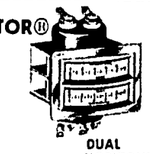
Self-contained and ready for use. Available in Model 150 and 153. Also available in Model 100 with external accessory.

MINIATURE MULTITESTER



Compact combination voltohmeter for testing resistances and AC or DC voltages. Meter has sensitivity of 8,000 ohms per volt on AC ranges, 10,000 ohms per volt on DC ranges. Accuracy ± 2% of full scale deflection.

ILLUMINATED METER
Sealed meter has own external source of illumination. Lamps for 6, 14 and 28 volts. Easy bulb replacement. Available in Model 100, 150 and 153.

NEW MODEL 1120 SIDE INDICATOR® Pat. Pend.
Single instrument panel opening only .516" x 1.605", scale 1.3" long. Horizontal or vertical mounting singly or with scales together. Dust-proof anodized aluminum case with clear plastic cover.
VERTICAL MOUNTING

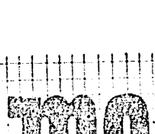
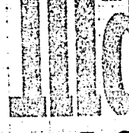
ELECTRICAL INDICATING INSTRUMENTS

HERMETICALLY SEALED METERS



HM2 (2½")
HM3 (3½")
HM4 (4½")

HM Series



Marion true glass-to-metal hermetic sealing . . long accurate life under adverse conditions of humidity, dust and hazardous atmospheres. Magnetically shielded.

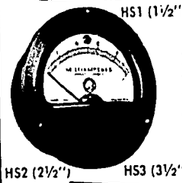
MARION "REGULARS"

phenolic and metal cases — designed for commercial application where hermetic sealing or ruggedization is not required. All Alnico construction. Reliable high torque performance in moderate price range.

MODEL 52N Series 52
Accurate dependable service in smallest practical form. Model 52N (JAN MR24, MR25) 2½" round phenolic case. 52S, 2½" rectangular phenolic case. Model 52 RM, narrow flange brass case. Also available in brass case without flange, 52RMS.

MODEL 53SN Series 53
Standard 3" commercial rectangular type (Model 53SN). Also available in 3½" round phenolic case (Model 53RN) (JAN MR34, MR35).

MODEL 55
Large 4⅜" x 4⅛". Critical readability on 100° scale. Extremely accurate. Most popular case style in test equipment field.

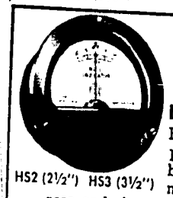


MODEL 56
6½" x 5¼" phenolic case. Large open face with 100° scale in 5½" arc.

MODEL 57
8½" x 7" open face, extra long scale. More than a mere overgrown 3" meter. Enlarged pole shoes — higher torque movement — higher damping factor. Accurate within 1%.

RUGGEDIZED METERS

HS1 (1½")



HS2 (2½") HS3 (3½")

HS Series
HERMETICALLY SEALED

Exceptionally accurate and sensitive even under extreme conditions of shock, vibration, mechanical stress or strain, weather and climate. Outstanding performance in *any* application. 2½" and 3½" types have standard A.S.A. dimensions.

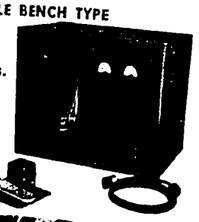
RELATED PRODUCTS

HS2 (2½") HS3 (3½")

NULL INDICATORS
Ruggedized, Hermetically Sealed. Used primarily as bridge and potentiometer balance indicators and where an instrument with very high sensitivity about the zero or balance point is desired. Sensitivity at this point is 1 ua per mm. or higher; the meter's shaded pole face and shielded core construction give sharply logarithmic attenuation as it departs from null point and provides ample overload protection.

HM2ET (2½") HM3ET (3½")

ELAPSED TIME INDICATORS
Two sizes, 2½" and 3½", standard JAN dimensions for panel mounting. Operating range −55°C to +85°C. Hermetically sealed. Magnetically shielded. Registers in 1/10 hour steps to 9999.9 or hour steps to 99999. Durable, self-starting synchronous motor. Available for 110-125, 220-250 volts, 50 or 60 cycles A.C.



M-2

MULTI-RANGE METER TESTER
The only instrument of its type available today. Used for production inspection and calibration of electrical indicating instruments and to maintain high measuring standards in the laboratory. It is also used as a precise production limit bridge permitting acceptance tolerances to be set for any value from ±½% to ±20%. Overall accuracy for current measurements better than ¼ of 1%. Resistance range 0-5000 ohms. Power source 115V AC 60 cycles. Complete, no accessories required.

MARION MODEL PM1 PORTABLE BENCH TYPE INDUCTION SOLDERING UNIT

Improves and speeds up production of small components. Low cost, low powered and portable. Size: 15¾" x 21½" x 15". 150 lbs. Power supply: 115 volts 60 cycles. Draws 775 watts full load, 100 watts standby.

TRADE MARK
ELECTRICAL MEASURING INSTRUMENTS

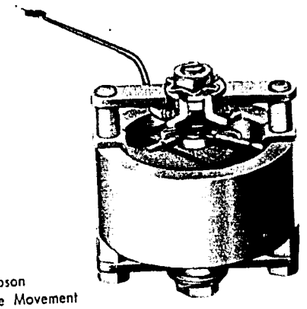
RUGGED • ATTRACTIVE • MODERATELY PRICED

TYPES—ammeters, milliammeters, voltmeters, AC and DC; resistance meters; many with zero adjusters; also pocket types.

ACCURACY—well within 5%. AC meters are double-vane, repulsion type with jeweled bearing; DC meters are polarized-vane solenoid type or moving magnet sensitive type.

METAL CASES—three basic styles, round or rectangular, all requiring 2-5/32" hole. Also pocket types.

DIALS—all metal—age and moisture resistant. Special calibrations, one to five colors.



USES—plate current and voltage readings; battery charging, emergency lighting, fire or burglar alarm units; TV antenna rotator indicators; voltage regulators, transmitters, receivers, plating equipment, AC line testers, field indicators, etc.

STOCKED—by leading electronics parts distributors. Ask for Bulletin G-56(SH) showing 219 models.

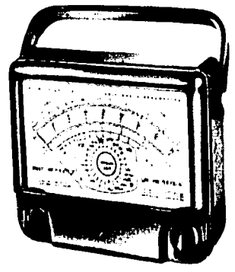
NEW Simpson Core Movement



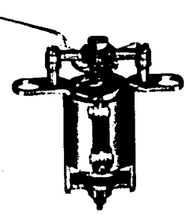
Simpson Core Movement

brings you the

finest in PANEL INSTRUMENTS and TEST EQUIPMENT

Simpson, world's largest manufacturer of electronic test equipment, brings you its new core movement. It's a more compact, more sensitive, *self-shielding* movement that gives electrical measurements with laboratory accuracy, yet has the ruggedness to withstand severe shocks. Its accuracy specifications are so rigid that Simpson engineers had to devise unusual production techniques. Now, let Simpson engineers design panel meters using this new core movement to your special instrument requirements.

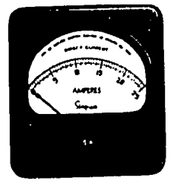
100,000 Ohms per volt, volt-ohm-microammeter with Simpson Core Movement, Model 269 . . . $88.00 at electronics parts jobbers. Also available in 20,000 ohms per volt, same size, case, and meter, Model 262 .....$59.50



RUGGEDIZED METERS

Simpson's 2½" and 3½" Panel Meters are available in *SEALED, RUGGEDIZED* models to meet specification MIL-M-10304-(SIG C). Movements are sealed against moisture and other adverse atmospheres, and are spring-mounted to absorb excessive vibration.

Sealed, Ruggedized with new Simpson Core Meter Movement



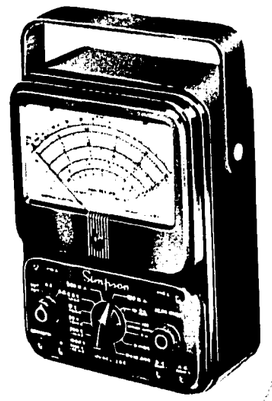
STANDARD MOVEMENT

Simpson Standard Movement

Simpson continues to make available its fine standard movement. This movement is used in many Simpson test instruments, including the now world-famous Model 260 Volt-Ohm-Milliammeter. Standard Simpson movements are available for prototype design or small production runs in over 700 different sizes and ranges of panel meters and they may be procured locally through distributors.

Write for catalog 17 (available October 1, 1954) . . . *PANEL METERS* . . . one inch to nine inch diameters . . . many styles including round, square, modernistic, flange, duplex, flush types . . . same catalog shows *test equipment* . . . VOM's, VTVM's, AM-FM signal generators, oscilloscopes, tube testers, field strength meters, white dot and color bar generators, and many others, suited to color TV and full range of industrial applications.

Model 27—3½" rectangular case at electronics parts jobbers, or direct from factory in production quantities.



Model 127—2½" rectangular case at electronics parts jobbers, or direct from factory in production quantities.

Model 125—2½" round case at electronics parts jobbers, or direct from factory in production quantities.

Modernistic meter with one-piece clear plastic front cover. Can be furnished with your brand name. Write us for details.

SERVOS make flight safe!

Lightweight Oster Motor type 2W-2084

Delivers 1/500 H.P. @ 6500 RPM on 24 to 29 volts DC. Suitable for pushpull, plate to plate operation. This motor will fill your needs in computer, fire control, and autopilot systems.

Miniaturized muscle men perform exacting control tasks on signal from electronic amplifiers!

Another example of Oster precision quality motors for avionics and for other closed-loop control systems.

Oster Avionic Products conform to military specifications for altitude, high and low temperature, life, shock, vibration, humidity, fungicidal treatment and salt spray.

You can depend on Oster quality in rotating components for automatic control.

Other OSTER Avionic Products include:

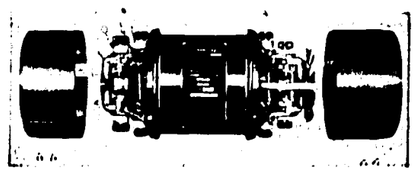
- Special motors: Servos, Synchros, Drive Motors, Blowers and Fans.
- Synchro generators, control transformers, transmitters, differentials, receivers and resolvers. Two-speed synchros and reference generators.
- Tachometer generators.
- Aircraft actuators, both linear and rotary.

Insure dependability... specify Oster®

JOHN OSTER MANUFACTURING COMPANY AVIONIC DIVISION RACINE, WISCONSIN

EEPCO

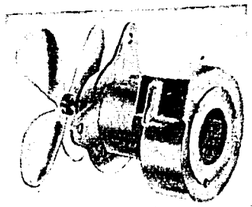
DC MOTOR OR GENERATOR This small permanent magnet, ball-bearing unit—As a motor: 1/125 H.P. at 6000 RPM continuous duty. As a generator: output 4 watts at 6000 RPM—5 volts per 1000 RPM. Dimensions: 1-29/32" x 1-1/2" x 1-15/100".



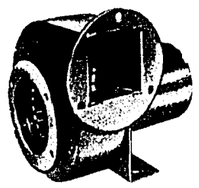
SHADED POLE MOTOR — for sound recorders, air circulators, many other applications. 4-pole, 2 or 4 coil construction. Will operate from 115 volts, 60 cycle a.c.

The RIGHT power supply for mobile equipment is an EEPCO specialty

Outstanding experience in producing rotary electrical equipment to meet rigid specifications is an integral part of every EEPCO product.



Whether your problem involves an industrial or highly developed military unit, EEPCO's complete research and engineering facilities are at your disposal. Contact EEPCO today for special design assistance that can provide you with the best solution.



DYNAMOTOR OPERATES FROM 12-24-32 VOLTS Output of this remarkably compact unit is 500 volts at .100 amperes. Dynamically balanced armature has 4 windings.

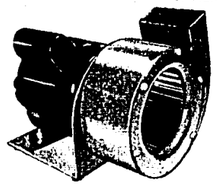
A15ABF-1 115 Volt — 400 cycle. Blower delivering 50 CFM at 8500 RPM. Propeller fan delivering approx. 300 CFM at 8500 RPM.

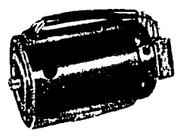
B20B3—115 Volt 400 cycle single phase centrifugal blower. Delivering 140 CFM of air against 2" of water operating at 6500 RPM minimum.

A08C1—2 phase control motor for operation on 60 cycle supply 115 Volt on one phase and 40 Volt on control phase. 3.0 oz/in starting torque on above voltages. 1500 RPM. No load speed.

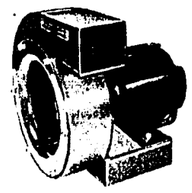
A15AD3—Axial blower unit for operation on 115 Volt 60 cycle single phase supply at 3300 RPM delivering 35 CFM at 0.2 S.P. This unit has special mounting bracket.



Manufacturers of Specialty Rotating Equipment Including Motors, Fans & Blowers

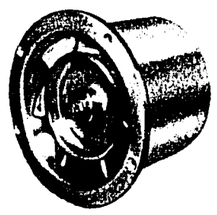


The features of all AIR MARINE motors include Stainless steel thru-bolts, Rigid die-cast aluminum housings, and Riveted stator to insure Extra-Rigid Construction assuring positive bearing alignment and uniform air gap. Motors are protected against humidity and fungus growth—can be mounted in any position—are equipped with ball bearings using lubricants for high and low temperatures—meet all AN specifications.



A11A-2—115 Volt 400 cycle single phase axial vane blower delivering 70 CFM at 1" static pressure at 11,000 RPM.

631 x 35 115 Volt, 60 cycle or 220 Volt, 60 cycle, 1 or 3 phase. 3450 RPM continuous duty. 250 CFM at 2½" water gauge. Used in microwave generators, unattended repeater stations. Fits in space 13½" long, 8¾" wide, 7¾" high.

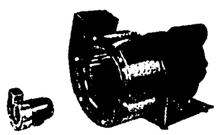


A15HF—115 Volt 60 cycle single phase capacity start & run sychronous motor running at 3600 RPM. This unit has special terminal block mounted on end of motor.

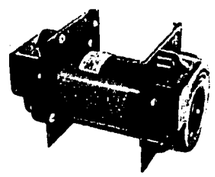
631 x 1—115 Volt, 60 cycle, 3450 RPM 100 CFM @ 2½" water gauge. Fits in space 9½" long, 8¾" wide, 7¾" high.

450C-1—115 Volt 400 cycle phase axial—vane type blower delivering 200 CFM at 6 S.P. Weight approx. 5 lb.

Variable frequency blower for operation on 115 Volt single phase. Available with axial fan or centrifugal blower.



A15BF-15—50 to 800 cycles—single winding available with axial fan or centrifugal blower.

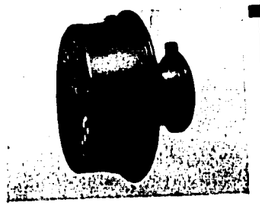


A15AB-2—50-60 cycle and 400 cycle operation single winding.

A15CF10—50-60 and 320-1000 cycle operation dual winding.

Showing comparison between our large and small blowers

A15BD—115 Volt 400 cycle single phase double blower delivering 26 CFM total at 0 static. This unit has special mounting brackets.



The motors and blowers on this page are representative of the many varied models available. Detailed information specifications and performance data on all the above units available on request.

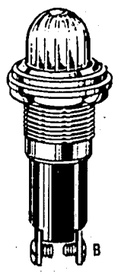
For PILOT LIGHTS
CONSULT
DIALCO

A

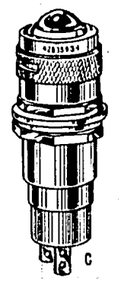
Your product benefits 3 ways from the use of a DIALCO Pilot Light:

Enhanced appearance: The glow of light and sparkle of a lens add colorful visual attraction.



Greater safety: A timely warning flashed by a pilot light can prevent damage to equipment.

Added service: Discs inserted behind lenses can be used to deliver specific messages, such as "FUEL LOW", "ON", "OFF", etc.



Let the Dialco engineering department assist you in selecting the *right* lamp and the *most suitable* pilot light for your needs.

Dialco offers the *complete* line of pilot lights, from sub-miniature types to giant units with 1½" lenses.

Every assembly is available complete with lamp.

Precisely Controlled Power
for Research, Production
and Equipment Applications...

VOLTAGE STANDARD POWER SOURCES

Whether your requirement is simple bench power, precision voltages for meter calibration or stable high power for computers, ELECTRONIC MEASUREMENTS is a dependable source for stable D.C. power. Long experience in this field, including the solution of many airborne problems, means ELECTRONIC MEASUREMENTS can meet your routine or special power needs competently and economically.

0-600 V
600MA
or
1 AMP UNIT
Illustrated

● REGATRON SERIES

VARIABLE D.C. VOLTAGE STANDARD
SUPER REGULATED POWER SOURCE
SMALL SIGNAL MODULATION
MECHANICAL AND ELECTRICAL VERNIERS
ESPECIALLY SUITED FOR TRANSISTOR APPLICATIONS
HIGH STABILITY OVER EXTENDED PERIODS
COMPACT SIZE FOR DELIVERED POWER

● REGATRON FOR COMPUTERS

MODULAR SYSTEM PERMITS CURRENTS UP TO 20 AMPS., VOLTAGE TO 350 V. AT HIGH EFFICIENCIES
HIGH STABILITY OVER EXTENDED OPERATING PERIODS
FAST CORRECTION SPEED AND LOW OUTPUT IMPEDANCE
VERY CLOSE REGULATION
EXTREMELY LOW RIPPLE
CONTINUOUS MONITORING OF TUBE PERFORMANCE
ABSOLUTE CALIBRATION AVAILABLE

FURTHER INFORMATION AND COMPLETE SPECIFICATIONS UPON REQUEST

● GENERAL PURPOSE POWER SUPPLIES

Electronic Measurements Company Regulated Power Supplies have been in production for almost a decade and have established a standard of performance recognized throughout the industry. A complete line is offered, capable of meeting most requirements.

A New Type of D-C Power Source

C&C

STAVOLT®

POWER RECTIFIERS

Closely Regulated by Magnetic Amplifier Control of unique and stable qualities.

Low Ripple

Fast Response

- Ten standard 28 Volt production models up to 1000 amperes, many others, mobile or stationary.
- Amazing size and weight reduction made possible by use of latest core and insulation materials and aluminum construction.
- Encapsulated components—shock mounted meters recessed behind plastic windows.
- No tubes—lamps—carbon piles—commutators or moving contacts and no radio interference.
- STAVOLT Rectifiers are rugged and can take heavy intermittent overloads. They meet MIL-E-7894 with both range and characteristics.

Engineers will be interested in learning more about the fine qualities of STAVOLT Rectifiers. Write for catalog with detail specifications.

Selenium Rectifier Power Units

D. C. POWER SUPPLIES

MODEL CV-30-24

INPUT: 117V 60 cycle single phase.
OUTPUT: 0-30 volts at 0-24 amperes D.C.
CONTROLS: Powerstat. Henry-ons magnetic circuit breaker. Klixon thermal circuit breaker. 4" rectangular voltmeter and ammeter accurate to 2%. neon pilot light. 5 way binding posts for output.

CV-30-24 full wave rectified D.C. $260.00
CF-30-24 2.5% ripple $300.00
CA-30-24 0.35% ripple $345.00

D. C. LABPACK

INPUT: 117 volts 60 cycle single phase.
OUTPUT: 0-28 volts at listed current, continuously variable.
CONTROLS: Powerstat, circuit breaker, neon pilot lamp, on-off switch, voltmeter and ammeter accurate to 3%, 5 way binding posts for output.

Model L 28-5, 5 Amperes full wave rectified D.C. $87.50
Model LF28-4 4 Amperes D.C. 2% ripple 107.50
Model L 28-10, 10 Amperes full wave rectified D.C. 155.00
Model LF28-8, 8 Amperes D.C. 2% ripple 170.00

The illustrated standard units represent the power supplies we manufacture. Many power supplies are designed to the exact requirements of the user, giving maximum utility together with economy. Prompt quotation and delivery. Request catalog describing these and other power supplies.

POWER CONVERSION FOR—

Production and laboratory testing of D.C. apparatus from A.C. power lines, allowing continuous variation of D.C. voltage and current to simulate changing battery or line voltage conditions.
Commercial operation of vibrator power packs, dynamotors, D.C. motors, relays and other devices which require D.C.

- Replacing storage or primary batteries.
- Battery charging.
- Life testing of battery operated equipment.
- High current selenium rectifier plate power supplies.

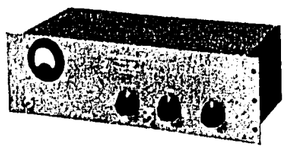
PRECISION SUPPLIES

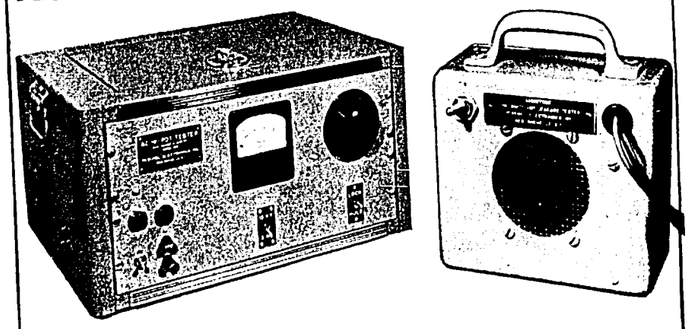


Constant Current Supply
Model RI-221
1-225 Ma. 0-300 V.
10 uA. ripple 100 Megohm Imped.

Regulated High Voltage Supply
Model RE-1601
300-1600 V. 0.5 Mv. ripple
0-7 Ma. 0.5 Ohm Imped.

Regulated High Voltage Supply
Model RE-2002
700-2020 V. 1 Mv. ripple
0-25 Ma. 0.5 Ohm Imped.

Klystron Modulator
Model ME-331
Square-wave frequency: 50-10,000 cps.
Used with RE-2002 Supply



Either positive or negative of any supply can be grounded.

Any of these supplies can be modified to meet specialized requirements.

Regulated HV supplies to 10 Kv. and Constant Current supplies to 1 Amp. can be designed and built. Inquires invited.

NORTHEAST SCIENTIFIC CO.
ONE GRAY STREET
CAMBRIDGE 38, MASS.

PESCHEL INSTRUMENTS AND POWER SUPPLIES

- Sensitive Hipot Testers, AC/DC, non-destructive, 5 microamp circuit breaker.
- Corona Ionization Test Sets.
- HV Test Sets, AC/DC, high capacity.
- DC Power Supplies, up to 100 KV.
- DC High Potential Test and Cable Fault Locators.
- Potential Indicators, wide range, 200 V to 50 KV.
- Dielectric Breakdown Testers, AC or DC.
- Audiotone Continuity and Leakage Testers, 0-100 megohms.
- Continuous Insulation Testers, production type.
- Electronic Heating.

SPELLMAN HIGH VOLTAGE POWER SUPPLIES

MODEL MIL-30
POSITIVE POLARITY POWER SUPPLY

A positive polarity high voltage DC supply with an output voltage range of 15 to 30 KV DC at 1 ma. with regulation of .5%. The MIL-30 also has a negative 1000 Volt tap at 1 ma. regulated. Also included—a positive 300 Volt tap at 1 ma. regulated. This unit, shown less housing, is built in accordance with military specifications. Dimensions: Length 15", Width 8½", Depth 9". Weight 36 lbs.

0-100 KV AC 2 ma.
0-100 KV DC 2 ma.
OIL-FILLED 60 CYCLE POWER SUPPLIES

Suitable for use in paint spraying, flocking, electrostatic precipitation.

SPELLMAN TV is uniquely adapted for the construction of special power supply units of all types. Please write concerning your needs.

Model LAB-60 CONTINUOUSLY VARIABLE REGULATED 0 to 60 KV DC SUPPLY.

Model LAB-60PN—Same as above with POLARITY REVERSIBLE From front panel.

Model LAB-40 CONTINUOUSLY VARIABLE REGULATED 25 to 40 KV DC SUPPLY.

Model LAB-30PN REVERSIBLE POLARITY From Front Panel—CONTINUOUSLY VARIABLE 1 to 30 KV DC SUPPLY.

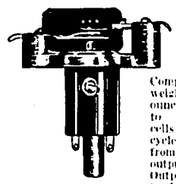
Model RG-30 CONTINUOUSLY VARIABLE 15-30 KV REGULATED DC POWER SUPPLY.

Model PN-30R REVERSIBLE POLARITY CONTINUOUSLY VARIABLE 1-30 KV UNREGULATED POWER SUPPLY.

Model PN-60 REVERSIBLE POLARITY 60 KV DC POWER SUPPLY.

Model 2040 40 KV DC POWER SUPPLY.

Model 1575 1½ KV POWER SUPPLY.



HIGH VOLTAGE RF STEP-UP COILS

5 KV	$ 4.80 Net
10-15 KV	12.00 Net
25 KV	36.00 Net
35 KV	42.00 Net

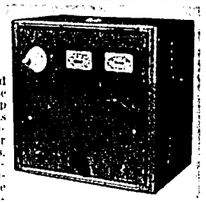
SPELLMAN TELEVISION CO., INC 3029 WEBSTER AVENUE BRONX, N. Y.



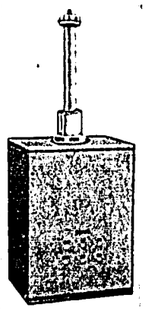
HIGH VOLTAGE
from Milliwatts to Kilowatts

MINIATURE HIGH VOLTAGE CONVERTER

Compact, powerful unit, weighs less than 3 ounces. Simply connect to standard flashlight cells or low voltage 60 cycles and any voltage from zero to 7000 volts output can be obtained. Output can be stabilized to 1% by means of circuits supplied. Delivery from stock. Perfect for Photoflash applications, breakdown testers, portable power supplies, megohmmeters, Geiger counters. Full details on request.

STABILIZED POWER SUPPLIES

Many standard models to choose from. Ranges up to 100,000 Volts DC. May be obtained with or without meters. Regulated or unregulated. Regulated types use amplifier circuits, highly accurate chopper type circuits or tubeless magnetic amplifier control. Full details on request.



HIGH CURRENT HIGH VOLTAGE

For applications requiring high power. Output available up to several amperes at high voltages. These are industrial type units intended for long continuous service under adverse conditions. Reversible polarity model illustrated. Write us giving details of your needs.

BREAKDOWN TESTERS

Basic transformer. Provides output of 0 to 100,000 Volts RMS. Up to 20 Ma may be drawn from the secondary. A special metering winding accurately shows the exact output voltage. The best all around tester obtainable for those odd breakdown and insulation measurements. Write for full details.

MAGNETIC AMPLIFIERS

Convert millivolts to volts or microamperes to milliamperes. Rugged units, simply plug in. No warm-up time—no delicate tubes. What are your needs?

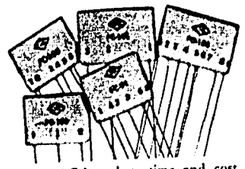
Clean Sweep
on soldered connections



82% **labor reduction in wiring—with this Centralab Printed Electronic Circuit Couplate†**

- CRL PC-101 Vertical Integrator reduces wiring connections from 16 to 3.
- Four capacitors — four resistors in one package.
- PC-101 is in CRL stock for *IMMEDIATE DELIVERY* — as are 30 standard circuit couplates.

Here are some of the reasons why Centralab is your only thoroughly experienced source for Printed Electronic Circuits.

- Centralab has more years of P.E.C.† engineering and production experience than any other supplier. (CRL pioneered Printed Electronic Circuits in the electronic industry.)
- CRL has over 150 specialized engineers for the design and development of P.E.C.'s. They can help *you* with your circuit problem.
- Hundreds of experienced production personnel and extensive, mechanized facilities produce your requirements whether hundreds or millions of couplates.
- Up to 29 different quality tests are made on each CRL Couplate before shipment.
- Centralab's experience in resistor, capacitor and ceramic materials goes back to 1923 — all these have contributed to the quality of Centralab P.E.C.'s.

Centralab P.E.C.'s reduce time and cost of installation, stocking and paper work — give you consistent, accurate performance for 100 or 1,000,000 plates.

†Trademark

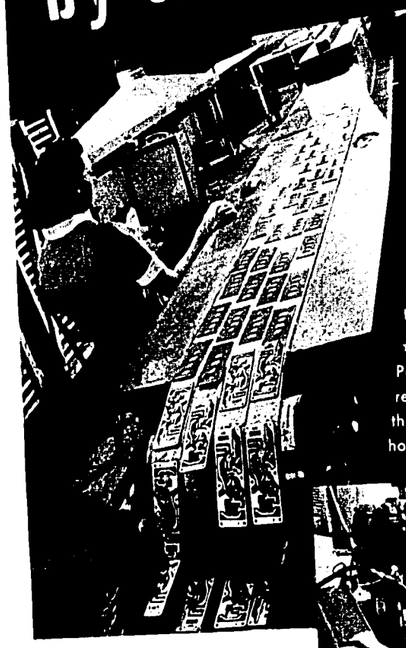
Classifications with a System!

THE IRE Directory Product Classifications have both a pattern and a purpose. They differ widely from most product indexes, deliberately. They aim to organize the hundreds of products and services of a complex technical industry according to the way engineers think. To this end, the product grouping follows the pattern of the IRE Professional Groups, broadly. The result is a division of all products and services into ten fundamental indexes into which 104 basic classifications have been organized.

For detailed identification, these 104 products and services, grouped in the 10 indexes, are further defined into 608 named products. We have tried to avoid oversimplification, and a tremendous amount of information is given by our product number system. But, the basic indexing adds speed. Purely alphabetical directories are as slow and cumbersome as a telephone book. IRE engineers have liked our system better!



You will note that we here differ from most directory compilers, for we do not mix meters with motors simply for alphabetical reasons. Products used in "Audio" whether components or complete apparatus form the first fundamental group. Yet, the same manufacturer and product may also appear in the "Component Parts" section. This system gives subject grouping for speed and convenience. A directory should aid a man who has forgotten some detail, or product name. Ours helps by grouping products as one would *think*.

For safety, an alphabetical "terminology" index is given, preceding the product system in the pink pages introducing the company index. You will note also that after each firm, its products are listed by number code in the alphabetical list, and that sub-classifications shown by number code in the product indexes give much detail. Just a little study of the system will help you get great good from this book.

The IRE DIRECTORY is 10 Indexes in one book.

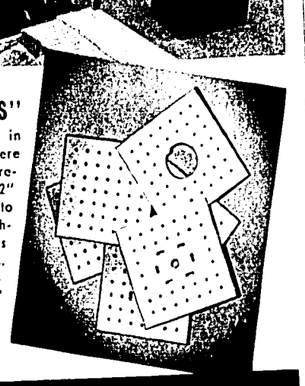
For

PRINTED CIRCUITS by the THOUSANDS

Select METHODE for Quality in Quantity on these circuit types:

★ Single Side Conductor Panels — for Economy and Simplicity in Auto-sembly and dip soldering . . .

★ Two Sided Conductor Panels — For Compactness in applications requiring miniaturization and involving relatively few feed thru connections.



★ "Plated Through" Conductor Panels — For the complex circuit requiring a large number of feed thru connections with conductive holes to permit circuit cross-overs.

Well integrated facilities and a department specialized and experienced on custom tooled volume applications assures performance and satisfaction consistent with Methode's record in serving high production users.

Or by the Hundreds with "QUAD-KARDS"

Where the designer wishes uniformity and simplicity in assemblies which will be used in small quantities where custom printed circuit tooling would be uneconomical, pre-tooled QUAD-KARDS can be furnished in standard 2" square segments with (or without) conductors printed to specifications. Quad-Kards have standard hole punchings for tube sockets, transformers and condensers *plus* a grid pattern of .050" diameter holes on ¼" centers. Undesired holes are omitted and the conductor pattern printed to the customer's layout. "Quad-Kards" may be abutted, angled or stacked during incorporation into finished assemblies. Details on request.

METHODE Manufacturing Corp.

2021 West Churchill Street • Chicago 47, Illinois

Geared to produce Plastic and Metal Electronic Components

IRE provides all THREE

"Proceedings of the I.R.E."

puts your product promotion monthly before the "thinking and doing" engineers in the fabulous, fast-moving radio-electronic industry. Circulation 38,945 (ABC).

Founded in 1913, "Proceedings of the I.R.E." is the authoritative work-book of America's fastest expanding industry. In it, electronic advances, years ahead of the times, are published every month, thus keeping engineers up to the moment on all that is new in engineering research and application. Its advertising is a constant product parade of the best this industry manufactures. A vital service to all men who specify and buy, it is a proved vehicle for your consistent product promotion—*with prestige!*

IRE DIRECTORY

provides 35,000 IRE members educated to buy and specify with your detailed product data for ready reference all year long.

The IRE DIRECTORY is their working encyclopedia . . . it organizes, codes, simplifies and "indexes for use" a vast and complex industry. They look to its listing of men, firms and products as vital working information. Wherever you find IRE members, you'll find IRE DIRECTORIES close at hand for ready reference. The cost of keeping your product story before 35,000 engineers is less than you'd expect. The price of one page is less than one-half the three cents postage required to mail 35,000 letters.

RADIO ENGINEERING SHOW

. . . the eye-opening event of each radio-electronic year . . . where over 40,000 engineers come to you for all that's new.

Bringing buyers and sellers face to face to discuss engineering needs and product performance is one of IRE's great services to an industry where understanding is the key to progress. The Radio Engineering Show completes with actual product presentation the balanced promotion package of "Proceedings of the I.R.E." for product promotion and the Radio Engineers Directory for product reference.

Stupakoff

PRINTED CIRCUITS

★ *Compact*

★ *Precision-made*

By combining in one compact, sealed unit a specified number of printed resistors and capacitors of precision values, Stupakoff Printed Circuits save space and weight, speed assembly, reduce costs, minimize assembly errors. By using Stupakoff Printed Circuits instead of the individual components, soldered connections are reduced up to 80%, assemblies are lighter and more compact, your assembly time is reduced and better products are made.

MINIATURIZING YOUR EQUIPMENT?

Specify SIMPLEST, MOST COMPACT

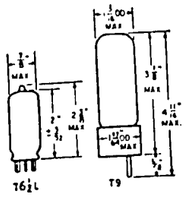
AMPERITE THERMOSTATIC DELAY RELAYS

MOST ECONOMICAL, HERMETICALLY SEALED

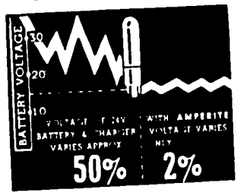
STANDARD MINIATURE

Provide delays ranging from 2 to 120 seconds.

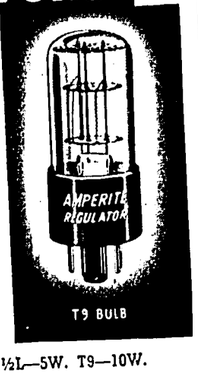
- Actuated by a heater, they operate on A.C., D.C., or Pulsating Current.
- *Hermetically sealed.* Not affected by altitude, moisture, or other climate changes.
- Circuits: *SPST only*—normally open or normally closed.



Amperite Thermostatic Delay Relays are compensated for ambient temperature changes from —55° to +70°C. Heaters consume approximately 2 W. and may be operated continuously. The units are *most compact, rugged, explosion-proof, long-lived,* and — *inexpensive!*



TYPES: Standard Radio Octal, and 9-Pin Miniature.



PROBLEM? Send for Bulletin No. TR-81

BALLAST-REGULATORS

- Amperite Regulators are designed to keep the current in a circuit *automatically regulated* at a definite value (for example, 0.5 amp).
- For currents of 60 ma. to 5 amps. *Operates on A.C., D.C., Pulsating Current.*
- Hermetically sealed, light, compact, and most inexpensive.

T9 BULB

Maximum Wattage Dissipation: T6½L—5W. T9—10W.

Amperite Regulators are the simplest, most effective method for obtaining *automatic regulation* of current or voltage. *Hermetically sealed,* they are not affected by changes in altitude, ambient temperature (—55° to +90°C), or humidity. Rugged; no moving parts; changed as easily as a radio tube.

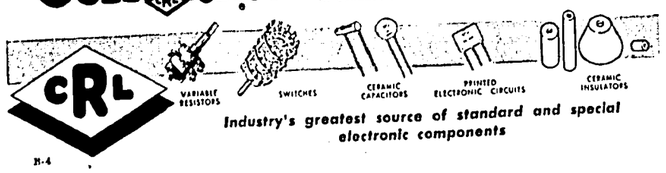
but FACTS...not fable

make the Model 2 Radiohm® industry's finest control

here's how it goes together...

SWITCH ... COVER ... STOP it's positive, also provides superior switch shielding. Laminated phenolic SHOE resists humidity. Double wiping CONTACT SPRING for noiseless rotation. TERMINALS ... velvet-smooth RESISTOR available in 14 standard tapers. CENTER TERMINAL-COLLECTOR, specially treated for smooth take-off. BASE laminated phenolic for high humidity insulation. GROUND PLATE ... BUSHING accurately finished to close tolerances for smooth shaft rotation. RETAINING RING ... SHAFT available in round, flatted, slotted, split-knurl, and finger-tip knurl. ALL ASSEMBLED the Model 2 is only 15/16" in diameter, rated at 1/2 watt.



VARIETIES AVAILABLE: single or twin, concentric shafts, plain or switch type, with or without taps; control and rotary tap switch combinations.

MANY SWITCH TYPES—Line switches rated 5 or 8 amps @ 125 volts a-c. Six switching combinations for real production flexibility.

NOW! Write for bulletins 42-164 and 42-157. Get all the facts and you'll specify Centralab.

SERIES 6000

Micro-RELAY by Terado

TRADE MARK

- **OPERATING POWER** 65 Milliwatts Less on special adjustment
- **SINGLE POLE** Double Throw
- **SWITCH RATING** 1.0 ampere/1,000,000 operations 24 volt non-inductive load. Greater load capacity at fewer operations.
- **CONTACTS** Solid coined silver
- **COIL RESISTANCE** To 10,000 OHMS
- **SHOCK TEST—50 G**
- **VIBRATION** Excellent characteristics due to short armature
- **INSULATION** 500 volt any terminal to ground
- **HERMETICALLY SEALED**
- **OPERATING TEMPERATURE** —55°C— +85°C
- **BASE TO FIT 7-PIN** Miniature tube socket
- **PHYSICAL SIZE** 3/4" x 1-11/16"

Noblette and Nobleloy

METAL FILM RESISTORS

Our research and development efforts continually aimed at resistor improvement and specialized in the range of 1/2 watt to 5 watt, makes available to you resistors of economical manufacture and high stability performance.

Better frequency response, less inductance and excellent resistance stability under adverse operating conditions are major features found only in our metal film resistors—and with assured initial accuracy, you have good reasons why, this time try—Noblette and Nobleloy metal film resistors.

SIMPLIFY CIRCUIT TRIMMING *with*

Bourns sub-miniature TRIMPOTS

TRADE MARK

- **Resolution: As low as 0.25%**
- **Power Rating: 0.25 watt at 100° F.**
- **Weight: Only 0.1 oz.**

BOURNS *TRIMPOT* is a 25 turn, fully adjustable wire-wound potentiometer, designed and manufactured exclusively by BOURNS LABORATORIES. This rugged, precision instrument, developed expressly for trimming or balancing electrical circuits in miniaturized equipment, is accepted as a standard component by aircraft and missile manufacturers and major industrial organizations.

Accurate electrical adjustments are easily made by turning the exposed slotted shaft with a screw driver. Self-locking feature of the shaft eliminates awkward lock-nuts. Electrical settings are securely maintained during vibration of 20 G's up to 2,000 cps or sustained acceleration of 100 G's. BOURNS *TRIMPOTS* may be mounted individually or in stacked assemblies with two standard screws through the body eyelets. Immediate delivery is available in standard resistance values from 10 ohms to 20,000 ohms. BOURNS *TRIMPOTS* can also be furnished with various modifications including dual outputs, special resistances and extended shafts.

BOURNS *also manufactures precision potentiometers to measure Linear Motion; Gage, Absolute, and Differential Pressure and Acceleration.*

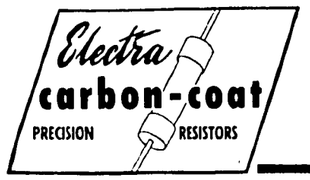
8 sizes to meet circuit requirements of high stability, accuracy & low cost

Electra carbon coat resistors provide the precision, stability and accuracy to meet a variety of applications and requirements in advanced electronic circuits. Electra offers the benefits of low voltage coefficient, low capacitive and inductive characteristics in high frequency applications, in addition to small physical size and economy.

STABILITY — regardless of resistance tolerance all Electra deposited carbon resistors are equally high in stability.

ACCURACY — ±1% is standard but resistance value tolerances of ±2%, ±5% and ±10% are available.



ECONOMY — When the advantages of stability, accuracy and small physical size are considered, Electra resistors are your most economical buy.

PART NUMBER	Wattage	Maximum Rated Voltage	Resist. Range	* DIMENSIONS Length A	Dia. B
DC-⅛	.125	250	4 Ω 250 K Ω	9/32"	5/64"
DC-¼	.25	300	5 Ω 1 Megs	17 32"	3/32"
DC-½	.5	500	6 Ω 5 Megs	13/16"	11/64"

Actual performance records prove that these DeJUR components withstand adverse conditions of vibration, heat and moisture. Each is engineered and manufactured to meet rigid government requirements. In addition to its wide variety of stock instruments, DeJUR offers top-flight laboratory, engineering and manufacturing facilities for production of these precision units adapted to your specifications. Inquiries are invited.

MANUFACTURERS OF SCIENTIFIC PRECISION EQUIPMENT FOR OVER 30 YEARS

Information at high speed! "Data the way an engineer thinks" is the key to IRE DIRECTORY classifications. All products are divided into 10 fundamental groups, many of which parallel professional group organization. The grouping plan makes this the fastest working directory you ever used! No components are mixed with test equipment—you turn right to a section where each item belongs.

Yet good engineering detail is maintained. 104 basic classes of products under these ten sectional product directories keep listings from becoming cumbersome, but clearly define products. Overlapping listings are skillfully eliminated. Simplicity makes this book easy to work with—insures faster finding of facts when forgotten. Thus the faults of terminology listings are avoided.

Completeness is insured! Most firms make many products in a single classification. Wasteful, eye-confusing relisting of the same firms over and over is quite sensibly solved by using a system of codes under the 104 basic headings which actually provide 608 separate classifications. A more complete picture of what each firm's full line is results, but you travel through fewer listings. The "Copp Principle" of Directory indexing makes these lists wide, well marked highways to information—fast.

3000 Firms listed. The alphabetical directory gives a clear definition of these firms by showing any or all of the ten fundamental groups in which these firms belong after every name.

Ads positioned with reason! In a DIRECTORY where ads play an important part in supplying information the user wants and needs, it makes good sense to cross-reference every advertiser in each listing so that the user can quickly find more detail. Ads are also placed facing company alphabetical listings, or in the product section in which they properly belong. No effort is spared to "organize" ad information.

More advertisers—more information! Never before have so many advertisers served IRE readers with so much information! The advertisers' list this year is truly a "social register" of this great industry.

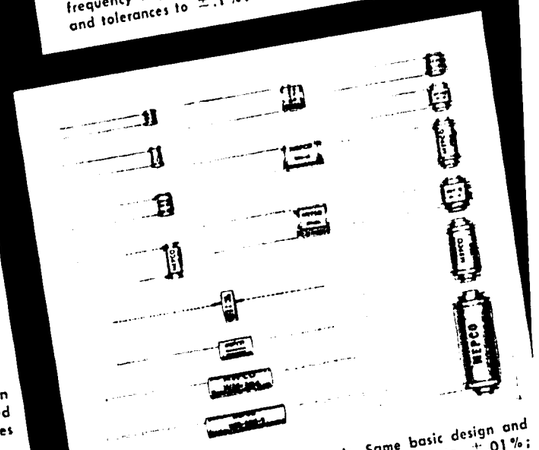
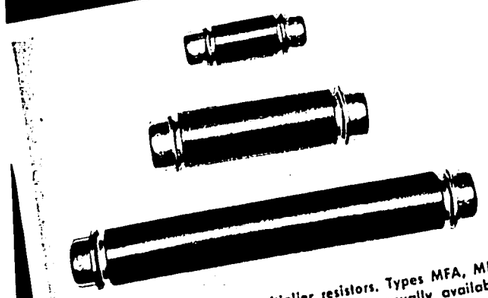
Time Proven
PRECISION RESISTORS



Encapsulated, approved MIL-R-93A and commercial types provide positive moisture and mechanical protection. Available in all resistance values, temperature coefficients and tolerances down to ±.01%. Also, matched sets.



Hermetic sealed carbon film types unexcelled for critical applications where wire wounds are too large or costly. Resin coated units to MIL-R-10509A. Disc and rod types for high frequency requirements. Glass sealed types for high stability and tolerances to ±.1%.

Standard JAN-R-93 and commercial steatite bobbin precision resistors. Basic lug terminal types include exclusive metal molded termination and patented internal insulation features. All types manufactured to your exact requirements.

Lead terminal precision wire wounds. Same basic design and reliability as standard JAN types. Tolerances to ±.01%; matched sets, etc.

JAN-R-29 external meter multiplier resistors. Types MFA, MFB and MFC in all standard resistance values usually available from stock.

Shown on this page

are but a few of the many types available either as standard items or custom manufactured to your exact specifications. Complete technical data will be furnished on request.

MEPCO, INC. MORRISTOWN, N. J.

MICRO-CIRCUITS CO. PRODUCTS

Please request data sheets for your files. We shall be pleased to discuss the application to your equipment of any of the materials described below.

PRINTED CIRCUITS

We can produce, to order, a wide range of low-cost conductor and resistor networks, moisture and rain-detecting grids, commutators and switches capable of over 100 million revolutions, resistor and tuning networks on flat or tubular bases for TV and radio circuits, etc.

RESISTORS

TEMPERATURE SENSITIVE—for protection of TV and radio receiver filaments. For temperature measuring and control.

VOLTAGE SENSITIVE—for circuit stabilization and voltage regulation at low cost. Medium to high resistance.

HIGH MEGOHM—for instruments and photocell circuits. One megohm to ten million megohms. Single resistors ½" to 8" long. Low-cost, printed resistor networks. An extremely versatile and time-saving series of low-cost decade units covering the above resistance range for laboratory and small production.

HIGH VOLTAGE—for high voltage power supplies in color TV receivers, etc. Single value resistors. Low-cost, printed-circuit bleeder-resistor strips containing all necessary fixed resistors. Printed on bases 1" to 8" long.

FLAT STRIP RESISTORS (tape resistors), resistor stock, and conductive sheets. With or without silver terminals, adhesives, etc. Makers of lightning arrestors, neon pilot lights, etc.; are buying strips which they shear into resistors at a fraction of a cent each.

CONDUCTIVE PAINT

OVER 100 TYPES for printed-circuit and shielding uses including extremely durable baking types.

SHIELDING MICROPAINTS—for meter, circuit, and instrument cases; cathode-ray tubes; etc. Silver types priced as low as 45¢/oz. Carbon types with resistances as low as 25 ohms/inch.

NEW, LOW COST, general purpose, air drying Silver Micropaint SC14. A few current prices for comparison are: 1 to 4 tr. oz.—$5.00/oz., 25 to 99 tr. oz.—$1.29/oz., 500 to 999 tr. oz.—$1.21/oz., 5000 tr. oz. and up—$0.98/oz.

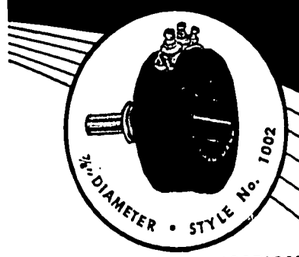
PRECISE-OHM RESISTORS

The very highest quality ceramic tubes, alloy wire and specially compounded vitreous enamel go into the manufacture of Precise-Ohm Resistors. A new, continuous, high-temperature, high production furnace is among our modern equipment; adaptable to manufacture of various size resistors, any size order, with closest possible control of critical fusing process in the application of vitreous enamel. If your product design requires wire wound resistors, insist on PRECISE-OHM.

FIXED: Wire wound vitreous enamel type; alloy wire, ceramic cores.
ADJUSTABLE: Fixed types, but with narrow longitudinal tract on side, bare of enamel.
TAPPED AND MULTISECTION: Like fixed type except that any number of taps may be incorporated.
PIGTAIL: 10 watt and smaller are space wound on low-loss ceramic cores with low temperature coefficient wire.
FERRULE TERMINAL: Ferrules are monel metal, oxidation and corrosion proof.
APPROX. WATTAGE RATING: 5 to 190 Watts
TUBE DIMENSIONS: (Outside diameter) $\frac{5}{16}$ to 1¾" (length) 1 to 11½.
RESISTANCE: (Min.) .03 to .78 (Max.) 10,000 to 125,000.



PRECISION RESISTORS

Precision, Price, and Promptness our bywords on precision resistors. Tolerance to 1/50% available on order. Price as always very competitive. Promptness unequaled in the field. **For further information on our many types, write Dept. R.**

precision inc. / 730 LYNDALE AVENUE NORTH MINNEAPOLIS, MINNESOTA.

VECTRON

PRECISION LINEAR WIRE-WOUND POTENTIOMETERS

GENERAL SPECIFICATIONS

Over-all Resistance: 50 ohms to 50,000 ohms
Resistance Tolerance: ± 5% standard (±2% or ±1% if specified)
Independent Linearity: ± 1% standard (±0.5% or ±0.25% if specified)
Temperature Coefficient of Resistance Wire: 0.00002 parts per °C, above 250 ohms 0.0007 parts per °C, 250 ohms or less
Power Dissipation: Nominal dissipation rating, 2 watts at 25°C. Rated 5 watts to 5°C under specific conditions
Electrical Rotation: 320° ± 5° standard to 357 ± 1° if specified
Resolution: Optimum—based on resistance
Terminal Assembly: Treated, electrical grade, laminated phenolic with gold-plated terminals.

Always to Your Specifications

From Vectron's three basic Potentiometer styles, ⅞" diameter, 1 1/16" diameter and 2" diameter, units can be made to suit your individual requirements. Multiple ganged units with individual phasing, special stops and even specially tapped units supplied to order, individually or in quantity. Additional new sizes and new types are being prepared as this publication goes to press. Standard shafts supplied in any length or detail; special bushings and shaft locks to order.

High Linearity — Superior Performance

Vectron Potentiometers provide superior performance. Uniformity and linearity far beyond normal specification requirements are the result of long experience. Close tolerances and special processing insure minimum run-out and bearing angularity.

IRE provides all THREE

"Proceedings of the I.R.E."

puts your product promotion monthly before the "thinking and doing" engineers in the fabulous, fast-moving radio-electronic industry. Circulation 38,945 (ABC).

Founded in 1913, "Proceedings of the I.R.E." is the authoritative work-book of America's fastest expanding industry. In it, electronic advances, years ahead of the times, are published every month, thus keeping engineers up to the moment on all that is new in engineering research and application. Its advertising is a constant product parade of the best this industry manufactures. A vital service to all men who specify and buy, it is a proved vehicle for your consistent product promotion—*with prestige!*

IRE DIRECTORY

provides 35,000 IRE members educated to buy and specify with your detailed product data for ready reference all year long.

The IRE DIRECTORY is their working encyclopedia . . . it organizes, codes, simplifies and "indexes for use" a vast and complex industry. They look to its listing of men, firms and products as vital working information. Wherever you find IRE members, you'll find IRE DIRECTORIES close at hand for ready reference. The cost of keeping your product story before 35,000 engineers is less than you'd expect. The price of one page is less than one-half the three cents postage required to mail 35,000 letters.

RADIO ENGINEERING SHOW

. . . the eye-opening event of each radio-electronic year . . . where over 40,000 engineers come to you for all that's new.

Bringing buyers and sellers face to face to discuss engineering needs and product performance is one of IRE's great services to an industry where understanding is the key to progress. The Radio Engineering Show completes with actual product presentation the balanced promotion package of "Proceedings of the I.R.E." for product promotion and the Radio Engineers Directory for product reference.

VECO Stands for

ADVANCED DESIGN . .

A recent development in sensing elements provides the basis for a new and better approach to problems in measurement and control. VECO THERMISTORS have an extremely high negative temperature coefficient of electrical resistance. Their small size and extreme sensitivity to thermal changes offer engineers a circuit element to utilize in new applications, and for the improvement of older methods.

BEADS • WASHERS • DISCS • RODS

SOME PRACTICAL USES:

Time delay • Gas analysis • Volume limiting • Surge protection • Vacuum manometry • Flow measurement • Temperature control • Temperature measurement • Radar power measurement • Temperature compensation Oscillator stabilization • and many new applications being developed.

SEND FOR . . .
VECO THERMISTOR DATA BOOK

VECO VARISTORS react instantaneously to current or voltage changes, and have innumerable uses such as arc suppressing and regulating source voltages.

VECO GAS ANALYSIS CELLS

employ Veco glass-coated Thermistors as sensing and reference elements (no open wires, therefore no corrosion).

$5.00 cash or money order will bring you the VECO Experimentors' THERMISTOR-VARISTOR package, No. 168—7 items and application circuitry—over a $15.00 value!

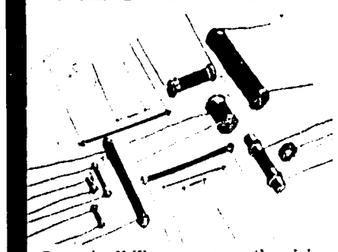
PRECISION *Potentiometers*

Rattray precision potentiometers have a wide scope and cover many types and sizes, in the field of wire-wound units of high accuracy, long life and stability. Rattray's designs are compact, having mechanical and electrical capabilities of the highest quality. The two basic lines include: single and multiple turn linear and nonlinear models. Rattray has the facilities for quantity production orders; fast deliveries made on sample and special requirement quantities.



Models	106	162	200	300	181-3	181-10
Dimensions:						
Diameter, in.	1.060	1.620	1.985	2.985	1.820	1.820
Length, single unit, in.	0.656	0.838	0.838	0.838	1.200	2.080
Add per section, in.	0.500	0.615	0.615	0.615	0.880	1.560
Resistance Range, ohms:						
Linear, max.	50,000	140,000	178,000	283,000	100,000	350,000
Non-linear	Depends on function involved.					
Electrical Contact Angle	350°	350°	350°	350°	1080°	3600°
Functional Tolerances:						
Linear	±0.35%	±0.15%	±0.10%	±0.075%	±0.1%	±0.075%
Non-linear	to ±0.5%	±0.5%	±0.4%	±0.3%	±0.5%	±0.3%
Torque Per Section, oz. in.	0.5	0.5	0.5	0.5	1.0	1.0
Wattage Rating at 40°C	1	2.5	4.0	5.0	3	5
Operating Temperature Range	−55°C to +75°C standard.					
Resolution, Max.	1/1500	1/2500	1/3300	1/5300	1/6000	1/20,000

Function tolerances indicated are typical and vary with resolution.
In all cases, extra taps can be provided as required.
Ball bearings available if required, and will increase length slightly.

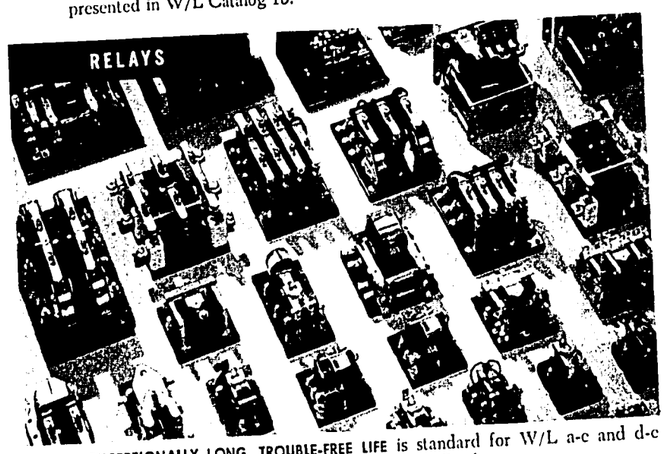
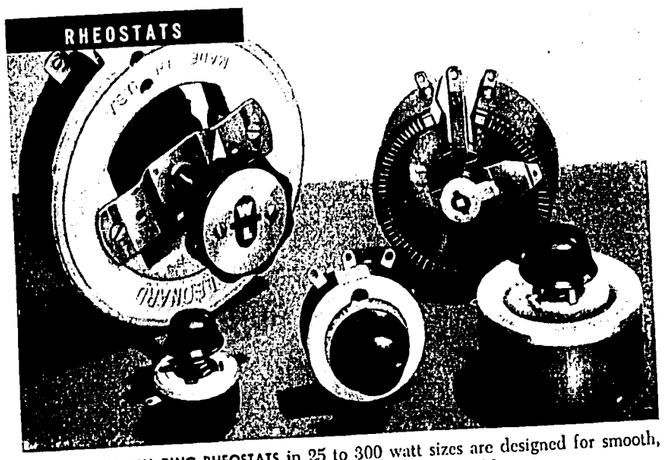
Stupakoff
CERAMIC RESISTORS



Stupakoff Temperature Sensitive Resistors are used for the control of voltage, current, pressure, temperature, humidity, radio oscillation, resistance and resistance compensation. Stupakoff Insulcon units are used as an infra-red light source and as heating elements. Both are supplied in the form of rods, tubes, discs, bars, rings, etc., and complete with terminals.



STUPAKOFF CERAMIC & MFG. CO.
LATROBE, PENNSYLVANIA
DIVISION OF THE CARBORUNDUM COMPANY

WIDEST SELECTION OF STOCK RESISTORS ever offered by any manufacturer is presented in W/L Catalog 15.

EXCEPTIONALLY LONG, TROUBLE-FREE LIFE is standard for W/L a-c and d-c magnetic relays. Write for data-packed Relay Catalog.

VITROHM RING RHEOSTATS in 25 to 300 watt sizes are designed for smooth, gradual resistance change. Send for Bulletins 1105-16.

Know your three R's in control components ?

That's resistors, relays and rheostats we're talking about – and a man looking for these devices earns his A when he shops at Ward Leonard.

You get more performance per dollar . . . a wider selection of stock items . . . and quicker service on made-to-order controls from Ward Leonard than from anyone else.

Take a look at our basic three R's here. Then find out how well one of our components can meet your product's requirements by writing us. Ward Leonard Electric Co., 90 South St., Mount Vernon, N.Y. 4.38

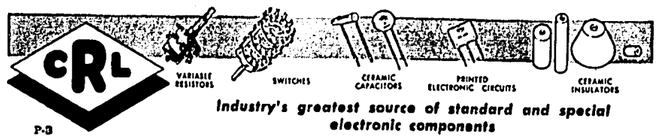
Centralab rotary switches solve a wide variety of electronic applications

Chances are you'll never design an "*electronic husband awakener*". But the uses for Centralab Rotary Selector Switches are as broad as your imagination

- Available in standard (1⅞" diameter) or miniature size (1½" diameter).
- Standard or special switching combinations — up to 12 positions or up to 6 poles per section.
- Single or multiple sections.
- Indexing: 30° or 60° (standard or miniature; 90° (standard only).
- Phenolic insulation — NEMA Grade XXXP. MIL Grade P3115B.
- Steatite insulation — JAN Grade L-5 for low loss characteristics.
- Shorting or non-shorting types.
- All hardware heavily cadmium plated.
- Clips and contacts silver plated spring brass.
- Solid silver alloy contacts available.



Centralab has complete facilities for volume production of custom switches: Modern, highly mechanized production plants . . . *plus* Centralab engineering specialists are at your service.

If you need something new . . . come to Centralab . . . we may have it!

Centralab

A Division of Globe-Union Inc.
9201 E. Keefe Avenue • Milwaukee 1, Wisconsin
In Canada: 804 Mt. Pleasant Road, Toronto, Ontario

Industry's greatest source of standard and special electronic components

P-3

There are

3 SPECIFIC WAYS

in which "Proceedings of the I.R.E." serves the advertiser differently and more effectively than other publications.

1. Pre-Specification Selling

Because "Proceedings of the I.R.E." publishes basic research and engineering application articles it is closely studied by those design engineers who must "keep ahead of the market." Often, the research published leads the industry production by from two to six years! The alert engineer, who needs this amount of time for his own design applications and for tooling up and changing the production in his own factory, studies the "Proceedings of the I.R.E." carefully. Its articles keep him abreast with the changes that will inevitably come and make it possible for him to be ready for them. This is the time for you to sell the unknown engineer designing the never-dreamed-of product "before it happens!" It is an insurance that you will be ahead of the market instead of behind it.

2. Personal Connection to the Individual

The Institute of Radio Engineers is an engineering society for individual engineers who must qualify on their own education, experience and engineering work. Thus, the magazine follows the reader as his private possession, wherever he goes. Wherever new engineering progress is developing, the work is done by individual engineers—and it is these men that must be sold! Only the engineer knows enough to specify and buy in a highly technical industry. Selling is a matter of reaching the minds of men because *a company cannot sign a purchase order.* Wherever radio engineering activity is the greatest, companies employ IRE members. An engineer moves into a new job in advance of production and with him goes "Proceedings of the I.R.E.," with all the advertising you so urgently need to place where engineering activity is the greatest.

3. Economy

It is a specific purpose of the Institute of Radio Engineers that its advertising rates should benefit and help the industry grow, by being economical. Part of the economy of a tax-free organization is thus passed on to advertisers in the form of low-cost advertising to a high-quality audience. The page rate per thousand engineers of "Proceedings of the I.R.E." is the lowest in the radio-electronic industry by deliberate intent. Thus, the Institute finds an extra way that it can help the firms that hire its engineers to gain new business at lower costs.

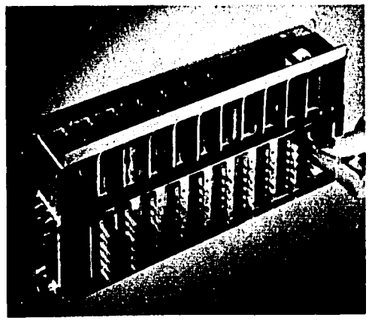
Cunningham
ESTABLISHED 1818
CROSSBAR



Presenting
A NEW HF CROSSBAR SWITCH

A truly superior switch for MASTER CONTROL AND MONITOR SWITCHING OF AUDIO & VIDEO CIRCUITS

Also COMPUTERS • TELEMETERING TELEPHONY • DELAY LINES ETC.

Advantages

- Switches up to 70 megacycles
- Extreme flexibility
- Fast quiet switching
- Crosstalk down 60 Db at 10 MC
- Any group of setups may be held intact while setting up others
- Individual magnets at each cross-over
- Maximum, six conductors per circuit
- Life-tested to 100 million operations
- Provision for spot or remote control
- Designed to permit easy modification
- Strapwiring eliminated
- Palladium contacts
- Reduced cost
- Compact design, small size
- Low operating power—2.5 watts
- Simple "package" installation

If you have a special switching problem, let us point out where our switches can be used to advantage. Write for further information on switch and Application Data sheets.

CO-AXIAL SWITCHES and MICROWAVE *Test Equipment*

REMOTE CONTROL SWITCHES

28 V. DC., 110 V. DC.—Compact, lightweight—available in Radial, spring return; Radial, transfer; parallel connector configuration.

115 V. AC., 60 cycle.—Compact, lightweight—available in Radial, spring return; parallel connector configuration.

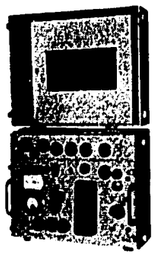
MANUAL CONTROL SWITCHES

Compact, lightweight—available in Radial; parallel connector configuration.

GENERAL CHARACTERISTICS

(all switches)

Frequency range .....0 to 10,500 MC
VSWR .....1.2:1 max. at 3000 MC
Insertion loss .....0.3 db max.
Crosstalk .....greater than 60 db at 3000 MC
greater than 40 db at 10,500 MC
Operation Life .....10,000 cycles, min.
Construction .....weatherproof
Connectors .....N, BNC, C, HN, BN, LN
Positions ..2, 3, 4 and 6: single and double pole
Easily adaptable for specialized usage.



"S" BAND BEACON

A highly miniaturized receiver-transmitter for missile applications to facilitate radar tracking. Supplied with power supply, cable and antenna (not shown).

"X" BAND TEST EQUIPMENT

Test set BHS (AN/UPM-10A) is a portable microwave signal generator for testing and adjusting beacon equipment and radar systems operating in the range of 8500 to 9600 MC. Measures power and frequency of external signals. Supplies pulse-modulated, square wave-modulated or unmodulated signals of known power and frequency. Also supplies frequency-modulated signals.

GENERAL COMMUNICATION COMPANY
681 Beacon Street, Boston 15, Massachusetts

The widest variety of

precious metal contacts

& contact materials

Types available include rivets, studs, screws, steel-back and solder-back buttons, washers, discs, rods, rings and special shapes and stampings . . . Supplied in practically any specified dimensions to suit special requirements and designed for assembly or attachment by any standard method. A wide selection of contact materials is available. Platinum, palladium, gold and silver—both pure and in their many alloys—give you exactly the metal you need for your own particular electrical contact application.

Your inquiries will receive our prompt courteous attention

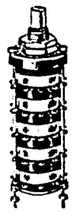
GRAYHILL Switches · Test Clips · Molded Plastic Parts

Grayhill Rotary Tap Switch
SERIES 3000

For Special Circuit Combination Applications



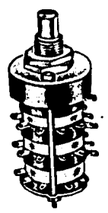
Available 1 to 12 decks, 2 to 11 contacts per deck.
A rugged index action assures rotor contact coming to rest at next position once thrown past center.
Diameter of switch 3-½"
Rated—20 amps., 115 v., A.C., non-inductive

Grayhill Miniature Tap Switches
SERIES 5000

For Commercial Applications

Available 1 to 6 decks—2 to 10 contacts per deck.
Shorting (make before break) or Non-shorting (break before make).
Switch rotates 360° with 10 positions—stops provided with 9 or less positions.
Bushings, ¼" long—⅜" —32 thread
Diameter of switch 1-1/32"
Rated to break—1 amp., 115 v., A.C., non-inductive.
To carry—5 amps., 115 v., A.C.

SERIES 12



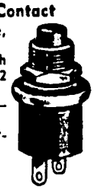
For Military Applications

Available 1 to 6 decks—2 to 10 contacts per deck.
Shorting (make before break) or Non-shorting (break before make).
360° rotation with 10 positions—stops provided with 9 or less positions.
Bushings, ¼" long—⅜"—32 thread
Diameter of switch 1-1/32".
Rated to break—1 amp., 115 v., A.C., non-inductive
To carry—5 amps., 115 v., A.C.

SERIES 24

Positive Detent Action and better feel for precision requirements.
Available 1 to 6 decks—2 to 10 contacts per deck.
Shorting (make before break) or Non-shorting (break before make).
360° rotation with 10 positions—stops provided for less than 10 positions.
Bushings, ¼" long—⅜"—32 thread
Diameter of switch 1—1/32"
Rated to break—1 amp., 115 v., A.C., non-inductive
To carry—5 amps., 115 v., A.C.

Grayhill Push Button Switch
SERIES 2000—Snap Action



For Manual Operation

Audible click when actuated
Momentary contact, single pole, single throw type.
O.D.—7/8" dia. x 1-59/64" high
Bushings, 7/16" long—15/32"—32 thread
Rated—10 amps., 115 v., A.C., non-inductive
1 amp., 115 v., D.C.
Rated Life—Approx. 50,000 operations
No. 2201—Normally open
No. 2202—Normally closed

SERIES 4000—Momentary Contact

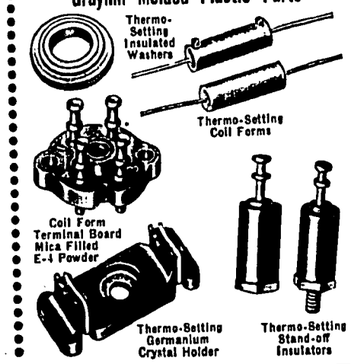
Momentary contact, single pole, single throw type.
O.D.—51/64" dia. x 1-17/32" high
Bushings, ⅜" long—15/32"—32 thread
Rated—½ amp., 115 v., A.C.—non-inductive
Rated Life—Approx. 800,000 operations
No. 4001—Normally open
No. 4002—Normally closed

SERIES 23 — Miniature, Momentary Contact

Momentary contact, single pole, single throw
O.D. ½" dia. x 1-3/64" high
Bushings, ¼" long — 5/16" — 32 thread
Rated—¼ amp., 115 v., A.C., non-inductive
Rated Life—Approx. 500,000 operations
No. 23-1—Normally open

Grayhill Test Clips
SERIES 16—Completely insulated, alligator type

Even hinge pin is insulated.
Low contact resistance (approx. .0015 ohm)—.008" silver overlay on contact surfaces
Terminals—silver plated
Finger grips—molded phenolic



SERIES 2

No. 2-2—Plug-in Adapter for equipment employing ¾" jack centers.
No. 2-0—Threaded Stud
No. 2-1—Banana Plug

Clips—Cadmium plated
Plugs—Nickel plated
Base—General purpose phenolic electrical grade, per Mil-P-14 type CFG.

NEY Precious Metals in Industry

YOUR DESIGN PROBLEM SIMPLIFIED WITH THE USE OF ONE OF OUR STANDARD CONTACTS

HEADED AND FORMED WIRE CONTACTS

This simplified chart shows the form and overall dimensions of a few of the many types of contacts made from Ney Precious Metal Alloys with electrical and physical properties that have proved exceptionally satisfactory for brush or wiping contact applications. Full technical and test data are available on request. Other Ney Precious Metal Alloys have solved many special industrial application problems. Consult us freely without obligation.

See also listings for Thermostats on page 378

Code number at end of each address refers to product or service sub-classifications listed at the head of the major classification.

STEVENS* hermetically sealed THERMOSTATS

Bright plated or dull black finish. Terminals to customer specification. Thermostats shown approximately ¾ size.

Stevens Hermetically Sealed Thermostats—specially engineered for precision control of devices or equipment subjected to dust, moisture or corrosive atmospheres—are tightly, permanently sealed in corrosion-resistant metal cans. Some models have neoprene covered terminals. Virtually any type mounting bracket available.

Stevens Hermetically Sealed Thermostats are available in two basic styles: Type M bimetal disc for high-current circuits; Type C bimetal strip for low-current circuits, or for use in conjunction with disc types. *Both models feature a bimetal thermal element that eliminates artificial cycling or life-shortening "jitters."*

If your problem involves fast, accurate control of temperature under rugged atmospheric conditions, specify Stevens Hermetically Sealed Thermostats—they add to the life and sales of your product.

***Stevens also makes a complete line of standard bimetal disc and strip thermostats. Write for data.** A-6669

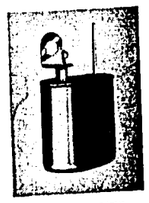
TESTED PER MIL-T-27 IN OUR "IN-PLANT" FACILITIES



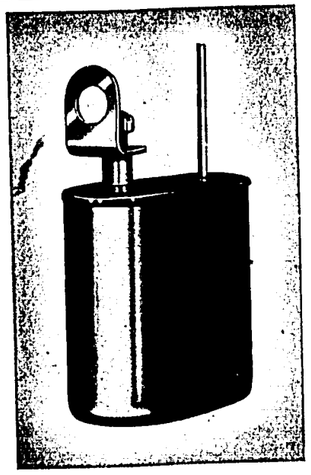
We are now producing government and commercial transformers in quantity. Our top flight engineering staff and complete electrical test facilities can help solve your toughest transformer problems.
"In-plant" testing means a minimum of waiting before passing Government tests. *Write or phone for detailed information.*

HIGH VOLTAGE PLATE TRANSFORMER — Class A, B, C, H — MOLDED MINIATURE BLOCKING OSCILLATOR TRANSFORMER

ATLANTIC TRANSFORMER CORP. 30 Hynes Ave., Groton, Conn.

NEW Hermetically Sealed MINIATURE THERMOSTAT

ACTUAL SIZE



★ Illustrated unit is Model 21. Designed for use in critical electronic, thermal sensing and thermal control applications.

Will control non-inductive loads up to 5 amperes at 27.5 volts D.C. The inherent features of Model 21 are its rapid response and extreme stability. Temperatures varying between —100°F. and +300°F. do not effect the original calibration.

OVERALL SIZE 11/16" x 5/16" WIDE, ⅞" HIGH

Terminals and mounting arrangements can be furnished to meet particular requirements.

Write for catalog illustrating largest thermostat and thermal timer line available to industry.

SINCE 1931 ULANET **GEORGE ULANET COMPANY**

416 Market Street • Newark 5, New Jersey

It's a safe bet to rely on Ulanet!

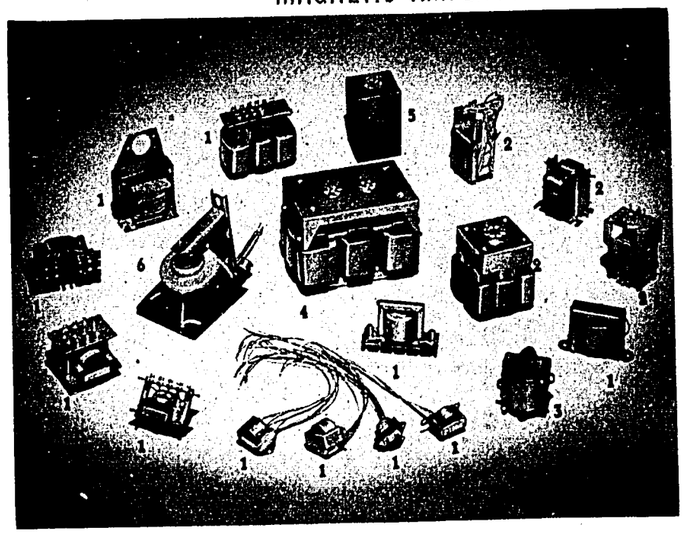
TYPE 01-1529

YES-Hermetically Sealed CLASS H

Open Type Transformer

POSSIBLE ONLY WITH

FORMFLEX



Designed for long life at "Hot Spot" temperatures of 200°C, permitting weight and size reductions over class A designs. Hermetically sealed (MIL-T-27) Grade 1, using exclusive FormFlex process.

Manufacturers of Inductive Equipment

AIRCRAFT TRANSFORMER CORPORATION

Long Branch, N.J.

Celco **Manufacturers of:**
TRANSFORMERS VARIABLE REACTORS
MAGNETIC AMPLIFIERS

1. OUTPUT, MATCHING, COUPLING, AND POWER SIGNAL 400 CYCLE TRANSFORMERS: used where reliability and miniature size is required, such as control amplifying systems. Supplied with any special lead wires or terminations.

2. DUAL MAGNETIC AMPLIFIERS: all types used in latest 400 cycle aircraft control amplifiers for Servo Systems.

3. VARIABLE REACTOR: used today in tuned resonant circuits for vacuum tube voltage regulating systems. Suitable for experimental laboratory work where a Hi-Q and wide range of inductance is required.

4. TRIPLE MAGNETIC AMPLIFIER: used in aircraft automatic pilots, by both the Army Air Force and Navy.

5. HERMETICALLY SEALED TRANSFORMERS: designed to conform to military specifications for hermetically sealed transformers, magnetic amplifiers and reactors.

6. FLY BACK: HORIZONTAL OUTPUT AND HIGH VOLTAGE TELEVISION TRANSFORMER: manufactured for extra quality performance, of very low costs.

COMMERCIAL USE

Omni-Range; Dme; Line Course Computers; Automatic Pilots Navigation; Transmitters and Receivers; Oil Burner Ignition; Fly Back; Vertical Output, Linearity Controls.

MILITARY USE

Servo Amplifiers; Adjustable Reactors; Transistor Magnetic Amplifier; Class H. Transformers; Drone Control; Guided Missile; Voltage Control; Marine Control; Sonar Celco Research.

IRE provides all THREE

"Proceedings of the I.R.E."

puts your product promotion monthly before the "thinking and doing" engineers in the fabulous, fast-moving radio-electronic industry. Circulation 38,945 (ABC).

Founded in 1913, "Proceedings of the I.R.E." is the authoritative work-book of America's fastest expanding industry. In it, electronic advances, years ahead of the times, are published every month, thus keeping engineers up to the moment on all that is new in engineering research and application. Its advertising is a constant product parade of the best this industry manufactures. A vital service to all men who specify and buy, it is a proved vehicle for your consistent product promotion—*with prestige!*

IRE DIRECTORY

provides 35,000 IRE members educated to buy and specify with your detailed product data for ready reference all year long.

The IRE DIRECTORY is their working encyclopedia . . . it organizes, codes, simplifies and "indexes for use" a vast and complex industry. They look to its listing of men, firms and products as vital working information. Wherever you find IRE members, you'll find IRE DIRECTORIES close at hand for ready reference. The cost of keeping your product story before 35,000 engineers is less than you'd expect. The price of one page is less than one-half the three cents postage required to mail 35,000 letters.

RADIO ENGINEERING SHOW

. . . the eye-opening event of each radio-electronic year . . . where over 40,000 engineers come to you for all that's new.

Bringing buyers and sellers face to face to discuss engineering needs and product performance is one of IRE's great services to an industry where understanding is the key to progress. The Radio Engineering Show completes with actual product presentation the balanced promotion package of "Proceedings of the I.R.E." for product promotion and the Radio Engineers Directory for product reference.

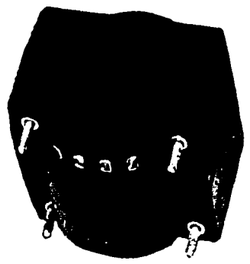
TRANSFORMERS.....

★ ENCAPSULATED
★ EMBEDDED

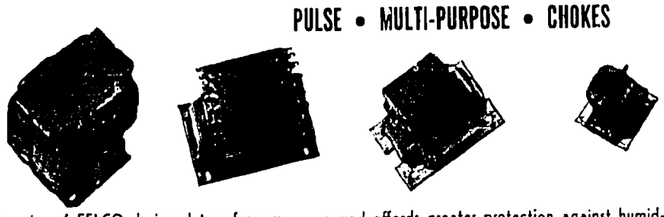


Years of Transformer Engineering

When designing your electronic equipment, consider the advantages of our facilities to properly engineer your transformer components. FELCO designed transformers are in great demand where size and weight are important factors.

FROM STANDARD UNITS . . . .

POWER • AUDIO • CHOKES • ETC.



From the simplest choke to the most complex power transformer, available embedded or encapsulated as shown here.

TO COMPLETELY ENGINEERED SERIES . . . .

PULSE • MULTI-PURPOSE • CHOKES

A series of FELCO designed transformers which have been treated with Westinghouse Fosterite, eliminating the need for expensive hermetic sealing. Impregnating the transformers with this special compound affords greater protection against humidity and reduces corona.

OR SPECIALS . . . .

Cast transformers are available for applications where size, weight and moisture resistance are important factors.

This type embedment is particularly adeptable to airborne, portable and specially designed apparatus and equipment.

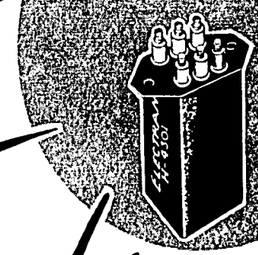
MANUFACTURERS OF SPECIALIZED TRANSFORMERS

Information at high speed! "Data the way an engineer thinks" is the key to IRE DIRECTORY classifications. All products are divided into 10 fundamental groups, many of which parallel professional group organization. The grouping plan makes this the fastest working directory you ever used! No components are mixed with test equipment—you turn right to a section where each item belongs.

Yet good engineering detail is maintained. 104 basic classes of products under these ten sectional product directories keep listings from becoming cumbersome, but clearly define products. Overlapping listings are skillfully eliminated. Simplicity makes this book easy to work with—insures faster finding of facts when forgotten. Thus the faults of terminology listings are avoided.

Completeness is insured! Most firms make many products in a single classification. Wasteful, eye-confusing relisting of the same firms over and over is quite sensibly solved by using a system of codes under the 104 basic headings which actually provide 608 separate classifications. A more complete picture of what each firm's full line is results, but you travel through fewer listings. The "Copp Principle" of Directory indexing makes these lists wide, well marked highways to information---fast.



3000 Firms listed. The alphabetical directory gives a clear definition of these firms by showing any or all of the ten fundamental groups in which these firms belong after every name.

Ads positioned with reason! In a DIRECTORY where ads play an important part in supplying information the user wants and needs, it makes good sense to cross-reference every advertiser in each listing so that the user can quickly find more detail. Ads are also placed facing company alphabetical listings, or in the product section in which they properly belong. No effort is spared to "organize" ad information.

More advertisers—more information! Never before have so many advertisers served IRE readers with so much information! The advertisers' list this year is truly a "social register" of this great industry.

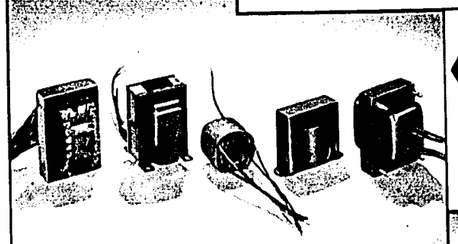
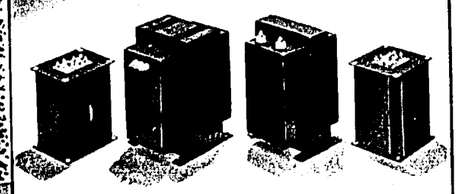
GTC

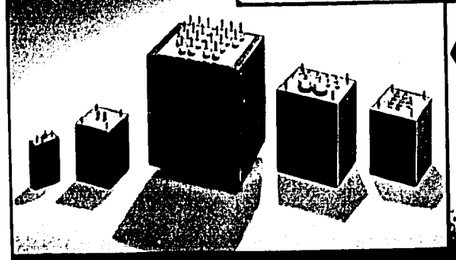


TRANSFORMERS . . .

. . . specified for the usual

. . . demanded for the unusual





"GTC" Transformers for television receiver applications . . . custom-designed for high quality at minimum cost.

"GTC" Transformers for industrial and commercial applications . . . accurately engineered and fully recognized for finest quality.

Manufacturers specify "GTC" . . . for audio uses, communication, radar devices, test equipment, transmitters, and various other electronic-controlled devices.

"GTC" Military Transformers . . . designed to meet rigid government specifications and to perform under the most severe and continuous operating conditions. MIL-T-27 and JAN-T-27.

Skilled engineering techniques make GTC a source for transformers in highly specialized and extremely unusual applications. Utilization of these techniques results in greater dependability, quality and better construction.

Our completely self-contained plant's modern equipment guarantees transformer production in any quantity, to meet your requirements. We welcome your inquiry and will supply production samples where desired.

GTC

GENERAL TRANSFORMER COMPANY

serving industry since 1928

18240 Harwood Avenue, Homewood, Illinois

(Suburb of Chicago)

There are

3 SPECIFIC WAYS

in which "Proceedings of the I.R.E." serves the advertiser differently and more effectively than other publications.

1. Pre-Specification Selling

Because "Proceedings of the I.R.E." publishes basic research and engineering application articles it is closely studied by those design engineers who must "keep ahead of the market." Often, the research published leads the industry production by from two to six years! The alert engineer, who needs this amount of time for his own design applications and for tooling up and changing the production in his own factory, studies the "Proceedings of the I.R.E." carefully. Its articles keep him abreast with the changes that will inevitably come and make it possible for him to be ready for them. This is the time for you to sell the unknown engineer designing the never-dreamed-of product "before it happens!" It is an insurance that you will be ahead of the market instead of behind it.

2. Personal Connection to the Individual

The Institute of Radio Engineers is an engineering society for individual engineers who must qualify on their own education, experience and engineering work. Thus, the magazine follows the reader as his private possession, wherever he goes. Wherever new engineering progress is developing, the work is done by individual engineers—and it is these men that must be sold! Only the engineer knows enough to specify and buy in a highly technical industry. Selling is a matter of reaching the minds of men because *a company cannot sign a purchase order.* Wherever radio engineering activity is the greatest, companies employ IRE members. An engineer moves into a new job in advance of production and with him goes "Proceedings of the I.R.E.," with all the advertising you so urgently need to place where engineering activity is the greatest.

3. Economy

It is a specific purpose of the Institute of Radio Engineers that its advertising rates should benefit and help the industry grow, by being economical. Part of the economy of a tax-free organization is thus passed on to advertisers in the form of low-cost advertising to a high-quality audience. The page rate per thousand engineers of "Proceedings of the I.R.E." is the lowest in the radio-electronic industry by deliberate intent. Thus, the Institute finds an extra way that it can help the firms that hire its engineers to gain new business at lower costs.

IMPROVED MINIATURE PULSE TRANSFORMERS

SURPASSES MIL-T-27 TEST SPECIFICATIONS

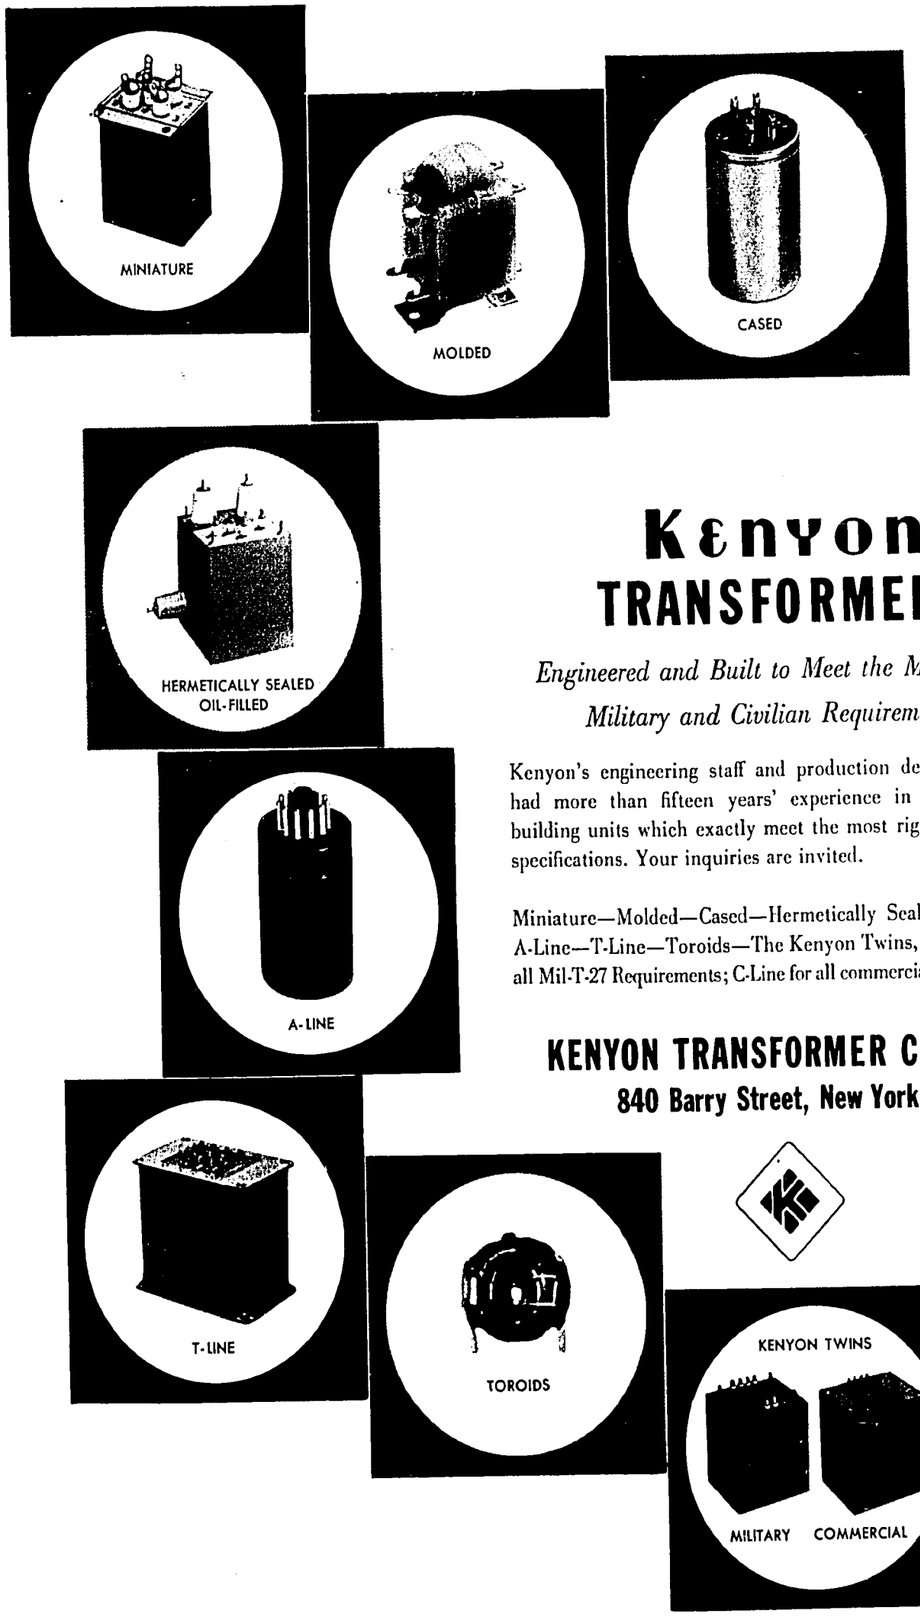
PULSE WIDTHS: from .05 to 20 μsec.

RISE TIMES: from .005 to .025 μsec.

2, 3 or 4 WINDINGS (with or without taps)

TYPICAL SPECIFICATIONS:

Model No.	G.1-11
Pulse Width	.1 microsecond
Rise Time	.005 microsecond
Test Voltage	2000 V RMS
Operating Temp. Range	−70°C to 135°C
Weight	less than .03 ounce
Size	11/32" diameter



Write for complete data: our Data Sheet Series G-1

- Developed for miniaturized electronic equipment.
- Impregnated and imbedded in a special Epoxy resin which will not support combustion.
- Insulation resistance in excess of 1,000 megohms from −70°C to 135°C.
- Highly stable grain-oriented, annealed, silicon steel toroidal cores.
- All leads clearly identified.

All types available on special order for operation to 210°C.

Kenyon TRANSFORMERS

Engineered and Built to Meet the Most Rigid Military and Civilian Requirements

Kenyon's engineering staff and production department have had more than fifteen years' experience in designing and building units which exactly meet the most rigid and unusual specifications. Your inquiries are invited.

Miniature—Molded—Cased—Hermetically Sealed Oil-Filled—A-Line—T-Line—Toroids—The Kenyon Twins, M-Line to meet all Mil-T-27 Requirements; C-Line for all commercial requirements.

MORE FOR YOUR POWER SUPPLY DOLLAR

N. J. ELECTRONICS CORP.
REGULATED POWER SUPPLIES

— meet every need
— fit every budget

STANDARD GRADE

Simple, conservative designs, constructed of high-quality standard components for general shop, bench, experimental use. No frills, no unwanted extras. Eighteen models *start at $48.50!!**

*Model 100R: 200-325 V, 100 ma, reg. 1% 6.3 V, 3 A unreg. Rack mtg.

LABORATORY GRADE

Entirely new standards of performance and service life. All components derated *at least* 30%. All units blower-cooled. *No electrolytics! No carbon resistors! No carbon potentiometers! 10,000 hour tubes!* Unusually high stability, close regulation, low ripple. Built to last a lifetime, intended for research labs, permanent equipment. The ultimate in convenience and flexibility, yet prices *start under $100.00!*

VOLTAGE REGULATING TRANSFORMERS

Patented SOLA Constant Voltage Transformers provide the following advantages: Automatic, instantaneous regulation within ±1% regardless of primary variations of 30%. No moving or expendable parts . . . no manual adjustments or maintenance . . . self-protecting against short circuit . . . available in a complete range of capacities and special types.

Write for Bulletin 1M-CV-200. We welcome any inquiries regarding specific applications to your requirements.

SOLA *Constant Voltage* **TRANSFORMERS**

SOLA ELECTRIC CO.
4633 W. 16th Street, Chicago 50, Illinois

Code number at end of each address refers to product or service sub-classifications listed at the head of the major classification.

ELECTRICALLY

VARI-L VARIABLE INDUCTORS

This line of A-F, R-F, V-H-F Saturable-Core Reactors for Sweep Tuning is growing in all directions:

HIGHER in Power, Frequency, Stability, Efficiency
LOWER in Cost and Space Requirements
WIDER in Range of Usefulness

as the result of continuing emphasis on production engineering and product reliability.

Chances are that, in designing to many special requirements, we have touched on problems similar to yours — and that there may be a Vari-L Inductor to suit your needs. Even if you need something "special," our policy of "Design for Adaptability" has possibly created a Vari-L Inductor that will require only slight modification, at slight cost, to do your job, too. And it costs you nothing to ask. Be sure to give full details.

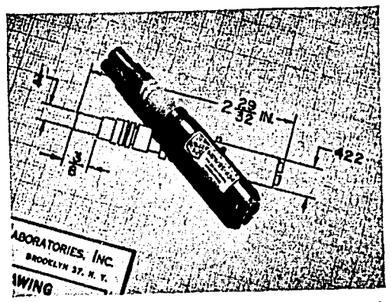
Your Regulated High Voltage Problems can be Economically Solved, Now, by the Originators of the Corona Discharge V-R Tube

ANTON

Typical Rugged AEL Corona Discharge V-R Tubes

FIXED REGULATION



300V to 10,000V

- stabilized voltages
- currents up to 2 milliamperes
- low dynamic resistance
- unlimited life
- size—ranging from sub-miniature T3 bulb to larger volume stainless steel shells

VARIABLE REGULATION

550V to 750V

- Just a turn of a screwdriver makes ±50V adjustment possible
- Stabilized voltage at every point
- Currents up to 50 micro-amperes
- no hot cathodes
- unlimited life

Variable Corona Discharge V-R Tube conceived and developed in its entirety by AEL

ANTON Corona Discharge V-R Tubes
New Freedom for Circuit Designers

TYPICAL APPLICATIONS

- Color TV Receivers and Monitors
- Airborne Radar Power Supplies
- Voltage Reference Tubes
- Cathode Ray Oscilloscopes
- Radiac Power Supplies
- All high voltage low current power supplies

Also available at AEL is a complete line of nucleonic tubes and instruments. We welcome the specifications of your individual requirements.

TRAVELING-WAVE TUBES

Two types of S-Band Traveling-Wave Tubes for instrumentation and systems application as well as general laboratory use.

	HA-1	HA-2
Frequency	2-4 kmc	2-4 kmc
Power	15 mw	1 watt
Gain	40 db	30 db

Similar Huggins Tubes in other frequency ranges are presently in various stages of development, as well as other types about which details cannot be published.

Write for further information on these tubes or concerning your individual requirements. Huggins engineers are prepared to undertake special research and development projects on traveling-wave tubes.

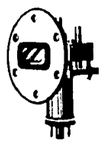
it's VARIAN···
for top performance in every KLYSTRON application



System designers and equipment buyers specify Varian klystrons for optimum performance because they know that **only** Varian klystrons combine extreme ruggedness and reliability with excellent frequency stability and ample power. Designed and built by the acknowledged leader in klystron development, Varian klystrons offer outstanding performance advantages in these and many other applications:

- Microwave relay transmitters and receivers
- Telemetering systems
- UHF television transmitters
- Radar receivers—local oscillators
- Coherent and pulsed radar transmitters
- Guided missile applications
- Microwave test equipment
- Particle accelerators—power tubes

COMPARE THESE FEATURES

FOR RADARS AND BEACONS
Unmatched high altitude performance without pressurization—excellent frequency stability — low noise — rapid warm-up — rugged — reliable.

FOR MICROWAVE RELAY SYSTEMS
Ample power to override noise—excellent frequency stability—economy of operation—long life.

FOR LABORATORY TESTING
Smooth, single-shaft tuning over a wide range—matched waveguide output—excellent microphonic characteristics—linear reflector tracking.

FOR UHF TELEVISION
Integral cavity construction for economical operation and simple installation—wide band-width for color TV—high power gain —long life.

VARIAN HAS A PRODUCTION KLYSTRON . . .
that meets the requirements of these typical applications:

APPLICATION	FREQUENCY RANGE (Megacycles)	POWER RANGE	TUBE TYPES
Radar & Beacon Local Oscillators	8500 — 10,500	25 — 140 mw	V-270,V-290,V-151,V-153,V-155
Radar Transmitters	8500 — 11,000	100 W — 9 KW	V-23, V-63, V-27, V-82, V-45
Beacon Transmitters	9100 — 12,200	450 mw — 9 KW	V-54, V-63, V-27, V-82, V-45
Relay Local Oscillators & Transmitters	5100 — 7500	30 mw — 1 W	X-26B, X-26D, X-26E, X-26F
UHF Television	470 — 890	15 KW	VA-6237, 38, 39, 40, 41 and 42
Laboratory Testing	8200 — 12,400	450 mw — 8 W	X-13, V-21, V-27, V-54, V-58

FOR COMPLETE SPECIFICATIONS
and technical data on these outstanding Varian klystrons, and for information about special purpose klystron engineering—write to the VARIAN Application Engineering Department today.

Information at high speed! "Data the way an engineer thinks" is the key to IRE DIRECTORY classifications. All products are divided into 10 fundamental groups, many of which parallel professional group organization. The grouping plan makes this the fastest working directory you ever used! No components are mixed with test equipment—you turn right to a section where each item belongs.

Yet good engineering detail is maintained. 104 basic classes of products under these ten sectional product directories keep listings from becoming cumbersome, but clearly define products.

Completeness is insured! Most firms make many products in a single classification. Wasteful, eye-confusing relisting of the same firms over and over is quite sensibly solved by using a system of codes under the 104 basic headings which actually provide 608 separate classifications. The result is a more complete picture of each firm's full line, but you travel through fewer listings.

At least one of your interests is now served by one of IRE's 21 Professional Groups

You should join and get these benefits!

Each group publishes its own specialized papers in its *Transactions*, some annually, and some bi-monthly. The larger groups have organized local Chapters, and they also sponsor technical sessions at IRE Conventions.

Aeronautical & Navigational Electronics	Fee $2
Antennas and Propagation	Fee $4
Audio	Fee $2
Broadcast & Television Receivers	Fee $2
Broadcast Transmission Systems	Fee $2
Circuit Theory	Fee $2
Communications Systems	Fee $2
Component Parts	Fee $2
Electron Devices	Fee $2
Electronic Computers	Fee $1
Engineering Management	Fee $2
Industrial Electronics	Fee $2
Information Theory	Fee $1
Instrumentation	Fee $1

Part V INSTRUMENTS & CONTROLS

5. Applications of Electronics
6. Radar, Microwave, UHF Equip.
7. Test & Measuring Equip.

The first few times you use this

EDGE INDEX

follow the "How to use" instructions slowly—ONE STEP AT A TIME.

After that you will be able to open easily and almost instantly to the section or letter that you seek.

HOW TO USE

1. **With the directory open on the desk, bend the book almost double in your left hand, with your thumb just below this line.**
2. **From one-line or two-line symbol adjacent to the letter or subject you seek, run your eye across horizontally to a corresponding page-edge symbol.**
3. **Open there with your right hand.**

IT IS EASIER IF YOU "FAN" OR "RIFFLE" THE LAST FEW PAGES WITH YOUR RIGHT THUMB. THE EDGE INDEXES COVERING THE OTHER DIRECTORIES WILL BE FOUND OPPOSITE PAGES 240, 270, & 476.

For complete list of products and services, arranged alphabetically for fast reference, see the eight-page pink section preceding page 1.

2	PART I COMPLETE DATA SPREADS
131	PART II ALPHABETICAL COMPANY LIST
241	PART III APPARATUS
271	PART IV COMPONENTS
401	PART V INSTRUMENTS & CONTROLS
477	PART VI SERVICES & MATERIALS

99 Oscilloscopes, Cathode-Ray	465
100 Radio-Frequency Test	469
101 Television Test Equip.	475

Classifications with a System!

THE IRE Directory Product Classifications have both a pattern and a purpose. They differ widely from most product indexes, deliberately. They aim to organize the hundreds of products and services of a complex technical industry according to the way engineers think. To this end, the product grouping follows the pattern of the IRE Professional Groups, broadly. The result is a division of all products and services into ten fundamental indexes into which 104 basic classifications have been organized.

YOU will note that we here differ from most directory compilers, for we do not mix meters with motors simply for alphabetical reasons. Products used in "Audio" whether components or complete apparatus form the first fundamental group. Yet, the same manufacturer and product may also appear in the "Component Parts" section. This system gives subject grouping for speed and convenience. A directory should aid a man who has forgotten some detail, or product name. Ours helps by grouping products as one would *think*.

1. **Audio Frequency Equipment** (Products 1 to 11)
2. **Broadcasting Equipment** (Products 12 to 17)
3. **Communications Equipment** (Products 18 to 25)
4. **Component Parts** (Products 26 to 62)
5. **Applications of Electronics** (Products 63 to 70)
6. **Radar, Microwave, UHF** (Products 71 to 74)
7. **Test & Measuring Equipment** (Products 92 to 101)
8. **Services and Materials** (Groups 75 to 91)

   Here we separate the consultant, the fabricating firm, the machine for radio manufacturing, and basic materials from being lost in an alphabetical maze of component and test equipment names.
9. **Education & Publishing** (Groups 102 & 103)
10. **Distribution Functions** (Service 104)

For detailed identification, these 104 products and services, grouped in the 10 indexes, are further defined into over 600 named products. We have tried to avoid oversimplification, and a tremendous amount of information is given by our product number system. But, the basic indexing adds speed. Purely alphabetical directories are as slow and cumbersome as a telephone book. IRE engineers have liked our system better!

For safety, an alphabetical "terminology" index is given, preceding the product system in the pink pages introducing the company index. You will note also that after each firm, its products are listed by number code in the alphabetical list, and that sub-classifications shown by number code in the product indexes give much detail. Just a little study of the system will help you get great good from this book.

The IRE DIRECTORY is 10 Indexes in one book.

1954 I.R.E. DIRECTORY READER SERVICE REPLY CARD

Place a 2¢ stamp on one or more of the perforated cards below, and they will be promptly forwarded to the manufacturers listed on the back. If you prefer to send your specific requirements, a letter would be more advantageous, however be sure to enclose the reply card.

A Directory of

5. Applications of Electronics

Industrial, Medical & Military

8 Major Groups

33 Products

Organized by functions for Engineers

63 Computers & Counters.
- 05 Analog to digital converters
- 10 Computers, analog
- 15 Computers, digital
- 20 Counters, continuous
- 25 Counters, pre-set

64 Electronic Control Equipment.
- 05 Burglar-alarm & protective systems
- 10 Combustion & smoke-nuisance controls
- 15 Electronic controls
- 20 Production control, counting & sorting equipment
- 25 Variable speed controls

65 Geophysical Apparatus.
- 05 Amplifiers
- 10 Complete exploration equipment
- 15 Control equipment
- 20 Microphones
- 25 Recording galvanometers

66 Induction Heating Equipment.
- 05 Brazing, soldering & welding
- 10 Di-electric heating
- 15 Induction heating

67 Medical Equipment.
- 05 Cardiographs
- 10 Diathermy
- 15 Electronic cauterizing
- 20 Electro-encephalographs
- 25 Stimulators

68 Nuclear Equipment.
- 05 Pulse count integrators
- 10 Radiation detectors
- 15 Scalers

69 Servo-Mechanisms.
- 05 Controls
- 10 Gears, gear-trains, etc.
- 15 Servo amplifiers
- 20 Servo motors & generators

70 Telemetering Equipment.
- 05 Data Recorders
- 10 Data storage mechanisms
- 15 FM/FM Modulators

The products and services of the Radio-Electronics industry have been organized into ten basic directories following closely the organization of the IRE Professional Groups. But 104 major product groups are numbered throughout.

Always consult the pink pages at the start of the Directory of firms, for a terminology cross-index, or to find products by name. The pink pages list 608 products by name, as well as under the product groups. Page numbers are given for speed.

ELECTRONIC COUNTERS with PLUG-IN UNITS

TYPE 1011-3

INSTRUMENT	RANGE	ACCURACY
Frequency Counter	0 cps to 100 kc max	1 count per 100,000
Phase Angle Counter	0 second cps to 1000 cps	1 count per 1000 cons
Time Interval Counter	10 us to 100,000 secs	1% microseconds
Universal Time Interval and Frequency Counter	Same as individual Frequency and time counters above. In addition, will count time ratio up to 1 to 1000	

PRICES	
Type 1011	$1295.00
Type 1102	$242.00
Type 1103	$148.00
Type 1104	$198.00
Type 1105	$148.00
Type 1106	$388.00

PHASE MEASURING INSTRUMENTS · 0 CPS TO 500 MC

TYPE	NAME	RANGE	ACCURACY	PRICE
205	Precision Phase Detector	10 kc to 10 mc	0.1 degree	$445.00
105	Phase Meter	10 kc to 5 mcs	0.5 degree	$345.00
213	H.F. Phase Meter	10 kc to 500 mc	5%	$225.00
1011-3	Phase Angle Counter	0 cps to 1 kc	0.5 degree	$850.00

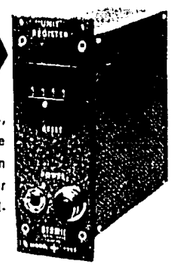
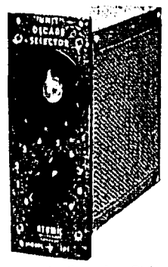
ATOMIC INSTRUMENT CO.

electronic counting and control with unitized construction for versatility

Select the instrument exactly suited to your specific counting and control application. Without high "custom design" costs, without time-consuming modifications, you can choose the right instrument for your operation from the wide variety of plug-in units available. A typical unitized instrument is the Preset Counter (right). Tell us your counting problem! Atomic has over ten "standard" counters, registers, etc. with unitized modifications to suit your needs. Ask for Bulletin G-8 for descriptions.



PRESET COUNTER

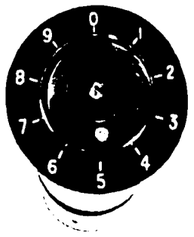


"DUZZENER" for counting in dozen and gross lots

Plug-in units are functional, compact and reliable.

A large variety of counting and control units, each performing a specific function, may be combined into a single instrument or used in units of your own manufacture. Write for details of available strips contained in Bulletin G-8.

Register Strip



Decade Counting Strip

Over 5 years dependable operation

DEKATRON counting tubes for counting, timing and computer circuitry

distributed by Atomic Instrument Co.

Many thousands of Dekatron Counting Tubes have been providing tens of thousands of hours of reliable operation since their introduction over 5 years ago. Type GC10D, 20,000 cps, is the seventh and latest model available.

*Dekatron counting tubes are manufactured by Ericsson Telephones, Ltd., G. B. and distributed exclusively in U.S.A. and Canada by Atomic Instrument Co. Complete stocks are maintained in the U.S. for fast delivery.

Atomic also manufactures a complete line of laboratory instruments for radioactivity detection and measurement. Write for catalog and new supplements.

NEW PRECISION COUNTING SYSTEM FOR HIGH FREQUENCY

DECAVIDER* 10-100

Newly modified DECAVIDER* 10-100 extends to 100 megacycles the counting range of 10MC standard counting equipment. Single knob Decade selector switch and output meter permit instant location of unknown frequency, no auxiliary tuning required. No loss of accuracy, merely add number indicated by DECAVIDER* to number on counter.

Specifications:

Range: 10-100 megacycles.
Used with: Any standard 10MC counter or EPUT meter.
Input: 0.05 to 4.0 volts rms.
Output: 1.0 to 20 volts rms.
Average Gain: 25 db.
Price: $495.00 FOB Caldwell, N.J.
Other DECAVIDERS* for other ranges with 100KC and 1MC counters.
Also available:—
DECALATORS* (Decade-switched crystal-controlled signal generators)
DECASWEEPS* (Decade-switched sweeping oscillators).

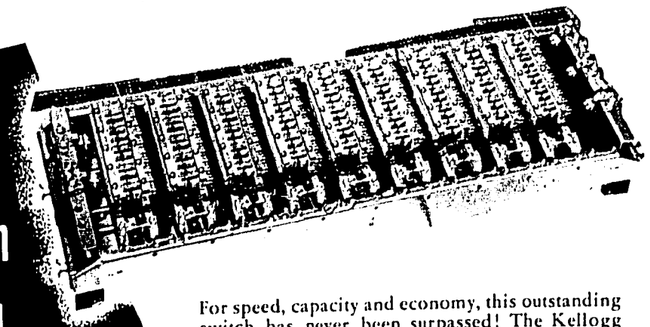
KELLOGG

Magnetic Impulse Counter

Check these features



- ☐ The long life and dependability characteristic of relay equipment.
- ☐ Occupies space of only two telephone relays.
- ☐ Operates over a wide range of pulse ratio and frequency.
- ☐ Replaces a chain of well designed relays at small fraction of cost.

It's new — but already Industry is pouring in orders for Kellogg's unique *Magnetic Impulse Counter!* . . . Why? Because it is simple, it saves space and it has a wide application in many fields. Actuated by electrical impulses, the Kellogg Magnetic Impulse Counter performs the counting and marking function of a chain of from 10 to 20 relays — or of a two-magnet ten-point stepping switch. It does this in less space and with assured reliability! It has many uses — from industrial control, to any system where trains of impulses, such as generated by a telephone dial, are to be counted. Get the facts. Get them now! Find out how the Kellogg Magnetic Impulse Counter can save you money. A request on your letterhead will bring particulars.

KELLOGG

Crossbar Switch

for Automatic Control Systems and Computers

For speed, capacity and economy, this outstanding switch has never been surpassed! The Kellogg *Crossbar Switch* operates completely in one movement—provides the fast, low-cost means of interconnecting or selecting many different circuits. Connects any 3 of 60 circuits to any of 75—or chooses 1 circuit from as many as 936. Palladium contact points insure utmost signal fidelity and prevent corrosion. Mounted for drawer-like removal from its rack.

- Exceptionally Fast Operation!
- Many Circuit Applications!
- Thoroughly Proved Performance!
- Built To Last, Designed To Grow!

There are

3 SPECIFIC WAYS

in which "Proceedings of the I.R.E." serves the advertiser differently and more effectively than other publications.

1. Pre-Specification Selling

Because "Proceedings of the I.R.E." publishes basic research and engineering application articles it is closely studied by those design engineers who must "keep ahead of the market." Often, the research published leads the industry production by from two to six years! The alert engineer, who needs this amount of time for his own design applications and for tooling up and changing the production in his own factory, studies the "Proceedings of the I.R.E." carefully. Its articles keep him abreast with the changes that will inevitably come and make it possible for him to be ready for them. This is the time for you to sell the unknown engineer designing the never dreamed of product "before it happens!" It is an insurance that you will be ahead of the market instead of behind it.

2. Personal Connection to the Individual

The Institute of Radio Engineers is an engineering society for individual engineers who must qualify on their own education, experience and engineering work. Thus, the magazine follows the leader as his private possession, wherever he goes. Wherever new engineering progress is developing, the work is done by individual engineers—and it is these men that must be sold! Only the engineer knows enough to specify and buy in a highly technical industry. Selling is a matter of reaching the minds of men because a *company cannot sign a purchase order.* Wherever radio engineering activity is the greatest, companies employ IRE members. An engineer moves into a new job in advance of production and with him goes "Proceedings of the I.R.E." with all the advertising you so urgently need to place where engineering activity is the greatest.

3. Economy

It is a specific purpose of the Institute of Radio Engineers that its advertising rates should benefit and help the industry grow, by being economical. Part of the economy of a tax free organization is thus passed on to advertisers in the form of low-cost advertising to a high quality audience. The page rate per thousand engineers of "Proceedings of the I.R.E." is the lowest in the radio-electronic industry by deliberate intent. Thus, the Institute finds an extra way that it can help the firms that hire its engineers to gain new business at lower costs.

REEVES INSTRUMENT CORPORATION • 215 EAST 91st ST., NEW YORK 28, N.Y.

NEW ANALOG COMPUTER PACKAGING CONCEPT PERMITS MAXIMUM COMPONENT SELECTION

400 Series REAC Expansion Consoles Combine Adaptability with Economy

Diode Function Generator, Diode Multiplier Recorder, Servo Voltmeter added to REAC Line

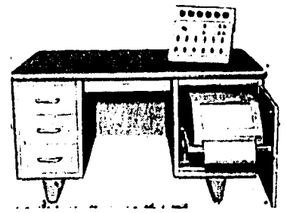
The Reeves Instrument Corporation assures its position of leadership in the field of analog computing equipment with the introduction of a new packaging concept, the Expansion Console of the Series 400 REAC. This year, Reeves also announces the addition of an all-electronic diode function generator, a square-law diode multiplier, a desk-mounted recorder and a servo voltmeter to its line of quality computing equipment. These units exemplify the high standards of accuracy, flexibility and adaptability which have already earned REAC equipment such a fine reputation.

The modular construction of the 400 Series REAC allows the types and quantities of components to be chosen so as to satisfy individual requirements. Not only is the initial size of the console variable but later expansion may be effected with great economy.

The new 400 Series REAC, shown above, represents an entirely new analog computer packaging concept which allows greater freedom in the choice of components and makes expansion more economical.

MINIATURE FLOATED GYROS CONTROL, MEASURE MOTION

Reeves Instrument Corporation, long a quantity manufacturer of quality HIGG floated gyros, is now offering three miniature floated sensing devices of great accuracy, the 20 IG Integrating Gyro, the 20 RG Rate Gyro and the 20 A Pendulous Accelerometer. Because the output gimbal of each of these devices is supported by the buoyancy of a fluid of its own density, friction is negligible. Thus accuracy is comparable to that of much larger units.



Although rugged enough to withstand government high-impact shock and vibration tests, each of the units weighs only about one pound and is only two inches in diameter.

The integrating gyro is used to cause a structure to move at any commanded rate with respect to inertial space or in any system in which varying rates of rotation about a given axis must be mechanically integrated. It may also be used to stabilize the structure on which it is mounted with respect to inertial space and about a given input axis.

The rate gyro may be used in any system where the rate of rotation about a given axis must be measured.

The accelerometer may be used in any system where the linear acceleration in inertial space along a given axis must be measured.

Reeves also produces a variety of precision floated gyros of other sizes.

Six Channel Recorder

PRECISION INDUCTION RESOLVERS USEFUL FOR MANY APPLICATIONS

Reeves precision induction resolvers are employed as basic elements in analog computers, automatic control systems, angle data transmission systems and plan position indicating radars.

Miniature resolvers (equivalent to Navy frame size 15) are available for applications where compactness is essential. Standard resolvers (equivalent to Navy frame size 23) may also be ordered.

Standard production models of Reeves resolvers compute the sine of an angle with an accuracy of better than five parts in ten thousand and with an angular error of less than two minutes.

Reeves resolvers are described in detail in RICO Bulletin #57.

DIODE AUXILIARY UNITS

Among the nonlinear computing components which may be housed in the 400 Series REAC are the new diode function generator and diode multiplier. Both of these units are capable of high speed real time operation and neither employs any complicated circuit configurations requiring servicing by specialized personnel or involving high replacement costs. The function generator is capable of generating a function of two variables.

Both the multiplier and the function generator are available as separate four channel units with built-in power supplies.

SERVO VOLTMETER

A convenient accurate readout device which may be ordered either as a part of a 400 Series Console or as a separate unit is the Servo Voltmeter. The standard unit is provided with 100-volt and 200-volt scales. Accuracy is 0.025%, while the dial reads directly to 0.01 volt.

SIX CHANNEL RECORDER

A new six channel recorder featuring automatic cycling may be ordered desk mounted, caster mounted or installed in a 400 Series Console. The automatic cycling provides sensitivity and offset traces prior to a run. From them, personnel studying the recording later will know immediately at what deflection sensitivity each of the channels was operated and what offset voltage, if any, was introduced to each channel.

OTHER REAC MODELS

In addition to the 400 Series, Reeves offers a wide variety of computer models. The desk-top 300 Series is ideal for small laboratories and for "on location" work. The 200 Series features single cabinets housing built-in power supplies, computing amplifiers and servos.

PROJECT CYCLONE

The REAC line of commercial computing equipment is the outgrowth of simulator development work done under contract to the Navy. Reeves is currently operating Project Cyclone, under the cognizance of the Bureau of Aeronautics. This activity, which is one of the largest analog computer installations in the world, uses essentially commercial REAC

STANDARD, MINIATURE BREADBOARD INSTRUMENTATION PARTS ECONOMICAL FOR BUILDING EXPERIMENTAL SERVOS, COMPUTERS

Reeves manufactures a complete line of precision breadboard parts for economical construction of experimental servos and computers. The line includes precision gears, component hangars, slotted mounting plates, etc. The use of these unique precision mechanical systems for building experimental models completely eliminates drafting and machine shop time and permits models to be modified quickly and inexpensively. Catalog RICO #10 gives a complete listing of standard (¼" shaft) and miniature (⅛" shaft) sizes. The latter are ideal for applications where small size and light weight are important factors.

New Electro Proximity Pick-up System

Actuates Electronic or Electro-Mechanical Devices for counting parts, indicating position and distance, detecting presence of metallic mass, sequence timing, limiting control. Operates from 0 to over 12,000 times a minute at distances up to ¾".

Produces Constant Electrical Output in Excess of 5 Volts when any metallic mass approaches the pick-up. Output voltage is independent of the speed or proximity of the actuating mass and remains constant while near the pick-up and drops to 0 when removed. $66.50 complete. **Special Types** for extended range and size.

Electro Magnetic Pick-up

Indicates Without Mechanical Contact RPM rate of speed or motion. For acceleration and velocity studies, precision ignition timing, ballistic research, many others.

Produces Variable Electrical Output in proportion to any magnetic object's rate of speed. It can be actuated by displacement or vibration of magnetic material in the field of the pick-up, such as a keyway in a shaft, gear tooth, pin or slot in the moving part. $22.50 less mating connector. **Special Types** for high temperature and deep space. Available with AN type connectors.

New Electro Miniature Magnetic Pick-up

For Small Space and Light Weight Applications. Controls electrically operated devices, rockets, guided missiles, etc. For mechanical or electrical counting. Indicates rate of travel, angular or linear speed, vibration. Similar performance characteristics to "3010-A" with 25% voltage output. $16.50 complete.

MEASURE STATIC OR DYNAMIC DISPLACEMENT

Electro Dynamic Micrometer Measures Without Mechanical Contact vibration in heat exchangers, motors, shaft whip, radial expansion due to high RPM, rate of acceleration, valve travel. Independent of acceleration or frequency of displacement.

IRE provides all THREE

"Proceedings of the I.R.E."

puts your product promotion monthly before the "thinking and doing" engineers in the fabulous, fast-moving radio-electronic industry. Circulation 38,945 (ABC).

Founded in 1913, "Proceedings of the I.R.E." is the authoritative work-book of America's fastest expanding industry. In it, electronic advances, years ahead of the times, are published every month, thus keeping engineers up to the moment on all that is new in engineering research and application. Its advertising is a constant product parade of the best this industry manufactures. A vital service to all men who specify and buy, it is a proved vehicle for your consistent product promotion—*with prestige!*

IRE DIRECTORY

provides 35,000 IRE members educated to buy and specify with your detailed product data for ready reference all year long.

The IRE DIRECTORY is their working encyclopedia . . . it organizes, codes, simplifies and "indexes for use" a vast and complex industry. They look to its listing of men, firms and products as vital working information. Wherever you find IRE members, you'll find IRE DIRECTORIES close at hand for ready reference. The cost of keeping your product story before 35,000 engineers is less than you'd expect. The price of one page is less than one-half the three cents postage required to mail 35,000 letters.

RADIO ENGINEERING SHOW

. . . the eye-opening event of each radio-electronic year . . . where over 40,000 engineers come to you for all that's new.

Bringing buyers and sellers face to face to discuss engineering needs and product performance is one of IRE's great services to an industry where understanding is the key to progress. The Radio Engineering Show completes with actual product presentation the balanced promotion package of "Proceedings of the I.R.E." for product promotion and the Radio Engineers Directory for product reference.

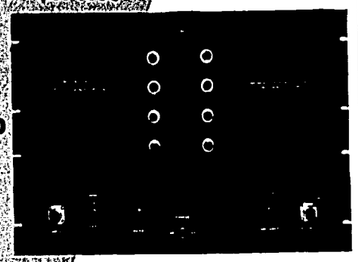
10mc EPIC SCALERS
0.1 MICROSECOND RESOLUTION



Other EPIC products available are—

- DECADE AND BINARY SCALING STRIPS (100 KC - 10MC)
- COUNTING AND TIMING EQUIPMENT
- CUSTOM DESIGN OF COUNTING SYSTEMS

Write for Details

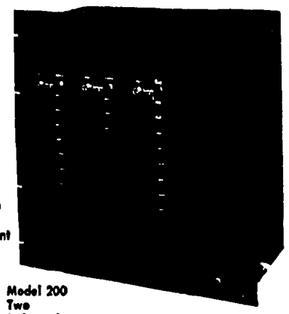
10mc BINARY SCALER MODEL 410 $575.00

10mc DECADE SCALER MODEL 412 $695.00

FEATURES:

Resolving Time: 0.1 usec
Maximum Acceptable Uniform Rate: 10 mc or 10⁷ counts/sec.

POWER SUPPLY: Electronically regulated.

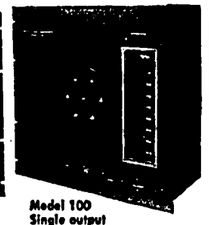


SCALE FACTOR: Model 410: BINARY Scale of 128. Model 412: Decade Scale of 100. Others: Upon request.

SIZE: Standard 19" rack mount. Modifications available to your specifications.

We will add any number of slow scaling stages and a register timer, etc., to suit your requirements.

APPLICATIONS:
Fast Nuclear Counting
High Frequency Measurements
Time Interval Measurements
Computer and pulse control work.
Extending other counter ranges.



SQUARE PULSE GENERATORS
MILLIMICROSECOND TO MICROSECOND RANGE

Model 300 Three Independent outputs $575.00

Model 200 Two Independent outputs $495.00

Model 100 Single output $395.00

New Basic Test instruments for NUCLEAR, RADAR, TV, UHF and other fields employing FAST PULSE CIRCUITS

FEATURES:

Pulse Shape: Square.

Rise Time: One millimicrosecond 10% to 90% Amplitude.

Pulse Width: One millimicrosecond to several microseconds.

Pulse Amplitudes: 100 volts to 0.006 volts in one db fixed steps using precision RF attenuators. Higher and lower voltages also available.

Output Impedance: Matched to any impedance for standard coaxial lines. Multi-impedance outputs also available.

Push-to-push button for single pulse operation. Internal regulated power supply, and standard 19" rack mount or portable cases as desired. Also available modified to your specifications.

Code number at end of each address refers to product or service sub-classifications listed at the head of the major classification.

Kearfott

SINCE 1917

PRECISION COMPONENTS IN PRODUCTION

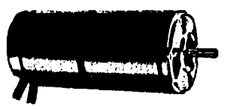
(shown ⅛ size)

GYROS

3 Gyro Platforms, Floated Rate Integrating Gyros, Vertical, Free, Directional, Rate Gyros and Gyro operated Rate Switches—compact, lightweight, hermetically sealed.

(shown ¼ size)

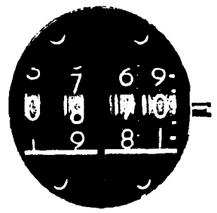
SYNCHROS



Transmitters, Control Transformers, Resolvers, Repeaters, and Differentials in Bu Ord Sizes 15, 11 and 8. High accuracy and environmental resistance.

(shown ¼ size)

ELECTRONICS



Miniature and subminiature Servo Amplifiers and Magnetic Amplifiers "potted" for convenience of installation and long life.

(shown ½ size)

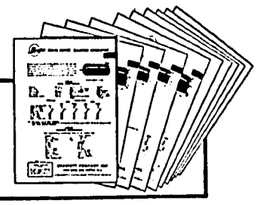
SERVO MOTORS

High torque, low inertia Servo Motors, Servo Motor-Generators, Inertial and Viscous damped Servo Motors 31-32" to 1¾" Diameter.

(shown full size)

MECHANICAL DEVICES

Counters, Electro-Mechanical Computers, Hermetic Rotary Seals, Aircraft Instruments and High Temperature Resistant, Chemically Inert, Machinable Ceramics.



SYSTEMS

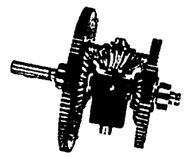
Aircraft Navigational Systems

Industrial Servo Systems

Servo Analog-to-Digital, Digital-to-Analog Converters

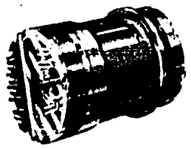
Electro-Hydraulic Servo Systems

Bulletin giving physical and technical data on the various Kearfott Products will be sent on request. The Kearfott organization is available to assist in the development and manufacture of other precision components you may require.



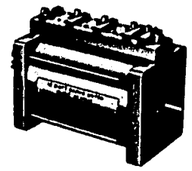
KEARFOTT COMPANY, INC., LITTLE FALLS, N. J.

Sales and Engineering Offices: 1378 Main Avenue, Clifton, N. J. West Coast Office: 253 N. Vinedo Avenue, Pasadena, Calif.
South Central Office: 6115 Denton Drive, Dallas, Texas Mid West Office: 188 W. Randolph Street, Chicago, Ill.

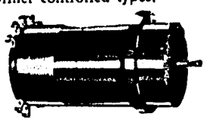


A GENERAL PRECISION EQUIPMENT CORPORATION SUBSIDIARY

FORD INSTRUMENT COMPONENTS



Ford Instrument Company makes the finest precision instruments and mechanisms for industry and the armed forces.



FORD MECHANICAL DIFFERENTIALS with single spider gear—available in 3/16," 1/4" and 5/16" shaft diameters—high accuracy, low friction.

FORD TELESYN UNITS are available in wide selection of sizes—proved precision accuracy, corrosion and fungus resistance mean better synchros when you specify Telesyn.

FORD SERVO MOTORS (60 and 400 cycles) for extremely low inertia and high frequency response. 1/5; ½; 1½; 2½; 5; 10-watt models in both low and high voltage, including magnetic amplifier controlled types.

FORD ELECTRICAL RESOLVERS available in sizes 23 and 31—interchangeability, temperature compensation −60°F to +160°F, highest accuracy, adaptability, 400 cycle frequency.

We have or are preparing literature on various components which Ford Instrument Company makes. Perhaps you would want to write in for some of our brochures on the instruments above or:

Mechanical Integrators
Magnetic Clutches and Brakes
Precision Cams • Rate Generators

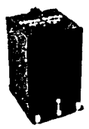
PACKAGED ELECTRONIC COMPONENTS

for design and production

ECONOMY



Servomechanisms, Inc., pioneers in the "packaged function" technique, offers the economy-minded designer and manufacturer of electronic and electromechanical control systems, outstanding savings in development and production costs through the use of plug-in electronic components. These standard plug-in components may be used immediately in the laboratory breadboard stage or in quantity production, thus relieving the user of design and production problems and reducing the electronic plug-in components to a purchased parts status. This advanced design philosophy provides a new standard of ***reliability, interchangeability,*** and ***ease of maintenance.*** Servomechanisms, Inc., facilities are available for the development and production of special "packaged electronic functions" and complete systems.

Classifications with a System!

THE IRE Directory Product Classifications have both a pattern and a purpose. They differ widely from most product indexes, deliberately. They aim to organize the hundreds of products and services of a complex technical industry according to the way engineers think. To this end, the product grouping follows the pattern of the IRE Professional Groups, broadly. The result is a division of all products and services into ten fundamental indexes into which 104 basic classifications have been organized.

For detailed identification, these 104 products and services, grouped in the 10 indexes, are further defined into 608 named products. We have tried to avoid oversimplification, and a tremendous amount of information is given by our product number system. But, the basic indexing adds speed. Purely alphabetical directories are as slow and cumbersome as a telephone book. IRE engineers have liked our system better!

You will note that we here differ from most directory compilers, for we do not mix meters with motors simply for alphabetical reasons. Products used in "Audio" whether components or complete apparatus form the first fundamental group. Yet, the same manufacturer and product may also appear in the "Component Parts" section. This system gives subject grouping for speed and convenience. A directory should aid a man who has forgotten some detail, or product name. Ours helps by grouping products as one would *think*.

For safety, an alphabetical "terminology" index is given, preceding the product system in the pink pages introducing the company index. You will note also that after each firm, its products are listed by number code in the alphabetical list, and that sub-classifications shown by number code in the product indexes give much detail. Just a little study of the system will help you get great good from this book.

The IRE DIRECTORY is 10 Indexes in one book.

Original antenna system specially produced for the Military

A MAJOR ANDREW ENGINEERING-PRODUCTION ACHIEVEMENT.

Only one of many proofs-in-use that Andrew is thoroughly qualified to take on your major *antenna* design-production projects.

Only Andrew offers you such extensive facilities exclusively devoted to the design and manufacture of complete antenna systems for communications including Andrew designed and produced flexible and semi-flexible coaxial cables and rigid transmission lines.

For AN/TRC-29 Military Microwave system: an 8' aluminum mesh parabolic antenna unique for its bandwidth, 1700-2400 MC. Very low V.S.W.R.

A Directory of

6. Radar, Microwave, UHF Equipment

4 Major Groups

19 Products

Organized by functions for Engineers

The Ultra-Highs have brought into being a set of equipment, mostly used for military purposes. In this particular directory we list both equipment and components which belong specially to this area of the spectrum.

Of all our groups, this one promises to expand the most in the future. The reader is also referred to basic groups 2, 3, & 5.

71 Antennas.
- 05 Feed systems
- 10 Receiving
- 15 Reflectors
- 20 Rotating mechanisms
- 25 Transmitting

72 Receivers.
- 05 Microwave relay
- 10 Position indicators
- 15 Radar

73 Transmitters.
- 05 Microwave
- 10 Microwave relay
- 15 Radar

74 Waveguides & Accessories.
- 05 Couplings
- 10 Flexible waveguides
- 15 Hybrid junctions
- 20 Microwave attenuators
- 25 Rigid waveguides
- 30 Sampling lines, reflectors, etc.
- 35 Switches
- 40 Transmission lines

The products and services of the Radio-Electronics industry have been organized into ten basic directories following closely the organization of the IRE Professional Groups. But 104 major product groups are numbered throughout.

Always consult the pink pages at the start of the Directory of firms, for a terminology cross-index, or to find products by name. The pink pages list 608 products by name, as well as under the product groups. Page numbers are given for speed.

GABRIEL

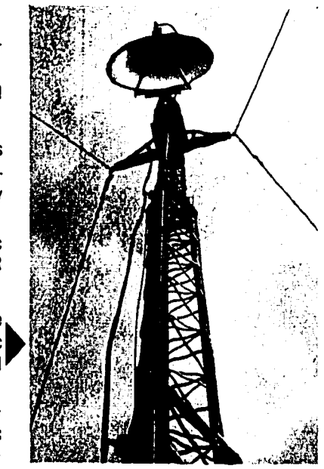
integrated research through production 33,000 mc 25 mc = ADVANCED ANTENNA PERFORMANCE

From Gabriel's *integrated* facilities for development and production came the unsurpassed antenna performance shown here . . .

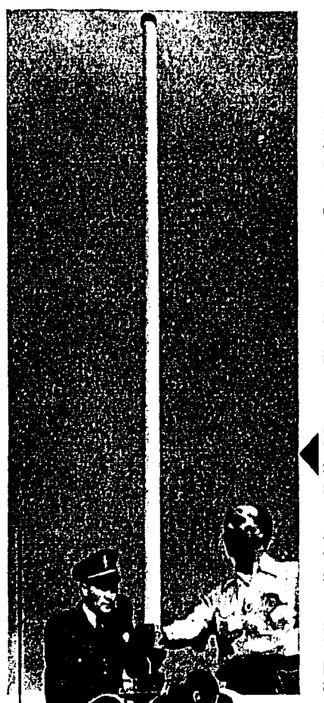
Gabriel *integrates* its antenna specifications with your system requirements. Ask a Gabriel Field Consultant for recommendations.

GABRIEL MICROWAVE ANTENNA

Field proved the world over, Gabriel Parabolics are produced for commercial, industrial, and military frequencies.



Request Catalog EMP for complete specifications in these and other frequencies.

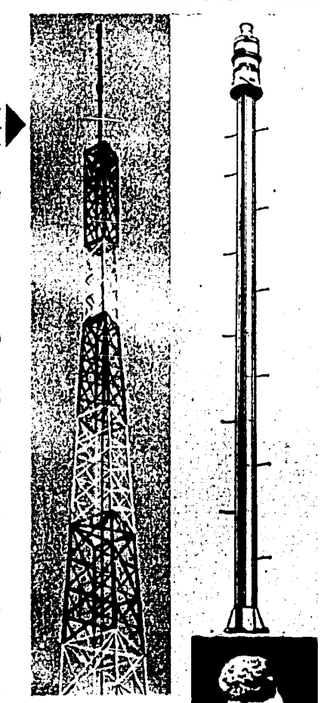


7000 mc. — 7000 mc. Railroad Microwave System Operates in mid-west weather conditions ranging from —27° to 110°F — and often mounted where difficult access makes reliability critical. Photo courtesy of Philco.

Important features are COMPLETE COVERAGE — 5925-7425 mc · HIGH GAIN — to 42.5 db over isotropic source · LOW VSWR — 1.13 max. · LOW SIDELOBES — better than 22 db down.

2000 mc. — 2000 mc. NATO Mobile Military Microwave Relay 24-channel communication relay using Gabriel 2000 mc offset feed antenna. Broadband characteristics of Horn Feed cover entire 2000 mc band.

Important specifications are HIGH GAIN — better than 30 db over isotropic source · LOW VSWR — 1.2 max. over 1750-1990 mc band · BEAMWIDTH — H plane 6°, E plane 5.7° · LOW SIDELOBES — better than 23 db down.



GABRIEL HIGH GAIN UHF-TV BROADCAST ANTENNA

From station after station, in metropolitan and smaller communities, come verified reports of increased signal coverage — at relatively low cost — with Gabriel's radically new transmitting antenna.

Request 24-page Report ETV for complete performance characteristics.

Important features are: HIGH GAIN — 25 and 14 power gain models available · IDEAL VERTICAL PATTERN — Cosecant squared radiation pattern for uniform field strength · SHAPED HORIZONTAL PATTERN — Omni-directional or cardioid as site requires · NULL FILL-IN — standard on all models · TROUBLE-FREE — mechanical design with greater strength, no de-icing, no insulator except as seal · ELECTRICAL BEAM TILT .7° if desired.

GABRIEL COMMUNICATIONS ANTENNAS

A complete line for wide-range dependable mobile communications for increased signal power with wider coverage at great savings over cost of high power station and mobile transmitters. Request 24-page Catalog EMC.

HIGH GAIN BEACON ANTENNAS — Gabriel HW series covers 450-470, 144-174, 108-144 mc bands. Gain up to 6.5 db over ½ wave dipole, with equal power radiation in all horizontal directions and low VSWR.

MOBILE ANTENNAS — Gabriel's complete line with bases, springs, and rods, meets every mobile communications need. Typical models are famous "disguise" Model SPPB-71 for all police frequencies; Model SPP-3 series of swivel-base, spring, and whip antennas; Model SPP-18 roof-top model for 140-165 mc.

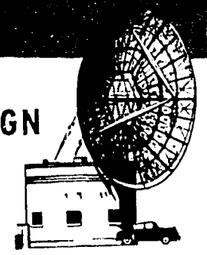
(Continued on page 424)

Information at high speed! "Data the way an engineer thinks" is the key to IRE DIRECTORY classifications. All products are divided into 10 fundamental groups, many of which parallel professional group organization. The grouping plan makes this the fastest working directory you ever used! No components are mixed with test equipment—you turn right to a section where each item belongs.

Yet good engineering detail is maintained. 104 basic classes of products under these ten sectional product directories keep listings from becoming cumbersome, but clearly define products. Overlapping listings are skillfully eliminated. Simplicity makes this book easy to work with—insures faster finding of facts when forgotten. Thus the faults of terminology listings are avoided.



Completeness is insured! Most firms make many products in a single classification. Wasteful, eye-confusing relisting of the same firms over and over is quite sensibly solved by using a system of codes under the 104 basic headings which actually provide 608 separate classifications. A more complete picture of what each firm's full line is results, but you travel through fewer listings. The "Copp Principle" of Directory indexing makes these lists wide, well marked highways to information—fast.

3000 Firms listed. The alphabetical directory gives a clear definition of these firms by showing any or all of the ten fundamental groups in which these firms belong after every name.

Ads positioned with reason! In a DIRECTORY where ads play an important part in supplying information the user wants and needs, it makes good sense to cross-reference every advertiser in each listing so that the user can quickly find more detail. Ads are also placed facing company alphabetical listings, or in the product section in which they properly belong. No effort is spared to "organize" ad information.

More advertisers—more information! Never before have so many advertisers served IRE readers with so much information! The advertisers' list this year is truly a "social register" of this great industry.

Code number at end of each address refers to product or service sub-classifications listed at the head of the major classification.

for MICROWAVE...
for TV...
it's— pdc

MICROWAVE

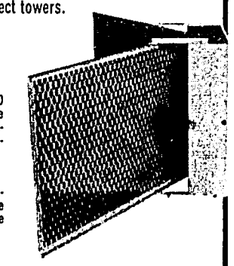
COAXIAL TRANSMISSION LINES

⅞" 50 OHM—1⅝" 50 OHM

Ideal for applications to 3000 mc, without regard to frequency. Furnished with RETMA flanges, which feature locating pins and anchor insulator connectors for positive concentricity between sections. Can be supplied with PDC "Air-lite" couplings for rapid, leak proof assembly in the field. Proved in use in many critical applications. More in use than all other types combined.

TOWERS

Prodelin all-aluminum guyed towers are available, in 10-foot increments, to a height of 200 feet. They can be raised or dismantled by 3 men in a half day, without special tools or footings. No wrenches, nuts or bolts required to erect towers.



ANTENNAS

Cavity-Fed Corner Reflector →

All-aluminum, high gain, from 890 to 2700 mcs. Ideal for short distances, as in local "side hops." Lightweight. Low wind resistance, facilitating pole mounting. Inexpensive. (See illustration right.)

← 2000 MC. Horn

All-aluminum, 20 db antenna for 2000 mc microwave communication. Low cost. Replaces more expensive parabolic antennas for short-distance transmission. (See illustration left.)

Parabolic. High gain, center and offset fed, from 890 to 2700 mcs. Spun or mesh aluminum. Superior electrical and mechanical performance. Many features incorporated as a result of years of actual experience and user case histories.

TV BROADCAST

COAXIAL TRANSMISSION LINES

51.5 and 50 ohm teflon and steatite insulated transmission lines and components provide very low attenuation, low VSWR, and flat impedance systems. Nominal 51.5 ohm lines are currently supplied in both teflon and steatite. Teflon lines are available with either RETMA flanges or PDC "Air-lite" couplings at no additional cost. 6⅛" teflon lines are supplied only with RETMA flanges; steatite insulated lines with RMA.

UHF-TV WAVEGUIDE

Prodelin is first choice in UHF-TV installations using waveguide. Prodelin pioneered in commercial TV waveguide proving exceedingly efficient over a long term of service in many installations. Special sexed flanges, which allow for expansion, permit rigid hanging direct to the tower members. This also eliminates the 24 bolts previously required and reduces installation time more than 50%.

UHF "TELEPLEXER"

The Prodelin "teleplexer" consists of a vestigial sideband filter and a diplexer. It combines the output of the aural and visual transmitters, rejecting and absorbing the unwanted portions of the signal. The resultant signal is fed to a single transmission line. The "teleplexer" is designed for inexpensive conversion to 50 KW operation.

STRENGTH

Mecatorn yields almost perfectly uniform wall thickness with a minimum of stock reduction. Current bead-design developments may even increase rigidity against wind and ice loads.

SIZE

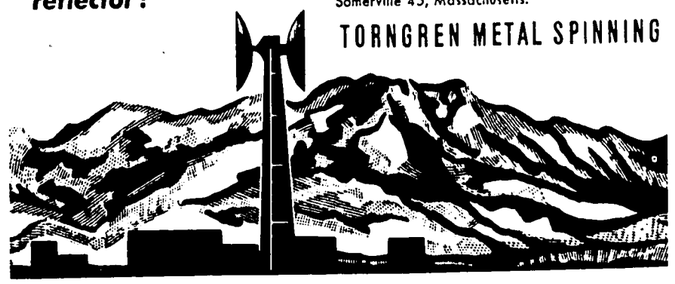
We fabricate 2' — 8' reflectors in production and 10' diameters regularly with a maximum,— currently—of 12'. Our drawing boards are now occupied with plans to manufacture up to 16' diameters.

WAVE INTENSITY

Uniform hydraulic pressures exerted by Mecatorn yield minimum surface irregularity. Higher reflectivity becomes more important as frequencies increase.

what do you require from a parabolic reflector?

PARALLEL WAVE PROPAGATION



The parabolic equation, $Z^2 + Y^2 = 4ax$, can be held to ±.030" by Mecatorn in the largest diameters, even closer as size decreases.

COST

Hydraulic Mecatorns, being semi-automatic, spin more accurately, faster than the usual hand methods—and novel, low-cost tooling methods make it the least expensive process. Torngren backs this up with the East's most complete spinning facilities and engineering service.

New data sheets C7, C8 cover radome, shield and other information, free on request to C. W. Torngren Co., Inc., 236 Pearl Street, Somerville 45, Massachusetts.

IRE provides all THREE

"Proceedings of the I.R.E."

puts your product promotion monthly before the "thinking and doing" engineers in the fabulous, fast-moving radio-electronic industry. Circulation 38,945 (ABC).

Founded in 1913, "Proceedings of the I.R.E." is the authoritative work-book of America's fastest expanding industry. In it, electronic advances, years ahead of the times, are published every month, thus keeping engineers up to the moment on all that is new in engineering research and application. Its advertising is a constant product parade of the best this industry manufactures. A vital service to all men who specify and buy, it is a proved vehicle for your consistent product promotion—*with prestige!*

IRE DIRECTORY

provides 35,000 IRE members educated to buy and specify with your detailed product data for ready reference all year long.

The IRE DIRECTORY is their working encyclopedia . . . it organizes, codes, simplifies and "indexes for use" a vast and complex industry. They look to its listing of men, firms and products as vital working information. Wherever you find IRE members, you'll find IRE DIRECTORIES close at hand for ready reference. The cost of keeping your product story before 35,000 engineers is less than you'd expect. The price of one page is less than one-half the three cents postage required to mail 35,000 letters.

RADIO ENGINEERING SHOW

. . . the eye-opening event of each radio-electronic year . . . where over 40,000 engineers come to you for all that's new.

Bringing buyers and sellers face to face to discuss engineering needs and product performance is one of IRE's great services to an industry where understanding is the key to progress. The Radio Engineering Show completes with actual product presentation the balanced promotion package of "Proceedings of the I.R.E." for product promotion and the Radio Engineers Directory for product reference.

SUPPOSE YOU DREAMED UP ONE LIKE THIS?

It does happen, you know... an inspired twist, a new application... a microwave component that seems impossible to produce.

Yet, so many fine ideas lie dormant... never leave the design board for want of production know-how, like the microwave assembly below. Luckily, in this case, the illustration is only an artist's conception. But suppose you dreamed it up and it had to be produced, with all its complicated bends, exacting tolerances, specialized finishes.

That's where the many years of unique production experience and the unusual facilities of Budd Stanley could help you in so many ways.

For we at Budd Stanley are manufacturing specialists in microwave components only. We constantly tackle the seemingly impossible design and engineer new production methods of our own to accomplish its manufacture... exactly as you specified it.

So, if you are designing or wish to specify a component that seems difficult to produce ... write, phone or wire us. We'll be glad to lend our know-how to your problem.

BUDD · STANLEY CO. INC. *43-01 22nd Street • Long Island City 1, N.Y.*

Tel. STillwell 6-1706

Cable address: "BUDDSTAN"

specialists in microwave application

for SPECIFIC microwave information on "new" components or "standard" plumbing

If you use microwave components ... you can benefit from Airtron's broad range of engineering experience in designing and producing both advanced and so-called "standard" plumbing. For specific, helpful information ... prepared *by* and *for* engineers ... merely fill in the obligation free coupon below and send it to us.

BRANCHING AND BALANCED DUPLEXERS
Standard and special duplexers from 6.66 x 3.41 to 360 x 220 O. D. Power performance and packaging to meet your applications. *Bulletin T-2200*

DIRECTIONAL COUPLERS
4 basic types in all waveguide sizes from 6.66 x 3.41 to .360 x .220 O. D. Broadband couplings and directivities to meet your needs. *Bulletin T-2400.*

BALANCED MIXERS
Mixers with waveguide crystal mounts or coaxial crystal mounts covering a frequency range from 400 to 40,000 megacycles. Standardized and special types. *Bulletin T-2600*

AIRTRON PRECISION CASTING FACILITIES
Precision castings, holding tolerances of ±.002" per inch of dimension, economically made to your own specifications. *Bulletin 6002.*

FLEXIBLE WAVEGUIDE
Available in all sizes for high power pressurized applications over wide temperature ranges. Seamless, twistable, preformed and circular. Special waveguides to meet specific problems. *Cat. 1011*

TWO-POSITION WAVEGUIDE SWITCHES
For rapid and/or cyclic switching to or from noise sources, signal generators, dummy loads, etc. Low VSWR, excellent crosstalk and high peak power performance. *Cat. 2331.*

SHORT SLOT HYBRIDS
Precision cast one piece hybrids. Low VSWR, excellent isolation and low attenuation over broad bandwidths. Used in balanced mixers, duplexers, power splitters. *Cat. 2361*

K-BAND TEST HORNS
For test purposes over the frequency range from 12,400 to 40,000 mc. One piece aluminum castings to close tolerances. Low VSWR. Low secondary lobes. *Cat. 3291.*

WAVEGUIDE MAGIC TEES
Hybrid junctions for power splitting with minimum energy loss. From 1.00 x 1.50 to all smaller standard and military sizes. Low VSWR and excellent broad band isolation. *Cat. 3330*

OTHER AIRTRON PRODUCTS

Folded Hybrids • Quick Disconnects • VSWR Standards • High Power Dummy Loads • Antenna Horns • Waveguide Bends, Twists, Elbows and Transitions • Rotating Joints • RF and Pressure Gaskets • Aircraft Junction Boxes and Cable Assemblies

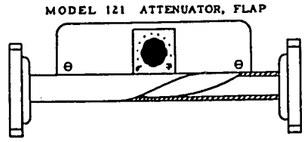
DOUGLAS

MICROWAVE SPECIALISTS

Do you need a specialist for your MICRO-WAVE-RADAR "Plumbing" problems; or is your need for standard or special test equipment? Design, Development and Production of component parts and test equipment in the frequency range of 1000-40,000 mcs. (and higher) is our specialty.

Our production facilities are available for "model shop" quantities or for large runs. We work to your pencil sketches or to your completely detailed drawings.

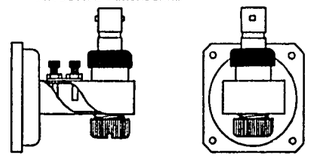
Our design facilities enable us to supply you with a completely engineered unit for those cases where an outline drawing and specification list only are sent us.



Your requirements are engineered and manufactured to the highest quality standards, whether the unit required is a simple transmission line or a complex balanced duplexer.

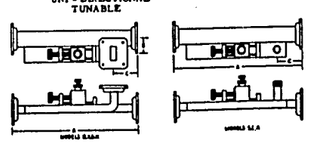
WE INVITE YOUR INQUIRIES.

Our catalog, the most complete and comprehensive in our field, is available upon request.



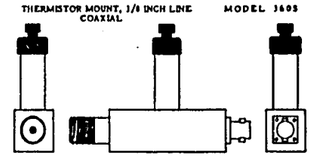
SOME SPECIAL FEATURES OF A FEW OF OUR CATALOG ITEMS

MODEL 121 ATTENUATOR, FLAP



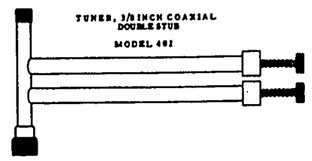
Features 270° knob rotation; may be easily calibrated

CRYSTAL DETECTOR MOUNT WAVEGUIDE - BROADBAND MODEL 160



Features double probe tuner to lower VSWR

DIRECTIONAL COUPLER UNI - DIRECTIONAL TUNABLE MODEL 172



Features sliding probe on sidearm for higher directivity

THERMISTOR MOUNT, 1/8 INCH LINE COAXIAL MODEL 3605

Features adjustable short for better match

TUNER, 1/8 INCH COAXIAL DOUBLE STUB MODEL 401

Features rotating knobs for finer tuning, once adjusted does not shift under vibration

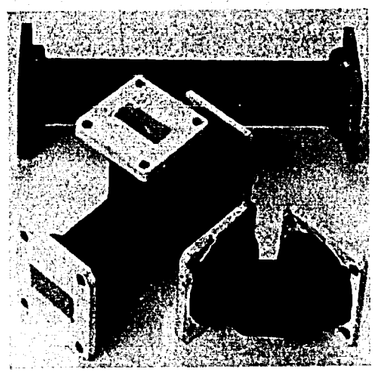
R. F. COMPONENTS MADE OF LAMINATED GLASS CLOTH

Microwave Transmission Lines Fabricated in This Manner Offer the Following Superior Properties:



NON CORROSIVE

NON HEAT CONDUCTING

HIGH STRENGTH TO WEIGHT RATIO

CLOSE MECHANICAL TOLERANCES

FINE SILVERED CONDUCTING SURFACE

Straight sections, tees and mitered elbows are among the many components available as standard items. GLAS-GUIDE can also be made to your print.

"Don't say waveguide, say Glas-Guide"

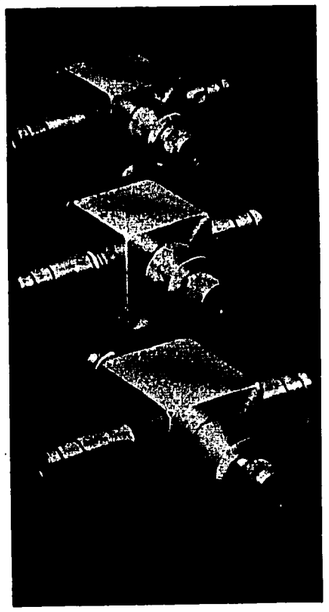
QUALITY DEVELOPMENT AND PRODUCTION OF . . .

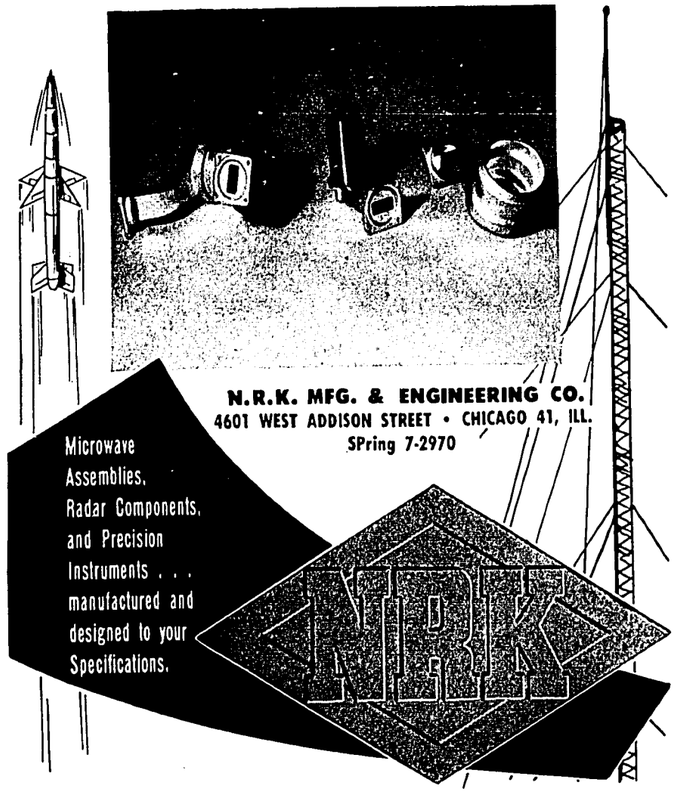


MICROWAVE COMPONENTS INSTRUMENTS ASSEMBLIES AND SYSTEMS

50 TO 3300 MC *Precision* DIRECTIONAL COUPLERS

FOR LAB. & INCORPORATION APPLICATIONS

Model No.	Frequency Range (Mc)
500-0Y	50 - 200
500-1Y	200 - 500
500-2Y	500 - 1000
500-3Y	1000 - 2000
500-4Y	1500 - 2500
500-5Y	2500 - 3300



Specifications:
Coupling (C) 30 db or as specified
Directivity: C + 10 db minimum
Arm balance: within .04 db
Arms matched to 1.25 on 50 ohms
VSWR: below 1.05:1
Price: $160.00 Delivery from stock

The F. C. Kent Company

has long been recognized as the outstanding source for formed waveguides in the country. If you have requirements for bent and formed waveguide sections — waveguides with as many as seven or eight different bends in one continuous section of tubing—in different planes and with sharp radii; if your assemblies call for waveguide tubing to be twisted, offset, tapered, expanded or call for a transition from rectangular to round; then we wish to bring to your attention our exceptional ability as specialists in bending and forming waveguide tubing in all sizes.

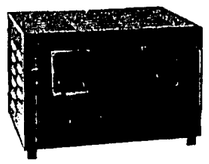
THE STANDARD OF QUALITY — HICKOK INSTRUMENTS — FOR OVER FORTY-THREE YEARS

MODEL 7001 MODEL 700

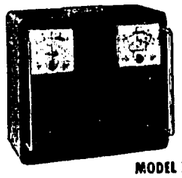
LABORATORY TUBE TESTER
All Voltages Variable and Metered



Model 700: Most complete and accurate Tube Tester. Covers wide ranges of values to duplicate the results in tube manuals. This instrument is invaluable for electronic developmental and research work. Model 7001: Null Reading Apparatus, for use with the Model 700 to obtain bridge type Null readings with an accuracy of 1%. Most complete and accurate tube Tester available. 7 other HICKOK tube testers are available to fill all your requirements.

MODEL 209A

TRUE VACUUM TUBE VOLTMETER
Laboratory Size and Accuracy



Model 209A: Contains large 9" meter with zero-center scale. Highly accurate for servicing industrial electronic equipment. DC Volts: 0-1200 in 6 ranges. AC RMS Voltage: 0-1200 V. in 6 ranges. AC Peak-to-Peak Voltage: 0-1200 V. in 6 ranges. Capacitance 0.1 to 10,000 MMF in 2 ranges, 0-1000 MF in 5 ranges. 50 MH to 100 henries. 0.1 ohm to 10,000 megohms in 7 ranges.

MODEL 710

SINE-SQUARE WAVE GENERATOR
For Laboratory & Industrial Use

Model 710: Provides an accurately calibrated source of sine wave and square wave functions over a wide frequency range. Sine wave total harmonic distortion below 1%. Hum level better than 90 db down. Square wave rise time less than .1 Micro second. 20 cycles to 1 MC in five ranges on both sine and square waves.

MODEL 755

NOISE GENERATOR
Industrial & Technician Model

Model 755: The first noise generator to be completely self-contained. Has two indicating meters. This instrument is divided into two parts—VTVM side and Generator Noise side. Permits noise level adjustments to improve sound and video in TV receivers. Ranges: 0-0.1, 0.5, 1.0 and 5.0 Volts, zero-center DC scale. Frequency rangeflat from 10 to 250 MC. Noise level: 0-20 db.

MODEL 1800

LABORATORY CATHODE RAY OSCILLOSCOPE
Wide Range . . . Versatile

Model 1800: Provides the ultimate in Oscilloscope function for the industrial electronic laboratory. Exceptional range, sensitivity and stability make the 1800 most desirable for the professional electronic engineer in his detailed visual study of any one electrical quantity as a function of another electrical quantity. 5 other models of HICKOK oscilloscopes are available. Write for catalog today.

ELECTRICAL

INDICATING METERS

HICKOK is a manufacturing pioneer and constant developer of the finest electrical indicating instruments. Today HICKOK manufactures the most accurate laboratory types with accuracies of 0.2% of full scale deflection down to small pocket portable types with accuracies of 1½%. HICKOK introduced the internal pivot design to provide the high standards of accuracy and dependability in modern instrumentation.

MODEL 46

The high HICKOK standard of quality is available in Ruggedized DC or Rectifier Type AC meters. This latest design provides the practical answer to requirements for shock-proof meters with dependable accuracy. These instruments are thoroughly engineered and tested and meet MIL-M-6A, MIL-M 10304 (Sig. C) and New Military Specification for Round Panel Instruments. Available in 2½", 3½" and 4½" Ruggedized.

MODEL 46-250

Space on an instrument panel is valuable. The need for obtaining as long a panel as possible is neatly filled with a 250 Degree Arc-Angle long scale instrument pioneered and perfected in the smaller size by HICKOK. These meters have a scale 2½ times as long as the conventional panel instruments. 250° Meters, in sealed as well as standard molded cases, are available in many sizes and ranges.

MODEL 14

HICKOK DC and AC Portable Instruments—Ammeters, Milliammeters, Microammeters, Voltmeters, Millivoltmeters, Volt-Ammeters Thermo-Meters are contained in a phenolic case lined with heavy steel shell which shields from the effects of stray magnetic fields. Scale divisions are spaced equal distances apart. Accuracy within ½ of 1%. On special order, Model 14 can be supplied with a calibration chart to provide accuracy to 0.2%. Also available is a complete line of pocket portables with accuracies to 0.5%.

The many special movements developed by HICKOK are: electrodynamometers, self-contained frequency meters, galvanometers, true logarithmic deflections, special curves for special purposes and ruggedized designs for highest shock tests. Full technical information on the complete line of HICKOK instruments and test equipment is available on request. Kindly list details of your requirements and ask for Catalog No. 28.

Manufacturers of the World's Most Complete Line of Electrical-Electronic Test Equipment

A Directory of

7. Test and Measuring Equipment

Laboratory Standards & Supplies

10 Major Groups

70 Products

Organized by functions for Engineers

In order to include Test Equipment with other instruments and controls in Part V, the Directory of Materials and Services, (Products 75-81), has been included in Part VI, beginning on page 477.

The products and services of the Radio-Electronics industry have been organized into ten basic directories following closely the organization of the IRE Professional Groups. But 104 major product groups are numbered throughout.

92 Audio Frequency Test Equipment.
93 General Laboratory Equipment & Supplies.
94 General Test Equipment.
95 Graphic Recorders.
96 Laboratory Standards of Frequency & Time.
97 Microwave & Radar Test Equipment.
98 Nuclear.
99 Oscilloscopes—Cathode-Ray.
100 Radio Frequency Test Equipment.
101 Television Test Equipment.

Always consult the pink pages at the start of the Directory of firms, for a terminology cross-index, or to find products by name. The pink pages list 608 products by name, as well as under the product groups. Page numbers are given for speed.

74. Waveguides & Accessories.

LABORATORY, ENGINEERING & PRODUCTION

HIGH FREQUENCY EQUIPMENT

RANGE	INSTRUMENT	DESCRIPTION	PRICE
50 KC—1000 MC	Mega-Sweep	Sweeping Oscillator	$465
50 KC— 950 MC	Calibrated Mega-Sweep	Sweeping Oscillator	$495
10 MC— 950 MC	111A Calibrated Mega-Sweep	Sweeping Oscillator	$575
1245 MC—9660 MC	Centilators	Sweeping Oscillator	$395 to 595
50 KC— 2 MC	Kilo-Sweep	Sweeping Oscillator with Crystal Markers	$525
5 KC— 200 KC	Sona-Sweep	Sweeping Oscillator with Crystal Markers	$525
50 KC— 20 MC	Model Video Marka-Sweep	Sweeping Oscillator with Crystal Markers	$495
50 KC— 8 MC	Model Video TTV Marka-Sweep	Sweeping Oscillator with Variable and Crystal Markers	$695
450 MC— 900 MC	Ultra-Sweep	Sweeping Oscillator	$895
450 MC— 900 MC	Ultra-Marker	Marker Generator	$395
450 MC— 900 MC	Model UHF Marka-Sweep	Combines Ultra Sweep and Ultra Marker in Single Cabinet	$1190
10 MC—1000 MC	Mega-Match	Impedance Match Indicator	$895
8500 MC—9700 MC	Microwave Mega-Match	Impedance Match Indicator	$895
10 MC—3000 MC	Megalyzer	Spectrum Analyzer	$895
5 MC— 220 MC	Mega-Node	Random Noise Generator	$295
100 MC—3000 MC	Mega-Node Sr.	Random Noise Generator	$995
1200 MC—26500 MC	Microwave Mega-Nodes	Random Noise Generator	$195 to 445
5 MC—26500 MC	Rada-Node	Radar Noise Figure Measuring Set	$1395
30 MC & 60 MC	Rada-Pulser	Pulsed-Carrier Generator	$595
12 MC to 80 MC	Rada-Pulser Sr.	Pulsed-Carrier Generator	$745
½, 1, 2 and 5 microseconds	Micro Pulser	Pulse Generator	$225
.025, 0.05, 0.1 and 0.25 microseconds	Mega-Pulser	Pulse Generator	$225
40 MC—10,000 MC	Radalyzer	Gain Measuring Set	$995

PRODUCTION AND SERVICE TEST EQUIPMENT

RANGE	INSTRUMENT	DESCRIPTION	PRICE
VHF TV All 12 channels	Model RF-P Marka-Sweep	All-Electronic Switchable RF TV Sweeping Oscillator for production test with narrow pulse markers	$795
20-50 MC	Model IF Marka-Sweep	All Electronic IF TV Sweeping Oscillator for production test with narrow pulse type markers.	$325
30 & 60 MC Others, Special	Rada-Sweep	Combined Sweeping Oscillator and Crystal Marker Generator for rapid alignment	$395
All 12 TV Channels	Mega-Pix Sr.	A Crystal Controlled Picture and Sound RF Signal Source for color, black and white	$990
Any Single Channel	Mega-Pix Sr.		$495
TV Channels 14,15,16,34, 35,36,37,38, 39, 40,47,48, 49,81,82,83	Mega-Pix UHF Converter	For use with Mega-Pix Sr.	$450
TV Channels 3, 15, 48, 82	Ultra-Pix	UHF Crystal Controlled Picture and Sound RF Signal Source	$795
Video	Model Uni-Chrome Chromabar	Color Generator— each NTSC color and black and white presented simultaneously	$425
Video	Model Multi-Chrome Chromabar	Multiple Color Bar Generator, all NTSC colors and black and white presented simultaneously.	$990
Video	Model Tri-Chrome Chromabar	All 6 NTSC colors displayed 3 at a time with black & white	$525
Video	Model Anychrome Chromabar	A laboratory Color Signal Generator	$495
All 12 TV Channels	Mega-Marker Sr.	A Crystal Controlled TV RF Sound Carrier Marker Generator	$250
All 12 TV Channels	Dual Mega-Marker Sr.	A Crystal Controlled High Output Picture and Sound RF Marker Generator	$350
19 to 49 MC	Megaliner	IF Marker Generator	$150

ELECTRONIC SOUND ANALYSIS EQUIPMENT

AUDIO FREQUENCY RANGE C.P.S.	INSTRUMENT	DESCRIPTION	PRICE
5—4400	Vibralyzer	Vibration Frequency Analyzer	$2500
85—8000	Sonagraph	Sound Spectrograph for Analysis of Audio Energy	$1995
100—5000	Sona-Stretcher	Speech Stretcher—slows speech to one-half of normal tempo	$950
100—4000	Sonalator	Dynamic Translator for Visible Speech Display	$1495 & 1695
40—12,000	Echo-Vox	A Wide and Continuously Variable Time Delay	$650

ACCESSORIES

RANGE	INSTRUMENT	DESCRIPTION	PRICE
8500 to 9700 MC	X Band Wavemeter	A High Q Micrometer—Controlled Co-axial Wavemeter	$50 & $75
DC to 500 MC	Attenuators	Switchable in 1 db steps	$50
450 to 900 MC	Ultra-former	An Unbalanced to Balanced Matching Transformer	$30
Any single VHF-TV channel	Telefilter	A single side band TV filter	$195

PROBLEM: *Analyzing or Monitoring Spectral Content*

FAST SOLUTION: *A General Purpose or Special Panoramic Instrument Designed for Your Needs*

Which Is Your Problem?

Analysis of Sounds, Vibrations, Waveform or Distortion

Ultra-audible sounds and vibrations, bandwidth of ultrasonic transmissions

Analysis of FM, AM and pulsed RF signals, interference, spurious oscillations or monitoring communications channels

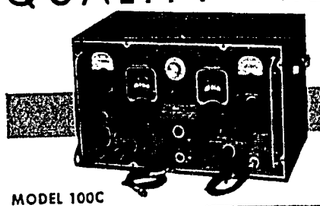
Solution

PANORAMIC SONIC ANALYZER Models AP-1 and LP-1 Visually displays spectral components between 40 20,000 cps in one second. Direct Reading.

PANORAMIC ULTRASONIC ANALYZER Model SB-7 2 KC-300 KC. Direct Reading. Continuously variable presentation width 200 KC to zero.

PANORAMIC SPECTRUM ANALYZER Model SPA-1
PANADAPTOR Models PR-1, SA-3, and SA-8a
PANALYZER Models SB-3 and SB-8a.
available in a variety of types having different sweep-widths and resolution capabilities.

Also Sweep Generators for accurate frequency response analysis covering sonic and ultrasonic frequencies, Models SG-1, G-2 and G-3



Write for complete details, prices and delivery today.

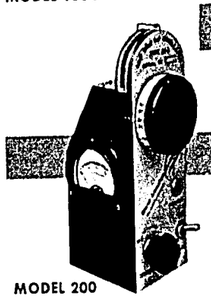
QUALITY PRECISION INSTRUMENTATION

MODEL 100C

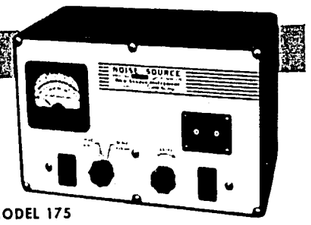
FM SIGNAL GENERATOR



A precision FM signal source for testing FM equipment. 27-230 mc.

MODEL 130A

UHF TV SWEEP FREQUENCY GENERATOR



A laboratory instrument also suitable for production and service testing of UHF television tuners and receivers. 450-900 mc.

MODEL 200

UHF GRID DIP OSCILLATOR

This versatile, compact instrument combines the power supply and oscillator in one lightweight unit. 400-900 mc.

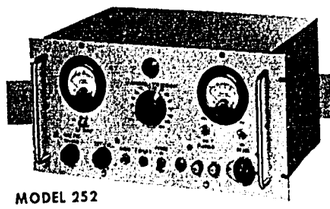
MODEL 175

VHF-UHF NOISE SOURCE

Features simple operation, long life noise diodes, and no balun requirements. 50-900 mc.

MODEL 155

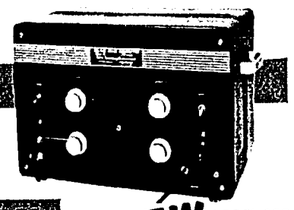
SIGNAL GENERATOR



Tests receivers and transmitters operating between 2700 and 3400 mc.

MODEL 160

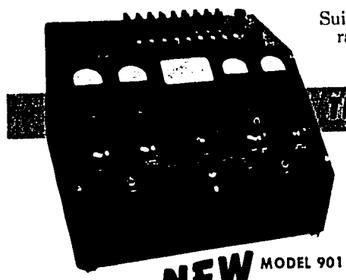
BROADBAND AMPLIFIER



Increases the sensitivity of oscilloscopes and voltmeters; amplifies short pulses without objectionable distortion. 15 kc — 50 mc. 60 db gain.

MODEL 252

MODULATION MONITOR



Measures the percentage of modulation of AM transmitters operating from 100-225 mc or 225-400 mc.

NEW MODEL 183

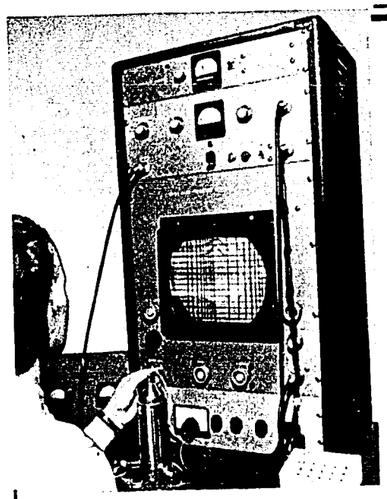
SQUARE WAVE GENERATOR

Suitable for testing the transient and frequency range of wide band amplifiers, and accurately measuring their amplitude. 10 cps to 1 mc.

NEW MODEL 901

TRANSCONDUCTANCE ANALYZER AND CIRCUIT SIMULATOR

Measures transconductance under all operating conditions; reproduces any type of static or dynamic tube characteristic. Range: 0-100; 0-500; 0-1,000; 0-5,000; 0-10,000; 0-50,000 micromhos.



NEW FREQUENCY STANDARD MODEL 701

A source of highly stabilized frequencies covering the range from 10 kc to 50 mc at intervals of 10 kc, 100 kc or 1 mc.

NEW LONDON INSTRUMENT Company

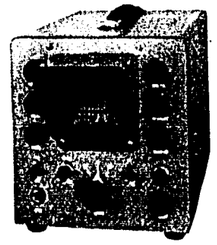
P. O. BOX 189P, NEW LONDON, CONN.

Engineering and Manufacturing Facilities for:

Audio Equipment
Acoustical Devices
Magnetic Recording
Industrial Electronics

Manufacturers of:

Audiometers
Hearing Aids
Equipment for the Deaf
Recording Heads
(Dynamu Division)
Curve Tracers
Headlight Dimmers



The Maico Audio Frequency Curve Tracer provides a fast, accurate means of obtaining a visual presentation of the frequency response of a wide variety of audio components and audio systems. Makes for more accurate inspection at lower cost.

Maico Company, Inc.

21 North Third St. **Minneapolis 1, Minn.**

TELEGRAPH DISTORTION ANALYZER

A VERSATILE NEW INSTRUMENT THAT SIMPLIFIES THE MEASUREMENT OF BIAS AND DISTORTION . . .

The Stelma Telegraph Distortion Analyzer Model TDA-1 is a self-contained, portable unit designed to measure the bias and distortion of telegraph signals rapidly and accurately. The percent distortion is read directly on a calibrated scale mounted in front of a cathode-ray tube. The various components of distortion making up the total distortion are clearly indicated.

No test signals required.
Measurements are made on regular teleprinter traffic.

An Ideal Instrument For Telegraph Terminal Centers and Field Stations

SIMPLE TO CONNECT

The Telegraph Distortion Analyzer is patched in series into a telegraph loop or local telegraph circuit. It can be conveniently carried into the field and readily plugged into working circuits at various repeater or terminal points in order to check the distortion characteristics of circuits and equipment.

QUICK TO ADJUST • EASY TO OPERATE

No special skill or technical knowledge is required to operate the TDA.

CONVENIENTLY PORTABLE

The Telegraph Distortion Analyzer weighs only 17 lbs. and measures 7½ x 8 x 12 inches.

STELMA PRODUCTS

Regenerative Repeaters, Electronic
Bias Test Sets
Telegraph Repeater—4-wire to 2-wire
Automatic Telegraph Distortion Warning Systems
Receivers, Carrier Telegraph
Transmitters, Carrier Telegraph

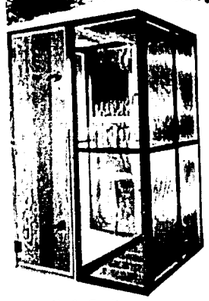
We're Glad we Bought a HIGHER ATTENUATION



NEW SCREEN ROOM

Lindgren "AMERICAN 40"

LONGER LIFE . . . GREATER EFFICIENCY . . .
IMPROVED COMFORT . . . LOWER COST!

When you buy screen rooms it pays to get HIGHEST GUARANTEED ATTENUATION to take care of future as well as present needs. Due to exclusive construction features, Lindgren true-isolated, double shielded BRONZE Screen rooms offer high attenuation (128 DB) at lower cost than cell type rooms rated below 100 D.B. Bronze lasts longer, costs less, is self-ventilating through open mesh. Also available in Copper up to 146 D.B.

Meets U. S. Gov't performance specifications

CONSISTENTLY HIGHEST ATTENUATION
"In our experience, your screen rooms consistently showed highest attenuation."
—(Engineering Report.)

Get this FREE BOOK
Gives construction diagrams, complete specifications, photos, sizes, prices, performance charts, engineering reports . . . Everything you need to know to buy Screen Rooms intelligently. Send for "Screen Rooms" of Quality, before you decide your screen room purchase.

ANOTHER INTERNATIONAL RADIANT FIRST!!

A TEMPERATURE CALIBRATION CABINET

Featuring:

SEVEN TANKS and ONE CHAMBER

- Permits closely controlled calibration and testing of remote temperature sensing devices.
- Temperature in each tank controlled to ±¼° F.
- Separate cooling or heating systems for each tank.
- Altitude conditions also available in chamber.
- Separate control of temperature and humidity in the chamber to tolerances ±2° F. closer tolerance possible.
- Illustrated unit has 7 tanks (—60° c. to +60° c.)
- Chamber temperature range — 70° c. to +60° c.

The illustrated unit was specially designed and built "to solve a clients' problem in environmental testing" a specialty of I. R. C. Our engineers are ready to solve your needs—call on us for quotations.

MANUFACTURERS OF: Vacuum Ovens, Brine Chillers, Diaphragm Exercisers, Rain Makers, Special Air Conditioning Equipment, Super Vacuum Systems, Explosion Chambers, Sunshine Chambers, Plastic Bell Jar Systems, Immersion Test Equipment, Low Temperature Test Equipment—Humidity Controlled Test Equipment, Altitude and Vacuum, Sand and Dust, Walk-In Rooms, Salt Spray, Fungus, Sublimators, Liquid Hot and Cold Baths, Mobile Refrigeration.

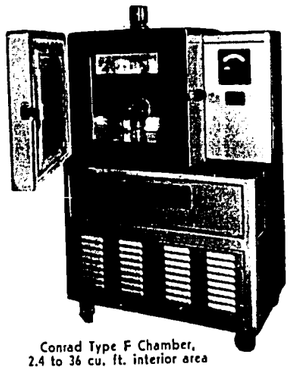
CONRAD ENVIRONMENTAL TEST CHAMBERS



★★★ *Full range of sizes, temperature and instrumentation.*

★★★ *Remote and portable liquid chilling units to 900,000 Btu per hr. at —100° F.*

★★★ *Self contained fully portable temperature test chambers.*

FULL SELECTIVITY OF EQUIPMENT TO MEET YOUR SPECIFIC NEEDS

Cold only—cold and heat—Cold, heat, and humidity—Heat and humidity—cold and altitude—Cold, heat and altitude—Cold, heat, altitude and humidity—Heat and altitude—Altitude only—Remote or portable liquid chillers—Portable test chambers.

Conrad Type F Chamber, 2.4 to 36 cu. ft. interior area

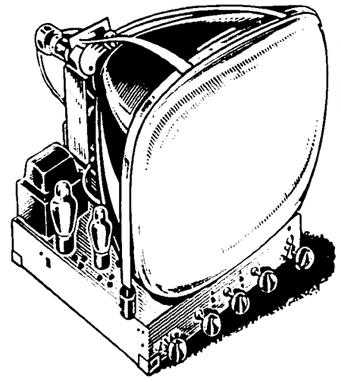
CONRAD DESIGN AND CONSTRUCTION ASSURES HIGH LEVEL PERFORMANCE AND RELIABILITY

Quicker draw down with patented Conrad double cascade system. Uses safe Freon 13 and 22.

Rigid insulation provides uniform heat barrier.

Stainless steel interiors permit test of any materials.

All welded cabinet construction—no wood used.



Full selection of instrumentation and controls.

High Purity

Baker ELECTRONIC CHEMICALS

New standards of precision have marked the rapid growth of the booming electronics industry. To help attain those standards, chemical purity is highly essential for phosphors, emission coatings, activating agents, etc.

Some of the Baker Chemicals popular with the electronics industry are shown on this page. As your electronics development work requires these or other chemicals to precise standards, Baker is your logical source of dependable supply.

J. T. Baker Chemical Co., Executive Offices and Plant, Phillipsburg, N. J.

Aluminum Nitrate	Chemical R-500
Aluminum Sulfate	Magnesium Chloride
Ammonium Hydroxide	Magnesium Oxide
Ammonium Phosphate	Manganous Carbonate
Antimony Trioxide	Phosphoric Acid
Barium Acetate	Potassium Hydroxide
Barium Aluminate	Radio Mixtures
Barium Carbonate	Reagent Grade Acids
Barium Nitrate	Silicic Acid
Barium Tungstate	Sodium Hydroxide
Cadmium Chloride	Sodium Phosphate Dibasic
Cadmium Sulfate	Strontium Carbonate
Cadmium Sulfide	Strontium Nitrate
Calcium Carbonate	Triple Carbonates
Calcium Chloride	Zinc Nitrate
Calcium Fluoride	Zinc Oxide
Calcium Nitrate	Zinc Sulfide

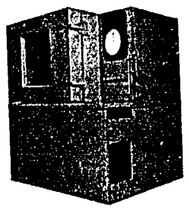
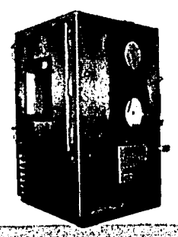
FOR
ENVIRONMENTAL
TESTING

Tenney

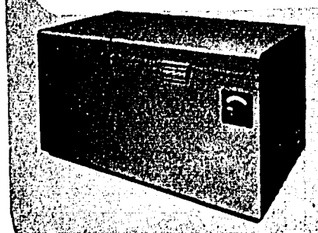


. . . for Tenney Test Chambers are precision-engineered for maximum efficiency and can be designed to simulate the complete range of temperature, atmospheric or pressure conditions found anywhere on earth — or above it to altitudes of 120,000 ft. plus! They attain sub-zero temperatures quickly, maintain them efficiently and provide full instrumentation for accurate evaluation of complete test data.



TENNEYZPHERE ALTITUDE CHAMBERS

Designed to withstand atmospheric pressure and to simulate global conditions of pressures, temperatures and humidities. Altitudes from sea level to approx. 80,000 ft. Temperature range from plus 200° F. to minus 100° F. Also simulates desired (20% to 95%) relative humidity.



TEMPERATURE AND HUMIDITY CHAMBERS

Model TR — Precision recorder controllers permit accurate simulation and check of temperatures to +200° F. Meets all Mil and JAN specs for low- and high-temperature requirements by incorporation of temperatures down to −100° F. Humidities within 20%-95% range. Variety of standard sizes.

Model TH — Designed for a temperature range of +35° F. to +185° F., and a humidity range of 20% to 95%. Accurately simulates, controls, and checks all above-freezing temperatures. Program control to meet a wide variety of Mil specs optional. Manufactured in a wide range of standard sizes.

TENNEY SUB-ARCTIC INDUSTRIAL CABINETS

Designed for low-temperature testing of metals, radios, instruments, plastics, liquids, chemicals and pharmaceuticals. Temperature ranges of −40° F., −80° F., −100° F., −120° F., −150° F., −170° F., are standard for each size.

MULTI-CELL
SHIELDING ROOMS

MULTI-CELL® Shielding Rooms meet all specifications for electrical and electronic performance in research, development and production including

JAN-1-225, 16E4 (Ships), MIL-1-16910, MIL-S-4957 (AER)* MIL-E-8669 AER*

Screen or Solid Enclosures— with Attenuation Characteristics

MIN 100DB from .10 to 10,000 MC and HIGHER

**Military specifications for shielded enclosures.*

Easily moved, enlarged, decreased, modified, by use of jig-built, interchangeable panels and doors. Supplied complete, ready for use, with choice of filter panel location, filters, ventilation entries, utility line entries, etc. Special laboratory benches and illumination available. Erection by our trained crew — anywhere.

Now in universal use by Military, Civil Authority, Industrial, Scientific and Educational Organizations for RF interference suppression over the major portion of the spectrum in use today.

High Resolution-Laboratory Standard DC Voltmeters

For most applications these rugged portable, self-contained nulling voltmeters replace a potentiometer, voltbox, galvanometer and standard cell combination. They are suitable for laboratory use, production line testing and field service.

Model LVM-5

Voltage Range: 0-100 Volts DC
Resolution: At least 50 microvolts between 0 and 1 volt
500 microvolts between 1 and 10 volts
5 millivolts between 10 and 100 volts
Absolute Accuracy: ± 0.1% of reading
Input Impedance: Infinite at null

Model PVM-4

Voltage Range: 0-600 Volts DC
Resolution: At least 5 millivolts between 0 and 10 volts
50 millivolts between 10 and 600 volts
Absolute Accuracy: ± 0.1% of reading
Input Impedance: Infinite at null

Catalog PL-2 describes these instruments completely, including their use as deflection potentiometers, null indicators and millimicroammeters. Copy on request.

IDA analog computers and accessories are manufactured by Computer Company of America, Division of Bruno-New York Industries Corp. Their usefulness in the field of dynamics has been proven over the years.

• • • • •

A complete line of standard computers, instruments and regulated power supplies is supplemented by the ability to design and manufacture specialized equipment for your particular applications. Your inquiries are invited.

LABORATORY TUBE ANALYSER U-61 B

The sources of supply and the many switching combinations possible with this instrument make all the standard measurements on electronic tubes in their working conditions: insulation, electrode continuity, current passed by each electrode, slope, etc. . . . Each voltage (one for the anode, two for the screens, one for the grid) is continuously variable from zero to its maximum value and is indicated by a separate meter. The currents passed by each electrode are also measured separately. Its easy use and the certainty of exact measurements are due to a stabilized power supply, correcting against changes in input voltage and output current, the voltage applied to each electrode being practically independent of the load current. The various voltages are also available at sockets so that the instrument may be used as a stabilized power supply for laboratory work. Overload cut-out gives protection against faulty connections. The possible combinations of switching and jumpers allow complete tube circuits to be examined.

TECHNICAL CHARACTERISTICS: Filament volts: 19 values from 1.1 to 117 V. Anode volts: variable from 0 to 300 V. max. current 100 mA. Auxiliary Grid volts: Two identical sources. Variable from 0 to 300 V. max. current 15 mA. Control Grid volts: Variable from 0 to 50 V. Power supply stabilisation: less than ± 1% variation of all sources for ± 10% power supply variation. Power supply: 110-130 - 220 - 250 V, 50 - 60 c/s. Tubes used: 3 × 5Y3 GB, 2 × 6 V6, 2 × 6L6, 3 × 6AU6, 2 × OB2. Dimensions: 24 × 13⅜ × 15¾ ins. (610 × 340 × 400 mm.) Weight: 66 lbs. (30 kg).

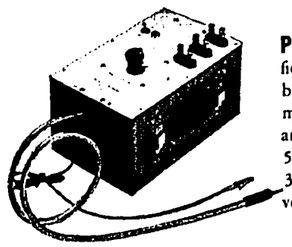
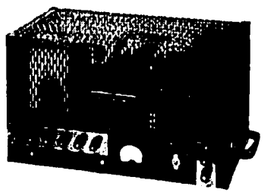
Keithley Instruments



Vacuum Tube Electrometer (Model 210) is a line-operated dc voltmeter, has ranges of 0.8, 2, 8, 20, and 80 volts, a 10^{14} ohm input, grid current within 10^{-13} ampere, accuracy within 2% of full scale, output amplifier with 0-5kc response and 10-volt output full scale on all ranges, output terminals for balanced or unbalanced recorders and amplifiers. Can be used with accessories below and as a preamplifier which has an ultra-high input impedance.



Vacuum Tube Electrometers (Models 200, 200A) are battery-operated dc voltmeters, have ranges of 2 and 20 or 2 and 8 volts, inputs of 10^{14} ohms, grid currents below 5×10^{-13} ampere, accuracy within 2% of full scale. Accessories described below permit use as polarity-sensitive kilovoltmeters, micromicroammeters of extreme range, and meg-megohmmeters.

Electrometer Accessories multiply uses of Keithley Electrometers. Decade Shunt clips over input terminals, converts instrument to direct reading micromicroammeter with full-scale sensitivity of 8×10^{-13} ampere. Voltage dividers provide numerous ranges up to 20 kv. The Test Voltage Supply is useful in measuring resistances as high as 10^{16} ohms.

Phantom Repeater is an instrument amplifier which greatly reduces measuring errors caused by circuit loading. Input impedance is over 200 megohms shunted by 6 mmf. Gains of 1.0, 10, and 100 accurate within 2%, frequency response 5 to over 150,000 cps, output impedance less than 350 ohms, noise equivalent to less than 70 microvolts at the input.

Meter Matcher is a power frequency amplifier. Eliminates meter current errors when using a voltmeter or wattmeter. Gives 150-volt voltmeter or wattmeter effective full-scale ranges of 15 to 600 volts. Input impedance 100,000 ohms to 4.0 megohms on five input voltage ranges, max signal 150 volts rms into resistive meter loads of over 2000 ohms; response 5 to 20,000 cps. Adds less than 0.15% error to measurements.

SPECIAL HARDWARE — RFL — TEST AND SERVICE EQUIPMENT

Est. 1922

SEALNUTS

Type H-1267 for toggle switches fits 13/32-32 thd. is equal to Boot AN 3223 I. Also types for 1/2-20, 1/4-32 and 1/4-40 thds.

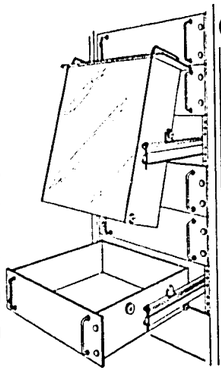
Type H-2475 for push switches fits 13/32-32 thd. Other types for various pushbutton diam. and lengths.

Type H-1268 for rotary shafts fits 3/8-32 thd. Also types for 1/2-20 and 13/32-32 thd w/large shafts.

Each *Sealnut** has three parts: black Silicone cap, nickel-plated brass nut, and Silicone O-ring. The nut tightens against the control panel for mechanical rigidity and is pressure sealed by the O-ring. The cap seals the switch handle or shaft. *Sealnuts* have operated without leaking at external hydraulic pressures of 200 lbs./sq. in. They remain flexible to —65°C, meet operating and service life requirements of Spec. MIL-B-5423 and are approved by U. S. Air Force, Navy and Signal Corps.

Write for illustrated data sheet and samples.

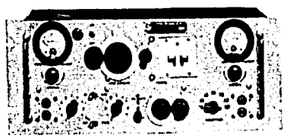
*U. S. Patent 2462023



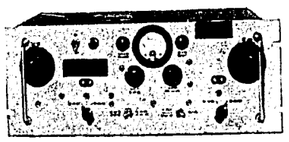
HANDLE

Type HA-5371 Handle with mounting plate is designed particularly for portable electronic equipment and conforms to MIL-T-945A. Hinged grip of black anodized aluminum is coated with black vinyl and swings 180°—lies flat when not in use. Will lift 125 lbs. without distortion. Insulated grip is comfortable to carry.

SLIDE ASSEMBLIES

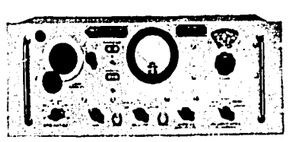


New inexpensive Chassis Slides designed for standard relay rack mounting on Navy and Signal Corps equipment are now available as stock item. Materials and finishes comply with MIL-E-16400 (Ships). Slides carry chassis to 100 lbs., tilt for easy access to bottom of chassis, and are easily removed. Rugged, cadmium plated, iridited steel rails with bronze rollers, stainless steel pins and nylon bushings. Write for detailed data sheet.

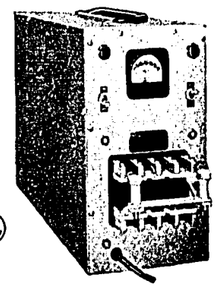


CRYSTAL TESTING EQUIPMENT

These three crystal impedance meters were specifically designed to test quartz crystals per MIL-C-3098. They are used to determine equivalent electrical parameters, such as resonance and anti-resonance resistance, series capacitance and inductance. From these parameters the crystal's performance index can be calculated. All units operate from 115 volt, 50/1000 cycle source and fit a standard relay rack. Front panels measure 7 x 19.



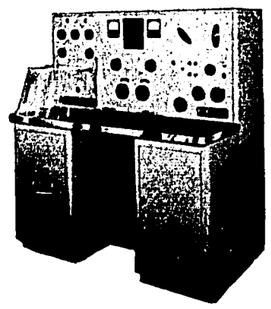
MODEL 459 (TS-330/TSM) C. I. Meter tests crystals in the frequency range of 1 to 15 mc. Three resistance ranges are available: 0-99, 0-990 and 0-9,900 ohms. Load capacitance is calibrated from 12 to 110 mmf., using calibration chart. Net $560.



MODEL 531 (TS-683/TSM) C. I. Meter is used for crystals in the frequency range of 10 to 140 mc. Twelve calibrating resistors of 10, 22, 30, 40, 51, 60, 68, 82, 91, 100, 120 and 150 ohms, plus a 100-ohm variable resistor are used for resistance calibration. An adapter for measurement of anti-resonance resistance is provided. Net $550.

MODEL 541 (TS-710/TSM) C. I. Meter tests crystals from 10 to 1100 kcs. Resonance and anti-resonance resistances from 10 ohms to 0.5 megohms are calibrated. Load capacitance calibrated from 15 to 105 mmf. Built-in voltmeter measures power dissipated in crystal. Internal ohmmeter measures crystal resistance using one of three variable resistance adapters supplied. Also supplied are two adapters for octal base and HC-5/U crystal holders, fourteen fixed calibrating resistors, and one RF cable. Net $650.

HOW TO CHARGE MAGNETS *Safely and Quickly—*



New MODEL 107-A Magnet Charger has dual range charging current output—12,000 amperes for small magnets and 22,000 amperes for larger, Alnico V magnets. Any shape or kind of magnet can be charged, including core type mechanisms, using charging bar or special adapters. Booster Unit available for increasing output to 28,000 amperes. Carrying handle added for easier portability.

Unit is self-contained, simple to operate, all exterior parts can be handled during complete charging cycle without danger to operator. Rugged and designed for production charging, its average magnetizing cycle is under 5 sec. Net price $490.

Weight: 75 lbs.-Size: 12 x 7 x 17-Operates on 110 volts, 15 watts.

INSTRUMENT CALIBRATION STANDARDS

MODEL 262B Dual Potentiometer Standards for calibrating meters to 0.1% through a range of 1 millivolt to 1500 volts and 1 microampere to 150 amperes. Uses L & N Brooks Mod. 7 pot. and Weston Mod. 4 standard cells. Voltage and current ranges separate for calibration of watt meters. Operates on 105/125 volts, 50/1600 cycles, 350 watts, with internal voltage regulator. Interlocks and hood protect instrument under test and operator from accidental overloads. Price $14,300.

Also available are MODELS 261B and 454 Standards for calibrating AC meters to 0.5% through ranges of 10 millivolts to 1500 volts and 1 microampere to 200 amperes; MODEL 260B Standards for DC meters to 0.5% over ranges of 1 millivolt to 1500 volts and 1 microampere to 150 amperes. Detailed data and prices on request.

All prices are FOB Boonton, N. J. and subject to change without notice.

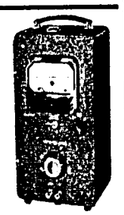
Symbol of Quality

ELECTRICAL INSTRUMENTS OF PRECISION SINCE 1927

BALLANTINE

World's Leading Electronic Voltmeters

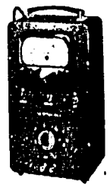


AUDIO to 150 kc — MODEL 300

Voltage Range..... 1mv—100v
Frequency Range..... 10cps—150kc
Accuracy..... 2% ENTIRE RANGE
Input Impedance..... ½ meg shunted by 30μμf

SUB-AUDIO to 150 kc — MODEL 302B

Battery Operated



Voltage Range..... 100μv—100v
Frequency Range..... 2cps—150kc
Accuracy..... 3% 5cps—100kc
5% elsewhere
Input Impedance..... 2 meg shunted by 15 μμf*

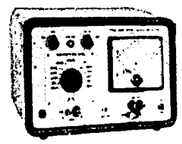
PEAK-to-PEAK — MODEL 305

Voltage Range..... 1mv—1000v pk-to-pk
Frequency Range..... 10cps—100kc (sine wave)
Pulse width..... 3μsec—250μsec
Min Rep Rate..... 20 pulses per sec
Accuracy..... 5% for pulses
Input Impedance..... 2 meg shunted by 15 μμf*

AUDIO to 2 mc — MODEL 310A

Voltage Range..... 100μv—100v
Down to 40 uv at reduced accuracy
Frequency Range..... 10cps—2mc
As null detector 5cps—4mc
Accuracy..... 3% 10cps—1mc
5% elsewhere
Input Impedance..... 2 meg shunted by 15μμf*

AUDIO to 6 mc — MODEL 314



Voltage Range..... 1mv—1000v
(100μv—1mv without probe)
Frequency Range..... 15cps—6mc
Accuracy..... 3% 15cps—3mc
5% elsewhere
Input Impedance..... 11 meg shunted by 7.5 μμf
(1 meg shunted by 25μμf without probe)

INFRASONIC to 30 kc — MODEL 316

Voltage Range..... 20 mv—200 v pk-to-pk
Frequency Range..... 0.05 cps—30 kc
(Down to .01 cps with corrections)
Accuracy..... 3% ENTIRE RANGE
Input Impedance..... 4.4 meg shunted by 50 μμf

TRUE RMS INDICATION — MODEL 320

Voltage Range..... 100 μv—320 v
Frequency Range..... 5 cps—500 kc
Accuracy..... 3% 15 cps—150 kc
5% elsewhere
Stability of Internal Calibrator..... 0.5%
Input Impedance...
10 megs shunted by 25 μμf below 10 mv
10 megs shunted by 8 μμf above 10 mv

DC & AC PRECISION CALIBRATOR — MODEL 420

Voltage Range..... 0-10 v RMS; Pk-to-Pk; or DC
Frequency (Std Model)..... 1 kc
(other values on special order)
Accuracy (long term)...Better than 0.5% above 1 mv
Distortion and Hum..... Less than 0.5%
Setting Resolution...Approaches 0.01% above 10 mv
Output Impedance (AC)..... 2-20 ohms depending on range setting

SENSITIVE INVERTER — MODEL 700

For Measuring DC Voltages when combined with any AC Voltmeter

Voltage Range..... 1μv—100v DC
Ratios DC Input to RMS Output..... 1:100 & 10:1
Accuracy..... 1% 100μv—100v
Input Resistance..... >10 meg for 1:100
50 meg for 10:1

DECADE AMPLIFIER — MODEL 220A

For Increasing the Sensitivity of any AC Voltmeter by 10 or 100 times

Voltage Range..... 10μv—50mv
Frequency Range..... 10cps—150kc
Accuracy..... 2% ENTIRE RANGE
Input Impedance..... 5 meg shunted by 15μμf

ACCESSORIES are available for all voltmeters to extend voltage measurements down to 20 uv and up to 10 kv, and to measure alternating currents from 0.1 uamp to 10 amp, and to provide DC from the Model 300 Voltmeter to drive external recorders or remotely located meters.

Famous for SENSITIVITY • ACCURACY • STABILITY

Each Ballantine Voltmeter

- Has only ONE voltage scale with decade range switching.
- Provides the same accuracy of reading at ALL points on the logarithmic voltage scale.
- Has a linear decibel scale.
- May be used as a high gain wide band amplifier.
- Responds to the average value of the input voltage wave, thus avoiding "turn-over" discrepancy.

WRITE FOR MORE DETAILED INFORMATION TO—

BALLANTINE LABORATORIES, INC.
102 Fanny Road, Boonton, N.J.

**Shunt capacitance is 8μμf on all ranges except two most sensitive ranges.*

PRECISION RF STEP ATTENUATOR*

Model AT-120 0 to 1000 MC

Small, rugged ladder attenuator achieves attenuation accuracy and low vswr from dc to uhf. Suitable for all signal and sweep generators in this frequency range.

Care in design assures maximum flexibility in mounting, drive, and types of input and output connections.

Easily adaptable for inclusion in different types of test equipment and in laboratory and production test applications.

MAXIMUM STEPS
Ten (eleven contact positions)

ATTENUATION RANGE
Up to 120 db total

OUTPUT IMPEDANCE
50 or 75 ohms nominal

INPUT IMPEDANCE
100 or 150 ohms nominal
50 or 75 ohms optional

INPUT AND OUTPUT VSWR
1.1 to 1000 mc at 50 ohms

Quick delivery on Standard Models. Prompt attention given to special requirements.

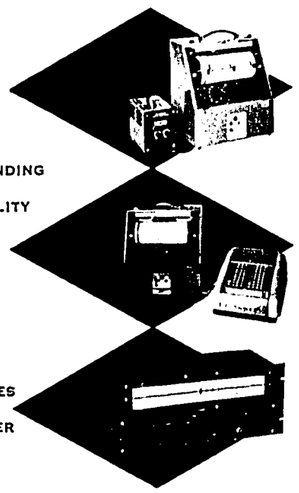
A new, large size, flat bed, versatile 2-axis recorder...

AUTOGRAF *trademark*

MODEL 2

The versatility and labor-saving convenience of the original portable Autograf have now been built into an instrument which handles standard 11" x 16½" graph papers. Model 2 has the same scales and ranges as Model 1 (0-5 millivolts to 0-100 volts each axis); same speed (full scale X and Y in one second); same input impedance (200,000 ohms per volt). In addition, depressed zero available each axis, larger recording area (twice as big), flat bed, easy-reading design.



Curves are available for observation and labeling while they are being drawn.

THE AUTOGRAF MODEL 1

general purpose 8½" x 11" X-Y recorder—is doing duty in hundreds of laboratory applications: chemical, electrical, electronic, wind tunnel, computer... And on production lines: measuring motors, filters, tubes, transistors, airfoils, amplifiers, rectifiers, magnetic circuits and materials, nuclear devices, etc....

BOTH AUTOGRAF MODELS ARE OUTSTANDING FOR THEIR VERSATILITY

NEW MODEL 20 SERIES DC VOLTMETER

AUTOGRAF CURVE FOLLOWER plots or reads out Y vs. X. Either Model 1 or Model 2 can be furnished as a recorder/curve follower.

AUTOGRAF POINT PLOTTER Models 1 and 2 may be fitted for point plotting from keyboard or other digital sources.

A new high accuracy, easy-to-read, multi-range servo-voltmeter with fast response. Scales 0-3 millivolts to 0-300 volts. Zero left or zero center. Designed for indication, control, or analog to digital conversion.

Bulletins describing these instruments are available, and we will be glad to send you the ones you want. Write...

F. L. MOSELEY CO., 409 NORTH FAIR OAKS AVENUE, PASADENA 3, CALIFORNIA

There are

3 SPECIFIC WAYS

in which "Proceedings of the I.R.E." serves the advertiser differently and more effectively than other publications.

1. Pre-Specification Selling

Because "Proceedings of the I.R.E." publishes basic research and engineering application articles it is closely studied by those design engineers who must "keep ahead of the market." Often, the research published leads the industry production by from two to six years! The alert engineer, who needs this amount of time for his own design applications and for tooling up and changing the production in his own factory, studies the "Proceedings of the I.R.E." carefully. Its articles keep him abreast with the changes that will inevitably come and make it possible for him to be ready for them. This is the time for you to sell the unknown engineer designing the never-dreamed-of product "before it happens!" It is an insurance that you will be ahead of the market instead of behind it.

2. Personal Connection to the Individual

The Institute of Radio Engineers is an engineering society for individual engineers who must qualify on their own education, experience and engineering work. Thus, the magazine follows the reader as his private possession, wherever he goes. Wherever new engineering progress is developing, the work is done by individual engineers—and it is these men that must be sold! Only the engineer knows enough to specify and buy in a highly technical industry. Selling is a matter of reaching the minds of men because *a company cannot sign a purchase order.* Wherever radio engineering activity is the greatest, companies employ IRE members. An engineer moves into a new job in advance of production and with him goes "Proceedings of the I.R.E.," with all the advertising you so urgently need to place where engineering activity is the greatest.

3. Economy

It is a specific purpose of the Institute of Radio Engineers that its advertising rates should benefit and help the industry grow, by being economical. Part of the economy of a tax-free organization is thus passed on to advertisers in the form of low-cost advertising to a high-quality audience. The page rate per thousand engineers of "Proceedings of the I.R.E." is the lowest in the radio-electronic industry by deliberate intent. Thus, the Institute finds an extra way that it can help the firms that hire its engineers to gain new business at lower costs.

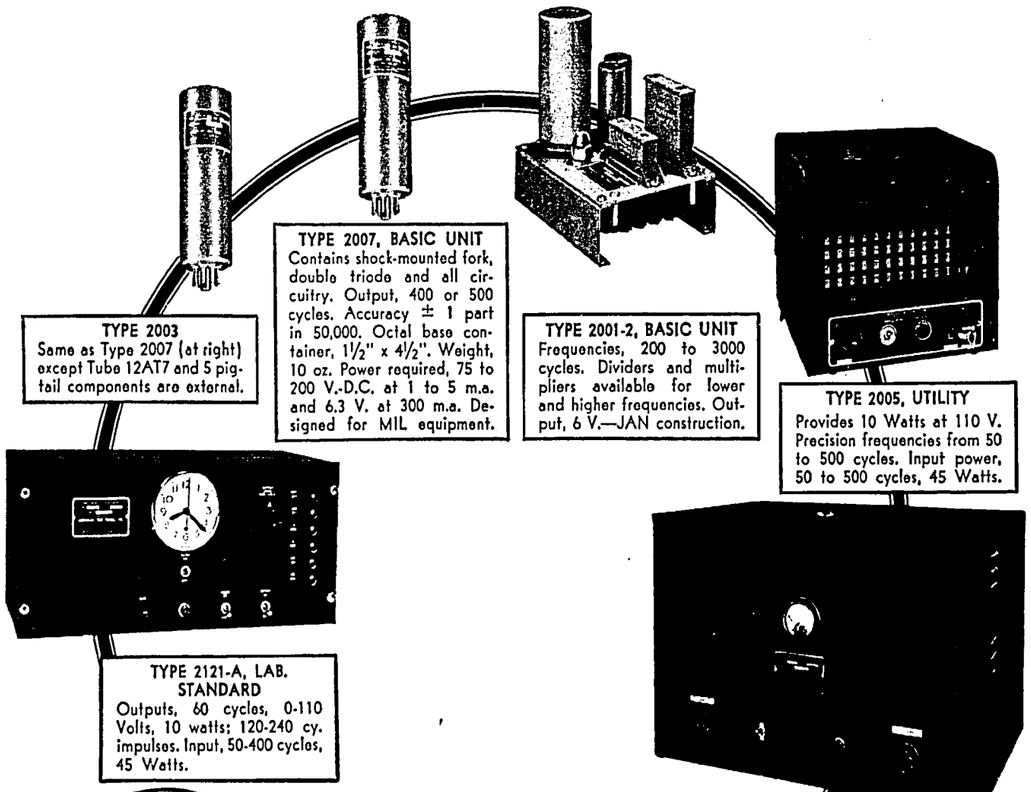
INK RECORDED

by ruggedly built, portable self-contained instruments

Polar Recorder
and POLINEAR RECORDER

MODEL PFR and PR

for BEAM PATTERN PLOTTING of antennas, microphones, loudspeakers, ultrasonic devices;



for FREQUENCY RESPONSE RECORDS of microphones, loudspeakers, amplifiers, filters, radio and television circuits.

Both recorders can be furnished with circuits for ac or ac-dc signal recording. Chart size 8½" x 11". Convenient linkage to oscillators, analyzers, rotational devices, test-turntables.

The POLAR RECORDER PR has selsyn-driven rotary movement; the POLINEAR RECORDER PFR has polar and linear synchronous-driven turntable.

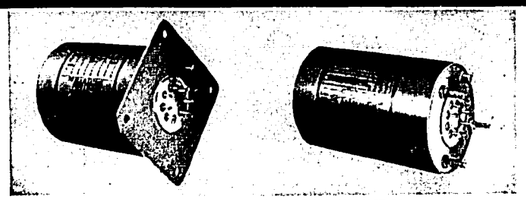
New A. W. HAYDON COMPANY

STOP CLOCK

STOPS TIME IN ITS FLIGHT

High Speed Stop Clock Accrued Seconds Indicator With Fluorescent Dial and Hands . . Also Available for Other Intervals.

This new, hermetically-sealed *Stop Clock* further enlarges the complete line of A. W. HAYDON COMPANY A.C. and D.C. Timers, time delay relays and timing motors. This accurate, panel-mounted timer totalizes hundredths of a second up to a minute. Hermetically-sealed, it weighs approximately 2 lbs. Comes with automatic reset.



SPECIAL FEATURES:

- Precision timing measuring hundredths of seconds to one minute.
- Automatic reset · Hermetically sealed · For operation on 50, 60 or 400 cycles A.C. or 20-30V D.C. 400 cycle unit has D.C. clutch.

A. W. HAYDON COMPANY TIMING DEVICES HAVE *PROVEN SUPERIORITY*

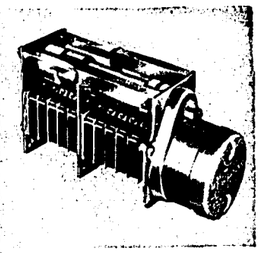
MINIATURE — HERMETICALLY SEALED TIME DELAY RELAY 6400, 11400, 24300 SERIES

- Single or multiple switching.
- Delay periods from 2 seconds to 3 hours.
- AC-DC or 400 Cycle Power.

MINIATURE — HERMETICALLY SEALED REPEAT CYCLE TIMER 3600, 13600, 24400 SERIES

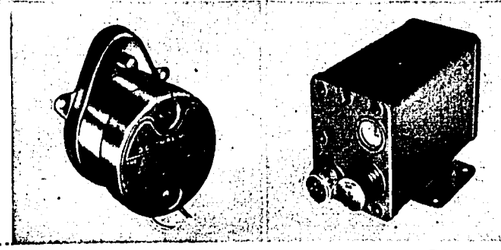
- 1 to 10 Switches.
- Wide choice of Cycling Time.
- AC-DC or 400 Cycle Power.

GENERAL SPECS. FOR MINIATURE HERMETICS
2½" Diameter Round Aluminum Housing — Flange or 3 Stud Mounting.
Glass seal terminals or header or AN connector



A. W. HAYDON CO. 400 CYCLE MOTOR 24100 SERIES has improved performance for aircraft use.

- Light in Weight — Small Compact Size.
- Now . . . you can run timing systems directly from 400 cycle power.
- Features fast start and stop, as well as high torque and reversibility.
- Get all the facts in the new A. W. Haydon Co. catalog, described below.



REPEAT CYCLE TIMER A. C. SERIES 13600 OR D. C. SERIES 3600

- Durable . . . Long life.
- Wide range of time cycles.
- Multiple control circuits.
- Easily adaptable to meet specific requirements.

SERIES 5300 D. C. TIMING MOTOR

- Rugged, Accurate, Reliable.
- Compact . . . Reversible, variable speed.
- Special windings available for operation from vacuum tubes or as tachometer generator.

NEW HERMETICALLY SEALED TIME DELAY RELAY

New Hermetically Sealed Time Delay Relay is Adjustable. Lightweight hermetically sealed enclosure is provided with adjustment knob and glass window to view calibrated dial. Provides complete protection from environmental condition, but allows variation of time delay period. Many ranges available. Standard hermetic housing available for all timers.

Burroughs **PULSE** equipment lets you assemble your own system—**IN MINUTES**

Just by connecting standard cables between Burroughs Pulse Control units, you can assemble virtually any pulse system you want. It's that easy.

Suppose you need a complex pulse sequence for testing. The basic units required to make up the system can be ordered from Burroughs—and delivered from stock. Connect them together, and there's your system. You've saved time-consuming "breadboard" engineering, equipment cost, and delay on your primary project. What's more, your Burroughs Pulse Equipment can be used over and over again on different, future projects.

To meet the growing need for versatile pulse control systems, Burroughs offers a whole family of matched pulse handling units: pulse generators, coincidence detectors, flip-flops, gating circuits, etc. During the past four years, this equipment has been in use by such prominent organizations as MIT, Consolidated Engineering Corp., Wayne University, Stanford Research Institute, and many others.

Let us help you get started quicker on pending engineering work. Write us a letter outlining briefly your pulse system requirements. Dept. P-1, Electronic Instruments Division, Burroughs Corp., 1209 Vine St., Philadelphia 7, Pa.

COAXIAL CRYSTAL MIXER
BROAD BAND FIXED TUNED

Broad Band Crystal Mixer Model CM107

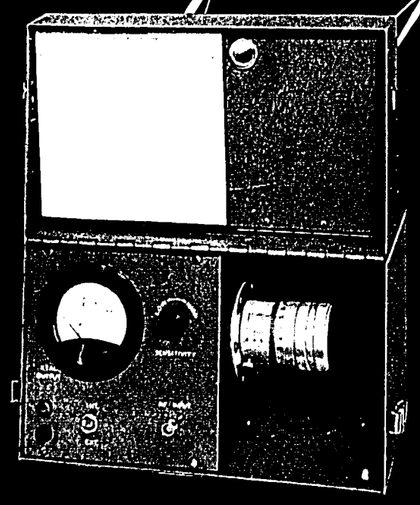
INPUT VSWR: Better than 2 to 1, without adjustments, for all frequencies within the nominal frequency range.

LOCAL OSCILLATOR POWER REQUIREMENT: 10 Milliwatts. Oscillator injector is adjustable to accommodate large variations in oscillator power.

LOCAL OSCILLATOR VSWR: Better than 2 to 1 with any L. O. injector adjustment.

LOCAL OSCILLATOR REJECTION AT I. F. OUTPUT: Better than 30 DB.

MODEL	FREQ. RANGE IN MC
CM-107A	225 to 400
CM-107A1	300 to 530
CM-107A2	510 to 760
CM-107B	750 to 1210
CM-107C	1120 to 1700
CM-107D	1700 to 2600
CM-107E	2600 to 4000
CM-107F	4000 to 5600



Specify Input Connector: Type "N" or UG-46/U.

COMPLETELY — SELF-CONTAINED FIELD TEST INSTRUMENTS — by

FREQUENCY STANDARDS

These precision-built field test instruments were designed by Frequency Standards to provide rapid and accurate means of frequency measurement in the field. Frequency is determined by means of a micrometer dial. This reading is translated to frequency by accurate individual calibration charts or curves. Transducers, fittings, and cables can be supplied to meet the requirements of customers and convenient storage space for these items is provided in the lid of the instruments.

MODEL	FREQUENCY RANGE	ACCURACY
912-4	900-1200 MC	.01%
1217-4	1200-1700 MC	.02%
1723-4	1700-2300 MC	.02%
2335-4	2300-3500 MC	.02%
3545-4	3500-4500 MC	.01%
4458-4	4400-5800 MC	.01%
5882-4	5800-8200 MC	.01%

BOLOMETERS & Thermistors

N-610B BOLOMETER

N-333 Thermistor

N-821B BOLOMETER

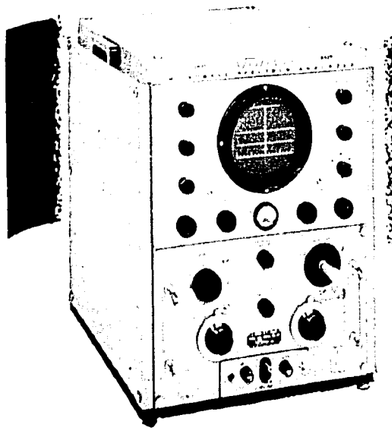
N-334 Thermistor

Features:

BOLOMETERS

N-610B—Interchangeable with IN21 and IN23 crystals
- 200 ohms at 8.75 ma bias
- Sensitivity 4.5 ohms/mw
- Frequency Range DC—12.4 kmc
- Total Power 32 mw

N-821B—For use in bolometer or barretter mounts
- Electrical specifications same as N-610B.



THERMISTORS

N-333 • MOUNTS in all crystal Detector mounts
- Operates with all power meters and bridges
- Resistance: 100 to 200 ohms depending on bias
- Detecting Element: Veco 32A5/32A26 Thermistor
- Frequency Range: DC to 12.4 K mc

N-334 • MOUNTS in bolometer or barretter mounts
- Electrical specification same as N-333

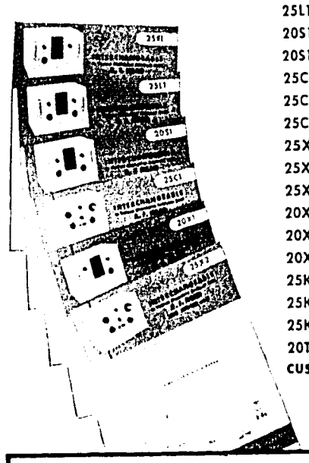
New VECTRON MICROWAVE SPECTRUM ANALYZER SA25

A Sensitive Test Instrument for Design, Manufacture, Installation and Maintenance of Microwave Radar, Altimeter, Guided Missile, Television Relay, Communication and Control Equipment.

Accurate Microwave Measurements including:



1. Basic frequency of the carrier and all side bands
2. Undesired microwave frequencies being generated
3. Relative intensity of signals, wanted and unwanted
4. Instability in terms of frequency and power output.

Engineered to meet present and future requirements

Vectron's SA25 Microwave Spectrum Analyzer has been engineered to serve present needs while it anticipates future trends in electronic and communication equipment. As this yearbook goes to press, the Bulletins listed below are only a few weeks old. They present a complete description of and detailed specifications for the SA25 and its Interchangeable RF Heads. Improvements and new features will be covered in the literature you receive.

ENGINEERS LIKE THESE FEATURES

- Interchangeable R. F. Heads for specific frequency (or band) coverage — 300 mc/s to 40 kmc/s.
- 5" medium persistence C R T display.
- 20 kilocycle bandwidth I. F. amplifier. Stable low noise circuit with higher usable gain.
- Dual range sweep — 2 to 20 C P S in two overlapping ranges. Single control — ready to use on either range without modification.
- Standard C R T bezel for camera or hood.
- Fully regulated DC supplies and stabilized "safety" high voltage supply.
- Minimum controls for maximum convenience.
- Amplified indication for transmission wavemeters.
- Extended low frequency response — New high-speed sweep and retrace.
- Improved power response linearity.

25L1	800-2400 mc/s
20S1	2400-3650 mc/s
20S1a	2400-4040 mc/s
25C1b	4240-4910 mc/s
25C1a	4240-5900 mc/s
25C1	5100-5900 mc/s
25X2b	5700-6600 mc/s
25X2a	5700-7425 mc/s
25X2	6250-7425 mc/s
20X1b	9500-10,250 mc/s
20X1a	8500-10,250 mc/s
20X1	8500-9660 mc/s
25K1	15,300-17,700 mc/s
25K2	22,800-26,400 mc/s
25KQ1	34,000-38,500 mc/s
20TV1	300-900 mc/s

CUSTOM HEADS

Complete Description and Detailed Specifications for the Basic Unit

If your frequency coverage requirements are not met by any of the RF Heads listed, please write and tell us your specific needs. These will be met in any one of three ways:

1. A custom RF Head.
2. An adaptation of an existing RF Head.
3. A new Vectron RF Head, completed too late to appear in this yearbook.

FOR COPIES OF ANY OF THESE BULLETINS, SEE YOUR VECTRON COMMERCIAL TEST EQUIPMENT REPRESENTATIVE OR WRITE:

VECTRON, inc. *Electronic and Electro-Mechanical Equipment*

402 MAIN STREET, WALTHAM 54, MASS.

Vectron invites your inquiries regarding the development and manufacture of:

Gyro mechanisms; Gyro stabilized Platforms; Gyros and Gyro Systems; Aircraft Instruments; Synchros and Servomechanisms; Electronic Systems; Precision Mechanical Devices; Computers and Calculators; Gear Assemblies; Microwave Equipment; Microwave Test Equipment; Radar Units and Systems; Communication Networks and Filters; Precision Electronic Components; Test Instruments

Information at high speed! "Data the way an engineer thinks" is the key to IRE DIRECTORY classifications. All products are divided into 10 fundamental groups, many of which parallel professional group organization. The grouping plan makes this the fastest working directory you ever used! No components are mixed with test equipment —you turn right to a section where each item belongs.

Yet good engineering detail is maintained. 104 basic classes of products under these ten sectional product directories keep listings from becoming cumbersome, but clearly define products.

Completeness is insured! Most firms make many products in a single classification. Wasteful, eye-confusing relisting of the same firms over and over is quite sensibly solved by using a system of codes under the 104 basic headings which actually provide 608 separate classifications. The result is a more complete picture of each firm's full line, but you travel through fewer listings.

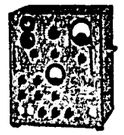
ELECTRONICS *unlimited?*

Well — almost. After you have discussed your problem with us we think you will agree that the solution of problems by electronics is almost *unlimited*. Pickard and Burns offers a completely integrated service for consultation, research, development, instrumentation, and custom manufacturing, in the various phases of electronics and radio.



The staff includes experienced specialists in electronics, physics, mathematics, navigation, geophysics, statistics and technical economics.

Facilities include a well equipped electronic laboratory, model shop, antenna laboratory and range, as well as manufacturing facilities for custom built apparatus.

RESEARCH AND DEVELOPMENT

- Radio and Microwave Communications
- Antennas
- Radar Systems
- Loran
- Instrumentation
- Automatic Recorders

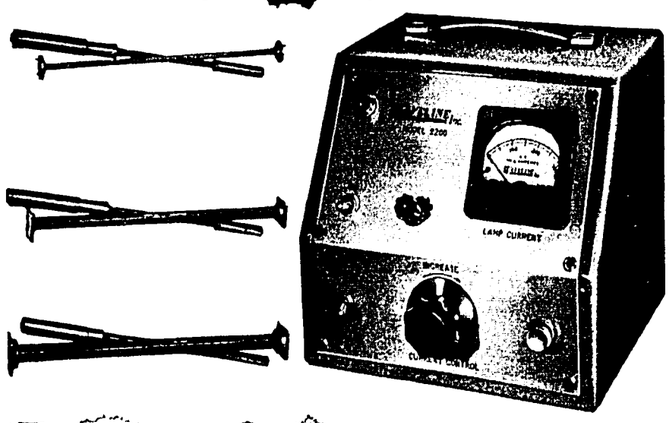
MEASUREMENT AND TEST EQUIPMENT

BOLOMETER AMPLIFIER, Model 100. A high-precision instrument to aid in measuring RF field strengths of antenna systems and RF networks.

BOLOMETER AMPLIFIER, Model 60. A highly accurate instrument not requiring the special features of Model 100.

LOG-LINEAR CONVERTER, Model 86. Will convert any 50 kc. signal to logarithmic form up to 100 db. for direct meter reading or to operate any conventional linear recorders.

PICKARD & BURNS
INCORPORATED
240 Highland Avenue,
Needham 94, Mass.



WAVELINE

MICROWAVE NOISE SOURCE

model 2200.....2600 to 26,000 mcs.

level 16.0 db above KTB at 290°K

independent of operating temperature

The WAVELINE Model 2200 microwave noise source—gas noise tube in combination with its Waveguide mount and power unit—provides a random noise squrce of known output level in the frequency range from 2,600 to 26.000 MCS. Throughout this range it also functions as an untuned termination.

The noise power of 16.0 db ±0.5 db above KTB at 290°K is available without warm-up time—and is *completely independent of operating temperature.*

The gas noise tube provides an average VSWR over the frequency range of the tube of approximately 1.07; maximum is approximately 1.13. Insertion loss of the unlighted tube is negligible; maximum inserted VSWR is 1.17. Full VSWR plots for active and inactive tube conditions are supplied with the unit.

MODEL 2200 POWER SUPPLY AND CABLES.....$150.00

Other Microwave test equipment available including complete line of Waveguide instruments. Write for general catalog of microwave instruments today!

WAVELINE INC CALDWELL NEW JERSEY

IRE provides all THREE

"Proceedings of the I.R.E."

puts your product promotion monthly before the "thinking and doing" engineers in the fabulous, fast-moving radio-electronic industry. Circulation 38,945 (ABC).

Founded in 1913, "Proceedings of the I.R.E." is the authoritative work-book of America's fastest expanding industry. In it, electronic advances, years ahead of the times, are published every month, thus keeping engineers up to the moment on all that is new in engineering research and application. Its advertising is a constant product parade of the best this industry manufactures. A vital service to all men who specify and buy, it is a proved vehicle for your consistent product promotion—*with prestige!*

IRE DIRECTORY

provides 35,000 IRE members educated to buy and specify with your detailed product data for ready reference all year long.

The IRE DIRECTORY is their working encyclopedia . . . it organizes, codes, simplifies and "indexes for use" a vast and complex industry. They look to its listing of men, firms and products as vital working information. Wherever you find IRE members, you'll find IRE DIRECTORIES close at hand for ready reference. The cost of keeping your product story before 35,000 engineers is less than you'd expect. The price of one page is less than one-half the three cents postage required to mail 35,000 letters.

RADIO ENGINEERING SHOW

. . . the eye-opening event of each radio-electronic year . . . where over 40,000 engineers come to you for all that's new.

Bringing buyers and sellers face to face to discuss engineering needs and product performance is one of IRE's great services to an industry where understanding is the key to progress. The Radio Engineering Show completes with actual product presentation the balanced promotion package of "Proceedings of the I.R.E." for product promotion and the Radio Engineers Directory for product reference.

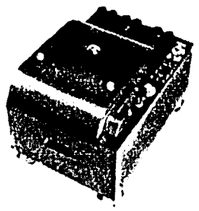
INSTRUMENTS

[illegible] today by [illegible] anticipating the future needs of scientists and testing engineers for more accurate, more versatile and more dependable instruments. This unceasing effort to foresee the demands of the future, results in the design and development of ultra-modern instruments that meet every requirement of science and industry.

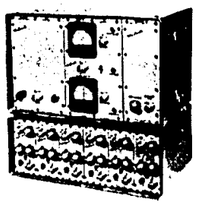


Heiland
20TH ANNIVERSARY

Heiland Research Corporation
130 East Fifth Ave Denver Colorado

Heiland

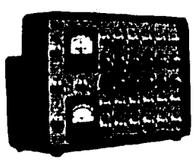
700 SERIES MULTICHANNEL RECORDING OSCILLOGRAPH—*For recording of static and dynamic current phenomena*—Simultaneous recording of as many as 60 separate channels on either 8 or 12 inch record widths and with record speeds as high as 144 inches per second assures accurate measurement of events occurring in the 0 to 5000 cps range.



Features include relay rack, table or aircraft mounting; convenient one surface operation; daylight loading; selective record speeds; trace identifier; scanning system; precision timing lines; AC or DC models available.

Heiland

MODEL 119 – SIX CHANNEL AMPLIFIER SYSTEM – Carrier linear and integrating type amplification of static and dynamic phenomena for oscillographic recording is simple and accurate when using the Heiland Amplifier System in conjunction with the Heiland Recording Oscillograph.



Among its many features are: One surface operation; high sensitivity; high power output; local and remote calibration; carrier amplification 0 to 1000 cps; linear and integrating amplification 5 to 3000 cps; relay rack, table or aircraft mountings; plug-in units.

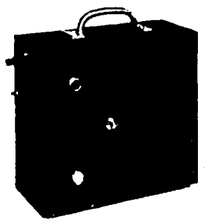
Heiland

MODEL 82-6 – SIX CHANNEL BRIDGE BALANCE & STRAIN INDICATOR UNIT—Provides a simple and accurate means of calibrating, measuring and controlling static and dynamic phenomena from resistive type transducers before applying such phenomena to the galvanometer circuits of the recording oscillograph.

Designed for relay rack, table or aircraft mounting. Each of the six separate channels may be individually calibrated to gages of different resistances and having two, three or four external arms. A micro-ammeter is provided to aid in calibration and also serves as a static strain indicator.

Heiland

MODEL 500B – PORTABLE RECORDING OSCILLOGRAPH—Provides maximum portability when it is desired to record up to 12 separate phenomena and with small size and economy as controlling factors.

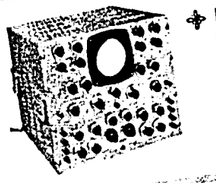


Record width–4 inches; record length–100 feet; highly accurate timing system; daylight loading; easy access; shock mount base; wide range of record speeds.

Heiland

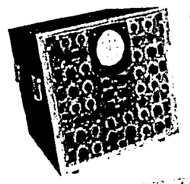
MODEL 401 – PORTABLE SIX CHANNEL RECORDING OSCILLOGRAPH – The Heiland 401 recording oscillograph has its own self contained storage battery power source. Its low cost, small size and ability to record up to six separate phenomena on two inch recording media have made this instrument popular for laboratory and industrial testing as well as in schools and universities.

Included in its features are: Accurate timing system; choice of record speeds; local or remote operation; direct monitoring; daylight loading.

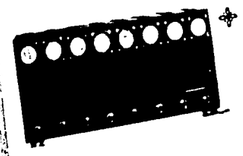


Heiland

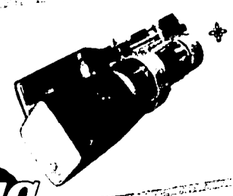
GALVANOMETERS– Heiland Galvanometers are employed in recording oscillographs to transfer minute voltage and current variations to the photographically processed record where they can be measured and studied. Heiland galvanometers are available having natural frequencies up to 5000 cps and sensitivities such that only a few micro-amperes are required for each inch of deflection on the record.
Their small size permits as many as sixty elements to be placed adjacently in a 12 inch space. One common magnet assembly provides the necessary magnetic field for each group of 12 galvanometers. Each magnet assembly is individually heated and thermostatically controlled.



Its features are: high sensitivity; broad range of frequencies; hermetically sealed; plug-in connection; precision balance; low zero drift; high amplitude recordings.



MULTI-CHANNEL SCOPES & MULTI-GUN TUBES THAT Tackle the TOUGH Jobs!



Dual Channel Scopes—Wide band, high gain. Separate intensity, focus, & axes controls on each channel. #H-21A:DC to 200kc, #H-23:DC to 1mc, #H-25:DC to 10mc.

Four Channel Scopes—Same separate controls. #H-43, DC-200kc range, for use with continuous film strip camera. #H-45, DC to 300kc range, sensitivity over .028 Vdc/in.

Multi-Tube, 8 Channel Scopes—For film strip seismography recording, etc. #H-81, AC amp. #H-82, DC amp., greater sensitivity.

Multi-Gun C.R. Tubes—Complete line from 1-gun to 10-gun types, special purpose tubes—virtually every type capable of commercial manufacture.

Complete Testing Equipment for

OMNI and

LOCALIZER RECEIVERS

A.R.C. Type H-14 Signal Generator

For a quick and accurate check by pilot before take-off, or for maintenance on the bench, this is the favored and dependable instrument. Checks up to 24 omni courses, omni course sensitivity, to-from and flag-alarm operation, and left-center-right on localizer. For ramp check, RF output 1 volt into 52 ohm line; for bench checks, 0-10,000 microvolts.

The H-16 Standard Course Checker is a companion instrument to the H-14. It makes possible a precise check on the course-accuracy of the H-14 or of any other omni signal generator. Just as a frequency meter is necessary in connection with a variable frequency signal generator, the H-16 Standard Course Checker is required in connection with a VOR signal generator for a precise measurement of phase accuracy.

These instruments sold only direct from factory.

MEASUREMENTS CORPORATION

Laboratory Standards

Throughout the world, Measurements' reputation for accuracy and reliability is your guarantee of satisfactory service.

STANDARD SIGNAL GENERATOR MODEL 65-B

FREQUENCY RANGE	OUTPUT RANGE	MODULATION
75 Kc.—30 Mc.	0.1 microvolt to 2.2 volts	AM. 0 to 100% 400 cycles or 1000 cycles External mod., 50-10,000 cycles

STANDARD SIGNAL GENERATOR MODEL 78

FREQUENCY RANGE	OUTPUT RANGE	MODULATION
15-25 Mc.; 195-225 Mc. 15-25 Mc.; 90-125 Mc. Other ranges on order	1 to 100,000 microvolts	AM. 8200-400 cycles 625—400 cycles Fixed at approximately 30%

STANDARD SIGNAL GENERATOR MODEL 78-FM

FREQUENCY RANGE	OUTPUT RANGE	MODULATION
86 Mc.—108 Mc.	1 to 100,000 microvolts	Deviation 0-300 Kc. 2 ranges FM. 400 and 8200 cycles External mod. to 15 Kc.

STANDARD SIGNAL GENERATOR MODEL 80

FREQUENCY RANGE	OUTPUT RANGE	MODULATION
2 Mc.—400 Mc.	0.1 to 100,000 microvolts	AM. 0 to 30% 400 cycles or 1000 cycles External mod., 50-10,000 cycles

STANDARD SIGNAL GENERATOR MODEL 82

FREQUENCY RANGE	OUTPUT RANGE	MODULATION
20 cycles to 200 Kc. 80 Kc. to 50 Mc.	0-50 volts 0.1 microvolt to 1 volt	Continuously variable 0-50% from 20 cycles to 20 Kc.

STANDARD SIGNAL GENERATOR MODEL 84

FREQUENCY RANGE	OUTPUT RANGE	MODULATION
300 Mc.—1000 Mc.	0.1 to 100,000 microvolts	AM. 0 to 30%, 400, 1000, or 2500 cycles. Internal pulse modulator External mod., 50-30,000 cycles.

STANDARD SIGNAL GENERATOR MODEL 84-TV

FREQUENCY RANGE	OUTPUT RANGE	MODULATION
300 Mc. to 1000 Mc.	Continuously variable from 0.1 microvolt to 1.0 volt	Continuously variable 0 to 30% External modulation 20 to 20,000 cycles.

STANDARD SIGNAL GENERATOR MODEL 90

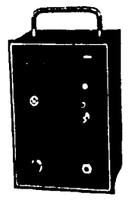
FREQUENCY RANGE	OUTPUT RANGE	MODULATION
20 Mc.—250 Mc.	0.3 microvolt to 0.1 volt	Continuously variable, 0 to 100% Sinusoidal modulation 30 cycles 5 mc Composite TV modulation.

PULSE GENERATOR MODEL 79-B

FREQUENCY RANGE	PULSE WIDTH	OUTPUT
60 to 100,000 cycles	Continuously variable from 0.5 to 40 microseconds	Approx. 150 v. positive with respect to ground. "Sync Output" 35 v. positive with respect to ground.

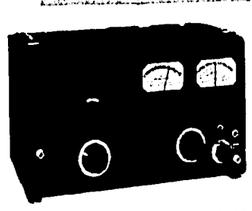
SQUARE WAVE GENERATOR MODEL 71

FREQUENCY RANGE	WAVE SHAPE	OUTPUT
Continuously variable 6 to 100,000 cycles	Rise time less than 0.2 microseconds with negligible overshoot	Step attenuator 75, 50, 25, 15, 10, 5 peak volts fixed and 0 to 2.5 volts continuously variable



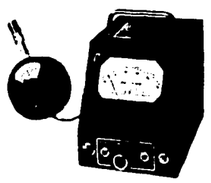
VACUUM TUBE VOLTMETERS

MODEL 62



VOLTAGE RANGE	FREQUENCY RANGE	INPUT IMPEDANCE
0-1, 0-3, 0-30 and 0-100 volts AC or DC	30 cycles to over 150 Mc.	Approximately 7 mmfd

MODEL 67



VOLTAGE RANGE	FREQUENCY RANGE	INPUT IMPEDANCE
.0005 to 300 volts peak-to-peak	5 to 100,000 sine-wave cycles per second	1 megohm shunted by 30 mmfd.

CRYSTAL CALIBRATOR MODEL 111

STANDARD SIGNAL GENERATOR MODEL 80

MEGACYCLE METER MODEL 59

U.H.F. FIELD STRENGTH METER MODEL 58

FREQUENCY RANGE	INPUT VOLTAGE RANGE
15 Mc to 150 Mc.	1 to 100,000 microvolts in antenna. 1 to 100 microvolts on semi-logarithmic output meter, balanced resistance attenuator with ratios of 10, 100 and 1000 ahead of all tubes.

INTERMODULATION METER MODEL 31

INTERMODULATION RANGE	FREQUENCIES (CYCLES)	ANALYZER INPUT VOLTAGES
3%, 10% and 30% Full scale	LF 60 cps HF 3000 cps	Full scale ranges of 3, 10, 30 volts RMS

MEGACYCLE METERS MODELS 59 LF—59—59 UHF

FREQUENCY RANGE	FREQUENCY ACCURACY	MODULATION
0.1 Mc to 4.5 Mc 7.2 Mc to 400 Mc 430 Mc to 940 Mc	Within ± 2%	CW or 120 cycles fixed at approximately 30%. Provision for external modulation

CRYSTAL CALIBRATORS

MODEL 111

FREQUENCY RANGE	FREQUENCY ACCURACY	HARMONIC RANGE
250 Kc.—1000 Mc	0.002%	.25 Mc Oscillator .25-450 Mc. 1 Mc Oscillator 1-600 Mc. 10 Mc. Oscillator 10-1000 Mc.

MODEL 111-B

FREQUENCY RANGE	FREQUENCY ACCURACY	HARMONIC RANGE
100 Kc.—1000 Mc.	0.002%	1 Mc. Oscillator .1 — 450 Mc. 1 Mc. Oscillator 1 — 600 Mc. 10 Mc. Oscillator 10—1000 Mc.

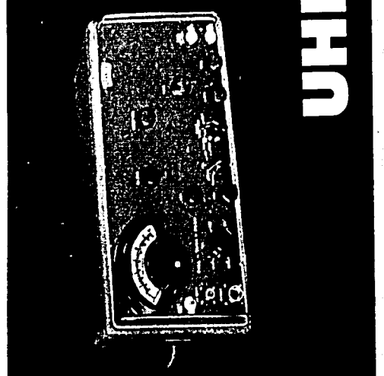
PHAZOR Pat. Pend. **PHASE METER MODEL 200A**

$349.50 F.O.B. New York, N. Y.

Measures phase shift in transformers, amplifiers, filters, and phase displacement networks.
- Measures from 0 to 360 degrees.
- Readings not affected by noise and harmonics.
- Phase shifts of the order of .01 degree can be measured employing special circuit techniques.
- Measures in-phase and quadrature components separately.

SPECIFICATIONS



Accuracy—Basic accuracy plus or minus 2 degrees. Plus or minus 1 degree due to meter error.
Noise and Harmonic Rejection—40 db. down
Sensitivity—6 millivolts full scale
Maximum Input Voltage—125 volts RMS
Peak Input Signal—400 volts
Frequency Range—20 to 20,000 cps.
Input Impedance
High Gain—2.0 megohm shunted by 25 mmfd.
Low Gain—2.5 megohm shunted by 10 mmfd.
Reference Input Impedance—4000 ohms
Power Supply—105 to 125 volts, 60 cps., 25 watts
Dimensions—Length 15 in., Hgt. 9 in., Depth 8 in.
Weight—25 pounds

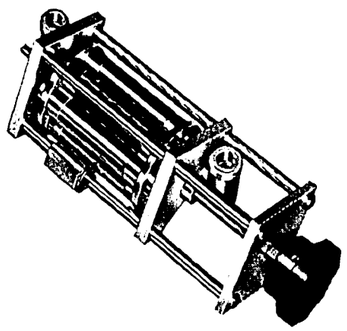
Consult the advertisements in this book for the detailed information you need in specifying and buying.

UHF

NM-50A 375mc to 1000mc

Commercial Equivalent of AN/URM-17.
Frequency range includes Citizens Band and UHF color TV Band.

VHF



NM-30A 20mc to 400mc

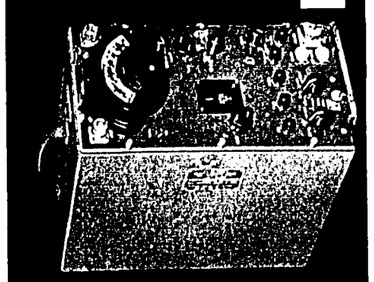
Commercial Equivalent of AN/URM-47. Frequency range includes FM and TV bands.

PRECISION ATTENUATION TO 3000mc!

TURRET ATTENUATOR featuring "PULL-TURN-PUSH" action

FREQUENCY RANGE: dc to 3000 mc.
CHARACTERISTIC IMPEDANCE: 50 ohms
CONNECTORS: Type "N" Coaxial female fittings each end
AVAILABLE ATTENUATION: Any value from .1 db to 60 db
VSWR: ≤1.2, dc to 3000 mc., for all values from 10 to 60 db
≤1.5, dc to 3000 mc., for values from .1 to 9 db
ACCURACY: ±0.5 db
POWER RATING: One watt sine wave power dissipation

Send for free bulletin entitled "Measurement of RF Attenuation"
Inquiries invited concerning pads or turrets with different connector styles



Single "IN-THE-LINE" ATTENUATOR PADS and 50 ohm COAXIAL TERMINATION

SWEEPMASTER

Sweep Frequency Generators give you these outstanding advantages

- A frequency Marker with an accuracy of ± 2%, independent of Sweepwidth, is inserted after external detection, eliminating undesirable transient distortion or limiting. This unique marker is independently adjustable in amplitude.
- An attenuator whose performance is free of frequency distortion, providing an output Envelope flat to within ± 1 db over the maximum sweep range.
- Separate examination of either the positive or negative envelope by front panel control.
- Durable, compact, lightweight Output and Detector Probes.

Descriptive Specifications

MODEL	FREQUENCY MARKER RANGE	SWEEPWIDTH CONTINUOUS ADJUSTMENT	RF OUTPUT 50 OHM* TERMINATION
SM I	100 KC to 11 MC	150 KC to 14 MC	1 Volt RMS
SM II	500 KC to 50 MC	150 KC to 20 MC	0.1 Volt RMS
SM III	500 KC to 75 MC	150 KC to 20 MC	0.1 Volt RMS

*75 ohm available when specified

MANUFACTURERS ENGINEERING & EQUIPMENT CORP.
5 Sunset Lane Hatboro, Pa.

Code number at end of each address refers to product or service sub classifications listed at the head of the major classification.

NEW!

UHF GRID DIP METER

300 TO 1000 MEGACYCLES

FEATURES:

★ Exceptionally wide frequency range.

★ High sensitivity for *both* capacitive and inductive coupling.

★ No wiping contacts.

★ May also be used as a sensitive high Q absorbtion frequency meter.

★ Frequency accuracy: ±2% *(individually calibrated dial.)*

★ 18 inches total dial scale readable to ¼% anywhere on dial.

★ High stability RF circuit. Short term stability approximately .01% after initial warm up.

★ Provision for internal or external modulation.

PRICE $275

Part VI SERVICES & MATERIALS

8. Raw Materials and Services
9. Education & Publishing
10. Distribution

The first few times you use this

EDGE INDEX

follow the "How to use" instructions slowly—ONE STEP AT A TIME.

After that you will be able to open easily and almost instantly to the section or letter that you seek.

HOW TO USE

1. With the directory open on the desk, bend the book almost double in your left hand, with your thumb just below this line.
2. From one-line or two-line symbol adjacent to the letter or subject you seek, run your eye across horizontally to a corresponding page-edge symbol.
3. Open there with your right hand.

IT IS EASIER IF YOU "FAN" OR "RIFFLE" THE LAST FEW PAGES WITH YOUR RIGHT THUMB. THE EDGE INDEXES COVERING THE OTHER DIRECTORIES WILL BE FOUND OPPOSITE PAGES 240, 270, & 400.

For complete list of products and services, arranged alphabetically for fast reference, see the eight-page pink section preceding page 1.

Complete-Data Spreads Part I 2

Classifications with a System!

THE IRE Directory Product Classifications have both a pattern and a purpose. They differ widely from most product indexes, deliberately. They aim to organize the hundreds of products and services of a complex technical industry according to the way engineers think. To this end, the product grouping follows the pattern of the IRE Professional Groups, broadly. The result is a division of all products and services into ten fundamental indexes into which 104 basic classifications have been organized.

YOU will note that we here differ from most directory compilers, for we do not mix meters with motors simply for alphabetical reasons. Products used in "Audio" whether components or complete apparatus form the first fundamental group. Yet, the same manufacturer and product may also appear in the "Component Parts" section. This system gives subject grouping for speed and convenience. A directory should aid a man who has forgotten some detail, or product name. Ours helps by grouping products as one would *think*.

1. **Audio Frequency Equipment** (Products 1 to 11)
2. **Broadcasting Equipment** (Products 12 to 17)
3. **Communications Equipment** (Products 18 to 25)
4. **Component Parts** (Products 26 to 62)
5. **Applications of Electronics** (Products 63 to 70)
6. **Radar, Microwave, UHF** (Products 71 to 74)
7. **Test & Measuring Equipment** (Products 92 to 101)
8. **Services and Materials** (Groups 75 to 91)

   Here we separate the consultant, the fabricating firm, the machine for radio manufacturing, and basic materials from being lost in an alphabetical maze of component and test equipment names.
9. **Education & Publishing** (Groups 102 & 103)
10. **Distribution Functions** (Service 104)

For detailed identification, these 104 products and services, grouped in the 10 indexes, are further defined into over 600 named products. We have tried to avoid oversimplification, and a tremendous amount of information is given by our product number system. But, the basic indexing adds speed. Purely alphabetical directories are as slow and cumbersome as a telephone book. IRE engineers have liked our system better!

For safety, an alphabetical "terminology" index is given, preceding the product system in the pink pages introducing the company index. You will note also that after each firm, its products are listed by number code in the alphabetical list, and that sub-classifications shown by number code in the product indexes give much detail. Just a little study of the system will help you get great good from this book.

The IRE DIRECTORY is 10 Indexes in one book.

1954 I.R.E. DIRECTORY READER SERVICE REPLY CARD

Place a 2¢ stamp on one or more of the perforated cards below, and they will be promptly forwarded to the manufacturers listed on the back. If you prefer to send your specific requirements, a letter would be more advantageous, however be sure to enclose the reply card.

1954 IRE DIRECTORY

A Directory of 8. Services and Raw Materials

To the engineer with a manufacturing problem, this section provides a special listing of the services and products which are basic to production. Separate from actual components, these are the base sources of manufacture, ranging from the research functions of Consulting Engineers, to subcontracting assemblers, and from basic raw materials such as ceramics, metals and staples, like wire, to such specialties as the parts for vacuum tubes. Here is a useful section, well illumined by informative advertising, which will serve you well, and often.

17 Product and Service groups give detail on 102 items the production engineer and designer may need.

The products and services of the Radio-Electronics industry have been organized into ten basic directories following closely the organization of the IRE Professional Groups. But 104 major product groups are numbered throughout.

Always consult the pink pages at the start of the Directory of firms, for a terminology cross-index, or to find products by name. The pink pages list 608 products by name, as well as under the product groups. Page numbers are given for speed.

75 Cable & Wire.
76 Ceramics.
77 Consulting Engineers.
78 Core Materials.
79 Fabricators & Services.
80 Gasses & Vapors.
81 Hardware & Findings.
82 Hermetic Seals.
83 Insulating Materials.
84 Laboratories & Custom Builders.
85 Lacquers, Paints, Compounds & Waxes.
86 Machinery & Tools.
87 Metals.
88 Moulded Products.
89 Plastics.
90 Solder.
91 Vacuum Tube Parts.

Key Man Coverage!

ENGINEERS are the most "literate" men in the world! Engineers do not know everything, but they do know where to look it up. "Engineers set the specs!" "Engineers are educated to buy!" You can only sell a technical industry through its technical men.

That is why reference advertising in the DIRECTORY every IRE Member gets and uses, covers the key men you need to sell! They know how to use IRE DIRECTORY information, and do use it. Have you told them your story?

In order to improve the grouping of products in the 1954 IRE Directory one of the 10 basic directories has been moved out of order. The directory of test equipment begins on page 435.

75. Cable & Wire.

5. Aluminum
10. Co-axial cables
15. Copper, bare
20. Low-loss, high-frequency types
25. Magnet wire
30. Precious & rare metals wire
35. Pre-formed wire harnesses
40. Rubber insulated
45. Shielded
50. Synthetic insulated
55. Wire mesh
60. Woven wire braid

Serving the Electronic Industry . . .

ALLOY METAL

WIRE • ROD • STRIP

- **Nickel Alloys**
- **Stainless Steels**
- **Electrical Resistance Alloys**

Alloy Metal Wire Company offers the electronic industry a wide selection of alloys in a full range of sizes—and backed by 35 years experience in the metal alloy field. Wire, rod and strip are available with outstanding electrical properties, special magnetic properties, high temperature resistance, corrosion resistance, excellent spring characteristics and good mechanical properties.

Nickel alloy and stainless steel wire are also available in a variety of special cross-sectional shapes, including oval, square, hexagon, teardrop, half oval, half round, wedge, D-shape and keystone.

Alloy Metal Wire Company engineers will be happy to help you select the right material for your application. Write today for our technical handbooks.

Alloy Metal Wire Company Materials

NICKEL ALLOYS	STAINLESS STEELS		ELECTRICAL RESISTANCE ALLOYS
	Chromium Nickel Grades	Straight Chromium Grades	
Nickel—Grade A	Almet 302	Almet 405	Alray A (80 Ni—20 Cr)
Grade D	Almet 304	Almet 410	
Grade E	Almet 17-7PH	Almet 420	Alray C (62 Ni—15 Cr—Bal Fe)
Duranickel ("Z" Nickel)	Almet 305	Almet 430	
Monel	Almet 308	Almet 434	Alray D (35 Ni—18 Cr—Bal Fe)
"R" Monel (Free Machining)	Almet 309	Almet 442	
"K" Monel	Almet 310	Almet 446	Excelsior (55 Cu—45 Ni)
"KR" Monel (Free Machining)	Almet 314		
Inconel	Almet 316		
Inconel X	Almet 317		
Inconel W	Almet 330		
	Almet 347		
	Almet C-20		

Other Alloy Metal Wire Co. products: *36%, 42%, 49% and 52% Nickel Irons; Nickel Clad Copper; Titanium; Special Alloys for high temperature springs.*

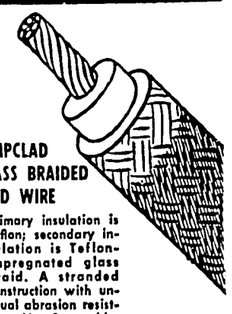
STOP RF LEAKAGE ON THE DRAWING BOARD

. . . WHEN YOU DESIGN METEX ELECTRONIC WEATHERSTRIPPING INTO YOUR EQUIPMENT YOU GET ITS POSITIVE SHIELDING EFFECTIVENESS — AT MAXIMUM OVERALL ECONOMY

Plan *now* to take full advantage of *Metex Electronic Weatherstripping's* unusual effectiveness in shielding all types of electronic equipment. Because it is made of *knitted* wire mesh, *Metex Electronic Weatherstripping* is both conductive and resilient. It assures positive metal-to-metal contact between all mating surfaces. And being resilient it accommodates itself positively to surface inequalities.

In reality, *Metex Electronic Weatherstripping* can do more for you than just shield RF leakage. It can cut the cost of machining mating surfaces to close tolerances. It can eliminate the need for extra fasteners and many other costly means of making joints RF tight.



Applications in which *Metex Electronic Weatherstripping* has already proved its effectiveness include pulse modulator shields, wave-guide choke-flange gaskets, local oscillators on TV sets, dielectric heaters, etc.

For detailed information on METEX ELECTRONIC PRODUCTS, write for FREE copy of "Metex Electronic Weatherstrips" or outline your SPECIFIC shielding problem — it will receive our immediate attention.

METAL TEXTILE CORPORATION

ROSELLE, NEW JERSEY

TEMPCLAD GLASS BRAIDED LEAD WIRE

Primary insulation is Teflon; secondary insulation is Teflon-impregnated glass braid. A stranded construction with unusual abrasion resistance. Non-flammable.

see #7 below

From the list below select the wire which meets your needs:

1 TEMPRITE TEFLON MAGNET WIRE — Sizes from 14–50 AWG incl. Withstands temperatures from —90 C —260 C. Single heavy, triple or quad thickness.

2 TEMPRITE-X SPECIAL TEFLON MAGNET WIRE — Same characteristics and sizes as regular Temprite magnet wire, but specially processed for severe applications.

3 THERMALON SILICONE MAGNET WIRE — Sizes from 14 — 50 AWG incl. Used for temperatures from —54 C—180 C. Made in single or heavy thickness.

4 TEMPVAR W A ENAMEL MAGNET WIRE — Sizes from 14—50 AWG incl. Excellent physical and electrical properties, is impervious to Freon 22. Standard space factor.

5 TEMPRENE TEFLON HOOK-UP WIRE — Sizes from 30—10 AWG incl. Unaffected by temperatures from —90 C—260 C. Excellent dielectric, impervious to all commercial solvents. Solid colors or spiral striped in 55 different color combinations. Made to meet MIL-W-16878A.

6 TEMPREX TEFLON EXTRUDED HOOK-UP WIRE — Sizes from 30—10 AWG incl. Types E and EE of MIL-W-16878A in 14 solid colors. Same characteristics as Temprene.

7 TEMPCLAD TEFLON FIBERGLAS LEAD WIRE — Sizes from 30—8 AWG incl. Made to MIL W 7139, for temperatures from —90 — 260 C. Suitable where maximum abrasion protection or resistance to mechanical stress is required.

8 RETEP TEFLON SATURATED GLASS BRAID LEAD WIRE — Low cost, low voltage push-back type for the range -90 C—260 C. Retains flexibility after impregnation.

9 NEBROC TEFLON FIBERGLAS LACING CORD — Developed especially for wiring harnesses or coil tying. Made in sizes from .009 — .076 and in tape form.

10 TEMPTUBE TEFLON FIBERGLAS TUBING — Sizes up to 1" I.D. Fully saturated for high dielectric and maximum abrasion resistance. Colors on request.

WIRES, CABLES, UHF INSULATION by REX

The REX PLANTS at WEST ACTON, MASS. 35 minutes N.W. of Boston

TRY OUR QUALITY PRODUCTS FOR THE ELECTRONIC INDUSTRY

UHF INSULATION

REXOLITE 1422

Sheets and rods with the electrical properties of polystyrene and the machinability of free-turning brass. Rexolite 1422 is a thermosetting cross linked styrene copolymer. Dielectric constant 2.5. Dissipation factor .00015 — .0003 at one megacycle.

REXOLITE 2101 — NEW

A glass reinforced laminate with fine UHF electrical properties in the same general range as Rexolite 1422 (see left) but with the added properties of good punchability, high impact strength and surprisingly low price.

WIRES & CABLES

SPECIALTY CABLES

Communication and control cables of all types. Excellent cable engineering. Fine cabling, shielding and jacketing work.

COAXIAL CABLES

Quotations on request for both special and standard coaxial cables.

REX K-F INSULATED WIRE AND CABLES

REX K-F WIRE insulated with trifluoro monochloroethylene (per Mil-W 12349) sets new high standards for hook-up wire. Write for full information.

TEFLON INSULATED WIRE AND CABLES

Write for full information on Rex Teflon insulated wire.

REX MICROWALL WIRES AND CABLES

High precision miniature wire for up to 120° C. Continuous operation. Write for full informaton.

TELEPHONE WIRES AND CABLES

Quotations on request for all plastic types.

REX VJN MINIATURE WIRE

Vinyl with Nylon jacket for −55°C. to 110°C. and 300 V to 2500 V. Write for full information.

MIL-SPEC WIRES

We make practically all of the plastic insulated military specification wires.

UL WIRES

Quotations on request.

Tensolite

MINIATURE SUPER-FLEXIBLE

PLASTIC INSULATED WIRE and CABLE

TENSOLON HOOK-UP WIRE

Teflon insulated for continuous use up to 250°C, "Tensolon" is available in 14 solid colors plus 819 stripe combinations and features a free-stripping, thin wall covering to MIL-W-16878A.

TENSOLEX MIL-W-76A HOOK-UP WIRE

Types LW, MW, and HW available in small wire sizes in all standard colors including spiral striping. Nylon jackets can also be supplied for greater resistance to abrasion.

SUB-MINIATURE WIRE AND CABLE

Thin wall vinyl insulation over flexible stranded conductors (AWG sizes down to #40) meets many requirements for small space factor. Available in all standard colors with or without wire braid shields.

SUPER-FLEXIBLE CABLES

Tensolite super-flexible cables, featuring the patented tensulation process, solve many problems calling for limpness and long flex life. Phonograph pick-up cables, hearing aid cordage, and telephone tinsels are regularly being supplied.

TENSOLITE WIRE KITS

For laboratory and prototype requirements, the following convenient desk size wire kits are now available from stock: Teflon Kit, SRIR Kit, Sub-miniature "1482" Kit, Flexible Cable Assortment.

SPECIAL CONSTRUCTIONS

Tensolite's engineering and development facilities are also available for collaboration in the solution of many special cable problems. Simple or complex, Tensolite will welcome an opportunity to estimate on your requirements.

Stupakoff

Electrical and Electronic

CERAMICS

Stupakoff is a leading manufacturer of ceramic products for electrical and electronic applications for all voltages, frequencies and temperatures. Parts are made of Alumina, Cordierite, Forsterite, Magnesia, Porcelain, Zircite, Titanates, Stupalith and Steatite—plain, ground, metallized or assembled.

Specialized types include resistor ceramics, metallized ceramics, high thermal shock-resisting ceramics and ceramic dielectrics. Send for information, giving proposed application and approximate specifications.

MICROWAVE DEVELOPMENTS

Wheeler Laboratories is an engineering organization offering consulting and engineering services in the fields of radio and radar.

Under the personal direction of Harold A. Wheeler, the Laboratories has enjoyed a steady growth since 1947, concentrating on the development of custom-made microwave components and equipment to fill the specific needs of our clients. To meet this expanding program, the staff has been increasing through the regular addition of particularly capable young engineers, and the laboratory facilities are presently being augmented to include a field station for testing antennas.

A brief summary of our work will be sent on request, and comprehensive engineering reports on some of our developments are available. Inquiries are welcomed regarding your particular problems in microwave design and development.

Wheeler Laboratories, Inc.

Intricate parts and precision components *can be LECTROFORMED!**

If the radio frequency component you need cannot be made by conventional methods or is difficult and costly to manufacture, the possibilities are it can be ***LECTROFORMED.***

* Trademark

LECTROFORMING can produce parts of intricate design, accurate interior dimensions and with high interior surface finish up to 5 micro-inch. Various metals may be used (such as silver, gold, copper, nickel and/or iron) to meet specific requirements for conductivity, strength and corrosion resistance.

LECTROFORMING achieves dimensional stability impossible by any other method.

LECTROFORMING is the manufacturing of an article by the electrodeposition of metal on a form of predetermined size, shape and finish. We welcome the opportunity to discuss your problem, no matter how difficult it may seem.

ENCAPSULATION*

. . . for the most exacting requirements of the electronic industry.

Impervious to climatic destruction—greater mechanical strength—improved appearance—reduction in size and weight—tamper proof—are but a few of the advantages of this LESS COSTLY, modern method of HERMETIC SEALING, adaptable to the smallest component or the largest assembly.

Our engineers will be pleased to discuss applications with you—and embed or encapsulate samples to your requirements. Write, wire or phone today.

*Fosterite - Permafil - Scotchcast - Acme - Stypol Araldite - Hysol - Epon - Paraplex - Stycast — and many others.

PHOTO Etched Components

INTRICATE SHAPES IN METALS UP TO 1/16 THICK PRODUCED DIRECT FROM YOUR DRAWING IN QUANTITIES FROM 1 TO 10,000

condenser plates - screens for tube grids — wave guides flat springs - stators - are only a few of many parts that can be produced by our PHOTO ETCHED method. Ideal for small runs on intricate parts. A drawing of the part — same size up to 6 times size — is all that is required.

YOUR LAYOUT ETCHED IN STEEL UP TO 1" THICK FOR DIES, JIGS, FIXTURES Saves die makers time on layout. Drawing is reproduced and etched on die block or drill jig.

Tri-Point specializes in the *machining* of Precision plastic components for electrical, and mechanical applications. A wealth of experience and skill has been acquired in working with all types of Plastics.

TRI-POINT is actively engaged in producing vast quantities of precision plastic parts for aircraft, instrument, radio, television and various electronic manufacturers.

TEFLON* • KEL-F† • NYLON • REXOLITE • PHENOLICS
In stock at all times.

Regardless of the complexity of the parts you need, Tri-Point possesses the technical and engineering down to earth "know how" necessary to fill your requirements promptly, efficiently and economically.

Send us your requirements and specifications.

Tri-Point engineers will welcome an opportunity to help you with any problems concerning the *MACHINING* of plastic component parts.

* DuPont Trade-Mark for tetrafluorethylene resin
† M. W. Kellogg Company Trade-Mark for trifluorochloroethylene polymers

Write for our bulletin 542.

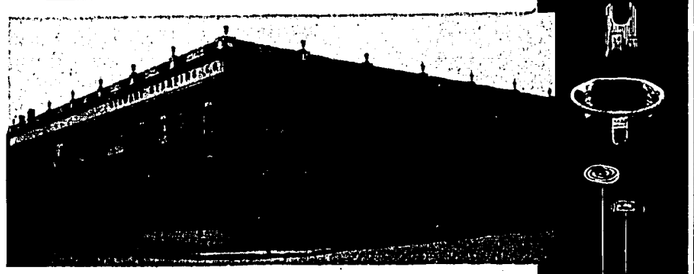
Information at high speed! "Data the way an engineer thinks" is the key to IRE DIRECTORY classifications. All products are divided into 10 fundamental groups, many of which parallel professional group organization. The grouping plan makes this the fastest working directory you ever used! No components are mixed with test equipment—you turn right to a section where each item belongs.

Yet good engineering detail is maintained. 104 basic classes of products under these ten sectional product directories keep listings from becoming cumbersome, but clearly define products.



Completeness is insured! Most firms make many products in a single-classification. Wasteful, eye-confusing relisting of the same firms over and over is quite sensibly solved by using a system of codes under the 104 basic headings which actually provide 608 separate classifications. The result is a more complete picture of each firm's full line, but you travel through fewer listings.

☆ fabricators
of Electrical and Electronic Components

We Specialize in **METAL STAMPING** *and Service*

This is Stewart Stamping's modern plant . . . equipped with high-speed, electronically controlled metal working equipment of our own design. In it we produce high quality metal stampings for **ON TIME** delivery. A large inventory of raw stock is always on hand.

Bring us your hard-to-solve problems of:
• Multi-Slide forming from progressive sectional dies, steel or carbide • Metal stamping in all metals and alloys • Hot-tinning, nickel, cadmium or zinc plating • Wire forming • Welding wire to progressive stamping at high speed

Skilled craftsmen are ready to design carbide or steel dies and tooling to suit your special needs. You are assured of dependable, courteous service—and a firm delivery date. Send a sample or blueprint for a quotation. Or write for our free catalog of standard parts.

A Complete Alphabetical Index of all Products

Listed in this Directory will be found in the eight-page pink insert immediately preceding page 1 of the products and firms section.

CTC Components shown include: A. capacitor; B. standard and insulated terminals; C. coil form kit; D. RF choke kit; E. coil forms and coils; F. coil kit; G. RF chokes; H. diode clips; I. panel hardware; J. standard and custom terminal boards; K. ceramic board.

One big family with a single thought

Whether you need terminals, clips, coils, chokes, capacitors — or any of a number of electronic components — you can be sure they're right if they're made by CTC.

One continuing basic idea governs the manufacture of every CTC product. And that idea is: *quality control.* We could not guarantee our products as we do without a constant check of numerous details that determine reliable performance. Our quality control engineers see to it that these manufacturing standards are consistently maintained — right through to periodic microscopic inspection.

Pictured here are a number of components available at CTC including our three kits. These items come in standard forms and are also custom engineered to meet your particular requirements. We would be glad to give you complete details, including specifications and prices, on any or all CTC units — as well as information on how CTC components can be specially designed to solve your individual electronic components problems.

You will find it well worthwhile to use components that are *guaranteed.* Write to Cambridge Thermionic Corporation, 440 Concord Avenue, Cambridge 38, Mass. West Coast manufacturers contact: E. V. Roberts, 5068 West Washington Blvd., Los Angeles 16 and 988 Market Street, San Francisco, California.

SMALL PARTS can play a BIG PART in...

Lower Production Costs!

Leading manufacturers in the electronics, machinery, appliance and toy fields have been saving substantially by using precision Multi-Swage parts instead of those previously made by turning, drilling, stamping or forming.

HERE ARE ONLY A FEW TYPICAL TINY PARTS MADE BY BEAD CHAIN'S *Economical, Dependable* **MULTI-SWAGE METHOD**

LET BEAD CHAIN MAKE YOUR

Tiny Parts to your Specifications at far less cost!

The advanced manufacturing method developed and used exclusively by Bead Chain swages practically any type of small tubular part from flat stock into precision forms with positive, tight seams . . . and does it *Automatically.* If you can use high-volume production . . . we can deliver it at a much faster rate . . . and at far less cost! Scrap is eliminated! Deliveries to you are dependably prompt!

We can supply you with parts that are beaded, grooved, shouldered and made with almost any metal. Diameters up to 1/4", lengths to 1 1/2"

This catalog can save you a lot of production time and money! Write for it

today!

GET PROOF-POSITIVE COST COMPARISONS!

Send us a blueprint or sample and quantity requirements. We will quickly show you the big economies we can deliver.

BEAD CHAIN®

Original and World's Largest Producer of Bead Chain

MANY MONEY SAVING APPLICATIONS OF MULTI-SWAGE PARTS IN THE

- **ELECTRICAL**
- **MECHANICAL**
- **PLASTICS and TOY FIELDS**

THE BEAD CHAIN MFG. CO • 60 Mountain Grove Street, Bridgeport 5, Conn.

COMMERCIAL PLASTICS CO.

Information at high speed! "Data the way an engineer thinks" is the key to IRE DIRECTORY classifications. All products are divided into 10 fundamental groups, many of which parallel professional group organization. The grouping plan makes this the fastest working directory you ever used! No components are mixed with test equipment—you turn right to a section where each item belongs.

Yet good engineering detail is maintained. 104 basic classes of products under these ten sectional product directories keep listings from becoming cumbersome, but clearly define products. Overlapping listings are skillfully eliminated. Simplicity makes this book easy to work with—insures faster finding of facts when forgotten. Thus the faults of terminology listings are avoided.

Completeness is insured! Most firms make many products in a single classification. Wasteful, eye-confusing relisting of the same firms over and over is quite sensibly solved by using a system of codes under the 104 basic headings which actually provide 608 separate classifications. A more complete picture of what each firm's full line is results, but you travel through fewer listings. The "Copp Principle" of Directory indexing makes these lists wide, well marked highways to information—fast.

3000 Firms listed. The alphabetical directory gives a clear definition of these firms by showing any or all of the ten fundamental groups in which these firms belong after every name.

Ads positioned with reason! In a DIRECTORY where ads play an important part in supplying information the user wants and needs, it makes good sense to cross-reference every advertiser in each listing so that the user can quickly find more detail. Ads are also placed facing company alphabetical listings, or in the product section in which they properly belong. No effort is spared to "organize" ad information.

More advertisers—more information! Never before have so many advertisers served IRE readers with so much information! The advertisers' list this year is truly a "social register" of this great industry.

GARDE MANUFACTURING COMPANY

MOLDERS OF THERMOPLASTIC AND THERMOSETTING MATERIALS

588 Eddy Street Providence 3, Rhode Island Sales Representatives in Principal Cities

There are

3 SPECIFIC WAYS

in which "Proceedings of the I.R.E." serves the advertiser differently and more effectively than other publications.

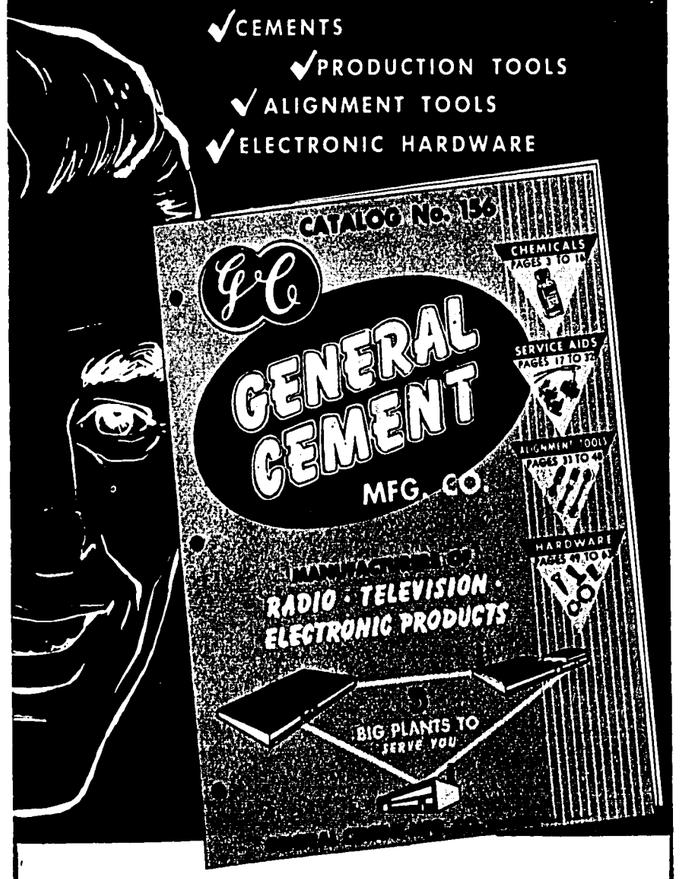
1. Pre-Specification Selling

Because "Proceedings of the I.R.E." publishes basic research and engineering application articles it is closely studied by those design engineers who must "keep ahead of the market." Often, the research published leads the industry production by from two to six years! The alert engineer, who needs this amount of time for his own design applications and for tooling up and changing the production in his own factory, studies the "Proceedings of the I.R.E." carefully. Its articles keep him abreast with the changes that will inevitably come and make it possible for him to be ready for them. This is the time for you to sell the unknown engineer designing the never-dreamed-of product "before it happens!" It is an insurance that you will be ahead of the market instead of behind it.

2. Personal Connection to the Individual

The Institute of Radio Engineers is an engineering society for individual engineers who must qualify on their own education, experience and engineering work. Thus, the magazine follows the reader as his private possession, wherever he goes. Wherever new engineering progress is developing, the work is done by individual engineers—and it is these men that must be sold! Only the engineer knows enough to specify and buy in a highly technical industry. Selling is a matter of reaching the minds of men because *a company cannot sign a purchase order*. Wherever radio engineering activity is the greatest, companies employ IRE members. An engineer moves into a new job in advance of production and with him goes "Proceedings of the I.R.E.," with all the advertising you so urgently need to place where engineering activity is the greatest.

3. Economy



It is a specific purpose of the Institute of Radio Engineers that its advertising rates should benefit and help the industry grow, by being economical. Part of the economy of a tax-free organization is thus passed on to advertisers in the form of low-cost advertising to a high-quality audience. The page rate per thousand engineers of "Proceedings of the I.R.E." is the lowest in the radio-electronic industry by deliberate intent. Thus, the Institute finds an extra way that it can help the firms that hire its engineers to gain new business at lower costs.

A Complete Alphabetical Index of all Products

Listed in this Directory will be found in the eight-page pink insert immediately preceding page 1 of the products and firms section.

For easier-to-tie knots *that will not slip!*

HEMINWAY & BARTLETT

Fungus-Proof

NYLON LACING CORDS and FLAT BRAIDED TAPES

- Revolutionary synthetic resin coating prevents knots from slipping.
- Laces faster and tighter with less effort. Unique "plastic memory" actually causes lacing to tighten *itself* after knot is made!
- Its greater strength means minimum breakage – minimum rejects.
- The synthetic resin coating retains the desirable malleability of wax and yet has a melting point of over 190°F. It is non-toxic to humans.
- Complies with *ALL* construction and fungus-proof requirements of Govt. Spec Jan-T-713 and Jan-T-152.

Cords and tapes are also available with wax finish.

NEW "PARAFORMED" SPIRAL WOUND PAPER TUBES

DO YOU HAVE A SPACE PROBLEM?

Eliminates squeezing operation of finished coil and possibility of shorts due to fractured enamel insulation.

For the first time, a paper tube like this—developed and perfected by PARAMOUNT after years of research! No artificial heat or pressure is used in its manufacture—*"PARAFORMING" takes place at the time of actual winding.* No sharp outside edges to cut the wire during winding of coils. Has great rigidity and physical strength. Permits coil manufacturers to hold *much closer tolerances.* No need for wedges to tighten the winding on the laminated core. Coils can be automatically stacked much faster, too. The new "PARAFORMED" tubes are approved and used by leading manufacturers. *And they cost no more!*

WRITE ON COMPANY LETTERHEAD FOR STOCK ARBOR LIST OF OVER 2000 SIZES

Paramount PAPER TUBE CORP.
617 LAFAYETTE ST., FORT WAYNE 2, IND.
Standard of the Coil Winding Industry for Over 20 Years

Plan with FLEXIBLE SHAFTS

FLEXIBLE SHAFTS

Make for simple grouping of working units and insure quiet, smooth trouble-free operation.

Flexible shafts offer a more economical construction and lower maintenance cost.

Direct alignment in remote control or power transmission around corners is a saving in space and operation.

Write on your letterhead for our Flexible Shaft Manual

IRE provides all THREE

"Proceedings of the I.R.E."

puts your product promotion monthly before the "thinking and doing" engineers in the fabulous, fast-moving radio-electronic industry. Circulation 38,945 (ABC).

Founded in 1913, "Proceedings of the I.R.E." is the authoritative work-book of America's fastest expanding industry. In it, electronic advances, years ahead of the times, are published every month, thus keeping engineers up to the moment on all that is new in engineering research and application. Its advertising is a constant product parade of the best this industry manufactures. A vital service to all men who specify and buy, it is a proved vehicle for your consistent product promotion—*with prestige!*

IRE DIRECTORY

provides 35,000 IRE members educated to buy and specify with your detailed product data for ready reference all year long.

The IRE DIRECTORY is their working encyclopedia . . . it organizes, codes, simplifies and "indexes for use" a vast and complex industry. They look to its listing of men, firms and products as vital working information. Wherever you find IRE members, you'll find IRE DIRECTORIES close at hand for ready reference. The cost of keeping your product story before 35,000 engineers is less than you'd expect. The price of one page is less than one-half the three cents postage required to mail 35,000 letters.

RADIO ENGINEERING SHOW

. . . the eye-opening event of each radio-electronic year . . . where over 40,000 engineers come to you for all that's new.

Bringing buyers and sellers face to face to discuss engineering needs and product performance is one of IRE's great services to an industry where understanding is the key to progress. The Radio Engineering Show completes with actual product presentation the balanced promotion package of "Proceedings of the I.R.E." for product promotion and the Radio Engineers Directory for product reference.

A NEW TECHNIQUE FOR BETTER VISIBILITY

by **NIGHT**

by **DAY**

ILLUMINATED

- SWITCH ASSEMBLIES
- CONTROL PANELS
- KNOBS
- DIALS

Because of a unique technique, characteristics never before achieved are available in panels, knobs, switches, flat and drum dials. The lettering is *flush*, on a non-reflecting black background, providing maximum angle visibility with no eye fatigue. When lighted from behind, there is no after-image.

An illustrated booklet showing some of the present applications of this new technique (and perhaps provoking some new ideas) is available.

Write for Booklet #11.

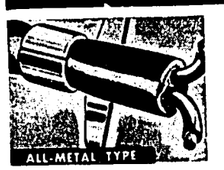
4 WAYS TO END ALL CORD AND CABLE SERVICE FAILURES *Economically*

PROTECT YOUR PRODUCT



at point of strain

Protect product saleability too — by insuring long life for cords, cables and conductors. Genuine "GRIPMASTER" Strain Reliefs provide these vital features—

- ★ Anchor cords to housings
- ★ Eliminate taping or threading
- ★ Prevent unraveling
- ★ Prevent cord pull damage
- ★ All sizes and styles
- ★ Easy to apply
- ★ Inexpensive

Gripmaster Strain Reliefs are "tremendous trifles" that make good products better!

Ask for samples.

GRIPMASTER STRAIN RELIEFS

Interruptions due to cable and cord connection failures are eliminated because they anchor the cord to the product at the point of strain. GRIPMASTER Strain Reliefs can withstand pulls up to 100 lbs., and are acceptable to Underwriters Laboratories. All types Reg. U. S. Pat. Off.

WIRE BINDING SLEEVES—Preventing fraying of cord ends, these specially-treated rubber tubes are available in five sizes to fit wires to .790

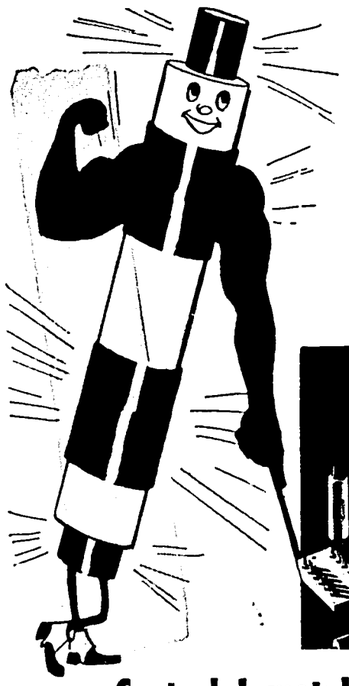
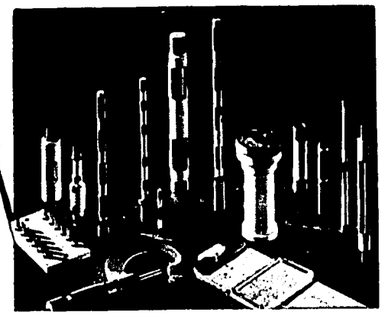
Stupakoff

GLASS to METAL SEALS



Stupakoff Kovar-Glass Seals are made with hard glass, assuring the highest degree of protection against thermal shock and weathering.

Stupakoff Kovar-Glass Seals are *not* mechanical compression seals, but develop a permanent and impervious bond through chemical interaction of the oxide of Kovar fused with hard boro-silicate glass.



Kovar is the ideal metal for such seals because its expansion characteristics closely match those of hard glass.

Available in a wide variety of standard sizes and designs, and can be made in many special forms. We will gladly submit samples and quotations.

STUPAKOFF CERAMIC & MANUFACTURING CO.
LATROBE, PENNSYLVANIA
DIVISION OF THE CARBORUNDUM COMPANY

Strength like beauty must be more than skin deep

Centralab metallized ceramics have a bond of 2000 psi

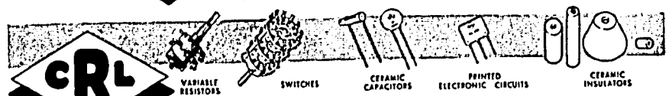
- Centralab's bond of non-ferrous metals to ceramic bodies is almost as strong as the material itself.
- Your precision requirements met by combining most desirable properties of metals and ceramic materials with JAN-specified characteristics, including:
- High dielectric strength — 240 volts per mil.
- Low loss at high frequency — loss factor at 1 MC — .007.
- High mechanical strength—18,000 psi, modulus of rupture.
- Harder than quartz — 7.5 Mohs' scale.
- Impervious to moisture or acids (.005%).

Metallizing is available for variometer rotor bars, feed-thru bushings, hermetically sealed parts, precision-machined units and many other applications. Send Centralab your problem.

Centralab is the leader in ceramic design and development

1 Quality ceramics since 1928.

2 Largest staff of engineers, physicists, and chemists of any ceramic producer available for consultation.



3 Modern, mechanized production facilities for your volume ceramic requirements.

Write now! Before you forget . . . for complete details on Centralab quality ceramics.

Industry's greatest source of standard and special electronic components

THE *Elusive Electron*

He's our benefactor . . . our servant . . .and our master, all in one. He works constantly, and seems to have unlimited powers. But, he's elusive. If conditions do not suit him, he becomes "lazy" or slips away completely.

Giant industries have originated because of him. One of these industries makes coils and transformers in which our friend lives and works. Hartford City Paper Company produces electrical papers used by many manufacturers for layer insulation, caliper .0005 and up in three finishes. They prefer Hartford's electrical papers because they cost less, and yet make the elusive electron perform at his peak.

If you make coils, condensers or transformers, you should know more about layer insulation paper. Write for samples, data sheets, and price lists.

3 microwave absorbents

for indoor radiation pattern measurements

Today you can simulate free space conditions indoors, at a reasonable cost, through the use of one of three Spongex Microwave Absorbents.

TYPES	1	2	3
	for 12 CM. Broadband Absorber	for 30 CM. Broadband Absorber	for 60 CM. Broadband Absorber

Manufactured to military specifications, Spongex Microwave Absorbents now are being used by government and commercial laboratories to construct anechoic chambers or darkrooms, and for screens to shield small areas. They are lightweight, flexible and easily mounted to any shape screen. Made of durable material, the absorbents can be changed from screen to screen.

Indoor use of Spongex Microwave Absorbents offers these advantages—

1 Continuity in antenna studies

2 Prevents delays due to inclement weather

3 Saves costly man-hours of work

Laboratory Quantities of

CONDUCTIVE PAINTS

for RESEARCH

and PRODUCT DESIGN

These products with their accompanying data sheets will suggest new design and production ideas for all of your electrical products. Order some now. Data sheets include current quantity prices.

S31 Basic Laboratory Kit Introductory price $49.50
This new kit, containing the conductive materials most widely used in every industry from electronics to home permanents, has more day-to-day uses in the laboratory than a multimeter. Contains $58.47 worth of materials including most of those listed below and some not listed plus instructions and manuals.

SC12 Air-Dry Silver Micropaint 1 to 4 Tr. oz. $5.95/oz.
To make "wires", shields, recording tape reversing contact areas.

SCT12 Baking Silver Micropaint 1 to 3 Tr. oz. $5.70/oz.
To make "wires", shields, terminals, etc.

SCT32 Baking Silver Micropaint 1 to 3 Tr. oz. $5.96/oz.
Similar to SCT12, but may be baked at 800° F. and used at 500° F.

SCP12 Silver Micropaint 1 to 4 Tr. oz. $6.50/oz.
Inorganic paint with water thinner. Useful to 1500° F. on inorganic bases or as temporary test terminals on organic surfaces.

SCF12 Firing Silver Micropaint 1 to 3 Tr. oz. $5.50/oz.
"Wires", shields, solder terminals on ceramic surfaces.

SS12-B Silver Shielding Micropaint
1 Tr. oz. btl. $3.70 ea.
Two ohms or less per square. 4 Tr. oz. btl. $7.45 ea.

ML12 Magnepaint, 2 oz. btl. $2.20 ea.
Magnetic paint for adjusting and increasing inductances of coils, etc.

R-series Resistance Micropaints 25 cc btl. $1.78 ea.
100 cc. btl. $5.35 ea.
Air drying for brush or spray application.
R101 = 125 ohms per square; R11 = 500 ohms per square; R21 = 12.5K per square; R31 = 310K per square R41 = 3.1 megs per square. Resistor design table with each order.

RS12 Shielding Micropaint 4 oz. btl. $1.10 ea.
1 pt. btl. $2.20 ea.
Approx. 200 ohms per square for shielding and CR tube exterior coating.

RS110 Aircraft Anti-Static Paint 1 lb. btl. $5.00 ea.
2 lb. btl. $7.75 ea.
Plastic coating type to reduce precipitation static on antenna canopies. Neoprene type also available.

SL11 Fast-Drying Solvent 100 cc btl. $1.47 ea.
For SC12, R-series, RS12, ML12, RS110

SL-2 Very Slow-Drying Solvent 100 cc btl. $1.47 ea.
For all silver paints except SC12, SCP12, SS12-B

SSL12-B Solvent for SS12-B 100 cc btl. $1.47 ea

Design and Repair of Printed Circuits
(Manual) $0.50 ea. (14 pages)

All above available for immediate shipment. F.O.B. New Buffalo, Mich. Terms net 30 days to rated companies, otherwise cash or C.O.D. Any or all data sheets will be sent free upon request.

MICRO-CIRCUITS CO.
NEW BUFFALO 3, MICH.

FOR
FAST PRODUCT REFERENCE

Consult the alphabetical index of products in the Pink Section preceding the "Products & Firms" section.

Here's the fastest way to produce finished wire leads!

Allen-Bradley Co., producers of motor controls, use several Artos CS-6 automatic wire cutting and stripping machines in their Milwaukee plant.

high speed ARTOS AUTOMATIC MODEL CS-6

MEASURES, CUTS and STRIPS wire, cord and cable at speeds up to 3000 pieces per hour

2-Conductor Twisted Wire

Single Conductor Solid Wire

2-Conductor Parallel Stranded Wire

300 Ohm Television Wire

SJ Cord

Heater Cord

Braided Cord With Rubber Jacket

3000 STRIPPED WIRE LEADS in one hour ...each precision-cut with both ends perfectly stripped. That's the speedy pace set by the Artos CS-6 in producing wire leads up to 15 inches in length! Production rates vary in proportion to the length cut.

Highly accurate machine operation reduces work spoilage to an absolute minimum. Errors due to the human element are eliminated. There is no cutting of strands or nicking of solid wire.

PROVED PERFORMANCE

Time-consuming hand stripping jobs which once were a bottleneck in many plants are gone forever. As a result, Artos automatic wire strippers are paying their way in the mass production of television and radio sets, electrical appliances, motor controls and instruments of all kinds.

Plan now to cut wire stripping costs in your plant... with the high speed, automatic Artos CS-6.

CS-6 CAPACITY

Finished Wire Leads Per Hour: lengths to 15", 3000; 6-4"-97" lengths, 500.

Stripping Length: 1½" max. both ends.

Cutting Length: max., 97"; min., 2"; special, ⅞".

WRITE FOR BULLETIN ▶ Descriptive technical sheet tells how the Artos CS-6 can save you money, manpower and time.

Automatic Wire Cutting and Stripping

ARTOS ENGINEERING CO.

2735 South 28th Street • Milwaukee 46, Wisconsin

There are

3 SPECIFIC WAYS

in which "Proceedings of the I.R.E." serves the advertiser differently and more effectively than other publications.

1. Pre-Specification Selling

Because "Proceedings of the I.R.E." publishes basic research and engineering application articles it is closely studied by those design engineers who must "keep ahead of the market." Often, the research published leads the industry production by from two to six years! The alert engineer, who needs this amount of time for his own design applications and for tooling up and changing the production in his own factory, studies the "Proceedings of the I.R.E." carefully. Its articles keep him abreast with the changes that will inevitably come and make it possible for him to be ready for them. This is the time for you to sell the unknown engineer designing the never-dreamed-of product "before it happens!" It is an insurance that you will be ahead of the market instead of behind it.

2. Personal Connection to the Individual

The Institute of Radio Engineers is an engineering society for individual engineers who must qualify on their own education, experience and engineering work. Thus, the magazine follows the reader as his private possession, wherever he goes. Wherever new engineering progress is developing, the work is done by individual engineers—and it is these men that must be sold! Only the engineer knows enough to specify and buy in a highly technical industry. Selling is a matter of reaching the minds of men because *a company cannot sign a purchase order*. Wherever radio engineering activity is the greatest, companies employ IRE members. An engineer moves into a new job in advance of production and with him goes "Proceedings of the I.R.E.," with all the advertising you so urgently need to place where engineering activity is the greatest.

3. Economy

It is a specific purpose of the Institute of Radio Engineers that its advertising rates should benefit and help the industry grow, by being economical. Part of the economy of a tax-free organization is thus passed on to advertisers in the form of low-cost advertising to a high-quality audience. The page rate per thousand engineers of "Proceedings of the I.R.E." is the lowest in the radio-electronic industry by deliberate intent. Thus, the Institute finds an extra way that it can help the firms that hire its engineers to gain new business at lower costs.

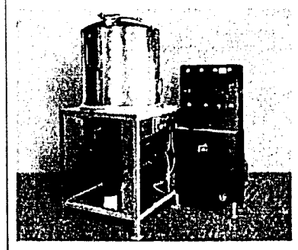
Stop your vinyl spaghetti marking problems COLD! with New heatless Kodifier® marking machine

Markings Can't Rub Off! The new KODIFIER heatless marking produces absolutely permanent code markings on vinyl sleeving. *Nothing* removes them: rough use, solvents or abrasion.

Ribbon Delivers Cold Printing! Specially-formulated INDELIDENT® process ribbon penetrates and permanently adheres to and unites with vinyl plastic materials: poly-vinyl-chloride and poly-ethylene.

Quick-Change Rotary Type! With one spin of type wheel . . . you change your code. Thus, KODIFIER is ideal for ***short runs*** where codes must be changed ***frequently*** . . . and serves equally well in ***production*** work where code remains ***constant.***



Write Dep't IR-9 today for sample processed markings and colorful brochure.

WE ALSO MAINTAIN A COMPLETE MARKING SERVICE FOR YOUR RUSH NEEDS.

TV COLOR PLATE ALUMINIZERS

Model—P-5

Model—P-6

Large scale high vacuum production evaporator with a 36" diameter stainless steel bell jar. Will handle four times the volume of an 18" bell jar model. The standard P-5 unit with the OFEC #1000 diffusion pump will produce a vacuum of 10^{-6} mm Hg within 8 minutes. Ultimate pressure is about 10^{-7} mm of mercury. The machine is fully equipped with thermocouple and Phillips type gauges for reading pressures from 0.5 to 10^{-5} mm of mercury.

A large industrial metallizer with a vacuum chamber capacity of 100 cubic feet. Its horizontal 5' diameter by 5' long welded stainless steel tank can handle almost any metallizing job in which high vacuum is used. Ideal for color plate aluminizing. The P-6 with its four OFEC #1000 high speed oil diffusion pumps and OFEC #600 booster pump backed by a Kinney 217 CFM mechanical pump will reach a pressure of 10^{-6} mm of Hg in less than 10 minutes. Ultimate vacuum is approximately 10^{-7} mm of mercury.

We can supply all types of high vacuum equipment and accessories including television tube aluminizers, oil diffusion pumps, laboratory and industrial high vacuum evaporators and vacuum furnaces. Also evaporated filming services such as: low reflection coatings, mirrors, radio frequency shielding coatings, dichroic filters, etc.

WIRE STRIPPING: Your jobs are peculiar to your own business and may be governed by such variables as kind and size of wire, what you use it for, your production requirements, and other similar factors.

So we may serve you promptly and efficiently, tell us what you are now doing and your hopes in the way of improved quality, increased production and lower costs.

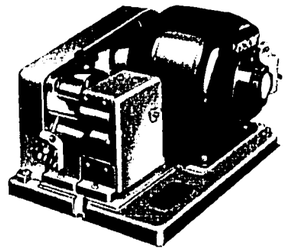

Illustration shows a MODEL "D-1" Two-Wheel Stripper, which is but one of the many different types of machines made. This one uses 1¼" diameter stripping wheels and is ordinarily used to strip any type of Film Insulation from wires in the range of AWG #25 to AWG #44. A wide variety of stripping wheels are available, made from FybRglass and Brush Wire, all designed to provide economical service.

This particular machine is only $156.25, f.o.b. Syracuse, exclusive of stripping wheels. It is available on a Test-Rental Plan or may be purchased out of savings over a ten month period.

BOESCH Winding Machines

1 Automatic Toroidal Coil Winder with Accurate Direct Reading Counter
2 Tape Winding Machines for the Taping of Toroidal Cores & Coils
3 Semi-Automatic Type Toroidal Coil Winding Machines
4 Sub-Miniature Toroidal Coil Winding Machines.
Model SM-A designed especially for winding of sub-miniature size coils.

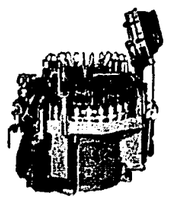
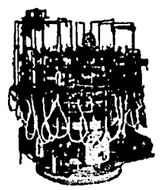
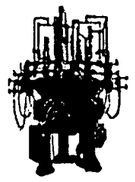
sealing glass
or sealing
glass-to-metal?



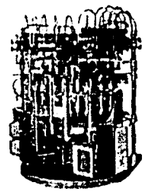
then KAHLE machinery is best for you...



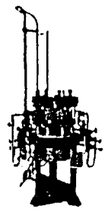
largest manufacturer
of sealing machines
for the electronics
and allied industries



Experience with the widest range of products to be sealed—whether all glass seals or glass-to-metal seals—makes Kahle your logical source for sealing machines—stationary, automatic or combination. Kahle automatic combination machines seal and exhaust in one operation—produce up to 2000 units each hour! Regardless of your product or production requirement, write **KAHLE.**



SPECIAL EXPERIMENTAL AND RESEARCH SERVICES OFFERED BY KAHLE INCLUDE:



- Special glass parts and accessories
- Special tools for research
- Special models
- Small-lot manufacture of special items for research or development
- Regular industrial engineering at regular fee or contract rates
- Special tubes, lamps, etc. for research purposes including elements and parts
- Any special equipment for manufacture or research for tubes or lamps

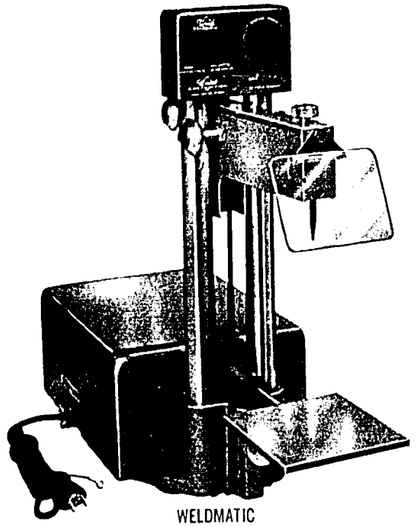
Attention Methods Engineers!

Need a "Third Hand" for wiring assemblies?



"Tiny Fix" and other Production Tool and Fixture assemblies give you just that—save you time and money by giving a "third hand" to each person using them. We design fixtures to your special needs or can supply these illustrated and others. Ask us for Literature and Prices. ●S-6 is Production Fixture with PF-311 Vise Adapter, gives complete radial action. ●TF-200 is "Tiny Fix" with TF-212 Vice Adapter, ●TF-201 is Vice Adapter, and ●PT-7-9B is a Bench Type Combination Straightener.

WELDMATIC
Model 1015

ACCESSORY PLUG-IN

TWEEZER-TYPE
HAND-PIECE

A major advance in precision metal joining

STORED-ENERGY WELDING SPEEDS ELECTRONIC ASSEMBLY

NEW METHOD

Welded electronic components and precision instruments (resistors, potentiometers, capacitors, transducers, etc.) show superior performance with lower production costs. All metals and most combinations joined in many shapes and thickness ratios. Milli-second weld-time permits precision welding of copper, silver, and other "difficult" materials.

STORED-ENERGY PRINCIPLE

Unitek Weldmatic equipment utilizes capacitor-discharge to make precision resistance welds. Energy stored is instantly adjustable over a very wide range to accommodate wires 0.0003 through 0.040 inch diameter and sheet metal 0.00005 to 0.020.

WELDMATIC FEATURES

Simple installation, rapid setup, versatility, easy operation, and low maintenance make the Model 1015 best for electronics assembly. Untrained operators make uniform, high-strength welds with no discoloration or deformation. Other models available for special jobs.

Write for descriptive brochure.

IRE provides all THREE

"Proceedings of the I.R.E."

puts your product promotion monthly before the "thinking and doing" engineers in the fabulous, fast-moving radio-electronic industry. Circulation 38,945 (ABC).

Founded in 1913, "Proceedings of the I.R.E." is the authoritative work-book of America's fastest expanding industry. In it, electronic advances, years ahead of the times, are published every month, thus keeping engineers up to the moment on all that is new in engineering research and application. Its advertising is a constant product parade of the best this industry manufactures. A vital service to all men who specify and buy, it is a proved vehicle for your consistent product promotion—*with prestige!*

IRE DIRECTORY

provides 35,000 IRE members educated to buy and specify with your detailed product data for ready reference all year long.

The IRE DIRECTORY is their working encyclopedia . . . it organizes, codes, simplifies and "indexes for use" a vast and complex industry. They look to its listing of men, firms and products as vital working information. Wherever you find IRE members, you'll find IRE DIRECTORIES close at hand for ready reference. The cost of keeping your product story before 35,000 engineers is less than you'd expect. The price of one page is less than one-half the three cents postage required to mail 35,000 letters.

RADIO ENGINEERING SHOW

. . . the eye-opening event of each radio-electronic year . . . where over 40,000 engineers come to you for all that's new.

Bringing buyers and sellers face to face to discuss engineering needs and product performance is one of IRE's great services to an industry where understanding is the key to progress. The Radio Engineering Show completes with actual product presentation the balanced promotion package of "Proceedings of the I.R.E." for product promotion and the Radio Engineers Directory for product reference.

HEAVY DUTY HANDPIECE

PENCIL HANDPIECE

"PLIERS" HANDPIECE

COMPLETE LINE
RESISTANCE SOLDERING DEVICES

Production engineers recognize the resistance soldering principle as a practical answer to heavy duty and production-line soldering problems. Initial costs are offset by immediate savings in time, material, and from increased production and efficiency. When confronted by production-line soldering problems, consider employing resistance soldering in your plant!

- faster—production increased 3 to 5 times
- economical—no wasted solder, flux or power
- safe—no burn, shock or visual arc hazard
- efficient—instantaneous, controlled heat for all types of soldered joints

Sel-Rex

Precious Metals for Plating

Pioneers in the Development of Modern Precious Metal Plating Processes

Outstanding developments by Sel-Rex in precious metals for plating have resulted in better quality at less cost for both decorative and industrial platers. Superior engineering skill and long experience in the plating field make Sel-Rex your best choice for all precious metal plating needs.

Sel-Rex BRIGHT GOLD PROCESS produces pore-free "mirror bright" deposits regardless of thickness. Eliminates need for scratch brushing or buffing. Gives excellent metal distribution and deposit is twice the hardness of conventional gold. Ideally suited for specification thickness in barrel or still plating.

Sel-Rex BRIGHT RHODIUM SOLUTIONS provide a brilliant, durable deposit that will withstand severe abrasion. The chemically stable solution is ideal for specification plating of protective coatings that will not corrode or tarnish in any atmosphere.

Sel-Rex SILVER SOL-U-SALT (Potassium Silver Cyanide) in pure crystalline form is completely soluble in water. Eliminates old fashioned mixing, calculating or filtering. Eliminates hazard of airborne dust—no insoluble particles in the bath to cause rough deposits.

Consult our engineers on any precious metal problem.
No obligation. Detailed literature available on request.

KOVAR glass sealing ALLOY

strong, durable

easy to use, available

The ideal alloy for glass sealing, Kovar matches the expansivity of certain hard glasses over the entire working temperature range. It resists mercury attack, has ample mechanical strength and seals readily with simple oxidation procedure.

Kovar produces a permanent vacuum-tight seal, and is readily machined or fabricated to permit the use of small and intricate shapes. It is of controlled composition and processing to permit duplication of results. Usable in any thickness: no need to feather edge on tubular or intricate shapes, and is relatively inexpensive, eliminating restraints on sizes and capacity. Can be welded, soldered, and brazed to other metals.

Kovar is available as sheet, strip, foil, rod, tube, wire—or fabricated cups, eyelets, leads and other shapes.

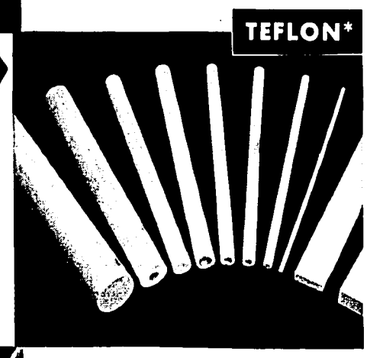
POLYPENCO® NON-METALLIC SHAPES

Use stock shapes for low cost fabrication

With POLYPENCO shapes, you can economically obtain the advantages of nylon, Teflon*, and Q-200.5 for a wide variety of components by fabricating them on standard metalworking tools. You also receive uniform high quality in every piece of stock. Most standard sizes are stocked now for immediate delivery.

NYLON

ROD: Diameters from 1/8" to 6 1/2" in lengths from 8' to 6'.



STRIP: .010" to .125" thick, 1/4" to 4" wide.

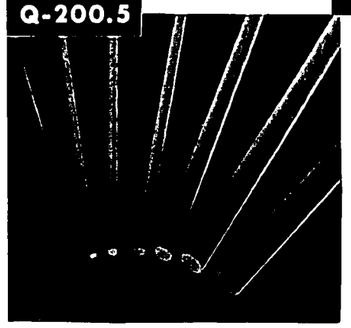
TUBING: .035" to .500" O.D., .020" to .410" I.D.

TUBULAR BAR: O.D.'s from 2" to 10" with wall thicknesses of 3/8" to 1 1/2".

SLAB: 1/4" to 1" thick, standard 10" width, discs from 1/4" to 2" thick in 6" to 12" diameters.

TEFLON*

ROD: Diameters from .030" to 4" in lengths ranging from continuous coils down to 6".



TUBING: 1/4" to 4 7/8" I.D. with walls from 1/8" to 2" thick.

SPAGHETTI TUBING: I.D.'s corresponding to American Wire Gauges 22 through 8, in lengths up to 1,000'.

TAPE: .002" to .125" thick, 1/4" to 12" wide.

SLAB: 24" or 48" squares from .125" to 1.50" thick.

Q-200.5

ROD: Diameters from 1/8" to 3 7/8" in lengths from 4' to 8'.

Other shapes and sizes can be supplied on special order.

Code number at end of each address refers to product or service sub-classifications listed at the head of the major classification.

now...TEFLON* with Certified performance

Conformance to specifications assured in **FLUOROFLEX®-T** *rod, sheet, tube*

Resistoflex will certify each shipment of "electrical grade" Fluoroflex-T products on six vital physical and electrical properties. Qualification tests are performed on all incoming Teflon powder to determine whether it will yield rods, tubes and sheets which are in conformance with specification AMS-3651 "Polytetrafluoroethylene." Processing under a quality control and inspection system approved by the USAF under MIL-Q-5923 specification maintains the identity of each lot of material through all stages of manufacture – from virgin powder to finished product.

An affidavit accompanies each shipment attesting to its conformance with AMS-3651. Certified test reports of the actual properties of any shipment will be furnished whenever they are requested.

Be *sure* of optimum performance in Teflon by specifying electrical grade Fluoroflex-T. Remember, too–Fluoroflex-T products are non-porous and stress-relieved. This means better dimensional stability, less costly machining and fewer rejects. For more details, write or phone...

**DuPont trade mark for its tetrafluoroethylene resin.*
®Resistoflex trade mark for products from fluorocarbon resins.

RESISTOFLEX

Belleville 9, N. J.

There are

3 SPECIFIC WAYS

in which "Proceedings of the I.R.E." serves the advertiser differently and more effectively than other publications.

1. Pre-Specification Selling

Because "Proceedings of the I.R.E." publishes basic research and engineering application articles it is closely studied by those design engineers who must "keep ahead of the market." Often, the research published leads the industry production by from two to six years! The alert engineer, who needs this amount of time for his own design applications and for tooling up and changing the production in his own factory, studies the "Proceedings of the I.R.E." carefully. Its articles keep him abreast with the changes that will inevitably come and make it possible for him to be ready for them. This is the time for you to sell the unknown engineer designing the never-dreamed-of product "before it happens!" It is an insurance that you will be ahead of the market instead of behind it.

2. Personal Connection to the Individual

The Institute of Radio Engineers is an engineering society for individual engineers who must qualify on their own education, experience and engineering work. Thus, the magazine follows the reader as his private possession, wherever he goes. Wherever new engineering progress is developing, the work is done by individual engineers—and it is these men that must be sold! Only the engineer knows enough to specify and buy in a highly technical industry. Selling is a matter of reaching the minds of men because *a company cannot sign a purchase order.* Wherever radio engineering activity is the greatest, companies employ IRE members. An engineer moves into a new job in advance of production and with him goes "Proceedings of the I.R.E.," with all the advertising you so urgently need to place where engineering activity is the greatest.

3. Economy

It is a specific purpose of the Institute of Radio Engineers that its advertising rates should benefit and help the industry grow, by being economical. Part of the economy of a tax-free organization is thus passed on to advertisers in the form of low-cost advertising to a high-quality audience. The page rate per thousand engineers of "Proceedings of the I.R.E." is the lowest in the radio-electronic industry by deliberate intent. Thus, the Institute finds an extra way that it can help the firms that hire its engineers to gain new business at lower costs.

Radio-Electronic Engineers will receive and use the 1954 IRE DIRECTORY

Better and Better and Better!

Up-to-dateness is almost a mania with IRE DIRECTORY compilers! Membership lists are corrected up to May 30th. Industry lists, compiled and classified by high speed IBM sorting methods are accurate to June 15th. No firm's report is older than 18 months.

Information at high speed! "Data the way an engineer thinks" is the key to IRE DIRECTORY classifications. All products are divided into 10 fundamental groups, many of which parallel professional group organization. The grouping plan makes this the fastest working directory you ever used! No components are mixed with test equipment -you turn right to a section where each item belongs.

Yet good engineering detail is maintained. 104 basic classes of products under these ten sectional product directories keep listings from becoming cumbersome, but clearly define products. Overlapping listings are skillfuly eliminated. Simplicity makes this book easy to work with--insures faster finding of facts when forgotten. Thus the faults of terminology listings are avoided.

Completeness is insured! Most firms make many products in a single classification. Wasteful, eye-confusing relisting of the same firms over and over is quite sensibly solved by using a system of codes under the 104 basic headings which actually provide 608 separate classifications. A more complete picture of what each firm's full line is results, but you travel through fewer listings. The "Copp Principle" of Directory indexing makes these lists wide, well marked highways to information —fast.

Machol Edge Index is just one more modern service to help the user find information fast.

Ads positioned with reason! In a DIRECTORY where ads play an important part in supplying information the user wants and needs, it makes good sense to cross-reference every advertiser in each listing so that the user can quickly find more detail. Ads are also placed facing company alphabetical listings, or in the product section in which they properly belong. No effort is spared to "organize" ad information.

More advertisers—more information! Never before have so many advertisers served IRE readers with so much information! The advertisers' list this year is truly a "social register" of this great industry.

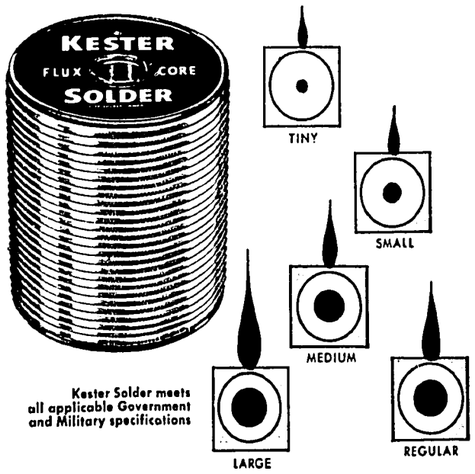
in solder flux cores, too...

the right size is important!

AND ONLY



KESTER SOLDER

GIVES YOU

5

ENGINEERED CORE SIZES!

Just as in selecting the right hat size, it's important to select the correct core size in Flux-Core Solder to give you the proper predetermined amount of Flux needed to do the job right. Core size, which controls the ratio of flux to solder regardless of strand size, is always uniform with Kester.

Kester Solder meets all applicable Government and Military specifications

With five different core sizes, available only in Kester Solder, you're sure of the desired solder-spread and absolute control of flux residue. This is a "job-insurance" feature, only to be had with Kester, that will see you through satisfactorily in your production on those exacting government contracts, and all other soldering.

KESTER SOLDER COMPANY

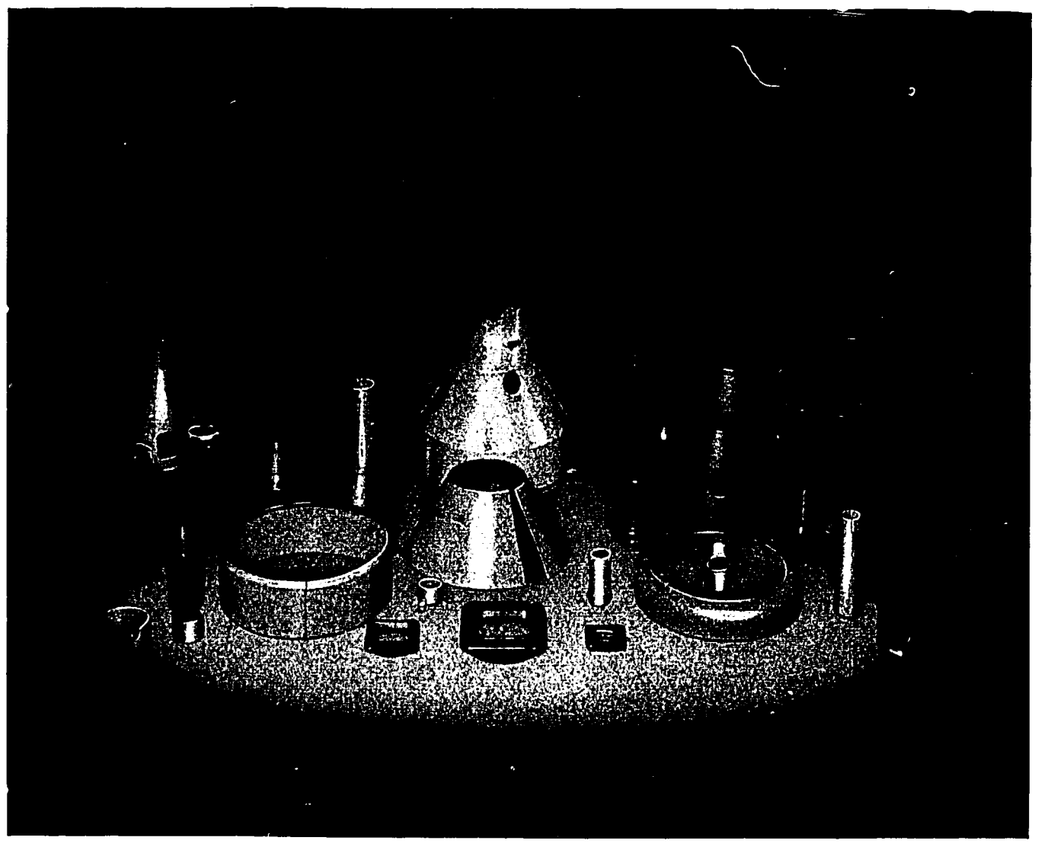
BEAD CHAIN

Multi-Swage Process

For Small Metal Parts

TRADE MARK

The advanced method for producing small metal parts — hollow or solid — beaded, grooved, shouldered, etc., — dimensions about ¼" or less diameter and up to 1½" length. This high speed process usually requires runs of 100,000 pieces, other than stock items, to justify job set-up costs.
Contact Pins have a tightly swaged seam with hole through entire length for easy threading of lead wires. Ideal for plastic, ceramic, metal and other bases or panels.
Male & Female Friction Contacts are available to close tolerances, maintain "holding power" with ease of engagement and release.
Terminals in many special and standard types, including turret-type — for flared, rolled, split, spun and other assemblies.



For further details see our advertisement on page 503.

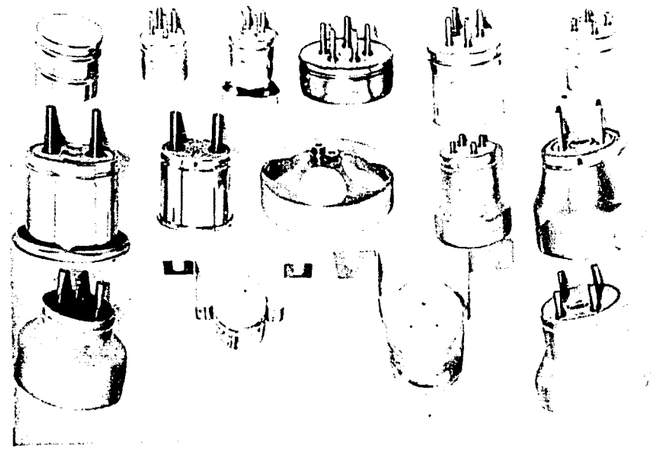
Designed for Application

Mu Metal Shields

The James Millen Mfg. Co. Inc. has for many years specialized in the production of magnetic metal cathode ray tube shields for the entire electronics industry, supplying magnetic metal shields to manufacturing companies, laboratories and research organizations. Stock shields are immediately available for all of the more popular sizes and types of cathode ray tubes as well as bezels for 2″, 3″ and 5″ size tubes.



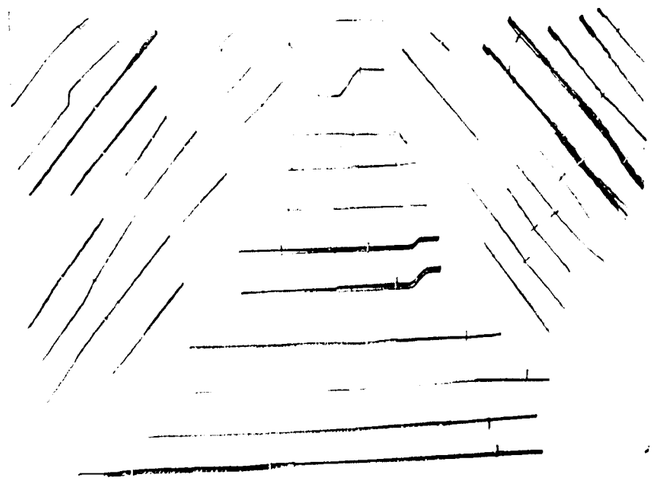
Many production problems, however, make desirable special shields designed in conjunction with the specialized requirement of the basic apparatus. Herewith, are illustrated a number of such custom built shields. Our custom design and fabrication department is at the service of our customers for the development and manufacture of magnetic metal shields of either nicoloi or mumetal for such specialized applications.

JAMES MILLEN MFG. CO., INC.

MAIN OFFICE AND FACTORY

MALDEN, MASSACHUSETTS, U.S.A.

DANIEL KONDAKJIAN TUNGSTEN LEADS—TUBE BASES



The Engineering Co. now specializing in the manufacture of Hydrogen Thyratron bases up to 6.25 in diameter. Also larger diameter bases.

Some of the popular bases which we manufacture are 50 watt, 3303B, 412 Industrial Base, Giant 7 Pin Bayonet, 4310-four pin jumbo base, Tetrode and many others.

All bases manufactured to JAN-1A/MIL-E-1B.

Bases are all given weight and strength tests.

Tungsten leads are made using General Electric Timing control. Each rod of tungsten is examined under magnifying glass to discover any flaws. Tube makers realize great loss in leakage if tungsten is not 100% pure.

Quality and low prices now available.

Send us your drawings for quotations and let us prove to you that Engineering Co. prices are OK.

A Directory of

9. Education and Publishing

The products and services of the Radio-Electronics industry have been organized into ten basic directories following closely the organization of the IRE Professional Groups. But 100 major product groups are numbered consecutively throughout.

Companies, associations, schools and publishers are contributing both training and printed education to the advancement of radio-electronics. A condensed list of those active in this field is included under the two headings,

Education
Publishing

in this special section. Note particularly the sub-classification codes at the end of each firm address.

102. Education.
- 05 Technical instruction—home study
- 10 Technical instruction—resident

103. Publishing.
- 05 Book publishers
- 10 Data sheet & manual preparation
- 15 Magazines

Always consult the pink pages at the start of the Directory of firms, for a terminology cross-index, or to find products by name. The pink pages list more than 500 products by name, as well as under the product groups. Page numbers are given for speed.

The 1954 DIRECTORY is— Better and Better and Better!

More Engineers Listed than ever before! IRE membership continues to gain and gain! More engineers (now 38,000) are listed, and therefore have a direct, personal interest in this DIRECTORY.

Up-to-dateness is almost a mania with IRE DIRECTORY compilers! Membership lists are corrected up to May 30th. Industry lists, compiled and classified by high speed IBM sorting methods are accurate to June 15th. No firm's report is older than 18 months.

Information at high speed! "Data the way an engineer thinks" is the key to IRE DIRECTORY classifications. All products are divided into 10 fundamental groups, many of which parallel professional group organization. The grouping plan makes this the fastest working directory you ever used! No components are mixed with test equipment—you turn right to a section where each item belongs.

Yet good engineering detail is maintained. 104 basic classes of products under these ten sectional products directories keep listings from becoming cumbersome, but clearly define products. Overlapping listings are skillfully eliminated. Simplicity makes the book easy to work with—insures faster finding of facts when forgotten. Thus the faults of terminology listings are avoided.

Completeness is insured! Most firms make many products in a single classification. Wasteful, eye-confusing relisting of the same firms over and over is quite sensibly solved by using a system of codes under the 104 basic headings which actually provide 608 separate classifications. A more complete picture of what each firm's full line is results, but you travel through fewer listings. The "Copp Principle" of Directory indexing makes these lists wide, well marked highways to information—fast.

3000 Firms listed. The alphabetical directory gives a clear definition of these firms by showing any or all of the fundamental groups in which these firms belong after every name.

Machol Edge Index is just one more modern service to help the user find information fast.

Ads positioned with reason! In a DIRECTORY where ads play an important part in supplying information the user wants and needs, it makes good sense to cross-reference every advertiser in each listing so that the user can quickly find more detail. Ads are also placed facing company alphabetical listings, or in the product section in which they properly belong. No effort is spared to "organize" ad information.

More advertisers—more information! Never before have so many advertisers served IRE readers with so much information! The advertisers' list this year is truly a "social register" of this great industry.

AVAILABLE BACK ISSUES
OF THE PROCEEDINGS OF THE I-R-E

One copy at $1.00 to IRE members; $2.25 to non-members; $1.65 to public libraries, colleges and subscription agencies. Postage prepaid to United States and Canada; 10¢ additional per copy to other countries. Please note special price for January 1954 Color Television issue: one copy at $1.25 to IRE members; $3.00 to non-members; $2.40 to public libraries, colleges and subscription agencies. Postage prepaid to United States and Canada; 25¢ additional per copy to other countries. The following issues are in stock as of August, 1954, and, subject to prior sale, of course, are available at this time.

1913-1915 Volumes 1-3 Quarterly

1913 Vol. 1 January (A Reprint)

1916-1926 Volumes 4-14 Bimonthly

1922 Vol. 10 June, August, October
1923 Vol. 11 April
1925 Vol. 13 April, June, December
1926 Vol. 14 February, April, August, October

1927-1938 Volumes 15-26 Monthly

1927 Vol. 15 May, October, December
1928 Vol. 16 February to December, Inc.
1929 Vol. 17 April, May, June, November
1930 Vol. 18 April to December, Inc.
1931 Vol. 19 January to November, Inc.
1932 Vol. 20 January, March to December, Inc.
1933 Vol. 21 All 12 issues
1934 Vol. 22 All 12 issues
1935 Vol. 23 All 12 issues
1936 Vol. 24 January, February, March
1937 Vol. 25 February to December, Inc.
1938 Vol. 26 All 12 issues.

1939-1954 Volumes 27-42 Monthly
New Format—Large Size

1939 Vol. 27 January, February, March, May, December
1940 Vol. 28 All 12 issues
1941 Vol. 29 All 12 issues
1942 Vol. 30 January, May, October to December, Inc.
1943 Vol. 31 February to December, Inc.
1944 Vol. 32 January, April, August to December, Inc.
1945 Vol. 33 March, May, June, November, December
1946 Vol. 34 February, April to December, Inc.
1947 Vol. 35 January to May, Inc., November, December
1948 Vol. 36 All 12 issues
1949 Vol. 37 February, March, July to December, Inc.
1950 Vol. 38 All 12 issues
1951 Vol. 39 All 12 issues
1952 Vol. 40 January to October, Inc., December
1953 Vol. 41 January to September, Inc., November, December
1954 Vol. 42 January to August, Inc.

**COMPUTERS & ROBOTS
OPERATIONS RESEARCH
SYMBOLIC LOGIC, etc.**

PUBLICATIONS

P2: COMPUTERS AND AUTOMATION. Monthly Articles on computing machinery, automatic control, cybernetics, robots, etc. Reference information: roster of organizations, list of automatic computers, etc. Annual subscription $4.50

P14: CIRCUIT ALGEBRA—INTRODUCTION. Report. Explains simply a new algebra (Hoolean algebra modified to include time) that applies to on-off circuits using electronic tubes, diodes, etc. Covers both static and sequential circuits. Applications to control, programming and computing. Problems and solutions involving circuits $1.90

P16: SYMBOLIC LOGIC—TWENTY PROBLEMS AND SOLUTIONS. Report. Contains some problems by Lewis Carroll and John Venn (out of print), and many other new problems. Guide to using symbolic logic in actual situations $1.80

. . . and 19 more publications (including plans for small robots). Any are returnable if not satisfactory. Why not ask for our free publication announcement?

COURSES

26 Courses in 12 Fields—by Mail

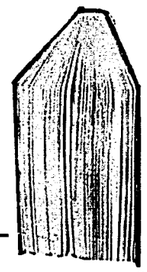
—Easy or Hard—Individuals or Study Groups—Scholarships, Incentives, etc.—Personal Teaching—Low Cost (Individual, $22 to $35; in Study Groups, as low as $9). We have students in 48 states and territories, 20 foreign countries. Ask for our course announcement—Free.

CONSULTING

We are Edmund C. Berkeley and Associates, consultants on automatic computing machinery, instructors, publishers, writers (Giant Brains or Machines that Think, Wiley, 1949, etc.), makers and exhibitors of small robots (Simon, Squee, etc.).

MAIL THIS COUPON

EDMUND C. BERKELEY AND ASSOCIATES
815 Washington St., R98, Newtonville 60, Mass.



1. Please send me publications circled: P2 P14 P16
Returnable in 7 days for full refund if not satisfactory. I enclose $..... in full payment (add 10¢ per item to cover cost of handling and mailing).

2. Please send free announcement of ☐ publications; ☐ courses; ☐ information on consulting.

My name and address are attached.

Add New Authority and Usefulness to your Library

with these McGraw-Hill books

Just Published!

1. ANALOG METHODS IN COMPUTATION AND SIMULATION

An organized treatment emphasizing engineering and scientific applications. Describes mechanical, electromechanical, electrical, and electronic analog components and how they may be combined into mathematical machines. Covers such recent advances as schemes for multiplication of variables and the uses of high-gain feedback amplifiers. **By W. W. Soroka, Prof. of Eng. Design, Univ. of Calif., 390 pages, 186 illus., $7.50.**

2. ACOUSTICS

A practical approach to better acoustics—for improved noise control, high fidelity music reproduction, and other applications. Discusses effects of sound in many aspects. Uses background of communication physicists and engineers to solve a wide variety of acoustical problems. Emphasizes practical application of electrical-circuit theory to discuss acoustics in many devices. **By Leo L. Beranek, Technical Dir., Acoustics Lab., M.I.T., 467 pages, 312 illus., $9.00.**

3. PRINCIPLES OF RADAR

Deals with fundamental concepts and techniques of pulse radar. Describes the general features of radar systems and components; discusses pulse circuits and their application to radar modulators, indicators and receivers. **By M.I.T. Radar School Staff. Revised by J. Reintjes, MIT, and G. Coate, formerly MIT. 3rd Ed., 887 pages, 565 illus., $7.75.**

4. ELECTRONIC MEASUREMENTS

Covers measurement fundamentals in conventional radio and many fields beyond it, including television, radar, and other pulsed systems. Describes microwave techniques, and a diversity of other techniques of value to the engineer in other areas. **By F. E. Terman, Dean of the School of Engineering, and J. M. Pettit, Assoc. Prof. of Elec. Eng., both Stanford Univ. 2nd Ed., 683 pages, 450 illus., $10.00.**

5. TELEVISION BROADCASTING

A practical manual that covers in detail the equipment, facilities, and techniques involved in running a television studio. Includes such topics as lighting, staging, television recording, and color television equipment. **By Howard Chinn, Columbia Broadcasting System, 700 pages, 180 illustrations, $10.00.**

6. CONTROL-SYSTEM DYNAMICS

An exposition of the "Root Locus Method" of analyzing feedback control systems—invented and developed by the author. Demonstrates techniques for determining response of linear control systems. Developing from the simple to the complex, each solution establishes a concept which permits a simpler technique to be applied to the next more complicated problem. **By W. R. Evans, North American Aviation, Downey, Calif. About 380 pages, 140 illus., In Press.**

7. MAGNETIC AMPLIFIER CIRCUITS

This practical treatment of fundamental principles, characteristics, and applications logically develops various kinds of basic and more complex magnetic amplifier circuit arrangements without extended mathematical considerations. Uses descriptive and graphical methods to give qualitative and quantitative interpretation of essential facts. Material is systematically classified by circuit functions. **By W. A. Geyger, U.S. Naval Ord. Lab. 277 pages, 135 illus., $6.00.**

8. SERVOMECHANISM ANALYSIS

A basic book presenting the essentials of the mathematical theory of servomechanisms for engineers. Giving the sound grounding in analysis that must precede successful design, the authors detail each mathematical method for analyzing servo systems. Includes physical explanations, worked examples, etc. **By G. J. Thaler, U.S. Naval Postgraduate School, and R. G. Brown, A.C. Sparkplug Div., G.M. Corp., 414 pages, 253 illus., $7.50.**

9. MUSICAL ENGINEERING

Unified treatment on all elements in production of music. Covers nature of sound, music, musical instruments, acoustics, and hearing, in both physical and psychological aspects. Gives facts to aid in study, measurement, and analysis of audio problems of many types. **By H. F. Olson, Dir., Acoustical Lab. R.C.A. Labs., Princeton, N.J. 369 pages, 303 illus., 28 tables, $7.00.**

10. RADIO ANTENNA ENGINEERING

A practical approach, enabling nonspecialists to handle ordinary problems of antenna design and construction. Covers receiving and transmitting antennas used in point-to-point ground-to-air, and military communications, as well as in broadcasting. Offers shortcut design methods to save time and reduce costs. **By E. A. Laport, Chief Engr., RCA Int. Div., 522 pages, 419 illus., $10.00.**

McGRAW-HILL ———MAIL HANDY COUPON TODAY———

Dept. IRE-D-54

McGraw-Hill Book Co., 327 W. 41st St., NYC 36

Please send me the book(s) circled to the right for 10 days examination on approval. In 10 days I will remit price of books I wish to keep, plus a few cents for delivery, and return unwanted books postpaid. (We pay delivery charge if you remit with this coupon. Same return privilege.)

There are

3 SPECIFIC WAYS

in which "Proceedings of the I.R.E." serves the advertiser differently and more effectively than other publications.

1. Pre-Specification Selling

Because "Proceedings of the I.R.E." publishes basic research and engineering application articles it is closely studied by those design engineers who must "keep ahead of the market." Often, the research published leads the industry production by from two to six years! The alert engineer, who needs this amount of time for his own design applications and for tooling up and changing the production in his own factory, studies the "Proceedings of the I.R.E." carefully. Its articles keep him abreast with the changes that will inevitably come and make it possible for him to be ready for them. This is the time for you to sell the unknown engineer designing the never-dreamed-of product "before it happens!" It is an insurance that you will be ahead of the market instead of behind it.

2. Personal Connection to the Individual

The Institute of Radio Engineers is an engineering society for individual engineers who must qualify on their own education, experience and engineering work. Thus, the magazine follows the reader as his private possession, wherever he goes. Wherever new engineering progress is developing, the work is done by individual engineers—and it is these men that must be sold! Only the engineer knows enough to specify and buy in a highly technical industry. Selling is a matter of reaching the minds of men because *a company cannot sign a purchase order.* Wherever radio engineering activity is the greatest, companies employ IRE members. An engineer moves into a new job in advance of production and with him goes "Proceedings of the I.R.E.," with all the advertising you so urgently need to place where engineering activity is the greatest.

3. Economy

It is a specific purpose of the Institute of Radio Engineers that its advertising rates should benefit and help the industry grow, by being economical. Part of the economy of a tax-free organization is thus passed on to advertisers in the form of low-cost advertising to a high-quality audience. The page rate per thousand engineers of "Proceedings of the I.R.E." is the lowest in the radio-electronic industry by deliberate intent. Thus, the Institute finds an extra way that it can help the firms that hire its engineers to gain new business at lower costs.

Wiley Books in Engineering

TELEVISION New 2nd Edition . . .

The Electronics of Image Transmission in Color and Monochrome

By V. K. ZWORYKIN and G. A. MORTON, both of RCA Laboratories. This entirely new and greatly enlarged 2nd Edition of *Television* covers the great technological advances of the past 14 years and is packed with practical, up-to-date information. It is the *first* book to give adequate coverage to *color* television. Its consideration of *both* the theoretical and practical aspects is sufficiently detailed to give a sound working understanding of this important new development. 1954. 1037 pages. 728 illus. $17.50.

APPLIED ELECTRONICS 2nd Edition

By TRUMAN S. GRAY, The Massachusetts Institute of Technology. A widely useful book which emphasizes, in its new edition, basic physical phenomena, limitations of tube and circuit devices, semi-conductor rectifiers and transistors, and applications common to the several branches of electrical engineering. Appendices include constants and conversion factors. Co-published by Wiley and The Technology Press, M.I.T. 1954. 881 pages. $9.00.

ELECTROACOUSTICS

An Analysis of Transduction and Its Historical Background

By FREDERICK V. HUNT, *Harvard University.* This new monograph is the first work to provide a complete and orderly history of the evolution, growth, and modern characteristics of the major electroacoustical transducer types. Harvard Monograph in Applied Science No. 5. Co-published with Harvard University Press. 1954. 260 pages. Illus. $6.00.

Principles of TRANSISTOR CIRCUITS

Edited by RICHARD F. SHEA, General Electric Company. The first full-length, integrated work on transistor characteristics and circuits. ". . . a single source for the cream of current thinking on the subject. . . . We believe that this definitive work will soon be known as the 'bible' of the transistor engineer."—*Radio & Television News.* 1953. 535 pages. 502 illus. $11.00.

ULTRA HIGH FREQUENCY PROPAGATION

By H. R. REED, University of Maryland and C. M. RUSSELL, both with the U. S. Naval Air Test Center, Patuxent River, Md. Presents new data on latest developments and experiments, on such critical factors as: reflection, diffraction, turbulence, directivity and divergence, installation practice and maintenance problems. 1953. 562 pages. 286 illus. $9.50.

FIELDS and WAVES in MODERN RADIO

2nd Edition

By SIMON RAMO, Ramo-Wooldridge Corporation, and JOHN R. WHINNERY, University of California, Berkeley. Treats applied electromagnetic theory at an intermediate level to provide a thorough grounding in principles plus much material for use in practical problems. The relation between low frequency and high frequency field concepts is clearly discussed, as well as the relation between field and circuit concepts. 1953. 576 pages. Illus. $8.75.

VACUUM TUBE OSCILLATORS

By WILLIAM A. EDSON, Stanford University. This is the first book to present a balanced treatment of the design and operation of vacuum tube oscillators and the two major factors affecting the behavior of these devices. Two facts are stressed throughout: (1) the behavior of oscillators is predictable; and (2) circuits *can* and *should* be designed to meet specific needs. 1953. 476 pages. 268 illus. $8.50.

ENGINEERING ANALYSIS: An Introduction to Professional Method

By D. W. VER PLANCK and B. R. TEARE, Jr., both of the Carnegie Institute of Technology. 1954. 344 pages. Illus. $6.00.

RADIO RECEIVER DESIGN, Part One Second Edition

By K. R. STURLEY, British Broadcasting Corporation. 1954. 667 pages. Illus. $10.00.

The PHYSICS of EXPERIMENTAL METHOD

By H. J. J. BRADDICK, University of Manchester, England. 1954. 404 pages. Illus. $7.00.

Introductory CIRCUIT THEORY

By ERNST A. GUILLEMIN, The Massachusetts Institute of Technology. 1953. 550 pages. 391 illus. $8.50.

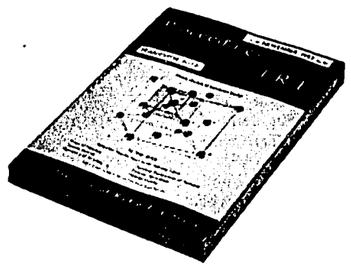
Sub-miniaturization!

Very soon, a tumbler-full of complex radio-electronic equipment will fly an airplane! Circuits have been flattened to the size of a post-card, and radio-tubes to match-heads. "Radio" becomes a part of every industry!

WHAT BECOMES SMALLER



Radio engineers call this program "subminiaturization", a self-contradictory word because as radio components are engineered down to thimble and pinhead size, electronic applications in industry become wider and greater. Already, military needs have stimulated radio-engineers to produce a signal system in the nose of a bomb, no larger than a man's hat which will direct and control tons of steel and dynamite. The wrist-watch radio is a practical reality.

WHAT GROWS LARGER

The industry radio has created is skyrocketing to new heights. Symbolic of the whole trend is the bristling array of antennae on the tops of homes and apartments and the jump in TV picture tube sizes from 6 to 27 inches. More than 1,000 technical meetings a year are held by IRE's 38,000 members in seventy-eight active sections in every part of the English Speaking world. The volume of published information required to feed this engineering progress is enormous.

For forty years, without need of change of name or direction, The Institute of Radio Engineers has published its "Proceedings of the I.R.E."—a monthly magazine by radio-electronic engineers, for radio engineers. It is an unabridged, accurate, working textbook-up-to-the-minute. 481 advertisers use its pages to keep their products before design men—to sell in the prespecification stage of this dynamic industry.

ABC AUDITED PAID CIRCULATION

"Proceedings of the I·R·E"

A Directory of

10. Distributional Functions for the Industry

The products and services of the Radio-Electronics industry have been organized into ten basic directories following closely to the organization of the IRE Professional Groups. But 104 major product groups are numbered throughout.

The final section of our "10 in 1" directory is the complement to manufacturing, which is distribution. It has proved to be a real service to IRE member engineers and executives to put into this book a list of annually checked jobbers, wholesalers and distributors. Many of these firms are identified further by the initials REP, as member of "The Representatives," or NEDA, as member of the National Electronic Dealers Association. The number after the address codes each firm as shown at start of listing, top left.

104 Distribution.
- 05 Export & Import
- 10 Jobbers & Wholesalers
- 15 Manufacturers Representatives
- 20 Sales & Service
- 25 Surplus dealers

Always consult the pink pages at the start of the Directory of firms, for a terminology cross-index, or to find products by name. The pink pages list 608 products by name, as well as under the product groups. Page numbers are given for speed.

104. Distribution.

5. Export & Import
10. Jobbers & Wholesalers
15. Manufacturers Representatives
20. Sales & Service
25. Surplus dealers

(Continued on page 561)

Code number at end of each address refers to product or service sub-classifications listed at the head of the major classification.

Classifications with a System!

THE IRE Directory Product Classifications have both a pattern and a purpose. They differ widely from most product indexes, deliberately. They aim to organize the hundreds of products and services of a complex technical industry according to the way engineers think. To this end, the product grouping follows the pattern of the IRE Professional Groups, broadly. The result is a division of all products and services into ten fundamental indexes into which 104 basic classifications have been organized.

You will note that we here differ from most directory compilers, for we do not mix meters with motors simply for alphabetical reasons. Products used in "Audio" whether components or complete apparatus form the first fundamental group. Yet, the same manufacturer and product may also appear in the "Component Parts" section. This system gives subject grouping for speed and convenience. A directory should aid a man who has forgotten some detail, or product name. Ours helps by grouping products as one would *think*.

1. **Audio Frequency Equipment** (Products 1 to 11)
2. **Broadcasting Equipment** (Products 12 to 17)
3. **Communications Equipment** (Products 18 to 25)
4. **Component Parts** (Products 26 to 62)
5. **Applications of Electronics** (Products 63 to 70)
6. **Radar, Microwave, UHF** (Products 71 to 74)
7. **Test & Measuring Equipment** (Products 92 to 101)
8. **Services and Materials** (Groups 75 to 91)

   Here we separate the consultant, the fabricating firm, the machine for radio manufacturing, and basic materials from being lost in an alphabetical maze of component and test equipment names.

9. **Education & Publishing** (Groups 102 & 103)
10. **Distribution Functions** (Service 104)

For detailed identification, these 104 products and services, grouped in the 10 indexes, are further defined into over 600 named products. We have tried to avoid oversimplification, and a tremendous amount of information is given by our product number system. But, the basic indexing adds speed. Purely alphabetical directories are as slow and cumbersome as a telephone book. IRE engineers have liked our system better!

For safety, an alphabetical "terminology" index is given, preceding the product system in the pink pages introducing the company index. You will note also that after each firm, its products are listed by number code in the alphabetical list, and that sub-classifications shown by number code in the product indexes give much detail. Just a little study of the system will help you get great good from this book.

The IRE DIRECTORY is 10 Indexes in one book.

Give your distributors the selling support they need with advertisements in "Proceedings of the IRE" and the IRE Directory.

the most widely used electronic supply guide

ALLIED'S

308-PAGE BUYING GUIDE

the world's largest stocks of Electronic Supplies for Industry

Simplify and speed your purchasing of electronic supplies and equipment. Send your orders to us at ALLIED—the reliable one-supply-source for *all* your electronic needs. You get immediate shipment from complete, quality lines that are *always in stock*. Depend on us for everything in electronic supplies for industrial and communications application, for research, development, maintenance and production. Send today for your FREE copy of the ALLIED Catalog—the *complete, up-to-date* guide to the world's largest stocks of Electronic Supplies for Industrial use.

There are

3 SPECIFIC WAYS

in which "Proceedings of the I.R.E." serves the advertiser differently and more effectively than other publications.

1. Pre-Specification Selling

Because "Proceedings of the I.R.E." publishes basic research and engineering application articles it is closely studied by those design engineers who must "keep ahead of the market." Often, the research published leads the industry production by from two to six years! The alert engineer, who needs this amount of time for his own design applications and for tooling up and changing the production in his own factory, studies the "Proceedings of the I.R.E." carefully. Its articles keep him abreast with the changes that will inevitably come and make it possible for him to be ready for them. This is the time for you to sell the unknown engineer designing the never-dreamed-of product "before it happens!" It is an insurance that you will be ahead of the market instead of behind it.

2. Personal Connection to the Individual

The Institute of Radio Engineers is an engineering society for individual engineers who must qualify on their own education, experience and engineering work. Thus, the magazine follows the reader as his private possession, wherever he goes. Wherever new engineering progress is developing, the work is done by individual engineers—and it is these men that must be sold! Only the engineer knows enough to specify and buy in a highly technical industry. Selling is a matter of reaching the minds of men because *a company cannot sign a purchase order.* Wherever radio engineering activity is the greatest, companies employ IRE members. An engineer moves into a new job in advance of production and with him goes "Proceedings of the I.R.E.," with all the advertising you so urgently need to place where engineering activity is the greatest.

3. Economy

It is a specific purpose of the Institute of Radio Engineers that its advertising rates should benefit and help the industry grow, by being economical. Part of the economy of a tax-free organization is thus passed on to advertisers in the form of low-cost advertising to a high-quality audience. The page rate per thousand engineers of "Proceedings of the I.R.E." is the lowest in the radio-electronic industry by deliberate intent. Thus, the Institute finds an extra way that it can help the firms that hire its engineers to gain new business at lower costs.

THE GRAMER LINE INCLUDES:

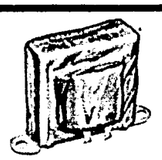
a wide variety of products for civilian and government applications designed and produced thru the combined facilities of Gramer Transformer Corporation, its Johnson Electronics and Halldorson Transformer Divisions.

TINYFORMERS plus SUB-MINIATURE • MINIATURE • MIDGET • SMALL TRANSFORMERS

MU-METAL SHIELDED TINYFORMER | HERMETICALLY SEALED TINYFORMER | TINYFORMER OPEN TYPE | SUPER TINYFORMER

HALLDORSON TRANSFORMER COMPANY is now a division of GRAMER TRANSFORMER CORPORATION and makes a complete line of PACKAGED TRANSFORMERS for the distributing trade.

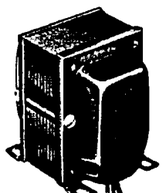
TRANSFORMERS POWER • INPUT



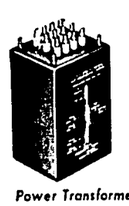
COILS • FILAMENT • ISOLATION • OUTPUT • DRIVER

INTERSTAGE • MODULATION • VIBRATOR • AUDIO

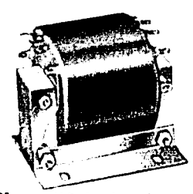
MICROPHONE • CHOKES



Filter Reactor MIL-T-27 GRD-1 CL-C

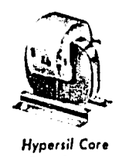


Fosterite Sealed Choke MIL-T-27 GRD-1 CL-B

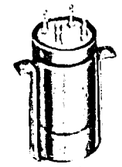


High Fidelity Output Transformer MIL-T-27 GRD-1 CL-A

Power Transformer Fully Enclosed

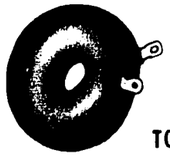


Power Transformer 400 Cycle MIL-T-27 GRD-1 CL-A



H.D. Laminated Power Transformer

Audio Transformer MIL-T-27 GRD-1 CL-A



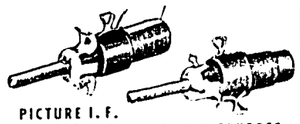
Hypersil Core Transformer

Input Transformer Mu-Metal Shielded

COILS A Complete Line of R.F. and I.F. Coils for Television, Radio and Communications Applications

TOROIDS

HORIZONTAL LINEARITY CONTROL COIL



ANTENNA COIL

- Toroids
- Sound Takeoffs
- Width Control
- Solenoids
- Horizontal Outputs
- Flybacks
- Trap Coils
- Ratio Detectors
- I.F. Coils
- R.F. Chokes
- Oscillators
- Q-Trans

Coils for Every Electronic Assembly Purpose—Expertly Wound and Impregnated to Your Exact Specifications!

HORIZONTAL OSCILLATOR COIL

PICTURE I. F. TRANSFORMER | SOUND TAKEOFF COIL

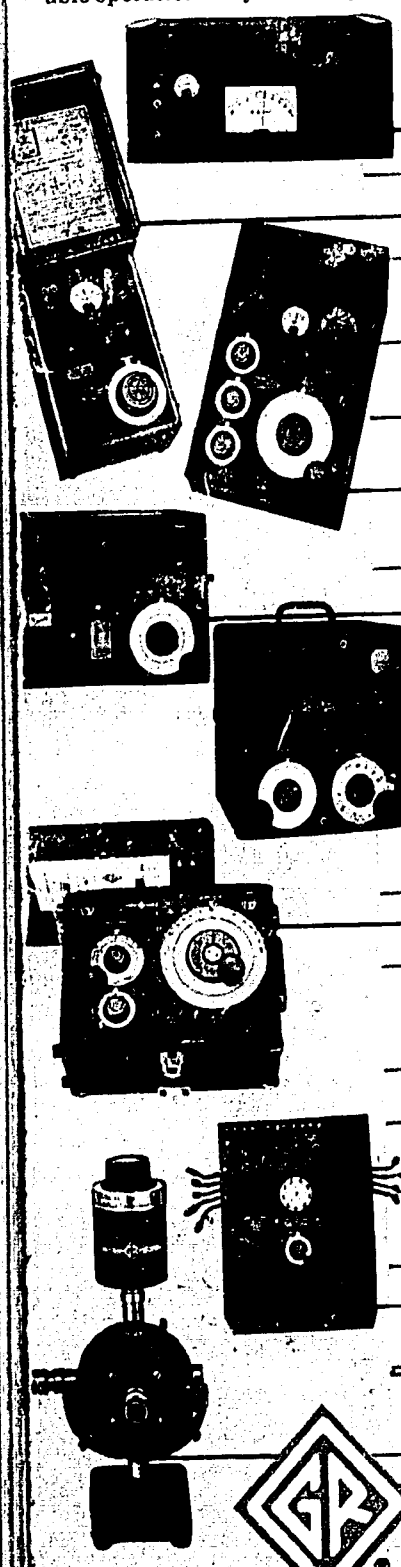
RATIO DETECTOR

Iron Core Tuned complete with Shield Can.

Write for Free Portfolio I-54-1 on Tinyformers, Transformers and Coils (Especially the Q-Tran type of Coils).

GRAMER TRANSFORMER CORPORATION

2734 NORTH PULASKI ROAD • CHICAGO 39, ILLINOIS



SINCE 1915, GR Bridges have been used in laboratories and by production test-groups for the measurement of . . .

RESISTANCE ☆ CAPACITANCE ☆ INDUCTANCE
IMPEDANCE ☆ DISSIPATION FACTOR
VACUUM TUBE and now TRANSISTOR COEFFICIENTS

These instruments are indispensable engineering tools found in research and development organizations engaged in every phase of scientific investigation. They are a result of decades of experience acquired in the design and manufacture of electronic test and measuring apparatus. Highest measurement accuracy, rugged construction, and dependable operation . . . year after year, have gained them the respect of engineers and scientists both here and abroad.

Write today for more complete information on any of these bridges. G-R Sales Engineers at our head office in Cambridge or at our Branch Engineering Offices in either New York, Chicago or Los Angeles will be glad to recommend instruments suitable for your measurements problems.

A GR Bridge FOR EVERY JOB

Instrument	*Measurement Frequency*	*Range of Measurements*	*Accuracy*	*Typical Uses*
1652-A Resistance Limit Bridge $425	dc	**R:** 1 to 1,111,111Ω	0.5% as limit bridge 0.25% by null method	Useful in production testing or laboratory
544-BA Megohm Bridge (with a-c power supply) $340	dc	**R:** 0.1 to 1,000,000 MΩ	±3% to 1000 MΩ ±4% to 100,000 MΩ	Measures high resistance — insulation, volume resistivity, etc.
740-B Capacitance Test Bridge $250	60 c	**C:** 5 μμf to 1100 μμf **D:** 0 to 50%	±1% ±1.5% of full scale	Production-test tool — measures ungrounded capacitors
1611-A Capacitance Test Bridge $475	60 c	**C:** 0 to 11,000 μf **D:** 0 to 60%	±1% ±2%	Testing insulators, bushings, cables, grounded capacitors.
650-A Impedance Bridge $260	dc 1. kc 1 kc 1 kc 1 kc	**R:** 0.001Ω to 1 MΩ **L:** 1μh to 100 h **C:** 1 μμf to 100 μf **D:** 0.002 to 1 **Q:** 0.02 to 1000	±1% ±2% ±1% ±20% ±20%	Completely self-contained, general-purpose laboratory and production bridge
716-CM Capacitance Bridge $570	1 kc 0.1, 10, 100 kc 0.1, 1, 10, 100 kc 0 1, 1, 10, 100 kc	**C:** 100 μμf to 1 μf **C:** 100 μμf to 1000 μμf **C:** 0.1 μμf to 1000 μμf **D:** 0.00002 to 0.56	±0.2% of full scale ±0.2% of full scale ±0.2% (substitution) ±2%	For capacitance standardization, precision measurements, dielectrics tests and studies
667-A Inductance Bridge $450	60 c to 10 kc	**L:** 0.1 μh to 1 h	±0.2%	Variety inductance measurements
1604-B Comparison Bridge $390	400 c, 1 kc, 5 kc	**Z:** 2Ω to 20MΩ	±0.1%	Rapid components testing, and sorting
916-AL Radio Frequency Bridge $535	50 kc to 5 Mc	**X:** ±11,000Ω at 100 kc **R:** 0 to 1000Ω	±2% (X-range varies ±1% inversely as frequency)	Measures impedances of antennas, transmission lines, etc. at r-f
916-A Radio Frequency Bridge $495	400 kc to 60 Mc	**X:** ±5,000Ω at 1 Mc **R:** 0 to 1000Ω	±2% ±1%	Similar to Type 916-AL but designed for higher frequencies
821-A Twin-T Bridge $570	460 kc to 40 Mc	**C:** 0 to 1000 μμf **G:** 0 to 100 μmhos at 1 Mc **B:** ±6000 μmhos at 1 Mc	±0.2% (G & B range ±2% vary directly as frequency)	Measures high impedances; parallel components, chokes, resonant impedance, solution conductivity, etc.
1612-A R-F Capacitance Meter $220	1 Mc	**C:** 0 to 1200 μμf	±4%	Rapid, accurate capacitance testing
1612-AL R-F Capacitance Meter $220	1 Mc	**C:** 0 to 100 μμf	±4%	Similar to 1612-A—adaptors available for measuring tube-socket capacitance
1601-A V-H-F Bridge $440	10 to 165 Mc	**X:** ±200Ω at 100 Mc **R:** 0 to 200Ω	±5% (X-range varies ±2% inversely as frequency)	For measurements on either lumped or coaxial circuits
561-D Vacuum Tube Bridge (also measures transistor low-frequency parameters) $750	1 kc	μ 0.001 to 10,000 **rp:** 50Ω to 20MΩ **gm:** 0.02 to 50,000 μmho	±2% ±2% ±2%	Adaptors furnished with instrument for measuring characteristics of receiving tubes and transistors
Slotted Line and Admittance Meter for Measurements to 5000 Mc				
1602-B U-H-F Admittance Meter $295	20 to 1500 Mc	**B:** ±0.2 to ±1000 mmho. **G:** 0.2 to 1000 mmho	±3% ±3%	For measurement of coaxial lines, antennas, networks, and components
874-LB Slotted Line $220	300 to 5000 Mc	VSWR, impedance, power	±2½% or better	Determines characteristics of standing waves in all 50-ohm systems

GENERAL RADIO Company
275 Massachusetts Avenue Cambridge 39 Massachusetts U S A
