C.——±5 PPM above 100 ohms
SPECIAL T. C.——upon request

Matched sets, dividers, networks and AC resistors available.

oc Ortho Crystal Inc.

Complete range of crystal filters from 1 KC to above 30 MC. Single sideband, band pass and band elimination crystal filters.

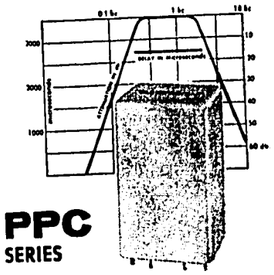
DELAY DISTORTIONLESS

WIDEBAND FILTERS



PPC SERIES

In the all-new SEG PPC Series, we have developed new techniques for eliminating phase and delay distortion in low, high or band-pass filters.

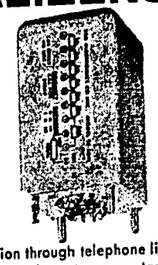
Here are typical specifications

Band width (3 db pts.)	270 to 2000 cps.
Ripple	±0.2 db
Insertion Loss	2 db Max.
Input impedance	600 ohms
Output impedance	600 ohms
Delay variation in passband	±2%
Size	3" x 3½" x 5"
Weight	5 lbs.

Hermetically sealed
Application: Data transmission

LINE EQUALIZERS

TEM SERIES



Data transmission through telephone lines has been increasing in importance constantly. The inherent reliability and freedom from interference of this transmission medium makes its use almost mandatory despite the amplitude and delay distortion inherent in telephone lines.

The SEG TEM Series of line equalizers uses new techniques for equalizing for both amplitude and delay in a single unit.

Extremely compact (a few cubic inches) the TEM Series is adjustable for any desired length of transmission line up to 25 miles.

Specify the transmission line characteristics and the nature and frequency spectrum of the transmitted signals or write for the TEM work sheet.

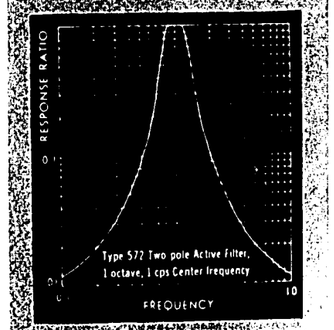
ULTRA-LOW-FREQUENCY BAND PASS ACTIVE FILTERS



All filtering and networks hermetically sealed in metal cases. Special encapsulations available. Size and mounting to meet individual problems promptly considered by our complete engineering facilities. Prompt delivery — Moderate prices

White

PLANT AT 8500 BALCONES TRAIL

WHITE INSTRUMENT LABORATORIES INCORPORATED
BOX 9066 AUSTIN 17, TEXAS

TUBES

Plug-in amplifier, impedance, network parts for use as filters or band-pass amplifiers. Widely used where LC filter sections are impractical. Available with tuned circuit or band pass response with center frequency .02 to 500 cps.

TRANSISTORS

Integral transistor-network units with tuned circuit response from 1 cps to 5 kc with Q values to 20, requiring no external components.

Write for comprehensive literature on filter, amplifier, and network performance and application

- Active Filters (above), bulletins 242, 252, 272.
- Twin-T Networks for harmonic rejection, low-pass filtering, feedback circuits. Null frequencies .02 cps to 50 kc, wide range of impedance levels. Bulletin 500.
- Toroidal Wave Filters, LC filters with stable toroidal inductors. Low, high, band-pass models available over wide impedance and frequency ranges. Ask for LC Bulletins.
- Network Notes contain articles on use, performance, and problems of networks and filters.

MICROLECTRON FUSES

Ultra fast types for protection of semi-conductor devices.
Standard ¼" x 1" and ¼" x 1¼".
Miniature type for printed circuit use.
Built for extreme environmental capability.

MICROLECTRON, Inc. | 1547 18th Street, Santa Monica, California
EXbrook 3 | 0356

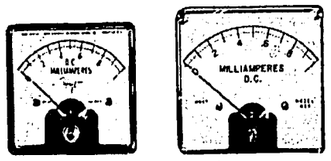
You can SEE and READ

by Hoyt

New Series 1025-1026 Interchangeable with Round Bakelite Case Types

Brilliantly new in their high visibility polystyrene cases are these modern type Meters by HOYT which give a true reading at a glance! Here longer scale length and the elimination of shadows plus clean design add up to a topnotch combination to incorporate in any panel.

The famous HOYT high torque movement with precise and rugged craftsmanship gives you what you've been looking for in Meters. These models are directly interchangeable with all round Bakelite meters, and are available in all AC and DC ranges as Ammeters, Milliammeters, Microammeters, Voltmeters and Millivoltmeters. Similar styles #1037 3½" and #1060 6" meters are also available for any modern panel meter application.



The HOYT square plastic case series (#649 and #653 shown) is available in 2½", 3½" and 4½" types. Just right for use where equipment needs to be revised to meet modern design requirements. These instruments are interchangeable with square Bakelite meters and can be supplied with a frosted or colored band on the case front in any AC and DC range. Extra long scales in shadow free cases give you the most value and quality for your money.

Write us for the NEW HOYT PANEL METER Brochure showing a complete line of plastic and Bakelite models.

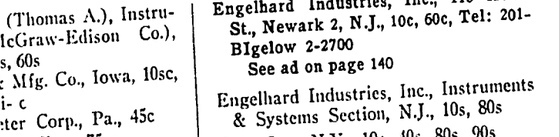
BIG LOOK panel meters



Ratings of D-c Panel Meters

D-C VOLTMETERS (Self-contained) 1.5, 3, 5, 8, 10, 15, 30, 50, 80, 100, 150, 200, 250, 300, 500 or 600 volts
D-C VOLTMETERS (For use with external resistors) 500, 600 or 750 volts
D-C AMMETERS (Self-contained) 1, 1.5, 2, 3, 5, 10, 15, 20, 30 to 50 amperes
D-C AMMETERS (For use with 50 millivolt external shunts) 50, 75, 100, 150, 200, 250, 300, 400, 500, 600 or 800 amperes; 1, 1.2, 1.5 or 2 KA
D-C AMMETERS (For use with 100-mv external shunts) 20, 40, 50, 75, 100, 150, 200, 250, 300, 400, 500, 600 or 800 amperes; 1 or 2 KA
D-C MICROAMMETERS 20, 50, 100, 200 or 500 microammeters
D-C MILLIAMMETERS 1, 1.5, 3, 5, 10, 20, 25, 30, 50, 80, 100, 150, 200, 250, 300, 500 or 800 milliammeters

Ratings of A-c Panel Meters

A-C VOLTMETERS (Self-contained) 3, 5, 10, 15, 30, 50, 150, 300, 500 or 600 volts
A-C VOLTMETERS (Transformer rated) 600 or 750 volts; 3 KV
400-CYCLE A-C VOLTMETERS (Self-contained—for use at 400 cycles) 150 or 300 volts
A-C AMMETERS (Self-contained) 1, 3, 5, 8, 10, 15, 20, 30 or 50 amperes
A-C AMMETERS (Transformer rated) 10, 15, 20, 30, 40, 50, 75, 80, 100, 150, 200, 300, 400, 500, 600 or 800 amperes; 1, 1.2, 1.5, 2 or 3 KA
A-C LOAD INDICATORS—Rated 0-5A. Can be applied to any 60-cycle a-c motor when used with the variable-ratio Type JCH-O current transformer
A-C MILLIAMMETERS 10, 25, 50, 100, 200 or 500 milliammeters

Ratings of Rectifier-type Panel Meters

VOLTMETERS 10, 15, 20, 25, 30, 50, 80, 100, 150, 200, 250 or 300 volts
MICROAMMETERS 500 or 800 microammeters
MILLIAMMETERS 1, 1.5, 2, 3, 5, 10 or 20 milliammeters

Available in 2½-, 3½-, and 4½-inch a-c, d-c, and rectifier types, General Electric BIG LOOK panel meters are particularly suitable for use in radio and communication equipment where accuracy and quality are required and space is at a premium. Features include distinctive appearance, excellent readability, and improved reliability. 2% accuracy class except for rectifier types.

Completely Sealed Cases on 2½- and 3½-inch Designs

General Electric quality is built in to stay. Gasketed construction on 2½- and 3½-inch models protects internal parts from dirt, dust, and water, and helps assure extra long, reliable life.

Snap-on, Snap-off Covers on 4½-inch Designs

Snap-on, snap-off covers are supplied on all 4½-inch BIG LOOK panel meters. The covers can be easily removed and replaced while the meter remains in its normal mounted position.

	SIZE		
	2½-inch	3½-inch	4½-inch
Scale length	2.1 in.	2.9 in.	3.93 in.
Approx net weight	7 oz	7 oz	9 oz

GREIBACH PRECISION METERS

nearest to the theoretical ideal of the perfect electrical meter —for direct measuring with the highest accuracy and negligible loss

for TRANSISTORS, DIODES, TUBES, AMPLIFIERS, IONIZATION, HYPERCRITICAL MEASURING, CONTROL BY LIGHT BEAM & PHOTOCELL

D.C. ULTRA SENSITIVE METER TO .0002 MA
6.3 inch scale—Microamps to Amps with high overload capacity. Precise, stable, rugged, up to 23 ranges in a single meter.

SELECTIVE EXPANSION .025%
.025% accuracy on effective 1,000 division 5 ft. scale, electrically folded into 10 sections. No hunting for readings.

NEW AC/DC NON-THERMAL TRUE RMS MICROAMMETER
Now voltmeters and ammeters with lowest energy consumption of any non-amplifier type. Low millivolt drop. 20-30MV, high overload capacity. Response DC to megacycles.

BIFILAR SUSPENSION IN ALL METERS
Frictionless, pivotless. No jewel bearings. Unique bifilar suspension—this basic element in all Greibach meters—assures permanent calibration.

Write for Complete Catalog and Price List.

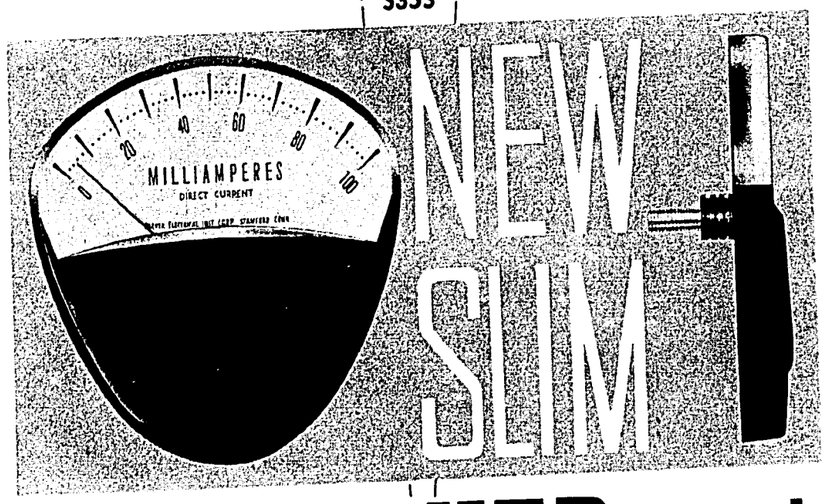
SERIES S35 • S35S



PARKER panel meters

STANDARD (S35) AND SEALED (S35S) FOR SURFACE MOUNTING

FEATURING...

- **Two 3/8" holes for mounting**
- **Accuracy—1½% full scale**
- **Movement withstands 100 times full scale current continuously**
- **Printed circuit coil**
- **Ceramic disk magnet**
- **Distinctive styling for minimum space**
- **Self shielding**

The Parker Surface Mounting Panel Meter embodies a revolutionary approach to movement design using a printed circuit coil in conjunction with a thin ceramic disk magnet.

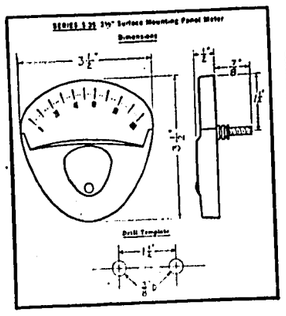
The most striking advantage of this technique is a great reduction in size so that the entire meter is contained in the scale housing and nothing projects from the rear except the terminals – which also serve as mounting screws.

STABILITY – Ceramic magnets used in Parker meters supersede all other known types of magnets for stability.

POINTERS – All meters have nylon pointers which are unaffected by overload shock contact with limit stops.

BEARINGS – Synthetic sapphire in silicone rubber shock-mounts. Pivots are made from "Niva Point"

SCALE LENGTH – Extra long 3 3/16" scale for maximum readability.



PRICES/LIST (S35)

DC MILLIVOLTMETERS	$12.72	25 MV 50 MV 100 MV	
DC VOLTMETERS	$13.92	1.5 VDC 3.0 VDC 5.0 VDC 10 VDC 15 VDC 25 VDC 30 VDC 50 VDC 100 VDC 150 VDC 200 VDC	500 ohms volt*

*Also available in 200 and 1000 ohms volt.

SPECIFICATIONS SERIES S35 - S35S

STANDARD ACCURACY 1.5% of full scale value at 70°F Ambient.

INSULATION All meters are checked for calibration at all cardinal points.

5000 Volts DC between terminals (mounting screws), and panel.

We welcome inquiries for non-standard units to customers' specifications.

Add $1.20 to above list prices for S35S sealed model

VIBRATING REED FREQUENCY METERS

J-B-T

Used wherever constant or known frequency is important to efficient operation of equipment.

Model 30-F

- *Permanently Accurate* within ±0.3% or better at reference temperature, depending on the model. This accuracy is not affected by poor wave form, external magnetic disturbances, or voltage fluctuations.
- *Size and Type for Every Service.* Made in many portable and panel styles and reed groupings; 12-650 cycles and above.
- *Rugged Construction* simplified, patented.
- *Suitable for Electronic Circuits.* Power consumption is comparatively low, and J-B-T reeds have high Q with prompt, sharp response.

ELAPSED TIME METERS

J-B-T elapsed time (or running time) meters provide a convenient means for timing reliability or other tests, checking tube or machine life, and scheduling maintenance. To be compatible with other panel indicators, they are made in many case types: round, square, clear-plastic, glass-to-metal seal, or special. Standard models for 60 cycles, 100-130 volts register in 1/10 hour steps to 9,999.9 hours (or 99,999.9 hours in new Model 31-EXW illustrated) then automatically reset. Others such as 50 cycles, 230 volts, or 0-9,999.9 minutes are also available.

Purchase of standard items through authorized electronic distributors is strongly recommended.

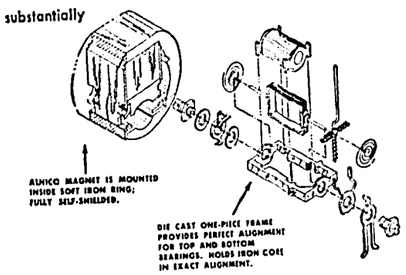
BAR-RING TYPE MOVEMENTS (Exclusively Triplett)

- Self Shielded
- Not affected by magnetic panels or substantially by stray magnetic fields.
- More Torque
- Lower Terminal Resistance
- Faster Response
- Exceedingly Rugged and Accurate
- All Case Sizes



TRIPLETT
Quality... First to last

TRIPLETT—For over 56 years, a leader in the field of meter and test equipment design and manufacture.

TRIPLETT offers a complete line of:

- Panel Instruments
- Portable Instruments
- Test Equipment: Radio, TV, Electrical and Electronic

For a complete description of all products, see the **TRIPLETT** listing in the Radio Electronic Master catalog.

All standard Triplett products available nationally through authorized Triplett Distributors.

RAWSON METERS

MULTIMETERS® and REGULAR METERS
AC and DC types, multiple ranges, accuracy ½ of 1%. 2 microamperes to 1 ampere DC. 2 milliamperes to 3 amperes AC.

ELECTROSTATIC VOLTMETERS
Ranges 100 V to 35,000 V, AC or DC. Resistance exceeds million megohms. Can measure static electricity.

R. F. VOLTMETERS
DC to 100 megacycles s. Thermocouple type Ideal for laboratory standards. New bulletin.

FLUXMETERS
Laboratory and production measurements on magnets and magnetic circuits. Single push button return-to-zero.

ROTATING COIL GAUSSMETERS
Our most recent development for measuring magnetic field strengths. Measures from a few gausses to 120 kilogausses.

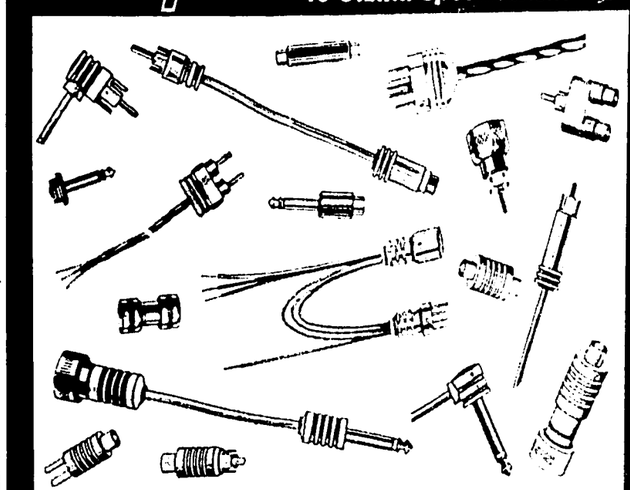
LAB-TRONICS ***CABLES and MOLDED TERMINATIONS Stock Types . . . or Designed to O.E.M. Specifications***



RELIABILITY • LOW COST • MOISTURE PROOF • STRAIN RELIEF
UNBREAKABLE • APPEARANCE • STOCK MOLDS • SPECIAL DESIGNS

Send for your new LAB-TRONICS ENGINEERING DATA HAND BOOK — complete with drawings, specifications and design suggestions.

LAB-TRONICS, INC., 3656 No. Lincoln Ave., Chicago 13, Illinois

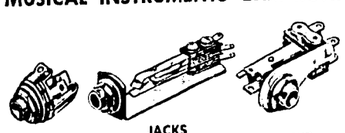
For details, circle #392 on Reader Service Card

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 81-226.

SWITCHCRAFT INC.

"SETS the STANDARD" in electronic components

FOR RADIO—TELEVISION—HI-FI—STEREO—TAPE RECORDERS MUSICAL INSTRUMENTS—ELECTRONIC CONTROLS AND COMPUTERS



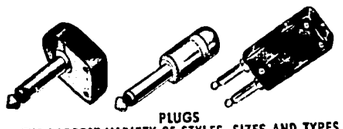
JACKS

FOR MILITARY AND INDUSTRIAL EQUIPMENT—MOST COMPLETE LINE

Available in all common and many special circuits.
"LITTEL-JAX"—require minimum panel space.
"TINI-JAX"—Similar to "Littel-Jax"—subminiature in design.
"SF-JAX"—short frame design—innumerable circuits.
"LF-JAX"—long frame design—all circuits.
"EXTENSION JAX"—for cable extensions.
"SHIELDED JAX"—shield assembled into and made a part of Jack.
"LAMP JAX"—Switchboard panel type. Ideal for mounting on Jack Panel.

TELEPHONE & MILITARY JACKS

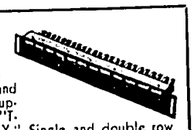
"T-JAX"—a conventional telephone switchboard design—all standard circuits and military specifications.
"M-JAX"—a heavy duty design used in heavy industrial equipment.



PLUGS

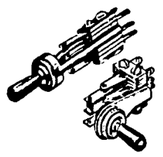
THE LARGEST VARIETY OF STYLES, SIZES AND TYPES

"LITTEL-PLUG"—small—fits standard Jacks—(also MIL type).
"TINI-PLUGS"—sub-miniature 2 conductor Phone Plug for use with "Tini-Jax".
"LUG-PLUG"—small—low cost.
"STANDARD"—conventional size, heavy terminals—rugged design. 2 and 3 conductor types.
"FLAT-PLUG"—removable cover permits use with screw or solder lug terminals. 2 or 3 conductor types.
"TWIN-PLUG"—two electrically independent 2-conductor plugs on ⅝" C.C. MILITARY TYPE



JACK PANELS

Black phenolic and aluminum types. Support Switchcraft "T-JAX" and "MT-JAX." Single and double row panels. Accommodate up to 52 Jacks.



"LEV-R SWITCHES"

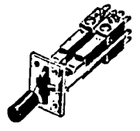
Unusually compact. Many circuits. Locking and non-locking. Series 3000 and 13000—single hole mounting. Series 12000 requires only about ¼ of depth behind panel of conventional "Key" switches.

"FF-SWITCH"

Flat frame support spring "pile-up" in various circuits and contact combinations. "Easy" action of colored push buttons.

"HOOK SWITCH"

Switch actuated by hanging accessory on hook. 2 different methods of mounting. Standard circuits. Soft easy action. Require minimum of depth behind panel.

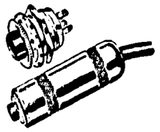


"TELEVER SWITCHES"

Rugged telephone type. Locking and non-locking types. Series 6000 mounts by screws or to escutcheon plate. Series 16000 features single hole mounting.

"LITTEL & TINY-SWITCHES"

"Littel-Switch" — rugged yet small, a Push Button switch available in simple circuits; contacts to suit. Various colors of Buttons.
"Tiny-Switch" — similar to "Littel-Switch", except sub-miniature design.

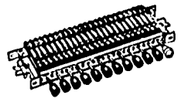


BUTTON AND CORD SWITCHES

"Button-Switches"—unusually small push button switch, completely enclosed.
"Cord-Switches" — cord mounted or pendant switch. Ideal for "hold" in hand operation.

"RS-SWITCH"

Rotary switch, rugged frame supports spring "pile-ups"; minimum panel depth. 2 or 3 position; locking or nonlocking action.



"MULTI-SWITCH"

Features choice of switching functions. 1 to 37 stations possible. Single frame or ganged assemblies. Illuminated or non-illuminated buttons. Available in 6 and 28 volt.

MOLDED CABLE ASSEMBLIES

(Audio Jumpers) Plugs molded directly to various cable combinations. Shielded and unshielded. Various lengths.

COMPLETE LINE OF AUDIO ACCESSORIES—ADAPTERS, COUPLERS, CONNECTORS WITH PHONE OR PHONO CONNECTIONS, AUDIO MIXERS, SPEAKER CONTROLS. WRITE FOR CATALOG A-401.

When writing for catalog, list products in which you are interested. Inquiries on custom-made components handled promptly.

ALNICUS!®

ALNICUS is a new kind of permanent magnet material that affords the design engineer in modern industry the widest latitude and greatest flexibility because—**it is commercially produced... it has the highest magnetic power ever... it is not limited to plugs, rectangles or other prismatic shapes.** In plain truth—ALNICUS makes it possible to **commercially produce** permanent magnets with the highest energy level ever achieved **in virtually any size or shape, and ALNICUS will maintain this high magnetic power in all configurations!**

For complete information write for Brochure RE.
Address inquiries to Dept. 62 on your company letterhead.

MAGNETIC MATERIALS DIVISION
U.S. MAGNET & ALLOY CORPORATION
266 Glenwood Avenue, Bloomfield, N. J.

the highest magnetic power for electronic applications!

ALNICUS... broadens the scope of magnet use for the Military and all industries. For example—with **commercially produced** ALNICUS it is now possible to have higher magnetic energy with no increase in unit size or weight... or, retain the same magnetic energy with a smaller, lighter unit.

The **BEST** *way to fill your* **MINIATURE LIGHTING NEEDS**

This quick-reference, illustrated catalog is packed with information about pilot—dial—signal—indicator—illuminating lighting units and lampholders of all types. In the big DRAKE line you'll find practical answers to virtually any Miniature Lighting requirement. And of course, our decades of specialized experience are at your service to help with unusual problems—our engineers will gladly discuss them with you!

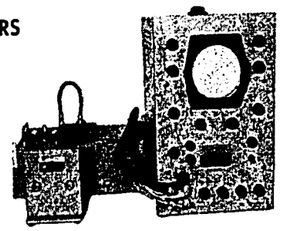
AMCI

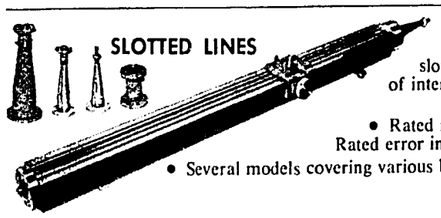
rf instruments and coaxial components

AUTOMATIC IMPEDANCE PLOTTERS

- Measure and plot rf impedance or transfer characteristic as a continuous function of frequency from 0.1 to 1700 mc.
- Impedance versus frequency curve is automatically plotted as it would be seen at any point desired.
- Entirely self-contained, except for use of an external oscillator.

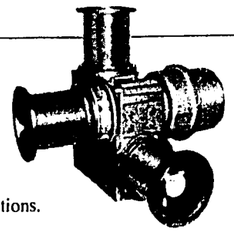


SLOTTED LINES

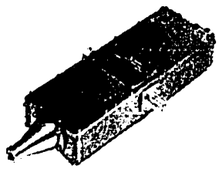


- High-precision universal slotted lines with a wide variety of interchangeable tapered reducers and tunable probes.
- Rated residual SWR is under 1.010. Rated error in detected signal under 1.005.
- Several models covering various bands from 37.5 to 4,000 mc.

COAXIAL SWITCHES



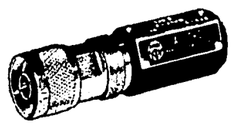
- For use in rigid 3⅛" and 6⅛" coaxial transmission line.
- Low SWR.
- Motor-driven or manually operated.
- Very high peak power models for radar applications.



INSTRUMENT HYBRIDS

- Inherent high isolation independent of frequency. Rated residual unbalance from 40 to 60 db.
- Wide range of frequency bands from 45 mc to 3600 mc for use with all transmission line sizes from Type N to 6⅛".
- Constant coupling in both magnitude and phase over the frequency range, with equal loads.

INSTRUMENT LOADS



- Excellent stability and low reflection. Suitable as secondary standards.
- SWR of Type N termination under 1.02, 0-1100 mc.
- Available in nearly all rigid and flexible coaxial transmission line sizes.
- Models for use at liquid nitrogen temperatures.

COAXIAL DIRECTIONAL COUPLERS

λ/4 side arm type, in rigid transmission line ⅞ in. to 6⅛ in. diameter—copper or aluminum—standard and pressurized types available.

- **Coupling 20db to 60db:** The value of coupling can be maintained within plus or minus 1db over a 2 to 1 frequency range.
- **Directivity 35db or better:** A directivity of over 40db can be held over a 30% frequency range.
- **Frequency range 200 to 2000 mc.**

COMPONENTS

"Microwave equipment made better by BOGART"

5000 series

WATER LOADS
The most experienced dummy load manufacturer in the world.

7000 series

COAXIAL COUPLERS
Flattest couplers in the industry.

8000 series

COAXIAL SWITCHES
Highest power, highest isolation.

CUSTOM DESIGNS
Custom creativity.

Choose from America's most complete catalog of Microwave test equipment and components listing more than 1000 standard items . . .

PLUS

Special designs manufactured to your specifications . . .

OR

Produced from your Blueprints in production or prototype quantities.

Your inquiries invited for design, development and production of MICROWAVE-RADAR component parts and test equipment in the frequency range of 100-90,000 megacyles.

FREE!

Latest DOUGLAS catalog!

WRITE TODAY for your copy of the Douglas Catalog featuring more than 1000 standard components in stock—more than any other source in the field.

and now: DOUGLAS RESEARCH CORP.

provides **RESEARCH • DEVELOPMENT • ENGINEERING** which includes

• ANTENNAS • R.F. ASSEMBLIES • WAVEGUIDE COMPONENTS • COAXIAL COMPONENTS

and in addition, manufacturing of Radar r.f. front ends and antennas, Microwave communications r.f. front ends and antennas. Write for additional information.

FERRITE MICROWAVE COMPONENTS

(To commercial and MIL specs)

● ISOLATORS

▸ **WAVEGUIDE:** From L Band to V Band [illegible] equipment isolators covering full waveguid[illegible] Isolators, and special designs featuring [illegible]

▸ **COAXIAL:** Compact coaxial isolators cover [illegible] Other coaxial ferrite devices can be used [illegible] ators, modulators, and phase shifters.

● CIRCULATORS

▸ **FARADAY ROTATORS:** These circulators [illegible] 20% bandwidths. Narrow band units are [illegible] high power designs are available.

▸ **DIFFERENTIAL TYPES:** L Band to Ka Band [illegible] are: high isolation, low loss, and [illegible] is ideal for parametric amplifier use.

▸ **JUNCTION TYPE:** These 3-port circulators [illegible] guide types. WYE type coaxial units are also [illegible] complete coverage from UHF to V Band. [illegible] applications.

● SWITCH

▸ **ROTATIONAL TYPES:** Ferrite devices offer [illegible] fast switching time to less than 1 μsec, [illegible] power applications. Applications [illegible] and one transmitter.

● VARIABLE ATTENUATORS & MODULATORS

Numerous ferrite configurations are [illegible] attenuator applications.

● SPECIAL DESIGNS

A thoroughly experienced engineering staff is available for consultation on [illegible] applications. Our chemical laboratory supplies special formulations of ferrites [illegible] enable our engineering department to meet even most difficult component requirements.

● **FERROTEC** has complete sales representation in all principal cities in the U.S., Canada, and in foreign countries.

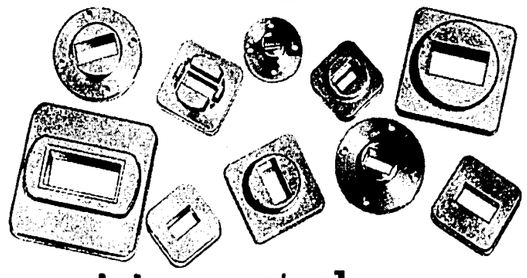
For details, circle #412 on Reader Service Card

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 81-226.

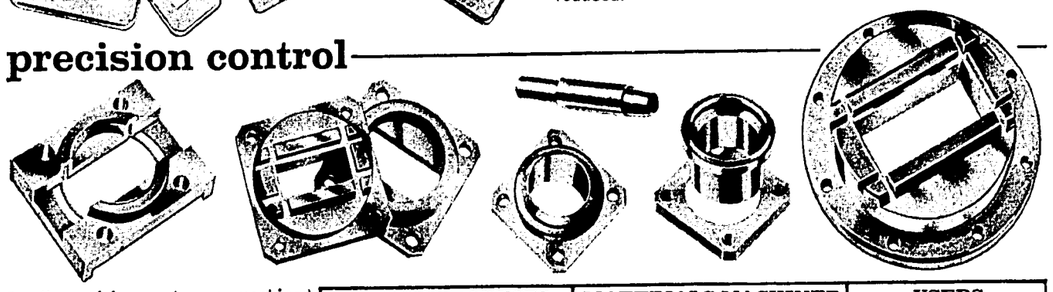
NEW—small precision forgings



To facilitate processing of orders for fast delivery of small Microwave flanges used in commercial and government projects, Leonard's Precision Manufacturing Co., Inc., now offers precision forgings of these flanges.

The U6-210, 596A and 600A flanges have precision-held sockets which eliminate milling of the hub. By maintaining one size throughout the socket area, assembly of parts is made easier and more efficient. Adjustment of jigs and fixtures due to size variations of slot milled parts is thus reduced.

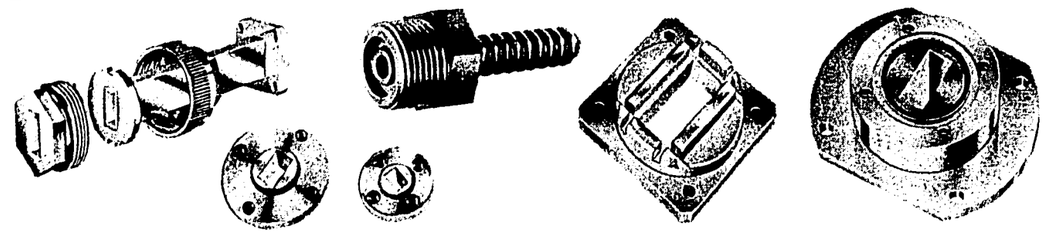
precision control



Small precision parts are machined from specified metals and the most close tolerances are held—.0005 if necessary. Original specifications are maintained on production orders. In the case of pilot models, specifications are not only held, but to further control the project, all jigs and fixtures are made by skilled mechanics.

TYPICAL PRODUCTS	MATERIALS MACHINED		USERS
adapters connectors couplings for rigid co-axial lines insular parts screw machine parts wave guide flanges specializing in microwave flanges	bar stock, forgings, or castings aluminum brass bronze copper plastic nylon lucite	teflon polyethylene OFHC copper tellurium silver stainless steel steel	Component Parts for Radio, T. V., Radar, Electronics, Automotive, Communication, Aircraft Industries.

precision machining



At Leonard's Precision Manufacturing Company, Inc., the function of Quality Control is not delegated to an Inspection Department as such; it is an integral part of every mechanic's job. Precision can only be maintained if everyone is constantly measuring and improving the quality of his work.

INSPECTION TOOLS. To properly measure specified tolerances, Leonard's Precision Manufacturing Company, Inc., maintains a complete set of inspection instruments:

Gage-Plug, round ground, thread, height. **Micrometers**-Depth, calipers, thread. **Indicators**-Dial. **Blocks**-Granite. **Verniers. Parallels.**

WORK-IN-PROCESS INSPECTION is part of every major operation. As an example, one out of every five pieces is checked in both the grooving and drilling operations.

FINAL INSPECTION, as a rule, is made by a journeyman. His job is made easy because of the series of previous inspections a product run goes through before completion. Short run orders receive 100% inspection and production runs are checked every 25 pieces. This continuous quality control program is an assurance of a precision product.

consumer service

DEPENDABILITY

Every request for quotation is thoroughly analyzed for workability of specified metals, for general feasibility of production—for maintenance of tolerances. Delivery dates once promised are maintained. It is a company policy to "refuse" orders if delivery schedules cannot be met.

ADVISORY SERVICE

Based on a "decade" of intricate machining, Leonard's Precision Manufacturing Company, Inc., offers its "technical know-how" to industry in a continual effort to make a better product. Changes are suggested only if they will improve the end product—tolerances are never changed.

LIECO FOR MICROWAVE

In addition to an extensive product line, LIECO can supply microwave components and system assemblies for small and large quantity production to customer's specifications. LIECO's capabilities in Research, Development, Design and Reliability Assurance are available for meeting requirements in the following fields:

ANTENNAS: Airborne, Marine, U.H.F. Microwave, Arrays, Slotted Arrays, R F Heads.

ANTENNAS Accessories: Feed Systems, Tuning Units, Rotary joints, Filters, Sector Scanners.

ATTENUATORS: Variable, Flap, Precision, Fixed.

ADAPTERS: Waveguide Flange to Flange, Waveguide to Coax, Waveguide tapered, Rigid Coax to Coax.

BENDS & TWISTS: Waveguide: Bends E & H Plane 0°-180°, Twists 0°-90°

BOLOMETERS: Waveguide: Bolometer (millimeter).

COUPLERS: Directional Antenna: 7/8" Coax line. Crossguide, Multi-hole, Branch Guide Rotary.

DETECTORS: Crystal, Bolometer, Single, Dual, Tunable, Fixed Tuned.

DIVIDERS: Waveguide: Power Divider.

DUMMY LOADS: Waveguide: High Power, Water Cooled; Coaxial.

FILTERS: R F, Waveguide, Coaxial.

FLANGES: Waveguide, Coaxial, Standard & Special.

GASKETS: RF Spring Finger.

HORNS: Microwave Horns, Gain Standard.

JOINTS: Microwave Rotary Joints, Continuous & Sector Scan.

MIXERS: Microwave Crystal, Crystal Coaxial & Waveguide.

MOUNTS: Microwave Bolometer, Crystal.

PHASE SHIFTER: Microwave Phase, Dielectric, Line Stretchers.

SHORTS: Waveguide & Coax, Adjustable, Fixed.

SWITCHES: Waveguide Switches. Manual, Motor Driven SPDT, DPDT, SP-Multi-Throw.

SCANNERS: Microwave Sector.

TEES: Coaxial, Waveguide, Series, Shunt, Hybrid.

TERMINATIONS: Microwave Low Power, High Power, Waveguide, Coaxial.

TRANSITIONS: Microwave Waveguide to Waveguide, Coax to Coax, Waveguide to Coax, tapered.

TUBING: Waveguide: Rigid Waveguide, Flexible.

TUNER: Waveguide. E-H, Slide Screw, Micrometer Driven.

WAVEGUIDE: Rigid, Flexible.

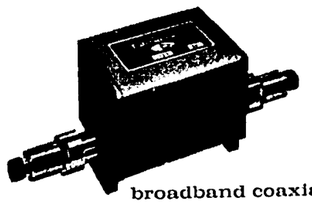
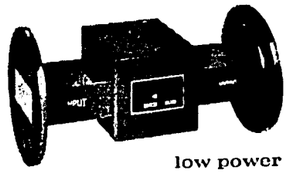
new! NARDA
ferrite isolators:



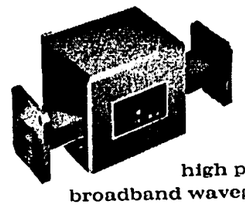
broadband coaxial

Excellent electrical characteristics with extreme versatility! ⅞" coaxial line construction allows higher power operation with ⅞" connectors, up to 20 kw peak, 400 watts average. (Normally supplied with Type N, ⅜" connectors; 10 kw peak, 10 watts average.) Features 15 db isolation and 1 db max. insertion loss. VSWR is 1.25 max. based on 2:1 load mismatch; 1.15 max. into matched load. Model 1233: 2.0-4.0 kmc; model 1233-1: 3.0-5.5 kmc; $450. each.



low power broadband waveguide

Provide maximum load isolation and minimum insertion loss over full standard waveguide frequency ranges. Extremely useful for maintaining signal source stability and eliminating long line and frequency pulling effects. Front-to-back ratios are the highest available on the market today: C Band—26:1, $250; XN Band—25:1, $225; XB Band—30:1, $235; X Band—30:1, $220.



high power broadband waveguide

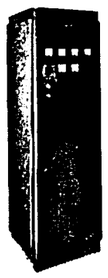
The only line of high power isolators that covers all of X Band with just two models (8.2-10.0 kmc and 10.0-12.4 kmc), each with front/back ratio of 40:1. Input power rating: 250 kw peak, 300 watts average, achieved through use of special high Curie temperature ferrite materials. VSWR is 1.05 max. with matched load; 1.10 max. with 3:1 mismatch. Only $175 each. Model with same VSWR, 28:1 front/back ratio, 300 kw peak, and 300 watts average, 7.05-10.0 kmc, $195.

consult NARDA for: Circulators • Phase Shifters • Modulators • Attenuators • Special Isolators

bolometers & thermistors:

The complete line of Bolometers (barretters) and Thermistors for all frequency ranges, including cylindrical, crystal, disc, and miniature configurations.

modulators & test instruments:



A line of Microwave Modulators, designed to operate a maximum number of existing magnetrons, without any alterations to the modulator. Provision has also been made for quickly converting these units to handle any new or uncommon pulse microwave tubes. All units feature silicon rectifiers and diodes for increased life and more reliable operation. Complete information on request.

Narda Microwave test instruments are designed to offer you something *more* than competition. Whether you require Power Meters, Klystron Power Supplies, and Radar Performance Checkers, VSWR Amplifiers, Impedance Meters, or any other Narda instruments, you'll be pleased with their precision workmanship, close adherence to specifications, excellent reliability, and exclusive features.

waveguide & coaxial equipment:

Narda's full catalog includes a complete line of UHF and microwave hardware, all of the highest quality. Most of our products are available for immediate delivery; flexible production schedules permit prompt shipment of even those items not regularly on the shelf.

free catalog:

We'll be glad to send you Narda's newest catalog. Just drop us a line, indicating the microwave areas in which you are most interested. Address: Department **IRED-61-3.**

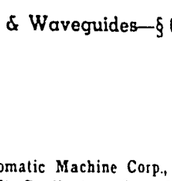
MICROWAVE COAXIAL COMPONENTS

The complete Sage catalogue includes twenty-three lines of coaxial and waveguide components, covering the frequency range from DC through Q-Band. The tables below highlight three of the coaxial lines.

TEMLINE HYBRIDS

Model No.	Frequency Range	Minimum Directivity	Max. VSWR	Body Dim.	Price
748	60-125 mc	30db	1.20	22" x	$225.00
749	125-250 mc	20db	1.20	11" x	175.00
750	250-500 mc	20db	1.20	6" x	175.00
751	500-1000mc	20db	1.25	3" x	175.00
752	1000-2000mc	20db	1.25	2" x	175.00
753	2000-4000mc	20db	1.25	1" x	175.00

Coupling: 3db ± 0.5db



COAXIAL BALANCED MIXERS

Model No.	Frequency Range	Output	Body Dim.	Crystals Supplied	Price
2491	125-250 mc	Dual	11" x	(2) 1N416E	$400.00
2493		Single			350.00
2501	250-500 mc	Dual	6" x	(2) 1N416E	300.00
2503		Single			350.00
2511	500-1000mc	Dual	3" x	(2) 1N416E	300.00
2513		Single			350.00
2521	1000-2000mc	Dual	2" x	(2) 1N416E	300.00
2523		Single			350.00
2531	2000-4000mc	Dual	2" x	(2) 1N416E	300.00
2533		Single			350.00
2541	4000-8000mc	Dual	2" x	(2) 1N415E	300.00
2543		Single			350.00

30 or 60mc IF

COAXIAL ROTARY JOINTS

Model No.	Frequency Range	Maximum VSWR	Maximum Insertion Loss	Price
305*	DC-12,400mc	1.15 DC-5000mc	Less than 0 1db	$100.00
305W*		1.30 5000-12 400mc		110.00
320**	800-12,000mc	1.10 800-6000mc	0 3db 800-1200mc	125.00
320W**		1.20 6000-8000mc	0 2db 1200 3000mc	135.00
		1.30 8000-12,000mc	0 1db 3000-12 000mc	

*Contacting junction **Capacitively coupled

NOTE: Models 305W and 320W are weatherized versions of Models 305 and 320, respectively.

Engineering inquiries concerning special requirements are invited.

SAGE LABORATORIES, INC.

3 HURON DRIVE • EAST NATICK INDUSTRIAL PARK • NATICK, MASS. • TWX: NATICK 479U • DIRECT DIAL CODE 617 OLYMPIC 3 0844

For details, circle #421 on Reader Service Card

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 81-226.

TRG INC.

Total capability in millimeter test bench and system components 26 to 220 kmc.

FERRITE DEVICES
- Complete ferrite duplexers
- Four port circulators
- Three port reciprocal switches
- Variable attenuations
- Modulators
- On-off switches
- Isolators

LOW LOSS CIRCULAR WAVEGUIDE COMPONENTS
- Mode filters
- Corrugated bends
- Rectangular to circular mode transitions
- Rectangular to TE_{01} transitions
- Dual mode transducers
- Rotary joints

TEST BENCH
- Slotted lines
- Directional couplers
- Wavemeters
- Variable attenuators
- Precision attenuators
- Phase shifters
- Detector mounts
- E/H tuners
- Slide screw tuners
- Sliding short circuits
- Transitions
- Tees
- Twists
- Bends
- Terminations
- Drill Jigs

SYSTEMS COMPONENTS
- Duplexers
- Single hybrid rings
- Triple hybrid rings
- Balanced mixers
- Waveguide switches
- Ferrite switches
- Antennas
- Rotary joints
- Flexible waveguide
- Receiver front ends

BOLOMETERS .....26 to 220 kmc
HARMONIC MIXERS AND GENERATOR .....26 to 220 kmc
CALORIMETERS .....26 to 220 kmc

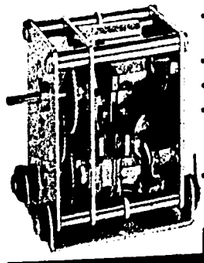
Speed Cannot Vary!

amglo

CONSTANT SPEED REED-CONTROLLED DC MOTORS AND TIMERS

--for critical Industrial, Military and Space Applications



- Speed is a function of reed frequency.
- Speed is independent of voltage and load variation.
- Low power input—0.5 to 2 watts.
- Operating Voltage—3 to 110 V. DC.
- Output shaft speed as required—(1500 RPM to 1 Rev. in 24, or more hours).
- Torque—up to 400 inch ounces at 1 RPM.

Write for descriptive literature.

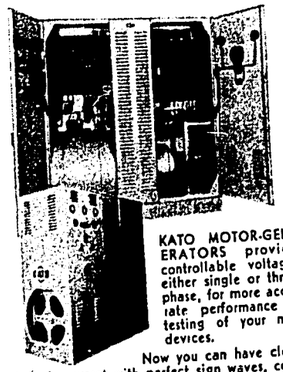
CLEAN POWER!



KATO MOTOR-GENERATORS provide controllable voltage, either single or three phase, for more accurate performance in testing of your new devices.

Now you can have clean 60 cycle current with perfect sign waves, complete control of harmonics, wave form and absolute voltage control with Kato Motor Generators.

Generator speeds from 720 RPM up to 3600 RPM at 60 cycles.

400 cycle generators—complete range up to 300 KW.

You can depend on Kato Engineering to solve your particular power problem.

WRIGHT MOTORS

A Dependable Source for Precision Servos and Rotary Components

Wright Division of Sperry Rand offers design engineers faced with new challenges a dependable source for precision servos and rotary components.

Wright Motors meet the most exacting demands of critical Defense and Commercial applications. And when adaptations are required to answer your specific requirements, Wright has the qualified engineering and production capabilities to serve with sureness and dispatch.

A catalog containing data on our complete line is available upon request. You are also invited to write for the name and address of your nearest Wright Motors representative.

POWER SUPPLIES

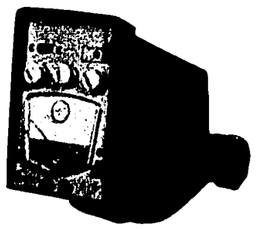
ANDERS

your assurance in reliability

NEW in '62!

OMNI-Power Supplies.

With versatility in mounting, meeting 90% of transistorized power requirements. Can be rack mounted, used on bench, or used as a modular unit. Three models available, 40W, 160W, and 500W. Each with four ranges 0-8, 0-16, 0-32, and 0-50 volts with graduated current 800 MA to 50 amps. OMNI-Power: means compactness, long life.



MODEL OMNI-POWER 40W

Send for bulletin on the complete ANDERS line of power supply units:

- Transistorized
- Vacuum Tube
- Solid State

We welcome the opportunity to quote on your special needs.

ANDERS Electronics, Inc.
Brook Rd., Needham Heights 94, Mass.

To improve performance of POWER SUPPLIES

specify

Inductrol* Induction Voltage Regulators

Voltage fluctuations can cause electronic tube failure, make equipment operate erratically, increase replacement parts costs. Inductrol regulators operate on the induction principle. This means precise voltage control and high reliability because **no brushes or tubes** are used. G-E Inductrol regulators are virtually maintenance free.

More information appears opposite General Electric "Voltage Regulator" listing in Directory II, Class 72.

*Registered trade-mark of General Electric Co.

REGULATED POWER MODULES ??

R|P|M*

*REGULATED POWER MODULE PATENT APPLIED FOR

FOR MILITARY (MIL-E-16400-B) INDUSTRIAL APPLICATIONS

HIGHER RELIABILITY FOR MILITARY APPLICATIONS higher environmental immunity to shock, vibration and humidity 5 year life expectancy in continuous use extended operating temperature 20 C to 65 C wide choice of D C Voltages

HIGHER RELIABILITY FOR INDUSTRIAL APPLICATIONS super rugged construction and MIL hardware all tubes clamped Wide choice of voltage and current ranges, 125-425 volts 50 to 400 milliamps 6 3VAC OUTPUTS at ample capacities RPM units are custom designed for compactness and most efficient use of space

SPECIFICATIONS — ALL MODELS

input 105-125 V A C 50-60-400 cycles

outputs Voltage ranges as shown in the table, continuously variable Current zero to full load as shown Outputs floating - either positive or negative may be grounded

6 3 V A C centertapped at Currents shown in table

regulation 0 05 regulation for NL to FL or line changes of 10 under any conditions of load current or line voltage within limits stated

ripple 1 mV RMS maximum under any conditions of load current or line voltage within limits stated

transient response Output voltage returns to within regulation limits within 25 microseconds in response to 50% step change in the load

stability Maximum long term stability is assured by the use of 20 ppm error sensing resistors and by pre aging every RPM unit

output impedance Maximum values as shown in the table

remote sensing Terminals for remote sensing are brought out on the terminal board

multiple operation RPM s may be paired off in series or parallel to achieve additional voltage or current capacities

ambient temperature Industrial units 0 50C operating

ambient temperature Industrial units 50 C operating Military units 20 to 65 C operating All units 55 to 85 C storage

construction One piece cast aluminum housing, baked enamel finish Input and output terminals compactly grouped for access through single round access hole in chassis Mounting by four 10-32 screws in any position

ELECTRONICALLY REGULATED D. C. CONSTANT VOLTAGE POWER SUPPLIES

The output voltage is continuously variable from 200 to 325 volts D.C. for load currents of 0 to 100 M.A. with an input voltage of 105 to 125 volts 60 cycle. Regulation is better than 1%. An isolated A.C. voltage of 6.3 volts at 3 amperes is available at the output terminal connections.

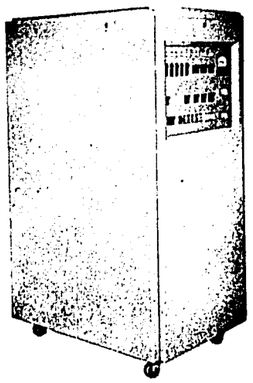
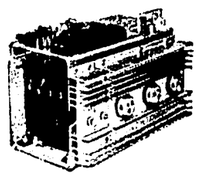
ENGINEERED AND BUILT BY ACME ELECTRIC *Means* DEPENDABILITY

When dependable performance is the major factor, your best source of supply is Acme Electric. We offer the cooperation of an engineering staff well qualified by experience to assist in your design problems. These engineers have at their command all the modern facilities essential to manufacturing magnetic components. We invite your inspection of these facilities.

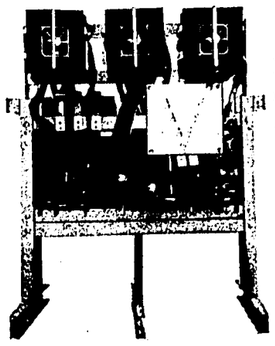
DC REGULATED POWER SUPPLIES



Individually designed to the specific power requirements of the application. Acme Electric designed units are used with electronic business machines, industrial, research and military systems.



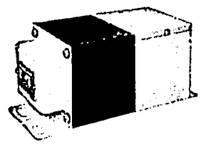
A typical production design incorporating transistorized panel, transformer, saturable reactor, rectifier and components into a compact dependable power supply.

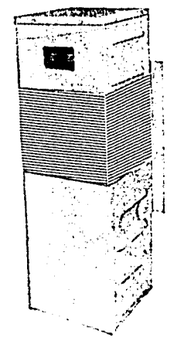


Magnet power supply module designed for an Alternating Gradient Synchrotron research project. Output power rating 175 KW dc. Also available in ratings to 1000 KW dc.

CONSTANT VOLTAGE STABILIZERS

All designs are for continuous duty service with regulation ±1% of normal regardless of variations of input voltage. Current limiting design protects unit against overloads. Available in standard stock models from 15 va thru 2 kva. Primary voltage 95-130; 190-260. Secondary voltage: 6.3; 120; 240. Write for catalog.





MINIATURE AND HIGH TEMPERATURE TRANSFORMERS

Our experience in designing and producing transformers for high temperature operation is of definite value if you need a supply source for such components. Several hundred designs have been produced successfully. Write for catalog.

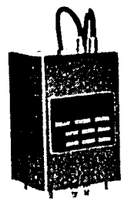
HIGH VOLTAGE EQUIPMENT by DEL

All Del products represent the ultimate in quality. Their design and manufacture incorporate only the finest materials and workmanship to assure thoroughly dependable operation in industrial and research applications.

Standard Power Supplies and Transformers are available from stock. Others can be built to your specific requirements with output up to 250 KV and 50 KW.

POWER SUPPLIES



COMPACT HIGH VOLTAGE POWER SERIES

Model No.	Output Voltage	Rated Current	Dimensions	Wt.
2.5—2—1	0—2.5KV	2MA	3" x 2½" x 4½"	3⅜
5—2—1	0—5KV	2MA	3" x 3½" x 4½"	4¼
10—1—1	0—10KV	1.25MA	3" x 3½" x 4⅜"	5½
15—1—1	0—15KV	1.25MA	4¼" x 5⅛" x 5¾"	11¾
20—1—1	0—20KV	1.25MA	4¼" x 5⅛" x 6¾"	14¾
25—1—2	0—25KV	1.25MA	4¾" x 6" x 7¼"	20
30—1—2	0—30KV	1.25MA	5" x 6½" x 7¼"	24¼
40—2—1	0—40KV	2MA	8¼" x 6¼" x 7"	32

These supplies feature reversible polarity, low ripple, shielded polyethylene output cables, selenium rectifiers in an epoxy filled hermetically sealed can. Extremely compact design for mounting on chassis. Input: 115 V— 60-400 cycles. High current units also available.

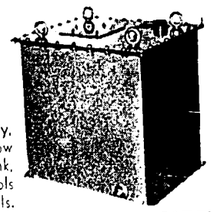
METER MULTIPLIERS

Del Electronic's line of multipliers are designed and built to provide high voltage DC measurements with safety and minimum corona at reasonable cost. Each unit consists of resistors immersed in high grade insulating oil and hermetically sealed grounded case. A neon lamp is permanently connected across the meter terminals for safety. All units are designed for use with 100 ua full scale meter. Can be furnished with panel type 4½" rectangular 100 ua meter (2% accuracy), with KV scale to match.

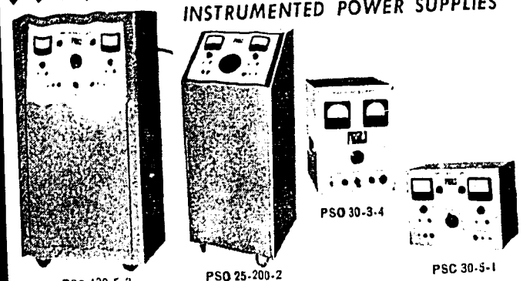
Type	Maximum Voltage in Kilovolts	Case Dimensions (Max.) W	D	H	Insulator Height
M—5	5	2—5/16"	2—1/16"	2—1/2"	1"
M—10	10	2—5/16"	2—1/16"	2—1/2"	1—3/4"
M—15	15	2—5/16"	2—1/16"	3—1/8"	1—3/4"
M—20	20	2—3/4"	2—1/2"	4"	2—1/2"
M—30	30	4—1/4'	3—1/4"	5—1/2"	3"
M—50	50	4—3/4"	4'	8"	7"
M—100	100	9—1/2"	9—1/2"	9—1/2"	12"
M—150	150	11"	11"	12"	20"
M—250	250	16—1/2"	16—1/2"	22"	28—3/4"

SERIES "O" OIL INSULATED TANK UNITS

These supplies feature reversible polarity, shielded polyethylene output cables, low corona, sealed oil tight, dust free tank, quiet long life operation. Various controls are available. Write for complete details.



INSTRUMENTED POWER SUPPLIES



Model No.	Output	RMS Ripple	Dimensions
PSC 20—5—2	20KV— 5MA	0.5%/MA	9½x11x12"
PSC 20—5—3	20KV— 5MA	0.5%/MA	20x14x12"
PSC 25—200—2	25KV— 200MA	4% RMS	24x20½x54"
PSC 30—3—4	30KV— 3MA	0.5%/MA	9½x11x12"
PSC 30—5—1	30KV— 5MA	0.5%/MA	20x14x12"
PSC 30—200—1	30KV—200MA	4%RMS	24x20½x54"
PSC 50—30—1	50KV— 30MA	0.1%/MA	24x20½x54"
PSC 80—10—1	80KV— 10MA	0.2%/MA	33x22x59"
PSC 100—5—1	100KV— 5MA	0.4%/MA	33x22x59"
PSC 100—200—1	100KV—200MA	0.1%	tank 44½x29x51" cabinet 27x27x70"
PSC 120—5—1	120KV— 5MA	0.4%/MA	33x22x59"
PSC 120—10—1	120KV— 10MA	0.4%/MA	33x22x59"
PSC 150—5—1	150KV— 5MA	0.45%/MA	33x22x59"
PSC 150—10—1	150KV— 10MA	0.45%/MA	33x22x59"
PSC 250—1—1	250KV— 1MA	0.6%/MA	tank 40x55x71" cabinet 20x14x12"
PSC 250—3—1	250KV— 3MA	0.6%/MA	tank 40x55x71" cabinet 20x14x12"

These fully instrumented D.C. Power supplies feature unexposed high voltage components immersed in tank filled with high grade insulating oil and large, easy-to-read KV and MA meters mounted on front panel, and many other control features.

REGULATED POWER SUPPLIES

HIGH VOLTAGE

TRANSISTORIZED SERIES TRHV

INPUT: 115 V 60 CYCLES

The TRHV line is the result of a new approach to an old problem. These power supplies are all solid state. Reference and regulating circuitry is accomplished at low voltage. Units are completely self-contained and require only 115V A.C. excitation to be operative. Series TRHV are rugged and feature good line, load and thermal stability. Operating temperature range is —20°C to +55°C. Also available for 400 cps operation.

Model #TRHV	Output Voltage	Max. Current	Size
1 R5—1	1 KV	5 MA	4¼ x 3¾ x 5½"
2.5R4—1	2.5 KV	4 MA	4¼ x 3¾ x 5½"
5R2—1	5 KV	2 MA	4¼ x 3¾ x 5½"
7.5R1.5—1	7.5 KV	1.5 MA	4¾ x 4 x 6"
10R1—1	10 KV	1 MA	4¾ x 4 x 6"
10R2—1	10 KV	2 MA	6¾ x 4¼ x 7½"
15R1.5—1	15 KV	1.5 MA	6¾ x 4¼ x 7½"
20R1—1	20 KV	1 MA	7¼ x 4 5/16 x 7½"

LOW VOLTAGE

WIDE RANGE VARIABLE —RV-500 SERIES

INPUT: 105 to 125 V, 57-63 CPS, 1φ

MODEL SCRT 32V-15A-1A

SCRT TYPE—Silicon Controlled Rectifier and Transistor Regulators
Designed to supply well regulated DC at high current. In wide usage where ripple and fast transient are required. Advantages include firing angle control for minimum dissipation.

MODEL SCRT	OUTPUT VOLTS	OUTPUT AMPS	STATIC REGULATION 105V-125V Line	STATIC REGULATION N.L. to F.L.	RIPPLE
32V—15A—1A	0—32	0—15	1% or 30MV	1% or 30MV	2MV RMS
60V—7.5—1	0—60	0—7.5	1% or 60MV	1% or 60MV	3MV RMS

SCR TYPE—Silicon Controlled Rectifier Regulator
Designed to supply well regulated DC at high current. In wide usage where ripple and response time characteristics are not too critical. Intended to replace the older, more cumbersome magnetic amplifier types.

MODEL SCR	OUTPUT VOLTS		OUTPUT AMPS		STATIC REGULATION 105V-125V Line	STATIC REGULATION N.L. to F.L.	RIPPLE
32V—15A—1	0/16	16/32	0—15		5% or 150MV	5% or 150MV	200MV RMS
60V—7.5A—1	0/30	30/60	0—7.5		5% or 300MV	5% or 300MV	400MV RMS

SILICON AND SELENIUM
DC POWER SUPPLIES

MODEL G50-50R: Input 220V, 3P, 60cps. Output 0-50VDC, 0-50A
MODEL G30-100: Input 220V, 3P, 60cps. Output 0-30VDC, 0-100A
AIRCRAFT BATTERY ELIMINATOR: Input 220V 3P, 60cps. Output 0-30VDC, 20OA
AIRCRAFT BATTERY ELIMINATOR: Rack or Bench. Input 115V, 60cps. Output 0-30VDC, 0-20A. **Price $200.**
REGULATED POWER SUPPLY: Input 115V, 60 cps. Output 5-30VDC, 0-40A. Regulation ±1%
MODEL GX-24-1: Input 115V, 60cps. Output 24VDC, 1A
PORTABLE BATTERY CHARGER: Input 115V, 60 cps. Output 6/12VDC, 20A
MODEL G92F: Input 115V, 60cps. Output 0-30VDC, 0-10A **PRICE $145.**
MODEL A10: Input 115 or 230V, 60cps. Output 115V, 125W. **PRICE $63.**
MODEL G30-40F: Input 115 or 230V, 60cps Output 0-32VDC, 0-40A. **PRICE $325.**
MODEL G30-10FR: Input 115V, 60cps. Output 0-30VDC, 0-10A. **PRICE $185.**
MODEL GX30-10: Rack. Input 115V, 60cps. Output 30VDC, 0-10A. **PRICE $125.**
MODEL G48-6FM: Rack. Input 115V, 60cps. Output 0-48VDC, 0-6A. **PRICE $190.**
MODEL GS 14-15F: Input 115V, 60cps. Output 0-14VDC, 0-15A. **PRICE $125**
MODEL GX30-5: Input 115V, 60cps. Output 30 VDC, 0-5A. **PRICE $70.**
MODEL G-115: Input 115 or 230V, 60cps. Output 0-32VDC, 0-50A. **PRICE $375.**
MODEL G94F: Input 115V, 60cps. Output 0-300VDC, 0-1A. **PRICE $240.**
MODEL GX30-20: Input 115V, 60cps. Output 0-34VDC, 0-20A. **PRICE $185.**

Other models plus full line of plating power supplies also available.
Catalog material available.

Additional features: meters, rated for continuous duty, excellent regulation and ripple, heavy duty components and construction, special designs at small additional cost.

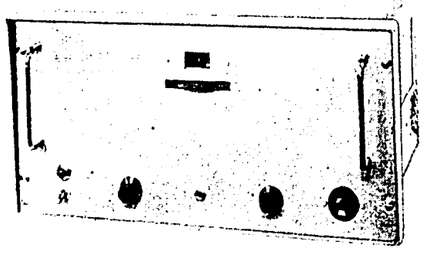
NEW Powertron
AC ELECTRONIC GENERATOR

MODEL 150
$525.00

PRECISION AC POWER SUPPLY FOR LABORATORY & PRODUCTION USE



SPECIFICATIONS

Power Output	160 V.A.	Total Distortion	Less than 1%
Fixed Frequency	400 CPS (other freq. avail.)	Regulation	Less than 1%
Variable Frequency	350-450 CPS	Operates with load of any power factor	
External Frequency	50-4000 CPS	Small size	8¾" x 19" Panel

Also Available — Model 250 — 250 VA Power Output

Representatives in Principal Cities

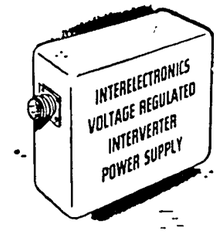
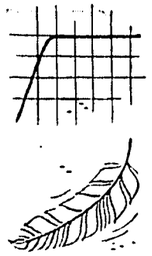
PROVEN RELIABILITY—
SOLID-STATE POWER INVERTERS
over 260,000 logged hours— voltage-regulated, frequency-controlled, for missile, telemeter, ground-support, 135°C all-silicon units available now—





Interelectronics all-silicon thyratron-like gating elements and cubic-grain toroidal magnetic components convert DC to any desired number of AC or DC outputs from 1 to 10,000 watts.

Ultra-reliable in operation for over 260,000 logged hours; no moving parts, unharmed by shorting output or reversing input polarity. Wide input range (18 to 32 volts DC), high conversion efficiency (to 92%, including voltage regulation by Interelectronics patented reflex high-efficiency magnetic amplifier circuits.

Light weight (to 6 watts oz.), compact (to 8 watts/cu. in.), low ripple (to 0.01 mv. p-p), excellent voltage regulation (to 0.1%), precise frequency control (to 0.2% with Interelectronics extreme environment magnetostrictive standards or to 0.0001% with fork or piezoelectric standards).

Complies with MIL specs for shock (100G 11 msec), acceleration (100G 15 min.), vibration (100G 5 to 5,000 cps), temperature (to 150 degrees C), RF noise (1-26600).

AC single and polyphase units supply sine waveform output (to 2% harmonics), will deliver up to ten times rated line current into a short circuit or actuate MIL type magnetic circuit breakers or fuses; will start gyros and motors with starting current surges up to ten times normal operating line current.

Now in use in major missiles powering telemeter transmitters, radar beacons, electronic equipment. Single and polyphase units now power airborne and marine missile gyros, synchros, servos, magnetic amplifiers.

Interelectronics—first and most experienced in the solid-state power supply field produces its own all-silicon solid-state gating elements, all high flux density magnetic components, high temperature ultra-reliable film capacitors and components, has complete facilities and know how—has designed and delivered more working KVA than any other firm!

For complete engineering data, write Interelectronics today or call LUdlow 4-6200 in New York.

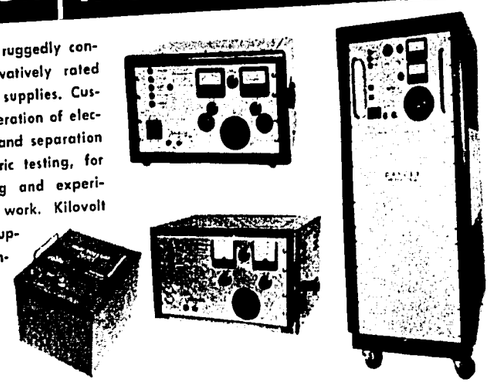
HIGH VOLTAGE POWER SUPPLIES INSULATION TESTERS

Soundly engineered, ruggedly constructed and conservatively rated high voltage power supplies. Custom designed for operation of electrostatic deposition and separation systems, for dielectric testing, for industrial processing and experimental laboratory work. Kilovolt Corporation power supplies represent concentrated experience in the field of high voltage techniques.



GENERAL UTILITY SUPPLIES

FEATURES

- Reversible Polarity Output
- Continuously Variable Output Control
- Automatic Overload Shut-off
- Dual Range Voltage and Current Meters
- Provisions for External Interlock
- Operational Pilot Lamps
- Selenium Rectification

AC Insulation Testers are available for testing to ASTM specifications. Full description and prices upon request.

Power packs to 30 KV are available for inclusion as components in your system. Write for OEM quantity prices.

All equipment may be modified to meet users special requirements. Requests are solicited for quotations to your specifications.

*Positive or Negative Polarity. Reversible Polarity on Special Order.

Prices and specs subject to change and should be verified when order is placed.

KUPFRIAN

TRANSISTORIZED POWER SUPPLIES

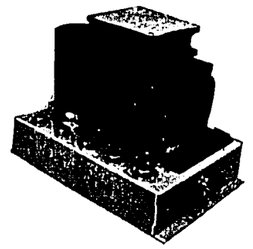
- **QUALITY CONSTRUCTION**
  High quality components are used throughout each unit. Expert workmanship and design provide "built in" quality.
- **DEPENDABILITY**
  The many KUPFRIAN power supplies in operation throughout the world serve to prove that KUPFRIAN units can be depended upon under a wide range of conditions.
- **LOW COST**
  Years of experience by KUPFRIAN MANUFACTURING CORP. in the transistorized power supply field have developed many cost-saving designs and production techniques which in turn reduce unit selling prices without sacrificing quality.

CUSTOM BUILT UNITS TO SPECIFIC REQUIREMENTS, COMMERCIAL OR MILITARY

Wide range of experience in the fields of: MISSILE, AIRCRAFT, COMMUNICATION, CONTROL & INSTRUMENTATION

CUSTOM-BUILT power supplies by KUPFRIAN MANUFACTURING CORP. are continually proving to be the most economical answer to many specific power requirements. KUPFRIAN engineers can supply the most practical design for these applications which result in greater savings and more efficient operation.

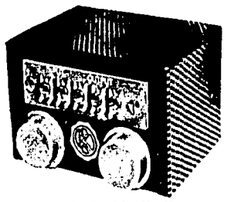
Pictured is a typical custom-built power supply developed to meet a specific customer application. In many instances designs in our file may be modified to fulfill your particular requirements. The diversified experience of KUPFRIAN MANUFACTURING has lent itself to the development of power supplies ranging in output from 5 watts to 1 kilowatt. These units can be supplied to fulfill the requirements of either commercial or military specifications. FORWARD YOUR REQUIREMENTS TODAY FOR A PROMPT QUOTATION.



TYPICAL CUSTOM-BUILT UNIT
Input 115 VAC • 60 cy
Output ± 24 VDC • 800 MA
± 20 VDC • 600 MA
Load regulated ± 2%.
Ripple 0.1% Max.

STANDARD UNITS

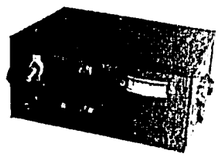
KUPFRIAN MANUFACTURING CORP. Transistorized Power Supplies are highly efficient units, designed to convert low-voltage power sources to higher AC or DC voltages. The solid-state design throughout offers a compact, shock resistent power supply adaptable to a variety of uses. They are instant starting for immediate response with no moving parts or pitted contact problems. Thousands of hours of trouble-free operation are assured with KUPFRIAN-built transistorized power supplies.



MODEL CA-0631-05
WRITE FOR BULLETIN 6071

FREQUENCY REGULATED POWER SUPPLIES

Two standard frequency regulated units are available as stock items. These are the IFA-1260-10; 100 watts and the IFA-1260-25; 250 watts. These units feature frequency control of ±1 cps for 20% to 100% load variation and an input differential of 11 VDC to 16 VDC. A continuous power output of 250 watts or 375 watts intermittent power is available. Output voltage and frequency adjustments can be made by the customer for specific installations. More detailed information on these and other standard frequency controlled units are available on request.



MODEL IFA—1260-10
WRITE FOR BULLETIN 6075

ELECTRONIC ASSEMBLIES

KUPFRIAN capabilities and facilities have lent themselves to the fabricating of electronic assemblies of many types. Experience includes the successful fulfillment of a wide range of customer requirements varying from small power devices to complete business machines.

PARTS ARE PART OF CUSTOM POWER... BUT THE BIG PART IS BRAIN POWER

NJE leads the custom power supply field because of its unparalleled engineering experience... experience that turns simple hardware into sophisticated power sources for computers, military equipment and systems for automation.

Very often your supply must be designed from the ground up, with specialists attacking a completely new problem. In other cases, we can modify an existing design to fit your needs in order to speed delivery and reduce costs.

NJE's completely new plant includes all research and development, engineering, drafting, sheet metal work, stock, painting, meter calibration, transformer production, assembly and testing—all under one roof!

Here are just a few of the leading projects now using NJE power supplies and systems: ■ U. S. Navy computer memory power supply ■ "Hustler" ground support power supply system ■ Radar system power supply ■ Hawk missile check-out ■ F-105 flight simulator power supply system ■ Atlas missile check-out ■ Nike Zeus.

For complete details on custom designs and a catalog on one of America's widest line of standards, write today!

North Hills CURRENT GOVERNORS are widely used by manufacturers and users of current sensitive devices. Of particular interest is the programmable feature in all models, since the current may be electronically pulsed, modulated or programmed.

Features included are as follows: Constant current over wide voltage range, high accuracy and stability, rapid manual or automatic selection of desired current level, current may be electronically pulsed, modulated, and programmed, inline readout, chopper amplifier, temperature compensated sampling resistors, reference elements, oven controlled reference, and

Model (No. all units operate from 115 V AC ± 10%)	Regulated Output Current	Output Voltage	Regulation Load and Line	[illegible]

from the SAME TERMINALS *with* AUTOMATIC TRANSFER TO EITHER MODE

The Power Designs Models 4005 and 2020 Power Supplies add a new dimension to the application of d-c sources for laboratory instrumentation. Truly universal, these instruments may be operated as a *constant voltage* source, a *constant current* source, a *constant voltage* source with *adjustable current limiting* or a *constant current* source with *adjustable voltage limiting*.

The Models 4005 and 2020 employ solid state devices exclusively in a proprietary circuit trademarked AMBITROL.
*TM

AMBITROL* is a dual regulator system permitting continuous control of voltage or current with automatic electronic cross-over to either mode of operation.

These supplies also feature remote voltage programming, remote current programming, dual concentric controls for coarse and fine adjustment of voltage or current and the HEATRAN® circuit for electronic control of power transistor dissipation.

MODEL 4005

CONSTANT VOLTAGE	CONSTANT CURRENT
Range: 0-40 vdc, 0-0.5 amperes, cont. adjust.	**Range:** 25 to 500 milliamperes, cont. adjust.
Regulation: .05% or 10 millivolts max. for line or load variations.	**Regulation:** .02% or 100 microamperes max., for line or load variations.
Ripple: .0005% or 250 microvolts maximum.	**Voltage compliance:** Output current constant to full rated output voltage of 40 volts.
Response Time: Less than 50 microseconds.	**Ripple Content:** .005% or 20 microamperes max.
Source Z: 0.1 ohms to 20 kc, 0.7 ohms to 1 mc.	**Source Z:** 400,000 ohms approximately.

MODEL 2020

CONSTANT VOLTAGE	CONSTANT CURRENT
Range: 0-20 vdc, 0-2 amperes, cont. adjust.	**Range:** 25 ma to 2.0 amp., cont. adjust.
Regulation: .05% or 10 millivolts max. for line or load variations.	**Regulation:** .05% or 250 microamperes max., for line or load variations.
Ripple: .0005% or 250 microvolts maximum.	**Voltage compliance:** Output current constant to full rated output voltage of 20 volts.
Response Time: Less than 50 microseconds.	**Ripple Content:** .01% or 25 microamperes max.
Source Z: 0.1 ohms to 20 kc, 0.7 ohms to 1 mc.	**Source Z:** 100,000 ohms approximately.

PRAXICON

The PI-9000 Series Power Supplies of which Model PI-9028 is illustrated, utilize an advanced technique for obtaining regulated DC Power at extremely high efficiency by means of switching circuitry which takes energy from the AC source in discrete pulses. These pulses are integrated by the regulator system to supply the load demand. Regulation is achieved by electronic control of pulse amplitude, pulse width, and pulse repetition rate.

PI-9028 2-28 VDC at 2 AMP. **$99.50**

Constant Current Supplies

RI-081	0-81 Ma	0-1000V
RI-234	0-230 Ma	0-350V

A series of high-voltage power supplies providing a stable and ripple-free high-voltage output over a wide range, practically independent of line voltage input or load current variations.

These supplies are completely self-contained and AC operated, and compactly housed in ventilated cabinets designed for either relay-rack mounting or bench use. All operating controls are mounted on front panel; output terminals and input power connection on back.

High-voltage rectifier is a full-wave silicon doubler. Output voltage is continuously variable over entire range in each case, usually variable stepwise in conjunction with a vernier control.

Among special features are molded components — rectifiers, transformers, etc. — cast in epoxy resin, for superior insulation and trouble-free performance.

Any of these supplies can be modified by using meters, polarity switches, co-ax connectors, wire-wound resistors, etc. — or special designs can be built to meet specialized requirements.

The range of any of these supplies can be made to start at zero voltage.

Features

Either positive or negative of any supply may be grounded

Regulation: .01 to .001%

Line Stability: .05 to .005%

Long-term Stability: .01-.05% per hour, about 0.1% per day

Impedance: 1 to 5 Ohms

Ripple: 0.5 to 3 Mv P-P

Standard tubes used

Millimeter Wave Generators

HIGH VOLTAGE POWER SUPPLIES AND EQUIPMENT

We have sold quantities of these power supplies to laboratories, industrial concerns, the government and universities. Only the best available selected material goes into these units, so that you will have many years of dependable service. Only a few of our standard models are shown below. Quotations on special supplies cheerfully given.

PRECISE MEASUREMENTS COMPANY

HIGH VOLTAGE POWER SUPPLIES

One of the most popular power supplies on the market. Completely redesigned for greater ruggedness and convenience of operation. Widely used for powering electronic equipment and for routine breakdown and insulation testing. Output voltage is well filtered D.C. which is adjustable with convenient front panel control. Input is 115 Volt, 60 cycle A.C. Larger 6" precision 1% mirror scale movement available on order. Regulated models offer closely stabilized output voltage regardless of line or load changes.

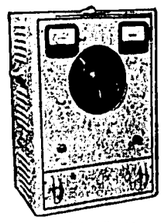
Model	Max. Voltage	Regulated 100 Microamps	Unregulated 1 MA.	Unregulated 5 MA.
6003-1	1,000		$150.00	$200.00
6000	2,500	120.00	175.00	225.00
6005	5,000	135.00	200.00	250.00
6010	10,000	145.00	225.00	275.00
6015	15,000	155.00	250.00	300.00
6025	25,000	205.00	275.00	350.00

Note. Regulated power supplies are of the radio frequency type and adjust from approximately 20% to full rated voltage. The 1 and 5 milliampere types are transformer operated and have a range of zero to full voltage output. These are recommended for industrial service applications.

Mirror Scale Higher Accuracy Meter. Recommended for more exact calibration or test purposes. Add $50.00 to any meter equipped power supply.

For additional built-in current meter (both meters are 3 inch size), including automatic meter protector circuit, add $50.00 to any power.

INDUSTRIAL POWER SUPPLIES



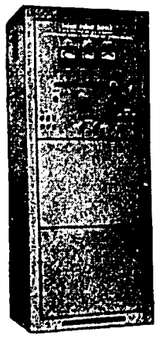
Regulated Types Available

Standard hum level 5% or less. .01% to 1% ripple available. All power supplies have automatic overload cutout control circuits. Regulated models available.

These industrial type power supplies are built for service and efficiency. All are of the transformer type and employ husky components that have been selected for their power handling capacity. Controls are arranged so that operation is greatly simplified and a number of safety features are built in for maximum protection of personnel and equipment. Output is continuously variable from zero to full rated value. Polarity reversing models (as illustrated) can be had at additional cost.

Model	Voltage	Current	Price
F-500V	0-500	3 Amp	$800.00
F-6001	0-1000	2 Amp	975.00
F-6002	0-2000	1 Amp	985.00
F-6003-A1	0-3000	100 MA	375.00
F-6003-AV	0-3000	500 MA	550.00
F-6003-AK	0-3000	1 Amp	1100.00
F-6005-A1-H	0-5000	100 MA	550.00
F-6005-AV	0-5000	500 MA	750.00
F-6005-A1K	0-5000	1 Amp	1200.00
F-6010-A1	0-10,000	100 MA	800.00
F-6020-A05	0-20,000	50 MA	975.00
F-6050-T	0-50,000	½ MA	600.00
F-6100-T	0-100,000	½ MA	1100.00

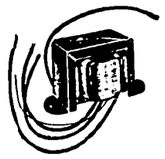
HEAVY DUTY POWER SUPPLIES



For use in applications where high voltages at extra high currents are required. Illustrated is our 100 KW Model, rated for 0 to 7,000 Volts at 14 Amperes DC. This unit is housed in a single convenient cabinet. Output voltage is regulated against line and load changes. Voltage is smoothly adjustable from zero to full output. Automatic circuits protect against overvoltage or over current conditions, turning off main power in a split second. Use of special transformer construction allows constant load drain at full rated output. All power supplies in this series are available with fixed or adjustable output and with or without regulation.

Model	Voltage	Current
A-10	0-1000	5 amperes
A-30	0-3000	5 amperes
A-31	0-3000	10 amperes
A-32	0-3000	20 amperes
A-50	0-5000	5 amperes
A-51	0-5000	10 amperes
A-72	0-7000	15 amperes
A-100	0-10,000	5 amperes
A-110	0-10,000	10 amperes
A-300	0-30,000	5 amperes

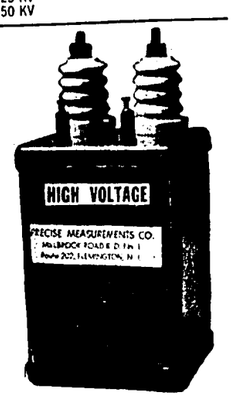
TRANSFORMERS, HIGH VOLTAGE



For experimental, industrial, or production use. These units are small and compact and rated for constant service. Primary designed for 115 Volts, 60 Cycle. Secondary is isolated. Only standard models are listed. We can wind specials for any frequency or voltage. Metering windings available.

Model	Voltage	Model	Voltage
1 KVT	1 KV	10 KVT	10 KV
2 KVT	2 KV	15 KVT	15 KV
3 KVT	3 KV	25 KVT	25 KV
5 KVT	5 KV	50 KVT	50 KV

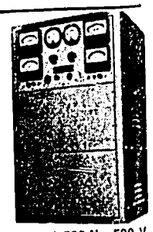
PACKAGED POWER SUPPLIES



These conveniently packaged power units will be found ideal for applications requiring minimum size and weight. Features isolated high voltage terminals permitting either the positive or negative side to be grounded. Rectifier tubes are operated from separate filament transformers so that DC output voltage can be varied from zero to full rated value. Selenium rectifier types have extra cells to assure operation under high line voltage or light loading. All standard units have well filtered DC output. Power packs with AC output available on order.

Model	Output Voltage	Current	Model	Output Voltage	Current
05-KV-5MA	500 Volts DC	5 Ma.	20-KV-1MA	20 KV DC	1 Ma.
1-KV-5MA	1 KV DC	5 Ma.	20-KV-5MA	20 KV DC	5 Ma.
2-KV-5MA	2 KV DC	5 Ma.	30-KV-1MA	30 KV DC	1 Ma.
5-KV-1MA	5 KV DC	1 Ma.	30-KV-5MA	30 KV DC	5 Ma.
5-KV-5MA	5 KV DC	5 Ma.	50-KV-1MA	50 KV DC	1 Ma.
10-KV-1MA	10 KV DC	1 Ma.	50-KV-5MA	50 KV DC	5 Ma.
10-KV-5MA	10 KV DC	5 Ma.	75-KV-1MA	75 KV DC	1 Ma.
15-KV-1MA	15 KV DC	1 Ma.	100-KV-1MA	100 KV DC	1 Ma.
15-KV-5MA	15 KV DC	5 Ma.			

CONSTANT CURRENT POWER SUPPLIES



Duel 500 V - 500 V, 10 Ampere Power Supply. Isolated outputs may be seried or paralleled.

Designed for application where output current must remain constant regardless of loading resistance changes. Used for magnet fields, plating applications, gaseous lamps. Dependable magnetic current stabilizer has no moving parts, no tubes, no transistors to replace. Simply set current to desired level, no balancing or other adjustments needed. Ideal for lamp operation since operating state ionizing voltage in no way affects lamp current. Standard hum level 5%. Lower hum levels available on order.

Model	Maximum Voltage	Maximum Current
C-25-700	25 Volts	700 Amperes
C-70-70	70 Volts	70 Amperes
C-500-10	500 Volts	10 Amperes
C-Duel 500-10	500 or 1,000 Volts	10 or 20 Amperes
C-800-2	800 Volts	2 Amperes
C-1000-100	1000 Volts	100 Amperes

AC INSULATION AND BREAKDOWN TESTERS

Used in testing insulation where AC voltages are desired. Dual instruments are also available which provide choice of AC or DC output with simple toggle switch selection. Units include kilovolt-meter, current meter and automatic overload cutout circuits.

Model	Voltage	VA	AC	Price AC and DC
3000	0 to 3,000	75	$150.00	$ 250.00
3010	0 to 3,000	300	250.00	400.00
3050	0 to 3,000	1,500	500.00	650.00
3100	0 to 6,000	3,000	700.00	1,100.00
5000	0 to 5,000	75	175.00	300.00
1000	0 to 10,000	75	200.00	350.00
1500	0 to 15,000	75	250.00	AC only
2500-AC	0 to 25,000	75	400.00	AC only
2500-DC	0 to 25,000	75	DC only	450.00

SPELLMAN RF TYPE - DC HIGH VOLTAGE POWER SUPPLIES

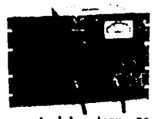
MODEL RG-30

Continuously Variable 15-30 KV Regulated DC Power Supply with Regulated Focus Voltage Tap

A continuous duty DC supply with highly filtered outputs and regulations better than 0.6% at 1 ma.—no load to full load. A variable focus tap 4-6 KV for use with 5WP11, 5TP4 and flying spot tubes. Dimensions: 19" wide x 10½" high x 13" deep.
With HV meter $375 Net Less meter $325 Net
MODEL RG-40 is a 20-40 KV unit with same specifications as RG-30 except .7 ma. at 40 KV.
With meter $375 Net Less meter $325 Net

MODEL PN-30 REVERSIBLE POLARITY

Continuously Variable 1-30 KV Unregulated DC Power Supply



A light, compact unit in wide use for insulation testing, condenser charging, precipitators and laboratory research. Polarity reversible from front panel. Current output—2 milliamperes at 20 KV; 1 ma. at 30 KV. Input—117V AC 60 cycles. Dimensions: 19" x 10½" x 13" .....$275 Net
Less meter .....$225 Net
MODEL PN-30C—Same as above except automatic overload and reset button provided. Adjustable sensitivity 0.5 ma. to 2.5 ma.
With meter .....$325 Net
Less meter .....$275 Net

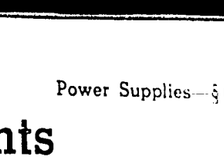
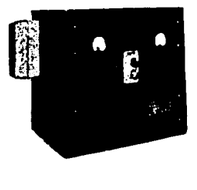
REGULATED DC POWER SUPPLIES



Silicon-Selenium

MAGNETIC AMPLIFIER ± 1% Voltage Regulation

- Greater reliability
- Fast response time
- Greater stability
- Operable under extreme environmental conditions
- No tubes—no warm-up
- Highly efficient



Models available: from 5 amperes to 1500 amperes, 6 volts to 250 volts.

RAPID ELECTRIC COMPANY

2881 Middletown Road, New York 61, New York • TA-8-2200

For details, circle #455 on Reader Service Card

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 81-226

DC TO DC HIGH VOLTAGE UNITS

THE VARIA•VOLT "KING"

THE VICTORY 16KV INFRA-RED POWER SUPPLY

Small but potent. So small that it—and the flashlight battery that powers it—can fit in the palm of a man's hand. This new power supply is designed for use with infra-red equipment which enables military men to work and fight at night. Only one inch in diameter and two and one-half inches long, it is capable of maintaining an output of 16,000 volts. Encapsulated for maximum moisture and humidity protection. Durable nickel plated finish.

ELECTRICAL SPECIFICATIONS

Power supply operates from one "C" cell (1.52 VDC) battery.
Voltage output 15,800 to 16,000 when loaded 1×10^{-9} Amps.
At a load of 1×10^{-7} amps the voltage change is not more than 300 VDC.
At a load of 5×10^{-7} amps the voltage is not less than 15,000 VDC.
Input current at 10^{-9} amps is less than 26 MA.
Ripple at 70°F is not greater than 1%
Voltage rise is in not more than 5 seconds.
Voltage will rise under load to a min. of 15,000 VDC when loaded 3×10^{-7} amps.
Physical size 1.000" dia. × 2.410" long.
Negative output from a special High Voltage Header.
- 10KV, 12 KV and 20 KV units available upon request

THE NEW VARIA•VOLT

A HIGHLY EFFICIENT AND ADJUSTABLE TRANSISTORIZED HIGH VOLTAGE UNIT

FEATURING:
Improved Load Regulation
Improved Temperature Stability (E out ± 10% 0°C-50°C)

- Miniaturized
- Rugged Design to Meet MIL-E-5272
- Encapsulated for Maximum Moisture and Humidity Protection
- Output Voltage Adjustable
- Isolated DC Input and Output
- Output up to 3KV
- May be Powered by Flashlight or other standard cells
- 7 Pin Miniature Connector—Glass to Metal Hermetic Seal
- Enamel Finish to MIL-E-15090B Except for Color
- Can be used with standard MIL approved 7 Pin Miniature Tube Clamps to lock in position for extreme shock or vibration applications
- Silicon Rectifiers

NO TALLER THAN A CIGARETTE
diameter 1.000"
overall length 3.437"
case length 3.000"
average weight 4 oz.

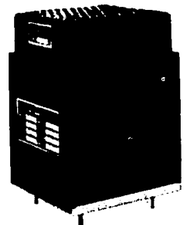
HIGHLY REGULATED AC TO DC UNITS • VICTORY VARIANTS

NOW for the first time through Victory's advanced electrical and mechanical design—a new power supply. Operate the power unit at 1% regulation, remove the operating key and add either a .25% or .05% regulator.

Operating key and special connector design permit complete interchangeability. This allows you to change regulation without any change of wiring or removing supply from its mounting position.

FEATURES

- Encapsulated Transformer and Choke for maximum moisture and humidity protection.
- Output voltage variable for 5% minimum adjustment on models using regulators.
- Aluminum construction for lightweight and maximum corrosion resistance.
- Isolated AC input, DC output.
- Victory specifications are conservative. Derating is not necessary.
- Remote sensing.
- Heat dissipating thermal design. (No heat sink required even at elevated temperatures).
- Short Circuit protected output.
- Overload protected output.
- Rugged design to meet MIL-E-5272.
- Regulators of complete semiconductor design.



- No Down Time
- Maximum Reliability
- Ruggedness
- Flexibility
- Advanced Electrical Design
- Advanced Mechanical Design

PAT. APP. FOR

Power unit can operate separately as a line regulator ± 1%.

Regulator can operate separately for line and load when supplied a DC input voltage

Combined sections form a highly regulated power supply for line and load and can operate without an additional heat sink.

PHYSICAL SIZE
$4\frac{13}{16}$"x$1\frac{1}{2}$"x$1\frac{1}{2}$"H

POWER UNITS

"WE KNOW HOW"

VICTORY ELECTRONICS, Inc.

50 BOND STREET, WESTBURY, L. I. EDGEWOOD 4-8892-7-8

DC TO AC
THE VARIA-VERTER

HERE'S THE ANSWER to industry's increasing need for compact, economical, versatile and reliable sources of 400-cycle power for testing and operation of aircraft and missile components.
WITH VARIA-VERTER, you buy only the power-source you currently need—yet you can easily and inexpensively convert or expand as your needs alter and increase. If a present application, for instance, requires only 25 volt-amperes, you can fulfill that requirement with minimum investment . . . yet with assurance that you will NOT have to purchase an additional, costly regulator if you later need to "step up" to 50 or 100 v.a.

ONLY VARIA-VERTER OFFERS ALL THESE FEATURES

- Encapsulated transformer for maximum moisture humidity protection.
- Isolated input and output.
- Aluminum construction for lightweight and maximum corrosion resistance.
- Complete semi-conductor design.
- Victory specifications are conservative. Derating is not necessary.
- Short circuit protected output.
- Frequency is adjustable for a minimum of 5% (regulated models only).
- Can be operated on resistive or inductive loads.
- Modular structure for interchangeability of the regulator to power unit means greater reliability.
- Heat dissipating thermal design. No additional heat sink required.
- Rugged design to meet MIL-E-5272.

THE VARIA•VERTER

Physical Size 4½"x4½"x1⅞"H

3 Highly Regulated Inverters With One Separate Regulator

Other models available upon request

BECAUSE the Regulator (upper unit) is an integral, independent subcomponent, increasing your power output is now as easy as changing a radio tube! When you go from 25 to 50, or 100 VA, you merely replace the power unit—the old regulator is easily connected to the new power unit, with virtually no downtime—means greater reliability and versatility.

MODEL: ELECTRICAL SPECIFICATIONS
DA 115X-.2R— 25V.A.
(Regulator DA 115XR + PWR Unit DA 115X .2B)
DA 115X-.5R— 50V.A.
(Regulator DA 115XR + PWR Unit DA 115X . B)
DA 115X-1R—100V.A.
(Regulator DA 115XR + PWR Unit DA 115X .5(B)
INPUT: 24 to 30 Volts D.C.
OUTPUT: 115 Volts A.C. 400 C.P.S. Square Wave
FREQUENCY REGULATION: ±1% Line and Load
VOLTAGE REGULATION: ±2.5% Line or Load

INVERTER

Physical Size 4½"x4⅓₆"x1⅞"H

Model: DA 115X—1
Input: 28 Volts D.C.
Output: 115 Volts A.C. 400 C.P.S. square wave, unregulated, 100 V.A.

AC TO DC POWER SUPPLY

Physical Size 5⅝"x5¾"x5⅞"H

Model: AD 28—5
Input: 115 Volts A.C. 60 C.P.S.
Output: 28 Volts D.C. 5 Amp. (Regulation Line or Load ±2%)

FREQUENCY CHANGER

Physical Size 5⅝"x5¾"x7⅝"H

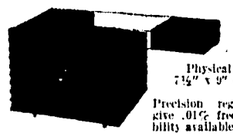
Combination 100VA Inverter and a 28 VDC supply

FOR CONVERTING 60-cycle, single-phase, power-line current to 400 cycles, the two sections shown are used together. For field-testing away from the power line, or for other applications where the source must be 28-volt d.c., the lower section is used. The upper section, by itself, is an unregulated d.c. to a.c. inverter! (115V 400 cycle Square wave) combined they form a frequency changer.
Model: DA—115X—1 + AD 28—5—100V.A.
Input: 115 Volts A.C. 60 C.P.S.
Output: 115 Volts A.C. 400 C.P.S. Square Wave. Unregulated

For details, circle #456 on Reader Service Card

WIDE RANGE SINE WAVE INVERTER

SEPARABLE REGULATOR CAN BE USED ON SINE WAVE OR SQUARE WAVE VARIA-VERTER



Physical Size 7½" x 9" x 6" H

Precision regulation to give .01% frequency stability available on request.

ELECTRICAL SPECIFICATIONS

INPUT: 18-31 VDC Output frequency: 400 cycles
OUTPUT VOLTAGE: 115 VAC
OUTPUT POWER: 100 VA
VOLTAGE REGULATION: ±3%
FREQUENCY REGULATION: ±1%
HARMONIC DISTORTION: 4% max.

In Addition To The Regular Features of VARIA-VERTERS, Added Advantages Of The VARIA-VERTER SINE WAVE INVERTER Are:

- High Efficiency
- Low Harmonic Distortion
- Operation Over Wider Range Of Input Voltage
- Voltage And Frequency Regulation
- Independent Adjustment Of Voltage And Frequency
- Separable Regulator

DC TO DC CONVERTERS

STATIC MOUNT TO MOUNT REPLACEMENTS FOR DYNAMOTORS

Model pictured has triple output:
1—250 VDC-250 MA
2—45 VDC- 10 MA
3—115 VAC 400 cycle square wave 30 VA rating. Frequency is regulated to ± 3% Input 24-30 VDC

Transistorized mount to mount dynamotor replacements offer these advantages:

- Lighter weight
- Higher efficiency
- No brushes
- Improved reliability
- Low starting current
- Instantaneous starting
- No commutator problem at high altitude
- Reduces ambient temp. in equipment
- Longer life
- No maintenance
- No moving parts

DIRECT REPLACEMENTS for VIBRATOR POWER SUPPLIES and GENEMOTORS

PHYSICAL SIZE
3¼"x2⅝"x2⅛"H

Model pictured
150 volts 300MA

Offering these advantages:

- High efficiency (up to 90%)
- Low starting current
- No maintenance
- Improved reliability
- No moving parts
- Light weight

Power ratings up to 50 watts
Ripple less than 1% RMS
Inputs available: 12 or 28 VDC

Available in any voltage from 100 VDC to 400 VDC (tolerance of output voltage 5%)
Higher power units up to 1000 watts on special order.
Other input and output voltages upon request.

DYNAMŪ® magnetic recording heads by Maico

There's a DYNAMŪ recording head to fit almost any production application. Maico engineers have designed them in a choice of frequency responses to fit any application from dictating machines to professional high-fidelity equipment. DYNAMŪ heads come in sizes and mountings to fit commonly used brackets. They use common impedances (which can be varied if desired).

DYNAMŪ's careful manufacturing and 100% inspection, with the resulting closely held tolerances, virtually eliminate rejections on your production line. Long life is built in, particularly in the metal-faced models designed for long, continuous use. Frequency response is stable because of the balanced design of DYNAMŪ heads.

DYNAMŪ erase heads, also designed to fit existing circuitry and hardware, provide clean erasure with low current requirements.

NOTES: All the above heads can be supplied with different impedances and lead lengths. Specifications are subject to change for product improvement without notice.

CUSTOMIZED MODIFICATIONS of standard DYNAMŪ heads can be made to meet your special requirements for commercial recorders. Maico also supplies special DYNAMŪ heads for telemetry, digital or other military and industrial instrumentation applications. We welcome an opportunity to consult with you on any special requirement you have.

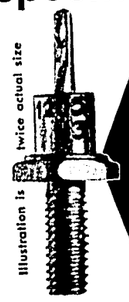
ANOTHER
Bradley®
PRODUCT

tailored to your specifications



12 ampere stud silicon rectifiers (USAF) IN1199-IN1206

Bradley silicon rectifiers are designed for wide ranges of application. This new 12 ampere stud silicon rectifier, qualified to MIL-E-1/1108, is available with ratings from 50 to 600 volts. These 12 amp. diodes are also available in high voltage assemblies with compensating networks of resistors and capacitors (for example, 50,000 volts at 3 amps.), as well as in standard and special configurations. This development brings the industry still another product in the ever increasing Bradley line of silicon, selenium and copper oxide rectifiers and diodes. Data sheets available on request.

HIGH VOLTAGE CARTRIDGE TYPE RECTIFIERS

The NAE cartridge type rectifiers are designed for applications requiring up to 26,000 volts and for currents up to 250 milliamperes. They are fabricated from series connected high PIV junctions and hermetically sealed in ceramic tubes for easy fuse clip mounting

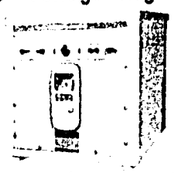
SOLVE YOUR VOLTAGE PROBLEMS WITH Inductrol* Induction Voltage Regulators



Voltage fluctuations can cause electronic tube failure, make equipment operate erratically, increase replacement parts costs. Inductrol regulators operate on the induction principle. This means precise voltage control and high reliability because no brushes or tubes are used. G-E Inductrol regulators are virtually maintenance free.

Inductrol regulator reliability and accuracy of operation can improve the performance of computers, TV transmitters, radio & radar equipment, X-ray equipment, equipment testing devices, and instrument calibration devices.

More information appears opposite G-E listing in this Class No.

*Registered trade-mark of General Electric Co.

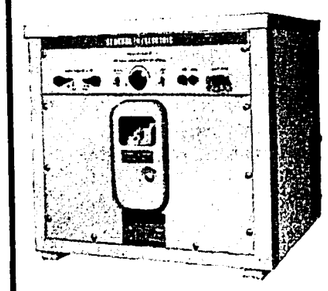
Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 81-226.

For Electronic Applications



RELIABLE

General Electric Inductrol* Induction Voltage Regulators

General Electric's complete line of 50-, 60-, and 400-cycle Inductrol regulators gives you extra values in *reliability* and *compactness*. In ratings up to 600 volts, 750 load kva—single phase, and up to 2000 load kva—three phase, you get these special features:

- SIMPLE, NO-BRUSH DESIGN fewer maintenance problems.
- HIGH SHORT-CIRCUIT STRENGTH will withstand up to 75 times normal current, for 2 seconds.
- HIGH OVERLOAD CAPACITY will withstand up to 100% overloads for one hour.
- HIGH EFFICIENCY 97% to over 99% at full load.
- NO HARMFUL WAVEFORM DISTORTION.
- ECONOMICAL, COMPACT DESIGN requires less floor space.
- DRIFT-FREE CONTROLS voltage automatically held to ± 1% bandwidth.

FOR MORE INFORMATION about General Electric's complete line of Inductrol regulators, contact the voltage regulator representative at your nearby General Electric Apparatus Sales Office. Or write: General Electric Company, Section 008-15, Schenectady 5, New York.

"Guess They Forgot the Surgistor"

MORE FAILURES of electronic equipments are caused by the destructive inrush surge currents at "Turn On" than any other factor.

A SURGISTOR connected in series with either the AC power line or the filament supply will effectively cushion the starting surge current providing full protection for the equipment. After a 10-15 second Protection Period, the Surge Limiting Resistance is automatically shorted out restoring full voltage to the circuits.

117 Volt Types (AC-DC)

No.	Watts of Load	Starting Ohms	List Price
4125-1	75-150	125	1.95

SOLVE YOUR VOLTAGE PROBLEMS WITH Inductrol* Induction Voltage Regulators

Voltage fluctuations can cause electronic tube failure, make equipment operate erratically, increase replacement parts costs. Inductrol regulators operate on the induction principle. This means precise voltage control and high reliability because **no brushes or tubes** are used. G-E Inductrol regulators are virtually maintenance free.

Inductrol regulator reliability and accuracy of operation can improve the performance of computers, TV transmitters, radio & radar equipment, X-ray equipment, equipment testing devices, and instrument calibration devices.

More information appears opposite G-E listing in this Class No.

*Registered trade-mark of General Electric Co.

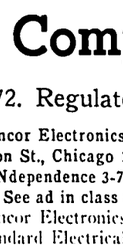
MICRO-MINIATURE • ULTRA-RELIABLE • ULTRA-PRECISION • SOPHISTICATED



SOLID STATE

INTERVAL TIMERS and TIME DELAY RELAYS

AVAILABLE FEATURES:

- Time delays from one millisecond to fifteen minutes
- Program timers (multi-outputs) up to several days
- Instant reset • Instant relay turn-on • 18-32 VDC
- Adjustable externally, remotely, or pre-set
- Reverse polarity protected • Temperature compensated
- Noise filtered • Transient suppressed
- Repeat-cycle • Sequencers • Pulsers
- Modules • Multiples
- Positive or negative output • Up to 6 PDT • 10 amps.
- Variety of sizes, configurations, header styles, & mountings
- Hermetically sealed and potted for shock and vibration protection

. . . Specially designed and manufactured models can be tailored to your requirements thru our field engineering services. Bulletins available. Write today.

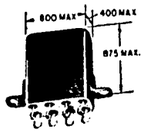
ALLIED CONTROL RELAYS

MILITARY RELAYS

SUBMINIATURE

TYPE KHJ-6D
DPDT ● DC

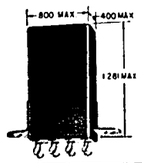


OPERATING CONDITIONS for KHJ-6D

Contact Rating: Low level up to 2 amps. non-inductive at 29 volts d-c or 115 volts a-c. 3 amp. contacts available on request.
Ambient Temperature: —65°C to +125°C
Vibration: 5-28 cps at 0.5 in. double amplitude, 28-2000 cps at 20g.
Shock: 50g operational.
Terminals: 0.2 in. grid spaced plug-in, printed circuit or hooked type solder terminals.

SENSITIVE

TYPE JSH-6D
DPDT ● DC

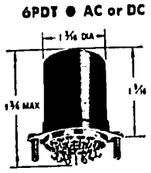


OPERATING CONDITIONS for JSH-6D

Average Pull-in Power at 25°C: SPDT-25 milliwatts; DPDT-40 milliwatts.
Contact Rating: 2 amps. non-inductive at 29 volts d-c or 1 amp. at 115 volts a-c. Low level contacts are available on request.
Ambient Temperature: —65°C to +125°C
Vibration: 5-55 cps at 0.12 in. double amplitude; 55-2000 cps at 20g.
Shock: 50g operational.
Weight: 1.1 ounce maximum.

MINIATURE

TYPE MHJ-18
6PDT ● AC or DC



OPERATING CONDITIONS for MHJ-18

Contact Rating: Low level up to 5 amps. non-inductive at 29 volts d-c or 2 amps. at 115 volts a-c.
Ambient Temperature: —65°C to +125°C
Vibration: 5-28 cps at 0.5 in. double amplitude; 28-2000 cps at 20g.
Shock: 50g standard.
Weight: 4.2 ounces maximum.
AC: This relay is supplied with self contained diodes for 60 to 400 cps operation.

OTHER RELAY TYPES	Maximum Contact Pile-Up	Contact Rating Amps.	Coil Operation	Max. Basic Dimensions: Width & Length		Seated Height
JH-6D	DPDT	5	DC	.400	.800	.906
JH-18D	6PDT	2	DC	.800	1.200	.781

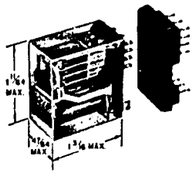
MHY-12	4PDT	10	AC or DC	1.197 dia.		1.328

COMMERCIAL RELAYS

TELEPHONE

TYPE T-154
4PDT ● DC



OPERATING CONDITIONS for T-154

Contact Rating: 2 amps. resistive or 1 amp. inductive at 29 volts d-c or 115 volts a-c. Low level or 5 amp. contacts available.
Nominal Coil Power: 700 milliwatts.
Minimum Coil Power: DPDT-125 milliwatts; 4PDT-300 milliwatts.
Dielectric: 1000 volts rms at sea level.
Terminals: Open relay—plug-in solder lugs or octal plug. Sealed relay—hooked type solder terminals, 14-pin miniature plug or octal plug.
Enclosure: Open, dust cover or hermetically sealed.

OTHER RELAY TYPES	Maximum Contact Pile-Up	Contact Rating Amps.	Coil Operation	Max. Basic Dimensions: Width & Length		Seated Height
LK	6PDT	2	DC	1.078	1.718	1.890
LKH	4PDT	2	DC	1.437	1.625	2.656

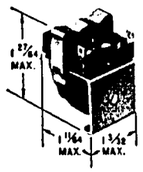
SKH	4PDT	2	DC	1.437	1.625	2.062
TAH	4PDT	2	DC	.953	1.343	1.593

GENERAL PURPOSE

TYPE FC-3D
SPDT ● DC



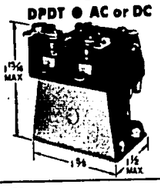
OPERATING CONDITIONS for FC-3D

Contact Rating: 2 amps. resistive or 1 amp. inductive at 29 volts d-c or 115 volts a-c.
Nominal Coil Power: 2.0 watts.
Minimum Coil Power: 300 milliwatts.
Capacity: Closed contacts to frame or between open contacts 3.0 mmf; open contacts to frame 1.5 mmf.
Dielectric Strength: 1000 volts rms at sea level.
Terminals: Solder lugs or "Miniature Faston" solderless tabs.

OTHER RELAY TYPES	Maximum Contact Pile-Up	Contact Rating Amps.	Coil Operation	Max. Basic Dimensions: Width & Length		Seated Height
AS-3	SPDT	5	AC or DC	1.000	1.687	1.296
BJ-6	DPDT	5	AC or DC	.875	1.703	1.968
F	DPST	2	DC	1.375	1.656	1.203
ME-6	DPDT	5	AC or DC	.828	1.406	1.203

POWER

TYPE BO
DPDT ● AC or DC



OPERATING CONDITIONS for BO

Contact Rating: 15 amps. non-inductive; 10 amps. inductive or 8 amps. motor load at 29 volts d-c or 115 volts a-c.
Dielectric Strength: 1500 volts rms at sea level.
Nominal Coil Power: 2.5 watts d-c or 5.0 volt amps. a-c.
Enclosure: Dust cover or hermetically sealed with hooked type solder terminals or octal plug.

OTHER RELAY TYPES	Maximum Contact Pile-Up	Contact Rating Amps.	Coil Operation	Max. Basic Dimensions: Width & Length		Seated Height
BOHR-6	DPDT	10	AC or DC	1.671	1.796	2.687
BOY-6D	DPDT	10	DC	1.843	1.500	1.937

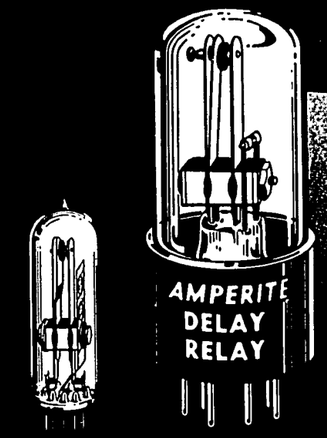
AMPERITE PREFERRED

by design engineers—because they're
MOST COMPACT • SIMPLEST • MOST ECONOMICAL
HERMETICALLY SEALED



Thermostatic DELAY RELAYS

2 to 180 Seconds

Actuated by a heater, they operate on A.C., D.C., or Pulsating Current.

Hermetically sealed. Not affected by altitude, moisture, or climate changes.

SPST only—normally open or closed.

Compensated for ambient temperature changes from —55 to +70 C. Heaters consume approximately 2 W. and may be operated continuously. The units are **rugged, explosion-proof, long-lived, and—inexpensive!**

TYPES: Standard Radio Octal, and 9-Pin Miniature

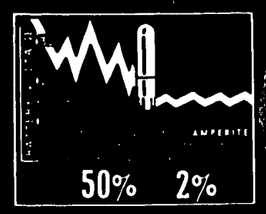
List Price, $4.00.
Standard Delays

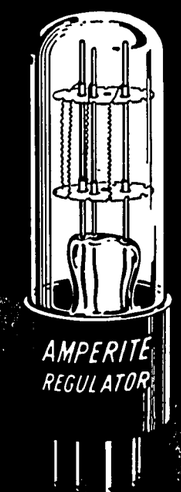
Also — Amperite Differential Relays: Used for automatic overload, under-voltage or under-current protection

PROBLEM? Send for Bulletin No. TR-81

BALLAST REGULATORS

Amperite Regulators are designed to keep the current in a circuit **automatically regulated** at a definite value (for example, 0.5 amp.) For currents of 60 ma. to 5 amps. Operate on A.C., D.C., or Pulsating Current





Hermetically sealed, they are not affected by changes in altitude, ambient temperature (—55 to +90 C), or humidity . . . Rugged, light, compact, most inexpensive . . . **List Price, $3.00.**

NEW RELAY

Branson Corp. now offers — for the first time — a truly miniaturized relay with a high order of operational reliability. Fully capable of meeting military requirements, the Type JR provides the circuit engineer with a new dimension in design flexibility.

The small space requirements of the new component approximate those of many transistors. This high density packing compatibility means excellent volumetric efficiency in circuit board applications.

Contact Arrangement . . . . . 1 Form C (SPDT)
Contact Rating . . Dry circuit or 1 amp 28VDC resistive
Life . . . . . 100,000 operations min.
Operate Time . . . . . 3 MS max.
Release Time . . . . . 3 MS max.

Available in several combinations of case, header and terminal style.

Shock . . . . . 50 G's 11 milliseconds
Vibration . . . . . 10-2000 cps 30 G's
Temperature . . . . . −65°C to +125°C

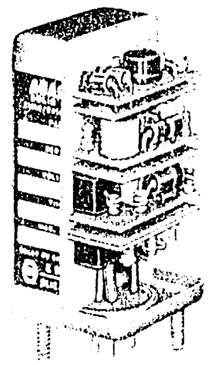
NEW SOLID STATE time/delay/relays



...with traditional AGASTAT reliability!

Now available . . . *solid-state* AGASTAT time/delay relays with accuracy and reliability essential for critical missile and computer applications

Advanced design . . . uses modular construction for versatility, rapid delivery on custom units. Specially selected, matched and tested components assure highest reliability and uniformity

Six basic types . . . cover timing ranges from 0.05 sec. to 60 hrs. Only 1⅛" sq. . . . hermetically sealed . . . immune to shock, vibration and voltage variations. Operation—18-32 vdc, pull-in or drop-out. Load current up to 2 amps. Write for brochure . . . contains full technical details. Dept. S-1462

AGASTAT TIMING INSTRUMENTS
ELASTIC STOP NUT CORPORATION OF AMERICA
ELIZABETH DIVISION • ELIZABETH, NEW JERSEY

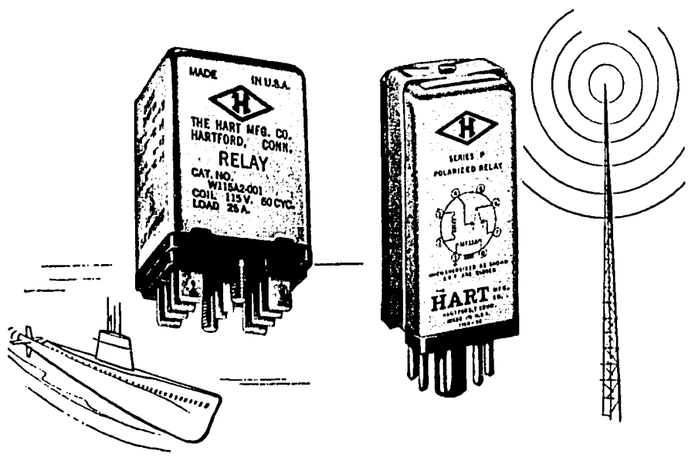
Heart of the Control System



"DIAMOND H" Relays

Look into the heart of the control system for a missile, a computer, a nuclear submarine, or a great many other critical applications. You might be surprised how often you'll find "Diamond H" relays.

Unless, of course, you're one of the increasing number of engineers who've already selected "Diamond H" relays for a spot where they just have to work despite all sorts of adverse conditions.

Hart makes relays of three basic types: miniature, hermetically sealed, aircraft-missile relays (Series R/S); high speed, sensitive, polarized relays (Series P), and general purpose AC, DC relays (Series W).

Technical literature outlining the wide range of characteristics available with each type relay is yours for the asking. You'll find "Diamond H" engineers uncommonly adept at working out a variation of the basic designs to meet your set of specific requirements.

Tell us your needs . . . by phone, wire or letter.

THE HART MANUFACTURING COMPANY
265 Bartholomew Ave., Hartford 1, Conn.

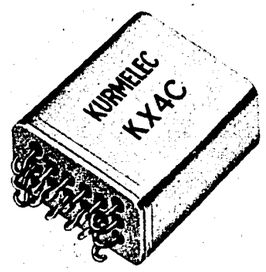
KURMAN ANNOUNCES "MIGHTY-MITE" *THE ASTRORELAY*



Brooklyn 22, N.Y. The smallest and lightest series of 4 POLE DOUBLE THROW RELAYS featuring high shock-vibration immunity, extreme reliability, low input power consumption, and meeting all the requirements of MIL-R-5757D, have been designed and made available by Kurman Electric Company, a Subsidiary of Crescent Petroleum Corp. This new Space-Age Relay, the Astrorelay, weighs approximately ½ oz., and meets the rugged demands of the missile and computer field.

This unique 4 Pole Double Throw micro-miniature relay, not larger than a postage stamp and the same size as Kurman KX-2C, offers excellent vibration immunity 30 G's 10-5000 CPS; 40 G's 10-2000 CPS. Special versions are available featuring vibration immunity of 50 G's 10-5000 CPS. The Astrorelay will meet 100 G shock test requirements.

Standard voltage ranges available are 6, 12, 24 volts. The relay will operate over a minus 65–+ 125 degrees C temperature range with a pull in power of approximately 250 milliwatts. Standard 4 pole double throw contact arrangement offers operation at any load from dry circuit, up to 2 amperes at 28 VDC resistive, featuring a contact resistance of less than 30 milliohms. Operate speed at nominal voltage will be approximately 8 milliseconds including a 2 millisecond maximum contact bounce. Drop out speed will be less than 4 milliseconds. In spite of the extremely small size, the insulation resistance is in excess of 1000 megohms, the relay will withstand a high potential break down test of 750 volts AC between any mutually insulated terminals or terminals in case. Dimensions are 0.875 x 0.800 x 0.400.

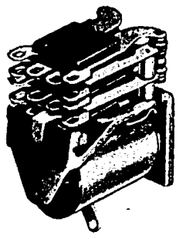
PRICE ELECTRIC RELAYS

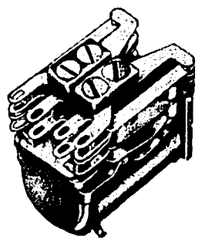
TELEPHONE
SERIES 5400
Miniature General-Purpose

To 4PDT. DC operated.* Contact ratings to 10 Amps. Coils for standard voltages to 120 VDC. Vibration-15G through 500 cycles. Shock-30G. Open (solder lugs or printed circuit tabs); Hermetically Sealed (plug-in and solder terminals).



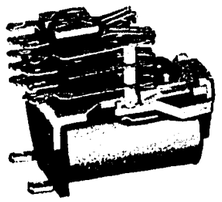
TELEPHONE
SERIES 5700
Midget General-Purpose

To 4PDT. AC or DC operated. Contact ratings to 10 Amps; single or bifurcated contacts available. Coils for standard voltages to 120 VDC or 230 VAC. Available to meet requirements of MIL-R-5757D, Types RY3JA1A4L01 and RY4JA1A2L02. Open or Hermetically Sealed (plug-in, solder terminals, AN connector).



TELEPHONE
SERIES 5600
Intermediate General-Purpose

To 6PDT. DC operated.* Contact ratings to 10 Amps; single or bifurcated contacts available. Coils for standard voltages to 120 VDC; special construction available for slow operate and/or release. Open or Hermetically Sealed (plug-in and solder terminals).

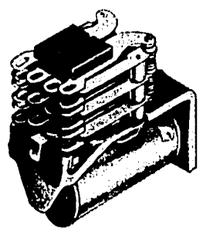


TELEPHONE
SERIES 5350
Small General-Purpose

To 6PDT. DC operated.* Contact ratings to 5 Amps. Coils for standard voltages to 120 VDC. Shock-30G. Vibrations—some styles to 10G through 500 cycles. Open or Hermetically Sealed (plug-in, and solder terminals).

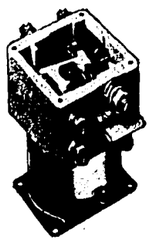
SENSITIVE
SERIES 5300
Small Sensitive

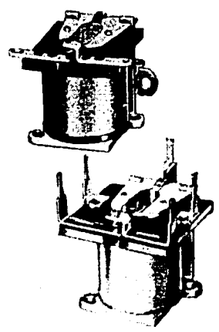
To DPDT. DC operated.* Contact rating 2 Amps to 26.5 VDC or 115 VAC. Standard sensitivity—20 milliwatts per pole; also available 10 milliwatts per pole sensitivity. Shock-30G. Vibration to 10G through 500 cycles available. Open or Hermetically Sealed (plug-in, and solder terminals).



HIGH CURRENT ROTARY
SERIES 8200

To 4PNO. DC operated.* Contact ratings to 200 Amps. Standard operating voltage-26.5 VDC. Temperature range —65° to +125°C. Shock-70G. Vibration-30G to 500 cycles. Open or Hermetically Sealed.



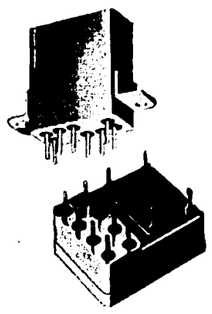


GENERAL PURPOSE
STYLES 1001 & 1005

SPDT. AC or DC operated. Standard contact ratings of 1 and 3 Amps; 10 Amp rating available on special order. Style 1001 has solder lugs and frame mounting. Style 1005 for printed circuit applications. Ideal for TV, automotive, and appliance control circuit applications.

MULTIPOLE
SERIES 2100

To 6PDT. AC or DC operated. Contact ratings to 15 Amps single break, 30 Amps double break. Coils for standard voltages to 120 VDC or 230 VAC. Open or Hermetically Sealed (plug-in and solder terminals).



MICRO-MINIATURE
STYLES 6 & 6A

DPDT. DC operated.* Lightweight, crystal can type relay is simple, reliable and versatile. Ideal for miniaturized assemblies. Termination can be provided to meet most requirements.

Style 6A is designed specifically for use in printed circuitry. Installed height is approximately 0.44".

Style 6 is available to meet requirements of MIL-R-5757D, Type RY4NA3B3L01.

SUB-MINIATURE
STYLE 506

DPDT. DC operated.* For Low-Level Circuits and General Purpose use. Available with isolated contact chamber for reliable low-level circuit switching. Solder or plug type termination. Available to meet requirements of MIL-R-5757D, Type RY4LA3B3L01.

SUB-MINIATURE
STYLES 300 & 520

6 PDT. DC operated.* A General Purpose relay of simple design and high reliability. Available with isolated contact chambers for reliable low-level circuit switching. Available to meet requirements of MIL-R-5757D, Types RY4LC2A3L01 and RY4LC3B3L01.

Suitable for AC operation with rectifiers.

reson-ator
FREQUENCY SELECTIVE DEVICES

RESONANT REED RELAYS AND OSCILLATOR CONTROLS

Reson-ator Resonant Reed Relays and Oscillator Controls are precision electro-mechanical devices engineered to provide the finest, most economical method of detection and generation of frequencies in the audio range. Ideal for any application requiring the stability and long life characteristic of this tuning fork type device.

- SIGNALING SYSTEMS
- DATA TRANSMISSION
- TONE GENERATORS
- FREQUENCY STANDARDS
- REMOTE CONTROL
- FREQUENCY DETECTION
- AUDIO FILTERS
- TELEMETERING

Brief Specifications—

Frequencies—67 cps to 1600 cps

Coil Resistances—1 to 1500 ohms DC

Temperature stability—±.0025%/°C from —40°C to +100°C

Reference 25°C

Enclosure—Drawn copper can, .750" x .750" x 3.281" overall. Provided with standard 7 pin hermetic seal header.

Relay Bandwidths—To suit customers requirements. From ±.1% to ±4%

Complete specifications and application data available upon request.

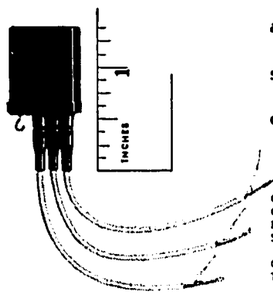
TELEX/AEMCO *Now Offers*



a truly
subminiature
coaxial relay

SPECIFICATIONS

Contact arrangement . . . . . 1 form C (SPDT)
Contact rating . . . . . 1 watt r.f.—50 ohms
Frequency range . . . . . 20 to 400 mc
Standing wave ratio . . . . . 1.25 to 1 over the frequency range
Crosstalk . . . . . 50 db down
Temperature range . . . . . —55° C to 100° C

SUBMINIATURE COAXIAL RELAY

At last! A truly subminiature coaxial. Created by TELEX-AEMCO engineers to meet requirements of ultra-compact airborne and portable communication equipment. Designed to withstand severe shock and vibration requirements.

Mountings, cables, connectors, and coil characteristics can be supplied to your specifications.

Limited production is now available. Call or wire today. Identify inquiry as type 95 subminiature coaxial relay.

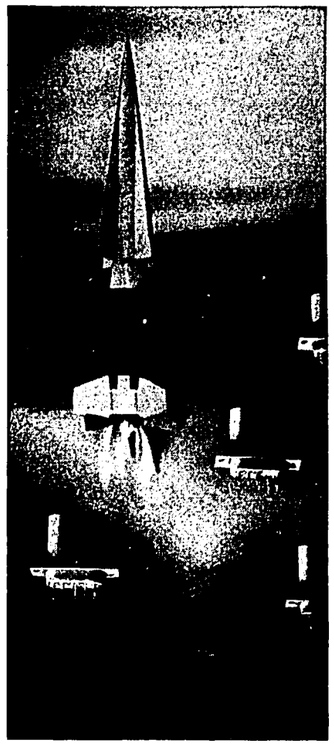
RELAY NEWS from Union Switch & Signal

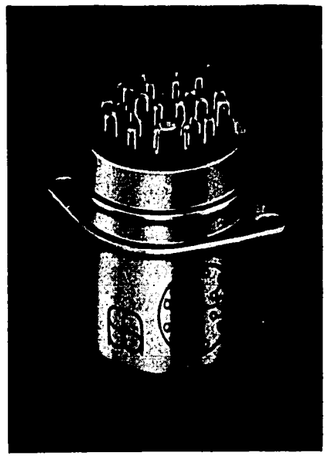


Contact Redundancy in New UNION Crystal Case Relays

The UNION 2-pole double throw General Purpose Crystal Case Relay is designed to consistently meet the requirements of Mil-R-5757D and Mil-R-5757/10. Its essential features . . . from minimum size to optimum reliability . . . permit it to be used in aircraft, guided missiles, shipboard and ground control electronic equipment.

A unique torsion-wire armature suspension system and a rugged all-welded frame construction provide a high level of vibration and shock immunity. Contact redundancy, which assures reliability in dry circuit and higher level contact loads, is provided through the use of bifurcated contacts.

Available with 0.2" grid-spaced header or "S" type header, with various mountings, terminals, and operating voltages. Write for Bulletin 1064.



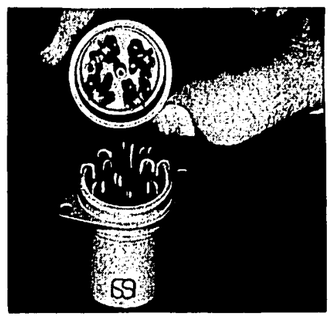
Why UNION Relays Are So Dependable

There's a good reason why our relays are the standard for reliability. For years, we've been building tough, reliable relays for use in airborne and guided missile electronic equipment and similar vital applications where perfect operation under severe environmental conditions is mandatory.

Our engineers created a compact 6-PDT miniature relay with just three major assemblies . . . instead of a fistful of small parts. This was accomplished by using a balanced rotary-type armature that provided a maximum resistance to the severe shock and vibration environment of aircraft and guided missiles. The rotary principle of operation is utilized in all our relays.

We have a reputation for building reliable electronic components and we intend to maintain our tradition for building reliable relays. And we supply these quality relays in quantity. Stocks are now available for prototype requirements in New York, Pittsburgh, Dallas and Los Angeles.

New 4-PDT-10-amp Relay Most Compact Rotary Type Available



This new durable relay is designed to meet the requirements of Mil-R-6106. It's a rugged relay featuring exceptionally sturdy terminals and husky contacts for high current applications. Glass-coated cylindrical contact actuators attached to the rotary armature provide square mating of contact surfaces, thereby assuring longer relay life. The balanced rotary armature provides maximum resistance to severe shock and vibration.

This small 4-PDT-10-Ampere relay is currently available with 115VAC and various DC operating voltages. Various mounting styles are provided. Write for bulletin 1069.

For additional information, write for Bulletin 1017 or call Churchill 2-5000 in Pittsburgh.

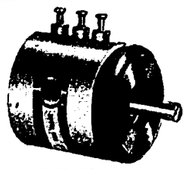
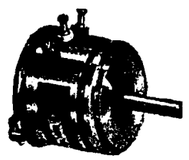
BORG MICROPOT® POTENTIOMETERS



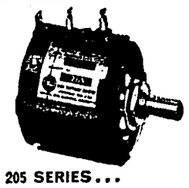
2100 SERIES . . .

7/8" diameter. 3 and 10-turn models. Resistances 10 to 40K (3-turn); 25 to 120K (10-turn). ±.5% standard linearity accuracy. −55°C to +125°C range. Request data sheets 160, 161.



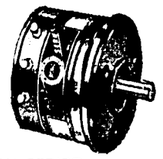
2400 SERIES . . .

Single-turn series. 7/8", 1-7/16", 2", 3" diameters. Resistances to 200K. ±1% to ±.5% standard linearity accuracy. −55°C to +125°C range. Request data sheets 186, 189, 190, 191.



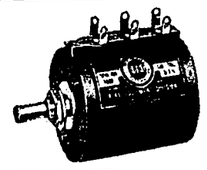
205 SERIES . . .

1-3/4" diameter. 3 and 10-turn models. Resistances 10 to 50K (3-turn); 1.15 to 100K (10-turn). ±.5% to ±.05% standard linearity accuracy. −55°C to +105°C range. Request data sheets 131, 162.



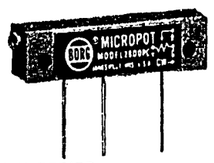
900 SERIES . . .

2" diameter. 3 and 10-turn models. Resistances 15 to 60K (3-turn); 25 to 100K (10-turn). ±.5% to ±.05% standard linearity accuracy. −55°C to +125°C range. Request data sheets 128, 129.



1100 SERIES . . .

1-13/16" diameter. 10-turn. Economically priced. Resistances 25 to 100K. ±.5% to ±.1% standard linearity accuracy. −55°C to +105°C range. Low-cost precision. Request data sheet 132.



2800 SERIES . . .

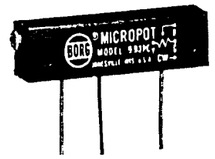
High-temperature, wirewound trimmer. −60°C to +175°C range. Each unit 100% tested against leakage. Resistances 10 to 50K. 1-1/4" length. 3 terminal types. Data sheet 173.

990 SERIES . . .

High temperature, wirewound trimmer. −60°C to +175°C range. Sealed against leakage. Resistances 10 to 50K. Four terminal types. 1-1/4" length. Data sheet 196.

992 SERIES . . .

Wirewound trimmer. −55°C to +105°C operating temperature. Resistances 10 to 50K. Three terminal types. 1-1/4" length. Economically priced. Request data sheet 172.



993 SERIES . . .

Carbon film element trimmer. −55°C to +105°C range. Resistances 20K to 1 megohm. Three terminal types. 1-1/4" length. Economically priced. Request data sheet 172.

BORG MICRODIAL® TURNS—COUNTING DIALS

3000 SERIES . . .

Concentric-scale. 1" dia. or 1-5/32" with finger-tip brake. 10-turns. Designed for 2100 and 2440 Micropot units; fine for any Micropot. Colors available. Data sheet 187.

1300 SERIES . . .

Direct-reading—3, 4, 5-digit models. 10, 100, 1000 turns. 1.8" to 2-1/16" dia. Brake optional. Reduce reading errors with in-line numerals. Data sheets 135, 136.

1320 SERIES . . .

Concentric-Scale type. 10-turns. 1-3/4" diameter. Finger-tip brake optional. Bright or satin chrome, gloss or dull black or combinations. Data sheet 138.

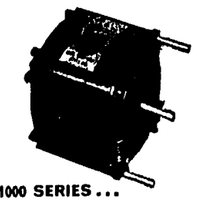
1330 SERIES . . .

Direct-reading, digital type. 10-turns. High style design. Internal, red or white light. Choice of colors. 1-3/4" dia. Finger-tip brake optional. Data sheet 164.

1360 SERIES . . .

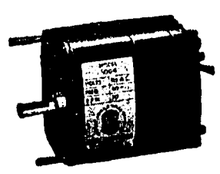
High style design. Attractive profile, colors. Molded numerals and lines. Won't scale or rub off. 1-3/4" diameter. 10-turns. Fingertip brake. Data sheet 137.

BORG MOTORS—FREQUENCY STANDARDS



1000 SERIES . . .

Sub-fractional H.P. instrument motors. Synchronous and induction. Two and 4-pole. Reversible. With or without gear trains. 1/750 to 1/2000 H.P. Request data sheet 139.



1060 SERIES . . .

Sub-fractional H.P. induction type control motors. Low inertia, high resistance squirrel-cage rotors. Variable speed, reversible. Gear trains available. Request data sheet 165.

Borg Frequency and Time Standards provide up to 1000 times the accuracy of conventional frequency comparisons. Stability of ±5 parts in 10^{10} per day after 21 days of continuous operation. Complete with Frequency Monitoring clock and Standby Power Supply. Request Bulletin 198.

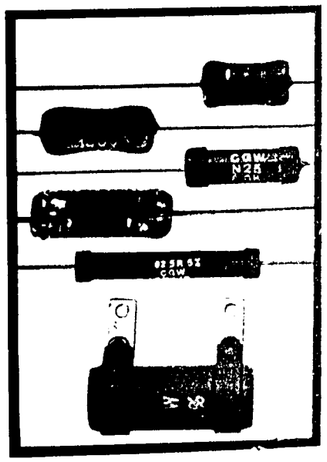
CORNING TIN OXIDE RESISTORS

In recent 30,000 hour load life tests at 140% of rated load, tin oxide resistors showed a 1% drift capability . . . a good indication of their inherent stability and reliable performance.



N • To MIL-R-10509B, ½, 1, and 2W. Derating to 130°C. 50R to 4.2 megohms.

N • To MIL-R-10509C, Char. B, ½, 1, and 2W. Derating to 150°C.

NF • MIL-R-10509C. Fusion sealed in glass for the ultimate in performance. 10 ohm to 360K, derating to 150°C.

LPI • Low power for radio, tv, etc. 3, 4, 5, 7, and 10W. From 10 ohms to 110K.

C • General purpose resistor priced to compete with composition types in ½, 1 and 2W sizes. From 10 ohms to 1.4 megohms.

R • ½ to 115W at 250°C. Derating to 235°C. 10 ohms to 1 megohm. MIL-R-11804C.

S • High temperature to MIL-R-11804C in 1, 2 and 4W at 400°C. Derating to ½ power at 120°C. 10R to 4.2 megohms.

WC-5 • Water cooled. 10 to 300 ohms, dissipating up to 5 KW.

H • High frequency for dummy antennas, circuit loading, damping, etc. 5 to 140W. 10 ohms to 1 megohm.

HL • For high power dummy antennas and circuit loading. 250 to 6000W.

Write for data sheets.

Better Things in
Smaller Packages

WIRE WOUND
Miniature Power Resistors

Carefully designed, precision made under stringent quality controls for critical electronic circuits where space is at a premium.

Types RS - HS - PRS - RLS - RSE
(Available with Weldable Leads)

Resistance range from .05 ohm to 175K ohms, depending on type; tolerance range from .05% to .3%

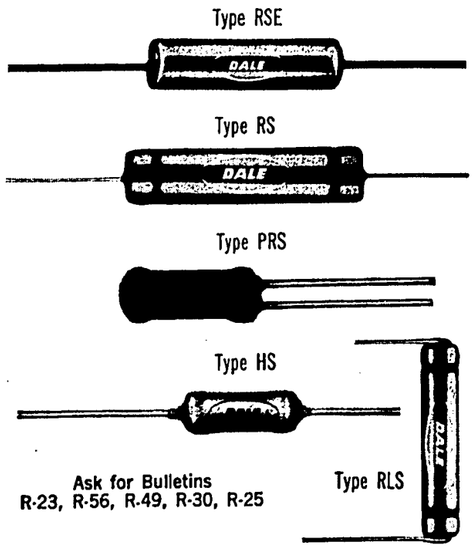
TYPE RS with axial leads in eight wattages—½, 1, 2, 2.5, 3, 5, 7, 10; ten sizes.

TYPE HS with axial leads in eight wattages -1.25, 3.75, 3, 3.25, 4.25, 6.5, 9, 13; nine sizes.

TYPE PRS with parallel leads in four wattages—3, 5, 7, 10; five sizes.

TYPE RLS with radial leads in six wattages—1, 2, 3, 5, 7, 10; eight sizes.

TYPE RSE in metal housing for clip mounting; five wattages—2, 3, 5, 7, 10; seven sizes.



Ask for Bulletins
R-23, R-56, R-49, R-30, R-25

Types NS - NLS

Non-inductive characteristics. Five wattages—2, 3, 5, 7, 10; six sizes. Resistance range from 1 ohm to 37K ohms, depending on size and type; tolerance range from .05% to 3%.

TYPE NS with axial leads; TYPE NLS with radial leads.

Ask for Bulletin R-34

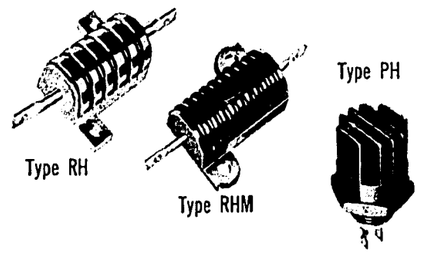
Types RH - RHM - PH

Silicone sealed in aluminum metal housing. TYPE RH and RHM have tabs for mounting to heat sink; TYPE PH designed for mounting through hole in chassis or heat sink.

TYPE RH six wattages—5, 10, 25, 50, 100, 250; resistance range from 0.1 ohm to 175K ohms.

TYPE RHM-25—25 watts for unprecedented reliability.

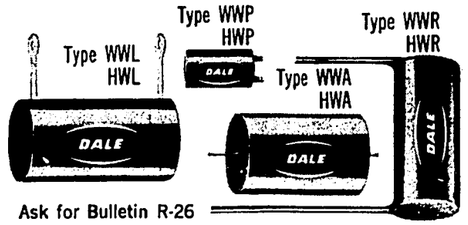
TYPE PH three wattages—10, 25, 100; resistance range from 0.1 ohm to 60K ohms. Tolerance range from .05% to 3%.



Ask for Bulletins R-21, R-36

Types WW - HW

Precision, encapsulated, bobbin-type, non-inductive. HW prefix denotes high temperature characteristics. Rated at .1 watt to 2.5 watts, depending on size and type; resistance range from .1 ohm to 6 megohms; tolerance range from .02% to 3%. Available with axial leads, lugs, radial leads and parallel leads.



Ask for Bulletin R-26

Deposited Carbon and Metal Film Resistors

(Available with Weldable Leads)

Carefully designed, precision made under stringent quality controls to assure stability and accurate, dependable performance in high frequency applications.

Type DC

Resistance range from 1 ohm to 200 megohms; tolerance 1% or higher as specified. TYPE DC in seven wattages—1/10, 1/8, 1/4, 1/2, 1, 2, 5; ten sizes.

Type DC

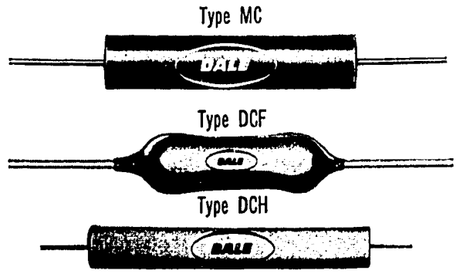
Ask for Bulletin R-24

Types MC - DCF - DCH
(Insulated)

TYPE MC is a deposited carbon resistor completely insulated and protected from environmental and mechanical damage by molded housing; resistance range from 1 ohm to 50 megohms. Available in five wattages—1/8, 1/4, 1/2, 1, 2; five sizes in standard tolerance of 1%.

TYPE DCF has a new coating material which provides a completely insulated resistor, yet maintains sub-miniature size. Resistance range from 1 ohm to 50 megohms; six wattages—1/10, 1/8, 1/4, 1/2, 1, 2; nine sizes in standard tolerance of 1%.

TYPE DCH hermetically sealed in non-hygroscopic ceramic envelopes; seven wattages—1/10, 1/8, 1/4, 1/2, 1, 2, 5; ten sizes.



Ask for Bulletins R-35, R-42, R-27

Type MF

Combines advantages of Dale's molding techniques with advanced high vacuum metal film procedures. It has inherently good R.F. characteristics, low noise levels, high stability, complete insulation. Resistance range from 100 ohms to 4 megohms, depending on size; tolerance 1%. Five wattages—1/8, 1/4, 1/2, 1, 2; five sizes. Temperature coefficient ±50 and ±100 P.P.M.

Ask for Bulletin R-43

WIRE WOUND
Trimmer Potentiometers

Series 1200 - 1100 - 900 - 600 - 1500 - 5000

Produced under stringently controlled conditions to assure highest quality and reliability. Welded construction throughout; sealed to protect against moisture and potting compounds.

SERIES 1200—A truly outstanding miniature T-Pot; three terminal configurations for standard or printed circuit mounting; 10 to 50K ohms; 5% tolerance; 1 watt.

SERIES 1100—Miniature, high temperature; three terminal configurations for standard mounting; 10 to 100K ohms; 10% tolerance; 1 watt.

SERIES 900—Sub-miniature, three terminal configurations for standard or printed circuit mounting; 10 to 30K ohms; 5% tolerance; 1 watt.

SERIES 600—Sub-miniature; eight terminal configurations for standard, panel or printed circuit mounting; 10 to 30K ohms; 5% tolerance; 1 watt.

SERIES 1500—Miniature, nine terminal configurations for standard, panel or printed circuit mounting; 10 to 50K ohms; 5% tolerance, 1 watt.

SERIES 5000—New sub-miniature space saving, square configuration; 100 to 50K ohms; 5% tolerance; 1 watt.

Ask for Bulletins R-51, R-50, R-59, R-60, R-61

Series 100 - 200 - 300

Designed to give excellent performance for normal circuit problems where economy is of prime importance, yet dependable performance is a necessity.

SERIES 100—Five terminal configurations; 10 to 50K ohms; 5% tolerance; rated at .8 watt.

SERIES 200—Five terminal configurations; 10 to 50K ohms; 10% tolerance; rated at .5 watt.

SERIES 300—Two terminal configurations; 100 to 20 K ohms; 15% tolerance; rated at .25 watt.

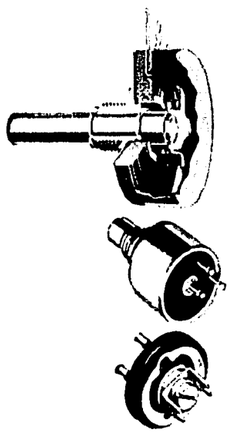
Centralab®: a RELIABLE source for

RELIABLE PRODUCTS

FOR MILITARY & COMMERCIAL APPLICATIONS

Most CENTRALAB products are available for immediate delivery in industrial quantities at factory prices, from CENTRALAB stocking distributors.



HOT MOLDED COMPOSITION VARIABLE RESISTORS

Meet MIL-R-94 environmental and test requirements. Provide smooth noise-free operation and high stability for which hot molded units are well known.

2 WATT @ 500V—Raised resistance track reduces surface contamination. Wide clearance between bushing and collector track for increased high voltage stability. Carbon collector and pick-off brushes.

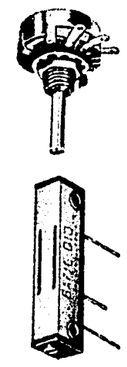
1-3/32" diam., 5/8" deep. 500 ohms—5 meg, linear taper; 10K-2.5 meg log taper.

3/4 WATT @ 350V—Metal enclosed units, available with triple "O" ring shaft seal. 23/32" diam., 1/2" deep. Same resistances as 2 watt unit.

1/2 WATT @ 350V—Similar construction as 3/4 watt. 1/2" diam., 15/32" deep. 100 ohms—5 meg, lin. taper.

1/3 WATT at 350V TRIMMER—locking type variable fixed resistor. Extremely resistant to shock vibration, acceleration, can be encapsulated. 19/32" diam., 11/32" deep. 50 ohms—5 meg, linear taper.

Write for Group G bulletins.



VARIABLE RESISTORS

1/4W. Linear Motion, wirewound 100 to 20K ohms and composition 10K to 2.5 meg. .250" x .325" x 1.250".

1/10W. Microminiature, 0.286" diam; Ultraminiature, 0.502" diam; Subminiature, 5/8" diam; 500 ohms to 10 megs. 1/4W. and 1/2W. Subminiature—For instruments and military. 43/64" diam. 500 ohms to 2.5 megs.

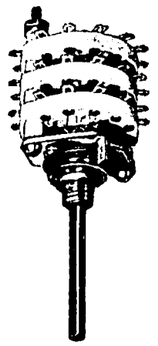
1/4W. Multiple Miniature—Up to 4 variable and 9 fixed resistors on a 3/4" x 2-1/4" steatite plate. 1000 ohms to 5 megs.

1/2W. Standard—For radio, TV. Single, Twin or dual-concentric. 15/16" diam. 250 ohms to 10 megs.

1-1/2W. Wirewound—for military and instruments. 11/16" diam., 5/16" deep. 4 ohms to 30K ohms.

2-5W. Wirewound—For instruments and TV. Single or dual-concentric. 1-5/32" diam. 1 ohm thru 100K ohms. Also available as 20 watt audio L and Bridged T Pad attenuators.

Write for Group B bulletins.



ELECTRONIC SWITCHES

Subminiature rotary—15/16" diam. for military and high reliability applications. Rating 0.5 amp. at 6VDC, 100 ma. at 110VAC. Laminated phenolic, steatite, single or multiple sections.

Miniature rotary—1-1/4" diam. for military and high reliability applications. Rated 2.0 amps. at 15VDC and 250 ma. at 110VAC. Available single or multiple ceramic, Mycalex and phenolic sections.

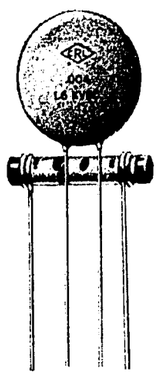
Standard rotary—1-5/16" diam. laminated phenolic or steatite insulation, single or multiple sections. Rating 2 amps. at 15-VDC. 150 ma. at 110VAC. (Resistive load.)

Heavy-duty power—For transmitter, industrial control, laboratory testing, military, commercial. 2-13/16" diam. 7-1/2 amp. rating at 110VAC. 25,000 cycles minimum.

Spring return—1-5/16" diam., coil or C-type springs, phenolic, steatite, single or multiple sections.

Specialized—Lever, slide, tone, tuner sections, others.

Write for Group P bulletins.



CERAMIC CAPACITORS

Ultraminiature—3 to 10VDC, 0.22—2.2 mfd.—for low power factor transistor applications.

Temperature compensating—Discs, tubulars, 150 v to 6,000 VDCW. 1 mmf.—0.1 mf. Capacitance +100 to —5250 ppm.

Bypass—Coupling—Discs, tubulars, 150 v to 6,000 VDCW, 1 mmf.—0.1 mf.

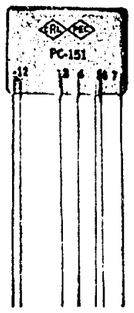
High Voltage—High Accuracy—High Voltage types, up to 30,000 VDCW, High Accuracy types, ± 1% tolerance, 500 VDCW, up to 2,500 mmf.

Trimmer—Tubular or flat. Meet MIL-C-81A specifications. 1 mmf. to 400 mmf. 500 VDCW.

Feed-thru—10—5000 mmf., 500—1,500 VDCW, bushing, shoulder, ring, eyelet, resistor-capacitor combinations.

Specialties—Stand-off, button-shape, potted, other capacitors.

Write for Group D bulletins.



PACKAGED CIRCUITS

Complete computer and Radio-TV circuits, amplifiers, oscillators, detector networks, resistor networks—including transistors, capacitors, resistors, wiring and inductance, manufactured to your specific performance limits.

PEC* circuits result in substantial savings in assembly costs. These high reliability packaged circuits can be supplied in a wide variety of terminals for printed circuit board applications.

1/2W. resistors meet applicable MIL-R-11 specifications, 50 ohms to 50 megs. Capacitors up to .01 mmf.

Write for Group T bulletins.

*Trade Mark

ENGINEERED CERAMICS

High alumina—85%, 95%, 99%—for high frequency, high temperature applications close tolerance (±.00025") designs. L6A Jan-I-10 grade.

Grade Jan-I-10-L5A steatite, Grade L2A Corderite, and Grade L2A Electrical Porcelain. For applications where high dielectric and compressive strength, high dimensional stability, low loss and low power factor are required, there is a CENTRALAB ceramic material for the job.

CENTRALAB also specializes in metalizing of ceramics, for hermetic seals or mechanical attachment of other ceramic or metal parts.

Write for Group X bulletins.

MICROWAVE RESISTORS by FILMOHM

NEW FLEXIBLE DISK RESISTORS

Rugged [illegible] METAL FILM [illegible] Low T.C. [illegible] Capacitance [illegible] Standard [illegible] Tolerances [illegible]

NEW MICROWAVE BOLOMETERS DISK TYPE

Broadband [illegible] wirewound Evanohm wire types [illegible] matched elements. Maximum VSWR at the standard mount less than 1.5 to 1.

NEW TWT ATTENUATOR RODS

Precision coated bands of carbon films [illegible] assembly and [illegible] products by Kanthal. Offered by R F [illegible] meter cut [illegible] of each rod

FOR RELIABILITY . . . STABILITY, UNIFORMITY

FILMOHM Metal Film Resistors offer: high stability • low temperature coefficient • tinned electrodes • micro-thin resistance film (even at highest frequencies) • quality-controlled dimensions, electrical and high temperature characteristics. Choose from a wide variety of shapes, sizes, base materials for a precision-engineered FILMOHM Microwave Resistor to suit your requirements.

•

FILMCARD
Metal film Fibreglass resistance card for all low power attenuators and terminations. Available in a wide range of resistivities. Easily fabricated. Ask about new FILMCARD KIT.

COAXIAL DISCS AND RODS
Metal resistance film fused to PYREX base, sealed with micro-thin quartz coating. From BNC to largest line size. Bulletin M-1-1.

METALLIZED GLASS ATTENUATOR ELEMENTS
Standard plates available for L through K bands.

FOTOCERAM* ATTENUATOR ELEMENTS
Ruggedized precision attenuator elements. Withstands severe shock and vibration.
*Reg. T.M. Corning Glass Wks., Corning, N. Y.

FILMOHM METALLIZED MICA
For use as rotary and guillotine attenuator elements. Ideal for mm. frequencies. Available in large sheets or fabricated parts. From .001" to .005" thick.

COAXIAL TERMINATION RESISTORS
Metal film, ceramic base resistors for 3/8" line coaxial terminations. Useable up to 10 KMC.

CERAMIC DISC RESISTORS
New, low cost, ruggedized disc resistors for coaxial terminations.

FLEXIBLE RESISTANCE CARD
Completely flexible thin plastic resistance card. May be laminated to cavities for use as mode suppressors.

HI-POWER COAXIAL LOAD RESISTORS
Metal film tubular glass resistors, non-inductive, for dummy loads and terminations. Standard and special sizes to 2' long.

STRIPLINE RESISTORS
Mica-base resistors as thin as copper stripline. Cement directly into stripline circuits.

MICRO-MODULE RESISTORS
Available on special order utilizing glass, ceramic or mica base. Custom-designed to suit your micro-miniature applications.

OTHER PRODUCTS AVAILABLE
FLEXIBLE DISC RESISTORS • METAL FILM CERAMIC TUBULAR RESISTORS • CRYSTAL RESISTORS

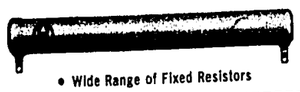
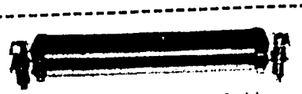
Proven performance in the most severe environments!

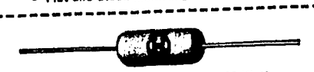
H-H "Gray Line" RESISTORS



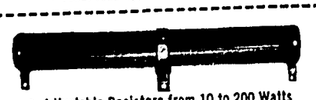
• Wide Range of Fixed Resistors



• Flat and Stack Mounting Power Resistors



• Axial-lead Types from 2 to 10 Watts



• Adjustable Resistors from 10 to 200 Watts

H-H "Gray Line" precision made resistors are available in a wide range of types . . . incorporate design and construction features that assure dependable performance in critical applications. Non-crazing and high temperature enamel, stronger core, welded wire connections, higher shock resistance and immunity to salt spray and humidity insure high reliability.

"Gray Line" fixed, ferrule, axial and adjustable resistors comply with MIL-R-26 specifications.

The reliable line with wide range design flexibility!

Standard Types from 5 to 1000 Watts

H-H "Gray Line" RHEOSTATS

MIL and Custom Types to Your 'Specs'

"Gray Line" Rheostats are exceptionally rugged . . . feature proven principles of construction that meet the most exacting specifications. Special design features assure long life and protection under extremes of humidity and abnormal atmospheric conditions. The "buss bar" contact arm automatically adjusts for complete, continuous contact and smooth, flexible control. H-H blue-gray, high temperature enamel is thermo shock proof, gives increased service life.

Hardwick Hindle "Gray Line" Rheostats, Resistors, and Potentiometers are available nationwide at all H-H authorized distributors.

New!

ACTUAL SIZE

SUB-MINIATURE WIRE WOUND

RESISTORS

100 PHYSICAL SIZES

Precision Resistors, Type TX (temperatures to +85°C ambient), and Type SX (temperatures to +125°C ambient), are unsurpassed in uniformity of performance.

New winding techniques mass-produce resistors free from dangerous "cross-overs" and insulation breakdowns. Maximum **reliability** is assured . . . and . . . at mass-production prices.

According to your need, PRECISION'S Type TX Resistors may be had in the size and resistance value you want for your circuit. Terminals may be either axial or radial. Tolerances are standard from ±1% to ±1/20%. Where extreme accuracies are required, tolerances to ±1/100% may be obtained . . . inductively or non-inductively wound.

Military requirements are to PRECISION'S specifications.

PHYSICAL SIZE: Available in 100 sizes, ranging from diameters from 1/16" through 3/8" and lengths from 3/16" to 1-1/2".

RESISTANCE RANGES: From .01 ohm through 5.0 megohm — in any resistance value required or decimal part thereof.

ACCURACY: ±5% to ±1/20%. Tolerances ±1/50% to ±1/100% (absolute) available on specification.

TEMPERATURE COEFF. OF RESISTANCE: Standard ±0.0005%°C. throughout. Special temperature coefficient +5000 ppm° to ±1 ppm°C.

For complete information about PRECISION'S Sub-Miniature Type TX Resistors, write to:

ONE COMPLETE RESISTOR SOURCE

1. Fixed, Wirewound, Power type Resistors, to MIL-R-26C and the commercial equivalents, in vitreous enamel or cement coatings, 5 watts to 200 watts.
2. Adjustable, Wirewound, power resistors in vitreous enamel or cement, 5 watts to 200 watts.
3. Precision, Wirewound Resistors, to MIL-R-93 and commercial.
4. Power-Precision wirewound resistors, Silicone coated, axial leads, 0.01 to 10% tol. (trade name—TECHSILOHM)
5. Power resistors, aluminized housing, RH types, MIL-R-18546B. (Trade name—Power pack)
6. Multisection wirewound, resistors, vitreous enamel and cement.
7. Printed circuit resistors.
8. Deposited carbon resistors in accordance with MIL-R-10509C.
9. Metal Film, Fixed, resistors, high stability—¼ watt to 10 watts.
10. Flat stacked mounted resistors. 10 watts to 60 watts.
11. Special resistors for every application.
12. Non-Inductive Resistors.
13. Wirewound heater elements.

TECH-OHM RESISTOR maintains over 500,000 resistors in stock and solicits your requirements based on quality, price, service, delivery and 13 years' experience.

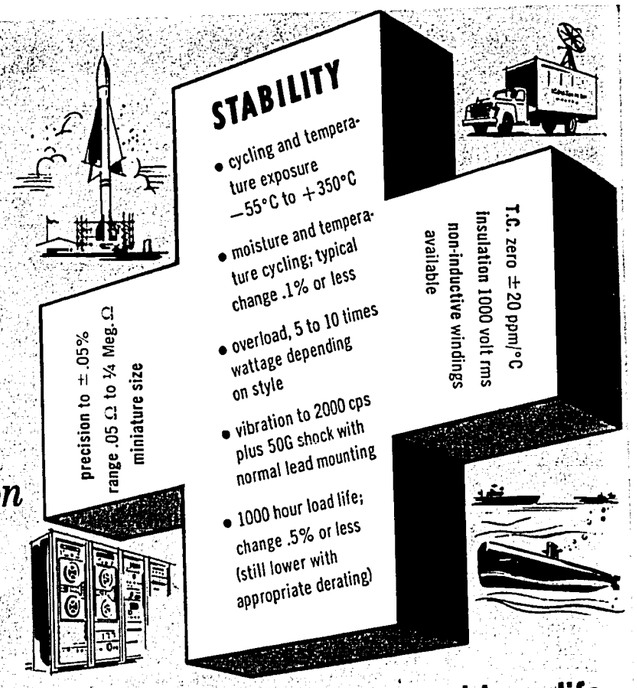
SAGE POWER RESISTORS

offer this unequaled combination of **PLUS** *features:*



these PLUS values mean trouble-free performance and long life reliability in your equipment.

Sage Electronics alone enjoys a position of product leadership in this field based on:

- 12 years specialized experience in miniature power resistors.
- exclusive use of high stability precision wire.
- introduction of newly developed Impervohm® coating, which offers superior protection in all combinations of moisture, temperature and voltage. Impervohm® also is highly resistant to ultrasonic solvent wash.

SPECIFY THESE SAGE SILICOHM® RESISTORS

TYPE "CS" CLIPPER METAL SHEATHED RESISTORS

Similar in all respects to Type "S", fully insulated plus addition of metal sleeve for heat sink mounting in spring clip holders.

TYPE "S" IMPERVOHM® COATED POWER RESISTORS

Meet or exceed MIL-R-26C requirements.

Style	Rating Watts
	full heat sink rating

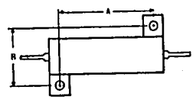
TYPE "M" METAL CLAD CHASSIS MOUNT RESISTORS

Aluminum housed resistors for heat sink mounting. SAGE Type "M" units feature less temperature rise than other similar resistors. Lower hot spot means longer service life and exceptional stability.

Meet or exceed requirements of MIL-R-18546 and MIL-R-8781 (USAF).



Dielectric strength to 2500 volts rms.

Style	Rating Watts	Resistance Range, Ohms*	A	B

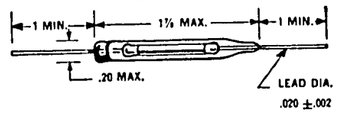
2: 1%, 2% and 5% tolerance available only below 100 meg.
3: 1% and 2% tolerance available only below 100 meg.

HI-MEG RESISTORS



GLASS SEAL: HI-MEGS are vacuum sealed in a glass envelope which is treated with a special silicone varnish which keeps the resistor relatively free from the effects of moisture.

RESISTANCE: HI-MEG resistors are available in values from 10^8 to 10^{14} ohms.

TOLERANCE: HI-MEG resistors can be supplied in the following tolerances: 1% below 10^{12} ohms, 2% and 5% below 10^{13} ohms, and 10% over the entire range.

MAXIMUM WORKING VOLTAGE: 1000 volts.

MAXIMUM OPERATING AMBIENT TEMPERATURE: 100°C.

POWER RATING: The power rating for any HI-MEG resistor is equal to one divided by the resistance in megohms.

For details, circle #510 on Reader Service Card

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 81-226.

VITROHM RESISTORS

STOCK RESISTORS

Ward Leonard offers the largest selection of stock resistor types and sizes. Seven distinct stock resistor types are available for immediate shipment from the plant or your local *A.I.*Distributor. Resistors ranging from 2 to 200 watts and with resistance values from 1 to 250,000 ohms are designed to meet a multitude of needs and applications. The secret of Ward Leonard Vitrohm Resistor dependability, accuracy and consistency lies in the balanced design of every component in each resistor.

CATALOG 15

Hard covered 64 page "CATALOG No. 15" on our complete line of stock and made-to-order resistors and resistor parts available. Illustrated with complete information, it contains ratings, graphs, dimensional drawings and tables. Write for one today.

METOHM RESISTORS

Exceeding MIL-R-10509D

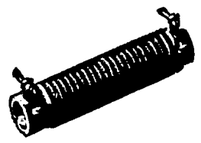
METOHM Resistors are Result-Engineered Molded metal film precision resistors and are now offered for a multitude of commercial, industrial, and military electronic requirements. METOHM Resistors feature high stability, reliability and accuracy in combination with low and controllable temperature coefficients. METOHM Resistors come in three standard sizes — ⅛, ¼, and ½ watts. For more information write for CATALOG 50.

type	application	watt ratings	resistance values (in ohms)
fixed 	General usage for voltage dropping, current limiting, etc. Electronic and industrial apparatus such as communication, instrument, motor control, appliance, transportation and similar equipment. Available in tapped and multi-section forms.	5 to 200	1 to 250,000
adjustable 	Circuits requiring adjustability. Voltage dividing or regulating purposes in control equipment, rectifiers, voltage and speed regulators, etc.	10 to 200	1 to 150,000
stripohm 	Equipment where space saving is a limiting design factor. Aviation, communication and navigation equipment. Available in fixed, adjustable, tapped and multi-section forms.	20 to 75	1 to 65,000
axiohm 	Apparatus requiring quick, easy installation of resistors and where space is limited. Radio and electronic equipment, communication, instrument and similar apparatus requiring miniature power resistors.	2 to 12.5	1 to 75,000
non-inductive 	High frequency circuits where tubular resistors with low values of inductance and distributed capacitance are required. Radio and other electronic apparatus such as therapeutic, transmitter, telephone, etc.	35 to 160	1 to 1,000
plaqohm 	Where a compact power resistor having low values of inductance and distributed capacitance is required. High frequency electronic equipment including laboratory test, induction heating, transmitter, etc. Available in fixed and tapped forms.	25 to 150	1 to 10,000
discohm 	On equipments where a miniature power resistor with low values of inductance and distributed capacitance is needed. High frequency electronic circuits in diathermy, carrier telephone and similar equipment.	24	1 to 4,000

Available from Stock — See your local Authorized Industrial Distributor

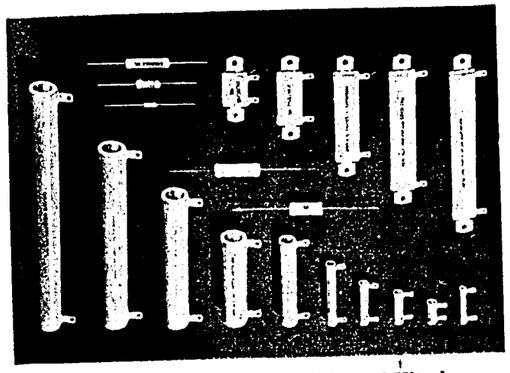
For details, circle #511 on Reader Service Card

RIBFLEX



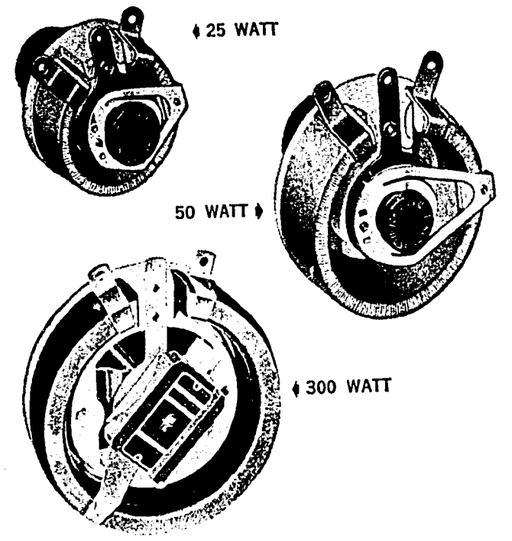
Ribflex resistors consist of a metal alloy resistance ribbon, reflexed, wound on edge on a ceramic core and held in place with vitreous enamel. Available in fixed, adjustable, tapped and multi-section forms. Used for intermittent and continuous-duty circuits where high wattage must be dissipated in a relatively small space such as in industrial motor controls, load banks, etc. CATALOG 15.

MIL RESISTORS



Ward Leonard manufactures a full line of Vitrohm resistors designed to meet the requirements of specifications MIL-R-26C and MIL-R-15109. The MIL-R-26C resistors, applied in electronic and electrically operated Military equipment, must successfully withstand a series of severe tests including thermal shock, humidity, electrolysis, momentary overload, etc. MIL-R-15109 resistors with suitable mountings are designed for HI-shock applications. BULLETIN 12.

RING RHEOSTATS



watt rating	ring dia. (in inches)	resistance values (in ohms) min.	resistance values (in ohms) max.
25	1 1/16	1	5,000
50	2 5/16	1	10,000
100	3 3/32	1	10,000
150	4	1	10,000
300	6	1	2,500

OTHER PRODUCTS BY W/L

MAGNETIC RELAYS

A complete line of a.c. and d.c. magnetically operated relays. Six basic stock types plus countless special purpose varieties. Send for RELAY CATALOG.

MAGNETIC CONTACTORS AC OR DC

A complete line of unit-insulated AC and DC solenoid contactors for main line switching, reversal or acceleration. All parts completely accessible. NEMA Sizes 00 to 5. A.C. BULLETIN 4450, D.C. BULLETIN 1950.

LOAD BANKS

For artificial loading applications to 70 KW Ward Leonard offers a full line of convection cooled load banks. Standardized frameworks accommodate Ribflex or Barohm resistors. Send for BULLETIN 39.

MAGNETIC STARTERS

Manual-magnetic-non-reversing for use with single phase motors and polyphase squirrel cage induction motors. BULLETIN 3151—Manual, NEMA Sizes 0 and 1, BULLETIN 4110—Magnetic, to NEMA Size 5.

PUSH BUTTON STATIONS

Wide selection of standard and heavy duty pushbutton stations for surface or flush mounting. Enclosures for watertight and dusttight pilot circuit applications. BULLETIN 2901.

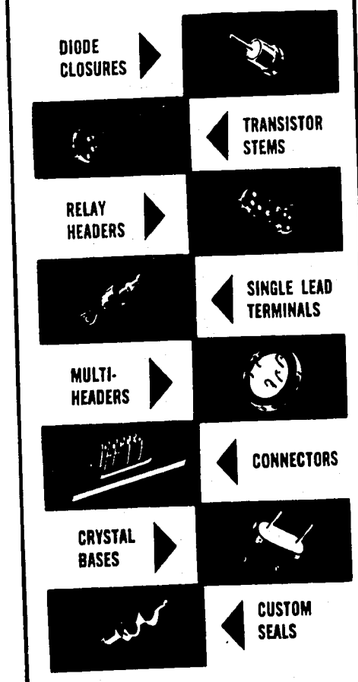
Sealed Rite by Hermetite

HERMETIC SEALS

- Glass to Metal
- Ceramic to Metal
- Copper Seals
- Hi-temp Seals



For high reliability in your seal requirements, whether they are standard or custom designed, Hermetite is your prime source. Our seals are not only designed to meet your requirements, but are made to surpass your specifications. Our highly skilled engineering staff is ready to assist you with designs for special applications.

SEALS (Hermetic)

Long experience in the semiconductor field has enabled us to develop hermetic sealing to the absolute in protection against corrosion and contamination, thus assuring the same characteristics out in space as at sea level on earth.

Our expert engineering group is at your disposal and will be pleased to offer assistance on any specific problem.

Your inquiries are invited.

UNITED Components INCORPORATED

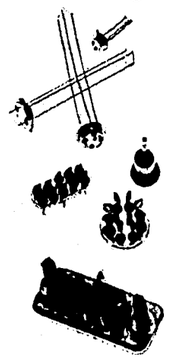
Tronex, Inc.

MANUFACTURER OF GLASS TO METAL SEALS



SEMI-CONDUCTOR SEALS. Reliability of product really begins with reliability of source. Tronex seals offer highest quality and reliability that permit you to build superior semi-conductor devices.

MINIATURE RELAY HEADERS. Tronex headers consistently meet the high standard of exacting specifications required in the relay, electronic and military applications.

CUSTOM DESIGNED HEADERS. General analysis of your seal problem by our extensive Engineering Section will solve your individual problem by our aid in designing and manufacturing a product tailored to your requirements.

Tronex, Inc. invite you to communicate with us to take advantage of Tronex services.

Operating temperature, all types, −50 to +75° C.
[1]Average DC resistance measured at 2 foot-candles, 2870° K. and 25° C ambient.
[2]With and without heat sink.
[3]Designed to replace previous plastic types. [4]At 25° C ambient. [5]S denotes side view cell.

Salient Characteristics:

- Hermetically Sealed Glass Enclosures.
- A Variety of Spectral Response and Resistance.
- The High Sensitivity and Fast Response of Cadmium Selenide.
- Power Dissipation to ½ watt, continuous.
- High Ratio of Light to Dark Current at low light levels.
- Stable and closely controlled Parameters.
- NEW! Low Resistance "L" types for Transistor and other low voltage applications!

Are you on the mailing list for Clairex Technical Information? If not, contact our representative or write direct to Dept. A1.

Clairex Photoconductive Cells . . . variable resistors controlled by light . . . unique design components for automation and control.

Your local distributor may be able to supply Clairex Photoconductors from stock. If not call or write our New York office for direct and immediate service, or contact our technical representative in your area listed below.

Priced from $1.15 to $4.00 depending upon quantity for all types listed.

FANON

SILICON DIFFUSED JUNCTION MESA POWER TRANSISTORS

- High Power Transistors
- High Wattage Dissipation
- High Reliability in Extreme Conditions
- Proven in: Power Amplifiers; Power Converters; Power Switching; Power Supply Regulators; DC & Servo Amplifiers; Relay Replacements

Supplied in three standard case styles and all popular types. As of June 1, 1961, the types listed are available for immediate delivery.

STYLE TO-3

	Types	
75 Watts @ 25°C	2N1487	2N1490
43 Watts @ 100°C	2N1488	2N1069
Max. 7.5 Amp I_c	2N1489	2N1070
Max. 100 Volts V_c		

SQUARE STYLE

	Types	
85 Watts @ 25°C	2N389	2N1210
45 Watts @ 100°C	2N424	2N1211
Max. 7.5 Amp I_c	2N389A	2N1620
Max. 100 Volts V_c	2N424A	

DOUBLE-ENDED STUD STYLE

	Types
85 Watts @ 25°C	2N1616
45 Watts @ 100°C	2N1617
Max. 7.5 Amp I_c	2N1618
Max. 100 Volts V_c	

Fanon has the power transistor you want today.

DIODES

SUBMINIATURE
GLASS DIODES

Germanium Gold Bonded in these types:

- COMPUTER • HIGH RESISTANCE
- HIGH CONDUCTANCE
- GENERAL PURPOSE • MILITARY TYPES:

1N128	1N270	1N277
1N198	1N276	1N281

Basic features include high forward conductance . . . recovery times in millimicroseconds . . . high inverse resistance . . . ruggedized mechanical construction . . . exceptional uniformity of characteristics.

Silicon Junction in the following types:

- FAST SWITCHING (0.15 to 1.0μ Sec.)
- GENERAL PURPOSE • MILITARY TYPES:

1N457	1N459	1N662
1N458	1N643	1N663
	1N658	

Designed to meet the most stringent commercial and military requirements, these diodes combine fast switching and high forward conductance, while protecting against thermal runaway at high voltages and temperatures up to 150°C.

TRANSISTORS

POWER
TRANSISTORS

Germanium in the following types:

- SWITCHING 5–8–15–25 amperes plus 3 ampere Spacesaver design
- AMPLIFIER 2–4 watts plus 2 watt Spacesaver design
- MILITARY TYPES:

2N297A	2N1011	2N1120

Excellent for applications involving power converters, audio amplifiers, voltage regulated power supplies and high current switching circuits.

Features include low thermal resistance, low base input voltage, low saturation voltage and superior current gain.

The 8 ampere switching series can replace the more costly ring emitter types in 3 to 8 ampere service. The 25 ampere series offers exceptionally low saturation voltage and is available with either pin type or solder lug terminals.

The Spacesaver design not only offers smaller size and lower mass but better frequency response and faster switching characteristics.

RECTIFIERS

DIFFUSED
SILICON JUNCTION
RECTIFIERS

Designed for maximum reliability under the most severe military and commercial applications, Clevite rectifiers offer these advantages: High dissipation — 600 mw — High voltage — up to 600 volts — High temperature — up to 150 ma at 150°C.

GENERAL INSTRUMENT SEMICONDUCTOR DIVISION

One Dependable Source For All Your Transistor Needs

General Instrument is your source for silicon planar expitaxial transistors and silicon microtransistors, as well as germanium computer, drift, MAT°° and MADT† types. Highest quality and long semiconductor life are assured through detailed research, careful product development and advanced production techniques. Complete specifications, engineering life test data and design curves are available on all General Instrument transistors, including the representative types listed here • Call the General Instrument sales office or franchised distributor nearest you or write today for Catalog SR-2099 to General Instrument Semiconductor Division, 65 Gouverneur Street, Newark 4, New Jersey.

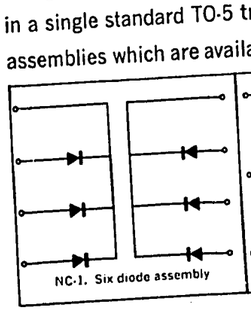
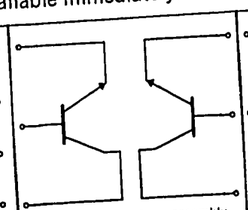
GENERAL INSTRUMENT NANOCIRCUITS

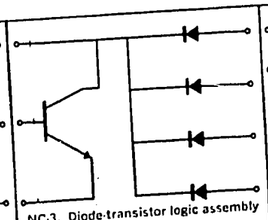
General Instrument Nanocircuits greatly simplify the fabrication of the most sophisticated electronic systems. Using either ceramic or metal master substrates, as many as nine diodes and two transistors can be mounted in a single standard TO-5 transistor package • The following circuit diagrams indicate a few of the types of assemblies which are available immediately.



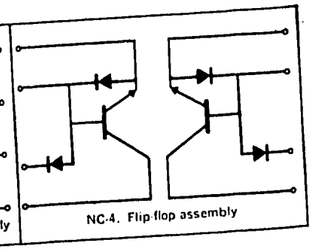
NC-1. Six diode assembly



NC-2. Two transistor assembly



NC-3. Diode-transistor logic assembly



NC-4. Flip-flop assembly

One Dependable Source For All Your Semiconductor Needs

In addition to a complete line of silicon power rectifiers and silicon and germanium diodes, General Instrument also makes encapsulated circuit modules to fit any electrical or physical requirements ("Circuit-Caps"), precision wire-wound resistors and microminiature computer logic circuits ("Nanocircuits") ■

GENERAL INSTRUMENT CORPORATION Semiconductor Division, 65 Gouverneur Street, Newark 4, N.J.

GENERAL INSTRUMENT SEMICONDUCTOR DIVISION

One Dependable Source For All Your Diode Needs

All General Instrument silicon diodes and germanium glass diodes are designed for long life and highest reliability in critical military and industrial applications. They exceed the most rigid requirements of mechanical, electrical, moisture-resistance and thermal-stability specifications ■ For details on the full line, write for Catalog SR-1045B.

One Dependable Source For All Your Rectifier Needs

General Instrument silicon power rectifiers are designed to exceed the most stringent requirements for reliability and performance in military and industrial applications ■ The wide range of General Instrument rectifier types, some of which are listed here, includes: top hats, 7/16"-hex medium-power studs, high-power diodes, plastic-encapsulated units, 7/16"-hex high-power studs, 1 1/16"-hex high-power studs, insulated studs, all JAN top hats, rectifier stacks, high-voltage cartridges, and custom packages for special needs.

Packaged Assemblies

General Instrument will package transistors, diodes and rectifiers in any configuration, including "Nanocircuits" ■ Complete circuit encapsulations, featuring compactness and extremely rugged construction with exceptional reliability, have long been made in our extensive packaging facilities. Numerous configurations are available off the shelf ■ Also available are such other standard devices as: high voltage silicon rectifier assemblies silicon rectifiers and modulator quads ■ Write for brochure entitled: "Circuit-Caps."

GENERAL INSTRUMENT CORPORATION Semiconductor Division, 65 Gouverneur Street, Newark 4, N.J.

COMPLETE TECHNICAL DATA
UPDATED AUTOMATICALLY

- SILICON PLANAR TRANSISTORS
- SILICON PLANAR MICROLOGIC ELEMENTS
- SILICON PLANAR DIODES
- SILICON PLANAR MULTIPLES
- INDUSTRIAL TRANSISTORS & DIODES High performance diffused silicon. Many Planar types available

CHOOSE THE DATA YOU WANT: Every Fairchild Semiconductor product data sheet, application note, technical paper, catalog and brochure is reference-numbered in this handy pocket size booklet. A return postage card inside the back cover lists the numbers; circle the appropriate number; mail the card and you will get all the data you want . . . promptly!

TECHNICAL ARTICLES: Informative technical articles and applications papers. Updating lists sent periodically.

SHORTFORM CATALOG LISTINGS: Each Fairchild Semiconductor product listed with abbreviated (but pertinent) specifications as a ready guide to products in which you may have further interest.

SELECTED CIRCUITS: A wide range of useful circuit diagrams with reference numbers to circle for further information and product specifications.

Mail the coupon or write direct to the address below for your free copy of this useful reference tool.

PLANAR PROCESS . . . PLANAR PRODUCTS . . . PLANAR RELIABILITY

The Planar Process developed by Fairchild Semiconductor protects the device from the start of manufacture with an integral silicon oxide surface; junctions are formed under the oxide surface, never exposed to contamination.

Planar products from Fairchild include high reliability transistors, diodes, multiples (more than 100 combinations of multiple transistor and/or diode dice mounted on single headers) and Micrologic Elements (a family of integrated functional logic building blocks capable of performing the total logic and control functions in computers).

Planar reliability has been demonstrated in millions of hours of storage and operating life tests in a wide range of device types. Reliability reports available on many devices, both transistor and diode.

Silicon Junction Diodes

All vacuum alloyed and soldered

In addition to offering such standard features as:

- hermetically sealed
- subminiature package
- rugged construction
- high temperature operation
- efficient rectification

United is using exclusively high vacuum for all operations where metallic parts are joined, to prevent the remotest possibility of contamination.

BOWMAR REGIONAL SALES OFFICES . . .

Bowmar offers the system designer an integrated, "one stop" capability for all types and quantities of precision control instrumentation. Many precision components and assemblies are available for IMMEDIATE DELIVERY; and specialized units can be redesigned or newly created to satisfy your exact requirements. Additionally, Bowmar's wide experience can be utilized to engineer and produce complete weight and space saving servo packages, to impart maximum reliablity and performance to the overall system.

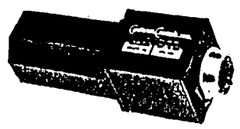
ULTRA-RELIABLE ENCODER MODULES
to your specs.
SERVO DRIVEN LINEAR/SECANT ENCODER



Package shown weighs only 18 oz., is 1 7/8" square x 6½" long and contains all of the following within the case.

Servo amplifier • Servo motor • 11 bit (2,048 count) binary, self-selecting, V-scan, non-ambiguous encoder (Guidance Controls Mod. ADC 11-11) • 10-turn follow-up pot. • 200:1 ratio gear train • Encoder driver circuit • 11 bit output decoding logic • Track/memory relays • Trimming pots and resistor network • Input and output through 32 pin connector

Guidance Controls Corp. invites your inquiries for servo driven systems of all types.

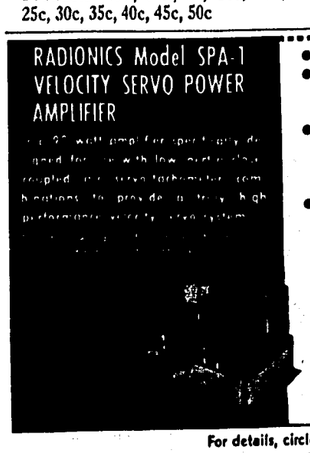
Muirhead & Co., Ltd., England, 5s, 35s, 50s,



- Undistorted power output: 90 watts at 60 cps.
- Output impedances: Output voltages of 70 and 115 volts, with a buck-boost winding of 5, 10, and 20 volts, for maximum stall-torque adjustment.
- Inputs: AC servo drive signal and a-c tach signal mixed with separate gain controls. 20 mv to either channel for full output. Amplifier hum and noise referred to input is 20 microvolts.
- Provisions for velocity servo operation:
  - Excitation and reference phase shift networks for both servo motor and tachometer.
  - Center-tapped drive-signal voltage source for direction of rotation reversal.
  - Adjustable tachometer feedback release control to allow maximum slewing rates as a straight servo.
  - Compensation for tachometer residual hum prevents motor drift with no signal.

For further information write for technical data on Model SPA-1 amplifier.

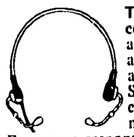
TELEX® HEADSETS

MAGNA-TWIN® MARK III—Developed specially for language learning field, aircraft, ham and commercial broadcasting. Provides true response and reproduction of vowels and consonants; suitable for all electronics applications presently used in American schools. Fully adjustable, weighs only 12 oz. Frequency response: 50 to 9,000 cps. Sensitivity: average 118 db for 1 mw input measured into a 6 c.c. coupler. Impedance to DC resistance ratio: 10:1. Headphone impedances: 500 to 600, 10,000 and 50,000 ohms. Others up to 200,000 ohms available on request. Reluctance, carbon, ceramic and magnetic noise-canceling microphones are optional.

DYNA-TWIN®—Custom-designed, balanced receivers provide unusually sensitive stereophonic reproduction. Dynamic receiver elements also assure exceptional high fidelity monaural listening. Weighs only 12 oz. Foam rubber muff seals and fully adjustable headbands allow use over long periods without discomfort or fatigue. Frequency response: 30 to 15,000 cps based on 10:1 subjective loudness ratio re 90 phons. Sensitivity: better than 90 db SPL for 1 mw input. Input required: 15 mw. Maximum input: 1 watt. Comfortable listening level; 1 mw.

TV "LISTENER"® — New "Listener" is designed to provide unique private listening features for home and institutional uses. Attach any radio, TV or central system without soldering. "Listener" switch turns set speaker on or off; user listens in private through Earset®. Built-in volume control is excellent for persons with a hearing loss. Second listener can use unit with optional second Earset®. Case is high impact plastic; will not crack or break with normal use. 15′ flexible cord has built-in strain relief. 5′ Earset® cord is flex-tested for assurance of long life.



TWINSET®—FAA approved. For commercial, amateur, and industrial uses. The standard on many airlines. Light and comfortable, just 1.6 oz. Signal piped directly into ears means less background noise and less signal loss. Frequency response: 50 to 5,000 cps. Sensitivity: 120 db above .000204 dynes per sq. cm. for 1 mw input. Impedances: 1,000, 500 (FAA approved) and 64 ohms. Volume control cords optional.

BOOM-MIKE HEADSET—Rugged, but weighs only 3.5 oz. Used on Pan American's 707 Jet Clipper; countless ham radio, TV, ship-to-shore, classroom, secretarial uses. Frequency response: to 5,000 cps. Sensitivity: 120 db above .0002 dynes per sq. cm. per mw input. Receiver impedance: 500 ohms. Available with double or single receiver, split phones. Choice of reluctance, dynamic, crystal, carbon or ceramic mikes with various impedances.

For complete information on these and other TELEX listening devices and accessories, write today.

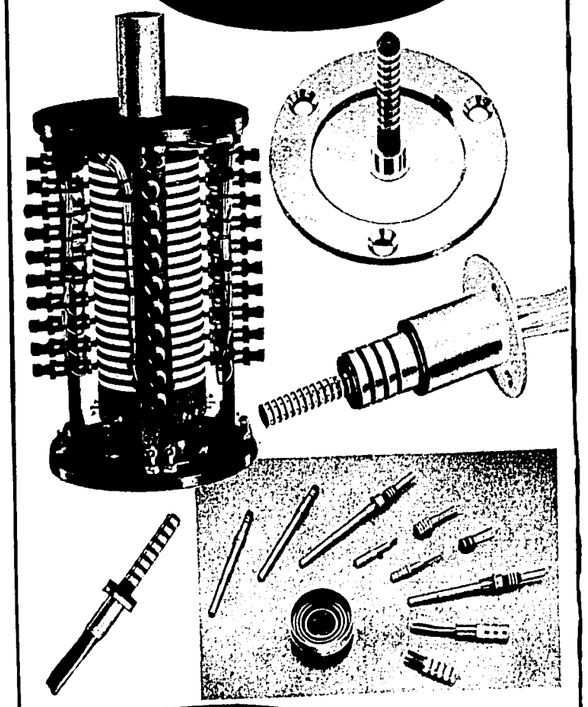
Airflyte ELECTRONICS CO.

Shown here are just a few examples of our products. We invite your inquiry on the development and production to your specifications. Avail yourself of our engineering facilities to carry-through from design ... to prototype ... to mass production. Hundreds of stock molds eliminate tooling in most cases.

SLIP RING ASSEMBLIES



COMMUTATING SWITCHES

HIGH SPEED ROTARY SWITCHES FOR TELEMETERING, SAMPLING, PROGRAMING AND ANALOG-DIGITAL CONVERSION.

Airflyte's production facilities are geared to produce standard and non-standard commutators at "off-the-shelf" prices. Featuring noise-free performance through the use of solid gold alloy commutating surfaces ... and exclusive drum construction for maximum life, uniform wear and close angular tolerance. We will supply packaged units (as illustrated) or component commutators and/or brush blocks. All products designed to meet MIL-E 5272 and MIL-E 5400 and other special environmental specifications.

Backed by over 10 years experience in building Precision POTENTIOMETERS and DIGITOMETERS we are now offering to you the NEW

ELECTRO-MEC
Rotary Switch

You will find the same high standards of workmanship resulting in heretofore unobtainable ACCURACY.

This switch is presently used in aircraft and missiles.

Available in single or multi-gang assemblies and/or in combination with potentiometers of all sizes.

Certified calibration data supplied with each instrument.

For Engineering Data Sheet giving further details, please write or telephone ST 6-3402

Teletype: NY4-2126

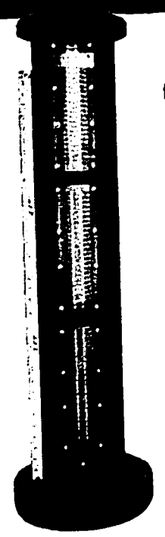
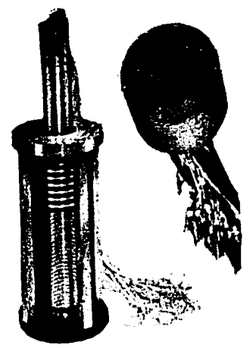
SLIP-RINGS
and
ROTARY SWITCHING
ASSEMBLIES





designed and built to your performance specifications

- *Single-circuit or multi-circuit*
- *Low-current or high-current*
- *Drum-type or pancake*
- *Internal or external rings*
- *Continuous or segmented*

Your performance specification is our standard in designing and building slip-rings for such services as: gyros, radar antennas, inertial-guidance systems, instruments, telemetering, programming, sampling, sequence selecting, and thermocouple, thermistor, and strain-gage circuits.

Bulletin 61-01 gives details of representative ELECTRO SWITCH slip-ring designs and includes a convenient check list for your use in specifying slip-rings and rotary switching and selector assemblies. Write today for your free copy.

U.S. patents issued and pending

THIS is the actual size of the

world's simplest acceleration switch.

It represents a totally new concept in acceleration sensing devices. Weight: about one ounce. Only one moving part: a precision ground ball held by an alnico magnet. The ball is released to close or open an electric circuit when the force of acceleration exceeds the magnet's pull.

It's as simple as that. Yet this versatile I-S design makes possible switches that respond axially, radially, or omnidirectionally, from 0.01 g to 500 gs. With adjustable g settings, if you desire. Automatic reset is optional. Closure time is variable. Accurate within 0.1%. Meets all applicable Mil specs.

But more than an ingenious design, the I-S switch represents an important attitude . . . an attitude that produces only equipment of sound and simple design and reliable performance, of uses limited only by your needs.

Try us; write today for descriptive brochure ID62

INERTIA SWITCH, INC. 311 West 43rd St., New York 36 • JUdson 6-5880
Inertia Switch invites research and development inquiries in the acceleration sensitive field.

For details, circle #543 on Reader Service Card

UNIQUE SUB-MINIATURE INSTRUMENT TYPE ROTARY GOV'T-QUALITY TOGGLE JBT SWITCHES

- Nominal 1" Dia.
- 12—Positions
- MIL-Materials
- Accelerated Snap-Action Detent
- More Contacts per Deck (patented wafer design)

Series 5000 Provides up to 8 Poles per Deck

Newest in the J-B-T switch family are 1" subminiature Series 5000 and 7000, used exclusively where miniaturized electrical or electronic devices require savings in space or weight and where performance requirements are high. Patented wafer construction provides unusual amount of switching capability per deck. Made with MIL type materials including silver alloy wafer contacts, gold-plated. **See Bulletin SM-11A.**

ROTARY AND LEVER SWITCHES

Catalog 558-G shows the more familiar J-B-T instrument-type rotary selector switches, laminated or molded types, in 14 and 20 positions, providing extra contacts in minimum space. 1 to 6 decks (more in some models). Variations are made as 6-pole, double-throw per deck, also 3-4-5 and 6-position lever types. Molded models available in banded and ruggedized construction.

TOGGLE SWITCHES AN, JAN, or MIL

J-B-T manufactures over 140 models of single pole, double pole, or 4 pole toggle switches for MIL-S-3950A and other government quality construction. Heavy duty types feature solid coin silver contacts and rocker arms unique to J-B-T for consistently low contact resistance. Medium duty types use double-grip, self-cleaning contacts. Bulletin TS-6C gives details.

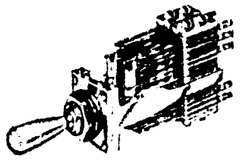
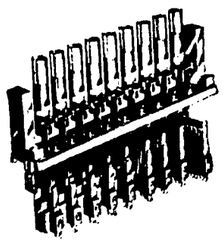
MOSSMAN SWITCHES

PUSH BUTTON • LEVER • TURN





Mossman lever, turn, push and interlocking push button switches are flexibly designed for adaptation to a great variety of electrical switching applications. All Mossman switches are designed for rugged, reliable service, constructed largely with non-ferrous, quality materials, carefully assembled.

R F PRODUCTS

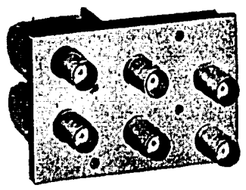
NEW DIMENSIONS IN R F CAPABILITY . . .

R F Products is a new division of Amphenol-Borg Electronics Corporation. It specializes in the design, manufacture and marketing of radio frequency components and assemblies under the widely known Amphenol, Borg and DK trademarks.

DK PRECISION-BUILT COAXIAL SWITCHES

R F Products can usually supply the coaxial switch you need from factory inventory. But if you have a special requirement that can't be met by one of our standard stocked switches, R F Products' engineering group is prepared to design the switch that will—and fast. Over 5000 different DK coaxial switch designs tailored to specific customers applications demonstrate the depth and creative capability of RF Products engineering staff.

Your DK coaxial switch catalog will be sent on request.



Series 323 DK coaxial switches are compact high-density designs for complex multi-position, multi-pole switching.

AMPHENOL IPC COAXIAL CONNECTORS

Pint-size Amphenol Subminax Coaxial Connectors feature full-size electrical characteristics.

R F Products offers a wider range of UG and commercial types of radio-frequency connector designs than any other manufacturer in the industry. Each Amphenol and IPC coaxial connector is engineered to satisfy all standards and most special requirements.

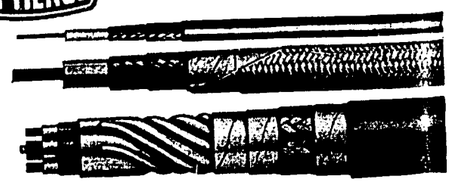
Behind the well-known quality of these coaxial connectors are new dimensions in service and engineering that are yours when you specify connectors by R F Products.

Send for your copies of the Amphenol and IPC coaxial connector catalogs.

AMPHENOL COAXIAL CABLE AND WIRE

R F Products can deliver from stock the largest selection of RG type cables in the world. Add this ability to Amphenol coaxial cable's hard-won reputation for engineering leadership—the first flexible cable to withstand continuous operation at 1000° F., for example—and you get an idea of R F Products' capability to serve you.

Write for R F Products catalog W-61.



There is an Amphenol Coaxial Cable to fit your requirement.

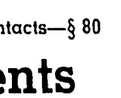
SPECIAL PRODUCTS BY TELEX ®

MULTIPLE ARRAY SWITCH* —Special modular construction allows more circuits; use any number of buttons to stack any number of custom arrays up to 92. Each button represents an 8 pole single or 4 pole double throw, normally opened or closed. In many applications this will allow the elimination of relays. All or any button and detent can be interlocked. Absence of complex multiplicity of parts extends reliability over 500,000 operations.



NEON INDICATOR LIGHTS* —Transistor driven, they combine advantages of low current drain with low voltage operation. Supply is 24V DC nominal, signal is -6V DC to trigger. Eliminates auxiliary power supplies and permits operation from logic circuits. Low power requirement allows operation as a two-terminal device by combining signal and supply voltages. Life expectancy is a nominal 25,000 hours for NE-2H @ .5 ma lamp current. Each meets MIL. STD. 202 specifications.

*Variations in sizes and shapes to specification.

For more information concerning these low cost products, write Sales Manager.

SEALECTRO QUALITY COMPONENTS

THE ORIGINAL PRESS-FIT® TEFLON*TERMINALS

Over 600,000 catalogued numbers. The fast, easy, dependable way to make connections. Teflon body withstands high heat, vibration, shock, and temperature cycling. Sealectro provides complete services, including engineering, design, chassis preparation tools, and the world's most complete line of teflon terminals in all standard EIA colors.

- ★ **SUBMINIATURE STAND-OFFS** — The ultimate in space-saving terminals for sub-miniaturization programs
- ★ **SUBMINIATURE FEED-THRUS** — For facilitating connections through chassis or casing in subminiature components and assemblies
- ★ **PROBES AND PLUGS** — Companion units for connectors and test jacks
- ★ **MINIATURE STAND-OFFS** — For components and assemblies stressing higher operating voltages rather than space-saving
- ★ **MINIATURE FEED-THRUS** — Wide selection of bushing diameters and lengths for making connections through chassis or casing
- ★ **CONNECTORS AND TEST JACKS** — Breakaway connectors (male and female) miniature test point jacks (female) accepting test probes.

SUPERIOR CONHEX SUB-MINIATURE RF CONNECTORS

SCREW-ON CONNECTORS

SNAP-ON CONNECTORS

NEW CRIMP-TYPE CONNECTORS (Screw-on)

NEW CRIMP-TYPE CONNECTORS (Snap-on)

Superior electrical and mechanical characteristics. Available as either Clamp-On or Crimp-On types for Scew-On or Snap-On connections. Connector to cable connections in either type are stronger than the cable itself. Wide range of types in both 50-ohm and 75-ohm impedance. Captivated contacts insure proper engagement of mating parts. Design prevents distortion of cable, thus eliminating electrical characteristic changes.

- ★ STRAIGHT CABLE PLUG AND JACKS
- ★ BULKHEAD RECEPTACLES
- ★ CABLE FEED-THRUS
- ★ RIGHT ANGLE PLUGS
- ★ CABLE TERMINATIONS
- ★ PRINTED WIRING RECEPTACLES
- ★ TEE ADAPTORS
- ★ BNC AND TNC CABLE PLUGS
- ★ ADAPTORS, BNC, TNC, N, TO CONHEX JACKS AND PLUGS.

SEALECTOBOARD

CORDLESS PROGRAM BOARDS

An exclusive Sealectro design permitting complete switching, programming and component interpositioning without patchcords in minimum space. Shorting pins, or component holders, are merely inserted at desired X- and Y-axis coordinate. Standard boards available. Custom designed and made boards to fit any X- and Y-axes requirements. Save money. Assure top dependability. Save space. Provide fast, simple operation. Incorporate the Sealectoboard in all equipment requiring multi-point switching, programming or component interposing.

KULKA TERMINAL BLOCKS

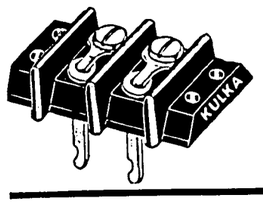
MOLDED BARRIER CONSTRUCTION

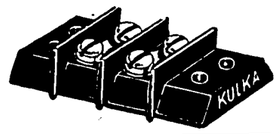
Kulka terminal blocks, used extensively in electrical and electronic assemblies, eliminate splicing, increase insulation, stop leakages and shorts, and generally simplify wiring work.

Molded of high tensile strength bakelite for general commercial use, they are available in other materials made in full compliance with latest military specifications, MIL-M-14E, covering CFG, MFE, MME, MDG, MAI-60, GDI-30, PM14, and other types of special plastics.

Kulka terminal blocks are made in many styles and sizes for varied applications. With 1 to 26 terminals, depending on size. Supplied with or without marker strips which may be printed or plain, or blocks can be engraved.

WIDEST SELECTION OF TYPES AND SIZES



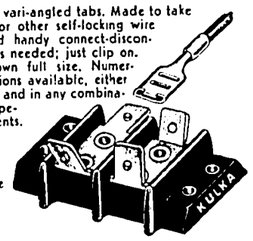


Used extensively in electronic and electrical assemblies, Kulka Terminal Blocks eliminate splicing, increase insulation, stop leakage and shorts, and simplify wiring. In widest range of types, sizes, insulating materials, terminals, etc. Here shown are two types of popular 600 Series. There's a Kulka Terminal Block for every need!

"KLIPTITE" BLOCKS

Available with vari-angled tabs. Made to take AMP, Burndy or other self-locking wire lugs. Fast and handy connect-disconnect; no screws needed; just clip on. 600 Series shown full size. Numerous tab variations available, either flat or angled, and in any combination to meet special requirements.

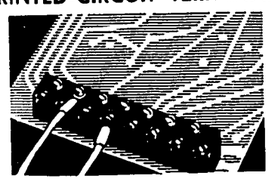
SERIES 800
Shown full size



MINIATURE BLOCKS

409 Series is ideal for miniaturization. Shown full size. Only 4⅜" long for 21 terminals. 5/16" wide with barrier. Also available with one-sided and two-sided soldering lug. Also with threaded holes taking 4-40 screws for mounting through chassis, if desired.

PRINTED-CIRCUIT TERMINALS



Simplify those external connections to printed-circuit boards, no matter how jammed up. Kulka 520 Series miniature terminal blocks mount on board. Terminal pins below slip into standard mounting holes for dip-soldering. Screw terminals. Readily connected or disconnected. 2 to 24 terminals. Entire assembly can be encapsulated.

MILITARY TERMINAL BOARDS

Heavy-duty terminal blocks in the widest range of types, materials, sizes. Here shown one-quarter size is a Military Terminal Board made to drawing 9000, Series S6505 B, 73214, Rev. H. Supplied in MAI-60 glass-filled Alkyd as per MIL-M-14 with latest revision. Threaded studs of manganese-bronze, molded in plastic. Slotted brass nuts. Typical of the "specials" developed and produced by Kulka.

Rugged, Precision
MINIATURE THERMOSTATS

MODEL 13

For your precise applications:

- MISSILES
- ELECTRONIC CONTROL
- AIRCRAFT
- COMPUTERS
- AUTOPILOTS
- TRANSISTOR PROTECTION

MODEL 24

MODEL 11

Illustrations shown full size

★ Hermetically Sealed
★ Strain Relief Protected

The quality of Ulanet miniature thermostats has been proved by years of dependable operation under the most extreme conditions. Their inherent accuracy and rapid response has been the leading reason for their final choice in so many critical applications. Get in touch with Ulanet for the answer to your heat control problems.

NEW!
Hermetically Sealed Surface-Sensing Miniature Thermostat

The only unit that meets the most stringent aircraft and military applications.

Send for Bulletin 100 for full details and dimensional drawings.

FM Series—The only metal thermostats that withstand mechanical clamping or pinching of cartridge without affecting set calibration.

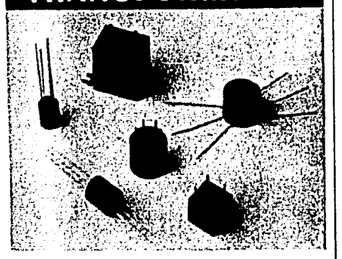
PULSE TRANSFORMERS



Pulse widths available from 50 millimicrosecs to 25 microsecs in a variety of configurations.

Sub-Miniaturization at its very best. Encapsulated, potted, molded and plug-in types.

F & W has specialized equipment and skilled operators, so necessary to handle the extremely fine wire sizes and exacting assembly work required in the production of Pulse Transformers.

Let us quote on your special Pulse Transformer requirements.

To improve output of TRANSFORMERS

specify

Inductrol* Induction Voltage Regulators

Voltage fluctuations can cause electronic tube failure, make equipment operate erratically, increase replacement parts costs. Inductrol regulators operate on the induction principle. This means precise voltage control and high reliability because **no brushes or tubes** are used. G-E Inductrol regulators are virtually maintenance free.

More information appears opposite General Electric "Voltage Regulator" listing in Directory II, Class 72.

*Registered trade-mark of General Electric Co.

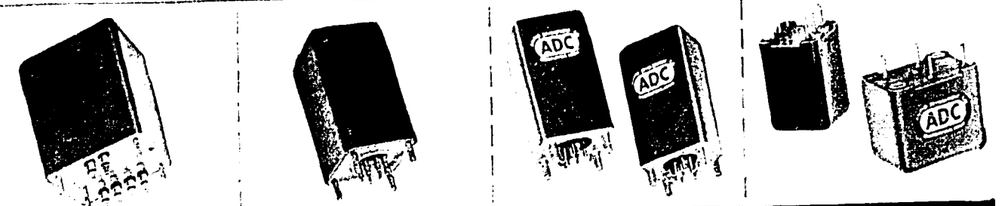
Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 81-226.

ADC

TRANSFORMERS · FILTERS · REACTORS
JACKS & PLUGS · JACK PANELS

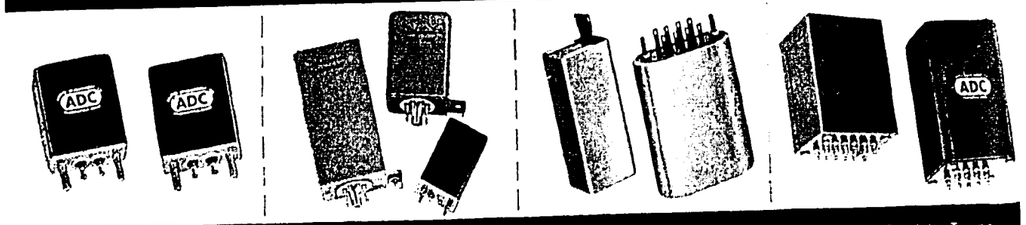


Military Standard POWER Transformers Types MS-90016 through MS-90036.

Military Standard AUDIO Transformers Types MS-90000 through MS-90008.

Sub-Miniature, hermetically sealed, low frequency inductors and transformers.

Transformers and filters for TRANSISTOR and PRINTED CIRCUIT applications to meet MIL-T-27A Grade 5, Class R or S.

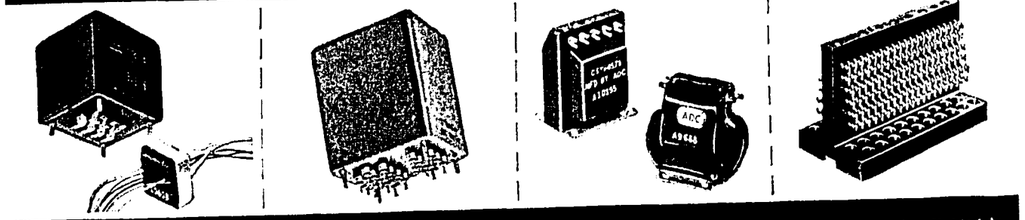


Toroids Hermetically sealed or open units for all frequency ranges.

Filters Sub-Audio to 1.5 mcs.

Telephone Coils Mechanically and electrically interchangeable with Western Electric.

Broadcast Quality Transformers Standard of the Industry.

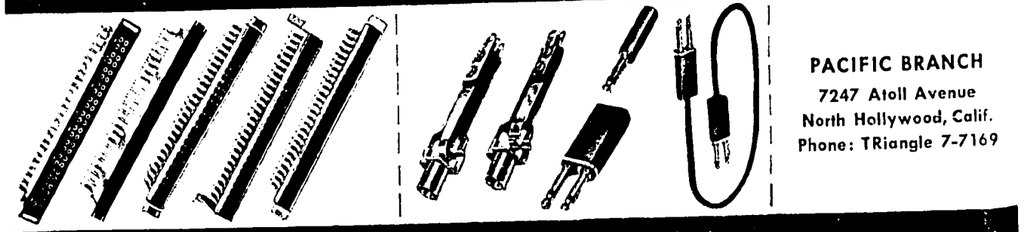


Magnetic Amplifiers and Saturable Transformers For servo motor control; DC-DC Power Supplies, and switching silicon controlled rectifiers.

Balanced Modulators Designs over a wide range up to 500 kcs.

Encapsulated Transformers--Using custom epoxy compounds for military and commercial applications.

Terminal Blocks Molded to your specifications. Six popular sizes in stock.



Jack Panels Several size panels in stock.

Plugs, Patch Cords and Jacks Standard in the communication industry. Long frame telephone type jacks; wide variety; two and three conductor.

Government Approved Qualification Testing Laboratory.

MORE RELIABILITY and BETTER PERFORMANCE with

FREED QUALITY

HERMETICALLY SEALED, MIL-T-27A PULSE TRANSFORMERS

- Maximum power efficiency and optimum pulse performance.
- For use in blocking oscillator, interstage coupling and low level output circuits.
- Ruggedized construction — Grade 4.
- Series or parallel connection of windings for optimum turns ratio.

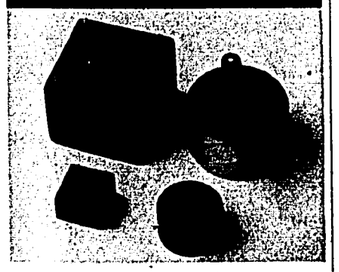
TOROIDAL TRANSFORMERS



All Forbes and Wagner Transformers are produced to meet specific circuit specifications. We can design to solve your problem or build to your own design. Our experience covers miniature, encapsulated, potted, molded, plug-in types. Let us show you what this experience can do for you.

TOROID WINDINGS

We are equipped with the most modern, precision type Toroidal Coil Winding Machines covering a wide range of core and wire sizes. Illustration shows a miniature Toroidal Assembly for use in a magnetic amplifier.

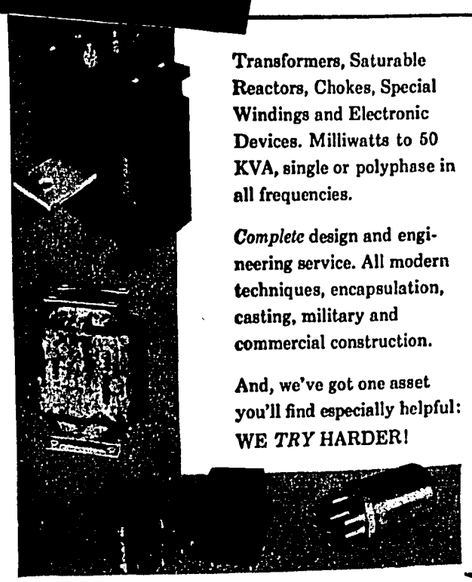
For details, circle #560 on Reader Service Card

Transformers



Transformers, Saturable Reactors, Chokes, Special Windings and Electronic Devices. Milliwatts to 50 KVA, single or polyphase in all frequencies.

Complete design and engineering service. All modern techniques, encapsulation, casting, military and commercial construction.

And, we've got one asset you'll find especially helpful: WE *TRY* HARDER!

ELECTRAN MFG. CO.

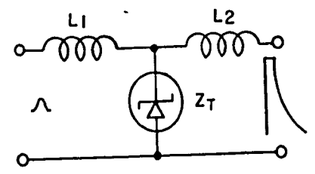
Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 81-226.

PROTECT TRANSISTORS FROM LETHAL TRANSIENT VOLTAGE PULSES

BY USING A GREEN DEVIL

DE SPIKER



SIMPLE AND INEXPENSIVE IN CONSTRUCTION—CLASSICAL IN OPERATION

L_1 is a small High-Q inductor which provides the time delay necessary to POSITIVELY insure the breakdown of the zenor diode, Z_T, prior to the pulse reaching the transistor. L_2 is a Low-Q inductance which helps Z_T dissipate the pulse energy. Thus, the full impact of the incident transient pulse never gets to the transistor.

Available in many stock sizes—with capabilities for carrying from 1 to 30 amps. D.C. Fully encapsulated for many years of reliable service.

Frequency range on some of these units is as wide as 100 kc to 100 mc. Data sheets with individual curves are available upon request

North Hills wideband transformers have been designed for low insertion loss (less than 1 db) and good matching characteristics over wide frequency ranges. Balanced windings feature extremely low unbalanced voltages and have a center tap. Complete specifications are available upon request.

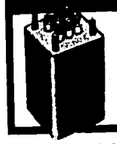
Three case styles are offered. Series AA models are potted in metal cases with a terminal board on the bottom and two 6-32 spade mounting bolts. Series BA are hermetically sealed with glass terminals at the case ends and two 4-40 studs on the bottom for mounting. Series BB is similar to BA except that the unbalanced connection is provided by a BNC connector.

A great variety of different requirements is being met by special designs. Your specifications for custom wideband transformers may be submitted for quotation.

NORTH HILLS ELECTRONICS, INCORPORATED
GLEN COVE, L.I., N.Y. OR 6-5700
For details, circle #564 on Reader Service Card

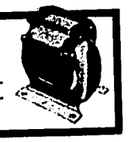
Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 81-224.

CUSTOM DESIGNED TRANSFORMERS for RELIABILITY



HERMETIC
Ceramic compression terminals. Stud type mounting. Schematic. Baked enamel finish, MIL-T-27A.

ENCAPSULATED HIPERSIL
Bracket mounting. Epoxy impregnation and coating. Resists environmental extremes.

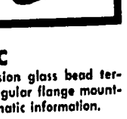


SUB-MINIATURE MIL CASE
Hermetic. Ceramic compression terminals. ¾" x ¾" x 1⅛" H. Wt. 1⅛ oz. MIL-T-27A Grade 4, class R.

MINIATURE MOLDED
Epoxy cast. Resists environmental extremes. For plug-in printed circuits. .040 pins ⅞" x 1 9/32" x ⅞" H. Wt. 1¾ oz.

ENCAPSULATED POWER
Bracket mounting. Used in portable equipment where terminals must be brought out from Transformer.

HIGH TEMPERATURE OPEN FRAME
For Airborne Applications, Teflon, Mylar, and Silicone insulations used. Flat bracket mounting.



HERMETIC
High compression glass bead terminals. Rectangular flange mounting. Full schematic information.

TOROIDS
Precision Inductors, Audio Transformers, Power Transformers, DC-DC Converter Switching Transformers

NEW ENGLAND TRANSFORMER

the home of quality custom transformers for the past 15 years

NOW...

- ✓ new quality controls
- ✓ new high standards
- ✓ new rigid requirements
- ✓ new improved manufacturing
- ✓ new 5 day delivery service (for standard items)

EXPANDED STAFF
includes

H. F. S. MORRIS
general use of transformers

SEYMOUR SCHWARTZ
transformers and associated components related to transistor applications

JOSEPH McCAFFREY
design of transformers and other iron-core components

B. FARENSBACH (ETCA)
magnetic amplifiers
design of pulse transformers

A. MAILLET

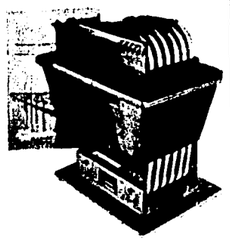
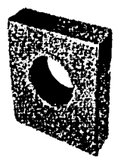
very high voltage high reliability pulse products



PEARSON PULSE TRANSFORMERS
High voltage custom units designed to meet any specification or system application. We supply complete tanked pulse transformer systems, including filament and pulse current transformers, voltage dividers, heat exchanger, tube socket, all bushings, internal bypassing and connections.

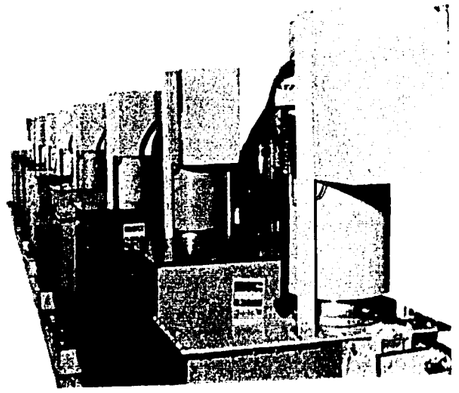
Unit at left, compared with the size of a telephone directory, is rated at 250 kv, 2.5 μsec. and 100 kw average power.



PEARSON PULSE CURRENT TRANSFORMERS
For precision pulse shape and amplitude viewing and wide band waveform viewing. Pulse currents from milliamperes to ten thousands of amperes at voltages up to 300 kv. Fast rise-time - 20 μμsec. Droop - 0.1% to 0.0005% per μsec. High output amplitude accuracy of +1%, —0%.

PEARSON PULSE VOLTAGE DIVIDERS
For monitoring pulse voltages up to 300 kv. Voltage division ratio adjustable from 3000 to 6000 : 1. Droop - 0.01% per μsec. for one megohm cable termination.

ALL PEARSON PULSE PRODUCTS ARE NOW UNCONDITIONALLY GUARANTEED FOR TWO YEARS.



Nine Pearson pulse transformers driving klystron amplifiers in a linac built by Applied Radiation Corporation, Walnut Creek, California. These 200 kv units are tanked complete with pulse shape monitoring, filament transformer, bushings, heat exchanger and klystron socket.

ONE METER TO FOUR MILLIMETERS

New Litton Electron Tubes for Advanced Applications

A. L-3403 KLYSTRON TUBE: One of our super power pulse klystrons for use in long range space radar detection and tracking.

B. L-3270 BROADBAND KLYSTRON: A 2 megawatt L-band klystron offering long life, high peak power, 8 percent bandwidth. Other broadband klystrons, using the exclusive Litton Skirtron techniques, are available with higher power in the L through S-band region with .002-.004 duty cycles.

C. L-3455 HIGH POWER MAGNETRON: A new magnetron delivering a minimum of 2 megawatts peak power at 406-450 mc. with a .002 duty cycle.

D. L-3458 HIGH TEMPERATURE PULSE MAGNETRON: Provides long life operation at ambient temperatures in excess of 662°F. Many hours of 900°F. operation have been achieved in X-band tests.

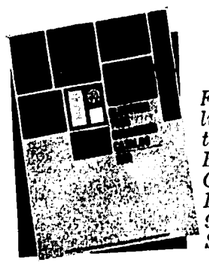
E. L-3629 FLOATING DRIFT TUBE KLYSTRON: High power, water-cooled klystron oscillator fixed tuned at 33,000-37,000 mc. Power output: 15 watts CW minimum. Other tubes available for immediate delivery from 12-4 mm. wavelength.

F. L-3472 TWT: PPM focused traveling wave tube offers higher CW power — 10 watts minimum — and wider bandwidth in a compact 3-lb. size. Operates in the range of 7,000-11,000 mc. One of a line of TWT's including a 1000-watt X-band pulse tube.

G. MICROTRON: The L-3189, one-kilowatt CW magnetron, is accompanied in package form by an electromagnet and filter assembly, high voltage and filament and isolation transformers. Only 6-second warm-up. Two year warranty for domestic microwave cooking.

H. L-3430 CUBE MINIATURE MAGNETRON: A one-kilowatt miniature magnetron, fixed tuned at 9300 ± 30 mc. weighing less than 9 ounces and no bigger than a normal X-band waveguide flange. Developments at other power levels and frequencies are planned.

I. L-3408 SWITCH TUBE: Provides switching at relatively low control voltage levels with an efficiency of 95 percent. Features high voltage holdoff, high current handling. Collector ratings: 150 Kv; 20 Amps; 10 KW dissipation.



For information on our tube line, exclusive of classified types, send for the 1961 Electron Tube Condensed Catalog. Write to: Marketing Dept., Electron Tube Division, 960 Industrial Road, San Carlos, California

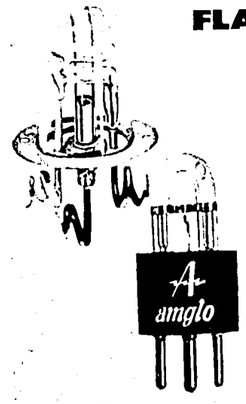
Uniform for Life
amglo
FLASHTUBES



—remain unchangingly uniform throughout their long service life. These scientifically developed and precision built gaseous conduction tubes are products of more than a quarter century of Amglo research and development — many are original Amglo. Available in wide variety, including reflective base, self-ionizing, grid controlled flashtubes, stroboscopic and special service tubes and signal lights. These and many other special tubes are covered in the Amglo Catalog.

IMAGE INSTRUMENTS, INC.
Double – Ended
ELECTROSTORE
— for —
● PICTURE STORAGE
● SCAN CONVERSION
● ANALOG PROCESSING

Provides independent scanning of both input and output of storage tube. Also gives instantaneous recording and continuous readout as well as continuous and variable, or instantaneous erasure. Readout may be with scans completely different from those used in recording. "Reads" and "Writes" simultaneously. No film, no tape, no processing required.

Write for complete specifications or ask for data related to your own particular image-storage problem.

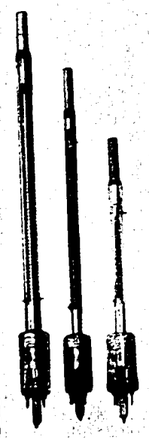
STEWART

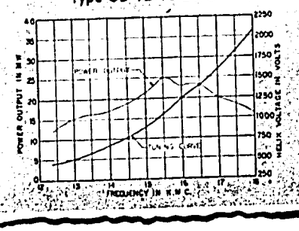
Backward Wave Oscillators

Stewart BWOs offer more uniform power output vs. frequency characteristics and electronic tunability over a greater bandwidth than conventional tube designs. Each Stewart BWO is guaranteed for a minimum of 500 operating hours.

Standard types are listed below; in addition, Stewart engineers will produce, in either experimental or production quantities, oscillators covering partial or octave bandwidths. Inquiries are invited on permanent-magnet-focused tubes and traveling wave amplifiers.



Performance Curves
Type OD 12-18 BWO

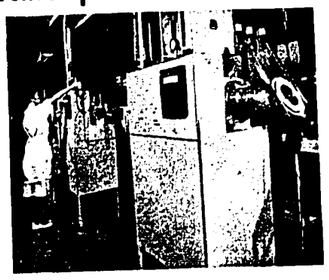


TYPE #	FREQ. RANGE* Gc	POWER** Min-Max, mw
OD 1-2	1-2	50-200
OD 1-2.6	1-2.6	50-200
OD 2-4	2-4	30-120
OD 3.7-5.9	3.7-5.9	30-45
OD 4-8	4-8	10-70
OD 5.2-8.3	5.2-8.3	10-40
OD 6-11	7-11	10-40
OD 6-12	6-12	10-30
OD 7-13	8.2-12.4	10-15
OD 10-15	10-15.5	10-20
OD 12-18	12.4-18	10-25
OD 15-22	15-22	10-20
OD 18-27	18-27	10-20
OD 26-40	26.5-40	5-20

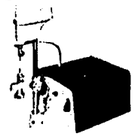
*Other bands also avail. **Higher min. power on special order

STEWART Controlled Atmosphere FURNACES

- cleaner operation
- faster heating and cooling
- lower operating cost
- exceptional ease of maintenance; long service life
- air or controlled atmosphere, with single or mixed gases
- accurate pyrometer control of temperature
- utilizes thermal tube as heating element instead of conventional, wire-wound ceramic muffles



STEWART
Precision Resistance
WELDERS



- complete package unit; built-in electronic timer
- 27 precision controlled heat positions; automatic or manual firing; 1/120 or 1/60 sec. weld time
- portable, lightweight; no installation, no holes to drill
- flexible cable foot control, operable from any location
- universal electrode mount; instantly adjustable
- fully adjustable weld pressures

1962 IRE DIRECTORY

Directory III Materials & Services

Electronic Hardware, Fabricators and Services, Machinery & Tools, Materials & Production

23 major groups 270 products

The products and services of the radio-electronics industry have been organized into three basic directories:

I. Complete Equipment
II. Components
III. Materials & Services

Within these three basic directories, 112 major product and service groups are numbered consecutively throughout. Under each of these 112 classes a further breakdown is given, showing in detail by a system of code numbers after each firm listed what specific products within the class are manufactured by that firm.

For a terminology cross-index listing all products in alphabetical order, consult the pink section preceding page 1.

The first few times you use this EDGE INDEX

follow the "How to use" instructions slowly—one step at a time. After that you will be able to open easily and almost instantly to the section that you seek.

HOW TO USE

1. Bend the Directory almost double with the back cover page on the inside.
2. Hold in your right hand with your four fingers near to the bound edge and your right thumb near the middle of the open side of this page.
3. From the heavy or light line symbol adjacent to the subject you seek, run your eyes across the page edges until you reach the horizontally corresponding symbol.
4. OPEN THERE!

LICENSE NO. 25H
MACHOL EDGE INDEX PATENT #2680630

For complete list of products and services, arranged alphabetically for fast reference, see the pink section preceding page 1.

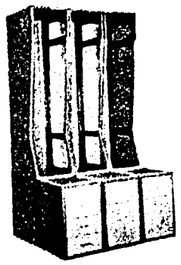
AMCO 1000 G's CERTIFIED SHOCK TESTS

Amco Aluminum and Semi-Custom Modular Frames qualify for Airborne, Shipboard and Ground Support Applications

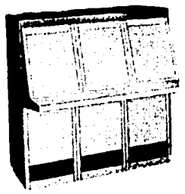
Certified Independent Tests prove Amco Aluminum and Semi-Custom Frames withstand shock & vibration under Mil E-5272C; Procedure XI (5–500cps), Procedure III (approx. 1000g's shock Mil-S901), Procedure II (15g's and drop Mil-S4456). Write for Test Report Supplement E.



Aluminum

ALUMINUM . . . Unique! Meets any size . . . Flush or recessed mounting of panels. Almost any shape from 13 basic parts . . . 3 castings & 10 extrusions. Units from 6" to 20 ft.; slopes from 0° to 90° standard. MilSpecs 6062-T6 extrusions and 356-T6 castings.

SEMI-CUSTOM . . . Heavy-duty, more internal clearance . . . 14 ga. box-channel steel frames, 12 ga. gusseting provides exceptional rigidity both front-to-back and side-to-side. Frames based on 22½" increments provides clearance for recessing 19" wide panels. Meets EIA Standards.

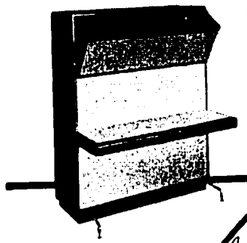


Semi-Custom

CUSTOM . . . When space and appearance are critical . . . 16 ga. double-channel steel frames, based on increments of 19⅛" widths, supports in excess of 3000 lbs. Multi-width panels and cowlings give single-unit appearance with series mounted racks. Meets EIA Standards.

Amco manufactures all necessary blowers, chassis slides, doors and drawers, writing surfaces, cowling lights and other accessories. **Check the extra savings you get thru Amco's combined-discount system of racks and accessories.** *PLUS FREE ASSEMBLY.*

Amco is your one complete source of Modular Instrument Enclosure Systems and Accessories. Write today for catalog of complete specifications.



REALISTIC 3 WEEK DELIVERY

Factory trained representatives in principal cities of U.S. and in Canada.

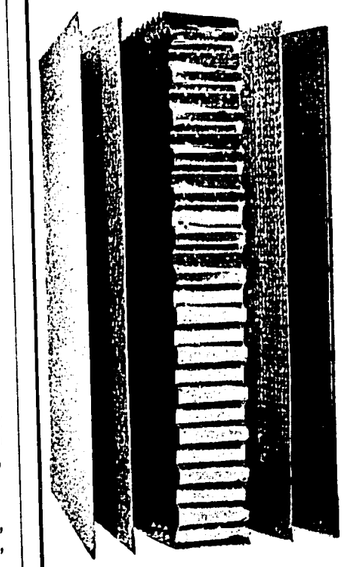
New Honeycomb Manual Available



BONDED HONEYCOMB STRUCTURES

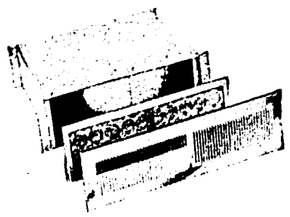
A new design manual covering all types of BONDED Sandwich construction, including aluminum, magnesium, titanium, fibre glass, stainless steel, copper, and others.

For your copy, write:

Albano Honeycomb Division
555 West 54 Street, New York 19, N.Y.

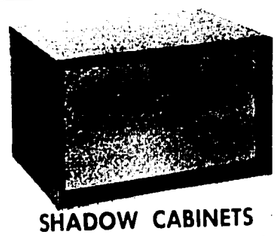
For details, circle #586 on Reader Service Card

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 81-226.



TRANS-AIRE BLOWERS

Bud Trans-aire Blowers are ideal for use where excessive heat is generated by equipment in an enclosed rack, cabinet or console. They have thermal overload protection and automatic re-set. These blowers occupy less area, and a smaller panel space than others having similar air displacement capability. They are the lowest priced units of equal capacity and performance. Available in three sizes with air displacement from 100 cfm. to 700 cfm.



SHADOW CABINETS

An extremely versatile housing since both front and rear panels as well as bottom may be removed for installation or servicing purposes. Unusually attractive appearance is created by recessing the front panel one inch as well as by beveling the front. The recessed front panel prevents accidental movement of controls, knobs and switches attached to it. The two piece body is made of 18 gauge steel and the panels of 16 gauge steel. Four sizes available. Finished in light gray hammertone. Four rubber feet supplied.

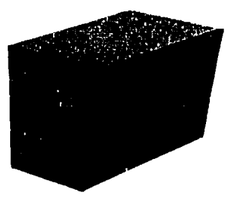
CREATE THE IDEAL ENVIRONMENT FOR YOUR ELECTRONIC EQUIPMENT WITH THESE BUD PRODUCTS

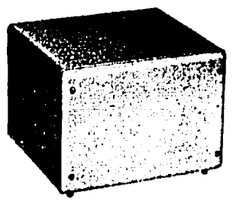
COWL-TYPE MINIBOXES

Bud Cowl-Type Miniboxes have a projecting cover which reduces glare from overhead lighting. It also provides protection for controls and dials. Cover has two box braces to which the bottom is attached by means of sheet metal screws. When assembled, this type of construction results in a sturdy, rigid housing. The unit may be table mounted or hung from a wall. Fabricated of .040 aluminum and furnished natural or with light gray hammertone finish. Four sizes available.

CONTOUR UTILITY CABINETS

This Bud Utility Cabinet is a very practical housing with symmetry and strength. All parts are fabricated from 20 gauge steel to provide strength and rigidity. Both front and rear panels are removable, the front panel being solid while the rear panel is louvered to provide ventilation. The body is finished in smooth dark gray enamel and the panels in light gray enamel. Four rubber feet supplied. Six sizes available.





See these new Bud Products at your Authorized Bud Distributor or write us for literature.

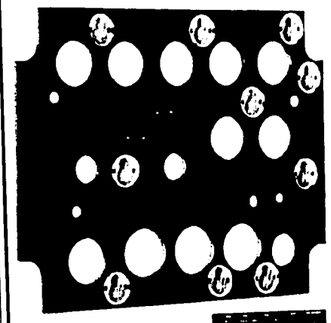
BODNAR CONTROL PANELS



- FLUSH-TYPE
- EDGE-LIGHTED
- EPOXY-EMBEDDED WIRING
- SPOT WELDED
- ABSOLUTE RELIABILITY

Completely Wired—Replaceable Lamps

For critical military requirements; exceeds MIL-P-7788A.

uniform illumination • maximum contrast • readability at any angle • visual comfort and efficiency • high impact resistance • wiring meets MIL-E-5400 environmental specs

FOR AIRCRAFT • SHIPBOARD
• GROUND SUPPORT EQUIPMENT

Innovators and leaders in this specialized field, BODNAR is noted for developing new panels at minimum cost . . . unique shapes, with maximum visibility, resistance to severe mechanical, thermal, chemical and environmental stresses.

Write for details and specification Bulletins on Illuminated Plastic Control Panels, Dials, Knob Assemblies . . . inquiries invited on special requiremenis.

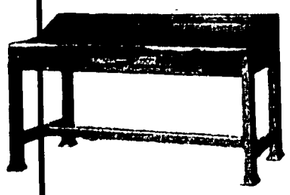
Electronic **TEST UNITS**

Formica Company offers the industry the latest development in electronic laboratory furniture and equipment — test benches and units made up of prefabricated sections, factory assembled from stock to suit the special requirements for your individual application.



Designed *by* engineers *for* engineers, with serviceability in mind — the individual sections are constructed to afford the greatest number of varied selections and combinations. Made of heavy-gauge furniture steel, Formica's benches are sturdy and can take a beating, yet are modern in style and practicability, to meet today's laboratory needs.

These testing units offer unusual space-saving arrangements. Through their design, available working area has been increased at least 50% over that in other types now in use. For more information write for brochures and specifications.

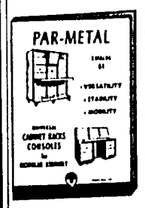
PAR-METAL for all Electronic Cabinetry!

Specify PAR-METAL to obtain custom quality features at production line prices. Par-Metal standardized Universal Cabinet Racks and DeLuxe Console Assemblies offer:

- Maximum stability, versatility, and mobility of single units and multiple assemblies.
- Full range of sizes, finishes, accessories, and fittings.

Personalized and interested engineering assistance is always available.



Our catalog contains complete technical and exact material specifications in the most comprehensive line of Welded Cabinet Racks and DeLuxe Console Assemblies. *Write for your copy today.*

STANTRON

Stantron's broad line of cabinetry comprises the widest range of modular elements available. It combines unequalled flexibility, accessibility, capacity, and economy with the professional styling and superb workmanship ordinarily associated with expensive custom housings. Over 170 standard modular elements.

Authoritative Reference Data:

How to Specify Electronic Wire and Related Products...

ALPHLEX TUBING: Catalog contains complete description of the entire line of eight Alphlex tubing products. Applications and all pertinent engineering specifications are listed in easy-reading charts. Highlighting the catalog is the Alphlex line of Teflon Tubing — a high temperature tubing (260° C.)

ALPHLEX ZIPPER TUBING: The most up-to-date and complete engineering brochure on the Alphlex line of Zipper Tubing. Featured is complete information on all 5 types of Zipper Tubing, and the unique hand-tool that simplifies closing.

SHIELDING AND BRAIDING: Applications, descriptions and all engineering data on Alpha Shielding and Braiding. Specifications on the 3 different types, Flat Braid, Oval Commercial Braid and Tubular Braid to military spec QQ-B-575 are provided. A special glossary is included.

ALPHLEX LACING CORDS AND TAPES: Types, materials and finishes for Round, Flat Braided, and Government Spec Cords and Tapes are included in the brochure. Alpha stocks a complete line of Lacing Cord for immediate delivery.

ALPHLEX SHRINKABLE TUBING: The newest addition to the Alphlex line of Tubing is Heat Shrinkable Tubing. This tubing, featuring controlled shrinkage, forms a tight mechanical bond seconds after heat is applied. Sizes, physical properties and a complete "How to Use" section are included.

ALL-NEW ALPHA ELECTRONIC WIRE AND CABLE CATALOG: 52 pages of complete engineering information describing the entire Alpha line of over 6000 electronic wire, cable and tubing products. Included in this comprehensive book are Military Specification breakdowns, plus complete descriptions and applications of all Alpha products. The catalog highlights such new products as:

- Retractile Coil Cords and Extension Cord Sets
- Teflon Cables
- Heat Shrinkable Tubing
- Teflon Tubing
- Zipper Tubing
- Shielding and Braiding

A special section describes Alpha facilities such as Striping, Cutting, Stripping, Tinning, Color Jackets, Short-Run Cables and the fabrication of Harnesses and Assemblies.

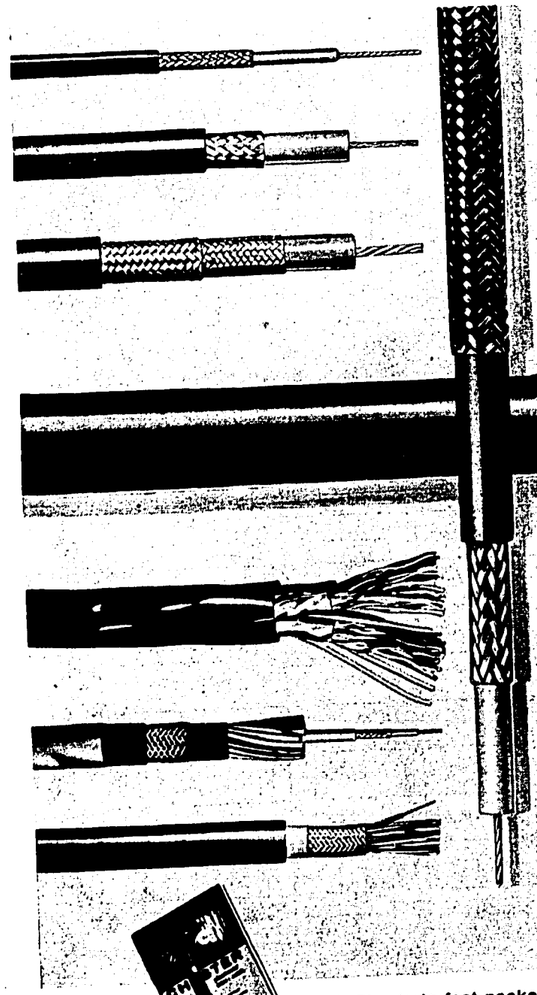
CHESTER

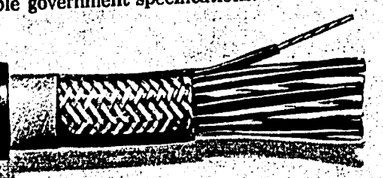
SPECIALISTS IN QUALITY CABLE CONSTRUCTION FOR THE ELECTRONIC INDUSTRY

Single conductors or any number of pairs . . . for coaxial and control applications. As a "specialist in specials" Chester concentrates on meeting the increasing demands of both military and commercial electronics for plastic insulated wire and cable – particularly coaxial cables and multi-conductor constructions. Typical types are shown here. All Chester products may be varied in conducting, insulating, jacketing, shielding or armoring materials to meet your particular needs.



RG TYPE COAXIAL CABLES

Chester RG Type Coaxial Cables are made in both military and non-military versions, single or multi-conductor. Miniature designs are available in a choice of foam and solid polyethylene or in Teflon insulations, and in variations which include double shielding with polyethylene separator and jacket for TV systems or other low loss, all weather, signal transmission applications. Military types meet MIL-C-17 and all other applicable government specifications.



MULTI-CONDUCTOR CABLES

Chester is the recognized leader in the manufacture of multiple-conductor cables for computers and related electronic equipment. These cables can be supplied to *your* design –ranging in size from miniature to large diameters, shielded or unshielded, in a wide selection of thermoplastic insulating and jacketing materials. Any combination of appliance wire, hook-up wire and military approved wires, as well as coaxial cables and shielded conductors can be grouped to meet your specific needs. Send us your requirements for prompt engineering cooperation and price quotation.

NEW, Chester's fact-packed coaxial cable selection guide. Write for your free copy.

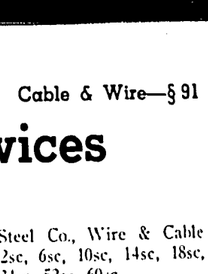
SIGMUND COHN CORP.

Specialists in Unusual Products

Since 1901



Precious Metal Wires for Potentiometers and Resistance Thermometers.

Galvanometer Suspension Strip

Gold Alloys doped for semiconductor devices; wire or special shapes.

Plating Solutions – Gold and Rhodium

Small Enamel Insulated Wires

Thermocouple Wires – Precious metal.

Wollaston Process Wire, as small as .000005" diameter.

HITEMP

A DIVISION OF SIMPLEX WIRE & CABLE CO.

Specialists in High Temperature Mil-Spec Wires and Cables

MIL-C-17B **NAS-703** **MIL-W16878C** **MIL-W-7139A** **MIL-W-19583**

"HITEMP FX" MAGNET WIRE A cross linked polymer with excellent mechanical properties for 260°C and plus continuous operation.

CERAMIC FILM INSULATED MAGNET WIRE—"CERAMATEMP" A flexible magnet wire for operation at 1000oF. Available in sizes 20 to 36 AWG in single and heavy thicknesses.

TEFLON MAGNET WIRE—"TEMPRITE" Sizes 14 to 50 AWG, single, heavy, triple or quadruple thicknesses, conforming to MIL-W-19583 (NAVY). Heavy triple and quadruple coatings. Available in 8 solid colors to conform with MIL Std. 104.

SPECIAL TEFLON MAGNET WIRE—"TEMPRITE X" Same characteristics and sizes as regular Temprite, but specially processed for severe abrasion applications.

MODIFIED RESIN ENAMEL MAGNET WIRE—"THERMISTER-L" Sizes 14 to 42 AWG inclusive. Used for temperatures from −54°C to +155°C. Available in single or heavy thicknesses. Conforms to MIL-W-19583 (NAVY) except for temperature rating.

CABLES Complete cable assemblies and fabrication.

MINIATURE EXTRUDED TEFLON HOOK-UP WIRE—"MX AND MXR" Available in sizes 22 to 32 AWG with standard or reinforced conductor. This special 300 volt thin wall insulated wire is a boon to miniaturization.

TEFLON HOOK-UP WIRE—"TEMPRENE" Fused Teflon tape insulation on wire sizes 8 to 32 AWG. Two or three color striped combinations, plus 10 solid colors. Conforms to MIL-W-16878C (E and EE).

TEFLON EXTRUDED HOOK-UP WIRE—"TEMPREX" Sizes 10 to 32 AWG, in both striped and solid colors. Conforms to MIL-W-16878C (E and EE).

SUB-MINIATURE TEFLON LEAD WIRE—"DQT" Solid copper conductors with Teflon film insulation rated at 300 volts. Available in sizes 20 to 32 AWG, and in 8 solid colors.

TEFLON INSULATED LEAD WIRE—"TEMPCLAD" Teflon insulated lead wire with an outer covering of Teflon impregnated glass fiber braid. Sizes 10 to 28 AWG in 8 solid colors.

100X EXTRUDED HOOK-UP WIRES AND JACKETED CABLES To all applicable military specifications. Sizes 4 to 32 AWG.

FLEXIBLE TEFLON TUBING—"TEMPRENE NON-RIGID" Sizes 10 to 26, solid colors and special striped combinations. Also large diameters ⅛" to 1" in 12" lengths.

"HIWRAP" Unfused, fused and bondable Teflon tape.

TEFLON EXTRUDED TUBING—"TEMPREX TUBING" Sizes 2 to 30 AWG. Fourteen solid colors.

100% SHIELDED WIRES Seamless tube of solid metal (copper, nickel, stainless steel) formed over single or multiple insulated wires to afford 100% shielding for RF or radiation applications

SHIELDED AND JACKETED MINIATURE CABLES Consist of Temprene or Temprex Conductors, shielded and jacketed for high temperature operation. Jackets available in fiberglass braids, teflon or silicone saturated, fused teflon tape, or vinyl insulation.

RIBBON CABLE ASSEMBLIES—"TEMPBRAID" 100% Teflon, flexible, flat ribbon multi-conductor cables. Available in from 2 to 30 conductors in sizes 12 to 32 AWG.

MINIATURE LOW NOISE COAXIAL CABLES Available in 50, 75 and 95 ohm impedances and attenuations of 2β, 20 and 15 db/100 ft. at 400 mc., respectively.

MINIATURE LOW CAPACITANCE COAXIAL CABLES Available in 8.5 or 10.5 mmfd./ft. capacitance ratings.

MINIATURE COAXIAL CABLES Consist of 50, 75 and 95 ohm cables, shielded and jacketed for applications up to +250°C. QPL approved for conformance to MIL-C-17B.

HEATER CABLES Teflon insulated for 600 volt operation. Size 12 to 26 AWG.

HIGH TEMPERATURE AIRCRAFT WIRE For 600 volt service at 400°F. Conforms to MIL-W-7139A (AER). Available in sizes 6 to 22 AWG, in 6 solid colors.

TEFLON MARKING FLUID Teflon printing ink available in black. Can be used for printing codes, etc., on Teflon.

SURFACE TREATED TEFLON WIRES Adherence of varnishes and compounds on Teflon hook-up and magnet wires now practical. Available in 10 solid colors. Conforms with MIL Std. 104.

REINFORCED STANDARD CONDUCTORS—"HIGH STRENGTH" Mechanically improved conductors Teflon insulated to meet all reuirements of MIL-W-16878C. Available in sizes 24 to 32 AWG.

"WRAP-IT" 100% Teflon pipe thread sealer.

HUDSON WIRE COMPANY

makers of quality fine wire for over 60 years

FILM and FABRIC INSULATED MAGNET WIRES

Film Insulations: Enamel, EZ-Sol (nylon), Hud-Sol (polyurethane), Formvar, Siliclad (silicone), Nyform, Nypoly, Isonel & ML (220°C), each single or heavy. Sizes 14 to 56. Fabric Insulations: Celanese, Nylon, Silk, Cotton & Orlon, each single or double. All solid & tracer colors, Sizes AWG 20 and finer. Combinations of Film & Fabric insulations available.

MAGNET WIRE DIVISION
Winsted, Conn.
FRontier 9-3341
TWX WSTD 450
Cassopolis, Mich.
Hickory 5-2424
TWX CSPLS 07

SPECIALS: High Frequency Litzendraht. Voice Coil. Bifilar & Trifilar. Pig-Tail leads. Braided Wires. Loop Wires. Silver plated Nickel. Aluminum. Special Servings of Nylon & Celanese in colors.

SINGLE END and STRANDED BARE CONDUCTORS

Copper (ETP & OFHC), Brasses, Bronzes, Other Copper Alloys, Aluminum, Silver, Zinc, Cadmium, Nickel, Tin, Lead, Monel, Stainless Steel, and Copper Coated Steel. Most metals available plated with Silver, Nickel, Tin (Hot Dip & Electro), Tin-Lead Alloys and Gold.

Concentric, Unilay, Bunched, and Rope Stranding, regular and reinforced, in finished Sizes AWG 4 to 32.

OSSINING DIVISION
Ossining, New York
Wilson 1-8500
