HELPFUL HINTS
for using the IRE DIRECTORY

A few minutes' study of the basic layout of the IRE DIRECTORY will help you to find the information for which you are looking more quickly and more accurately. At first glance, the IRE DIRECTORY may seem to be confusing, but by using the various portions of the book as listed below, you will find your way around easily, and will discover that it is actually a very simple arrangement, and a much more logical one than a purely alphabetical terminology listing.

PINK SECTION at the front of the products and firms section contains a terminology index listing every product, major and minor, for which a list of manufacturers is given. Page numbers refer you to the page on which the listings for that product begin. Following this alphabetical index is a copy of the questionnaire which is sent to the firms who have furnished us with product information. A quick look through this questionnaire will help greatly in understanding the product arrangement. At the top of the first page of the pink section is a small index referring you to the opening page of the complete-data spread section, the alphabetical directory, and each of the three product directories.

THE COMPLETE DATA SPREAD SECTION (pages 1-160) contains product advertisements of great usefulness to the reader. Most of these advertisements are two pages or more, and all of them contain complete information on the products manufactured by the advertising firms—specifications, prices, illustrations, and suggested applications.

ALPHABETICAL DIRECTORY OF MANUFACTURERS (pages 161-264) contains a list of 4,304 firms representing the majority of buying and selling power in the radio-electronic industry. Each firm listing contains the complete mailing address and telephone number for the firm. Following the state name in the firm address, a list of code numbers is given. These numbers refer to the 102 major products listed in the book (for quick reference to the meaning of the codes, use the questionnaire form in the pink section).

THE THREE DIRECTORIES OF PRODUCTS ARE:

1. Complete Equipment
2. Components
3. Materials and Services

This breakdown into three directories saves you from traveling through many products in which you are not interested at the moment, and helps you to turn immediately to the listings for the type of product you want, following a straight line to your destination. Use the Machol edge index at the top of the first page of the pink section to locate immediately the first page of the appropriate directory, then use the Machol edge index at the beginning of each directory to find the specific product you want. You don't even have to know the page number—the index will find it for you automatically!

102 MAJOR PRODUCTS are listed within these three Directories. Each product listing contains a number of sub-headings so that you may know specifically what each firm makes. To interpret the code numbers shown after each firm's listing, consult the first page of that product class, where the sub-headings are defined. You will note that advertisements are positioned throughout the book in the most appropriate listing section, so that the advertisement for a relay manufacturer will appear in the relay section, to help you with further information on his product. Every advertiser's listing shows you the page number on which his advertisement may be found, and you will derive more value from this book if you consult these advertisements for facts you cannot find in the listings.

COMPLETE ADDRESS LISTINGS are given only for advertisers in this section. If you wish to locate the address and telephone number for any other firm, it will be necessary to use the alphabetical directory.

THE DISTRIBUTION SECTION is class 102, the last class in the book. This section contains a list of 1389 manufacturers representatives, distributors and jobbers, grouped geographically. See page 702 for a more complete explanation of the use of this section.

ADVERTISER'S INDEX appears on pages 154-160 and on pages 726-728.

How to Use the Machol Edge Index

High speed reference is a major objective of the IRE DIRECTORY. To this end we have adopted the Machol Edge Index system, and these indexes:

Advertisers Index, pages 154-160 and 726-728.

Key to Products, Pink Section.

Index to Spreads, 1.

1	COMPLETE DATA SPREADS
161	ALPHABETICAL COMPANY LIST
265	DIRECTORY I COMPLETE EQUIPMENT
385	DIRECTORY II COMPONENTS
597	DIRECTORY III MATERIALS & SERVICES

Detailed Machol edge indexes will be found on the first page of the alphabetical Directory and each of the three major product Directories, pages 161, 265, 365, and 597. The Machol system will help you find both alphabetical and product sections swiftly.

HOW TO USE

1. Bend the Directory almost double with the back cover page on the inside.
2. Hold in your right hand with your four fingers near to the bound edge and your right thumb near the middle of the open side of this page.
3. From the heavy or light line symbol adjacent to the subject you seek, run your eyes across the page edges until you reach the horizontally corresponding symbol.
4. OPEN THERE!

LICENSE NO. 25
MACHOL EDGE INDEX PATENT #2680630

1960 Edition prepared by The Advertising Department of the Institute of Radio Engineers, 72 W. 45th St., New York 36, N.Y.
William C. Copp, Mgr.; Lillian Petranek, Asst.; Carl Maier, Production; Frank G. MacAloon, Research.

ohm & megohm meters 291

Alphabetical Index of Products

Product	Page
optical filters, infrared	313
optical transmitting materials	313
oscillators, RF	335
oscilloscope cameras	329
oscilloscopes, general purpose	329
oscilloscopes, special UHF & pulse analysis equip.	329
oscillosynchroscopes	329
output power meters	269
ovens	649

—P—

packaged circuits	283
packaging materials	635
packaging	628
panels, instrument & meter	598
paper insulation	651
particle accelerators equip.	326
patch cords	463
phase meters, RF	335
photo electric controls	271
pick-ups-crystal	481
pick-ups-dynamic	481
pick-ups-magnetic	481
pick-ups-reluctance	481
pilot lights, brackets, jewels, mounts	483
pilot run plants	654
plastic fabricators	628
plastic molders	628
plastics, extrusions	685
plastics, laminations	685
plastics, raw powders	685
plastics, rods	685
plastics, sheets	685
plastics, tubes	685
plastic insulation	651
playback arms	481
plugs	463
point to point equip., receivers	332
point to point equip., transmitters	332
positioning equipment	271
positioning indicators	470
potentiometers, precision	527
power supplies, infrared	313
power supplies, AC type	487
power supplies, DC type	487
power supplies, high voltage, kilovolt	487
power supplies, low voltage	487
power supplies, magnetic	487
power supplies, medium voltage	487
power supplies, microwave	487
power supplies, primary power sources, fuel, engine driven	487
power supplies, transistor	487
power supplies, variable	487
power supplies, voltage regulated power sources	487
pressure controls	271
pressure gages	291
primary standards of frequency	353
primary standards of time	353
printed circuit machinery	661
printed electronic assemblies	503
printers, computation	283
production controls, counting & sorting equipment	271
proprietary moldings	681
public address, sound systems	353
pulse count integrators	326
pyrometers	291
pyrometers, infrared equipment	313

—Q—

q meters, RF	335

—R—

racks-aging	291
radiation detectors	326
radiometers, infrared	313
radiotelephones, marine	316
receivers, airborne	266
receivers, airport	266
receivers, AM broadcast	281
receivers, amateur	
receivers, central station	325
receivers, FM broadcast	281
receivers, microwave relay	317
receivers, mobile	325
receivers, mobile central station	325
receivers, point-to-point	332
receivers, radar	333
receivers, single sideband	351
receivers, telegraph & teleprinter	358
receivers, telemeter	359
receivers, TV b & w	279
receivers, TV closed circuit	279
receivers, TV color	279
receivers, UHF-VHF	279
receiving equipment, amateur	267
receiving equipment, facsimile	291
record changers	481
record players	481
recording galvanometers	311
recording oscillographs	329
recording, cutting heads	509
recording, blank disks	509
recording, cutting styli	509
recording, demagnetizer	509
recording, tape splicing equipment	509
rectifiers, copper oxide	511
rectifiers, copper sulfide	511
rectifiers, germanium	511
rectifiers, grid controlled	513
rectifiers, mercury vapor	513
rectifiers, receiving	513
rectifiers, selenium diodes	511
rectifiers, selenium stacks	511
rectifiers, silicon	511
rectifiers, transmitting	513
relay broadcast & stl equipment	281
relay racks & cabinets	621
relays, co-axial	515
relays, d'arsonval	515
relays, differential	515
relays, frequency selective	515
relays, hermetically sealed	515
relays, impulse	515
relays, keying	515
relays, latching	515
relays, mercury contact	515
relays, polarized	515
relays, power control & overload	515
relays, rotary	515
relays, sensitive	515
relays, stepping	515
relays, sub-miniature	515
relays, telephone	515
relays, time delay	515
remote control monitors	325
repeat & relay equipment	282
research & development labs.	654
resistors, carbon fixed molded	527
resistors, carbon, variable	527
resistors, deposited carbon	527
resistors, potentiometers	527
resistors, potentiometers, precision	527
resistors, precision film	527
resistors, printed circuit	527
resistors, vacuum sealed	527
resistors, very high megohm	527
resistors, wirewound, fixed	527
resistors, wirewound, variable	527
resistors, wirewound, precision	527
retaining rings	635
RF power output meters	335
RF signal generators	335
rheostats	527
rivets	635
rubber insulation	651

—S—

sales & service	703
salt spray resistive coding	659
scalers, nuclear	326
screw machine products	635
screws, nuts & washers	635
screws, self sealing	635
sealing & potting compounds	659
secondary standards of frequency	353
secondary standards of time	353
selective calling equipment	325
sensitized paper equipment	291
servo amplifiers	345 & 367
servo controls	271 & 345
servo couplings	345
servo magnetic clutches	345
servo motors & generators	345 & 477
servo multipliers	345
servo repeaters	345
servo resolvers	345
servo-mechanisms, gears, gear-trains, etc.	345
shielded enclosures	291
shielding, microwave	687
shielding, radio frequency	687
shipborne communications equipment	316
signal generators, AF	269
signal generators, AM	335
signal generators, FM	335
signal generator, SSB	335
signal generators, TV	363
silicon diodes	541
silicones	651
single sideband, receivers	351
single sideband transmitters	351
slip rings	419
slotted lines & measuring accessories	319
sockets, crystal	547
sockets, diodes	547
sockets, pilot light	547
sockets, plug-in	547
sockets, printed circuit	547
sockets, receiving tube	547
sockets, transistor	547
sockets, transmitting tube	547
sockets, UL approved industrial types	547
solder dipped prewired chassis	503
soldering irons & guns	661
solder, acid core	689
solder fluxes	689
solder, plain	689
solder, precious metal	689
solder, pre-forms	689
solder, rosin core	689
sonar, marine	316
sound level meters AF	269
spectrometers	291
spectrum analyzers	269
springs	635
square wave generators	269
stimulators, medical	317
strain indicators	470
strain reliefs	635
stroboscopes	291
styli-diamond	481
styli-metallic	481
styli-sapphire	481
subminiaturization service	654
surplus dealers	703
survey meters, nuclear	326
sweep generators, RF	335
sweep generators, TV	363
switch seals	635
switches, band	551
switches, coaxial	551
switches, contacts	551
switches, control	551
switches, crossbar	551
switches, electronic	551
switches, ferrite	551
switches, foot	551
switches, key	551
switches, limit	551
switches, mercury	551
switches, momentary contact	551
switches, power	551
switches, precision snap-action	551
switches, rotary	551
switches, slide	551
switches, solenoids	551
switches, spring-return	551
switches, tap	551
switches, thermally operated	551
switches, time	551
switches, toggle & push button	551
synchronizing generators, TV	363
synchros	477
synthetic insulation	651

—T—

tape phonographs & playback equipment	481
tape recording & play back equipment	283
tape to card converter	283
technical instruction—home study	699
technical instruction—resident	699
telegraph & teleprinter equip. receivers	358
telegraph & teleprinters equip. transmitters	358
telegraph test equipment	269
telemetering data storage mechanisms	359
telemetering equip. data recorders	359
telemetering FM/FM modulators	359
telemetering receivers	359
telemetering transmitters	359
temperature controls, electronic	271
temperature indicators	470
terminal blocks & strips	691
terminals, rivet or stud	691
terminals, wire end	691
test clips	463
test jacks	463
test leads	463
testing & certifying organizations	654
thermistors	527
thermostats, bellows	558
thermostats, bimetal	558
thermostats, hermetically sealed	558
time & voltage-calibrators	329
timers, automatic cycle	470
timers, automatic reset	470
timers, elapsed	470
timing controls	271
transducers, electro-mechanical	559
transducers, photo electric	559
transducers, thermo electric	559
transformers, audio	561
transformers, current limiting	561
transformers, hermetically sealed	561
transformers, high voltage	561
transformers, horizontal output & flyback	561
transformers, intermediate frequency	561
transformers, isolation	561
transformers, low frequency	561
transformers, microwave	561
transformers, power	561
transformers, precision matched	561
transformers, precision voltage dividing	561
transformers, pulse	561
transformers, radio frequency	561
transformers, saturable	561
transformers, toroidal	561
transformers, TV deflection	561
transformers, TV impedance matching	561
transformers, ultrasonic	561
transformers, variable	561
transformers, vibrator	561
transformers, voltage regulating	561
transformers, 400 CPS	561
transistor testers equipment	291
transistors, alloy junction	541
transistors, diffused base	541
transistors, junction	541
transistors, point contact	541
transistors, surface barrier	541
transit cases	598
transmitters, amateur	267
transmitters, airborne	266
transmitters, airport	266
transmitters, AM broadcast	281
transmitters, pascimile	
transmitters, fixed frequency	281
transmitters, FM broadcast	281
transmitters, microwave	317
transmitters, microwave relay	317
transmitters, mobile	325
transmitters, mobile-central station	325
transmitters, point to point	332
transmitters, radar	333
transmitters, relay broadcast & stl equip.	317
transmitters, single side band	351
transmitters, telegraph & teleprinter	358
transmitters, telemeter	359
transmitters, TV broadcast	281
transmitters, TV closed circuit	281
transmitters, UHF-VHF	281
tubes, air-cooled power	581
tubes, atr & TR types	581
tubes, cathode-ray	573
tubes, ceramic	573
tubes, electrometer	577
tubes, iconoscopes	581
tubes, image orthicons	581
tubes, klystrons	581
tubes, magnetrons	581
tubes, miniature	573
tubes, monoscope	581
tubes, photo multiplier	577
tubes, standard types, glass & metal	573
tubes, traveling wave	581
tubes, TV picture—color	573
tubes, TV picture—monochrome	573
tubes, thyratrons	577
tubes, voltage regulators & ballasts	577
tubes, water-cooled power	581
tubes, x-ray	577
tubing, metal	635
tuners, AM	585
tuners, FM	585
tuners, klystron	585
tuners, microwave	585
tuners, TV	585
tuners, UHF & VHF	585
tuning forks	353
turntables	356
TV broadcast receivers	279
TV broadcast transmitters	281
TV broadcast—B & W receivers	279
TV broadcast—color receivers	279
TV calibrators	363
TV camera control equipment	356
TV camera lenses	356
TV camera	356
TV closed circuit receivers	279
TV closed circuit transmitter	281
TV film projectors	356
TV marker generators	363
TV signal generators	363
TV studio lighting equipment	356
TV sweep generators	363

—U—

UHF-VHF generators	363
UHF-VHF receivers	279
UHF-VHF transmitters	281
ultrasonic cleaners	661
ultrasonic drills	661
ultrasonic generators	291
ultrasonic solderers	661
ultrasonic testers	291

—V—

vacuum controls	271
vacuum gages	291
vacuum pumps	661
vacuum tube machinery	661
vacuum tube parts, anodes	695
vacuum tube parts, envelopes, glass	695
vacuum tube parts, envelopes, metal	695
vacuum tube parts, getters	695
vacuum tube parts, grids & grid wires	695
vacuum tube parts, guns & gun parts	695
vacuum tube parts, lead wires	695
vacuum tube parts, phosphors	695
vacuum tube parts, pins & prongs	695
vacuum tube parts, shaft locks	695
vacuum tube parts, spacers & insulators	695
vacuum tube parts, stampings	695
vacuum tube testers	291
vacuum tube voltmeters	291
vacuum, tube basses	695
vacuum, tube caps	695
vacuum, tube clamps	695
vacuum, tube shields	695
vacuum, tubing-cathode	695
variable speed controls	271
varistors	589
vibration & shock mounts	589
vibration analyzers	291
vibration exciters	661
vibrators, semi-conductor	427
video monitors	325
video tape record	343
voltage regulators, automatic	589
voltage regulators, manually operated	589
voltmeters—audio frequency	269
voltmeters	470
vor equipment	266

—W—

walkie-talkies	289
wattmeters & watt hour meters	470
waveguide, directional couplers	591
waveguides, cavities	591
waveguides, couplings	591
waveguides, crystal-detectors	591
waveguides, crystal mounts	591
waveguides, duplexers	591
waveguides, flexible	591
waveguides, horns	591
waveguides, hybrid junctions	591
waveguides, isolators	591
waveguides, multipliers	591
waveguides, phase shifters	591
waveguides, probes	591
waveguides, rigid	591
waveguides, rotary joints	591
waveguides, sampling lines, reflectors	591
waveguides, switches	591
waveguides, terminations	591
waveguides, transmission lines	591
waveguides, unfinished castings	591
welders & brazers	661
wire	603
wire strippers	661
wood cabinets	598

Alphabetical Index of Products

Custom Sealing Service

ENGINEERED MANUFACTURED

Consult E-I for Complete Design-Engineering Service on your next Sealing Problem... Sales Engineers Located in all Principal Cities

The E-I line provides designers with the versatility of the most complete selection of standard seals in the industry. Proof of their dependable performance is the fact that E-I Seals were employed on the Atlas Missile Program... are specified for critical assignments industry-wide on both commercial and military equipment.

Select your seals from the E-I standard line or ask E-I for quotations on custom sealing components of your own manufacture. Either way, E-I engineers will work with you in meeting your sealing requirements, quickly and economically!

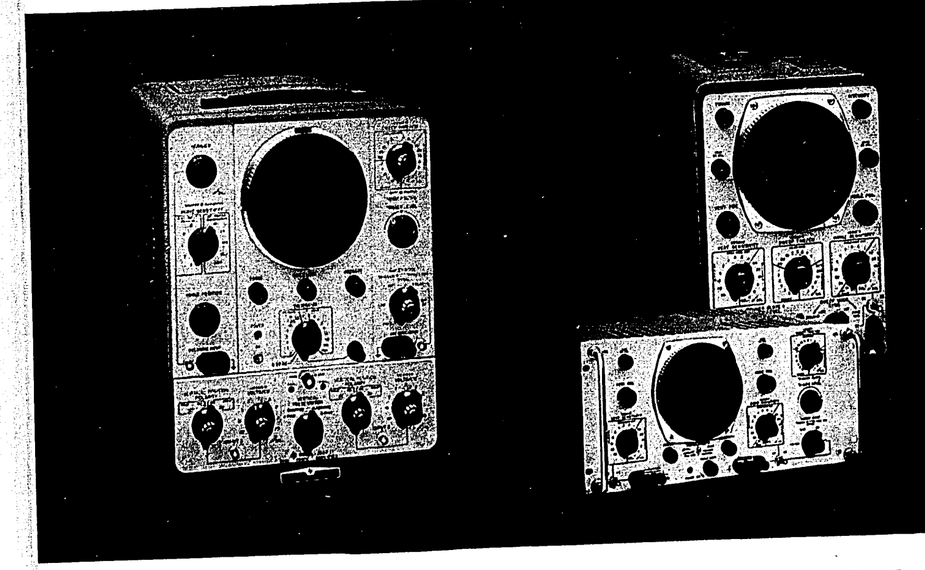
hp

SHORT FORM 1959 CATALOG

hp offers complete coverage in quality oscilloscopes – DC to 10 MC!



hp 150A/AR – DC to 10 MC

Models 150A/AR are intended as the most broadly useful, convenient high quality 10 MC scopes offered. A variety of plug-ins (see below) provide dual trace or differential input, or high amplification eliminating pre-amplifiers on input from most transducers.

Automatic Trigger

Sweep Range 0.02 μsec/cm to 15 sec/cm; 24 sweeps 0.1 μsec/cm to 5 sec/cm, 3% accuracy. Internal, line voltage or external triggering, pos. or neg. slopes, sensitivity 0.5 v (external). Has sweep amplifier, vernier; sensitivity 200 mv/cm to 15 v/cm. Vertical amplifier dc to 10 MC, optimum transient response and rise time less than 0.035 μsec. Calibrating voltages, 0.2 mv to 100 v peak, accuracy 3%. Approx. 1 KC square wave rise and decay time 1.0 μsec. $1,100.00 (cabinet), $1,200.00 (rack mount).

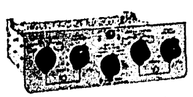
hp 130B/BR – DC to 300 KC

Termed the finest low frequency oscilloscope ever offered, *-hp-* 130B/BR combine big 'scope performance and positive dependability with 1 mv sensitivity and the convenience of direct reading, "universal" automatic trigger, no preamplification from most transducers and simple controls.

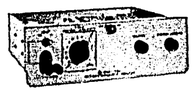
Similar X and Y amplifiers

Models 130B/BR have similar horizontal and vertical amplifiers with sensitivity 1 mv/cm to 125 v/cm. Input circuits are balanced on the 6 most sensitive ranges; single ended input dc or ac coupled. 21 sweep times may be directly set, instrument sweeps 1 μsec/cm to 12.5 sec/cm, triggering is internally, by line power, or externally by 0.5 v or greater. Includes x 5 magnifier for all internal sweeps increasing fastest sweep time to 0.2 μsec/cm. *-hp-* 130B (cabinet) or 130BR (rack) $650.00.

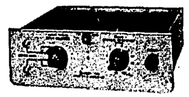
New amplifiers and accessories



-hp- 152B Dual Trace Differential Amplifier. New plug-in amplifier providing differential input and dual traces electronically switched between A and B channels at either 100 KC or on alternate sweeps. Sensitivity range 0.05 v/cm to 50 v/cm, input attenuator with 9 calibrated ranges in 1-2-5-10 sequence and vernier. $250.00.



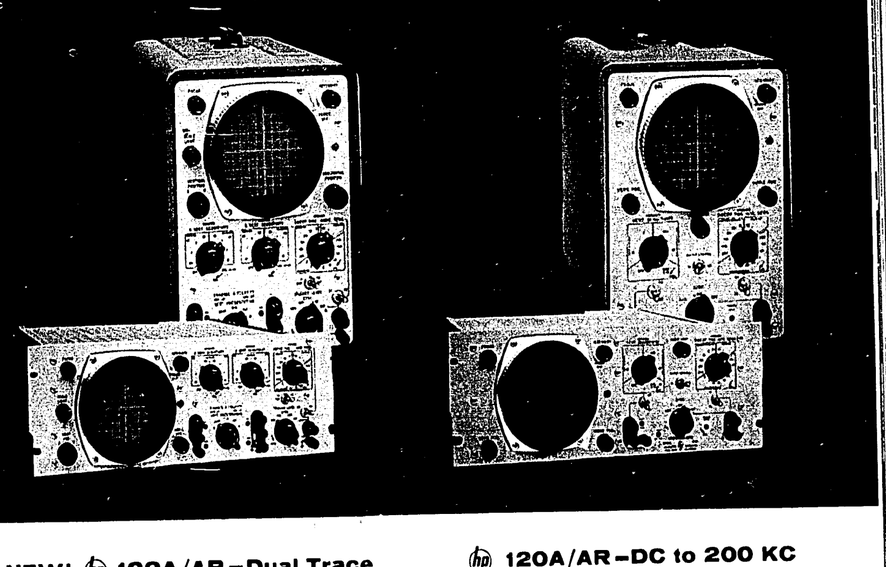
-hp- 153A Very High Gain Amplifier. New plug-in permitting *-hp-* 150A to be used for many direct measurements from transducer without *preamplification*. Pass band dc to 500 KC, sensitivity 1 mv/cm to 125 v/cm, balanced input on all ranges. 15 calibrated ranges in 1-2-5-10 sequence, 1 mv/cm to 50 v/cm; plus vernier. $125.00.



-hp- 151B High Gain Amplifier. For 150A high gain unit with 5.0 mv/cm sensitivity, frequency response dc to 10 MC.. 12 calibrated ranges on 1-2-5-10 sequence, 5 mv/cm to 20 v/cm; accuracy ±5%. Vernier adjustment. 1 megohm input impedance with 31 μμf shunt. Pass band rise time 0.035 μsec. Has 2 BNC terminals. $200.00.

Data subject to change without notice. Prices f. o. b. factory.

For details, circle #4 on Reader Service Card



NEW! hp 122A/AR – Dual Trace

Model 122A/AR is a dual trace, 200 KC oscilloscope providing two separate traces for simultaneous study; single trace available when desired. Twin vertical amplifiers, alternate and chopped presentation, differential input, automatic syncing and x 5 sweep expansion. Ideal for direct comparison of filter, amplifier, output/input or with vibration testing apparatus.

Sweeps 5 μsec/cm to 200 msec/cm

15 calibrated sweeps; vernier extends slow sweep to 0.5 sec/cm, expander extends fast sweep to 1 μsec/cm. Automatic trigger; manual override sets trigger between +10 and −10 v. Vertical amplifiers dc to 200 KC (dc coupled) or 2 cps to 200 KC (ac coupled). Sensitivity 10 mv/cm to 100 v/cm. Horizontal amplifier same bandwidth as vertical, sensitivity 0.1 v/cm to 100 v/cm. *-hp-* 122A (cabinet) or 122AR (rack mount), $625.00.

hp 120A/AR – DC to 200 KC

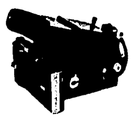
Ideal for industrial or production line work as well as daily lab jobs, Models 120A/AR are outstanding in both value and "big 'scope" performance features. This all-new instrument covers DC to 200 KC, has the *-hp-* universal trigger circuit which optimizes signals automatically; also offers automatic synchronization on any internal or external voltage including line power.

Sweeps 1 μsec/cm to 0.5 sec/cm

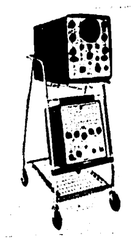
Features include 15 calibrated sweeps in 1-2-5 sequence, sweep speeds range 5 μsec/cm to 0.5 sec/cm, "times-5" sweep expansion on all ranges, high sensitivity calibrated vertical amplifiers. All power supplies are regulated for steady, drift-free traces. Automatic trigger and base line can be cut out for bright, clear photography trace. Extra compact Model 120AR is only 7" high. Utmost dependability, rugged construction. *-hp-* 120A (cabinet) or 120AR (rack) $435.00.

Increase convenience of your 150A/AR

-hp- 154A Voltage/Current Dual Channel Amplifier. New plug-in for 150A permits simultaneous measurement and observation of ac voltage and current. Electronic channel switching by alternate sweeps or by 100 KC chopper. Unique current probe clamps *around* wire under test, does not load circuit. $430.00.



-hp- 196A Oscilloscope Camera. Most convenient recording camera available. Object-to-image size ratio 1 to 0.9 views full 10 cm graticule width. One-hand mounting and multiple picture setting. Easy access to *f*-stop and shutter while camera mounted. Permits viewing image with both eyes while photographing, even if wearing glasses. Employs Polaroid® Land Camera Back, Wollensak 3" f/1:9 lens. 7 shutter speeds 1/100 to 1 sec. Weight only 9 lbs. $425.00.



-hp- AC-115A Oscilloscope Testmobile. For 150 series oscilloscopes but fits others. 4" rubber tired wheels, heavy chrome tube construction, tilts 'scope to 30° in 7½° increments, folds for storage, shipping. $80.00. *-hp-* AC-116A Storage Unit fastens to *-hp-* AC-115A, holds 150A plug-ins or *-hp-* AC-117A Accessory Drawers. *-hp-* AC-116A, $22.50. *-hp-* AC-117A, $10.00.

For details, circle #5 on Reader Service Card

Oscillators – 0.008 to 10,000,000 cps

Hewlett-Packard now offers 12 high quality, fast and accurate oscillators, each an exceptional value and each engineered to do a specific job best. Each incorporates the famous RC resistance capacity circuit pioneered by *-hp-*. This circuit makes possible instruments that are highly stable, wide range, compact and portable; instruments that are extremely simple to operate and require no tedious re-setting or adjustment during operation.

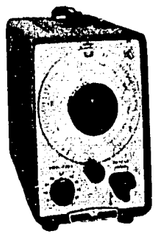
Instrument	Primary Uses	Frequency Range	Output	Price
-hp- 200AB	Audio tests	20 cps to 40 KC	1 watt/24.5 v	$150.00
-hp- 200CD	Subsonic through supersonic audio and ultrasonic tests	5 cps to 600 KC	160 mw or 10 v/600 ohms; 20 v open circuit	170.00
-hp- 200J	Interpolation, frequency measurements	6 cps to 6 KC	160 mw/10 v	300.00
-hp- 200T	Telemetry, carrier current tests	250 cps to 100 KC	160 mw or 10 v/600 ohms; 20 v open circuit	450.00
-hp- 201C	High quality audio tests	20 cps to 20 KC	3 w or 42.5 v/600 ohms	225.00
-hp- 202A	Low frequency measurements	0.008 to 1200 cps	28 mw or 30 v p-p/4000 ohms	525.00△
-hp- 202C	Servo equipment tests, measurements	1 cps to 100 KC	160 mw or 10 v/600 ohms	300.00
-hp- 205AG	High power audio tests, gain measurements	20 cps to 20 KC	5 watts	500.00△
-hp- 206A	High quality, high accuracy audio tests	20 cps to 20 KC	+ 15 dbm	750.00△
-hp- 207A	Audio sweep generation	20 cps to 20 KC	160 mw or 10 v/600 ohms	275.00
-hp- 233A	Carrier oscillator—current tests	50 cps to 500 KC	3 w/600 ohms	500.00
-hp- 650A	Wide range video tests	10 cps to 10 MC	15 mw/3 v	490.10△

△ Rack mounted instruments $15.00 less.

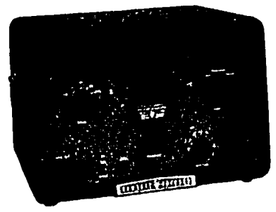
200 Series Audio Oscillators

For audio and ultrasonic measurements, *-hp-* offers popular Models 200AB and 200CD. Both have highest stability and accurate tuning circuits. Low impedance operating levels plus superior insulation guarantee long years of trouble-free dependability. Operation is simple; just three controls; no zero setting necessary. *-hp-* 200AB, 20 cps to 40 KC, $150.00. *-hp-* 200CD, 5 cps to 600 KC, $170.00.

207A Sweep Oscillator

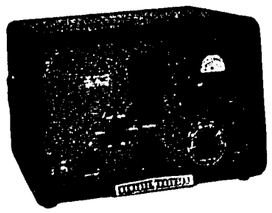


This new audio oscillator provides continuous single-sweep frequency coverage from 20 cps to 20 KC. No band switching is needed; dial accuracy is 4%, and the instrument also provides a flexible 10 v/600 ohm output usable balanced or with one side grounded. Frequency response is ±1.0 db full range, distortion and hum are less than 1%. *-hp- 207A may be swept by hand, motor driven, tuned remotely or coupled to a recorder.* -hp- 207A, $275.00.



202A Function Generator

Compact, multi-purpose source of transient-free test voltages from 0.008 cps to 1,200 cps. Continuously variable through 5 bands; offers exceptional stability (within 1%) and distortion less than 1% to 100 cps. Sine, square or triangular waves may be selected by a front panel switch; the 30 volt output peak-to-peak is constant for all wave forms and over full frequency range. *-hp-* 202A, $525.00△.

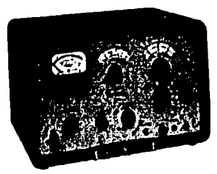


650A Test Oscillator

Covering 10 cps to 10 MC, *-hp-* 650A is a highly stable, wide band instrument for audio, supersonic, video and rf measurements. Output is flat within 1 db full range; voltage range is 0.00003 to 3 v. In addition to 600 ohm impedance, voltage divider provides a 6 ohm impedance. Distortion less than 1% to 100 KC; stability ±2% to 100 KC. $490.00△.

Distortion, Wave Form Analyzers – 20 cps to 50 KC

NEW! 302A Wave Analyzer



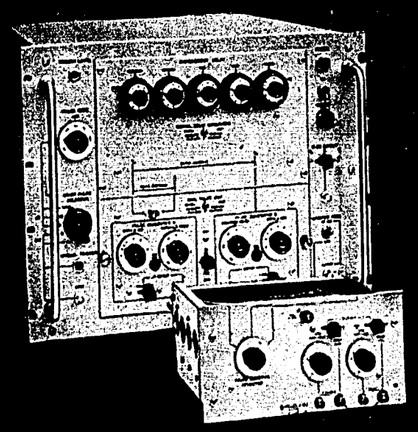
New, completely transistorized, this advanced instrument provides direct, accurate wave component measurement without troublesome calibration or stabilization. Measurement range 20 cps to 50 KC. The instrument is hum free, requires little power, needs no warm-up, has very sharp acceptance circuits plus an AFC. May be battery operated (18 to 28 volts). Simple operation, rugged, trouble-free. $1,475.00.△

Instrument	Primary Uses	Frequency Range	Characteristics	Price
-hp- 302A	Wave form analysis	20 cps to 50 KC	Direct reading, no calibration needed	$1,475.00△
-hp- 330B	Measures total audio distortion	20 cps to 20 KC	Includes input amplifier, VTVM	410.00△
-hp- 330C	For FM broadcast measurements	20 cps to 20 KC	Special VU meter to meet F.C.C. requirements	440.00△
-hp- 330D	For AM, FM broadcast measurements	20 cps to 20 KC	AM detector and VU meter to meet F.C.C. requirements	500.00△

△ Rack mounted instruments $15.00 less.

NEW!

218AR Digital Delay Generator



Independently adjustable time intervals or pulse delays

±0.1 μsec time interval accuracy

Crystal oscillator time base

Regulated power supplies

Model 218AR Digital Delay Generator is a totally new instrument applicable to many types of timing measurements including calibrating the range determining circuits of radar receivers, etc. The generator is built to rigid standards and is suitable for military use. It provides two precision time intervals or pulse delays, either of which are independently adjustable from 1 to 10,000 microseconds in 1 microsecond steps. These time intervals are accurate to within 0.1 microsecond ±0.001% of the selected value, and may be initiated from an internal multivibrator, 10 cps to 10 KC, or from an external rate generator, 0 cps to 10 KC. Total jitter does not exceed 0.02 microseconds in either case. The instrument also provides a 50 volt synchronizing output pulse at the beginning or end of a time interval, and a 1 microsecond timing comb output at the front panel.

No count ambiguity

A unique feature of the new *-hp-* 218AR is its time base, a pulsed crystal controlled oscillator. The oscillator starts at T_0 and stops at the last output pulse. This eliminates the "plus-or-minus-1-count" ambiguity of many counter circuits in such application.

Model 218AR is a completely self-contained instrument, requiring only one or more *-hp-* 219 series plug-ins to perform a broad variety of time and delay generation measurements. Simplicity and flexibility are increased by the large variety of output signals provided by the plug-in units. The instrument is particularly compact and well-designed; etched circuits and the use of plug-ins materially increase circuit accessibility.

The instrument's power supplies are fully regulated to avoid effects of line voltage variations. It is available as *-hp-* 218AR, rack mount. $2,000.00.

219A Dual Trigger Unit

This plug-in drawer for *-hp-* 218AR supplies trigger pulses of positive polarity, 50 volts, 0.1 μsec rise time from a 50 ohm source. Pulse A occurs at T_0 or T_1 as selected by a switch; Pulse B is triggered at T_2. *-hp-* 219A, $100.00.

219B Dual Pulse Unit

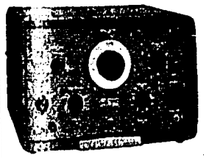
This plug-in drawer for *-hp-* 218AR produces two high-power pulses which are continuously adjustable in width, 0.2 to 5 μsec and in amplitude from 0 to 50 volts, positive or negative polarity. The leading edge of these pulses can be set to occur at the beginning or end of the selected time interval. Both pulses are brought out to separate front panel jacks but may be switched to a common jack with no change in level or output impedance. *-hp-* 219B, $450.00.

219C Digital Pulse Duration Unit

This plug-in drawer for *-hp-* 218AR produces a high power output pulse whose delay and duration are digitally controlled. The pulse is available in both polarities simultaneously, and is continually adjustable in amplitude up to at least 15 volts from a 90 ohm source. It may also be obtained from a directly coupled 500 ohm source with an amplitude of at least 90 volts. *-hp-* 219C, $350.00.

Square Wave and Pulse Generators

212A Pulse Generator



Provides continuously variable, high power "fast pulses" of superior wave form. Combines broad general usefulness with 0.02 μsec rise and decay time to meet requirements of radar, TV and nuclear work. Pulse length variable 0.07 to 10 μsec; minimum overshoot; 50 watt peak power (50 v to 50 ohms load). Low impedance means accurate pulses can be delivered at a distance from the instrument. Repetition rate variable 50 to 5,000 pps; controlled internally or externally. Synchronizing pulse available in advance of, or following output pulse. $585.00 (cabinet), $570.00 (rack mount).

211A Square Wave Generator

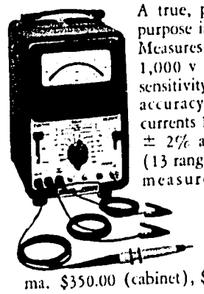
Versatile, wide range instrument for testing oscilloscopes, networks, video and audio amplifier performance, modulating signal generators and measuring time constants. Offers simple control of electronic switches; is also convenient for indicating phase shift, frequency response, transient effects. Two separate outputs (a) 7 volt 75 ohm circuit for TV work; (b) 55 volt 600 ohm output for high level work. Both have full amplitude variation. Instrument operates free-running or externally synchronized with positive going pulse or sine wave of 5 volts minimum amplitude. $300.00 (cabinet), $305.00 (rack mount).

DC and AC Voltmeters; DC Milliammeter

NEW! -hp- 425A Microvolt-Ammeter

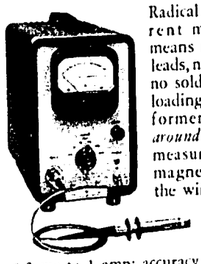
New, high sensitivity, high stability microvolt meter reading end scale voltages of 10 μv to 1 v in 11 ranges. Also reads currents of 10 μμa to 3 ma in 18 step, 1-3-10 sequence. Accuracy ± 3% on all ranges. Drift less than 2 μv referred to input terminals under all conditions; much less under lab conditions. Input impedance 1 megohm ± 3% on all ranges. Instrument can also be used as a 100 db amplifier providing up to 1 v output from signals as small as 10 μv. Amplifier ac rejection is at least 3 db at 0.2 cps and 60 db at 60 cps and above. $500.00 (cabinet), $505.00 (rack).

NEW! -hp- 412A Precision Volt-Ohm-Ammeter



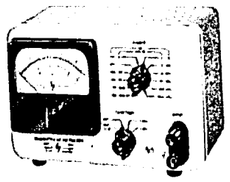
A true, precision, multipurpose instrument at last! Measures dc voltage 1 μv to 1,000 v (max. full scale sensitivity 1 mv, full scale accuracy 1%). Measures currents 1 μa to 1 amp with ± 2% accuracy, full scale (13 ranges). As ohmmeter, measures 0.02 ohms to 5,000 megohms. Low noise, drift. Recorder output provides 1 v or 1 ma. $350.00 (cabinet), $355.00 (rack).

NEW! -hp- 428A Clip-On DC Milliammeter



Radical approach to current measurements means no breaking of leads, no dc connections, no soldering, no circuit loading. "Current transformer" probe clamps *around* wire under test, measures by sampling magnetic field around the wire. Readily measures dc current in presence of strong ac. Covers 0.3 ma to 1 amp; accuracy ± 3%. $475.00 (cabinet), $480.00 (rack).

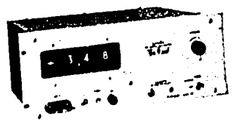
NEW! -hp- 403A Transistorized AC Voltmeter



Battery-operated, portable, weighs less than 5 lbs., transistorized, covers 1 cps to 1 MC and 100 μv to 300 v rms (max. full scale sensitivity 1 mv). Also reads db direct from −12 to 2 db. 400 hours battery life (6 mos. average use) hum less than 30 μv on all but lowest range. Average reading meter; accuracy ± 3% to 500 KC, ± 5% to 1 MC. Input impedance 2 megohms; high overload capacity. $250.00.

Instrument	Primary Uses	Frequency Range	Voltage or Current Range	Input Impedance	Price
-hp- 400D	Wide range ac measurements High sensitivity	10 cps to 4 MC	0.001 to 300 v 12 ranges	10 megohms 15 μμf shunt	$225.00
-hp- 400H	High accuracy wide range ac measurements	10 cps to 4 MC	0.001 to 300 v 12 ranges	10 megohms 15 μμf shunt	325.00
-hp- 400L	Log voltages, linear db measurements	10 cps to 4 MC	0.001 to 300 v 12 ranges	10 megohms 15 μμf shunt	325.00
-hp- 403A	Battery-operated portable; fast, accurate, hum-free ac measurements	1 cps to 1 MC	0.001 to 300 v 12 ranges	2 megohms 40, 20 μμf shunt	250.00
-hp- 405AR	Direct, automatic voltage measurement. Recorder output, automatic polarity	Dc	0.001 v to 1,000 v (accuracy ±0.2% of reading ±1 count)	11 megohms to dc	825.00
-hp- 410B	Audio, rf, VHF measurements; dc voltages; resistances	dc; ac—20 cps to 700 MC	1.0 to 300 v 7 ranges	dc—122 megohms; ac—10 megohms/ 1.5 μμf	245.00
-hp- 412A	Precision voltage, current resistance measurements	Dc	1 mv to 1,000 v 1 μa to 1 amp	10 to 200 megohms, depending on range	350.00
-hp- 425A	Read μv, μμa; 100 db amplifier; medical, biological, physical, chemical	dc voltages as 100 db amplifier	10 μv to 1 v 11 ranges	1 megohm ± 3%	500.00
-hp- 428A	Clip-on milliammeter eliminates direct connection, circuit loading	Dc	0.3 ma to 1 amp, 6 steps, ±3% accuracy	——	475.00

NEW! -hp- 405AR Automatic DC Digital Voltmeter



Literally "touch-and-read" measuring speed. Automatic range, polarity selection, covers 0.001 v to 1,000 v (accuracy ± 0.2% of reading ±1 count). New novel circuitry provides a stability of readings virtually eliminating jitter in the last digit. Floating input, analog-to-digital conversion, digital recorder output and front panel switch to hold ranges. *Just 7" high!* $825.00.

-hp- 400D Vacuum Tube Voltmeter

Best -hp- ac VTVM ever built! Covers all frequencies 10 cps to 4 MC. Extremely sensitive, wide range, accurate within 2% to 1 MC, measures 0.1 mv to 300 v. Direct reading in db or volts; 10 megohm input impedance with 15 μμf shunt insures negligible loading on circuits under test. $225.00 (cabinet), $230.00 (rack).

-hp- 410B Vacuum Tube Voltmeter

All-purpose test instrument, range, 20 cps to 700 MC. Also serves as dc VTVM with 122 megohms impedance, or ohmmeter for measurements 0.2 ohms to 500 megohms. Input capacity 1.5 μμf, 10 megohms input resistance. $245.00 (cabinet), $265.00 (rack).

-hp- 400L Logarithmic Voltmeter

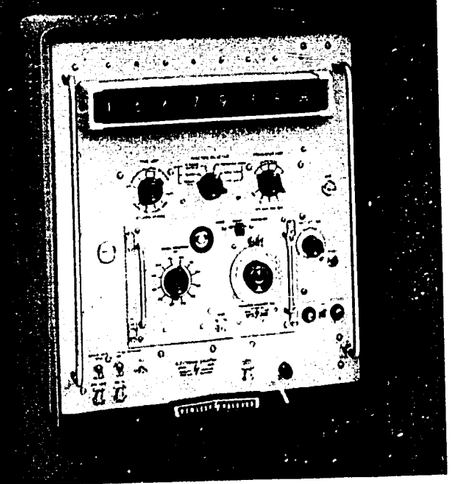
New -hp- 400L, 10 cps to 4 MC, features a 5" true log voltage scale plus a 12 db linear decibel scale. Accuracy is a *constant percentage of the reading*, ± 2% of reading or ± 1% of full scale, whichever is more accurate, to 500 KC; ± 5% full frequency range. Voltage range 0.3 mv to 300 v. $325.00 (cabinet), $330.00 (rack).

-hp- 400H Vacuum Tube Voltmeter

Need extreme accuracy of 1%? -hp- 400H covers 10 cps to 4 MC, has 5" meter with mirror scale, measures voltages 0.1 mv to 300 v (max. full scale sensitivity 1 mv), 10 megohm resistance minimizes circuit loading. 56 db feedback amplifier insures stability. Rugged, trouble-free precision instrument. $525.00 (cabinet), $530.00 (rack).

For details, circle #8 on Reader Service Card

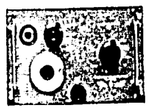
NEW! -hp- 524C Precision Electronic Counter



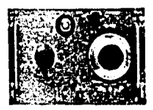
- Bright, big-number readout
- New stability—3 parts in 10^9 short-term
- Direct, instantaneous, automatic readings
- Covers frequencies 10 cps to 220 MC*
- Measures time interval 1 μsec to 100 days
- Measures period 0 cps to 10 KC
- Resolution 0.1 microseconds
- No calculation or complex setup
- Easily used by non-technical personnel
- High sensitivity, impedance, reliability

* With proper plug-ins.

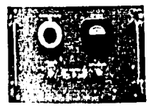
5 PLUG-IN UNITS INCREASE FLEXIBILITY, USEFULNESS FOR MANY MEASUREMENTS



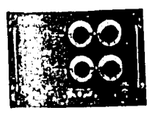
-hp- 525A Frequency Converter. Extends 524's direct reading range to cover 10 cps to 100 MC with no loss in accuracy. Provides additional amplification to increase video sensitivity to 0.1 v through 524's basic 10 cps to 10.1 MC range. $250.00.



-hp- 525B Frequency Converter. Converts -hp- 524 for direct readings 100 to 220 MC in decade steps. Maintains same high accuracy throughout range; provides high sensitivity for low level work. $250.00.



-hp- 526A Video Amplifier. Increases 524 sensitivity to 10 mv for low power frequency measurement 10 cps to 10.1 MC. Accuracy same as counter; minimum input 10 millivolts rms. $175.00.



-hp- 526B Time Interval Unit. Permits 524 to measure interval 1.0 μsec to 100 days with accuracy of 0.1 μsec ± 0.0001%. Reads in sec, msec or μsec. Triggering from separate "stop" or "start" on pos. or neg. going waves. Trigger adjustable −192 to + 192 volts. $175.00.

-hp- 526C Period Multiplier. Permits 524 to measure period over 100, 1,000 or 10,000 cycles of unknown, thus providing the greater accuracy of mid-range frequency readings. Front panel switch selects desired period. $225.00.

New big-number readout, and new crystal oscillator stability of 5 parts in 10^9 per week—these are significant advances incorporated into new -hp- 524C Electronic Counter.

The new 524C permits you to buy only the basic counting facilities you need now—later on add inexpensive plug-ins to triple and quadruple the usefulness of your counter.

The basic -hp- 524C reads frequency 10 cps to 10.1 MC over 5 selected periods. Display time is variable, counts are automatically reset, action is repetitive, readings are direct without calculation or interpolation; an automatic illuminated decimal point is included.

The instrument is of highest quality throughout and employs a military design approach. -hp- 524C, less plug-ins, $2,300.00 (cabinet); $2,275.00 (rack mount). -hp- also offers Model 524D, similar but with 8 vertical readout units, at lower price.

Instrument	Primary Uses	Frequency Range	Characteristics	Price
-hp- 524B Frequency Counter	Frequency, period measurements	10 cps to 10.1 MC (Freq.) 0 cps to 10 KC (Period)	Direct reading, no interpolation; stability about 2/1,000,000/week	$2,150.00■
-hp- 524C Frequency Counter	Frequency, period measurements	10 cps to 10.1 MC (Freq.) 0 cps to 10 KC (Period)	Direct reading, no interpolation; stability about $5/10^9$ per wk	2,300.00■
-hp- 524D Frequency Counter	Frequency, period measurements	10 cps to 10.1 MC (Freq.) 0 cps to 10 KC (Period)	Direct reading, no interpolation; stability $5/10^9$ per wk	2,150.00■
-hp- 525A Frequency Converter	Extends 524 range to 100 MC; increases basic sensitivity	10 cps to 100 MC	Accuracy ±1 cps ± stability; 0.1 v rms min. input	250.00
-hp- 525B Frequency Converter	Extends 524 range from 100 to 220 MC; high sensitivity	100 MC to 220 MC	Accuracy ±1 cps ± stability; 0.2 v rms min. input	250.00
-hp- 526A Video Amplifier	Increases 524 sensitivity to 10 millivolts	10 cps to 10.1 MC	Accuracy same as basic counter; 10 mv rms min. input.	175.00
-hp- 526B Time Interval Unit	Measures interval 1 μsec to 100 days	1 μsec to 10^7 sec	Accurate 0.1 μsec ±0.0001%	175.00
-hp- 526C Period Multiplier	Period measurement	Extends range of 524 to measure 10,000 periods	Greater accuracy in period measurement	225.00

■ Rack mounted instrument $25.00 less.

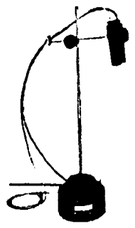
For details, circle #9 on Reader Service Card

Other hp Frequency Measuring and Monitoring Equipment

hp 500B/C Frequency Meters

Directly measures frequency of voltages 3 cps to 100 KC; expanded scale allows any 10% or 30% of range to be measured full scale. Sensitivity 0.2 v rms (sine waves), 1 v peak for pulses. Input impedance 1 megohm with 40 $\mu\mu$f shunt; accuracy independent of line voltage changes. Also available as *-hp-* 500C, calibrated for direct reading in rpm. *-hp-* 500B/C, $285.00 (cabinet), $290.00 (rack mount).

hp 506A Optical Tachometer Pickup



Versatile, flexible light source and pickup for use as a transducer with *-hp-* 521A/C, 500B/C, etc. Measures 300 to 300,000 rpm (beyond with amplified output); normal output at least 1 v rms into 1 megohm or greater impedance. Light source 21 cp 6 v bulb; Type 1P41 phototube, phototube bias 70 to 90 v dc (supplied from *-hp-* 500B/C, 521 A/C). *-hp-* 506A, $125.00.

hp 508A–D Tachometer Generators

Rotating speed transducers used with electronic counters or frequency meters for simple, accurate measurements from 15 to 40,000 rpm (or beyond with amplifier) *-hp-* 508A provides 60 output pulses per shaft revolution; *-hp-* 508B, C, D provide 100, 120 and 360 pulses/rev respectively. Output voltage increases linearly with shaft speed to 5,000 pps. Running torque approx. 0.15 in. oz.; peak starting torque approx. 4 in. oz. *-hp-* 508A, B, C or D, $100.00.

hp 521 Industrial Counters

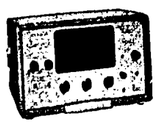
-hp- 521D

Low cost, simple operation, almost limitless uses characterize *-hp-* 521 Industrial Counters. *-hp-* 521A measures frequency, random events per unit of time; with transducers also measures rps, speed, rpm, weight, pressure, temperature, acceleration, etc. *-hp-* 521A reads direct in cps, rpm, and rps; display is variable 0.1 to 15 seconds or "hold." Frequency range 1 cps to 120 KC, accuracy ± 1 count ± accuracy of power line frequency (usually ± 0.1%); input min. 0.2 v rms; input attenuator adjusts sensitivity 0.2 to 100 v rms, input impedance 1 megohm with 50 $\mu\mu$f shunt, gate time 0.1 and 1 sec. also Manual Gate. *-hp-* 521C same as 521A except has greater accuracy, crystal controlled time base and 5-place (instead of 4-place) registration with count capacity of 99,999. *-hp-* 521D same as 521A except has in-line readout in bright, large numerals. *-hp-* 521E similar to 521D but has 5-place, in-line readout. *-hp-* 521G similar to 521A but measures to 1.2 MC (5 places). *-hp-* 521A, $475.00. *-hp-* 521C, $650.00. *-hp-* 521D, $675.00. *-hp-* 521E, $875.00. *-hp-* 521G, price on request.

Instrument	Primary Uses	Frequency Range	Characteristics	Price
-hp- 100D Secondary Standard	Frequency, time measurements	100 KC, 10 KC, 1 KC, 100 cps, 10 cps	Stability 1/1,000,000 (short-time). Sine or rectangular output. Marker pips	$ 750.00△
-hp- 500B Electronic Frequency Meter	Rapid frequency measurements	3 cps to 100 KC	9 ranges ±2% accuracy. Input 0.2 to 250 volts	285.00
-hp- 500C Electronic Tachometer Indicator	Rpm measurements	180 to 6,000,000 rpm	Similar to 500B but calibrated in rpm	285.00
-hp- 506A Optical Tachometer Pickup	Rps and rpm measurement	300 to 300,000 rpm	Phototube and light source; output 1 v rms	125.00
-hp- 508A Tachometer Generator	Shaft speed measurement	15 to 40,000 rpm	Output 60 cycles per revolution	100.00
-hp- 508B Tachometer Generator	Shaft speed measurement	15 to 30,000 rpm	Output 100 cycles per revolution	100.00
-hp- 508C Tachometer Generator	Shaft speed measurement	15 to 25,000 rpm	Output 120 cycles per revolution	100.00
-hp- 508D Tachometer Generator	Shaft speed measurement	15 to 5,000 rpm	Output 360 cycles per revolution	100.00
-hp- 520A Nuclear Scaler	For counting high-rate pulses	Capacity 100 counts in 2 decades. 10,000,000 pps counting rate	100:1 divider for operation of low speed scalers	615.00△
-hp- 521A Industrial Electronic Counter	Measure frequency, speed	1 cps to 120 KC	Direct reading, accurate within ±1 count ±0.1%, 4 place registration	475.00
-hp- 521C Industrial Electronic Counter	Measure frequency, speed	1 cps to 120 KC	Direct reading, accuracy within ±1 count ±0.01%, 5 place registration	650.00
-hp- 521D Industrial Electronic Counter	Measure frequency, speed	1 cps to 120 KC	Direct in-line readout accuracy within ±1 count ±0.01%	675.00
-hp- 521E	Measure frequency, speed	1 cps to 120 KC	Same as 521C except has in-line digital readout	875.00
-hp- 521G	Measure frequency, speed, elapsed time	1 cps to 1.2 MC	Direct reading, accuracy ±1 count ±0.1% 5 place registration	on request
-hp- 522B Electronic Counter	Frequency, period, time interval measurements	10 cps to 120 KC	Direct reading, accuracy ±1 count ±0.001%	915.00△
-hp- 523B Electronic Counter	Frequency, period, time interval	10 cps to 1.1 MC	Direct reading, accuracy ±1 count ±2/1,000,000	1,245.00
-hp- 523CR	Frequency, period, time interval	10 cps to 1.2 MC	Direct reading, accuracy ±1 count ±2/1,000,000, in-line digital readout, 10-line code arrangement	1,485.000
-hp- 523DR Electronic Counter	Frequency, period, time interval	10 cps to 1.2 MC	Direct reading, accuracy ±1 count ±2/1,000,000	1,285.00

△ Rack mounted instruments $15.00 less.

hp 522B Electronic Counter



Compact, low cost, versatile instrument for frequency, period or time measurements. Measures frequency 10 cps to 120 KC, time interval 10 μsec to 10^5 sec. Reads direct in cps, KC, seconds or milliseconds. Count automatically reset, action repetitive. Stability of time base 1/100,000 per week. Easily used by untrained personnel. High quality, completely self-contained, bright, clear numerals; ideal industrial as well as lab instrument. $915.00△.

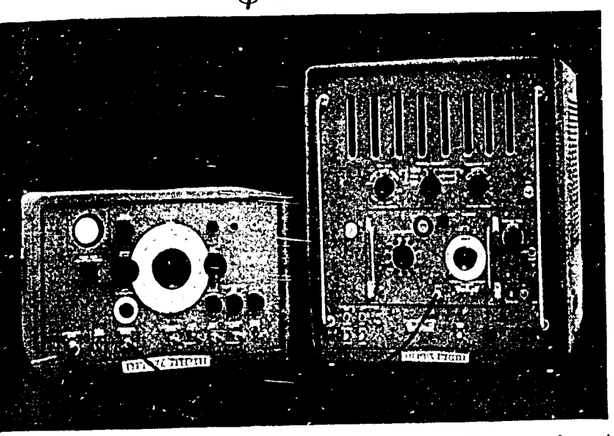
hp 523CR/DR Electronic Counters

-hp- 523CR

Model 523CR is a revolutionary all-purpose counter measuring frequency 10 cps to 1.2 MC, time interval 1 μsec to 27.8 hours, period 0.00001 cps to 100 KC. Stability 2/1,000,000 per week. Results displayed in sec, msec, μsec or KC; automatic decimal. Display time variable 0.1 sec to 10 sec or indefinitely. Accuracy ± 1 count plus crystal stability, 5 gate times. Usable with 100 KC primary standard. High quality; completely self-contained. Pulse output for Z-axis oscilloscope modulation. *-hp-* 523DR similar but has neon numeral column readout. *-hp-* 523CR, $1,485.00; *-hp-* 523DR, $1,285.00.

For details, circle #10 on Reader Service Card

hp 540A/540B Transfer Oscillator



Measure frequency to 12.4 KMC quickly, easily, with electronic counter accuracy. Avoid guesswork, end "trial and error," eliminate expensive setups. Measure on pulsed, AM, FM, CW and noisy circuits.

Just two -hp- instruments—Model 540B Transfer Oscillator and a 524 series electronic counter, (with plug-ins) are all the equipment you need to measure unknown frequencies up to 12.4 KMC swiftly and accurately.

This simple, two instrument setup is particularly useful for quick CW and AM frequency measurement, FM center frequency and deviation checks, and frequency of high-noise signals. Frequencies of pulsed signals can be measured using an external oscilloscope. Overall accuracy is better than 10 times that of the best microwave wavemeters; and on clean CW signals, is about 1/1,000,000.

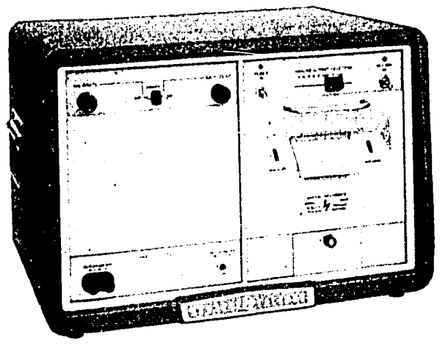
Simple operation

When approximate frequency is known, the 540B is tuned until a harmonic beats with the unknown. The multiplying factor is noted, and the 540B frequency measured on the 524. The 524 reading, times the multiplying factor, is the unknown.

Brief Specifications, hp 540B

Oscillator Freq. Range: 100 to 220 MC
Harmonic Freq. Range: Up to 12.4 KMC
Stability: Better than 0.002%/minute
Output: 2 volts into 50 ohms
Amplifier Gain: 40 db max, 1 v output
Oscilloscope: 100 cps to 200 KC; vert. sens. 5 mv rms/inch
Price: $750.00△.
Model 540A, similar to 540B, but requires an external mixer above 5 KMC. $615.00△.

hp 560A/561A/B Digital Recorder



Continuous digital record for counters
Direct reading, simple hookup
Five 11-digit lines/second
Analog output for pen recorder
Accuracy identical to counter used

No intermediate equipment is needed between *-hp-* 560A and an *-hp-* counter equipped with 560A digital recorder kit. In direct hookup, completely self-contained *-hp-* 560A provides a printed record of all types of test data, plus, through an analog output, a convenient graphic record of very small data variations.

The analog output is a voltage or current proportional to the number represented by any 3 consecutive digits of recorded data. The 560A permits expanded strip chart recording and the chart cannot be driven off scale since range variation for the 3-digit scale is 0 to 999. Wider variation merely causes a repetition of the 0 to 999 sequence. Print capacity is five, 11-digit lines/second; secondary or coding data may be entered simultaneously with primary data.

-hp- 561A Digital Recorder offers 10-line coded decimal entry with separate connection for each position of each wheel so that the instrument may be operated from relays, stepping switches and beam switching tubes.

-hp- 561B Digital Recorder similar to *-hp-* 561A, for use with *-hp-* 405AR Digital Voltmeter and *-hp-* frequency counters with in-line presentation.

△ Rack mount instrument $15.00 less.

Brief Specifications

Accuracy: Identical to counter used
Printing Rate: 5 lines/sec maximum
Digit Capacity: Up to 11 per line
Driving Source: 560A—Parallel entry staircase voltages
561A/B—Ten-line decimal code
Analog Output: (560A) Proportional to any 3 consecutive digits; max. amplitude 1 ma or 100 mv
Print Command Signal: 10 μsec minimum, pos. or neg., 15 v pulse
Price: *-hp-* 560A $1,265.00△ (with six comparators).
-hp- 561A $975.00△.
-hp- 561B price on request.

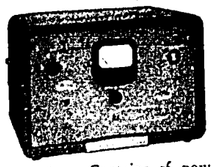
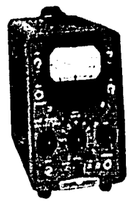
Microwave Impedance Measuring Equipment



hp 416A Ratio Meter

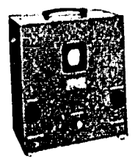
Automatically combines forward and reverse signals and displays their ratio directly, irrespective of amplitude variations. Contains rf power monitor indicating proper power level. Rear terminal signal available to operate oscilloscope or recorder. Suitable for single and swept frequency operation. $475.00△.



hp 415B Standing Wave Indicator

For all waveguide and coaxial slotted sections. Gives readings in SWR or db. Single frequency operation; 315 to 2020 cps. Low noise level, 0.1 μv (full scale) sensitivity, 60 db. calib. attenuator. $200.00.

hp 803A vhf Bridge



Provides direct impedance measurements in vhf range, 2 to 2,000 ohms, −90° to +90° phase angle. Wide frequency range 52 to 500 MC; makes measurements down to 5 MC and up to 1,000 MC. Fast, simple to use. $800.00.

hp 417A vhf Detector

Super-regenerative (AM) receiver covering all frequencies from 10 to 500 MC in 5 bands. Designed for use with -*hp*- 803A Bridge. 5 μv sensitivity full range. Single frequency control, reads direct in MC. $350.00.

Instrument	Primary Uses	Frequency Range	Characteristics	Price
-*hp*- 360A-D Low Pass Filters	Eliminates harmonic voltages from uhf systems	Cut-off frequencies A- 700 MC C-2,200 MC B-1,200 MC D-4,100 MC	50 db rejection at 1.25 cutoff freq.	$ 40.00
-*hp*- 415B Standing Wave Indicator	SWR indicator or null indicator	With external detectors, 10 to 18,000 MC	0 to 70 db attn. Max. sensitivity 0.1 μv	200.00
-*hp*- 416A Ratio Meter	Reflection coefficient measurements	With external detectors, 10 to 18,000 MC	Continuous swept frequency presentation; accuracy ±3%	475.00△
-*hp*- 417A vhf Detector	vhf bridge detector (for -*hp*- 803A)	10 to 500 MC	Approx. 5 μv sensitivity	350.00
-*hp*- 803A vhf Bridge	Measurement of vhf impedance, SWR	52 to 500 MC	2 to 2,000 ohms impedance —90° to +90° phase angle	800.00
-*hp*- 805A Coaxial Slotted Section	Measurement of SWR	500 to 4,000 MC	For Type N Connectors flexible cables	450.00
-*hp*- 805B Coaxial Slotted Section	Same as above	Same as above	For rigid 7/8" RG44/U line	450.00
-*hp*- 806B Coaxial Slotted Section	Same as above (mounts in 809B)	3,000 to 12,000 MC	For Type N Connectors flexible cables	200.00
-*hp*- 809B Universal Probe Carriage	G, J, H, X and P 810 Waveguide Sections Supports 806B section, also		Accepts 442B, 444A probes	160.00
-*hp*- 814B Universal Probe Carriage	Supports K and R 815B Waveguide Slotted Sections		Accepts Untuned Probe 446B	200.00

△ Rack mounted instruments $15.00 less.

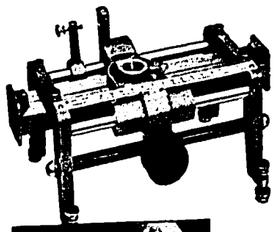
hp 360 Low Pass Filters

Isolating filters which speed microwave measurements by eliminating harmonics, permitting transmission at single, known frequency only. Particularly necessary in slotted line, filter characteristic, receiver response, similar measurements. Table above gives cut-off frequency; insertion loss not over 3 db; nominal impedance 50 ohms. -*hp*- 360A, B, C or D, $40.00.

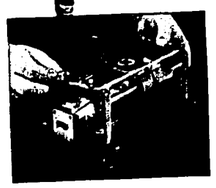
hp 805A/B Slotted Lines

Exclusive -*hp*- "parallel-plane" design insures utmost mechanical rigidity, less leakage, greater accuracy, low SWR of 1.02 or 1.04 (depending on model). Range 500 MC to 4 KMC, reads in cm and mm to 0.1 mm. -*hp*- 805A, for 50 ohm Type N use, -*hp*- 805B, for 46.3 ohm RG 44/U stub supported 7/8" O.D. coax. -*hp*- 805A/B, $450.00.

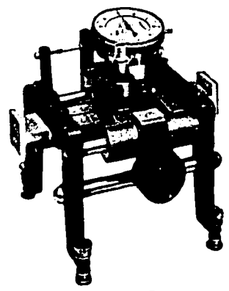
hp 809B/814B Universal Probe Carriages



-*hp*- 809B and 810B



Quick, easy waveguide interchange



-*hp*- 814B, 815B, 446B

Models 809B and 814B are precision built mechanical assemblies operating, respectively, with -*hp*- 810B and 815B series slotted sections.

Combination of the 809B carriage and 810 slotted sections covers 2.6 to 18.0 KMC. Combination of 814B carriage and 815B series sections covers 18.0 to 40.0 KMC.

On either carriage, waveguides can be interchanged in seconds for real savings on engineering time. Only one probe is required for each carriage to cover full frequency range. Manufacture is of highest quality to assure positive mechanical positioning of interchangeable waveguides and precise installation of mating -*hp*- probes (see table, "Waveguide Test Equipment"). -*hp*- 809B has a vernier scale reading to 0.1 mm and is equipped for dial gauge mounting. -*hp*- 814B has a dial read directly to 0.1 mm and interpolated to 0.01 mm.

-*hp*- 810B Slotted Sections. -*hp*- 810B, for mounting in 809B carriage, is a flanged, waveguide section with accurately machined slot. Slot is tapered at ends to minimize reflection. Available in 5 waveguide bands, 3.95 through 18.0 KMC.*

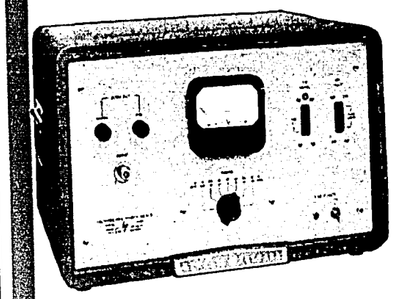
-*hp*- S810A. Complete slotted section assembly including probe carriage. In 2.6 to 3.95 KMC (S-band) size only.*

-*hp*- 815B Slotted Sections. For mounting in 814B carriage. Available K and R bands, 18.0 to 40.0 KMC. These sections are accurately machined so that they are quickly and easily interchanged, and precisely positioned.*

*For prices, see Waveguide Test Equipment table.

For details, circle #12 on Reader Service Card

Microwave Power Measuring Equipment



hp 434A Calorimetric Power Meter

Just connect and read powers 10 mw to 10 watts! Covers dc to 12.4 KMC. No barretter or thermistor needed. No external terminations or plumbing. Measures CW or pulsed power. Two simple controls; no technical skill required.

New -*hp*- 434A Calorimetric Power Meter is, factually, the fastest, easiest way yet devised to measure powers accurately from 10 milliwatts to 10 watts, dc to 12.4 kilomegacycles.

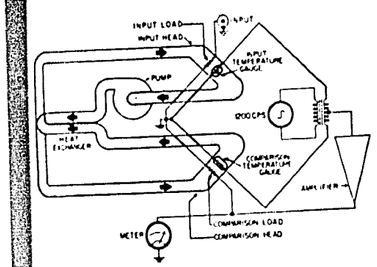
With the 434A, measurement is literally as simple as connecting to the 50 ohm, type N front panel terminal and reading power directly. Thus the instrument is particularly suited for use by non-technical people.

Compact, self-contained

-*hp*- 434A fills the range between bolometer microwave power meters (such as the popular -*hp*- 430C, below) and conventional calorimeters for powers above 10 watts. But unlike previous cumbersome equipment suggested for its range, the new -*hp*- 434A is compact, moderate in cost, completely self-contained, and needs no detectors or external plumbing whatsoever.

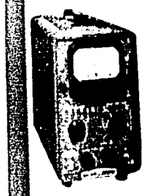
Brief Specifications

Input Power Range: 7 ranges; full scale readings 0.01 to 10 watts
Frequency Range: dc to 12.4 KMC
dc Input Impedance: 50 ohms ± 5 ohms at input jack
Input SWR: Less than 1.7 full range, less than 1.3 to 7 KMC
Meter Response (full scale): Less than 5 seconds
Controls: Zero Set, Meter Range
Accuracy: Within 5% of full scale
Price: $1,115.00 (cabinet); $1,100.00 (rack mount)



Circuitry, -*hp*- 434A

hp 430C Microwave Power Meter



No computations! Provides instantaneous, automatic power readings *direct* in dbm or mw at all frequencies for which there are suitable bolometer mounts. For CW measurements, uses either 1/100 amp. fuse or Sperry 821 barretter. Also measures CW or pulsed power with negative coefficient thermistor. Provides up to 16 ma bias current. Operates with all mounts in adjacent table. Range 0.02 to 10 mw. $250.00.

hp 477B Coaxial Thermistor Mount

For frequency range 10 MC to 10 KMC. SWR less than 1.5. Thermistor element is 200 ohm negative. No tuning required; not susceptible to burnout. $75.00 (including thermistor).

hp 764D-767D Dual Directional Couplers

New high directivity dual coaxial couplers make reflectometer measurements practical in vhf and uhf coax systems. Flat response, high power capacity, low insertion loss. Four models, covering 216 to 4,000 MC collectively. 764D/765D $160.00. 766D/767D $150.00.

Instrument	Primary Uses	Frequency Range	Characteristics	Price
-*hp*- 430C Microwave Power Meter	Measurement of rf power	Depends on Bolometer Mount	0.02 to 10 mw ±5% accuracy	$ 250.00
-*hp*- 434A Calorimetric Power Meter	Measurement of rf power	dc to 12.4 KMC	Direct reading, no barretters, thermistors or terminations; CW, pulsed	1,115.00△
-*hp*- 475B Tunable Bolometer Mount	Measurement of rf power (with 430B/C)	1,000 to 4,000 MC	Matches 50 ohm line to 100 or 200 ohms	225.00
-*hp*- 476A Universal Bolometer Mount	Measurement of rf power (with 430B/C)	10 to 1,000 MC	No tuning required SWR less than 1.25	85.00
-*hp*- 477B Coaxial Thermistor Mount	Measurement of rf power (with 430C)	10 MC to 10 KMC	No tuning required SWR less than 1.5	75.00
-*hp*- 485 Waveguide Detector Mount	Measurement of rf power	2,600 to 12,400 MC	Full coverage of waveguide band	See Table Waveguide Equipment
-*hp*- 487B Waveguide Thermistor Mount	Measurement of rf power	3,950 to 40,000 MC	Full coverage, no tuning, 1.5 SWR except K/R487B 2.0	See Table Waveguide Equipment
-*hp*- 764D Dual Directional Coupler	Reflectometer and rf power measurements	216 to 450 MC	Coupling attenuation* 20 db, directivity 30 db	160.00
-*hp*- 765D Dual Directional Coupler	Reflectometer and rf power measurements	450 to 945 MC	Coupling attenuation* 20 db, directivity 30 db	160.00
-*hp*- 766D Dual Directional Coupler	Reflectometer and rf power measurements	940 to 1,975 MC	Coupling attenuation* 20 db, directivity 26 db	150.00
-*hp*- 767D Dual Directional Coupler	Reflectometer and rf power measurements	1,900 to 4,000 MC	Coupling attenuation* 20 db, directivity 26 db	150.00

*Power handling capacity all 764/767 series couplers 50 watts CW, 10 Kw peak.

†For use with barretter or crystal. ‡For use with barretter only. *Complete assembly including carriage. §Mounts in 809B Carriage.

■ Includes Thermistor, installed. **J530A, 5.85 to 8.2 KMC, $120; J530B, 5.20 to 7.05 KMC, $150. * Includes barretter; checked for square law characteristics.

††Available with circular flanges equivalent to UG-425/u for K bands and UG-381/u for R bands. Specify by adding suffix "C" to model number: i.e., K487BC.

NEW! hp 382A Precision Attenuators

Previously offered for frequencies 3.95 through 18.0 KMC, popular -hp- 382A series precision attenuators are now available in "K" and "R" bands, 18.0 to 40.0 KMC. "K," "R" band attenuators are of new, space-saving design (see photo). Direct reading, one-control tuning, high power handling capacity. Attenuation 0 to 50 db full range, independent of frequency. Phase shift constant with attenuation. For prices G, J, H, X and P382A, see table above. -hp- K382A, $425.00. -hp- R382A, $450.00

hp 281A Waveguide - Coax Adapters

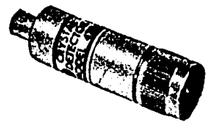
For convenient transition between waveguide and coax systems. Each unit covers a full waveguide range with SWR less than 1.25. Type N coax plug, AN waveguide flange. For S, G, J, H and X bands, 2.6 to 12.4 KMC. $25.00 to $50.00.

hp 487B Thermistor Mounts

For fast, accurate waveguide power measurements. Each unit covers full range of its waveguide frequency. No tuning needed, SWR 1.5 max., except K and R bands, SWR 2.0 max. Max. power 10 mw. Rugged construction, high temperature coefficient thermistors virtually eliminate burnout. For G, J, H, X, P, K and R bands. 3.95 to 40.0 KMC. $75.00 to $225.00.

hp 870A Slide Screw Tuners

For flattening waveguide systems, matching, etc. Probe position and penetration adjusts to set up reflection canceling existing reflection. Precision lead screw or micrometer varies probe insertion; vernier adjusts probe position. Corrects SWRs of 20 with accuracy of 1.02 SWR. For S, G, J, H, X, P, K, R bands, 2.6 to 40.0 KMC. $125.00 to $225.00.



hp 420A/B Crystal Detectors

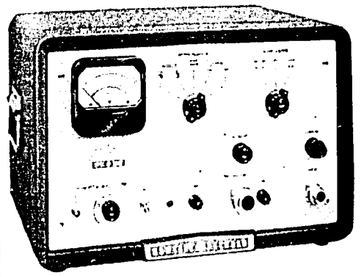
Employs a silicon crystal to detect rf signals in Type N coaxial lines. Covers frequencies 10 MC to 12.5 KMC, sensitivity approx. 0.6 v/0.1 mw, frequency response ±3 db full range. Uses modified 1N26 crystal, max SWR 3. $50.00 each. Also available as matched pairs as -hp- 420B, $150.00 pair.

hp 444A/446B Untuned Probes

-hp- 444A is modified crystal (1N76 or 1N26) plus small antenna in convenient housing. Probe penetration easily variable; may be locked in position. No tuning needed; sensitivity superior to most elaborate single or double tuned probes. Range 2.0 to 18 KMC; fits ¾" bore. *New -hp- 446B*, for -hp- 814 Probe Carriage, similar but covers K and R bands, 18.0 to 40.0 KMC. -hp- 444A, $40.00. -hp- 446B, $145.00.

NEW! hp Noise Measuring Equipment

hp 340B/342A Noise Figure Meters



Receiver and component alignment jobs that once took skilled engineers a full hour are now done in 5 minutes by a semi-skilled worker. Receiver performance can often be improved over the best adjustment previously possible. Improvement in receiver performance often equals doubling transmitter output. Since accurate alignment is easy, equipment is better maintained and peak performance enjoyed regularly.

Above are some of the time-saving, cost-cutting advantages of new -hp- noise figure measuring equipment including new Models 340B and 342A Noise Figure Meters and a variety of coaxial and waveguide noise sources.

Model 340B Noise Figure Meter automatically measures and continuously displays IF or rf amplifier noise figure at either 30 or 60 MC. Other frequencies from 10 to 60 MC on special order.

Model 342A Noise Figure Meter is similar to Model 340B except that it operates on five frequencies, 30, 60, 70, 105, and 200 MC. 30 MC and four other frequencies between 38 and 200 MC on special order.

Brief Specifications

Frequency Range: Depends on noise source

Noise Figure Range: 3 to 30 db, indication to ∞ with waveguide noise source
0 to 15 db, indication to ∞ with IF noise source

Accuracy: ± 0.5 db, 10 to 25 db; ± 1 db, 3 to 10 db, and 25 to 30 db, waveguide noise source
± 0.5 db, 0 to 15 db, IF noise source

Required Rcvr or rf Amplifier Gain: Approx. 40 db minimum (Waveguide Noise Source)
Approx. 50 db minimum (IF Noise Source)

Input Frequency: 30 or 60 MC, selected by switch

Bandwidth: 1 MC minimum

Input Impedance: 50 ohms

Price: -hp- 340B, $715.00△; -hp- 342A, $815.00△.

(Note: This instrument available only in U. S. and Canada.)

hp 343A vhf Noise Source

For IF and rf amplifier measurement. Temperature-limited diode broadband source operating at frequencies 10 to 600 MC. Excess noise 5.2 db, 50 ohms impedance. $75.00.

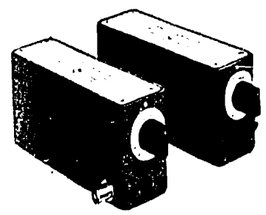
hp 345B IF Noise Source

Operates at either 30 or 60 MC. Frequency selector switch; other frequencies between 10 and 60 MC on special order. Separate switch matching 50, 100, 200 and 400 ohm lines. Excess noise 5.2 db. Temperature limited diode instrument. $75.00.

hp 347A Waveguide Noise Source

Argon gas discharge tubes mounted in waveguide section. Models cover all waveguide frequencies 2.6 through 18.0 KMC; S, G, J, H, X and P bands. Excess noise level approximately 15.2 db; noise level uniform even when instrument is cold. $180.00 to $190.00.

hp 355A/B Attenuators – 0 to 132 db



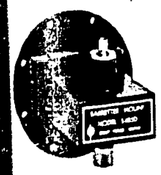
Here are two completely new design 50 ohm attenuators providing, together, 0 to 132 db attenuation in 1 db steps from dc to 500 MC! -hp- 355A provides 0 to 12 db attenuation in 1 db steps; -hp- 355B provides 0 to 120 db attenuation in 10 db steps. One simple control for each attenuator; overall full range accuracy is ± 0.25 db for -hp- 355A. For -hp- 355B, accuracy is ±1 db to 250 MC; ± 2 db to 500 MC. -hp- 355A or 355B, $125.00.

hp 350 Attenuators

Basic bridged-T high accuracy attenuators (not pictured). -hp- 350A matches 500 ohm lines, -hp- 350B matches 600 ohms. Maximum 110 db attenuation in 1 db steps. 5 watts capacity, high accuracy, compact, low cost. -hp- 350A or 350B, $85.00.

More hp equipment, available for most waveguide frequencies

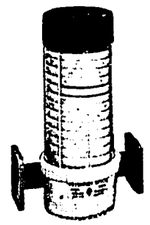
hp 485 Detector Mounts



Three basic series offered; *S485A* for S band (no tuning, 1.35 SWR, 821 element); *485B*, for G, J, H, X bands (tunable, 1.25 SWR (with barretter) full range, 1N23, 1N21 or 821 element); *485D* for S, G, J bands (factory-installed 821 barretter). $75.00 to $170.00.

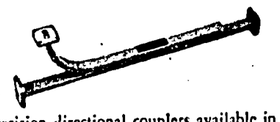
△ Rack mount instrument $15.00 less.

hp 532A Waveguide Frequency Meters



New design for P, K, R bands. Wide band, direct reading, no interpolation or charts. Comprises a high Q resonant cavity tuned by choke plunger; no sliding contacts. Transmits almost full power at resonance; resonance indicated by 1.5 db dip in output. Precision tuning mechanism; no back-lash. Also similar model for X-band. $150 to $250.

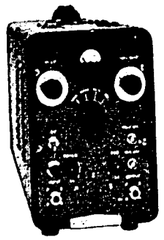
hp 752 Multi-Hole Couplers



Precision directional couplers available in 3 models with coupling factors of 3, 10 and 20 db. Coupling accuracy ± 0.4 db except K, R bands which are ± 0.7 db. Directivity better than 40 db full range, coupling variation not over ± 0.5 db full range. Primary guide SWR less than 1.05. S, G, J, H, X, P, K, R bands, 2.6 to 40.0 KMC. $100.00 to $375.00.

Wide Band Amplifiers for Fast Circuit Work

Traveling-Wave Tube Amplifiers



-hp- offers Traveling-Wave Tube Amplifiers for all frequencies 2 to 12.4 KMC. *-hp-* 490B, 492A and 494A are low level, high gain amplifiers with 30 and 25 db gain; they offer amplitude, pulse, phase or FM modulation. *-hp-* 491A is a high power traveling-wave tube amplifier having a rated output of 1 watt, 2 to 4 KMC. All amplifiers have exclusive *-hp-* helical coupling system, and employ encapsulated traveling-wave tubes that can be readily replaced. *-hp-* 490B/491A, $1,400.00. *-hp-* 492A/494A, $1,500.00.

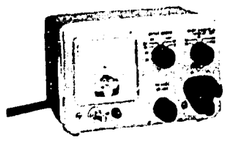
Instrument	Primary Uses	Frequency Range	Characteristics	Price
-hp- 450A Amplifier, Stabilized	General purpose lab amplifier	10 cps to 1,000,000 cps	20 and 40 db gain, frequency response ±½ db	$ 140.00
-hp- 460AR Amplifier, Wide Band	Wide band, pulse amplification	100 KC to 120 MC	20 db gain, rise time 0.003 μsec	185.00
-hp- 460BR Amplifier, Fast Pulse	Pulse amplification high output	100 KC to 120 MC	15 db gain, 125 peak volts	225.00
-hp- 490B Traveling-Wave Tube Amplifier	Amplification throughout "S" band	2 to 4 KMC	30 db gain; Millimicrosec rise time; 10 mw output	1,400.00
-hp- 491A Traveling-Wave Tube Amplifier	High power "S" band amplification	2 to 4 KMC	30 db gain; millimicrosec rise time; 1 watt output	1,400.00
-hp- 492A Traveling-Wave Tube Amplifier	Amplification through most of "G" and "J" bands	4 to 8 KMC	30 db gain; millimicrosec rise time; 10 mw output	1,500.00
-hp- 494A Traveling-Wave Tube Amplifier	Amplification throughout "X" band	7 to 12.4 KMC	25 db gain; millimicrosec rise time; 5 mw output	1,500.00

460AR/BR Fast Pulse Amplifiers

-hp- 460AR Wide Band Amplifiers, in cascade with *-hp-* 460BR Fast Pulse Amplifiers, provide up to 90 db gain, 125 v open circuit. This permits direct connection to oscilloscope deflection plates. Rise time 0.003 μsec. Will amplify millimicrosecond pulses. Over 100 MC band width for 'scopes. *-hp-* 460AR, $185.00. *-hp-* 460BR, $225.00.

Regulated and Klystron Power Supplies

NEW! 721A Transistor Power Supply



New, completely transistorized, compact, regulated supply. Output 0 to 30 v, continuously variable. 150 ma maximum output, output impedance less than 0.2 ohms. Regulation, no load to full load, 0.3% or 30 mv whichever is greater. Line voltage change of ± 10% causes output change of less than 0.3% or ± 15 mv, whichever is greater. Front panel switch limits maximum output current preventing damage to transistors, etc., from accidental overload. Reads ma, v direct. $145.00.

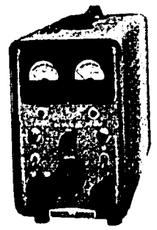
Instrument	Primary Use	Characteristics	Price
-hp- 711A Laboratory Power Supply	General purpose regulated dc supply for lab and field use	0 to 500 volts @ 100 ma	$250.00
-hp- 712B Power Supply	Same as 711A	0 to 500 volts @ 200 ma	365.00△
-hp- 715A Klystron Power Supply	Regulated beam, reflector source for low power klystrons	250 to 400 volts @ 50 ma	300.00
-hp- 721A Transistor Power Supply	Powering transistors, similar applications	0 to 30 v, 150 ma	145.00

△ Rack mounted instruments $15.00 less.

712B Power Supply

This *-hp-* instrument features high regulation of 50 mv no load to full load, 0.1 millisecond transient response, internal impedance 0.1 ohms in series with 25 μh; full-load maximum hum less than 500 μv, sealed transformers, chokes and condensers. 0 to 500 v, 200 ma supply and fixed −300 v tap providing a 50 ma, 300 to 800 v variable supply for klystron operation. $365.00△.

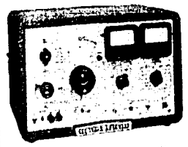
711A Power Supply



High regulation, 0 to 500 volt supply with separate meters. Ideal for powering experimental setups, other basic applications, including driving low level amplifiers, constant frequency oscillators and other setups requiring highly stable voltages. Regulation 0.5% or 1.0 volt, whichever is greater, no load to full load or on line voltages 110/230 v ± 10%. Less than 1.0 mv ripple, overload relay protection. Includes two 6.3 v ac 3 amp supplies. $250.00 (rack mount, $255.00).

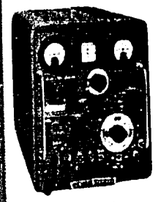
Signal Generators – 50 KC to 21 KMC

NEW! 606A Standard Signal Generator



New, ultra-modern; 50 KC to 65 MC. Output 3 v full range, continuous attenuation to 0.1 μv. MO-PA circuit with full feedback loop insures constant output full range. Low distortion, broad modulating capabilities. Typical *-hp-* speed, ease of operation; occupies ¼ bench space normally needed for generators of this frequency. $1200.00△.

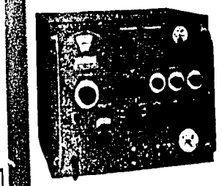
608D vhf Signal Generator



10 to 420 MC. Highest stability. No incidental FM or frequency drift. Calibrated output 0.1 μv to 0.5 v throughout range. Built-in crystal calibrator provides frequency check accurate within 0.01% each 1 and 5 MC. Master-oscillator, intermediate and output amplifier circuit design. Premium quality performance, direct calibration, ideal for aircraft communications equipment testing. $1,100.00.

-hp- 608C vhf Signal Generator. High power (1 v max.) stable, accurate generator for lab or field use. 19 to 480 MC. Ideal for testing receivers, amplifiers, driving bridges, slotted lines, antennas, etc. $1000.00.

626A/628A shf Signal Generators

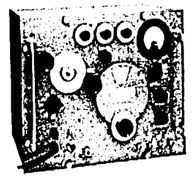


New instruments, bringing high power, wide range, convenience and accuracy to 10 to 21 KMC range. Frequencies, output voltage directly set and read. Output 10 to 20 db better than previous spot-frequency sets SWR better than 1.2 at 0 dbm and lower. Internal pulse FM or square wave modulation; also external pulsing or FM'ing. *-hp-* 626A, 10 to 15.5 KMC, $3,250.00. *-hp-* 628A, 15 to 21 KMC, $3,250.00.

Instrument	Frequency Range	Characteristics	Price
-hp- 606A	50 KC to 65 MC	Output 0.1 μv to 3 v. Full feedback loop, low distortion	$1,200.00△
-hp- 608C	10 to 480 MC	Output 0.1 μv to 1 v into 50 ohm load. AM, pulse, or CW modulation. Direct calibration	1,000.00
-hp- 608D	10 to 420 MC	Output 0.1 μv to 0.5 v. Incidental FM less than 0.001%	1,100.00
-hp- 612A	450 to 1,230 MC	Output 0.1 μv to 0.5 v into 50 ohm load. AM, pulse, CW or square wave modulation. Direct calibration	1,200.00
-hp- 614A	800 to 2,100 MC	Output 0.1 μv to 0.223 v into 50 ohm load. Pulse, CW or FM modulation. Direct calibration	1,950.00
-hp- 616A	1,800 to 4,000 MC	Output 0.1 μv to 0.223 v into 50 ohm load. Pulse, CW or FM modulation. Direct calibration	1,950.00
-hp- 618B	3,800 to 7,600 MC	Output 0.1 μv to 0.223 v into 50 ohm load. Pulse, CW FM or square wave modulation. Direct calibration	2,250.00
-hp- 620A	7,000 to 11,000 MC	Output 0.1 μv to 0.223 v into 50 ohm load. Pulse, FM or square wave modulation. Direct calibration	2,250.00
-hp- 623B	5925 - 6575 MC 6575 - 7175 MC 7175 - 7725 MC (specify)	Output 70 μv to 0.223 v into 50 ohm load. FM or square wave modulation. Separate power meter and wave meter section	1,900.00
-hp- 624C	8,500 to 10,000 MC	Output 2.23 μv to 0.223 v into 50 ohm load. Pulse, FM or square wave modulation. Separate power meter and wave meter section	2,265.00△
-hp- 626A	10 to 15.5 KMC	Output 10 dbm to −90 dbm. Pulse, FM, or square wave modulation. Direct calibration	3,250.00
-hp- 628A	15 to 21 KMC	Output 10 dbm to −90 dbm. Pulse, FM, or square wave modulation. Direct calibration	3,250.00

△ Rack mounted instruments $15.00 less.

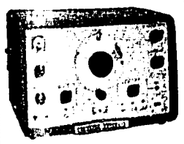
614A/616A uhf Signal Generators



Among most widely used signal generators. *-hp-* 614A, 800 MC to 2.1 KMC, *-hp-* 616A, 1.8 to 4.0 KMC. Direct reading, direct frequency set, no calibration charts, wide range. *-hp-* 614A SWR 1.6, output accuracy ± 1 db − 10 dbm to −127 dbm. *-hp-* 616A, SWR 1.8, output accuracy ± 1.5 db, −7 dbm to −127 dbm. Both have constant internal impedance 50 ohms. Modulation is internal or external pulse, or FM. *-hp-* 614A or *-hp-* 616A, $1,950.00.

Swept Frequency Oscillators

686A Electronic Sweep Oscillator



Totally new kind of backward-wave device eliminating sweep motors, tuning plungers, range limitations, etc. Covers all or part of X-band with flexible, *quiet* electronic sweep. Simple to operate, direct reading, continuously adjustable sweep width and rate, 10 mw output minimum, frequency sweep linear with time. Has slow sweep for recorders; fast for oscilloscope; single sweep manually started or externally triggered, external FM, AM modulation. Ultimate in X-band sweep oscillators, $2900.00△.

Instrument	Frequency Range	Characteristics	Price
-hp- 683A	2.0 to 4.0 KMC	Electronically swept; variable sweep rate, width. Output 10 mw, SWR 2.1 or less. Pulse, square wave, FM, AM modulation	$3,000.00△
-hp- 684A	3.7 to 5.9 KMC		2,900.00△
-hp- 685A	5.2 to 8.3 KMC		2,900.00△
-hp- 686A	8.2 to 12.4 KMC		2,900.00△
-hp- 687A	12.4 to 18.0 KMC		3,400.00△

△ Rack mounted instruments $15.00 less.

Data subject to change without notice. *Prices f. o. b. factory.*

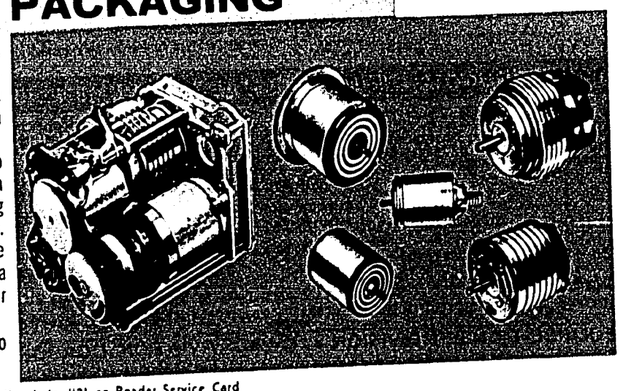
COMPONENT PACKAGING

In addition to supplying catalog component items such as — synchros, motors, gyros, etc. — Eclipse-Pioneer is in an excellent position to offer a premium in the way of customer service and accommodation on component packaging.

We may have already solved a problem similar to yours — for somebody else, thus enabling our system specialists to adapt from our extensive line, existing production packages to meet your systems requirements.

Should your problem turn out to be entirely new, we can — and will — design, develop, and produce a component or complete system to solve your specific problem.

No package too intricate or too simple, no quantity too large or too small — for Eclipse-Pioneer.

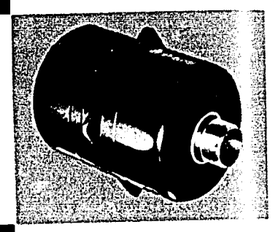


For details, circle #21 on Reader Service Card

PRECISION GYROS FOR ALL APPLICATIONS

Eclipse-Pioneer . . . the nation's foremost supplier of panel indicator gyros . . . offers a complete line of gyros to meet all applications. This group includes all the basic vertical, rate, free, and directional types used as reference components in complete navigation, radar, compass, automatic flight control, and guidance systems.

CAGEABLE FREE GYRO TYPE NUMBER 17224-1-A



FEATURES: Designed specifically for missile application where maximum operating temperature of 350°F. allows location near missile skin. Caging time of 8 secs. achieved through solenoid-link mechanism, thus replacing standard motor-gear train caging mechanisms.

MOTOR: 115 volts, 400 cps, 3 phase with rated speed of 22,000 rpm and a rotor moment of inertia of 1260 gram-cm².

DRIFT RATE: Will not exceed 4° per hour when subjected to Scorsby test at amplitude of ±15° and rate of approximately 6 cpm (corrected for earth's rotation).

PICKOFF: Potentiometer pickoff available on inner and outer gimbal axes. May be excited by either dc or ac source potential. 360° freedom on outer axis and ±85° on inner axis.

CAGING AND UNCAGING: Can be caged and uncaged remotely by applying 28 volts dc. Positive mechanical locking in cage position. Dynamic caging up to roll rates of 30°/sec. Will cage consistently from any position within 8 secs. with gyro rotor at full speed. Application of 28 volts dc will uncage within 0.1 seconds.

WARM-UP TIME: 90% of rated speed in one minute.

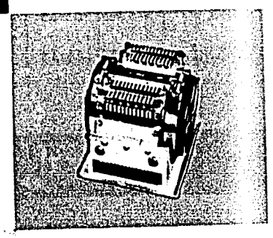
ENVIRONMENTAL CHARACTERISTICS: Maximum operating temperature of 350°F. and a minimum of −55°F. Maximum allowable shock is 60 g. with maximum operating vibration of 7 g. (from 10 to 550 cps). Maximum excursion not to exceed 0.5 in. Positive hermetic seal.

OPERATING LIFE: Minimum of 1000 hours.

OVERALL SIZE: 4 inches x 5 inches (less connector).

WEIGHT: Approximately 4.2 lbs.

MINIATURE VERTICAL GYRO TRANSMITTER TYPE NUMBER 14128-1-A



FEATURES: Electrolytic switch detectors, hysteresis synchronous motor, completely self-contained, requires no erection amplifier, and hermetically sealed.

MOTOR: 115 volts, 400 cps, 3 phase, hysteresis synchronous with rated speed of 24,000 rpm and a rotor moment of inertia of 1200 gram-cm².

DATA TRANSMITTERS:
- Type — Autosyn synchro
- Output voltage — 11.8 volts (maximum)
- Null — 30 mv (maximum)
- Maximum error — 7 minutes
- Sensitivity — 200 mv/degree

ERECTION RATE:
- Normal — 2 degree per minute, nominal
- Fast — 20 degree per minute

DEGREES OF FREEDOM:
- Bank — 360 degrees
- Pitch — Controlled tumbling at 85 degrees (approximately)

FREE DRIFT: ¼ degree per minute

OPERATING LIFE: 1000 hours

TEMPERATURE RANGE: −55°C to +71°C

DIMENSIONS:
- With shockmount — 5-1/2" wide x 4-15/16 high x 5-1/4 long
- Gyro only — 3-1/2" diameter x 5" long

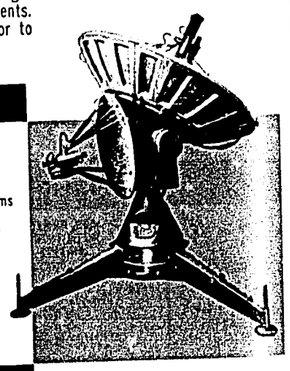
WEIGHT:
- With shockmount — 5 lbs. 12 oz.
- Gyro only — 3 lbs. 12 oz.

RADAR ANTENNA DEVICES

Vast experience in servo-mechanisms and in latest packaging techniques plus the use of lightweight castings throughout, enables Eclipse-Pioneer to manufacture radar antenna devices to meet a wide variety of exacting requirements. Airborne or ground radar antenna devices can be supplied to include the electro-mechanical drive unit only or to include the complete reflector assemblies and feed systems.

TYPICAL EXAMPLES OF ECLIPSE-PIONEER RADAR ANTENNA DEVICES

HIGH GAIN SEARCH ANTENNA

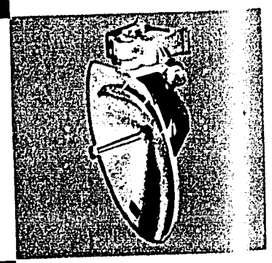


Lightweight, ground-based, air-transportable, dual reflector, multi-band, high gain search antenna and control system.

Specifications	
Weight	1000 lbs.
Data accuracy	0.5 mil.
Slewing rates (in azimuth and elevation)	2 rpm
Operating temperature range	−54°C to +66°C
Elevation and Azimuth	Two-speed 60 cps synchro data systems 1:1 and 36:1
Servo drives	Induction motor coupled bidirectional hysteresis clutch
Wind loading	50 mph (full operating performance). 100 mph (no structural damage).
Frequency range	10 to 1
Bands	Four, remotely selected
Polarization	Four planes remotely selected
Beam width	Broad and narrow remotely selected

Available with shock-proof, water-proof transit cases.

AIRBORNE WEATHER RADAR ANTENNA TYPE NUMBER 40027-□-A

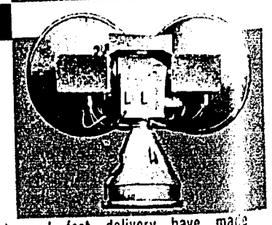


Airborne weather radar antenna with line of sight stabilization for x- or c-band, switchable wide fan (cosecant squared) beam pattern for mapping or pencil beam for storm detection.

Specifications	
Standard frequency range	9345 to 9405 mc/s. This permits beacon operation at 9310 mc/s.
Optional frequency range	9215 to 9275 mc/s.
Operation	Up to 60 kw peak with a 0.001 duty cycle.
Reflector size	30 in. dia. (truncated)
Beam width	3.2° maximum in E and H planes
Side lobes	At least 18 db below main lobe peak.
Polarization	Horizontal for pencil beam, vertical for mapping.
Weight	27 lbs. (approximate)
Operating temperature range*	−40°C to +55°C
Storage temperature range*	−65°C to +55°C
Humidity	10% to 95%

*These temperature ranges can be extended for specific application

GROUND ANTENNA PEDESTAL TYPE NUMBER 40107-1-A



Lightweight, ground-based, air or all-purpose vehicle transportable tracking antenna pedestal for mounting dual reflector.

Specifications	
Weight	700 lbs. approx.
Data accuracy*	0.7 mil.
Slewing rates (in azimuth and elevation)	4 rpm.
Operating temperature range	−54°C to +66°C
Elevation and Azimuth	Two-speed synchro data systems 1:1 and 16:1
Elevation load	Counterbalanced
Servo drives	¾ hp motors (dc) for use with an amplidyne servo system.
Wind loading	50 mph (full operating performance) 100 mph (no structural damage)

*Higher accuracies available

Supermarket volume makes Eclipse-Pioneer the ideal place to shop for synchros, motors, gyros, radar antenna devices, and component packages.

Premium precision, minimum cost, and fast delivery have made Eclipse-Pioneer the "buy word" for precision components.

MAGNETRONS

FERRITE DEVICES

SYLVANIA MICROWAVE COMPONENTS & TUBES

"Rocket" Planar Triodes

Sylvania Rocket Tubes are planar-electrode disc-seal triodes for use as oscillators and amplifiers at frequencies up to 3300 mc. Design permits broadband operation. Tuning is simpler and covers a greater continuous range than that of many other types of UHF tubes.

2C36—is a pulse-modulated oscillator for frequencies up to 3000 mc.
2C37—is designed for use as a c.w. oscillator up to 3300 mc. Plate disc is flat, grid disc folded.
5764—is a CW or pulse-modulated oscillator for use up to 3300 mc.
5765—is for use as a c.w. oscillator without external feedback in the range from 900 to 2900 mc.
5767—is a c.w. oscillator for use up to 3300 mc. Both discs are folded.
5768—is intended for use as a c.w. amplifier-multiplier up to 3000 mc.
6018—is a pulse-modulated oscillator for use up to 1750 mc.
6BA4—High gain, low noise, UHF television amplifier.
6481 (RT434)—c.w. oscillator for use up to 3300 mc.
6503—c.w. amplifier for use up to 3000 mc.

Microwave Crystal Diodes

Sylvania manufactures microwave crystals for radar, countermeasure and test applications.

TR and ATR Tubes

Sylvania's TR/ATR line emphasizes new developments in high power and coaxial types.

Type	Description	Frequency, mc
6164	Broadband TR	8490-9578
6163	ATR	9050
TR860	Coaxial TR	(classified)
6899	Broadband TR	8700-8900

Counter Tubes

Sylvania decade counter tubes provide visual and electrical read-out for a broad field of counting and programming applications.

Type	Rated Speed	Outputs
6476	4 KC	10
6476A	4 KC	10
6802	4 KC	4
6879	5 KC	3
6909	100 KC	4
6910	100 KC	10
7155	100 KC	3

Trigger Tubes

OA5—Cold cathode trigger tube capable of dissipating one watt of energy. Designed in T 5½ bulb size.

6483—Cold cathode trigger tube capable of dissipating one watt of energy. Designed in T-3 bulb size.

6873—Ruggedized cold cathode trigger tube with increased trigger sensitivity and higher operating voltage capabilities. T 5½ bulb.

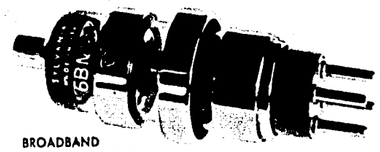
TRAVELING WAVE AMPLIFIERS



BROADBAND REFLEX KLYSTRONS

SYLVANIA MICROWAVE COMPONENTS

Rugged, Reliable Traveling-Wave Amplifiers

Broadband amplifiers for airborne, shipboard, and ground based equipment. Fully tested to complete military-type specifications. Ideal for countermeasures, radar, communications and test equipment.

Lightweight Permanent Magnet Types

Type	Frequency (KMC)	Power Output
TW-4006	1-2	15 mw
TW-4007	1-2	1 watt
TW-4002	2-4	10 mw
7072	2-4	1 watt

Compact Solenoid Types*

Type	Frequency (KMC)	Power Output
6753	1-2	15 mw
6752	1-2	2 watts
TW-620A	1-2	2 watts
TW-538	1-2	1 KW, pulse
6493	2-4	10 mw
6559	2-4	2 watts
TW-534	2-4	2 watts, pulse
6698	2-4	1 KW, pulse
TW-613	8-11	5 mw
TW-622	8-11	2 watts
TW-591	8-10.5	1.0 KW, pulse

Rugged, Reliable Backward Wave Oscillators

Compact voltage-tuned broadband oscillators for wide-range search receivers and test equipment.

Type	Frequency (KMC)	Power Output
6699*	1-2	20-700 mw
6496*	2-4	20-700 mw
7096	2-4	100 mw
BW-623*	4-8	20-700 mw
PIA-1757	26.5-41	5 mw

*Mating Solenoid available for all types.

Long-Life Reflex Klystrons for Microwave Relays

These reliable klystrons are widely proven in microwave relay service. Fully tested to the equipment specification. Maximum frequency stability results from special tuner design.

Type	Frequency (KMC)	Power Output
6974*	4.6-5.0	2 watts
K-4008	5.3-6.3	0.02-1 watt
K-4009	5.3-6.6	0.02-1 watt
K-4010	5.8-7.125	0.02-1 watt
K-4011	6.3-7.5	
6468	6.125-6.425	1 watt
6469	6.575-6.875	1 watt
6470	7.125-7.425	1 watt
K-8418	6.125-6.425	1 watt
K-8408	6.575-6.875	1 watt
K-8398	7.125-7.425	1 watt
K-4162	6.125-6.425	1 watt
K-4161	6.575-6.875	1 watt
K-4160	7.125-7.425	1 watt

*Special Linear Tuner.

Broadband Reflex Klystrons

These versatile klystrons are ideal for search receivers, signal generators, and microwave relays.

Type	Frequency (KMC)	Power Output
6BM6	0.55-3.8	50-175 mw
6BM6A*	0.55-3.8	50-175 mw
6BL6	1.6-6.5	60-250 mw
5836	1.6-6.5	60-250 mw
5837	0.55-3.8	50-175 mw

*Pulse type.

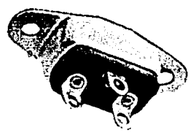
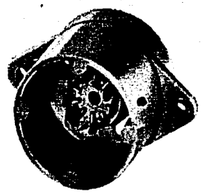
A. C. Receptacle—Designed for economical installation

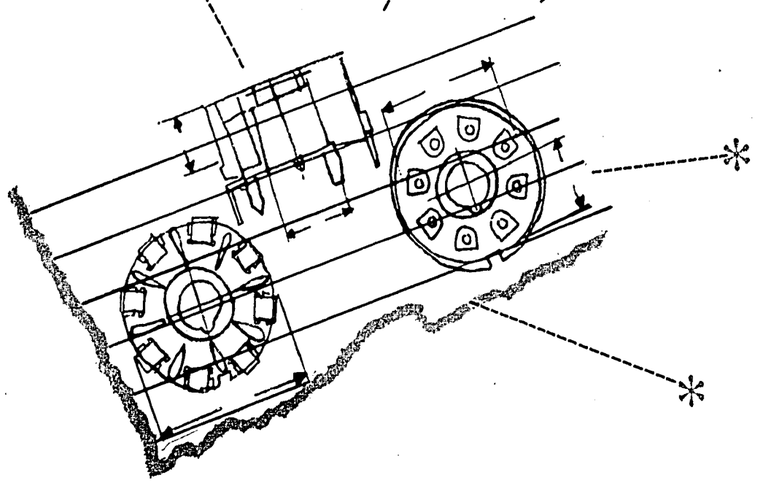


Interlock Plug—3-pin —positive grounding

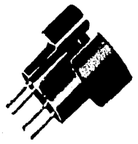


Anti-corona Sockets —Octal, 9-pin

Printed Circuit Sockets —Octal, 9-pin, 7-pin



Counter Tube Socket —with built-in zero-adjust



"Class 30" Transistor Socket—for standard 100-mil grid

"In-line" Transistor Socket—with snap-in printed circuit contacts

Any one of these sockets could have been designed for you

If you're building circuits . . . chances are you've come across at least one socketing problem. Maybe it was an entirely new problem like socketing the "class 30" transistor or perhaps a recurring bugaboo like high voltage arcing.

Either way, if you brought your problem to Sylvania it didn't take long to find an efficient, economical solution.

If you haven't been checking Sylvania for your socket requirements, why not do it next time? Sylvania has produced millions of sockets in over 150 varieties to fit every need. Many are now standard items and may offer an immediate solution to your problem. Write for specification sheets on the above sockets or let us suggest the best socket for the application you have in mind.

TRADE MARK

NEW MONITOR OSCILLOSCOPES

Sierra 218
Monitor Oscilloscope

The new Sierra Oscilloscopes, Model 218 Series are especially designed for continuous function monitoring of as many as seven channels simultaneously in one rack unit. Rugged and compact, the Scopes provide, in the smallest possible package, a convenient means for viewing and evaluating complex voltages. Designed primarily for tape recording and data handling systems, the Scopes are particularly ideal for measuring and analyzing mechanical quantities through a transducer, such as stress, strain and vibration, pressure, displacement and acceleration.

NEW IN-CIRCUIT TRANSISTOR TESTER

Sierra 219A
Transistor Tester

The new Sierra Model 219A Transistor Tester provides a technical breakthrough—a means for in-circuit transistor testing, saving hours of trouble shooting and service time. Designed with a unique combination of transistor circuits, using low impedance methods, the Tester will measure the Beta parameter of a transistor while it is connected in a circuit. Beta and Collector Current parameters may be measured with the transistor removed from the circuit. Request Bulletin.

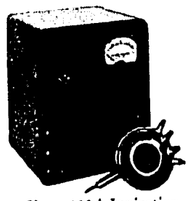
All Sierra Carrier Frequency Voltmeters feature built-in calibration oscillators and circuits for level calibration, have aural monitoring jacks, and (except 103B) are furnished with Sierra Model 149A Precision Spiral Scale Dials. New Sierra 121Y CFVM, similar to Model 121A Analyzer but has special 20-pin connectors and selector switch for rapid patching to carrier racks.
†Contains carrier re-insertion oscillator for monitoring suppressed carrier systems. Furnished with planetary drive dial. Note A. Ranges from ± 2 KC at low end of dial to ± 3 KC at upper end. Note B. ± 1 KC in the 48 KC to 256 KC region. Note C. ± 1 db for + 30 db to —40 db attenuator steps on 135 ohm balanced measurements. Note D. All models may be converted for 135 and 600 ohm balanced line measurements by convenient plug-in bridging transformer, Model 130D.

WIDEBAND DIRECTIONAL COUPLERS

Model	10 KC	3 MC	10 MC	30 MC	100 MC	300 MC	1000 MC	2000 MC	Primary Line Connectors
137, 137A				73	63	53	43	37	Type N
138, 138A				59	49	39	29		Type N
145		52	42	32	22	12			Type N
150				53	43	33	23		Type N
212A				50	40				Type LC Female
213A				68	58	48			Type LC Female
214A					81	71			Type LC Female
139B	50	50							None

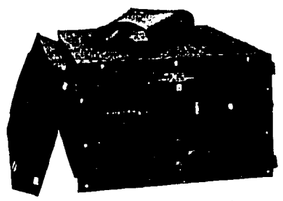
Directivity: 12 db ± 3 db greater than coupling factor at each frequency. e.g.: Model 145 at 100 MC has directivity of 34 db (22 + 12).
Impedance: Models 137 and 138 are 51.5 ohms. Models 137A, 138A, 145, 150, 212A, 213A and 214A are 50.0 ohms. Model 139B may be matched to most impedances encountered on open wire lines.
Power: Models 137, 137A, 138, 138A, 145, and 150 usable to 1000 watts. Models 212A, 213A and 214A usable to 150 KW peak. Model 139B usable to 50 KW or higher under certain conditions. See Bulletin 101.
Connectors: See table for primary line. Secondary line, type N, male, except 139B. Model 139B for open wire transmission lines.



Sierra 193A Ionization Gauge and 192A Amplifier

IONIZATION GAUGE & AMPLIFIER

Model 193A Ionization Gauge and Model 192A Ionization Gauge Amplifier provide convenient, dependable and accurate monitoring of pressures during processing from 10^{-4} to 10^{-1} mm Hg. Monel encased Phillips type ion gauges operate for months without attention; amplifier includes high voltage rf power supply, VTVM, heater transformer and low voltage supply. Request Bulletin 118.



Sierra 124A Line Fault Analyzer

LINE FAULT ANALYZER

Designed for rapid location of faults on cables, transmission lines. Instantly pin-points shorts, opens, grounds; indicates nature of fault as well as exact location. Easy to use, high resolution.

Model 124A Line Fault Analyzer operates on most OPEN WIRE power, communications lines. Direct reading, range ½ to 200 miles. Sweep marker continuously adjustable from 5 to 100 miles, locates faults with accuracy of ¼ mile. Request Bulletin 102.

IMPEDANCE METER

For high noise carrier measurements 30 KC to 300 KC. Measures on "hot" lines. Request Bulletin 112.

COAXIAL READOUT DEVICES

Increase Directional Coupler sensitivity, low VSWR, operates to 1,200 MC. 50 ohm impedance, filtered output. Request Bulletin

DOUBLE STUB TUNERS

Match 50 ohm line to loads having 2:1 VSWR. To 3.5 Kw peak; three models covering, collectively, 155 MC to 1,700 MC. Request Bulletin 110.

LINE BRIDGING TRANSFORMER

Converts voltmeter and wave analyzer inputs from single-ended to balanced operation. Model 130D bridges both 135 and 600 ohm balanced lines. Frequency range 3 KC to 500 KC. Write for details.

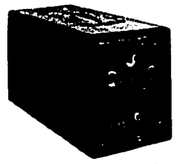
THERMOPILE

Converts differential temperatures in flowing liquids to electrical energy. Output approx. 1 mv/°C. Request Bulletin 119.

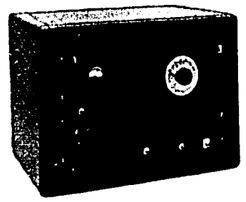
LOW PASS FILTERS

Model 184 Series Low Pass Filters have an insertion loss of not more than 0.4 db in pass band, sharp cut-off, 1.5 VSWR or less, and rejection greater than 60 db from 1.25 to 10 times cut-off frequency. Five models: for cut-off frequencies of 44, 75, 131, 230, 400 MC. Power range 250 watts in pass band, 25 watts in rejection band. Request Bulletin 115. *(Also higher frequency models. Request Bulletin M-23.)*

Sierra 290A Calorimeter



Sierra X287A Water Load



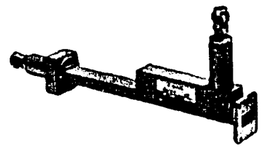
Sierra 215A Power Source

CALORIMETERS, WATER LOADS

Now Sierra offers two groups of Calorimeters and mating Water Loads for both waveguide and coaxial service.

Model 190 Calorimeter and Sierra XB187A/B Water Loads constitute a complete system for calorimetric power measurements in the SL, S, XB and X bands. Model 187 Water Loads are available with power measuring ranges of, respectively, 20 Kw, 10 Kw, 1 Kw and 2 Kw average. Request Bulletin M24. Model 190 Calorimeter has ranges of 300, 600, 1,500 and 3,000 watts max. A Coaxial Liquid Cooled Load, Sierra 186A-Z (not shown) can be used with 190 Calorimeters to measure dc to 4 MC. Request Bulletins.

New Model 290A Calorimeter includes liquid flow controls, calibration sources and metering circuits. The calorimeter is self-calibrating and permits accuracies up to 1%. A closed loop circulating system with fluid pump and heat exchanger is available as an accessory. Request Bulletin.



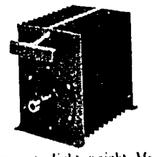
Sierra X187B Water Load

New Model 287 series Dual Water Loads provide balanced measurements when used with Model 290A. 287 series loads are offered in SL, S, XB and X bands and, in conjunction with Model 290A, comprise a complete power measuring system. An unusual feature of the 287 series is that the thermopile is a part of the load, resulting in materially improved accuracy. Request Bulletin.

NEW POWER SOURCES— 25 MC TO 1,000 MC

New Model 215 Power Sources permit fast, accurate calibration of Bi-Directional Power Monitors and Termination Wattmeters. Output power is adjustable from 20% to 100% of rated power, and tuning is continuous over frequency ranges. Units are self-contained including power supply, and are supplied in sturdy bench cabinets or can be rack mounted. Four models cover, respectively, 25 MC to 50 MC, 50 MC to 150 MC, 150 MC to 470 MC and 470 MC to 1,000 MC. All models have an output of 50 watts ± 1.5 db; use Type N connectors and operate from a 115 v, 60 cps input. Request Bulletin M19.

50 OHM COAXIAL TERMINATIONS



New compact, light weight Model 160 series coaxial terminations feature stable operation over a wide frequency range and up to high ambient temperatures. High surface to volume ratio provide a very low VSWR from dc to 4,000 MC. Model 160—1: 1 watt; Model 160—5: 5 watts; Model 160—20: 20 watts; Model 160—100: 100 watts; Model 160—500: 500 watts. Request Bulletin 114.

FIELD, LAB POWER MEASURING INSTRUMENTS

TERMINATION WATTMETERS

Sierra 185A-15FN
Termination
Wattmeter

Sierra 185A Series Average-Reading Termination Wattmeters are broadly useful, dependable instruments for terminating rf coaxial transmission systems and measuring rf powers. They are ruggedly built, conservatively rated, and ideal as dummy loads for testing and adjusting transmitters and oscillators. Three models offer, respectively, power ranges of 0 to 5/15, 0 to 30/100 and 0 to 150/500 watts. Other specifications (all models): frequency range 20 to 1,000 MC, accuracy ±5%, maximum VSWR 1.2, female N connectors. Request Bulletin 120. (Sierra also offers Model 195A Peak Reading Wattmeters; request Bulletin 121.)

BI-DIRECTIONAL POWER MONITORS

Sierra 164
Power Monitor

Sierra offers Power Monitors whose collective frequency ranges provide coverage from 2 MC to 1,000 MC.

Model 164 Series (shown). Two plug-in elements cover 25 MC to 1,000 MC, measure incident and reflected power of 10, 50, 100 and 500 watts full scale. Another plug-in is similar but covers 2 MC to 30 MC. Also available are four lower power elements covering same range at 1, 5, 10 and 50 watts full scale. Power is read direct on linear scale accurate within ±5%. Insertion VSWR less than 1.08 (Type N connectors) except on 1 watt ranges where VSWR is 1.15. 50 ohm impedance. Model 164 with Type N or UHF connectors, male or female. Request Bulletin 111.

Model 194A-A Peak-Reading Power Monitor (not shown) measures incident and reflected peak power directly, 200 MC to 1,215 MC. 1, 3, 10 and 30 Kw peak, ±5% full scale. From 1μsec, 400 pps up. Request Bulletin 122.

PLUG-IN ELEMENTS FOR MODEL 164

(Note: Model 164 does not include plug-ins. Order separately as needed.)

180 Series—1, 5, 10, 50 watts full scale
180–52: 25 MC to 52 MC
180–148: 50 MC to 148 MC
180–470: 144 MC to 470 MC
180–1000: 460 MC to 1,000 MC

270 Series—50, 100, 500, 1,000 Watts full scale
270–75: 10 MC to 75 MC
270–30: 2 MC to 30 MC

181 Series—10, 50, 100, 500 watts full scale
181–250: 25 MC to 250 MC
181–1000: 200 MC to 1000 MC

Accessories Available: Model 164-LS Equivalent Transmission Line Section; Model 164-CC Carrying Case.

Model 194A-A Peak-Reading Power Monitor. Model 194A-A quickly measures incident and reflected powers on radar and other pulsed systems. Measures peak power directly, independently of duty cycle. 200 MC to 1,215 MC. 1, 3, 10 and 30 Kw peak. ±5% full scale. From 1 μsec pulses, 400 pps up. HN connectors. Request Bulletin 122.

FILTERS

CUSTOM DESIGN

Small size and high performance characteristics of Collins Mechanical Filters make them a natural choice of equipment designers. Collins Filters are now employed and may be designed into high performance transmitting and receiving equipment, multiplexing equipment, missile guidance systems, frequency synthesisers, doppler radar, data transmission systems, precision navigation equipment, spectrum analyzers, and other specialized equipment where reliability, compactness and economy are required.

CUSTOM DESIGN

The filters shown are standard production types. It is possible to obtain special types with a wide variety of characteristics. We are interested in discussing your requirements. For prices and delivery information call or write: Collins Radio Company, Product Line Manager, Western Division, 2700 West Olive Ave., Burbank, California.

SPECIFY DALOHM® COMPONENTS FOR INHERENT DEPENDABILITY!

DALOHM gives you quality resistance products made by the most advanced techniques. DALOHM quality is constantly monitored by our environmental laboratories to assure stability and high standards of *uniformity and reliability.* DALOHM resistors and potentiometers meet applicable Military Specifications. We invite your requests for qualification samples or test reports.

Examine this resume of the DALOHM line. You'll find a wide variety of resistors, trimmer potentiometers and other electronic products from which you can select a component to meet your needs.

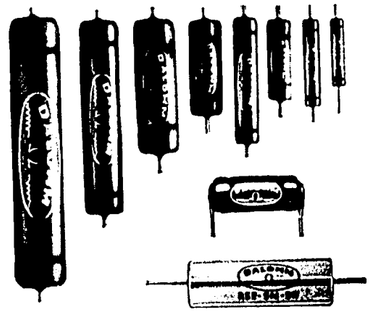
And, remember, DALOHM engineers stand ready to help in design, development and production of special resistance products, resistor networks and electronic equipment.

DALOHM Wire Wound Miniature Power Resistors

Carefully designed, precision made to meet all space problems and for all applications where equipment must meet the most severe environmental, shock, vibration and humidity conditions. Smallest in size, completely welded from terminal to terminal, coated with special silicone material, impervious to moisture, salt spray, vapor gases. Temperature coefficient all types 0.00002/Deg. C.

TYPES RS—RLS—RSE

Resistance range from .05 ohm to 175K ohms, depending on type: tolerance range from .05% to 3%. Type RS with axial leads in six wattages—1, 2, 3, 5, 7, 10; nine sizes. Type RLS with radial leads in six wattages—1, 2, 3, 5, 7, 10; eight sizes. Type RSE ruggedized in metal housing for tremendous shock resistance; five wattages—2, 3, 5, 7, 10; seven sizes.



Ask for Bulletins R-23, R-30, R-25

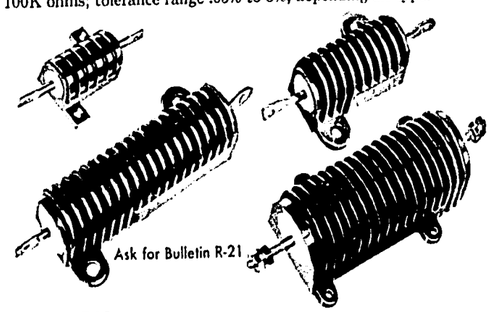
TYPES NS—NLS

Non-inductive characteristics. Five wattages—2, 3, 5, 7, 10; six sizes. Resistance range from 1 ohm to 37K ohms; tolerance range .05% to 3%. Type NS with axial leads. Type NLS with radial leads.

Ask for Bulletin R-34

TYPE RH

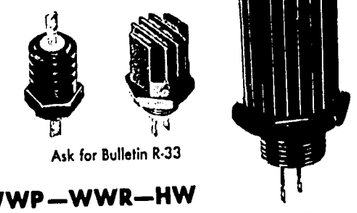
Silicone sealed in die-cast, black anodized, radiator finned housing. Lugs provided for mounting to heat sink. Four wattage ranges—10, 25, 50, 250; resistance range 0.1 ohm to 100K ohms; tolerance range .05% to 3%, depending on type.



Ask for Bulletin R-21

TYPE PH

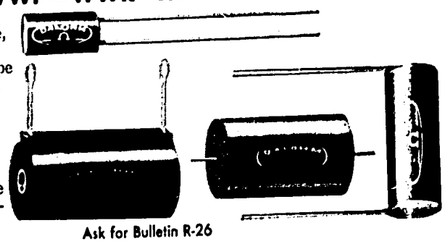
New ruggedized Powerhouse resistor designed for mounting through hole in chassis or heat sink; sealed in black anodized, finned aluminum housing. Three wattages—10, 25, 100; resistance values from 0.1 ohm to 60K ohms; tolerances from .05% to 3%.



Ask for Bulletin R-33

TYPES WWA—WWL—WWP—WWR—HW

Precision encapsulated, non-inductive, pi-wound. Resistance range from 1 ohm to 6 Megohms, depending on type and size; tolerances from .05% to 1%. Type WWA (axial leads) in sub-miniature and standard sizes; Type WWL (lugs) in sub-miniature and standard sizes; Type WWP (parallel leads) in sub-miniature sizes; Type WWR (radial leads) in sub-miniature sizes: HW (high temperature) in sub-miniature sizes.



Ask for Bulletin R-26

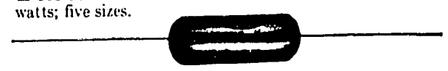
DALOHM Metal Film Resistors

New molded metal film resistors combine advantages of DALOHM molding techniques with advanced high vacuum evaporated metal film procedures to provide the best characteristics of wire wound resistors, yet retain miniature size. Metal film resistors have inherently good H.F. characteristics and low noise levels. DALOHM MF resistors have other outstanding features: high stability, fully insulated, low and controllable temperature coefficients and ability to withstand rigorous environmental conditions.

TYPE MF

Resistance range from 100 ohms to 4 Megohms, depending on size; tolerance 1%; temperature coefficient is ± 50 P.P.M. or ± 100 P.P.M. Available in five wattages—2, 1, ½, ¼ and ⅛ watts; five sizes.



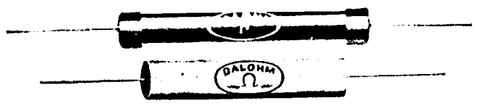
Ask for Bulletin R-43

DALOHM Deposited Carbon Resistors

Assure stable, accurate, dependable performance. Pure crystalline carbon bonded on ceramic rods of special material. Provide precision resistance values, low voltage coefficient, low capacitive and inductive characteristics in high frequency applications, extremely high stability and economy.

TYPES DC—DCH

Resistance range from 10 ohms to 200 Megohms; tolerance 1% or higher as specified. Type DC in six wattages—⅛, ¼, ½, 1, 2, and 5; nine sizes. DCH hermetically sealed in non-hygroscopic ceramic envelope; seven wattages—1/10, ⅛, ¼, ½, 1, 2 and 5; ten sizes.



Ask for Bulletins R-24, R-27

TYPES MC—DCF

Type MC is a deposited carbon resistor completely insulated and protected from environmental and mechanical damage by molded housing; resistance range from 1 ohm to 50 Megohms. Available in five wattages—⅛, ¼, ½, 1 and 2; five sizes in standard tolerance of 1%. The DCF type has a new coating material which provides a completely insulated resistor, yet maintains sub-miniature size. Available in five wattages—⅛, ¼, ½, 1 and 2; eight sizes in standard tolerance of 1%.

Ask for Bulletins R-37, R-42

DALOHM Trimmer Potentiometers

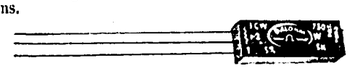
TYPE 1000 Trimmer

Miniature precision trimmer potentiometer with completely sealed case and welded construction throughout; is resistant to stringent environmental conditions. Rated at 2.5 watts; resistance range from 100 ohms to 50K ohms; tolerance 5%.

Ask for Bulletin R-44

TYPE 750 Miniature

Identical to the Type 1000 trimmer except is smaller with 2 watts rating and resistance range from 100 ohms to 30K ohms.



Ask for Bulletin R-41

TYPE A10-W Trimmer

Rated at 1 watt; resistance range from 10 ohms to 30K ohms; tolerance 5% standard. Ask for Bulletin R-32

TYPE B11-W Trimmer

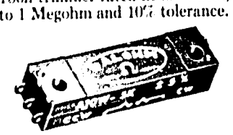
Identical to A10-W but with 10% tolerance and resistance range to 100K ohms. Ask for Bulletin R-37

TYPE C12-W Trimmer

Similar to B11-W but with 15% standard tolerance and resistance range to 20K ohms. Ask for Bulletin R-38

TYPE A10-C Trimmer

Superior performing deposited carbon trimmer rated at .25 watts; resistance range from 20K ohms to 1 Megohm and 10% tolerance.



DALOHM Hysteresis Motor

The DALOHM hysteresis motor is a split-capacitor type, sub-fractional horsepower from 1/20th to 1/300th. Totally enclosed, it has a new space-saving pancake design giving great rigidity. It is ideally suited for such applications as facsimile machines, Hi-Fi turntables, tape recorders, tele-metering and many other types of equipment where constant synchronous speed is essential.

An outstanding feature is the exceptionally low heat rise. This removes the basic objection common in most hysteresis motors. It also has extremely low noise and no vibration or magnetic strays.

Design, Development and Production of:

Celco DEFLECTION YOKES TRANSFORMERS

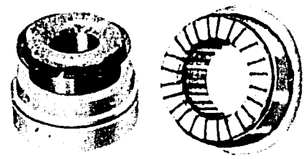
For...Military and Commercial Avionics

Leading system manufacturers now depend on CELCO for their difficult and critical applications on many of these components.

Our design development, production and quality control experience – combined with CELCO's highly skilled operators, production foremen and engineers – comprises a team that has proven their outstanding performance for quality components.

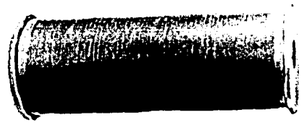
Apply the CELCO "know-how" to your production requirements!

Celco We specialize in the design and manufacture of **PRECISION DEFLECTION YOKES** for military and commercial applications. CELCO can give you immediate engineering evaluation on your critical display problems.

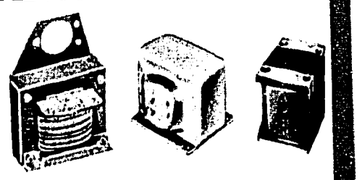


Celco **COILS FOR TRAVELING WAVE TUBES** – precision wound for minimum transverse magnetic fields. High temperature windings are a CELCO engineering development –

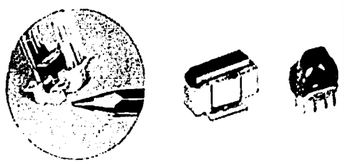
Unit illustrated is 12" long.



Celco **HIGH TEMPERATURE TRANSFORMERS** – high temperature windings and impregnations on CELCO TRANSFORMERS permit high operating temperature with reduced size and weight.



Celco **MINIATURE TRANSFORMERS & SATURABLE REACTORS** – specially produced for the Transistor and Plug-in type amplifier assembly. CELCO designs these units wherever reduction in size and weight must be made.



Celco **TOROIDAL COILS** – CELCO is equipped to cover an extremely wide range of toroidal windings.

No. 50 wire on a .062" ID Toroid
No. 15 wire on 9" OD Toroid

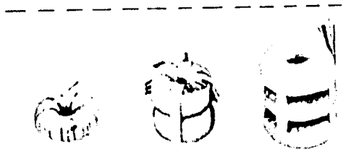
and Production of:

MAGNETIC AMPLIFIERS AIRCRAFT MOTOR COMPONENTS

...Nuclear and Computer Industries

Celco **MAGNETIC AMPLIFIERS**–encapsulated with epoxy resins or silicone rubber. CELCO experience with proper treatment of Toroidal Coils assures designed performance.

Celco **TOROIDAL COMPONENTS** – for use in system assemblies. Sub-assemblies of chokes, Transformers and Saturable Reactors are manufactured at CELCO for packaging into a single unit.



Celco **PRECISION TRANSFORMERS** – CELCO develops Precision Transformers for such applications as Computer Components with high accuracy of turns ratio and output voltages.

Celco **HERMETICALLY SEALED MAGNETIC AMPLIFIERS & TRANSFORMERS** – with various types of terminations, evacution and inert gas pressurization give CELCO components minimum weight with high-breakdown voltage resistance.

Celco **R.F. CHOKES, TRANSFORMERS** – specialized universal winding types of coils and assemblies. These CELCO windings are used when minimum distributed capacitance is required and space does not permit use of mechanical supports.

Celco **MOTOR COMPONENTS**–Centrifugally cast squirrel cage rotors for low inertia motors, armatures, stators, field coils and special type rotor coils – are a CELCO production specialty.

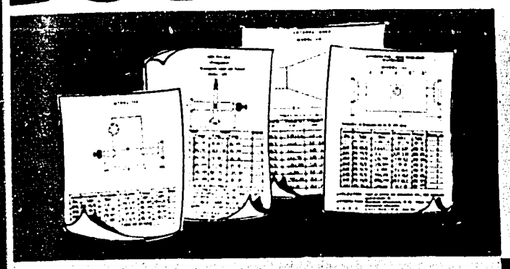
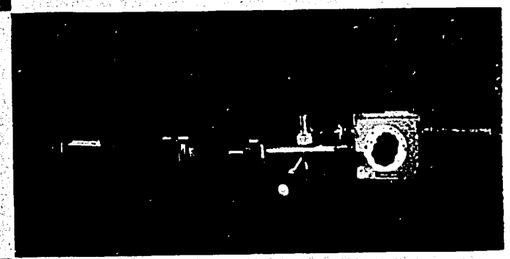
DOUGLAS

DOUGLAS has it !

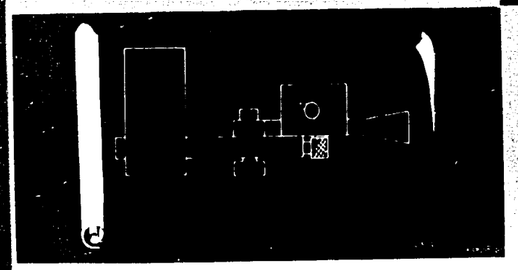


Choose from America's most complete catalog of Microwave components listing more than 1,000 standard components . . .



PLUS

Special designs manufactured to your specifications . . .



OR

Produced from your blueprints in production or prototype quantities.

Your inquiries invited for design, development and production of MICROWAVE—RADAR component parts and test equipment in the frequency range of 100—90,000 megacycles.

DOUGLAS MICROWAVE CO., INC.

is proud to announce the formation of a new division...

SPECTRA ELECTRONICS CORP.

250 EAST THIRD ST., MT. VERNON, N.Y.

First major stride in a continuing Douglas program of expansion and growth . . . to meet the needs of industry and government . . . and to provide practical solutions to the challenge of this electronic era.

RESEARCH ● DEVELOPMENT

in the fields of

- Countermeasures
- Security Systems
- Communications
- Infrared Instrumentation and Systems for industry and government
- Space Electronics

YOUR 1960 IRE DIRECTORY TO SEMICONDUCTORS

A PARTIAL LISTING OF INTERNATIONAL RECTIFIER CORPORATION PRODUCTS

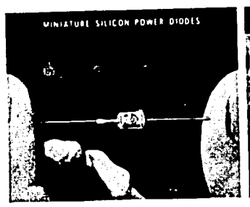
...THE MOST EXTENSIVE LINE OF QUALITY RECTIFIERS ON EARTH!

All designed and manufactured to meet the most rigid military requirements!

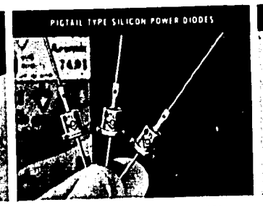
ELECTRONIC TYPES FOR INDUSTRIAL AND MILITARY APPLICATIONS

SILICON AND SELENIUM LOW CURRENT TYPES TO 1 AMP.

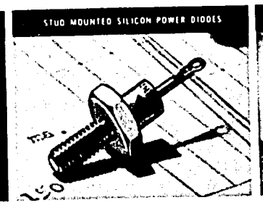
***SPECIAL MILITARY TYPES**
Special configurations and high reliability rectifiers for military applications may be obtained under our "Prescribed Reliability" Program. Address your inquiry to: Military Products Dept.



Ratings: 100 to 600 PIV, Up to 500 ma.
Specifically designed for missile and airborne equipment applications where miniaturization and reliability are prime factors. Hermetically sealed, all-welded, pigtail lead construction. Manufactured to meet the most rigid military requirements. Request **Bulletin SR-203**



Ratings: 50 to 600 volts PIV • 250 to 750 ma.
An extensive line of silicon power diodes for military and industrial applications featuring all-welded, hermetically sealed construction. All designed and manufactured to meet the most rigid military requirements. For complete technical data, write for **Bulletin SR-202.**



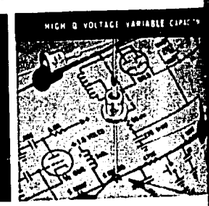
Ratings: 50 to 600 volts PIV • 400 ma. to 1 amp.
Industrial and military types including the 1N253, 1N254 and 1N255. Stud mounted, hermetically sealed, all-welded construction. Operating temperature range: –55°C to +150°C. Designed and manufactured to meet most rigid military specifications. **Bulletin SR-135C**

Ratings: 20 to 160 volts • 100μa to
Ideal components for bias supplies, sens
lays, computers etc. High resistance, (fi
ohms and higher at —10 volts). Excelle
forward characteristics. Extremely sma
cost. Encapsulated to resist adverse
mental extremes. **Bulletin SR-163.**

Ratings: From 100 ma. to 50 Amps.
Low forward voltage drop and low leakage characteristics make this series ideal for a wide variety of power applications. For details request **Bulletin C-349,** (26 volt cells); **Bulletin SR-160,** (45 to 52 volts per cell) and **Bulletin SR-152,** on high current density cells.

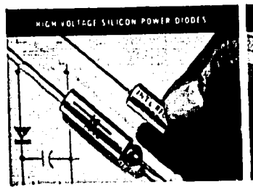
Ratings: 25 to 156 volts AC, 50 to 1,200 ma. DC
The widest range in the industry! Designed for Radio, Television, TV booster, UHF converter and experimental applications. Input ratings from 25 to 156 volts AC and up. DC output current 50 to 1,200 MA. Write for application information. **Bulletin ER-178-A**

Ratings: 400 PIV, up to 750 ma.
SD-500. A hermetically sealed, all-welded silicon junction rectifier offering maximum reliability in the high temperatures encountered in TV applications. Pigtail leads eliminate the need for brackets, blocks, etc., simplify installation. For complete data: **Bulletin SR-201**

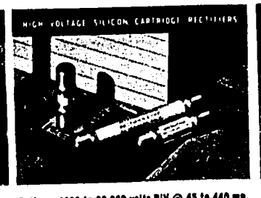


Ratings: 6 of 1000, 200 PIV DC
Semicap's small size, light weight, high
bility and low power requirements ma
ideal for automatic frequency control,
quency modulation oscillators and
networks. All-welded hermetically se
shock-proof housing. Request **Bulletin**

SILICON AND SELENIUM HIGH VOLTAGE TYPES



Rating: 600 to 2400 volts PIV • 100 to 125 ma.
Three types available. Hermetically sealed, pigtail construction. Style J rated at 600 to 1000 volts PIV at 125 ma. **Bulletin SR-138E** Styles K and L with PIV ratings from 600 to 2400 volts at 100 ma. dc output current are described in technical detail—**Bulletin SR-157.**



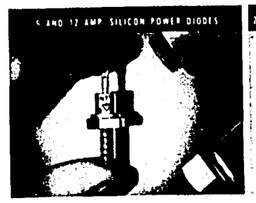
Ratings: 1000 to 20,000 volts PIV @ 45 to 440 ma.
Especially suited for miniaturized military equipment where optimum reliability is a prime factor. Standard types for, normal convection cooling and high current types for forced air or oil cooling. Hermetically sealed, metallized ceramic housing. Request **Bulletin SR-225.**

Ratings: 20 to 20,000 volts • 0.2 to 195 ma.
Designed for long life and reliability in half-wave, voltage doubler, bridge, center-tap circuits, and 3-phase circuit types. Phenolic cartridges and hermetically sealed types available. Operating temperature range: –65°C to +100°C. For details specify **Bulletin H-2.**

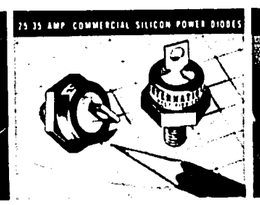
Ratings: 85 to 600 ma • 1500 to 6000 PI
Highly reliable series of tube replacement
rated from 1500 to 6400 PIV, 85 to 600 ma (
the ST-7 replacement for the 6X4 Tube) offer
rior characteristics of silicon
voltage applications.
For complete data:

POWER TYPES FOR INDUSTRIAL AND MILITARY APPLICATIONS

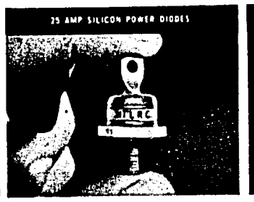
SILICON AND SELENIUM MEDIUM CURRENT TYPES 1 TO 150 AMPS.



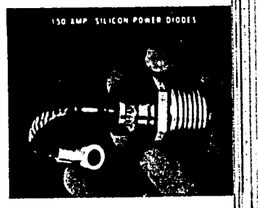
Ratings: 8 and 12 Amps • 50 to 500 PIV.
Precision-controlled diffusion process insures optimum operation and high uniformity of characteristics over the entire operating temperature range. Full 8 or 12 ampere output current over a PIV range from 50 to 500 volts. Rugged, all-welded construction.
Bulletin XSR-308.



Ratings: 25 to 35 Amps • 50 to 500 PIV.
50 to 500 PIV Rated "Quad-Sealed" power diodes are low in cost yet provide extremely stable operation on a wide range of commercial applications. 4 layer "Quad-Seal" process assures high resistance to humidity, shock, vibration and temperature extremes.
Bulletin SR-310.

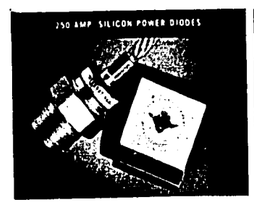


Rating: 50 to 500 volts PIV • 25 to 45 Amps.
Advanced ceramic techniques assuring excellent thermal characteristics and mechanical stability are used in the production of these highly reliable, hermetically sealed rectifiers for military or industrial applications. For complete technical data, request **Bulletin SR-304**

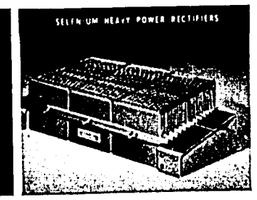


Ratings: 50 to 800 volts PIV • 45 to 150 Amps.
An extensive series of standard and revers
polarity types. Optional mounting bases i
cluding machine thread and pipe thread type
Machine thread base types: **Bulletin SR-30**
Pipe thread base types. **Bulletin SR-30**
Complete stack assemblies: **Bulletin SR-30**

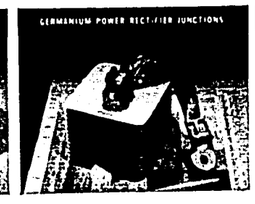
SILICON, SELENIUM AND GERMANIUM HIGH CURRENT TYPES 50 TO 670 AMPS. SPECIAL JUNCTION



Ratings: 50 to 500 volts PIV • 75 to 250 Amps.
Standard and reverse polarity types offered in a series of machine thread and pipe thread mounting styles. Complete assemblies in all circuit configurations also available. Rugged construction and hermetic sealing assure long life and reliability. Ask for **Bulletin SR-305**



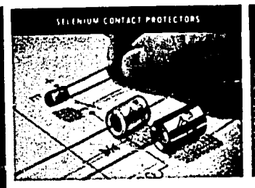
Ratings: 6 to 30,000 volts • 50 to 2,300 Amps.
Specifically designed for industrial DC power needs. Patented construction features assure long life. Descriptive bulletins available are: **Bulletin C-349,** (26 volt cells); **Bulletin SR-160,** (45 to 52 volts per cell) and **Bulletin SR-152,** on high current density cells.



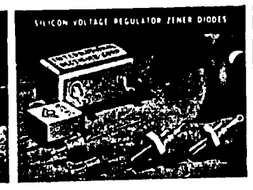
Ratings: 500 amperes • 26 to 66 volts rms
High capacity functions especially designed for high-current, low-voltage electrochemical installations. Air cooled, these hermetically sealed junctions provide efficiency to 98.5%. Cast aluminum airfoil housing effects maximum heat transfer. Request **Bulletin GPR-25A.**

Ratings: 10 Amps • 20 to 200 PIV.
A completely new miniature control device capabl
of replacing the thyratron and similar units that pr
portionately control power to a load from an ac source
Units currently available with output currents up t
10 amps, PIV ratings from 20 to 200 volts.
Bulletin SR-35

SPECIAL SEMI-CONDUCTOR DEVICES



Complete series of AC and DC types.
Designed to eliminate arcing and erosion across the contacts of relays, switches, etc. A complete series in each of three basic types: diode type, cartridge type and hermetically sealed types for industrial application. For complete data: **Bulletin SR-130-A**



Ratings: From 600 milliwatts to 10 watts
A complete series in 6 types. Miniature single junction types, multiple junction types and double anode units. 750 milliwatt and 1 watt types: **Bulletin SR-251,** 3.5 and 10 watt types: **Bulletin SR-252,** Multiple junction 5 watt types: SR-253, Double anode types: SR-254

Voltage Regulation: ±0.01%
Built to withstand environmental extremes, and operable up to 125°C, these miniature, highly stable reference packs provide output voltages of either 8.4 or 16.8 volts dc—are available in 6 distinct types allowing operation from varied power sources.
Request **Bulletin SR-401.**

(Wide range of silicon and selenium types.)
Self-generating cells available in standard an
custom sizes, mounted or unmounted. Fo
details on wide selection of selenium type
request **Bulletin PC-649A.** Silicon solar cells wit
efficiencies as high as 10%. Designed to ruggedi
military specifications. **Bulletin SR-275A.**

SK-604 TUBE EXTRACTOR

A spring-steel extractor for use with the 4X150 series, 4X250 series and 2C39 series tubes. U.S.A. Price $ .55

VACUUM SWITCHES

Single-pole double-throw switch within a high vacuum adaptable for high-voltage switching. Contact spacing .015". Switch will handle R-F potentials as high as 20 Kv. In D-C switching will handle approximately 1.5 Amps. at 5 Kv.

Type	U.S.A. Price	Coils	U.S.A. Price

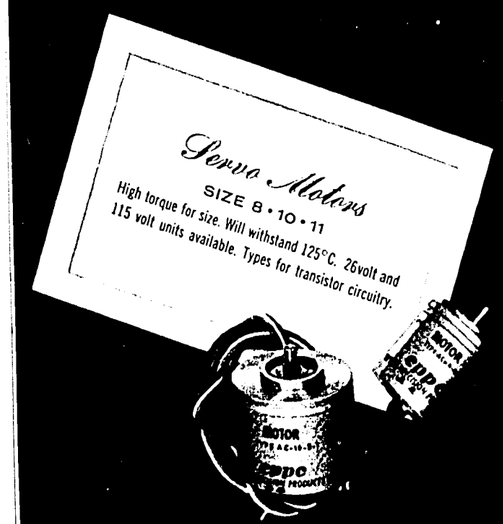
CPPC for ANY ROTARY COMPONENT



Servo Motors

SIZE 8 • 10 • 11

High torque for size. Will withstand 125°C. 26volt and 115 volt units available. Types for transistor circuitry.

Linear Transformers

(Induction Potentiometers)

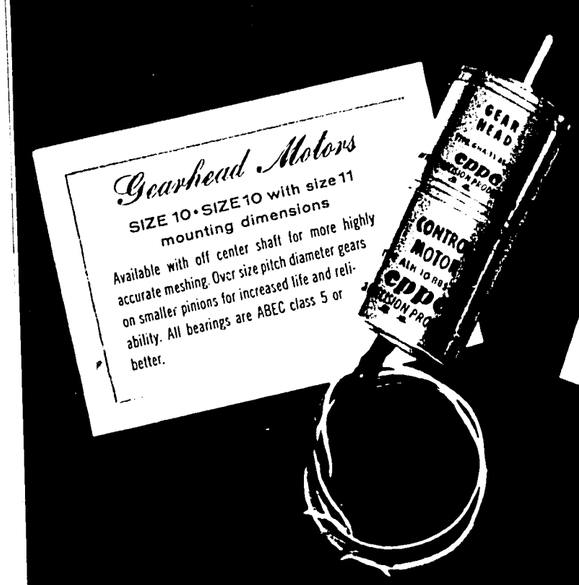
SIZE 8 • 10 • 11

These units feature low secondary impedances. Can be designed to work with wide range of load impedances. Infinite resolution. Linearity .5%. Wide variety. Can be temperature compensated.

Synchros

SIZE 8 • 10 • 11 • 15 • Pancake
BuOrd • High Temp. (450°F)

Highest accuracy in production quantities (7' max. error is typical); lowest nulls, lowest phase shifts; corrosion resistant construction, stainless steel or aluminum housings. Double ended shafts available. An extremely wide variety of synchros available as Transmitters, Receivers, Control Transformers, Differentials, Resolvers.



Gearhead Motors

SIZE 10 • SIZE 10 with size 11 mounting dimensions

Available with off center shaft for more highly accurate meshing. Over size pitch diameter gears on smaller pinions for increased life and reliability. All bearings are ABEC class 5 or better.

D. C. Motors

SIZE 8

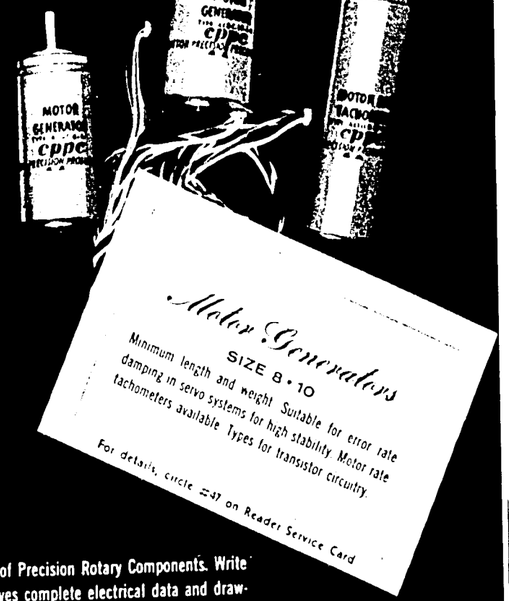
Smooth rotation at low speeds. Reversible. Speed linearly proportional to voltage. 28 or 14 volt input. Leads or terminals. Available with governor which maintains constant speed within ±1%.

For details, circle #46 on Reader Service Card

Precision Computing Resolvers

SIZE 8 • 10 • 15 • Pancake

Highest accuracy (functional error 03% to 1%) Excellent nulls, low phase shift. Units to resist 450° F. Resistive, feedback winding or thermistor compensation. Types for transistor circuitry BuOrd shafts and Mk 4 Mod 0 brush block obtainable.



Motor Generators

SIZE 8 • 10

Minimum length and weight. Suitable for error rate damping in servo systems for high stability. Motor rate tachometers available. Types for transistor circuitry.

For details, circle #47 on Reader Service Card

CLIFTON PRECISION PRODUCTS CO., INC.

CLIFTON HEIGHTS, PA.

These pages describe only partially our wide line of Precision Rotary Components. Write or telephone for CPPC's latest catalogue which gives complete electrical data and drawings. Special units are available to withstand severe vibration and shock, extremely high temperature, and radio-active environments.

Most units available for immediate delivery. Two plants (Clifton Heights, Pa. and Colorado Springs, Colo.) to serve you.

Home Sales Office: 9014 West Chester Pike, Upper Darby, Pa., Hilltop 9-1200 (Suburban Philadelphia).

CINCH SOCKETS

PRINTED CIRCUIT SOCKETS

No. 22920

These sockets for the three types of receiving tubes. Miniature, Flat Press and Button.

The contacts are so spaced that they can be mounted in an incremental drill pattern. This fact together with the exact precision and uniformity of Cinch sockets make them ideal for automatic assembly.

No. 22920—7 contact miniature molded vertically mounted socket with JAN type shield base. Mica insulation. Silver plated phosphor bronze contacts drop through .062" dia. clearance holes arranged on a .1" X and Y axis.

No. 24255

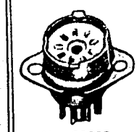
No. 24255 — 8 contact button base subminiature molded, vertically mounted socket. Mica insulation. Silver plated beryllium copper contacts drop through .070" dia. clearance holes arranged on a .1" X and Y axis.

No. 24255A–Same as above except insulation to withstand temperatures above 200° Centigrade.

No. 22024

No. 22024—7 contact flat press subminiature molded, vertically mounted socket for conventional wiring. Assembled with a special shield base to accept a subminiature shield with the "J" lock. Flat sided retaining nuts and screws are provided for mounting. Mica insulation. Silver plated beryllium copper contacts.

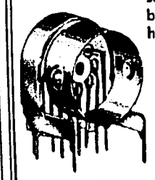
No. 22023—Same as above except insulation to withstand temperatures above 200° Centigrade.



No. 22022

No. 22022 — 8 contact button base subminiature molded vertically mounted socket for conventional wiring. Assembled with special shield base to accept a subminiature shield with the "J" lock. Mica insulation. Silver plated beryllium copper contacts.

No. 22021—Same as above except insulation to withstand temperatures above 200° Centigrade.



No. 24202

No. 24202- 7 contact miniature molded right angle mounted socket with JAN shield base. Mica insulation. Silver plated beryllium copper contacts drop through .062" dia. clearance holes arranged on a .1" X and Y axis.

No. 24257— 7 contact flat press subminiature molded right angle socket. Mica insulation. Silver plated beryllium copper contacts drop through .046" dia. clearance holes arranged on a .1" X and Y axis.

No. 24257

No. 24439—Similar to above except 9 contacts. Both meet Mil. Specs.

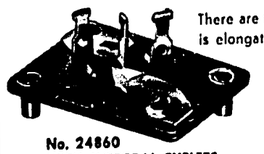
No. 24308 — 8 contact button base subminiature molded, right angle mounted socket. Mica insulation. Silver plated beryllium copper contacts drop through .046" dia. clearance holes arranged on .1" X and Y axis.

No. 24308

No. 24308A—Same as above except insulation to withstand temperatures above 200° Centigrade.

For details, circle #48 on Reader Service Card

POWER TRANSISTOR SOCKETS



No. 24860
WITH INTEGRAL EYELETS

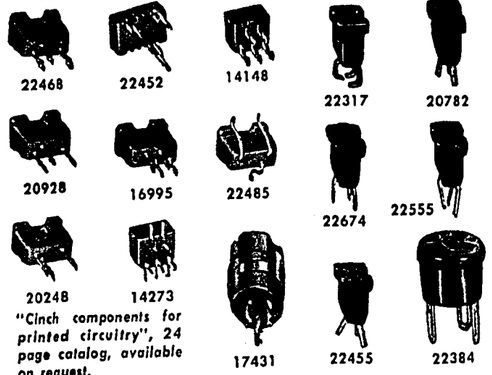
There are three laminated type sockets; No. 22831 is elongated in shape, top and bottom plates are of chocolate colored XP Bakelite, 1/64" and 3/64" respectively; both vacuum wax impregnated. No. 24324 is rectangular in shape. Top and bottom plates are of natural XP Bakelite, vacuum wax impregnated. Formed thread for 6 — 20 screw, .104/.110 dia. hole in C R steel plate. Provides easy attachment to a heat sink. No. 24860 is identical with 24324 except it is equipped with integral eyelets for easy assembly to chassis. All contacts are of brass, cadmium plated.

No. 22831

No. 24246

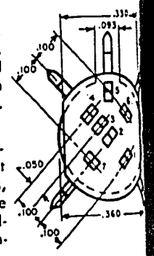
No. 24246 is a molded socket with General Purpose Bakelite casting. Contacts are of phosphor bronze, cadmium plated.

QUICK, EASY ASSEMBLY WITH CINCH TRANSISTOR SOCKETS:



"Cinch components for printed circuitry", 24 page catalog, available on request.

UNIVERSAL TRANSISTOR SOCKETS



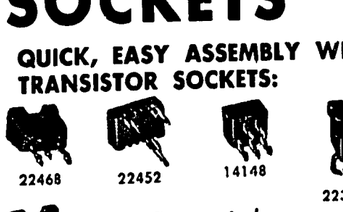
Standoff type Universal Transistor Socket for use with ten transistor bases and five base types. Casting is mica-filled phenolic (MFE). Contacts are beryllium copper, gold plated. Contacts may be used with either one or two sided 1/16" p.w. boards.

STANDOFF TYPE

No. 24872

No. 24872 for use with transistors designed to the triangular base layout .2" x .1" (JETEC-30) contact centers, as well as the three contact in-line (.048 x .192 contact centers). Available in G. P. Black and low loss Mica-filled Phenolic.

CINCH MIL SOCKETS MEET AND SURPASS RIGID MILITARY REQUIREMENTS



MINIATURE NOVAL

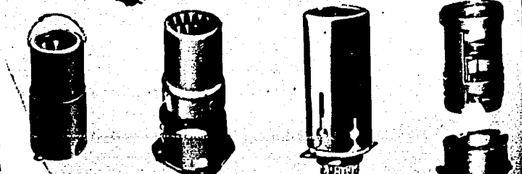
Saddles and shield base are brass, nickel plated. All contacts are silver plated; tails are hot tin dipped. Molded castings are type MFE material, ceramic castings are grade L4 material or better.

MIL shields are made of brass, nickel plated. Springs are non-magnetic stainless steel. Heat-reducing inserts are available.

Descriptive circular on sockets, shields and shield inserts available on request.

CINCH HEAT DISSIPATING TUBE SHIELDS

For Miniature, Sub-miniature, Octal and Power Tubes. The 7 and 9 pin Miniature Series, T, TR and NW Series are variously covered by Military Specifications: MIL-S-9372B (USAF), MIL-S-242A (Ships), MIL-S-19786A (Navy), SCL-6307/2 (Signal Corps). In Octal and Power Series, the shields are covered by Redstone Arsenal and Signal Corps approval.



OCTAL and POWER SHIELDS TR5 and TR6 T5 and T6

Under license arrangement with International Electronic Research Corporation.

CINCH MANUFACTURING COMPANY
1026 South Homan Ave., Chicago 24, Illinois
Division of United-Carr Fastener Corporation, Boston, Mass.

JONES PLUGS . . . SOCKETS

S-312-AB

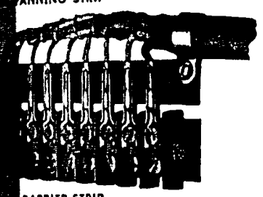
"300" SERIES Plugs and Sockets are designed for light duty service. Two to thirty-three contacts. Plugs and sockets polarized. Phosphor bronze "knife switch" socket contacts engage both sides of heavy brass plug contacts for positive connections. Molded bakelite insulation. Also can be supplied with contact tails that will take standard solderless terminals. UL approved.

ES BARRIER TERMINAL STRIP

500 SERIES . . . wider and higher barriers for increased creepage distances. Closed bottoms for complete insulation. Material between s at the base adds to the strength and maintains same creepage dis- between contact to contact and contact to ground. Can be imprinted No insulating or marker strip required.

ES FANNING STRIP

ANNING STRIP



BARRIER STRIP

Big help in terminal wiring. Connections are made through Fanning Strip, on bench or anywhere apart from barrier strip, and quickly slipped into assembly. Simplifies and facilitates soldering. Insures positive, correct connections. Saves time. Ideal for harness or cable assembly. Strong construction; brass terminals, cadmium plated. Heavy Bakelite mounting.

P-2406-CCT

S-2406-SB

P-506-CE PLUG WITH CAP

S-506-DS SOCKET WITH DEEP BRACKETS

2400 SERIES plugs and sockets . . . improved socket contacts. For highest electrical and mechanical efficiency. 4 individual flexing surfaces. Positive contact over practically their entire length. Cadmium plated plug and socket. Contacts mounted in recessed pockets, greatly increasing leakage distance, increasing voltage rating.

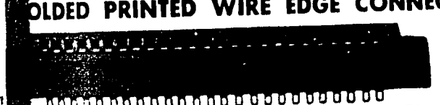
500 SERIES for heavy duty work, severest electrical services. For 5,000 Volts 25 Amperes per Contact alterable by circuit characteristics. Socket contacts phosphor bronze knife-switch type, cadmium plated. Plug contacts hard brass cadmium plated 2, 4, 6, 8, 10, and 12 contacts. Plugs and sockets polarized. Long leakage path from terminal, and terminal to ground. Caps and brackets, steel parkerized (rust-proofed). Plug and socket blocks interchangeable in caps and brackets. Terminal connections most accessible. Cap insulated with canvas bakelite.

Jones catalog; plugs and sockets, barrier strips, fanning strips, terminal panels, fuse mounts. Available on request.

HOWARD B. JONES DIVISION
CINCH MANUFACTURING COMPANY

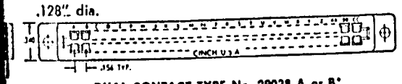
CINCH CONNECTORS

OLDED PRINTED WIRE EDGE CONNECTOR



SINGLE CONTACT TYPE NO. 29029 A OR B*

Made in 6 through 25 contacts inclusive. Designed for nominal 1/16" printed wire board, either single or two sided copper. A polarizing contact made of brass, Sel-Rex gold plated, can be placed in any contact position. Insulation material is of glass filled Diallyl Phthalate (Type GDI-30 per Mil. M-19833). Contacts are of Beryllium Copper or Phosphor Bronze with Sel-Rex gold plate .00003 minimum. Terminals are mounted on .156" centers. Mounting holes are .128" dia.



DUAL CONTACT TYPE No. 29028 A or B*

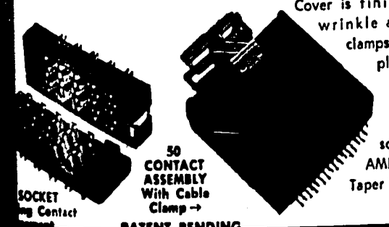
Made in 12 through 50 contacts in multiples of two. Designed for nominal 1/16" printed wire board, copper clad on both sides. Contacts, polarizing contact, insulation and mounting holes are the same as described for No. 29029.

*A—Phosphor Bronze Contact *B—Beryllium Copper Contact

CH HINGE CONNECTORS

positive contact, have simple locking device, easy release. Maximum er of contacts in minimum space.

g contact action keeps contacts clean at all times. Either the plug or body fit into the cap. Cable entrance hole can be placed at the one end, or in the top or both. Cover is finished in black wrinkle and the cable clamps are cadmium plated. Contact tails will take either conventional solder wiring or AMP "78" series Taper Tab receptacles.



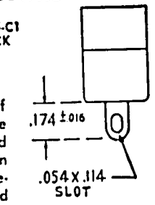
SOCKET
ng Contact

50 CONTACT ASSEMBLY With Cable Clamp →

PATENT PENDING

CINCH UNIVERSAL EDGE CONNECTORS

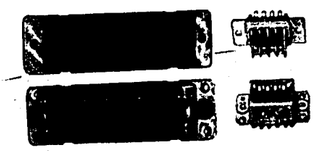
No. 24585-15-C1
G. P. BLACK



Available in four basic materials, and in any number of contacts 6 through 25. All contacts are phosphor bronze with P-92-3-03 finish (.0003 silver followed by .00003 gold flash). Pre-assembled polarizing key in any connector in any contact position when desired. Type one contact, reproduced here, which takes a standard No. 20 stranded copper wire for conventional soldering is ready for delivery.

For details, circle #49 on Reader Service Ca

BLUE RIBBON CONNECTORS



24 CONTACT P & C ELIMINATES BREAKAGE IMPROVED TYPE

8-CONTACT PLUG & SOCKET

Visual alignment unnecessary—ribbon spring contacts—floating bushings. Tha protective barriers between ribbon contacts insure uniform spacing. The entire length of the contacts are supported by quality dielectric. Multiple mounting makes it possible to make or break any number of circuits simultaneously. Molded in mounting plates are of corrosion resistant passivated stainless steel.

Manufactured by agreement with Amphenol Electronics Corp.

PRINTED CIRCUIT SUB-MINIATURE CONNECTOR

DC-37P (TOP) DC-37S-1

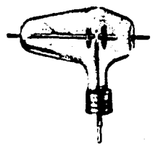
Manufactured by agreement with Cannon Electric Company

D-Sub-Miniature; Printed circuit pin and socket inserts are available in 9, 15, 25, 37 and 50 contacts. Steel with cadmium plate finish shell; contacts of copper alloy with gold over silver plate; Nylon or Diallyl-phthalate insulation. Keystone shell shape polarization.

CINCH MANUFACTURING COMPANY
1026 South Homan Ave., Chicago 24, Illinois
Division of United-Carr Fastener Corporation, Boston, Mass.

TUNG-SOL

TUNG-SOL/CHATHAM SPECIAL-PURPOSE TUBES



VACUUM SWITCH
Used in high-voltage test equipment and airborne radar units.
Types available: 1S22

RECTIFIERS
Used throughout industrial electronic equipment and broadcasting operations—AM, FM and TV.
Types available: 1Z2, 3B25, 3B28, 4B32, 5AT4, 5R4GY, 5R4WGA, 5R4WGB, 6H6WGT, 6X4W, 25Z6WGT, 26Z5W, 83, 583, 5517, 5726/6AL5W, 5726/6AL5W/6097, 5829WA, 3B29, 576A.

VOLTAGE REFERENCE TUBES
Used in radios and other electronic gear with regulated power supplies. Especially in high-accuracy units.
Types available: 5651, 5651WA. 5783, 5783WA, 5783WB.

TELEPHONE TUBES
Used in hand sets and carrier equipment.
Types available: 313C, 338A, 407A, 426A, 5842/417A, 5847/404A, 6028/408A.

TWIN TRIODES
Used widely in equipment handling frequencies from the audio level through the frequency band.
Types available: 5670, 5670WA, 6SU7GTY, 12AT7WA, 12AY7, 53, 6SC7GTY, 5687, 5687WA, 2C51, 6188/6SU7WGT, 5814, 5814WA, 5751, 5751WA, 6SN7WGTA, 6021.

HYDROGEN THYRATRONS
Used in radar modulators and missile tracking beacons. Miniatures in airborne units.
Types available: 1258, 5948, 5949, 7190, 7191, VC1257, 7192, 7240, 7454, 5948A, 5949A.

VOLTAGE REGULATORS
Used in Radio and other electronic equipment with regulated power supplies.
Types available: OB2WA, OB2, OC3W, OD3W, 6542, 6627/OB2WA, 6074, 7099.

POWER PENTODES
Used in public address systems, hi-fi amplifiers, radio transmitters and receivers.
Types available: 2E22, 3A4, 5A6, 6AR6, 6L6WGB, 5881, 26E6WGB, 6098/6AR6WA, 6146, 6550, 6883.

THYRATRONS
Used in power supplies, radio transmitters, motor controllers and spot welders.
Types available: 2A4G, 2D21W, 3C23, 6D4, 323B, 393A, 394A, 395A, 885, 2050W, 5594, 5696, 2D21, 2050, 5727/2D21W, 5643, 6012, 6901.

SEMICONDUCTORS

GERMANIUM TRANSISTORS

TO-5 Inverted Header Design Brings you these Benefits . . .

- improved thermal properties for longer life.
- superior mechanical characteristics for increased reliability.

TO-3 and High Power Outlines Feature Exclusive Tung-Sol Cold Weld Seal . . .

- True hermetic, copper-to-copper seal improves thermal characteristics.
- Elimination of heat-damage, heat-caused moisture and "splash" increase reliability.
- Vacuum-tight, moisture-proof cold-weld seal lasts even through "breathing" over long-life.

* ENTERTAINMENT TUBES
* LAMPS

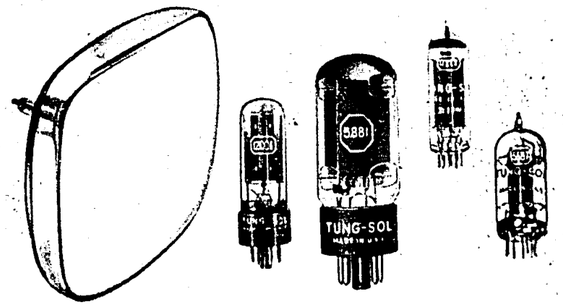
PENTODES
Used in military and other communications equipment.
Types available: 1AD4, 6AJ5, 6AK5WB, 6AS6, 6AU6WA, 5636, 5636A, 5639, 5654/6AK5W, 5654/6AK5W/6096, 5672, 5678, 5725/6AS6W, 5725/6AS6W/6187, 5749/6BA6W, 5875.

VHF TRIODES
Used in military VHF radio and test equipment.
Types available: 5676

POWER TRIODES
Used in high current regulated power supplies and radio and industrial gear with built-in power supplies.
Types available: 6AS7G, 5998, 6080, 6080WA, 6082, 6336, 6336A, 6394A, 6520, 7105, 6528, 7241, 7242.

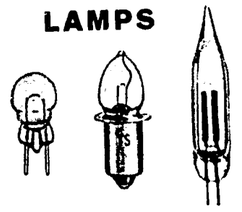
INDICATOR THYRATRONS
Used in relay service wherever a small, lightweight, self-indicating tube is needed.
Types available: 7400, 7401, 7323.

ENTERTAINMENT TUBES



Tung-Sol Blue Chip quality tubes are available for virtually every entertainment need — cathode ray, series-string, hybrid auto radio, TV, radio and hi-fi.

LAMPS



Neon glow and miniature incandescent lamps represent two areas of Tung-Sol lamp leadership, dating from 1907 and development of the first successful electric automotive headlamp.

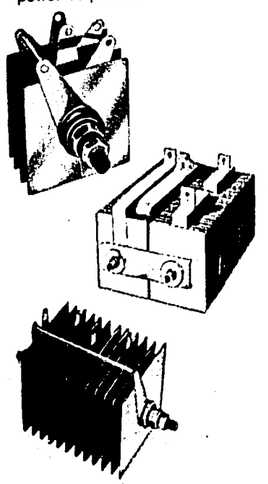
SELENIUM RECTIFIERS

Specializing in high power units. All plate sizes . . . all power requirements.



SILICON RECTIFIERS

Wide power range for radio, television and heavy-duty industrial applications.

Small, flexible lead units for TV, radio, power supplies, blockers, DC to DC converters. Series 1N2072 to 1N2079 with Peak Inverse Voltages from 50 to 500.

Top hat, axial lead units with ratings up to 750 ma and up to 600 Peak Inverse Voltage.

High current, stud-mounted units with ratings up to 70 amperes and up to 600 Peak Inverse Voltage.

TUNG-SOL®

Variable Toroids

Burnell Adjustoroids® are always new because they are always being designed for newer and broader electronic and mechanical applications.

NEW Burnell's complete line of encapsulated Adjustoroids are particularly adaptable to printed circuit use.

NEW A screw mount PC type Adjustoroid for greater durability in high acceleration, shock and vibration environments.

NEW 'Pot' mounting Adjustoroids for panel mounting and knob adjustment wherever slotted controls are difficult to reach.

NEW Continuous internal improvements including adjustment range, Q, size, etc. Burnell Adjustoroid engineers are constantly seeking solutions to space, accessibility and performance problems.

Burnell Adjustoroids and sub-miniature Adjustoroids are supplied hermetically sealed to meet government specifications MIL E 15305A or encapsulated in many sizes and shapes to meet the application. If your Adjustoroid needs can't be met from our stock catalogue, we'll be glad to manufacture to your specifications. For additional information, write for Adjustoroid bulletin.

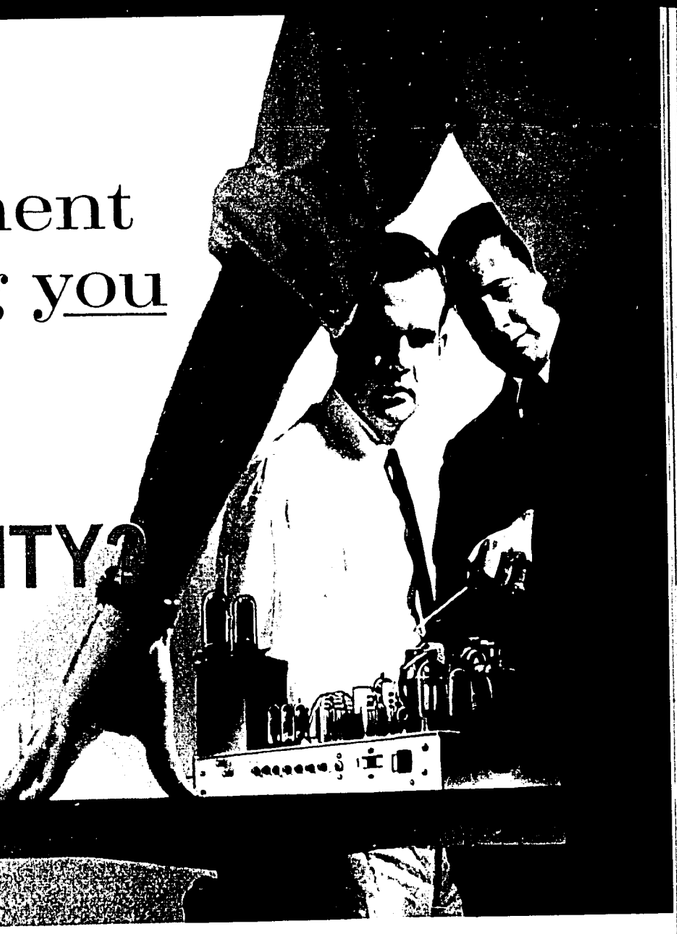
1960 IRE Directory

Is management asking you about TUBE RELIABILITY?



...asking you to predict the future performance of the tubes you specified for that new radio, phonograph, or TV-set design? Asking you to specify high-quality tubes at the lowest possible costs? There's a simple way to answer these questions. That's to design around RCA PREFERRED TUBE TYPES.

These are the types *most* designers specify *most* often, because Preferred Types have proven themselves *the most reliable, the most useful.* And because they're specified so frequently, they're in virtually continuous production. This means ready availability, no production hold-ups because of shortages. Means better-performing tubes, too (the more you work with a tube, the better you can make it). Preferred Types minimize field problems, as well. Service technicians are more familiar with them...know they're in demand, so keep them in stock.

There's no question of tube reliability if you specify PREFERRED designer-preferred TUBE TYPES. Ask your RCA Field Representative for the up-to-date list.

RADIO CORPORATION OF AMERICA
Electron Tube Division
Harrison, N.J.

RCA FIELD OFFICES

EAST: 744 Broad St., Newark 2, N. J. HUmboldt 5-3900
MIDWEST: Suite 1154, Merchandise Mart Plaza Chicago 54, Ill., WHitehall 4-2900

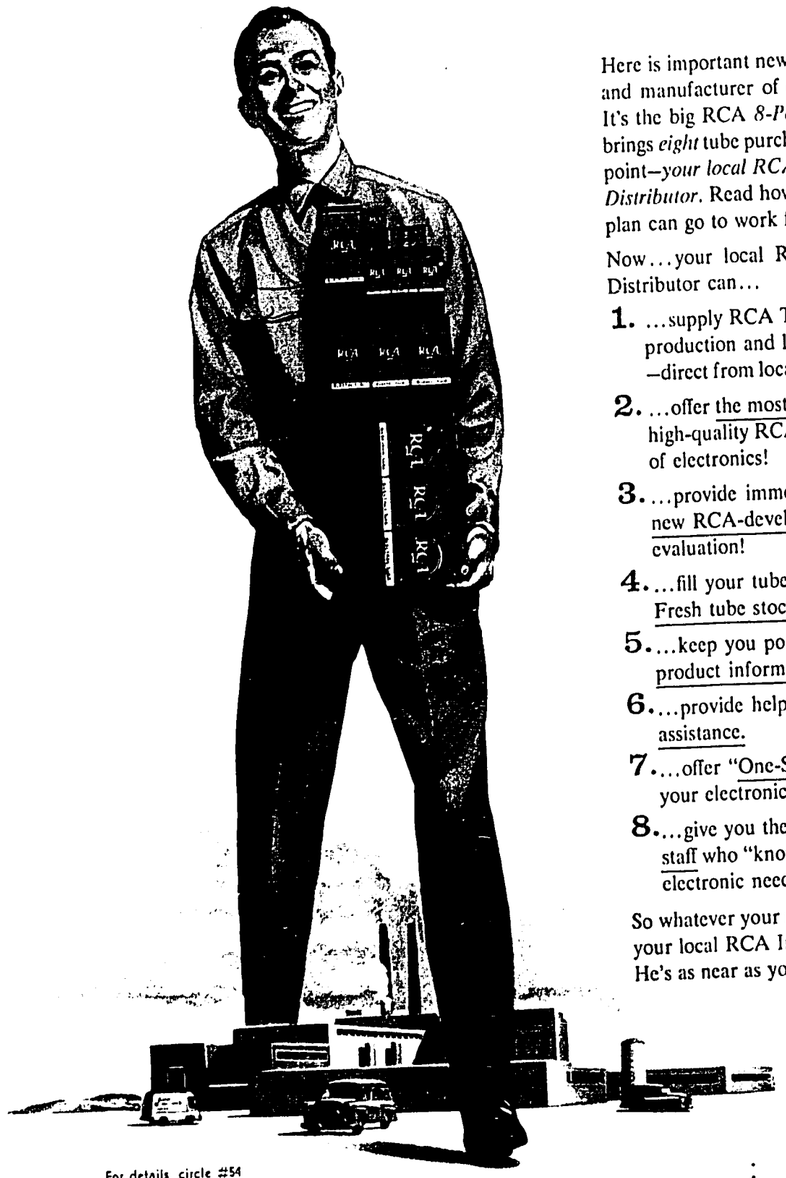
NOW...look how much your RCA Industrial Tube Distributor can do for you...



Here is important news for every designer and manufacturer of electronic equipment. It's the big RCA *8-Point-One* plan that brings *eight* tube purchasing benefits from *one* point—*your local RCA Industrial Tube Distributor*. Read how the big 8-Point-One plan can go to work for you—right now.

Now...your local RCA Industrial Tube Distributor can...

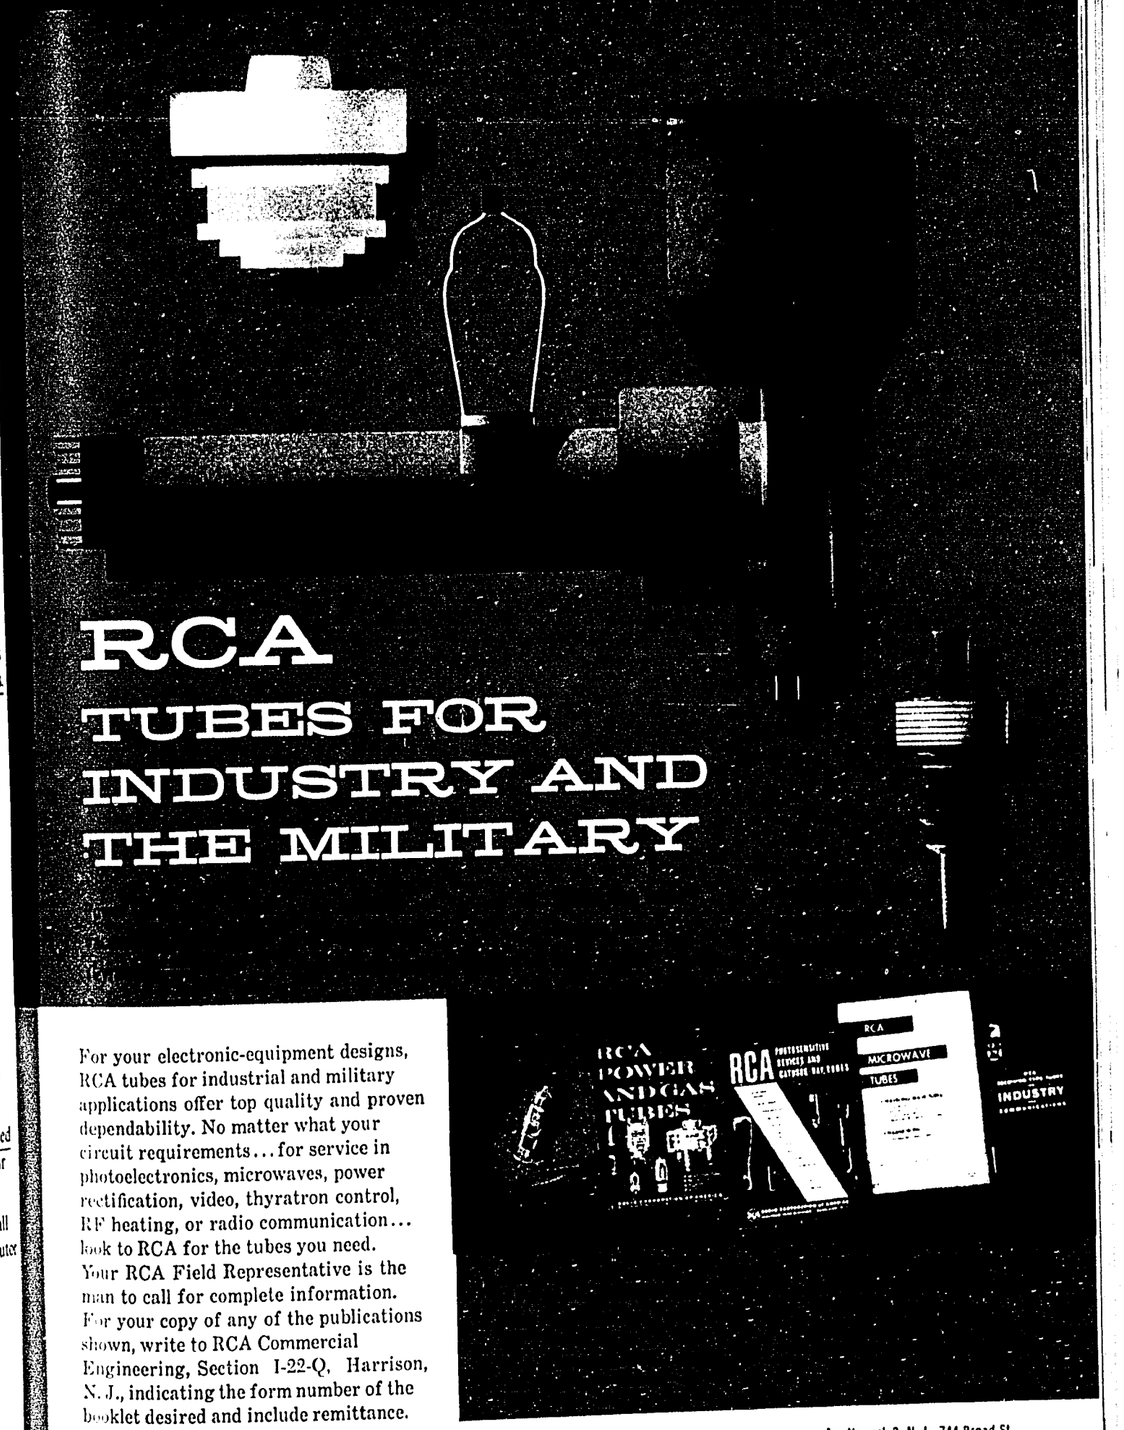
1. ...supply RCA Tubes for your pre-production and laboratory requirements—direct from local stock at factory prices.
2. ...offer the most comprehensive line of high-quality RCA Tubes in the history of electronics!
3. ...provide immediate delivery of new RCA-developed types for your evaluation!
4. ...fill your tube orders from Factory-Fresh tube stocks!
5. ....keep you posted with practical product information—regularly!
6. ....provide helpful RCA technical assistance.
7. ....offer "One-Stop" order service on your electronic requirements.
8. ....give you the benefits of a specialized staff who "know" electronics and your electronic needs.

So whatever your needs in electronics, call your local RCA Industrial Tube Distributor. He's as near as your telephone.

For details, circle #54 on Reader Service Card

For the name of your nearest RCA Industrial Tube Distributor, call Western Union by 'phone number and ask for Operator 25.

RADIO CORPORATION OF AMERICA
Electron Tube Division — *Harrison, N. J.*



For your electronic-equipment designs, RCA tubes for industrial and military applications offer top quality and proven dependability. No matter what your circuit requirements...for service in photoelectronics, microwaves, power rectification, video, thyratron control, RF heating, or radio communication... look to RCA for the tubes you need. Your RCA Field Representative is the man to call for complete information. For your copy of any of the publications shown, write to RCA Commercial Engineering, Section I-22-Q, Harrison, N. J., indicating the form number of the booklet desired and include remittance.

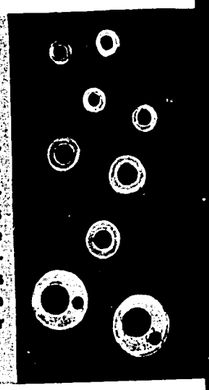
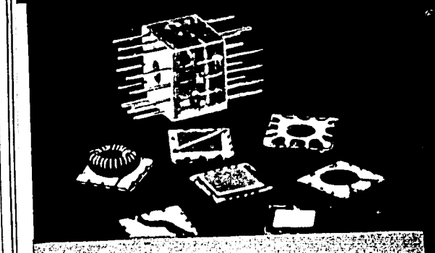
Whatever your design needs

...INDUSTRIAL ...ENTERTAINMENT
...MILITARY ...COMPUTER

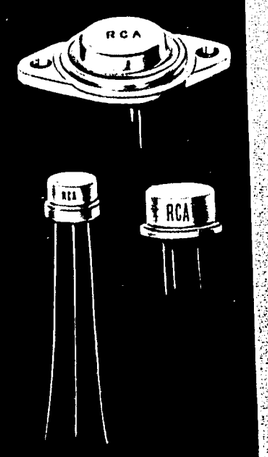
specify RCA semiconductor products



RCA FERRITES
...a comprehensive line of memory cores, switching cores, transfluxors, memory planes, and aperture plates for computer and data processing equipment. RCA's wide experience in the manufacture and application of ferrite materials can be of valuable help to you in your computer designs.



RCA MICROMODULES
...an important, new concept in electronic parts packaging makes possible electronic equipment having a parts density of 600,000 parts per cubic foot —resulting in a size reduction to 1/10 that of existing miniature equipment.



RCA TRANSISTORS
...RCA Transistors cover a wide range of applications from DC to VHF, for RF, IF, AF and switching functions in entertainment, industrial, military and computer applications. They are produced and controlled to meet the most critical performance requirements and have built an enviable record of electrical uniformity and long life.

RCA DIFFUSED-JUNCTION SILICON RECTIFIERS
...a wide range of types for entertainment, industrial and magnetic-amplifier service featuring rugged design, high-efficiency performance and electrical uniformity. Precision-controlled diffused junction process provides high reliability. New types are constantly being added to this line.

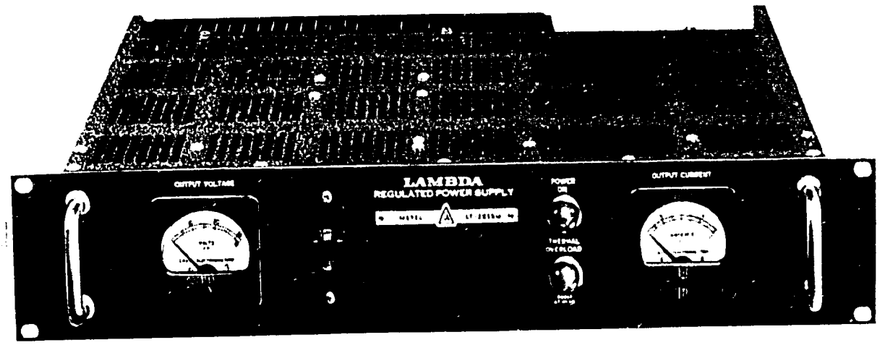
LAMBDA'S ALL-TRANSISTOR LINE

Delivered now • Guaranteed for five years



1-AMP AND 2-AMP—CONVECTION COOLED

No internal blowers
No moving parts

0-32 VDC

0-1 AMP 0-2 AMP

CONDENSED DATA

Voltage Bands	0-8, 8-16, 16-24, 24-32 VDC
Line Regulation	Better than 0.15 per cent or 20 millivolts (whichever is greater). For input variations from 105-125 VAC.
Load Regulation	Better than 0.15 per cent or 20 millivolts (whichever is greater). For load variations from 0 to full load.
AC Input	105-125 VAC, 50-400 CPS
Electrical Overload Protection	Magnetic circuit breaker, front panel mounted. Unit cannot be injured by short circuit or overload.
Thermal Overload Protection	Thermostat, manual reset, rear of chassis. Thermal overload indicator light, front panel.
Size	3½" H x 19" W x 14⅜" D.

- Ambient 50° C at full rating.
- High efficiency radiator heat sinks.
- Silicon rectifier.
- 50-400 cycles input.
- Special, high-purity foil, long-life electrolytics.

- Compact. Only 3½" panel height.
- Short-circuit proof.
- Protected by magnetic circuit breakers.
- Hermetically sealed transformer. Designed to MIL T27A.

- All transistor. No tubes.
- Fast transient response.
- Excess ambient thermal protection.
- Excellent regulation. Low output impedance. Low ripple.
- Remote sensing and DC vernier.

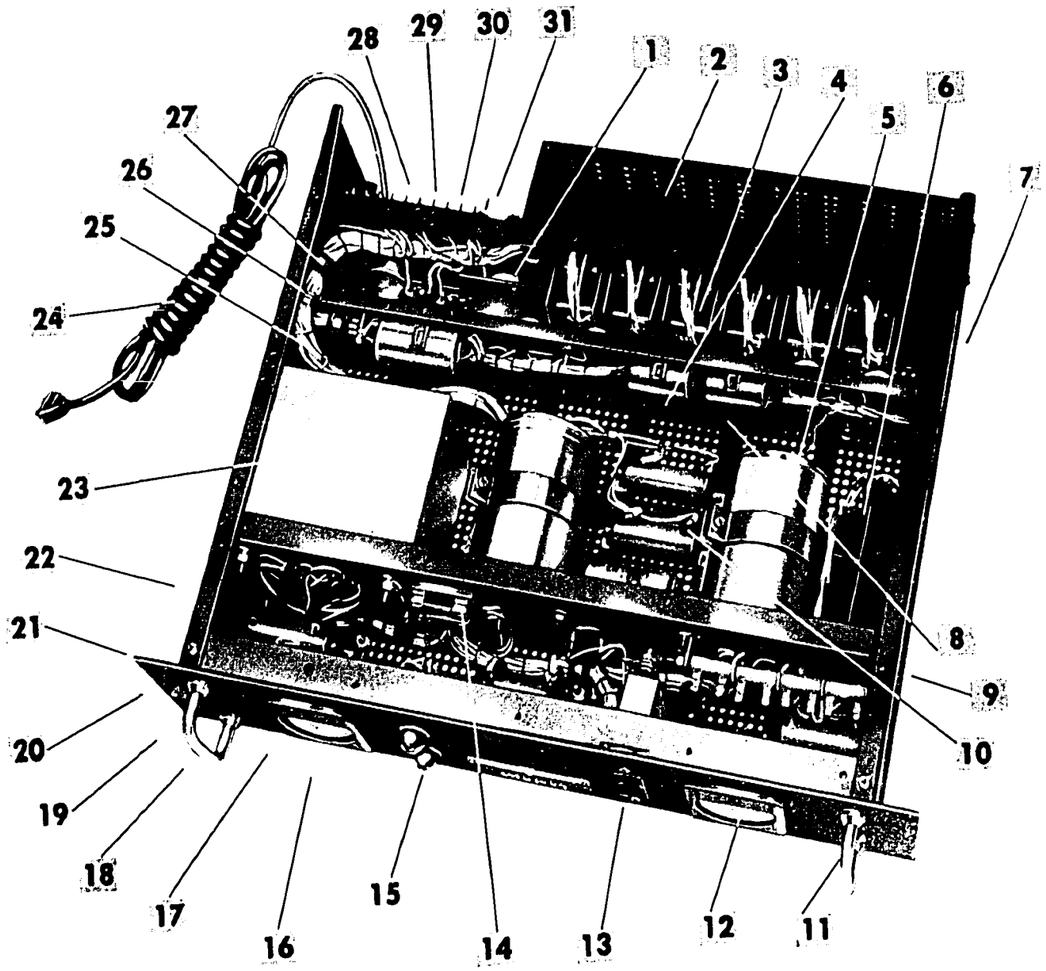
LAMBDA L-T TRANSISTORIZED POWER SUPPLIES



DESIGN AND PERFORMANCE FEATURES

1. Thermal overload breaker for excess ambient temperature protection
2. High efficiency, convection heat sinks
3. Industrial type power transistors inherently protected against overload
4. Highly stable Zener voltage reference diode
5. Special, high-purity foil, hermetically sealed, long-life electrolytic capacitors
6. Silicon rectifier
7. Excellent regulation, low output, impedance, low ripple
8. Stable, low-noise wire-wound reference networks and multipliers
9. Unit welded chassis and frame
10. Every connection and solder joint individually inspected and checked
11. Sturdy gripping handles
12. Meters on "M" models
13. Magnetic circuit breaker
14. Fuses, internal failure protection
15. Thermal overload indicator light
16. Fast transient response
17. Every specification lab-checked before shipment
18. Rated for full load over entire voltage range
19. Advanced packaging for optimum thermal and mechanical design
20. Rated for 24-hour continuous duty
21. Compact—only 3½" panel height
22. Rated for operation from 50-400 cycle source
23. Hermetically-sealed transformer—designed to Mil-T 27A
24. Heavy-duty extra-length industrial cord
25. Harness wiring
26. Nylon jacketed vinyl wire
27. Sturdy cable clamp anchors
28. Remote DC vernier adjustment terminals
29. Remote sensing terminals
30. All controls clearly identified and marked
31. Heavy-duty barrier-type terminal block located for convenient rack cabling

LAMBDA®

POWER SUPPLIES

Less space! Improved performance!
Long, trouble-free service!
Transient free output!

Fill the need for compact, regulated DC power supplies. Economy of panel space, functional simplicity, new quick-service features.

Wiring, tubes and other components readily accessible. You can reach them easily, service them fast

400 MA, 800 MA, and 1.5 ampere models include new, high-efficiency, long-life, hermetically-sealed semi-conductor rectifiers. All Com-Pak models are constructed with hermetically-sealed magnetic components and capacitors for long trouble-free service.

Condensed Data

LINE REGULATION	Better than 0.15% or 0.3 Volt, whichever is greater.
LOAD REGULATION	Better than 0.25% or 0.5 Volt, whichever is greater
INTERNAL IMPEDANCE	
C- 200 Series	Less than 6 ohms
C- 400 Series	Less than 3 ohms
C- 800 Series	Less than 1.5 ohms
C-1500 Series	Less than 0.75 ohms
RIPPLE AND NOISE	Less than 3 millivolts rms
POLARITY	Either positive or negative may be grounded.
AMBIENT TEMPERATURE	Continuous duty at full load up to 50°C (122°F) ambient.
AC OUTPUT (unregulated)	6.5 VAC (at 115 VAC Input)
C- 200 Series	10 AMP
C- 400 Series	15 AMP
C- 800 Series	20 AMP
C-1500 Series	30 AMP

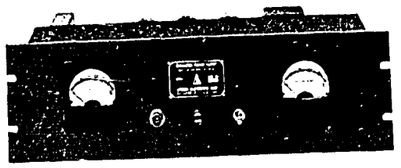
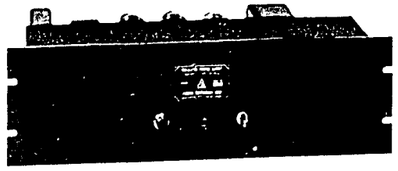
OTHER LAMBDA POWER SUPPLIES—RACK MODELS.....

100 MA SERIES

Complete power supply dependability



Model 28M: 200-325 VDC, 0-100 MA, with meters, $89.50
Model 29M: 100-200 VDC, 0-100 MA, with meters, 99.50



Model 28: 200-325 VDC, 0-100 MA, without meters, $59.50
Model 29: 100-200 VDC, 0-100 MA, without meters, $69.50

These long-lasting, dependable sources of power deliver "work horse" service...yet cost as little as $59.50.

Intended primarily for fixed voltage use, they provide a convenient, low-cost power source for auxiliary equipment; also suited to production line applications.

Lambda gives you the strongest proof of consistent, trouble-free power supply performance ever offered: a guarantee covering workmanship and materials (except for tubes and fuses) for *five full years.*

The guarantee, by far the most liberal one given by any power supplies manufacturer, has been made possible by an outstanding record of field performance.

This performance record proves the excellent experience which owners of Lambda power supplies have had with their equipment even under the most grueling, heavy-duty service.

Factual evidence of this kind is backed up by the results of many independent preference studies which show that of the engineers who specify power supplies, more than 50% prefer Lambda equipment.

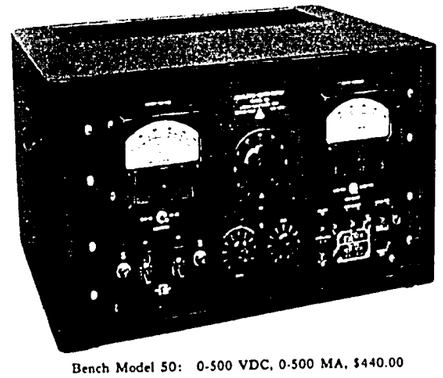
.....HEAVY DUTY AND PORTABLE MODELS

500 MA

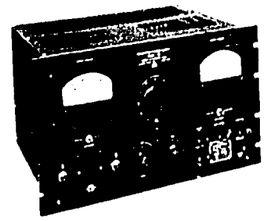
Wide range power supplies in bench and rack models



Bench Model 50: 0-500 VDC, 0-500 MA, $440.00

Lambda Model 50 is a general purpose, heavy duty power supply for bench use. It is housed in a compact cabinet provided with a rear access door and two sturdy carrying handles.

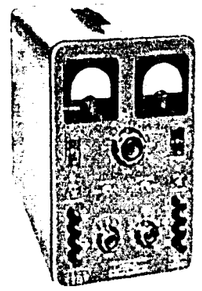
Rack Model 50R, intended for mounting in a standard 19" rack, is identical to Model 50 except that a ventilated dust cover is supplied in place of the cabinet.



Rack Model 50R: 0-500 VDC, 0-500 MA, $420.00

200 MA PORTABLE

Wide range de luxe portable power supply for broad field and laboratory applications

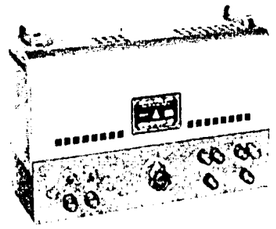


Model 71:
0-500 VDC,
0-200 MA,
$310.00

Built for heavy-duty service, this versatile precision unit features maximum compactness and portability. Weight: 49 lbs. Only 13" high, 8¾" wide, 14½" deep.

Model 71 is mounted on rubber bumper feet and is equipped with a sturdy fold-down leather handle.

100 MA PORTABLE



Model 25: 200-325 VDC, 0-100 MA, $69.50

Model 26: 100-200 VDC, 0-100 MA, $79.50

COMPACT...PORTABLE...LOW COST

Supplies both regulated voltages and unregulated AC voltage for a variety of uses. Popularly used as a power source for electronic equipment and for many other applications requiring a source of stabilized DC voltage. Weight: only 19 lbs. Size: 8"H x 14"W x 6"D.

S-10	13 x 8¾ x 14½	49	85

GENERAL SPECIFICATIONS

Sufficient tolerance is incorporated in the specifications to allow for normal commercial component and tube deviations. Tube replacements may be made with any equivalent tubes meeting E.I.A. specifications.

INPUT
105-125 VAC, 50-400 CPS, single phase. Exceptions: Models 50, 50R and 71 – 105-125 VAC, 50-60 CPS.

DC OUTPUT
Voltage Range: Continuously variable over ranges specified, except where otherwise noted.

Current Range. The current ranges given apply to the entire DC output voltage range, and for input voltages from 105 to 125 VAC. No "de-rating" is necessary.

Polarity: Either positive or negative terminal may be grounded.

AC OUTPUT
The AC output is unregulated, isolated and ungrounded. It has a value of slightly higher than 6.3 V (when fully loaded) at an input of 115 VAC. This value allows for voltage drop in connecting leads. Dual outputs may be connected in series or parallel.

DUTY CYCLE
Continuous duty at full load.

METERS
Where meters are indicated, a separate voltmeter and milliammeter are provided.

OVERLOAD PROTECTION
Ample protection is provided against external overload and internal failure conditions by means of fuses.

Circuit breakers of the magnetic, "trip-free" type are employed in Models 50, 50R, 71 and LT series as protection against external overloads. And in the LT series, the transistor complement is independently protected by special transistor circuitry.

STYLE
Rack Models are designed for mounting on standard 19" relay racks.

Bench Models are provided with compact, special-purpose designed, ventilated cabinets equipped with carrying handles. The power supply units may be removed from their cabinets for mounting in standard relay racks (except Models 25, 26 and 71).

RATINGS AND COMPONENTS
All components used are of the highest quality and are operated well within manufacturers ratings. Hermetically sealed, oil-filled capacitors are used exclusively, except in LT series, where special high purity foil, long life electrolytics are used. Ample safety factors are provided in the design to insure the long life, and the dependable, trouble free operation so desirable in industrial and laboratory applications.

what is ⊞

Litton Industries has been built on a program of establishing strong proprietary product values based on advanced technologies. We have twenty-two manufacturing plants in the United States and two overseas. Engineers and scientists on our staff have the pleasure of seeing the fruition of their research and development work in the form of economically useful products. Here are our areas of exploration and manufacturing:

Military Equipments & Systems · Commercial Flight Equipment · Communications Equipment · Components · Electron Tubes · Business Machines ·

Here are some of the products we make:

Accounting Machines
Adding Machines
Antennas
Automatic Control Devices
Carcinotrons
Cathode Ray Tubes
Communications Equipments
Computers
Countermeasures Equipments
Cross Field Devices
Data Processing Equipments
Digital Computers
Directional Couplers
Display Tubes
Duplexers
Echo Boxes
Etched Circuits
Ferrite Load Isolators
Fire Control Systems
Gas Tubes
Guidance Systems
Klystrons
Magnetrons
Microwave Components
Missile Control Systems
Multiplexers
Navigation Systems
Potentiometers
Print-out Tubes
Rotary Joints
Serial X-ray Machines
Solid State Devices
Telemetry Equipment
Television Replacement Components
Terminals
Toroids
Transducers
Transformers
Traveling Wave Tubes

We have staff openings of professional scope for engineers and scientists at all levels in our Maryland Division and in our Electronic Equipments Division. For the former, address Litton Industries, Maryland Division, 4900 Calvert Road, College Park, Maryland. For the latter, address Litton Industries, Electronic Equipments Division, Beverly Hills, California.

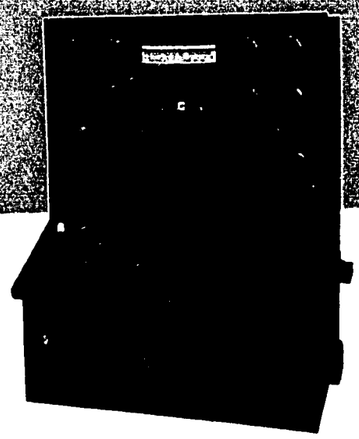
OF ELECTRICAL INDICATING INSTRUMENTS,

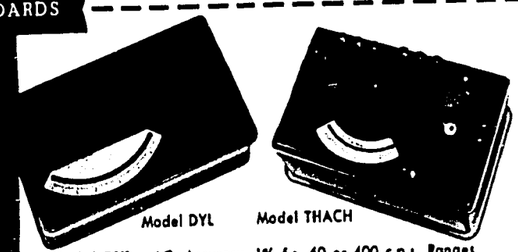
LABORATORY STANDARDS

SENSITIVE RESEARCH



Model LTC—AC-DC/DC calibration console. *Accuracy*—.05% *of actual reading.* Ranges—.5 v. to 1111.5 v.; 1 ma. (2 ma. on AC) to 11.115 amps. Resolution—.01%. Frequency—DC to 25 kc. Other consoles are:

Model	% Accuracy	Ranges
LTD	.05 of reading	.1 v. to 1111.1 v.; 1 ma. to 11.111 amps. DC
LTCA	.05 of reading	.5 v. to 1111.5 v.; 2 ma. to 11.115 amps. AC-DC
LTA	.05 of full scale	.3 v. to 1500 v.; 2 ma. to 30 amps. AC-DC.
LTHD	.05 of reading	0-1.6 amps.; 0-1.6 v. DC.



Model DYL Model THACH

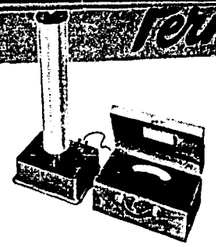
Model DYL—AC. Accuracy—1% f.s. 60 or 400 c.p.s. Ranges 10/20/50/100/200/500 ma.; 1/2/5/10 amps.; 20/50/100/200/500 v. f.s. 12" venier scale. **Model THACH**—AC/DC *Self Checking* Volt-Amp-Milliammeter. Accuracy—.2% f.s. to 4 kc. Ranges—10/20/50/100/200/500 ma.; 1/2/5 amps.; 1/2/5/10/20/50/100/200/500/1000v. f.s. Checks its own accuracy against an internal standard cell. Special regulated **THACH Power Supply** (optional) automatically shuts off power to the THACH when switching ranges, reducing possibility of accidental overloads. Output is DC or 60 c.p.s. (400 c.p.s. can be plugged in).

ranges, .3 v. to 1.5 kv.; 1.5 ma. to 15 amps. f.s.
Accuracy .1% f.s. Multirange I or E combinations
Accuracy .1% f.s. Multirange I or E combinations
00 c.p.s.
Pivots and shock-mounted jewels.

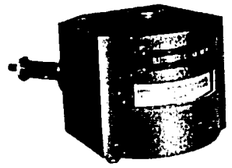
CORPORATION
NEW ROCHELLE, N. Y.

Permanently Reliable

AC-DC ELECTROSTATIC VOLTMETERS



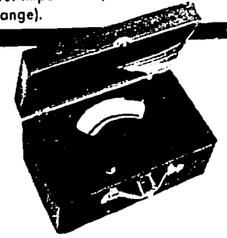
Model CRV — Crest or peak voltmeter for reading true RMS, negative peaks and positive peaks. Accuracy—1% f.s. for basic 0-1 kv. instrument. 1% multipliers available up to 100 kv. for AC or pulsed DC measurements. 5.2" scale. For pulses of 20/sec. or more. High input impedance (varies according to range).



Model ESH - Accuracy-1% f.s. (.5% on special order). Single or multirange combs. from 5 kv. to 100 kv. f.s. 6" scale. Input impedance up to 5 x 10^{15} ohms. Reads true RMS. Switch controlled from rear. Transit lock and brackets for panel mounting available. Adaptor for peak voltage reading. All electrostatics have a modified square law scale.

Model ESD — Accuracy-1% (.5% on special order). Sing multirange from 120 v. to 5 5.2" scale. Reads true RMS impedance 10^{15} ohms. Univ **Model**—Accuracy—1%; range 300 v. to 5 kv. f.s. 4" scale **VPA**—Peak voltage adapto 30 kv. maximum invers rating.

AC-DC POLYRANGERS



Model U88 — Accuracy — .5% DC; .75% AC/DC f.s. (thermocouple side). 88 ranges f.s. from 200 μa. to 1.5 amps.; 20 mv. to 750 v. DC, and 10 ma. to 3 amps.; .5 v. to 750 v. AC/DC. Frequency 5 kc. on E and 15 kc. on I. 5.2" scale. Automatic Temperature Compensation. **Model USP**—similar to above but 28 ranges.

Model C — Rugged DC, .25% f.s. accurate reference standard. 14 ranges f.s. from 1.5 ma. to 3 amps.; 1 v. to 1 kv. (2 combs.) 1 sec. period. 6.3" scale. **Model WVA** — same, but 27 f.s. ranges from 1 ma. to 15 amps.; 100 mv. to 1 kv. **Model S**—Accuracy-.5%. Sensitivity to 10,000 ohms/v.; 5 mv.; 100 μa. 13 ranges. 5.2" scale.

Model DYP — Transformer dynamometer for 60 c.p.s. A ing. Accuracy — .3% f.s. ranges from 5 ma. to 10 v. to 2 kv. 6.3" scale. Polyra are portable, general pur and E measuring instru Other models and range co tions available. Write for c plete listing.

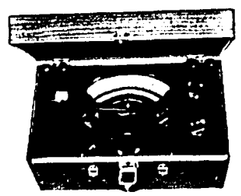
AC-DC THERMOCOUPLE INSTRUMENTS

Model XT—R.F. ammeter. Accuracy —1% f.s. DC to 70 Mc. Single range from 1 amp. to 100 amps. (higher on special order). Automatic Temperature Compensation. 6.3" scale. **Model RF**—same, but ranges 1 ma. to 1 amp. f.s. Frequency — 1 Mc. (4 range unit 250 kc.). **Model AU** — Accuracy-.5% (on special order) up to 20 kc.

Model A—Accuracy—.75% f.s. (.5% on special order). Single or multirange switch controlled f.s. ranges from 1 ma. to 1.5 amps.; .2 v. to 1.5 kv. Frequency — up to 7 kc. on E; 15 kc. on I. Automatic Temperature Compensation. 6.3" scale. Thermocouple instruments are available with a thermocouple replacement feature and overload protective shunt.

Model RFV—Radio frequen meter. Accuracy — .5% f.s. max. frequency influence o controlled multirange units v. (5 Mc.) to 300v. f.s. (15 Single range instruments of v. f.s. have an upper frequen of 10 Mc. Automatic Temp Compensation. 6.3" scale C certified on DC. Frequency ence constant.

DC CORROSION AND ELECTROLYSIS INSTRUMENTS

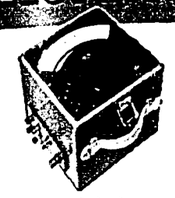


Model PV — Potentiometer voltmeter — measures *true potentials* with zero current drain. Accuracy — .5% f.s. Multirange combs. from 2 mv. to 20 v. f.s. 5.2" scale. **Model ZR**—Zero resistance micro-milliammeter having a zero volt loss. Accuracy—.5% f.s. Multirange combs. from 10 μa. to 300 ma.

Model HS-COR — Designed for rugged field use for A. T. & T. and Bell Tel. Labs. Accuracy — .5% f.s. Multirange combs. from 5 mv. to 100 v. Sensitivities to 1 megohm/v. 6.3" scale. Features the *formica case, Diamond Pivots,* and *special non-slip binding posts for alligator clips.*

Diamond Pivots and shock mounted jewels are included in all Laboratory Standards and ultra high sensitivity instruments (thermocouple meters, low resistance meters, etc.) They are many more shock resistant than conventional pivots and jewels their installation assures a tion free moving element the severest operating con

ELECTRICAL INDICATING INSTRUMENTS

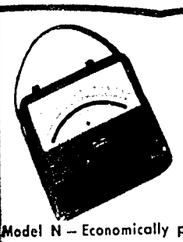


del PDLW — Polyphase watter for use down to 20% p.f. racy—.75% f.s. up to 500 c.p.s. irange combs. from 1.5 w. to kw. f.s. at 75/150/300 v. f.s. quency limits of 2.5 kc. on spe- order) 5.2" scale. **Model PDW** me, but accuracy — .25% f.s. n to 50% p.f. and up to 800 . Ranges from 15 w. f.s. at 00/200 v. f.s. 6.3" scale.

Model DW — Single phase reference standard wattmeter. Accuracy —.25% f.s. to 50% p.f. and up to 800 c.p.s. Multirange combs. from 5 w. to 2 kw. f.s. at 50/100/200 v. f.s. 6.3" scale. **Model DLW**—same, but accuracy .5% f.s. down to 20% p.f. and up to 500 c.p.s. Ranges from .2 w. f.s. at 75/150/300 v. **University Model**—same, but 4" scale and reduced accuracy.

Model VAW—Volt-Amp-Watt-meter. AC. Accuracy—.5% f.s. for E. and I.; .75% f.s. for w. Ranges for "50-800 c.p.s." model—50/100/200/250/500 w.; 1/2/2.5/5 kw. f.s. at 100/200/500 v. f.s. down to 50% p.f.; "50-125 c.p.s." model has additional ranges of 12.5/25 w. f.s. and 25/50 v. f.s.

AC-DC WATTMETERS



A *NEW* portable Field instrument

Model N — Economically priced, rugged DC and AC voltmeters and ammeters. Accuracy — .5% f.s. Switch controlled. Range combs. — 50 mv. to 1.5 kv. (up to 5 k.-ohms/v.); 50 μa. to 50 amps. DC; 5 v. to 750 v.; 10 ma. to 10 amps. AC. Long 6" scale. Moulded bakelite case with carrying strap. *Can be supplied for panel mounting.*

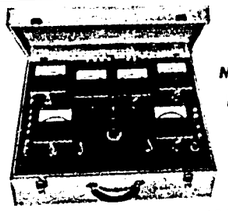
UNIVERSITY MODEL

Portable double pivoted D'Arsonval,[1] dynamometer,[2] and moving iron[3] instruments. Single and multirange. Switch controlled to 5 amps. and 1 kv. Self-contained to approximately 20 amps. and 1.5 kv. (DCHI to 30 kv.)

Model	*Accuracy*	*Scale*	*F.S. Ranges Start At*
1C	.25% f.s.	6.3"	DC 30 μa; 50 mv.
1S	.5% f.s.	6.3"	DC 1 μa; 1 mv.
1UNIV.	.5% f.s.	4"	DC 2 μa; 1 mv.
1DCHI	1% f.s.	4"	DC 1.5 kv. 50k Ω/v.
2D	.25% f.s.	6.3"	AC/DC 5 ma; 1.5 v.
2UNIV.	.5% f.s.	4"	AC/DC 10 ma; 7.5 v.
2MI	.5% f.s.	6.3"	AC 10 ma; 7.5 v.

AC-DC VOLTMETERS AND AMMETERS

EPSTEIN FRAME



Model MAT

set, designed in accordance with ASTM specifications (sec. A341-49 A343-49), for core loss measurements, determination of hysteresis and magnetization curves, magnetic field and AC permeability Inductors above and below 1 amp. available. Includes automatic nal power compensation circuit. Contains a DC ammeter, AC am- r, RMS voltmeter, flux voltmeter, low p.f. wattmeter, and fluxmeter convenient overlapping ranges. **Model COL** — core loss test set special .25% f.s. accurate flux voltmeter (6.3" scale), RMS voltmeter, eter and wattmeter.

Model FM — a zero torque multirange fluxmeter calibrated in maxwells. Reads changes in flux linkage of a search coil as it moves in a magnetic field. Accuracy-.5% f.s. Sensitivity 1000 lines/div. using standard 10 turn search coil (1000 turn coil = 10 lines/div.). 5.2" scale. **Calibrated search coil and magnet** available for certification purposes.

MAGNETIC TESTING INSTRUMENTS

IC instruments have hand- n mirrored scales, electro- c and magnetic shielding temperature compensation. bles in general conform to specs C39.1-1951 for either or .5% class instruments. *All products are calibrated st primary standards that National Bureau of Stand- Certificates of Accuracy and unconditionally guaranteed materials and workmanship period of one year.*

Model JWSP

TYPE EW CASE

All of the models described in this brochure, and in our complete catalog, are available as edgewise panel instruments with *no loss in accuracy or sensitivity.* Scale lengths — 5" (type EW-5) and 7" (type EW-7). Switch controlled. Single or multirange. In some cases, such as polyrangers, they are supplied mounted in standard 19" rack panels. **Model JW** — Accuracy — .5% f.s. Max. of 3 DC ranges (B.P.'s only) from 2 μa, and 1.5 mv. f.s. Scale 4". **New Model JWSP** — same, but can contain up to 10 switch controlled ranges. **Rectangular DC and AC models** available at accuracies from .5% to 1% f.s.

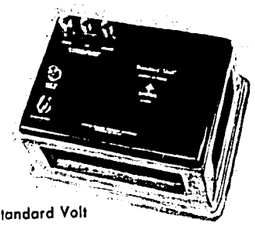
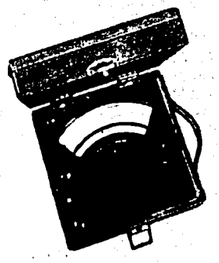
Model INCRE



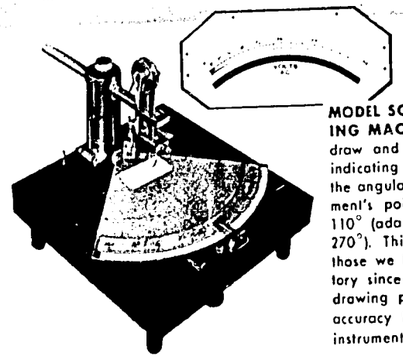
Standard Volt

Model INCRE – Differential Incremeter. ***A NEW .05% f.s. accurate expanded scale DC standard*** for rack panel mounting or portable use. Combines the high comparison accuracy of the differential instrument with a .005% stable source. Scale has an effective length of 63" or 70", and a resolution of 1000 divisions. Each 10% of any range is expanded over the instrument's *actual* 6.3" or 7" scale length. Direct reading! No balancing or nulling! Single or multirange combinations from 200 μa. to 10 amps. and 200 m.v. to 1 kv. **The Standard Volt** is the internal source used, and is available separately. Input 115 v. 60c.p.s. 25 va. Output 1.0 v. and 1.0185 v. to within .01%. (Exact E. can be certified to .001%).



Model RA measures the ratio of 2 DC currents or voltages. Accuracy – .25% max. Minimum current per coil 50 μa. Scale reads 0 to ∞. Special scales as required.

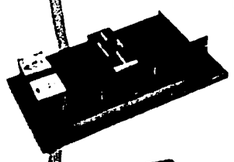
Model FRE – Frequency meter. Accuracy – .25% of center frequency. (expanded scale), or of f.s. value (zero left). Ranges e.g.; 54 – 66 c.p.s.; 350-450 c.p.s.; or 0-100 c.p.s. f.s. Nominal input 115 v. and/or 230 v. ±15%. 6.3" scale.



MODEL SCAMA — SCALE DRAWING MACHINE used to manually draw and print any flat electrical indicating instrument scale where the angular deflection of the instrument's pointer is no greater than 110° (adapter available for arcs of 270°). This unit is a duplicate of those we have used in our laboratory since 1927 and is capable of drawing precision scales to all the accuracy that the resolution of an instrument will permit.

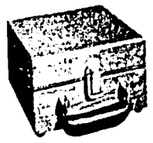
INSTRUMENT ACCESSORIES

VACUUM THERMOCOUPLES (Instrument type)–Sensitivities from 1 ma. to 1 amp. Output approximately 8-10 mv. open circuit. UHF types. Isolated or contact heaters. Special long-time constants. AIR COUPLES to 100 amps. (higher on special order).



LABORATORY STANDARD SHUNTS–Accuracy–.1% or .05%. Potential drop 50 mv., 100 mv., or 300 mv. Values from 1 amp. to 1000 amps. Rated for continuous duty.

MULTIPLIERS–Available to extend voltage ranges of all instruments. Accuracy – .1% or .05%.



FORMICA CASES are available for all portable instruments normally supplied in a wood case. They are structurally strong, a good dust and humidity barrier, and will look like new for the life of the instrument.

MODEL STC – Miniature Standard Cell. Accuracy – .025%. Nominal output 1.0185 v.

Specifications subject to change without notice.

Printed in U. S. A.

Your most advanced, dependable semiconductor and component products available anywhere are made by Texas Instruments—pioneer leader with the greatest semiconductor experience.

Ready to give you fast, time-saving local service on TI products is TI's nationwide network of top distributors—quality local sources where you get the newest TI products—off-the-shelf within hours—at factory prices.

If you have an electronic component requirement, contact your Texas Instruments distributor nearest you for fastest possible delivery from his complete line of stock. Check the list above for your nearest authorized TI distributor.

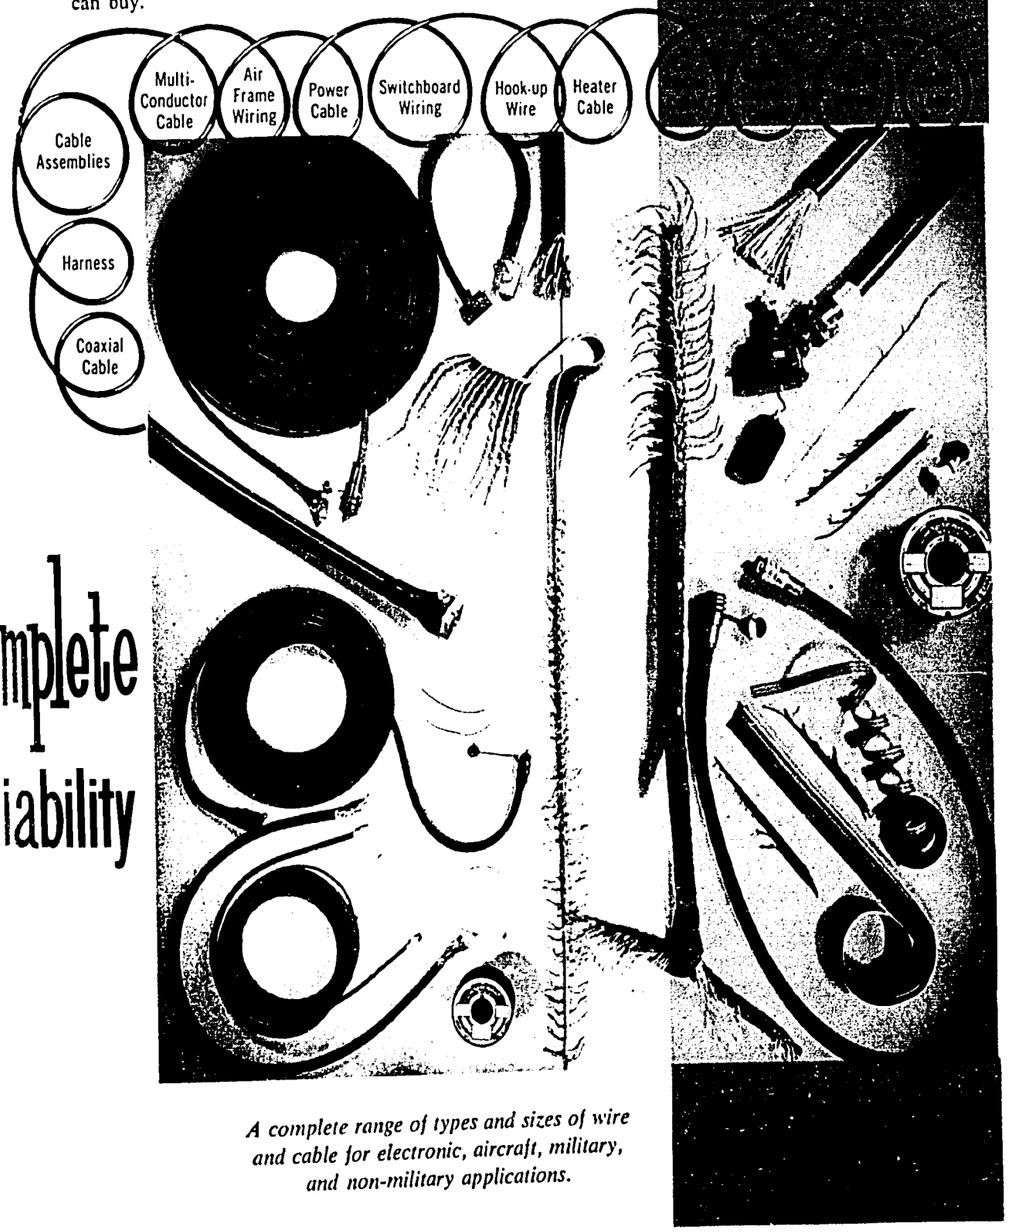
Surprenant

Surprenant's reputation for quality products is a direct outgrowth of its unique versatility. *All manufacturing processes from testing the incoming copper rod and insulation ingredients to terminating the finished wire and cable are done at the Surprenant plant.* This permits Surprenant quality certification at every step of manufacture.
Combine these controls with the most advanced manufacturing techniques and quality materials like TEFLON — and you know why Surprenant manufactures the most reliable wire and cable that money can buy.

true VERSATILITY



Complete reliability

A complete range of types and sizes of wire and cable for electronic, aircraft, military, and non-military applications.

New! NARDA Two-Stage, Low-Cost
ULTRASONIC VAPOR DEGREASER

Aircraft engine oil strainer, one of many aircraft, automotive and electronics parts cleaned and decarbonized by the new Narda Ultrasonic Vapor Degreaser—in less time and with less chemicals!

• BETTER CLEANING • UP TO 40 TIMES FASTER!

• INCREASES ENGINE and INSTRUMENT RELIABILITY!

This new production model SonBlaster Vapor Degreaser, originally designed by Narda for the U. S. Air Force, is now commercially available to operators of aircraft and automotive fleet service centers–at low cost! Pushbutton operated, this advanced design equipment thoroughly and quickly degreases and decarbonizes: oil and fuel strainers, pistons and rings, valves, spark plugs, carburetors, fuel pumps, ball bearings and hydraulic system parts, etc.

Especially recommended where manual cleaning with abrasives, strong corrosive chemicals or inflammable solvents is harmful or dangerous. Unexcelled where superior work *plus* volume production is desired. Volatile solvents for degreasing and aqueous solutions for decarbonizing can be used alternately.

The SonBlaster Vapor Degreaser is simple and economical to use. To degrease: place parts in (1) boiling sump and (2) ultrasonic sump (3) flush with power spray, using filtered and distilled pure solvent (4) condensing solvent vapor removes any residue traces–finished job is the ultimate in degreasing!

SPECIFICATIONS:

Electrical Input: 208/230 volts, 50/60 cycles, 25/20 amps.

Generator: Delivers 300 watts average; 600 watts peak, 40 kc

Transducer: Barium Titanate, 40 kc. Diaphragm, 112 sq. inches.

Recirculation System: ½ h.p. pump, stainless steel filter; 4500-watt heater, thermostatically controlled.

Valves: Pushbutton, solenoid operated on all drains.

Cabinet: Cold rolled steel, baked enamel finish; 16 gauge, 302 stainless steel top. (All stainless steel cabinet optional at extra cost.) Overall dimensions, 56" long x 32" wide x 23½" wide.

Sumps: Overall working area, 28" x 16", 14 gauge, 302 stainless steel, heliarc welded.
Boiling sump capacity, 7 gals.
Ultrasonic sump capacity, 6 gals.
Distillate reservoir capacity, 2 gals.

Price: $2990 for above model. Other Narda Ultrasonic Vapor Degreasers from $1500 up.

For additional information, please write to:

America's Volume Producer of Dependable Low Cost Ultrasonic Systems

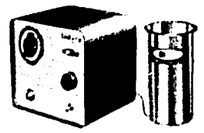
For details, circle #80 on Reader Service Card

Narda SonBlasters offer the most complete line of lowest-cost mass-produced ultrasonic cleaners!

Narda's mass-production techniques assure you the most complete line of ultrasonic cleaners at the lowest prices in the industry! From the smallest 35-watt to the amazing 2500-watt unit with a tank capacity of 75 gallons, Narda's SonBlasters are available **now**—off-the-shelf—for immediate delivery. And with a full 2-year warranty besides!

What do **you** want to clean? Transistors, semi-conductors, other electronic, automotive, missile and avionic components, instruments, timing mechanisms—Narda's SonBlasters clean 'most any mechanical, electrical or horological part or assembly you can think of—and clean faster, better and cheaper.

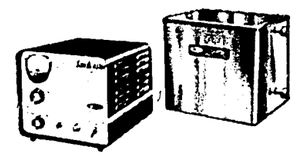
No matter what you need in ultrasonic cleaning equipment, you'll find Narda's complete line of production-size units have the quality, power, performance, capacity and appearance of cleaners selling up to three times their price! Write for more details **now** and we'll include a free questionnaire to help determine the precise model you need. Address: Dept. IRED-19.



Generator G-202 35 watts
Transducerized Tank NT-202 Capacity: ⅜ gallon

An amazingly efficient, yet inexpensive, ultrasonic cleaner. Duty cycle timer permits operator to turn the unit on, set it, and leave; the SonBlaster will turn off automatically at the end of the cycle. Four choices of timers—from 0-15 min. to 0-120 min. Also available without timer at slightly lower cost (G-201).

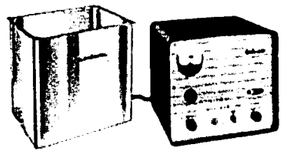
$220



Generator G-601 60 watts
Transducerized Tank NT-602 Capacity: 1 gallon

A more powerful production-type unit, with a special circuit and selector switch permitting operator to alternate between two tanks, when items being cleaned require different solutions or a two-step process.

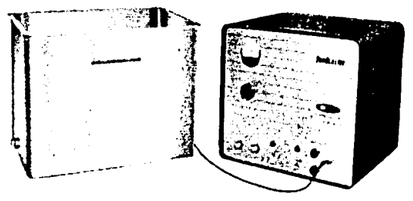
$350



Transducerized Tank NT-1505 Capacity: 5 gallons
Generator G-1501 200 watts

The lowest price in the industry for a tank of this capacity and activity. Generator also will operate 2, 3 or 4 submersible transducers at one time, with just a turn of the load selector switch on the front panel.

$695



Transducerized Tank NT-5001 Capacity: 10 gallons
Generator G-5001 500 watts

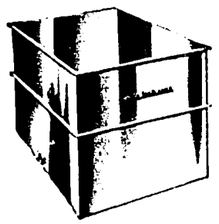
Generator features standby switch for longer life and load selector switch on the front panel to operate up to 8 submersible transducers or 8 NT-602 or 2 NT-1505 transducerized tanks at one time. Larger tanks available on special order.

$1325

Submersible Transducer NT-605

Heli arc welded stainless case, hermetically sealed for safe, leak-proof immersion. Radiating face: 27 sq. in. Effective plane of radiation: 40-50 sq. in. (approximately 10" x 5"). Effective cavitation of volumes up to 1200 cu. in. at 24 in. tank height (5 gal.) and 2400 cu. in. at 48 in. tank height (10 gal.). Bulkhead electrical fitting on back allows all wiring connections to be made on outside of tank. For use in any arrangement or location in any shape tank you desire to use. Also available—model NT-604, identical with NT-605, except for pipe thread instead of bulkhead fitting, permitting electrical connections inside of tank.

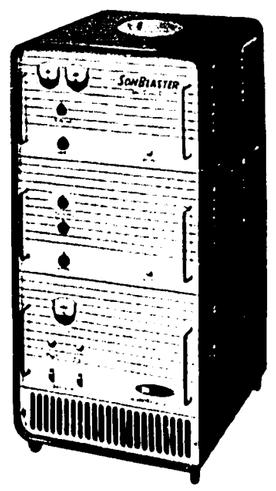
$130



Transducerized Tank NT-25001
Capacity: 75 gallons

Powerful unit drives the largest mass-produced industrial-size transducerized ultrasonic cleaning tank made! Also energizes up to 40 Narda 60-watt submersible transducers (NT-604 or -605). Capable of energizing tanks measuring up to 15 square feet of area by 2' or 3' high.

$4360



Generator G-25001
2500 watts

Consult with Narda for all your ultrasonic requirements. The SonBlaster catalog line of ultrasonic cleaning equipment ranges from 35 watts to 2.5 KW, and includes transducerized tanks as well as immersible transducers which can be adapted to any size or shape tank you may now be using. If ultrasonics can be applied to help improve your process, Narda will recommend the finest, most dependable equipment available—and at the lowest price in the industry!

For custom-designed cleaning systems, write to our Industrial Process Division; for information on Chemical processing applications, write to our Chemical and Physical Process Division; both at the address below.

the narda ultrasonics corporation

625 MAIN STREET, WESTBURY, L. I., N. Y.

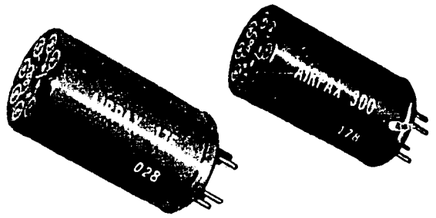
AIRPAX ELECTRONICS INCORPORATED



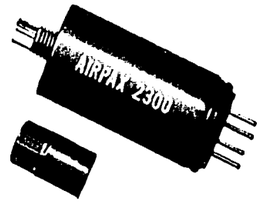
Types 175 and 300. The sub-miniature choppers which set the standards for the chopper industry. Type 175 uses a 6.3 volt, 60 CPS drive; Type 300 requires a 6.3 volt, 400 CPS drive. Both are hermetically sealed, stable, long-life choppers.

Types 6010 and 6015. Transistor choppers. Type 6015 includes the drive transformer. It is encased in a sub-miniature can with a 7 pin header. Drive for the 6010 may be as high as 100 KC; the type 6015 drive is 6.3 volts at 50 to 2000 CPS.

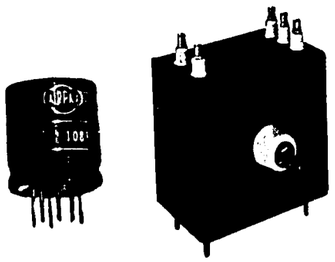
Airpax produces CHOPPERS for every purpose

Type 371. For reliability under extreme conditions of shock and vibration Airpax provides a center pivoted type which functions during vibrations of 15 G amplitude, over a frequency range of 10 to 2500 CPS.

Type 5600. Designed for transistor drive. Drive coil is tapped at its electrical center and requires only 8.5 milliamperes of drive current from a 9 volt, 400 CPS source. Eliminates drive transformer.



Type 2300. This low noise chopper is ideal for use in null seeking servo systems, instrument amplifiers and applications where noise must be kept at 1 microvolt or less, RMS. Drive is 6.3 volts, RMS at 400 CPS.



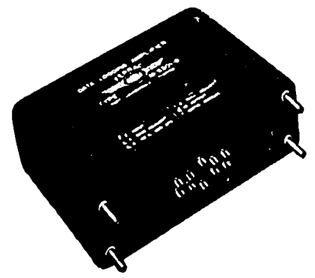
CUSTOM TRANSFORMERS. Airpax designs and manufactures custom transformers. The Fosterite facility at Cambridge is the largest in the country. Small size or large, bring your transformer requirements to Airpax.

Magnetic inverse time delay CIRCUIT BREAKER. Only slightly larger than an "ON-OFF" switch, this circuit breaker provides power control and positive circuit protection. Available in ratings from 50 ma. to 10 amps.

AIRPAX ELECTRONICS INCORPORATED

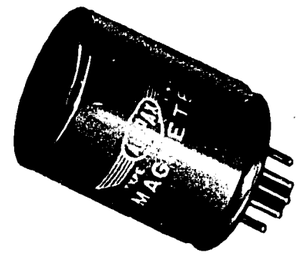
CAMBRIDGE, MARYLAND — FORT LAUDERDALE, FLA.

For details, circle #82 on Reader Service Card

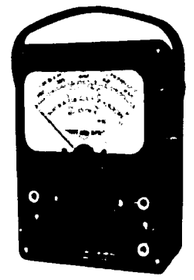


DATA LOGGING AMPLIFIER. A three-stage high accuracy, molded magnetic amplifier designed to deliver ± 5 volts at a linearity better than 0.1%. Voltage gains from 100 to 10,000 are obtainable in this differential type magnetic amplifier.

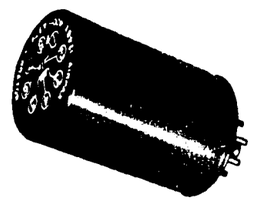
TACH-PAK. The all new Airpax TACH-PAK is a completely self-contained, highly sensitive unit which makes possible the accurate measurement (0.25%) of the speed of any rotating, reciprocating or oscillating shaft. Also available with AN connector.



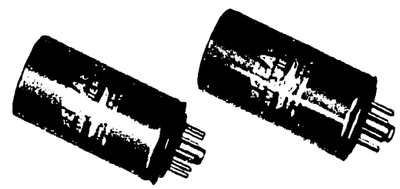
MAGMETER. Frequency to voltage converter. Output current is linear with input frequency. The MAGMETER is substantially insensitive to fluctuations in signal amplitude or waveform. Operates servo type recorders.



AIRCRAFT TEST SET. Inexpensive, portable all purpose test set measures frequency, DC and AC voltages commonly found in aircraft ground maintenance checks. Standard phase checker is a built-in feature.



VIBRATORS. Airpax pioneered high-frequency power vibrators. Type 500 is a 400 CPS interrupter for moderate continuous or heavy intermittent loads. This vibrator and variations are used in airborne transceivers, guidance equipments, and portable sets.



FERRAC Magnetic Amplifiers. Available in plug-in or molded types. Faster response—wider dynamic range—higher gains.

PREAC. Airpax PREAC amplifiers, for 60 or 400 CPS operation, have power gains of over 50 db. Unit is hermetically sealed.

ALLIED CONTROL COMPANY, INC., 2 EAST END AVENUE, NEW YORK 21, N. Y.

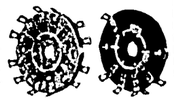
before you freeze your design...call on OAK engineers!

OAK "EARLY-BIRD" ENGINEERING HELPS YOU GET BETTER COMPONENTS . . . FASTER!

By calling on Oak engineers early, you take full advantage of their 25 years of specialization in electro-mechanical devices. This intensive background enables them to save you costly re-engineering time. Even on seemingly simple components, Oak engineers have been able to make valuable suggestions that resulted in better performance and lower costs. Combine this thorough engineering with Oak's manufacturing skills and facilities, and you can feel assured of getting the *exact* component you need . . . and in a lot less time.

NEW! 150°C SWITCH SECTIONS

These high-temperature, low-power wafers have demonstrated high reliability in actual operation during 800-hour tests at a continuous, ambient 150°C. Special alloy clips; ceramic or Mycalex insulation.



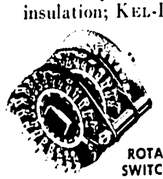
ELECTRO-MECHANICAL COMPONENTS ENGINEERED AND MANUFACTURED TO YOUR EXACT REQUIREMENTS!

low-current switches

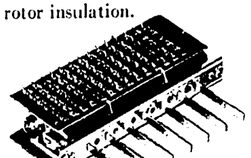
Mounts in a 1" diameter circle

Type A Miniature Rotary Switch

Available in three models: 45°, 36°, and 30° throw. Up to 18 contacts. Silicone glass stator insulation; KEL-F® rotor insulation.

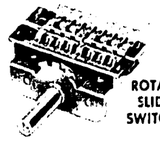


ROTARY SWITCHES



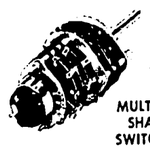
PUSHBUTTON SWITCHES

PRINTED CIRCUIT SWITCHES



ROTARY SLIDER SWITCHES

LEVER OPERATED SWITCHES



MULTIPLE SHAFT SWITCHES

The above switches represent but seven of the hundreds of basic Oak designs—already tooled for fast production. Custom variation of these designs provides a source of special switches in almost *infinite variety*. Excellence of design plus highest quality materials make Oak switches the best you can buy. Standard insulation is phenolic, steatite, and Mycalex; contacts, silver-plated spring brass or spring silver alloy.

choppers

smallest...lightest in its class

Series M

DC-AC

Low Level Inverter

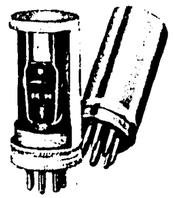
Withstands 30 G vibrations from 0-500 cps and −55° to +100°C temperatures. Custom-built in an unusual variety of packages.

Type 605 Chopper Eliminates Phase-Shift Circuit

Has 0° (or 180°) phase-lag "designed-in." Available with side or vertical flange mounts, flattened pierced pins, solder loops, or standard socket pins.

NC 600 Series of Oak Choppers

Available for frequencies from 15 to 600 cycles. Operates up to 125°C. High contact rating. Exceptional stability. Low voltage starting.

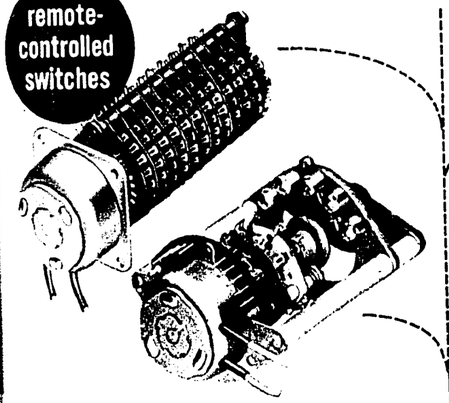


VIBRATORS

Custom-Designed and Custom-Built

Basic Oak designs cover practically any application. The V6000 Series is a versatile, general purpose vibrator. Type 94 is designed primarily for auto radios. Type 95 is a small, medium power shunt drive interrupter. The MV Series is designed for portable radios and similar applications. All can be supplied for military needs.

remote-controlled switches

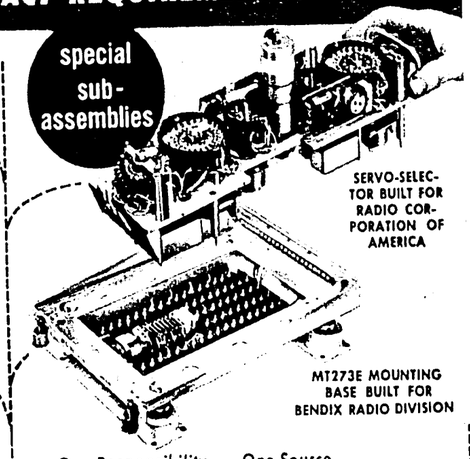


Thousands of Combinations

Oak remote-controlled switches are custom combinations of Oak rotary solenoids* and the many types of Oak rotary switches. They are unusually reliable, giving a positive stepping action even under conditions of shock and vibration. Ideal for mobile and military equipment.

*Mfd. under license from G. H. LELAND, INC.

special sub-assemblies



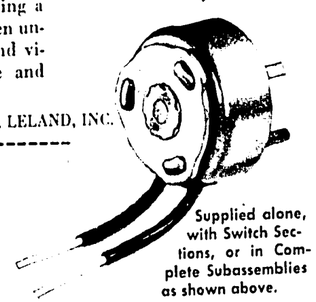
SERVO-SELECTOR BUILT FOR RADIO CORPORATION OF AMERICA

MT273E MOUNTING BASE BUILT FOR BENDIX RADIO DIVISION

One Responsibility . . . One Source

Turn your prototype over to Oak engineers. They will analyze it, test it, redesign for optimum performance, and convert it into a manufacturable device. Oak's modern production facilities then build your subassembly, and run any life and environment tests which may be required.

rotary solenoids*



Supplied alone, with Switch Sections, or in Complete Subassemblies as shown above.

Oak rotary solenoids are ideal actuators for remote control of complex circuits under the severe conditions of MIL-S-4040A and similar specifications. They are compact, rugged and extremely adaptable.

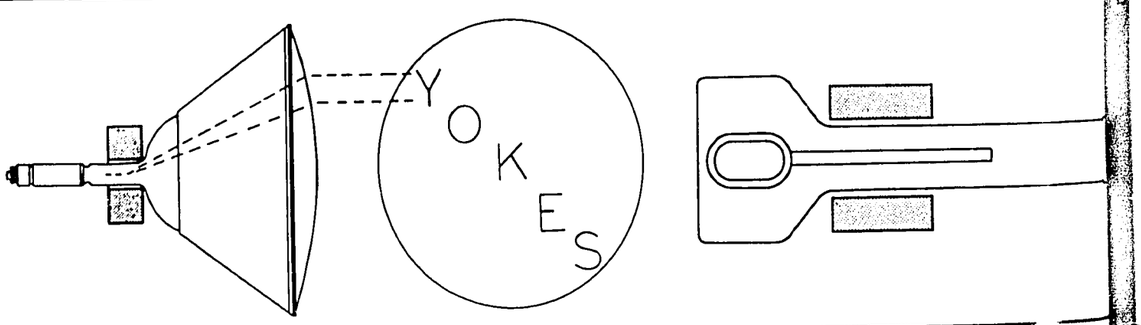
Celco YOKES

YEARS AHEAD IN DESIGN PERFORMANCE!

Celco YOKES FOR CHARACTER DISPLAYS & HIGH RESOLUTION APPLICATIONS



Deflection yokes for difficult character display and high Resolution problems are another achievement in advanced design and engineering at Celco.

Celco Deflection Yokes permit the rapid presentation of random character and alpha numeric displays. Low hystersis, high accuracy and fast recovery time with emphasis on the degradation of current near zero make possible magnetic deflection in character displays.

Celco High Sensitivity Yokes minimize the deflecting currents required from the deflection drivers, resulting in high efficiency for your system.

For best utilization of the New High Resolution CRT's CELCO YOKES assure minimum defocusing at large deflection.

The construction of our yokes makes it possible to obtain **sensitivities, linearities, responses and distortion-free deflection fields** not possible with the usual types of yoke.

For critical applications, many of our customers have saved years of trial and error in YOKE selection by specifying CELCO YOKES.

Celco FOR STANDARD, COMMERCIAL & MILITARY APPLICATIONS

For details, circle #89 on Reader Service Card

Single units or production quantities immediately available in wide range of inductance-resistance-Recovery time-pin cushion corrected or optimum focus as required. Also available 2-1/8" and 2-1/2" neck CRT yokes.

TYPE BY

Transistorized encapsulated yoke for 70 7/8" neck and 1" neck image storage tubes.

TYPE AY

Push-pull or single ended yokes for 52°, 70° and 90° deflections for 1 7/16" neck CRT.

TYPE RY

Rotating deflection yokes for PPI displays. Gears, bearings, slip rings and contact assembly included.

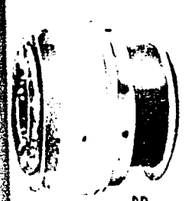
TYPE CF

Electromagnetic focusing coil for 7/8", 1" and 1 7/16" neck CRT

TYPE MY

Miniature light weight deflection yoke coils or assemblies for incorporation into customer housings.

Celco ENGINEERED YOKES FOR PRECISION DISPLAYS



DP

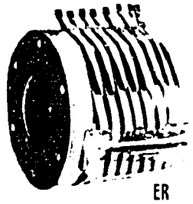
Dual ... yoke custom ... deflection system ... off-center-ing co...

HS

Special high sensitivity deflection yoke with critical damping provisions.

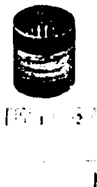
PI

Plug-in type encapsulated deflection yoke for rapid insertion.



ER

Encapsulated rotating, 4 axis slip ring precision deflection yoke.



MS

Miniature deflection yoke for rotating or fixed coil radar system.

For engineering information on your special display problems call your nearest Celco Plant.

THE SHRINKING MAN'S FILTER

Although worlds apart in purpose, practitioners of the art of head shrinking and Burnell & Co. miniaturization engineers are both expert in reducing to size. For example, Burnell's new microminiature *MICROID* filters are particularly valuable in transistorized circuitry and only a step away from micromodule use. Range of the new Type *MIT* band pass filter is 7.35 kc to 100 kc, band width 15% at 3 db and +60% —40% at 40 db. Size is 1/2"x19/32"x15/16", weight .3 oz. Types *MLP* and *MHP* cover 5 kc to 100 kc with a standard impedance of 10K ohms. These are microminiature counterparts of the popular Burnell TCL and TCH low pass and band pass filters. The band pass filter results when cascading a TCL with TCH filter. Size is 3/4" x 1/2" x 1".

Type *MIF* microminiature interstage filters are designed for a wide variety of applications. Input impedance is 10K ohms, output to grid with a voltage gain of approximately 2:1. The 3 db band width is nominally 8%. Ranging from 7.5 kc to 100 kc, these interstage filters are provided in the same case as Type *MLP*.

Fully encapsulated, the new *MICROID* filters provide less weight, more reliability and exceed MIL specifications. We'll be glad to design and manufacture to your specifications in any quantity. Write for special filter bulletin to help solve your circuit problems.

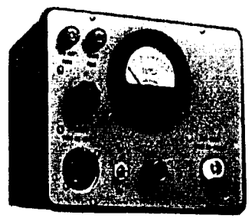
Average Reading R.F. POWER METERS

These broad band R.F. Power Meters are of the absorption-type consisting of an oil filled, air cooled, coaxial load resistor and a voltmeter calibrated to read watts. The power meter is suitable for use as a field or laboratory test instrument, is completely shielded and non-radiating, permitting transmitter testing and adjustment without interference. The meter box is easily detachable, permitting location of the load resistor at a remote point. In cases where power measurements are not required the load resistor may be used as a dummy load. No correction curve is necessary to cover the frequency range. The spurious response usually associated with directional couplers and capacitative voltage dividers is absent in this purely resistive voltage divider. Since this is a resistive voltage divider which has the same voltage division at DC, 60 cycle AC, and at high radio frequencies, this instrument can be calibrated and its calibration can be checked frequently on 60 cycle supply voltages.

Model	Power Ranges In Watts	Max. Power Dissipation	Price
PM-3	60, 150	150 watts	$220.00
PM-5	1.5, 6	10 watts	95.00
PM-7	150, 600	600 watts	285.00
PM-8	1.5, 6, 15, 60	100 watts	225.00
PM-9	2.5, 10	10 watts	105.00
PM-10	15, 60	90 watts	145.00
PM-16	150, 600, 1500	1500 watts	375.00
PM-18	1.5, 6, 15, 60, 150, 600	600 watts	485.00
PM-19	1.5, 6, 15, 60, 120	100 watts	250.00



PEAK READING
R.F. POWER METERS

The peak reading power meters listed are designed to accurately measure the peak power of pulsed R.F. signals in the range of .2 to 700 MC with PRF of 800 to 10,000 pps and pulse duration of .5 microseconds or more, and less than specified maximum average power dissipation.

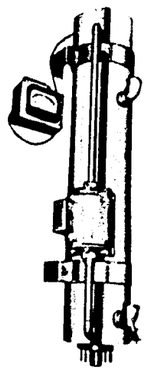
Model	Peak Range	VSWR	Max. Average Power Dissipation	Connector	Impedance	Supply Voltage	Accuracy	Freq. Range	Price
PM-12	0-50kw	1.15	60 watts	Type HN	51.5	115V,60-1600cps	±10%	.2-700Mc	$350.00
TS-305	0-50kw	1.15	50 watts	Type HN	51.5	115V,60-1600cps	±10%	220-330Mc	$350.00
PM-13	0-100kw	1.15	100 watts	Type HN	51.5	115V,60-1600cps	±10%	.2-700Mc	$125.00

NEW! HI-POWER COAXIAL

CALORIMETRIC POWER METER

DIRECT READING—5 to 50 KW

DC—1000 MC • VSWR less than 1.3



These power meters are greatly simplified Calorimeters which use water to carry the heat away, for economy of space and cost.

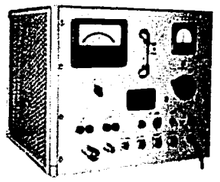
The instrument is fully self-contained, portable, water cooled and requires only connection to the power line and water supply. It does not use any flow meters, thermometers or any other controls. There is only the "ON" and "OFF" switch for the operator to use on the front panel, when a measurement is to be made. A sensitive thermopile and microammeter measure the power dissipated in the R.F. load. The microammeter is calibrated in watts, is direct reading and can be remotely located.

The radio frequency load has a low VSWR between DC to 1000 MC. This feature makes it possible to calibrate this instrument at 60 cps against an accurate laboratory type wattmeter, and then use it at any frequency up to 1000 MC. Thus an accuracy of 2% can be easily accomplished. This recalibration is necessary only when measurements are made at extreme temperatures or when wear is suspected.

This calorimeter is particularly recommended for field service where a rugged and yet accurate Power Meter is required for use by unskilled personnel.

Model	Power Rating	Connector	Max. VSWR	Water Supply	Price
CX-5	5 KW	1-5/8"	1.3	1.5 G.P.M.	$1050.00
CX-10	10 KW	3-1/8"	1.3	3 G.P.M.	1450.00
CX-20	23 KW	3-1/8"	1.3	6 G.P.M.	2250.00
CX-50	50 KW	6-1/8"	1.3	15 G.P.M.	4500.00

DIRECT READING
CALORIMETER BRIDGE



with Self-Contained Calorimeter Loads, Cooling System & Circulating System.

This Calorimeter is completely self-contained with its own circulating system, cooling system and the radio frequency dummy load and requires only connection to the regular power line. The R.F. power is read directly on a 4½" meter in watts. A single coaxial dummy load is available to cover the frequency range from DC to 10,000 Mc and for the power range from 1 to 1000 watts. The overall accuracy of this Calorimeter is 3%. However, this accuracy can be improved greatly by calibrating the Calorimeter by means of an external laboratory-type wattmeter.

Model	Range	Frequency	Price
CB-11	1 watt	DC-4 KMC	$900.00
CB-12	5 watts	"	900.00

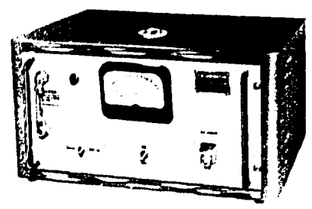
CBW-7	6000 watts	"	3000.00

DIRECT READING
Calorimetric Power Meter



These power meters are greatly simplified Calorimeters, which use an accurate metering pump of the gear type driven by an over-powered synchronous motor to keep the fluid flow constant. The instrument is fully self-contained, portable, self-cooled and requires only connection to the power line. It does not use any flow meters, thermometers or any other controls. There is only the "ON" & "OFF" switch for the operator to use on the front panel, when a measurement is to be made. A sensitive thermopile and microammeter measures the power dissipated in the R.F. load. The microammeter is calibrated in watts and is direct reading. These Calorimeters are available with either a coaxial or a waveguide load.

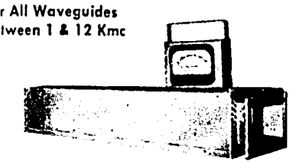
HI-POWER DIRECT READING
CALORIMETER

For All Waveguides Between 1 & 12 Kmc



This Calorimetric Power Meter consists of a Waveguide Thermopile Mount, a Microammeter and a blower to remove heat. The instrument is compact and is not much bigger than a Waveguide Waterload. It is extremely simple to operate. There are no controls, thermometers, flowmeters, heat exchanger or liquids. Reading time is approximately 1 minute and 1 minute between readings of different power levels. Accuracy is better than plus or minus 5%. The effect of ambient temperature changes between 60°F to 80°F is negligible.

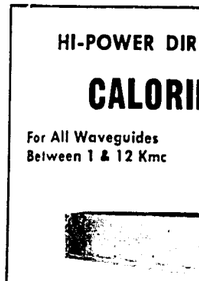
SEMICONDUCTOR LIFETIME MEASURING EQUIPMENT



Here is a reliable instrument for measuring lifetimes as short as one microsecond It is so designed as to accommodate large or small samples including cylindrical ingots. The light source consists of a non-inductive capacitor charged through a resistor by the variable high voltage supply to the firing voltage of the air gap between two electrodes. The resulting light flash is focused by a lens onto the sample holder. The lens is adjustable so that the light image can be brought to focus at any point. The sample holder will accommodate ingots from ¾ to 10-inches in length. Its adjustable fingers make pressure contact with the ends of the specimen. A trap lite and stray light shield is mounted on the bed of the sample holder. The adjustable bed has a full traveling range of 12-inches.

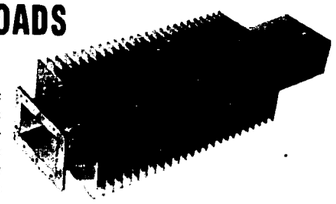
Semiconductor Lifetime Measuring Equipment, Model LM-1 .....$1250.00

Light Source with Variable Power Supply 15,000V .04 Mfd. 15,000V, Model LS-2 .....$1250.00

Light Source with Variable Power Supply 10,000V, Cabinet & Stand, .02 Mfd., Model LS-1 .....$850.00

HI-POWER DUMMY LOADS

A. WAVEGUIDE:



These Waveguide Dummy Loads are of the lossy wall type. They are designed to change microwave energy into heat which is removed by means of cooling fins into the adjoining air. A full line of such dummy loads is listed below. Lossy wall loads are superior to inguide loads because of the more efficient removal of the heat generated, and the highly reduced tendency toward pulse power breakdown. New construction shortens the path between the inner surface of the lossy guide and the cooling fins. The lossy material used in these loads absorbs only a minimum of moisture, is extremely durable, provides a strong adhesive bond to the metal walls and handles the thermal shock efficiently.

* P Indicates Pressurization

B. COAXIAL:

These R.F. Terminations are oil filled resistors, in which the oil is used as a dielectric and to carry the heat generated to cooling fins. At the rated power the heat dissipating housing is designed to keep the temperature of the oil below 250°F. No additional forced cooling is necessary up to 1500 watts. Above 1500 watts, additional cooling, such as water or forced air is necessary. These loads are housed in an expandable all metal housing. Neoprene diaphragms are not used.

MC Series *Halltron* MAGNETIC CIRCUIT

— operates with extreme linearity and low hysteresis

The MC-1 (illustrated) contains an Indium Arsenide Halltron mounted in a small air gap of an efficient magnetic circuit. This combination results in a high output voltage which is the product of two electrical inputs.

Special magnetic design, coupled with the low temperature coefficient of InAs, provide extreme linearity for either input quantity.

The magnetic circuit is optimized for DC and audio frequencies, while the Halltron input can be used from DC into the megacycle range. The MC-1 is 1⅝" wide (square base) and 2 5/16" high. Mumetal shielding minimizes interference.

Other MC units are available for higher outputs, greater efficiency or optimized parameters for specific applications.

MS-40 Series MAGNETORESISTOR

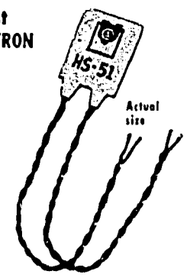
The FIRST magnetic field sensitive RESISTOR

Utilizes high-electron mobility indium antimonide.

A new SEMICONDUCTOR DEVICE in which the electrical resistance is a function of an applied MAGNETIC FIELD. Utilizes non-inductive design and "thinner-than-a-dime" construction. For use as: contactless potentiometers, amplifiers, E & I regulators, squaring devices, modulators, transducers, etc.

HS-50 Series *Halltron*

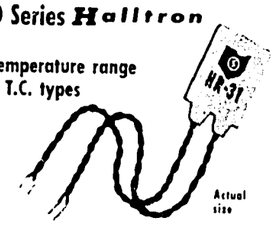
The FIRST and most widely used HALLTRON



Utilizes high efficiency indium antimonide for applications which require high levels of output power, high sensitivity and economical Hall-effect components and which do not need extreme linearities or elevated temperature operation.

HR-30 Series *Halltron*

Wide temperature range —low T.C. types



The HR-30 Series Halltron utilizes indium arsenide for low T.C. characteristics. For applications which require moderate output power levels, high sensitivities, good linearities with both current and magnetic field, wide temperature operating ranges and low T.C. of Hall-output voltages.

Semiconductor Materials: Electronic grades of the following compound semiconductor materials are available for thermoelectric, infrared and electronic applications. The materials are in polycrystalline and, in some cases, single crystal form. Other materials are available on request.

InSb	AlSb	CdTe	Ag_2Se	(In,Ga)As	In
InAs	Bi_2Te_3	InP	Ag_2S	Pb	Sb
GaAs	Bi_2Se_3	GaP	In(P,As)	Bi	
GaSb	PbTe	Ag_2Te	(In,Ga)Sb	Te	

THERMOELECTRICS: Devices and materials for thermoelectric heating, cooling and power generation — in a variety of configurations and capacities—are now in production. Send for information.

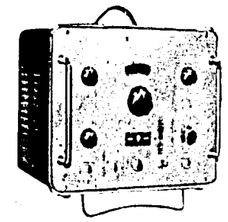
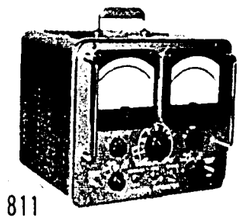
- Model L771B 950 to 2000 MC SEC
- Model S771B 1950 to 4000 MC SEC
- Model C772A 3950 to 8200 MC SEC
- Model X772A 7050 to 11,000 MC SEC
- Power Output 10-100 MW CW MAX into matched load. Variable through level set attenuator
- Modulation pulse, square wave both internal and external



811

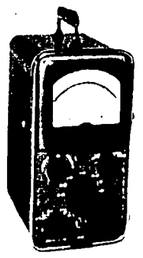
RATIO METER AND STANDING WAVE AMPLIFIER IN ONE COMPACT PACKAGE

- Two cycle Precision Laboratory VSWR reflectometer readings of 1.02 to [illegible] on only two scales
- VSWR DB and reflection coefficient scales eliminate conversion tables
- Full 70 DB standing wave amplification on expanded VSWR scales
- Crystal and bolometer operation



812

- A 3-inch removable meter with 1% linearity provides high resolution and accuracy
- A filter tunable between 950 and 1050 CPS aligns instrument with output frequency of signal source
- Range 70 DB in six decade steps. Normal and expanded scales for VSWR and DB
- Gain automatically maintained when switching from normal to expanded scales
- Detectors crystal or bolometer
- Full scale sensitivity 0.1 [illegible] V signal-to-noise ratio 3:1



831

- Power Range Full Scale
  - 20 DBM or 0.010 MW
  - 15 DBM or 0.030 MW
  - 10 DBM or 0.10 MW
  - 5 DBM or 0.30 MW
  - 0 DBM or 1.00 MW
  - 5 DBM or 3.00 MW
- Maximum possible accumulative error 5%
- FXR Series 218 Temperature Compensated Thermistor Head a required accessory

HIGH POWER PULSE MODULATORS

THE FXR standard or custom designed high-power pulse modulators will meet your most exacting requirements . . . advanced engineering and expert craftsmanship assure this.

IMPORTANT — Send for our PRELIMINARY QUESTIONNAIRE.

*High Power Modulator Model No.	Power (peak mega-watts)	Voltage (peak kilovolts)	Current (peak amps)	Duty Cycle	Pulse Width (μ sec)	Rep Rate (PPS)

MAXIMUM TELEMETERED RESPONSE THROUGH FLAT AMPLITUDE AND CONSTANT DELAY

In keeping with its reputation as a pioneer in the field of toroids, filters and related networks, Burnell & Co. now offers a complete line of low pass and band pass constant delay filters for standard RDB telemetering channels. These Burnell constant delay filters combine accurate amplitude and phase to effectively limit intelligence distortion and false transients to a minimum. Telemetered signals from off course missiles or those in distant or terminal flight are no longer blocked by attenuation and noise.

Amplitude and Phase Necessary

For maximum performance of telemetering systems, it is recognized that filtering of sampled data requires *both* linear phase and flat amplitude in the pass band. However, until recently a combination of the two in one unit had not been available.

Combination Achieved

Existing sub carrier discriminators afford no better than a choice of flat amplitude pass band with *non-linear* phase in one filter or a constant time delay filter with *distorted amplitude*. In contrast, Burnell constant delay filters combine both—are flat within 3 db over the pass band—1½ db for the low pass filters—and possess a time delay constant within 5%.

Write for Bulletin CD 051

TECHNICAL DATA

FOR ± 7½% PASS BAND
1 Flat within 3 db over pass band
2 21 db at ± 15% of center freq.
3 40 db at ± 22% of center freq.
4 Time delay over the pass band, constant to ± 5%

FOR ± 15% PASS BAND
1 Flat to 3 db over pass band
2 23 db at ± 30% of center freq.
3 40 db at ± 44% of center freq.
4 Time delay over pass band constant to ± 7%

Input impedance — 500 ohms
*Output impedance — 500 ohms and high impedance for operation to a grid
*optional impedance available on special order.

Where other materials fail our work begins...

The world's most NEARLY PERFECT electronic insulation materials.....

Whatever your high temperature needs—to 1550°F—there is a Mycalex insulation to meet them . . . each offering a *unique combination* of special advantages for electronic design: the *plus* factors of the inorganics *and* the design latitudes of the organics!

MYCALEX® glass-bonded mica—formulations of high quality natural mica and electrical grade glasses, with high dielectric strength, total dimensional stability, high arc resistance, high temperature resistance. Depending on their formulation, they can be machined or molded to exacting tolerances, inserts can be permanently molded in or cemented in—the thermal expansion of MYCALEX being close to that of stainless steel.

SUPRAMICA® ceramoplastics—advanced formulations of synthetic mica and high temperature glasses, created for insulation applications at operating temperatures up to 1550°F. They have a thermal expansion coefficient close to that of stainless steel. They are available in moldable or machinable types . . . both offering *total* dimensional stability.

SUPRAMICA 555—Precision-molded insulation, for operating temperatures to 700°F.

SUPRAMICA 560—Precision-molded insulation, for operating temperatures to 932°F. (500°C.)

MYCALEX 410—Precision-molded insulation, for operating temperatures to 600°F.

MYCALEX 410X—Lightweight precision-molded insulation material.

SUPRAMICA 500—Machinable insulation, for operating temperatures to 850°F.

SUPRAMICA 620—Machinable insulation, for operating temperatures to 1550°F.

MYCALEX 385—Machinable insulation, for operating temperatures to 700°F.

MYCALEX 400—Machinable insulation, for operating temperatures to 800°F.

General Offices and Plant: 125-B Clifton Blvd., Clifton, N. J.
Executive Offices: 30 Rockefeller Plaza, New York 20, N.Y.

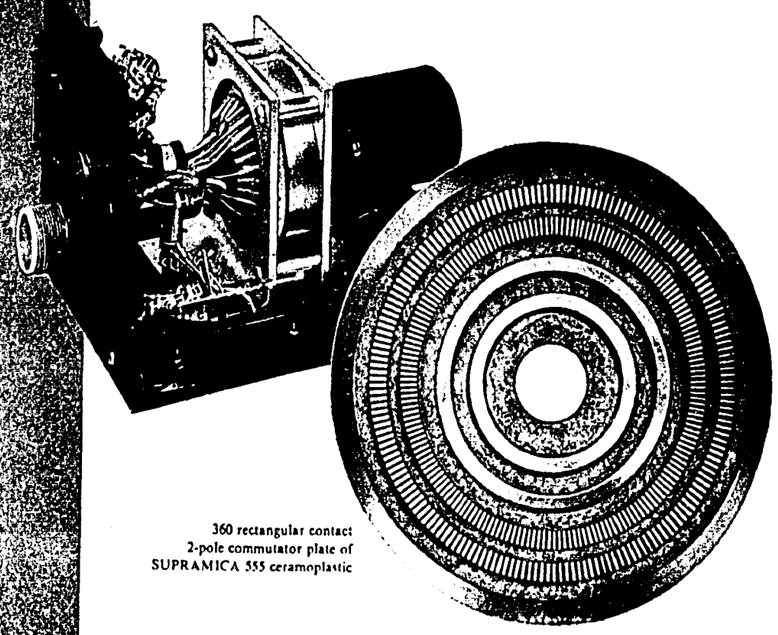
major advance in miniaturization:

SUPRAMICA® 555 commutator plates



360 rectangular contact 2-pole commutator plate of SUPRAMICA 555 ceramoplastic

on a 3 inch precision-molded plate ...up to 540 rectangular contacts!

Since 1948 . . . when Mycalex Electronics Corporation pioneered the first *precision-molded* MYCALEX® 410 glass-bonded mica, 180-contact commutator plate . . . MYCALEX switches have introduced a degree of accuracy and dependability never before approached in mechanical switching.

And now, Mycalex offers a *new* ceramoplastic commutator plate design destined to set *even higher* standards for long-life, low-noise-level multiplexing.

Typical of these new plates is the CP 427. Its specifications call for *precision-molded* SUPRAMICA 555 ceramoplastic which delivers total dimensional stability as well as superb thermal endurance (700°F.). The individual contacts of this plate have an exclusive *rectangular* form and embody tolerances within the .0005" range. They are permanently fixed in place.

An exclusive brush-holder design permits *lower pressures* on the wipers . . . gives *lower contact resistance* with a noise level of *less than 10 microvolts*. Brush bounce is eliminated and life greatly extended. MYCALEX switches using this type of design have been tested satisfactorily for over 1000 hours at 600 RPM without maintenance.

Information on complete MYCALEX switches or matched brush assemblies and plates is available.

General Offices and Plant: 125-B Clifton Blvd., Clifton, N. J.
Executive Offices: 30 Rockefeller Plaza, New York 20, N.Y.

ALITE

Bulletin

NEW CERAMIC-TO-METAL SEALS CATALOG JUST OUT—This 16-page bulletin contains complete information and detailed specifications on the industry's broadest standard line of hermetic bushings. Gives important performance data on ALITE High Alumina Ceramic —complete details on Alite's electrical properties, mechanical strength, temperature resistance, etc. Facts on over 100 standard sizes of high voltage terminals, feed-throughs, cable end seals, plus helpful information on special applications.

You'll want to have this catalog handy when ordering standard terminals, or when requesting quotations or engineering assistance on special ceramic-metal assemblies. Let us put a free copy on your desk. *Write today for Bulletin A-40.*

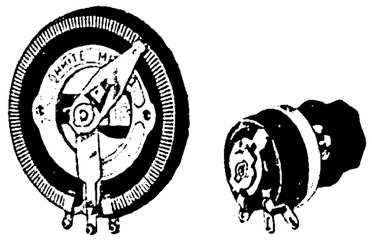
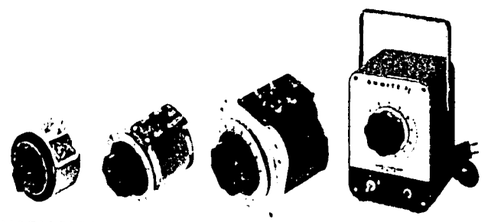
INDUSTRY-PREFERRED COMPONENTS

catalog and engineering manual 58

Long life and dependability are synonymous with the name Ohmite. When you specify Ohmite components . . . you build reliability into your product. This reliability is backed by Ohmite's continuing research programs which explore new product ideas, improve present products, and develop more efficient manufacturing processes. All this plus the fact that Ohmite is the world's leading specialist in the manufacture of power-type resistance components—high quality rheostats and wire-wound resistors in the most complete range of sizes and types available to industry. Reliability is also characteristic of Ohmite tap switches, precision wire-wound resistors, metal film resistors, general-purpose relays, variable transformers, subminiature tantalum capacitors, and R. F. chokes.



RHEOSTATS Complete range of vitreous-enameled, close control, power rheostats from 12½ to 1000 watts. Single or tandem. Many additional features. Also available to meet MIL-R-22A requirements. All sizes from stock in a wide range of resistance values.



VARIABLE TRANSFORMERS Newly expanded line of six basic models with current ratings that meet a large percentage of industrial applications. Includes *enclosed units and tandem assemblies*. Two models, VT2 and VT4, offer capacity greater than competitive units of comparable size and price. A sizeable "bonus", in current is given in all sizes when the overvoltage feature is not required ("N" suffix, see below).

Advanced Features—Positive current transfer achieved with direct brush to slip-ring, pigtail connection; table or panel mounting on Models VT4 and VT8 (adjustable shaft moves to brush or base side); interchangeable with other popular types both electrically and "mounting-wise"; rhodium plating on brush track for longer life.

Specials—Shafts for nonstandard panel thicknesses, auxiliary switches, taps on transformer winding for fixed intermediate voltages, and motor drives for remote control or servo-operation.

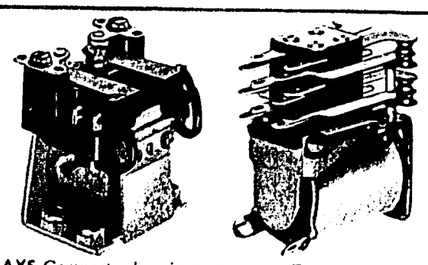
Basic Models (with overvoltage) All inputs 120 v ac*

MODEL VT2	MODEL VT4	MODEL VT8
Volts output: 0-120/132	Volts output: 0-120/140	Volts output: 0-120/140
Amps output: 1.5	Amps output: 3.5	Amps output: 7.5

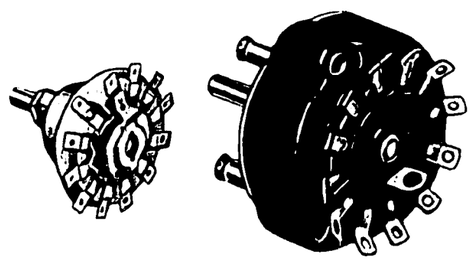
Basic Models (without overvoltage) All inputs 120 v ac*

MODEL VT2N	MODEL VT4N	MODEL VT8N
Volts output: 0-120	Volts output: 0-120	Volts output: 0-120
Amps output: 1.8	Amps output: 4.75	Amps output: 10.0

*Units available for 240-volt input also

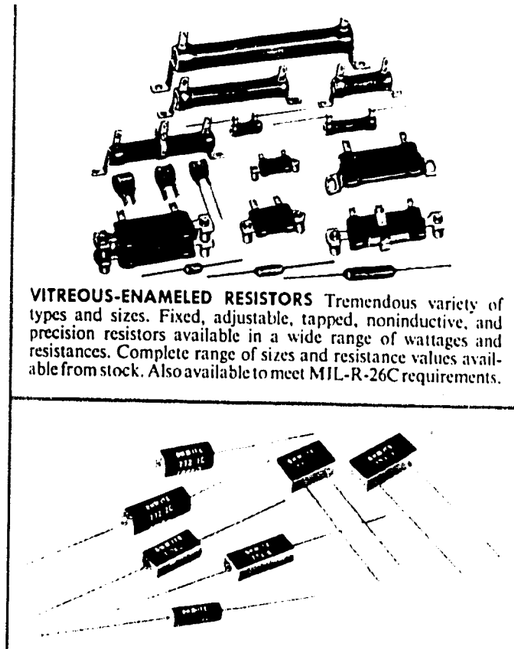


RELAYS Compact relays in many types. For a.c. or d.c., in a wide range of contact combinations and coil voltages. Four stock models in 65 types. Also nine standard types promptly made to order. Available in hermetically sealed or dust-protective enclosures. Models TT and TS relays, with "molded module" contact springs, are designed to meet MIL-R-5757C and MIL-R-6106C respectively.

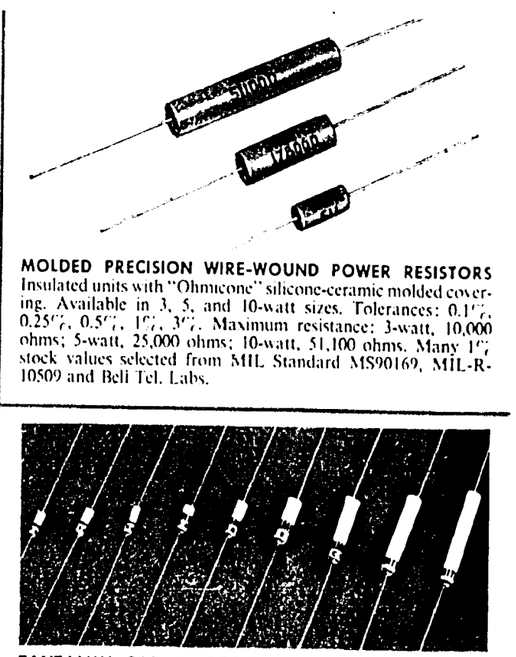


TAP SWITCHES Ceramic insulated, rotary selector switches for a-c use. High-current, silver-to-silver contacts. Single or tandem. Five sizes: 100, 50, 25, 15, and 10 amperes available from stock.

For details, circle #106 on Reader Service Card

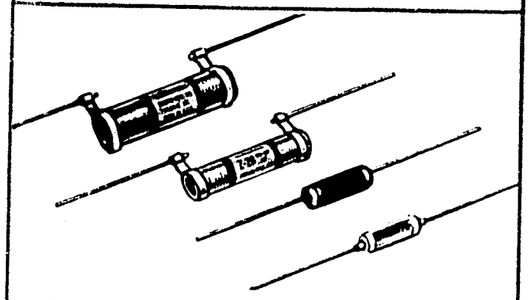


VITREOUS-ENAMELED RESISTORS Tremendous variety of types and sizes. Fixed, adjustable, tapped, noninductive, and precision resistors available in a wide range of wattages and resistances. Complete range of sizes and resistance values available from stock. Also available to meet MIL-R-26C requirements.



MOLDED PRECISION WIRE-WOUND POWER RESISTORS Insulated units with "Ohmicone" silicone-ceramic molded covering. Available in 3, 5, and 10-watt sizes. Tolerances: 0.1%, 0.25%, 0.5%, 1%, 3%. Maximum resistance: 3-watt, 10,000 ohms; 5-watt, 25,000 ohms; 10-watt, 51,100 ohms. Many 1% stock values selected from MIL Standard MS90169, MIL-R-10509 and Bell Tel. Labs.

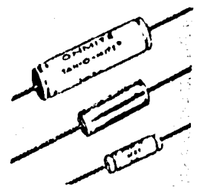
METAL FILM PRECISION RESISTORS Wattage ratings at 125°C and 150°C ambient; excellent high frequency characteristics; low temperature coefficient of resistance. Long-term load and shelf stability. Styles to meet MIL-R-10509C and MIL-R-19074B (Ships). Many 1% stock values selected from MIL Standard MS90169, MIL-R-10509 and Bell Tel. Labs.



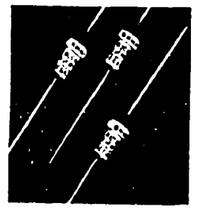
R. F. CHOKES Radio-frequency chokes in seven stock sizes for 3 to 520 megacycle applications. Single-layer wound. Other single-layer chokes and vitreous-enameled chokes can be made to order.

For details, circle #107 on Reader Service Card

TANTALUM CAPACITORS Series TW (tantalum wire capacitors) available in eleven subminiature sizes; .01 to 80 mfd. over-all capacitance range. Smallest size .062 x .20 inch; largest .134 x .812 inch. Insulated units standard. Working voltages to 150 volts. Wide range of stock sizes, capacitance values, and voltage ratings.



Series TF (tantalum foil capacitors) available in three sizes; .25 to 140 mfd. over-all capacitance range. Working voltage to 150 volts. For −55°C to +85°C operation. Available in polar and nonpolar units. Available for vibration ranges 0-55 and 0-2000 cps. Meets MIL-C-3965B. Styles CL-34 and CL-35. Wide range of stock units in polar type.



Series TS (tantalum, porous, slug-type capacitors) size "U" offers a range of 1.75 to 30 mfd. Working voltages to 125 are available. Design and construction meet MIL-C-3965B Grade 3. Two operating temperature ranges, −55°C to +85°C (Style UB) and −55°C to +125°C (Style UC). New Style SUB, *straight side type*, available in temperature range −55°C to + 85°C. All styles carried in stock.

RELAYS SWITCHES

AUTOMATIC ELECTRIC

AE RELAYS

	SERIES	OPERATING TIME, SECONDS	RELEASE TIME, SECONDS
CLASS B When extremely long service and reliable operation are demanded, this relay meets the requirements. Life often exceeds 400 million operations. Ideal for computers, fire control, pulsing or switching functions.	BQA	0.002-0.030	0.005-0.050
	BSO	0.040-0.120	0.025-0.350
	BSR	0.004-0.035	0.035-0.600
	BSA	0.020-0.055	0.035-0.600
	BFA	0.010-0.025	0.008-0.020
	BMS	0.010-0.030	0.015-0.050
CLASS E A new telephone-type relay, designed for long-life industrial service. Based on the rugged Class B design, this is a universal relay, engineered for a variety of uses demanding compact size coupled with our usual high standard of reliability.	EQA	0.002-0.030	0.005-0.025
	ESO	0.015-0.050	0.025-0.125
	ESR	0.005-0.030	0.025-0.125
	ESA	0.015-0.030	0.050-0.125
	EFA	0.005-0.025	0.005-0.025
	EMS	0.010-0.030	0.015-0.030
 **CLASS A** This original telephone-type relay will hold down costs, yet provide dependable operation and long life. A wide variety of coils, contacts, contact spring arrangements and mounting facilities makes this truly the "all-purpose" relay.	AQA	0.002-0.025	0.005-0.025
	ASO	0.040-0.120	0.020-0.250
	ASR	0.004-0.025	0.020-0.350
	ASA	0.010-0.050	0.020-0.350
	AWS	††Up to 2	0.005-0.025
	AVR	0.002-0.025	††1 to 15
	AMC	0.210-0.280	0.300-0.345
 **CLASS C** This compact relay combines unusual dependability and surprisingly long service life in a space about half of the size of the average relay of equal rating. Can be used for high-speed or delayed operation.	CQA	0.005-0.035	0.005-0.025
	CSA	0.010-0.040	0.015-0.200
	CMS	0.010-0.035	0.010-0.050
 **CLASS S** Specify this relay for aircraft use, where a small, light relay is required, resistant to shock and vibration. It features fast pulse response because of its small mass and slight self-inductance. Series SQPC available for printed circuits.	SQA	0.002-0.016	0.005-0.085
	SQD	0.002-0.030	0.005-0.085
	SQPC	0.002-0.030	0.005-0.085
	S-Power	0.005-0.016	0.005-0.010
 **CLASS Z** Choose Class Z relays where a small, light relay is needed but long life or time delay is of greater importance than extremely small size. Similar to Class A relay, but smaller and less sensitive.	ZQA	0.002-0.025	0.005-0.025
	ZSO	0.010-0.050	0.050-0.150
	ZSR	0.003-0.010	0.050-0.200
	ZSA	0.010-0.040	0.050-0.200
	ZMS	0.010-0.040	0.005-0.200
	ZFA	0.010-0.025	0.008-0.020
	Type 18	0.002-0.025	0.005-0.025
CLASS F An a.c. relay, for use when the number of relays doesn't justify a rectifier, and when operate and release time delays are not a factor. When operate and release timing is required, an inexpensive rectifier can be used with any of the above d.c. relays.	FQA	0.002-0.025	0.005-0.040
	BFA	0.010-0.025	0.008-0.020
	EFA	0.005-0.025	0.005-0.025
	FMS	0.002-0.020	0.002-0.020
	FMC	0.298-0.333	0.290-0.350
	ZFA	0.010-0.025	0.008-0.020
 **POLARIZED** Series PHD and PLD offer "2-position" or "3-position" operation; Series PTW provides "2-position" only. "2-position" relays "stick" operated until current is reversed; "3-position" have neutral position in absence of current.	PLD	0.003-0.010	0.022-0.047
	PHD	0.006-0.027	0.065-0.075
	PTW****	0.007 Minimum	0.0002 Approx. Travel Time
SPECIAL PURPOSE—We can usually make assemblies of Automatic Electric relays with modifications to suit your special applications. The Class E Video relay, illustrated here, is an example. Others are designed for power applications, electro-mechanical interlocking, marginal operation, mechanical locking, micrometer adjusting, and the simultaneous closing of up to 35 circuits (BAR relay).			

AE STEPPING SWITCHES

FAST STEPPING, SMOOTH RUNNING, POSITIVE STEPPING

TYPE 44

The Type 44 is a small switch with a large, flexible capacity. Use this switch in almost any d.c. application—for impulse controlled response or self-interrupted operation. Though it's only slightly larger than a pack of king-size cigarettes, the Type 44 rotary stepping switch accommodates up to six 10-point bank levels.

TYPE 45

In every feature of its design, the Type 45 rotary stepping switch provides for adaptation to varied requirements, including a.c. operation. The one-piece, open-type flat frame occupies only one side of this switch, so the 25-point contact banks can be built up level by level as needed, up to twelve.

SERIES OCS RELAY

Here's a shock-resistant relay which can be used for cam-switching...for alternate on-off operations...or as a "stepper." When you order Automatic Electric's OCS relay, you specify the programming. This compact unit simplifies engineering and wiring—cuts space, weight and maintenance costs.

PTW****		1 Form C	TungstenCarbide or Palladium	14 oz.	2-7/8x2-1/4x3-5/16

*More contacts can be used at a sacrifice of speed.
**Up to 0.600 sec. release time on BSO relay with 6 springs max.
***With 1 snap-action switch and 1 contact assembly (8 springs max.)
****Octal or pin-type plug (to fit WE Co. 255 applications) available.
†Higher wattage obtainable with oversize coils.
††Timing value in conjunction with a Series ASO relay.
†††Most relays can be furnished with special heavy-duty contacts.

Automatic Electric, pioneer in the use of telephone-type relays for industry, has the experience, reputation, manufacturing facilities, research staff, and down-to-earth, practical "know how" to solve your knottiest control problem. We specialize in the hermetic sealing of relays and switches, as well as in the design, circuitry and assembly of industrial control "packages" and systems. Our representative and facilities are at your command.

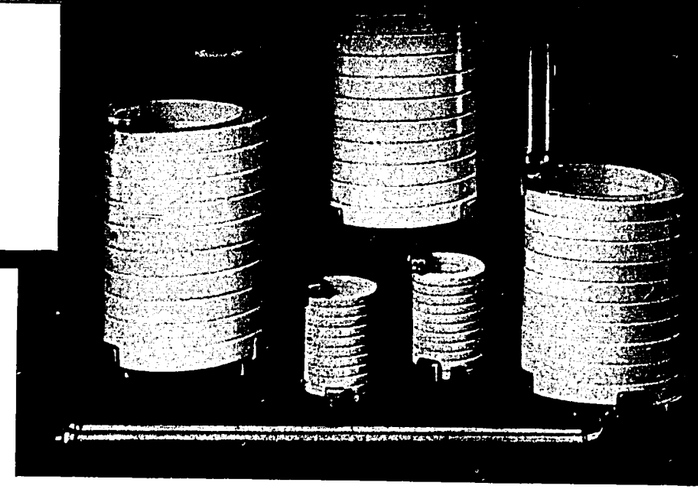
TUBE SUPPORTS
for air-cooled tubes

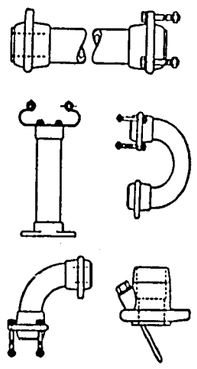
No longer is it necessary for equipment manufacturers to design supports for forced-air-cooled tubes. After producing many such special designs, Lapp has engineered and built a complete series of insulating supports for air-cooled tubes. Use of these supports facilitates design of transmitter and other high-power circuits. Simple, compact, efficient and attractive in appearance, in porcelain or steatite, they make for economical production, easy interchangeability, and availability of replacement units. Write for Bulletin 301, with complete description and specification data.

For details, circle #112 on Reader Service Card



INSULATION FOR WATER-COOLED SYSTEMS

For carrying cooling water which must undergo a change in potential, use of Lapp porcelain eliminates troubles arising from water contamination and conductivity, sludging and electrolytic attack of fittings. Permanent cleanness and high resistance of cooling water is assured—for positive cooling and long tube life.



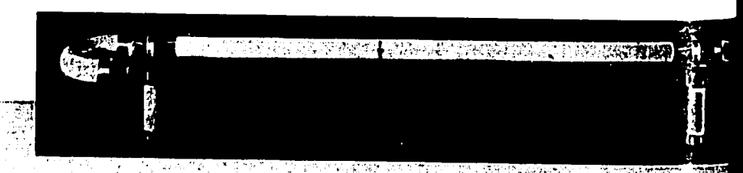
LAPP PORCELAIN WATER COILS

Twin-hole and single-hole models in sizes to provide flow of cooling water from 2 to 90 gallons per minute. Cast aluminum mounting bases, lead pipe or flexible metal hose for attachment.

LAPP PORCELAIN PIPE

Inside diameters ¾″ to 3″, in straight, 90° and 180° elbows, fittings. Swivel-type connections. Standoff insulators attach directly to fitting bolts.

Write for Bulletin 301 with specifications for Lapp Porcelain Water Coils and Porcelain Pipe.



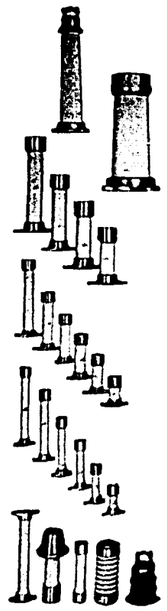
ENTRANCE INSULATORS

To eliminate losses which occur in ordinary types of bushings at radio frequency, Lapp units use air as major insulation, porcelain path being lengthened by its "bowl" shape. In wide variety of types for most electrical and mechanical requirements.

STAND-OFF INSULATORS

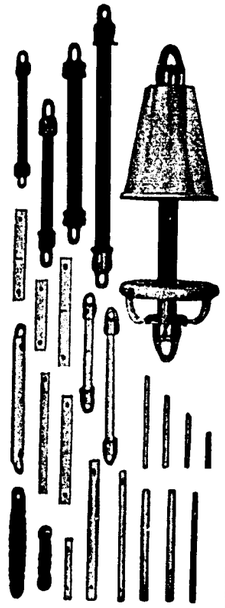
Dependable mechanical and electrical performance—and trim good looks. Hundreds of standard and special types available.

Write for Bulletin 301, listing entrance and stand-off insulators.

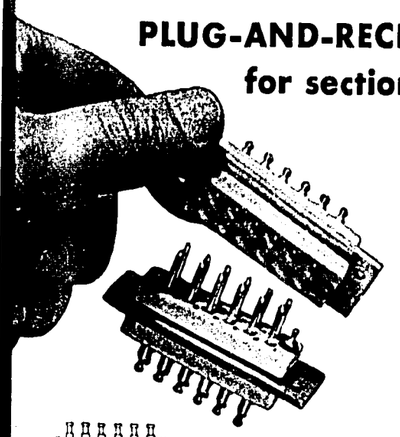


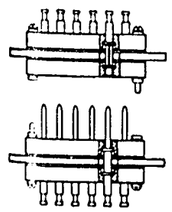
ANTENNA STRAIN INSULATORS

The largest of the porcelain rod insulators shown develops 12,000 lb. strength. Available, as specified, with rain shield and/or corona rings. Smaller units, in porcelain or steatite, for all strain or spreader use. Engineering and production facilities also available for special performance units See catalog 301.



PLUG-AND-RECEPTACLE UNITS
for sectionalizing circuits



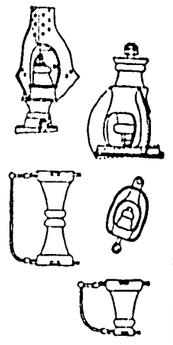


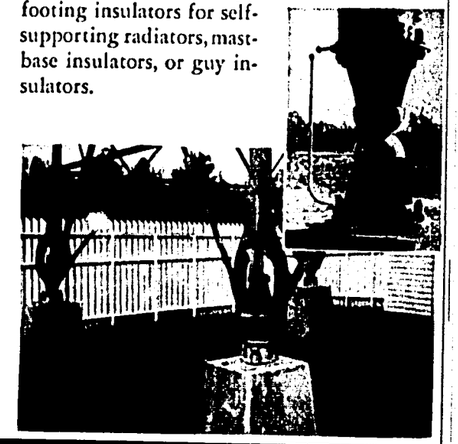
For panel-rack or other sectionalized circuits, Lapp offers a variety of plug-and-receptacle units. Any number of contacts can be provided (in multiples of twelve). Male and female contacts are full floating, for easy alignment and positive contact. Contacts silver plated, terminals tinned for soldering. Insulation is steatite, the low-loss ceramic . . . non-carbonizing even under leakage flashover resulting from contamination, moisture or humidity. Write for complete electrical and mechanical specifications and recommendations.

For details, circle #113 on Reader Service Card

ANTENNA TOWER INSULATORS

Most of the world's radio towers are supported by Lapp insulators, including the tallest guyed mast ever built. Through the Lapp "compression cone," immense loads can be carried by electrical porcelain. Write for data on Lapp footing insulators for self-supporting radiators, mast-base insulators, or guy insulators.





LAPP GAS-FILLED CONDENSERS
Capacitance for high-voltage, high-current duty

The record of more than 18 years' service, in thousands of installations, proves the reliability of the Lapp Gas-Filled Condenser. For duty at high voltages and high currents, this unit offers the advantages of extreme compactness . . . low loss . . . high safety factor . . . constant capacitance under temperature variation . . . grounded tuning shaft . . . and rugged sturdiness. Units available in four tank diameters, 7″ to 18″ . . . in fixed or variable capacitance . . . capacitances to 30,000 mmf; current ratings to 390 amps at 1 mc; voltages to 85 Kv peak. Write for Bulletin 302.

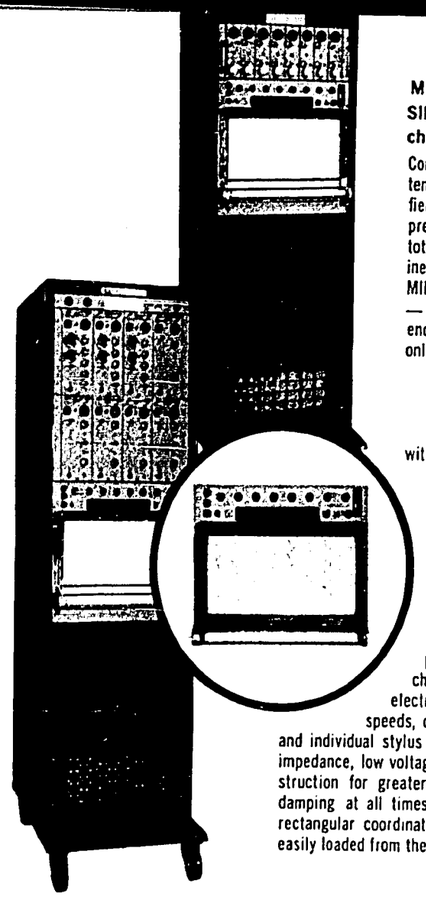
SPECIAL ASSEMBLIES

Lapp business is electrical porcelain, its application, design, manufacture, and assembly. Our skill is in our knowledge of the capabilities, and limitations, of ceramic insulation . . . in engineering ingenuity to meet specified requirements . . . and in efficient production. If you have need for insulating parts and associated sub-assemblies, we may be able to show you how they can be made most economically, to perform most efficiently.

Lapp

LAPP INSULATOR CO., INC.
RADIO SPECIALTIES DIVISION
150 SUMNER ST., LEROY, N. Y.

VERSATILE, RELIABLE RECORDING INSTRUMENTATION FROM SANBORN



MAXIMUM PERFORMANCE VERSATILITY — 6 or 8 channels, DC to 150 cps

Linearity 0.5%, 3 db down at 150 cps (10 div peak-to-peak amplitude). Improved current feedback power amplifiers, negligible drift. Total panel space only 38½". Efficient ducted air system assures constant, adequate cooling of all circuits for reliable operation.

VERSATILE "350" SERIES PREAMPS — compact (10½" high) interchangeable units with highly developed circuitry; for use in "350" systems, or individually (see "450" unit Amplifiers) with its own power supply to drive optical recorders, tape recorders, 'scopes, meters, etc. Available types include

- Carrier
- DC Coupling
- Phase Sensitive Demodulator
- True Differential Wide Band DC (4 models)
- Basic Chopper

with others in development

MINIMUM PANEL SPACE, SIMPLER PREAMPS — 6 or 8 channels, DC to 150 cps

Comparable performance to "350" System; uses same Recorder-Power Amplifier unit. Modules of up to 8 plug-in preamps occupy 7" of panel space; total panel space only 28" (max.); cabinet 60" high.

MINIATURIZED "850" SERIES PREAMPS — simplified, economical plug-in front ends for "850" systems; panel area only 2 1/16" x 7". Types include

- Carrier (separate MOPA required)
- Phase Sensitive Demodulator
- DC Coupling
- Basic Chopper (MOPA required)

with others in development

BASIC "350"/"850" 6- and 8-CHANNEL RECORDER-AMPLIFIER UNITS

6- or 8-channel recorder with transistorized, current feedback Power Amplifiers and voltage regulated power supply. Sensitivity 0.1 volt/chart div; panel space 17½"; nine electrically controlled pushbutton chart speeds, or remote control; automatic over-all and individual stylus heat control; time-code marker; low impedance, low voltage galvanometers with enclosed construction for greater reliability; true velocity feedback damping at all times, limiting ahead of output. Inkless, rectangular coordinate recording on Permapaper charts, easily loaded from the front.

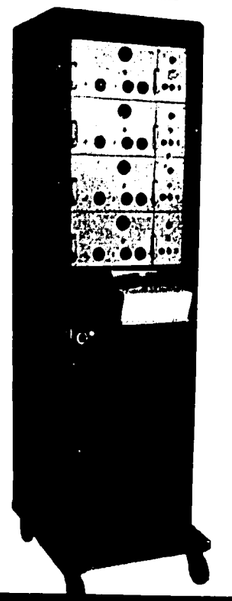
VERSATILE, ECONOMICAL — 1 to 8 channels DC to 100 cps

Twelve front ends cover the widest variety of applications. Frequency response 2 db down at 100 cps; over-all linearity better than 1%; basic sensitivity from 10 μv/div to 0.1 volt/div, depending on preamplifier. Current feedback driver amplifier and regulated power supply for each channel; amplifiers, recorder available in individual portable cases.

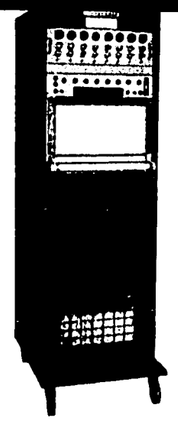
1- to 8-CHANNEL "150" SERIES RECORDERS Nine chart speeds (multi-channel types), shifted mechanically; automatic over-all and individual stylus heat control; recorder assembly slides out for easy paper loading, better view of recording and marking notations on record; time-code marker; paper take-up; inkless, rectangular coordinate recording on Permapaper charts.

FAMILIAR "150" SYSTEM FRONT ENDS — feature wide choice of types, plug-in design; all have attenuator ratios of 1, 2, 5, 10 . . . to 1000, many have calibrated zero suppression.

- AC-DC
- Carrier
- Servo Monitor (phase-sensitive demodulator)
- DC Coupling
- Log-Audio
- Low Level
- Stabilized DC
- AC Wattmeter
- RMS Volt/Ammeter
- 400 Cycle Frequency Deviation
- Frequency Meter
- Triplexer 3-channel electronic switch



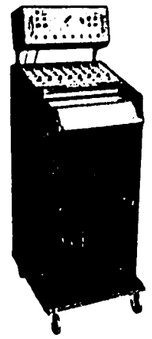
For details, circle #114 on Reader Service Card



when preamplification is not needed —

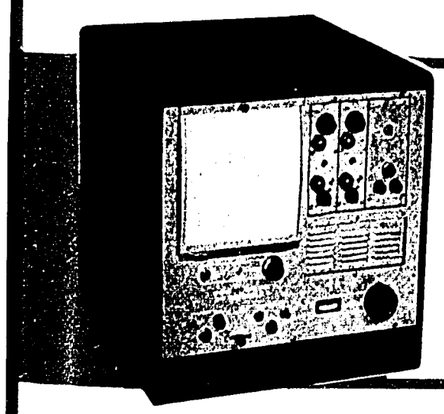
SIMPLIFIED 6- or 8-CHANNEL SYSTEM — 5 volts full-scale

Model 358-5480 system for computer readout, telemetry recording, DC voltage monitoring and similar applications requiring no preamplification. Control panel provides position, smooth gain and attenuation controls, and internal calibration signal. Sensitivity 0.1 volt/div; linearity 0.5% of full scale, gain stability better than 1%; current feedback amplifiers, velocity feedback damping; 9 electrically controlled chart speeds and all other "350" Recorder features.



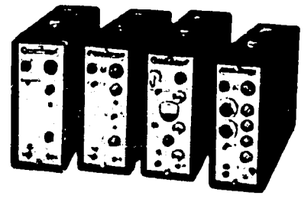
"150" SYSTEM AND PROGRAMMER FOR COMPUTER READOUT

6- or 8-channel consoles in 46½" high mobile cabinet. Dual-Channel DC Amplifiers have sensitivities from 0.01 to 10 volts/div; internal calibration 2 volts ± 1%; frequency response flat to 20 cps down 3 db at 50 cycles. Optional Programmer sequences system operation in 20 steps including recorder turn-on, calibration, computer DC level reading, recording for pre-set time, turn-off and reset.



HIGH SPEED OPTICAL X-Y RECORDER — flat response to 100 cps, writing speeds to 2500"/sec.

Can record such rapidly changing variables as acceleration and vibration of mechanical elements, transistor characteristics, etc. Mirror-galvanometers and a light beam produce recording traces on ultraviolet-sensitive 8" x 8" direct-print paper that develops immediately by exposure to normal room light. Interchangeable "850" system preamplifiers are used for each axis; new preamps and time base generator now in development allow a wide variety of applications.



SELF-CONTAINED "450" UNIT AMPLIFIERS with power supply

Versatile "350" Series preamplifiers with individual power supplies in portable cases; for driving 'scopes, optical oscillographs, tape recorders, etc. Available in "450" cases or four-unit modules in 19" frame for rack mounting. One "450" case and power supply can serve any "350" preamp.

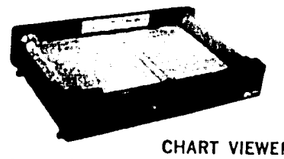


CHART VIEWER for easier editing and study

Permits convenient viewing and interpretation of Sanborn and other strip charts up to 200 ft. long and 16" wide, at continuously variable speeds from ¼" to 7½" per second. Single control for direction and paper speed. Viewing table 18½" x 24".

LINEAR MOTION TRANSDUCERS

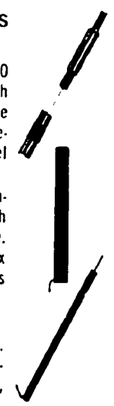
. . . to measure displacement

PROBE STYLE — complete, ready to connect to 150, 350 or 850 Series Carrier Amplifiers; uses differential transformer. High sensitivity, unlimited resolution, linearity 0.5%; stroke range 0.050", sensitivity 50 chart div deflection/0.001" displacement. Model 580 for flange mounting has plug-in cable, Model 581 for screw mounting has integral cable.

LINEARSYN — differential transformer; error due to nonlinearity less than 1% of full scale; unlimited resolution. High shock, vibration resistance; hermetically sealed, immersible. Strokes from ±0.005" to ±10.000"; high sensitivities. Six standard series (three shielded, three unshielded), five models in each series.

. . . to measure velocity

LVsyn — accurate, stable calibration; unlimited resolution. Single-ended or push-pull output. Strokes to 9"; output sensitivities from 35 to 650 mv/inch/sec. Twelve standard Models, with regular or unbreakable cores.



For details, circle #115 on Reader Service Card

Other Sanborn precision instruments include . . .

Individual Recording Galvanometers, Power Amplifiers, Recording Assemblies . . . Servo Monitor Phase Shifters . . . Event Recorders, 4 to 32 channels . . . Monitor Meter . . . Wide Band Driver Amplifier . . . Master Slave Control . . . Pressure Transducers.

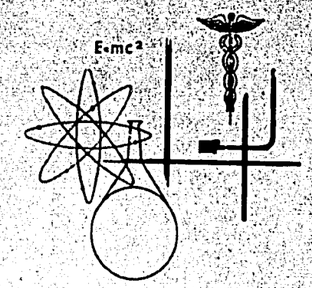
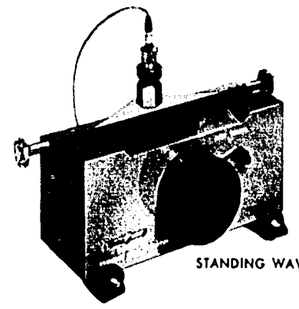
140 KMC

ULTRAMICROWAVE® EQUIPMENT BY

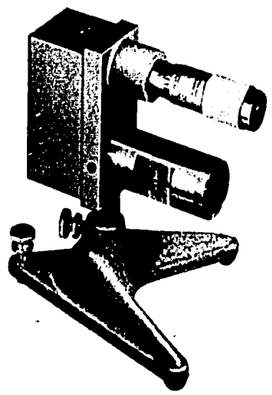


—it works—it's accurate—it's available

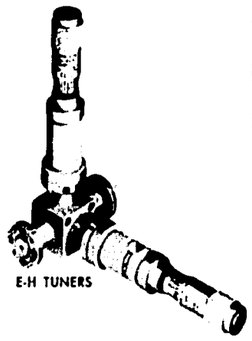


STANDING WAVE DETECTORS

CRYSTAL MOUNTS



CAVITY WAVEMETERS



E-H TUNERS

Recent advances in physical research have created an interest in the highest attainable microwave frequencies—an interest which requires the use of millimeter wave components and instruments beyond the scope of those currently available. Just as in 1954, when De Mornay-Bonardi was the first to offer commercially available instruments and components of A and B sizes (50-90 KMC), now for first time D-B offers instruments and components for the W size—90 to 140 KMC. These units truly represent a major breakthru in the microwave art, and can greatly enlarge your scope of microwave activity.

C-A-C®

A Subsidiary of Collins Radio

As designers and manufacturers of inductor components and related inductor assemblies, Communication Accessories Company works constantly toward three major objectives which are prime requisites to sound business and sturdy growth:

1. To produce the best products
2. To provide the best service
3. To keep a realistic price structure

To accomplish these objectives, C-A-C has built an ultra modern and functional 56,000 square foot production and office building where provisions for employee comfort and efficiency are a part of the architecture.

C-A-C's staff of engineers and sales representatives has been so selected as to make these goals actualities. In fact, C-A-C's entire personnel functions as a tool to provide you with the utmost in good service.

C-A-C's products, constructed from the best available components, assure maintenance-free operation at peak performance. Your operational costs are reduced when you make use of C-A-C components. We welcome your requests for information, products or assistance. For further product detail, send for our latest catalog.

COMMUNICATION ACCESSORIES COMPANY

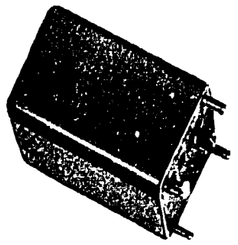
LAMINATED TRANSFORMERS and REACTORS

Transformers For Transistor and Tube Circuits



POWER TRANSFORMERS
Std. to MIL-T-27A, Class S
Also Class T to 200° C Amb.

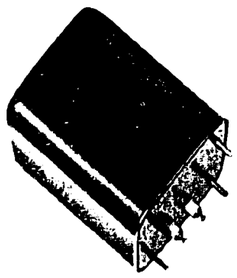
Inquire about our new series of transformers specifically designed for modern aircraft equipments. They employ outputs of medium range plate voltage at high currents and special outputs to supply transistor circuits.

Hermetically Sealed, Built per MIL-T-27A, Grade 4, Class S (85°C Ambient, 45°C Rise). Life expectancy X (10,000 hours minimum). Maximum operating altitude, 70,000 feet

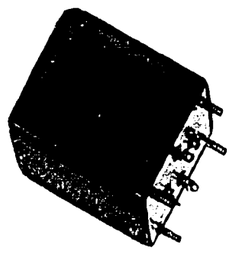
DC to DC Converter Saturable Transformers and Separate Switching Transformers with non-saturable power transformers also available.

Many standard units carried in stock.

Transformers and Chokes available from 50 CPS to 15 KC.



FILTER REACTORS



FILAMENT TRANSFORMERS
380-1000 Cycles
105/115/125 Volt Primaries

TOROIDS (REGULAR)

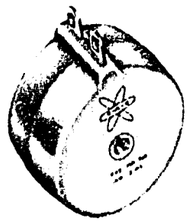
OPEN COIL
(TYPE QL)

CORE TYPE 206. Excellent Q characteristics especially for portable and airborne equipments. Best from 1 KC to 20 KC. Q to 140. Inductance from 5 MH to 3 HY.

CORE TYPE 848. Same physical size as the 206. Lower permeability for use from 2 KC to 100 KC. Q to 190. Inductance from 2 MH to 500 MH.

CORE TYPE 930. High Q for high power level and stability with slight increase in weight and volume. Frequency .5 KC to 10 KC. Q to 160. Inductance from 5 MH to 17.5 HY.

CORE TYPE 395. Same physical size as 930. Lower permeability for use from 1 KC to 50 KC. Exceptional high Q to 225. Inductance from 5 MH to 500 MH.



MOLDED PLASTIC
(TYPE MP)

CORE TYPE 254. Exceptional Q below 5 KC. For critical filters, oscillators and tuned transformers. Sharp characteristics and highest power capabilities Q to 205. Inductance from 20 MH to 36 HY.

CORE TYPE 715. Used below 2.5 KC where higher Q is important. Best in high level networks where stability versus voltage is a factor. Q to 250. Inductance from 20 MH to 60 HY.

HERMETICALLY SEALED
(TYPE HS)

Special core types in a variety of permeabilities and sizes, including temperature stabilized, are available on request. Many in stock.

For details, circle #122 on Reader Service Card

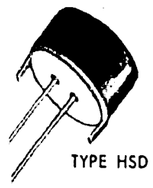
SUB-MINIATURE TOROIDS

TYPE QLS

Basic Inductor Component with flex leads. Wax impregnated units standard. Plain or plastic dipped on special order. Q valves from 12 to 190 over a frequency range of 1 KC to 5 MC. Maximum 4 HY inductance.

TYPE MPF

Hi-temp polyester resin molding compound. Tinned brass terminals. 3-48 tapped center bushing easily stacked. Special versions available for 350° F. application.



TYPE HSD

Optimum case size for printed circuit applications with mounting tabs. Hermetically sealed compression glass header. Available with four leads for tapped coils.

CORE TYPE 050 from 5.0 MH to 3.0 HY
For Freq. up to 15 KC.

CORE TYPE 051 from 1.0 MH to 500 MH
For Freq. up to 100 KC.

CORE TYPE 054 from .05 MH to 10 MH
For Freq. up to 5 MC.

THIS SERIES NOT AVAILABLE WITH TEMPERATURE STABILIZATION

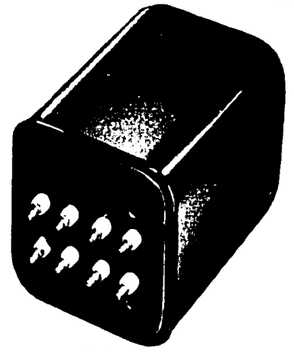
MAGNETIC AMPLIFIERS SATURABLE REACTORS PRECISION TRANSFORMERS



We build saturable transformers for 2-phase servo motors, missile control and other automatic control devices in a wide variety of types. Frequency, 60 CPS to 15 KC. Also complete magnetic amplifiers and Special Mag Amp devices.

Built to MIL-T-27A
Grade 4, Class R, Life X
Altitude to 50,000 Feet (or you name it!)

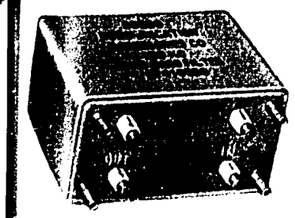
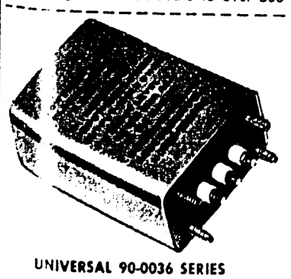
FILTERS



100 KC BAND PASS FILTER

BAND PASS

LC filters utilizing high Q toroidal inductors, high quality capacitors, impedence transformations, near unity coupling and other applications of advanced network theory resulting in high performance units in small volume packages. C-A-C filters range from sub-audio to over 500 KC.



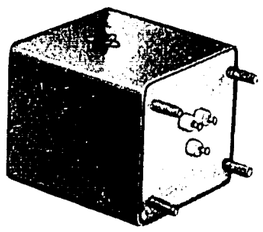
UNIVERSAL 90-0036 SERIES
40 CPS to 50 KC

LOW PASS

All the wide variety of C-A-C Low Pass Filters are built to military specifications. Temperature: —40°C to +85°C for a pass band tolerance of ± 1 db.

BAND REJECTION AND HIGH PASS FILTERS ALSO AVAILABLE

TELEGRAPH TONE FILTERS and NETWORKS



HERMETICALLY SEALED
170 Cycle Spacing

Transmit Filters, 90-057- Series
Receive Filters, 90-0573 Series
Center Frequency from 425 CPS to 3315 CPS.

C-A-C produces many types of telegraph filters with a variety of channel spacing—120 Cycle, 150 Cycle, 85 Cycle and others. Also Oscillators, Discriminators and Translation Filters.

CRYSTALS

SERIES	FREQUENCY RANGE	DESCRIPTION	BULLETIN
BH6	200 kc to 125 mc	Holder is equivalent to MIL Type HC-6 U, can be supplied with all MIL Type crystal units, and for commercial requirements. Special models for high shock, temperature and vibration applications. Also available with wire leads.	No. 493
BX	10 mc to 125 mc	Holder is equivalent to MIL Type HC-18 U. Can be supplied with all MIL Type crystal units and for commercial requirements. Also available with plug-in pins.	No. 502
BH9	4 kc to 200 kc	Holder is equivalent to MIL Type HC-13 U. Can be supplied with all MIL Type crystal units. Also available with wire leads. Special models for high shock, vibration and temperature applications.	No. 501
BG6	3 mc to 100 mc	Glass mounted crystal unit has minimum ageing and high reliability. Also supplied with wire leads when part of BTC-2 crystal oven assembly. Special model BG61A-5 at 5 mc has maximum stability for time standards.	No. 496
BG7	4 kc to 3 mc	Advanced design in all glass mounting for plug-in or with wire leads in Bliley TCO-11C oven assembly. Exceptional stability with low ageing and low resistance.	No. 503
BG9	100 kc or 1000 kc	Glass mounted crystal unit developed for secondary standards. Has minimum ageing and high Q for stability.	100kc-No.492 1000kc-No.491
BG12	100 kc	Glass mounting for GT-cut crystals at 100 KC. Supplied with wire leads in TC97 oven assembly for primary standards.	No. 498

OVENS

SERIES	HEATER VOLTAGE	DESCRIPTION	BULLETIN
TCO-14	6.3, 12.0 or 26.5	High stability (·1°C.) oven for use with Bliley crystal series BH6 or BH9 (MIL-Holders HC-6 U or HC-13 U)	No. 514
TCO-141	6.3, 12.0 or 26.5	Crystal and component oven with stability ·1.5°C. features snap-action thermostat for reliable performance and low circuit interference. For use with Bliley crystal series BH6 or BH9 (MIL-Holders HC-6 U or HC-13 U)	No. 515
TC90	6.3, 18 or 115	Precision crystal ovens for frequency standards. Single stage models hold ·1°C; Dual stage models hold ·.25°C.	No. 500
BTC-1	6.3	An hermetically sealed crystal and oven subminiature plug-in package which maintains frequency ·3 ppm with ambient temperature variation from -55°C. to +70°C. Freq. range: 5 mc to 125 mc.	No. 494
BTC-2	6.3 or 26.5	An hermetically sealed plug-in package consisting of oven and glass mounted crystal for high reliability, high stability and low ageing. Freq. range: 4 kc to 125 mc.	No. 497
BCO-10	12.6, 26.5 or 115	A compact component oven providing temperature control for up to 10 diodes. Stability ·1°C. with ambient temperature -10° to +50°C	No. 517
BPCO-1	26.5	High stability transistorized proportional controlled plug-in oven for crystals and components. Stability ·.01°C. from +10°C. to +50°C. For use with Bliley crystal series BG6, BG7 and BG9.	No. 518
TCO-11	115	Precision oven designed for use with Bliley BG6 and BG7 series glass mounted crystals. Temperature stability ·1°C.	No. 508

CRYSTAL FILTERS

Bliley filter networks are available in three standard designs with characteristics selected for general application as shown in the following tabulation:

MODEL	FREQ	BW-6db	BW-60db	FORM FACTOR	IMPEDANCE
BFN-5	5.0 mc	3.5 kc	12 kc	3.5	1600 ohms
BFN-11	10.7 mc	30.0 kc	55 kc	1.8	2700 ohms
BFN-13	13.0 mc	30.0 kc	55 kc	1.8	1500 ohms

CUSTOM ENGINEERED FILTERS

Bliley facilities are available for analysis, design and production of crystal filter networks for specialized applications over the range from 100 kc to 10 mc. Depending upon functional requirements, bandwidths from 50 cycles to 100 kc are attainable. With an unsurpassed background in the development and manufacture of quartz crystal resonators, Bliley is in a unique position to utilize modern crystal filter synthesis techniques in combination with special quartz resonators having low spurious response characteristics. Request Bulletin No. 509.

PACKAGED OSCILLATORS

Bliley Model CCO-7 is an ultra-stable packaged oscillator that combines transistorized circuitry, temperature control and a precision quartz crystal at 1 mc, mounted in glass, for stability of 1 parts in 10 million. For applications that require stabilities in excess of 1 ppm, oscillator design should be closely integrated with crystal parameters to obtain desired performance. Bliley has extensive experience in design and development of packaged oscillators for high stability performance. Request Bulletin No. 516.

ULTRASONIC DELAY LINES

Bliley ultrasonic delay lines for the range 2 to 1500 microseconds are custom engineered for each application. Exceptional performance characteristics such as low loss and attenuation of spurious responses result from a complete appreciation of the critical factors involved.

A new series of low loss short delay lines (2 to 50 microseconds) for carrier frequencies up to 30 mc utilizes barium titanate transducers. Loss levels of these lines, into terminations of 100 ohms, range from 6 db to 10 db compared to 35 db for quartz transducers. Bliley is completely equipped to design, produce and test ultrasonic delay lines for your application. Request Bulletins No. 18 and No. 513.

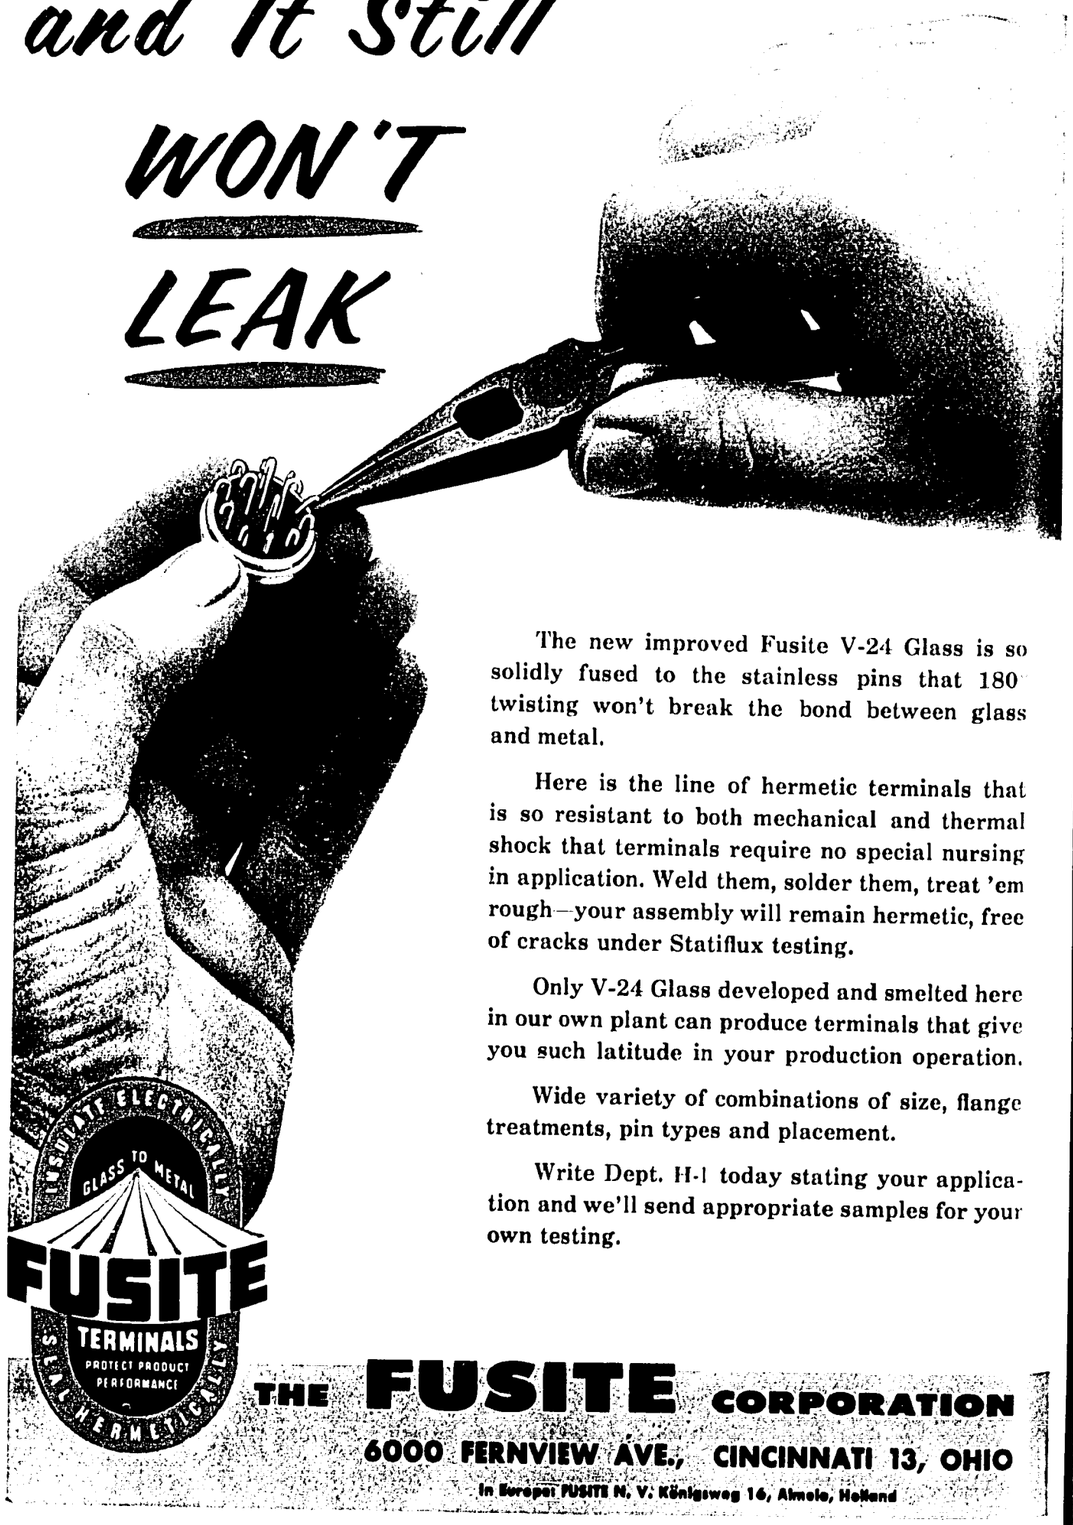
Twist It 'til It Snaps and It Still WON'T LEAK



The new improved Fusite V-24 Glass is so solidly fused to the stainless pins that 180° twisting won't break the bond between glass and metal.

Here is the line of hermetic terminals that is so resistant to both mechanical and thermal shock that terminals require no special nursing in application. Weld them, solder them, treat 'em rough—your assembly will remain hermetic, free of cracks under Statiflux testing.

Only V-24 Glass developed and smelted here in our own plant can produce terminals that give you such latitude in your production operation.

Wide variety of combinations of size, flange treatments, pin types and placement.

Write Dept. H-1 today stating your application and we'll send appropriate samples for your own testing.

HOW TO SIMPLIFY CIRCUIT DESIGN WITH BURNELL CRYSTAL FILTERS

Through advanced crystal filter production techniques and circuitry by Burnell & Co., it is now possible to overcome numerous design problems formerly believed insoluble with even the best individual toroidal components.

FREQUENCY RANGE EXTENDED

Depending on band width and frequency, filters may be composed entirely of crystals or in complex networks, combine quartz crystal elements with stabilized toroidal coils to produce the desired band width and shape factor. Frequency has been extended from low range up to 20 megacycles.

TRANSISTOR TO PENTODE OPERATION

Economy is achieved with standardized complex designs of lattice networks and their three terminal network derivatives. Packaging encompasses a wide range in standard, miniature and sub-miniature sizes with considerable latitude in permissive impedance range from transistor usage to pentode operation.

STANDARD DESIGN OR CUSTOM ENGINEERED

Whether you need crystal filters of standard design or custom units engineered to specifications of center frequency, band width, selectivity and impedance level, the facilities of Burnell & Co. are at your disposal. Write for new Burnell Crystal Filter Bulletin XT-455.

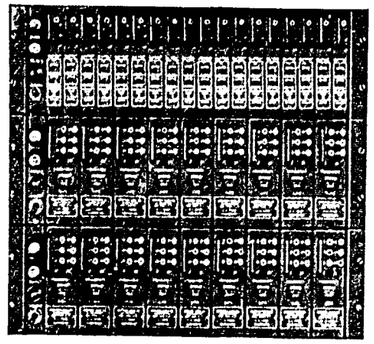
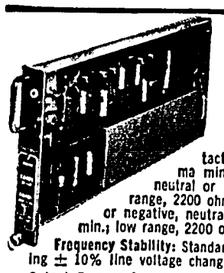
Northern Radio TRANSISTORIZED Voice Frequency Carrier Telegraph Systems



18 CHANNELS IN ONLY 15¾" PANEL SPACE

Top shelf shows 18 FS Tone Keyers, Type 211, Model 1; Next 2 shelves contain 9 each FS Tone Converters, Type 212, Model 2.



FREQUENCY SHIFT TONE KEYER

Type 211, Model 1

Keying Inputs, levels and impedances: 1: Contact keying (internal battery to "dry" contacts) 1 ma min.; 2. DC current pulses, positive or negative, neutral or polar; high range, 220 ohms, 30 ma. min; low range, 2200 ohms, 0.5 ma. min.; 3. DC voltage pulses, positive or negative, neutral or polar; high range, 100,000 ohms, 10 volts min.; low range, 2200 ohms, 1 volt min.

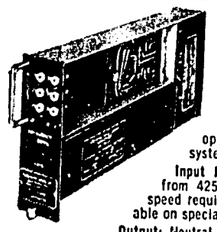
Frequency Stability: Standard Networks ± 2 cps total for all causes including ± 10% line voltage change and ± 25°C. from 25°C. temperature change.

Output Frequencies: All standard VF carrier channels from 425 to 3315 cps. Bandwidth dependent on keying speed requirements. Other frequencies and bandwidths available on special order.

Output Level and Impedance: 5 dbm maximum, into 600 ohms, unbalanced. May be paralleled with any number of other Keyers operating on different frequencies in the same audio system.

Power Requirements: 14 V DC, 15 MA. Two transistorized power supplies and one automatic change-over relay are mounted on the rear of each mounting shelf.

Dimension: 7/8" wide x 5¼" high x 10½" deep.



FREQUENCY SHIFT TONE CONVERTER

Type 212, Model 2

Input Level and Impedance: —48 dbm to +8 dbm into 600 ohms, unbalanced. May be paralleled with any number of other converters operating on different frequencies in the same audio system.

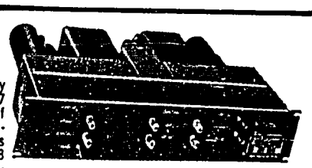
Input Frequencies: All standard telegraph VF channels from 425 to 3315 cps.. Bandwidth dependent on keying speed requirements. Other frequencies and bandwidths available on special order.

Output: Neutral DC voltage pulses of 5 volts maximum across a 2000 ohm external load. Polar pulses ± 10 volts across a 2000 ohm external load. Output drives appropriate voltage-to-current converters, such as Northern Radio Type NRC 691 Transistor Relay which provides "Dry Contact" Keying to external battery supply.

Power Requirements: 14 V DC at 30 MA. Two transistorized power supplies and one automatic change-over relay are mounted on the rear of each mounting shelf.

Dimensions: 17/8" x 5¼" x 113¼" deep. For rack mounting a number of these units, a shelf assembly is available accommodating nine (9) units in a panel height of 5¼".

LINE BATTERY P.S. PANEL



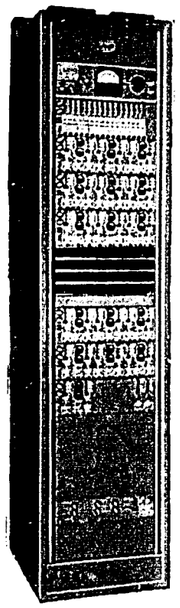
The Northern Radio Line Battery Power Supply Panel, Type 227 Model 1, is used as a source of DC power for teleprinter, telegraph and similar circuits. It is equipped with two (2) Type 228 Model 1 Power Supplies, to provide DC requirements for a group of eighteen (18) or less teleprinter channels. The two Power Supplies are normally mounted on the Line Battery Power Supply Panel, Type 227 Model 1, with one Supply operating and the second "standing-by." An automatic transfer circuit is provided on the panel to place the "stand-by" unit in operation should the first supply fail. The Line Battery Power Supply Panel, Type 227 Model 1, is 3½" high x 19" long. The AC input and DC output circuits are isolated from each other and also from chassis so that either side of the circuit may be grounded, or left ungrounded as may be determined.

Technical Data:

AC Input: 115/230 volt, 50/60 cycles AC ± 10%. Output Voltage: 120 volts DC nominal. Maximum Output Current: 1.2 amperes. Maximum Output Ripple Voltage: 2%.

16-CHANNEL DIVERSITY SYSTEM

- **Diversity switching sensitivity from —60 dbm to 0dbm**



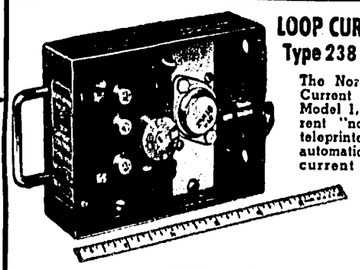
The Northern Radio Voice Frequency Telegraph Terminal, Type 235 Model 1, is a multi-channel frequency shift communications terminal used for transmission and reception of telegraph, teleprinter or telemetering signals over channels subject to fading or attenuation changes, such as long distance point-to-point radio circuits. It provides the necessary equipment for transmission of 16 intelligence channels over one (1) voice frequency circuit, and diversity reception of 16 similar channels, received through two (2) voice frequency circuits. The two (2) voice frequency receiving circuits are normally obtained from radio receivers arranged for space diversity reception. Means are provided to allow reception on a frequency diversity basis rather than space diversity. A combination of space and frequency diversity may be utilized for maximum reliability, when conditions are such as to require same. All the necessary equipment may be mounted in approximately ⅔ of one standard 7-foot telegraph rack.

PRINTER RELAY

Type 237, Model 1

The Northern Radio Printer Relay, Type 237 Model 1, is used as a coupling device between a DC teleprinter signal loop and the printer selector magnet. It replaces electro - mechanical signal relays and their associated local DC power supplies normally used with printers, providing the advantages of relays and improving printer performance but eliminating the maintenance problems which electro - mechanical relays introduce.

This device effectively isolates the reactance of the printer selector magnet, presenting a resistive termination to the signal loop. Several printers equipped with this device can, therefore, be connected in series with the same signal loop without harmful interaction between them. The Printer Relay may be used with either polar or neutral keyed signals. When neutral signals are supplied, the device automatically selects the proper operating level for the loop current supply, and can therefore tolerate large changes in absolute values of loop current without introducing appreciable distortion into the printer selector magnet. It normally mounts within the housing of the teleprinter.



LOOP CURRENT CONTROL

Type 238 Models 1 and 2

The Northern Radio Loop Current Control, Type 238 Model 1, is used as a current "normalizer" in DC teleprinter signal loops, to automatically maintain loop current at the optimum value despite changes in loop resistance or loop supply voltage.

The Loop Current Control, Type 238 Model 1, is designed for use in loops requiring a nominal 60 milliamperes operating current, while the Model 2 is designed for a nominal 20 milliampere circuit. Both models incorporate a calibration control to allow reasonable variations from these design values.

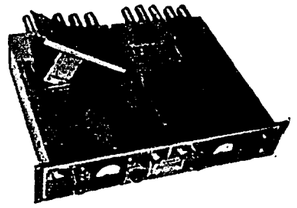
Input Impedance: Variable. Automatically changes as necessary to maintain "constant current" in the circuit to which connected. Maximum and minimum limit of operation are specified by allowable voltage drops across the terminals of the device.

Voltage Limits: Maximum—80 volts; Minimum—5 volts.

Operating Currents: Model 1: 60 milliamperes (adjustable 55-75 milliamperes). Model 2: 20 milliamperes (adjustable 10-30 milliamperes).

MULTI-CHANNEL FREQUENCY SHIFT TONE TELEGRAPH SYSTEMS

These Multi-Channel Telegraph Systems are audio carrier systems capable of multiplexing such circuits as telephone lines, VHF, UHF, or radio frequency links—or practically any type circuit from which a two-wire audio circuit can be derived. Designed to meet any speed requirements, these systems are fully electronic, without relays or moving parts to wear. They can be used for high-speed printer, Morse or time division Multiplex circuits, as well as such application as Telemetering, Control Circuits and Servo-Mechanisms. Instantaneous and complete sending and channel control permits any binary code groups, either "Clear Text" or "Cryptographic," to be channelized without need for additional phasing or synchronizing equipment, while paralleling of channels will allow for transmission of other type codes, such as 3 element cable code. The completely independent operation of each channel, including its own power supply, localizes faults to one channel only, leaving other channels unaffected. Individual channel separation filters are used at both transmitting and receiving ends. This arrangement allows for sending telegraph or control signals over a circuit carrying, simultaneously, other forms of intelligence: or for two-way communications on the same line. The audio frequency shift principle of transmission provides for high fidelity of signal reproduction over a wide range of signal levels as well as under severe noise or interference conditions. Circuit requirements of any speed, shift and center frequency can readily be met. The systems illustrated are for use on printer circuits up to 100 WPM channel capacity. The system arrangement is very flexible, permitting grouping of the basic units into various arrangements of Multiplex Systems. These systems can be made to accommodate a large variety of channel numbers and speeds to meet any individual requirements. The flexibility is further improved by the fact that the racks, power control units, and terminal connection panels are the same for both transmitting and receiving terminals.

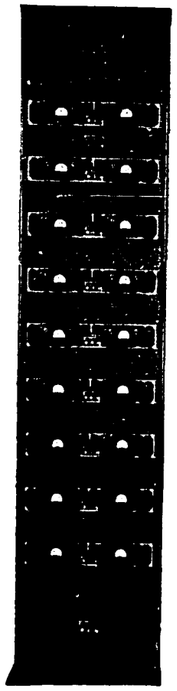


DUAL FS TONE KEYER; TYPE 153 MODEL 3:

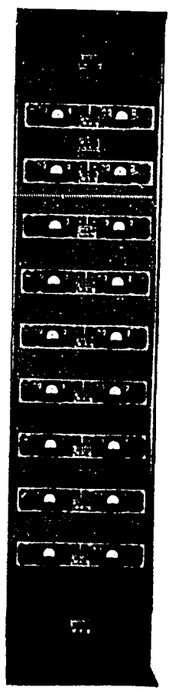
Keying Input.... Relay contacts, ± DC current or voltage pulses, neutral or polar.

Input Level.... DC voltage: ± 10 volts min. DC current: 45 ma min., ± or polar. Relay: contact rating 5 ma min.

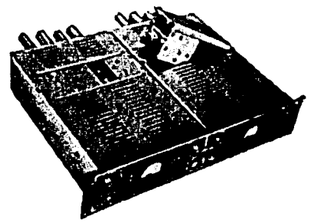
Keying Input Z... DC voltage: 100K ohms. DC current: 220 ohms.



TRANSMITTER



RECEIVER



DUAL FS TONE CONVERTER: TYPE 152 MODEL 3:

Input Z: 600 ohms, unbalanced.

Input Level:—40 dbm to 0 dbm.

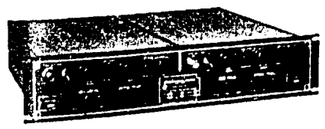
Input Frequencies: 18 channels, 425-3315 cps, 170 cycle spacing.

Keying Speed: 45 dot cycles.

DUPLEX TELEGRAPH SYSTEM FOR MULTI-CHANNEL TONE EQUIPMENT

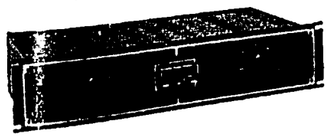
SEVEN NEW FEATURES in this system—simple 4-position switch selects from 12 possible duplex combinations: duplex operation between stations connected via carrier telegraph channels: *all-electronic*, without relays or moving parts: polar or neutral for either half duplex or full duplex: break-in now also possible for all *half*-duplex circuits: provided with positive feature to prevent space signal lock-out: includes individual line battery for each channel.

The Northern Radio Duplex Telegraph System consists of one each Dual Frequency Shift Tone Keyer, Type 153 Model 3; Dual Duplex Selector Panel, Type 200 Model 1; Dual Loop switch Panel, Type 200A Model 1; and Dual Frequency Shift Tone Converter, Type 152 Model 3.



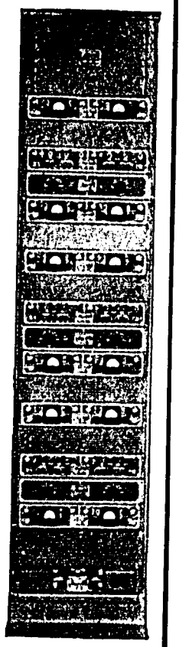
DUAL DUPLEX SELECTOR PANEL Type 200 Model 1

The Dual Selector Panel provides 12 loop options, patching facilities for monitoring purposes and channel routing, including the possibility of patching-in another tele-printer loop circuit (T-junction). Any of the 12 loop options are available and may be selected for the Dual Loop Switch Panel by simple strapping arrangements. It has an individual line battery for each channel for greatest circuit flexibility. Battery and line fuses are also provided for maximum protection.



DUAL LOOP SWITCH PANEL Type 200A Model 1

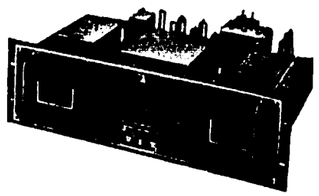
The Dual Loop Switch Panel rapidly selects half-duplex and/or full duplex mode of operation for any of the 4 standard loop options by front panel switching available from the 12 loop options in the Dual Duplex Selector Panel.



REGENERATIVE REPEATER

TYPE 207

MODEL 1



This new Regenerative Repeater—the most advanced in the industry—is designed for use in telecommunication circuits to re-shape and re-time distorted signals for local use or retransmission. Special provision has also been made for its use on half-duplex where it will not only regenerate the ordinary teleprinter signals but also faithfully reproduce such special signals "break" signals and "mark restoration" information. *Outstanding features include:* ... maximum acceptable signal distortion: new circuitry accepts up to 47% mark or space distortion: "floating" input & output circuits: completely electronic output, no relays: greater timing circuit stability: time base derived from highly stabilized L-C oscillator: adaptable to any speed: low-pass filter & frequency-determining elements are plug-in units: completely self-contained: includes power supply & line battery.

TECHNICAL DATA:

Input Keying Signal Requirements: (1) Neutral keying, positive or negative sense, (a) on-off 60 ma pulses, (b) on-off voltage pulses 10-100V into 100K ohms, (2) Polar keying, (3) Dry contact keying.

Frequency Stability of Time Base Generator: Less than 1 point range loss for ± 10% line voltage variation or ± 20° C ambient change from 25° C.

Sampling Time: Approximately 50 microseconds.

Output: Electronic tube outputs: (a) neutral 65 ma. max. into 2K ohms, (b) polar 33 ma (max.) into 2K ohms.

Power Requirement: 125 watts approx. 110/220V, 50/60 cps.

Mounting: Standard 19" rack mounting, 5¼" panel.

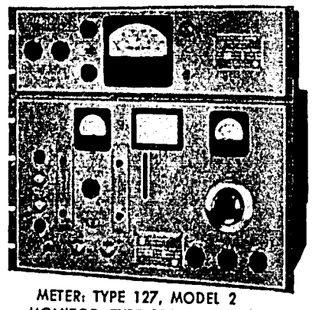
Northern Radio FREQUENCY SHIFT TERMINAL EQUIPMENT

FREQUENCY and SHIFT MONITOR SYSTEM

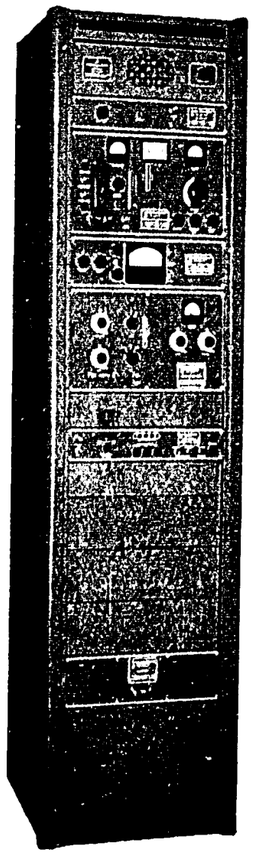
This system consists of a Type 106 Frequency and Shift Monitor and a Type 127 Frequency Meter. It is designed as a secondary standard to monitor the frequency and amount of shift of transmitter carrier output. It is particularly intended to measure the frequency shift of a mark and space (FS) signal either when setting up for traffic or under normal keying conditions.

The Monitor's stability is better than 2 cycles per megacycle over an ambient temperature range of 0-50° C—using crystals having a temperature coefficient of only 3 parts/million/degrees C. Range is 2.5-30 mc with 10 crystal-controlled frequencies (separate panel trimmers for each); use of external oscillator also provided for. Frequency Shift range is 10-10,000 cps. Less than 100 millivolts RF input needed for 2 volts audio output.

The Frequency Meter is specially designed with selectable normal and fast-acting damping factors, permitting frequency measurements of signals while keying. Its accuracy is 2% of full scale for the ranges 0-200, 500, 2000, 5000, 20,000 cps.



METER: TYPE 127, MODEL 2
MONITOR: TYPE 106, MODEL 4



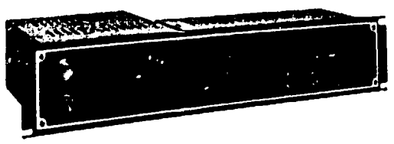
TYPICAL TRANSMITTER TERMINAL for TWINPLEX OPERATION

TYPE 105, MODEL 6

FREQUENCY SHIFT KEYER

Supersedes and replaces its leader predecessor, Type 105, Model 4.

- Highest stability achieved by any FS Keyer.
- Increased frequency range 1.0 to 7.0 mc.
- Pre-selection of proper FS for any particular transmitter frequency multiplication.
- Permits use with external oscillator without need of adapters.
- Improved accessibility for even easier maintenance.
- Direct-reading frequency calibration of shift from 0 to 1000 cps.
- FS dial adjusts "Mark" and "Space" frequencies equally above and below the carrier position.
- Direct-reading frequency calibration of mixer and output tuning dials from 1.0 to 7.0 mc.
- Direct reading calibration of output frequency vernier ± 600 cps.
- Pulse-shaping circuit permits operation within assigned band-width with no adjacent channel radiation.
- Linear carrier shift up to 1400 cps for Fax operations.



TWINPLEX COMBINER TYPE 177 MODEL 1

For twinplex operation, the transmitting terminal includes a Twinplex Combiner Type 177 Model 1.

The Twinplex communication system makes possible a 2-channel radio circuit whereby 2 non-synchronous or synchronous telegraph transmissions modulate a single radio carrier wave causing the carrier to assume one of four specific frequencies with 400 cps separations.

The Combiner converts the four possible conditions of two telegraph signals (M1-M2, M1-S2, S1-M2, S1-S2) respectively into one of four voltages related in a 0-1-2-3 manner. The Combiner output voltage modulates the Frequency Shift Keyer.

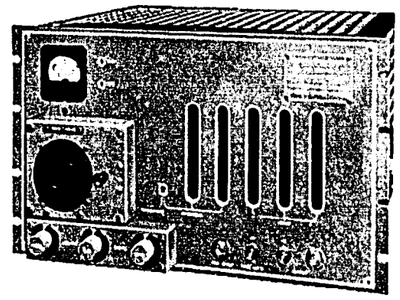
The two telegraph channels provide the same operational flexibility as that of two separate single channel FS systems. One can, for example, simultaneously use channel #1 on 60 wpm teletype and channel #2 on high-speed Morse or Time-Division Multiplex.

TECHNICAL DATA:

Keying Inputs: 1. Contacts; 2. DC current pulses, positive, negative, or polar; 3. DC voltage pulses, positive, negative, or polar.
Input Level: 1. DC Voltages: ± 10 volts minimum; 2. DC Current: ma. minimum.
Keying Speed: 240 Words per minute maximum.
Output Impedance: 10,000 ohms.
Keying Input Impedance: 1. DC Voltage: 100,000 ohms. 2. DC Current: 220 ohms.
Output Level: Neutral: 0 to 25 volts; Polar: +6 to −6 volts.
Output Voltage Conditions: Four output voltages are to be proportioned as follows assuming linear F.S. Keyer characteristic.
Input: M1 M2, M1 S2, S1 M2, S1 S2; Output 0, 1, 2, 3.
Individual level adjustments provided.
Power Requirements: 100/220 volts, 50/60 cycles. Approximately 50 watts. Connections at rear of chassis.
Dimensions: 3½" High x 19" Wide x 10" Deep.

For details, circle #132 on Reader Service Card

VARIABLE MASTER OSCILLATOR TYPE 173 MODEL 1



The Northern Radio Company Variable Master Oscillator provides a continuously variable source of radio frequency energy with a stability of approximately 1 cycle per megacycle in the range of 2 to 4 megacycles. It may be used as the basic control oscillator for diversity receivers, high frequency transmitters and other communications devices, or as a laboratory standard for test and measurement functions.

Its ease of operation and direct reading of frequency make it an outstandingly useful device where precise frequency control must be maintained by completely unskilled personnel. No curves, interpolations or calculations of any kind are required in its use. Frequency is set approximately to the desired value by rotating the oscillator dial. The last three digits of the frequency automatically pulls in to the valve pre-set on the switches and holds with an accuracy that exceeds that of most temperature-controlled crystal oscillators.

HIGH FREQUENCY OSCILLATOR

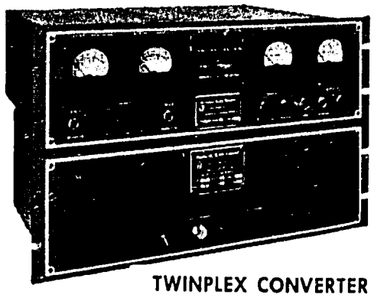
Output Frequency: 2-4 MC continuously variable.
Stability for any combination of temperature range from 0 to 50° C, and line voltage of 115 to 230 ± 10%: Approximately 1 cycle per megacycle.
Output level: ½ watt into 75 ohm load. Lever control on rear of chassis.
Readability: ± 2.5 cycles per second. Direct digital readout on mechanical and electronic counters.
Resettability: Absolute.

BEAT FREQUENCY OSCILLATOR

Output Frequency: 400-800 KC crystal controlled.
Output Level: 3.5 volts into 1000 ohm load. Level control on rear of chassis.

TIME BASE CRYSTAL OSCILLATOR

Output frequency 100 KC
Stability for 0 to 50° C and ± 10% Line Voltage change: 0.2 part per million for any 12 hour period; 1.0 par million for thirty days.
Output Level: Approximately 2 volts.
Output Impedance: Approximately 100,000 ohms.

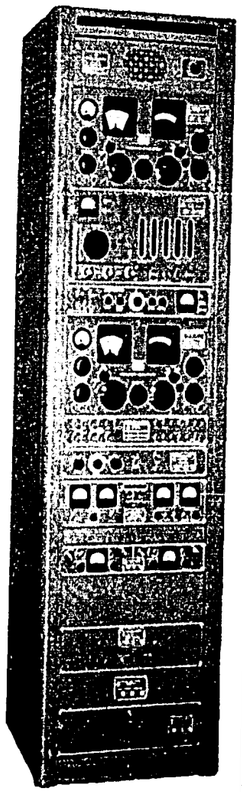


TWINPLEX CONVERTER TYPE 178 MODEL 1

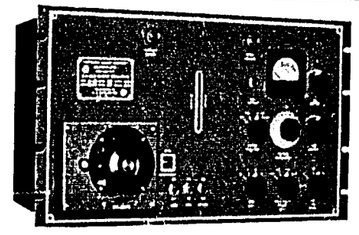
This Twinplex communication system makes possible a 2-channel radio circuit whereby 2 non-synchronous or synchronous telegraph transmissions modulate a single radio carrier wave by causing the carrier to assume one of four specific frequencies with 400 cps separations.

The receiving equipment consists of the Twinplex Converter Type 178 Model 1 and a single or diversity receiver such as the Northern Radio Type 110 Dual Diversity Receiving System. The Converter demodulates and separates the four audio tones from the radio receiver(s) into two channels each carrying the originally transmitted intelligence. The Twinplex Converter replaces the standard FS Converter for this purpose.

The two telegraph channels provide the same operational flexibility as that of two separate single channel FS systems. One can, for example, simultaneously use channel #1 or 60 wpm teletype and channel #2 on high-speed Morse or Time-Division Multiplex. It further permits the reception of channel #1 signals on all standard FS converters (tunable to 400 cps shift) without need for a Twinplex Converter: this is valuable for "Forked Circuit Operation" where the intelligence of channel #1 is intended for pick-up by other receiving stations which are not equipped for Twinplex Reception in addition to the main receiving stations which are so equipped. Reception of channel #2 (or of both channels) requires the receiving end to be equipped with a Twinplex Converter.

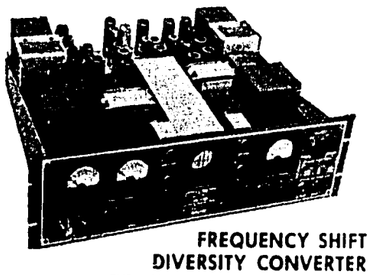


TYPICAL RECEIVER TERMINAL for TWINPLEX OPERATION



VARIABLE MASTER OSCILLATOR TYPE 115, MODEL 1

The Variable Master Oscillator Type 173 (above) may be replaced by this Variable Master Oscillator Type 115 Model 1 which is designed principally for use in diversity reception to supply variable or crystal HFO voltage to the receivers. Its variable frequency has a stability equivalent to that obtained by non-temperature-controlled crystal oscillators. It also provides 3 HFO crystals for operation of diversity receivers where fixed frequencies are required, and 2 BFO crystals.



FREQUENCY SHIFT DIVERSITY CONVERTER TYPE 174, MODEL 1

For use with either single-receiver frequency diversity systems or 2-receiver space diversity systems. By means of plug-in units, any reasonable number of channels is available between the frequencies of 425 and 3315 cps for either frequency or space diversity operation. For standard FS operation, the plug-in networks provide shift adjustments from 100 to 1000 cps shift.
Normal Input Level: −40 to +10 VU (Zero VU = 1MW into 600 ohms). (Satisfactory operation on fades to −60 VU.)
Limiter Recovery Time: Negligible for a 40 VU differential between Mark and Space frequencies.
Output: 65 ma into 2000 ohms floating (self-contained line battery).
Keying Speed: Maximum of 40 dot cycles with narrow band frequencies diversity. Up to 400 dot cycles with the wide band networks.
Monitor: 2-inch Cathode Ray tube
Input phone jack
2 input volume level indicators
1 output current indicator

crystal growing with Trancoa silicon . . .

single, single all the way

POLYCRYSTALLINE SILICON SPECIFICATIONS			
Grade	Resistivity P-Type	Max. Resistivity Ratio for 10% & 60% Points	Max. Boron Content (ppt)
IA	500	3:1	0.5
I	100	3:1	1.0
II	50	3:1	2.0
III	25	3:1	7.0
IV	2.5	3:1	–

Consistently clean Trancoa Silicon eliminates the twins, polys, and dropped charges that can result from dirty material. This will give you a larger yield of single crystal per pound of silicon . . . saving material, saving machine time, saving labor.

We prove the cleanliness of our Silicon at Trancoa by growing test crystals with only 3/16th of an inch between crucible and crystal . . . and they are single, single all the way! You can be confident of achieving uniform results within a lot and from one lot to another by growing crystals with Trancoa Silicon.

See table for the five grades available. Complete information is contained in "Trancoa Methods for Evaluating Silicon". Write today for a copy.

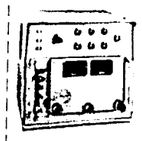
MICROWAVE · ELECTRONICS

All Polarad microwave signal generators and sources feature single-dial tuning control, direct reading frequency dial accurate to 1%, continuous tuning in each range, high stability, low harmonic content, and non-contacting short-type klystron cavity chokes for noiseless tuning and accurate calibration.

MICROWAVE SIGNAL GENERATORS
Model MSG-1
950 to 2,400 mc
Model MSG-2
2,150 to 4,600 mc
Power Output:
0 dbm to –127 dbm

Model MSG-1



MICROWAVE SIGNAL GENERATOR
Model PMX
4,450 to 11,000 mc
Basic Unit Model GB-2
(Modulator, Keyer, Power Supplies)
Tuning Unit G-48
4,450 to 8,000 mc
Tuning Unit G-711
6,950 to 11,000 mc

Model PMX

MICROWAVE SIGNAL GENERATOR
Model MSG-34
4,200 to 11,000 mc all in one unit
Power Output:
0 dbm to –127 dbm

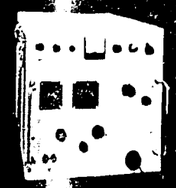
Model MSG-34

MICROWAVE SIGNAL GENERATOR
Model PMK
10,000 to 21,000 mc
Basic Unit Model GB-3
(Modulator, Keyer, Power Supplies)
Tuning Unit G-1015
10,000 to 15,500 mc
Tuning Unit G-1521
15,000 to 21,000 mc

Model PMK

Model SG-121R Signal Generator and Model SS-1218 Source are available to cover the frequency range 12,400 to 17,500 mc

MICROWAVE SIGNAL SOURCE Model KSS—1,050 to 11,000 mc		
Tuning Unit	Frequency Range	Power Output Range
S-12	1,050 to 2,250 mc	80 to 400 mw
S-24	2,140 to 4,600 mc	40 to 250 mw
S-48	4,450 to 8,000 mc	15 to 50 mw
S-711	7,850 to 11,000 mc	14 to 40 mw



EHF MICROWAVE GENERATORS AND SOURCES
9 plug-in units cover 18,000 to 50,000 mc

SIGNAL GENERATORS Basic Unit Model HU-2	FREQUENCY RANGE	SIGNAL SOURCES Basic Unit Model HU-1
Plug-In Tuning Unit Model No.		Plug-In Tuning Unit Model No.
G1822-1	18,000 – 22,000 mc	S1822-1
G2225-1	22,000 – 25,000 mc	S2225-1
G2427-1	24,700 – 27,500 mc	S2427-1

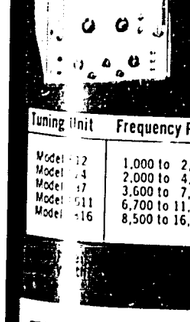
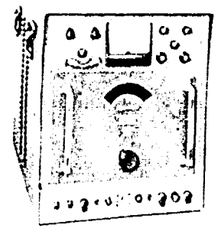
	41,700 – 50,000 mc	S4150-1



Tuning Unit	Frequency Range	Power Output
Model [illegible]12	1,000 to 2,000 mc	70 – 800 mw
Model [illegible]24	2,000 to 4,000 mc	70 – 750 mw
Model [illegible]37	3,600 to 7,200 mc	15 – 500 mw
Model [illegible]511	6,700 to 11,400 mc	15 – 200 mw
Model [illegible]516	8,500 to 16,000 mc	3 – 75 mw



EXTENDED RANGE MICROWAVE RECEIVER
Model R
400 to 46,700 mc

Four instruments in one:
- AM-FM receiver
- Field intensity receiver
- Pulse, pulse-time or pulse-position demodulator
- Sensitive power meter

Basic Unit Model R-B

8 Interchangeable Plug-in Tuning Units*

Model RR-T	400- 1,000 mc	Model RX-T	7,300-11,260 mc
Model RL-T	950- 2,040 mc	Model RKS-T	9,500-15,600 mc
Model RS-T	1,900- 4,340 mc	Model RKU-T	14,700-22,000 mc
Model RM-T	4,200- 7,740 mc	Model RQ-T	20,260-46,700 mc

*U. S. Patent 2,774,243

CALIBRATED FIELD INTENSITY METER

Power Supply — Monitor Unit

Model FIM 1,000-10,000 mc

A highly sensitive instrument for field intensity and r-f interference measurements, antenna pattern analysis. Used as null detector and r-f voltmeter. Highly accurate frequency and power calibration.

Four Interchangeable Tuning Units*

FIM-L	1,000 to 2,240 mc
FIM-S	2,140 to 4,340 mc
FIM-M	4,190 to 7,740 mc
FIM-X	7,360 to 10,000 mc

*U. S. Patent 2,774,243

Calibrated Antennas Supplied with Model FIM

Test Antennas (not calibrated): 1,000 to 39,700 mc

MICROWAVE ATTENUATOR
Model SIJ
Covering
4,000 to 12,400 mc
Continuously variable, stub-tuned.

SUB-MINIATURE S-BAND CAVITIES
Plate and Grid Pulsed Models
Each Covering
2,750 to 3,000 mc

ALL CERAMIC KLYSTRON TUBES
Maximum Heat & Shock Resistance
ZV 1012 600 to 2,000 mc
ZV 1010 900 to 3,800 mc
ZV 1009 1,600 to 6,500 mc

FREE LIFETIME SERVICE ON ALL POLARAD INSTRUMENTS

MICROWAVE · ELECTRONICS

FOR MICROWAVE SPECTRUM ANALYSIS

DIRECT-READING SPECTRUM ANALYZER
Model TSA 10 to 44,000 mc

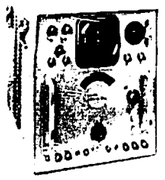
FEATURES
- Direct-reading UNI-DIAL control
- High accuracy, resolution and sensitivity
- Stable, accurate frequency marker

To test missile radars, microwave components, telemetering, multi-pulse transmissions

Model DU
Spectrum Display and Power Unit

Five interchangeable Tuning Units

STU-1	10 — 1,000 mc
STU-2A	910 — 4,560 mc
STU-3A	4,370 — 22,000 mc
STU-4	21,000 — 33,000 mc
STU-5	33,000 — 44,000 mc



COMBINATION SYNCHROSCOPE SPECTRUM ANALYZER
Model TSA-S 10 to 44,000 mc

Time Display: Pulsed signal as seen in synchroscope operation.

Frequency Display: Same signal as seen in spectrum analyzer operation.

Selector switch determines function instantly. Tuning Units: Same as Model TSA above.

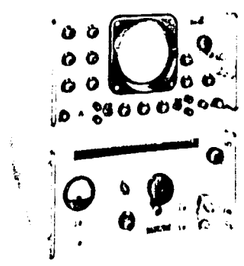
VERY WIDE DISPERSION SPECTRUM ANALYZER
Model TSA-W 10 to 44,000 mc

Narrow and Wide Pulse Analysis

70 mc frequency dispersion displays pulses as narrow as 0.1 μsec. For wide pulse analysis, dispersion may be adjusted to as narrow as 100 kc.

Wide dispersion permits simultaneous observation of two or more signals separated by relatively large frequency difference.

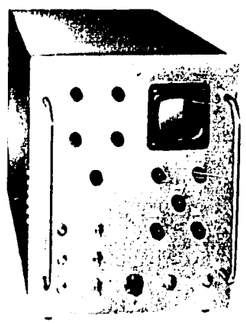
Resolution: 7 kc narrow bandwidth, 50 kc wide bandwidth. Tuning Unit Frequency Ranges: Same as Model TSA above.



MULTI-BAND, SINGLE UNIT SPECTRUM ANALYZER
Model SA-84

Complete frequency coverage, 10 to 40,880 mc, all in one self-contained unit. No additional tuning units required

Also available: Model SA-84W 10-40880 mc in one unit, and same choice of dispersion bandwidths as Model TSA-W above.



MULTI-PULSE SPECTRUM SELECTOR
Model SD-1

Permits spectrum analysis of individual microwave pulses in a pulse group. Any pulse in a complex coded signal may be isolated and intensified for examination.

Here's how to pick the best DIODES for your money

Price is no clue when diodes sell for about the same, and just **looking** at them tells nothing. But if you ask the right questions about the three key factors in the production of quality germanium gold bonded diodes, you have your clues to more long-term reliability for your money. Here they are:

BAKING TIME AND TEMPERATURE
bear a direct relationship to long-term stability. You get a measure of the quality of diodes by asking: "How long do you bake, and at what temperature?" (All GT diodes are baked at 140°C for at least 96 hours—the highest and longest in the industry!)

STRICT, STATISTICAL, HISTORY LOGGING
traces the progress of every single wafer made from each ingot of germanium. At GT, if a few wafers fail to pass the stringent GT quality tests along the way, then all from the ingot are suspect and can be identified and pulled out. There are no "stowaways" in a shipment of GT quality diodes.

LEVEL OF TESTING STANDARDS
reveals the level of quality. Ask about "everyday" test standards. (In the GT Seal Test, diodes are submerged in a penetrant-dye solution for 24 hours under 75 psi. This test is so sensitive that it will reveal a leak so small it would take over 300 years for 1 cc of gas to diffuse through the case.) All GT quality tests—100% electrical, 100% shock and vibration, and 100% temperature cycling—are at the highest industry level... and as a final mark of quality, the color bands on GT Germanium Gold Bonded Diodes are baked on to stay.

GT is equipped to supply diodes tested to individual customer requirements, such as JAN Qualification Inspection Tests and many others.

To get the full measure of quality in Germanium Gold Bonded Diodes, see your GT representative; or write directly to the company with know-how **NOW.**

Here's General Transistor does it

GT know-how NOW gives you high-quality semiconductor devices in production quantities for prompt delivery

"If it's a high-quality device and you need it—regardless of quantity—General Transistor will produce and deliver it as promised."

That's the GT policy...and here's how it was made to work:

PROCESS ENGINEERING—From the very beginning of the company, a process engineering program was devoted to the continuous improvement of high-quality, high-speed, mass-production techniques. The results were increasingly rewarding to our growing list of customers; GT became their most dependable supplier, meeting every emergency.

QUALITY CONTROL—Intensive efforts were also applied to innovating techniques for quality control during production. OUR AIM: To supply only high-quality semiconductor devices.

LARGE PRODUCTION FACILITIES—Today GT is a major producer; GT production facilities are larger than those of many suppliers in the semiconductor field. Meeting high-quality specifications, in quantity, is never a problem.

LOGISTIC RELIABILITY—GT's earned reputation for high-quality devices in production quantities is a precious one. It's worth protecting. Therefore, "wild" claims are avoided. This leads to logistic reliability. When GT says: "We will deliver"—that is a fact on which other plans may be based.

GT never announced a major research breakthrough until the result was available in production quantities. When GT publishes specifications, tolerances, etc., it is done with the full knowledge that they can be substantiated to every decimal point in production quantities . . . not merely in sample lots.

GT's place in the industry is that of a primary supplier of high-quality devices in production quantities for prompt delivery. This is know-how NOW.

That's why you can depend on General Transistor. It's the company with NOW-HOW.

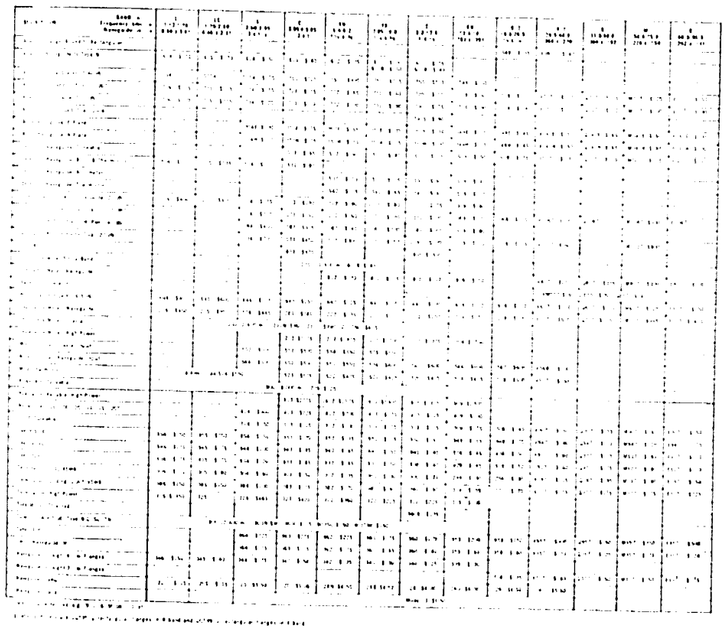
Narda—UHF and Microwave products from 200 to 90,000 Mc

Narda's full catalog includes a complete line of UHF and Microwave instruments, as well as bolometers and thermistors, all of the highest quality. Most of our products are available for immediate delivery; flexible production schedules permit prompt shipment of even those items not regularly on the shelf.

Narda's list of repeat customers reads like a "Who's Who" of American industry and universities. You'll experience the same satisfaction, when you choose among the instruments listed on this page and the next three. For additional information on any item, and a free copy of our latest catalog, write to the address shown below.

Waveguide Instruments L to E Band



Microwave Test Instruments

Frequency Power Meter
Model 107
500-1500 mc
$1150.

•

Radar Performance Checker
Model 116
All Frequencies
$485.

•

VSWR Amplifier
Model 441
All Frequencies
$200.

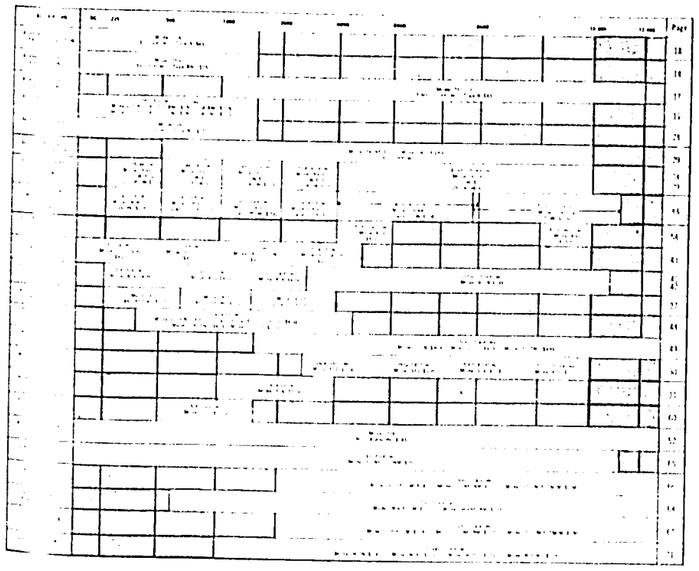
•

Tuned Pre-amp
Model 442
All Frequencies
$200.

•

Laboratory Training Set
Model 117
X Band
$1900.

Coaxial and UHF Equipment



Bolometers & Thermistors

The complete line of Bolometers (barretters) and Thermistors for all frequency ranges, including cylindrical (821), crystal (610), disc (603), and miniature (604), configurations.

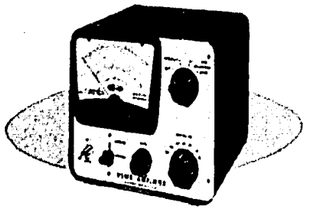
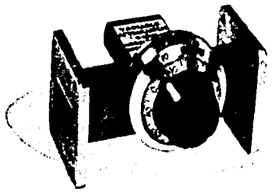
Narda-UHF and Microwave products from 200 to 90,000 Mc



BATTERY-OPERATED VSWR AMPLIFIER

Transistorized and battery-operated for complete independence from line voltage deviations. 0.1 microvolt sensitivity at 200 ohms over both "normal" and "extended" scales. Protective circuit permits any switching operation or cable connection to be made or broken without danger to bolometer; blowouts can not occur. Covers frequency of 1,000 cps ± 1%; plug-in frequency networks available for 315-3,000 cps. Bandwidth: 25-30 cps. Range: 70 db (60 db in 10 db steps, 10 db continuous).

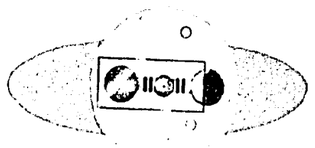
Model 441 . . . $200



VARIABLE ATTENUATORS FIXED CALIBRATED PADS

Variable attenuators — 0 to 20 db range; VSWR under 1.15; all waveguide sizes.
Fixed calibrated pads available in all waveguide sizes with 3, 6, or 10 db calibration.

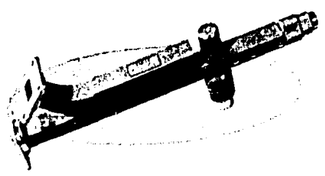
13 models, from $55 to $200.



DISC BOLOMETERS AND THERMISTORS

Coaxial bolometer elements available for 200-ohm operation at 4.5 or 8.75 ma bias. Thermistors with 200 ohms resistance at 13 ma. For power measurement and detection to 10 mw.

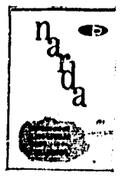
$25.00 each.



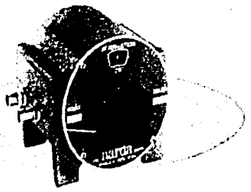
HARMONIC AND CRYSTAL MIXERS

Mixers serve as converters in coaxial lines and waveguides with microwave receivers and spectrum analyzers. NARDA Harmonic Mixers hold a silicon crystal element with provision for the injection of a standard frequency.

Priced from $425.



Write for your free copy of Narda's new 1959 catalog.
Address: Dept. IRED-3



TURRET ATTENUATORS

A UHF-only attenuator, representing considerable savings in costs for this application. Each model offers a Designer or Development Engineer twelve steps of attenuation from d.c. to 1,500 mc, with a VSWR of 1.25. Model 705 provides 0 to 30 db attenuations; model 705 — 0 to 20 db; model 707 — 0 to INF db.

All models . . . $275 each.

COAXIAL ATTENUATORS

Double pi-section attenuators for high power rating and broad frequency characteristic. Available in 6 or 10 db values, dc to 1500 mc. VSWR equals 1.2. Frequency variation is ±1 db; calibration frequency equals 1000 mc; calibration accuracy equals ±0.2 db.

6, or 10 db Models . . . $40 each.

WAVEGUIDE DETECTORS

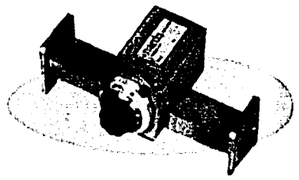
Designed for broad band operation with low VSWR and maximum versatility. May be used with a variety of crystal, bolometer (barretter) or thermistor elements, for absolute power measurement when used with appropriate bolometers and thermistors, as well as for detection of relative power levels. Also fixed tuned models.

13 models available from $75 to $125.

TRANSISTORIZED, BATTERY-OPERATED MICROWAVE POWER METER

Fully transistorized and self-balancing to provide accurate, automatic direct-reading measurements of cw or pulsed power. Provides the widest power measuring range available, with 0.001 to 0.01 mw and 0.003 to 0.03 mw scales, in addition to the five standard scales up to 10 mw. Powered by a nickel-cadmium battery, which is rechargeable overnight or during operation with built-in battery charger, it provides complete independence of filament heating errors and line voltage variations. Accuracy: 3% of full scale reading.

Model 440 . . . $250



CALIBRATED VARIABLE ATTENUATORS

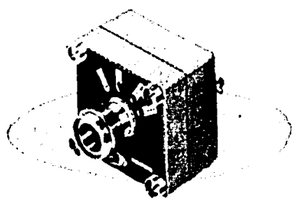
Precision attenuators of the parallel vane type, providing a maximum VSWR of 1.15; maximum insertion of 0.5 db; calibration accuracy — 0.3 db; calibration chart supplied. Calibration is precise and permanent, and not affected by humidity or temperature variations.

Seven models from $200 to $375.

BOLOMETERS AND THERMISTORS

Ruggedized construction; coin silver contacts. Barretter types available for 4.5 and 8.75 ma bias; 50, 100, 200, 400 ohm values. Thermistor types 100 or 200 ohm operation.

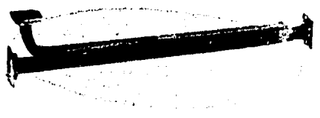
N821B & N610B, $10.00 each.



COAXIAL DETECTORS

Mounts for both bolometers and thermistors of the mica disc type, from 500 to 10,000 mc. Usable with any of the four types of bolometers and thermistors; a unique arrangement permits rapid change of elements and shows at a glance which type is in the detector, as well as its bias current requirements.

Model 561 (not including element) $50.



HIGH DIRECTIVITY COUPLERS

3, 6, 10, 20 and 40 db couplers, all with directivity exceeding 40 db. 40 db (high power) coupler may be used at full rated power of the waveguide size. Standard cover flanges terminate both ends of primary line; low VSWR termination and standard cover flange on secondary arm.

$95 to $400.

the narda microwave corporation

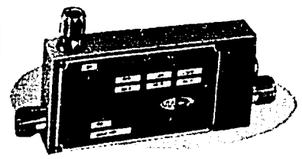
For details, circle #142 on Reader Service Card

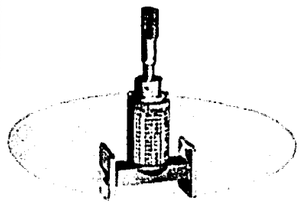
Narda-UHF and Microwave products from 200 to 90,000 Mc



COAXIAL DIRECTIONAL COUPLERS

Only Narda offers coaxial directional couplers in 10 and 30 db values, as well as 20 db. Flat coupling — values within 1 db of nominal over full octave frequency range. Calibration provided to ±0.2 db accuracy. Directivity exceeding 20 db. May also be used at lower frequencies than specified. 225 to 10,000 mc.

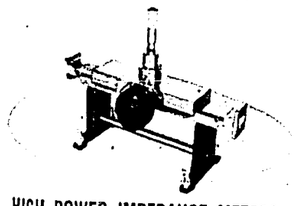
Five models, from $100.



WAVEGUIDE FREQUENCY METERS

Each consists of a section of waveguide with a resonant cavity attached symmetrically to the broad wall. Coupling is through an inductive iris, designed so unit is electrically equivalent to a straight section of waveguide. Power dip is at least 10% over the frequency range; accuracy equals 0.08%.

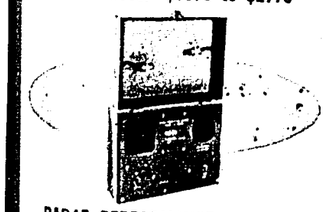
Five models from $110 to $150.



HIGH POWER IMPEDANCE METERS and VARIABLE REACTANCES

Meters have fixed value output coupling of 45 db, nominal. Reactances can vary magnitude of standing wave ratio from 1.02 to 2.0. Phase of standing wave is separately variable. Maximum residual VSWR: 1.02. (1.03 for 12.4-18.0 kmc Meter)

Meters: $1375 to $2175
Reactances: $1975 to $2775

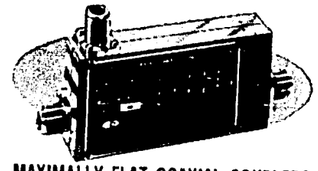


RADAR PERFORMANCE CHECKER (Transistorized)

Used with an echo box, for rapid pre-flight or production line measurement of over-all radar performance. Completely portable; no power source needed. Accuracy: 2 db. Resolution: 2 db. Range: 0 db to —12 db on panel dial.

Model 116T . . . $485.

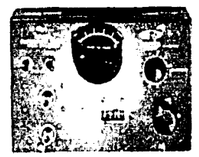
Write for your free copy of Narda's new 1959 catalog.
Address: Dept. IRED-3



MAXIMALLY FLAT COAXIAL COUPLERS

A new series of coaxial directional couplers, pioneered by Narda, presenting the flattest frequency response of any coupler manufactured today. Coupling variation is only ± 0.2 db over a full octave; deviation of mean value from nominal is only ± 0.3 db. Calibration accuracy is ± 0.1 db and 5 calibration points are engraved on the nameplate of each unit. Intermediate points may be determined at a glance. Connectors are Series N Female; others available on special order. Models are available covering frequencies from 240 to 11,000 mc, most in both 10 and 20 db versions.

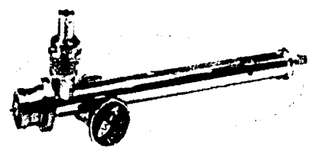
10 models . . . $200



S to X BAND FREQUENCY METER

The only single instrument covering 2,350 to 10,500 mc., and less expensive than any combination covering same frequencies. Completely self-contained; built-in detector and indicating meter; nomograph type calibration chart converts digital counter readings to frequency in mc., to rated accuracy of 0.2%.

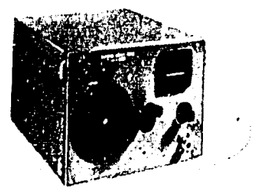
Model 802B . . . $785.



RF PROBE

A precision tuneable RF Probe with optional detector (included). Fine wire probe is adjustable in depth over a wide range by a fine-pitch threaded knob. Probe pickup may be tuned over the range of 900 to 18,000 mc. Insertion loss: 25 db or less in most slotted lines.

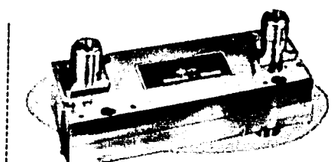
Model 229 . . . $125.



ECHO BOXES

C Band and X Band Echo Boxes with high Q resonant cavities used for rapid testing and evaluation of radars. Frequency indication is direct reading in megacycles; resonance indicator is panel microammeter. Complete with carrying case.

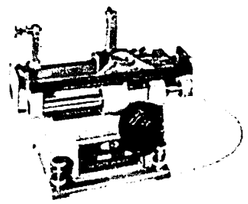
C Band (Loaded Q: 50,000) . . . $ 970
X Band (Loaded Q: 90,000) . . . $1500



COAXIAL HYBRID JUNCTIONS

For use in duplexers, mixers and other circuits requiring power division into two lines. Signal into one terminal appears at two opposite terminals, equal in amplitude, but shifted 90 degrees. Features in-line terminals for operation of TR tubes between a pair of hybrids; ruggedized construction; equal power split, ± 0.25; VSWR: 1.2; isolation: 20 db. Three models cover frequencies of 46-950, 950-2000, 2000-4000 mc.

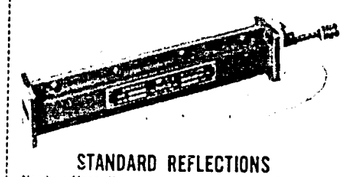
All models . . . $225 each



IMPEDANCE METERS

Carriage mounting and drive mechanism are integral with the transmission line casting, for permanent accuracy and freedom from slope errors. Angle-mounted, scale and vernier. Removable supporting stand. Coverage from 2600 to 90,000 mc; coaxial models, from 1500 to 90,000 mc—all accurate for VSWR's of 1.01.

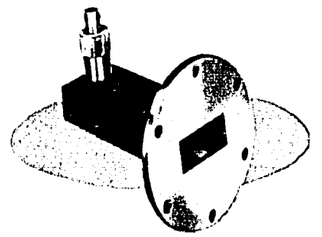
13 models from $250 to $425.



STANDARD REFLECTIONS

Narda offers five values of reflections for each of six different waveguide sizes. Provides calibrated reflections or VSWRs for use in standardizing reflectometers or calibrating slotted line impedance meters. Five values of reflection coefficient in each waveguide size.

Six models from $125 to $300.



BOLOMETER AND THERMISTOR BROADBAND MOUNTS

A new series of Narda matched mounts, offering the optimum in accuracy and flexibility, with instant replacement of element. Bolometers and thermistors, available from stock, plug in without tools and without need for adjustments. VSWR is extremely low over the full waveguide band. No tuning required.

$60 to $210

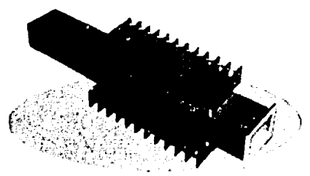
Narda-UHF and Microwave products from 200 to 90,000 Mc

WAVEGUIDE TERMINATIONS

Narda Waveguide Terminations provide an exceptionally low VSWR (less than 1.02) over the entire frequency range of the waveguide. Power is in excess of 1 kw peak, 1 watt average. Standard cover flange input.

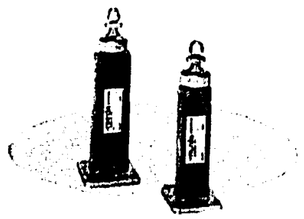
13 models from $20 to $45.



HI POWER TERMINATIONS

An improved type capable of handling extremely high power without deteriorating under high temperatures. Designed for operation over the entire waveguide band with average VSWR approx. 1.05. Heat dissipating fins at regions where most power is absorbed.

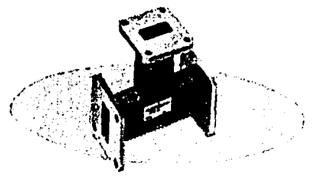
Seven models . . . $125 to $700.



ADJUSTABLE WAVEGUIDE SHORTS

Tuneable shorts of the trap or non-contacting type for minimum r-f loss for use in many tuning and measurement applications. Tuned by a knurled lead screw with locking nut, except for model covering 12.4 to 18.0 kmc, which uses micrometer drive. Models to cover bands from 2.60 to 90.0 kmc.

13 models from $40 to $90.

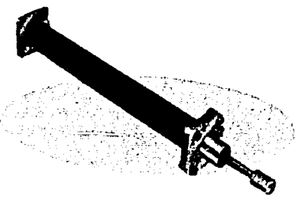


TEE SECTIONS

Waveguide tee sections for making connections in microwave circuits corresponding to series and shunt connections at lower frequencies. Very tight tolerances permit use as a power divider. Branches are terminated with standard cover flanges.

Thirty models from $35 to $275.

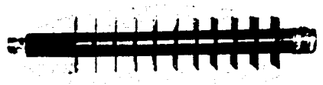
Write for your free copy of Narda's new 1959 catalog. Address: Dept. IRED-3



SLIDING TERMINATIONS

The most convenient means for evaluating the residual VSWR of slotted lines. VSWR of the element is 1.01 or less, from 1100 to 90,000 mc. The sliding feature makes these terminations particularly suitable for evaluating residual VSWR of impedance meters.

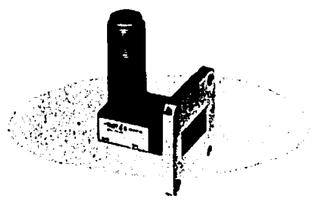
13 models from $60 to $90.



COAXIAL HI POWER TERMINATIONS

Useful over the complete frequency range from 700 to 12,400 mc, with a VSWR of 1.20 or less and under 1.1 from 1000 to 9000 mc. Designed for power levels up to 200 watts average and 50,000 watts peak. Efficient heat-dissipating fins permit withstanding temperatures in excess of 500° F.

Model 369, NF & NM . . . $250
Model 369, CF & CM . . . $270



ADAPTERS

These adapters provide a low VSWR, lossless transition from rectangular waveguide to type N coaxial line. Broadband design provides bilateral VSWR below 1.25 over the complete waveguide frequency range. Small but rugged, for both laboratory and field use.

Seven models from $25 to $175.

TWISTS

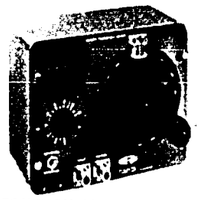
Narda waveguide twists provide a smooth 90 degree twist in waveguide orientation. Standard models use brass waveguide and two flanges equivalent to standard cover flanges. Other flange combinations, waveguides and lengths, available on special order.

13 models from $40 to $175.

COAXIAL TERMINATIONS

Narda Coaxial fixed and sliding Terminations are the first and only to cover the entire frequency range S to X band; provide accurate reference for coaxial component VSWR measurements. VSWR of the terminations is 1.05 or less. Travel of sliding termination is in excess of half wavelength at lowest frequency.

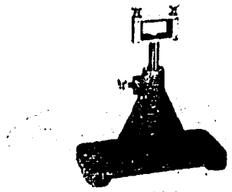
Fixed: $55 to $58 Sliding: $110 to $116



UHF FREQUENCY METER DETECTORS

The only direct reading frequency meter detectors available for the UHF range. Absorption type meters, with 0.2 db insertion loss, each includes resonant cavity, coaxial switch, crystal detector, current meter, sensitivity control, and type N input and output terminals. 200-500 mc, 500-1500 mc., 1500-2400 mc.

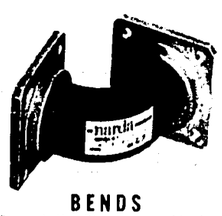
Three models . . . $375 each.



STANDS AND CLAMPS

Heavy cast iron Model 3 stands for use with Model 2 Series Clamps. Rectangular base for stability and closer spacing when required. Knurled screw provided for height adjustment. Clamps are felt lined to provide secure clamping action without marring surfaces or finishes.

$3.50 to $5.50.



BENDS

Narda E – and H – Plane waveguide bends for use where a 90 degree angle is required with negligible reflection of the microwave signal. VSWR equals 1.05 maximum. Standard cover type flanges. Special flanges, materials and dimensions available on special order.

13 models from $25 to $100.

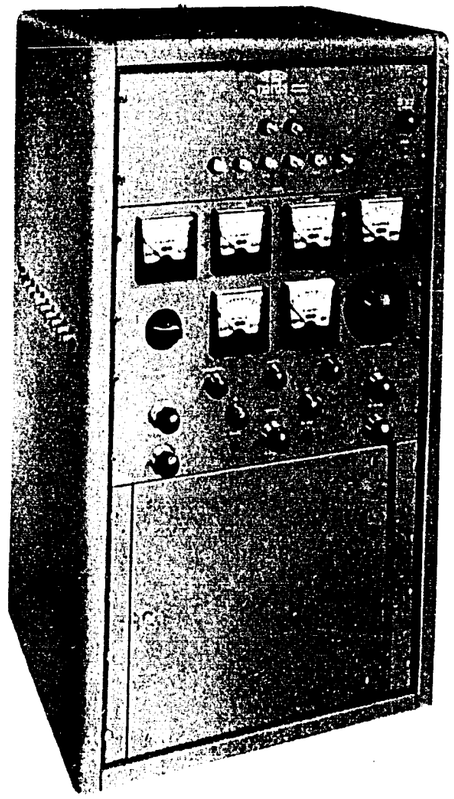
NEW FROM NARDA

Model 10001 $4700.



High Power MICROWAVE MODULATOR *accepts over 40 magnetrons!*

Here's the first of a series of new products from Narda's recently-established High Power Electronics Division! A high power Microwave Modulator that permits installation **inside the unit** of any of more than 40 magnetrons! Complete, compact and self-contained, it accepts magnetrons covering 3,200 mc to 35,000 mc, with peak outputs from 6 KW to 120 KW. Model 10001 features a completely interlocked circuit, with all high voltage leads and connections **internal,** for maximum safety; solid state high voltage bridge rectifiers for longer life and reduced heat output (prolonging life of other components, too); and built-in meters and viewing connectors for all principal parameters.

Other features are shown below. For complete specs and a list of at least 40 magnetrons suitable for use with the 10001, write Narda's High Power Electronics Division (HPED) at Dept. IRED-9.

SPECIFICATIONS

High voltage supply: Continuously variable from 0 to 4 KV at 100 ma; **Magnetron filament supply:** Cont. variable from 0 to 13 volts at 3 A; **Rep. rate generator range:** Cont. variable from 180 to 3000 pps; **Pulse width:** 1 microsecond at 70% points, rise time 0.15 microseconds, max. slope 5% (other pulse widths available); **Size:** 38" h, 22" w, 18" d. **Weight:** 150 lbs.

Complete 1959 catalog available on request.

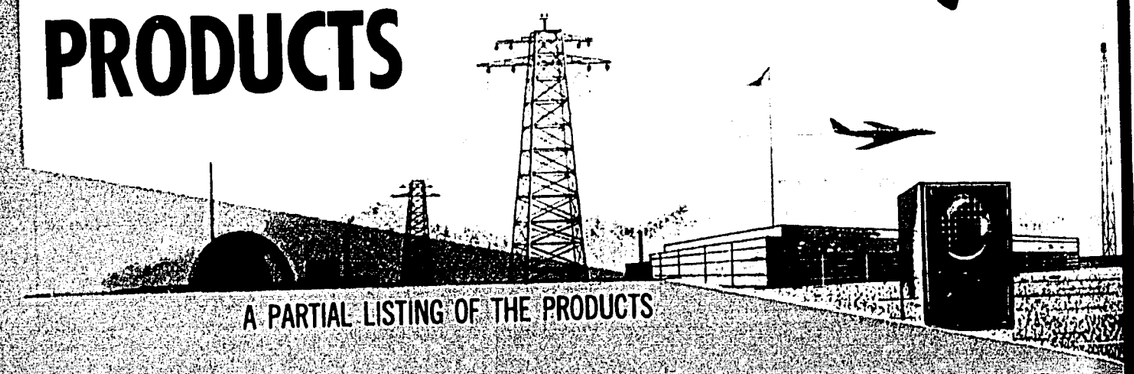
BUYERS GUIDE FOR ITT PRODUCTS

Components Division

Components & Tubes

HIGH RELIABILITY FOR ELECTRONICS

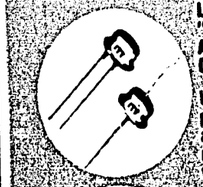
ITT Components Division, a unit of the world-wide International Telephone and Telegraph Corporation, offers high reliability electronic components for industrial and military applications.



A PARTIAL LISTING OF THE PRODUCTS OF ITT COMPONENTS DIVISION

diffused junction silicon devices standard JEDEC packages

Dual positive hermetic sealing — maximum heat transfer — withstand high current surges — designed for highest electrical efficiency, and maximum operating reliability to meet military specifications.

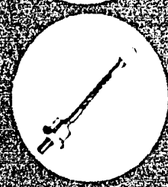


LOW POWER TYPES "TOP-HAT" (SERIES R) AND "DERBY" (SERIES C) CONFIGURATIONS

Up to 1.5 amps for printed circuit or wire-in applications with voltage ratings up to 800 volts PIV.

MEDIUM POWER TYPES SERIES "D", "K" AND "U"

Rated up to 30 amps at 150° C. case temperature. Voltage ratings up to 800 volts PIV.



HIGH POWER TYPES SERIES "T"

Ratings up to 70 amperes at 150° C. case temperature. Voltage ratings up to 600 volts PIV.

ZENER VOLTAGE REGULATOR DIODES

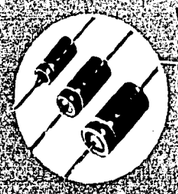
3.9 to 100 volts ±5% and ±10% tolerances. 750 milliwatt, 1 watt, 3.5 watt and 10 watt ratings. Axial lead or stud mountings.

HIGH CURRENT SILICON RECTIFIERS

Silicon rectifier assemblies to provide desired current and voltage output. Both single and three phase assemblies are available.

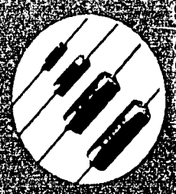
tantalum capacitors

ITT miniature tantalum capacitors fill the ever growing need for lightweight, miniaturized high reliability components to meet military specifications. These capacitors offer greater electrical stability with rugged construction and larger capacity per unit volume.



WET ANODE TYPES

3 Case Sizes, with a non-corrosive electrolyte. Operate without derating from 55° C. to 125° C. Designed to MIL specifications. Large capacity per unit volume.



SOLID ANODE TYPES

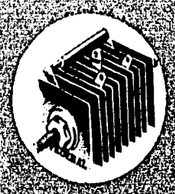
4 Case Sizes . . . with excellent frequency stability over wide operating temperature ranges . . . hermetically sealed. All types designed to MIL specifications.

GLASS SEALS

Compression seals, solder seals, pressure, standoff and spadenut terminals, condenser end seals and transistor closures, designed for uniform seal integrity and high electrical insulation under the most severe conditions. Standard types and custom designs are made to your specifications.

hi-density selenium rectifiers

ITT Hi-Density Selenium Rectifiers utilize maximum cell area, providing high electrical output in relation to weight, good voltage regulation within rated capacity — superior quality and performance characteristics for industrial and military applications.



NEW! 45 VOLT INDUSTRIAL RECTIFIER

Smaller, lighter, more efficient selenium rectifiers can be designed with ITT's new 45 volt cells. Other features include: smaller mounting dimension, long life, low temperature rise, conservative ratings and reliability at higher temperatures — plus cost reductions.

NEW! DOUBLE DENSITY INDUSTRIAL RECTIFIER

Carefully controlled evaporation techniques permit ITT's Hi-Density selenium rectifier cells to carry double the current of conventional cells — 180 milliamperes per square inch. This process features rectifiers of small size, high operating efficiency at a lower cost.

CONTACT PROTECTORS

Suppresses voltage surges in inductive circuits. Extends contact life by reducing erosion due to sparking and preventing component failure. Reduces electrical noise. Available for DC or AC applications.

New! Ultra-fast to protect transistors against over voltage.

power tubes

ITT power triodes and rectifier tubes for communications, dielectric and induction heating, random noise generators and pulse operation applications are outstanding. An exceptionally wide range of tubes are available in air cooled, water cooled and vapor cooled types.

POWER TRIODES

ITT Power Triodes, for CW and pulse operation are used as modulators, amplifiers and oscillators in communications and industrial service. Water cooled and air cooled types.

EVAPORATIVE COOLED POWER TRIODES

Evaporative Cooled Power Triodes feature high anode dissipation, high loading capacity and exceptional overload capability.

SUPER-POWERED TRIODES

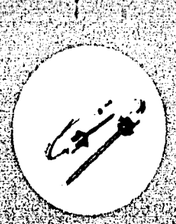
Super-powered Triodes, developed by ITT Components Division, for use as modulators, amplifiers and oscillators in communication and industrial services.

CERAMIC POWER TRIODES

Ceramic Power Triodes with rugged, coaxial design for modern requirements in high temperature, high frequency, high power applications.

special purpose tubes

Special Purpose Tubes made by ITT are available in many standard types and sizes, and custom designed types are also made for specific applications.



TRAVELING WAVE TUBES

A rugged line of traveling wave tubes with metal envelopes and ceramic seals. They are of the helix type, self-aligning in the external solenoid, and are provided with either coaxial or waveguide fittings.

IATRON TUBES**

Iatron storage tubes are used in radar and electronic display systems. They feature extreme brightness for day light viewing and controlled storage time. Information can be written, stored and erased with ease. Direct view and projection types.

HYDROGEN THYRATRONS

ITT - Kuthe hydrogen thyratrons, made by Kuthe Laboratories, Inc.*, the world's largest manufacturer of gas-filled thyratrons and diodes, feature an extensive line of glass or ceramic types.

*A unit of ITT Components Division

GLASS HYDROGEN THYRATRONS

ITT - Kuthe hydrogen thyratrons used in pulse forming circuits and other applications deliver peak powers up to 33 megawatts. High altitude designs are available. Hydrogen reservoirs are used for long life.

CERAMIC HYDROGEN THYRATRONS

Ceramic hydrogen thyratrons feature peak performance with size reduced by one-third over equivalent glass types. They can withstand greater shock and vibration and high ambient temperatures up to 125° C.

RESEARCH AND DEVELOPMENT TYPES

In addition to the standard products of the ITT Components Division, the ITT Laboratories are making a variety of other types, in limited quantities, for development purposes. These include:

- Image Converter Tubes
- Multiplier Photo Tubes
- Lead Telluride Infrared Detectors
- Barrier Grid Storage Tubes
- Electro Static Focusing TWT
- Permanent Magnet Type TWT
- Super Powered Pulse Triodes

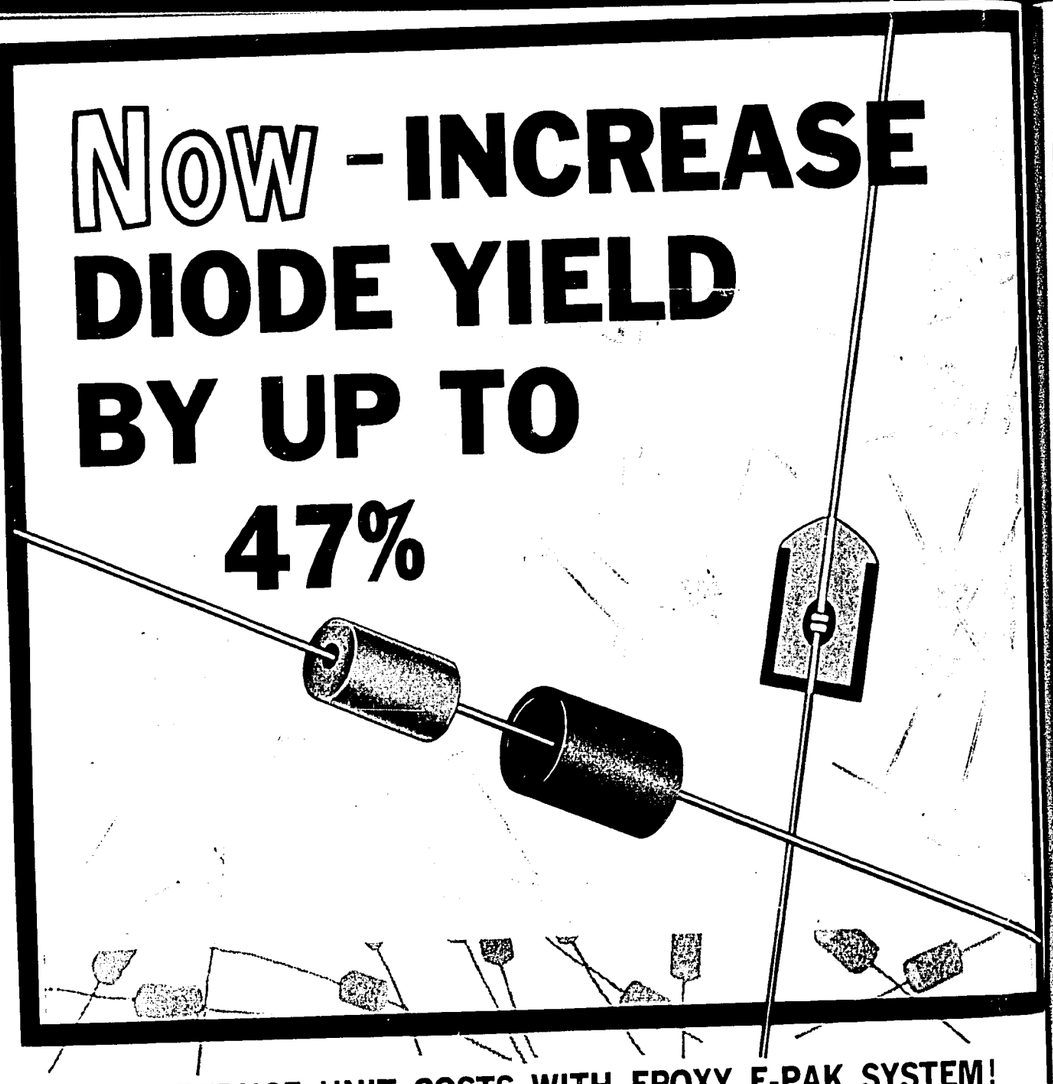
NOW - INCREASE DIODE YIELD BY UP TO 47%



AND REDUCE UNIT COSTS WITH EPOXY E-PAK SYSTEM!

Now, Epoxy Products brings the mass production economy of the famous E-Pak system* to diode encapsulation! It works like this: the diode is inserted into a preformed yellow epoxy E-Form pellet . . . both pellet and diode are then placed in a molded epoxy case . . . heat is applied, the pellet melts, cures, seals the unit completely. It's a quick, efficient operation that requires no expensive fixturing, yet meets all applicable Mil-Specs (including MIL Std. 202-A).

This system eliminates glass to metal seals and the accompanying disadvantages of glass cracking, and weld contamination. Heat dissipation is exceptional.

These rugged epoxy packages are homogeneous and resistant to 95% relative humidity for 1,000 hours. They can be cycled from —55° C to +200° C. The yellow pellet provides immediate cathode identification and quick visibility.

If you encapsulate diodes, **every other method is now obsolete!** Write today for complete information and samples. Inquire, too, about the applications of E-Pak system to other semiconductor devices.

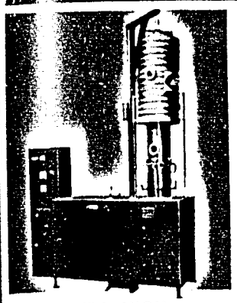
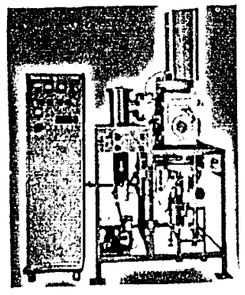
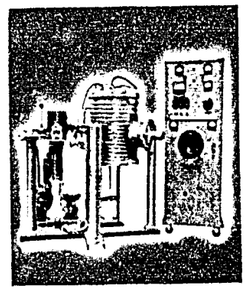
Kinney® HIGH VACUUM EQUIPMENT



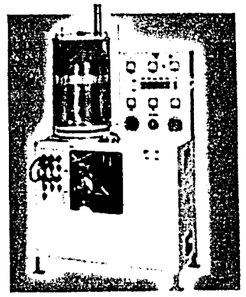
ULTRA HIGH VACUUM SYSTEM
The KINNEY Model UH-9 Ultra High Vacuum System is the first standard working equipment producing pressures in the order of 1×10^{-9} mm Hg. with realistic time cycles. The UH-9 is equipped with fittings customarily found in High Vacuum Evaporators but operates at much lower pressures. Ask for Bulletin 4150.1.



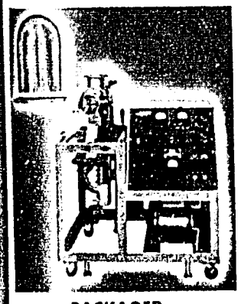
FLOATING ZONE REFINER
An important advance in the purification of semi-conductor materials and refractory metals, this KINNEY development will process loads 6" to 10" long and up to 1½" in diameter with purification heretofore unattainable. Chamber suitable for use with vacuum or inert gas atmosphere. Ask for Bulletin 4501.1.



F-9 UNIVERSAL LABORATORY FURNACE
Laboratory furnace of improved design with a capacity of 5 lbs. of steel or similar volume of other metals if crucible is tilt poured; or 25 lbs. if bottom plug pouring is employed. Can be provided with resistance or induction heaters to attain temperatures in excess of 2000° C. Ask for Bulletin 4560.1A.

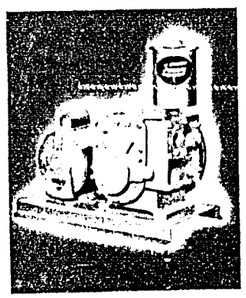


HIGH VACUUM EVAPORATORS
The KINNEY Line of High Vacuum Evaporators embraces sizes from small laboratory units to high production equipment with chambers 6 ft. in diameter. Model R-2 illustrated has a high capacity pumping system which will produce pressures in the order of 1×10^{-6} mm Hg. in seven minutes. Ask for Bulletin 4100.1D.

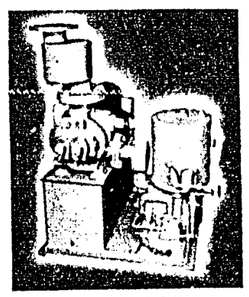


PACKAGED PUMPING SYSTEMS
KINNEY Packaged Pumping Systems afford speedy evacuation of chambers, tanks, bell jars, tubes, etc., with ultimate pressures to 1×10^{-7} mm Hg. Systems consist of KINNEY Cold Trap, Fractionating Oil Diffusion Pump, two-stage Mechanical Pump, Operating and Control Panel. Ask for Bulletin 3000.1.

SINGLE-STAGE VACUUM PUMPS
The KINNEY Line of single-stage Pumps includes 3 Simplex and 11 Duplex models embracing a range from 13.0 to 780 cfm free air displacement. These oil-sealed Rotary Piston Pumps feature gas-ballasting and develop ultimate pressures to .010 mm Hg. or better. Ask for Bulletin 3120.1.

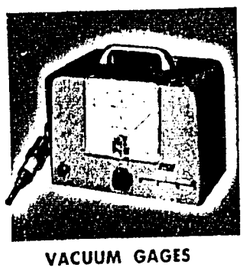


TWO-STAGE VACUUM PUMPS
Designed for work in the low micron area, KINNEY two-stage, gas-ballasted, oil-sealed mechanical Pumps range in capacities from 2.0 to 46.0 cfm free air displacement. They attain ultimate pressures in the order of .0002 mm Hg. or lower. Ask for Bulletin 3150.1.



MECHANICAL BOOSTER VACUUM PUMPS
A major advance in vacuum technology . . . developed to produce clean, dry vacuum with maximum speed and at lowest cost. These Kinney two-stage and four-stage Pumps, covering a range from 30 to 5100 cfm free air displacement, attain ultimate pressures of .0002 mm Hg. or lower. Ask for Bulletin 3180.1.

OIL DIFFUSION PUMPS
KINNEY High Speed and Fractionating Oil Diffusion Pumps offer high pumping speed in the low micron region. High Speed models 1" to 10" . . . Fractionating models 2" to 16" and higher. KINNEY straight-through and right-angle Poppet Valve Baffles also available. Ask for Bulletins 3270.1 and 3290.1.



VACUUM GAGES
The KINNEY family of integrated Vacuum Gage Systems covers a broad range of pressures. The new KINNEY Compensated Thermocouple Gage accurately spans the range from 3000 to 1 micron. The KINNEY TIG-5 Thermocouple/Ionization Gage gives accurate readings from 3000μ to 1×10^{-3} mm Hg. Ask for Bulletin 3800.1.

HIGH VACUUM ACCESSORIES
High Vacuum Valves, Packaged Power Units, Low Voltage and Rectified Power Supplies, Hermetic Sealing Units, Liquid Nitrogen Cold Traps, Complete Gage Systems, Ionization Gage Tubes, Feed-throughs of all sizes, Rotary Motion Devices, Headers, Filament Holders, Pyrex and Stainless Steel Bell Jars, Bell Jar Guards, Japanese Fan Shutters, Work-Holding Fixtures, Tripods, Gaskets, Highest Purity Coating Materials.

KINNEY MFG. DIVISION

3631 WASHINGTON STREET • BOSTON 30 • MASS.

Please send literature on the following KINNEY products —

- ☐ High Vacuum Pumps
- ☐ Mechanical Booster Pumps
- ☐ Oil Diffusion Pumps
- ☐ Packaged Pumping Systems
- ☐ High Vacuum Gages
- ☐ Ultra High Vacuum Systems
- ☐ Floating Zone Refiner
- ☐ Laboratory Furnaces
- ☐ Evaporators
- ☐ High Vacuum Accessories

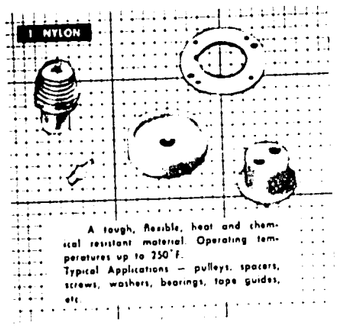
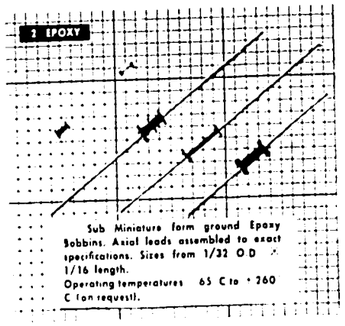
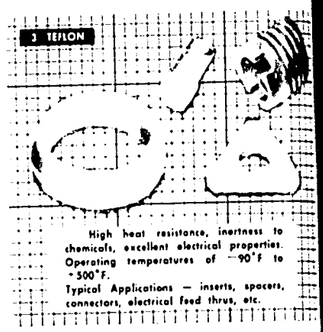
For details, circle #151 on Reader Service Card



A tough, flexible, heat and chemical resistant material. Operating temperatures up to 250°F.
Typical Applications — pulleys, spacers, screws, washers, bearings, tape guides, etc.



Sub Miniature form ground Epoxy Bobbins. Axial leads assembled to exact specifications. Sizes from 1/32 O.D. x 1/16 length.
Operating temperatures 65 C to +260 C (on request).



High heat resistance, inertness to chemicals, excellent electrical properties. Operating temperatures of −90°F to +500°F.
Typical Applications — inserts, spacers, connectors, electrical feed thrus, etc.

NORRICH
PRECISION ELECTRONIC COMPONENTS

Here are some of the quality parts being manufactured at Norrich for more reliable electronic products.

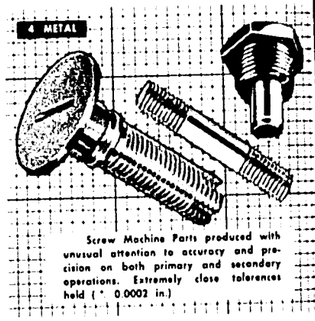
Norrich specializes in the machining of precision plastic and metal components for Electrical, Chemical and Mechanical applications. This specialization is based on a wealth of experience and skill acquired in working with all types of plastic and metal materials.

Advanced production methods, ultra modern production and inspection equipment, continuous quality control, and engineering skill enables N.P.C. to meet critical delivery schedules at economical costs.

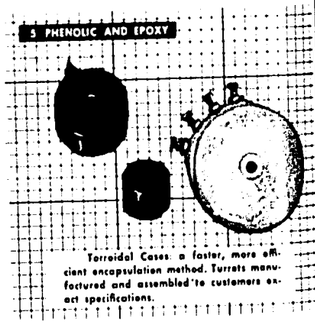
Norrich is actively engaged in producing custom parts for aircraft, missile, instrument, radar, radio, etc; for the foremost electronic manufacturers.

No matter what your problem, Norrich Plastics feels confident in its ability to aid in its resolution; drawing fully on extensive facilities, engineering and experience to produce precision parts in any quantity.

Send us your prints; analysis, evaluation and recommendations given. Call or write for technical specifications, descriptive brochures and quotations.



Screw Machine Parts produced with unusual attention to accuracy and precision on both primary and secondary operations. Extremely close tolerances held (± 0.0002 in.)



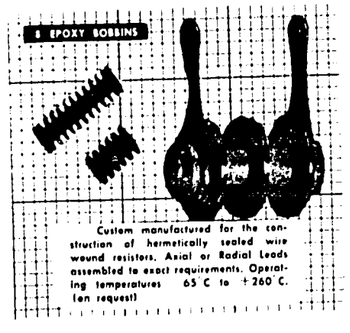
Toroidal Cases: a faster, more efficient encapsulation method. Turrets manufactured and assembled to customers exact specifications.

Screw Machine Parts. Extremely good tensile and impact strength.

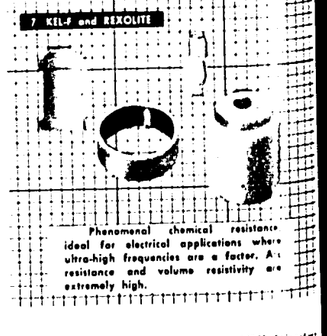
NORRICH PLASTICS CORP.

107-109 WEST 18th STREET, NEW YORK 11, N. Y. WAtkins 4-8360-1

For reliable encapsulating and encasing of Resistors, Capacitors, Coils, Transformers and other applications where hermetic sealing is required. Wall thickness's to .005.



Custom manufactured for the construction of hermetically sealed wire wound resistors. Axial or Radial Leads assembled to exact requirements. Operating temperatures 65°C to +260°C. (on request)



Phenomenal chemical resistance ideal for electrical applications where ultra-high frequencies are a factor. Arc resistance and volume resistivity are extremely high.

The CARE that produces QUALITY in THERMISTORS

Besides the technology and manufacturing resources you'd expect of Keystone, there's a great deal of individual patience and care bound up in each thermistor we make. Our Thermistor Division is staffed by people who appreciate the importance of precision workmanship—and many of them have been with us since we made our first negative temperature coefficient resistance unit over 20 years ago. ● Along with our complete laboratory, engineering and manufacturing facilities, our "people who care" have made Keystone *the key name* in thermistors today.

How do you benefit by all this? It's simple. Whether the thermistor you need is as large as your thumb or as small as a gnat's eye, it will perform as specified . . . on earth, in space, or below the seas . . . if made by the people at Keystone. ● We'd be more than pleased to hear from you about your possible application for thermistors. Chances are we can help. Write us.

Amazing New **WEE-DUCTOR**

The R. F. Choke that's so small you can pack 200,000 to a cubic foot

Tiny, new WEE-DUCTOR covers a full range of inductances from 0.10 μH to 1,000 μH, yet it measures only 0.150" x 0.375" and occupies a volume of less than 0.0066 cubic inch!

Unique, new, ferrite sleeve and core construction provides 10,000 to 1 inductance range in a tiny package . . . yet it still allows for a high current rating at 125°C operating temperature.

WEE-DUCTOR is the latest addition to the Essex Electronics line of standard R.F. Choke Coils . . . write today for detailed data sheet describing this amazing new miniature choke with the expanded range of inductances!

Essex Electronics Standard Line of R.F. Chokes

Essex Part Number	L μH	Max. Res. Ω	I Max. ma	Dia.	Length
WEE-DUCTOR	0.10 - 1,000	0.035 - 14.9	3000 - 150	0.157	0.375
RFC-S	0.10 - 100	.02 - 6.0	4000 - 220	0.188	0.44
RFC-M	1.0 - 1,000	.04 - 21.0	2700 - 125	0.25	0.60
RFC-L	1.0 - 10,000	.03 - 80.0	4000 - 80	0.31	0.90

Compact! Easy to Read! Union Data Display Indicators

Union Switch & Signal makes two types of electro-mechanical, DC-operated data display indicators: digital types, displaying 10, 12, or 16 characters on a wheel; and alpha-numerical types, displaying up to 64 characters on a MYLAR* belt. Character assignments can be furnished as required.

TRANSLATION Both Digital and Alpha-Numerical Indicators operate directly on binary codes on a null-seeking basis. This eliminates the need for external equipment for translation from binary to decimal code, as required with other display devices.

VISUAL READ-OUT Indicator packages are designed for quick, easy readability, even when indicators are mounted in rows.

INFINITE RETENTIVITY The indicators require power only during the response time, because they are of the null-seeking type. Once positioned, the indicators *retain* the data visually and electrically until a new code is transmitted.

ELECTRICAL READ-OUT The design of the decoding and control portions of the indicators provides electrical read-out of data in the same form as the input. The data can be read continuously or periodically without erasing the stored information.

USES These indicators can be used in the output of digital computers, in teletype receiving equipment, in telemetering systems, or wherever data needs to be displayed. Bulletin No. 1015 gives you complete information.

**Dupont's synthetic fiber*

Bulletin No. 1015 gives you complete information.

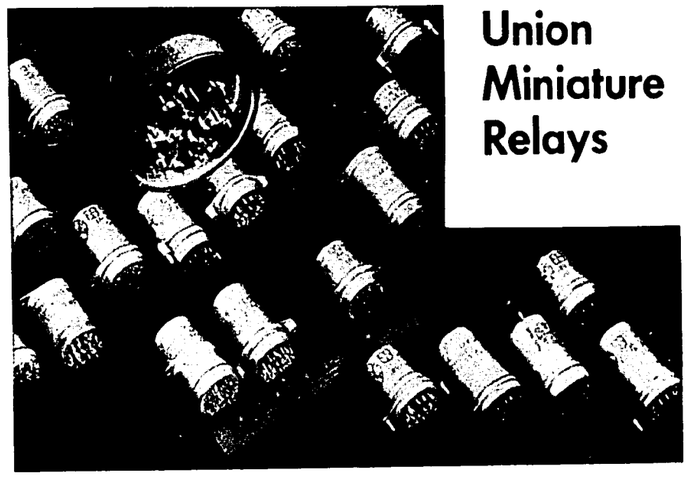
Tops in reliability!



Union Miniature Relays

Used in seven successful missiles. Union Miniature Relays originally were developed for air-borne and guided missile electronic equipment; they meet or exceed the requirements of MIL-R-25018, MIL-R-6106C, and MIL-R-5757C. They are now being utilized in the following missiles: The Matador, Thor, Talos, Vanguard, Atlas, Titan, and the Jupiter C.

The excellent reliability and small size of the Union Miniature Relays have led to their use in traffic control systems, computers, resistance welders, and other equipment.

OUTSTANDING FEATURES

HI-LO CONTACTS—Permit high and low load handling in same relay. Dry-circuit contacts available for extremely low-level loads.

COIL RESISTANCE—In standard case, from 0.9 to 8750 ohms; in long case, from 1.6 to 13,000 ohms.

TEMPERATURE RATING—Class A −55 to +85°C; Class B −65 to +125°C.

AC OR DC—Nominal operating voltages from 1.5 to 160 volts, DC; 115 volts, 60 to 400 cps, AC. Built-in rectifiers in AC relays.

TYPES AND MOUNTINGS—6PDT or 4PDT; plug-in or solder-lug connections. All usual mountings.

SPECIALS—Slow-acting relays if you need a differential between operating time of various relays. Plate-circuit relays—operate on less than 8 milliamperes; double-coil relays—either coil operates relay. Write for complete information.

"better than we expected!"

SMI-C Subminiature Series* Precision Connectors

When our connectors meet your specifications perfectly . . . well that's all part of our job. But when they exceed requirements, we drop all modesty and do a little shouting. This was the case with our new SMI-C Connector Series, causing one of our leading customers to exclaim "Better than we expected!" These are the newest members of the family of over 150 reliable types of U. S. COMPONENT connectors, products of a close liaison between application engineers and our design team.

- STAINLESS STEEL REINFORCING RETAINER provided under each screwlocking element removes all torque stresses from molded bodies, avoiding breakage.
- POSITIVE RE-ENTRANCY OF MALE PINS assured each time by flanged guide female contact.
- SELF-ALIGNMENT ACTION assisted by provision of wider countersink on upper end of contact.
- IDEAL FOR CRITICAL ENVIRONMENTAL CONDITIONS and extremes of military applications.
- 7-11-14-20-26-34 contacts. Other configurations upon request.

HELPFUL HINTS
for using the IRE DIRECTORY

A few minutes' study of the basic layout of the IRE DIRECTORY will help you to find the information for which you are looking more quickly and more accurately. At first glance, the IRE DIRECTORY may seem to be confusing, but by using the various portions of the book as listed below, you will find your way around easily, and will discover that it is actually a very simple arrangement, and a much more logical one than a purely alphabetical terminology listing.

PINK SECTION at the front of the products and firms section contains a terminology index listing every product, major and minor, for which a list of manufacturers is given. Page numbers refer you to the page on which the listings for that product begin. Following this alphabetical index is a copy of the questionnaire which is sent to the firms who have furnished us with product information. A quick look through this questionnaire will help greatly in understanding the product arrangement. At the top of the first page of the pink section is a small index referring you to the opening page of the complete-data spread section, the alphabetical directory, and each of the three product directories.

THE COMPLETE DATA SPREAD SECTION (pages 1-160) contains product advertisements of great usefulness to the reader. Most of these advertisements are two pages or more, and all of them contain complete information on the products manufactured by the advertising firms—specifications, prices, illustrations, and suggested applications.

ALPHABETICAL DIRECTORY OF MANUFACTURERS (pages 161-264) contains a list of 4,304 firms representing the majority of buying and selling power in the radio-electronic industry. Each firm listing contains the complete mailing address and telephone number for the firm. Following the state name in the firm address, a list of code numbers is given. These numbers refer to the 102 major products listed in the book (for quick reference to the meaning of the codes, use the questionnaire form in the pink section).

THE THREE DIRECTORIES OF PRODUCTS ARE:

1. Complete Equipment
2. Components
3. Materials and Services

This breakdown into three directories saves you from traveling through many products in which you are not interested at the moment, and helps you to turn immediately to the listings for the type of product you want, following a straight line to your destination. Use the Machol edge index at the top of the first page of the pink section to locate immediately the first page of the appropriate directory, then use the Machol edge index at the beginning of each directory to find the specific product you want. You don't even have to know the page number—the index will find it for you automatically!

102 MAJOR PRODUCTS are listed within these three Directories. Each product listing contains a number of sub-headings so that you may know specifically what each firm makes. To interpret the code numbers shown after each firm's listing, consult the first page of that product class, where the sub-headings are defined. You will note that advertisements are positioned throughout the book in the most appropriate listing section, so that the advertisement for a relay manufacturer will appear in the relay section, to help you with further information on his product. Every advertiser's listing shows you the page number on which his advertisement may be found, and you will derive more value from this book if you consult these advertisements for facts you cannot find in the listings.

COMPLETE ADDRESS LISTINGS are given only for advertisers in this section. If you wish to locate the address and telephone number for any other firm, it will be necessary to use the alphabetical directory.

THE DISTRIBUTION SECTION is class 102, the last class in the book. This section contains a list of 1399 manufacturers representatives, distributors and jobbers, grouped geographically. See page 702 for a more complete explanation of the use of this section.

ADVERTISER'S INDEX appears on pages 154-160 and on pages 726-728.

How to Use the Machol Edge Index

High speed reference is a major objective of the IRE DIRECTORY. To this end we have adopted the Machol Edge Index system, and these indexes:

Advertisers Index, pages 154-160 and 726-728.

Key to Products, Pink Section.

Index to Spreads, 1.

1	COMPLETE DATA SPREADS
161	ALPHABETICAL COMPANY LIST
265	DIRECTORY I COMPLETE EQUIPMENT
365	DIRECTORY II COMPONENTS
597	DIRECTORY III MATERIALS & SERVICES

Detailed Machol edge indexes will be found on the first page of the alphabetical Directory and each of the three major product Directories, pages 161, 265, 365, and 597. The Machol system will help you find both alphabetical and product sections swiftly.

163	A

HOW TO USE

1. Bend the Directory almost double with the front cover page on the inside.
2. Hold in your right hand with your four fingers near to the bound edge and your right thumb near the middle of the open side of this page.
3. From the heavy or light line symbol adjacent to the subject you seek, run your eyes across the page edges until you reach the horizontally corresponding symbol.
4. OPEN THERE!

LICENSE NO. 25
MACHOL EDGE INDEX PATENT #2680630

1960 Edition prepared by The Advertising Department of the Institute of Radio Engineers, 72 W. 45th St., New York 36, N.Y.
William C. Copp, Mgr.; Lillian Petranek, Asst.; Carl Maier, Production; Frank G. MacAloon, Research.

Choose the correct cleaner for your purpose!

In determining which ultrasonic cleaning unit to buy, remember that all ultrasonic cleaning systems are not alike. The principle is the same, but the results are not. *The power and frequency of the transducer* are the key factors in determining the success or failure of applying ultrasonic energy for solving industry's cleaning problems. Acoustica research has developed *two* types of transducers for its ultrasonic cleaning units–the *General Purpose* 40kc barium titanate transducer and the *Multipower* heavy duty 20kc transducer. Expert Acoustica engineers are ready to advise you which type will better suit your needs. Mail the coupon below for information–there is no obligation.

Wherever you fly... More Channels nearby!

WITH ARC's NEW TYPE T-25A 360 CHANNEL TRANSMITTER

As air traffic becomes heavier, pilots are busier with more frequent ground communications. To meet this growing need in traffic control, ARC designed the Type T-25A 360 Channel Transmitter with the widest range of frequencies — more than adequate for today or years to come. Weighing only 7.7 pounds including shock mounting, the T-25A provides complete coverage of 360 channels at 50 kc spacing between 118.00-135.95 megacycles. It is a 6-10 watt unit (nominal 8 watts), providing ample range for planning approaches in congested air traffic areas. Power consumption of only 2.0 amperes during transmission on the 28 volt model, plus the 2.0 amps input to the receiver dynamotor that supplies high voltage. This means little added power drain on the electrical system.

This transmitter is recommended for use with ARC's line of tunable receivers, (R-13B and R-19) for a primary communication system on small aircraft or as a "back-up" to ARC Type 210 Transmitter-Receiver on larger aircraft.

Certified to CAA TSO C-37 Category A and FCC Requirements

Engineers: Investigate Career Opportunities at ARC

Aircraft Radio Corporation BOONTON, N. J.

Dependable Airborne Electronic Equipment Since 1928

OMNI/LOC RECEIVERS • MINIATURIZED AUTOMATIC DIRECTION FINDERS • COURSE DIRECTORS • LF RECEIVERS AND LOOP DIRECTION FINDERS
UHF AND VHF RECEIVERS AND TRANSMITTERS (5 TO 360 CHANNELS) • INTERPHONE AMPLIFIERS • HIGH POWERED CABIN AUDIO AMPLIFIERS
10-CHANNEL ISOLATION AMPLIFIERS • OMNIRANGE SIGNAL GENERATORS AND STANDARD COURSE CHECKERS • 900-2100 MC SIGNAL GENERATORS

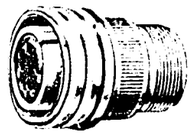
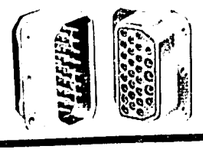
AN MS CONNECTORS a complete selection of standard MIL-C-5015 connectors, including new "Stub E" environmentally resistant constructions. Miniature AN-type 165 series; miniature "Minni E" environmentally resistant connectors. Request Catalog A5 for complete data.



RF CONNECTORS every standard RF Series, N, BNC, C, HN, BN, LC, LT, UHF is available from AMPHENOL. Subminax RF connectors are an expanding line of subminiature types made only by AMPHENOL. Complete engineering services stand behind each AMPHENOL RF. Request Catalog D3.

RACK & PANEL CONNECTORS from the remarkable Blue Ribbon connectors with their smooth-working "ribbon" contacts to new "Poke Home" contact designs, AMPHENOL connectors meet every rack & panel application need. Request Catalog B6.



MISSILE CONNECTORS Breakaways, umbilical and interstage, are designed and produced by AMPHENOL for a large number of missile projects. Each is a special purpose connector, application-engineered for a particular requirement. Write for additional information.

HERMETIC SEAL CONNECTORS new "Identoseal" marking on AMPHENOL hermetically sealed connectors provides clear contact identification in the compression sealed glass inserts. Receptacles to mate with AN-MS, 165 and MinniE connectors. Headers also available. Request Catalog A5.

PRINTED CIRCUIT CONNECTORS 143 Series receptacles mate with standard .055" - .073" boards, 6 to 22 contacts, and with 133 Series plugs and adapters, 10 to 22 contacts. Superior gold-plated contacts, other reliability features. Request Catalog B6.

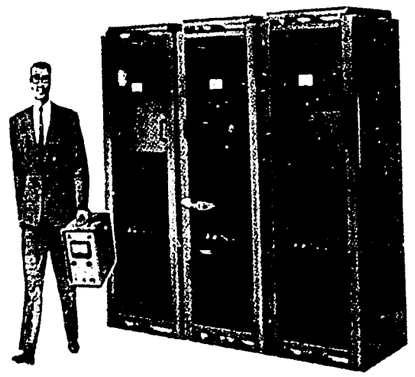
AC POWER

COMPLETELY ELECTRONIC

The Behlman

INVERTRON®

is available in a choice of power and frequency ranges . . .



FROM PORTABLE TO MULTI-KVA MODELS

The Behlman Invertron is a completely electronic A.C. Power Source widely used in research and development, production testing, test consoles, electronic systems or wherever A.C. Power other than that obtainable from the 60 cycle line is required.

INVERTRON®

Models are available with single phase, two phase or three phase output and with either fixed and variable frequencies.

INVERTRON®

A wide range of power ratings are available in standard models with other power ratings on special order.

INVERTRON®

The Invertron features extreme frequency accuracy and stability, exceptional regulation against both line and load, and low harmonic distortion and noise.

INVERTRON®

Specifications for all standard models include 1% maximum distortion, 1% regulation no load to full load, extremely low output impedance, and essentially zero response time.

For further information write or call

Modular construction techniques employed to provide low cost custom as well as standard units.

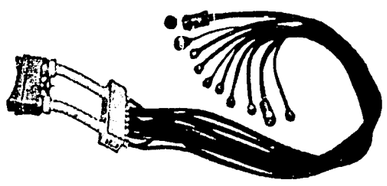
Cable assemblies by BENDIX

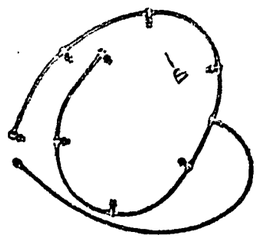
Specialized designs for the most exacting requirements

The versatility of design and reliability of performance offered by Bendix* Cable Assemblies result from over a quarter century of precision manufacturing in this field. Our outstanding research and design facilities are available for custom designing cable assemblies to meet your specialized requirements on each installation. Cable assemblies shown are typical Scintilla Division developments in cabling for aircraft, electronic and missile applications.

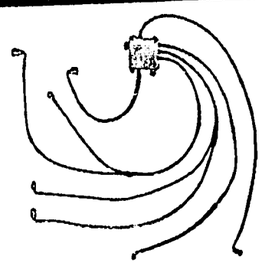
*REG. U.S. PAT. OFF.



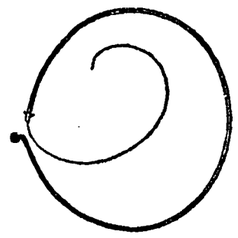
MISSILE CONTROL CABLE: This cable is fabricated using both Benseal® (a plastic molded covering) and Bendix electrical connectors. Protects vital circuitry controlling the firing of missiles.



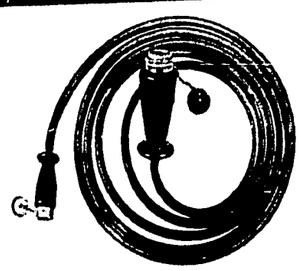
THERMOCOUPLE HARNESS: Flexible, completely sealed and suitable for continuous operation in ambient temperatures of —65°F to 1500°F. Thermocouples are singly detachable and the sealed harness eliminates any chance of trouble from altitude, moisture or other contaminants.



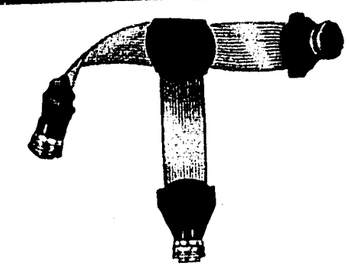
CONTROL HARNESS: This configuration, encased and sealed in metal braid and complete with junction box, can safely withstand the adverse effects of engine environment such as heat, vibration, and oils.



FUEL CELL CABLE: Safely conducts electricity to fuel control valves, pumps, switches and gaging devices immersed within fuel cells. Features: unbroken stainless steel bellows type conduit, double layer protection between current carrying conductors, stainless steel integral connector shells.



HEAVY DUTY CABLE: Ground support cable assembly built and designed for hard usage at missile launching sites. Heavy duty moldings and a tough neoprene tubing combine to resist wear.



RIBBON CABLE: Ribbon type cable terminated to both standard MS or Bendix Pygmy® connectors. Advantages offered by this type of wiring include durability, performance, lightness, plus minimum space requirements.

Export Sales & Service: Bendix International Division, 205 E. 42nd St., New York 17, N.Y. Canadian Affiliate: Aviation Electric Ltd., 200 Laurentien Blvd., Montreal 9, Quebec

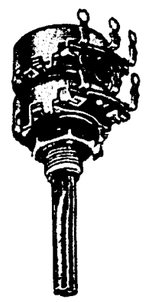
QUALITY AND

For standard and sub-miniature applications—From stock or to your specifications—it's CENTRALAB for electronic components.



VARIABLE RESISTORS

1/10W. Micro-miniature—For transistor circuits, hearing aids. 0.286" diam. 500 ohms to 10 megs.

1/10W. Ultra-miniature—For computers, hearing aids, transistor circuits. 0.502" diam. 500 ohms to 10 megs.

1/10W. Sub-miniature—For military, communications, computer use. 5/8" diam. 500 ohms to 10 megs.

1/4W. and 1/2W. Sub-miniature—For instruments and military. 43/64" diam. 500 ohms to 2.5 megs.

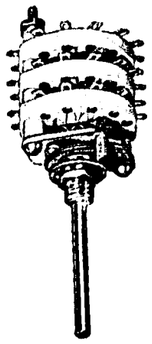
1/4W. Multiple-miniature—Up to 4 variable and 9 fixed resistors on a 3/4" x 2-1/4" steatite plate. 1000 ohms to 5 megs.

1/2W. Standard—For radio, TV. Single, Twin or dual-concentric. 15/16" diam. 250 ohms to 10 megs.

2-5W. Wirewound—For instruments and TV. Single or dual-concentric. 1-5/32" diam. 1 ohm thru 15K ohms.

Write for Group B bulletins.

RELIABILITY



ELECTRONIC SWITCHES

Sub-miniature rotary—15/16" diam. for military and high reliability applications. Rating 0.5 amp. at 6VDC, 100 ma. at 110VAC, Laminated phenolic, steatite, single or multiple sections.

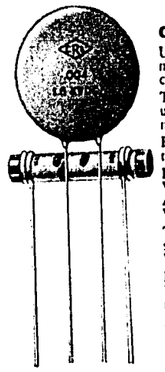
Standard rotary—1-5/16" diam. laminated phenolic or steatite insulation, single or multiple sections. Rating 2 amps. at 15VDC 150 ma. at 110VAC (Resistive load.)

Heavy-duty power—For transmitter, industrial control, laboratory testing, military, commercial. 2-13/16" diam. 7-1/2 amp. rating at 110VAC. 25,000 cycles minimum.

Spring return—1-5/16" diam., coil or C-type springs, phenolic, steatite, single or multiple sections.

Specialized—Lever, slide, tone, tuner sections, others.

Write for Group P bulletins.



CERAMIC CAPACITORS

Ultra-miniature—3 to 12 VDC, 0.22—2.2 mfd.—for low power factor transistor applications.

Temperature compensating—Discs, tubulars, 150 v to 6,000 VDCW, 1 mmf.—0.1 mf. Capacitance +100 to —5250 ppm.

Bypass—Coupling—Discs, tubulars, 150 v to 6,000 VDCW, 1 mmf.—0.1 mf.

High Voltage—High Accuracy—High Voltage types, up to 30,000 VDCW. High Accuracy types, ± 1% tolerance, 500 VDCW, up to 2,500 mmf.

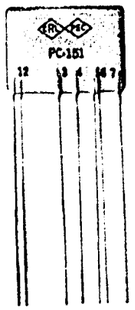
Trimmer—Tubular or flat. Meet JAN-C-81 specifications. 1 mmf. to 400 mmf. 500 VDCW.

Feed-thru—10—5000 mmf., 500—1,500 VDCW, bushing, shoulder, ring, eyelet, resistor-capacitor combinations.

Specialties—Stand-off, button-shape, potted, other capacitors.

Write for Group D bulletins.

IN ELECTRONICS



PACKAGED CIRCUITS

Complete computer and Radio-TV circuits, amplifiers, oscillators, detector networks, resistor networks—including transistors, capacitors, resistors, wiring and inductance, manufactured to your specific performance limits.

PEC* circuits result in substantial savings in assembly costs. These high reliability packaged circuits can be supplied in a wide variety of terminals for printed circuit board applications.

1/2W. resistors meet applicable MIL-R-11 specifications, 50 ohms to 50 megs. Capacitors up to .01 mmf.

Write for Group Y bulletins.

ENGINEERED CERAMICS

High alumina—85%, 95%, 99%—for high frequency, high temperature applications, close tolerance (± .00025") designs. Jan I-10-L6A grade.

Grade Jan I-10-L5A steatite, Grade L2A Corderite, and Grade L2A Electrical Porcelain. For applications where high dielectric and compressive strength, high dimensional stability, low loss and low power factor are required, there is a CENTRALAB ceramic material for the job.

CENTRALAB also specializes in metalizing of ceramics, for hermetic seals or mechanical attachment of other ceramic or metal parts.

Write for Group X bulletins.

Reliability—

miniaturized Magnetic Modulators

All Magnetic Modulators strictly conform to MIL T-27A. Some typical circuit applications for Magnetic Modulators are algebraic addition, subtraction, multiplying, raising to a power, controlling amplifier gains, mechanical chopper replacement in DC to fundamental frequency conversion, filtering and low signal level amplification

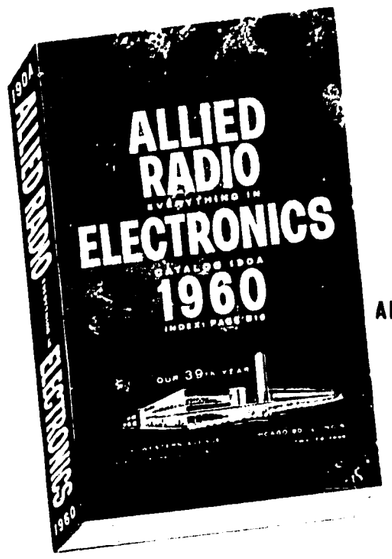
ALLIED

is your direct factory source for everything in

electronic supplies



free

on request
the most widely used
electronic supply guide

ALLIED'S 1960 CATALOG

the most complete, easiest-to-use buying guide—providing the detailed tech specs you need to write up your supply requirements—the *one* catalog that fills *all* your needs . . .

BUY AT FACTORY PRICES

world's largest stocks at your command

WE SPECIALIZE IN THE SUPPLY OF:

- Semi-Conductors
- Special-Purpose Tubes
- Relays
- Switches & Timers
- Connectors
- Capacitors
- Test Instruments, Meters
- Controls, Resistors
- Electronic Parts for Every Industrial Need
- Knight-Kit Test Instruments in Low-Cost Kit Form
- Knight Paging and Public Address Equipment

ONE ORDER TO ALLIED FILLS THE WHOLE BILL

Simplify and speed your buying of electronic parts and equipment. Your ALLIED Catalog is the best single source for electronic supply. With the world's largest stocks at your command, there's no need to deal with hundreds of separate factories—*one order to us fills the whole bill.* Finally, you get the fastest service in electronic supply (same day shipment) and *you buy at factory prices.* Send today for your FREE 1960 ALLIED Catalog—your one-source electronic supply guide.

BALLANTINE

Famous for

ACCURACY - STABILITY
SENSITIVITY

Each Ballantine Voltmeter has only one voltage scale, with decade range switching, which provides the same accuracy of reading at all points on the logarithmic voltage scale. A linear decibel scale is also provided for use by acoustical engineers. Each Voltmeter also may be used as a high gain wide band amplifier.

TRUE RMS INDICATION MODEL 320

Voltage Range ..... 100 μv — 320 v
Frequency Range ..... 5 cps — 500 kc
Accuracy ..... 3% 15 cps — 150 kc
5% elsewhere
Stability of Internal Calibrator 0.5%
Input Impedance . . .
10 megs shunted by 18 μμf below 10 mv
10 megs shunted by 8 μμf above 10 mv

AUDIO to 250 kc MODEL 300D

Voltage Range ..... 1 mv — 1000 v
Frequency Range ..... 10 cps — 250 kc
Accuracy ..... 2% ENTIRE RANGE
Input Impedance ..... 2 meg shunted by 15 uuf

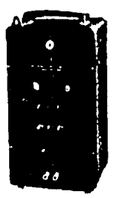
DC & AC PRECISION CALIBRATOR MODEL 420

Voltage Range ..... 0-10 v RMS; Pk-to-Pk; or DC
Frequency (Std. Model) ..... 1 kc
(other values on special order)
Accuracy (long term) Better than 0.5% above 1 mv
Distortion and Hum ..... Less than 0.25%
Setting Resolution Approaches 0.01% above 10 mv
Output Impedance (AC) .... 2-20 ohms depending on range setting

SUB-AUDIO to 150 kc MODEL 302C

Battery Operated

Voltage Range ..... 100 μv — 1000 v
Frequency Range ..... 2 cps — 150 kc
Accuracy ..... 3% 5 cps — 100 Kc
5% elsewhere
Input Impedance ..... 2 meg shunted by 10 μμf*
*Shunt capacitance, 25 μμf on two most sensitive ranges



SENSITIVE INVERTER MODEL 700

For Measuring DC Voltages when combined with any AC Voltmeter

Voltage Range ..... 1 μv — 100 v DC
Ratios DC Input to RMS Output ..... 1:100 & 10:1
Accuracy ..... 1% 100 μv — 100 v
Input Resistance ..... >10 meg for 1:100
50 meg for 10:1

PEAK-to-PEAK MODEL 305

Voltage Range ..... 1 mv — 1000 v pk-to-pk
Frequency Range ..... 10 cps — 100 kc (sine wave)
Pulse Width ..... 3 μsec — 250 μsec
Min Rep Rate ..... 20 pulses per sec
Accuracy ..... 5% for pulses
Input Impedance ..... 2 meg shunted by 8 μμf*
*Shunt capacitance, 15 μμf on two most sensitive ranges

DECADE AMPLIFIER MODEL 220B

For Increasing the Sensitivity of any AC Voltmeter by 10 or 100 times

Voltage Range ..... 20 μv — 50 mv
Frequency Range ..... 10 cps — 150 kc
Accuracy ..... 2% ENTIRE RANGE
Input Impedance ..... 5 meg shunted by 15 μμf

AUDIO to 2 mc MODEL 310A

Voltage Range ..... 100 μv — 100 v
Down to 40 μv at reduced accuracy
Frequency Range ..... 10 cps — 2 mc
As null detector 5 cps. — 4 mc
Accuracy ..... 3% 15 cps — 1 mc
5% elsewhere
Input Impedance ..... 2 meg shunted by 9 μμf*
*Shunt capacitance, 19 μμf on two most sensitive ranges

DIRECT READING CAPACITANCE METER MODEL 520

Capacitance Range ..... 0.01 μμf to 12 μf
in 9 decade ranges covering over a billion to 1
Accuracy ..... 2% above 0.1 μμf
5% below 0.1 μμf
Capacitor Power Factor 0.15
Test Frequency ..... 1 kc

AUDIO to 6 mc MODEL 314

Voltage Range ..... 1 mv — 1000 v
(100 μv — 1 mv without probe)
Frequency Range ..... 15 cps — 6 mc
Accuracy ..... 3% 15 cps — 3 mc
5% elsewhere
Input Impedance ..... 11 meg shunted by 8 μμf
(1 meg shunted by 25 μμf without probe)

ACCESSORIES are available for all voltmeters to extend voltage measurements down to 20 μv and up to 10 kv, and to measure currents from 0.1 μamp to 10 amp, and to provide DC from the Model 300 Voltmeter to drive external recorders or remotely located meters.

INFRASONIC to 30 kc MODEL 316

Voltage Range ..... 20 mv — 200 v pk-to-pk
Frequency Range ..... 0.05 cps — 30 kc
(Down to 0.01 cps with correction)
Accuracy ..... 3% ENTIRE RANGE
Input Impedance ..... 10 meg shunted by 17 uuf
or 40 uuf depending on setting

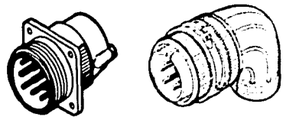
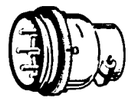
27,000 CANNON PLUG DESIGNS

FOR EVERY CONCEIVABLE APPLICATION

AIRCRAFT AND ELECTRONIC INSTRUMENTATIONS—MS, MS-A, MS-B, MS-E, MS-R SERIES, conforming to Specification MIL-C-5015D. Vibration-proof—Lightweight—Plugs are available with from 1 to 100 contacts. 15 different insert diameters and 260 contact layouts. 6 shell styles, MS 3100 to MS 3108 with all accessories. Environmental-Resisting MS-E and MS-R Series have interfacial sealing at mating faces and integral grommet seal at wire entry plus—grounding lugs and integral cable clamp.



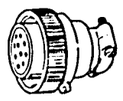
GENERAL CIRCUITRY AND QUICK DISCONNECT—K, RK SERIES, with special acme thread. The all-purpose series with eight insert diameters available. Conduit and cable clamp entry types. 1 to 110 contacts. 10, 15, 30, 40, 60, 80, 115 and 200 amp. silver plated contacts. High quality phenolic, melamine, and formica insulators. Cadmium-plated aluminum alloy shells.



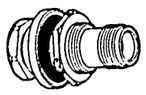
UNIT-PLUG-IN RACK/PANEL-DP, DPB, DPD, DPD2, DPD2R, DPJ, DPS SERIES, available with from 2 to 180 contacts in rectangular inserts. With and without shells; coaxial and high voltage contacts. Permit quick disconnect, interchange, replacement, testing, and inspection of assemblies and sub-assemblies.

AUDIO AND LOW-LEVEL CIRCUITS—P, XLR, XK, O, UA, BRS SERIES, in many shell styles and insert layouts. Straight and 90° angles. Latch-lock types. Wall-mounting, panel, locknut mounting, and adapter receptacles, single and two-gang. 10 and 30 amp. contacts, coaxials.

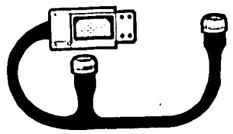
MINIATURE AND SUB-MINIATURE—D, US, DPA, DPX, AND K-MINIATURE SERIES, designed for amplifiers, miniature indicators, computer circuits, telemetering equipment, and general instrumentation of limited space requirements. Variety of shell styles, junction shells, and insert arrangements. Available with from 2 to 50 contacts, plus coaxials.



COAXIAL RF SERIES—available in a wide range of Series and types from sub-miniature to large cable applications. New Cannon adapters available for use with latest cable developments. Cannon's latest RF Plugs include aluminum versions designed for use where weight-saving is a critical design criteria.



GM AND PLUG HARNESS SYSTEMS—Cannon produces a wide range of GM Plugs to fit specific missile applications, ranging from straight umbilical dis-connects to stage-separation dis-connects. Cannon also produces Plug Harness Systems featuring MS or other specified plugs and cables as one unit, available with various contact types and sizes. From 8 to 140 contacts. Highest quality and proven reliability. Varied remote disconnect methods actuated by hydraulic, pneumatic, explosive, or manual means.



The Cannon Electric Company also has available a wide variety of plugs for Battery-Power, Fire-wall, Watertight, Printed Circuit, and other applications, as well as "Kwik-Term" Terminals and DC Solenoids.
FOR ADDITIONAL INFORMATION on the typical designs illustrated . . . other configurations for your specific applications . . . or the design, engineering and manufacture to your special needs . . . write to Cannon Electric Company—3208 Humboldt Street, Los Angeles 31, California. Please refer to Dept. 425.

LARGEST FACILITY IN THE WORLD FOR PLUG RESEARCH-DEVELOPMENT-MANUFACTURE

CANNON PLUGS

Factories in Los Angeles, Santa Ana, Salem, Toronto, London, Paris, Melbourne, and Tokyo. Distributors and Representatives in the Principal Cities of the Worl

You get
better performance
at
LOWEST COST
with
relays
by
COMAR

Avoid excessive relay costs . . . reduce needless relay space requirements . . . simplify installation and get better performance with relays by Comar, custom-made to your specifications. All types are available with any combination of switches, contact materials, coils, leads and mountings required. Complete engineering, manufacturing and sealing facilities are all combined in one large, modern plant to reduce your costs and speed delivery. Write for complete information today.

Write for your new free Comar catalog

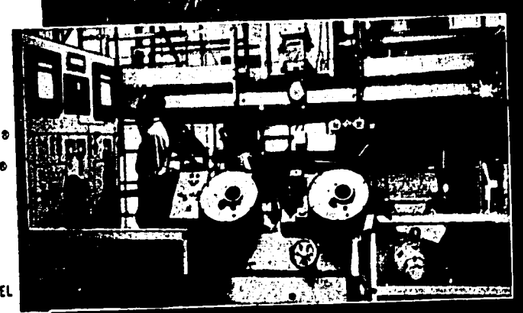
Special Spring Alloys:
BERALOY®
COBENIUM®
NI-SPAN C*
17/7 P.H.

Corrosion Resisting Alloys:
NILSTAIN®
MONEL*
INCONEL*

*T. M. International Nickel Co.



WBD vacuum melted metals are providing the answer to increasing demands for entirely new alloys. New applications in missiles, rocketry, nucleonics and aircraft call for the creation of new alloys, new metals, new highs in degree of purity, alloys subjected to the selective removal of certain materials.

WBD research and production facilities are available to help industry work out special problems requiring these custom alloys. This integrated service provides complete development and manufacturing departments and features one of the nation's largest vacuum melting installations. Over 40 years of experience in melting and manufacturing precision alloys is at your service. Consult our Sales Engineering Department for information on custom alloy service.

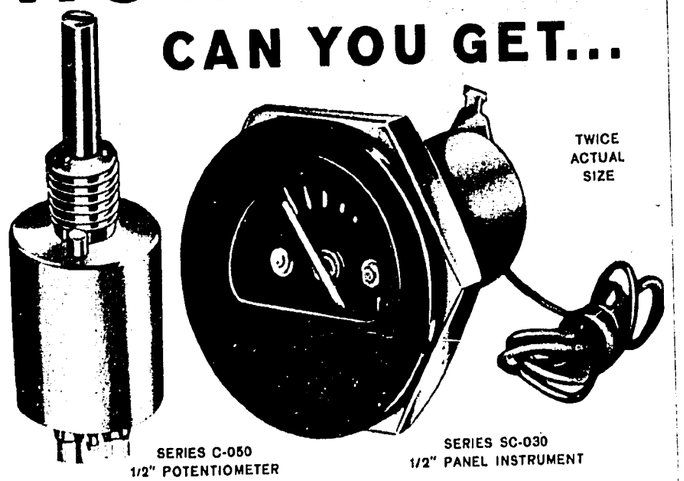
HOW SMALL CAN YOU GET...



TWICE ACTUAL SIZE

SERIES C-050
1/2" POTENTIOMETER

SERIES SC-030
1/2" PANEL INSTRUMENT

AND STILL BE ACCURATE? Frankly, we don't know. But these two microminiature examples of DeJUR ingenuity – each only one-half inch in diameter – have the same sensitivity and accuracy you find in precision instruments twice their size and weight. Just check these features:

SERIES C-050 POT. Exclusive one-piece metal case and bearing design eliminates need for special assembly precautions • Exclusive water-tight molded covers with integrally cored, solid terminals which cannot loosen or transmit solder or resin • Multiple finger brush • Molded nylon side insulation • Direct connection from winding ends to terminals • Rotation: electrical, 310°; mechanical, 325° or continuous 360° • Threaded bushing, servo or ball-bearing mounting • O-ring sealed shaft and epoxy sealed cover (optional).

SERIES SC-030 METER. Accuracy: ±5% of full scale • Ranges: 100-800 UA, DC; 1-800 MA, DC; 1-800 VDC; 50 MV basic movements for DC ammeters with external multipliers • Calibration: magnetic or non-magnetic • Internal zero adjuster • Gasket-sealed scale window and terminals • Miniaturized external-pivot D'Arsonval movement • High flux density Alnico magnet • Available with optional face plate and hex nut for front mounting (see illustration).

And while you're checking, look into some of the other rugged single-turn pots and panel instruments in DeJUR's precision line. Get complete specs by writing today for free technical literature to:

You're always sure with

DeJUR

Most of the work underway at G. C. Dewey & Co. is classified. It concerns advanced concepts of analyzing and evaluating complete weapons systems. Specialized techniques involving systems analysis and operations research are utilized to provide helpful insights into project problems.

Through these methods and its small, select nucleus of competent physicists, scientists and mathematicians, G. C. Dewey has successfully analyzed and evaluated complete military systems involving electronic countermeasures, digital data processing, missile guidance, radar, communications and nuclear physics.

This success has led to current work on prime contracts for long range systems analysis and planning, operations research as a tool for developing new weapon systems concepts and work in aerial warfare, reconnaissance and intelligence. We will welcome the opportunity to discuss your current problems. Our Director of Marketing can be reached at Murray Hill 2-7369.

If you are a physicist, electronic engineer or mathematician with an advanced degree backed by demonstrated technical achievement, thorough understanding of the laws of cause and effect and the application of the scientific method, we would be interested in exploring position possibilities with you. Our steady growth has already opened new areas for rapid and orderly advancement in our mid-Manhattan offices. These opportunities are coupled with excellent remuneration, liberal tuition and three week vacation plans.

G. C. DEWEY & CO., INC.
202 E. 44 St., New York, N. Y.

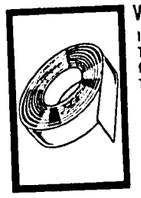
NOW EXCLUSIVELY VACUUM MELTED KARMA High Resistance Alloy THERLO Glass Sealing Alloy

D-H vacuum melting produces alloys of higher ductility and tensile properties. These are achieved by greatly reducing inclusions, especially oxides and nitrides. Other direct benefits are elimination of gas, not only from the surface but from the entire mass, and general improvement in the electrical, electronic and mechanical properties.

VACUUM MELTED KARMA* *High Resistance Wire*

The temperature coefficient of superior KARMA resistance wire has been improved to less than ±10 parts per million from —60°C. to +125°C. Higher stability and linearity are added to these important properties.

- Low thermal EMF against copper (equaled only by Manganin)
- Improved ductility
- High resistance to oxidation
- Wire sizes down to .0005"
- 800 ohms per circular mil foot



VACUUM MELTED THERLO* *Glass Sealing Alloy*

Improved workability is the major result of vacuum melting THERLO . . . the long established cobalt, nickel, iron alloy for sealing to hard or thermal shock resistant glass. THERLO also:

- Produces a permanent vacuum-tight seal with simple oxidation procedure
- Resists mercury
- Is readily machined and formed—deep drawn or spun
- Can be welded, soldered, brazed
- Is available as rod, wire, strip, sheet foil—and in special shapes

Complete line of performance-proven alloys for the manufacture of: ELECTRON TUBES, RESISTORS (Fixed & Variable), GLASS-TO-METAL SEALS, THERMOCOUPLES, STRAIN GAGES, etc. Write for the D-H Alloy Manual.

*T.M. Reg. U.S. Pat. Off.

For Capacitors with GREATER RELIABILITY . .

Choose

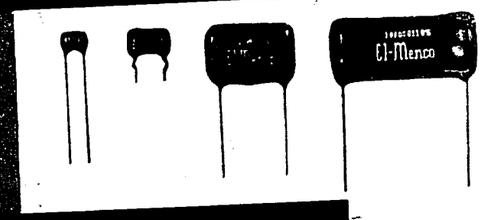
El-Menco

The Capacitors You Find Wherever There's Electronics!

EL-MENCO DUR-MICA CAPACITORS

Only 1 Failure Per 43,000,000 Unit-Hours!

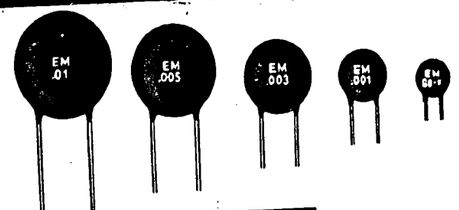
- It has been computed that "debugged" DM30, 10,000 MMF units, when subjected to 257,000 hours of life at 85°C with 100% of the rated DC voltage applied, will yield only 1 FAILURE PER 43,000,000 UNIT-HOURS!
- DM15, DM16, DM19, DM20 . . . perfect for miniaturization and for new designs using printed wiring circuits. Also available in DM30, DM42 and DM43.
- New "hairpin" parallel leads insure easy application.
- Exceed all electrical requirements of military specification MIL-C-5A.



EL-MENCO CERAMIC DISC CAPACITORS

Toughest Ever!

- Available in 500 working volts DC and 1,000 working volts DC ratings.
- Low-loss phenolic coating that is wax impregnated.
- Flat design assures reduced self-inductance . . . particularly adaptable to very high frequency applications.
- Insulation resistance far exceeds the 10,000 megohms minimum requirement.
- Exceed all electrical requirements of E.I.A. specifications RS-198.

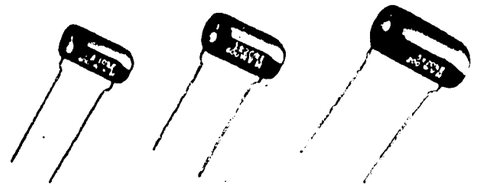


EL-MENCO *MYLAR-PAPER DIPPED CAPACITORS

Only 1 Failure in 7,168,000 Unit-Hours!

- Life tests at 100°C with rated voltage applied have yielding only 1 FAILURE PER 716,800 UNIT-HOURS for 1 MFD. Since the number of unit-hours of these capacitors is inversely proportional to the capacitance, 0.1 MFD Mylar-Paper Dipped capacitors will yield only 1 FAILURE PER 7,168,000 UNIT-HOURS!
- Working volts DC: 200, 400, 600, 1000 and 1600.
- Durez phenolic resin impregnated.
- Tolerances: ± 10% and ±20% (closer tolerances available).
- Dielectric strength: 2 or 2½ times rated voltage, depending upon working voltage.
- Exceed all electrical requirements of E.I.A. specification RS-164 and military specifications MIL-C-91A and MIL-C-25A.

*Registered Trademark of DuPont Co.



EL-MENCO MOLDED MICA CAPACITORS

Superior Performance!

- Unmatched for excellent stability, dielectric strength, high insulation resistance, extremely high "Q" and correspondingly low power factor.
- Units can be subjected to a short "debugging" life test at elevated voltage and temperature for removal of early life failures and for improved reliability.

Write for Free Samples and Booklets on Any of The Above Capacitors

Our most potent weapon in the battle of time:

QRC*

In advanced military electronics research, the ability to do the job *isn't good enough*. The job must be done *reliably* and *on time*.

Hallicrafters' QRC program was originated to provide not only the finest of engineering facilities and people, but the flexibility required for immediate, crash effort on critical electronics problems.

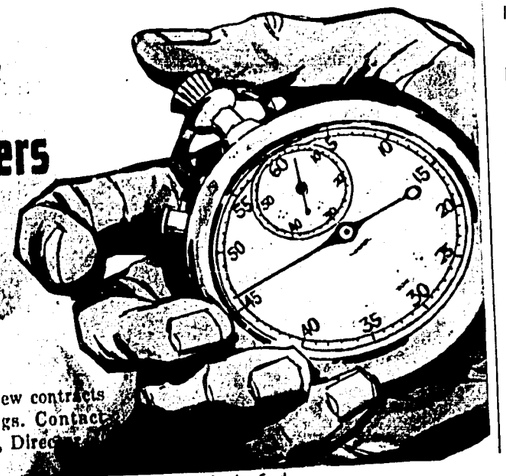
Hallicrafters has provided our military forces for the past six years with a Quick Reaction Capability that has played a major role in helping to win the battle against time.

* Quick Reaction Capability: Refer to Air Force Reg. No. 80-32

The tough jobs get off the ground in a hurry at . . .

hallicrafters

Chicago 24, Ill.



Qualified Engineers: new contracts have created openings. Contact William F. Frankart, Director of Engineering.

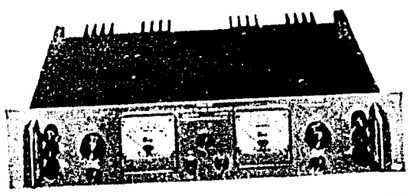
Numbers after address show the product and service classes in which firm appears. These classified listings follow the Alphabetical Directory. For complete instructions on use of this Directory, see pink sheets preceding catalog section.

regulated transistorized power supplies



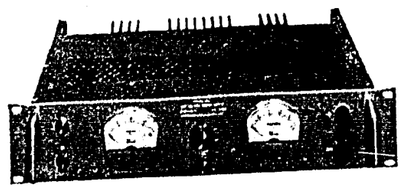
802A

TWIN SUPPLY—.01% REGULATION
2 0-30 VOLT, @ 0-1.0 AMPERE OUTPUTS

LINE REGULATION: less than 3.0 millivolts
LOAD REGULATION: less than 3.0 millivolts
RIPPLE AND NOISE: less than 250 microvolts rms.

SPECIAL FEATURES: By connecting the outputs in series, 0-60 volts @ 1.0 ampere can be obtained. Automatic short circuit protection. Fast recovery time. Output terminals front and rear. Remote sensing. Continuously variable.

$580.00



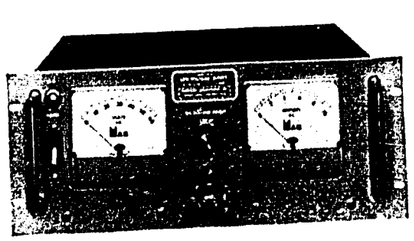
806A

PROGRAMMABLE—.01% REGULATION
0-20 VOLTS @ 0-2.0 AMPERES

LINE REGULATION: less than 2.0 millivolts
LOAD REGULATION: less than 2.0 millivolts
RIPPLE AND NOISE: less than 200 microvolts rms.

SPECIAL FEATURES: Remote programming at 100 ohms per volt. Fast recovery time. Output terminals provided on front and rear. Remote sensing. Continuously variable. Automatic overload protection.

$320.00. With meters, $350.00



810A

RACK MOUNTED SUPPLY
0-50 VOLTS @ 0-7.5 AMPERES

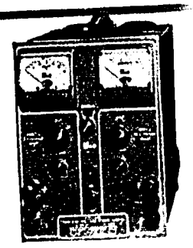
LINE REGULATION: less than 10 millivolts
LOAD REGULATION: less than 10 millivolts
RIPPLE AND NOISE: less than 1.0 millivolts

SPECIAL FEATURES: Excellent transient response. Output terminals both front and rear. Designed to work with sudden load changes. External sensing provided. Automatic overload protection.

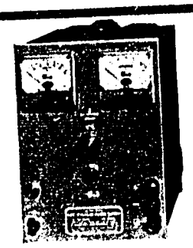
$895.00

TWIN SUPPLY BENCH TYPE
2-36 VOLTS @ 0-1.0 AMPERE

LINE REG: less than 10 mv.
LOAD REG: less than 10 mv.
RIPPLE & NOISE: less than 500 μv. rms.
SPEC. FEATURES: A twin power supply—may be connected in series to provide 4 to 72 volts at 1.0 ampere. Has automatic overload protection.



800A **$580.00**

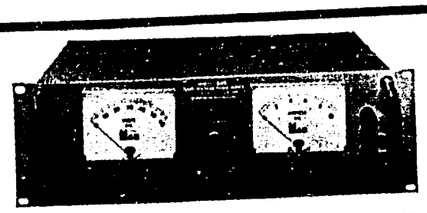


800B

LABORATORY BENCH TYPE
2-30 VOLTS @ 0-2.5 AMPERES

LINE REG: less than 10 mv.
LOAD REG: less than 10 mv.
RIPPLE & NOISE: less than 500 μv. rms.
SPEC. FEATURES: An inexpensive laboratory type power supply with automatic overload protection.

$339.00



812B

FIXED VOLTAGE—ECONOMICAL
(SELECTABLE 0-32 VOLTS) @ 10 AMPERES

LINE REGULATION: less than 15.0 millivolts
LOAD REGULATION: less than 15.0 millivolts
RIPPLE AND NOISE: less than 1.0 millivolts rms.

SPECIAL FEATURES: For fixed voltage applications and not continuously variable. An economical high current supply with excellent transient response. Automatic overload protection.

$550.00. With meters, $590.00

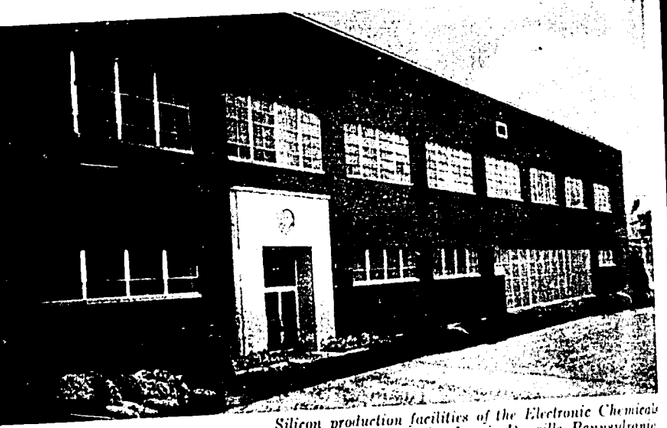
MERCK HAS ALL FOUR FORMS OF



Silicon production facilities of the Electronic Chemicals Division of Merck & Co., Inc. in Danville, Pennsylvania

Silicon

IN PRODUCTION QUANTITIES

***MERCK DOPED SINGLE CRYSTAL SILICON**—offers doped float zone refined single crystals of high quality at low costs. Yields of usable material are reported to be especially high when device diffusion techniques are used with these crystals. Float zone single crystals doped either "p" or "n" type with resistivities from *0.1 to 300 ohm cm.* any range plus or minus 25% with high lifetimes, available in diameters of 19 to 21 mm., and random lengths of 2 to 10 inches.

NOTE: *Doped single crystals float zone refined in other diameters, resistivities, or lifetimes not listed above can be furnished as specials.*

MERCK HIGH RESISTIVITY "P" TYPE SINGLE CRYSTAL SILICON—offers float zone refined single crystals of a quality unobtainable by other methods. Available with minimum resistivity of 1000 ohm cm. "p" type and a minimum lifetime of 200 microseconds, diameter 18 to 20 mm., random lengths 2 to 10 inches.

MERCK POLYCRYSTALLINE BILLETS—have not previously been melted in quartz, so that no contamination from this source is possible. Merck guarantees that single crystals drawn from these billets will yield resistivities over 50 ohm cm. for "n" type material and over 100 ohm cm. for "p" type material. Merck silicon billets give clean melts with no dross or oxides.

MERCK POLYCRYSTALLINE RODS—are ready for zone melting as received . . . are ideal for users with float zone melting equipment. Merck polycrystalline rods are available in lengths of 8½ to 10½ inches and in diameters of 18 to 20 mm. Smaller diameters can be furnished on special order. In float zone refining one can obtain from this material single crystals with a minimum resistivity of 1000 ohm cm. "p" type with minimum lifetime of 200 microseconds or the material can be doped by user to his specifications.

*NOTE: *Extended resistivity range.*

BUILDING THE FUTURE IS A BIG JOB!

The radio-electronic engineers who form the membership of the Institute of Radio Engineers must remain years ahead of actual production, in order to pave the way for the products of tomorrow, through research and development today.

The special issues of "Proceedings of the IRE" help these men transform the theory of today into the production lines of tomorrow. Pictured above are the October 1951 Color Television Issue; November 1952 Transistor Issue; and January 1953 UHF Issue (all now out of print). In 1959, IRE published special issues on Government Research (May), Infrared (September), and Biomedical Electronics (November).

Special issues on special subjects are more than usually helpful, but every issue of "Proceedings of the IRE" is filled with facts and figures!

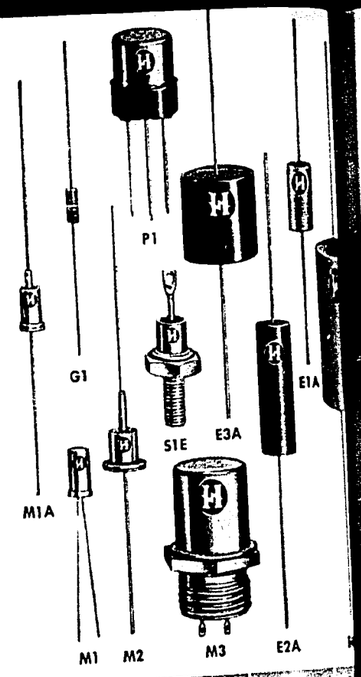
typical I E characteristic curve for Hoffman Silicon Diodes

Hoffman

YOUR SOURCE FOR GREATER SELECTIVITY IN SILICON SEMICONDUCTOR DEVICES



6 ZENER LOW VOLTAGE DIODES • 200mW • Zener Voltage Range: 2.0V — 8.0V — Case Type: M1

6 ZENER MICRO-MINIATURE GLASS LOW VOLTAGE DIODES • 250mw • Zener Voltage Range: 2.0V — 8.0V — Case Type: G1

5 ZENER "DOUBLE ANODE" LOW VOLTAGE DIODES • 200mW • Zener Voltage Range: 3.0V — 8.0V — Case Type: M1

15 ZENER "SINGLE ANODE" MEDIUM VOLTAGE • 150mW • Zener Voltage Range: 7.5V — 145V — Case Type: M1

9 ZENER "DOUBLE ANODE" MEDIUM VOLTAGE DIODES • 150mW • Zener Voltage Range: 7.5V — 45V — Case Type: M1

6 ZENER REFERENCE DIODES & ELEMENTS • Operating Zener Voltage: IN429:6.2V ±5% 1N430, 1N430A, 1N4308, 1N1530, 1N1530A: 8.4V ±5% • Dyn. Imp.: IN429:20 ohms Others: 15 ohms — Case Type: M1, M3, P1

4 ZENER REFERENCE MICRO-MINIATURE DIODES • Operating Zener Voltage: 5.9V to 6.5V • Dyn. Imp.: 15 ohms — Case Type: G1

15 ZENER REFERENCE STRINGS • Operating Zener Voltage: 6.2V thru 49.6V ±5% • Dyn. Imp.: 20 ohms to 180 ohms (over the entire line) — Case Type: E1A, E2A, E3A, E4A

38 ZENER VOLTAGE REGULATORS 10 WATT • Zener Voltage Range: 5.6V to 200V ±10% • Dyn. Imp.: 1 ohm to 140 ohms (over the entire line) — Case Type: S1E

38 ZENER VOLTAGE REGULATORS 1 WATT • Zener Voltage Range: 5.6V to 200V ±10% • Dyn. Imp.: 1.2 ohms to 1100 ohms (over the entire line) — Case Type: M1A

26 GENERAL PURPOSE SILICON DIODES • 150mW • PIV Range: 6.8V thru 470V — Case Type: M1

6 HB GENERAL PURPOSE SILICON DIODES • 150mW • PIV Range: 6.8V thru 270V — Case Type: M1

8 GLASS GENERAL PURPOSE DIODES • 200mW • PIV Range: 25V to 175V — Case Type: G1

5 GLASS FAST RECO SILICON DIODES • 200mW • PIV Range: 25V to 175V — Case Type: G1

11 SILICON DIFFUSED JUNCTION MEDIUM POWER RECTIFIERS • PIV Range: 50V to 1000V — Case Type: M1A

7 SILICON DIFFUSED JUNCTION MEDIUM POWER RECTIFIERS • PIV Range: 50V to 500 V — Case Type: M2

8 SILICON DIFFUSED JUNCTION MEDIUM POWER RECTIFIERS • PIV Range: 95V to 570V — Case Type: S1E

9 SILICON SOLAR CELLS • Typical Power Output Range: .072mW to 34.0mW (at 10,000 ft. candles—sunlight) • Spectral Response: Range: 4000 to 11,500 angstroms; Peak: 8500 angstroms

8 PHOTO-VOLTAIC READOUT CELLS • Number of readout positions: from 4 to 10 • Spectral Response: Range: 4000 to 11,500 angstroms; Peak: 8500 angstroms

ILLINOIS CAPACITORS

KNOWN THE WORLD OVER FOR

Time Tested Quality

For over 25 years ILLINOIS CONDENSER COMPANY has been foremost in the development of ever greater dependability and longer life in all types of capacitors. Listed below are only a few of the more popular—and most recently developed ILLINOIS types.

SUB-MINIATURE ELECTROLYTIC CAPACITORS

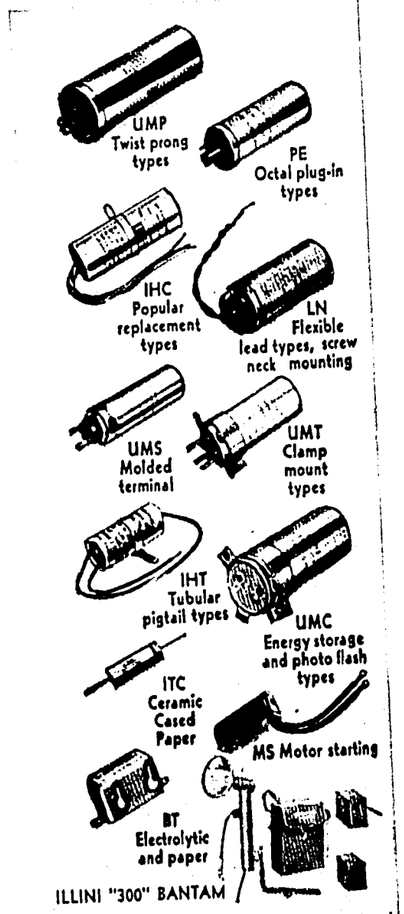
TYPE SMT-TUBULAR

SMTU-UPRIGHT

2 PRONG SINGLE

3 PRONG DUAL

A complete line for low voltage D.C. circuits. Have many advantages including Aluminum Cases patented construction; hermetically-sealed; immersion-proof; excellent life characteristics; low leakage currents; shock and vibration-resistant; ideal for applications requiring minimum size and weight.



TYPE UMP Standardized twist-prong type. Patented molded terminal construction for efficient, stable operation under extreme temperature ranges. Capacity ranges from 10 to 3,000 MFD and from 6 to 525 WVDC.

TYPE PE Hermetically sealed plug-in octal base type. Especially useful in fixed or mobile communications equipment. Operating temperature range —40°C to +85°C. Available in wide ranges of capacities and voltages.

TYPE IHC Popular multiple section types with flexible leads, insulating sleeves and mounting straps. Equally adaptable for original equipment or replacement purposes. Available in capacities from 10 to 250 MFD at 25 to 500 WVDC.

TYPE LN Extruded aluminum can type with screw neck mounting and flexible leads. Capacity ranges from 8 to 80 MFD and from 450 to 600 WVDC.

TYPE UMS Hermetically sealed inverted can type with screw neck mounting and molded-in terminals. Wide ranges of capacities and voltage ratings. Meets all government specs.

TYPE UMT Inverted can type with clamp mounting. Hermetically sealed, shock resistant with new molded terminal construction. Ideal for use in highest quality equipment. Meets all government specs. Wide capacity and voltage ranges.

TYPE IHT Popular tubular aluminum can, pigtail type electrolytic. Internal riveted construction. In capacity ranges of 1 to 2000 MFD and from 6 to 600 WVDC. Also available with solder lug terminals. Supplied with insulating sleeves.

TYPE UMC Low leakage-high capacity electrolytic for power filter packs voltage stabilization, energy storage and photo flash. Capacity ranges up to 50,000 MFD to 50 V. and 1000 MFD at 450 V.

TYPES SMT and SMTU "Miniature" and sub-miniature electrolytics with patented hermetic seals. Especially designed for printed circuits, portable equipment, transistor equipment, and any application where size and weight must be kept at an absolute minimum. Capacity ranges from .5 to 2000 MFD and from 3 to 250 WVDC available. Aluminum case types. Temperature ranges —40°C to +65°, +85°, +100°C.

TYPE MS Motor starting capacitors available in bakelite and aluminum cases. Long wire leads with terminals. Capacities to 5,000 MFD at 115, 220 and 320 VAC.

TYPE BT Hermetically sealed bathtub type especially designed to withstand vibration and shock. Available in electrolytic and paper capacitor types for government and commercial use.

ILLINI 300 ELECTRONIC FLASH KIT "BANTAM" A new high intensity, low voltage electronic photoflash kit featuring latest advances in tube, capacitor and reflector design. 100 watt second output. Uses standard type batteries. Easily assembled, rugged, reliable and economical to operate. AC Power Pack also available.

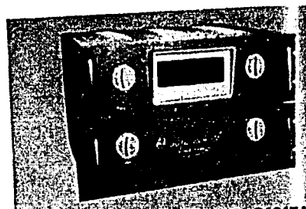
DIGITAL VOLTMETERS OHMMETERS, RATIOMETERS

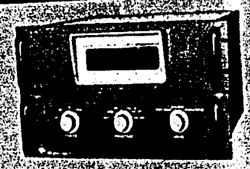
and Allied Products

Technological advance requires automatic high-accuracy measurements that only digital voltmeters can make. Customers in advanced fields find that NLS digital voltmeters last up to 5 and 10 times longer, a benefit from the producer who originated the digital voltmeter and who has the greatest research and development experience. Some applications are: missile checkout, computers, reliability testing, process monitoring, quality control, and general laboratory use. NLS features are unique because they were designed for application and not just for competition. Features of NLS meters include: complete transistorization, mercury relay digitizers rated at 3 billion readings, plug-in oil-immersed stepping switches, "no needless nines" digital logic for high speed and long life. Write today for complete data on AC-DC digital meters and accessories.

Prices and specifications subject to change without notice; prices (quoted f.o.b. Del Mar) slightly higher in Alaska, Hawaii, and outside U.S.A.



V-44 ALL-ELECTRONIC DIGITAL VOLTMETER—500 readings per second . . . measures DC voltages from ±0.001 to ±999.9 volts . . . input impedance 10 megohms . . . completely automatic . . . output for data logging accessories.

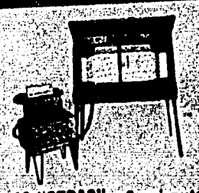


M-24 VOLT-OHM-RATIOMETER—Measures DC voltages of ±.0001 to ±999.9 volts; resistances of .1 ohm to 1 megohm; DC voltage ratios to ±.9999 . . . transistorized . . . completely automatic . . . connectors for data logging accessories . . . complete—$4950.

MODEL 125 AC TO DC CONVERTER—Adds AC voltage ranges to NLS DC digital voltmeters. Ranges, 9.999/99.99/999.9 volts. Frequency range, 10 cps to 10kc . . . Input impedance, 10 megs shunted by 20uuf . . . exceptional stability . . . complete—$1200.

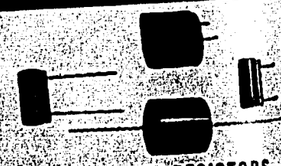
V-35 TRANSISTORIZED VOLTMETER—Measures DC voltages from ±0.0001 to ±999.99 volts, DC voltage ratios to ±.99999 . . . completely automatic . . . plug-in stepping switches . . . 5-digit illuminated readout . . . complete—$3750 (4-digit V-34 also available—$3150).

NLS 481 LOW-COST INDUSTRIAL VOLTMETER—Measures and displays DC voltages of ±0.001 to ±999.9 volts . . . automatically selects and indicates range and polarity . . . 4-digit illuminated readout . . . one compact unit, 5¼-in. high . . . complete—$1285.



NLS 12 "OTRAC"—Semi-automatic oscillogram trace reader and computer . . . permits tabular recording in sequence of digital values of 10 or more traces . . . new optigraphic reading head . . . centralized controls . . . quick-change data handling system.

NLS 50 GO/NO-GO VOLTAGE COMPARATOR—Instantly gives go/no-go indication of voltage level within range of ±0.001 to ±999.9 volts . . . 50 milli-second operating time . . . limit settings to ±0.01% . . . transistorized for highest reliability . . . 3½-in. high.



NLS PRECISION RESISTORS—Vacuum encapsulated in special epoxy resin . . . extremely reliable wire-wound precision resistors of 1 ohm to 5 megohms . . . meet MIL-R-9444 specifications and MIL-R-93 saltwater immersion tests . . . operating temperature limits of −55° to +125° C.

non-linear systems, inc.

Originators of the Digital Voltmeter

THE FIRST COUNT-DOWN WAS . . .

Inside AN R.F. SHIELDING ENCLOSURE

Proper functioning of critical missile electronic guidance systems demands exhaustive pretesting in the laboratory, on the production line and at the launching site. One very important pre-testing procedure is analyzing the performance of electronic components, sub-systems and systems in an area completely free of RF interference.

Shielding, Inc. is a supplier of RF Shielding enclosures for use in both the Thor and Atlas programs. As a designer and producer of RF shielding enclosures from the **largest ever built** to standard, modular rooms, Shielding has the experience and abilities to fill critical RF shielding requirements — with either a standard or custom-designed enclosure.

Missile and communication equipment manufacturers and government officials know from experience that Shielding enclosures offer the **highest RF shielding effectiveness** available for construction material used . . . incorporate **extra mechanical design features** and **installation versatility** not found in conventional enclosures.

Whatever your RF interference needs, Shielding will deliver an enclosure to your specifications. Write or wire, outlining your problems, to Shielding, Inc. You will receive a prompt appraisal.

Numbers after address show the product and service classes in which firm appears. These classified listings follow the Alphabetical Directory. For complete instructions on use of this Directory, see pink sheets preceding catalog section.

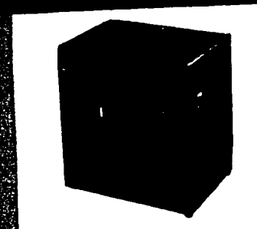
SPECIALISTS IN SPECIAL TRANSFORMERS

Known for over thirty years for transformer custom-design and manufacture.

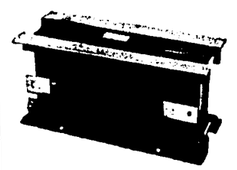
The illustrations shown here are only a few of the many types manufactured.

NWL manufactures and designs transformers for—

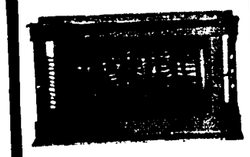
HEATING
TESTING
POWER
ELECTRONIC
ELECTRIC FURNACE
SPECIAL WELDING
PHASE CHANGING
PRECIPITATION
CONTROLLING
RESEARCH
LIGHTING
INDUSTRIAL
MEASURING
SIGNALING
HIGH AND LOW
VOLTAGE



High Voltage Test up to 50 KV Often equipped with circuit breakers, indicating meter and variable auto transformer input to 20 KVA

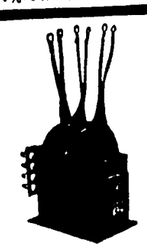


Current Transformer Phase Angle error corrected 2.4 minutes. Accuracy ½ of 1% 1 to 10,000 Amperes.

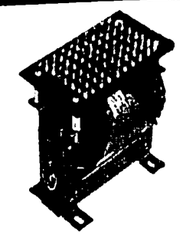


Audio Transformer, from 2 Cycles to 3 KC in sizes from 1 to 100 KVA

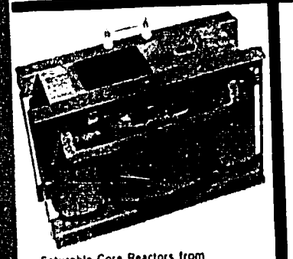
Air Core Reactors 0 1 to 50 KVA



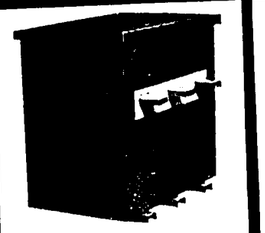
Multi-filament transformer up to 10 KVA and up to 60 KV insulation



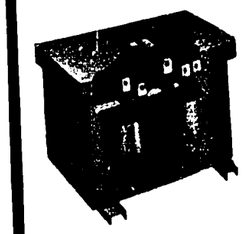
Multi-Voltage Transformer for test or experimental use 0 1 to 50 KVA



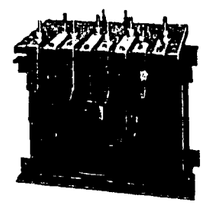
Saturable Core Reactors from sizes 1 to 200 KVA



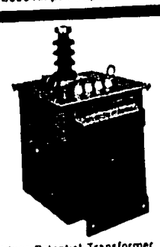
Rectifying Transformer 1, 2 or 3 Phase, 1 to 3000 Amperes up to 300 KVA



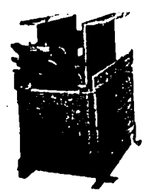
Phase Changing Transformer 2 to 300 KV



Filament Transformer, 400 cycles with 4 secondaries, 10 volts, 100 Amperes. Each secondary can be mounted in parallel series or series parallel.



Outdoor Potential Transformer, output: 35 KV, 25 KVA continuous duty, Vacuum-oil filled. With brackets for pole mounting.



Heating Transformer for Molybdenum Furnaces: Has a 10,000 Ampere secondary with a maximum of 5 volts Primary taps extended to reduce secondary to 0.75 volts.

New additions
to the SIE line of

ADVANCED DESIGN INSTRUMENTS

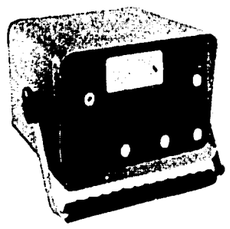
SIE instrumentation continues to set standards for accuracy, versatility and reliability. These new ADI instruments join the already popular:

C-6 Resistance Meter—direct reading from 0 to 10,000,000 megohms.

E-2 Comparison Bridge—for fast, accurate component matching.

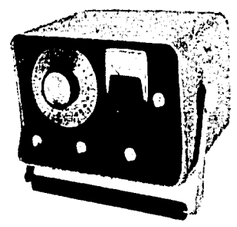
M-2 Oscillator—low distortion sine waves from 1 to 120,000 cps.

Let your SIE representative demonstrate these instruments in your lab and watch for additions to the ADI line in the near future.



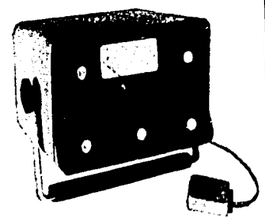
model R-3
transistorized voltmeter

Combines more desirable features than any other instrument in its class. Transistorized circuitry provides outstanding reliability, eliminates warm-up, gives instantly stable operation. Battery operation makes the R-3 immune to transient power-line disturbances. Self-contained battery source in a quick-change compartment gives more than 300 hours battery life using readily available batteries. "Battery Test" indicates battery condition. **VOLTAGE RANGES:** AC, 1 mv to 1000 v full scale in 14 ranges; DC, 1 v to 1000 v full scale + or — in 7 ranges; Electrometer, 0 to 1 vdc + or — • **RESISTANCE RANGES:** 10 ohm, 100 ohm, 1 k, 10 k, 100 k, 1 m half scale • **INPUT IMPEDANCE:** AC, 10 m, shunted by 25 mmf; DC, 100 m; Electrometer, Greater than 10,000 megohms • **FREQUENCY RESPONSE (on AC):** 10 cps to 500 kc • **ACCURACY:** 3% • **DIMENSIONS:** 11¾" W x 7½" H x 10¾" D • **PRICE:** $335.00 f.o.b. Houston, Texas.



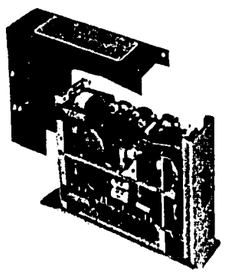
model N-1 transistorized
signal generator

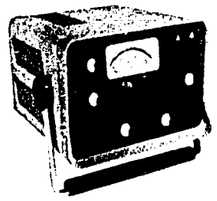
Continuously variable over a frequency range from 2 to 200,000 cps. Transistorized, battery operated, providing 1 v. rms output at less than 1% distortion. Five band, extended frequency range makes this instrument particularly useful in the design, test and repair of audio, geophysical, medical, and control equipment. Special features include calibrated attenuator and adjustable combination handle-support. **FREQUENCY RANGE:** 2 cps to 200 kcps in 5 bands (10:1) • **CALIBRATION ACCURACY:** Frequency 2%, 20 cps to 200 kcps • **LEVEL** 5% • **OUTPUT:** Volts (Rated) 1.0 v. rms at less than 1% distortion • **SOURCE IMPEDANCE:** 1500 ohms in attenuator positions; less than 50 ohms in low impedance position • **DIMENSIONS:** 7½" H (with feet) x 11¾" W (with handle) x 10⅜" D • **PRICE:** $310.00 f.o.b. Houston, Texas.



model T-1 vibration meter

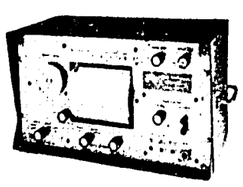
The SIE Model T-1 Vibration Meter enables the user to measure displacement amplitude, acceleration and velocity of vibration—from which frequency can be easily calculated. Battery-powered transistor circuitry makes the T-1 completely portable, and eliminates the effects of power-line transients. It is necessary only to connect the transducer (either seismic-velocity or crystal accelerometer type) for reading to be taken, making the T1 invaluable for field vibration analysis on aircraft, equipment, components or installations with no auxiliary power source. Output jacks are provided to permit waveform monitoring and recording of measured parameters.





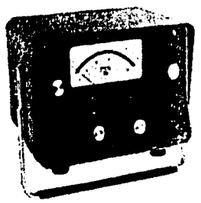
model R-2
vacuum-tube voltmeter

Offers more in terms of functional versatility, range, and accuracy, than hitherto available in a single electronic voltmeter. Incorporates unique SIE "DC Distend" which expands any portion of DC volts ranges by a factor of 10 or 100 for critical voltage measurements. Novel circuitry makes all DC readings upscale, with polarity-indicating lights, giving twice the scale length of center-zero meters. **VOLTAGE RANGES—AC AND DC:** 1 MV-1000V full scale, 14 ranges, in 10 db steps • **RESISTANCE RANGE:** 10 ohms-10 megohms midscale, in decade ranges • **DB SCALE:** —20 to +2 db • **FREQUENCY RESPONSE:** 10 cps-1 mc • **DC CALIBRATION:** Internal standard cell, provides 1.00 volt on front panel to 10 megohms load. • **INPUT IMPEDANCE—MILLIVOLT SCALES:** 10 megohms shunted by 25 mmf (9 megohms on AC)—**VOLTAGE SCALES:** 10 megohms shunted by 20 mmf • **ACCURACY:** 2% of full scale + .1 MV, DC and 10-100,000 cps; 5%, 100 kc-1 mc • **POWER REQUIREMENT:** 105-125 VAC, 50-60 cps • **DIMENSIONS—PORTABLE:** 10⅝" W x 7¼" H x 12½" D (not including handle)—**RACK-MOUNTED:** 19" W x 8¾" H x 11¼" D (behind rack panel) • **FINISH AND CASE:** Black anodized, engraved aluminum panel; grey wrinkle aluminum case • **WEIGHT:** 14 lbs. • **PRICE:** $550.00 F.O.B. Houston, Texas



ARP-2 audio response plotter

Permanent, pen-written frequency response curves of any audio-range equipment provided quickly and easily. Input to system under test is supplied by a built in audio oscillator. As the oscillator sweeps its range, output from the tested system is plotted on the chart. **FREQUENCY COVERAGE:** 20-20,000 cps • **CHART SCALES:** 1. AC signal levels, linear in db, 0-40 db range. 2. DC voltage, 0-1 volt, linear in voltage, self-calibrating • **MAXIMUM AC SENSITIVITY:** 10 millivolts full-scale, i.e.—chart covers 100 microvolts to 10 millivolts (40db) • **INPUT IMPEDANCE:** AC, 1 megohm; DC, greater than 10 megohms • **ACCURACY:** AC level recorder, ±1 db; DC recording, 1% • **RECORDING SPEED (USING MOTOR-DRIVE):** 6 in/minute • **PEN SPEED:** 1 sec. (full span) • **CHART SIZE:** 15½" L x 5½" W • **POWER REQUIREMENTS:** 105-125 vac, 50-60 cps; 100 watts • **DIMENSIONS:** 19½" W x 10½" H x 11" D • **CASE:** Aluminum, portable • **WEIGHT:** 34 pounds • **PRICE ARP-2 AUDIO RESPONSE PLOTTER:** $850.00 F.O.B. Houston, Texas • **CONDENSER MICROPHONE ASSEMBLY:** $125.00 F.O.B. Houston, Texas



model K-1 microsource

Usable with any standard oscillator in its frequency range to produce controlled test signals. Internal battery and polarity-reversing switch for generating DC test signals. Output continuously variable from zero to 3 volts in 7 steps. • **PRICE:** $125.00 F.O.B. Houston, Texas

model D-3C DC amplifier

The SIE Model D-3C DC Amplifier meets the specific requirements of airborne thermocouple and strain gage telemetering applications. It is a differential DC preamplifier designed to withstand extreme environmental conditions.

SIE SOUTHWESTERN INDUSTRIAL ELECTRONICS COMPANY

A DIVISION OF DRESSER INDUSTRIES, INC.

10201 Westheimer • P. O. Box 22187 • Houston 27, Texas

CABLE ADDRESS: SIECO HOUSTON TWX: HO 1166

SIE's new 300,000 sq. ft. facility for research, development and manufacture of electronic instrumentation, now completed at DRESSER ELECTRONICS CENTER, Houston, Texas.

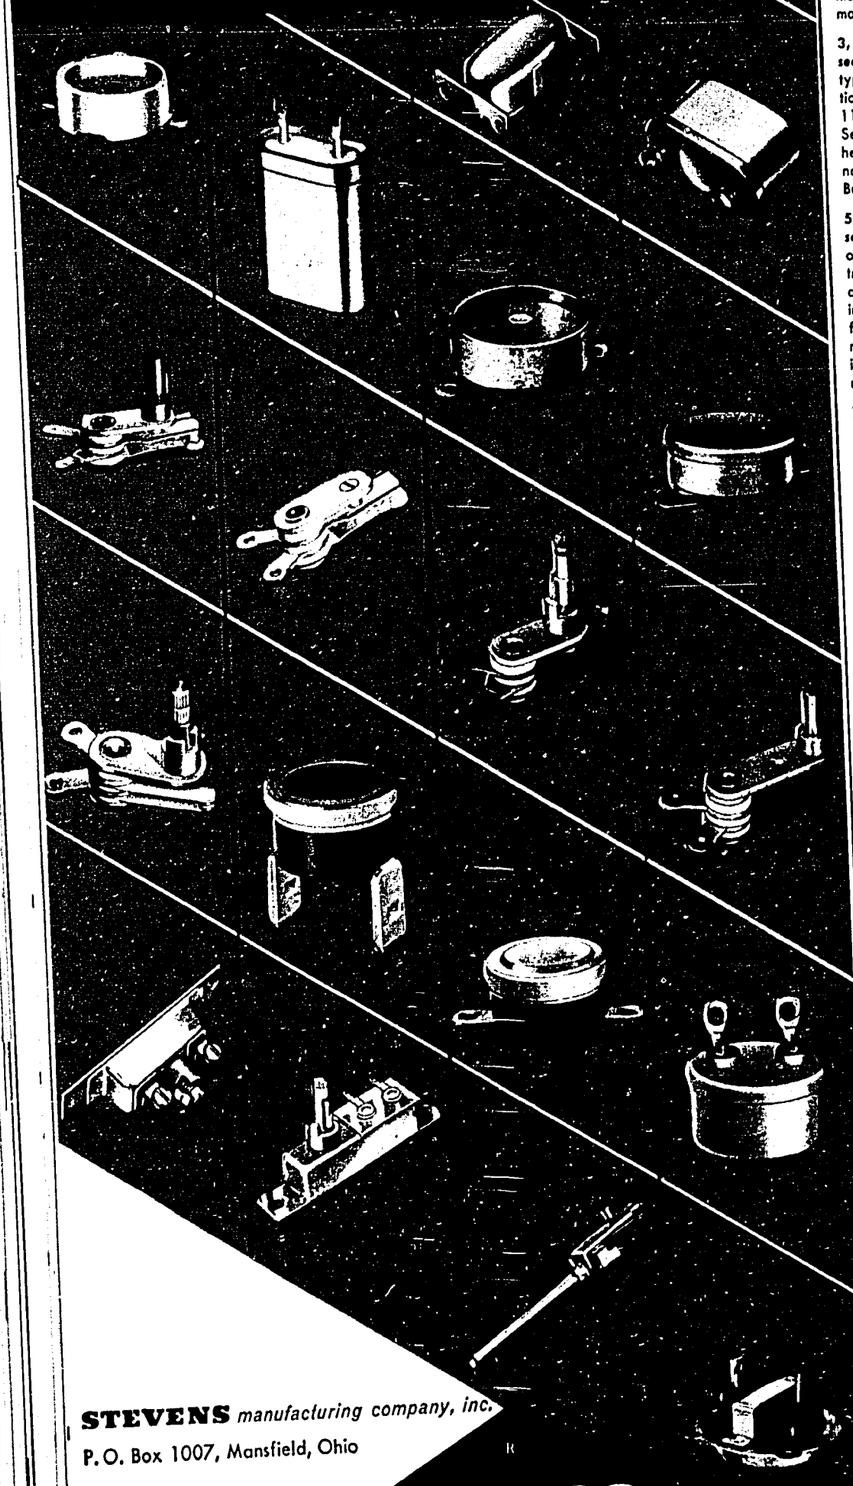
STEMCO THERMOSTATS
for precise, sensitive temperature control



1, 2, TYPE C *semi-enclosed* **(1),** *hermetically sealed* **(2).** Small, positive acting with electrically independent bimetal strip for operation from -10° to 300°F. Rated at approximately 1 amps, depending on application. Hermetically sealed type can be furnished as double fe mostat "alarm" type. Various terminals and mountings. Bulletin 5000.

3, 4, TYPE M *semi-enclosed* **(3),** *hermetically sealed* **(4).** Electrically independent bimetal st types for appliance and electronic applica tions from -20° to 300°F. Rating: 8 amps a 115 VAC, 4 amps at 230 VAC and 28 VDC Semi-enclosed with virtually any type termina hermetically sealed with pin or solder term nals, wire leads, various mounting bracke Bulletin 6000.

5, 6, TYPE MX *semi-enclosed* **(5),** *hermetically sealed* **(6).** Snap acting miniature units to ope on temperature rise for missile, avionic, ele tronic and similar uses. 2° to 6° differentia available. Rated at 3 amps to 1 amp, depen ing on duty cycle, at 115 VAC and 28 VD for 250,000 cycles. Semi-enclosed types wi metal or ceramic bases; hermetically seale in circular or CR7 cans. Various termina mountings, brackets, etc. Bulletin 6100.

7, 8, TYPE S* *adjustable* **(7),** *non-adjustable* **(8).** Positive acting with single stud or nozzle moun ing. Operation to 600°F. Rated at 15 amp at 115 VAC, 7 amps at 230 VAC. Spade, scre or elevated terminals, various adjusting ste etc. Bulletin 1000.

9, TYPE SA* *adjustable* **(9)** *or non-adjustable* Snap acting with electrically independent b metal. Also single-pole, double-throw. Scr stud or nozzle mounting. Non-inductive-loa rating: 15 amps at 115 VAC, 10 amps at 23 VAC. Spade or screw terminals. Bulletin 200

10, TYPE SM* *manual reset* **(10).** Electrica same as Type SA (above) except for manu reset feature. Bulletin 2000.

11, TYPE B *adjustable* **(11)** *or non-adjustable* For uses where heat generated by passag of current through bimetal strip is desirable Various terminals, single stud or nozzle moun ing. Operation to 400°F. Nominal rating: 1 amps at 115 VAC of 40 cycles and highe Bulletin 9000.

12, 13, 14, TYPE A* *semi-enclosed* **(12, 13)** *hermetically sealed* **(14).** Insulated, electrically independent bimetal disc gives fast respons and quick, snap action control for appliance electronic and apparatus applications fro -20° to 300°F, or higher on special orde Rating: 3 to 4 amps, depending on duty cyc at 115 VAC, 2 amps at 230 VAC and 28 VD Various enclosures and mountings, includi brackets. Bulletin 3000.

15, TYPE R* *sealed adjustable* **(15),** *sealed non-adjustable* **(16).** Positive acting for operation to 600°F. Rated at 15 amps at 115 VAC, 4 amps at 230 VAC. Screw terminals. Bulletin 700

16, TYPE W* *adjustable* **(16),** *or non-adjustable* Snap action bimetal strip type for operatio to 300°F. Rated at 5 amps at 115 VAC, amps at 230 VAC. Screw or nozzle mounting spade, solder or screw terminals. Bulletin 4000

17, TYPE H† *adjustable.* Positive acting for fr pans, skillets, sauce pans, etc. Fail-safe, con in low to 500°F in high. Rated at 1650 watts at 115 VAC. Bulletin 10,000.

18, TYPE D* *automatic* **(18),** *or manual reset* For laundry dryers or other surface and warm air applications. Snap acting disc type U.L. approved for operation to 350°F. Open or enclosed styles. Rated at 25 and 40 amps at 120-240 VAC. Screw or spade terminals. Bu letin 8000.

Illustrations, for general information only, do not necessarily show size comparisons. Fully dimensioned and certified prints on request. Manufacturer reserves right to alter specifications without notice. AA-59

*Refer to Guide 400ED for U.L. or C.S.A. approved ratings.

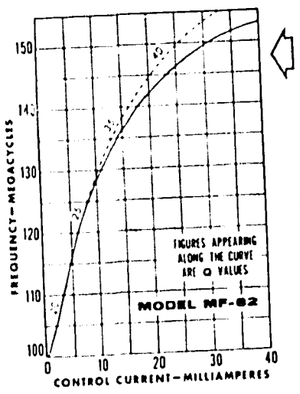
VARI-L

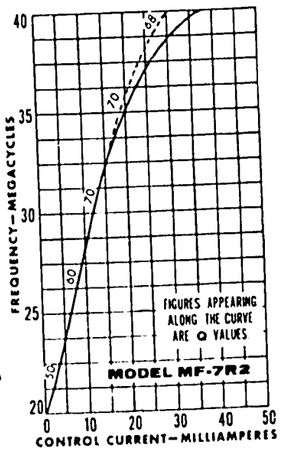
ELECTRICALLY
Variable Inductors

The Convenient and Reliable Method for Non-Mechanical Frequency Control

We offer six years experience in the exclusive field of high-frequency saturable-core reactors for such equipment as sweep oscillators, receivers, modulators, spectrum analyzers and frequency synthesizers. We carry on continuous research in such areas as evaluation of core materials, packaging techniques, and custom-design applications. A stock line is maintained for rapid service to designers, representative types being described below and in more details in our catalog. Samples of special inductors usually take only a week or two for delivery. Write for a quotation on a Vari-L inductor to your specifications.

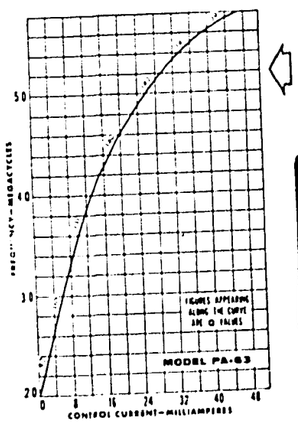


MF-82 Typical Freq. Range, 0-40 ma: 100 to 150 mc. Starting Inductance 0.2 μh, ±10%. PM Bias, sealed in steel can (dotted curve shows performance of MF-82C, same as above but in copper can).

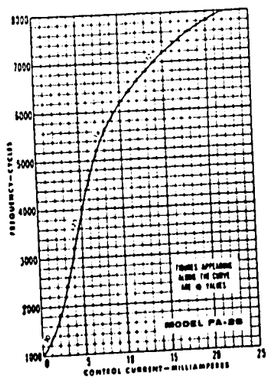


Typical Freq. Range, 0-40 ma: 20 to 40 mc. Starting Inductance 1.5 uh, ±10%. PM Bias, sealed in steel can (dotted curve shows performance of MF-7R2C, same as above but in copper can).

MF-7R2



PA-63 Typical Freq. Range, 0-50 ma: 2.0 to 5.8 mc. Starting Inductance 45 μh, ±10%. PM Bias, epoxy-embedded.



Typical Freq. Range, 0-50 ma: 1000 to 8000 cps. Starting Inductance 4.0 henries, ±10%. PM Bias, epoxy-embedded.

A WINCO POWER SUPPLY DESIGNED TO YOUR EXACT NEED

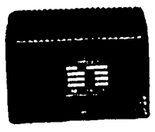
Wincharger engineers have solved many formidable power problems for both the military and civilian companies. If you have an application with special problems of vibration, altitude, heat, shock, humidity or regulation, tell us about it. Wincharger engineers will design a power supply to fit your exact needs. Problem solving is a specialty at Wincharger.

ALTERNATORS

Brushless alternator for emergency AC aircraft power or missile power supply systems.

SPECIFICATIONS

Weight—20.5 lbs.
Rated Output—4.0 KVA at 80% power factor.
Ambient Temp.—100° C.
Temp. Rise—40° C.
Voltage Regulation—plus or minus 5%.
Speed—12000 RPM plus or minus 5%.
Voltage—208/120, 3 phase—400 cycle.



TRANSISTORIZED POWER SUPPLIES

Design capitalizes on the inherent advantage of transistorized equipment . . . stresses retrofit, which means they can be used to replace vibrators and dynamotors in existing aircraft if so desired.

SPECIFICATIONS

3 sizes—25, 50 and 100 watts with overload capacities up to 100% for short periods.
Volt Ripple—less than 1%
Efficiency—85%

ALTERDYNES

An urgent Armed Forces requirement for AC power coupled with a conventional dynamotor for automatic-tuning, necessitated the development of this special Alterdyne.

SPECIFICATIONS

Input—Nominal 27.5 Volts DC.
Output No 1—250 Volts DC at 300 Mils.
Output No. 2—43 Volts DC at 10 Mils
Output No. 3—115 Volts—400 Cycle AC 30 Watts
Temperature Range—Minus 40° C to plus 45° C.
Duty—Continuous

DYNAMOTORS

As higher-altitude jet aircraft were developed, dynamotors were required that would operate at 80,000 feet. The result—this Winco dynamotor to operate at higher altitudes.

SPECIFICATIONS

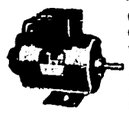
Input—Nominal 27.5 Volts DC
Output No. 1—600 Volts DC at 550 Mils.
Output No. 2—250 Volts DC at 150 Mils.
Unfiltered Ripple Maximum—1%
Duty Cycle—5 Minutes On
5 minutes Off
And Repeat.
Temperature Range—Minus 55° C to plus 85° C.
R.P.M.—8,500
Altitude—80,000 feet.

INVERTERS

Literally thousands of each of the Winco Inverters from 20 VA to 6½ KVA have been manufactured on a mass-production basis at low-cost without sacrifice of high quality standards.

SPECIFICATIONS

Model No. 3186
Input—Nominal 27.5 Volts DC.
Output—115 Volts, 400 Cycle 1 phase. 2500 VA.
Temperature Rise—50° C.
R.P.M.—6,000 Approx.
Altitude—50,000 feet.



AC & DC BALL BEARING

GENERATORS

Complete line from 500 watts to 10 KW. 1800 or 3600 RPM. Units equipped with terminal box or complete controls. Application engineering service available to special adaptations.

PORTABLE POWER

GENERATORS

Equipped with Automatic CONSERV-er. Brings engine to full power when load is applied, reduces to idling speed when tool is turned off—all automatically. 300 watts to 10 KW.

FORTY-SEVEN YEARS OF RADIO-ELECTRONIC HISTORY

are recorded in "Proceedings of the IRE." The photo above shows the issues from 1912 through 1947—twelve years of rapid advances and earth-shaking accomplishments are not even included in this panorama of progress! Since publication of its first issue, "Proceedings of the IRE" has paced and pioneered in every field of radio from the first vacuum tube through today's giant computers and tiny transistors. The engineers who write, read and use this magazine have transformed the world in forty-seven short years! Is it any wonder that so many advertisers believe these engineers must learn about their products in the fact-packed advertising pages of "Proceedings of the IRE"?

Wheeler Electronic Corp., 150 W. Aurora St., Waterbury 20, Conn., 10, 16, 36, 43, 48, 61, 62, 73, 82

1960 IRE DIRECTORY
Directory I
Complete Equipment

Communication—
Computation—
Instrumentation—
Test

35 major groups
242 products

The products and services of the radio-electronics industry have been organized into three basic directories:

I. Complete Equipment
II. Components
III. Materials & Services

Within these three basic directories, 102 major product and service groups are numbered consecutively throughout. Under each of these 102 classes a further breakdown is given, showing in detail by a system of code numbers after each firm listed what specific products within the class are manufactured by that firm.

For a terminology cross-index listing the 857 sub-products in alphabetical order, consult the pink section preceding page 1.

The first few times you use this EDGE INDEX

follow the "How to use" instructions slowly—one step at a time. After that you will be able to open easily and almost instantly to the section that you seek.

Machol edge indexes covering the alphabetical section and each of the three major directory groups will be found on pages 161, 265, 365, and 597.

HOW TO USE

1. Bend the Directory almost double with the back cover page on the inside.
2. Hold in your right hand with your four fingers near to the bound edge and your right thumb near the middle of the open side of this page.
3. From the heavy or light line symbol adjacent to the subject you seek, run your eyes across the page edges until you reach the horizontally corresponding symbol.
4. OPEN THERE!

LICENSE NO. 25
MACHOL EDGE INDEX PATENT #2680630

For complete list of products and services, arranged alphabetically for fast reference, see the pink section preceding page 1.

KAY Electronic Test & Measuring Instruments

• Sweeping Oscillators • Noise Figure Measurement • TV Picture & Sound Signal Sources • Marker Generators • Pulsed Carrier Generators • TV Transmitters • Color Generators • Signal Generators • Attenuators • Sound Spectrographs • Gain and Loss Test Sets • Spectrum Analyzers • Vibration Analyzers • Vacuum Tube Voltmeters • Transistorized Test Instruments • Power Supply • Voltmeters • Probe • Video Amplifier • Crystal Oscillator • Audio-Oscillator • Fluttermeter • Rota-Graph

SWEEPING OSCILLATORS

Vari-Sweep

INST.	RANGE	TUNING	WIDTH	OUTPUT	PRICE
MEGA-SWEEP	50kc-1000mc	continuous	0-40	100mv	$495
CALIB. MEGA-SWEEP	50kc-950mc	single dial	0-40	50mv	545
MEGA-SWEEP 111A	10mc-500mc	zero level	0-40	.15V rms 70 ohms	595
	400mc-950mc	base line		.3V rms 300 ohms	
MEGA-SWEEP 112A	800mc-1200mc	single dial	0-40	.3V rms 70 ohms	595
VARI-SWEEP	2-220mc Fund	continuous	Up to 30 mc plus	1.0V rms 70 ohms	745
VARI-SWEEP 400	15-470 mc	continuous	30mc plus	1.0V rms 70 ohms	795
ULTRA-SWEEP	450-900 Fund	continuous	0-50 mc	3.0V rms 70 ohms	975
MAGNA-SWEEP	5-1000mc	continuous	25-1000 mc	0.1V rms 1.5V rms	4950
	2200-3800mc	variable over range		50 ohms	

SWEEPING OSCILLATORS WITH MARKS

Rada-Sweep Sr.

Marka-Sweep
Model Video 50

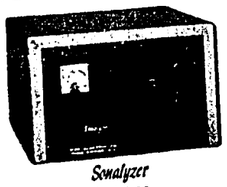
INST.	RANGE	TUNING	WIDTH	MARKERS	OUTPUT	PRICE
MARKA-SWEEP	50kc-20mc	3 ranges	complete	6 crystals	0.2V rms	$$$$
MODEL VIDEO		50kc-20mc	range		70 ohms	
MARKA-SWEEP	50kc-8mc	.....	0-8mc	5 crystals	1.5V rms	745
MODEL VIDEO TTV				1 variable	70 ohms	
MARKA-SWEEP	50kc-50mc	contin.	4-50mc	8 crystals	1.0V P.-P.	745
MODEL VIDEO 50			contin. variable			
VARI-SWEEP	10-145mc	contin.	30mc+	11 crystals	1.0V rms	995
MODEL RADAR	Fund			1 variable	70 ohms	
VARI-SWEEP	4-120mc	contin.	30mc+	11 crystals	1.0V rms	995
MODEL IF	Fund			1 variable	70 ohms	
RADA-SWEEP SR	1-260mc	6 switched	60-70mc	24 crystals	0.5V rms	595
	Fund	bands			70 ohms	plus crystals
KILO-SWEEP	50kc-2mc	contin.	contin. to 100kc	6 crystals	0.25V rms	575-895
	.5mc				70 ohms	
	-10mc					575
SONA-SWEEP	5kc-200kc	contin.	0-20kc	6 crystals	0.25V rms	
					70 ohms	425
RADA-SWEEP	20-40mc	.....	20mc or 2mc	9 crystals	.25V rms	
	50-70mc				70 ohms	675
LIGNA-SWEEP CP	100kc-220mc	6 switched	10-60mc	18 crystals	1.0V rms	plus crystals
		bands	contin. variable		70 ohms	600 ohms
LIGNA-SWEEP SKV	200cps-11mc	4 switched	2kc-10mc	uses variable	1.0V rms	895
		bands		marker	and 70 ohms	

NOISE FIGURE MEASUREMENT . . . NOISE GENERATORS

Mega-Node Sr.

INST.	RANGE	NOISE FIG. RANGE	PRICE
MEGA-NODE	5-220mc	0-16db @ 50 ohms	$345
		0-23.8db @ 300 ohms	295
MEGA-NODE SR.	10-3000mc	0-20db @ 50 ohms	270-495
MICROWAVE	1120-26,500mc	Fluorescent Tubes 15.8 ± .25db	(with power supply
MEGA-NODES		Inert Gas Tubes 15.28 ± .1db	$1495, covering range
RADA-NODE	5-26,500mc	0-23.8 ± .25 db	5mc to 40
		IF strips @ 30 and 60mc	345
MEGA-NODE 175-A	50-500mc	0-19db, 300 ohms	345
MEGA-NODE 403-A	3-500mc	0-19db, 50 ohms	

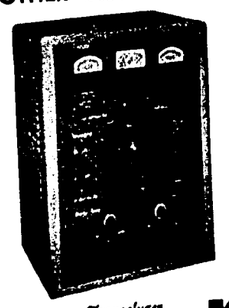
SPECTRUM ANALYSIS



Sonalyzer
Model 30

INST.	DESCRIPTION	FREQ. RANGE	FEATURES	PRICE
VIBRALYZER	Vibration Frequency Analyzer	5-4400cps	Displays amplitude vs frequency vs time. Provides permanent record.	$2495
SONA-GRAPH	Sound spectrograph for frequency analysis of audio energy	85-8000cps	Records frequency and intensity to time	2195
ECHO-VOX SR.	Provides variable periods of time delay at audio frequencies	40-12,000cps	20 to 1600 millisecond delay range	1695
SONA-STRETCHER	Speech stretcher for slowing speech to ⅓ normal tempo	100-4000cps	Has phono & tape recorder inputs	950
SONALYZER MODEL 30	A 30-Channel all-electronic spectrum analyzer providing immediate visible display of complex waveforms up to 20,000 cps			1995
SONAGRAM DISPLAY UNIT	Accessory for use with Sonalyzer to provide a 3-dimensional-frequency vs intensity vs time-display on long persistence 'scope			495
VARI-VOX	A compressor and expander for audio signals; slows to ⅓ or doubles normal tempo with no loss of intelligibility			1495

OTHER INSTRUMENTS



Transalyzer

INST.	RANGE	RANGE OF MEASUREMENT	FEATURES	PRICE
DRD METERS	1.1-18Kmc	Direct reading digital frequency meters with coupling elements for waveguide or coaxial line. Accuracy ±0.1%		$325-550
	9 Models			595
MICROLTER 50 VTVM	100cps-50mc	Full Scale: 1mv-1V in 7 ranges. May be used as 50mc video amp.		1495
TRANSALYZER	50kc-50mc	Measures Alpha and Alpha Cutoff—Collector and Emitter Current. 3 Voltages—Emitter to Base, Emitter to Collector, and Base to Collector		995
MEGA-MATCH	10mc-1000mc	Confin. tuned sweeping oscillator	Displays reflected energy. Checks matching impedance	325
UTILATOR	4.5-220mc	Fundamental Freq. Utility Oscillator	0.7V rms into 70 ohms metered AGC'd	2195
GAIN SET		Complete Equipment for Making Precision Measurements of Gain or Loss in Components and Systems		975
MEGA-PIX	TV Sound-Picture	Color or Black and White Transmitter	.25 output into 70 ohms	795 135
RADA-PULSER SR.	Pulsed-Carrier	Generator, 12-80mc. Continuously variable carrier frequency and pulse width		
AUDIOLATOR	15cps-15kc	Transistorized audio oscillator, battery operated. Flat to ±0.5 db over range. Output 1.0V rms at 600 ohms.		95
TRANSIFIER	15cps-15mc	Transistorized battery operated amplifier giving 10db and 20db gain

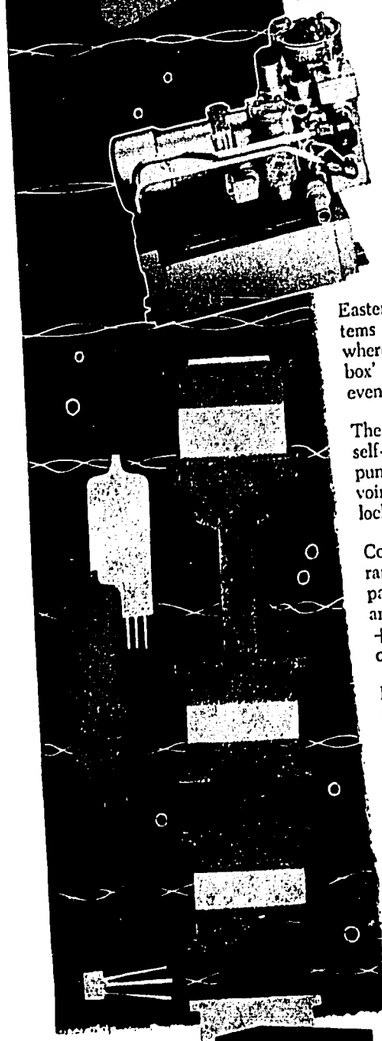
BUILD ON...

Eastern

TEMPERATURE CONTROL EXPERIENCE:

AVIONIC COOLING



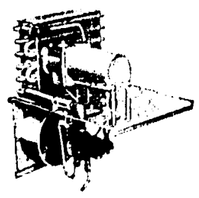
Eastern cooling packs for electronic subsystems extend operating ranges to altitudes where air cooling becomes ineffective. 'Black box' designs can be more compact—reliable even at five times the speed of sound.

These liquid cooling systems are completely self-contained—provide such components as pumps, heat exchangers, air impellers, reservoir, coolant flow and temperature interlocks and similar parts.

Cooling capacities of existing systems range from 1,000 to 22,000 watts dissipation rates. Eastern cooling packs take ambient temperatures from −55°C to +55°C in stride, and perform to altitudes of 60,000 ft.

Extensive experience in missile applications has enabled Eastern to develop systems unusually compact and light as well as highly reliable. At the same time, Eastern is able to provide at minimum cost equipment engineered to a specific need by using missile-proved components designed to your system configuration.

Turn to Eastern for space-, weight-, and cost-saving solutions to your hottest cooling problem. Write for New BULLETIN 360.



liquid cooling units for 50 to 50,000 watts dissipation

SPECIAL KEYBOARDS

Any number of keys, bars, switches or lights in any arrangement you require—wired to your specifications.

Concord Keyboards can be found working with many different types of equipment throughout the United States and Canada. Only proven components with exceptionally long life characteristics are used. A typical example: a keyboard that has twelve keys and one bar, wired to a cable and connector with a steel case painted grey—$220. Delivery three to five weeks. Send us a sketch of your desired key layout and wiring specifications for an immediate estimate.

Also call upon us for your special requirements for paper tape or magnetic tape input equipment.
