Now, obtain TRUE RF Transistor Parameters by the 3-terminal method

You can now measure alpha and admittance parameters of transistors accurately (within 2%) and easily under small signal conditions.

The addition of 5 special transistor adapters to the revolutionary Wayne Kerr RF Bridge, a two or three terminal transformer ratio arm bridge, makes these measurements possible. The direct currents and voltages required are furnished by a separate Wayne Kerr Control Unit which also provides for monitoring. Write for technical information.

FOR TRANSISTOR MEASUREMENTS Measure input, output admittance and current gain in grounded base configuration, and input and transfer admittance in grounded emitter configuration.
FOR GENERAL MEASUREMENTS Measure complex impedance, balanced and unbalanced, or balanced with the center point grounded and the impedance between any pair of terminals in a 3-terminal network.
Measure resistance, capacitance and inductance over 15 kc to 5 mc.
Capacitance range: 0.01 $\mu\mu$f to 20,000 $\mu\mu$f in 6 ranges
Resistance range: 10 ohms to 10 megohms in 6 ranges
Inductance range: 0.5μH to 50 mH in 6 ranges
Extreme stability due to fact that impedance looking back into the terminals and impedance to ground at balance are both exceedingly low.
Accuracy of bridge: 1% over most of range; with adapters—within 2%.
RF Bridge B-601 $640.00
Transistor Adapters Q-601 A to E $300.00
OTHER INSTRUMENTS: AF, VHF Bridges; AF, UHF Oscillators; Microwave Equipment; Attenuators; Wave Analyzer; Distance and Vibration Meters.
Send for complete W-K catalog showing other instruments

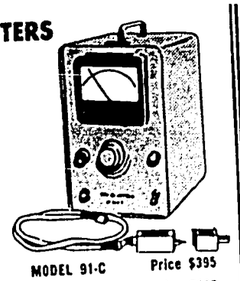
VOLTMETERS

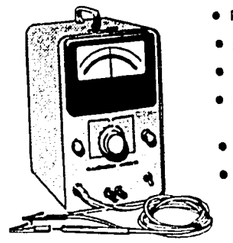
SENSITIVE RF VOLTMETERS

- RANGE:
  Model 91-C: 1 mv to 3 v.
  Model 91-CA: 0.3 mv to 3 v.
- FREQ. RANGE: 10 kc to 600 mc.
- ACCURACY: 5% to 200 mc.
  10% to 600 mc.
- High impedance probe and 52 ohm adapter.
- Special adapters and voltage divider available.



MODEL 91-C Price $395
MODEL 91-CA Price $495

DIFFERENTIAL DC VOLTMETER-AMPLIFIER



- RANGE: 10 μv to 1000 v.
- ACCURACY: 3% full scale.
- COMMON MODE REJECTION: 80 db
- INPUT RESISTANCE: 10 megohms to 100 megohms.
- Zero center meter.
- OUTPUT CAPABILITY: 0.5 ma into 1500 Ω.

MODEL 98-A Price $395

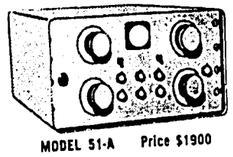
NULL DETECTORS

NEW DC NULL DETECTOR

- For use with bridges. Provides compression for hunting or linearity for close tolerance work.
- HUNTING RANGE: 60 db.
- FULL SCALE SENSITIVITY:
  VOLTAGE: 10 μv to 100 v.
  CURRENT: 1 μμa to 10 μa.
  POWER: 10^{-17} watts to 10^{-3} watts.
- INPUT RESISTANCE: 10 meg.
- OUTPUT RATING: 1.0 v across 500 Ω.
- MAX. AMPLIFIER GAIN: 100 db.

MODEL 56-A
Price $450

NEW AC NULL DETECTOR

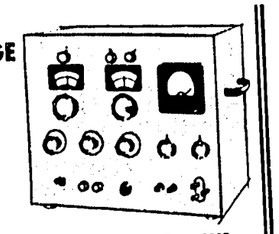


MODEL 51-A Price $1900

- TUNING RANGE: 20 cycles to 200 kc.
- SENSITIVITY: 10μv for ¼ inch CRT deflection or 100 μ dc output.
- PHASE SENSITIVE.
- HUNTING RANGE: 75 db with AVC on; 25 db with AVC off.
- INPUT IMPEDANCE: 1 megohm shunted by 100 μμf.
- Discrimination of 2nd harmonic of tuned freq. is 35 to 40 db.
- Useful as a low frequency impedance bridge detector, tuned voltmeter, or in wave analysis.

BRIDGES

THREE TERMINAL
CAPACITANCE BRIDGE



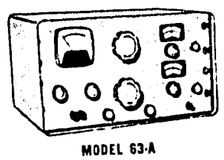
- CAP. RANGE: .0002 μμf to 11,000 μμf.
- APPROX. ACCURACY: ±0.25% + range factor.
- Measures direct or grounded capacitance and conductance.

MODEL 74-C Price $935

- Self-contained 100 kc oscillator and detector.
- Special models available at 1000 ~, 465 kc and with built-in dc bias for diode testing.

NEW INDUCTANCE BRIDGE

(Tentative Specifications)

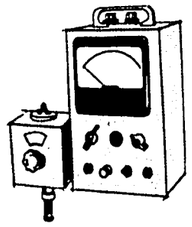


MODEL 63-A

- INDUCTANCE RANGE: .002μh to 1.1 henry.
- INDUCTANCE ACCURACY: ±0.25% + range factor.
- RESOLUTION: .01%.
- TEST FREQUENCIES: Continuously variable from 1 kc to 100 kc with internal oscillator and detector.
- EFFECTIVE SERIES RESISTANCE RANGE: .01 to 110,000 ohms.
- Non-interacting inductance and resistance balance controls.

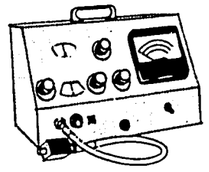
UHF GRID DIP METER

- FREQ. RANGE: 300 to 1000 mc.
- Small, lightweight probe.
- High sensitivity for both capacitive and inductive coupling.
- Internal 120 ~ modulation or external modulation.
- May be operated as a diode detector.



MODEL 101-B Price $275

RF DISTORTION METERS



MODEL 85 Price $740

- FREQ. RANGE:
  Model 85-B: 1 to 100 mc.
  Model 85-C: 0.1 to 6 mc.
- SENSITIVITY: 60 db below 1 v.
- INPUT IMPEDANCE: Approximately 50 ohms.
- Rapid measurement of total distortion.
- Same voltmeter features as model 91-C above.

PIPELINE TO PRECISION

Model WWVT RECEIVER
transistorized and rugged

A portable receiver for utilizing transmissions of WWV and WWVH. It is battery operated, small (9"x12"x5"), light weight (6 lbs.), rugged-sealed metal case and encapsulated components, and designed especially for remote operations under extreme environmental conditions; meets MIL-8189B Specifications. It features instantaneous crystal controlled frequency selectivity, self-contained antenna and 2 microvolt sensitivity.

Model WWVC STANDARD FREQUENCY COMPARATOR

A highly sensitive (better than 1 uv on all frequencies) crystal controlled receiver for utilizing transmissions of the National Bureau of Standards stations WWV and WWVH. Used for precise audio and radio frequency standards work as well as accurate time interval measurements. Available in cabinet or for rack mounting using a 5¼" panel.

Model SR-7 WWV RECEIVER

This receiver is the dual conversion type. Dimensions: 3-15/16" x 11" x 8½" deep. Available in upright or vertical models, or as rack mounted model. Noise limiter, antenna trimmer and provision for an oscilloscope or head phone are incorporated.

Model AK-8 ANTENNA KIT

This special antenna is designed to provide optimum response to signals from WWV and WWVH on 2.5, 5, 10, 15 and 20 mc. Includes modification kit for receiver with all wire, 50' of coaxial cable and suitable fittings to provide outstanding performance. Antenna is completely assembled; needs only one support for satisfactory operation.

Benchpak Model BP 200A Adjustable POWER SUPPLY

Hi range 150V to 300V: Lo range 0 to 150V. 150 MA available throughout (200 MA at high end of each range) plus a fixed 150V 50 MA at all times. 4" wide x 8" deep x 7½" high; weight 14 lbs.

CHANGEABLE CHASSIS

SPEED-CHASSIS

The Speed-Chassis is a flexible breadboard assembly with interchangeable socket arrangements which can be mounted on a relay rack if desired. Shield cover and panel are available to make successful breadboard assemblies both permanent and neat.

SUBMINIATURE 13-DIGIT ENCODER *for airborne or other limited space applications. Detailed specifications in Bulletin 0858.* **SIZE:** *2⅜" dia. x 3¾" long; ¼" dia. shaft, ⅞" long.* **WEIGHT:** *1¼ lbs.* **OVERALL ACCURACY:** *± 1¼ quanta in 8192.* **READOUT RATE:** *Model A, nominally 10KC (50 microsecond pulse), max. of 100KC (5 microsecond pulse). Model B, max. of 200KC for element, 10KC for sequence.* **MAXIMUM ANGULAR SPEED OF ROTATION AT FULL ACCURACY:** *2 rpm (6 rpm at 12-digit accuracy). 10 rpm with temperature control.*

4" DIA. 13-DIGIT ENCODER *for general purpose applications. Detailed specifications in Bulletin 0958.* **SIZE:** *4" OD with protrusions on one side x 7" long; ¼" dia. shaft, 0.67" long.* **WEIGHT:** *9¼ lbs.* **OVERALL ACCURACY:** *± 1 quanta in 8192.* **READOUT RATE:** *100 cps, max.* **MAXIMUM ANGULAR SPEED OF ROTATION AT FULL ACCURACY:** *720 rpm; maximum rotation rate, 600 rpm.*

6" DIA. 13-DIGIT ENCODER *for general purpose applications. Specifications in Bulletin 1058.* **SIZE:** *6⅜" dia. with protrusions x 7¾" long; ½" dia. shaft, 1" long.* **WEIGHT:** *14 lbs.* **OVERALL ACCURACY:** *± 1 quanta in 8192.* **READOUT RATE:** *100 cps, max.* **MAXIMUM ANGULAR SPEED OF ROTATION AT FULL ACCURACY:** *720 rpm (10 microsecond pulse).*

Model A2.6SS13 (Parallel readout)
Model B2.6SS13 (Sequential readout)

Model A4DP13

Model A6DP13

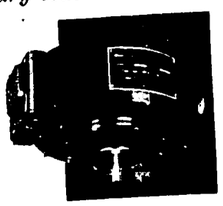
Now from

Baldwin®

precision shaft angle analog-to-digital encoders in 5 standard models:

13, 16 and 18 digit / photoelectric readout / reflected binary code.*

9" DIA. 16-DIGIT ENCODER *precision unit for radar applications. Detailed specifications in Bulletin 1158.* **SIZE:** *9⅛" dia. with protrusions x 4⅜" high; ½" dia. shaft, 1¼" long.* **WEIGHT:** *17½ lbs.* **OVERALL ACCURACY:** *± 1 quanta in 65,536.* **READOUT RATE:** *100 cps, max.* **MAXIMUM ANGULAR SPEED OF ROTATION AT FULL ACCURACY:** *90 rpm (10 microsecond pulse)*



Model A9SP16

HIGH PRECISION 18-DIGIT ENCODER *for radar or theodolite applications. Detailed specifications in Bulletin 1258.* **SIZE:** *21" max. dia. x 8⅛" high.* **WEIGHT:** *169 lbs.* **OVERALL ACCURACY:** *± 1 quanta in 262,144.* **READOUT RATE:** *100 cps, max.* **MAXIMUM ANGULAR SPEED OF ROTATION AT FULL ACCURACY:** *25 rpm (10 microsecond pulse).*

*Encoders with decimal, trigonometric functions and other nonlinear codes are also available. All disks are made on a special divided circle machine designed and built by Baldwin. *Write for descriptive bulletins.*

GUIDEPOSTS

to help you find your way around in the IRE DIRECTORY:
Pink section contains a complete description of each of the various parts of the DIRECTORY, plus a terminology index to all products listed, and a copy of the complete questionnaire form.
Machol Edge Indexes on pages 265, 365, and 587 guide you directly to the major product headings.

MEMORY PACKS

General Electric's *Memory Pack* is a completely encapsulated memory storage plane for computer systems. Built to withstand considerable shock and vibration and extreme variations in humidity, altitude and temperature, the enclosed construction of the Memory Pack allows it to be easily stacked into multiples of the basic number of bits. Tested packs are available in virtually any size, usually at no increase in cost over open planes. 227-21

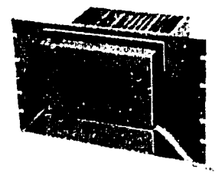
By

POTTER

M906 General Purpose Magnetic Tape Transport



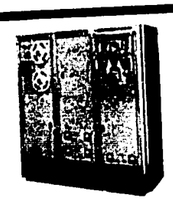
M909 Perforated Strip Reader

Potter designed data processing equipments have an established reputation for unexcelled performance and reliability. Maintaining or exceeding the "State of the Art" is the company's philosophy in this fast moving technology.

Custom designs are offered to satisfy military or commercial specifications.

M3269 Tape Loop Buffer

Single And Dual Gap Read/Write Heads



Integrated Systems For Data Processing

Write for literature describing these and other Potter special application products. For detailed technical specifications on any of the Potter Products listed above, call or write your Potter Representative or the plant.

250 KC Transistor Driven SHIFT REGISTERS

Available in 5 bit and 10 bit plug in modules

These small, rugged, low cost units are assembled magnetic shift registers with associated transistor circuitry mounted on a printed circuit board. Units may be cascaded to form registers of any length with input and output to every bit available on the socket.

Only Magnetics Research's unique "wide width" design gives you:

- **Output voltages of controlled width**
- **Operation independent of advance current width**
- **Positive protection against transistor over-dissipation**

For complete details on standard stock designs write for MRC technical bulletin I-259

MAGNETICS RESEARCH COMPANY, Inc.
255 Grove Street • White Plains, N.Y. • White Plains 9-9588

SHIFT REGISTERS
. . . custom designed

General Electric custom designs shift registers between 0 and 700 kc/s. With shift pulse power as low as .001 watts per kc, *voltage controlled* registers can deliver shift rates from 70 to 700 kc, to customers' specifications. Up to 100 kc, core-diode registers can be tailored to your exact needs. Most important, G. E.'s short cycle design service delivers first prototypes within a matter of days after specifications are received. 227-25

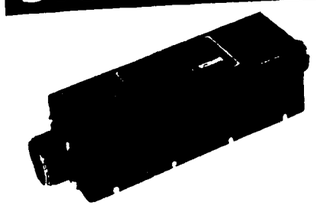
COURT STREET, SYRACUSE, NEW YORK

For details, circle #218 on Reader Service Card

DIGIOMETER



"Digiometer" is a fast rugged component which accepts binary digits at its input and provides the equivalent of a precision potentiometer setting at its output. The operation is accomplished by hermetically-sealed micro-miniature relays switching fixed, encapsulated, precision resistance elements. The unit shown will accept up to ten digits in straight binary code. Other codes can be supplied on order.

APPLICATIONS

Digital control systems
Automatic checkout systems
Airborne command links
Industrial automaton systems
Digital-analog function generation
Tie-in of digital and analog systems

alfax "ELECTRICITY IS THE INK" **is revolutionizing graphic recording!**

ALFAX PAPER AND ALDEN ADJUSTERLESS RECORDING TECHNIQUES MAKE POSSIBLE—

• ***New Accuracies and Resolution in Direct Graphic Recording!***

Record full range of your electronic signal outputs—monitor processes and operations directly and instantaneously on Alfax Paper —no pens or ink—up to 17 step permanent tone shades.

Magazine Fact Finder—2 Channels Plus Timing

Here is a compact Magazine Recorder which will permanently record two separate operations and automatically print a recurring time signal on the Alfax Tape. Simple to install—they will operate unattended — remotely or on the spot.

Multi-Channel Fact Finder—30 Channels Plus Timing

Record thirty channels of on-off data by merely supplying current to writing stylI—no pens or inks—simple motion switches are easily installed to make or break writing current to Alfax Paper. Ideal for monitoring production operations and processes, this compact, rugged recorder is portable for lab, factory and field use.

Alden "Flying Spot" Component Recorders

Get hi-resolution tone shade recordings on Alfax Paper of detecting instruments using scanning or sweep methods to collect data. Synchronize Alden "Flying Spot" with sweep or rep rate of your equipment—use direct signal outputs to mark Alfax with tone shades proportional to signal variations. Ideal for sonar, radar, facsimile, ultrasonic and magnetic flaw detection etc.

Alden Curve Plotters

The Basic Helix Recorder with special electronics can provide continuous, automatic curve plotting of phenomena converted to voltage. Any number of channels can be recorded simultaneously along with standard or reference signals so that the information is instantly and permanently self-calibrated.

• ***Fastest, Most Accurate Means of Communication!***

New high and low speed Alden facsimile recording systems using Alfax Paper are the most accurate means of communication today —are simple to install and operate virtually unattended.

High Speed Selective Dispatch Facsimile System

Specially designed to permit selection of pertinent data from any copy — letters, dispatches, reports, etc. — for instant transmission to wherever needed—yet complete reproductions can also be sent. 12 square inches of copy, 1800 words of newspaper type, or 900 words of typewriter text can be transmitted and received per minute.

Continuous Reproduction Facsimile System

Extremely high quality reproduction of large copy: such as newspapers, weather maps, blueprints, finished advertising layout, drawings, photographs, etc., can be transmitted easily with this equipment. Copy is scanned flat and reproduction automatically on remote continuous recorder.

Alden Giant Bulletin System

Fastest, accurate means of disseminating information to large groups of people. Automatically provides changing "up to the minute" bulletins 4 feet wide and up to 10 feet high and as much as 12 square feet of copy per minute, enlarged 10 times from remote flat-copy scanner as sent either by wire or a microwave system.

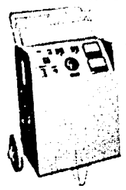
Headquarters for **HIGH POTENTIAL** Testing

INSULATION BREAKDOWN DIELECTRIC STRENGTH

Every over-potential test need from the generator to the appliance motor . . . is met by a HYPOT®



150 KV Testing Mobile HYPOT®

Non-destructive testing of power cables, generators, and insulators with AC or DC test potentials to 150 KV. New DC Mobile HYPOT® is easier to handle, cuts costs. Write for bulletin "Mobile HYPOT®"

Model 5500

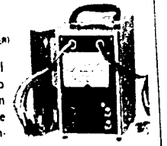
Typical Mobile HYPOT® provides 0 to 120 kv d-c at 5 ma. More compact and easier to use than equivalent a-c test sets. Lower in cost, too.

30 KV Testing Bench HYPOT®

Models available with AC or DC test potentials from 5 to 30 KV. Widely used for insulation testing of cables, distribution equipment and heavy duty motors.

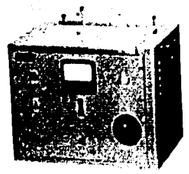
10 KV Testing Portable HYPOT Jr.®

The advanced over-potential tester that enables anyone to make high potential breakdown tests. Separate lights indicate excess leakage current and insulation breakdown. Available with test voltages from 1500 v a-c to 10000 v a-c.



Model 412

INSULATION Materials Tester



Model 4501 Materials Tester

New materials testing AC HYPOT® meets ASTM dielectric strength test requirements. Features automatic rate of test voltage rise, transparent test cage that is safety interlocked and complete line of plug-in materials testing fixtures. Write for new bulletin . . . "HYPOT® Insulation Tester"

VIBROTEST® measures FIVE MILLION Megs

Direct reading a-c operated megohmmeter for resistance measurement to five million megohms. Drift free, stable and accurate on all ranges.

VIBROTEST® Model 2570 has six megohm ranges: 1-50, 10-500, 100-5000, 1,000-50,000, 10,000-500,000 and 100,000-5,000,000 megohms. Write for bulletin.

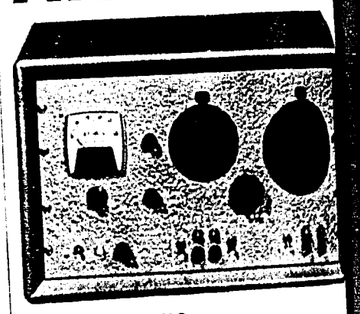
THE AETNA SERVO ANALYZER



APPLICATIONS

Aetna's LOW COST Servo Analyzer be used to measure amplitude sponse, phase response, open or cl loop transfer functions, transient sponse, computer response etc. particularly useful in evaluating and DC servo systems.

TECHNICAL DATA

FREQUENCY RANGE

Model 100-A
0.25 to 100 cycles per second

Model 100-B
0.0008 to 100 cycles per second

Frequency stability 1.0%

OUTPUT WAVE FORMS

Sine wave 20 volts peak to peak
Modulated sine wave 30 volts
Square wave 20 volts peak to p
Synchronized sweep over the entire f quency range
Cathode follower output system a 100 to 1 attenuator

PHASE MEASUREMENT

Zero to ± 180 degrees

INPUT CARRIER

50 to 5000 cycles per second, 115 v

POWER REQUIRED

150 watts, 117 volts, 60 cycles

RACK MOUNTING

19" wide x 10½" high x 14" d

CABINET MOUNTING

21½" wide x 13" high x 14½" d

NET WEIGHT

65 pounds

Acton Laboratories, Inc.
LABORATORY INSTRUMENTS OF EXCEPTIONAL PRECISION

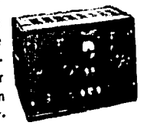
VOLTAGE MEASUREMENT

TYPE 810-A VTVM — Balanced circuits and liberal inverse feedback to insure long-time stability and accuracy. 7 full scale DC ranges: 1-1000 volts; 6 AC ranges; 1-300 V (rms); 7 resistance ranges 0.2 to 500 with multipliers of x1-x1 meg. DC accuracy ±2%; AC accuracy ±3%. Frequency response ±1 db, 10 cps to 700 mc. 100 meg input impedance for DC measurement. High input impedance to 700 mc maintained by 1.2 mmf input capacitance of AC probe.

TYPE 815-A VTVM — Has wide ranges. 9 full scale DC ranges; 0.1-1,000 volts; 8 AC ranges: 0.1-300 volts (rms); 9 DC current ranges: 0.001 ua to 100 ma; 9 resistance ranges: 0.2 to 500 with multipliers x0.1 to x10 meg. DC accuracy ±2%, AC ±3%, both 1 V range and higher. Frequency response 15 cps to 100 MC. DC input impedance 100 meg; AC 5 mmf and 10 meg. Also available as 815-AR (rack mount — gray panel).

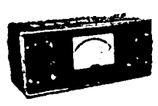
IMPEDANCE MEASUREMENT

TYPE 310-B Z-ANGLE® METER — Measures in polar form the impedance, phase angle, dissipation factor, and storage coefficient of any RLC combination. One balancing control permits accurate analyses to be made more quickly and easily than with conventional AC bridges Measures impedances from 0.5 to 100 k. Frequency range: 30 cps to 40 kc. Accuracy of impedance magnitude is ±1% to 20 kc and ±2 degrees for phase angle. Unit has internal 400 cps and 60 cps signals.



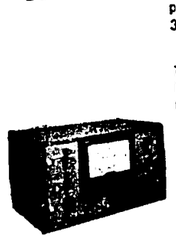
TYPE 314-A LOW-IMPEDANCE Z-ANGLE® METER — Measures low values of complex impedances in polar form. Direct readings of impedance in ohms, phase angle in degrees, and dissipation factor. Freq. range of 30-1000 cps, impedance-magnitude range of 0.005-1000 ohms accurate to ±1%, and dissipation-factor range of 0 to infinity. Phase angles measured from −90° to 0° to +90°, with accuracy of ±1°. 4-terminal arrangement nullifies effect of lead impedance and insures accurate measurements. Also available as 314-AR (rack mount).

PHASE MEASUREMENT AND GENERATION

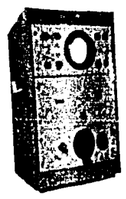


TYPE 320-AB PHASE METER — Measures phase difference between 2 signals (1 cps to 100 kc) of any wave shape and indicates phase angle on large meter with separate ranges of 360°, 180°, 90°, and 36°. Accuracy is ±(1% of full scale + 3 degrees). Requires no adjustments, corrections, or balancing operations. Amplitude range is .7 to 120 volts rms. Input impedance of 10 meg and 13 mmf. Also available as 320-ABR (rack mount).

TYPE 709-A BROADBAND SECONDARY PHASE STANDARD — Calibrates phase measuring instruments and measures phase when used with oscilloscope. Develops 2 sinusoidal signals variable from 0° to 360° with respect to each other. Range is 20 cps to 20 kc. Accuracy of ±1° from 20 cps to 10 kc. High input impedance, low output impedance. Inherent distortion less than 1%. 0.5 to 5-volt output varies less than ±2% with phase shift. Also available as 709-AR (rack mount).



TYPE 328-A TRANSISTORIZED PHASE METER — Frequency range 10 cps to 50 kc. Direct reading from 0 to 360° in 6 ranges of 60° each on large 5" meter scale. Absolute accuracy of 1° from 10 cps to 10 kc. Amplitude range .25 to 170 volts peak except at low frequencies. Input impedance: one megohm shunted by 20 mmf. Internal output impedance is approx. 100,000 ohms. Recorder connector provided. Power: 105-125 volts, 60 cycle AC, 20 watts. Terminals provided for operating from an external 45 volt battery, 50 mil drain. Also available as 328-AR (rack mount).



TYPE 7000-B AUDIO PRIMARY PHASE STANDARD — Calibrates phase detectors and phase shifting devices but can also be used to measure phase shift. Supplies 2 sinusoidal signals of same frequency whose phase relationship is continuously variable from 0° to 360° with ±0.05° accuracy, set by Lissajous pattern. Any single frequency available from 30 cps to 20 kc. Output of 1 to 10 volts rms from impedance of approximately 200 ohms.

TYPE 706-A ULTRA-SONIC PRIMARY PHASE STANDARD — Calibrates high frequency phase meters, phase detectors, and phase-shifting devices. Generates 2 sine-wave signals having variable phase difference 0° to 360° at any specified single frequency 20 to 200 kc. Phase angle accuracy of ±0.1 degree set by observation of multiple frequency Lissajous pattern on built-in scope. Also available as 706-AR.

TYPE 511-A POWER AMPLIFIER — Low distortion, low noise and phase shift compensated amplifier for 50 cps to 50 kc range. Output load characteristics: 5 ohms 12.8 watts, 25 ohms 13 watts, 200 ohms 15 watts, 1200 ohms 12 watts, down 1 db at 50 kc. Phase compensation permits application as drive source for Type 7000-B. Also available as 511-AR (rack mount).

TRANSMISSION AND DELAY MEASURING SETS

Measures the absolute amplitude and relative delay characteristics of 600 ohm transmission circuits in the frequency range from 200 cycles to 24 kc. The instrument consists of two basic units: the 451-A Transmitter and the 452-A Receiver.

The instruments will operate 32°F to 130°F and with normal 60 cycle line voltages ranging from 105 to 125 volts. It has an overall precision and accuracy of ±50 microseconds and a drift rate not exceeding ±50 microseconds per 30 minutes.

POTENTIOMETER TESTING EQUIPMENT

TYPE 394-A PONOGOMETER® STANDARD — Measures equivalent noise resistance (ENR) of single or multiturn precision potentiometers. Provides for establishing threshold level of ENR from 10-2000 ohms. ENR's above threshold level established produce both visual and audio indication. 100 kc frequency response flat to 50 kc. Accuracy is ±(3% of threshold value + 3 ohms). Recovery time is 1.5 seconds maximum. Also available as 394-AR (rack mount). Ideal for incoming inspection or laboratory analysis.

TYPE 395-C PONOGOMETER® STANDARD — Calibrates Ponogometer®. Accuracy 1%. Also available as 395-CR (rack mount).

TYPE 396-B PONOGOMETER® ATTENUATOR — Extends range of threshold resistance of Ponogometer®. Permits direct measurement of ENR's from 10 ohms to 100 k. Frequency response is ±3 db from 12 cps to 1.5 mc. Available as 396-BR (rack mount).

RESEARCH AND DEVELOPMENT

Acton Laboratories, Inc., also has complete facilities and experienced engineering staff to provide specialized research in and development of electronic components and instruments.

ENVIRONMENTAL TESTING

Testing to military and commercial specifications in a fully equipped Environmental Testing Laboratory is another important service provided by Acton Laboratories, Inc.

DUAL SPEED DRIVES, Types DSD-1 or DSD-2, are manually operated speed reducers for high or medium velocity ratios. Features — spring loaded gears and bearings, aluminum dials (3" or 5" diameter available), complete freedom from backlash within the rated torque output range. Accuracy 6 minutes of arc. Precision drive PDW-1, accuracy 1 minute of arc.

Environmental Feedback...

TESTING DIVISION
Stressing the Engineering approach in Environmental, Qualification and Reliability Testing

Associated

MANUFACTURING DIVISION
The quality line of Environmental Chambers and Test Equipment

The skill and know-how gained from the coordination of Associated's two divisions through "feedback" of information assures the proper utilization of test equipment within the Testing Division and the proper design of environmental test equipment within the Manufacturing Division.

Write for illustrated literature!

TESTING DIVISION

Temperature-Altitude-Humidity –300°F to +500°F, 200,000 ft., 5% to 100% RH, in one of more than 30 chambers available for your testing.

Sawtooth shock test being performed on a Shock Test Machine developed by Associated.

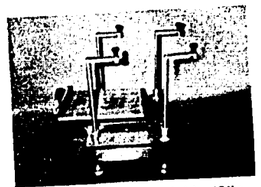
Explosion-proof testing in accordance with specifications MIL-E-005272B, MIL-E-5272C MIL-E-5422D, etc.

Reliability testing being performed using automatic check out panels.

MANUFACTURING DIVISION

All Lucite Salt Spray Chamber built to perform tests in accordance with specifications MIL-E-5272A, QQ-M-151A, MIL-STD-202A, etc.

Temperature-Altiude Test Chamber for environmental testing within the range of –300°F to +1200°F and from sea level to 350,000 feet.



Auxiliary Vibration Table (Slippery Table) a complete line, adjustable in height, for use with any vibration machine.

High temperature—low temperature chambers available in single or dual units for testing range of –300°F to +1200°F.

ASSOCIATED TESTING LABORATORIES, INC.

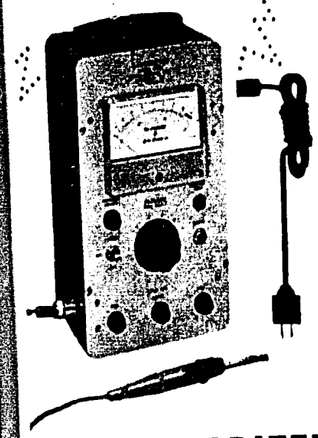
New



TRANSISTORIZED D-855 GAUSSMETER

- Complete portability for use in field or lab
- Reads flux fields up to 30,000 gauss
- Can be equipped to read Earth's field flux density
- Probe is only .025" thick
- Active area of probe .01 square inches
- Fully transistorized
- Power Supply: selective from 105-125 volt 50-60 cycle line or internal batteries
- Net weight: 8-3/4 lbs.
- Overall size: 13-1/2" high, 8-3/4" wide, 7-1/4" deep

Precision built, completely transistorized, the new D-855 Gaussmeter accurately measures flux density and determines "flow" direction. Ideal for measuring and locating "stray fields", plotting variations in strength and checking production lots against a standard. It's simple to operate. The Dyna D-855 doesn't require jerk or pull, gives no ballistic reading. Can be operated in the field with batteries which are enclosed in rugged protective carry case. This is an improved version of the pioneering D-79 Gaussmeter (Pat. #2,707,769) which has modernized magnetic flux measurement for the past six (6) years.

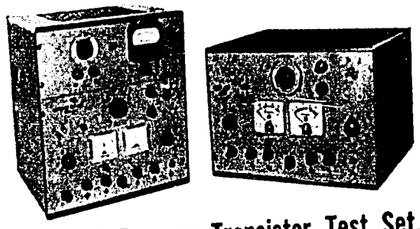
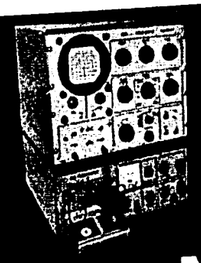
COMPLETE LINE OF TRANSISTOR TEST EQUIPMENT



General Purpose Transistor Test Set, KP-2 Series • Research and quality control with maximum reliability • Direct Precision Measurements • Up to 2 amps 200v. Based on h parameters using basic straight forward circuitry. Features common bases or emitter, direct measurement of h parameters plus α and β cutoff. Meter indication of DC parameters — I_{co}, I_{eo}, V_{cer}, V_{ebf}.

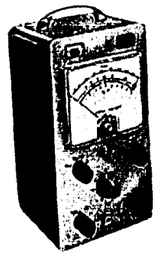


Curve Tracer, Model MW-1

• Newest, most Versatile on market Features Highest maximums in broad ranges fup to 30 amperes and 300 volts — 450 watts maximum!. Lowest impedance Positive overload protection Unique tube adapter allows vacuum tube measurements by external provision of screen and filament supplies

Transistor Test Set, Model GP4

• Standard of the Industry for low power transistors Measures h parameters and equivalent T coefficients NPN and PNP junction and surface barrier transistors common base or emitter circuits α and β cutoff and I and C Measurement frequency from 100 cps to 1 mc

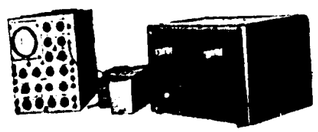


Beta Tester, Model KT-1

• Lightweight • Portable • Easy to use. Measures Betas h_{fe} and I_{co}. This completely self-contained unit features a transistorized 1 kc oscillator and batteries, printed-circuit construction and meter overload protection.

Semiconductor Resistivity Test Set

• Precise. • Easy to operate . . . Features exclusive FOUR-POINT-PROBE. Reliable applications for both production quality control and R&D. Measurement accuracy ±5%.



Minority Carrier Lifetime Test Set, Model JJ

••Basic Tool for the Industry . . . Provides a reproducible measure of minority carrier lifetime of both germanium and silicon. Evaluates performance characteristics.

Component Selector Model NA-1

Designed primarily for incoming inspection or quality control testing a large number of 2 or 3 terminal components • Capacity 50 at one time • Manual or foot switch operation • Safety switching • Manual reset.

GREIBACH
BIFILAR SUSPENSION
Precision Meters

Incorporating the truly revolutionary, pivotless, weightless light-pointer movement (shown at left). Superior performance to conventional pivot and pointer precision meters. Thousands in daily use. Greibach meters feature:

- Accuracy of 0.25% or better.
- Sensitivity to 0.2 microampere, full scale (25×10^{-4} amps).
- Overload up to 125,000,000%!
- Shock resistance up to 500 G's on meter movement.
- Voltmeters up to 5,000,000 ohms/volt.
- Energy dissipation as low as 4×10^{-10}.
- Repeatability of 0.1% or better without tapping.
- Panel (shown), Bench and Portable models. Wide range of ranges and multi-ranges.

Literature: Technical details and complete specifications available on request.

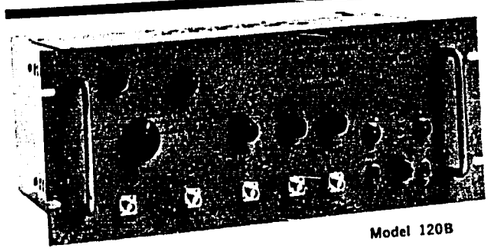
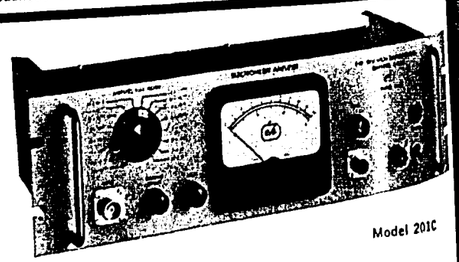
EH Specialized laboratory and production test instruments for your advanced requirements

EH Model Number	Item	Description
101N	Coincidence Unit	Multi-channel (4) coincidence circuitry. Ultimate resolution: 3 millimicroseconds. Operates directly from photomultiplier outputs.
120B	Pulse Generator	Ultra-fast hard tube pulse circuitry. Rise time < 2.5 millimicroseconds. Repetition rate 10 cps to 10 Mc continuous. Pulse widths 2.5 to 25 millimicroseconds.
130	Pulse Generator	Fast general purpose pulse circuitry. Pulse widths 100 millimicroseconds to 1 second. Rise time < 10 millimicroseconds. Pulse amplitude: 50 volts.
140	Transistor Rise, Storage, and Fall Time Meter	Semi-automatic measurement of rise, storage and fall time of NPN and PNP transistors. 10 millimicroseconds to 10 microseconds full scale, each channel. Readout time: less than 50 milliseconds. Linearity: ± 7%, ± 5 millimicroseconds.
161	Binary	50 Mc scale of 2 unit. Element for fast pulse systems. Extends ranges of present cycle counters.
201C	Electrometer Amplifier	Measures currents between 10^{-6} and 10^{-15} ampere. Ultra-high sensitivity with ultra-low noise. Response time: 250 microseconds for 10^{-9} ampere full scale.
202	Electrometer for Automatic Control	Measures current with specifications identical to EH model 201C, but has presettable high limit control for actuation of external devices. Extremely stable; zero drift less than 3% per week.
203 series	Constant Impedance Micromicroammeter	Constant impedance instrument for automatically measuring very low currents. Measures transistor I_{co}, diode back current, capacitor leakage current. Fast response time even with large overloads. Provisions for remote control.
213	Microvoltmeter	Measures potentials below 1 microvolt. Response time < 50 milliseconds. Chopper stabilized; ultra-low drift. Accuracy: 3% of full scale.
215 series	Multimeter • Millivoltmeter • Micromicroammeter • Megmegohmmeter • Current Integrator	Basically a very stable millivoltmeter, the EH 215 series offers easy conversion to micromicroammeter, megmegohmmeter, and current integrator. As millivoltmeter, range is 10 millivolts to 10 volts f. scale with fast response. Measures current to < 10^{-11} ampere. Measures resistance to > 10^{16} ohms Measures integrated current <10^{-13} coulomb.
301B	Analytical Balance	Automatic analytical balance. Measurement time: 1 second. Accuracy: 0.2%. Range: 1 milligram to 200 grams.
401	Microwave Signal Generator	Precision microwave signal generator for frequencies from 500 to 11,000 megacycles. Readout to 7 significant figures. 1 watt power output, 1 to 11 kMc. Extremely stable 1 part in 10^7 short term.

EH Model Number	Item	Description
ZT	Pulse Transformer	Impedance matching pulse transformer for pulse inversion or straight reproduction. Features 0.5 millimicrosecond rise time. For various impedances and connector matching. Extremely compact small size.



Model 120B



Model 201C

EH instruments are designed and manufactured to the high quality standards necessary for the most advanced work. All over the world, these superb instruments are making important contributions at research and testing centers.

Write or wire EH for additional information. Our staff is ready to assist you.

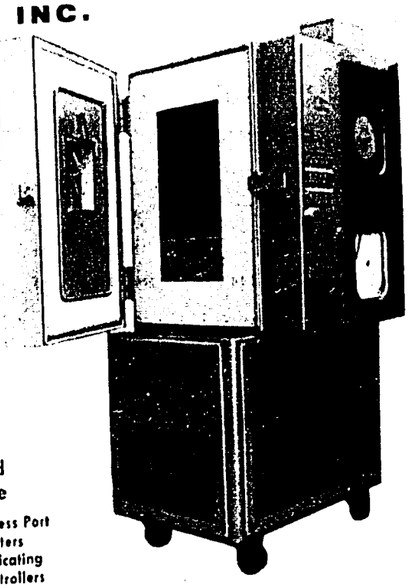
INTRODUCES THE

NEW

TEMPERATURE ALTITUDE HUMIDITY CHAMBER



- Temperature Range −120°F to+500°F
- Altitude Range Sea level to 200,000 feet
- Humidity Range 20% to 95% between+35°F and+200°F, limited by a low dewpoint of+35°F.

Optional Accessories and Instrumentation Available

- Viewing Window
- Interior Light
- Manual Wiper
- Electric Feed-Thru Terminals
- Program Controllers
- Access Port
- Casters
- Indicating Controllers
- Recording Controllers

Standard Work Space Sizes Available

- 15" W x 21" H x 12" D
- 24" W x 30" H x 20" D
- 35" W x 36" H x 36" D

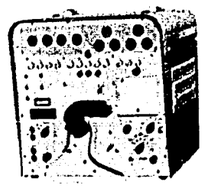
lifelong association with quality

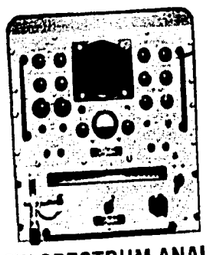
Lavoie test instruments are known and relied upon right around the world. Superlative design, consistent reliability and the industry's prime order of accuracy are the ingredients which continue to stamp all quality instruments bearing the Lavoie name.

Here are four representative units, each of which invites your trial and the beginning . . . or continuation . . . of a lifelong, rewarding association with the Lavoie standard of quality.



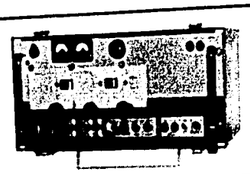
LA-302 ROBOTESTER

Provides the immediate profits of the automated approach to volume testing as well as for unique individualized test programs. High-speed sampling, go/no-go indication, with digital readout of fault isolation.



LA-20W SPECTRUM ANALYZER

Features 1 to 44 Kmc range in one instrument, selection of square law, linear or log detection, 10-KC resolution at 3 db points, regulated filament and plate supplies. Unit illustrated is only one of a full line of spectrum analyzers.



LA-70A FREQUENCY METER

Frequency measurements from 20 mc to 3000 mc with .0001% accuracy. Oven-controlled crystal oscillators, direct dial reading and light in weight for ease in portability. Ideally qualified to accommodate stringent FCC communications requirements.

LA-90 FREQUENCY STANDARD

New design approach to crystal oven thermal regulation permits frequency stability of 1 part per 10^9 per day at low cost, in small package. Oven temperature stability of 0.01%. Output frequency (basic LA-90 unit): 1 mc, 5 mc, 100 kc, 10 kc, 1 kc.

Technical literature describing these units in detail is available on request. Detailed technical data may also be supplied on a selection of Pulse Generators, WWV Receivers and Crystal Ovens and a diversified line of quality test equipment for laboratory and plant.

MANSON

HAS THE LOW-COST SOURCES TO MEET YOUR NEEDS

$\Delta f/f < 1/10^8$

(DRIFT RATE PER DAY DUE TO CRYSTAL AGING)

Plus outstanding stability under all other environmental and circuit conditions:

$\Delta f/f$ due to:

Circuit Noise	parts in 10^{10}
Ambient Temperature Change	$1/10^8$ from 0°C to 50°C
Vibration & Shock	$2/10^9$ per MIL-T-17113
Change in B+ or Filament Voltage	$2/10^9$ for ±20% B+ change or ±10% filament change

Ultra-stable frequency generators for use as reference sources or master oscillators. Unmatched for precision, compactness and low cost, Manson Oscillators and Harmonic Generators meet the highest stability specifications per dollar.

		SPECIFICATIONS
1 Megacycle HARMONIC REFERENCE OSCILLATOR Price $1095.  MODEL RD-110	Complete, self-contained system incorporates ultra-stable crystal oscillator, jitter-free pulse generator, mixer and regulated power . . . . . Generates, measures, monitors frequencies at harmonic points to over 1000 Mc . . . . . Crystal frequency tunable ±25 cycles *without degradation of stability characteristics* . . . . . counter-type, ultra-linear tuning dial for exceptionally accurate settability and readability.	FREQ. STABILITY: Meets above listed specifications. FREQUENCY: 1 megacycle, tunable ±25 cycles. OUTPUTS: a) Sine Wave, 3 volts rms across 50 ohms; b) *Pulse*, jitter-free, balanced, ±40 volts peak across 250 ohms. TUNING ACCURACY: 0.1 cps with direct-reading, linear dial; substantially zero-error readability and resettability. HARMONICS: Usable to kilomegacycle region. INPUT: 105/125 V., 60 cps, 100 watts. SIZE: 5¼" H x 19" W x 11¾" D, for rack or bench.
1 Megacycle HIGH STABILITY OSCILLATOR Price $395.  MODEL RD-140	Compact crystal oscillator suitable as a reference source or master oscillator in frequency control systems . . . . . non-microphonic design and proportional oven control assure high insensitivity to both vibration and temperature . . . . . *new packaged* version (RD-145) for direct, sub-assembly incorporation in portable or airborne instruments . . . . . 2 x 4 x 6 inches, 12 ounces . . . . . employs ultra-precise Manson thermostatic oven, substantially meeting RD-140 specs. FREQUENCY DIVIDERS AND MULTIPLIERS available to extend range from 100 kc to 10 mc and above . . . . . stability characteristics equal to crystal oscillator. AVAILABLE SOON! Model RD-147, ultra-low-drift oscillator . . . incorporates continuous aging compensation to reduce drift rate to 5 parts in 10^8 per 6 months.	FREQ. STABILITY: Meets above listed specifications. FREQUENCY: 1 megacycle. (Frequencies from 0.8 mc to 1.2 mc available on special modification.) Frequency adjustable more than 6 cycles, allowing ample compensation for crystal aging. Alternate version, Model RD-146, incorporates calibrated trimmer dial on front panel. OUTPUT: Sine wave, 1 volt rms across 1000 ohms. POWER REQUIRED: 250 VDC @ 60 ma; 6.3 VAC @ 1.8A. MOUNTING: For 19" relay rack or bench use. Front panel height, 3½".
1000 Megacycle REFERENCE GENERATOR Price $850.  MODEL RD-170	This precision-built, low cost standard employs crystal synthesizer techniques for high stability, low noise and low spurious signals . . . . . Basic unit furnishes outputs of 0.1 kmc and 1 kmc . . . . . Optional feature includes harmonic generator utilizing base frequencies to furnish highly stable, usable outputs over a major portion of microwave spectrum . . . . . All outputs tunable when used with RD-110. • Model RD-175, L-band generator, output tunable 1.095kmc-1.405kmc in 10-mc steps, meets above listed stability specifications when used with RD-140.	OUTPUT FREQUENCIES: 100 mc and 1000 mc sinusoidal. Tunable ±2.5kc and ±25kc respectively, if used with RD-110. STABILITY: Meets above stability specifications when used with RD-110 or RD-140. OUTPUT POWER: 100 milliwatts at either output. HARMONICS (Model RD-170H): Usable to above 20,000 Mc. INPUT POWER: 250 VDC @ 150 ma reg.; 6.3 VAC @ 4A. SIZE & MOUNTING: 5¼" H x 6¾" D, for 19" rack or bench use.

For Military Applications. . . . . CRYSTAL FREQUENCY SYNTHESIZERS

Manson manufactures the 0-406/UR synthesizer and a full line of disciplined incremental and continuous-coverage oscillators, approaching the "black-box" equivalent of a crystal with thousands of selectable frequencies. Ideal for SSB systems, as transmitter exciters or receiver VFO's, ultra-stable frequency generators, FSK exciters and similar applications where exactness, operating convenience and equipment dependability are mandatory.

Standard and developmental models cover the range from 15 kc to 410 mc. Features include stabilities and setting accuracies to $1/10^8$ and better; zero-error readability and resettability; ultra-low spurious signals; MIL construction.

Letterhead inquiries invited.

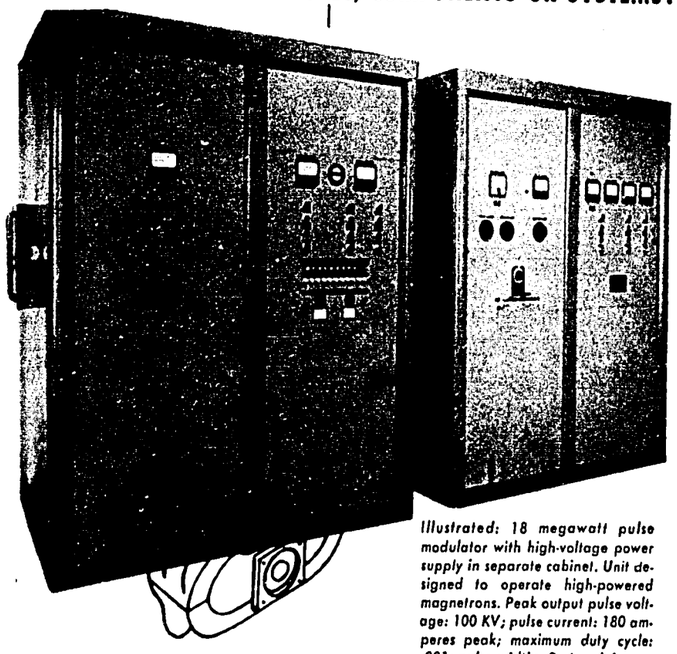
Pulse Modulators, High Voltage Power Supplies, Communications Instruments and Components, Complete Microwave Systems.

For details, circle #234 on Reader Service Card

Testing MAGNETRONS KLYSTRONS CARCINOTRONS

● OTHER MICROWAVE TUBES, COMPONENTS OR SYSTEMS?



Illustrated: 18 megawatt pulse modulator with high-voltage power supply in separate cabinet. Unit designed to operate high-powered magnetrons. Peak output pulse voltage: 100 KV; pulse current: 180 amperes peak; maximum duty cycle: .001; pulse widths: 2, 4 and 6 μsec.

Come to Manson for the widest selection of standard *Pulse Modulators* and *High-Voltage Power Supplies* covering all useful power levels. From kilowatts to tens of megawatts, Manson has precision-engineered designs for operation and test of magnetrons, klystrons, traveling wave tubes, backward wave oscillators, lighthouse tubes, pulse transformers, waveguide components and related devices. The wide range of standard models is readily adaptable to meet individual specifications.

HIGH POWER PULSE MODULATORS:

Hard- and soft-tube types from 16 kw. to 30 megawatts peak power output, and higher. Average output powers as high as 60 kilowatts. Typical operating features include: continuously adjustable voltage control; discrete or variable pulse widths; internally- and externally-controllable repetition frequencies; auxiliary synchronized outputs; pulse-shape monitoring circuits; and interlocking and overload protection.

HIGH VOLTAGE POWER SUPPLIES:

High-voltage DC and AC types, single- or multiple-output, regulations and stabilities to 0.01%. Standard and custom designs to satisfy your specific tube testing or production problems: highly-regulated supplies uniquely suited for TWT test and operation; unregulated high-power supplies for systems testing; and complete power sources for controlling all aspects of tube production.

Available from stock! **BASIC 1 AND 2 MEGAWATT MODULATORS**

375 FAIRFIELD AVE. manson **STAMFORD, CONN.**

Manson offers to engineers and technicians a rewarding present and attractive future in Connecticut.

Test and Service Products

For MAGNET CHARGING, TREATING and CALIBRATION

MODEL 1221 is used for small magnets. Its 10,000 ampere-turn output will saturate about 2" of Alnico V. Operates by condenser discharge method thru plug-in fixtures. Uses only 30 watts at 115 v. For continuous duty; charging cycle averages 3 sec. Price $180.

MODEL 107A is a versatile, condenser discharge magnetizer for most medium size magnets of either simple or complex pole configuration. It provides ranges of 12,000 and 24,000 ampere-turns and is capable of saturating most instrument magnets, including the core type mechanisms, using the standard flat bar, adapters or wire-wound fixtures. Can be used for continuous duty production magnetizing; average charging cycle is under 5 sec. Weight is 75 lbs. Size 12 x 7 x 17. Operates from 115-volt, 60-cycle line. Price $530.

MODEL 1500 is designed for production, research and instrument repair work. It will magnetize the new cobalt platinum and barium ferrite materials as well as all the Alnicos. It will saturate large switchboard meter assemblies and all panel type instruments and uses most existing adapters designed for the Model 107A. Wire-wound fixtures are plugged into the front panel through a safety interlock system providing maximum operator protection. Operates from 115-volt, 60-cycle line. Size 11 x 20 x 15; weight 125 lbs. Price $945.

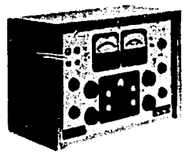
MODEL 942 will saturate Alnico magnets weighing up to 34 lbs. and high flux ceramic magnets of any shape or pole configuration. Operates on condenser discharge principle from regular 115-volt, 60-cycle line. Produces charging outputs (depending on number of 100 μf condensers employed) from 100,000 to 200,000 ampere-turns through plug-in transformers, up to 3600 watt-seconds using wire-wound fixtures. Adapters for multi-pole rotors, rod, bar, ring and various other shapes available. Equipped with extensive system of safety interlocks for complete operator protection. Designed for continuous production use with low power consumption. Price of basic unit is less than $2100.

MODEL 889A de-magnetizes saturated magnets to any desired level of flux. Provides a precision method for rapidly treating permanent magnets, including the new core type instrument mechanisms. Used with Model 206A Booster or Model 107A Charger. Price $247.

MODEL 1295A is a stable, all transistorized Gaussmeter which measures magnetic fields to ±3% accuracy over 9 full-scale ranges: 0-100, 200, 500, 1K, 2K, 5K, 10K, 20K, and 20K+ gausses, using a single probe. A 1000-gauss, ±¾% reference magnet is also supplied. Operates from 115-volt, 50-400 cps line, or 5 mercury cells (not supplied). Price complete $420.

For ELECTRICAL INSTRUMENT CALIBRATION

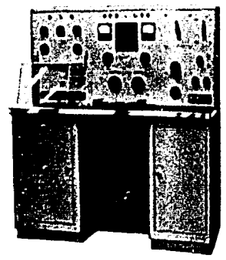
A Model for Every Purpose and Price Range



MODEL 829 checks AC and DC meters of all types and ranges. Compact cabinet contains power supply, special Weston standard meters, Wheatstone Bridge and all circuits for quick, convenient instrument calibration to 0.5% accuracy by non-technical personnel. Automatic protection for both operator and instrument under test is provided by interlocks and high voltage discharge circuits. Net price $2650.

DUAL POTENTIOMETER DC STANDARD

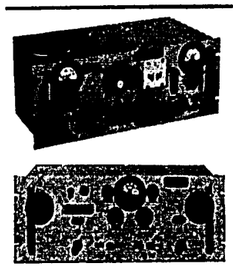
MODEL 262B



MODEL 262B Dual Potentiometer Standards for calibrating meters to 0.1% through a range of 1 millivolt to 1500 volts and 1 microampere to 150 amperes. Uses L & N Brooks Mod. 7 pot. and Weston Mod. 5 standard cells. Voltage and current ranges are separate for the calibration of wattmeters. Operates on 105/125 volts, 50/1600 cycles, 350 watts, with internal voltage regulator. Operator is protected by interlocks. Price $15,600.

Also available are MODELS 261B and 454 Standards for calibrating AC meters to 0.5% through ranges of 10 millivolts to 1500 volts and 1 microampere to 200 amperes; MODEL 260C Standards for DC meters to 0.5% over ranges of 1 millivolt to 1500 volts and 1 microampere to 150 amperes. Accuracy of 0.25% using charts. These standards have been used for 8 years by the government services and leading industrial organizations.

For CRYSTAL TESTING



FOUR MODELS developed for Signal Corps under national crystal testing standardization program to measure resonance and anti-resonance resistance of quartz crystals including those covered by MIL-C-3098B. Capacitance, inductance and PI of crystal can be determined.

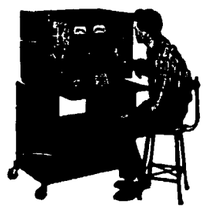
MODEL 459A (Improved TS-330/TSM) covers 800 kc to 15 mc, for 0.002% crystals, 0-9900 ohms. Operates from 115/230 v, 50-1000 cps. Price $1125.

MODEL 531 (TS-683/TSM) Crystal Impedance Meter covers range of 10-140 mc for 10-150 ohm crystals. Twelve fixed calibrating resistors of 10, 22, 30, 40, 51, 60, 68, 82, 91, 100, 120 and 150 ohms, plus a 100-ohm var. resistor for determining crystal resistance. Anti-resonance adapter also provided. Operates from 115/230 v, 50-1000 cps source. Price $590.

MODEL 541A (TS-710/TSM) for 10-1100 kc range crystals with resistances from 200 ohms to 0.5 megohms. An internal load capacitance is calibrated from 15 to 105 mmf with accuracy better than ±0.5 mmf. Power dissipated in crystal measured by built-in VTVM and ohmmeter. For 115/230 v, 50-1000 cps operation. Price $860.

MODEL 1207 (AN/TSM-15) covers range of 75-200 mc for 10-125 ohm crystals. Crystal voltage at series resonance is measured within 10%, effective resistance within ±5 ohms and the power calculated. 18 Co cancellation inductances and 1 uncompensated var. resistor supplied; 5 compensated var. resistors available. 115/230 v, 50-1000 cps. Price $1245.

VARIABLE FREQUENCY POWER SUPPLY



PORTABLE CALIBRATION SYSTEM

MODEL 150

MODEL 150 is a stable, single phase, 150 VA power source of laboratory quality. Output frequency is continuously adjustable between 380 and 2400 cps with stability of 0.1% ±2 cycles. Price $575.

Portable Cart provides Versatile Use and Storage Facility for Owners of Models 150 and 829.

Heavy gauge steel cart is mounted on free rolling, swivel casters. Interior shelf adjustable full height. Inside measures 33" wide x 16½" deep x 26" high. Opening one side accommodates standard 19" wide panels; other side 24" wide for equipment in cabinets. Drop leaf work shelf attaches either side.

Prices are FOB Boonton, N.J. & subject to change without notice. ***Send for product literature.***

READ PHASE NULL VOLTS DIRECTLY

MODEL 301 Broadband Phase Angle Voltmeter is designed for laboratory use, features 10 cps to 100 kc operation, 12 voltage ranges covering 1 mv to 300 volts.

NORTH ATLANTIC PHASE ANGLE VOLTMETERS

For Production Line, Laboratory, Ground Checkout

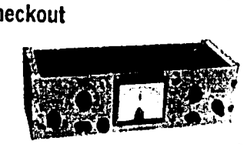
Now, combined in one compact package, all the functions required for precise measurement of voltage, phase angle, quadrature, impedance and power factor. Measurement of AC signals which previously required extensive equipment—or which could not be made at all—can be accomplished simply and accurately in the laboratory, on the production line or in the field. For broadband or single frequency operation.

READ DIRECTLY

- Total Voltage
- Phase Angle
- In-phase Voltage
- Quadrature Voltage
- Null

Specifications: Abridged specifications of the Model 301 Broadband Phase Angle Voltmeter are shown below. Specifications of other models on request.

- Frequency range 10 cps to 100 kc
- 1 mv to 300 volts full scale
- Accuracy 1/2° absolute; special technique .01°
- 0–360° phase angle without ambiguity
- Nulling sensitivity 5 microvolts
- Signal and/or reference isolation
- Optional filters plug in from front
- Bench or rack mounting



Model 202. For production line or checkout applications. Characteristics similar to Model 301 but designed for single frequency operation.

Model 401 AC To DC Phase Sensitive Converter permits conventional DC instrumentation to be used for AC measurements. Single- or double-ended DC output proportional to rms, fundamental, in-phase or quadrature component of AC signal.

Plug-In Accessories for Phase Angle Voltmeters include reference isolation, resistance summing, and bridging transformer modules for eliminating ground loops and adapting voltmeter to ratiometer applications.

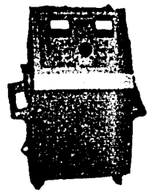
PE HIGH VOLTAGE TEST EQUIPMENT

DC OVERPOTENTIAL TESTERS

MODEL S50 DC 0-50 KV, 5 ma.
MODEL S100 DC 0-100 KV, 5 ma.
MODEL S120 DC 0-120 KV, 5 ma.
MODEL S150 DC 0-150 KV, 5 ma.
MODEL S200 DC 0-200 KV, 5 ma.

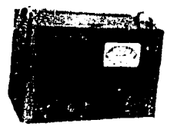
Features:
- Non-destructive testing
- Small, light weight units
- Rugged design for industrial use
- Use of selinium rectifiers
- Plug-in type HV output shielded cable
- Control cabinet stacks on top of HV tank (May be separated for remote control)

— Also available in heavier current models —



SENSITIVE HIPOT TESTERS, DELUXE SERIES "H"

H2 AC/DC 0-2 KV Peak AC/DC, 1 ma.
H5 AC/DC 0-5 KV Peak AC/DC, 1 ma.



Features:
- 5 microamp circuit breaker (adjustable to 1000) deenergizes HV
- Non-destructive testing
- Dual output, AC and DC
- Dual scale KV meter, directly at output
- Portable, safe
- Guarded or straight ground return

Also available in larger cabinets with 19" panel in 10 KV, 20 KV, and 30 KV models, with two meters, plus other extra features. (See general catalog.)

HIGH VOLTAGE TEST SETS, SERIES "K" HIGH CAPACITY AC, or DC

Many sizes: 2 KV to 200 KV and 1 to 100 KVA or KW

For dielectric tests on: Insulating materials, motors and generators, transformers, wire and cable, HV bushings and other apparatus.

FEATURES:
- High current capacity to meet ASTM, IPCEA Standards
- Metering at output for greatest accuracy
- Complete safety and convenience controls, including external interlock
- 4" meters with dual scales
- Motorized output control optionally available
- Separate control section for remote control

Send for catalog of complete line, including: low-cost S & D hipot testers, high power HV test sets, cable fault locaters, and wire sparkers.

GOERZ FOR INSTRUMENT CALIBRATION TO... ±0.05%

PHYSICS RESEARCH LABORATORIES, Inc. proudly announces the availability of the famed C. P. Goerz AC/DC Comparator. The Goerz Comparator is a basic standardizing instrument offering accuracies in the ±0.05% class. The accuracy of ±0.05% is referred to *true value, not* full scale. It holds for *current, voltage* and *power* in the following ranges up to and including 1000 c. p. s.:

CURRENT: 0-50 ma; 0.2/0.5/1/2/5/10/20/50/100/125 amperes;

VOLTAGE: 0-15; up to 600 volts in 5-volt steps;

POWER: Up to 600 volts; up to 100 amperes.

All quoted accuracies are based on the accessories supplied with the instrument. Higher current and voltage available with special accessories.

For Optical Equipment: Write To Goerz American Optical Co. Inwood, L.I., N.Y.

Further details are available upon request in PRL technical note 319 ADC.

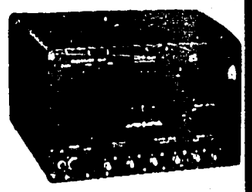
Precision Electronic Test Equipment

LABORATORY INSTRUMENTS

PULSE TIMER — MODEL PT 244



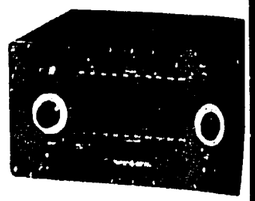
The TLI Model PT-244 is a paired trigger generator which provides a fixed and a delayed pulse. Delays up to 10,000 microseconds are provided with an accuracy of ±0.01 microseconds read directly from a combination of decade counters and a digital dial. Mechanically, the instrument is a full size module of the TLI Modular Instrumentation System and therefore may be used with modular system Stack Pedestal for bench mounting or may be rack-mounted with the Modular Rack Adapter.

SPECIFICATIONS

Accuracy	±0.01 microseconds
Delay Range	0-10,000 microseconds
Marker Output	10, 1 and 0.1 microseconds
Jitter	Less than .001 microseconds
PRF	30-2500 PPS
Fixed Pulse Amplitude	±25 volts open circuit
Delayed Pulse Amplitude	±55 volts open circuit
Output Impedance	1500 ohms minus 700 ohms plus

PRICE Model PT-244 Pulse Timer—$1,895.00

TEST OSCILLATOR — MODEL TO 258

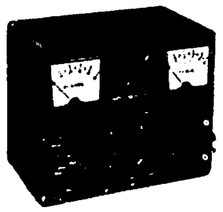


Model TO-258 Test Oscillator furnishes twenty pre-determined frequencies selected by means of push-buttons. A calibrated control permits any selected frequency to be varied ±15% of its nominal value in the telemetering model. It features low distortion and excellent frequency stability over wide ranges of temperature and power input. Features a full sized modular cabinet.

SPECIFICATIONS

Telemetering model furnishes standard FM/FM frequencies from 400 ~ to 70 KC. Special Models for any 20 frequencies from 20 to 100,000 cycles per second.

Model TO-258 Test Oscillator (FM/FM) $425.00



DIODE TESTER — MODEL DT 257

Model DT-257 Diode Tester measures the static characteristics of germanium, silicon and low-power selenium diodes. Separate forward and reverse power supplies, having continuously variable outputs or pre-set regulated reverse potentials permit either complete measurements or checks at selected operating points. Features a 2/3 modular cabinet.

SPECIFICATIONS

Pre-set regulated reverse voltages.
-10, -50, -100, 0-150 volts at 5 ma.
Forward current to 500 ma. at 1.0 volt.
Reversed or shorted diode indications.
Internal meter overload protection.
Test fixture allows quick connections.
Provisions for accessory diode heater.

Model DT-257 Diode Tester $295.00
Model OV-120 Diode Oven $150.00

MILLIMICROAMMETER — MODEL MA 259

As an accessory to the Model DT-257 Diode Tester, this instrument will measure the low reverse currents of silicon diodes. The minimum full scale range of 50 microamperes for the Diode Tester is extended to 0.01 microamperes by use of the millimicroammeter.

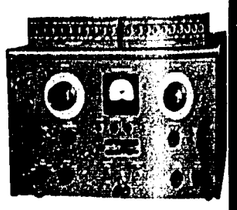
As a millimicroammeter, this instrument covers the range from 0.01 microamperes to 1,000 microamperes and is completely self contained and battery powered.

SPECIFICATIONS

6 Ranges	0.01; 0.1; 1.0; 100; 1,000μa full scale
Input Impedance	0.01μa Range—50 megohms 0.1μa Range—5 megohms 1.0μa Range—0.5 megohms 10μa Range—50,000 ohms 100μa Range—5,000 ohms 1,000μa Range—500 ohms
Accuracy	5% of full scale
Voltage Drop	All ranges 0.5 volts

Model DT-257 less batteries $125.00

PULSE GENERATOR — MODEL PG 200AA

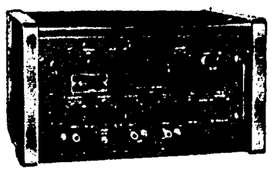


Model PG-200AA Pulse Generator features wide ranges of pulse duration, amplitude, and positioning. It may be operated self-synchronous or driven by an external signal of almost any wave-form. In both cases, it furnishes a fast trigger for synchronizing auxiliary equipment.

SPECIFICATIONS

Duration and position .05 to 50 us, 1000 us with range extenders.
Rise and decay times constant .03 us.
Single pulses to 20,000 per second.
100 volts, 50 ohms driving impedance.
Trigger or sine wave synchronization.
Calibrated width, position and rate.
May be cascaded for dual pulse output.

Model PG-200AA Pulse Generator $850.00
Model PGA-210 Range Extender $80.00



ELECTRONIC SWITCH — MODEL ES 180A

Model ES-180A Wide-Band Electronic Switch provides presentation of two waveforms on almost any conventional oscilloscope. It also furnishes a movable horizontal index trace for making rapid and accurate amplitude and time measurements without parallax error. The control dial is calibrated both in volts and percentage amplitude and a connector is provided for introducing external time markers.

SPECIFICATIONS

Unity DC gain down 3 db at 15 MC. 6 db at 22 MC; Rise-time .023 microseconds.
Identical stable feedback amplifiers, both DC and heater supplies regulated.
93 ohms output impedance minimizes effect of cable length and load on bandwidth.
Input impedances 1 megohm and 10 mmfd; attenuator divisions 1, 3, 10, 30, 100.
Alternate-sweep or alternate-sample displays, switching rates to 400 KC.

Model ES-180A Electronic Switch $995.00

TELETRONICS LABORATORY, INC. 54 KINKEL STREET WESTBURY, L. I., N. Y.

the industry's pioneer & complete line of

MINIATURIZED ELECTRONIC INSTRUMENTS

By *building-in* trio labs' panel-mounting instruments you . . . customize test systems, set-ups and instruments; save space, (average model is 4" x 4" x 4"); save time with at-a-glance monitoring; save money; make monitoring foolproof (go-no go"); improve system reliability; increase overall design freedom. Choose from many "standard" or "special" models—or consult us for new designs for your needs. Write for free "how to" Engineering Guide to Dept. IRE-60.

CUSTOMIZE EFFICIENCY & ACCURACY WITH TRIO LABS' BUILD-IN INSTRUMENTS

BEFORE . . . 3 external instruments were used to measure AC and DC voltages . . . cluttered, tedious, wasteful, subject to error.

AFTER . . . 3 trio labs' miniature VTVMs integrally built-in now are always on hand to measure just the parameters you designate.

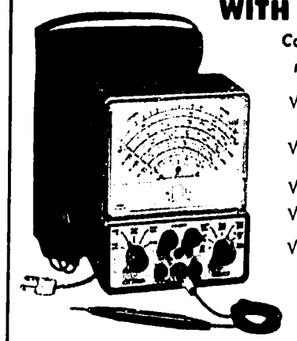
The New Model 77

VACUUM TUBE VOLTMETER

WITH NEW 6" FULL-VIEW METER

Compare it to any peak-to-peak V. T. V. M. made by any other manufacturer at any price!



- V Model 77 completely wired and calibrated with accessories (including probe, test leads and portable carrying case) sells for only $42.50.
- V Model 77 employs a sensitive six inch meter. Extra large meter scale enables us to print all calibrations in large easy-to-read type.
- V Model 77 uses new improved SICO printed circuitry.
- V Model 77 employs a 12AU7 as D.C. amplifier and two 9006's as peak-to-peak voltage rectifiers to assure maximum stability.
- V Model 77 uses a selenium-rectified power supply resulting in less heat and thus reducing possibility of damage or value changes of delicate components.
- V Model 77 meter is virtually burn-out proof. The sensitive 400 microampere meter is isolated from the measuring circuit by a balanced push-pull amplifier.
- V Model 77 uses selected 1% zero temperature coefficient resistors as multipliers. This assures unchanging accurate readings on all ranges.

AS A DC VOLTMETER

The Model 77 is indispensable in Hi-Fi Amplifier servicing and a must for Black and White and color TV Receiver servicing where circuit loading cannot be tolerated.

AS AN ELECTRONIC OHMMETER

Because of its wide range of measurement leaky capacitors show up glaringly. Because of its sensitivity and low loading, intermittents are easily found, isolated and repaired.

AS AN AC VOLTMETER

Measures RMS values if sine wave, and peak-to-peak value if complex wave. Pedestal voltages that determine the "black" level in TV receivers are easily read.

Model 77 comes complete with operating instructions, probe and test leads. Use it on the bench—use it on calls. A streamlined carrying case, included at no extra charge, accommodates the tester, instruction book, probe and leads. Operates on 110-120 volt 60 cycle. Only.....

$42.50 NET

Specifications

• **DC VOLTS**—0 to 3/15/75/150/300/750/1,500 volts at 11 megohms input resistance • **AC VOLTS (RMS)**—0 to 3/15/75/150/300/750/1,500 volts • **AC VOLTS** (Peak to Peak)—0 to 8/40/200/400/800/2,000 volts • **ELECTRONIC OHMMETER**—0 to 1,000 ohms/10,000 ohms/100,000 ohms/1 megohm/10 megohms/100 megohms/1,000 megohms • **DECIBELS** —10 db to + 18 db, + 10 db to + 38 db, + 30 db to + 58 db. All based on 0 db = .006 watts (6 mw) into a 500 ohm line (1.73v). • **ZERO CENTER METER**—For discriminator alignment with full scale range of 0 to 1.5/7.5/37.5/75/150/375/750 volts at 11 megohms input resistance.

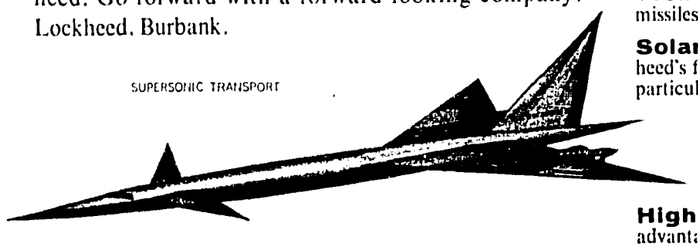
Space Transports *are under development now, capable of transporting a pilot and 1000 pounds of payload or three passengers—equipped to work in—to an orbit of 1000 miles altitude. Indications are that an operational vehicle will be feasible and practical in the 1965 period.*

FOR FUTURE DECADES IN SPACE... *another Lockheed Progress Report to Engineers*

advancing the state of the art in Electronics

Plotting the nation's future space exploration projects requires the capabilities of a forward-looking company; one with vision, superiority in technical skills and advanced facilities. Lockheed, Burbank, long a leader in extending the science of flight, is placing its vast resources and accumulated knowledge into programs designed to provide major breakthroughs in the fields of: Basic and applied research; manned aircraft of advanced design; missiles and spacecraft. Shown here are artists' renderings of a few of these important projects. Such project diversification calls for high-level technical skill, offers genuine challenge to experienced engineers. At Lockheed these varied projects require engineers in many fields. Take advantage of this need. Go forward with a forward-looking company: Lockheed, Burbank.

SUPERSONIC TRANSPORT

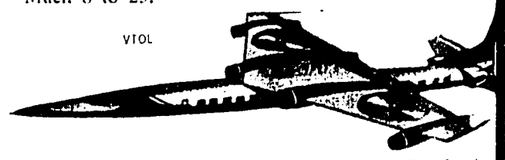


Supersonic Transports—have held an important place in our thinking for the past several years. Extensive wind tunnel tests have been conducted on many design concepts, supplemented by exhaustive laboratory and structure studies. Lockheed is prepared to build an airliner that will travel at speeds in excess of Mach 3 at an altitude of 75,000 feet.

Infrared Systems studies are being conducted ... advanced method of detecting fast-moving missiles and hig... aircraft.

High Altitude Flight Vehicle programs have ... been awarded to Lockheed for supersonic vehicles of ... aerodynamic design configurations with speed ranges ... Mach 8 to 25.

VTOL



Vertical Take-off and Landing Projects—... heed, Burbank, is engaged in exploring the potential of ... projects on a very broad scale. Different VTOL features are ... ied in each proposal. Considerable emphasis is being pla... VTOL "air recovery" vehicles, designed for air rescue and ... missiles recovery missions.

Solar Radiation Studies—are being conducted ... heed's flight test radio station at Briar Summit, California, ... particular emphasis on solar flares.

Manned Vehicle studies are being conducte... cerning fundamental problems associated with ... manned vehicles capable of hypersonic glide ... above the earth.

High caliber scientists and engineers are invited ... advantage of Lockheed's outstanding career opportunities ... ings now exist in: *Aero-Thermodynamics; propulsion; aero... electronics—research and systems; instrumentation—wind ... servomechanisms—flight controls; dynamic analysis ... operations research; electrical instrumentation; physics; ... underwater sound propagation; and manufacturing research* ... today to: Mr. E. W. Des Lauriers, Manager Professional Pla... Staff, Dept. 2710, 2400 North Hollywood Way, Burbank

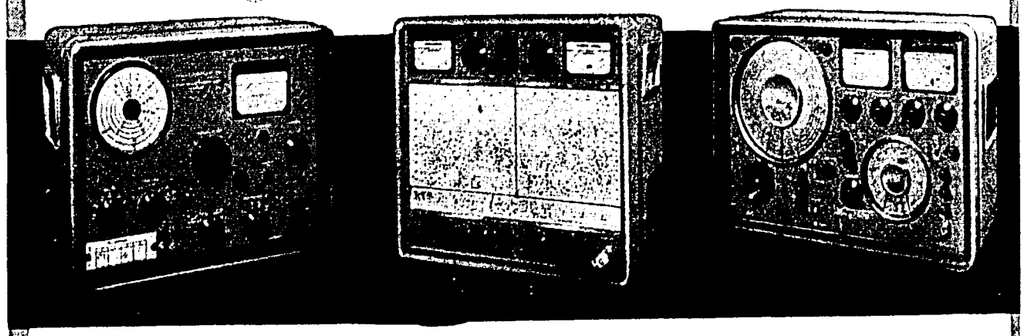
117 DIFFERENT EQUIPMENTS

Marconi for Electronic Measurement



CARRIER DEVIATION METER Model 791D

Measures Deviation: 200 cps to 125 kc in four ranges; extended down to 10 cps using external readout.

Carrier Frequency Range: **4 to 1,024 mc,** directly calibrated.

Modulation Frequency Range: **50 cps to** 35 kc.

Crystal Locking: ensures freedom from microphony, allows measurement of FM hum and noise in VHF and UHF communication and broadcast transmitters.

STANDARD SIGNAL GENERATOR Model 867

Frequency Range: 15 kc to 30 mc on 15-ft high-discrimination full-vision scale.

Crystal Accuracy: 0.01% with in-built 1-mc harmonic source.

Output Range: 4 μv to 4 volts at 75 ohms. 0.4 μv to 0.4 volt at 13 ohms. Automatic level control for good stability.

Amplitude Modulation: Monitored and variable up to 100%; high quality assured by envelope negative feedback. Modulation frequencies, 400 and 1,000 cps. Less than 200 cps spurious FM.

FM SIGNAL GENERATOR Model 1066A

Frequency Range: 10 to 470 mc, on fundamentals throughout. 0.0025% short-term stability.

Direct-Reading Incremental Tuning: Stepped control up to ±15 kc; continuously variable from 0 to ±20 and 0 to ±100 kc.

Output Range: 0.2 μv to 200 mv at 50 ohms.

Modulation: FM deviation continuously variable and monitored from 0 to 20 and 0 to 100 kc. Also AM up to 40%. Modulation frequencies, 1 and 5 kc.

Marconi Instruments market 117 different equipments of importance to electronic engineers, from voltmeters to test equipment for guided missile projects and multi-channel links. Representative of the types of equipment that American industry has relied on for many years, the three Marconi instruments above are outstanding for quality and the advanced nature of their designs. Altogether, the range of equipments provided is an impressive guide to the achievements of Marconi Instruments in every essential branch of instrumentation.

If you would like us to mail you details of Marconi instruments made for any particular job, please let us know your requirements, and ask for leaflets B147R.

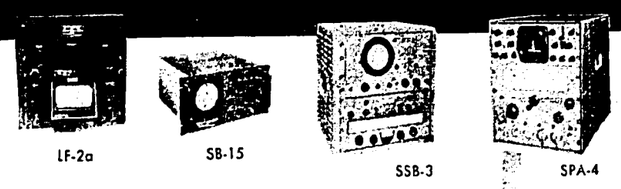
LOOK FIRST TO THE COMPANY THAT IS FIRST...



Panoramic
RADIO PRODUCTS, INC.

PANORAMIC **BROADBAND SPECTRUM ANALYZERS**—0.5 cps to 25 mc.

A matchless series of 5 easy-to-operate direct reading instruments plot amplitude vs frequency of inputs with display on 5" CRT or chart. Features include: "quick look" broadband plus highly selective narrow band analysis with adjustable center frequency, sweep width, and selectivity (resolution). Linear and 40-db log calibrated amplitude scales.

Applications: vibration-noise analysis, distortion measurements and Fourier analysis.

Model LF-2a. 0.5 cps to 2,250 cps. Exceptional stability, to 0.05 cps/hr, for narrow-band analysis with 0.1 cps resolution. Built-in recorder gives 12" x 4½" chart.

Model LP-1a. 20 cps to 22,500 cps. "Quick look", 1 sec, 40 cps-20 kc log sweep plus linear sweeps. Resolution range 10 cps to 1 kc. Famous for noise and vibration analysis.

Model SB-7bz. 1 kc-300 kc. Features discriminator linearized sweep for accurate analysis. Resolution capability to 100 cps. Noted for ease of use and reliability.

Model SB-15. 100 cps-525 kc. Complete yet only 8¾" high. Many advanced features. 100 cps resolution capability.

Models SPA-3. 200 cps-15 mc; and SPA-3/25, 200 cps-25 mc. Resolution capability is 200 cps. For applications where broad frequency coverage is a must.

PANALYZORS—for wide range RF Spectrum Analysis. **Three models: SB-3, SB-8b, and SB-12a** (in various types) cover the frequency range to 1000 mc, supplying broad choice of sweep widths up to 10 mc, sensitivity, resolution capabilities up to 10 cps, and other factors. Widely used for analysis of locally generated AM, Single Sideband, FM, and pulsed transmissions, for general RF spectrum study, and spotting spurious frequency components.

SPECIAL for Single Sideband Spectrum Analysis, the new **Model SSB-3a** incorporates a highly selective Panalyzor with a 2-40 mc tuning head, two-tone audio source, and unique self-checking features to cover a 60-db dynamic range.

PANADAPTORS—Basic Models SA-8b and SA-3 (in over 20 types). For operation with Communications and Special Purpose Receivers. Main use is in monitoring jammed communication channels for detection of interference, spurious, off-frequency transmitters, etc. Also adaptable to receivers with non-standard IF. Specify companion receiver when inquiring.

PANORAMIC **MICROWAVE SPECTRUM ANALYZERS** 10 mc to 44 kmc

Direct-reading instruments for pulsed AM, FM and CW signal analysis, with ±1% frequency accuracy. Features: continuously adjustable IF filter bandwidths and sweep speeds; linear, log, and power amplitude scales, calibrated frequency markers, and others.

Model SPA-4, 10 mc to 44 kmc. Single tuning head. Highly stable, with 0-70 mc and 0-5 mc dispersion ranges. Sensitivity to —100 dbm. Calibrated on 8 individual sliderule scales. IF bandwidth range 1 kc to 80 kc.

Model SPA-1, 50 mc-4 kmc. Two plug-in tuning heads. 0-10 mc dispersion. Sensitivity to —100 dbm. IF bandwidth range is 9 kc to 100 kc.

ACCESSORIES for PANORAMIC Broadband Analyzers: Increase Applications Areas

Spectral Density Analyzer, Model PDA-1 for random waveform analysis.

Synchronous Frequency Analyzer, Model SF-2, for dynamic balance analysis.

Time-Frequency Analyzer, Model TFA-1, for transient studies.

Recorder and Sawtooth Wave Generator, Model RC-3a, for unattended graphic spectrum plots.

also Signal Alternator, Model SW-1; Triangular Wave Generator TW-1 IF filters, CF-1. Oscilloscope Camera F-296, and many others.

PANORAMIC **TELEMETERING TEST INSTRUMENTS** (for IRIG FM/FM Systems)

Model TMI-1a, Telemetering Indicator, analyzes 350 cps-85 kc band. Used for subcarrier spectrum analysis, pre-emphasis, distortion measurement.

Model TMC-1, Telemetering Subcarrier Deviation and 3-Point Calibrator. Used with TMI-1a for precise analysis of individual channel deviation, and provides 3 frequencies per channel for accuracy in discriminator calibration to 0.02%, (0.002% optional).

Model TMC-307a, Seven-Point Calibrator. Provides 7 frequencies for each ±7½% and 15% IRIG channel. Accuracy to 0.02% (0.002% optional). Calibration of 18-channel discriminator completed in 42 seconds when an automatic operation.

Automatic FREQUENCY RESPONSE TRACING SYSTEMS 0.5 cps to 15 mc

Automatically plot amplitude response vs. frequency. Consist of Panoramic Spectrum Analyzer and a companion sweep frequency generator. Unique advantages: single-line display, unlimited dynamic range, responds to *fundamental* frequency only, discriminates against spurious and noise. Use **Model G-5** with LF-2a, **G-2** with Lp-1a, **G-3a** with SB-7bz, **G-15** with SB-15, **G-6** with SPA-3. Invaluable for plotting response of amplifiers, transducers, filters, etc.

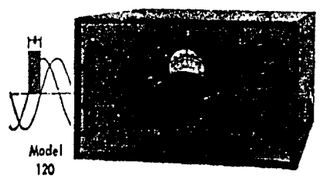
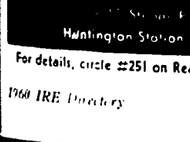
CEC Precision Instruments



Phase Angle Meter and Monitor

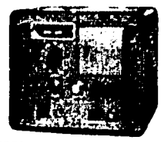
- ***Direct Reading Without Ambiguity:*** Phase angle is read directly on a large 6½" meter. The Coarse Meter Scale is graduated from 0° to 360° in 5° divisions. A selector switch cancels out all but the last 30° of any measured phase angle, providing a vernier reading on a 0° to 30° scale which is graduated in 0.5° divisions.
- ***High Accuracy Over a Wide Frequency And Amplitude Range:*** An accuracy of ± 1 degree is obtained over the frequency range of 20 cps to 20,000 cps and from 2 to 20 volt peak input. At frequencies of 20,000 to 100,000 cps phase measurements can be made at slightly reduced accuracy.
- ***Accepts Sinusoidal or Complex Wave Forms:*** Since the method of phase detection is based on the point of zero cross over, any type of wave form is acceptable which does not cross the zero axis more than once in a given direction per cycle.
- ***Recorder Output:*** An output is available which is suitable for use with recording equipment. It provides 0 to 10 volts DC corresponding to a phase angle of 0 to 360°.
- ***Rugged:*** Originally designed for Military use, as Monitor, Phase AN/URM-67



Precision Pulse Delay Generator Model 131

- Ranges: 100 to 999,900 yards in 100 yard steps.
- Accuracy: ± 5 yards or 0.01%.
- Input Trigger: 50 to 5,000 P.P.S. random source accepts up to 10% jitter.
- Pulse Widths: 0.1, 0.6, and 4.0 μsecs.
- Rise Time: 0.05 μsecs.
- Amplitude: Up to ± 50 volts into 75.Ω
- Output: Strobe and Trains—Train spacing 1,000, 10,000 or 100,000 yds.
- Internal Trigger Generator: 50 to 500 and 500 to 5,000 P.P.S.
- Power Requirements: 115 volts ± 10%; 50 to 450 cycles, 300 watts.
- Also available: Model 130 with range of 1 to 10,000 μsecs. in 0.1 μsec. step.

VHF-UHF Frequency Calibrator Model 121



- Wide Frequency Range: Covers entire spectrum from 50 mc to 11,000 mc without the use of tuning controls.
- Ease of Operation: A flick of the switch delivers the full spectrum. A switch provides a choice of 50 mc or 100 mc spacing. The amplitudes of the marker signals are adjusted by an output level control.
- Accurate: (±) 0.005% at any frequency, unaffected by temperature or input power variations.
- Compact; Rugged; Light Weight: Built to the same specifications as its Military equivalent of Test Set AN/USM-45.

CEC CONTROL ELECTRONICS CO., INC
Huntington Station, New York

PULSE GENERATORS

2120A Pulse Generator—fully calibrated pulse width & delay, 10 cps—100 kc, 80 v from 93 ohms, .02 μs rise time.

2125B Pulse Generator—general purpose unit, 10 cps—100 kc, 50 v into 50 ohms.

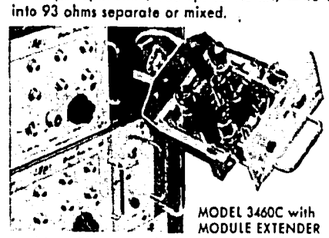
3450B Megacycle Pulse Generator—200 cps to 2 mc, ±50 v output.

4120A Variable Pulse Generator—economical compact unit, 33 cps to 330 kc, ±50 v output.

4550A 10 MC Pulse Generator—fully transistorized unit providing ±10 v into 180 ohms at 20 mμsec rise time. 100 cps to 10 mc rep. rate.

2140A Double Pulse Generator—high power independently controlled outputs, separate or mixed. 10 cps—100 kc.

3460C Megacycle Double Pulse Generator—0-100 μs separation, 130 cps to 1.3 mc, ±40 v into 93 ohms separate or mixed.



MODEL 3460C with MODULE EXTENDER

New Electro-Pulse instruments feature plug-in modular printed board construction for ease of use and maintenance.

2150A Pulse Burst Generator—5 pulse output, on-off coding, independant delay, width, and provision for delay modulation.

5621A Digital Code Group Generator—provides 2 digitally positioned triggers, with 1 μsec resolution, either or both of which may be connected to initiate a 3-pulse group. Also available digitally controlled variable width Single and Double Pulse Generators.

2200 Series Time Delay Generators—1 to 4 channels of 1-10,000 μs delay from external triggers. Trigger outputs.

5720A Time Mark Generator—Separate or mixed markers 10 sec to 1 μsec in decades. Each output 12 v at 10% duty cycle.

5100A Series Pulse Code Generators—for core testing and word generation, clock rates to 1 mc, multichannel 10 bit code with interval repeat, current output 50 ma to 5 amp per channel.

6020B Voltage and Current Calibrator—.5% accuracy measurements of DC, sine wave, or pulse voltages.

ELECTRONIC COUNTERS

7100 Series Totalizers—1 to 6 glow transfer counter decades.

7200 Series Preset Counters—2 to 5 preset decades, optional batch counter.

7300 Series Frequency Indicators—Read 0.1 to 10,000 events per second.

7440B Time Interval Meter—measures time intervals or periods from 10 μs to 99 sec.

7550B Time Interval & Frequency Meter—measures frequency, period, interval, etc. Counting rate to 100 kc.

7600 Series Dual Preset Counters—2-4 decade presets with warning preset selection.

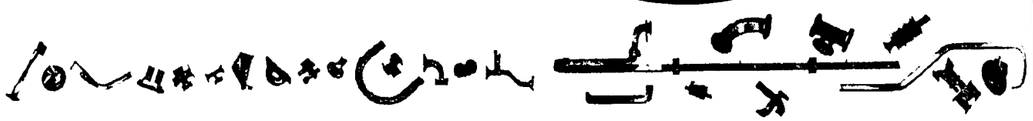
RAMCOR

Creating
Advanced Concepts
In Microwave
And Electronic
Instrumentation



Ramcor makes available to government and industry a specialized combination of creative engineering, proven development techniques and precision production abilities.

Ramcor is a dynamic merger of a mature manufacturing organization with a first rank engineering team—both rigorously schooled in design, development and production of electronic instruments, systems and system support equipment.

Organized, staffed and equipped to meet the most critical requirements of government and industrial programs, Ramcor offers the scientific knowledge, engineering experience and production capabilities needed to produce next generation concepts—today.

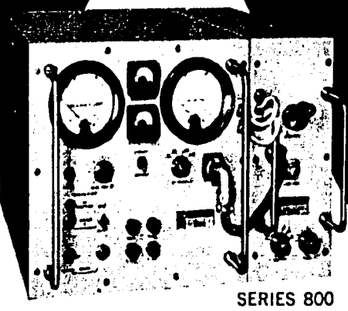
From PITLOG –

STALO STABILITY TESTER

Accurate to 1 part in 10^9

Measures short term deviation and long term drift from UHF to 10,000 mc. Checks stability of radar systems components, stalos, robos, K's, klystrons and other stable signal sources, either on production line or in the field. Particularly useful in design, test and maintenance of MTI radars.

A VERSATILE MICROWAVE STABILITY TESTER... DESIGNED FOR ANY APPLICATION REQUIRING PRECISE MEASUREMENT OF FREQUENCY STABILITY



SERIES 800

PITLOG

PRECISION MEASUREMENTS
from 50 to 10,500 MCS

WEINSCHEL

100% Square Wave MODULATED RF SOURCES
Offer High Amplitude and Frequency Stability

Model MS-6

Output Amplitude Independent of Load
Feedback circuit maintains constant incident power, allowing use of full generator output without power consuming impedance masking.

Amplitude Stability
After one hour warm-up and without feedback circuit: ± 0.1 db/hr. With regulator and external directional coupler, the incident power will change less than 0.2 db for a change in load of from 25 to 150 ohms. With a voltage probe, the voltage variation is reduced by 10:1 by feedback.

Model No.	Frequency MCS	Minimum Peak Power Output (100% Sq. Wave Modulated)
MS-1	50-250	80MW
MS-2	250-920	200MW
MS-3	900-2000	100MW
MS-4	2000-4200	60MW
MS-5	4000-7300	40MW
MS-6	7200-10,500	30MW

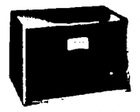
AVAILABLE FROM ANTON

ALPHA, BETA, GAMMA AND NEUTRON DETECTORS

More than 100 types of detectors covering the entire range of nuclear radiation . . . unique configuration and "special application" devices. The Anton Neutron Detector Catalog and the Anton a, b, γ Detector Catalog belongs in your radiation facility reference file.



PRECISION LABORATORY RATEMETER

Newest version of the first commercially available log-linear ratemeter. The 229 Series sets the standard for precision count rate measurements in the research, medical and industrial fields. Six linear scales—one log scale—integral highly regulated power supply—other unique features. Favorably priced—can be used with scintillation, halogen or organic counters. Recorder jack included. Ideal for chromatogram analysis.

AIR PARTICLE MONITORS

Portable and rack mounted a, b, γ air particle monitoring units. Moving paper and fixed paper instruments available. Produced to latest AEC and military specifications.

PORTAL "CHECK-OUT" MONITORS

Convenient, complete uninterrupted "head-to-toe" b, γ monitored exiting. Effective rapid portal monitor offers eight individual alarm channels. Complete with long-lived, thin-walled Anton halogen quenched stainless steel detectors.

HAND AND FOOT MONITORS

For a, b, γ detection and measurement. Equipped with scaler or ratemeter read-out. Auxiliary probes available. Incorporate long-lived, Anton halogen quenched stainless steel counters.

ANTON ELECTRONIC LABORATORIES, INC.
1226 FLUSHING AVE BROOKLYN 37 N Y

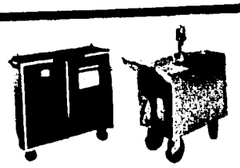
AVAILABLE FROM ANTON

ALPHA, BETA, GAMMA AND NEUTRON DETECTORS

More than 100 types of detectors covering the entire range of nuclear radiation . . . unique configuration and "special application" devices. The Anton Neutron Detector Catalog and the Anton a, b, γ Detector Catalog belongs in your radiation facility reference file.



AIR PARTICLE MONITORS

Portable and rack mounted a, b, γ air particle monitoring units. Moving paper and fixed paper instruments available. Produced to latest AEC and military specifications.

PRECISION LABORATORY RATEMETER

Newest version of the first commercially available log-linear ratemeter. The 229 Series sets the standard for precision count rate measurements in the research, medical and industrial fields. Six linear scales—one log scale—integral highly regulated power supply—other unique features. Favorably priced—can be used with scintillation, halogen or organic counters. Recorder jack included. Ideal for chromatogram analysis.

PORTAL "CHECK-OUT" MONITORS

Convenient, complete uninterrupted "head-to-toe" b, γ monitored exiting. Effective rapid portal monitor offers eight individual alarm channels. Complete with long-lived, thin-walled Anton halogen quenched stainless steel detectors.

HAND AND FOOT MONITORS

For a, b, γ detection and measurement. Equipped with scaler or ratemeter read-out. Auxiliary probes available. Incorporate long-lived, Anton halogen quenched stainless steel counters.

ANTON ELECTRONIC LABORATORIES, INC.

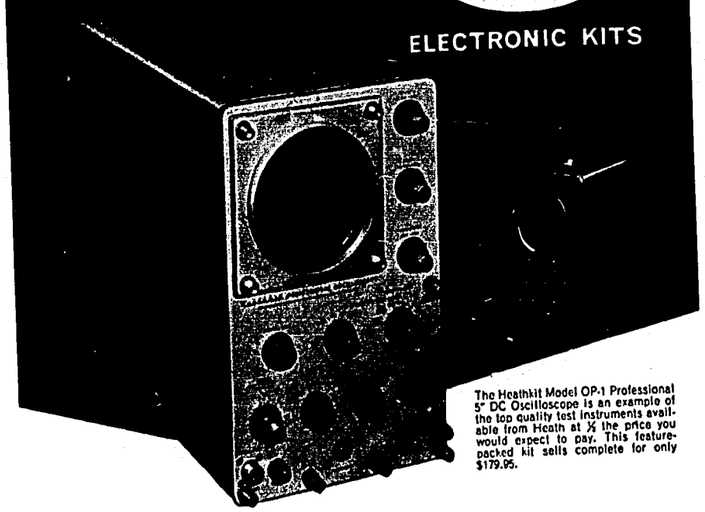
Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. Complete addresses will be found in the Alphabetical Directory, pages 161-264.

CUT LAB EQUIPMENT COSTS IN HALF

HEATHKIT

ELECTRONIC KITS



The Heathkit Model OP-1 Professional 5" DC Oscilloscope is an example of the top quality test instruments available from Heath at ½ the price you would expect to pay. This feature-packed kit sells complete for only $179.95.

Heathkits give you twice as much equipment for every dollar invested.

The Heathkit Model V-7A is the world's largest selling VTVM. Precision 1% resistors are used in the voltage divider circuit for high accuracy and an etched circuit board simplifies assembly and cuts construction time in half. Price of this outstanding kit is only $25.95.

The Heathkit Model PS-4 Variable Voltage Regulated Power Supply Kit is another outstanding example of Heath Company engineering ingenuity. Truly professional in performance as well as appearance yet it costs only $54.95.

Stretch your test equipment budget by using HEATHKIT instruments in your laboratory or on your production line. Get high quality equipment without paying the usual premium price by letting engineers or technicians assemble Heathkits between rush periods. Comprehensive step-by-step instructions insure minimum construction time. You'll get more equipment for the same investment and be able to fill any requirement by choosing from more than 100 different electronic kits by Heath. These are the most popular "do-it-yourself" kits in the world, so why not investigate their possibilities in your business. Send today for the free Heathkit catalog!

ALL PRICES F.O.B. BENTON HARBOR, MICH. PRICES AND SPECIFICATIONS ARE SUBJECT TO CHANGE WITHOUT NOTICE.

This PANEL MOUNTED OSCILLOSCOPE mounts in a hole 5⅛" wide by 4⅝" high and extends 10½" beyond the front panel. The front panel dimensions are 6" wide by 5⅛" high. The input impedance is 1 megohm and the frequency response is linear from 10 cycles to 40,000 cycles. The unit employs identical vertical and horizontal amplifiers, push-pull. The gain is approximately .1-.25 volts RMS per inch. This oscilloscope is complete with low and high voltage power supplies. Weight is 6 lbs.

FOR YOUR OSCILLOSCOPE AND CATHODE RAY TUBE NEEDS

SYSTEMATS®—The up-to-date custom approach to multi-function monitoring. Any number of modules may be mixed or matched. Built to industrial or military standards and uses PANELSCOPES as building blocks.

PANELSCOPES®—Standard and custom designed panel mounted oscilloscopes in modular form of 5 13/16" x 5 1/4". Amplifiers from 2 1/2 mv/inch, up to 10 mc; triggered, repetitive or expanded sweeps; and automatic portrayal available. Rugged and military construction.

PANELPACKS®—Power supplies for PANELSCOPES and SYSTEMATS.

RAKSCOPES®—Standard and custom built rack mounted industrial and military type oscilloscopes.

PULSESCOPES®—A series of versatile pulse synchroscopes for Laboratory, Field and Airborne use.

CRAFTSCOPES®—A series of direct reading portable industrial oscilloscopes featuring 5-inch displays, small size (1/2 to 3/4 cu. ft.) and weights as low as 18 lbs.

POCKETSCOPES®—A series of extremely portable time-tested industrial oscilloscopes less than 1/4 cu. ft. and weight as low as 8 lbs. with wide performance specifications.

RAYONIC® CATHODE RAY TUBES—A complete line of 3-inch and 5-inch tubes made to EIA or MIL specs. with rectangular and round cross sections. Tube lengths: from 7 inches. P1, P2, P7, P11 and special phosphors available.

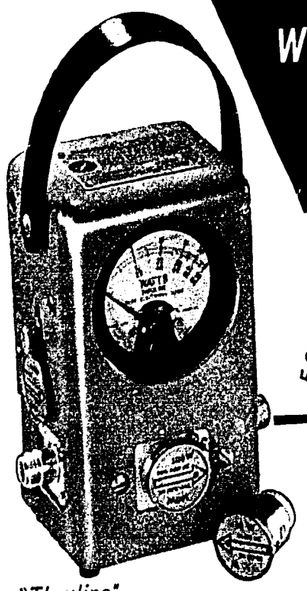
when rf power must be absorbed or accurately measured...



"Thruline"

50 OHM NOMINAL

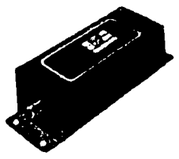
You will find dependable coaxial line instruments and accessories at Bird Electronic. Specialization in this field, backed by a constantly growing engineering staff and enlarged physical facilities, has resulted in the continuous development of new designs to meet specific requirements. If you are searching for more than a standard product for field or laboratory use, turn to Bird Electronic. Our years of experience in this field may assist you in the solution of your problem.

DIRECTIONAL RF WATTMETERS

Direct reading . . . "thru" type . . . for measuring forward or reflected power in complete systems under operating conditions . . . inserted between transmitter and antenna or load . . . full scale power and frequency range determined by plug-in elements.

Model	Line	Impedance	Frequency ELEMENTS Power		Connector
43	RG-8/U etc.	50 ohms	25-60; 50-125 100-250; 250-500; 400-1000 mc	10; 25; 50; 100; 250; 500 W	N; C; HN; UHF
4712	1⅝	50 ohms	200-500 400-1000 mc	.5; 1.0; 1.5; 2.5; 5.0 KW	Rtma Std.
460	3⅛	50 ohms	200-500 mc	1; 2.5; 5; 10	Flange
480	3⅛	51.5 ohms	400-1000 mc	25; 50 KW	Sleeve Bullet
490	6⅛	51.5 ohms	200-500 mc	25; 50 and 100 KW	

COAXIAL RF FILTERS



Designs utilize both distributed and lumped constant . . . insertion loss and VSWR are very low in pass band . . . high attenuation in stop band . . . new miniature filters as light as 5 ounces. Will produce in quantity to your specs.

	Low Pass	Low Pass	Low Pass	Low Pass	High Pass	Band Pass
Models	5310	5311	522	819-1200	530	5131
Cut Off	90 mc	160 mc	400 mc	1200 mc	420 mc	45 mc & 105 mc
Stop Band	100-180 mc	180-320 mc	500-1200 mc	1900-4000 mc	100-375 mc	33.7-39.7 mc 120-1000 mc
Max. Power	100W	100W	150W	3.5KW	50W	25W
Min. Stop Band Atten.	55db	55db	55db	40db	60db	25db 40db
VSWR in p.b.	1.5	1.5	1.35	2 to 1	2.5	1.6
Connectors	Female N		Male-Female N			Female BNC

Chart shows characteristics of typical Filters

"Termaline" RF ABSORPTION WATTMETERS

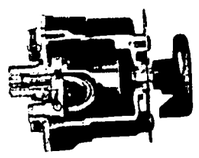
Portable . . . direct reading . . . non-radiating "load" type wattmeter . . . used in field or laboratory to measure and absorb power . . . accuracy ±5% of full scale . . . VSWR 1.1 to 1 maximum over operating range.

Model	Freq. Range	Max. Power	Power Range Scales	Input Connector
611	30-500 mc	60W	0-15; 0-60	Female N
612	30-500 mc	80W	0-20; 0-80	
67	30-500 mc	500W	0-25; 0-100; 0-500	Coplanar with Adapter to UG-21/U (optional) RG-17 & RG-19 cable assemblies: adapters to rigid lines
67C*	30-500 mc	2500W	0-100; 0-500; 0-2500	
824*	30-220 mc	5000W	0-5000	

*Water cooled (other available models described in specification sheets)

COAXIAL SWITCHES

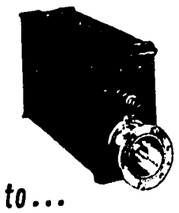
Small compact design permits the "Coaxwitch" selector to be incorporated into many electronic units where repeated channel switching is required. Finger-tip operation: pull knob, rotate and push in to make contact.



Model	74	71B	72R	65J
Positions	Six	Eight	Reversing Switch	Two
Coaxial Circuits	One	One	Two	Two
Connector	Type N female connectors are standard on all models to receive UG-21/U series plug. Use adapters with other cables and connectors.			

"Termaline" RF LOAD RESISTORS

Reflection-free terminations for 50 ohm coaxial lines . . . low VSWR . . . non-radiating . . . water cooled ratings 2500 W to 50 KW . . . air cooled rating to 1500 W.



Model	Max. Power	Freq. Range	Max.* VSWR	Connector
80	5W	0-1KMC	1.1	"N", "C", "HC"
80A	20W	0-500MC	1.1	
81	50W	0-1KMC	1.1	N Female
81B	80W	0-1KMC	1.1	
82A	500W	0-1KMC	1.1	Coplanar with Adapter to UG-21/U
883	1.2KW	0-1KMC	1.1	LC
888	1.5KW	0-1KMC	1.1	3⅛ Flanged

*Other VSWR requirements can usually be met by special selection

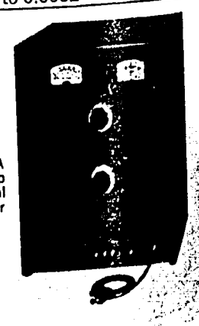
BRC Precision Test Equipment is engineered and manufactured to the highest standards of the industry–standards that have made the BRC trademark a recognized symbol of precision and dependability throughout the world. Highly qualified field representatives–specialists in electronic test equipment–stand ready to solve customer problems in every major foreign and domestic area. For the complete facts write today for the new BRC catalog.



Type 240-A Sweep Signal Generator

25th ANNIVERSARY *Precision Electronic Instruments since 1934*

Boonton Radio Corporation

BOONTON, NEW JERSEY, U.S.A.

For details, circle #263 on Reader Service Card

Magnetic Amplifier Relays RL – 101, RL – 102 and RL – 103. Sensitivity 40 microwatts.

Variable Delay Lines: Rise time 55ns; impedance 75 to 1500 ohms; resolution time less than 8 x 10⁻¹¹ sec.; total delay up to 1200 μs.

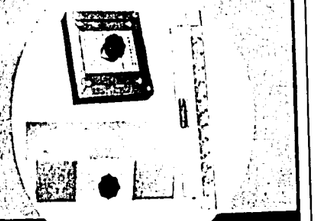
Step Variable Delay 602-603 Series: Equal input and output impedance; 11 different steps; total delay 0.2 μs to 27.5 μs; impedance 75 to 500 ohms.

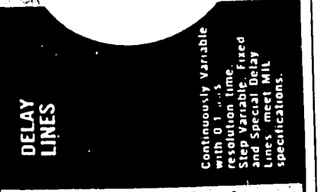
Tapped Delay Lines ST, 6T, 7T, 8T and 9T Series: Total delay 0.1 μs to 500 μs; impedance 50 ohms to 2500 ohms.

AD-YU ELECTRONICS LAB., INC. formerly ADVANCE 249 Terhune Ave., Passaic, N. J.

DELAY LINES

Continuously Variable with 0.1 μs resolution time. Step Variable, Fixed and Special Delay Lines meet MIL specifications.





Type 405 Series Direct reading in degrees

Type 405H — 8 cps to 500 kc. Type 405 — 8 cps to 100 kc. Type 405L — 1 cps to 20 kc. No amplitude adjustment 0.25° relative accuracy

Type 205A1 — A2 — 100 kc to 15 mc, 0.05° accuracy

Type 205B — 10 mc to 500 mc, 0.05° accuracy

Type 202 — 20 cps to 150 kc, 1° full scale sensitivity, accuracy 0.02° or 2%

PHASE METERS

0.0001 CPS TO 500 MEGACYCLES Accuracy 0.05 Microvolt Sensitivity

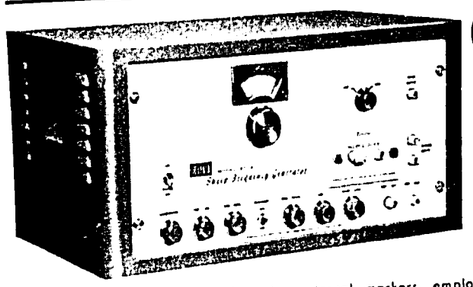
PRECISION TEST EQUIPMENT

JERROLD

FOR ACCURATE QUANTITATIVE MEASUREMENTS... USING SWEEP FREQUENCY GENERATOR TECHNIQUES...



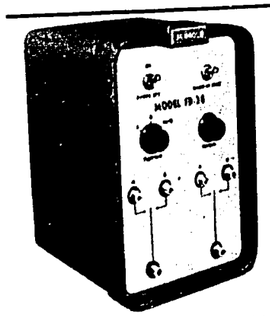
NEW

WIDE BAND SWEEP FREQUENCY GENERATOR — MODEL 900-A

SWEEP WIDTHS—AS WIDE AS 400 MC . . . FROM 0.5 MC to 400 MC. The JERROLD Model 900-A, Wide Band Sweep Frequency Generator is an instrument of unusual versatility. In two ranges—0.5 to 400 MC and 275 MC to 1200 MC—the instrument supplies sweeps with center at any frequency from 500 KC to 1000 MC and sweep widths as broad as 400 MC and as narrow as 100 KC. RF output—carefully monitored by matched, crystal diodes feeding two stage, push-pull AGC amplifier—is flat within ±0.5 db over sweep width up to 800 mcs. and ±1.5 db from 800 mcs. to 1200 mcs. When using sweep widths as narrow as 20 mcs. flatness at any frequency is approximately ±0.15 db. The output voltage is 0.5 RMS across a 50 ohm load at the upper range and 0.25 volts lower range.

The instrument features provisions for external markers, employing "birdie bypass" circuitry, and a plug-in R.F. detector that can be used in remote applications.

$1260.00



A HIGH SPEED COAXIAL SWITCH — MODEL FD-30

For the simultaneous display of two channels or voltages on an oscilloscope.

Frequency range of coaxial circuit is from DC to 250 MC with a VSWR of less than 1.1 at 50 or 75 ohms impedance. Switch contacts "Mercury-Wetted" with an adjustable switch rate of 30, 15 or 10 cps.

$250.00

Wide Band Sweep Generators—Models 601 and 602

Portable, wide band instruments designed for the test and alignment of LF, IF, and RF circuitry. The Generators feature an electronic, saturable reactor sweep circuit with a maximum sweep deviation of approximately 5 to 1. RF output on all ranges is fundamental.

MODEL 601

12 MC to 225 MC in eleven overlapping ranges. RF output of 1.0 volt RMS. Output flat ±½ db over widest sweep width and as flat as 1/5 db at sweep widths of 40 mc or lower.

MODEL 602

4 MC to 112 MC in eleven overlapping ranges. RF output of 2.5 volts RMS. Output flat within ±½ db.

Other Generators available on special order to cover any portion of the frequency range from 15 KC to 225 MC.

$395

VARIABLE, LABORATORY ATTENUATORS — MODELS AV-50 and AV-75

$150.00

Variable, switch-type attenuators from DC to 500 MC. The attenuators feature: 0 to 62.5 db attenuation, in 0.5 db steps; insertion loss of ¼ db at 250 MC, and ½ db at 500 MC; VSWR of less than 1.15 at 250 MC, and less than 1.4 at 500 MC. Jerrold developed rotary, coaxial switches that utilize a floating rotor with dual wiping, self aligning contacts mounted in a "Tel-F" dielectric, completely shielded switch sections; and rugged, compact construction. Model AV-50 is 50 ohms with BNC connectors, and Model AV-75 is 75 ohms with Jerrold "F" Series connectors

ALSO AVAILABLE FOR ACCURATE QUANTITATIVE MEASUREMENTS

MODEL 707 — PRECISION SWEEP GENERATOR

Available with plug-in oscillator heads for any frequency range from 4 MC to 250 MC. Flatness ±5/100 db, power output +20 dbm.

MODEL CM-6 & CM-10 — CRYSTAL MARKERS

Available with 6 or 10 crystal frequencies of your choice. Harmonics, side band or "birdie bypass" markers.

MODEL VC-12 — VOLTAGE COMPARATOR

For use with any sweep generator for accurate quantitative measurements of Voltage, Power, dbm, and relative db differential.

MODEL SPR-100 — OSCILLOSCOPE PREAMPLIFIER

A complete sweep generator accessory featuring a built-in amp that is flat to 250 MC, a preamp. gain of 40 db, and provision for marker insertion employing "birdie bypass" circuitry.

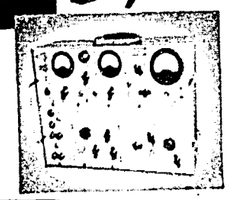
Tomorrow's Circuitry

RT-500 RECEIVER-TRANSMITTER TESTER

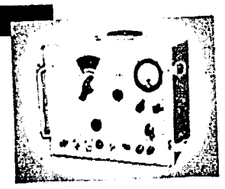


Equivalent to AN/TRM-1. Laboratory-quality portable instrument, designed to measure performance on transmitting and receiving equipment.
- Frequency Range: 190 KC to 400 MC
- Signal Generator Output: 2.5 to 100,000 microvolts into 50 ohms
- Transmitter Tester Power Range: 3 to 100 watts
- Volt/Milliwatt Meter: multi-range meter measures AC, DC volts and milliwatts

SG-25 STANDARD SIGNAL GENERATOR

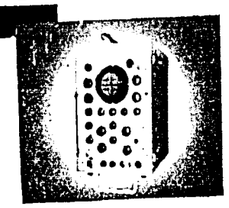
Equivalent to AN/URM-25D. For alignment of radio receivers, measurements of receiver sensitivity and selectivity, and in all radio frequency voltage measurement work.
- Frequency Range: 10 KC to 50 MC in 8 bands
- Calibrated Output: 0.1 to 100,000 microvolts into 50 ohms
- High Output: 2.0 volts, 500 ohms impedance

SG-26 STANDARD SIGNAL GENERATOR



Equivalent to AN/URM-26B. For alignment of radio receivers, measurements of receiver sensitivity and selectivity, and in all radio frequency voltage measurement work.
- Frequency Range: 4 to 405 MC in 6 bands
- Calibrated Output: 0.1 to 100,000 microvolts into 50 ohms
- Output Impedance: 50 ohms nominal

PO-400 PULSE OSCILLOSCOPE



Equivalent to AN/USM-38. Precision portable oscilloscope for analyzing amplitude and time characteristics of complex electrical waveforms.
- Transient Response: 0.06 microseconds (rise time)
- Square Wave Response: less than 5% drop at 50 cycles
- Deflection Sensitivity: 0.1V RMS per inch
- Sweep: 1 to 100,000 microseconds per inch, triggered or recurrent

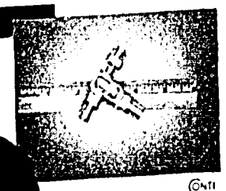
AT-120-R. F. STEP ATTENUATOR

Designed for use in output systems of signal generators, precision microvolters, IF strips of microwave receivers, etc.
- Frequency Range: 0 to 1000 MC
- Attenuation Range: up to 120 db in ten steps
- Output Impedance: 50 ohms standard, 75 ohms optional
- VSWR: 1.1 up to 500 MC, 1.2 up to 1000 MC

CS-200 SERIES COAXIAL SWITCHES

For all types of coaxial switching.
- Positions: up to 12
- Nominal Impedance: 5 ohms
- VSWR: 1.2 up to 500 MC, 1.3 up to 1000 MC
- Cross-talk for 12 Position: greater than 75 db down at 1000 MC

CM-300 CRYSTAL DETECTOR MOUNT



For general purpose in RF monitoring 50 or 75 ohm coaxial systems. Can be used with Trad Attenuator AT-120.
- Frequency Range: 10 to 1000 MC
- Accuracy: ½ db
- Impedance: available in 50, 75, 100, 150 and 225 ohms
- Maximum Signal Output: 2.5 V RMS

Trad has a complete, diversified line of electronic products, some of which are listed here. All products are available for speedy delivery. Trad's national representative organization is now being expanded. Interested reps may write or call George Trad at Prospect 6-7445 for appointment.

STODDART RADIO INTERFERENCE
AND FIELD INTENSITY MEASURING EQUIPMENT

covering a frequency range of 30 cps to 1000 mc

NM-40A (AN/URM-41)
30 cps to 15 kc

SELECTIVE OPERATION/Specifications

Sensitivity: For a one-to-one signal-to-noise ratio, the sensitivity of the NM-40A is better than 0.15 microvolt from 1000 to 15,000 cps, 0.25 microvolt from 300 to 1000 cps and 1.0 microvolt from 30 to 300 cps, when used as a selective two-terminal voltmeter with its narrowest bandwidth and an input impedance of 100,000 ohms.

Spurious Responses:

$2\ F_0' > 60$db down from F_0
$3\ F_0' > 55$db down from F_0
All others > 75 db down
} where F_0 is any input signal using selective operation

WIDEBAND OPERATION/Specifications

Frequency Response: 30 cps to 15 kcs, ±0.5 db.

Sensitivity: 15 microvolts sensitivity at input impedance of 100,000 ohms.
Input Impedance: 50, 600, 10,000 and 100,000 ohms.
The NM-40A may also be used as an ultra-sensitive AUDIO frequency WAVE ANALYZER.

NM-10A (AN/URM-6B)
14 kc to 250 kc

GENERAL SPECIFICATIONS:

Sensitivity: Electrostatic pickup using rod antennas, one microvolt-per-meter to 2 volts-per-meter. Electro-magnetic pickup using shielded loop antennas, 10 microvolts-per-meter to 100 volts-per-meter. As a two-terminal voltmeter, either balanced or unbalanced, one microvolt to one volt.

Effective Random Noise Bandwidth: Varies from approximately 55 cps to 400 cps over the frequency range. Calibration charts give exact figures for each frequency.

Image Rejection: Better than 50 db.

I.F. Rejection: Greater than 60 db.

The equipment is of sturdy drip-proof construction and may be operated for prolonged periods in driving rain or snow with no deleterious effects.

NM-20B (AN/PRM-1A)
150 kc to 25 mc

GENERAL SPECIFICATIONS:

Sensitivity: As a two-terminal voltmeter, either balanced or unbalanced, one μv to one volt. Electrostatic pick-up using rod antenna, 2 μv/meter to 2 volts-per-meter. Electromagnetic pick-up using shielded loop antenna: SMALL LOOP, 10 to 30 μv/meter min. to 10,000 to 30,000 μv/meter max.; LARGE LOOP, 2 to 6 μv/meter min. to 20,000 to 60,000 μv/meter max.

Image Rejection: Better than 50 db.

I.F. Rejection: >45 db.

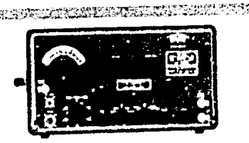
BFO is provided for C.W. reception.

NM-30A (AN-URM-47)
20 mc to 400 mc

Sensitivity: Radiated pick-up using a calibrated, tuned dipole (without reflector), 0.6 to 60 μv/meter, depending on frequency. Conducted pick-up via 50-ohm matched coaxial line, 0.5 to 1 μv from 20 to 240 mc, less than 6 μv from 240 to 400 mc.

Spurious Response Rejection: Better than 40 db.

I.F. Rejection: >60 db.



NM-50A (AN/URM-17)
375 mc to 1000 mc

Sensitivity: Radiated pick-up using a calibrated, tuned dipole (without reflector) 35 to 160 μv/meter, depending on frequency. Conducted pick-up via 50-ohm matched coaxial line, 2 to 5 μv.

Impulse Bandwidth: Approximately 600 kc over frequency range.

Image Rejection: Better than 40 db.

Spurious Response Rejection: Better than 40 db.

I.F. Rejection: >80 db.

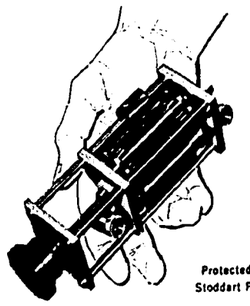
STODDART COAXIAL ATTENUATORS AND TERMINATIONS

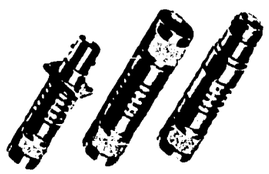
made with exclusive Stoddart Filmistors for highly accurate and stable resistive values from dc to 3000 mc.



Protected under Stoddart Patents

2, 6 AND 10-POSITION TURRET ATTENUATORS
WITH SIMPLE "PULL-TURN-PUSH" OPERATION, SMALL AND RUGGED

ATTENUATOR PADS



Available in any conceivable combination of male and female Type C and Type N connectors. Maximum length of 3" for any attenuation value.

GENERAL SPECIFICATIONS:
VSWR: <1.2 to 3000 mc for values from 10 to 60 db; as value decreases below 10 db, VSWR increases to not over 1.5.
Characteristic Impedance: 50 ohms.
Attenuation Value: Any value from 0 db to 60 db including fractional values.
Accuracy: ±0.5 db; values above 50 db have rated accuracy of attenuation through 1000 mc only.
Power Rating: 1.0 watt sine wave.

COAXIAL TERMINATIONS
Small-stable-50 or 70 ohms

½-Watt: 50 ohms impedance, TNC or BNC connectors, dc to 1000 mc, VSWR less than 1.2.

1-Watt: 50 ohms impedance, dc to 3000 mc or dc to 7000 mc, Type N or Type C connectors, male or female; VSWR less than 1.2, 70 ohm, Type N, male or female terminations available.

Fast delivery on all items/Send for complete literature

SUB-MINIATURE CLUTCH-BRAKE ELECTRO-MAGNETIC

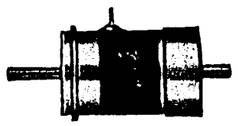
RELIABILITY • HIGH PERFORMANCE • VERSATILITY

• 9 Models • 5 Sizes • 3 Shaft Alternates • Equals 135 Standard Configuration Selection • Available on Prompt Delivery

Model B

Model B-Brake
Normally free — Energized to brake
- .500 thru 1.562 servo mounting dia.
- 4 thru 120 oz. in. min. brake torque.
- .8 to 16 oz. weight

Model BF



Model BF-Brake
Normally braked — Energized to free.
- .500 thru 1.562 servo mounting dia.
- 2 thru 60 oz. in. min. brake torque.
- .8 to 16 oz. weight.

Model MBC

Model MBC-Duplex Clutch
Output shaft normally clutched to one input flange — Energized same output shaft clutched to other input flange
- .500 thru 1.562 servo mounting dia.
- 2 thru 60 oz. in. min. clutch torque
- 1 to 20 oz. weight

Model CF

Model CF-Clutch
Normally clutched — Energized to free
- .500 thru 1.562 servo mounting dia.
- 2 thru 60 oz. in. min. clutch torque
- .9 to 18 oz. weight.

Model C

Model C-Clutch
Normally free — Energized to clutch.
- .500 thru 1.562 servo mounting dia.
- 4 thru 120 oz. in. min. clutch torque
- .8 to 16 oz. weight.

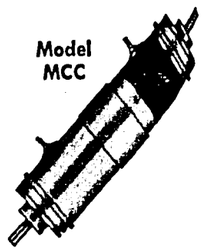
Model MC

Model MC-Brake Clutch
Normally braked — Energized to clutch
- .500 thru 1.562 servo mounting dia.
- 2 thru 60 oz. in. min. clutch or brake torque
- 1 to 16 oz. weight

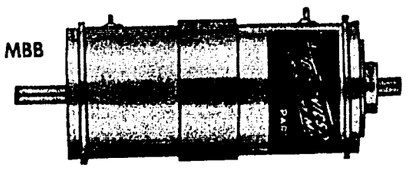
Model MB-Clutch Brake
Normally clutched — Energized to brake.
- .500 thru 1.562 servo mounting dia.
- 2 thru 60 oz. in. min. clutch or brake torque
- 1 to 16 oz. weight

Model MB

Model MCC

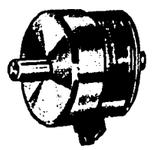


Model MBB



Model MBB-Clutch Brake
Normally input flange and output shaft free — Energize one coil to clutch input flange to output shaft or Engage other coil to brake output allowing input flange to free.
- .500 thru 1.562 servo mounting dia.
- 3.5 thru 120 oz. in. min. clutch or brake torque
- 1.6 to 30 oz. weight.

Autotronics Industrial Miniatures are available in 4 models with a pilot mounting dia. of 1.125 — torque rating 20 thru 40 oz. in. min.

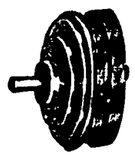


C-125-Clutch. Normally free — Energize to clutch.
B-125-Brake. Normally free — Energized to brake.
BF-125-Brake. Normally braked — Energize to free.
MC-125-Brake Clutch. Normally braked — Energize to clutch.

PANCAKE CLUTCH-BRAKE

The Newest addition to the precision line is the Pancake unit — in 4 models featuring a 1.000 in. servo mounting dia. — length .500 in. from servo flange to end of cap — torque rated 6 thru 12 oz. in. min.

Available Models:



PC-8-Clutch. Normally free — Energized to clutch.
PMC-8-Brake Clutch. Normally braked — Energized to clutch.
PB-8-Brake. Normally free — Energized to brake.
PBF-8-Brake. Normally braked — Energized to free.

All standard units operate at 28 v.d.c. Other voltages can be supplied.

SERVO COMPONENTS TO COMPLETE ASSEMBLIES

DAYSTROM TRANSICOIL designs and manufactures a wide variety of precision servo components and complete assemblies for both industry and the military. The precision that goes into these products is the result of many years of specialized experience in the servo field. You're getting a head-start on quality when you specify Daystrom Transicoil . . .

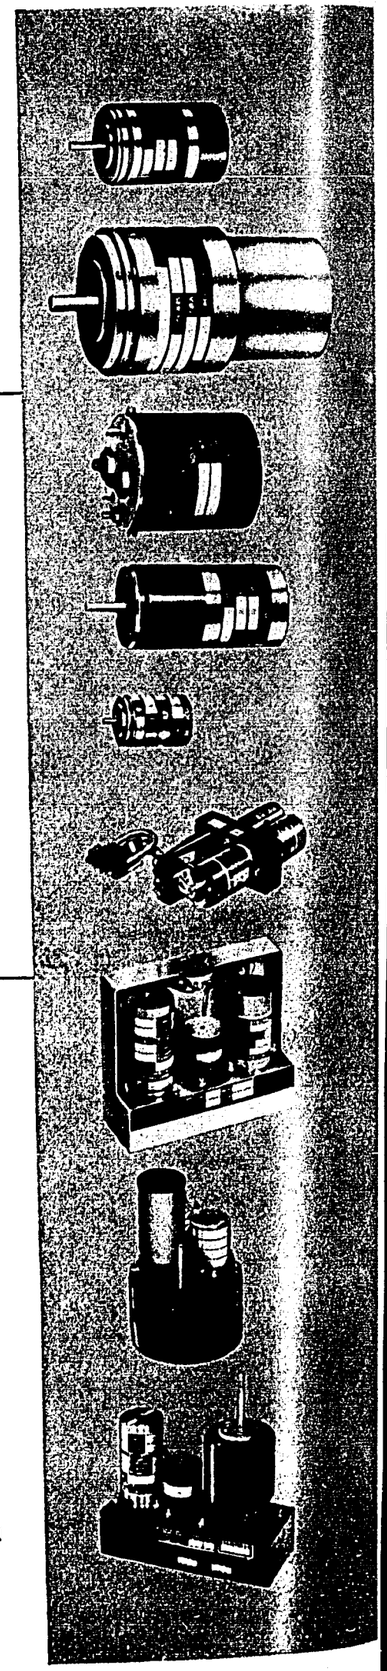
SERVO MOTORS & MOTOR GENERATORS
- Frame Size: 5, 6, 8, 9, 11, 15, and 18 for 60 and 400* cycle operation
- Standard Operation:—55 C to +120 C
- *400 cycle units may be wound for operation with transistor drive

GEAR TRAINS
- Mounted on the motor or generator
- Maximum backlash will not exceed 30 minutes as measured with a 1 in-oz. load on the output shaft
- Ratios from 7:1 to 2187:1. Other ratios available to suit customer specifications

SYNCHROS—Transmitters, Control Transformers, Differentials
- Frame Sizes: 8 and 11 for 400 cycle operation
- Also Inductive Potentiometer, Infinite Resolution
- Output: linear

AMPLIFIERS—Tube or Transistor Types
- Miniaturized amplifiers to drive a combination of Daystrom Transicoil rotating components and assemblies
- Designed to meet industrial and military requirements

COMPLETE ASSEMBLIES
- Design and manufacture of complete servo assemblies to customer specifications



Complete specifications, mechanical data, dimensions, etc., are included in the Daystrom Transicoil Catalog. This is available at no cost through Daystrom Sales Representatives in principal cities throughout the United States, or by letterhead request to the plant.

by BOWMAR

Optimum performance and reliability of precision electronic control systems are dependent upon the components and servo packages of which they are comprised.

Bowmar's sound, imaginative approaches to components and package design have led many projects to new high levels of reliability and accuracy, while often reducing critical weight and size. This experience and pioneering have improved the state of the art in many types of precision systems including **weapons control, inertial guidance, navigation, autopilot** and **tracking.** Bowmar experience is displayed by its successful history of performance in the most advanced missile and aircraft programs.

Why not let Bowmar skills contribute to your project? Bowmar's engineering and production capabilities are equal to any task, regardless of complexity.

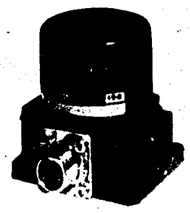
BASIC BUILDING BLOCKS

SERVO SYSTEM COMPONENTS

- Servo Motors—Frame Sizes 5-25
- Synchros and Resolvers Frame Sizes 5-25
- Tachometers—Damping, Rate, Integrating
- Transistorized Amplifiers High Temperature 2.5-16 watts

Synchros—Size 2—20 sec max. error

HYDRAULICS



6100 Series Servo Valve

Servo Valves

- Two moving parts
- Anti-clogging — over size orifices, high pressure clearing
- Flow rates—0-5, 0-10 gpm

Systems

For hi-performance hydraulic or pneumatic missile control.

COMPUTERS

Navigational Computer

- Great Circle Course and Navigational
- Inertial Position
- Guidance
- Analog and Digital for Missile Applications

INERTIAL GUIDANCE

23 lb. Inertial Platform

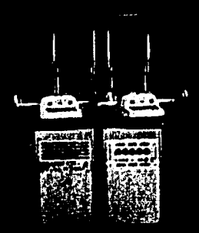
Components include floated gyros, single and two-axis accelerometers, first and second integrators, computers. Complete systems in production for major missile applications feature high accuracy, long-term reliability, light-weight construction.

GYROS

Miniature Floated Gyro

- Rate-floated Integrating; Spring Restrained
- Vertical—Miniature, Self-Contained
- Two Axis Free For Missile Control
- Directional, Conventional and Roll Stabilized
- 3 Gyro, 3 and 4 Gimbal Platforms
- North Seeking Theodolites

GROUND SUPPORT



Digital Logging System

Completely integrated ground support equipment based on unique [illegible] test equipment modules for analog or digital, manual, semi-automatic or fully automatic testing of complete sub-systems or systems.

MICROWAVE

Antenna Array

- Waveguides, Strip—Transmission Lines, Ferrite Components
- Radar rf and Antenna Assemblies
- Transponder Systems, Target Simulators, Test Sets
- Traveling Wave Assemblies

Engineers:

Kearfott offers challenging opportunities in advanced component and system development

Kearfott — A GENERAL PRECISION COMPANY

KEARFOTT COMPANY, INC., LITTLE FALLS, N. J.

Ultra-Reliability

is our watch word at
GUIDANCE CONTROLS CORP.

PRECISION POTENTIOMETERS
A complete line of linear and non-linear potentiometers.
LINEARITY . . .
Standard .08%
Best .03%
MAXIMUM RESOLUTION .015%
Low torque, low noise, excellent stability.
Exceeds MIL 5272 and NAS 710.

MAGNETIC CLUTCHES

Unique electro-magnetic design provides for extreme torque to inertia ratio . . . over 1,000,000 rad./sec.²
SPECIFICATIONS
- Zero backlash and .0005" max. end play
- Friction face
- ABEC-5 ball bearings
- .0015" TIR input/output shaft concentricity with servo mount pilot
- Exceeds MIL-5272, 4158, and 8189 specs.

Send For Free Data Sheets

MICRO & SUB-MINIATURE CLUTCH BRAKES
- Most advantageous for critical size/critical weight applications
- Offered in sizes 6 and 8
- Exceeds MIL-E-5272, 4158, and 8189 specs

GC GUIDANCE CONTROLS CORP.
110 Duffy Ave.
Hicksville, N. Y.
a subsidiary of Dyna-Magnetic Devices Inc.

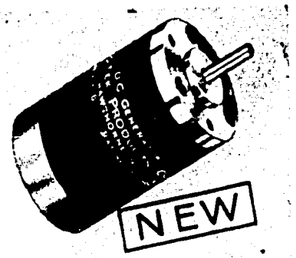
Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. Complete addresses will be found in the Alphabetical Directory, pages 161-264.



direct-current

TACHOMETER GENERATOR

permanent-magnet

APPLICATIONS

- **VELOCITY SERVOS** Ideal for use as a rate generator in servo or integrating devices where a highly linear speed/voltage relationship is required with minimum ripple.
- **DIRECT READING TACHOMETER** Makes an excellent tachometer when combined with a d-c voltmeter having proper voltage range.
- **SPEED TRANSDUCER** Ideal for use as a speed transducer in connection with fast response direct writing oscillographs.

FEATURES

- **SIZE** Miniature. Approx. dia. 1¼".
- **LINEARITY** Output voltage is proportional to speed to better than ½ of 1%.
- **SPEED** Excellent service life at 12,000 rpm. Higher speeds possible.
- **OUTPUT** Various models up to 20 volts per 1,000 rpm.
- **RIPPLE** The rms value will not exceed 3% of the d-c value at any speed in excess of 100 rpm.
- **BRUSH LIFE** Better than 20,000 hours at 1800 rpm.
- **BIDIRECTIONAL OPERATION** Output in either direction is held to a ¼ of 1% tolerance.
- **CONSTRUCTION** Aluminum housings with protective treatment; stainless steel shafts; fully shielded ball bearings; Mylar insulation.

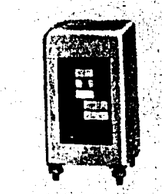
Accurate



These tolerances are from absolute frequency under any combination of the conditions within operating specifications. For specific operating conditions much closer frequency tolerances may be maintained.

TRANSISTORIZED
TUNING FORK

FREQUENCY STANDARDS

TYPE MAFC — Frequency Standard

- Frequency Range Available: 360 cps to 4 kc
- Tolerances % ±: 0.2, 0.05, 0.02, 0.01, 0.005*
- Temperature Ranges: —20 to +71°C, —55 to +100°C, —55 to +125°C
- Power Supply Voltage: 12 or 28 vdc ± 15%
- Size: 1⅞"x1⅞"x2¼" • Weight: 8 oz.

TYPE AFC — Frequency Standard

- Frequency Range Available: 360 cps to 4 kc
- Tolerances % ±: 0.2, 0.05, 0.02, 0.01, 0.005*
- Temperature Ranges: —20 to +71°C, —55 to +100°C, —55 to +125°C
- Power Supply Voltage: 12 or 28 vdc ± 15%
- Size: 2⅛"x2⅛"x3¼" • Weight: 13 oz.

TYPE MAFCD — Frequency Standard

- Frequency: 60 cps
- Tolerances % ±: 0.2, 0.05, 0.02, 0.01, 0.005*
- Temperature Range: —55 to +71°C
- Wave Shape: Sine w/less than 1% harmonic distortion
- Power Supply Voltage: 10 to 14 vdc
- Size: 4⅛"x4⅛"x4⅛" • Weight: 4 lbs.

TYPE MFB — Frequency Divider

- Ratios Available: 2:1, 4:1, 5:1, 8:1, 10:1, 16:1
- Temperature Ranges: —20 to +71°C, —55 to +100°C
- Power Supply Voltage: 12 or 28 vdc ± 15%
- Size: 1⅝"x1⅝"x2¼" • Weight: 6 oz.

TYPE MFS — Frequency Standard for Laboratory or Field

Type MFS is a small, lightweight frequency standard that can replace units many times its size without sacrificing frequency stability. Internal batteries and provisions for external power supply make the unit ideal for either laboratory or field applications.

- Frequency Ranges Available: 50 cps to 4 kc
- Frequency Stability: 2 parts in 10⁹/per month
- Temperature Range: —20 to +71°C
- Size: 3⅜"x5⅝"x5⅝" • Weight: 2 lbs.

TYPE MLS — Laboratory — Frequency Standard

Type MLS is an extremely high stability laboratory frequency standard. The clock on the panel facilitates easy checking of stability.

- Frequency Ranges Available: 50 cps to 4 kc (Multiple Taps Optional)
- Frequency Stability Available: 5 parts in 10⁹
- Output: 10 watts at specified frequency
- Input: 115 v, 50 cycles to 400 cycles
- Size: 9"x10"x7" • Weight: 15 lbs.

A wide variety of units are designed to comply with the most severe military specifications.

Manufactured by

ACCURATE INSTRUMENT CO.

2418 W. ALABAMA

BULLETIN 2078

GPT-10K

SINGLE SIDEBAND HI-POWER TRANSMITTER

The TMC Model GPT-10K, Basic Transmitter, is a conservatively rated, general purpose unit capable of providing 10 kw PEP output throughout the range of 4 to 32 megacycles. Conservatively designed, all components within a large safety factor, attractive styling, GPT-10K includes built-in spectrum analyzer, P.S. Exciter, complete with all necessary tuning and loading controls.

The TECHNICAL MATERIEL CORP.
MAMARONECK, N.Y.

FREQUENCY STANDARDS

PRECISION FORK UNIT
TYPE 50

Size 1" dia. x 3¾" H. Wght., 4 oz.*

Frequencies: 240 to 1000 cycles
Accuracies:—
Type 50 (±.02% at —65° to 85°C)
Type R50 (±.002% at 15° to 35°C)
Double triode and 5 pigtail parts required
Input, Tube heater voltage and B voltage
Output, approx. 5V into 200,000 ohms

*3¼" high
400 - 1000 cy.

FREQUENCY STANDARD
TYPE 50L

Size 3¾" x 4½" x 5½" High
Weight, 2 lbs.

Frequencies: 50, 60, 75 or 100 cycles
Accuracies:—
Type 50L (±.02% at —65° to 85°C)
Type R50L (±.002% at 15° to 35°C)
Output, 3V into 200,000 ohms
Input, 150 to 300V, B (6V at .6 amps.)

PRECISION FORK UNIT
TYPE 2003

Size 1½" dia. x 4½" H. Wght. 8 oz.*

Frequencies: 200 to 4000 cycles
Accuracies:—
Type 2003 (±.02% at —65° to 85°C)
Type R2003 (±.002% at 15° to 35°C)
Type W2003 (±.005% at —65° to 85°C)
Double triode and 5 pigtail parts required
Input and output same as Type 50, above

*3½" high
400 to 500 cy.
optional

FREQUENCY STANDARD
TYPE 2005

Size, 8" x 8" x 7¼" High
Weight, 14 lbs.

Frequencies: 50 to 400 cycles
(Specify)
Accuracy: ±.001% from 20° to 30°C
Output, 10 Watts at 115 Volts
Input, 115V. (50 to 400 cycles)

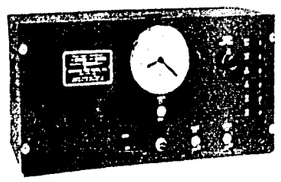
FREQUENCY STANDARD *NEW*
TYPE 2007-6
TRANSISTORIZED, Silicon Type

Size 1½" dia. x 3½" H. Wght. 7 ozs.

Frequencies: 400 — 500 or 1000 cycles
Accuracies:
2007-6 (± .02% at —50° to +85°C)
R2007-6 (±.002% at +15° to +35°C)
W2007-6 (±.005% at —65° to +125°C)
Input: 10 to 30 Volts, D. C., at 6 ma.
Output: Multitap, 75 to 100,000 ohms

FREQUENCY STANDARD
TYPE 2121A

Size
8¾" x 19" panel
Weight, 25 lbs.



Output: 115V
60 cycles, 10 Watt
Accuracy:
±.001% from 20° to 30°C
Input, 115V (50 to 400 cycles)

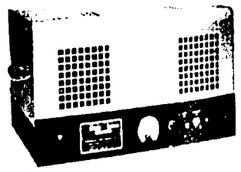
FREQUENCY STANDARD
TYPE 2001-2

Size 3¾" x 4½" x 6" H., Wght. 26 oz.

Frequencies: 200 to 3000 cycles
Accuracy: ±.001% at 20° to 30°C
Output: 5V. at 250,000 ohms
Input: Heater voltage, 6.3 - 12 - 28
B voltage, 100 to 300 V., at 5 to 10 ma.

FREQUENCY STANDARD
TYPE 2111C

Size, with cover
10" x 17" x 9" H.
Panel model
10" x 19" x 8¾" H.
Weight, 25 lbs.



Frequencies: 50 to 1000 cycles
Accuracy: (±.002% at 15° to 35°C)
Output: 115V, 75W. Input: 115V, 50 to 75 cycles.

ACCESSORY UNITS
for TYPE 2001-2

L—For low frequencies
multi-vibrator type, 40-200 cy.
D—For low frequencies
counter type, 40-200 cy.
H—For high freqs, up to 20 KC.
M—Power Amplifier, 2W output.
P—Power supply.

This organization makes frequency standards within a range of 30 to 30,000 cycles. They are used extensively by aviation, industry, government departments, armed forces—where maximum accuracy and durability are required.

SPECIAL

TIMING and COUNTING INSTRUMENTS

THE Series 70 System measures CONTINUOUS time intervals by means of an electronic memory or storage. Time increments as well as continuous time intervals are measured by the Series 70 System, and recorded on tape punch and printer readout.

ELECTRONIC time averaging of two inputs to this system averages out errors due to eccentricities.

THIS System was developed for testing inertial gyros — but the general approach may be the solution to your problems! Write today to the SPECIALIST IN FREQUENCY COUNTERS.

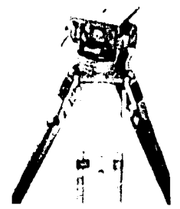
CECO offers you a variety of dependable equipment for

IMAGE ORTHICON
VIDICON
MICRO RELAY

IMAGE ORTHICON

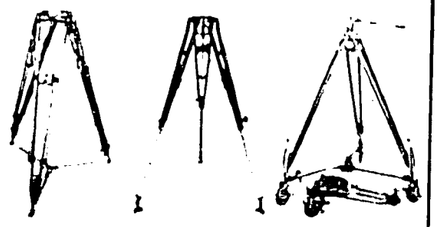


TH-2 BALANCED TV HEAD MODEL C with adjustable center of gravity for Image Orth Cameras weighing up to 135 lbs. **$425.00**

MICRO RELAY

TH-3 MICRO RELAY TILT HEAD for mounting Parabola Beam Reflectors **$285.00**

TRIPODS



TR-1B PROFESSIONAL TYPE TRIPOD with wooden tripod legs for BALANCED TV Head and LARGE VIDICON HEAD **$150.00**

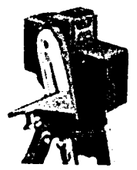
TR-3 METAL TRIPOD for mounting MICRO RELAY TILT HEAD, LARGE VIDICON and BALANCED TV HEAD. **$260.00**

D-3 PROFESSIONAL SENIOR DOLLY for PRO JR., METAL and Professional Type Tripods **$180.00**

CAMERA EQUIPMENT CO., INC.

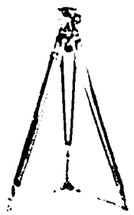
Dept. IRE 315 West 43rd St., New York 36, N. Y. JUdson 6-1420

VIDICON



X-140 REMOTE CONTROL PAN & TILT HEAD with "Dialastop" for remotely panning and tilting Vidicon Cameras weighing up to 20 lbs **$400.00**

X-141 CONTROL BOX for REMOTE HEAD **$40.00**



TR-6 PRO JR SPRING BALANCED PAN & TILT HEAD for Vidicon Cameras weighing up to 35 lbs (With Tripod) **$200.00**

TH-3-V LARGE VIDICON SPRING BALANCED PAN & TILT HEAD for Vidicon Cameras weighing up to 100 lbs **$310.00**

**Dealer and quantity price inquiries invited.*

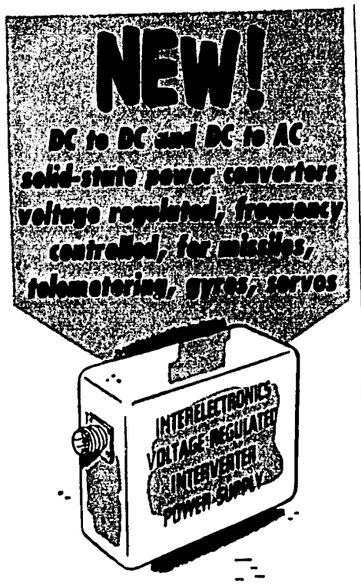
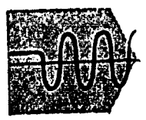
Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. Complete addresses will be found in the Alphabetical Directory, pages 161-264.





Interelectronics Interverter solid-state thyratron-like elements and magnetic components convert DC to any number of voltage regulated or controlled frequency AC or filtered DC outputs from 1 to 1800 watts. Light weight, compact, 90% or better conversion efficiency.

Ultra-reliable in operation, no moving parts, unharmed by shorting output or reversing input polarity. Complies with MIL specs for shock, acceleration, vibration, temperature, RF noise.

Now in use in major missiles, powering telemetering transmitters, radar beacons, electronic equipment. Single and polyphase AC output units now power airborne and marine missile gyros, synchros, servos, magnetic amplifiers.

Interelectronics — first and most experienced in the DC input solid-state power supply field, produces its own solid-state gating elements, all magnetic components, has the most complete facilities and know-how—has designed and delivered more working KVA than any other firm!

For complete engineering data write Interelectronics today, or call LUdlow 4-6200 in N. Y.

A.W.E. INSTRUMENTS FOR ASTRONAUTICS TO AUTOMATION

Front-line participators in everything aero- or astro-nautical, A.W.E. are constantly exploring scientific fields beyond the capabilities of standard electronic recording equipment.

To bridge this gap, the company maintains an electronics division whose duty it is to provide measuring instruments and process control equipment in step with research advances.

Many of the electronic advances are also the answer to long standing commercial requirements. The principles involved are tailored to meet the needs of automation in industry and a growing range of commercial electronic equipment is now marketed by the company.

Among the items offered are: data reduction equipment, analog-digital and digital-analog converters, telemetry and U.H.F. equipment.

All devices are adaptable to suit customers' own requirements. If you have a particular electronic problem why not consult:

A.W.E. ELECTRONICS

Armstrong Whitworth Equipment, Hucclecote, Gloucester, England.

GENERAL DEVICES, INC.

MOST ADVANCED LINE OF STANDARD AND SPECIAL

MULTICHANNEL PRODUCTS FOR TELEMETRY

THE LARGEST SPECIAL PURPOSE FACILITIES FOR ENGINEERING AND PRODUCTION, THE NATION'S MOST PIONEERING EXPERIENCE.

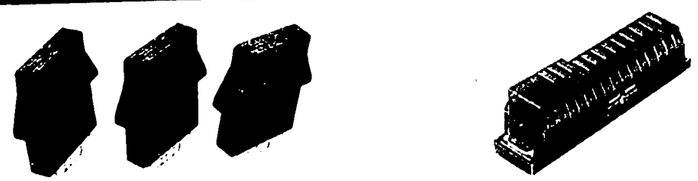
Subminiature all electronic 45 channel multicoder with both PDM and PAM outputs.

Standard low level and mixed high and low level PDM multicoder for IRIG channel configurations ML and MX series.

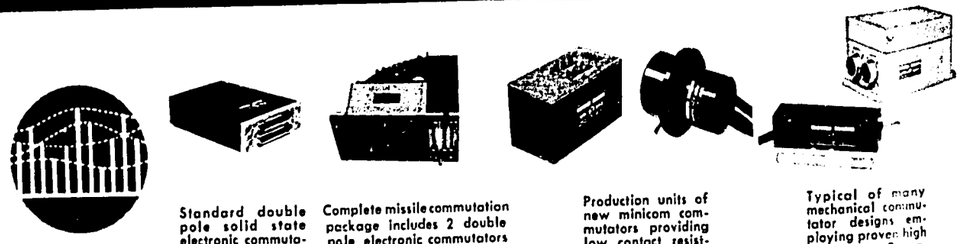
RLH series PDM multicoders for rack and panel installation in fixed ground equipment.

SX series - New ultra subminiature mixed high and low level multicoders.

PDM COMPLETE PDM DATA ACQUISITION SYSTEMS.
FIRST IN QUALIFIED ALL ELECTRONIC SOLID STATE MULTICODER PRODUCTION.
HIGH, LOW AND MIXED INPUT LEVELS IN STANDARD CONFIGURATIONS.



FM SUBMINIATURE HIGH PERFORMANCE SOLID STATE FM-SUBCARRIER COMPONENTS.
COMPLETE SYSTEMS AND SUB-SYSTEMS.
CALIBRATORS AND SIGNAL CONDITIONING EQUIPMENT.



Standard double pole solid state electronic commutators providing IRIG and special wave forms.

Complete missile commutation package includes 2 double pole electronic commutators and a low level electromechanical commutation and amplifier.

Production units of new minicom commutators providing low contact resistance, small size, long life.

Typical of many mechanical commutator designs employing proven high performance Perma-Brush®.

PAM THE NATION'S MAJOR SUPPLIER OF COMMUTATION PRODUCTS.
QUALIFIED MECHANICAL COMMUTATORS AND ALL-ELECTRONIC SOLID STATE
COMMUTATORS IN PRODUCTION FOR MAJOR PROGRAMS.
GEARED FOR LOW COST, HIGH PRODUCTION AND FOR QUICK DELIVERY.

the three sides to sell in RADIO AND ELECTRONICS

The fellows who write the big orders in this business know their market. And they know that hitting that market with year-in, year-out consistency is a three-way proposition. The reason is simple. The radio and electronics engineers of America believe in and wholeheartedly support these three *Institute of Radio Engineers'* services.

Proceedings of the IRE

Here's the engineer's monthly fact sheet — with more pages, more editorial features, and more readers than any publication in its field. Over 58,000 radio-electronics engineers read *Proceedings* because they want to know what's going on and they've discovered *Proceedings* is the place to find out. It's on top of the latest developments in this fast-moving, fast-expanding field.

IRE directory

More than 1,000 pages long, with circulation well above the 50,000 mark, this unique annual covers the radio-electronics industry from stem to stern. In the Directory you'll find a pinpointed classification of 3,500 manufacturers and 1,500 distributors of radio and electronic equipment along with the products they handle. To help you clinch the sale the *IRE Directory* lists the business phone numbers of 3,200 firms. No wonder they call the *IRE Directory* the "Bluebook" of the radio-electronics industry.

Radio Engineering Show

The radio-electronics "spectacular" held annually at New York's mammoth Coliseum. Here's your personal introduction to 60,000 radio-electronics engineers — the men who use the products you sell and manufacture. They're eager to see your new equipment, to listen to your new ideas. This year, don't pass up this golden opportunity to meet them on their home grounds.

For all the details:

1960 IRE DIRECTORY

Directory II Components

45 major groups 428 products

The products and services of the radio-electronics industry have been organized into three basic directories:

I. Complete Equipment

II. Components

III. Materials & Services

Within these three basic directories, 102 major product and service groups are numbered consecutively throughout. Under each of these 102 classes a further breakdown is given, showing in detail by a system of code numbers after each firm listed what specific products within the class are manufactured by that firm.

For a terminology cross-index listing the 857 subproducts in alphabetical order, consult the pink section preceding page 1.

The first few times you use this EDGE INDEX

follow the "How to use" instructions slowly—one step at a time. After that you will be able to open easily and almost instantly to the section that you seek.

Machol edge indexes covering the alphabetical section and each of the three major directory groups will be found on pages 161, 265, 365, and 597.

HOW TO USE

1. Bend the Directory almost double with the back cover page on the inside.
2. Hold in your right hand with your four fingers near to the bound edge and your right thumb near the middle of the open side of this page.
3. From the heavy or light line symbol adjacent to the subject you seek, run your eyes across the page edges until you reach the horizontally corresponding symbol.
4. OPEN THERE!

LICENSE NO. 25
MACHOL EDGE INDEX PATENT #2680430

For complete list of products and services, arranged alphabetically for fast reference, see the pink section preceding page 1.

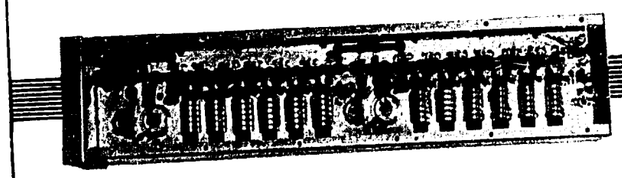
BROADBAND RF AMPLIFIERS



HRB-SINGER Presents

A New Line of Amplifiers With Improved Performance Capabilities

LOW NOISE: input network utilizes a grounded grid triode which offers optimum low noise characteristics for broad-band amplifiers operating in the VHF region

EXTREME BANDWIDTH CAPABILITY: bandwidths not achievable using conventional techniques

OPTIMUM NOISE FIGURE FOR BROAD-BAND: uses conventional low-noise input network

LESS SUBJECT TO OVERLOADING: basically a distributed type amplifier

DYNAMIC RANGE: significant advantage of paralleling is the increased dynamic range

HIGH RELIABILITY: several of the distributed lines may fail without total loss of operation

MODEL NO.	BANDWIDTH	GAIN	NOISE FIGURE	POWER INPUT
530 NK	50 mc—300 mc	>30 db	5-7 db	180 ma. at 150 v. 4 amps at 6.3 v.
3060 NK	300 mc—600 mc	>22 db	<10 db	180 ma. at 150 v. 4 amps at 6.3 v.
2550 NK	250 mc—500 mc	>27 db	<8 db average	180 ma. at 150 v. 4 amps at 6.3 v.

Impedence: 50 Ohms Nominal

The basic distributed band-pass amplifier has been modified by employing a cascade pair of grounded grid triodes in an active input network to obtain higher order results. Reliability in operation is insured by employing pentodes essentially in parallel which will allow operation of the amplifier with reduced gain even if several pentode tubes should fail.

These compact units, weighing approximately two pounds, employ miniature components and high grade etched wiring chassis for lightweight ruggedness and high reliability. Amplifiers are available in bench, rack, or weather-proof enclosures for antenna mounting. For increased versatility power supplies are packaged separately from amplifiers and are available for operation from 50 to 400 cycles AC, and from 28 VDC.

In addition to the amplifier models now available, **HRB-SINGER, INC.,** engineers will meet your own special performance requirements for specific UHF and VHF applications. Direct your inquiries to **Dept. G-10.**

MAGNETIC AMPLIFIERS

MILITARY & INDUSTRIAL

PRECISION TYPES, for analog computing, telemetering, industrial and nuclear controls, data logging; 60 and 400 CPS.
Input, 100 microamperes, DC
Output, 15 volts, DC
Gain, to 1,000,000 per stage
Linearity, to 1%
Balance, to 0.2%
Temperature, to 100° C.

RELAY AND MONITOR TYPES, for relay preamplification missile checkout systems, data logic and switching controls . . . in linear and snap-action types; 60 and 400 CPS.
Input, one microwatt, DC
Output, one watt, AC or DC

SEND FOR LITERATURE . . .

DETAILED ENGINEERING BULLETINS are available from the factory or from our many field representatives . . .

HI-PERFORMANCE TYPES, for electro-hydraulic valves, tape and machine controls, and other fast response requirements; 400 CPS.
Input, 300 microamperes, DC
Output, 15 volts, DC
Response, to 100 CPS.

CYCLEMAG FREQUENCY DETECTORS, for tachometers, speed measurement, frequency control systems . . .
Input, one watt, AC
Output, to 1 milliampere, DC
Frequencies, to 2000 CPS.

CUSTOM DESIGNS often solve tough design problems. Acromag's experience working with wire drawing machines, missile systems, nuclear reactors, auto-pilots, and industrial instrumentation . . . is yours for the asking . . .

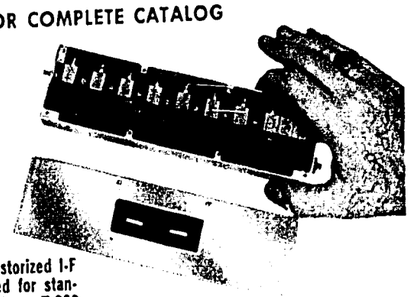
WIDE BAND AMPLIFIERS ● **I-F AMPLIFIERS PRE-AMPLIFIERS**

WRITE FOR COMPLETE CATALOG

TRANSISTORIZED AMPLIFIER SERIES T-330



A new series of completely transistorized I-F amplifiers offered to fill the need for standardized, high quality units. These T-330 series amplifiers by I.F.I. are available in a variety of center frequencies and bandwidths. They also can be equipped with emitter follower, cathode detector or low noise tube input.

The quality of construction is high. The use of printed circuitry and quality control procedures provide rigid standards. Individual inspection and testing of each unit prior to delivery assure the superior quality of IFI transistorized I-F amplifiers. These transistorized amplifiers meet all applicable military environmental specifications.

MAGNETIC AMPLIFIERS

Complete from Design To Finished Product by FORBES and WAGNER

Modern facilities comprise precision toroid winding, impregnating, assembling, encapsulation and testing to provide completely matched units for use in magnetic amplifiers.

Illustration shows a miniaturized magnetic amplifier with matched cores. Larger amplifier has been only partially potted to show toroidal cores.

Write for brochure giving the complete F & W story.

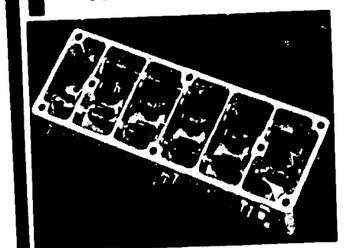
FOR HIGH RELIABILITY IN
MISSILE
APPLICATION



Featuring EXTREME DEPENDABILITY UNDER CONDITIONS OF:
• HI-VIBRATION • HI-TEMPERATURE
• HI-ALTITUDE • HI-HUMIDITY

WRITE FOR CATALOG 95D

MODEL 82 TRANSISTORIZED MISSILE IF AMPLIFIER features the ruggedness and proven performance of the LEL IF64 missile amplifier at 1/50th the power requirement. The standard model 82 has a 10 mc bandwidth at 60 mc center frequency. Amplifiers embodying the features of the 82, but with electrical characteristics to meet your system requirements, can be supplied.

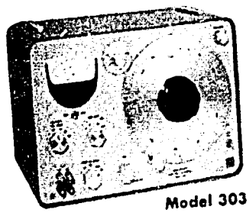
QUAN-TECH ELECTRONIC INSTRUMENTS



Model 303

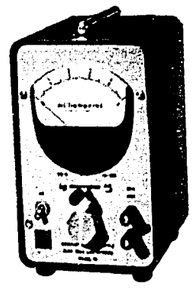
Designed especially for applications in the fields of ultrasonics and noise spectrum analysis. Switch enables you to select any of four constant bandwidths. Two broadest positions are flat topped, vastly increasing the simplicity of tuning at high frequencies

New! — Wave and Noise Spectrum Analyzer

Frequency Range: 30 cycles to 100 kc, ±300 cycle vernier
Voltage Range: 100 microvolts to 300 volts full scale
Bandwidth: —3 db at 10 and 30 cycles round top; 100 cycles and 1 kc, flat top
Monitor Output: Meter output and a voltage proportional to dial setting provide graphic display on oscilloscopes and X-Y recorders

Price: $1200.00

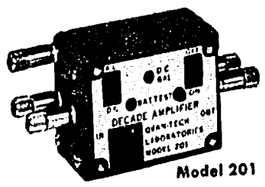
Provides constant output current, variable over a wide range, and independent of the voltage drop across the load. Extremely useful for transistor applications, potentiometer noise measurements, strain gage applications, etc.



Model 151

New! Constant Current Supply

Output: 0.5 to 500 ma. DC in three ranges: 0.5 to 5 ma; 5 to 50 ma; and 50 to 500 ma. 20 volts maximum output voltage.
Power Input: 105-125 volts, 50-60 cycles, 25 watts.
Price: $225.00



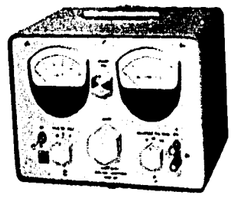
Model 201

Extremely compact and stable, a completely self-contained miniature amplifier Its DC response, low noise, and freedom from microphonics make it exceptionally useful with DC oscilloscopes and in sub-sonic as well as conventional applications.

DC-Coupled Decade Amplifier

Gain: 10 ±2%, flat within ±2% DC to 100 KC.
Input: 400k ohms and 30 mmf, 20 uv input noise.
Output: 100 ohms, 1 volt P-P max, ½% distortion.
Batteries: Three ZM 9 mercury cells, life 600 hrs.
Price: $85.00

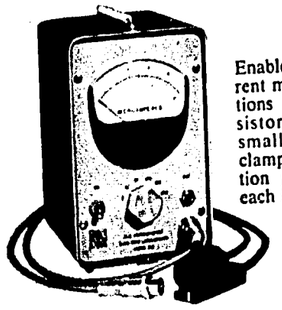
Models 104 and 121 Power Supplies feature 0.1% regulation and metered ranges of voltage and current. Models 101, 102, 103, and 105 (not shown) are compact, lightweight supplies providing voltage metering and 0.25% regulation. Continuous adjustment and overload protection on all models.



Model 104

Transistorized Power Supplies

Model 101:	0- 8 volts DC, 0- 2 amps.	Price $195.00
Model 102:	0-14 volts DC, 0- 1 amp.	Price $175.00
Model 103:	0-30 volts DC, 0-½ amp.	Price $175.00
Model 104:	0-50 volts DC, 0- 1 amp.	Price $375.00
Model 105:	0-50 volts DC, 0-¼ amp.	Price $205.00
Model 121:	0-15 volts DC, 0- 5 amps.	Price $425.00



Model 301

Enables rapid, accurate AC current measurements and observations of wave forms in transistors, magnetic amplifiers, small servo systems, etc. A clamp-on probe and an insertion probe are provided with each instrument.

AC Microammeter

Sensitivity: 3 ua to 100 ma full scale (300 ua to 100 ma—clamp on probe).
Frequency: ±2% 50 ~ to 100 KC (±5% 100 ~ to 100 KC—clamp on probe).
Input Impedance: 2 ohms—3 ua to 1 ma; negligible 300 ua to 100 ma.
Price: $290.00

Also available is Model 202 Isolation Amplifier, custom-built power supplies, and amplifiers to your specifications.

We welcome any requests for information regarding specific applications of Quan-Tech instruments.

Prices and specifications subject to change without notice.

A **TRACKING ANTENNAS** — *A 60-foot satellite tracker points skyward. 28- and 84-foot models also available.*

B **SCATTER ANTENNAS** — *One end of a scatter link showing two 120-foot antennas. 28- and 60-foot models are also available.*

C **RADAR ANTENNAS** — *A giant radar antenna forerunner to the BMEWS Program. Dozens of conventional types are also available.*

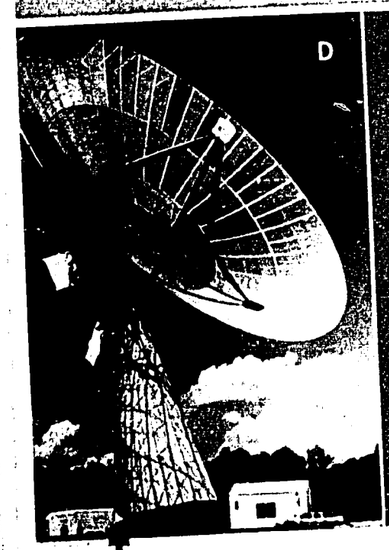
D **RADIO TELESCOPES** — *An 84-foot radio telescope listens to the heavens whisper. 28- and 60-foot models are also available.*

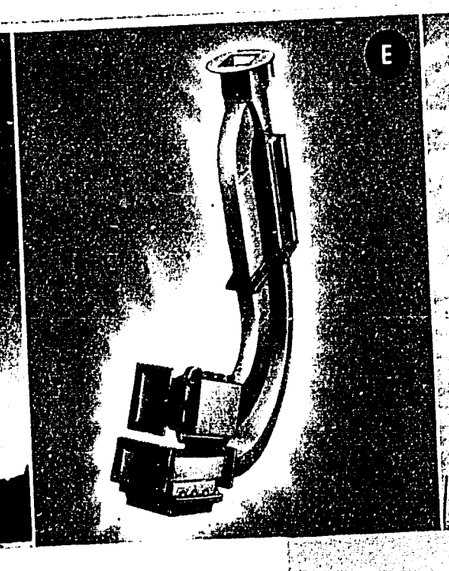
E **WAVEGUIDE COMPONENTS** — *A dual polarized feed with two waveguide inputs. Other large size components include many types of horns, duplexers, transitions, straight sections and bends.*

F **FIELD SERVICE** — *Kennedy Field Service engineers erect an 84-foot radio telescope. Other services include site selection, construction, personnel training and servicing.*

G **RESEARCH AND DEVELOPMENT** — *Kennedy's antenna service includes basic R & D in microwave propagation.*

ASK KENNEDY!





THE solution to antenna problems begins when someone says: "Let's ask Kennedy!"

A few of the many reasons why are shown on this page. These Kennedy antennas are setting new standards for all-weather reliability and versatility wherever they serve throughout the free world.

Kennedy antennas come in many shapes and many sizes. But whatever the type, and whatever the conditions under which it must serve, Kennedy can offer a design that fully measures up to specifications.

Kennedy Field Service engineers are available to install antennas anywhere in the world. It's a part of the complete, integrated service that is still another reason why more and more people in electronics are "asking Kennedy" about antenna problems.

Gabriel electronics division

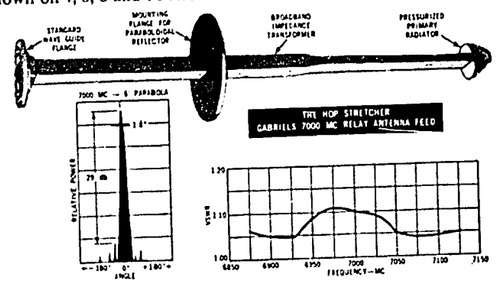
THE GABRIEL COMPANY

INTEGRATED ANTENNA PROGRAMS — RESEARCH DEVELOPMENT PRODUCTION

New Products

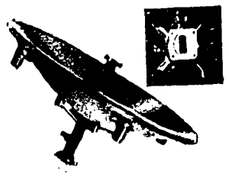
The HOP-STRETCHER feeds offer higher gain, lower sidelobe levels and more desirable beam-widths for center-fed parabolic antennas. This feed was developed for S, X, K_u and K_a bands.

Technical features of X-band antenna • Sidelobes at least 24 db down on 4, 6, 8 and 10 ft. reflectors • High gain efficiency, 65-70%

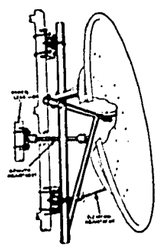


The new hi gain 3 kmc Cylindrical Coaxial Feed provides similar E and H-plane patterns, minimum side and backlobes, and negligible squint. Rear-mounted, with easy polarization adjustment to any angle.

7000 mc Offset Antenna. Ideal for installations where passive reflectors are utilized — VSWR less than 1.10:1 over 5900-8500 mc — Sidelobes at least 24 db down — gain is 41 db at 7000 mc. Elliptically shaped reinforced fiberglas reflector.

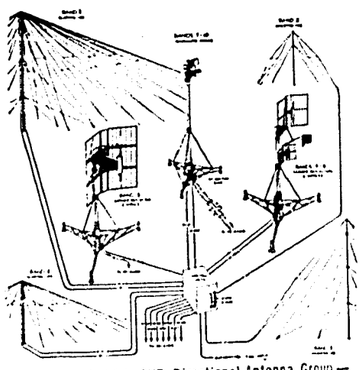


The new X-band parabolic antenna with standard feed. Features variable polarizing adjustment, 0 to 90°. Manually locked in position.



The new universal 3-point suspension mounting bracket for 2, 4, 6, 8 and 10 ft. parabolic reflectors.

Features • Independent azimuth adjustment. • Independent elevation adjustment. • Adaptable for mounting in all locations.

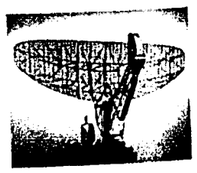


Broadband, HF-to-SHF, Directional Antenna Group — Remotely controlled.

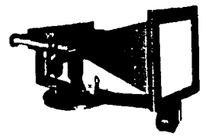
Low-drag Airborne Flush-mount Antenna. Beacon — Countermeasures — Homing — Navigation

Missile Antennas — Telemetering, Destruct, Guidance ICBM, Surface-to-Air, Air-to-Air, and Surface-to-Surface.

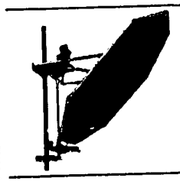
Radar Antennas
- Shipborne Search
- Harbor Control
- Airborne Height Finding
- Land Base Search



Designed, developed, and constructed to military specifications with improved strength-to-weight ratio and component reliability.



Aleutian Line—Dew Line Low loss, heavy duty duplex feed horns for Tropospheric Scatter Radio Communication Systems.



Motorized Passive Reflector For maximum point-to-point transmission in microwave relay links. Fast, accurate, easy adjustment from remote location. Manually adjusted reflectors also available.

The Gabriel Electronics Division is one of the world leaders in microwave relay link antennas, and the more complex antennas. They are dedicated to improve and extend the state-of-the-art in antennas and antenna components.

Call or write to GABRIEL ELECTRONICS DIVISION for counsel on your antenna needs.

GABRIEL'S STANDARD MICROWAVE PARABOLIC ANTENNAS

...Contributing millions of trouble-free operational hours for industry and the military.

- 7000 mc — Broadband (5925-7425 mc) high gain > 40 db low sidelobes — low VSWR < 1.13:1 over band.
- 4000 mc — Narrow-beam broadband (3700-4200 mc) — low VSWR < 1.2:1 — gain > 37 db.
- 2000 mc — Available in offset and center-fed feeds. Narrow-beam broadband (1750-2110 mc) — high gain > 28 db low VSWR < 1.3:1 over band
- 940 mc — All weather radome covered feed — gain > 22 db low VSWR < 1.25:1.

Expanding the Frontiers of Space Technology

Lockheed maintains extensive research capabilities for the development of antennas and telemetering systems and spacecraft applications.

Laboratory studies in antennas and electromagnetic propagation include the application of solid state materials to microwave transmission line components; the design of antennas to survive the rigors of space flight; the effects of space on radio signals and radar detection; and the scattering from missile shapes and space vehicles. Research is also being conducted in the application of ferrites and MASERS; on problems of radio transmission between space vehicles and Earth, re-entry scattering and diffraction by man-made objects and ionized gases; and development of antennas for data link systems between satellites and ground stations.

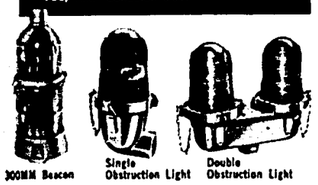
Telemetering has been brought to a high degree of successful application in the integration of circuits and components into high-performance systems. A completely sub-miniaturized FM-FM system has been developed, along with a complete PAM-FM system characterized by highly efficient band-width utilization, low power consumption and economy of size and weight. This represents a significant achievement in the field of high capacity telemetry.

Engineers and Scientists—Lockheed Missiles and Space Division programs reach far into the future and deal with unknown and challenging environments. If you are experienced in one or more of the above areas, or have background in related work, we invite you to share in the future of a company that has an outstanding record of achievement and make an important individual contribution to your nation's progress in space technology. Write: Research and Development Staff, Dept. J-93, 962 W. El Camino Real, Sunnyvale, California. U.S. citizenship required.

HUGHEY and PHILLIPS, INC.

Specialists in Obstruction Lighting Equipment and Controls

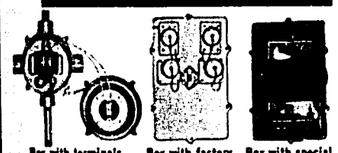
BEACON and OBSTRUCTION LIGHTS, designed to meet specifications of CAA, FCC, and Canadian DOT.



300MM Beacon — Single Obstruction Light — Double Obstruction Light

You'll find Hughey & Phillips have obstruction lights for every job. The engineering of each light offers maximum efficiency and simplified installation and maintenance. Whether you need bottom or side entrance conduit fitting types, there is a model to meet your requirements.

SPECIAL CAST ALUMINUM WATERTIGHT JUNCTION BOXES, offering a wide choice in types of terminals, cable support, and factory installed screw cap receptacles.



Box with tarminals, cable support, and receptacle in cover. — Box with factory installed screw cap receptacles. — Box with special terminals and cable support.

Hughey & Phillips have pioneered in the use of adequate junction boxes with proper terminals, and built-in cable support to meet NEC requirements.

SPECIAL CONTROL UNITS, designed for both indoor and outdoor installation.

- Photo-Electric Control Units
- Beacon Flashers
- Combination Photo Control & Beacon Flashers
- Lamp Failure Indicator System
- Controls with Autotransformer system . . . pioneered by Hughey and Phillips for tall towers increases lamp life.

Photo control, flasher and Lamp Failure Alarm

TOWER LIGHTING ISOLATION TRANSFORMER

THREE SIZES . . . 750, 1750, 3500 WATTS

FEATURING:
- HIGHER EFFICIENCY
- IMPROVED REGULATION
- ADDITIONAL TAPS
- FIBER GLASS INSULATION
- EPOXY ENCASED
- VERSATILE MOUNTING

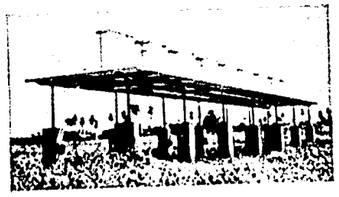
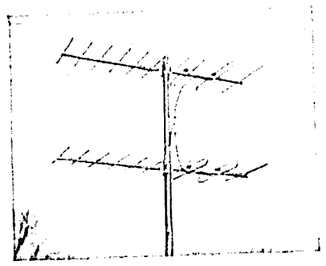
Antennas



MINITRACK ANTENNAS

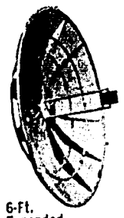
Horizontally or vertically mounted arrays similar to this MINITRACK antenna can be designed for individual beam requirements or you can select from a number of existing designs.

TACO offers unsurpassed facilities for the design, development and manufacture of military and commercial antenna systems. Mechanically, Taco is currently handling antenna arrays in the area of 2000' dimensions. Electrically, Taco is equipped and experienced in the design and manufacture of antennas from 30 MC to X-band. Modern laboratory and manufacturing facilities include long-range test sites, complete measuring and testing equipment, automatic constant potential welding equipment, and provision for competent field service and installation service anywhere.



RUGGEDIZED YAGI

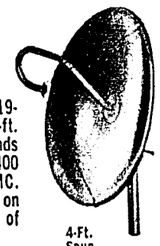
From 30 MC to 500 MC. Available as individual units or stacked systems.



6-Ft. Expanded Aluminum Mesh

PARABOLIC ANTENNAS

Mesh sizes from 4-ft. to 19-ft. and spun sizes from 4-ft. to 6-ft. Frequency bands from 806-960 MC, 1700-2400 MC and 5925-7450 MC. Other bands available on special order. Variety of mountings.



4-Ft. Spun Aluminum

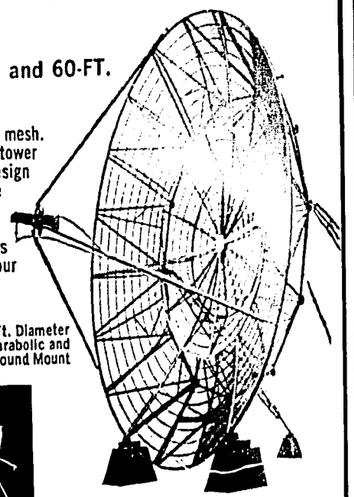
WAVE GUIDE COMPONENTS

Large Wave Guide Components for 10½" and 21" in the form of wave guide bends, feed horns, are available. Certified welders assure quality units fully tested to meet the most stringent electrical and mechanical requirements.

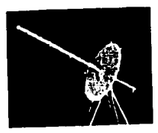
28-FT., 32-FT. and 60-FT. PARABOLICS

Expanded aluminum mesh. Ground mounted or tower mounted. Unique design allows rapid, simple erection.

Dual polarized horns supplied to meet your requirements at reasonable cost.



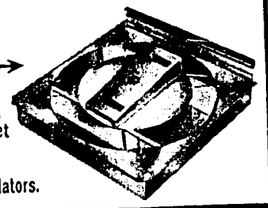
28-Ft. Diameter Parabolic and Ground Mount



AIRBORNE ANTENNAS

←Antenna AT-256-A/ARC Type and Construction: Streamlined blade type antenna. Heat treated permanent mold aluminum castings with Teflon insulators.

Antenna G-833→



Type and Construction: Flush mounted annular slot antenna for communication band. Sheet aluminum, spot welded construction per Air Force specifications. Fibreglas insulators.

HELICAL ANTENNAS and MOUNTS

Mechanical mount for azimuth and elevation. Electromechanical remote mounts also available. Helicals available in 4, 6, or 8 turns from 215-265 MC. Other frequencies on special order. Mount illustrated is H-M-1.

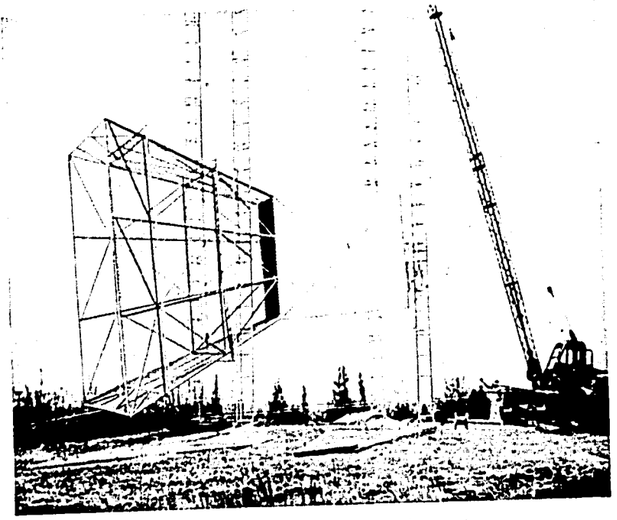
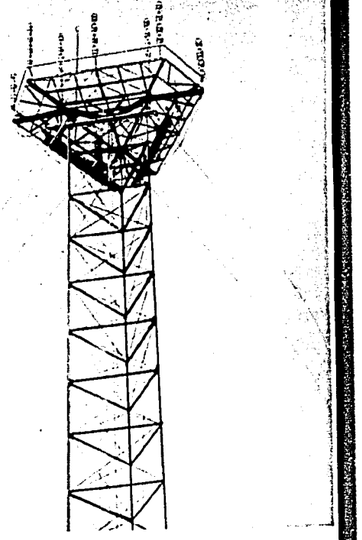
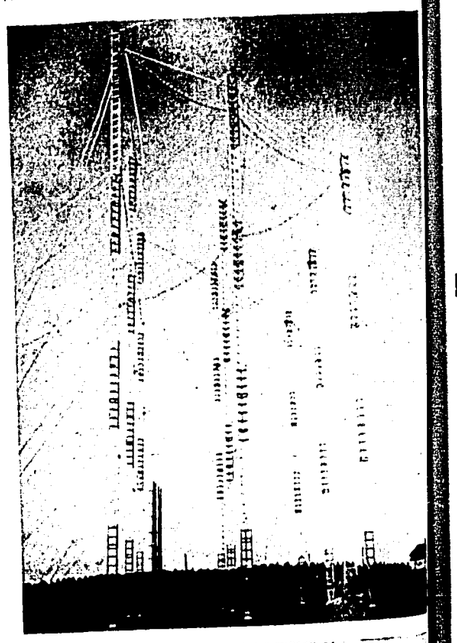
Special-design tower supporting Air Force antennas for test purposes.



Horn-type receiving antenna and support towers for signal amplification.





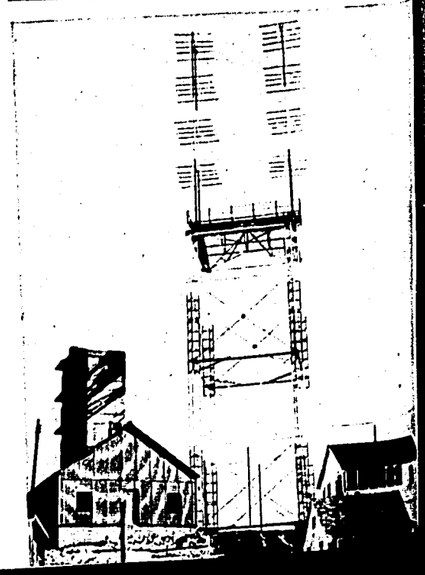
Towers supporting large curtain type antenna for scatter communication.

STAINLESS TOWER DESIGNS OFFER UNUSUAL VERSATILITY FOR SPECIAL APPLICATIONS

"Custom" design utilizing Stainless stock tower sections is the answer to many special tower requirements. Standard stock tower sections may be modified and adapted to special specifications at minimum cost.

A wide variety of self-supporting or guyed structures are available to support all types of top or antenna loads and withstand all types of wind, ice and rigidity conditions.

Let Stainless' Design Staff advise and assist you with your structural problems.



Special design self-supporting test structure having very rigid deflection and ice load specification.

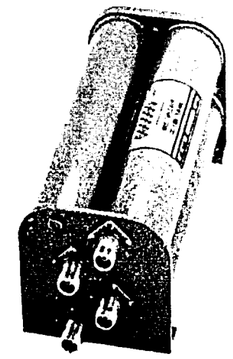
Rantec's long line of proprietary products, results of many original research and development projects, are now in use in major missile and satellite programs, tracking range installations and instrumentation laboratories throughout the world. These are "flight proven," "range proven" products with a history of *tested* reliability.

RF & MICROWAVE

ANTENNAS

Rantec antennas — helical arrays, antenna feeds, slot arrays and other special designs — are widely known for their efficient, dependable operation in telemetry systems, radar tracking and augmentation, command guidance and ECM systems. Rantec helix installations have been used in many major missile and satellite projects including the long-range Pioneer series.

TELEMETRY MULTIPLEXERS



When quantity of information, weight, space and optimum antenna location are problems, Rantec telemetering multiplexers provide an easy, efficient solution. With Rantec multiplexers, two, three, four (illustrated) or six telemetry signals can be coupled to a single antenna system. Isolation between r-f inputs is extremely high while transmission loss of signals to the antenna is extremely low. Rantec multiplexers (high Q coaxial band pass filters) cover the telemetry band and are optimized for indicated frequency ranges. They are now in production for use in nine major missile programs.

MICROWAVE FERRITE COMPONENTS

To meet the pressing needs of systems engineers, Rantec has designed, developed and manufactured a number of widely-used microwave ferrite components.

Amplitude Modulators
Single Side-Band Modulators
Phase Shifters
High-speed Ferrite Switches
Iso-duplexers
Circulators (illustrated)
Load Isolators

In addition to the above products, Rantec also designs and manufactures VHF remote attenuators, non-contacting antenna lobing switches, high-speed logarithmic pattern recorders and automatic radome boresight measurement equipment.

Complete information on Rantec products and a brochure describing Rantec research and development capabilities are available free of charge on request.

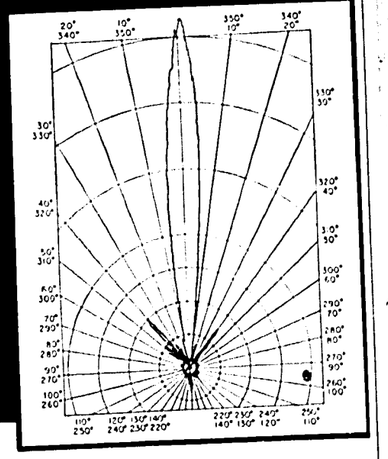
THE NEW

Trylon / Laport Rhombic

a low-interference antenna for long distance communications



The history making concept by E. A. Laport of the unique Rhomboid Antenna illustrated above, has been developed, engineered, installed and tested by the facilities of The Wind Turbine Company. An 8.5 mc installation realizes such significant improvement, as: Sidelobes at least 14 db below the main beam over a two to one frequency range. Gain at least 10 db more than comparable conventional Rhombics, twice the power handling capacity — and with lower transmission line loss, too!

The meticulous model testing and careful attention to electrical and structural details inherent in this installation, are typical of Trylon engineering. The Wind Turbine Company welcomes the opportunity to apply this sound approach to the planning, design, fabrication, and installation of your next antenna system — whether for AM, FM, TV, Microwave, Mobile, or Long-distance communications.

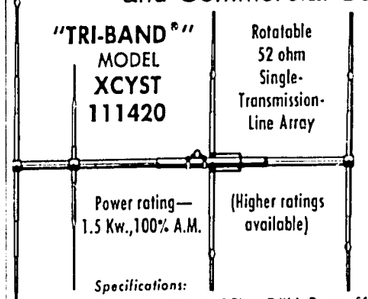
TELREX LABORATORIES

Designers and Manufacturers of

COMMUNICATION ARRAYS FOR THE ARMED FORCES
and Commercial Service



Specifications:
Gain 11Mc.-8.0 db, F/B 24 db, E-Plane B-W ½Power—66°
Gain 14MC.-8.4 db, F/B 24 db, E-Plane B-W ½Power- 60°
Gain 20Mc.-8.6 db, F/B 24 db, E-Plane B-W ½Power—56°
Wind surface—13.36 sq. ft. Load at 100 mph.—423 lbs.
Turning radius—23 ft. Container size—12"x12"x14'
Antenna weight—160 lbs. Shipping weight 200 lbs.
Antenna rated design with ½" radial ice—110 mph.

Calibrated for easy assembly to specifications and center frequency of your choice. Custom Quality construction throughout. Suggested rotator for above — Telrex Model 500-RI5.

Also available: Over 172 off-the-shelf fixed or rotatable high-performance arrays: 7Mc. to 600Mc. Mono, Duo, Tri and Multi-band individually fed or single line feed, and medium to extra heavy duty rotator-indicator control systems, rotated masts, and towers.

- Telrex is equipped to design and supply to our specifications or yours, Broadband or single frequency, fixed or rotary arrays for communications, FM, TV, scatter-propagation, etc.
- Consultants and suppliers to communication firms, universities, propagation laboratories and the Armed Forces.

For information or to order, phone PRospect 5-7252 or write Department SC.

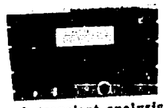
New High Power Pulsed Oscillator PG-650-C



The successful introduction of the PG-650 pulsed oscillator to many test applications has led to an improved model of interest to workers in ultrasonics, r.f. transient analysis, nuclear magnetic resonance, etc. The following characteristics and features are available only with the PG-650-C.

Frequency Coverage 5-90 MC in 7 ranges*

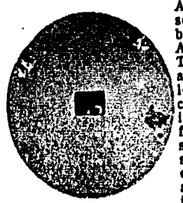
R.F. output Voltage (Min.) into 93 ohms .....0—300 p to p
Pulse length continuously variable .....1½—15 μsec
Rise and Fall times (Max.) .....0.3 μsec
Pulse Droop .....5% Max.
Noise Output between Pulses .....Thermal Noise from Termination
Harmonic Content (Max.) mostly 3rd 10%
R.F. Leakage .....Negligible
Trigger to Pulse Jitter .....005 μsec

SPECIAL FEATURES

Internal Delay Ranges available from calibrated Helipot .....200, 1100, 11,000 μsec
Gate Pulse output available for intensifying and blanking purposes.
External modulation of r.f. oscillator using varying pulse lengths and p.r.f.'s for Carr-Purcell Method.
Fine controls of P.R.F., Pulse length, and delay times.

** Use of special coils will extend the coverage from 0.5 to 150 MC*

ULTRASONIC DELAY LINES

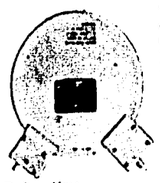


Advanced designs in solid delay lines has been the feature of ARULAB products. This organization has always been the leader in a highly competitive field in improving the performance in all respects. The model shown has the lowest secondary level and widest bandwidth in history and was designed especially for integration applications.

SPECIFICATIONS:

Delay time .....900 μsec
Average Max. Secondary level .....70 db
Triple Travel level .....60 db
Bandwidth for Operation .....10 MC
Center Frequency .....40 MC
3 db Bandwidth .....20 MC
Size .....1½" diam. x 1"

Model "C" Miniturized Line



The Model "C" series delay lines were developed to reduce the weight and cost of the longer delays needed for radar applications. These units represent a 20% reduction in diameter and 40% in weight over older models. Typical Specifications:

Delay time .....1500 μsec
Center Frequency .....32 MC
Bandwidth 3 db .....20 MC
Insertion Loss (50 ohms) .....60 db
Capacity .....100 μμfd
Max. Secondary level—5 MC-BW .....43 db
Max. Secondary level—20 MC-BW .....40 db
Aluminum Case .....8¾" diam. x ⅞"
Weight .....2 lbs.-14 oz.

Please write for our bulletins on other test equipment: Wide Band Amplifiers, Preamplifiers, and Precision Attenuators.

ARRA LINE

CONTINUOUSLY VARIABLE ATTENUATORS

Exclusive Features:

- Broadband Impedance Match
- Min. VSWR for all values of attenuation over band
- Insertion Loss: 0.2 db max.
- Calibration Accuracy: ± 0.2 db
- Drive: Micrometer for general use. Piston & Shaft drives for systems & power level applications.
- Connectors: Type "N" Female (others on request)
- Size: 5" dia. x 1" high, excluding connectors and micrometer
- Power Rating: 10 watts average min.
- Calibration freq.: midband
- Continuously variable for all values of attenuation

Model No.	Freq. KMC	Max. Atten.	Max. VSWR	Unit Price
1414-10	.25-.50	10	1.5	$290.
2414-20	.50-1.0	20	1.5	$290.
2-3414-30	.8-2.5	30	1.5	$290.
3414-30	1.0-2.0	30	1.4	$270.
4414-30	2.0-4.0	30	1.3	$250.
4-5414-30	2.0-6.0	30	1.3	$260.
5414-30	4.0-7.0	30	1.3	$270.
6414-30	7.0-11.0	30	1.3	$280.

Upon Special Request:
—Other frequency bands between 250Mc. and 11 KMC.
—Other ranges of continuously variable attenuation from a minimum of .2 db to a maximum of 60 db.
Write for complete specifications and outline drawings.

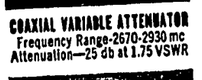
FACILITIES
make the Difference

■ Creative microwave engineering talents work best when equipped with *extensive test and production facilities.* Here at PREMIER, our inventive, experienced engineers have at their disposal test and production equipment on a par with the most advanced in the entire microwave industry.

These integrated facilities enable PREMIER to exercise complete control over all steps of production from theory to finished component, thereby assuring complete uniformity . . . and over-all excellence.

Whatever your problem in advanced microwave development, you can expect to find your most efficient . . . and economical . . . solution at PREMIER. Some typical PREMIER products are depicted at the right.

For detailed technical information, write to:

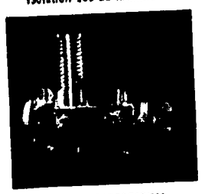


PREMIER INSTRUMENT CORP.
33 New Broad Street, Port Chester, N. Y.
THE WAVEGUIDE HOUSE

COAXIAL VARIABLE ATTENUATOR
Frequency Range-2670-2930 mc
Attenuation—25 db at 1.75 VSWR

HIGH POWER VARIABLE ATTENUATOR
Power Level—300 kw peak for 8.5-9.6 Kmc
Attenuation—1-40 db at 1.15 VSWR

WAVEGUIDE SWITCH
VSWR-1.06 maximum
Isolation-100 db minimum



COAXIAL DIRECTIONAL COUPLER
Coupling Values—20 to 50 db
Directivity—greater than 30 db

For details, circle #315 on Reader Service Card

WEINSCHEL
FIXED COAXIAL ATTENUATORS
1 to 12.4 KMC
50 Ohms 1 to 20 db
Connectors: Type N, C, BNC, TNC or SC. Each type with male/female, double male or double female connectors. Made with Weinschel Film Resistors for maximum stability.

There are

3 SPECIFIC WAYS

in which "Proceedings of the I R E" serves the advertiser differently and more effectively than other publications.

1. Pre-Specification Selling

Because "Proceedings of the I R E" publishes basic research and engineering application articles, it is closely studied by those design engineers who must "keep ahead of the market." Often, the research published leads the industry production by from two to six years! The alert engineer, who needs this amount of time for his own design applications and for tooling up and changing the production in his own factory, studies the "Proceedings of the I R E" carefully. Its articles keep him abreast with the changes that will inevitably come and make it possible for him to be ready for them. This is the time for you to sell the unknown engineer designing the never-dreamed-of-product "before it happens!" It is an insurance that you will be ahead of the market instead of behind it

2. Personal Connection to the Individual

The Institute of Radio Engineers is an engineering society for individual engineers who must qualify on their own education, experience and engineering work. Thus, the magazine follows the reader as his private possession, wherever he goes. Wherever new engineering progress is developing, the work is done by individual engineers—and it is these men that must be sold! Only the engineer knows enough to specify and buy in a highly technical industry. Selling is a matter of reaching the minds of men because *a company cannot sign a purchase order.* Wherever radio engineering activity is the greatest, companies employ I R E members. An engineer moves into a new job in advance of production and with him goes "Proceedings of the I R E," with all the advertising you so urgently need to place where engineering activity is the greatest.

3. Economy

It is a specific purpose of the Institute of Radio Engineers that its advertising rates should benefit and help the industry grow, by being economical. Part of the economy of a tax-free organization is thus passed on to advertisers in the form of low-cost advertising to a high-quality audience. The page rate per thousand engineers of "Proceedings of the I R E" is the lowest in the radio-electronic industry by deliberate intent. Thus, the Institute finds an extra way that it can help the firms that hire its engineers to gain new business at lower costs.

What do you need in Battery Power?

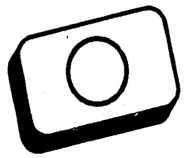
ZINC-CARBON? MERCURY?
NICKEL-CADMIUM?
WATER-ACTIVATED?

MORE THAN 5,000 BURGESS BATTERY TYPES

each with the highest measure of uniform dependability! This is why 2 of 3 electronic engineers specify

BURGESS BATTERIES

BURGESS
IS THE MOST COMPLETE ONE-SOURCE LINE OF *Portable Power!*



EXCLUSIVE WAFER CELL CONSTRUCTION

. . . offers compactness, long shelf life, exceptional service life. A 30% increase in battery life at no increase in size.

TRANSISTOR ACTIVATORS

Burgess Activator Batteries for transistor circuits are smaller and more compact in size! Yet they deliver 30% more power because of the patented "Wafer-Cell" construction! Burgess Activators give you compact power, uniform performance, longer shelf life . . . all combined with modern packaging.

RESERVE BATTERIES

High energy output in a compact power source. Can be stored dry for years! Activated only when immersed in water. No handling of dangerous electrolyte, no spilling or leaking! Wide range of efficient operating temperatures. Designed for your specific applications.

MERCURY ACTIVATORS

Burgess constructional features provide *uniform quality* and *dependable service!* Burgess *exclusive* patents offer sealed-in-steel protection, wide temperature range efficiency, controlled venting, patented inner cell connector, and flat discharge curve.

SEALED NICKEL-CADMIUM BATTERIES

A secondary rechargeable battery system which delivers high energy output from a small package! Hermetically sealed-in-steel cells eliminate annoying maintenance and addition of liquids. Can be recharged many times, by trickle or quick charge, for long lasting economical power!

Check with your Burgess Distributor for complete local stocks of fresh BURGESS BATTERIES! Or your distributor can order from Burgess the special battery needed for your specific application!

FREE DESIGN SERVICE

For special applications, skilled Burgess Engineers offer you a FREE battery design service. Burgess will manufacture the exact battery to fit your needs, regardless of quantity required.

NEW ENGINEERING MANUAL

New 100-page dry battery handbook now available! Engineers engaged in the design of battery-powered equipment are invited to write to Burgess Battery Company Dept. IRE Freeport, Ill., to secure a copy. Others may buy the manual for $1.00.

BURGESS BATTERY COMPANY

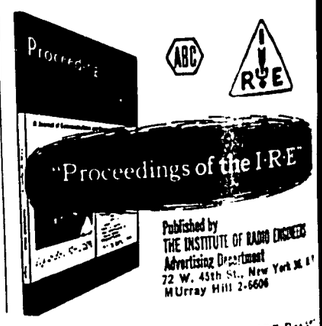
From servo-mechanisms to electronic computers "RADIO" is a way of THINKING!

Far-reaching progress in the radio-electronic field is no "happy accident." Television, electronic computers and the "radiation" power of the atom, rapidly being harnessed to industry, were not discovered . . . they were engineered.

From "fission" to "computation," these engineering achievements are accomplished through an enormous process of information exchange—the methodical and brilliant teaming together of engineering *thinking* to solve a problem. In radio this work has been done deliberately by a growing engineering society, through its meetings and published proceedings, which unleash the creative minds of men.

In 1958, "Proceedings of the I·R·E" published nearly 2000 text pages, exclusive of product news and departmental features. This is the word-count equivalent of eight 500-page textbooks on radio-electronics for engineers. It exceeds the contents of the next two contemporary publications put together. This "high" in genuine reader service was logically matched by advertising worth over a half-million dollars, by firms investing in the engineers' reading interest and benefiting by it.

Engineers are educated to specify and buy!



HIS HEART IS A YARDNEY SILVERCEL® BATTERY!

Because YARDNEY SILVERCEL® Batteries are up to 5 times smaller and 6 times lighter than any other batteries of equal capacity, they power measuring devices inside "Hurricane Sam", an artificial man used to perfect jet escape techniques. Today, imaginative engineers are also using SILVERCEL® Batteries in communications, portable power supplies, telemetering and instrumentation . . . either as standard or custom-built models. Couldn't you use these light, compact, powerful SILVERCEL® Batteries? Write for complete data today.

NEW BF SERIES BATTERY HOLDER

No. 300 • No. 400 • No. 500 SERIES

BF Series Transistor Battery Holder accommodates batteries and cells with diameters up to 1⅜" and lengths from 1 19/64" to 7 3/16" making it possible to use different battery combinations to obtain a wide selection of DC voltages. Batteries can be exchanged simply by unscrewing the holder cap. Designed for mounting up to a 1⅝" diameter hole and ⅜" thick panel.

Inquiries for special battery holder lengths and diameters are invited.

AIR-MARINE MOTORS, INC.

air · marine motors, inc.

Designers and manufacturers of sub-fractional h.p. motors, blowers and fans . . .

. . . application engineered and proven by environmental laboratory testing, to customer or MIL specifications.

Air-Marine manufactures electric motors for the following general performance ranges:

- **HORSEPOWER** . . . . . 1/500th to 1/2 h.p.
- **SPEEDS** . . . . . 3600 rpm max. at 60 cps
  24,000 rpm max. at 400 cps
  Dual and Variable Speed Units
- **FREQUENCY** . . . . . Fixed . . . 50, 60 or 400 cps
  Variable . . . 50 to 450 cps, and 320 to 1,000 cps
  Special . . . as required
- **VOLTAGE** . . . . . Standard 115V and 230V
  Special . . . as required
- **PHASE** . . . . . 1, 2 or 3 phase
- **SIZE** . . . . . 1" O.D. to 4 3/4" O.D.
- **BLOWER CAPACITY** . . . . . To 1,000 CFM air delivery for blowers and fans depending on Static Pressure encountered.

TYPES OF SUB-FRACTIONAL MOTORS MANUFACTURED:

Induction, Hysteresis Synchronous, Reluctance, Synchronous, Servo, Gear, and High Slip Induction.

BLOWER AND FAN TYPES OFFERED

Centrifugal and Vane Axial Blowers, Blower Housings, Axial Flow Fans.

SERVICES OFFERED

Complete design and development
Air delivery measurement
Environmental testing.

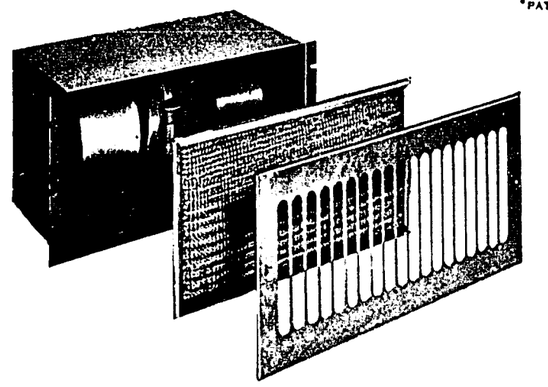
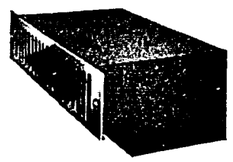
*PATENTED



STANDARD RACK MOUNTED FANS & BLOWERS

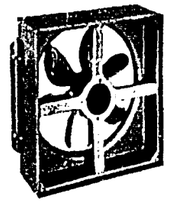
Over 15 models available in panel heights of 3½" to 12¼" in increments of 1¾". Range, 80 to 1200 cfm. All units feature quiet operation, no electrical noise and maximum air delivery. Blower units provide better air delivery against pressure and higher velocity for faster cooling. Highly reliable, rubber mounted, 115 volts, 60 cycle motors. Also Mil. Spec. and DC motors available. Permanent filters. Smart, heavy gauge, stainless steel grilles.

RECESSED MODELS



Provide higher performance with minimum panel height. Filter and blower are recessed into the unused portion of the open base commercial type rack. Fit 3½", 5¼", 7", 8¾" and 10½" panel heights and deliver 150 cfm to 1200 cfm. Highly reliable, rubber mounted, 115 volts, 60 cycle motors. Mil. Spec. and DC motors available. Permanent filters.

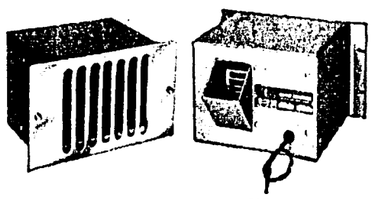
REVERSIBLE FAN



Easy-to-install Filter Box Propeller Fan gives wide choice of cfm's and great mounting flexibility. Operates as blow or suck—without rework. Compact, low-cost. Long, service-free life. Operates from various power sources.

HALF PANEL WIDTHS

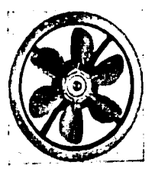
For narrow racks or where space is a problem. Fit half the width of standard 19" racks leaving balance of space for other components. Blower model (5¼" high) delivers 100 cfm. Fan model (7" high) delivers 225 cfm. Powered by highly reliable, rubber mounted, 115 volts, 60 cycle motors. Mil. Spec. and DC motors available. Permanent type filter.



HALF PANEL WIDTH FILTER-GRILLE ASSEMBLIES ALSO AVAILABLE

MIL. SPEC. BLOWERS

Meet most rigid specifications. Mount in any position. Deliver 10 cfm. Fit 3¼" cube. Continuous duty, totally enclosed motor, 1/300 hp. 115 volts, 60 cycle, 3400 rpm.



RING TYPE FANS

175 to 395 cfm. Fan diameters 6½" and 8". Motors totally enclosed, highly reliable, 115 volts, 60 cycle, 3000 rpm. Mil. Spec. and DC motors available. Other sizes available.

FREE! Engineering Booklet on Forced Air Cooling. Describes air convection methods. Includes design data, tables, charts, etc.

FREE! 36 page catalog loaded with helpful data. Shows complete line of fans, blowers.

IMMEDIATE DELIVERY!

Motor Blower Assemblies!

Compact, rugged construction. In stock from 4 to 150 CFM. Designed for applications where space and weight are prime factors. Blowers available without motors.

Write for literature.

Ripley's wide-range line of small motor-blowers offers a selection with a variety of models . . . one ideally suited for your specific job. Designed to meet your most exacting requirements and stocked for immediate delivery!

Why not let our engineers advise you?

Complete facilities for fabricating blower wheels, blowers, motor-blower assemblies for all industries. Estimates submitted promptly on receipt of blueprints or specifications.

Write for complete information today.

HI VOLTAGE LOW INDUCTANCE CAPACITORS

Designed as high temperature gas discharge sources for Thermonuclear and similar type power research. Suitable for high peak energy within a short time constant and for blocking, bi pass service, power supply filters and similar applications.

FEATURES

- Voltage Ratings up to 150KV.
- High energy content up to 4000 joules.
- Ringing frequency as high as 1.25 mcs.
- Hermetically sealed. Low cost per joule.

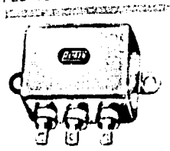
COMMERCIAL —

TYPE TES (ACTUAL SIZE)

TYPE RLR

TYPE XPR

TYPES AQ-TQ — CP04 THRU CP11



TYPE MDL

TYPES EX-EZ

SOLID TANTALUM

Subminiature, (⅛" x ¼") hermetically sealed metal case . . .
Temperature range —80° to +85° C
Maximum capacity variation averages less than ±5%
Indefinite shelf life, meets environmental requirements MIL-C-3965

METALLIZED MYLAR*

Type RQL in a hermetically sealed case is designed to meet electrical and environmental requirements of MIL-C-18312 (U.S.N.)
Type RLR is an uncased unit . . . tough protective mylar* wrap and epoxy end seal
Both have a temperature range of —55° C to +125° C without derating

MYLAR* DIELECTRIC

Round (XPR) and flat (XPF) miniature capacitors
Temperature range of —55° to +125° C
Units employ an outer mylar* polyester tape wrap and ends sealed with a plastic thermosetting resin to afford excellent protection against moisture.

MIL-C-25A PAPER — CP04 through CP70

Temperature range to +125° C . . . Hermetically sealed miniature tubulars and bathtub cans with ratings up to and including 1000 volts . . . Variety of types and mounting styles available.

METALLIZED PAPER

With self healing characteristics
Miniature glass-to-metal sealed tubulars
Metal cased and uncased units
Conform to MIL tests for moisture resistance, thermocycle immersion and vibration . . .
To +125° C operation.

SAFETY MARGIN ELECTROLYTIC**

Astron Electrolytics with high purity foil, special stable electrolytes and precision assembly provide long life, exceptionally low leakage and resistance to corrosive elements. Designed for use in transistorized and printed circuits in all military, industrial and commercial applications.

RF NOISE SUPPRESSION FILTERS

A standard line of typical filters covering a wide range of electrical and mechanical requirements or custom engineered and produced filters specifically for your equipment.
SOLVING YOUR FILTER REQUIREMENTS FROM THE PROBLEM TO THE PRODUCT.

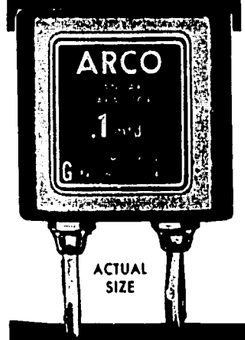
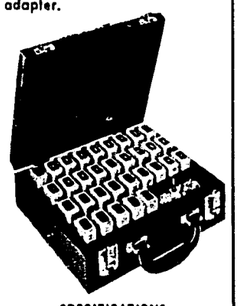
now...
A PRECISION LABORATORY
STANDARD CAPACITOR KIT
FOR ALL PHASES OF PRODUCTION TESTING . . . YET LOW IN COST!



ACTUAL SIZE

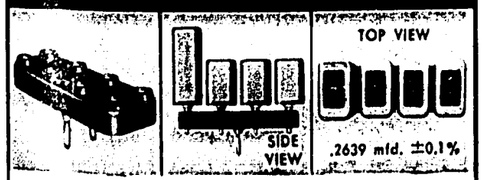
Complete set of 32 precision standards ranging from .0001 to .5 mfd. Includes handsome durable carrying case (11⅜w x 9⅜h x 3⅝d) plus a 4-position adapter.



SPECIFICATIONS:
INSULATION RESISTANCE
5000 megohm - microfarads or 50,000 megohms, whichever is the lesser.
TEMPERATURE COEFFICIENT
.0001 to .1 mfd.
+40 ±15 ppm/°C.
0.2 to 0.5 mfd.
−130 ±10 ppm/°C.
MAXIMUM VOLTAGE
.0001 to 0.04 mfd.
500 volts peak.
.05 to 0.5 mfd.
300 volts peak.
DISSIPATION FACTOR
.0001 to .0004 mfd. — 0.15%
.0005 to .001 mfd. — 0.1%
.002 to 0.5 mfd. — 0.05%

ARCO STANDARD CAPACITORS MAY BE PURCHASED IN INDIVIDUAL UNIT VALUES OF ANY QUANTITY.
Write For Bulletin SS-2
For Complete Information

±0.1% TOLERANCE MINIATURIZED
OVER 50 SMALLER AND LIGHTER THAN OTHER STANDARDS OF COMPARABLE ACCURACY



By quick and easy insertion of ARCO standard capacitors into the adapter jig, a capacitance value of four significant figures with an accuracy of ±0.1% is obtained.

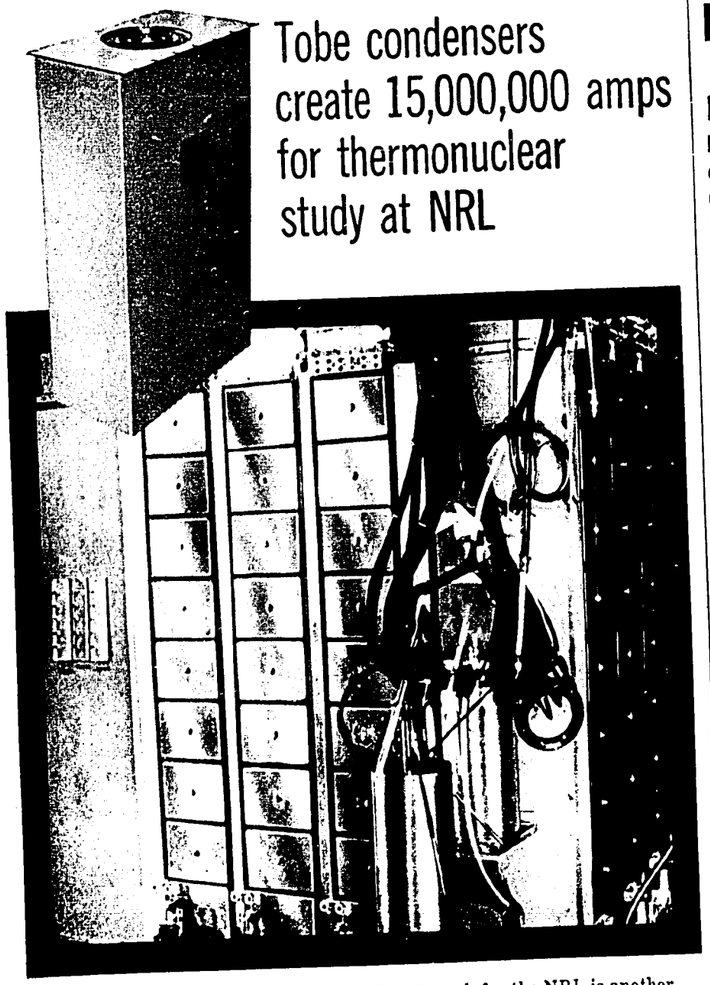
LOOK TO TOBE FOR PROGRESS



Tobe condensers create 15,000,000 amps for thermonuclear study at NRL

This Tobe condenser bank has a short-circuit current of 15 million amperes and a rise time of 2.8 microseconds. It is adding momentum to experiments by A. C. Kolb on high-velocity shock waves in thermonuclear devices at the U. S. Naval Research Laboratories.

The 99 Tobe condensers shown—totaling 1,430 uf—store 285,000 joules at 20 kv, and create discharge currents of 7-10 million amperes into an external inductance of about 0.01 uh.

Tobe's work for the NRL is another page in the rapidly expanding catalog of thermonuclear devices for which Tobe has supplied condensers. The same *creative engineering in action* is yours to command whether for energy-storage condensers, pulse-forming networks, or any high-power condenser application.

For technical information or engineering aid, write today to Tobe Deutschmann Corporation, Norwood, Massachusetts.

GLASS CAPACITORS by CORNING

Fixed Glass Capacitors

Rugged, reliable, extreme miniaturization

Only complete mechanical destruction will alter their values. Temperature coefficient is plus 140 ± 25 ppm/°C. from −55°C. to +85°C. Absolute retrace. TC variation is less than 15 ppm between units. Capacitance drift is negligible.

Medium-Power Transmitting Capacitors

Small, light, strong

Ideal for mobile RF transmitters. Most ratings take less space than mica types. Heavy metal lugs provide minimum contact resistance plus heat dissipation for higher power handling ability.

High-Capacitance Canned Capacitors

Custom-built, compact, potted units for special requirements.

Subminiature Capacitors

Up to 90% volume reductions possible when wire leads are not required. Made to your specifications.

Trimmer Capacitors

Direct-traverse: for applications of great ruggedness plus thermal stability and smooth tuning characteristics. Practically zero TC in VHF range. Negligible capacity shift with widely variable ambient temperatures. Invar core. Four standard ratings: 0.5 to 3.0 mmfd; 1.0 to 7.5 mmfd; 1.0 to 8.0 mmfd; 1.0 to 12.0 mmfd.

Midget-rotary: for superior performance and economy. Three capacity ranges at 50 mc. Four terminations. Also custom design.

For more complete information and prices, just write to us. Corning Glass Works, 550 High Street, Bradford, Pa.

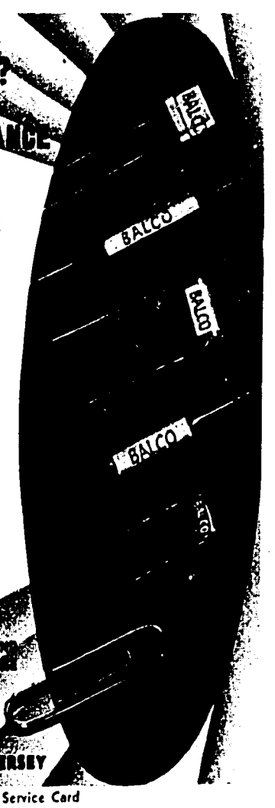
Need Good Performance -70° to 250° C.?

HI-TEMPERATURE HI-PERFORMANCE MICRO MINIATURE CAPACITORS

For Military and Commercial Applications

TYPES: TEFLON, MYLAR, POLYSTYRENE, OTHERS — FOIL and METALLIZED TYPES

CHARACTERISTICS:
- HI PERFORMANCE OVER WIDE TEMPERATURE RANGES
- HI INSULATION RESISTANCE OVER 10^{14} OHMS
- HI STABILITY UNDER REPEATED TEMP. CYCLING LESS THAN .001
- LOW DISSIPATION FACTOR LESS THAN .0005
- LOW ABSORPTION LESS THAN .0005
- LOW TEMPERATURE COEFFICIENT LESS THAN 50 PPM/°C.
- WITHSTANDS SEVERE MIL ENVIRONMENTAL CONDITIONS
- STAINLESS STEEL CASES



BALCO CAPACITORS

Packs A Lot Of Capacity

Into A Little Space

NEW GE KSR* TANTALYTIC® CAPACITORS

For Example: 3500 MFD at 15 volts.

Size 1.31" x .75" x 2.5" high.

The new designs provide up to 40% reduction in weight, and 30% reduction in required space, when compared to other foil tantalum units. They also cost less per volt-microfarad.

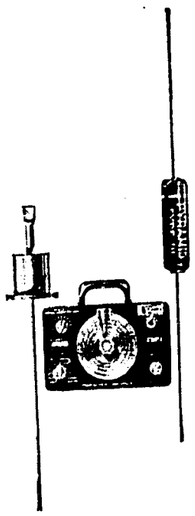
SPECIFY PYRAMID



for every application of modern electronic circuitry! New and available from Pyramid: Capacitors—New type TAK Tantalum, New Mylar® dielectric types 101, 103, 106, 107, 109, 111 featuring the "Gold Standard," a line of ±10% tolerance capacitors made specifically for the replacement market. New high reliability types TQ and CQM for telephone and computer applications. New silicon rectifiers exclusively for radio and TV replacement market, sold only thru Radio-Electronics Parts Distributors. Model RC-1, New Resistance-Capacity-Ratio Bridge Tester, with special 3 volt amplifier for checking electrolytics used in miniaturized equipment. Pyramid continues to supply a line of dry electrolytics and paper dielectric capacitors in standard and miniature types for today's most critical requirements. All are made to exact standards which meet or exceed rigid requirements of military specifications MIL-C-25, MIL-C-62 and MIL-C-3965. For information or engineering data pertaining to your specific applications, write to: Research and Development Division, Pyramid Electric Company, Darlington, S. C. or Sales Office: Union City, N. J. EXPORT: 458 Broadway, N.Y.13, N.Y. CANADA: Wm. Cohen, Ltd., 7000 Park Ave., Montreal. Capacitors—Rectifiers—for original equipment . . . for military applications . . . for replacement.

5-WAY RELIABILITY IN YOUR CIRCUIT DESIGN WITH Vitramon® CAPACITORS

The latest additions to the growing line of "Vitramon" Capacitors feature smaller mounting area, lower inductance, and more versatility of application — *plus* all the phenomenal electrical characteristics for which "Vitramon" Capacitors are noted — fine silver electrodes fused to pure porcelain enamel, perfectly bonded to provide *stability, wide temperature range, humidity immunity, low loss, low noise.*

RADIAL SERIES

- Thin design — 5/64" to 7/64"
- Versatile mounting — can be used axially, radially, or on edge
- Ideal for minute circuit assemblies
- 0.5 to 1200 mmf; 500 to 50 vdc

PARALLEL SERIES

- Tiny mounting area — 11/64" x 9/32"
- Designed for automatic insertion
- Packed for cartridge feeding
- Capacitance through 1000 mmf. at 100 vdc

CO-AXIAL SERIES

- Compatible with MIL-C-10950B
- Very low inductance
- Flexible leads
- Maximum height from mounting surface 1/4"
- To 1000 mmf at 300 vdc

AXIAL SERIES

- Extremely rugged
- 4 case sizes from 3/8" to 29/32"
- 0.5 to 6800 mmf; 500 to 300 vdc

AXIAL-RADIAL SERIES

- Mounted axially or radially
- 4 case sizes from 3/8" to 27/32"
- 0.5 to 5600 mmf; 500 to 300 vdc

VARIABLE TRIMMER PISTON CAPACITORS

for subminiaturazation of printed and conventional circuitry

Are obsolescent oversized capacitors cramping your style? Let JFD Precision Trimmers help you save time and space . . . upgrade performance reliability in critical network design.

Miniature and subminiature JFD Piston Capacitors give you maximum tuning range in absolute minimum physical size . . . precise tuning resolution and stability . . . ultra low loss operation . . . rugged shock, vibration and corrosion resistance . . . approximately zero temperature coefficient. These are some of the reasons why they are specified in almost all of today's critical systems.

If you're looking for new design freedom, new performance highs under severe environmental conditions, why not investigate the many advantages of JFD Trimmers? If your requirements can't be met from our current models, we'll be glad to produce according to your specifications. Write for the new JFD Piston Capacitor File Folder for detailed electrical and mechanical data.

JFD Electronics

PRECISION
ELECTRONIC COMPONENTS
for Space-Challenging Demands!

SEALCAPS

New JFD air-tight, water-tight Miniature Quartz Sealcaps seal out moisture, seal in reliability and accuracy, regardless of atmosphere. Combine characteristics of new Sealcap construction and miniature quartz capacitor design. Eliminates corona and voltage breakdown at high altitude. Sealcap design prevents formation of moisture inside unit. Quartz design provides high Q, ultra-low loss high frequency operation, greater stability and approximately zero temperature coefficient. Available unpotted or encapsulated for higher dielectric strength. For complete data write for Bulletin No. 215A. Also available in glass dielectric (bulletin 207B)

LC TUNERS

Combine variable inductor and capacitor in one compact unit. Affords more circuit in less space, better reliability, greater economy, faster assembly, smaller size and weight. Use of glass or quartz dielectric assures a low temperature coefficient. Flexibility in design to suit circuit requirements. The number of turns, types of windings, size and type of capacitor plates, Q and other parameters can be designed to suit individual circuit requirements.

Write for Bulletin No. 216 listing standard and panel circuit mounting types now available.

DELAY LINES

Designed for applications calling for short delay intervals, the new lines offer a high ratio of delay to pulse rise time, in minimum space. Available for printed circuit assembly or for conventional mounting, JFD distributed-constant Delay Lines meet all military requirements. They can also be modified or custom-designed to meet your most rigid specifications. JFD lumped constant Delay Lines can also be designed to suit your requirements.

Characteristics: Precise pulse fidelity; operating temperature range of —55° C to +125° C; excellent temperature stability; rugged encapsulated construction resists environmental moisture, humidity, shock and vibration; linear phase shift; 0.1 inch grid spacing for printed board types; attenuation of approximately 1 db per μ sec.

Write for Bulletin 213A providing complete electrical and mechanical data. Also—lumped constant Delay Lines to your specifications.

These are a few examples of JFD creative engineering to solve today's problems and tomorrow's applications. For information or engineering assistance on specific tuning or pulse circuitry needs, call or write today.

NEW CATALOG SUMMARY

presenting . . . Jennings Vacuum Components, inherently qualified by their unique use of a vacuum dielectric, to help you solve many difficult design problems of high voltage in limited spaces.

A few minutes inspection of the wide range of vacuum components in this new product bulletin will reveal many design possibilities that ordinary electronic components cannot achieve. The bulletin contains valuable data and specifications on the latest types of Jennings Fixed and Variable Capacitors, Power Switches, Coaxial Relays, Triggered Spark Gaps, Transfer Relays and High Voltage Measuring Equipment.

The following examples illustrate some of the unusual capabilities of Jennings vacuum components:

R6G Vacuum Switch with Model E Switch mount

Recommended max. load voltages for max. operating recovery voltage @ 50 amps-rms	27 kv
Thermal current (for 30° C rise)	250 amps rms
Max. interrupting current (10 times)	1500 amps rms @ 9 kv
Withstand voltage (60 cycle 1 min. dry)	36 kv rms

RB3 Vacuum Transfer Relay

Overall length	3 in.
Rated operating voltage (60 cyc)	20 kv
Test voltage between terminals	21 kv
Continuous current	28 amps rms

Type USLS Vacuum Variable Capacitor

Capacity range	5-465 mmfd
Overall length	5⅝"
Peak voltage (max. capacity)	5 kv
Peak voltage (min. capacity)	10 kv
Continuous current	40 amps rms

Send for your Jennings' catalog today. There will be no sales follow-up unless you outline a specific application.

COIL WINDERS, INC.

"TODAY'S COMPONENTS for TOMORROW'S ELECTRONIC PROGRESS!"

TOROIDAL INDUCTORS

Subminiature to maximum sizes — open construction, hermetically sealed or custom-design epoxy molded — readily available.

POWER TRANSFORMERS

To meet specific and exacting requirements — from subminiature to 5 K.V.A. output — up to 200° C. temp., 50 K.C freq. in accordance with MIL-T-27A, Grades 4 and 5.

FILTERS

Low pass, high pass, band pass and band eliminator — custom engineered to exacting requirements and specifications.

POWER SUPPLIES

Custom engineered A.C., D.C., high voltage . . . with tolerances to ½% — regulated transistorized with tolerances is low as 0.1%.

MAGNETIC AMPLIFIERS

And saturable reactors for two-phase servo motors and electronic controls from microwatts to 3 K.V.A.

NOW--48-56 Gauge Wire Coils built to YOUR specifications

Whatever your application—from hearing aids to missile systems—Deluxe Coils' new fine wire plant can supply the miniature coils you need . . . built to your specifications for precision and accuracy.

Deluxe Coils' engineers work with you to make each coil fit the exact size and performance requirements of your design. In the newest of air and sound conditioned facilities these coils are then produced in quantities and speeds that will meet even mass production schedules.

ENCAPSULATED

in Epoxy resin, Deluxe ultra-fine wire miniature coils are easily inserted in otherwise difficult assemblies. Simplify change or replacement.

All types of miniature fine wire coils, 40-47 gauge, ultra fine wire coils, 48-56 gauge, and components can be produced.

A few current applications include:

- *Electric Watches*
- *Hearing Aids*
- *Hi-fidelity Cartridges*
- *Guided Missiles*
- *Servo-Mechanisms*
- *Miniature and Micro-Miniature Relays*

Write for information on Deluxe Coils' fine wire production capabilities—and how they can be put to work for you, right away.

TRAVELING WAVE TUBE SOLENOIDS*

Anodized aluminum for lightest weight. Choice of foil or wire, aluminum or copper, air or liquid cooled for optimum design.

Close liaison with tube manufacturers and system designers results in best possible designs in minimum developmental time.

CURRENT REGULATED POWER SUPPLIES*

Laboratory, military and commercial, models from 500 watts to 10 kilowatts with five to one current adjustment with one small potentiometer.

ELECTROMAGNETS, SPECIAL FOCUS COILS, and HIGH ENERGY MAGNET COILS*

We are equipped to design and build sources of magnetic energy for any application.

IF and RF CHOKES, COILS AND TRANSFORMERS*

Designed and built to your requirements by our Western Coil Products Division. One of our 100 stock designs may meet your requirements.

* All products are designed and built to customer requirements in accordance with applicable military or customer specifications.

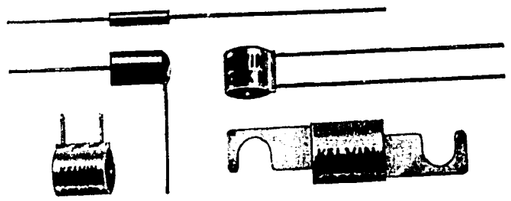
KELVIN

Precision Electrical Components

RESISTORS



WIRE WOUND precision, encapsulated

Newly developed Kelvin winding techniques produce tension-free ("RELAXED") resistor windings, practically eliminating resistance drift with age and "shorts" or "opens" due to thermal shock.

Specifications: Shock, moisture and temperature proof; exceeds military specifications.

Size Range: from micro-miniature, .080 dia. x .375 length to 1.0 dia. x 2.125 length.

Wattage, Resistance and Voltage Range: from .05 watt, 100K max. resistance, 100 volts max.,to 2.5 watts, 25.0 Meg max. resistance, 1200 volts max.

Temperature Range: —65°C to +125°C.

Standard resistance tolerances are 1%, 0.5%, 0.25% and 0.1%. Special tolerances upon request.

Temperature coefficient: ±.002% per degree C within operating temperature ranges.

Microscopic techniques are used for precision welding of all terminations.

WIRE WOUND power, precision

Available from 20 watts, ⅝" dia. x 2" length to 200 watts, 1¼" dia. x 10½" length.

Specifications:

Maximum Resistance Ranges: up to 15K

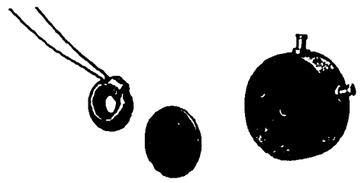
Tolerances: up to .01%

Temperature Coefficient: ±.002%/°C, closer upon request.

Temperature Range: —55°C to +100°C.

Coating: Silicone varnish

TOROIDS



INDUCTORS

Uncased: impregnated with a special plastic compound for high Q factors and maximum temperature stability. Coils are coated with an inert wax having a melting point of approximately 125°C. to provide moisture resistance and mechanical protection. Insulated flexible lead wires with Hi-temp insulation are provided.

Cased: hermetically sealed in conformance with MIL-T-27A specifications. A variety of standard sizes and shapes are available. Special case configurations available to customer's specifications.

Encapsulated: easily mounted or stacked on a single screw through the center holes. The sturdy turret lugs may be used as tie points to mount other components. Will withstand temperatures of —55°C to +125°C under conditions of high humidity and severe mechanical shock.

Specifications: Kelvin now offers higher Q factors and inductances at lower frequencies in miniature coils than heretofore available due to the application of advanced winding techniques. Excellent stability vs. temperature and current, and self-shielding effects are also main features of Kelvin toroids wound on molybdenum permalloy dust cores.

Size Range: Encapsulated; ¾" O.D. x ⅜" height, to 2⅜" O.D. x 1⅛" height. Uncased; ⅝" O.D. x 1/32" height, to 2¼" O.D. x 1" height.

Inductance Range: from .00002 HY. to 200 HY.

Temperature Coefficient: 100 PPM/degree F.

Tolerance: within 1% of nominal inductance values. Stabilized coils available upon request. These units will remain within 0.1% tolerance from +30°F to +130°F.

TRANSFORMERS power, miniature

400 cycle, in the power range under 15 V. A.

Specifications:

Frequency Range: 375 cps to 525 cps.

Ambient Temperature (for full rating): —55°C to +90°C.

Encapsulation: Epoxy; moisture, temperature, shock-proof.

Windings: Toroidal, no external fields.

Specials up to 100 V. A., 400 cycle.

RATIO precision

For precise voltage division or multiplication over wide range of load fluctuations, frequency and ambient temperature... with low insertion loss.

Specifications:

Ratio: Two secondary windings, choice of any ratio from 1:1 to 1000:1 on both windings; choice of 115, 28, 12 or 6.3 volt primary windings.

Tolerance: 0.1% standard; accuracies to .005% available.

Case: Hermetically sealed.

MAGNETIC AMPLIFIERS

Toroidal construction, maintenance free, rugged and highly reliable. Designed to fulfill the most exacting requirements. When inquiring, specify power supply frequency, voltage, output, input and output impedance, signal power for full output, response time, temperature requirements, maximum case size and weight.

POWER TRANSFORMERS AND FILTER CHOKES

Available in all standard case sizes and hermetically sealed in conformance with MIL-T-27A.

FILTERS

WAVE precision, electric

Cases hermetically sealed to MIL-T-27A. Low-pass, band-pass, high-pass and band supression types available in the audio and low RF ranges.

TELEMETERING Sub-miniature

Available in standard RDB frequencies.

Encapsulated Inductances

Millen DESIGNED for APPLICATION encapsulated coils provide another advance in the r-f inductor field. Modern application requires miniature, heat and cold resistant, hermetically sealed, and abrasion-resistant r-f inductor assemblies. The James Millen Manufacturing Company has pioneered many advances in the r-f inductor field, including the now-standard 4 pi r-f choke, the axial lead r-f choke, and the miniature r-f choke. Developments have now made possible another advance, the No. 3430I and No. J301 encapsulated inductors—hermetically sealed miniature size. Ambient temperature minus 55 degrees to plus 100 degrees C.

NO. J301 MINIATURE ENCAPSULATED INDUCTANCES

DESIGNED for APPLICATION miniature inductances are: extremely small (see table at right) hermetically sealed wound on axial lead Carbonyl cores color coded. Coils are available in RETMA standard values plus 25, 50, 150, 250, 350, 500, and 2500 microhenries. Coils are three layer solenoids up to 350 microhenries. From 360 to 2500 microhenries coils are pi-wound. Current rating 50 to 600 milliamperes depending on coil size. Inductance ± 5%. Special coils on order.

NO. 3430I STANDARD ENCAPSULATED INDUCTANCES

Encapsulated DESIGNED for APPLICATION axial lead phenolic form r-f inductances. Hermetically sealed heat resistant abrasion proof color coded. 1 to 350 microhenries available in RETMA standard values plus 25, 50, 150, 250, and 350 microhenries. Inductance ± 5%. Values available in same progression as J301 coil listed in the table at the right. Solenoid winding for 1 to 15 microhenries. Universal pi winding from 20 microhenries to 350 microhenries. Current rating 250 to 1500 milliamperes, depending on coil size. Ambient temperature range minus 55 degrees to plus 100 degrees Centigrade. Size: ¼ inches diameter × ⅞ inches long. Special coils on order.

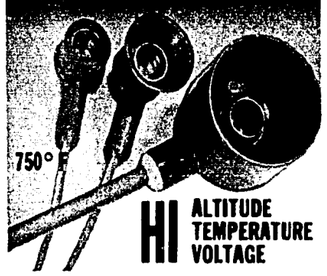
SILICONE

TUBE CAP CONNECTORS



HI ALTITUDE TEMPERATURE VOLTAGE

This is a new series of Tube Cap Connectors using special silicone components for high reliability applications. They provide the highest degree of resistance to temperature extremes and are virtually unaffected by ozone and corona. The excellent dielectric characteristics make them ideal for high voltage. Skirts and sealed-in leads guard against flashover at high altitudes. Additional features include anti-corona cup and long-life spring contacts.

Clip this out—keep handy for part numbers and specs on connectors below for either ¼" or ⅜" top caps. Prefix 90 for ¼"; 91 for ⅜". Lead wire 18" long from center of cap or length to your specs.

#90 or 91SCCSL beryllium copper contact, cadmium plated nests in anti-corona cup. Silicone rubber insulation throughout.

#90 or 91SCCRSL beryllium copper contact, cadmium plated nests in anti-corona cup. Silicone rubber insulation throughout. Takes up to one watt resistor — specify value and tolerance.

#90 or 91SCCDSL beryllium copper contact, cadmium plated nests in anti-corona cup. Skirt clings to tube — guards against flash-over Silicone rubber insulation throughout.

#90 or 91SCCDRSL beryllium copper contact, cadmium plated enclosed in anti-corona cup. Skirt clings to tube — helps suppress corona—guards against arc-over. Takes up to one watt resistor. Specify value and tolerance.

#90 or 91CCSTLRL beryllium copper contact, cadmium plated nests in anti-corona cup. Glass-filled silicone insulation on cap; silicone rubber on lead. Long skirt for arc-over. Takes up to 2 watt resistor. Specify value and tolerance.

Besides new silicone types — Alden provides a complete series of connectors for ¼", ⅜" and ½" cap in your choice of phenolic, mica, polyethylene, nylon and Kel-F. Complete hi-voltage cable assemblies are available using Alden hi-voltage disconnects and tube cap connectors.

TELL US ABOUT YOUR CONNECTING PROBLEM. FOR PROMPT RECOMMENDATIONS — WRITE OR PHONE JACK POLLARD NOW.

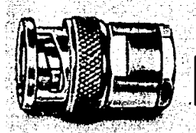
OTHER FITTINGS AVAILABLE. WRITE FOR FREE CATALOG.

Today's requirements call for miniaturization,

but...



HOW SMALL IS MINIATURE?

Automatic MAKES THEM ALL!

Unit engineered to fit all available sub-miniature cables, AUTOMATIC'S Sub-Miniature Connectors are available in three types; BAYONET, PUSH-ON AND THREADED COUPLING.

Special receptacles available for printed circuit applications.

CHECK THESE FEATURES:

No special tools required for assembly. Foolproof clamping insures accurate alignment . . . positive contact . . . extra strong grip. Exclusive internal-parts design allows outside dimensions of connectors to remain constant regardless of cable dimensions.

For BAYONET, PUSH-ON and THREADED SUB-MINIATURE and MICRO-MINIATURE COAXIAL CABLE CONNECTORS, always specify AUTOMATIC. Our engineers are always ready to discuss your special requirements.

Write, wire or phone for free technical information.

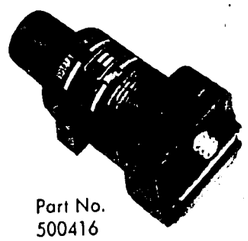
Long Life FLIGHT APPROVED
COMMUTATORS AND INERTIAL VELOCITY METERS

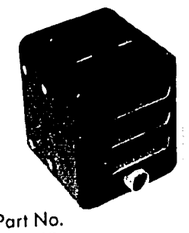


Part No. 500416

PAM or FM/FM Commutator
3 Pole 30x10 — AC or DC Motor

This unit continued operating from pre-flight through recovery in the nose cone of a Jupiter missile.

Part No. 500416 (DC Motor)
500417 (AC Motor)
MIL-E-5272A, MIL-I-6181B, IRIG

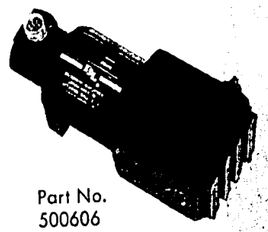


Part No. 500263

PDM Miniature Commutator
3 11/64" x 3 13/32" x 3¼"
for 3 (45x20) Poles with pulser

Motor is completely contained within the commutator rings and reduces volume to provide an ideal unit for missile and other airborne applications..

MIL-E-5272A, MIL-I-6181B, IRIG (MOD.)



Part No. 500606

Combination FM/FM Commutator
2 Poles 30x5 plus 2 poles 60x5

A flexible PAM commutator with 28V DC motor and all switch contacts available at connectors for interwiring per flight requirements. Useful for systems checkout due to long life capabilities.

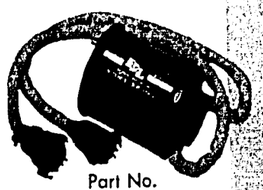
Missile and aircraft environments.

Part No. 500421
(includes temperature control equipment)

Inertial Velocity Meter
1½" dia. x 3½" — weight 15 oz.

This unit reacts to acceleration forces and yields an output signal which is the time integral of that acceleration to an accuracy of 50 feet at 100 miles.

MIL-E-5400



Part No. 500206

Analog to Digital Converter
(Gray, Binary Coded Decimal)

These converters, with a multi-turn input, provide bi-directional read-out of 20,000 bits per minute for 500 hours or more. Standard models have 1000, 3600 and 216,000 bits capacity.

MIL-E-5272B

Write for Technical Bulletins on these units by part number or send your specifications.

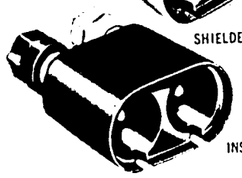
DUB-L-PLUG
DUAL ELECTRICAL CONNECTORS



SHIELDED/INSULATED TYPE

INSULATED TYPE

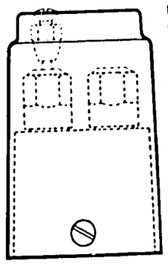
SHIELDED/INSULATED AND INSULATED TYPES AVAILABLE

ALL CONDUCTING METAL PARTS GOLD-PLATED

NYLON BODIES ON INSULATED TYPES AVAILABLE IN 6 COLORS

DUB-L-PLUG Dual Electrical Connectors are valuable accessories for making quick connections to SUPERIOR 5-WAY and similar binding posts mounted on ¾" centers. Completely recessed integral banana plugs prevent accidental shorting. Captive black and white thumbnuts permit ready circuit and polarity identification. Wiring connections to insulated DUB-L-PLUGS can be made by center hole clamping, spade lug, clip-lead, banana plug or looping and clamping.

SHIELDED/INSULATED DUB-L-PLUG



Used where protection from stray fields is desired as in high impedance testing. Supplied with sturdy die-cast chrome-plated case that can be removed if only insulated plug is needed. Has grounding banana plug that can be removed when used with 2-wire ungrounded circuits. Nylon body supplied in black only.

INSULATED DUB-L-PLUG

Ideal for making rapid connections in power circuits and electronic and electrical applications where shielding is not required. All metal parts are recessed for maximum safety of user and equipment. Design permits stacking of several DUB-L-PLUGS if desired. Nylon bodies supplied in red, white, blue, yellow, green or black.

PRINTED CIRCUIT SERIES

MICRO MINIATURE SERIES

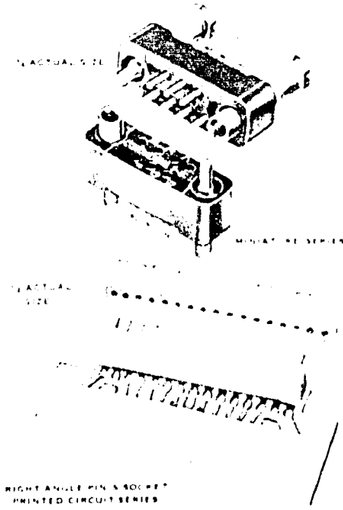
HOW TO MAKE THE RIGHT CONNECTIONS WITH...

Continental Connectors

All types of military and commercial wiring snap into place smoothly, securely, reliably...when you use Continental Connectors. Whether for missiles, telemetering equipment or computers, Continental Connector now has or can custom-make the mechanically and electrically correct precision connector you need for space-saving, vibration-proof performance.

Take printed circuit boards, for example. Continental Connector's new, patented* "Bellows-Action" printed-circuit contact connectors hold 1/16", 3/32" or 1/8" boards in a vise-like grip to form a positive connection between conventional wiring and printed circuitry. Available with up to 116 contacts set in various rugged plastic moldings, these low-resistance connectors are offered in several wiring styles including eyelet lugs for soldering, solderless wire-wrap lugs, taper tab solderless wiring and contacts for dip soldering.

The same engineering ingenuity that Continental Connector incorporates in printed circuit connectors is available to you in numerous micro-miniature, miniature, right-angle, power and hermetically sealed types, many with polarizing screwlocks, hoods and protective shells.



RIGHT ANGLE PIN & SOCKET PRINTED CIRCUIT SERIES

Start making the right connections today. Write for free technical literature to Electronics Sales Division, DeJUR-AMSCO Corporation, 45-01 Northern Boulevard, Long Island City 1, N. Y. (Exclusive Sales Agents)

You're always sure with **DeJUR**

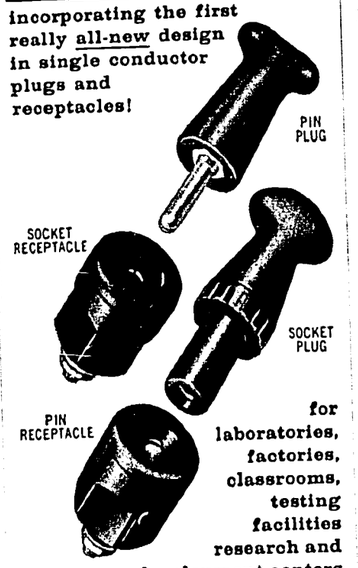
Supercon
ELECTRICAL CONNECTORS

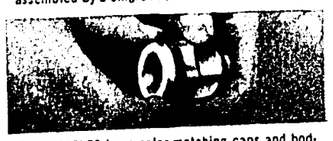
incorporating the first really all-new design in single conductor plugs and receptacles!



for laboratories, factories, classrooms, testing facilities research and development centers

50 AND 100 AMPERE CAPACITIES
GOLD-PLATED BRASS PARTS
CORROSION-RESISTANT NYLON PARTS IN RED, WHITE, BLUE, YELLOW, GREEN, BLACK
NEW, POSITIVE-GRIP PLUG DESIGN
SOLDERED OR SOLDERLESS CONNECTIONS
FAST . . . EASY ASSEMBLY

PLUGS have two fastening screws to permit solderless cable connections if desired. Socket plug grips and shields are of a simple threaded construction for quick assembly . . . pin plugs are assembled by a single nut after cable connection.



RECEPTACLES have color-matching caps and bodies to permit more rapid circuit identification on both front and back of panel.

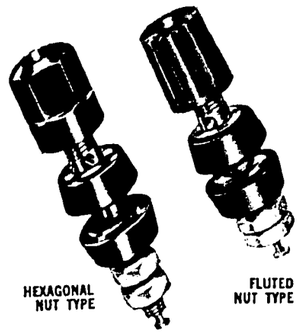
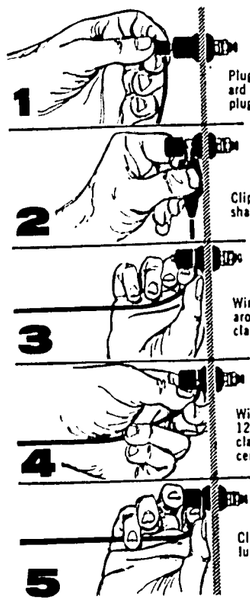
5-way

BINDING POSTS



- GOLD-PLATED
- 6 COLORS
- CONNECT 5 WAYS:



Current capacity of 30 amperes, working voltage of 1000 volts. All current-carrying metal parts are gold-plated for long life, resistance to corrosion, stable electrical contact and faster soldering. Offered with either hexagonal or fluted type thumbnut. Available in red, white, blue, yellow, black or green durable nylon for more attractive panels and easier circuit identification. Can be mounted and securely locked in any panel from 1/6" to 1/4" thick. Adapter spacers are available for thinner panels. Complete insulation from the panel is provided. Write for bulletin on SUPERIOR 5-WAY Binding Posts.

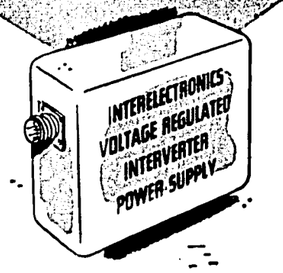
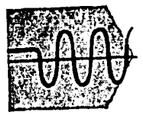
NEW!

DC to DC and DC to AC solid-state power converters voltage regulated, frequency controlled, for missiles, telemetering, gyros, servos





Interelectronics Interverter solid-state thyratron-like elements and magnetic components convert DC to any number of voltage regulated or controlled frequency AC or filtered DC outputs from 1 to 1800 watts. Light weight, compact, 90% or better conversion efficiency.

Ultra-reliable in operation, no moving parts, unharmed by shorting output or reversing input polarity. Complies with MIL specs for shock, acceleration, vibration, temperature, RF noise.

Now in use in major missiles, powering telemetering transmitters, radar beacons, electronic equipment. Single and polyphase AC output units now power airborne and marine missile gyros, synchros, servos, magnetic amplifiers.

Interelectronics — first and most experienced in the DC input solid-state power supply field, produces its own solid-state gating elements, all magnetic components, has the most complete facilities and know-how—has designed and delivered more working KVA than any other firm!

For complete engineering data write Interelectronics today, or call LUdlow 4-6200 in N. Y.

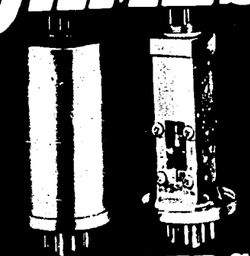
JAMES



CHOPPERS

INSTRUMENT CHOPPERS

Modulate and demodulate signals as low as one microvolt; center pivot design for operation over wide range of temperature, vibration, shock; shielded for minimum residual noise. Models operate from D.C. switching to 500 Cps.

NEW MILITARY CHOPPERS

Using the JAMES low noise level chopper mechanism; packaged in new miniaturized 7 and 9 pin plug-in or wire-in models. Designed to provide high reliability of operation over extremes of environment; for missile and airborne applications.

INSTRUMENT TRANSFORMERS

For use in low level applications. A complete standard line for input, interstage, power and output. Consult JAMES with your transformer problems.

NEW LOW LEVEL HIGH SPEED RELAYS

For digital/analog and other instrumentation. Operate in microsecond range; permit switching of microvolt signals. Wide variety of configurations; center off, MBB and BBM.

TRANSISTOR TRANSFORMER KIT

JAMES kit C-2450 gives the circuit designer transformers for 93% of all transistor circuit applications. Consists of a set of 12 precision matched miniature transformers, each mounted on 11 pin plug with shield. Each covers portion of range of impedance ratios used in transistor circuitry.

Write for engineering literature.

DC-AC CHOPPERS

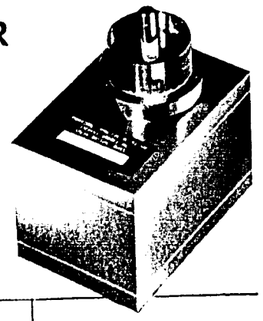
For 50/60/94/120 Cycle Use

There are twenty-two miniature types, both single and double pole, built to rigid commercial specifications with the emphasis on long life, low noise level, and extreme reliability. Please write for Catalog 515.

MICROVOLT MODULATORS

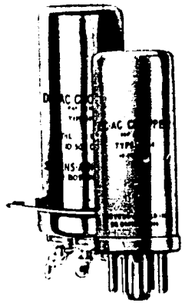
VIBRATING CAPACITOR

A vibrating-reed type capacitance modulator used to measure currents as low as 10^{-16} amperes. Drift never exceeds ±0.2 millivolts per day, noncumulative. Thus it is ideal where stable performance without recalibration is required for periods of a month or more. Write for Catalog 523.



ULTRA HIGH SPEED RELAYS

Operating time 200 microseconds. Mount in any position. Will cover the range of —65°C to +85°C factory sealed. Please write for Catalog 337.



0-500 CYCLE DC-AC CHOPPERS

Liberal factors of safety. Before any Chopper is shipped, it is tested twice over the range of —65°C to +85°C to give double proof of stamina. Please write for Catalog 280.

RESONANT RELAYS

Permit remote control by radio or carrier through frequency discrimination. Relays operate only when energized at rated frequencies and reject all others. Please write for Catalog 335.

STEVENS-ARNOLD

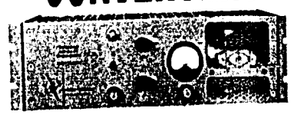
INCORPORATED

7 ELKINS STREET, SOUTH BOSTON 27, MASS. S/A-13-2/3

For details, circle #379 on Reader Service Card

Military reliability in

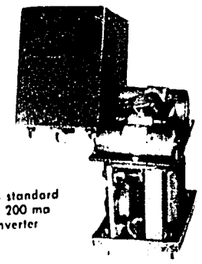
SEMI-CONDUCTOR POWER CONVERTERS



PS-4000B 115 volt AC input; 300 volt 1.5 ampere regulated DC output supply

PS-8001
300 watt miniature all-silicon rectifier regulator

PS-3001
26 volt DC input, 115 volt, 150 VA Square wave output



PS-1004B standard 325 volt, 200 ma dc-dc converter

Power Sources units are now in production missiles

Complete range of sizes, types and capacities for military and commercial requirements:

- DC to AC available in any power up to 1500 watts . . . square or sine wave output.
- AC to DC available with voltages up to 500V, and currents to 3 amps . . . DC Regulation to 0.1 . . . Impedances to .05 ohms . . . Over-all efficiencies 70-75%.
- DC to DC available in combinations of the DC to AC and AC to DC ratings shown above.
- Military Reliability is assured by extremely conservative designs and the use of the best, pretested military grade components and advanced semiconductor techniques. Meet MIL E-5400 and MIL-E-8189.

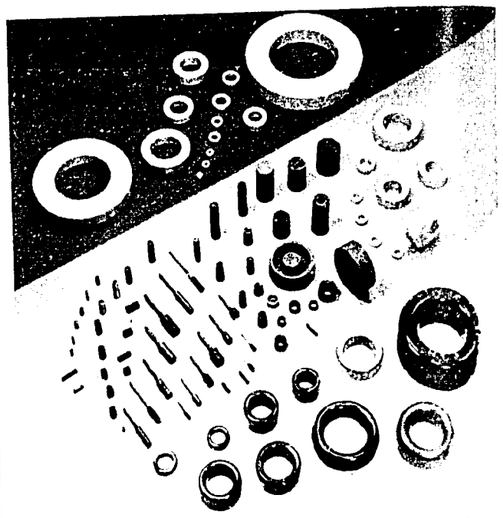
Specify "ARNOLD"

for your MAGNETIC CORE requirements

Top to bottom: Tape wound cores, Silectron C, E and O cores, and bobbin cores.



Top to bottom: Mo-Permalloy powder cores, iron powder cores, and sendustron

SILECTRON C-CORES, E-CORES and TOROIDS Arnold C and E cores are made from precision-rolled Silectron strip in 1, 2, 4 and 12 mil thicknesses.

They are supplied in a wide variety of shapes, and in sizes from a fraction of an ounce to several hundred pounds. In addition to standard transformer applications, they may also be supplied for special applications such as saturable reactors, instrument transformers and pulse transformers.

Over 1,000 stock cores are listed in the Arnold Silectron catalog. A wide selection of preferred sizes are carried in stock for immediate shipment. For complete data on C and E cores and Silectron toroids, *write for Bulletin SC-107A.*

TAPE WOUND CORES of High Permeability Materials Arnold tape wound cores are available made of Deltamax, 4-79 Mo-Permalloy, Supermalloy, Mumetal, 4750 Electrical Metal, Silectron, or the new rectangular-loop material, Supermendur. All except Supermendur cores are available in standard tape thicknesses of 1, 2 and 4 mils; also in special tape thicknesses of ½ mil, 12 mil or other, as required or feasible. Supermendur is presently available in 4 mil cores.

Toroidal cores are made in 30 standard sizes with protective nylon or aluminum cases. Special sizes of toroidal cores are produced to individual requirements. *Write for Bulletin TC-101A. (TC-113A for Supermendur Cores.)*

BOBBIN CORES Arnold bobbin cores are available in a wide range of sizes, tape thicknesses, widths and number of wraps to suit the ultimate use of the core in electronic computer assemblies. Magnetic materials usually employed are Deltamax and Square Permalloy in standard thicknesses of 1, ½, ¼ and ⅛ mil. Bobbins are supplied in ceramic or stainless steel. *Write for Bulletin TC-108A.*

MO-PERMALLOY POWDER CORES Available in a wide range of sizes, from .260" OD to 5.218" OD. They are coated various types of enamel and varnish finishes, some of which permit winding with heavy Formex insulated wire without supplementary insulation over the core.

These powder cores are supplied in four standard permeabilities: 125, 60, 26 and 14 Mu. They provide constant permeability over a wide range of flux density, and in most cases may be furnished stabilized to provide essentially constant permeability over a specific temperature range. Large warehouse stocks of preferred sizes are carried for immediate shipment. *Write for Bulletin PC-104C.*

IRON POWDER CORES A wide selection of cores is available from simple cylinders to special cores of complicated design. The line includes all standard types of threaded cores, slug, sleeve, slug and cylindrical insert cores: for use in antenna and RF coils, oscillator coils, IF coils, permeability tuning, FM and television coils, noise filter coils, induction heating and hardener coils, and other low frequency applications. Preferred sizes are carried in warehouse stock for quick shipment. A standard series of iron powder toroids is also manufactured conforming to the standard sizes proposed by the Metal Powder Industries. *Write for Bulletin PC-109.*

SENDUST POWDER CORES Available in a wide selection of sizes, ranging from .800" OD to 3.346" OD, and in permeabilities of 10, 13, 25, 30, 50 and 80, although not all sizes available in all permeabilities. They possess magnetic properties generally superior to iron powder cores, but inferior to Mo-Permalloy powder cores in the audio and carrier frequency range. *Write for Bulletin SDC-110.*

SPECIAL MATERIALS

2V PERMENDUR . . . a ferromagnetic alloy of cobalt, vanadium and iron that possesses high flux density saturation properties. Its magnetostrictive properties are useful in many transducer applications. *Write for Bulletin EM-23.*

VIBRALLOY . . . a ferromagnetic alloy of nickel, molybdenum and iron whose temperature coefficient of elastic modulus is controllable over a wide range. It has high ferromagnetic permeability, and a rather high coefficient of magnetostriction. Used in applications where a zero or controlled thermo-elastic coefficient is desired.

BARIUM TITANATE . . . A piezoelectric ceramic widely used in accelerometers, phono pickups, microphones, ultrasonic grinding and cleaning devices and underwater signaling devices. For more information, *write for Bulletin CM-116.*

Performance-Guaranteed Products by MAGNETICS, inc.

TAPE WOUND CORES

Magnetics, Inc. offers guaranteed maximum and minimum performance limits for high permeability tape wound cores. Available immediately from stock made from Hy Mu-80 (square *and* round), or Orthonol®. Cores are dry hydrogen annealed to meet performance specifications.

Inside Diameters	0.375-in. to 4.000-in.
Outside Diameters	0.500-in. to 6.000-in.
Tape thickness	.001, .002, .004, .006
Heights	0.125-in. to 2.000-in.

Note: All AIEE standard sizes are included. Special sizes on request.

TAPE WOUND SILICON (Magnesil) CORES are available in 2, 4 or 12 mil gauges for use typically in current transformer, magnetic amplifier and saturable reactor applications. Core sizes meet all standard size criteria. Cores are available cased or uncased.

TAPE WOUND BOBBIN CORES are made of 4-79 Mo Permalloy or Orthonol® tapes. Stainless steel and ceramic bobbin cores with exclusive "Poly-Cap" do not distort with temperature—allow normal potting techniques. Ultra-small stainless steel bobbin cores are available for miniaturization (0.047' diameter). A broad range of diameters and tape widths are also available.

For Complete Details: **Write for Bobbin Core Catalog BC-203**

Magnetics, Inc. offers tape wound cores in both phenolic and aluminum core boxes, in standard paint finish or with GVB (Guaranteed Voltage Breakdown limits) finish. GVB cores can be vacuum impregnated and will withstand 1,000 volts at 60 cycles before breakdown. The aluminum boxed cores will withstand temperatures to at least 450°F. All core tests are in accordance with accepted standards of the AIEE Working Group on Core Matching and Grading.

For Complete Details: **Write for Tape Wound Core Catalog TWC-200**

MOLYBDENUM PERMALLOY POWDER CORES

Only Magnetics, Inc. guarantees realistic inductance limits for both temperature stabilized and non-stabilized molybdenum permalloy powder cores. Linear inductance cores are also available. Performance-Guaranteed, all cores may be ordered in a variety of standard sizes, and can be numerically coded within the guaranteed inductance limits at slight extra cost.

Inside Diameters . . . 0.225 to 0.950-in. Heights . . . . . 0.140 to 0.570-in.
Outside Diameters . 0.375 to 1.570-in. Permeabilities . . . . Minimum to

Standard baked enamel and wax-tight varnish finishes, or no finish. Cores with finishes which will sustain 500 or more volts may be wound directly with heavy Formex-coated wire.

For Complete Details: **Write for Powder Core Bulletin PC-203**

MAGNETIC LAMINATIONS

"Performance-Guaranteed" laminations are available in Hy Mu-80, 48 Alloy and Orthonol®. Standard shapes include DU-1, DU-37, DU-50, EE-24-25, EE-26-27, EE-28-29, EE-186-187, EI-11, EI-12, EI-21, EI-75, EI-187, EI-375, EI-625, F-12, F-12 (Modified), F-13, F-20, F-21, F-187, Ring, UBE, UI-312 and UI-375. Standard gauges are 0.014-in. and 0.006-in. Laminations are dry-hydrogen annealed to meet specifications. Special shapes produced to fit your specifications. These include rotor, stator, and recording head laminations using customer-owned dies.

For Complete Details: **Write for Magnetics, Inc. Applications Engr. Dept.**

MAGNETIC SHIELDS

"Performance-Guaranteed" shields are used in the protection of electronic measuring devices from moderate or high flux external fields. Shields are usually made from Mu Metal or 48 Alloy, respectively, but they can be made from a number of other commercially available magnetic and non-magnetic materials when your specifications require it. Shields are normally .025-in. thick, but other thicknesses such as .014, .020, .031 and .062 can be readily supplied. Shields are fabricated and can be painted, lacquered or unfinished to meet your requirements. They are dry-hydrogen annealed for highest field attenuations.

For Complete Details: **Write Magnetics, Inc. Applications Engr. Dept.**

New Exclusive IRON CORE Development

Saves Production Costs

Reduces Breakage Loss

Corrects for Non-uniformity of torque in phenolic impregnated coil forms

EQUI-TORQUE®
Process #25
. . . Developed by
RADIO CORES, INC.
Originators of
ENGINEERED ECONOMY® IRON CORES

Get even, smooth-running, satisfactory torque control in application of threaded cores to coil forms with EQUI-TORQUE PROCESS #25!

- ★ Specially processed tacky wax
- ★ Lubricates to ease torque
- ★ Impregnated in cores
- ★ Compensates for low torque
- ★ Covers all thread form
- ★ Uniform running torque
- ★ Wax withstands 200°F.
- ★ Equalizes initial and running torque
- ★ Recycling excellent
- ★ No deterrent in function with aging

*Trademark

Operational tested and now being used by leading television, radio and coil manufacturers.

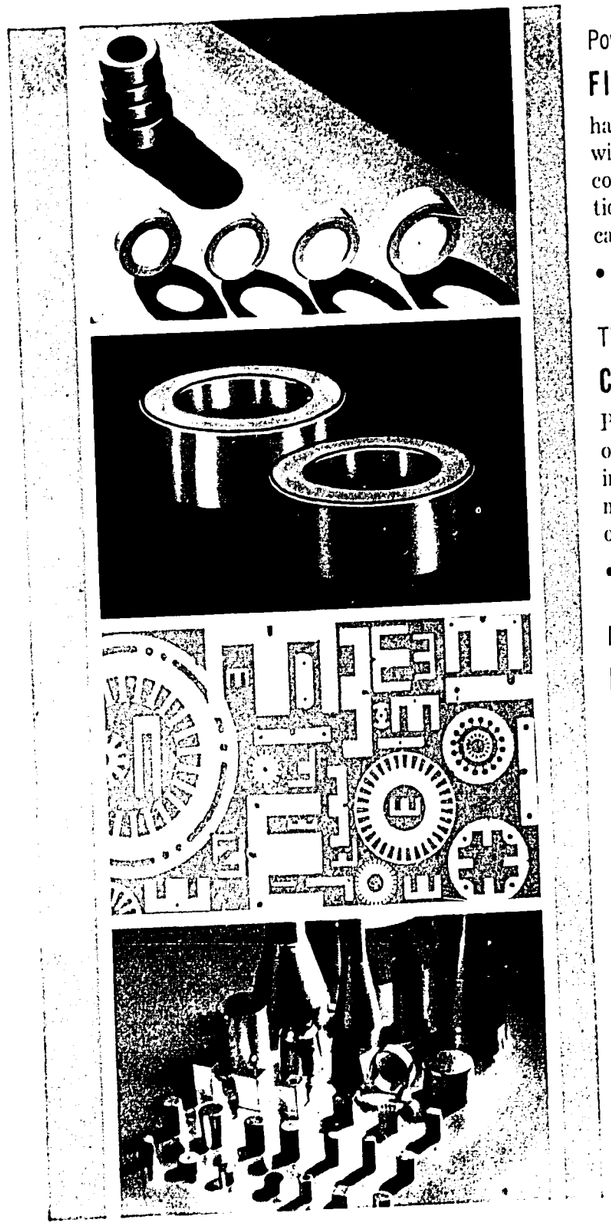
DESIGNews

Magnetic Metals Company designs and produces stamped and tape wound cores and shields for the electrical and electronic industries.



Powdered Permalloy

FILTOROID CORES

have characteristically high permeability combined with low core loss. Nine standard sizes of Filtoroid cores are available. Several types of core stabilization and finish are offered to achieve special application requirements.

- **Send for Bulletin G-1.**

The Ultimate in Tape-Wound Cores

CENTRICORES

Precision manufacturing methods are used to obtain closely matched magnetic characteristics including high thermal stability. Centricores matched at room temperature will remain matched over wide temperature ranges.

- **Send for Bulletin D-7.**

Mass-Produced . . . Precision-Made

MAGNETIC CORE LAMINATIONS

Motor laminations are produced to close specifications from customer-owned dies. Our representative will discuss your needs. Transformer laminations in a wide variety of shapes and sizes are made from standard dies.

- **Send for Bulletin A-1.**

Drawn or Formed

MAGNETIC SHIELDS

Provide efficient protection of sensitive electronic equipment against stray magnetic fields, and offer a high ratio of field strength reduction. A wide range of single and multiple shield structures are available from existing tools.

- **Send for Bulletin F-1.**

SILICON...any way you want it!

Is there any good reason why you shouldn't obtain all forms of silicon you want from a *single* source?

Up to now the answer to that question was simple: No one firm offered a complete silicon supply facility.

But that is no longer true because from Allegheny you can now obtain silicon in every form. Here are the facts:

1. BULK — The bulk polycrystalline silicon you get from Allegheny comes in four grades, three semiconductor, one solar. Each requires a minimum of doping, exhibits a high degree of uniformity and shows a significantly low boron level.

2. CAST BILLETS — Cut to charge size for Czochralski furnaces and in standard sizes up to 2" in diameter.

3. CAST RODS. — For float zoning, you get uniformly dense cast rods in standard sizes up to 1", with lengths entirely dependent on your requirements.

4. MASTER DOPING ALLOYS — These are made from extremely pure silicon, using 99.999% or better elemental dope. They are alloyed in different ranges, and in homogeneous lots of sufficient size to allow for long term standardization in your production doping procedures.

5. SINGLE CRYSTALS — Custom processing of single crystals is a basic service from Allegheny. We will depend on your specifications and grow in Czochralski or float zone furnaces, again depending on application.

6. SLICES — You can get slices to meet any surface requirement since Allegheny has both the know-how and facilities for slicing, lapping, and finishing. And 100% testing is your assurance that the slices completely meet your specifications.

7. SEEDS & SPECIAL FORMS — You tell us your machining and other physical requirements and we will provide the shapes and forms, cut ultrasonically. All seeds are oriented optically to ½° (or better) to the (111), (110) or (100) plane.

Analyze your current silicon supply arrangements. Consider that *only* Allegheny provides every form of silicon you need. Doesn't it look like now is a good time for you to get the facts from the people at Allegheny? Write, wire, or phone

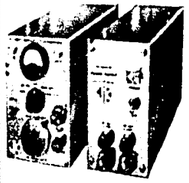
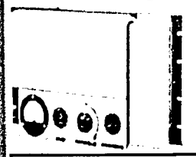
JK PRODUCTS

PACKAGED FREQUENCY MANAGEMENT

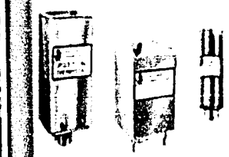


New JKFS-1100T Precision Frequency Standard: Most advanced-design frequency standard available today, is transistorized, with double proportional control oven. ***Stability:*** 5 x 10^{-10}/Day. ***Input:*** 24 to 32 v DC. ***Output:*** 1 v rms into 50 ohms at 1 MC and 100 KC. ***Dimensions:*** 6.0" H x 4.9" W x 12" D.

New JKFS-1100TP Companion Power Supply: Completely transistorized power supply available to operate from 115 v AC or 24 v DC. Has built-in standby batteries good for up to 20 hours operation. Has automatic switchover. Weight of combined units is 25 lbs. ***Dimensions:*** 6.0" H x 3 19/16" W x 12" D. Units are designed to mount with 7" x 19" panel for rack mounting.

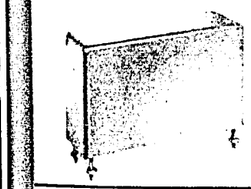


Time-Proven JKFS-1000 Frequency Standard: ***Stability:*** 1 x 10^{-9}/Day. ***Output:*** 5V into 5000 ohms at 1 MC, 50 mV into 50 ohms at 100 KC. Pulse output for measurements up to 20 MC. 115 v 60 cps A.C. 15 1/4" high, 19" wide, for standard rack mounting.

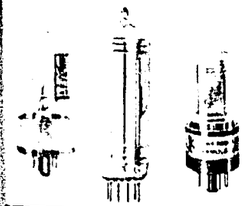


JK Thermystals: Advanced-design frequency control unit combining plug-in simplicity with extreme precision. ***Frequency stability:*** 30 to 900 kc, ±.0001 to 1000 cps, ±.00002% to ±.00005%. Higher frequencies available.

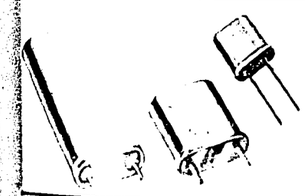
JK Transistor Oscillators: Complete, compact, precise precision signal sources providing fixed temperature and humidity environment for transistor and circuitry elements. ***Frequency Range:*** 100 Cycles to 75 m.c. ***Frequency Stabilities:*** 12 hr. period 1 x 10^{-8} to 1 x 10^{-9}. Fully transistorized and temperature controlled.



JK Crystal Filters: Compact, rugged, hermetically sealed and stable, JK CRYSTAL FILTERS (band pass filters) have a ***Frequency Range:*** 1 kc to 40 mc, and are available for special filtering purposes to 150 mc. ***Band Width*** at 6 db: 0.01% to 4% of nominal on most frequencies, and up to 10% for certain frequencies.



JK Glasline Crystals: For ultra stable frequency control, JK GLASLINE CRYSTALS provide unprecedented stability and reliability. Compact, evacuated and hermetically-sealed against moisture, contamination, shock and barometric pressure. Over a complete range of 1000 cycles to 5 mc. and up. High shock and vibration performance.



JK Military Types: Hermetically-sealed, JK MILITARY TYPE CRYSTALS are metal-cased and in ***Frequency Ranges:*** 8 kc to 100 mc. High shock and vibration performance.

JK Ovens: Capable of maintaining set temperatures around components or circuitry with less than ±1° C. variation over the range of −55° to +100° C. JK OVENS are light, compact, inexpensive, uniform and reliable.

BULOVA

SYNONYM FOR QUALITY, RELIABILITY AND STABILITY!

Frequency control SYSTEMS AND OSCILLATORS .3 cps to 100 mc

Bulova frequency control systems and oscillators are custom-engineered for the most exacting military and industrial applications.

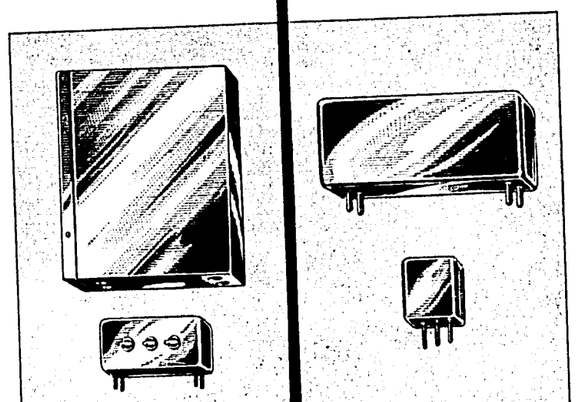
Bulova systems and oscillators span the frequency range from .3 cps to 100 mc and in stability ± 15 pp million without oven to ± 1 pp 10^9 with proportional oven control ...are available in either tube type or transistor construction.

They graduate in size from the MB-100 (1" x 1" x 2") to complete systems. The MB-100 compensated crystal oscillator assures single frequency output with a stability of ± 15 pp million from −50° C. to +90° C. without oven control. Complete systems may include power supply, oscillator, gated and resetting circuitry, binary stage, voltage regulator and pulse or power amplifiers

Crystal FILTERS 7 kc to 20 mc

Bulova crystal filters are designed to solve filtering problems at center frequencies with bandwidths of 0.01% to 8% and slope factors of 60/6 db as steep as 1.4 to 1.

Bulova filters shave the frequency range from 7 kc to 20 mc, inclusive ...are available as bandpass, reject and single side band. They graduate in size from the 2E2 SB (1 7/16" x 1 13/16" x 1¼") for frequencies of 175 kc through 20 mc to the OE6 (5½" x 3 1/16" x 3 3/4") a single side band for frequencies of 7 kc through 500 kc.

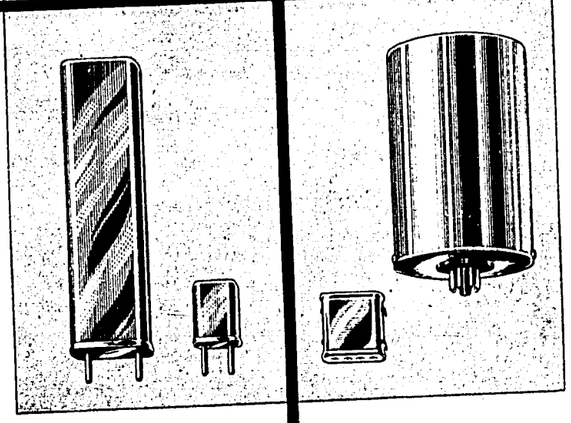


CRYSTALS 2 kc to 100 mc

Bulova crystals are designed and produced for use wherever reliable, close-frequency control is essential.

Bulova crystals assure exacting control from 2 kc through 100 mc with 100 g shock resistance and 30 g to 2000 cps vibration resistance in most frequencies. They graduate in size from the HC-13/U (1½" x 2 3/32" x 3") for 2 kc to the HC-18/U (.50" x .400" x .510") for 100 mc. The HC-18/U is now available to cover 450 kc through 1100 kc and 2 mc through 100 mc.

The majority of Bulova MIL Type crystals may be obtained in miniature holders.



OVENS

Bulova ovens are engineered to maintain ±.1° C. of operating temperatures so as to assure superior results in electrical stability of crystals, components and circuitry.

Bulova ovens graduate from the AM-100ED (external measurements: 3" diameter with a 7" maximum height; internal: 1.8" diameter with a 6" height) to the BHC-18-1 (external: 1 1/32" x 1 1/32" x 1¼"; internal 1 1/32" x 1 1/32" x 7/32"). The AM-100 maintains a temperature stability of ± .1° C. and is used for Bulova Type 74 glass crystal holders (Military Type HC-15/U), or complete systems. The BHC-18-1 holds temperature to ± 2° C. (−55° to +90° C. ambient) and has a capacity for a single HC-18/U plug-in type crystal holder or two crystal diodes, such as the IN658.

Complete information on all Bulova components and systems is available from your nearest Sales Representative, or by writing—*Department A-1376, Electronics Division, Bulova, 40-06 62nd Street, Woodside 77, New York.*

LET SHEROLD SOLVE YOUR CRYSTAL PROBLEMS

Complete, advanced engineering laboratory is at your disposal.

Whether your need is for one special frequency crystal—or thousands, you can be assured of quality manufacture and unexcelled performance when you specify Sherold . . . now one of the country's largest, exclusive producers of crystals for military and commercial requirements.

Write for complete data on your requirements.

McCOY

Quality QUARTZ CRYSTALS

Standard of excellence for the crystal industry. Produced in frequencies from 500 k.c. to 200 m.c. to meet government or your own specifications. Standard size or Subminiature; Glass or Metal Cases; Plug-in or wire leads.

Quality CRYSTAL FILTERS

from 1 m.c. to 30 m.c., with band width of 0.1% to 0.8% of center frequency.

For additional information on your specific needs, write, wire or phone us. Our research section will be glad to assist you.

Where quality is absolutely essential...

GRACE SILICON

(ultra-high-purity)

Minute instruments in the nose cones of American space explorers record vital phenomena beyond the pull of earth's gravity. The phenomena: the unknowns of outer space including bands of radiation, cosmic rays, temperatures, etc. The data recorders: complex electronic devices packed with transistors, diodes, rectifiers and other subminiature signal transmitters.

It wasn't possible ten years ago. It wouldn't be possible today if it weren't for ultra-high-purity silicon. Purity such as is produced by the Pechiney process used in the manufacture of Grace Silicon.

May we suggest that wherever silicon of top quality is required—for semiconductor devices in research, military, industrial and entertainment uses—call or write GRACE ELECTRONIC CHEMICALS, INC., PL 2-7699, 101 N. Charles Street in Baltimore.

GRACE ELECTRONIC CHEMICALS, INC.

101 N. Charles St., Baltimore, Maryland

Subsidiary of W. R. Grace & Co.

ELECTRICALLY VARIABLE
DELAY LINES

A unique General Electric product, *Electrically Variable Delay Lines* are suitable for general signal processing applications and as modulating devices for FM communications equipment. Highly adaptable to transistorized circuitry, EVDL's can be produced within a wide range of operating characteristics to give delays up to 12 microseconds. Tailored to defense electronics equipment, the EVDL will withstand extreme humidity, shock and vibration. 227-24

GE WIRE SONIC DELAY LINES

New in the field of delay devices, *Wire Sonic Delay Lines* employ a special alloy wire as the delay medium. WSDL provides long delay per unit volume (up to 10,000 μsec) and adjustable or fixed delay. *Plus* values such as shock and vibration resistance, stability over wide temperature ranges and the availabilty of output taps give this advanced type of delay device unlimited applications at relatively low cost. 227-23

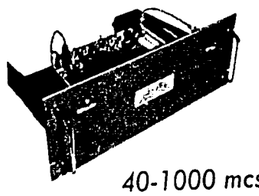
advances in **RF** *techniques*

In recent years, Applied Research Inc. has contributed notably to the state of the art with unique originations in RF components and equipments. Much must remain undiscussed; the production items below are representative.

BROADBAND RF AMPLIFIERS



40-1000 mcs

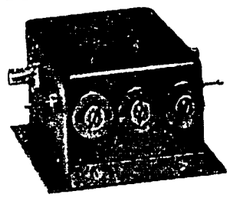
Model HFW Amplifiers cover an octave of frequency. Their truly exceptional performance features low noise, high gain with low power drain. Units are available in weather-proof cases for antenna mounting or other outdoor installation.

SPECIFICATIONS (condensed)

Model HFW-302

Input freq.	300 to 600 mcs
Input, output VSWR	Less than 1.5 in passband
Noise figure, average	7 db
Gain	20 db

BANDPASS FILTERS



30-2000 mcs

Model HFF and HFF-T Bandpass Filters are rugged, reversible in operation, remarkable in performance (which approximates theoretical expectations). Advanced filter designs are also available for antenna couplers and diplexers.

SPECIFICATIONS (Condensed)

Model HFF-T3

Center freq.	425 mcs
Bandwidth	50 mcs
Insertion loss	0.15 db
VSWR	1.03 in passband

UHF CONVERTERS

300-900 mcs

Model UHC-R Converters provide the ultimate in sensitivity and performance, featuring low noise, high image and spurious rejection, minimum adjacent channel interference.

TYPICAL SPECIFICATIONS (condensed)

(Model UHC-R-4.5)

Input freq.	400-525 mcs
RF bandwidth	10 mcs
Noise figure	5.5 db
Output bandwidth	5 mcs
Converter gain	50 db (min.) overall

FIXED PAD Attenuators & Terminations

(Patents Pending)

For Type

BNC Connectors

DC to 1000 mcs

HFA-50 and HFA-75 Attenuators; HFT-50 and HFT-75 Terminations have impedances of 52.5 and 75 ohms; VSWR is 1.2 maximum up to 1000 mcs; attenuation values 1 to 20 db.

For Type

TNC Connectors

DC to 2000 mcs

HFA/T-50 and HFA/T-75 Attenuators; HFT/T-50 and HFT/T-75 Terminations have impedances of 52.5 and 75 ohms; VSWR is 1.2 maximum up to 2000 mcs; attenuations values 1 to 20 db.

For Type

N Connectors

DC to 2500 mcs

HFA/N-50 Attenuators and HFT/N-50 Terminations have impedances of 52.5 ohms; VSWR is 1.2 maximum up to 2500 mcs; attenuation values 1 to 20 db.

Impedance Transformers

For Type

BNC Connectors

DC to 1000 mcs

Type HFAM Impedance Matching Transformers match any pair of 50, 75, 93 ohms with minimum loss over a broad band of frequencies; VSWR is 1.2 maximum at 1000 mcs

Literature is available on all ARI systems and equipments.

WHERE SHARING PAYS OFF

SOME YEARS AGO we pointed out in "Proceedings of the IRE" that an amazing and unique characteristic of scientific men is their sense of responsibility to the past and to the future, expressed in their sharing with one another the new findings and discoveries of their science. The fact that engineers share information is a major contribution to the amazing growth of industrial progress and to our high standard of living.

Design Engineers seem to have an impelling need to publish. It is important and fortunate that they have had magazines *in which to publish*. Of course, their articles make these magazines possible, just as the publishing organization's faith and courage gives them the vehicle for communication. A magazine is a three-way team of author, medium, and reader—mutually dependent.

Such a contribution of one to the other is the vital service of the periodical. The thundering pace of radio-electronics and its expression in communications; glorious hi-fi music; the brilliant, full-color picture; and that same radio principle bringing in a new era in industrial controls which makes automation practical; the amazing time-and-effort-saving electronic computer; and new fabulous developments already being discovered in research which will be made practical by the radio engineer—all these *could not have been possible* without the publication as a means of collating and organizing information, and distributing it to those who needed it and *knew how to work with it*.

These are generalities! But "Proceedings of the IRE" *is specific*. The Superheterodyne circuit, FM, TV, radar, the computer, color TV, the transistor, scatter propagation, solid state electronics (stereatronics) all were presented and developed *article by article* in the history-making issues of "Proceedings of the IRE." The impact on industry of this broad exchange of information among engineers has been enormous, creating new markets and even new ways of life.

FM is an excellent illustration of this "sharing." Consider particularly the "lead out time" needed in FM. In December 1935, an article by Armstrong (an IRE Member) in "Proceedings of the IRE" proved conclusively to the engineering world that frequency modulation was an improvement *and practical*. (Today, FM is the audio side of every TV receiver.) This was the fourteenth article on frequency modulation *that had appeared in "Proceedings of the IRE,"* eight of them by Armstrong. It is now known that some of these articles which defined the weakness that had to be corrected, as well as some that amplified the discovery by further independent research, all helped make the final perfection possible.

At that time, in all the world, only four other articles on the subject had appeared. These were condensations of the "discussion" in "Proceedings of the IRE." Yet the final "Proceedings" article was published six years before the first FM broadcasting station went on the air. Engineers needed every bit of this "lead-out time" to do their work. The early publication in "Proceedings of the IRE" gave them just that; and thousands of engineers, who had followed this series, knew in December, 1935 that a great change had come and that they must design and tool up for it. Armstrong shared, "Proceedings" published, and an industry profited!

This is the traditional service of the "old-line" magazine. The author "shared"—the magazine "published"—the reader "studied" and industry progressed mightily through the three-way contribution. Truly, the reader contributes attention! This kind of publishing wins such attention, more than any other kind! It does the ground-work and sales-conviction building that comes years ahead of the final product news.

Advertising shares! The informative "ad" follows exactly the same pattern with exactly the same results. Again and again, display copy in "Proceedings of the IRE" has announced new developments or highlighted the engineering usage of a staple item. Year-after-year, we have seen-time businesses start sharing their helpful information with readers in "Proceedings of the IRE" and as a result reap orders, prosper and grow. Today in aggregate, they are the giant industry identified as "Electronics."

It is said that the fundamental result of a magazine is to define a market. Since 1913, "Proceedings of the IRE" has defined an unfolding technical radio and electronic market by articles that stimulated the use of new products and by presenting the manufacturers' stories of these new components, instruments and systems to engineers eager for as many new devices as would serve them well.

Electromagnetic & Magnetostrictive

CEC **DELAY LINES FILTERS**

AUDIO AND HIGH FREQ. MINIATURIZED

Control Electronics Co. Inc. specializes in the design and production of electromagnetic and magnetostrictive delay lines and miniaturized filters. A sample grouping is shown here. Further information is available from our Engineering Dept.

BUILT TO MIL. SPECS. FAST PROTOTYPE SERVICE
1 to 3 WEEKS DELIVERY

Distributed Constant Delay Lines

CEC DISTRIBUTED CONSTANT DELAY LINE FEATURES
- Lowest cost — reliable performance
- Maximum delay to rise time ratios
- Maximum delay per cubic inch
- Delays to 30 μ secs.
- Impedances: 200 to 10,000 Ω
- Bandwidths to 20 mcs
- Linear phase shift

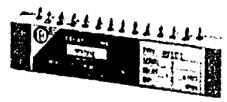
Miniaturized, Electrically or Mechanically Variable Delay Lines

Infinite, incremental or decade variable delay lines available in any range of delays and impedances.

Fixed or Variable Magnetostrictive Delay Lines

Long and Short Delays from 5 μ secs to 5,000 μ secs. Choice of impedances.

Lumped Constant Delay Lines



Multi-tapped Lumped Constants available in many configurations

DELAYS TO 20,000 MICROSECONDS
BANDWIDTHS to 500 MCS
Zo FROM 50 TO 10,000 OHMS

Over 275 standard Lumped Constant Delay Lines available

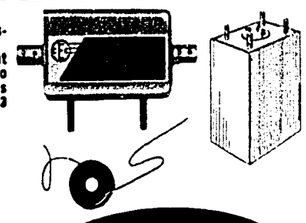
System Delay Lines

Complete delay and pulse systems designed to your needs.

Audio and High Frequency, miniaturized

FILTERS and TOROIDS

Standard and Special Designs - to meet customer's unusual requirements.
HIGH, LOW & BANDPASS FILTERS with input and output impedances from 500 ohms to 10,000 ohms, and with cut-off frequencies from 200 cps to 70 kcs, including the 23 standard RDB Telemetering channels.



STANDARD	SPECIALS
High Pass	90° Phase Shift
Low Pass	Null "T"
Band Pass	Ultra Stable
Inter-Stage	Band Suppression
	Constant Delay

SPECIAL FILTERS AND TOROIDS TO YOUR SPECS. QUICK DELIVERY

CEC CONTROL ELECTRONICS CO., INC.

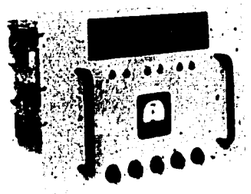
RAPID ACCESS in Analog Data Reduction Systems

DIGITAL TIMING GENERATOR

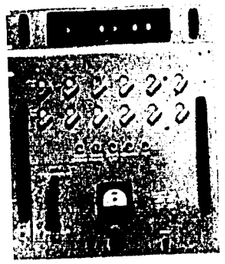


MODEL 201 for Tape Indexing generates numerically coded timing signals which are recorded on the magnetic tape throughout the data recording periods, providing a precise digital index in terms of elapsed time.

Write for Technical Bulletin TSG

MODEL 206A IS A MILITARIZED AIRBORNE VERSION OF MODEL 201.

MAGNETIC TAPE SEARCH UNIT

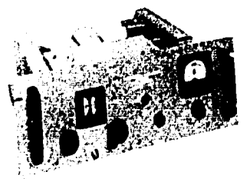


MODEL 202 for Tape Searching operates during data reduction periods. This instrument automatically locates and selects for controlled playback the tape data included between a "sequence start time" and a "sequence end time" specified by panel dial settings. Model 202 may be modified to search for timing formats other than those originated by Model 201.

ULTRA STABLE OSCILLATOR

One Megacycle Signal Source

STABILITY: 1 PART IN 10^9 PER DAY



For precise time measurements or frequency control, Model 101C features include: A crystal oven without moving parts that is stabilized to better than 0.01°C. by temperature-sensitive resistance bridge, and dissipation in oscillator crystal which is stabilized at a power level of less than one microwatt. MULTIPLIERS and DIVIDERS are available for other frequency values with corresponding stability. *Write for Bulletin USO.*

MAGNETIC CORE LOGIC EQUIPMENTS

1. **DIGITAL FORMAT CONVERTERS FOR**
   Gray Code to Binary Coded Decimal
   Straight Binary to Binary Coded Decimal
2. **TIME PROGRAMMERS FOR**
   precise elapsed time interval pulses
3. **MAGNETIC CORE STORAGE REGISTERS**

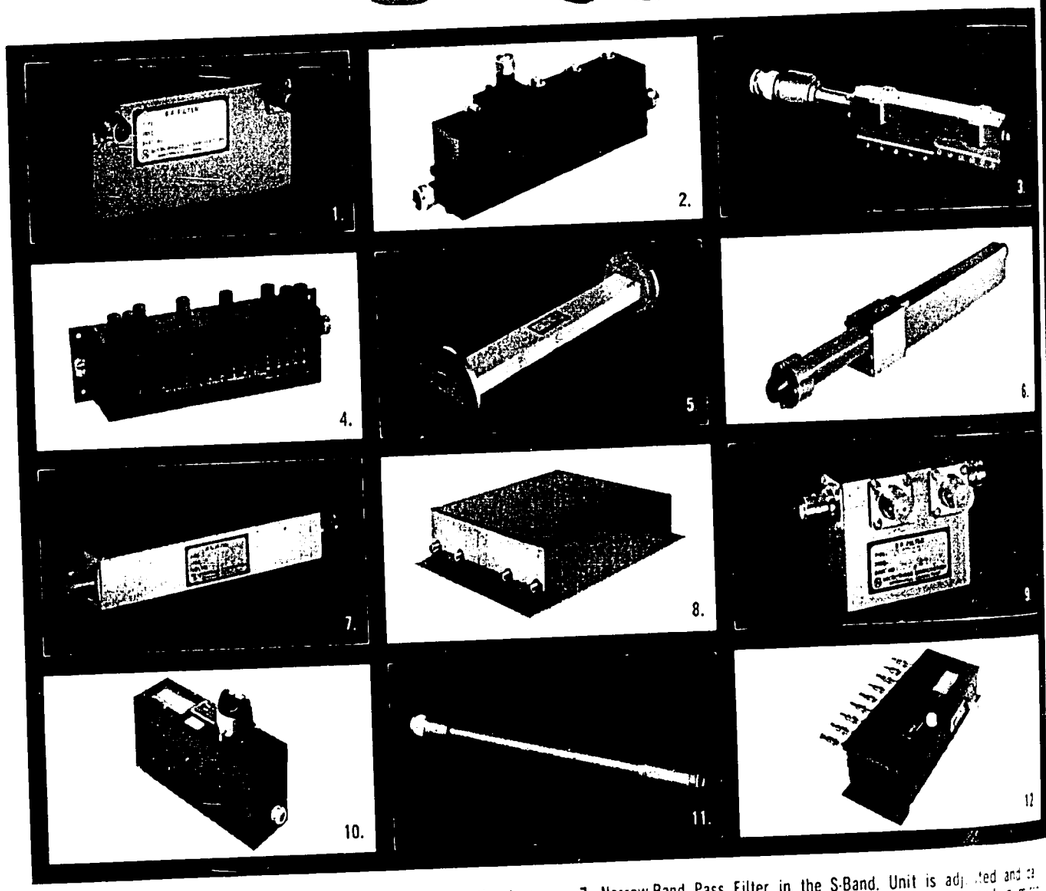
MC RF Filters



1. Miniature Tacan Bandpass Filter. Maximum passband insertion loss, 1.5-db. Unit has sharp skirt characteristics.
2. Miniature L-Band Preselector-Mixer Assembly for 30- or 60-mc IF operation. Efficient miniature unit for airborne application.
3. Sub-Miniature Bandpass-Filter Crystal-Mount Assembly. Unit weighs 3 ounces complete. It has 50 DBM tangential sensitivity in the 2.6-3.2 kmc region.
4. Calibrated Coupled-Tuned Bandpass Filter. Passband insertion loss, 0.5-db maximum.
5. C-X-Band Waveguide Filter. Passes C-Band with less than 0.5-db insertion loss; attenuates X-Band signals by more than 50-db. VSWR over a 10% band is maintained under 1.3:1.
6. L-Band Low-Pass Filter. Handles 20 kw peak power, 1 kw average. VSWR in passband, 1.2:1.
7. Narrow-Band Pass Filter in the S-Band. Unit is adj...ted and ca... brated to give exact effective band width; can be ...ed in mic... wave-noise measurements.
8. Airborne Telemetering Quadruplexer. 1.0-db passban... 6-mc channel separation; 20-db isolation with harm... to 20 kmc.
9. Miniature Broadband Triplexer. Crossover freque... 600-mc. The unit couples three channels with only ... at crossover frequencies.
10. Tunable S-Band Cavity Filter. 2-3 kmc tuning ran... width with sharp skirt selectivity.
11. Bandpass Filter in the X-Band. 500-mc bandw... maximum insertion loss in the passband, 60-db ... 10% of cutoff frequency.
12. Eleven-Channel Crystal-Video Output L-Band Mul... equipped with RF power monitor at the input.

FILTERS

DESIGNED TO YOUR SPECIFICATIONS

Call us for advanced filters & wideband transformers

Whether for quality communications or military use—when you want the finest in precision and the most dependable performance—specify filters and wideband transformers by North Hills Electric. Also available are custom designed filters and wideband transformers.

ENGINEERING AND DESIGN CONSULTATION

Where specifications are not published, take advantage of North Hills efficient and experienced staff in service.

FREE BULLETIN

Standard toroids and wide-band transformers available.

OFC *components*

for defense and industry!

TOROIDS **In addition to standard toroid features, O.F.C. units have—**

• Winding to minimize distributed capacity. Coil may be used at higher frequencies with higher "Q" factors. • Winding to inductance value on self-calibrating winding equipment yielding 1% units as standard tolerance at no cost premium for core calibrating, etc. • Availability of waxed, encapsulated, encased or taped units • Complete line of stock core sizes. Fast delivery on special orders • Facilities for winding from #44 to #10 AWG wire.

HIGH TEMPERATURE TRANSFORMERS

In addition to meeting requirements of MIL-T-27A, grade 4, Class T, O. F. C. high temperature transformers feature—

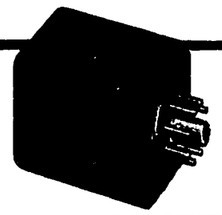
• Reduced iron losses • Large heat-radiating surface area • Very small height dimension • Negligible radiation of power frequency components • Reduced copper loss • Ability to use higher ambients because of smaller unit temperature rise • High reliability, simple construction, excellent shape factor • Excellent regulation and reduced weight.

VARIABLE RF ATTENUATORS **These rotary adjustable variable attenuators are extremely accurate over wide frequency range. Available as individual unmounted units or in various combinations on rack-mounted panels, featuring—**

• Gold contacts • Resistive networks that function from D. C. to maximum operating frequency • Each resistor mounted in cavity. This eliminates reactive components over the unit's useful frequency range • Highly stable. Installed to prevent any element value shift due to heat • Fully tested for insertion loss and voltage standing wave ratio.
• Conservatively rated. Guaranteed for full year under normal conditions.

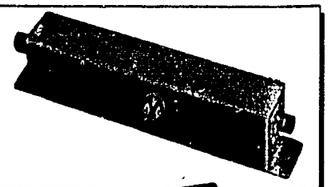
PLUG-IN FILTERS

• Standard octal socket makes interchange simple • Low distortion
• Toroid coil construction provides 70 db min rejection hum pickup
• Available, from stock, in wide range of frequencies
• Hermetically sealed.



ANTENNA FILTERS

• Cutoff frequency range up to 450 MC • Attenuation of 40 to 90 db over stop band • Insertion loss less than 1.0 db over entire pass band • VSWR less than 1.5 over entire pass band • Designed to your size, weight, termination, power and impedance specifications • Slope of cutoff 60 db at 1.2 of cutoff frequency.



MAGNETIC AMPLIFIERS **Built to customer specifications, Ortho Filter's high voltage and high temperature units feature—**

• Use from milliwatt to kilowatt ratings • Special test procedures to insure excellent balance and minimum mill voltages • Tape wound toroids and cut cores to facilitate low cost prototypes promptly
• Controlled winding techniques that guarantee uniformity with respect to distributed capacity and leakage inductances.

Write for complete information.

Ortho Filter Corporation

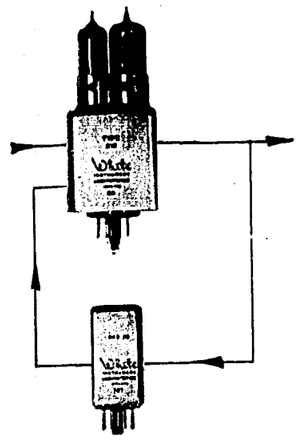
filters networks



ACTIVE FILTERS Plug-in amplifier-feedback network pairs for use as filters or bandpass amplifiers. Widely used where LC filter sections are impractical. Available with tuned circuit response Q to 40, center frequency 1 cps to 500 cps, bandpass response with center frequency 5 to 500 cps. Ask for bulletin 212, 572.

TWIN-T NETWORKS For harmonic rejection, low-pass filtering, feedback circuits. Hermetically sealed, stable, plug-in or stud-mounted. Null frequencies 1 cps to 50 kc, wide range of impedance levels. Ask for bulletin 500.

TOROIDAL WAVE FILTERS Hermetically sealed LC filters with stable toroidal inductors. Low, high, bandpass models available over wide impedance and frequency ranges. Stud-mounting and plug-ins. Stock and special designs such as interstage filters. Ask for LC bulletins.

Complete engineering service for special filter and network designs. Instrumentation and control problems invited. Manufacturing facilities for prototypes or a thousand units. Fast delivery at competitive prices. Let us put you on our mailing list for our "Network Notes" and technical bulletins.

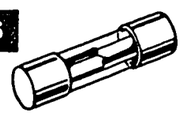
. . . You'll find the Type and Size Fuse you need

• • • IN THE COMPLETE LINE OF BUSS AND FUSETRON FUSES

The following is only a representative selection. The complete BUSS line of fuses includes: single-element, quick-blowing type; single-element for normal circuit protection type; dual-element, slow blowing type and signal or visual indicating types . . . ranging in size from 1/500 ampere up — plus a companion line of fuse clips, blocks and holders.

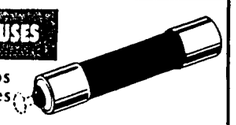
BUSS AGX FAST ACTING FUSES

¼ x 1 in. Glass tube 1/500 to 2 amp.



BUSS GLD SIGNAL ACTIVATING FUSES

¼ x 1¼ inch. Silverplated pin pops out when fuse is blown and activates signal or alarm.



FUSETRON MDL FUSES

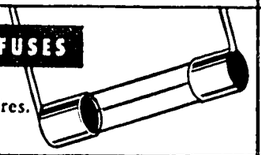
¼ x 1¼ inch. Dual-element — slow blowing type 1/100 to 30 amp.

BUSS ABC CERAMIC TUBE FUSES

¼ x 1¼ inch. High interrupting capacity fuses ¼ to 30 amp.

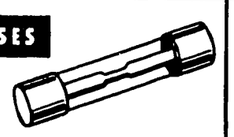
BUSS GJV PIG TAIL FUSES

⅛ to 6 amp. Solder into circuit wires.



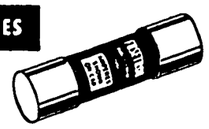
BUSS SFE STANDARD FUSES

Fuses of different amperages are different lengths — to make it impossible to insert too large a size.



FUSETRON FNM FIBRE TUBE FUSES

$^{13}/_{32}$ x 1½ inch. Dual-element — slow blowing type.



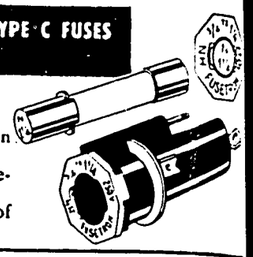
FUSETRON TYPE N and TYPE C FUSES and FUSEHOLDERS

Especially suitable for protection of TV

Ears on fuses match slots in holder.

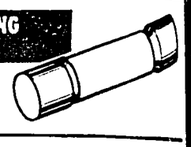
Marking on fuse and fuseholder in direct view.

Safeguard against use of wrong size and type of fuse.



BUSS KTK HIGH INTERRUPTING CAPACITY FUSES

$^{13}/_{32}$ x 1½ inch. Capable of safely interrupting 68,000 amps.

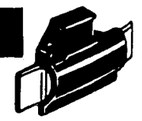


FUSETRON ACK CLAMP TYPE FUSES

20 to 300 amp., Dual-element type.

BUSS ACO AIRCRAFT FUSES

Mechanical Indicating — Limiter type 1 to 75 amp.

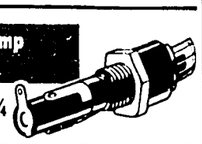


BUSS Series HJ and HK Non-Indicating FUSEHOLDERS

Panel mounted for ¼ x 1 inch and ¼ x 1¼ inch fuses.

BUSS Series HJ and HK Lamp Indicating FUSEHOLDERS

Panel mounted for ¼ x 1 inch and ¼ x 1¼ in. fuses.

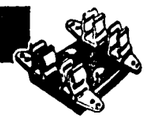


BUSS No. 4051 ONE-PIECE CLIP and TERMINAL

Solder type terminal for ¼ inch fuses.

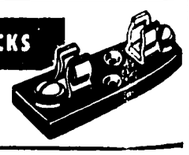
BUSS No. 4409 FUSE BLOCKS

Small Base, solder type Side Terminals.



BUSS No. 4512 FUSE BLOCKS

Full Base, Screw type Terminals.



For more detailed information to help you select fuses and fuseholders to meet your electrical protection needs . . . Write for BUSS bulletin SFB.

Or tell us your problem and let our Fuse Engineers assist you in getting the protection you require.

Bussmann Mfg. Division, *McGraw-Edison Co.* University at Jefferson, St. Louis 7, Mo.

GASEAL©
Pressurized metal hermetic seals for easy installation anywhere without special tools. Withstand more than 850 degrees F., high pressures and altitudes. For any sealing configuration.

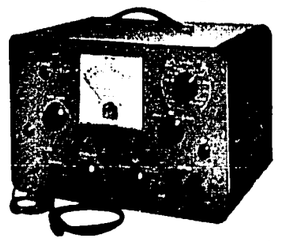
Best Insurance for Component and Systems Reliability!

Corrosion...dust...fungus...altitude...humidity...pressures. *True* hermetic sealing completely eliminates their usually disastrous effects on electronic and mechanical apparatus.

GHS offers uniquely qualified techniques and specially developed facilities in the field of hermetic sealing. They are guaranteed to add a *permanent plus* to your product reliability.

For inert gas filling, 100% mass spectrometer leak testing of any assembly, and every phase of *true* hermetic sealing to meet military or industrial specs, GHS in-plant services are unequalled.

The GHS Megpot©



Quickly, efficiently tests your components, insulation. Features 10 million megohms, 100, 200 or 500V DC, automatic "charge" and safety controls, non-destructive (as high as 5000V AC) high-potential test set with current limiting and automatic shut-off circuit. Portable.

Write for Specific Information . . . and use the GHS Advisory Services without obligation.

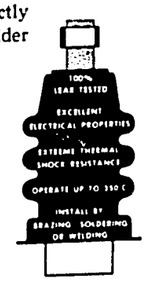
EXTREME THERMAL SHOCK
won't damage these
CERAMASEAL HERMETIC TERMINALS

SOME HAVE EVEN WITHSTOOD A SUDDEN 460°C CHANGE

With an alumina content up to 99%, CERAMASEAL terminals are not only mechanically strong, but some have even been transferred directly from liquid nitrogen into hot solder without cracking!



The CERAMASEAL molecular bond between the ceramic and metal flanges, caps or tubes is stronger than the high alumina ceramic.
Easy to install too, by conventional brazing, heli-arc welding or soldering techniques.
FOR COMPLETE INFORMATION, catalog and spec sheets, write Ceramaseal, Inc., New Lebanon Center, N. Y. or phone: West Lebanon 3-5851.

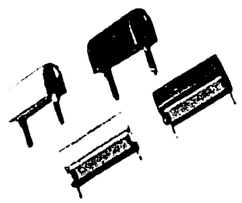
Ucinite Electrical Assemblies



PRINTED CIRCUIT TEST JACKS

For permanent assembly to ptd. circuit bds. Accessible to std. .080 probes without adaptors. Gold-over-silver beryllco contacts . . . color coded nylon bodies.

TEST JACKS

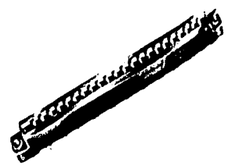
Ucinite's quality jack for .080 probes. Beryllium copper contacts. Nylon insulation in colors. Metal shell for firm, dependable mounting. MS16108 types available.

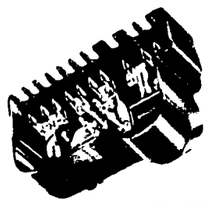
STAMPED CIRCUITS

"Printed circuitry" by a stamping process free of electrolytic contamination. Injection and thermoset molded housings simplify miniaturization of intricate packages and permit complete flexibility of basic raw materials.

PRINTED CIRCUIT CONNECTORS

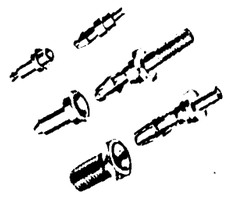
Unique torsion-bar contacts, provide consistent performance unaffected by repeated insertions of maximum and minimum tolerance boards. Available in various multiples of contacts.





SPECIAL ASSEMBLIES

Stamped circuits, molded housings, special contacts custom-designed in a complete package to fit the application.

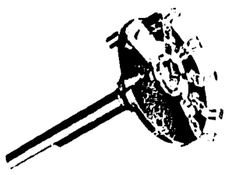


BANANA PINS

Four sizes of plugs with one-piece beryllium-copper springs. Adaptable mounting ends in threaded, staking or solder lug types. Mating jacks also available.

"PK" MOLDED SWITCH

Single wafer rotary switches in rugged, molded construction. Economical, durable. Single pole, two or three position types available.



AIRCRAFT SNAP SWITCHES

Precision, momentary contact, push-button types made to MS25089. Small and dependable. Hermetically sealed and other special versions are available.

AIRCRAFT COMMUNICATION PLUGS AND JACKS

4-conductor type made to rigid Mil. Specs. . . . U92A U Jack . . . U93A U Plug . . . U94A U Switch-Jack combination.

VIBRATION ISOLATORS

Equiflex (1:1 ratio) metal mounts ensure long life, fit small spaces, can be used in any direction. A range of sizes, cup or plate mountings.

With years of specialized experience in the electronics field and complete facilities for the volume production of small metal stampings as well as the assembly of metal to plastic and ceramic components, Ucinite is fully equipped to supply you with special electrical parts and assemblies . . . designed, assembled, wired and marked to your specifications.

* * *

For complete design, engineering and production service, call your nearest Ucinite field engineer.

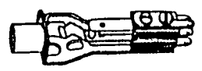
JACK PANELS and PATCH CORDS

Standard broadcast (audio and video) as well as custom built jack panels as used in a wide range of instrumentation and control applications requiring either regular switchboard or coaxial types of jacks. A complete selection of patch cords to fill all types of applications. Size range of special panels from two up to jumbo sizes with about one thousand jacks per panel.

JACK — PLUGS — KEYS



A complete selection of standard types of jacks and plugs plus an extensive line of coaxial types suitable for pulse circuitry, microwave, and video applications. Push button and turn type keys with a very wide variety of circuit combinations using well established telephone switchboard designs are available.

HEADSETS

Thirty-five years of continuous production has produced fourteen basic types ranging from substantially all military types to specialized low cost units suitable for incorporating in toys as a sound generating device. All basic types produced in a wide assortment of variations.

Write for bulletins on these and the many additional standard stock items as well as an almost unlimited variety of manufactured-to-order products falling within the product classifications shown above.

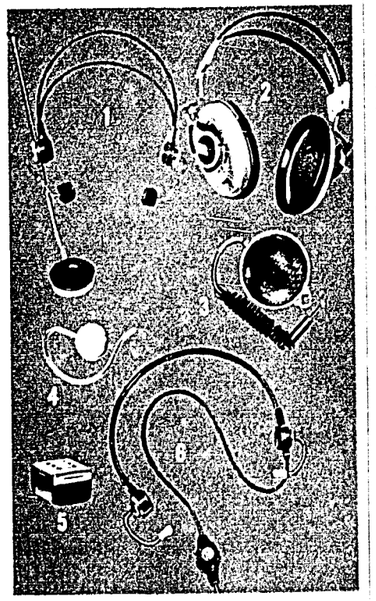
WORLD'S FINEST LISTENING DEVICES by TELEX®



. . . including

1. BOOM MIKE HEADSET: For ham radio, TV, airline, ship-to-shore, class room, secretarial (2 or 3-way communications). Standard on Pan America's Boeing 707 Jet Clipper. Just 3½ oz., yet rugged for long use. Choice of 50 ohm carbon, reluctance, crystal or dynamic mikes—various impedances available.

2. DYNAMIC HEADSET: Hi-fi for all listening uses—for radio and TV monitoring, for stereo listening, for audiometers, for class room uses. Lightweight. Wide bandwidth which can be modified to your needs.

3. PILLOW SPEAKER: For private audio listening, for sleep learning and in hospitals, hotels, railroads, airlines, and busses. Two types: *Dynamic* has stainless steel housing with a hanger; *Magnetic* is unit molded. Hermetically sealed diaphragm can be sterilized by submerging in alcohol.

4. MINIATURE RECEIVER: For hearing aid, transistor radio, and group hearing uses. Available as a cartridge unit in earsets, hearing aids, headsets, etc. Weight 2.5 grams; dimensions (cased), .26" thick, .51" diameter —(uncased), .13" thick, .49" diameter.

5. MINI-MIKE®: Dynamic speaker and mike —only 1 x 1 x ¾ inches. For uses requiring miniature electro-acoustic transducers—dictation machines, trans-receivers, etc. Can be made in variable response.

6. TWINSET®: For amateur, commercial, and industrial uses. CAA approved—standard on many airplanes. Light and comfortable. Less background noise, less signal loss—signal is piped directly into ears. Weighs just 1.6 oz.

For complete information on these and other Telex listening devices and accessories, write

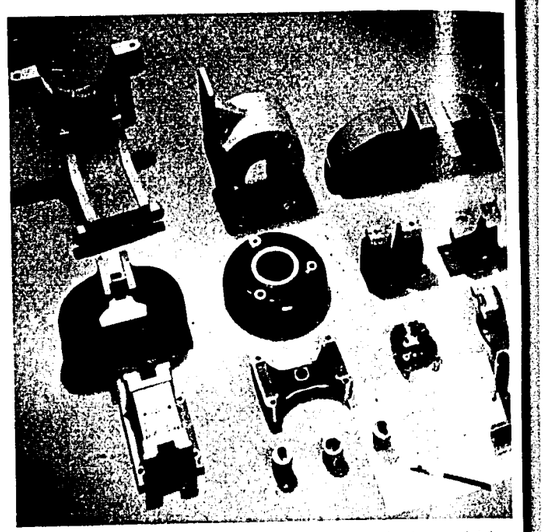
Specify "ARNOLD"

for your PERMANENT MAGNET requirements

Typical group of Arnold permanent magnets, both cast and sintered types.



Typical group of permanent magnet assemblies, aluminum jacketed.

ALNICO MAGNETS

Arnold permanent magnets are available in all types of Alnico material, in sizes ranging from large castings weighing over 80 pounds to very small sintered parts weighing less than one gram.

Alnico V can usually be depended upon to deliver the greatest energy product to the magnetic circuit per unit weight of magnet material. It is therefore generally the first choice for a magnetic material except where special physical considerations are paramount.

Special assemblies such as rotors, traveling wave tube magnets, magnetron magnets, etc. may be supplied in an aluminum jacket to facilitate mounting and supply an added protection to the magnet.

Large magnet assemblies may also be supplied for mass spectrometer and other measuring applications where a high degree of stability and uniformity of field is required.

Many sizes and types of Alnico magnets are carried in stock for immediate delivery. For more information, *write for Bulletin GC-106C.*

SPECIAL PERMANENT MAGNET MATERIALS

ARNOX III

Arnox III is a molded-type magnet having high coercive force and moderately low residual induction and energy product. Principal uses are for magnetic requirements which are not stringent, and for a relatively short magnet of reasonable cross section. Accurate dimensions and close tolerances can be economically obtained. These magnets can be premagnetized before assembly, and have very high resistance to demagnetization. Slightly better magnetic properties are obtained in the pressing direction than in other directions.

ARNOX V

Arnox V is a ceramic permanent magnet material composed of highly oriented barium ferrite. It has many times the energy product of Arnox III and is comparable in many applications to Alnico V. Because of its high coercive force, its use is recommended in applications where a short magnetic length is desirable or where extremely high demagnetizing forces may be encountered. In many applications, it may be magnetized prior to assembly.

VICALLOY

Vicalloy is a carbon-free permanent magnet alloy containing about 10% vanadium, 50% cobalt and the balance iron.

Vicalloy may be fabricated in the form of castings, hot rolled bars and forgings, or cold rolled strip, wire and tubing. After suitable heat treatment, the material is quite readily machinable. Vicalloy is available on special order in bar, strip and thin tape for recording purposes. *For more information, write for "The Magneteer," Vol. 2, No. 1.*

CUNIFE

Cunife is a permanent magnet alloy of copper, nickel and iron which is malleable, ductile and machinable after final heat treatment. The magnetic properties of Cunife are developed by cold working and are directional with the best magnetic properties found only in the smaller sizes of rods or wires.

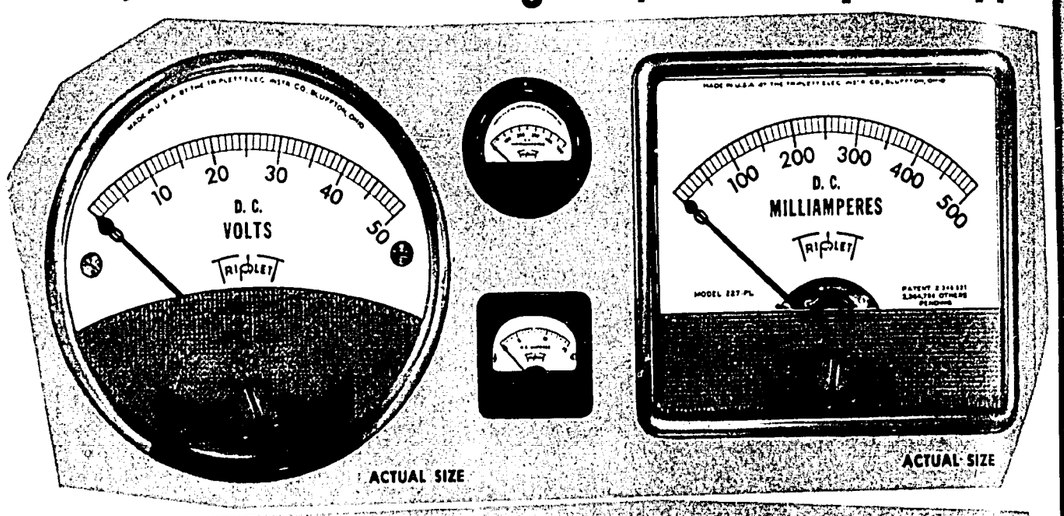
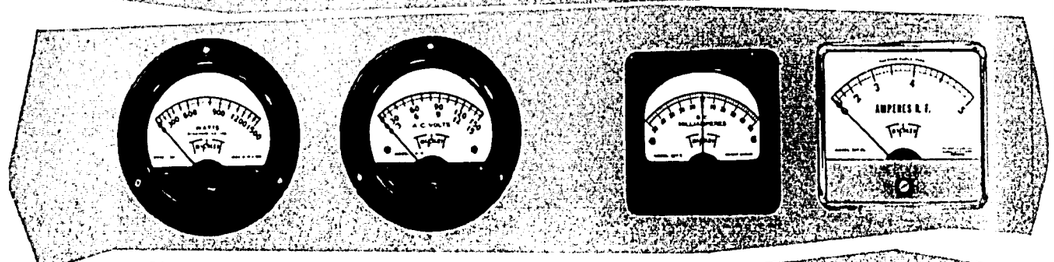
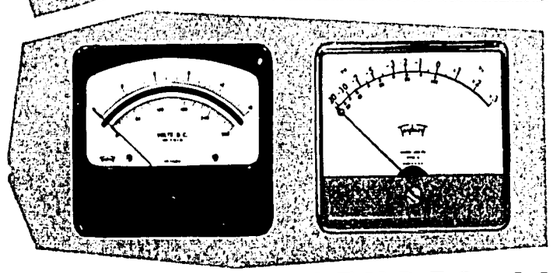
TRIPLETT Reliability... through 15,631 accepted types







Clear plastic (PL) meters feature:

- Longer scale length
- Visibility unlimited
- Light unobstructed—no shadows
- Interchangeability—universal
- Appearance revolutionized

UNIQUE FEATURES AND CHARACTERISTICS

These guarantee superior quality in *all* TRIPLETT meters:

- High torque to weight ratio for extra rugged movement. Specially developed bearings withstand severe vibration and reduce friction to a minimum.
- Bearings are microscopically graded not only for depth and radius, but also for *polish*. Only best quality jewels are used.
- Unique hardening method assures uniformly hard pivots.
- High flux scientifically aged alnico magnets for greatest permeability. Micrometrically balanced all metal frame construction protects bearings against vibration from any direction.
- Simplicity of frame construction assures easy, accurate alignment in servicing.
- Dials are all metal—no paper dials are ever used—will not become abrasive, warp, crack or discolor under normal conditions. (Printing presses in Triplett's own plant allow fast, inexpensive service on special dial requirements.)
- Extra strong ribbed pointers precisely balanced with triple "slide and lock" adjusting weights.
- Insulations provide extra allowance for breakdown voltages.
- All metal parts processed, all molded parts precured to eliminate distortions from stresses and strains.

RAWSON METERS

MULTIMETERS® and REGULAR METERS
AC and DC types, multiple ranges, accuracy ½ of 1%. 2 microamperes to 1 ampere DC. 2 milliamperes to 3 amperes AC.

ELECTROSTATIC VOLTMETERS
Ranges 100 V to 35,000 V, AC or DC. Resistance exceeds million megohms. Can measure static electricity.

FLUXMETERS
Laboratory and production measurements on magnets and magnetic circuits. Single push button return-to-zero.

ROTATING COIL GAUSSMETERS
Our most recent development for measuring magnetic field strengths. Measures from a few gausses to 120 kilogausses.

WATTMETERS
New type, high frequencies, low power factors, very low wattages *write for new bulletin.*

HEADQUARTERS FOR FINE RADIO-TV-ELECTRONIC PRODUCTS

Walsco

GENERAL CEMENT MFG. CO.

SERVICE AIDS • CHEMICALS • ALIGNMENT TOOLS • ELECTRONIC HARDWARE, PLUGS AND JACKS

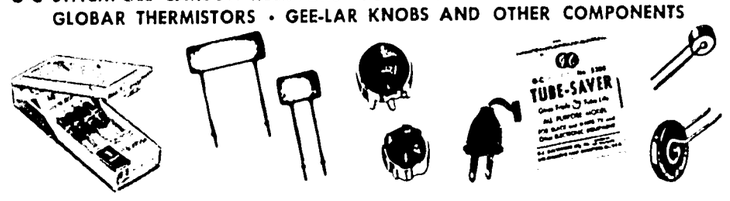
Send For Free Complete Catalog . . . lists 1000's of items

Thousands of quality products available in handy packs or bulk . . . competitively priced and ready for immediate delivery.

GENERAL CEMENT MFG. CO. • Division of Textron Inc. • Rockford, Illinois • Los Angeles, California

G-C ELECTRONICS MFG. CO.

G-C STACKPOLE CARBON RESISTORS • FUSE-SISTORS • SWITCHES • TUBE-SAVERS
GLOBAR THERMISTORS • GEE-LAR KNOBS AND OTHER COMPONENTS



High quality exact replacement components for every type of application . . . handy packs or bulk.

Send For Free Complete Catalog.

Hundreds of stock knobs in all styles, sizes and types for hi-fi, stereo, TV, radio and auto radio. Immediate delivery in any quantity.

G-C ELECTRONICS MFG. CO. • Division of GC—Textron Inc. • Rockford, Illinois • Los Angeles, California

audiotex MFG. CO.

HIGH FIDELITY AND STEREOPHONIC AUDIO ACCESSORIES

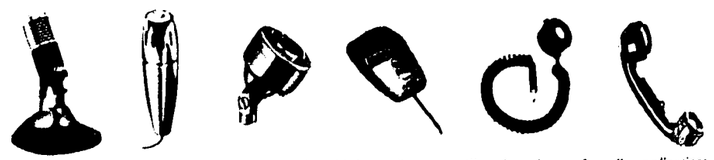
Send For Free Complete Catalog.

Complete line of record and tape accessories designed for better audio and hi-fi performance.

AUDIOTEX MFG. CO. • Division of GC — Textron Inc. • Rockford, Illinois • Los Angeles, California

American Microphone MFG. CO.

MICROPHONES FOR EVERY BROADCAST, P.A., MOBILE OR RECORDING NEED



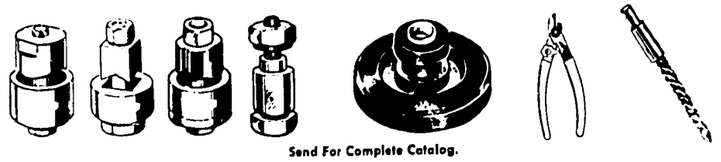
Send For Free Complete Catalog.

Dependable, high quality, versatile microphones for all applications.

AMERICAN MICROPHONE MFG. CO. • Division of GC— Textron Inc. • Rockford, Illinois • Los Angeles, California

Walsco ELECTRONICS MFG. CO.

CHASSIS PUNCHES • PHONO DRIVES • SERVICE AIDS & TOOLS



Send For Complete Catalog.

High quality, specially designed products for every precision application.

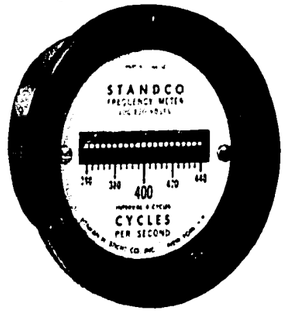
"STANDCO" VIBRATING REED FREQUENCY METERS



HERMETICALLY SEALED and Ruggedized 3½" and 2½" Sizes Meeting all MIL Specs

Normal Frequencies
25, 50, 60 or 400 Cycles
Special Ranges
from 15-1500 cycles

ALSO IN OTHER TYPES

PANEL MOUNTING: 3½" Flush Bakelite.
SWITCHBOARD MOUNTING: 7¼" round surface, or 4½" square semi-flush cases.
PORTABLES: In large or small cases.

INDUCTION MOTORS CORP. ACQUIRES NEW DIVISION, ANNOUNCES LARGE EXPANSION PROGRAM

Company Changes Name to IMC Magnetics Corp.

WESTBURY, NEW YORK, AUGUST 3, 1959—Induction Motors Corporation, one of America's leading manufacturers of electro-mechanical components for the electronics, aircraft and missile industries, is launching a large-scale expansion program, it was announced by Charles Wohlstetter, Board Chairman, and Simon Saretsky, President.

It was also announced that the company has acquired an important new division and is changing its name to one more indicative of the expanding line of products it is offering in the electronic components field.

As of May 1, Induction Motors became IMC Magnetics Corporation, a name designed to make it clear that the company has moved beyond the area of manufacturing motors alone, Mr. Wohlstetter said. Shortly thereafter, construction will begin to double the size of IMC's plant in Westbury, Long Island, from 30,000 to 60,000 sq. ft.

The new IMC division is Gray & Kuhn, Inc., of Roslyn Heights, Long Island. Established by John E. Gray and John J. Kuhn in 1956, it designs and manufactures delay lines, pulse and blocking oscillator transformers, and filters—all of which have constantly widening applications in modern electronic equipment. Its delay lines—of the phase corrected, lumped constant and mamgnetostriction types—are being used in radar systems, color television, electronic computers, pulse generators, telemetering equipment, and broadband oscilloscopes.

Its blocking oscillator transformers—of the low current miniature variety, encapsulated in epoxy resin—are being used for the generation of rectangular pulses in electronic computers, pulse generators, television transmitters and telemetering equipment.

Its filters—of the band-pass and low-pass types—are being used in communication receivers, telemetering devices, and multi-plexing systems,

The Gray & Kuhn line, Mr. Wohlstetter said, fits logically into the IMC family of products and expands the number of components IMC produces for the data processing field. To date, the major percentage of Gray & Kuhn's volume has been for commercial use. Mr. Gray, formerly President of the Harnett Electric Division of Hazeltine Electronics Corp., will continue as President of the new IMC division. Mr. Kuhn, former Executive Vice President of Electro-Mechanical Products, Inc., will remain as Vice President.

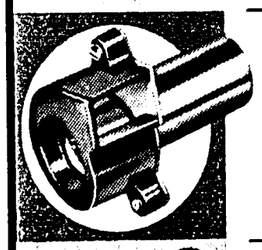
The new division represents IMC's second acquisition. The first, in 1956, was PSP Engineering Company of Maywood, California, the nation's largest designer and manufacturer of aircraft quality solenoids, and also a large producer of high precision synchros, resolvers, and stepping motors. PSP products are in use in speed control systems, launching devices, and general control systems on many of the major missile projects currently in work in the U.S.

Mr. Wohlstetter said the new addition in Westbury will house dust-controlled and air-conditioned manufacturing space and laboratories for the production of servo motors and servo tachometers. He added that the expansion stems from the company's continuous program of broadening its product lines.

IMC PRECISIONEERED MOTORS

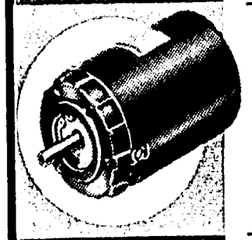
700 FRAME SERVO MOTOR

INPUT: 6-57 volts; 2 phase at 400 cps
FREQUENCY RANGE: 400-1000 cps
NUMBER OF POLES: 2, 4 and 6 poles
TYPICAL PERFORMANCE: 26/26 at 400 cps; No load Speed: 6,200 rpm; Stall Torque: 0.30 oz. in.; Power 3 watts/ø; Inertia: 0.65 gm cn²; Acceleration: 33,000 rad/sec²; Impedance: 133 + j117 ohms
WEIGHT: 1.6 ounces
DIMENSIONS: 0.750 Dia. x 1.062 Length
Bulletin 7F3



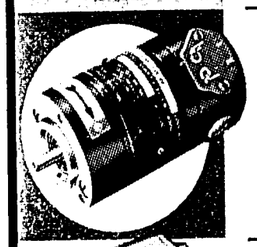
900 FRAME AC MOTOR

FREQUENCY: 320-1000 cps
AIR DELIVERY: (1½" Blower)*; 10 cfm @ 0"sp; 8 cfm @ 0.2"sp
RPM: 7000 @ 400 cps
WEIGHT OZ.: 7
WEIGHT OF MOTOR OZ.: 4½
*Also available in 1" blower size
Bulletin 9F4



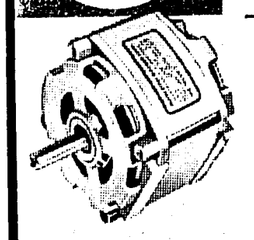
1600 FRAME MOTOR

HORSEPOWER: 1/300-1/10
FREQUENCY: 25-1000 cycles—var. 50-1000 cycles
VOLTAGE: 26-208
POLES: 2, 4, and 6 poles
PHASES: 1, 2, or 3
TYPES: Induction or Synchronous
BEARINGS: Ball or Sleeve
Available non-cooled or self-cooled
APPLICATIONS: Blower, Fan, Gear, Recording and Control



2000 FRAME DC MOTOR

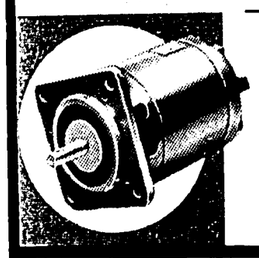
INPUT: 6-115 volts DC
OUTPUT POWER: 1/75 to 1/10 hp depending on speed, duty cycle and cooling
LIFE: 1000 hr brush life; 250 hrs at high altitude. Available with gear speed reducer and/or speed governor, shunt, series, or compound wound.
Bulletin 20F2



2900 FRAME HYSTERESIS MOTOR

VOLTS:	115	T.P.I. (oz.in.):	4.5
CPS:	60	T.P.O. (oz.in.):	5.0
WATTS INPUT:	24	T.St. (oz.in.):	4.0
AMPERES:	.22	CAPACITOR (mfd):	2.5
NUMBER OF POLES:	4	220 VOLTS A.C.:	∫
RPM:	1800	WEIGHT:	1 lb
H.P.:	1/125		

Hysteresis Catalog



3800 FRAME AC MOTOR

INPUT: 26-230 volts AC; 1, 2 and 3 phase
INPUT FREQUENCY: 25-400 cycles
NUMBER OF POLES: 2, 4, 6, 8 and 12 poles
OUTPUT POWER: Induction motors—to 1 hp. Torque motors—10 to 200 oz. in. stall torque; Hysteresis synchronous motors—1/200 to 3/4 hp (can be wound for single, dual or three speed.)
BEARINGS: Ball or Sleeve
WEIGHT: 8-11 lbs.
MOUNTING: Round or square flange and ¾" base

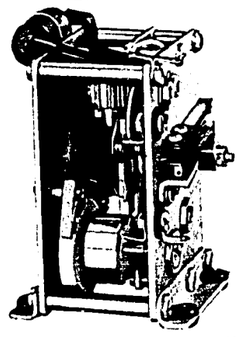
AMGLO Constant Speed DC Motors



Reed controlled, DC Motors offer constant speed from 900 RPM to 1 Rev. Per Day.

- 3 to 110 V. DC operating voltage.
- 0.1 to 2 Watt Input.
- Built to specifications for use in timing, signalling and missile control.

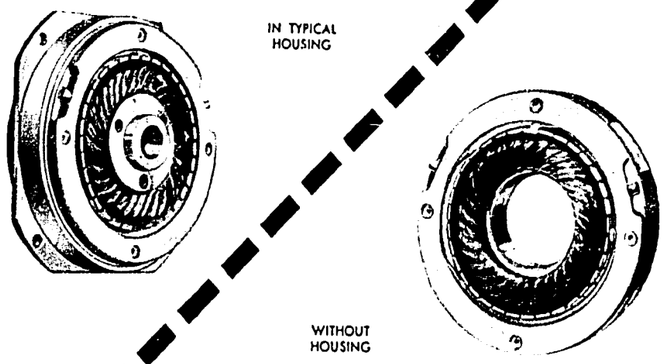
a Complete line of

D.C. TORQUE MOTORS

FOR DIRECT DRIVE SERVO APPLICATIONS



- High angular acceleration by utilizing direct drive (4,000 rad. sec.^{2})
- High peak torque per unit volume
- Minimum control and total power input
- Rapid electrical response
- Optimum shape for compact systems

THIS DESIGN TAKES MAXIMUM ADVANTAGE OF THE PROPERTIES OF DC CONTROL POWER AND PERMANENT MAGNET FIELDS.

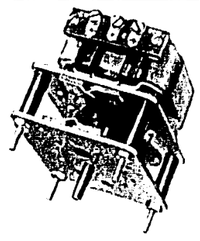
THE MARK OF QUALITY

BARBER COLMAN

quick solutions to various electronic problems

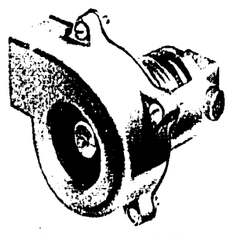
Ultra-Sensitive Relays

Operating on input powers of 40 to more than 1,000 microwatts, the Barber-Colman Micropositioner polarized relay is ideal as a differential relay in electronic plate circuits, as a null detector in resistance bridge circuits, or as an amplifier in photoelectric circuits. Resonant relays also available from Barber-Colman.



Reversible Small Motors

Shaded pole a-c type, up to 1/25 hp . . . adaptable to a variety of control circuits, including transistor and vacuum tube types. Ideal for use with servo mechanisms and other follow-up and positioning units. Available with or without gearheads. A wide range of gear ratios for gear motors . . . open or enclosed.



Small Motors with Blowers

In both a-c and d-c types with cooling fans or blowers for quick, dependable dissipation of heat from tubes, circuit components and other equipment mounted in confined enclosures.

COMPLETE LINE 125° C

SERVO MOTOR TACH GENERATORS

to your precise specification

Oster®

- Both Damping and Integrating types available with parameters to your requirement.
- Complete size range. 8, 10, 11, 15, 18. Can be designed with gear train.
- 54 C to 125 C ambient temperature range.
- Designed to MIL-E 5272.
- Assembled under closely controlled environmental conditions.

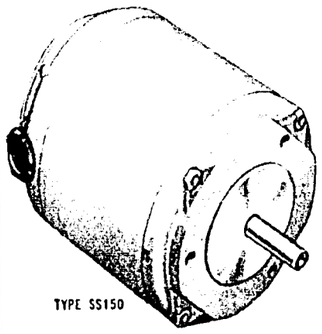
slo-syn
SYNCHRONOUS MOTORS

- INSTANT STARTING, STOPPING, REVERSING
- CAN BE USED AS A D-C STEPPING MOTOR
- 72 RPM SHAFT SPEED WITHOUT GEARS
- STARTS AT FULL 150 OUNCE-INCHES TORQUE



TYPE SS150

A SLO-SYN Synchronous Motor is an enclosed, permanent magnet type synchronous a-c motor adaptable for a wide variety of control applications. At 60 cycles the speed accurately remains at a constant 72 RPM without gear reduction. A single-pole, three-position switch can give instant starting, stopping and reversing control because the motor has three leads only. When used as a stepping or "inching" motor, d-c impulses are converted into either 200 or 400 precise increments of one revolution of the motor shaft.

RATINGS AND SPECIFICATIONS

INPUT	120 volts, 40/70 cycles, 1 phase
OUTPUT SPEED	72 RPM at 60 cycles
CURRENT	0.3 ampere maximum at 60 cycles
TORQUE	150 ounce-inches
WEIGHT	6.5 pounds
SHAFT DIAMETER	3/8"
SHAFT LENGTH	1-3/16"
DIMENSIONS	4-1/4" dia., 4-3/4" depth

SLO-SYN Synchronous Motor types are available with a resistor and a capacitor integrally mounted in an enclosure on the end of the motor if desired. Planetary gear types are also available which have specially-designed speed reduction assemblies to provide speeds of 3.323, 0.665, 0.133 or 0.027 RPM.

CHICAGO MINIATURE LAMPS

Standard or Special Design

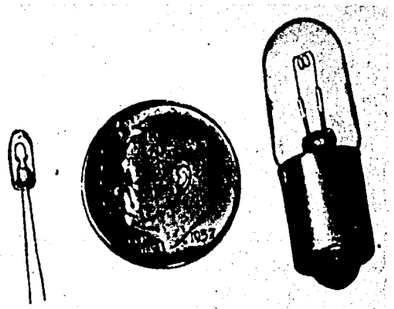
for

ELECTRONIC EQUIPMENT
AIRCRAFT
FLASHLIGHTS—LANTERNS
INDICATORS—COIN MACHINES
AUTOMOTIVE EQUIPMENT
APPLIANCES

Your requirements in miniature lamps, whether engineered for some specific application or for some standard or stock style, (This company produces and stocks the broadest line of standard miniature lamps in the industry.) can be filled most advantageously and most dependably with the Chicago Miniature Lamp Works as your principal source of supply.

Many years of experience plus extensive facilities and resources are available to Chicago Miniature's customers for the production of lamps in any quantity.

Write for Helpful Free Miniature Lamp Chart



ONE BILLION YEARS — OR FIFTEEN SECONDS!

The vast disparity in the planned life expectancy of these two lamps illustrates the versatility of Chicago Miniature's lamp engineering. One of these lamps, initially designed for integral lighting of jet plane instruments, has such a fantastic safety margin that accelerated life tests indicate a calculated life of one billion years!

The other provides a brilliant point of light on a missile for only the first few seconds of flight,—just long enough for tracking apparatus to determine the accuracy of its course. Special lamps for special jobs is a specialty of Chicago Miniature Lamp Works.

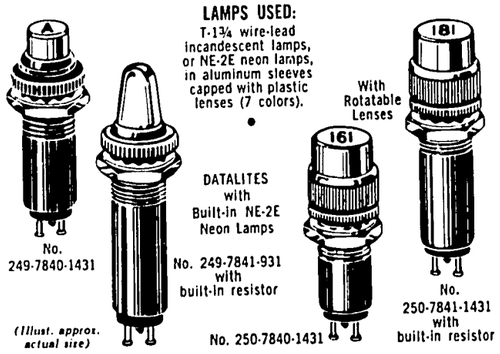
"DATA STRIP"—PANEL MOUNTED "DATALITES" FOR VERTICAL OR HORIZONTAL READING

In this brochure—complete facts on DIALCO's

DATALITES®

For the Computer-Automation Industries

DATALITES by DIALCO are ultra-miniature Indicator Lights specially designed to meet the critical requirements of the computer-automation fields. Made in 2 basic styles: *Lamp Holders with* DIALCO'S own *replaceable Lamp Cartridges* (see above); or integrated DATALITES *with Built-in Neon Lamps* which are *not replaceable* (see below). Ultra-compact, single units mount in ⅜" clearance hole; the twin-lamp assembly mounts in ¾" clearance hole.



DATALITES have fully insulated terminals and conform to all applicable military specifications. Integrated units are available *with or without built-in resistors.* The cylindrical lenses can be hot-stamped with digits, letters, etc. Complete details in *Brochure L-160A.* Send for it now.

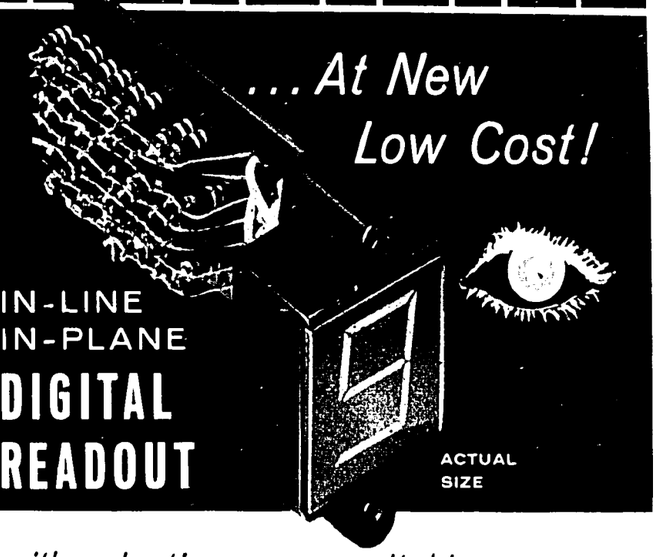
LEGIBILITY

Burton Browne Advertising



with selective group switching

features: Clearly defined characters ½" x ⅞" easy to read even with high ambient light & viewing angles up to 150°. In-plane construction eliminates confusing depth to figures.

Multiple units may be arranged in-line occupying only 1⅛"x1½" panel area per digit. For limited space applications matrix and indicator may be separated.

Selective group switching eliminates complicated relay trees commonly employed for segmented displays.

Input range 150 to 300 volts. Power Consumption only 1 watt max. per digit at 150V.

Cost as low as $5.00 per digit in production quantities.

ELECTRONIC EQUIPMENT DIVISION | ***I.D.E.A., Inc.***
7900 Pendleton Pike—Indianapolis 26, Indiana

Applications include use in digital voltmeters, counters, status boards, missile check-out and countdown equipment, timers, target range units, air route and terminal area traffic control systems, aircraft and control instrumentation.

UNIPLUGS

Model 119—12.6 VDC @ 0.9 amps DC Filament Supply $43.50

Model 125B—6.3 VDC @ 1.5 amps DC Filament Supply $47.00

Model 227—28.0 VDC @ 1.2 amps DC Filament Supply $59.00

Model 123A—800 VDC @ 1.5 ma. Reg. Photomult. Supply $98.00

Model 123A—1000 VDC @ 1.5 ma. Reg. Photomult. Supply $98.00

Model 223—1500 VDC @ 1.5 ma. Reg. Photomult. Supply $159.00

Model 224—2650 VDC @ 1.5 ma. Reg. Photomult. Supply $495.00

Model 212—200 to 300 VDC 150 ma. max. Voltage Regulator $46.50

Model 214—200 to 300 VDC 250 ma. max. Voltage Regulator $58.00

Model 215—150 VDC @ 12 ma., 6.3 VAC @ 0.9 amps Power Supply $44.00

These "Uniplugs" are the most popular for general lab-stock. Delivery is usually from stock. Quantity prices on 10 or more of a kind.

ELECTRONIC POWER SUPPLIES

For Transistors • Strain Gauges • Bridges
For Research • Production • O.E.M.

DESIGNED FOR APPLICATION

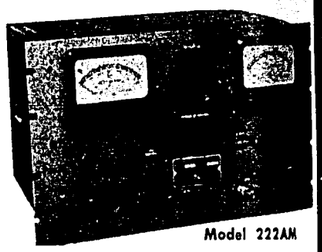
Every Electronic Measurements Power Supply gives the user a carefully selected combination of features . . . the features most sought after in each particular voltage and current range. When desired, these features can be modified to meet unusual applications. For example, the ®Regatron Programmable models can be converted to constant current operation by means of a few simple external connections. A plug-in chopper stabilization unit is also available.

To aid the purchaser in his selection, Electronic Measurements has various specification sheets and bulletins which will be furnished on request. A partial list includes:

Bulletin 765AM . . . the use of programmable power supplies in automatic test and process equipment.

Bulletin 422AM . . . the use and selection of power supplies for laboratory application.

Bulletin 350AM . . . a brief summary of E/M power supplies.



Model 222AM

NOTES:
[1] HAS MODULATION INPUT.
[2] DIAL CALIBRATION GUARANTEED ACCURATE TO 0.25% OR 0.3 V.
[3] DIGITAL-TYPE PRESENTATION WITH A GUARANTEED CALIBRATION ACCURACY OF 0.25% OR 0.5V.
[4] DIAL CALIBRATION GUARANTEED ACCURATE TO 0.3% OR 0.4 V.
[5] DIAL SETTINGS ARE ACCURATE WITHIN 0.1% AND/OR 0.025 V, WHICHEVER IS GREATER. TOLERANCE OF 1-VOLT CONTROL IS ±5% CORRESPONDING TO 0.05 V.
[6] ADD SUFFIX R FOR RACK MOUNTING.
ADD SUFFIX T FOR ENCLOSED TABLE MOUNTING.

GENERAL NOTES: FOR PANEL VOLTMETER AND AMMETER ADD LETTER "M" TO MODEL NUMBER. FOR CHOPPER STABILIZATION ADD LETTER "K" TO MODEL NUMBER.

(R) Registered U. S. Patent Office. Patents Issued and Pending.

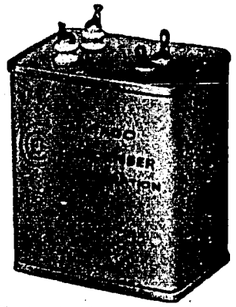
***POWER SUPPLY FOR DC MINIATURIZED!**



The 5 KVDC/5ma unit occupies only 2½ x 3¾ x 3¾ inches, weighs 3¾ LBS. Hermetically sealed, highest quality selenium rectifiers. Long-life, quality capacitors . . . LOW RIPPLE OF 1%! Lightweight, compact. Positive or negative terminal can be grounded to case. Stand-off high voltage terminals for safety.

Also complete line of quality film capacitors. POLYETHYLENE, ACETATE, TEFLON®, POLYSTYRENE, and MYLAR®.

ELECTRONICALLY REGULATED D. C. CONSTANT VOLTAGE POWER SUPPLIES

The output voltage is continuously variable from 200 to 325 volts D.C. for load currents of 0 to 100 M.A. with an input voltage of 105 to 125 volts 60 cycle. Regulation is better than 1%. An isolated A.C. voltage of 6.3 volts at 3 amperes is available at the output terminal connections.

MODEL 3 ILLUSTRATED

MODEL 3 CAB. MTG., VOLTMETER	$69.50
MODEL 1 RELAY RACK MTG.	$52.50
MODEL 2 SUB-CHASSIS MTG.	$49.50
DUAL RACK MOUNT FOR MODEL 2 Mounts Two Model 2 Units in 8¾"	$9.00

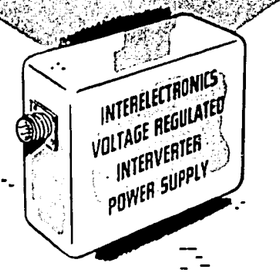
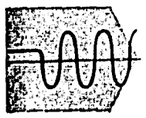
NEW!

DC to DC and DC to AC solid-state power converters voltage regulated, frequency controlled, for missiles, telemetering, gyros, servos





Interelectronics Inverter solid-state thyratron-like elements and magnetic components convert DC to any number of voltage regulated or controlled frequency AC or filtered DC outputs from 1 to 1800 watts. Light weight, compact, 90% or better conversion efficiency.

Ultra-reliable in operation, no moving parts, unharmed by shorting output or reversing input polarity. Complies with MIL specs for shock, acceleration, vibration, temperature, RF noise.

Now in use in major missiles, powering telemetering transmitters, radar beacons, electronic equipment. Single and polyphase AC output units now power airborne and marine missile gyros, synchros, servos, magnetic amplifiers.

Interelectronics — first and most experienced in the DC input solid-state power supply field, produces its own solid-state gating elements, all magnetic components, has the most complete facilities and know-how—has designed and delivered more working KVA than any other firm!

For complete engineering data write Interelectronics today, or call LUdlow 4-6200 in N. Y.

HIGH POWER at Transistor Voltages!

NEW MRC DV-III TRANSISTOR POWER SUPPLY

The DV-III offers unparalleled performance at an unbelievably low price! **SAVES MONEY**—Replaces several high-priced power sources! One versatile DV-III features all these outputs: either 0-60 V., D.C. or 0-30V., D.C. or 0-115 V., A.C. **SAVES TIME**—Ends annoying battery and meter hook-up! The portable, rugged MRC DV-III provides continuously variable output voltage control; 2-range voltmeter; 2-range milliameter; magnetic circuit breaker; pilot lights.

SPECIFICATIONS—**D.C. Range #1:** 0-60 V. @ 0-1 Ampere; .05% Ripple at max. output. **D.C. Range #2:** 0-30 V. @ 0-2 Amperes; .10% Ripple at max. output. **A.C. Range:** 0-115 V. @ 1.2 Amperes. **DIM.:** 7" x 11" x 8½". **WT.:** 24½ lbs.

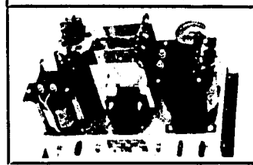
GATES Power Supplies Unlimited

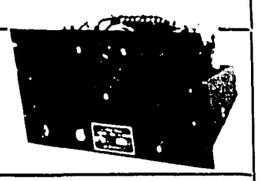


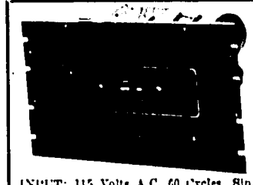
SILICON POWER SUPPLY
Model GX30-20

INPUT: 115 Volts, 1 Phase, 60 Cycles
OUTPUT: 0-34 Volts D.C. 0-20 Amperes, Continuous Duty
REGULATION: No load to Full load: 18%
RIPPLE: Below 1%
Silicon Rectifiers, High Efficiency
Dimensions: 10"x17"x3"
PRICE: $185.00 NET

SELENIUM POWER SUPPLY
Model G48-6FM

INPUT: 115 Volts A.C. 60 Cycles—Single Phase
OUTPUT: 0-48 Volts D.C., 0-6 Amperes
CONTROL: Continuously Variable over Entire Range
REGULATION: 15% No Load to Full Load
RIPPLE: 1% R.M.S.
DIMENSIONS: 19" Wide, 13" Deep x 10½" High, Fits RETMA, Western Electric Racks
PRICE: $190.00 NET



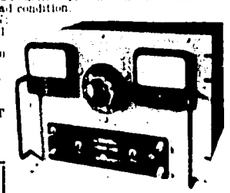


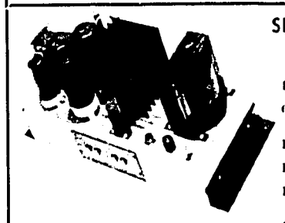
SILICON RACK MOUNT SUPPLY
Model GX30-10

INPUT: 115 Volts A.C. 60 Cycles, Single Phase
OUTPUT: 30 Volts D.C. 0-10 Amperes Continuous Duty
REGULATION: 10% No Load to Full Load
RIPPLE: Below 0.5% R.M.S.
DIMENSIONS: 8¾"H x 19"W x 10"D
PRICE: $125.00 NET

AIRCRAFT BATTERY ELIMINATOR
Model G10IF May be used for Rack or Bench

INPUT: 115 Volts A.C., 60 Cycles, Single Phase
OUTPUT: 0-28 Volts D.C., 0-20 Amperes, Continuous Duty
RIPPLE: 1% R.M.S.
Unique overload device prevents needle slam and shows overload condition.
REGULATION:
D.C.V. at full load: 28
D.C.V. at 1/10 load: 28
METERS: 2% Accuracy
PRICE: $200.00 NET

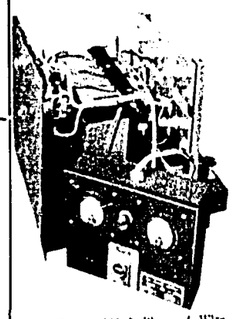




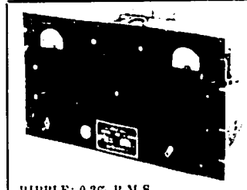
SELENIUM POWER SUPPLY
Model GX30-5

INPUT: 115 Volts A.C. 60 cycles, single phase
OUTPUT: 30 Volts D.C., 5 Amperes D.C. Continuous Duty
REGULATION: 12% No Load to full load
RIPPLE: Below 1% R.M.S.
DIMENSIONS: 7" Wide x 15" Long & Overall Height 10"
PRICE: $70.00 NET

SILICON REMOTE CONTROL



INPUT: 208/220 3 Phase, 4 Wire, 60 Cycles, AC
OUTPUT: 30 Volts D.C. 0-100 Amperes DC Continuous Duty
REGULATION: No Load to Full Load 1%
RIPPLE: 4% RMS
DIMENSIONS: Main Unit Supplied with Grilled Cover 19" Wide 17⅛" High 21" Deep



SILICON POWER RECTIFIER
Model G30-10FR

INPUT: 115 Volts A.C. 60 Cycles, Single Phase
OUTPUT: 0-30 Volts D.C., 0-10 Amperes, continuous duty
CONTROL: Continuously Variable over entire range.
REGULATION: 6% No load to full load
RIPPLE: 0.2% R.M.S.
METERS: 2% Accuracy
DIMENSIONS: 19" Wide x 13" Deep x 10½" high
PRICE: $175.00 NET

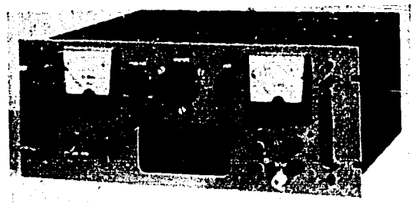
1705 Taylor Avenue — New York 60, New York
TYrone 2-6490

For details, circle #464 on Reader Service Card

MID-EASTERN ELECTRONICS, INC.



Transistorized Power Supplies ME Series

- **Both Magnetic and Transistorized Regulation**
- **Short circuit Proof**
- **Sixty-four Basic Models provide complete flexibility.**

SPECIFICATIONS

Input: 105-125 VAC, 60 cps, Single Phase.

Output Voltage: Continuously variable over entire range specified with vernier control at all settings.

Output Current: Current specified applies to entire DC voltage range and for entire input range.

Duty Cycle: Continuous duty at full load.

Polarity: Output completely floating; either positive or negative side may be grounded. Units can be series connected.

Regulation: *Line: 0.05% for changes from 105-125 VAC.

***Load:** 0.1% for changes from zero to full load.

Ripple: Less than 0.01% or 1 mv whichever is greater

Recovery Time: Less than 50 microseconds.

Overshoot: Less than 1% of the voltage setting.

Regulated AC Output: 120 VAC, 60 cps, ±½% regulation at rear receptacle. Power equals DC power rating of supply.

Electrical Design:
Completely solid state. Only 2.5 amperes per transistor (rated at 15 amperes continuous) permitted; maximum junction temperature at maximum ambient limited to 80°C.—extreme reliability has resulted from these and similar conservative measures. Modular design permits rapid servicing.

Mechanical Design:
All components completely accessible. All wiring harnessed and located on the outer surfaces of the sides and back of "U" shaped chassis. Removing dust cover exposes all wiring and components.

Overload Protection: Automatic protection afforded by magnetic line voltage regulation circuit. No fuses necessary; automatic overload circuit cuts off supply when output current exceeds a preselected point, which is continuously variable from 20 to 120% of rated current by front panel control. Overload circuit can be defeated for charging large banks of capacitors. Continuous operation into short circuit will not damage unit in any way.

External Sensing: All Mid-Eastern supplies are equipped for remote load change sensing to maintain regulation at the load.

Ambient Temperature: 0 to 50 Degrees C, continuous duty at full load.

Cooling: High volume axial flow fan with air intake at front panel grill.

Style: 19" rack panel, engraved. Gray baked enamel finish. Black anodized dust cover, irradited chassis 15" deep.

Terminations: 5 way binding posts at front, screw terminals at rear, 6' heavy duty line cord.

Metering: 3½" 2% precision meters supplied on "M" models. Add $30.00.

* Or 10 mv whichever is greater. Regulation specs. applicable down to 5V.

Onan ELECTRIC PLANTS

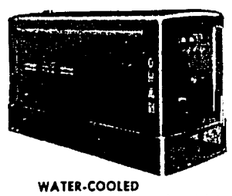
ELECTRIC PLANTS

Onan ELECTRIC PLANTS

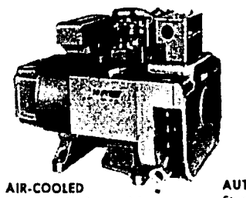
Emergency standby models for

- RADIO STATIONS
- TV STATIONS
- MICRO-WAVE RELAY
- MUNICIPAL SIGNALS

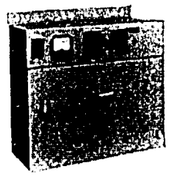
Provide electric power for communications and other uses when utility service is interrupted. Driven by gas or gasoline engines. Start automatically when power is interrupted, stop automatically when it is restored. Sizes from 1,000 to 150,000 watts in all standard voltages, 50 or 60-cycle . . . for any emergency power need.



WATER-COOLED
10 to 230KW. Housed models to 80KW. Unhoused models available in all sizes. Powered by heavy-duty gasoline or Diesel engines.



AIR-COOLED
1 to 10KW. Powered by one or two-cylinder Onan engines. Vacu-Flo cooling permits enclosed installations.

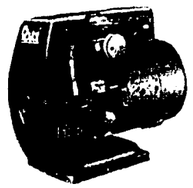


AUTOMATIC CONTROLS
Start and stop the electric plant automatically as needed. Models for all Onan plants. Instantaneous or timed cranking.

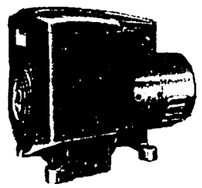
Portable and mobile models for

- MOBILE RADIO AND TV UNITS
- MARINE RADIO, RADAR
- FIELD RECORDING
- CHARGING 2-WAY RADIO BATTERIES

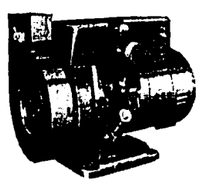
Lightweight, air-cooled types, 500 to 10,000 watts. All standard voltages A.C. Also D.C., battery charging and combination A.C.-D.C. models. Smaller units can be hand carried. Vacu-Flo cooling for enclosed installations.



SINGLE-CYLINDER, A.C.
500 to 2,500 watts. Lightweight. Can be equipped with aluminum tube frame for hand carrying.



TWO-CYLINDER, A.C.
3,500 to 10,000 watts. Smooth-running, high capacity. High speed trailers available.



BATTERY CHARGERS
D.C. output only, or one and two KW, A.C. with 30 amps D.C. for battery charging.

See your Onan distributor or write for information

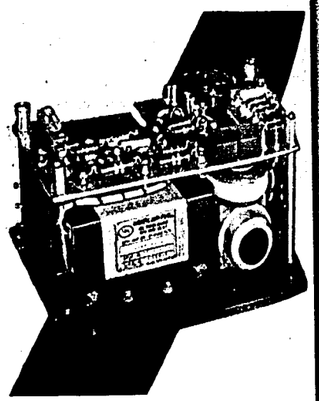
New PRECISION FREQUENCY

STATIC INVERTER SUPPLY

INPUT 28V D.C. ± 10%
OUTPUT *Nom.* 115V ± 2%
400 CPS ± 0.01%
1 Ø (2- or 3-phase output available)
RATINGS: 30VA 50VA 100VA
Higher ratings available.

APPLICATION:
For gyro wheel supplies and where precise 400 cycle voltages are required in aircraft, radar and missile computers.



FEATURES:
PRECISION OUTPUT FREQUENCY
RUGGED
EXCELLENT WAVEFORM
SIMPLICITY OF CIRCUITRY
FAST STARTING TIME
GOOD VOLTAGE REGULATION throughout an adjustable range
ISOLATED CASE DESIGN
HIGH RELIABILITY
VIBRATION ISOLATED
COMPACT
LIGHTWEIGHT
MILITARY SPECIFICATIONS

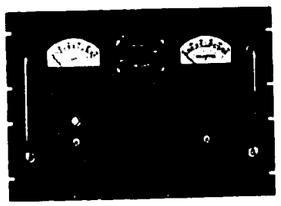
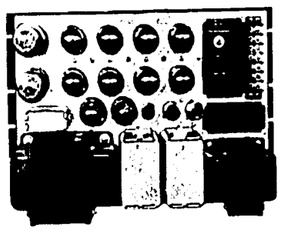
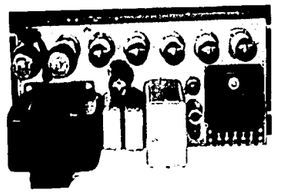
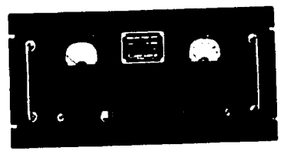
POWER SUPPLIES









VOLTAGE REGULATED POWER SUPPLIES

Featuring

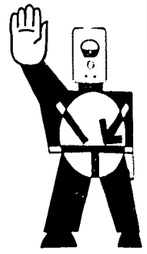
- .05% regulation for load or line variations
- 500 microvolts ripple
- 50 microseconds response time
- 10-turn voltage controls for minimum noise
- Karma (20-PPM) wire wound, low t.c. error sensing resistors
- 50 hour pre-aging
- Meters included in feed back loop for low low output impedance
- Separately fused line and load circuits
- Separate AC and DC switches
- JAN quality components
- Input: 105-125 v. 55-65 cy. single phase
- 28 Models available from stock

POWER DESIGNS INC. *presents*

SEMICONDUCTORIZED POWER SUPPLIES

featuring

ROBOTEC · HEATRAN · VOLTRAN PROTECTION



Power Designs' *Semiconductorized* Power Supplies utilize the unique properties of semiconductor devices to create new circuit concepts achieving performance, efficiency and reliability hitherto unattainable. These instruments are NOT the conventional transistorized versions of vacuum tube regulators.

ROBOTEC*

is an inherent electronic circuit producing simultaneous voltage and current cutoff upon external short circuit. The "ROBOTEC" circuit operates in 30 microseconds holding the power supply cut off until manually reset and reducing line input power to a negligible value. If an external short circuit exists the power supply cannot be turned on.

HEATRAN

is a transistorized circuit continuously monitoring dissipation in the series power transistors of the regulator system. Dissipation above a preset maximum value is automatically transferred into external vitreous enamel resistors extending from the rear of the equipment in a perforated metal cage. "HEATRAN" thus permits fewer transistors for a given power supply capacity, more compact equipment with increased reliability and practical convection cooling.

VOLTRAN

is a transistorized circuit continuously monitoring the voltage drop in the series power transistors of the regulator system. Voltages above a preset maximum are instantaneously absorbed thus protecting these transistors against line and load transients and permitting more conservative voltage derating.

40	KM93	Rack	12¼"	19"	13"	—
	KM93B	Bench	14"	22"	15"	B

FEATURES

- Vacuum Varnish Impregnated Magnetic Components.
- 4½" Rectangular 2% Accuracy, D.C. Panel Meters (3½" on small units).
- Controls include power switch, line and load fuses, pilot light, voltage control knob, output binding posts.
- Voltage Regulation: 1/10 Load 36 Volts Full Load 32 Volts
- Panel Type Carrying Handles.
- Convection Cooled Continuous Duty Ratings.

Bulletin No. 102

0-32 V.D.C. 4% Ripple

Input: 208 V.A.C. 60 Cycles, 3 Phase

Amps.	Model	Style	H	W	D	Fig.
100	FR100	Floor	46"	22"	18"	A
200	FR200	Floor	46"	22"	24"	A

FEATURES

- Fully Self-Protecting Circuit.
- Pushbutton Operated Magnetic Contactor.
- Indicating Type AC Input Fuses.
- Adjustable Overcurrent Control in D.C. Circuit.
- Thermal Overload Device on Rectifier.
- Overload Warning Light and Reset Button.
- 4½" Rectangular, 2% Accuracy Panel Meters.
- Low Voltage Regulation: Approx. 8%
- Ball Bearing Type Casters.
- Input Receptacle and Mating Plug.
- All receptacles, terminals and controls clearly designated.
- Budget Priced.

Bulletin No. 155

0-110 V.D.C. 1% Ripple

Input: 115 V.A.C. 60 Cycles, Single Phase

Amps.	Model	Style	H	W	D	Fig.
2.5	RS10	Rack	8¾"	19"	9½"	D

	RS40B	Bench	19¼"	19"	15"	C

FEATURES

- Vacuum Varnish Impregnated Magnetic Components.
- Non-Aging Rectifiers (Germanium or Silicon).
- 4½" Rectangular 2% Accuracy D.C. Panel Meters (3½" on small units).
- Controls include Power Switch, Line and Load Fuses, Pilot Light, Voltage Control Knob and Output Binding Posts.
- Both D.C. Terminals above ground and isolated from A.C. Line.
- Panel Type Carrying Handles.
- Convection Cooled Continuous Duty Ratings.

Bulletin No. 204

TRANSISTOR REGULATED POWER SUPPLIES

3-32 Volts D.C. ± ½% Regulation*
Input: 105-125 volts A.C., 60-400 cycles, Single phase

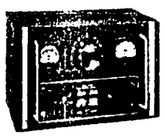
1	TR10B	Bench	10	TR30B	Bench
5	TR20	Rack	15	TR40	Rack
5	TR20B	Bench	15	TR40B	Bench

FEATURES

- Zener Diode Reference.
- Ripple less than 5 M.V.
- Vacuum varnish impregnated magnetic components.
- Short Circuit Protection.
- Controls include power switch, fuses, pilot light, voltage control knob and output binding posts.
- 2% Accuracy Panel Meters.
- Both outout terminals above ground and isolated from A.C. line.
- Panel type carrying handles.
- Continuous duty ratings.
- High efficiency.

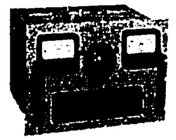
* Line and Load



GENERAL PURPOSE UNITS

OUTPUT: 0-30 Volts D.C. Unfiltered Full Wave.
INPUT: 115 V.A.C., 60 Cy., 1 ϕ.
Model GM72 5 Amperes
Model GM78 10 Amperes
Model GM84 20 Amperes
Model GM90 30 Amperes
FEATURES: 2% accuracy Panel Meters, Line and Load Fuses, Switch, Pilot Light, Binding Posts.

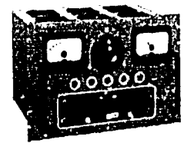
Bulletin No. 179



AIRCRAFT BATTERY SUBSTITUTE

OUTPUT: 0-30 V.D.C., 20 Amperes.
RIPPLE: Less than 1%.
INPUT: 115 V.A.C., 60 Cy., 1 ϕ.
REGULATION: 1/10 Load 35 Volts Full Load 30 Volts
FEATURES: Ammeter overcurrent protection circuit prevents needle 'slam' when starting inverters & motors.
MODEL KM88 ...Rack Mount
MODEL KM88B...Bench

Bulletin No. 100



DUAL RANGE POWER SUPPLY

OUTPUT: 0-32/64 V.D.C., 40/20 Amps.
RIPPLE: Within 1% of aver. DC.
INPUT: 115 V.A.C., 60 Cy., 1 ϕ.
FEATURES: Thermal overload protection, indicating line and load fuses, overload warning light, dual range voltmeter.

FROM MILLIWATTS TO KILOWATTS

HIGH VOLTAGE POWER SUPPLIES AND EQUIPMENT

We have sold quantities of these power supplies to laboratories, industrial concerns, the government and universities. Only the best available selected material goes into these units, so that you will have many years of dependable service. Only a few of our standard models are shown below. Quotations on special supplies cheerfully given.

PRECISE MEASUREMENTS COMPANY

HIGH VOLTAGE POWER SUPPLIES

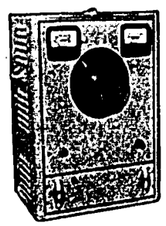
One of the most popular power supplies on the market. Completely redesigned for greater ruggedness and convenience of operation. Widely used for powering electronic equipment and for routine breakdown and insulation testing. Output voltage is well filtered D.C. which is adjustable with convenient front panel control. Input is 115 Volt, 60 cycle A.C. Equipment is available without meter, with one meter (4½"), with two meters, or with larger 6" precision 1% mirror scale movement. Regulated models offer closely stabilized output voltage regardless of line or load changes.

Model		Maximum Voltage	Price	Price Regulated Model
6001	With Kilovolt Meter	1,000	$ 75.00	
6000		2,500	60.00	
6000-A	With Kilovolt Meter	2,500	80.00	$120.00
6005		5,000	75.00	
6005-A	With Kilovolt Meter	5,000	95.00	135.00
6010		10,000	85.00	
6010-A	With Kilovolt Meter	10,000	105.00	145.00
6015		15,000	95.00	
6015-A	With Kilovolt Meter	15,000	115.00	155.00
6025-A	With Kilovolt Meter	25,000	175.00	205.00

MIRROR SCALE HIGHER ACCURACY METERS: Recommended where more exact settings or measurements are needed. Meter size has been increased to 6 inches for easier reading. Price $35.00 additional on any meter equipped model. ..... ADD $35.00

TWO METER MODEL .....

INDUSTRIAL POWER SUPPLIES



Regulated Types Available

These industrial type power supplies are built for service and efficiency. All are of the transformer type and employ husky components that have been selected for their power handling capacity. Controls are arranged so that operation is greatly simplified and a number of safety features are built in for maximum protection of personnel and equipment. Output is continuously variable from zero to full rated value. Polarity reversing models (as illustrated) can be had at additional cost.

Standard hum level 5% or less. .01% to 1% ripple available. All power supplies have automatic overload cutout control circuits. Regulated models available.

Model	Voltage	Current	Price
F-500V	0-500	3 Amp	$800.00
F-6001	0-1000	2 Amp	975.00
F-6002	0-2000	1 Amp	985.00

F-6100-T	0-100,000	½ MA	1100.00

HEAVY DUTY POWER SUPPLIES

For use in applications where high voltages at extra high currents are required. Illustrated is our 100 KW Model, rated for 0 to 7,000 Volts at 14 Amperes DC. This unit is housed in a single convenient cabinet. Output voltage is regulated against line and load changes. Voltage is smoothly adjustable from zero to full output. Automatic circuits protect against overvoltage or over current conditions, turning off main power in a split second. Use of special transformer construction allows constant load drain at full rated output. All power supplies in this series are available with fixed or adjustable output and with or without regulation.

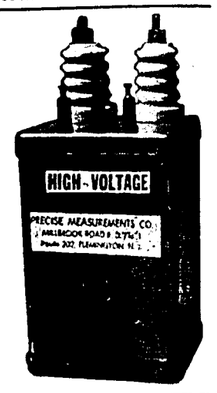
Model	Voltage	Current
A-10	0-1000	5 amperes
A-30	0-3000	5 amperes
A-31	0-3000	10 amperes
A-32	0-3000	20 amperes
A-50	0-5000	5 amperes
A-51	0-5000	10 amperes
A-72	0-7000	15 amperes
A-100	0-10,000	5 amperes
A-110	0-10,000	10 amperes
A-300	0-30,000	5 amperes

TRANSFORMERS, HIGH VOLTAGE

For experimental, industrial or production applications. These units are small and compact and rated for constant service. Primary designed for 105/115/125 Volts 60 Cycle. Secondary winding has half voltage tap. Only standard models are listed, other voltages and currents available on order.

Model	Voltage	Model	Voltage
1 KVT	1 KV	10 KVT	10 KV
2 KVT	2 KV	15 KVT	15 KV
3 KVT	3 KV	25 KVT	25 KV
5 KVT	5 KV	50 KVT	50 KV

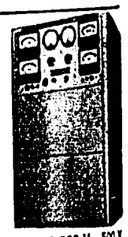
PACKAGED POWER SUPPLIES



These conveniently packaged power units will be found ideal for applications requiring minimum size and weight. Features isolated high voltage terminals permitting either the positive or negative side to be grounded. Rectifier tubes are operated from separate filament transformers so that DC output voltage can be varied from zero to full rated value. Selenium rectifier types have extra cells to assure operation under high line voltage or light loading. All standard units have well filtered DC output. Power packs with AC output available on order.

Model	Output Voltage	Current	Model	Output Voltage	Current
05-KV-5MA	500 Volts DC	5 Ma.	20-KV-1MA	20 KV DC	1 Ma.
1-KV-5MA	1 KV DC	5 Ma.	20-KV-5MA	20 KV DC	5 Ma.
2-KV-5MA	2 KV DC	5 Ma.	30-KV-1MA	30 KV DC	1 Ma.
5-KV-1MA	5 KV DC	1 Ma.	30-KV-5MA	30 KV DC	5 Ma.
5-KV-5MA	5 KV DC	5 Ma.	50-KV-1MA	50 KV DC	1 Ma.
10-KV-1MA	10 KV DC	1 Ma.	50-KV-5MA	50 KV DC	5 Ma.
10-KV-5MA	10 KV DC	5 Ma.	75-KV-1MA	75 KV DC	1 Ma.
15-KV-1MA	15 KV DC	1 Ma.	100-KV-1MA	100 KV DC	1 Ma.
15-KV-5MA	15 KV DC	5 Ma.			

CONSTANT CURRENT POWER SUPPLIES



Designed for application where output current must remain constant regardless of loading resistance changes. Used for magnet fields, plating applications, gaseous lamps. Dependable magnetic current stabilizer has no moving parts, no tubes, no transistors to replace. Simply set current to desired level, no balancing or other adjustments needed. Ideal for lamp operation since operating state ionizing voltage in no way affects lamp current. Standard hum level 5%. Lower hum levels available on order.

Model	Maximum Voltage	Maximum Current
C-25-700	25 Volts	700 Amperes
C-70-70	70 Volts	70 Amperes
C-500-10	500 Volts	10 Amperes
C-Duel 500-10	500 or 1,000 Volts	10 or 20 Amperes
C-800-2	800 Volts	2 Amperes
C-1000-100	1000 Volts	100 Amperes

Duel 500 V - 500 V, 10 Ampere Power Supply. Isolated outputs may be series or paralleled.

AC INSULATION AND BREAKDOWN TESTERS

Used in testing insulation where AC voltages are desired. Dual instruments are also available which provide choice of AC or DC output with simple toggle switch selection. Units include kilovoltmeter, current meter and automatic overload cutout circuits.

Model	Voltage	VA	AC	AC and DC Price
3000	0 to 3,000	75	$150.00	$ 250.00

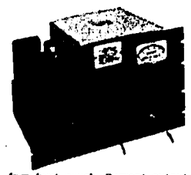
SPELLMAN HIGH VOLTAGE POWER SUPPLIES

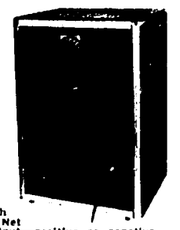


MODEL PN-30R REVERSIBLE POLARITY

Continuously Variable 1-30KV Unregulated DC Power Supply

A light, compact unit in wide use for insulation testing, precipitators and laboratory research. Polarity reversible from front panel. Current output approx. 2 ma. at 30KV; 250 microamperes at 30KV. Input: 110V AC 60 cycles. Dimensions: 19" x 10½" x 13" deep. ..... $225 Net

With meter installed on front panel ..... $275 Net

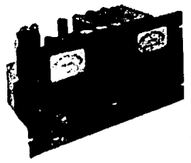


MODEL LAB-90 RF TYPE CONTINUOUSLY VARIABLE 0-90KV REGULATED DC POWER SUPPLY

Output current .7 ma. at 90KV; 1 ma. at 80KV; 2 ma. from 40KV down. Regulation better than 1% throughout entire range. Dimensions in cabinet: 28" high, 21¾" wide, 18" deep.

LAB-90 Complete with meter ..... $900 Net

Specify polarity output—positive or negative



MODEL RG-5 5KV DC REGULATED POWER SUPPLY

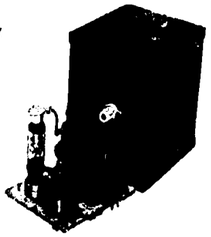
Output current 2 ma. Regulated against line and load 1%. Variable 3 to 7KV. Complete with Current and Volt Meters . $250 Net

MODEL RG-10 10KV DC REGULATED POWER SUPPLY

Output current 2 ma. Regulated against line and load 1%. Variable 7 to 12KV. Complete with Current and Volt Meters . . $260 Net

MODEL RG-15 15KV DC REGULATED POWER SUPPLY

Output current 2 ma. Regulated against line and load 1%. Variable 12 to 17KV. Complete with Current and Volt Meters . . $275 Net



MODEL 4575 5KV-1 ma. DC POWER SUPPLY

For an output voltage of 5KV DC at 1 ma., the low voltage input requirement is 230V at 50 ma. By varying the DC input the output voltage can be varied from approximately 1KV to 7½KV. Dimensions: 5¾" high x 5" deep x 4¼" wide. In completely enclosed metal housing.

MODEL 4575 ..... $32.50 Net

MODEL 4575-2 Same as above with 2 ma. output at 5KV ..... $42.50 Net

MODEL 4575PN—Same as 4575 except reversible polarity. Either positive or negative output may be grounded or left floating ..... $42.50 Net

MODEL 4575-2 PN—Same as 4575-2 except reversible polarity. Either positive or negative output may be grounded or left floating . . $82.50 Net

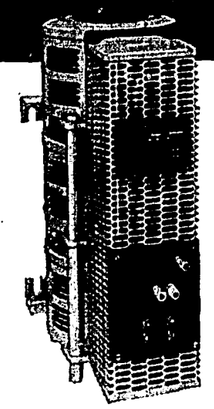
VARICELL D C

adjustable

A-C/D-C power supply



- VERSATILE... EITHER A-C OR D-C OUTPUT
- SMALL, COMPACT
- LOW COST PER KVA
- GOOD REGULATION
- LOW PERCENTAGE RIPPLE
- FULL CURRENT RATING AT ANY VOLTAGE SETTING

Here is a small, compact unit designed to provide a source of adjustable low a-c or d-c voltages from a-c power lines. Features greater equipment utilization and flexibility . . . a single unit does the job of several! Can be used independently or as a component. Essentially consists of a 3-phase, low voltage POWERSTAT variable transformer combined with a static d-c power supply. The power supply uses highly efficient silicon rectifier cells connected for full-wave 3-phase operation. Filtering is usually not required because the low ripple content is approximately 4.2% and ripple frequency 360 cycles at a supply frequency of 60 cycles. The a-c or d-c regulation is approximately 10% at the maximum voltage setting.

VARICELL TYPE V4050-3 RATINGS

A-C INPUT: 240 volts, 50/60 cycles, 3-phase (Primary delta connected)

A-C OUTPUT: 0-30 volts, 40 amperes, 3-phase (Secondary delta connected); 0-50 volts, 25 amperes, 3-phase (Secondary wye connected)

D-C OUTPUT: 0-35 volts, 50 amperes (Secondary delta connected); 0-60 volts, 30 amperes (Secondary wye connected)

The a-c and d-c outputs cannot be simultaneously loaded or externally interconnected. The a-c output can be used either single or three phase.

"TABTRAN" UNIVERSAL RECTIFIER TRANSFORMERS Dsgnd for F.W.B., C.T. & H.W.

Rec'd Volts (DUAL† 6-9-11-18-& 6-9-11-18
Sec. Rec'ds 8-1-6-9-12-15-18-21-24-27-30-33-36 Volts.
Pri.-115 VAC, *115 & 230 AC

TR1001	1 Amp per each Rec'd Windings	$4.75
TR1002	2 Amp per each Rec'd Windings	6.60
TR1003	5 Amp per each Rec'd Windings	8.70
TR1004	8 Amp per each Rec'd Windings	10.80
TR1005	12 Amp per each Rec'd Windings	13.75
TR1006	24 Amp per each Rec'd Windings	24.00
TR1007*	50 Amp per each Rec'd Windings	56.00
TR1008*	100 Amp per each Rec'd Windings	106.00

† Windings to be Series at Amps Shown; Parallel Secds @ 2X Amps

"TABTRAN" UNIVERSAL RECTIFIER CHOKES

CR5001	1 Amp, 0.1 Henrys 1.4 Ohm	$3.75
CR5002	2 Amp, 0.1 Henrys .67 Ohm	5.60
CR5007	4 Amp, .01 Henrys .1 Ohm	5.95
CR5003	5 Amp, .07 Henrys .6 Ohm	9.45
CR5004	12 Amp, .01 Henrys .1 Ohm	14.45
CR5005	24 Amp, .004 Henrys .022 Ohms	27.00
CR5006	50 Amp, .001 Henrys .001 Ohm	40.90

"TABCAP"® FILTER CAPACITORS

CE15SM	6000 MFD 15 V Wkg	$2 each
CE50ZM	2000 MFD 50 V Wkg	$4 each
CE25Ø5M	500 MFD 250 V Wkg	.50 each
Brackets for capacitors		25c each

"TABTRAN" ISOLATION & CONTROL XFMRS
Enclosed Power Type Elec/Static-Shielded

Primary 115/230V & Secondary 115/230V 1ø 60 cps.
Also on SPECIAL ORDER 230/460V Specify!

TPP050/50W	$11	TPP075/75W	$13

DESIGN • PRODUCTION • ASSEMBLY

Completely Integrated Service

Printed Circuits for Military and Industrial Electronic Equipment

"Packaging" of circuits, from schematic diagram into Printed Circuit or Modular form.

Production in small or medium quantities – prototypes to a few thousand boards.

Secondary operations: Plating – Fabrication – Assembly – Dip Soldering – Encapsulation

Rigid Inspection and Quality Control insure the production of High Reliability Printed Circuits to Exacting Specifications.

Ansley | *PLUS* | Module

Adds a third dimension to printed circuitry. It may answer your design problem. Ask us for details.

CUSTOM PACKAGING

General Electric's Custom Packaging Service creates small, lightweight, high density electronic circuit modules tailored to specific application and space requirements. Expert engineering and proven manufacturing knowledge transform customer requirements into small, self-supporting electronic packages — inverters, flip-flops, encoders, amplifiers. Provide only your design requirements and receive tested prototypes in the shortest possible time. 227-26

TRANSISTORIZED *DIGITAL* SYSTEM BLOCKS

The concept of completely transistorized system blocks
for use in the data handling field
was pioneered and commercially developed by NAVCOR.
Now — utilizing these system blocks,
the pulse generating and programming demands
of all projects involving switching transistor
circuits up to 200KC are quickly satisfied.
Creative engineering by NAVCOR
has produced units that can be readily interconnected
by back panel patch-board plugs to build-up
complete data handling systems.
These compatible modules are available from stock...
delivered complete and attractively packaged,
ready to work immediately as an important part
of your transistor development program.
In addition, Navigation Computer Corporation
has the facilities and experience
to develop system blocks to specifications.

"FIRST IN PRINTED CIRCUITS"

"World's Largest and Most Experienced Independent Manufacturer"

GLEN COVE, NEW YORK
Photocircuits CORPORATION
ORiole 6-8000
TWX: GL 4761 • Cable: PHOCIRCO

PRODUCTION CAPACITY
complete job shop facilities

You can have the world's largest and most flexible printed-circuit manufacturer at your service. Whether it's 100 or 1,000,000 boards, IBM punched card scheduling, experienced production people and stringent quality control methods assure you dependable quality and reliability . . . on time.

TUF-PLATE HOLES
reliable thru-hole construction

PC's famous plated-thru holes are substantially more reliable than eyelets under experimental cycling. Will pass MIL-E-5272A without a failure. Plating is dense, ductile and fine grained. Tuf-Plate holes assure reliable dip soldering as a homogenous portion of your circuitry.

PRINTED-CIRCUIT PMI MOTORS
new design in DC motors

Printed-circuit motors are the first major change in motor design in over 50 years. Their advantages include lower costs, pancake shape, low armature inertia, better commutation, no commutator sparking and no cogging at any speed. Printed-circuit motors are ideal for torque, servo and inertially damped designs from fractional to several horsepower.

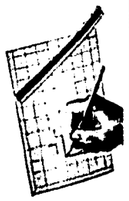
MINIFY
tested and proven miniaturization

Landless, plated thru-hole construction saves up to 80% of board space. Components are the size limiting factors, not the circuitry. Each board has the same Tuf-Plate reliability—production proven in thousands of military uses.

NEW NEW NEW

MASTER CIRCUIT SYSTEM
printed circuits without costly art

From penciled sketch to finished board, PC's Master Circuit System is a production short-cut . . . a one-step method for faster delivery and lower costs. You pencil the configuration you want, select the "catalogued" tolerances, plating and base materials from the prepared list and PC does the rest . . . without tool charges . . . without costly art work.



Timely tech bulletins written for engineers and designers who wish to keep pace with the newest developments in printed circuitry. Bulletins give specifics on materials, layout, design, assembly, etc. To receive them contact your nearest PC field office or the main plant at Glen Cove, New York.

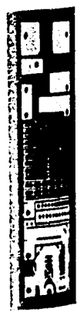
TECHNICAL BULLETINS
up-to-the-minute literature

Streamlined prototype system puts finished boards in your hands quickly. From quote to shipment, your requirements are handled by one man in a matter of hours. Complete and separate from general production, the Proto-Circuits Division is staffed by experts to help you with money-saving pre-production boards.

PROTO-CIRCUITS DIVISION
fast service on prototypes

Printed-circuit techniques inaugurate low-cost precision resistor production. Etched foil factor is adjusted after manufacture with tolerances held to 0.1% of high wattage ratings. PC etched resistors withstand 100% overload . . . provide excellent humidity stability. Maximum resistance 100 ohms per sq. in., each side of board.

ETCHED RESISTORS
mass-produced precision resistors



FOR DETAILED INFORMATION ON ANY OF THESE DEVELOPMENTS, CONTACT YOUR NEAREST PC SALES ENGINEER

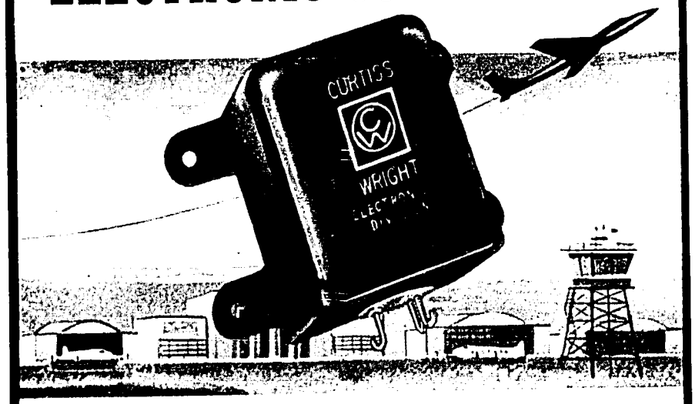
CURTISS WRIGHT

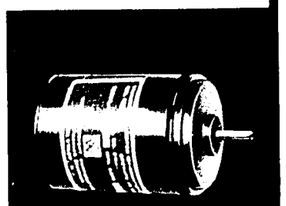
CUSTOM DESIGNED
ELECTRONIC COMPONENTS



TIME DELAY RELAYS
Instant reset — Voltage compensated

Curtiss-Wright "IR" thermal time delay relays reset the instant they are de-energized. The second cycle will always provide the same delay as the first cycle. Variations from 22 to 32 volts will not affect the time delay of the "IR" Series.

SPECIFICATIONS
Time delay.....Preset 20 to 180 seconds
Contact arrangement..SPST, DPDT OR SPDT
Temperature comp.....−65°C to +125°C
Weight:.....4½ ounces
Terminals.....Hooked solder type
Mounting.....Bracket or stud
Variations of the above relay characteristics available upon request.



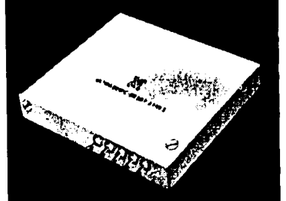
New DIGITAL MOTORS

Stepping motors for high reliability applications. Meet the requirements of assured reliability and long life for aircraft, missile and automation systems.

FEATURES | Bi-directional • Positive lock • Dynamically balanced • Simplicity of design • High pulsing rate.

New ULTRASONIC DELAY LINES

Enables development engineers to employ new concepts in existing and projected applications. Low in cost, small in size and simple to operate.



SPECIFICATIONS
Delay range.....5 to 6000 microseconds
Tolerance.....± 0.1 microsecond
Signal to noise ratio.....Greater than 10:1
Input and output impedance. 50 to 2000 ohms
Carrier frequency.....100 kc — 1 mc
Delay to pulse rise time.....Up to 800:1

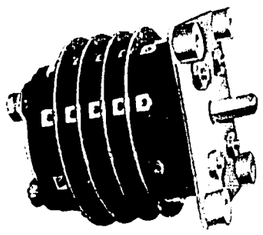
RELAYS

The Couch Type 4A Relay illustrated is one of a family of rugged relays . . . relays which exceed all environmental extremes demanded by our modern military airborne applications because of a unique patented rotary armature design. Our Bulletin 132 will tell you more. Write for it today.

SPECIFICATIONS
Contacts: 2PDT or 4PDT (Form C); dry circuit to 10 amperes
Vibration: 20G, 5 - 2000 CPS
Shock: 75G operating
Mounting: all standard designs
Pull-in power: ½ watt DC
Coil resistance: 19 to 27,000 ohms
Size and weight: 1½"D by 1½"H; 3.2 oz

JR SWITCHES



The JR Multipole Rotary Switch . . . another Couch product. Contact ratings — 10 amperes at 125VAC, 5 amperes at 125 VDC. Available in 1 - 25 sections, 8 contacts to each section, with 4 rotor types. Dimensions — 2¾"D by 5"L for 10 section switch. For Navy, and similar usage, these switches are furnished in watertight enclosures with illuminated dials.

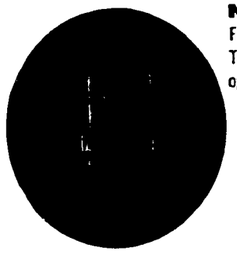
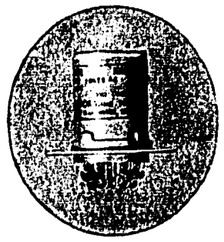
FILTORS INC.

LEADING MANUFACTURERS OF HERMETICALLY SEALED ROTARY MICRO AND SUB-MINIATURE RELAYS

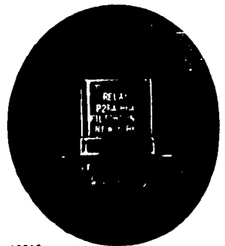


NEW!
Filtors is first with a crystal can relay for AC operation! The new Powrmite® micro-miniature relay for AC operation is the smallest, lightest AC relay made today.

NEW!
Filtors is first with relays with a built-in arc suppressed coil. In the same micro-miniature size Filtors' Powrmite is also made with a built-in arc-suppressed coil to cut radio interference a minimum of ten to one. Available also in four and six-pole sub-miniature relays. Filtors arc suppressed relays increase life and reliability of associated circuitry.



NEW!
Filtors now manufactures the smallest, lightest four and six-pole sub-miniature relays for AC operation.



POWRMITE®

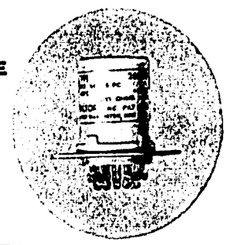
new MICRO MINIATURE relay by Filtors, leading specialists in development and manufacture of micro miniature relays.

SPECIFICATIONS:

AMBIENT TEMPERATURE RANGE	—65°C. TO +125°C.
DIELECTRIC STRENGTH	1000 VOLTS (750 VOLTS BETWEEN OPEN CONTACTS)
INSULATION RESISTANCE	10,000 MEGOHMS MINIMUM AT 25°C.
CONTACT ARRANGEMENT	2C (2 POLE DOUBLE THROW).
CONTACT RATING	2 AMPS RESISTIVE AT 28 VOLTS DC OR DRY CIRCUITS
SHOCK	100 Gs 11 MILLISECONDS.
VIBRATION	10—55 CPS AT .06 AMPLITUDE. 55—2000 CPS AT 30 G.
PICK-UP TIME	5 MILLISECONDS MAXIMUM AT NOMINAL COIL VOLTAGE, 25°C. TEMPERATURE.
RELEASE TIME	5 MILLISECONDS MAXIMUM.
NOMINAL COIL VOLTAGE	26.5 VOLTS DC.
COIL RESISTANCE	550 OHMS ± 10% AT 25°C.
ALTITUDE	70,000 FEET
DUTY	CONTINUOUS.
PICK-UP	RELAY SHALL PICK-UP WHEN COIL VOLTAGE IS 18 VOLTS DC MAX.

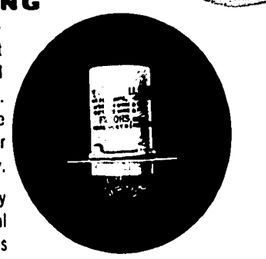
NEW!
All types of Filtors Powrmite micro-miniature relays are now available in .2 grid space in all mounting styles; .2 grid space relays feature Filtors' new "Sensi-Tork" motor, a Filtors development for greatest reliability and sensitivity.

GENERAL PURPOSE



precision manufactured under rigid quality control. Offers lightweight, rugged, compact construction for high environmental conditions. Applicable to instrument, geophysical, aircraft controls and many other circuits where high reliability and multiple switching are required. Available in 2 DPDT, 4 DPDT and 6 DPDT.

LATCHING



relay remains in "energized" position indefinitely without consuming power. As an overload relay it can be electrically reset from a remote position. Contacts can be closed by one circuit and opened by another. It has many applications in fail-safe circuits. Its small size, light weight and hermetically sealed enclosure make possible its use in airborne and other equipment. Either coil may be energized continuously without damage to the relay.

It affords the designer great latitude in circuitry, particularly in "lock-up" circuits, e.g., where the contacts of one conventional relay are used to lock-up the coil of another relay. Thus it avoids redundancy. Available in 2 DPDT, 4 DPDT and 6 DPDT.

5/8 INCH STYLE

A rugged 2 pole double throw relay of small size and weight designed for high reliability under extreme conditions. Available with either 2 amp or dry circuit contacts.

Hermetically Sealed

Rugged—built to meet conditions of

high altitude
high vibration
high temperature

DIALCO RELAYS exhibit no resonance from 5 to 1,000 CPS at 10 G's; are not damaged by 50 G's shock; are fully compensated for temperatures from −65° C to + 125° C.

Available in delays from 1 to 300 seconds; heater voltages up to 150 V. interchangeable on DC or AC of any frequency with a power drain of 4 watts. SPST normally open or normally closed contacts are rated at 6 amps at 115 V. AC or 3 amps at 28 V. DC resistive.

'DIAMOND H' RELAYS

NEW . . . High Speed Polarized Relays

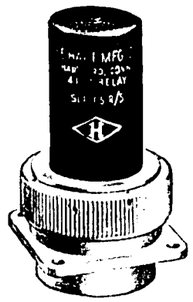
Fast action with freedom from bounce, plus high sensitivity and consistent operation with low distortion, are provided by small, rugged Series P Polarized Relays. SPDT, with two independent coils, they will handle over 1,000 pulses per second. Various coil resistances up to 5,000 ohms each coil. Contact ratings vary with switching speed but range from 60 MA to 2A with voltages to 120 AC or DC, dependent upon amperages employed.

Aircraft-Missile Series R & S Relays

Miniature, hermetically sealed 4PDT, Series R & S relays provide excellent reliability over their long service life. Electrically and physically interchangeable, the two series differ only in that Series S coils are separately sealed within the sealed cases, with organic matter eliminated from the switch mechanism for greatest reliability in dry circuits. Contacts MA to 10 A.

Special Mountings

Series R/S Relays are available with 10 standard mounting arrangements, plus a ceramic plug-in socket. MS-AN type connector mounting, illustrated at right, makes assembly, installation and field service extremely simple, while the connector provides a seal against moisture.



"Diamond H" engineers are prepared to work with you to develop variations on these relays to meet your specific requirements. Tell us your needs . . . by phone or letter.

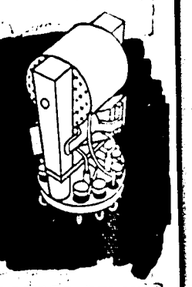
designed especially for **VIBRATION and**

The rotary-balanced armature design of Hi-G relays assures efficient operation of these important components even under severe vibration and shock — up to 20 or 30G out to 2000 cps. By design, very little momentum is built up in moving parts. For more complete information on the complete line of Hi-G relays, send for New 1959 Hi-G CATALOG.



HI-G THE [illegible] COMPLETE LINE OF *ROTARY BALANCED RELAYS*

Hi-G offers complete engineering and production facilities to manufacture relays for specific applications. Your inquiries are invited.

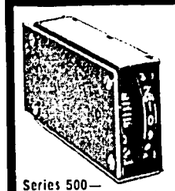
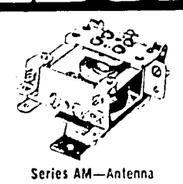
HILLBURN RELAYS

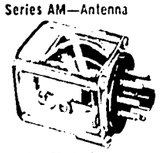


Series 500—Stepping Relay—Counter

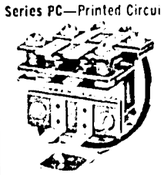


Series AM—Antenna

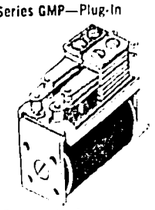
Series PC—Printed Circuit



Series GMP—Plug-In

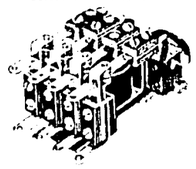


Series BG — Control



Series TA—Telephone

Series PS—Sensitive



Series ML—Power

for Reliability—

Hillburn relays are the result of careful design, evaluation, and the thorough inspection, adjustment and testing of every completed product.

Your order for Hillburn relays assures you of a quality product, "on-time" delivery and reliable performance.

Hillburn manufactures relays to your special requirements plus a complete line including:

- General Purpose
- Plate Circuit
- Industrial Control
- Printed Circuit
- Latching—Mechanical
- Latching—Magnetic
- Telephone
- Sensitive
- Stepping
- Antenna
- Polarized
- Plug-in

More than 25 types—over 500 variations to meet specific applications.

Write Dept. RE for catalog covering all relay types.

what size reliable RELAYS do you need

Micro-miniature 44

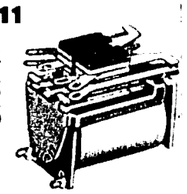
SPDT and DPDT contacts rated 2 amps at 28 VDC and 115 VAC, non-inductive. Operate time, 5 ms. max.; release 3 ms. max.—wide choice of mountings; vibration and shock resistance to meet military specifications.

Subminiature 33

Fast acting contact combinations to 6 arms per stack, 12 per relay. Contact ratings to 5 amps. Operate sensitivity (SPDT) 250 mw. min.

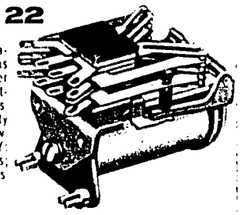
Miniature 11

Contact combinations to 8 arms per stack; 16 per relay. Contact ratings to 5 amps. Operate sensitivity (SPDT) 150 mw. min.



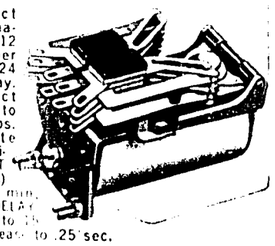
Small 22

Contact combinations to 12 arms per stack, 24 per relay. Contact ratings to 15 amps. Operate sensitivity (SPDT) 100 mw min. TIME DELAY: operate to 65 ms; release to 150 ms



Medium 66

Contact combinations to 12 arms per stack; 24 per relay. Contact ratings to 15 amps. Operate sensitivity (SPDT contacts) 60 mw min. TIME DELAY: operate to .75 sec; release to .25 sec.



Above relays available with contacts ranging from hard gold alloy for low level switching to heavy duty power; plug-in mounted, subminiature snap action contacts; open, dust tight or hermetically sealed; to meet applicable military specs. Tell us what you need or send for catalog 159.

PRICE ELECTRIC
. . . Reliable Relays for Industrial and Military Use

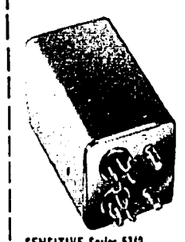
MICRO-MINIATURE Style 6
Lightweight, crystal can type relay is simple, reliable and versatile. Ideal for miniaturized assemblies. Termination can be provided to meet most requirements.

SUB-MINIATURE Style 506
For Low Level Circuits and General Purpose use. Meets requirements of MIL-R-25018. Available with solder or plug type termination.

MINIATURE Style 570
A 6 PDT general purpose relay of simple design and high reliability. Available with isolated contact chamber for low level circuitry use. Meets the following MIL specifications and drawings: MIL-R-5757C, MIL-R-25018 (USAF), MS 24115-6 (USAF) Class B; Type II; Grade 3.

MULTIPOLE Series 2100
For military and commercial applications. Available in 2 frame sizes providing up to 6 PDT contact combinations. Available hermetically sealed.

TELEPHONE Series 5400
For communications and other circuit control applications. Available in any standard voltage to 115 VDC. Resists 15 G vibration through 500 cycles. Available hermetically sealed.



SENSITIVE Series 5340
1-inch square, hermetically sealed 1 or 2 Form C Contacts, 2 amps., 20 milli-watts per contact pole, 500-cycle vibration for military applications Temperature —65° C to 125° C.

Price Electric has a complete line of relays to meet your requirements. Write for literature and specifications.

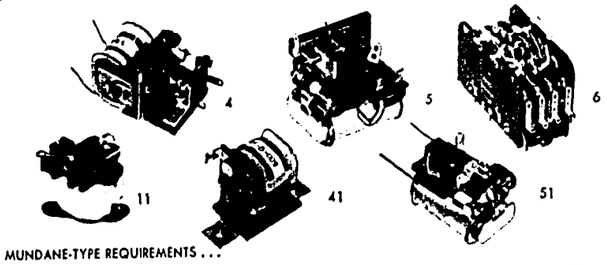
SIGMA TYPES AT YOUR SERVICE

On the left, Hardwicke J. von Cumulus exemplifies scientific inquiry in the best tradition, pondering problems of the highest order concerning interrelation of theoretical factors in sensitive relay design. His is an 0.6^{-13} world, beyond the ken of most, deaf to the Cry of the Coliseum. He's the gentleman to see if you're just wondering about the characteristics of a relay for use somewhere out of this world.

At right is Sigma's General Purpose Application Man of the Year, Mackinaw L. Mundane. Although Mackinaw will never quite understand what all the Hardwickes are muttering about, he doesn't care; he's closing in fast on some good unsophisticated jobs for Sigma relays. He's heard all about Progress, Improvement and Doing the Difficult Jobs Well, but he knows *his* bread is buttered by the guy who wants a relay that will work well, on the ground, under everyday circumstances. He will enthusiastically tell you, point blank, which Sigma type to pick for speed, quietness, price, life or some combination thereof. His customers make toys, burglar alarms, electric blanket controls, machinery controls, UL-approved items and such, and some of his favorite relays are shown below.

Actually, there's a whole crew of Mundanes here ready to jump when you speak — not at you, but up with answers. Or from a distance you can get some useful data on which to judge and select, in the form of specific relay Bulletins, or assembled within elegant covers as the NEW Sigma Catalog. Communication with H. J. von C. and other Scientists, however, is restricted to 8:30-5:00, Monday through Friday.



AMONG MUNDANE-TYPE REQUIREMENTS . . .

LOW PRICE: Series 11 sells at less than a dollar in quantity, with mechanical life of 100,000,000 operations. DC and shaded pole AC.

RANGE OF ADJUSTMENT: Series 4 and 5 can be adjusted and specified as to both drop-out and pull-on. Standard sensitivities from 1 to 200 mw.

HIGH CONTACT RATING: Series 51 switches 10 amperes of incandescent lamp load yet operates on 100 mw.

HIGH SPEED: Series 41 can be operated in less than 2 milliseconds and will switch loads up to 1 ampere 100,000,000 times.

AC OPERATED: Shaded pole 41 with no rectifiers. Extremely quiet, reliable operation with switch ratings up to 5 amperes, or operating sensitivity as low as 0.06 v-a.

MAGNETIC LATCHING: Series 6 (Form Z) polar relay provides an exceptionally reliable latching contactor. Up to 4-pole double throw with no mechanical catches to wear.

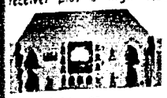
RIXON CUSTOM DESIGNS FOR: COMMUNICATORS

DATA TRANSCEIVER

For wireline and other voice communications circuits—500 to 2500 bits/second in a 3-kc bandwidth. A fully transistorized transmitter and receiver plus a high stability clock system and a self-contained delay equalizer in a single unit—requiring 5½ in. of standard rack space. Automatically synchronized clock for detecting and regenerating received data pulses.

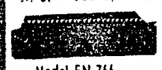


Sebit—25

Data input and output is serial, ground-referenced. Features low error rate and reliable performance under wide range of adverse transmission conditions. *Write for Bulletin No. 62.*

DELAY EQUALIZER

Improves data transmission accuracy by compensating for envelope delay distortion introduced by voice communications circuits. Relative delay: flat at midband, min. at bandedges—frequency of max. delay 1000, 1250, 1500, 1750, or 2000 c/s—delay range 0.8 ms to 3.5 ms in 10 steps. Input and output-600 ohms. Size—19 x 3½ x 8-in.



Model EN-766

Bulletin No. 64.

SEMICONDUCTOR RELAYS

Transistorized. Size 2½ x 4½ in. Useful for interconnecting different portions of data transmission systems—also for reliable high-speed (up to 2500 bits/sec) switching of d-c circuits to 200 ma—300 volts. Polar or neutral input and/or output. No a-c line power required. Control power less than 1 watt derived from keyed system. Interchangeable with WE 255A or similar types. Input sensitivity to 3 ma. *Bulletin No. 65.*

Relay without case Model SCR-60

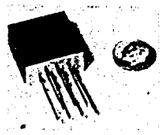
FILTERS — NETWORKS

Filters—All Types

Custom-tailored for your application. Design capability and a stock of components equal ability to meet your requirements without lost time. Linear phase designs for data systems is a specialty. *Bulletin No. 61.*

FREQUENCY DIVIDERS

Useful for dividing output from frequency standards in timing and clock circuits. Unit delivers one output pulse for every two input pulses. Can be directly cascaded for large division ratios. Feedback taps provided to make any ratio possible. Requires 20 to 30 volts d-c at less than 15 ma per unit. *Bulletin No. 56.*



MXFD—100

DEVELOPMENT ENGINEERING

The engineering talent responsible for the equipment in this column is available for special developments either on fixed price or CPFF basis. Other significant Rixon developments and areas of experience include: 50-KW VHF Transmitter, 16-Channel Transistorized TTY Multiplex Equipment, Low Noise Preamplifiers, High Power Dummy Antenna, Antenna Matching Equipment, etc.

METALLIC FILM RESISTORS by CORNING

Type N

MIL-R-10509B—½, 1, 2W at 40°C. Derating to 140°C. Up to 4.2 megohms.

MIL-R-10509C New fusion-sealed resistor. ¼-watt. Can be boiled in water without failing moisture specs. 10 ohm to 360 Kohm at 70°C., derating to 160°C.

New epoxy-coated resistors. ⅛, ¼, ½-watt at 70°C. Exceptional moisture resistance.

Low-Power

Highest resistance range of any low-power resistors. LPI-3: 3W, 125-40 K. LPI-4: 4W, 125-90 K. LPI-5: 5W, 180-110 K. LPI-7: 7W, 180-90 K. LPI-10: 10W, 180-70 K.

Also C-42 resistor: a low-cost, 2W, 70°C. resistor to meet MIL-R-11B; 130 to 1.5 K.

High-Power

Type R 7 to 115W at 40°C., derate to ½-power at 120°C.; 10 ohms to 1 megohm. To MIL-R-11804B.

Type S High-temperature to MIL-R-11804B. ½, 1, and 2W at 120°C. Up to 4.2 megohms.

Type WC-5 Water-cooled HF. Can mount direct on coax line and at RF ground potential. 35 to 200 ohms with ± 15% standard; 10 and 5% also available. Dissipates up to 5 KW.

Type H High-frequency for dummy antennas, circuit loading, damping, and terminating. 10 ohms to 1 megohm. 5 to 140W.

Type ST for highest wattage to volume ratio of any metallic oxide resistor. 2½, 5, and 10 W at 25°C., derating to 350°C. 2% and 5% tolerances.

For more information on any or all of these resistors, write for data sheets. Corning Glass Works, 550 High St., Bradford, Pa.

ACE

Potentiometers - Trimmers - Relays

RELIABILITY IN MINIATURIZATION

ACEPOT®-500 / ACEPOT X-500*

Sub-miniature, linear and non-linear potentiometers. Single turn unit, ½" size, ±2% resistance tolerance and ±0.3% ind. linearity.

actual size

Size	½" x ½"
Weight	0.25 ounce
Resistance Range	2Ω to 500K
Resistance Tolerance	±2%
Linearity	±0.3% Ind. standard
Temperature*	−55°C to 125°C*
Mechanical Rotation	Continuous or with stops
Electrical Angle	325° std. ≷ available
Resolution	0.12% for 50 K Others comparable
Torque**	.05oz./in. at 20°C (Bronze) .035oz./in. (Ballbearing)
Power	2W for 60°C rise or 2.5W for 65°C (X-500)
Mounting	Threaded bushing, servo, flush or flanged. Ganged up to 6 cups.

* X-500 standard high temperature potentiometer. Range: −55°C to 150°C.

**Jewel bearing Acepot torque of .014 ounce/inch.

ACEOHM®

Sub-miniature trimmers . . . high temperature, humidity proof for severe environment.

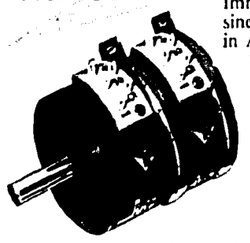
actual size

Size	1¼" x ¼" x ¼" Standard Mounting holes
Weight	0.2 ounce
Resistance Range	10Ω to 75K — Special to 150K
Mechanical Rotation	25 Turns on lead screw, adjustable over 100% of winding
Power Rating	1.6W at 40°C Derates to 0 at 225°C
Temperature Range	−55 to 225°C
Resolution	.13% for 75K Other resistances comparable
Dielectric Strength	1000 volt DC for 60 sec.
Load Life	1000 hours at 180°C
Capacitance	Extremely low distributed capacity (moulded hitemp, phenolic case & cover)

Completely sealed element. Meets and surpasses all applicable requirements of MIL-E-5272A and MIL STD. 202A.

ACEPOT®

Standard non-linear and linear potentiometers. 0.25% terminal conformity with out padding resistors. Immediately available in sine, cosine, square law and log functions in AIA sizes.



Typical Spec's:	Sine-cosine	Double Sided Square-law
Size	3"	3"
Resistance	20K ±5% driving	25K ±5% driving
Conformity	½% pk-pk	±0.25%
Function angle	360°	±180°
Power	4 watts	3 watts
Mounting	Servo	Servo

Submit your design requirements to our Engineering Group for evaluation and quotations.

ACESET®

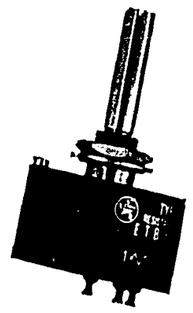
Sub-miniature Trimmers. Heat dissipation . . . 2 watts at 60°C. Immediate delivery in resistances of 50Ω to 50 K.

actual size

Size	⅓" x 5/16"
Weight	⅓ ounce, including lock washer and nuts
Resistance Range	50Ω to 100K ±10% std. tol
Linearity	±5%
Temperature Range	−55°C to +125°C
Mechanical Rotation	330° Nominal
Electrical Angle	320° Nominal
Power	2 watts for 60°C rise
Mounting	¼"-32 threaded bushing

ACEMHO*

Conductive plastic element. Infinite resolution. Extremely long life. No sudden open-circuit failure possible. Low, low noise. Meets JAN & MIL specs. Patents pending.



Size	1 3/16"
Weight	1.6 ounce
Resistance	to 5 megohm
Linearity	.5% Independent
Resolution	essentially infinite
Power	2W at 20°C
Mounting	Bushing

*Reg. applied for

ACETRIM*

Sub-miniature trimmers . . . A wide range of resistances are available in this low-cost, space and weight saving unit.

actual size

Size	½" x ½"
Weight	0.25 ounce
Resistance Range	2Ω to 250K ±5% std tol
Linearity	±3%
Temperature	−55°C to 125°C (to 150°C (X-500))
Mechanical Rotation	continuous or with stops
Electrical Angle	325° std. available
Power	2W for 60°C rise or 2.5W for 65°
Mounting	Threaded bushing, printed circuit, flush, flanged, ganged.

*Trade Mark applied for

Exact requirements for your particular applications, can be custom designed and mass produced with short lead time. All units are anti-fungus treated and fully sealed against dust, moisture and humidity. Meets applicable JAN-MIL specs including shock and vibration. Send us your specifications for engineering assistance on designs and applications. Complete Fact File and Application Data Sheets available on request. CALL, wire or teletype Dept. A3 at Ace Electronics Associates, Inc., 99 Dover Street, Somerville, Mass. SOmerset 6-5130, TWX SMVL 181.

How to assure reliability in a precision pot

Precious Metal Resistance Wires and Contacts

by H. E. HALE
Vice-President & General Manager

The reliability of precision potentiometers is directly proportional to retained accuracy over storage, rotational life, and environmental exposure; and inversely proportional to their electrical noise characteristics. Corrosion, oxidation, and foreign deposits are some of the conditions which adversely affect these factors.

Base metal resistance wires and contacts are particularly susceptible. For this reason, precious metal alloys should be specified wherever possible. Their high tensile strength and ability to remain inert to oxidizing and corrosive atmospheres are especially desirable. Electrical noise is kept at a minimum, and storage and rotational life are greatly extended. In addition, resolution and conformity are improved. These advantages more than offset the metals' higher initial costs.

Three general ranges of preferred temperature coefficients can be considered in choosing a precious metal: (a) ±20 ppm; (b) ±200 ppm; and ±600 ppm. Choice will be governed by specific design requirements.

Fairchild has pioneered the use of precious metals in potentiometer applications, and has included these materials in designs even when they have not been specified by customers as a necessary requirement. An outstanding example is the one-piece precious metal wiper found in all Fairchild linear and non-linear, high-reliability pots. In addition to the advantages outlined above, the unique wiper design provides high-deflection sensitivity and natural frequencies. Wire and contact diameters are matched to assure optimum conformity and incremental voltage steps; hardnesses are also matched for minimum degradation. These pots are available in ⅞-inch to 3-inch diameters, single- and multi-turn, in standard and high-temperature models. Accuracies are as high as .009%.

Precious metal resistance wires and contacts are examples of the many Safety Factors built in by Fairchild beyond specifications to assure reliability in performance.

You are invited to write to Dept. 31P for more information.

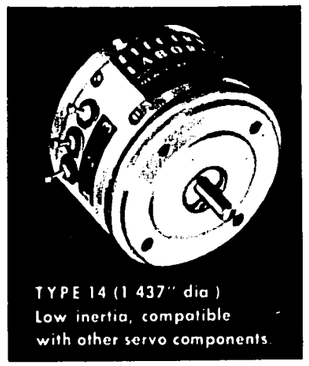
Predict performance!
Cut costs!
The key to dependable system performance is

RELIABILITY!



TYPE 14 (1.437" dia.)
Low inertia, compatible with other servo components.

Designers everywhere insist on the rugged reliability of precision potentiometers by Electro-Mec.

- 100% inspection of all vital characteristics.
- Glass insulated terminals.
- 18K gold slip rings.
- Ultra-dependable resistance elements artificially aged to insure stability.
- Exclusive long life wiper design incorporates precious metal contacts.
- Built-in safety factors.

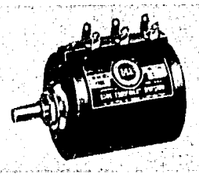
205 SERIES, 10-TURN MICROPOTS

SIZE: 1¾" dia.; 2⅛" long; shaft extension ⅞" or special to order.

LINEARITY ACCURACY: ±0.1% and 0.05% (independent or zero based).

RESISTANCES: 50 ohms to 100,000 ohms, tolerance ±5%.

POWER DISSIPATION: 5 watts at 40° C.



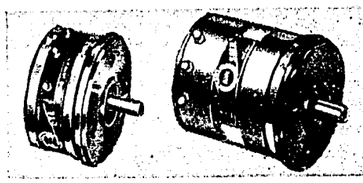
1100 SERIES, 10-TURN MICROPOTS

SIZE: 1⅞" dia.; 2⅛" long; shaft extension ⅞" or special to order.

LINEARITY ACCURACY: 0.5% to 0.1% (independent linearity).

RESISTANCES: 50 to 100,000 ohms, tolerance ±5%.

POWER DISSIPATION: 3 watts at 40° C.



900 SERIES MICROPOTS

Borg 900 Series Micropots are available in single-turn, 3-turn and 10-turn models.

SIZE: Single-turn — 2" dia.; 1⁵⁄₆₄" long
3-Turn — 2" dia.; 1⅝" long
10-Turn — 2" dia.; 2¹⁄₁₆" long
Shafts — ¼" dia.
Bushing Mount — ⅞" long
Servo Mount — ⅝" long

LINEARITY ACCURACY: Single-turn — ±.5% (independent)
3-Turn — ±0.1% (independent, zero based, or absolute reference).
10-Turn — .05% (independent, zero based, or absolute reference).

RESISTANCES: Single-Turn — 50 to 50,000 ohms
3-Turn — 15 to 60,000 ohms
10-Turn — 50 to 300,000 ohms

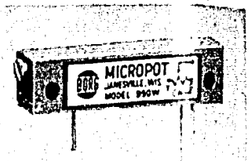
TEMPERATURE LIMITS: Tested to 350° F.

STANDARD COMPONENTS

built by BORG

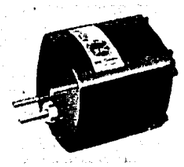
FIT MANY SPECIAL DESIGN NEEDS

Design flexibility of standard Borg components often eliminates the need for expensive, specially designed units. Borg offers a complete line of precision potentiometers, turn-counting dials and fractional horsepower motors. Many of these standard Borg components are currently on duty in missile launching platforms and firing control stations, radar and sonar equipment, computers and similar electronic apparatus. Production of standard Borg components assures quick delivery. A partial selection is shown on this page. Write for complete data on all Borg components. Ask for catalog BED-A90.



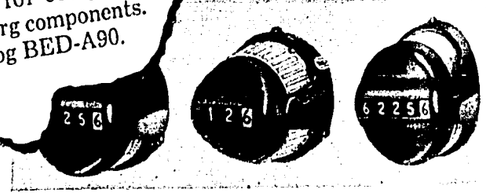
990 SERIES TRIMMING MICROPOTS

SIZE: 1¼" x 5⁄16" x 15⁄32"
RESISTANCES: 10 to 30,000 ohms standard. Other values on special order.
Tolerances — ±5% 100 ohms and over
±10% below 100 ohms
ADJUSTMENT: Screw driver slot provides adjustment of complete range in 40 turns.
TERMINALS: Printed circuit, soldered lug, insulated wire leads



PRECISION INSTRUMENT MOTORS

Borg-Motors offer you fractional horsepower motors in synchronous or induction models with or without gear-trains in 2-pole or 4-pole models for your precision equipment. Borg-Motors are totally enclosed, using precision machined die cast alloys for end bells and gear train cases. Die cast rotors, mounted on two ball bearings, assure long life, continued accuracy.



DIRECT READING MICRODIALS

Borg Direct-Reading Microdials provide the highest accuracy of perception when forced-fast-reading and setting is required because of their inline digital presentation. Borg Direct-Reading Microdials are available in 3-digit 10-turn models, 4-digit 100-turn models and 5-digit 1,000 turn models. Also available are Borg Concentric Scale Microdials which indicate the position of any multi-turn device of 10 turns or less.

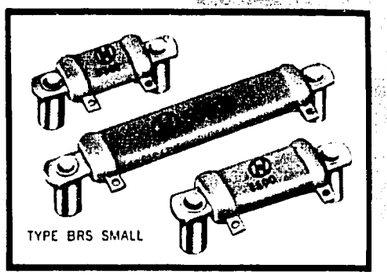
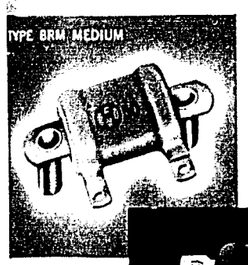
Space Problem?

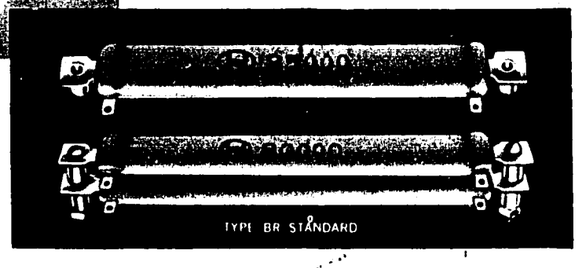
SPECIFY Blue Ribbon PRECISION SPACE-SAVER RESISTORS

...the Complete Line of Flat and Stack Mounting Wire Wound, Power Resistors





Available in Wattage Ratings from 10 to 75 W
Resistance Range from .10 to 100,000 Ohms



These High Reliability Space-savers feature matched coefficient of expansion with gray vitreous enamel covering for complete protection from overloads and environmental conditions. Aluminum thru-bracket improves heat dissipation, minimizes hot spots, allows a higher wattage rating per unit of space. Bracket construction facilitates stacking and saves additional space.

For Complete Specifications and illustrated bulletin on H-H Blue Ribbon Resistors, call or write, today!

'Gray Line' RHEOSTATS

Complete range from 25 to 1000 watts. Shock resistant construction. High temperature enamel bonding withstands greater overload.

'Gray Line' RESISTORS

Fixed, adjustable, ferrule and axial lead types for all commercial and military applications. Super-ruggedized for complete reliability.

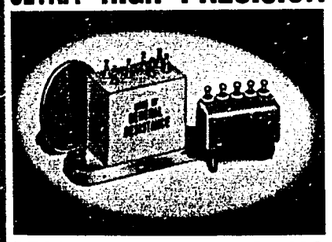
ULTRA-HIGH PRECISION



RESISTOR NETWORKS

If it can be made, GenRes will make it! GenRes, for instance, can supply 400-cycle Resistor Networks with accuracies as high as ±.005% for such critical applications as summing circuits, voltage dividers and binary networks. Custom-engineered and mass-produced GenRes Resistor Networks, made to meet the most stringent electrical and mechanical specifications, can save you time and money!

WIREWOUND RESISTORS

GenRes application-engineered, ultra-high reliability Precision Wirewound Resistors, accurate to .01% over a wide temperature range, include axial, lug, printed circuit and radial lead encapsulated types to meet any requirement. For complete data on rugged, proven GenRes standard, ceramic or temperature-compensating Wirewound Resistors write for complete catalog.

WHEATSTONE BRIDGE

New, novel GenRes "Go-No-Go" Wheatstone Bridge offers a guaranteed accuracy of .0035%! This precision-engineered instrument also features: .0005% sensitivity; a six-dial decade; up to ±.01% for full scale deflection. Operates as go, no-go Limit or Wheatstone Bridge from 10 to 111,111,100 ohms. Write for Bulletin P-100.

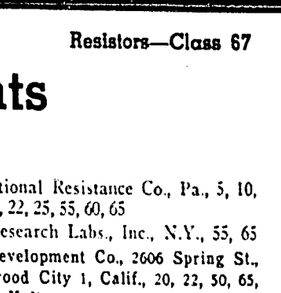
WHY WAIT?



If you need a
2" SINE-COSINE POTENTIOMETER

that delivers
0.5%—OR EVEN .25%—PEAK-TO-PEAK ACCURACY

with a
RESISTANCE RANGE OF 70K OHMS PER QUADRANT

YOU CAN HAVE IT TODAY

For more than a year, we've been supplying this 2" unit in servo, 3 hole mount, and modular design (for stacking flexibility), to the simulator and computor fields. If you'd like to see it, just give us a call or drop us a line. *We'll take one from a production run* and send it right over. We'll be happy to discuss your drawings with you, design prototype models to your specifications, or simply send you literature and data sheets on our line of precision potentiometers which we design and manufacture in sine-cosine, square law, single sided squares and secant functions that meet applicable sections of MIL specifications.

now, one source ELECTRA offers you all of these precision resistors

All Electra resistors are designed to meet or exceed Mil-R-10509C. Your request will bring complete specifications and characteristics on any or all types by return mail. In addition to resistors, Electra manufactures a complete line of Ceramic Disc and Plate Capacitors. For complete details, see your local representative, or write for catalog and price schedules.

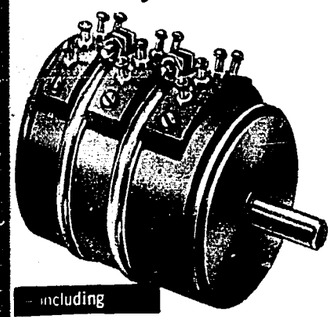
Precision Potentiometers by RATTRAY



including

- MINIATURE TYPES
- SUB-MINIATURES
- MULTI-GANG UNITS
- STANDARD TYPES

featuring

- HIGH ACCURACY
- LOW TORQUE
- EXCELLENT RESOLUTION
- LOW NOISE

Rattray experience-engineered precision potentiometers are supplied in types that meet most electronic applications. Complete research and development facilities, and unique winding techniques, make it possible to produce custom designs to the most critical military and commercial specifications. All-metal construction of mounting and aligning surfaces provides precise mechanical interchangeability. Precise electrical performance is obtained by detailed quality checks throughout production. Special winding machines assure high resolution and function accuracy.

New Handbook Available ... precision potentiometers ... helpful tech ... information ... designers and ... users.

Call or write Rattray now for catalog or quotations on your potentiometer applications.

SAGE

"SILICOHM" POWER RESISTORS

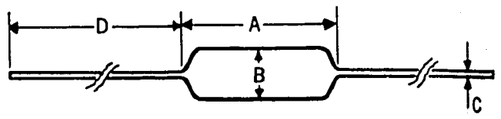
(WIRE WOUND)

OFFER THESE UNIQUE FEATURES:

- **PRECISION** (tolerances to ± .05%)
- **LOW T.C. OF RESISTANCE** (± 20 ppm/°C)
- **INSULATED** (1000 V-RMS Dielectric Strength *MIN.*)
- **HIGH TEMPERATURE** (derated to 275°C)
- **STABILITY** (.5% *MAX.* lifetime drift)

PROMPT DELIVERY
Order direct or through your distributor. A special department for prototype quantities insures shipment within one week of receipt of order.

TYPE "S" AXIAL LEAD UNITS SILICONE-COATED



TYPE "CS" AXIAL LEAD UNITS SILICONE-COATED METAL-SHEATHED (for clip-mounting)

TRU-OHM RESISTORS and RHEOSTATS

Designed to MEET and EXCEED MIL Specifications

TRU-OHM is your prime source for quality resistors and power rheostats to meet your most intricate requirements . . . for civilian or military applications. A TRU-OHM representative is in your area to serve you.

Find out why TRU-OHM is America's No. 1 Source for Wirewound Resistors and America's Fastest Growing Source for Power Rheostats . . . *Your inquiry will receive immediate attention.*

Our latest catalog is available upon request

Shallcross

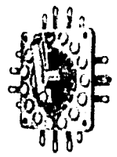
PRECISION WIREWOUND RESISTORS

Small, Shallcross "P-Type" encapsulated resistors offer unmatched stability and reliability for critical applications. All are reverse-pi wound on multiple-section epoxy resin bobbins then hermetically-sealed in a tough epoxy coating.

"P-Type" resistors are offered in a complete range of commercial and military types with radial leads, axial leads, or lug terminals. Military types meet or exceed MIL-R-93A (85°C ambient) and MIL-R-9444 (125°C ambient) requirements—including salt water immersion tests. Standard tolerances—1%, 0.5%, 0.25%, 0.1%, and 0.05%. Close tolerances and matched pairs a specialty. *Write for Bulletin L-30.*

ROTARY SELECTOR SWITCHES

STANDARD SWITCHES



Single-Pole, instrument-type switches using silicone-impregnated steatite or phenolic decks. ¼" laminated silver or solid brass contacts and multiple-leaf wiper arms. Positive, long-life ball-bearing detent. Up to 4 decks. Many optional special features. *Bulletin L-31.*

OVAL CERAMIC SWITCHES

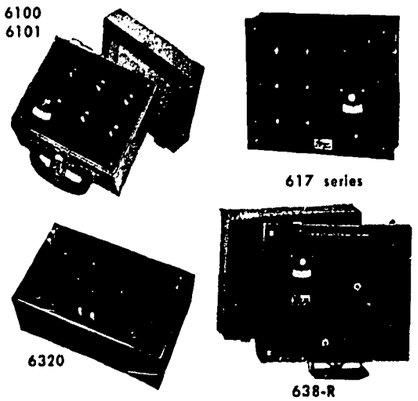
Assembled by Shallcross from stock, interchangeable parts, the "12,000" Series offers custom-built quality without the delay and cost of specials. Solid silver contacts and collector rings on steatite decks. 0.0025 Ω contact resistance. 1 to 3 poles per deck, up to 10 decks. Adjustable stop. Optional detent. *Bulletin L-32.*

MINIATURE SWITCHES

Only 1¾" square by 1" deep for first deck, ⅝" for additional decks. Silver alloy button contacts and multi-leaf wipers maintain low contact resistance. Glass fibre Silicone-laminate decks for outstanding humidity, moisture and salt-spray resistance. 1 to 4 poles per deck. 1 or 2 hole mounting. Easily-positioned, adjustable stops. *Bulletin L-45A.*

BRIDGES

Field & Lab Types for
Precise DC Resistance Measurements
. . . 1 micro-ohm to 10^{4} megohms.
Bulletin L-19B



Model Number	Measurement Accuracy	Maximum Setting	Minimum Setting	Circuit	Special Features
6100	±0.1% +0.01Ω (.1Ω to 11.11 MegΩ)	11.11 MegΩ	0.001Ω	Fault Location—Wheatstone	Fault Location by Murray, Varley, Hilborn & Fisher Loop Tests.
6101	±0.1% +0.01Ω (1Ω to 11.11 MegΩ)	11.11 MegΩ	0.001Ω	Wheatstone	Four dial rheostat usable as decade box.
6320	±0.02% +0.01Ω (1Ω to 11.11 MegΩ)	111.11 MegΩ	0.00001Ω	Wheatstone	Most accurate five dial Shallcross bridge for direct resistance measurement.
	±0.05% to ±20% on separate "+" and "—" percent selectors. (1Ω to 10 MegΩ)	11.111 MegΩ	0.0001Ω	Percent Limit	Rapid "GO-NO GO" percent limit testing. Built-in adjustable comparison standard.
638-R	±0.75% or better (.001Ω to 1Ω)	11.11Ω	0.000001Ω	Kelvin	Overlapping Kelvin and Wheatstone ranges selected with single ratio dial.
	±0.2% +0.01Ω (1Ω to 11.11 MegΩ)	11.11 MegΩ	.001Ω	Wheatstone	
6350	±1%, (100Ω to 10 MegΩ) ±2%, (10 MegΩ to 10,000 MegΩ) ±5%, (above 10,000 MegΩ)	1.111 x 10^{9} MegΩ	0.01Ω	Wheatstone with d-c Amplifier	Modular construction dual range power supply, null indicator-amplifier, for 115V. 60 cycle operation.
617 Series	±0.1% to ±20% on separate "+" and "—" selectors from a minimum resistance consistent with number of dials in use to the maximum settings.	111,111Ω 1,111,110Ω 11,111,100Ω	0.1Ω *1Ω 10Ω	Percent Limit	For rapid "GO-NO GO" percent limit testing. Hand or foot operated for production testing. All models also usable for direct resistance measurements. Binding post for external d-c power supply.
	1±0.2% +0.01Ω from a minimum consistent with number of dials in use to the maximum setting.	111,111Ω 1,111,110Ω 11,111,100Ω	0.1Ω *1Ω 10Ω	Wheatstone	

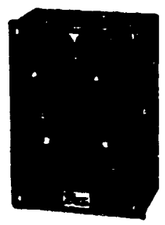
† Except 617B and 617J ±0.1% ±0.01Ω. * Except 617G, 0.01Ω.

DECADE RESISTANCES

Available as single unmounted decades or as complete decade resistance boxes with 1 to 6 dials. Steps as low as 0.01 ohm; total resistance as high as 11,111,100 ohms.

Remarkably rugged and accurately-calibrated for maintained stability in rough lab, classroom and production line work. Uses impregnated Shallcross precision wirewound resistors mounted on steatite switch decks. Large button contacts of silver or brass. *Write for Bulletin L-17A.*

DECADE VOLTAGE DIVIDERS



Laboratory-type voltage dividers used in bridge circuits, for measuring rotary potentiometer linearity, in synchro-test delta bridge circuits, and in other uses requiring maintained accuracy and high resolution. Kelvin-Varley or Potentiometer circuits available in eight 4 and 5 dial models.

Impregnated Shallcross precision wirewound resistors used throughout. Steatite instrument switches assure uniformly low contact resistance. *Bulletin L-16B.*

For details, circle #530 on Reader Service Card

. . . for the ultimate in precision potentiometers

• TRIMMER POTS

Single turn and multiturn.
Wide range of resistance values.
Rotary and box types.
Temperature range to 225°C.
Wirewound and film resistance elements.
Metal casings and hermetically sealed molded plastic.
Threaded bushing mountings, except box types that offer printed current lugs, tinned leads or standard 3 wire lead mountings.

• PRECISION PANEL CONTROLS

High accuracy of terminal conformity.
Wide range of standard resistance values in pots ranging in size from ½" diam. to 3" diam.
Commercial types available in addition to those manufactured to meet military specifications.

• PRECISION SERVO TYPE POTS

Linear and non-linear single and multiturn wirewound pots in a range of sizes from ⅞" diameter to 3" diameter.
Sine-Cosine pots from ⅞" diam. to 3" diam. in addition to many special designs.
Unique, new film resistance in hermetically sealed moisture-proof units provide operation up to 225°C, assuring extreme accuracy and reliability under the most severe environmental conditions.
High accuracy, ultra reliable, long life precision provide incomparable performance characteristics.

• UNITIZED CLUTCH-POT MODULES

Basic Electro-Mechanical components for Systems Designers.
Packages may be composed of syncros, servo motors, magnetic clutches, brakes, spring return devices, commutator switches, and precision single or multiturn potentiometers.

• PRESSURE TRANSDUCERS

Measure absolute, gage or differential pressures in extreme environmental conditions with a high degree of accuracy.
Film type or wirewound resistances available.
Designed for use with non-corrosive fluids.
Output is either one or two potentiometers whose functions are linear with pressure.
Full details upon request.

• TRANSLATORY POTS

For lineal motion with both linear and non-linear resistance functions.
Range of stroke lengths from 2½" to 12".

• Accelerometers • Dials and Knobs • Precision Drives

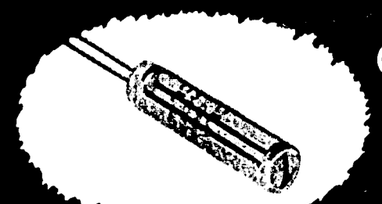
the Light touch in automation and control



PHOTOCONDUCTIVE CELLS, of the cadmium sulfide and cadmium selenide types . . . developed and manufactured by the Clairex Corporation.

Behaving as variable resistors in which the resistance is controlled by light, these unique and rapidly advancing design components can transform most circuits — perhaps your circuit — into a critical function of light! Thus, by replacing a critical resistance element with a Clairex photoconductor, a circuit can be controlled with "the light touch."

Clairex offers a versatile standard line of ¼" diameter cells. These standard cells provide an unusually wide range of design parameters including a sensitivity on the order of 1 million times that of conventional photoemissive tubes—a paramount advantage to the design engineer. Among other advantages are unusually high light to dark current ratios, linearity of voltage irrespective of polarity from microvolts to hundreds of volts, and small size for miniaturized applications.

Clairex will be happy to discuss and consider special requirements. Hundreds of diverse applications are now in use. No matter what your automation or control problem, employing a Clairex Photoconductive Cell will probably provide the solution.

Priced from $1.15 to $4.00 depending upon quantity.

IF YOU DESIGN IN THE FIELDS OF

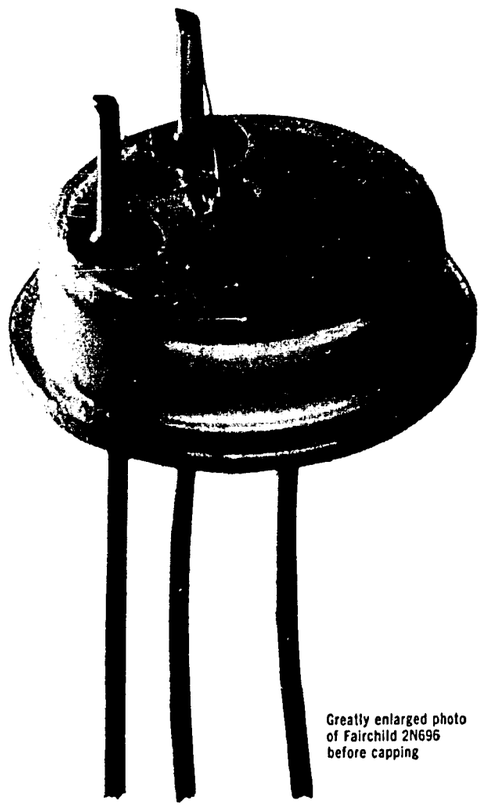
FAIRCHILD SILICON MESA TRANSISTORS

IN BOTH POLARITIES

Four models of great importance to the computer-circuit designer



Greatly enlarged photo of Fairchild 2N696 before capping

Important – because for high-speed switching, Fairchild's 2N696, 2N697, 2N1131 and 2N1132 are the most advanced transistors available. They are solid-state diffusion devices, a type that is certain to dominate computer-circuit applications in the future because of its superior combination of speed, power and reliability. Fairchild Semiconductor Corporation was first to offer solid-state diffused NPN silicon transistors of such high performance – and again first in offering PNP silicon transistors closely matching these NPN transistors in both high frequency and DC characteristics. All are in quantity production and available from stock.

Speed and power in combination
80 milli-micro-second rise time is typical. Two-watts dissipation at 25°C. and 10 ohms maximum saturation resistance provide high-current capability even at elevated junction temperatures.

Utmost reliability
Storage at 300° C. in excess of 1000 hours caused no serious changes in these transistors, assuring a large safety factor at operating temperatures. Mesa construction as shown in enlarged photograph provides extraordinary ruggedness by eliminating suspension of any significant masses. Units have survived 22,000g, 4-millisecond duration shock test without damage.

NPN and PNP closely matched
The circuit designer need no longer be limited by unavailability of PNP transistors. Fairchild has them. And they are closely matched to the NPN transistors in DC characteristics, affording opportunities for circuit designs based on complementary symmetry.

PNP

ABSOLUTE MAXIMUM RATINGS (25° C.)

V_{CER} – Collector to emitter voltage	30v
V_{CBO} – Collector to base voltage	40v
V_{EBO} – Emitter to base voltage	5v
Total dissipation at case temperature 25° C.	2 watts
at case temperature 100° C.	1 watt

ELECTRICAL CHARACTERISTICS (25° C.)

SYMBOL	CHARACTERISTIC		MIN.	TYPICAL	MAX.	TEST CONDITIONS

HIGH PERFORMANCE HUGHES SEMICONDUCTORS

Hughes offers you a complete line of high performance semiconductor devices ... all of which have been engineered for extreme reliability. Here is a sample of these devices:

DIODES—The envelope of one-piece, fusion-sealed construction gives you complete protection from contamination and moisture penetration. Maximum body dimensions: .107"x .265". Gold plated leads: .020"x1", nominal.

Standard point-contact germanium, containing a large number of individual types each with outstanding features all its own.

High-conductance fast-recovery germanium, typified by low forward impedance and excellent transient response.

Standard silicon, featuring high-temperature operation and characterized by good forward conductance together with extremely high back resistance.

High conductance silicon, characterized by extremely low dynamic forward impedance together with excellent reverse characteristics and uniform forward characteristics.

Quick recovery silicon, combining exceptionally low capacity, high current capabilities, low reverse leakage, and fast recovery.

Gold bonded, with fast recovery plus high forward conductance, low reverse leakage, high peak inverse voltage.

Voltage Regulator, featuring low dynamic resistance and exceptional long-term stability over wide temperature ranges. E.I.A. types.

Parametric Amplifier Diodes, for use in cavity parametric amplifier. Have produced noise temperatures of 100°K at room temperature and 50°K liquid nitrogen cooled.

CAPACITORS—Tiny, reliable devices whose capacitance is determined by the applied DC voltage. They are characterized by high Q and a wide capacitance range. The famous Hughes glass envelope is utilized.

RECTIFIERS—Hughes offers you efficient silicon rectifiers with voltage ratings up to 1000 volts, and—in the glass package—current ratings up to 400 mA.

Higher ratings up to 3 amperes and 1,000V are available in EIA stud mount and top hat packages.

All the popular EIA type numbers are available on both glass and metal packages.

TRANSISTORS—*Germanium* NPN *and* PNP alloy junction transistors for high-speed switching applications at low and medium current levels.

Silicon PNP alloy junction transistors for switching and amplifying applications at low to medium current levels.

Silicon PNP *Double-Diffused Mesa* (DDMT) high frequency transistor switches and IF amplifiers operable at low to medium current levels.

In addition to semiconductor devices, also available are CAST SILICON DOMES in a wide variety of sizes.

For additional information concerning any of the products described above, you are invited to call or write the Hughes Semiconductor sales office nearest you. They are located at:

COMPUTER AND SWITCHING TRANSISTORS

2N425 2N426 2N427 2N428

This series of Germanium PNP alloy junction transistors are designed and 100% tested to close parameters for computer and switching applications where medium or high-speed as well as high current switching are required.

The reliability and stability of these transistors are assured by closely controlled techniques of manufacture. The mechanical design and hermetic seal of the TO-9 case enables these Industro transistors to meet or exceed the mechanical and environmental requirements of military standard MIL-T-19500A.

We specialize in fulfilling requirements for specially selected parameters.

Write for full information on the more than 80 types in our line.

Kodak

Q• What is a Kodak Ektron Detector?

A: It is a semi-conductive resistor. The photosensitive area can be laid down in any pattern. Response extends to 3.5 microns in the infrared. Unaffected by vibration; high signal-to-noise ratio.

Q: What can it be used for?

A: For such applications as an infrared sensor in weapons systems, and in instrumentation for process control, analysis, and safety.

Q: How can I get the facts about spectral response, types, availabilities, and the like?

A: By writing for a new brochure called "Kodak Ektron Detectors."

PHILCO TRANSISTORS

SURFACE BARRIER TRANSISTORS (SBT*)

TYPE	GAIN h_{fe}	FREQUENCY f_{max} in mc	APPLICATIONS
2N128	40	60	General communications; MIL specifications
2N240	30	Switching rates 20mc	High-speed switch; controlled hole storage and saturation characteristics; MIL specifications
2N299	22db @ 10mc	110	Tuned amplifier; MIL specifications
2N300	18	95	Video amplifier; MIL specifications
2N344	22	50	General purpose; narrow beta spread (11-33)
2N345	35	50	General purpose; similar to 2N344 with higher beta; MIL specifications
2N346	20	75	General purpose; like 2N344 and 2N345 but higher frequency

*Philco Corp. for Surface Barrier Transistor

MICRO ALLOY TRANSISTORS (MAT*)

TYPE	GAIN h_{FE}	FREQUENCY f_{max} in mc	APPLICATIONS
2N393	95	60	High-speed, high-gain switch; MIL specifications
2N1122	95	60	High-speed, high-voltage level switch
2N1122A	95	60	Higher voltage level operation

*Trademark Philco Corp. for Micro Alloy Transistor

MICRO ALLOY DIFFUSED-BASE TRANSISTORS (MADT*)

TYPE	GAIN	FREQUENCY f_{max} in mc	APPLICATIONS
2N499	10db @ 100mc	320	VHF amplifier; MIL specifications
2N501	h_{FE} 35	Switching rates 40mc	Ultra-fast switch; typical t_r 9 mμsec; t_s 9 mμsec; t_f 7 mμsec; MIL specifications
2N501A	h_{FE} 35	Switching rates 40mc	Rated at 100°C; MIL specifications
2N502	10db @ 200 mc	700	VHF amplifier; MIL specifications
2N502A	10db @ 200 mc	700	Rated at 100°C; MIL specifications
2N503	12.5db @ 100mc	420	VHF amplifier
2N504	46db @ 455kc	Minimum 50	IF amplifier; high level logic switch
2N588	14db @ 50mc	250	General purpose RF-IF amplifier

*Trademark Philco Corp. for Micro Alloy Diffused-base Transistor

MICRO-MINIATURE TRANSISTORS

TYPE	GAIN h_{fe}	FREQUENCY $f_{\alpha b}$ in mc	APPLICATIONS
2N207	100	2	Low level amplifier; particularly suited for hearing aid use; N.F.* 15db max
2N207A	100	2	Low level amplifier; particularly suited for hearing aid use; N.F.* 10db max
2N207B	100	2	Hearing aid input stage; other extremely low noise applications; N.F.* 5db max
2N534	150		High voltage amplifier switch
2N535	100	2	General purpose; 85°C max temperature rating; N.F.* 10db max
2N535A	100	2	General purpose; 85°C max temperature rating; N.F.* 5db max
2N535B	100	2	General purpose; 85°C max temperature rating; N.F.* 0db max
2N536	h_{FE} 100	2	Low level switch at pulse rates up to 150kc

*Noise Factor at 1μv reference level across 1000 ohms

SILICON SURFACE ALLOY TRANSISTORS (SAT*)

TYPE	GAIN h_{fe}	FREQUENCY f_{max} 15mc	APPLICATIONS
2N495	15		General purpose; MIL specs
2N496	h_{FE} 10	f_T 11mc**	High-speed switching; MIL specs

*Trademark Philco Corp. for Surface Alloy Transistor **Frequency for beta=1

BILATERAL TRANSISTOR

TYPE	GAIN h_{FE}*	FREQUENCY $f_{\alpha b}$ 500kc	APPLICATIONS
2N462	45		Controlled pulse response (max t_{on} and t_{off} 12 μsec)

*Forward and inverse

MEDIUM FREQUENCY TRANSISTORS

TYPE	GAIN h_{FE}	FREQUENCY $f_{\alpha b}$ in mc	APPLICATIONS
2N597	70	4.5	High-voltage general purpose amplifier and switch; TO-9 case
2N598	85	7.5	500kc logic switching; TO-9 case
2N599	105	18	Logic switching rates up to 1mc; core driver; TO-9 case
2N600	85	7.5	500kc switching; 1 watt peak power dissipation for 0.1 sec; stud mount
2N601	105	18	High-power core driver; typical rise time 0.1 μsec; stud mount
2N1123	70	4.5	High-voltage power amplifier and switch; stud mount

PULSE AMPLIFIER TRANSISTORS

TYPE	GAIN h_{FE} h_{fe}	FREQUENCY	APPLICATIONS
2N670	100	$f_{\alpha b}$ 700kc	High peak current pulse amplifier; relay driver
2N671	100	$f_{\alpha b}$ 650kc	High power version of 2N670; stud mount
2N672	20 (Sat.)	0.5 μsec max t_r	High-current switching core driver; controlled rise, fall and store times
2N673	20 (Sat.)	0.5 μsec max t_r	High power version of 2N672; stud mount

MEDIUM POWER TRANSISTORS

TYPE	GAIN h_{FE}	FREQUENCY $f_{\alpha b}$ in mc	APPLICATIONS
2N223	h_{fe} 110	0.6	Audio driver; exceptional beta lin.
2N224	90	0.51	Audio output; exceptional beta linearity; available as matched pair (2N225)
2N226	60	0.4	Audio output; exceptional beta linearity; available as matched pair (2N227)
2N1124	Min h_{fe} 40	Minimum 0.4	E3-51 based high-voltage, general purpose industrial amplifier
2N1125	h_{fe} 100	Minimum 1	E3-51 based high-voltage, medium frequency amplifier and switch
2N1126	Min h_{fe} 40	Minimum 0.4	E3-51 based high-power, high-voltage, general purpose industrial amplifier; stud mount
2N1127	100	Minimum 1	E3-51 based high-power, high-voltage, medium frequency amplifier and switch; stud mount
2N1128	h_{fe} 100	1	E3-51 based audio driver
2N1129	165	0.75	E3-51 based high-gain transistor for amplifier and switching
2N1130	125	0.75	E3-51 based general purpose audio transistor

POWER TRANSISTORS

TYPE	GAIN	FREQUENCY $f_{\alpha e}$ in kc	APPLICATIONS
2N386	33db @ 5w PO	Minimum 7	High-voltage general purpose amplifiers; relay actuators and power converters
2N387	33 db @ 5w PO	Minimum 6	High-voltage general purpose amplifiers; relay actuators and power converters

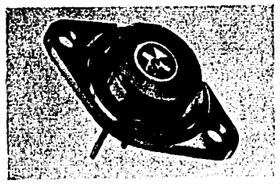
semiconductors

SILICON TRANSISTOR CORP.

All semiconductor products, manufactured by Silicon Transistor Corp., are made to rigid quality control standards emphasizing comprehensive environmental and life testing to the most severe military specifications.



TRANSISTORS

STC Diffused silicon NPN high power transistor: 60 V, 4 amp, 50 Watts.
Low saturation resistance: 0.7 ohms typical.
Hermetically sealed in TO-3 package. Typical applications: Class A and Class B amplifiers, power converters; relay replacement and controls; power switches; high level D. C. amplifiers and power supply regulators.

HIGH RELIABILITY DIODES

General purpose, high conductance, fast recovery, high temperature silicon circuit diodes in a hermetically sealed subminiature glass package. **Typical applications:** Commercial and industrial computer and military circuitry. Inquiries invited for special purpose types.

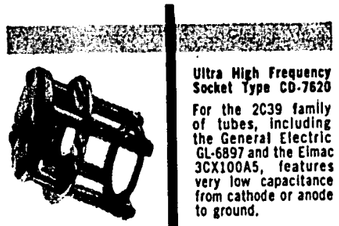
Special Sockets and Connectors

by jettron®

...FROM DESIGN TO PRODUCTION

Jettron is fully-equipped to design and manufacture your precision electronic components including connectors, sockets and cable assemblies. Call or write Jettron for quotations on "specials" for all commercial and military applications.



Ultra High Frequency Socket Type CD-7620

For the 2C39 family of tubes, including the General Electric GL-6897 and the Eimac 3CX100A5, features very low capacitance from cathode or anode to ground.

Input Connector Type CD-7700

For the Western Electric 6280/416B planar type triode. Has 18 spring fingers making contact with the RF cathode; specially designed beryllium copper contacts.

Ultra High Frequency Socket Type CD-8210

Designed by Jettron for use with the General Electric GL-6442 and similar lighthouse tubes. Features very low capacitance from cathode or anode to ground.

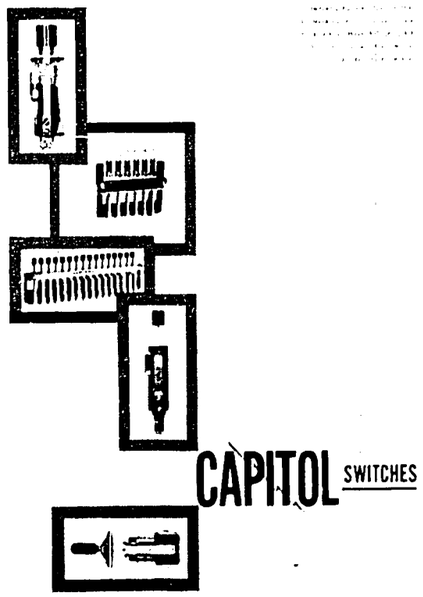
CAPITOL SWITCHES

are adapted to many variations of switching requirements and mechanical arrangements. They are manually operated units, featuring selective control of one or more groups of circuit combinations.

Capitol switches are a finely finished product, offering maximum reliability, with smooth mechanical action. All parts are noncorrosive. Paladium contacts are rated at 3 amp.



CAPITOL SWITCHES

Capitol Switches Include:

- Illuminated single and multiple position switches
- Interlocking push-button switches
- Push-lock, push-release switches
- Telephone lever switches

Typical Applications

- Test equipment control panels
- Intercommunication systems
- Computer systems
- TV and radio control systems
- Missile control systems

BRAININ ELECTRICAL CONTACTS

Contacts in BRALOY*

(Silver-Cadmium Oxide)

Resistance to sticking under high current and high inductive circuit conditions. Effective arc quenching properties. Can be supplied in the form of contact rivets, welding type contacts, etc. Whether you are seeking advice on new applications, redesign, or wish your own designs executed, send us your requirements, and they will receive our most careful attention.

Grayhill was one of the pioneers and leaders in miniaturization of electronic components. Its first product, almost 15 years ago, was a power tap switch that was the first of its kind and is still being used by many manufacturers.

Grayhill has led the way in the introduction of high quality and precision standards in miniature parts, and has helped make possible the reduction in size of so much electronic equipment without impairment of function or efficiency.

Grayhill products are sold thru a network of about 100 industrial electronic distributors strategically located across the country, each of whom maintains a representative stock of Grayhill products, enabling the industrial engineer to procure the needed requirements for engineering and prototype construction at short notice. Write for the name of your nearest Grayhill distributor, and a copy of Grayhill catalog.

PRECISION COUNTERS

Presently used in Exacting Military, Airborne Navigational, Automation & Commercial Applications

Ambient temperature range is −65°F to +160°F. Construction is of corrosion resistant non-fungus nutrient materials with stainless steel shafts operating in shielded ball bearings for low torque. Shock and vibration tested.

Series AD-1 Low cost Degree & Mil Indicator. Meets MIL-E-16400. Counts in either direction thru 360° or 6400 mils and repeats.

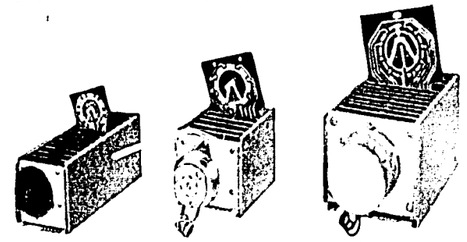
Series 2600 Latitude & Longitude Indicators with internal gearing completely contained within the moveable mask or window. Meets MIL-E-5400.

Series 2500 and Series 1000 Linear Indicator can be supplied for use with servo operated readin and readout. Thumb wheel for manual setting. Meets MIL-E-5400. For digital indication of positions, distances, etc.

Excellent delivery. Write for full details or phone WE 5-4600.

UNIQUE DESIGN ROTARY SWITCH— 5-SECOND WAFER REPLACEMENT

No Unsoldering or Disassembling . . . No Wire Removing . . . Simply Lift out Any Wafer & Replace Instantly . . . Highly Reliable—Presently Supplied for Military Applications



Reduces to seconds maintenance which otherwise could take a full day or more, saving valuable time. New design obsoletes old switches.

Switches are available in sizes approx. 2" x 2", 3" x 3" and 4" x 4" with lengths to accommodate up to 36 wafers. Virtually unlimited choice of switch circuit configurations. All connections are to a single bank of receptacles and are conveniently accessible from one side of the aluminum housing. Contacts are silver, gold or rhodium plated on a copper base. Wafers can be made to include printed circuitry and components in addition to their normal switching function.

Switches may be manually, motor or solenoid operated for use in any rotary selector switch application. Manufactured under Tabet U. S. Patent No. 2,841,660. Other U. S. and foreign patents pending. Write for details today.

THIS is the actual size of the world's simplest acceleration switch.

It represents a totally new concept in acceleration sensing devices. Weight: about one ounce. Only one moving part: a precision ground ball held by an alnico magnet. The ball is released to close or open an electric circuit when the force of acceleration exceeds the magnet's pull.

It's as simple as that. Yet this versatile I-S design makes possible switches that respond axially, radially, or omnidirectionally, from 0.01 g to 500 gs. With adjustable g settings, if you desire. Automatic reset is optional. Closure time is variable. Accurate within 0.1%. Meets all applicable Mil specs.

But more than an ingenious design, the I-S switch represents an important attitude . . . an attitude that produces only equipment of sound and simple design and reliable performance, of uses limited only by your needs.

Try us; write today for descriptive brochure ID5960

INERTIA SWITCH, INC. 311 West 43rd St., N. Y. 36 • JUdson 6-5880
Inertia Switch invites research and development inquiries in the acceleration sensitive field.

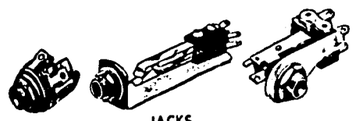
SWITCHCRAFT INC.

"SETS the STANDARD" in electronic components

FOR RADIO—TELEVISION—HI-FI—STEREO—TAPE RECORDERS MUSICAL INSTRUMENTS—ELECTRONIC CONTROLS AND COMPUTERS



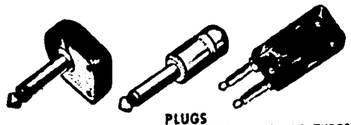
JACKS

FOR MILITARY AND INDUSTRIAL EQUIPMENT—MOST COMPLETE LINE

Available in all common and many special circuits.
"LITTEL-JAX"—require minimum panel space.
"TINI-JAX"—Similar to "Littel-Jax"—subminiature in design.
"SF-JAX"—short frame design—innumerable circuits.
"LF-JAX"—long frame design—all circuits.
"EXTENSION JAX"—for cable extensions.
"SHIELDED JAX"—shield assembled into and made a part of Jack.
"LAMP JAX"—Switchboard panel type. Ideal for mounting on Jack Panel.

TELEPHONE & MILITARY JACKS

"T-JAX"—a conventional telephone switchboard design—all standard circuits and military specifications.
"M-JAX"—a heavy duty design used in heavy industrial equipment.



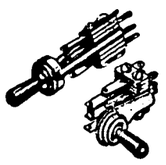
PLUGS

THE LARGEST VARIETY OF STYLES, SIZES AND TYPES

"LITTEL-PLUG"—small—fits standard Jacks—(also MIL type).
"TINI-PLUGS"—sub-miniature 2 conductor Phone Plug for use with "Tini-Jax".
"LUG-PLUG"—small—low cost.
"STANDARD"—conventional size, heavy terminals—rugged design. 2 and 3 conductor types.
"FLAT-PLUG"—removable cover permits use with screw or solder lug terminals. 2 or 3 conductor types.
"TWIN-PLUG"—two electrically independent 2-conductor plugs on 5/8" C.C. MILITARY TYPE

JACK PANELS

Black phenolic strip, reinforced with steel, supports Switchcraft "T-JAX" and "MT-JAX". Single or double row panels accommodate up to 52 Jacks—common and special circuits.



"LEV-R SWITCHES"

Unusually compact. Many circuits. Locking and non-locking. Series 3000 and 13000—single hole mounting. Series 12000 requires only about 1/4 of depth behind panel of conventional "Key" switches.

"FF-SWITCH"

Flat frame support spring "pile-up" in various circuits and contact combinations. "Easy" action of colored push buttons.

"HOOK SWITCH"

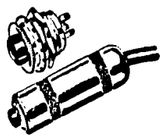
Switch actuated by hanging accessory on hook. 2 different methods of mounting. Standard circuits. Soft easy action. Require minimum of depth behind panel.

"TELEVER SWITCHES"

Rugged telephone type. Locking and non-locking types. Series 6000 mounts by screws or to escutcheon plate. Series 16000 features single hole mounting.

"LITTEL & TINY-SWITCHES"

"Littel-Switch" — rugged yet small, a Push Button switch available in simple circuits; contacts to suit. Various colors of Buttons.
"Tiny-Switch" — similar to "Littel-Switch", except sub-miniature design.



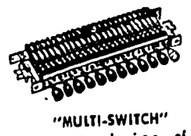
BUTTON AND CORD SWITCHES

"Button-Switches"—unusually small push button switch, completely enclosed.
"Cord-Switches" — cord mounted or pendant switch. Ideal for "hold" in hand operation.

COMPLETE LINE OF AUDIO ACCESSORIES — ADAPTERS, COUPLERS, CONNECTORS WITH PHONE OR PHONO CONNECTIONS, AUDIO MIXERS, SPEAKER CONTROLS. Write for Bulletin S-590.

"RS-SWITCH"

Rotary switch, rugged frame supports spring "pile-ups"; minimum panel depth. 2 or 3 position; locking or non-locking action.



"MULTI-SWITCH"

Features choice of switching functions. 1 to 37 stations possible. Single frame or ganged assemblies. Illuminated or non-illuminated buttons.

MOLDED CABLE ASSEMBLIES

(Audio Jumpers) Plugs molded directly to various cable combinations. Shielded and unshielded. Various lengths.

Illustrated are representative parts of the regular line. Send for Catalog No. S-58. Inquiries on custom-made components will receive prompt attention.

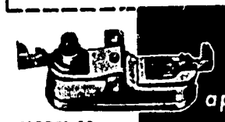
Rugged, Precision

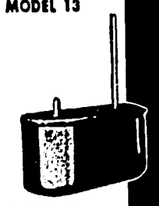
MINIATURE THERMOSTATS



MODEL 13

For your precise applications:

- MISSILES
- ELECTRONIC CONTROL
- AIRCRAFT
- COMPUTERS
- AUTOPILOTS
- TRANSISTOR PROTECTION



MODEL 24

MODEL 11

Illustrations shown full size

★ ***Hermetically Sealed***

★ ***Strain Relief Protected***

The quality of Ulanet miniature thermostats has been proved by years of dependable operation under the most extreme conditions. Their inherent accuracy and rapid response has been the leading reason for their final choice in so many critical applications. Get in touch with Ulanet for the answer to your heat control problems.

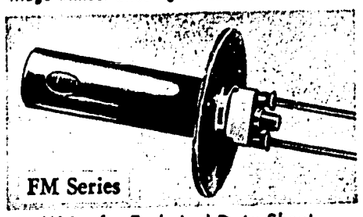
NEW!

Hermetically Sealed Surface-Sensing Miniature Thermostat

The only unit that meets the most stringent aircraft and military applications.

Send for Bulletin 100 for full details and dimensional drawings.

FM Series—The only metal thermostats that withstand mechanical clamping or pinching of cartridge without affecting set calibration.



Write for Technical Data Sheets

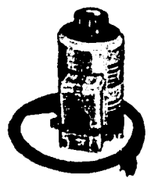
POWERSTAT

the most extensive line of **Variable Transformers**

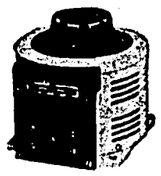
POWERSTAT variable transformers deliver a continuously-adjustable output voltage from a-c power lines. They feature excellent regulation, zero waveform distortion, high efficiency and rugged construction. POWERSTAT is the quality variable transformer... designed, engineered and manufactured to user requirements for long, dependable service.

TYPE 10B

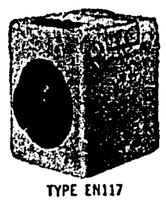
TYPE 20



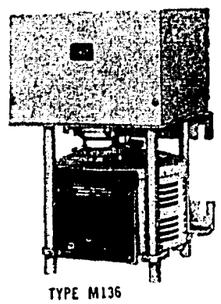
TYPE 116



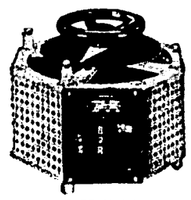
TYPE 126



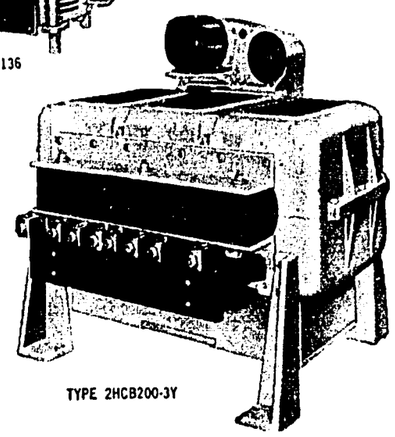
TYPE EN117



TYPE M136



TYPE 1156C



TYPE 2HCB200-3Y

10B SERIES

Provide highest ratings and performance characteristics in their price and size range. New brush design for longer life, more efficient operation, easier replacement. Constant current load rating to 1.75 amps.; constant impedance load rating to 2.5 amps. For 120 and 240 volt duty.

20 SERIES

Of open construction for back-of-panel mounting. Ideal components for apparatus requiring a variable transformer with constant current load rating to 3.0 amps.; constant impedance load rating to 5.0 amps. For 120 and 240 volt duty.

116-216 AND 117-217 SERIES

Open, enclosed and/or fused cord-plug types available. On 120 or 240 volt lines, constant current load rating 7.5 amps. for 116 Series; 10 amps. for 117 Series. On 240 and 480 volt lines, constant current load rating 3 amps. for 216 Series; 4 amps. for 217 Series. Higher on constant impedance loads.

EN116-EN216 AND EN117-EN217 SERIES

Housed in functionally formed and joined dust-tight enclosures. On 120 or 240 volt lines, constant current load rating 6.5 amps. for EN116 Series, 8.5 amps. for EN117 Series. On 240 or 480 volt lines, constant current load rating 2.6 amps. for EN216 Series, 3.5 amps. for EN217 Series. Higher on constant impedance loads.

126-226 SERIES

Small, compact, functional design in open, enclosed, fused, cord-plug, enclosed terminal models. On 120 or 240 volt lines, constant current load rating 12.5 amps. for 126 Series. On 240 or 480 volt lines, constant current load rating 6 amps. for 226 Series. Higher on constant impedance loads.

136-236 SERIES

Manually-operated and motor-driven types available. On 120 or 240 volt lines, constant current load rating 20 amps. for 136 Series. On 240 or 480 volt lines, constant current load rating 9 amps. for 236 Series. Higher on constant impedance loads. Motor-driven standard speeds 5, 15, 30 or 60 seconds.

1156C-1256C SERIES

Heavy duty POWERSTATS. As many as 24 units can be ganged and mechanically and electrically interlocked for ratings up to 217 KVA. On 120 or 240 volt lines, current ratings up to 270 amps. for 1156C Series. On 240 or 480 volt lines, current ratings up to 224 amps. for 1256C Series. Manually-operated or motor-driven.

H-C SERIES

Introduce a new concept in variable transformer design. Have helical coils with motor-driven contact brushes rotating along outside edge of coil. Feature high current ratings, low impedance. Either 200 or 360 amp. types available. For 240 volt, 60 cycle 3-phase service.

plus: LINE CORRECTORS • EXPLOSION-PROOF • LIMITED RANGE • ISOLATED WINDING • OIL-COOLED • HIGH FREQUENCY ..*and other types*

ELECTRAN

Transformers

Transformers, Saturable Reactors, Chokes, Special Windings and Electronic Devices. Milliwatts to 50 KVA, single or polyphase in all frequencies.

Complete design and engineering service. All modern techniques, encapsulation, casting, military and commercial construction.

And, we've got one asset you'll find especially helpful: WE *TRY* HARDER!

TRANSFORMERS

BUILT TO MEET YOUR DESIGN PROBLEMS

All Forbes and Wagner Transformers are produced to meet specific circuit specifications. We can design to solve your problem or build to your own design. Our experience covers miniature, encapsulated, potted, molded, plug-in, open frame types. Let us show you what this experience can do for you.

FLYBACK PULSE RF-IF SATURABLE TOROIDAL

Up to five F & W sub-miniature pulse transformers are packaged in this single assembly measuring 1.80" x 1" x .312".

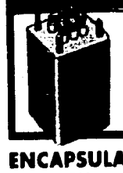
Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. Complete addresses will be found in the Alphabetical Directory, pages 161-264.

CUSTOM DESIGNED TRANSFORMERS for RELIABILITY



HERMETIC
Ceramic compression terminals. Stud type mounting. Schematic. Baked enamel finish, MIL-T-27A.

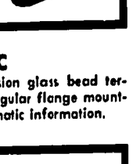
ENCAPSULATED HIPERSIL
Bracket mounting. Epoxy impregnation and coating. Resists environmental extremes.

SUB-MINIATURE MIL CASE
Hermetic. Ceramic compression terminals. ¾" x ¾" x 1⅛" H. Wt. 1⅛ oz. MIL-T-27A Grade 4, class R.

MINIATURE MOLDED
Epoxy cast. Resists environmental extremes. For plug-in printed circuits. .040 pins ⅞" x 1⅝₂" x ⅞" H. Wt. 1¾ oz.

ENCAPSULATED POWER
Bracket mounting. Used in portable equipment where terminals must be brought out from Transformer.

HIGH TEMPERATURE OPEN FRAME
For Airborne Applications, Teflon, Mylar, and Silicone insulations used. Flat bracket mounting.



HERMETIC
High compression glass bead terminals. Rectangular flange mounting. Full schematic information.

ULTRA-MINIATURE (UM-F)
Resin impregnated. 4" color coded leads for dip soldering. Size ⅜" x ⅜" x ⅜". Wt. .08 oz.

Classifications with a System!

THE IRE Directory Product Classifications have both a pattern and a purpose. They differ widely from most product indexes, deliberately. They aim to organize the hundreds of products and services of a complex technical industry according to the way engineers think. The result is a division of all products and services into three fundamental indexes into which 102 basic classifications have been organized.

For detailed identification, these 102 products and services, grouped in the 3 indexes, are further defined into 857 named products. We have tried to avoid oversimplification, and a tremendous amount of information is given by our product number system. But, the basic indexing adds speed. Purely alphabetical directories are as slow and cumbersome as a telephone book. IRE engineers have liked our system better!

You will note that we here differ from most directory compilers, for we do not mix meters with motors simply for alphabetical reasons. Products which are in the form of "Complete Equipment" form the first fundamental group. Yet, the same manufacturer may also appear in the "Component Parts" section. This system gives subject grouping for speed and convenience. A directory should aid a man who has forgotten some detail, or product name. Ours helps by grouping products as one would *think*.

For safety, an alphabetical "terminology" index is given in the pink pages. You will note also that after each firm, its products are listed by number code in the alphabetical list, and that sub-classifications shown by number code in the product indexes give much detail. Just a little study of the system will help you get great good from this book.

The IRE DIRECTORY is four directories in one

Alphabetical • Complete Equipment • Components • Materials and Services

Sola Electric Co.

SOLA AC and DC voltage regulation

Continuous, automatic, maintenance-free

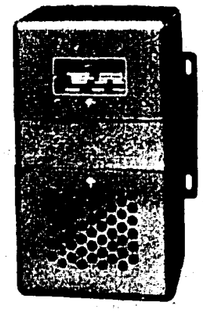
Sola Constant Voltage Transformers and Regulated DC Power Supplies provide dependable, regulated output voltage. Their output regulation is unaffected by wide variations in input voltage.

Sola CV Transformers are static-magnetic regulators with completely automatic, continuous regulating action. Their response to variations in input voltage is usually 1.5 cycles or less. They have no moving or renewable parts and require no maintenance.

Each Sola Regulated DC Power Supply incorporates a constant voltage transformer in combination with a semi-conductor rectifier and a high-capacitance filter section. This combination makes the power supply compact, dependable, and efficient; and assures sustained output voltage in the face of pulse or intermittent loads, or heavy, short-time overloads.

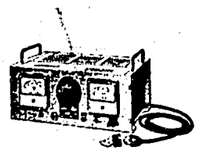
Constant Voltage Transformers

Sola Constant Voltage Transformers



***Standard Sinusoidal Type** provides voltage regulation of ±1% with primary voltage variations as great as ±15%. With less than 3% total rms harmonic content in their output voltage wave, these units are desirable for use with equipment having elements sensitive to power frequencies harmonically related to the fundamental. Available in nine ratings, 60va to 7.5kva.*

***Normal-Harmonic Type** also provides ±1% regulation at somewhat less cost. This group has an average of 14% total rms harmonic content in its output voltages and is suited to equipment not extremely sensitive to voltage wave shape. The series includes those mechanical designs specially engineered for use as built-in components. Nineteen stock ratings range from 15va to 10kva.*



***Adjustable Sinusoidal Type** provides ±1% regulated voltage output—one output adjustable from 0-130 volts and one fixed at 115 volts. Has less than 3% total rms harmonic content in output voltage. Portable for use in shop or laboratory, or mount on standard relay rack.*

***Electronic Power Type** regulators provide ±1% regulated filament voltage at 6.3 and 6.3-volt levels; or a combination of plate and filament voltages regulated ±3% for ±15% input variations. Filament regulators are available in ratings from 2.3 to 25 amps. One model is specially designed for portable lab or shop bench use; it has a 30va rating. Combination plate/filament regulators, in three stock sizes, are designed to operate with commonly-used rectifier tubes.*

***Custom-designed units** can be supplied in production quantities in ratings from 1va to 25kva to suit individual specifications. Custom designs can include special mechanical structures, various voltage ratios, special frequencies, compensation for frequency variations, multiple output voltages, three-phase service. Units can be manufactured to military specifications.*

Write for Circular 11-CV for additional information on Sola Constant Voltage Transformers

DC Power Supplies

Sola Constant Voltage DC Power Supplies

For intermittent...variable ...pulse...or high-current loads

Compact, rugged Sola Constant Voltage DC Power Supplies provide output regulated within ±1% over line voltage variations as great as ±10%. Their output contains ripple voltage of 1% total rms or less. They have exceedingly low output impedance. Output is in the "ampere" range. The high, short-time overload capacity handles intermittent and pulse loads without serious voltage drop or damage to components.

***Fixed-output-voltage designs** are available in six stock models with ratings from 24v @ 6a to 250v @ 1a. They are extremely compact, light-weight, and moderately priced in proportion to their power output and performance.*

***Adjustable-output designs** provide a considerable range of regulated dc test voltages. Accessory handles offer portability and permit self-stacking. Six models are available with outputs ranging from 5v @ 7a to 400v @ 0.6a.*

YOUR NEEDS BECOME TELEX' SPECS!

Pioneers in miniaturization—*specialists* in custom packaging for computer, military, AEC, missiles—*experienced* in the rigid performance specifications and tough environmental conditions required for electronic gear in missiles and rockets...Now Telex experience is available to private industry.

Telex production and testing facilities are geared to the specialized requirements of miniaturization—of close tolerance production including Mil-T-27A specifications—and of special packaging techniques including encapsulation.

For maximum component density, maximum reliability, and rigid environmental requirements . . . talk to Telex. For Pulse Transformers, Toroidal Coils, Inductors, Subminiature Audio Transformers, or for other Magnetic Components . . . talk to Telex.

In fact, why not talk to Telex today? Or simply write for information.

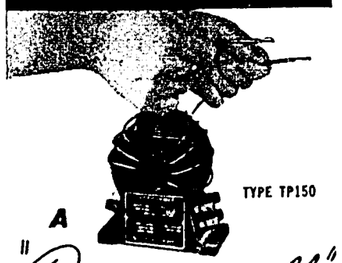
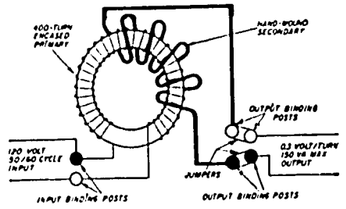
FLEXIFORMER
PACKAGED TRANSFORMER PRIMARY



A
"Do-it-yourself"
TRANSFORMER

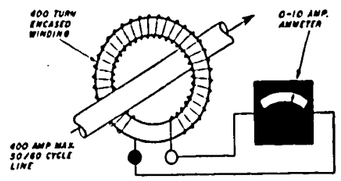
Here is the original "do-it-yourself" transformer. This portable, self-contained toroidal primary coil eliminates the task of obtaining the right transformer for each new job . . . simply wind your own! Especially useful when high amperage at low voltage is required. Used to demonstrate basic transformer principles . . . serve as working lab equipment. The primary consists of a silicon steel core having a coil of 400 turns of copper wire. Completely enclosed in durable, high-impact plastic with integral SUPERIOR 5-WAY binding posts for making connections. Versatile laboratory, shop, classroom and inspection aid.

A SOURCE OF A-C VOLTAGE



FLEXIFORMER type TP150 has an input rating of 120 volts, 50/60 cycles single phase and an output rating of 150 VA. The voltage of the secondary is proportional to the number of turns hand wound through the center opening. The correct number of turns is determined by dividing the desired output voltage (plus approximately 25%) by 0.3 which is the volt/turn ratio of the FLEXIFORMER.

A CURRENT TRANSFORMER



FLEXIFORMER type TP150 becomes the secondary winding when used as a current transformer. A current carrying conductor passing through the center opening serves as the primary. When used with a 0-1 ampere ammeter, currents up to 400 amperes can be measured with an accuracy of 1% at 60 cycles. Can be used as portable units or fastened permanently in place.

Note 1—SM series are two hole mounting with holes on center line. #4-40 Pem nuts are fastened to the bracket.
Note 2—#6-32 Pem nuts on bracket are standard.
Note 3—#8-32 Pem nuts on bracket are standard.

● Dielectric test voltages:
PRIMARIES 1000 Volts RMS
SECONDARIES 1500 Volts RMS
● All primaries 380-1000 cps
● Epoxy resin used as encapsulant
● Prices subject to change without notice

STERLING TRANSFORMER CORPORATION
297 North 7th St. Brooklyn 11, N.Y.
Stagg 2-4200

TRANSFORMERS DESIGNED AND BUILT TO MEET YOUR SPECIAL REQUIREMENTS
For government and industrial specifications
PROTOTYPES DELIVERED WITHIN 1 TO 3 WEEKS • We are noted for our ability to solve special problems.

Custom-designed General Electric Cathode Ray Tubes Improve Display-equipment Performance

Today's industrial and military display applications require the finest in cathode-ray-tube technology.

At General Electric, each customer requirement is analyzed to help the customer determine the tube design best suited to it. Should a new or improved type be needed, a veteran G-E engineering-manufacturing task force researches, custom-designs, and produces the appropriate tube.

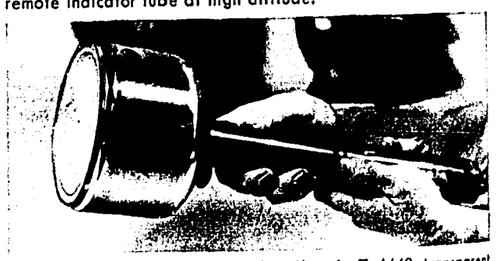
General Electric's fully integrated Cathode Ray Tube Department includes research-and-development engineering and laboratories, design engineering, and manufacturing and marketing engineering facilities. Also available is the experience gained through company-wide work in virtually every engineering and scientific field.

For immediate answers to your display problems, call or write Regional Sales Managers R. E. McBride, M. B. Lees, or A. N. Reagan—General Electric Company, Cathode Ray Tube Department, Electronics Park, Syracuse, N. Y. 555-1

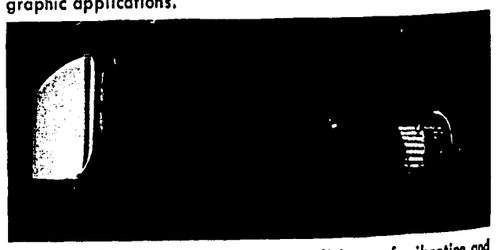
Large (16") GL-4623 electrostatic deflection tube was custom designed for critical processed-video use . . . can be furnished to meet specific pattern-distortion requirements.

From G.E.'s CRT Development Laboratory came the GL-4619 21-inch, closed-circuit TV monitor tube, which provides more than 1000-line resolution in critical airport operations.

Tiny (1½") GL-4580 electrostatic deflection tube, developed by G-E manufacturing-engineering task force, performs as vital remote indicator tube at high altitude.



Thoroughly researched and job-tailored, Z-4448 transparent phosphor tube offers ultra-high resolution for specialized photographic applications.



Designed for use under severe conditions of vibration and humidity, two-gun GL-4386 4 x 6" electrostatic deflection tube meets all design specs, is successfully job proven.

Progress Is Our Most Important Product

GENERAL ELECTRIC

I want a "Whatcha-ma-call-it?"

It's a "thinga-ma-jig that....."

How often have you struggled to remember the name of a component or electronic item. . . . Just could not think quickly what it is called?

YOU CAN FIND IT IN THE IRE DIRECTORY!

because

(1) The IRE Directory classifies products by purpose and use.

(2) Its listings are fundamental—the way an engineer thinks.

(3) "Terminology" is cross indexed in the pink pages —condensed, simple, not mixed in with firm names.

(4) Ads face listings thus helping to identify products by actual pictures.

(5) Product code numbers reduce complex and duplicate listings, saving you "searching" time and effort.

Study it . . . save it . . . work it.

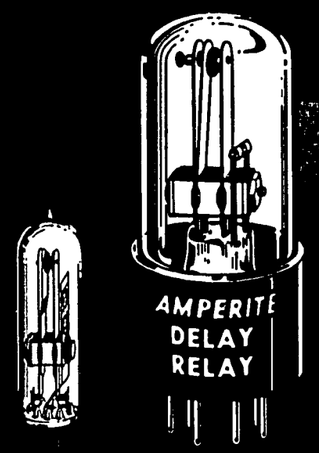
AMPERITE PREFERRED

by design engineers—because they're
MOST COMPACT • SIMPLEST • MOST ECONOMICAL
HERMETICALLY SEALED



Thermostatic DELAY RELAYS

2 to 180 Seconds

Actuated by a heater, they operate on A.C., D.C., or Pulsating Current.

Hermetically sealed. Not affected by altitude, moisture or climate changes.

SPST only—normally open or closed.

Compensated for ambient temperature changes from —55° to +70° C. Heaters consume approximately 2 W and may be operated continuously. The units are rugged, explosion-proof, long-lived, and—inexpensive!

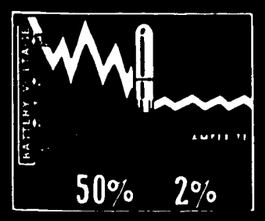
TYPES: Standard Radio Octal and 9 Pin Miniature. List Price, $4.00. Standard Delays.

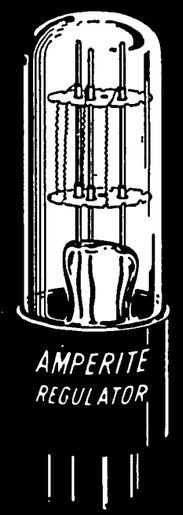
Also—Amperite Differential Relays: Used for automatic overload under voltage or under current protection.

PROBLEM? Send for Bulletin No. TR-81

BALLAST REGULATORS

Amperite Regulators are designed to keep the current in a circuit automatically regulated at a definite value (for example 0.5 amp.) For currents of 60 ma. to 5 amps. Operate on A.C., D.C., or Pulsating Current.





Hermetically sealed, they are not affected by changes in altitude [illegible] to 90 C° of humidity. Rugged [illegible]. List Price, $3.00.

AMGLO

Grid Controlled Flashtubes

- Used extensively for automotive timing, wheel balancing and other stroboscopic applications.
- Capable of flashing at rates up to several thousand per minute when operated at 400—600 volts.
- Can be used with electrolytic or oil capacitors, 1 to 2 Mfd at high flash rates, 2 to 4 Mfd at rates to 1800 per min.
- Non-polarized, may be accidentally or purposely (to increase life) reversed without harm.
- Special tubes of all kinds promptly made.

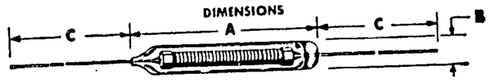
2: 1%, 2% and 5% tolerance available only below 100 meg.
3: 1% and 2% tolerance available only below 100 meg.

DIMENSIONS



HI-MEG RESISTORS

GLASS SEAL: HI-MEGS are vacuum sealed in a glass envelope which is treated with a special silicone varnish which keeps the resistor relatively free from the effects of moisture.

RESISTANCE: HI-MEG resistors are available in values from 10^8 to 10^{14} ohms.

TOLERANCE: HI-MEG resistors can be supplied in the following tolerances: 1% below 10^{12} ohms, 2% and 5% below 10^{13} ohms, and 10% over the entire range.

MAXIMUM WORKING VOLTAGE: 1000 volts.

MAXIMUM OPERATING AMBIENT TEMPERATURE: 100°C.

POWER RATING: The power rating for any HI-MEG resistor is equal to one divided by the resistance in megohms.

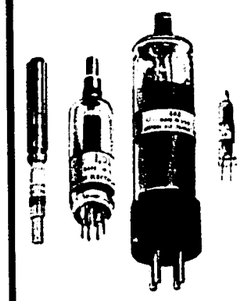
SOLVE YOUR REGULATED HIGH VOLTAGE PROBLEMS NOW WITH RELIABLE ANTON CORONA DISCHARGE V-R TUBES



ANTON CORONA DISCHARGE V-R TUBES

have been found to be extremely reliable over the wide range of military shock, temperature, current and voltage requirements. Fixed and adjustable tubes are available to stabilize voltages from 300 V—30 KV at currents below several milliamperes with voltage tolerances within ± 1%. MIL approved types available. Well suited for use as voltage reference tubes, stabilizing all high voltage-low current power supplies and for control of high voltage, accelerating potentials of cathode ray devices (radar scopes, TV, etc.). Send for valuable FREE application and design notes.

SPECIAL PURPOSE ELECTRON TUBES!

KIP Electronics — designers and manufacturers of these original and exclusive types:

- Triple Coincidence Thyratrons
- Transistor Indicators
- Display and Memory Diodes
- Low Drain Heater Cathode Triodes
- Cold Cathode Diodes and Triodes
- U. H. F. Diodes and Triodes
- Linear Display Counters
- Logarithmic Diodes
- Binary Counters
- Trigger Tubes

These tubes are made in many sizes with various ratings. If you have any tube problem, KIP will solve it . . . in fact, they may have already done so.

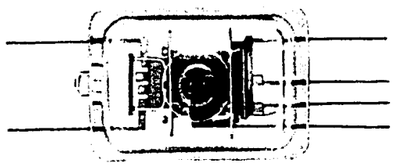
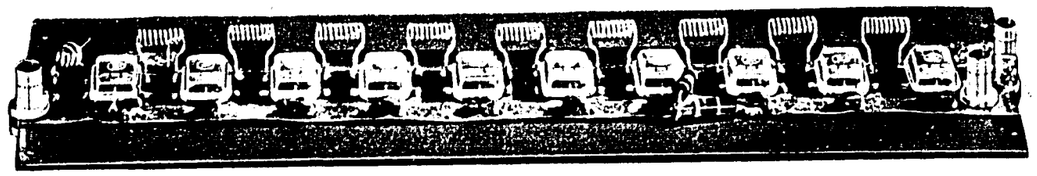
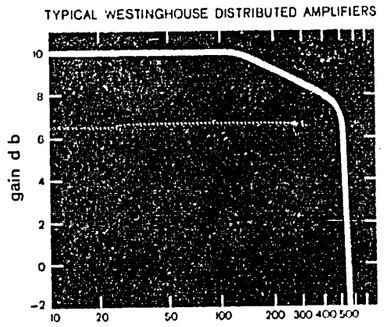
Westinghouse tube engineering... serving the nation through imagination





GAIN AT HIGHER FREQUENCIES



with Westinghouse distributed amplifiers

The new Westinghouse Match Box Tubes provide distributed amplifiers with response to 550 MC.

Match Box tubes surpass conventional tubes in high frequency performance and resistance to vibration. Tubes lie flat . . . no height problem . . . eliminates sockets, fits printed circuits.

Westinghouse Distributed Amplifiers can be designed with various frequency pass bands. They're especially suited for electronic counter-measure circuits and for high-speed, high-frequency oscilloscopes. We'd welcome the opportunity to design and build your Distributed Amplifiers.

CHARACTERISTICS WX3683

Heater 6.3 Volts	0.2 amperes
Plate current	8 milliamperes
Transconductance	5100 micromhos
Plate Voltage	180 volts

Write for complete information.

There are

3 SPECIFIC WAYS

in which "Proceedings of the I R E" serves the advertiser differently and more effectively than other publications.

1. Pre-Specification Selling

Because "Proceedings of the I R E" publishes basic research and engineering application articles it is closely studied by those design engineers who must "keep ahead of the market." Often, the research published leads the industry production by from two to six years! The alert engineer, who needs this amount of time for his own design applications and for tooling up and changing the production in his own factory, studies the "Proceedings of the I R E" carefully. Its articles keep him abreast with the changes that will inevitably come and make it possible for him to be ready for them. This is the time for you to sell the unknown engineer designing the never-dreamed-of-product "before it happens!" It is an insurance that you will be ahead of the market instead of behind it.

2. Personal Connection to the Individual

The Institute of Radio Engineers is an engineering society for individual engineers who must qualify on their own education, experience and engineering work. Thus, the magazine follows the reader as his private possession, wherever he goes. Wherever new engineering progress is developing, the work is done by individual engineers—and it is these men that must be sold! Only the engineer knows enough to specify and buy in a highly technical industry. Selling is a matter of reaching the minds of men because *a company cannot sign a purchase order.* Wherever radio engineering activity is the greatest, companies employ I R E members. An engineer moves into a new job in advance of production and with him goes "Proceedings of the I R E," with all the advertising you so urgently need to place where engineering activity is the greatest.

3. Economy

It is a specific purpose of the Insitute of Radio Engineers that its advertising rates should benefit and help the industry grow, by being economical. Part of the economy of a tax-free organization is thus passed on to advertisers in the form of low-cost advertising to a high-quality audience. The page rate per thousand engineers of "Proceedings of the I R E" is the lowest in the radio-electronic industry by deliberate intent. Thus, the Institute finds an extra way that it can help the firms that hire its engineers to gain new business at lower costs.

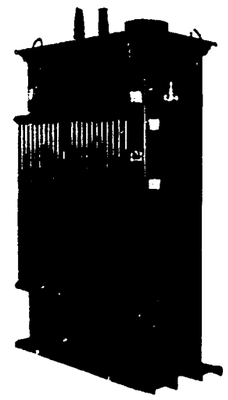
INDUSTRIAL SERVICE
PACKAGED POWER SUPPLIES



For use in applications where large amounts of DC output power is required. Input is usually 220 V. or 460 V., three phase (single phase types also available). Output is rectified DC which is completely isolated so that either side can be grounded. All units use new type WIDE AREA silicon rectifiers. No tubes or other delicate parts to replace or wear out. Forward resistance is very low, resulting in excellent voltage regulation. Special cell balance precautions guard against surge damage. Simply connect one of these units to the power lines and obtain direct current output. Variable voltage output is obtainable by adjusting input voltage. Standard models are listed below. Good delivery on other voltages and currents.

Model	Output Voltage	DC Current
100-100	100 Volts	100 Amps
100-1000	100 Volts	1000 Amps
500-50	500 Volts	50 Amps
500-500	500 Volts	500 Amps
1000-50	1000 Volts	50 Amps
1000-100	1000 Volts	100 Amps
3000-10	3000 Volts	10 Amps
3000-50	3000 Volts	50 Amps
5000-10	5000 Volts	10 Amps
5000-25	5000 Volts	25 Amps
10,000-2	10,000 Volts	2 Amps
10,000-5	10,000 Volts	5 Amps
20,000-2	20,000 Volts	2 Amps
20,000-5	20,000 Volts	5 Amps
30,000-2	30,000 Volts	2 Amps
30,000-5	30,000 Volts	5 Amps

GE Power TUBES

First Choice

FOR MILITARY AND COMMERCIAL APPLICATIONS

Pioneering research, precision manufacture and advanced testing, combined with forty years' design and application experience . . . these are the reasons why you should make General Electric Power Tubes your first choice for military and commercial applications.

- Klystrons
- Thyratrons
- Ignitrons
- Magnetrons
- Voltage-Tunable Magnetrons
- Metal-Ceramic Tetrodes
- Camera Pick-up Tubes
- Traveling-Wave Tubes
- Parallel-Plane Microwave Tubes
- High-Power Duplexers
- High-Power Waveguide Filters
- Special Purpose Tubes

Contact your nearest General Electric power tube representative for availability, delivery and technical information on any of the above products. *Power Tube Department, General Electric Company, Schenectady 5, New York.*

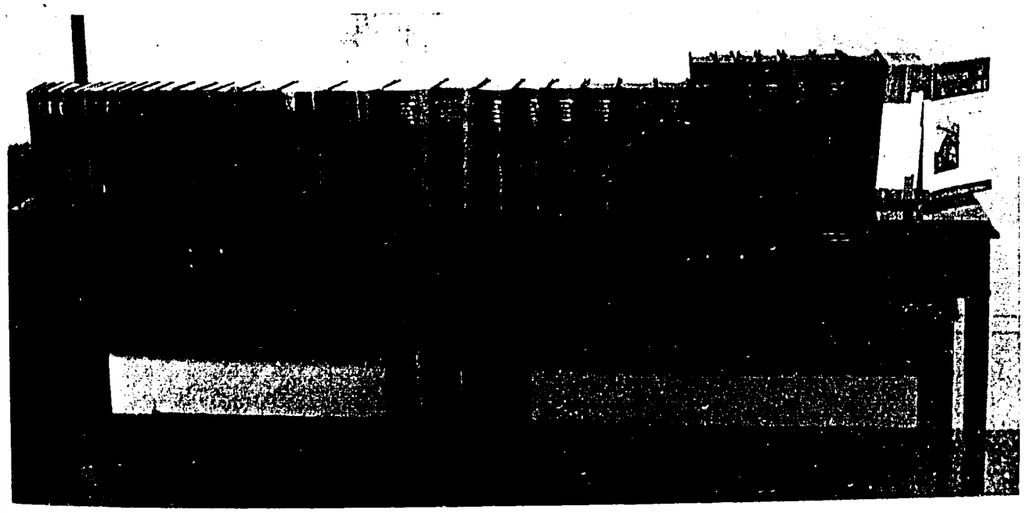
Be sure to consult the advertisements in this issue for complete information on products. Directory listings cannot tell you everything you want to know about a company's products. For example, the National Electronics, Inc., advertisement on page 586 gives complete specifications on their entire line of electron tubes.



FORTY-SEVEN YEARS OF RADIO-ELECTRONIC HISTORY

are recorded in "Proceedings of the IRE." The photo above shows the issues from 1912 through 1947—twelve years of rapid advances and earth-shaking accomplishments are not even included in this panorama of progress! Since publication of its first issue, "Proceedings of the IRE" has paced and pioneered in every field of radio from the first vacuum tube through today's giant computers and tiny transistors. The engineers who write, read and use this magazine have transformed the world in forty-seven short years! Is it any wonder that so many advertisers believe these engineers must learn about their products in the fact-packed advertising pages of "Proceedings of the IRE"?

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. Complete addresses will be found in the Alphabetical Directory, pages 161-264.

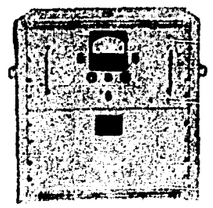
STABILINE

Automatic

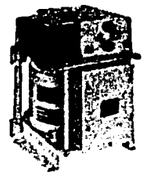
VOLTAGE REGULATORS

with rated outputs from

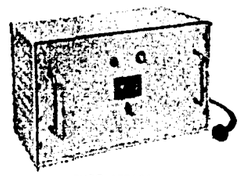
0.25 to 100 KVA



TYPE EMT4115

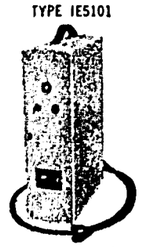


TYPE EMT4104UT

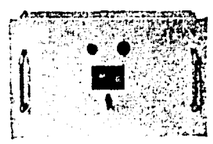


TYPE IE5101

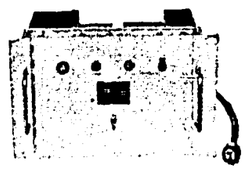
TYPE IE5102R



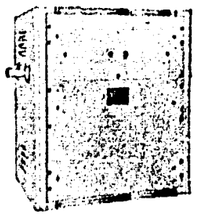
TYPE IET51002



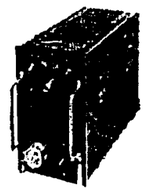
TYPE IET5101R



TYPE TM7101R



TYPE TM7105



TYPES IEH5101 and TMH7101

TYPE IEH5101R

STABILINE automatic voltage regulators deliver a constant output voltage regardless of variations in input voltage or changes in load current. Each is a precision built unit subject to the most rigid manufacturing specifications, inspected at every stage of manufacture, checked and rechecked to assure published performance characteristics. Several series are available to meet the particular requirements of any application.

EMT SERIES
Electro Mechanical Transistorized

Consist of POWERSTAT variable transformer, detector circuit, auxiliary transformer. Highly efficient, correct faster than most automatic voltage regulators. Maintain constant voltage to loads up to 100 KVA without waveform distortion. Control circuit is completely transistorized.

IE SERIES
Instantaneous Electronic

Completely electronic with no moving parts. Hold output voltage to within ±0.1 percent for wide line variations and within ±0.15 percent for any load current change or load power factor change from .5 lagging to unity. Waveform distortion never exceeds 3%.

IET SERIES
Instantaneous Electronic Transistorized

Feature a transistorized circuit. Output voltage remains within a 0.5 volt bandwidth for any and all variations in line voltage, load current and load power factor (0.25 volt bandwidth for input voltage changes only; 0.25 volt bandwidth for load current and power factor changes from lagging 0.5 to unity).

TM SERIES
Tubeless Magnetic

Have no tubes, transistors or moving parts. For unattended locations or where maintenance is impossible over long time periods. Response time for ordinary line and/or load changes is within ½ second; accuracy is within a 1.0 volt bandwidth.

STABILINES
for High Frequency Applications

Meet the light weight and small size requirements for 400 cycle use. Built to meet military specifications.

THE SUPERIOR ELECTRIC COMPANY

From the AMCI Catalogue

AUTOMATIC IMPEDANCE PLOTTERS

- *Continuous impedance display with frequency*
- *Available in portable and rack-mounted units*

Type	Frequency Range (mc)	Line Size
12	2.5-250	Type N
11-Q	30-400	Type N
11-PS	180-1100	Type N

SLOTTED LINES

TYPE 1026-4

- *Residual swr under 1.010*
- *Rated error in detected signal under 1.005*
- *Available with a wide variety of tapered reducers*

Type	Frequency Range (mc)	Impedance (ohms)
1026-13	50-3000	50 or 75
1026-8	75-3000	50 or 75
1026-6	100-3000	50 or 75
1026-4	150-3000	50 or 75
1026-2	300-3000	50 or 75

COAXIAL SWITCHES

TYPE 1038

- *High power ratings; swr under 1.06*
- *Pressurized*
- *Motor-driven and manually operated models*

Type	Frequency Range (mc)	Line Size
1038	0-450	6⅛"
1136	0-500	3⅛"
Very high peak power models for radar applications		
1038-HV	0-450	6⅛"
1136-HV	0-500	3⅛"

INSTRUMENT LOADS

TYPE 1108B

- *High stability; very low swr*
- *Nearly all transmission line sizes*

Type	Frequency Range (mc)	Line Size	Max SWR
1108B	0-1100	Type N	1.02
2120	0-1000	⅞"	1.03
1112	0-1000	1⅝"	1.03
1110	0-650	3⅛"	1.03

HYBRIDS

TYPE 1104

- *Very broad band*
- *Very low residual unbalance*

Type	Frequency Range (mc)	Max. SWR	Residual Unbalance (db)
1027-K	60-120	1.4	−50
1027-L	120-240	1.4	−50
1027-M	240-480	1.5	−50
1027-N	480-960	1.6	−50
1098	960-1600	1.6	−40
1102	1600-2400	1.5	−40
1104	2400-3600	1.5	−34
1100-K	60-120	1.4	−55
1100-L	120-240	1.4	−55
1100-M	240-480	1.5	−55
1100-N	480-960	1.6	−55
1099-N	800-960	1.2	−50
1099-O	975-1175	1.2	−50
1024	TV Channels 2-13	1.05	−50

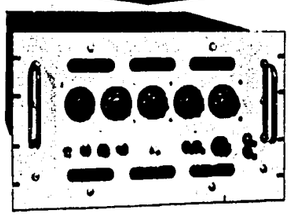
NORTH HILLS'



CURRENT GOVERNOR
Model CS-11
for *Constant Current*

- Precision Current Source
- Gyro Torquer Supply
- Transistor and Diode Tester

High Accuracy · Excellent Stability · Programmable

For testing and measurement of gyros, transistors, diodes, clutches, solenoids, meters, other current sensitive devices.

- Current Range is 1μa to 100 ma with 5 decades — digital in-line readout —
- Regulation and stability 0.002% —
- Accuracy 0.02%

In use by leading companies for gyro torquer supply, transistor avalanche test, diode PIV test, clutch testing, calibration.

Literature describing this and other constant current sources from 0.1μa to 30 amp. may be obtained from

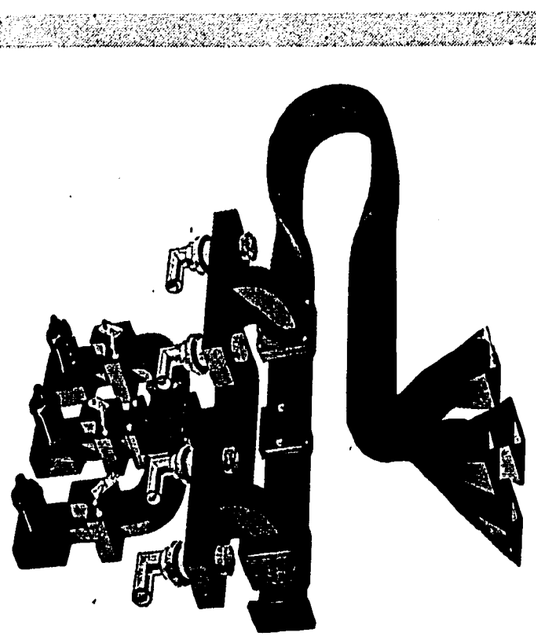
SUPPOSE YOU DREAMED UP ONE LIKE THIS?



It does happen, you know . . . an inspired twist, a new application . . . a microwave component that seems impossible to produce.

Yet, so many fine ideas lie dormant . . . never leave the design board for want of production know-how, like the microwave assembly below. Luckily, in this case, the illustration is only an artist's conception. But suppose you dreamed it up and it had to be produced, with all its complicated bends, exacting tolerances, specialized finishes.

That's where the many years of unique production experience and the unusual facilities of Budd Stanley could help you in so many ways.

For we at Budd Stanley are manufacturing specialists in microwave components only. We constantly tackle the seemingly impossible design and engineer new production methods of our own to accomplish its manufacture . . . exactly as you specified it.

So, if you are designing or wish to specify a component that seems difficult to produce . . . write, phone or wire us. We'll be glad to lend our know-how to your problem.

BUDD · STANLEY CO., INC. *43-01 22nd Street · Long Island City 1, N. Y.*

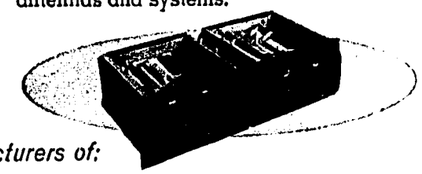
MICROWAVE COMPONENTS

Designed—Manufactured by Gorham

One source for design, consultation and quality-controlled manufacturing services for your specific requirement . . . from individual waveguide components to basic designs for microwave antennas and systems.



Custom Manufacturers of:

- CAVITY TYPE TUNERS
- CAST MICROWAVE COMPONENTS
- FABRICATED WAVE GUIDES
- SLIP RING ASSEMBLIES
- ELECTRO MECHANICAL ASSEMBLIES

GORHAM **MANUFACTURING CO.** *Electronics Division Providence 7, R. I.*

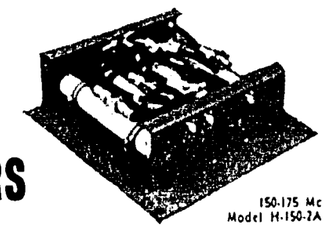
Now Available

DUPLEXERS MULTICOUPLERS



150-175 Mc
Model H-150-2A

SAVE MONEY—USE ONE ANTENNA FOR SEVERAL CHANNELS

FEATURES:

- HIGH ISOLATION
- LOW INSERTION LOSS
- NO MAINTENANCE
- LOW INITIAL COST

FREQUENCIES—20 Mc to 10,000 Mc

TYPICAL APPLICATIONS:

- 2 OR MORE SIMPLEX CHANNELS
- 2 OR MORE DUPLEX CHANNELS
- UP TO 12 MULTICOUPLED SYSTEMS
- 1 OR MORE REPEATERS

1960 IRE DIRECTORY

Directory III Materials & Services

Fabricators, Machinery

22 major groups 187 products

The products and services of the radio-electronics industry have been organized into three basic directories:

I. Complete Equipment

II. Components

III. Materials & Services

Within these three basic directories, 102 major product and service groups are numbered consecutively throughout. Under each of these 102 classes a further breakdown is given, showing in detail by a system of code numbers after each firm listed what specific products within the class are manufactured by that firm.

For a terminology cross-index listing the 857 subproducts in alphabetical order, consult the pink section preceding page 1.

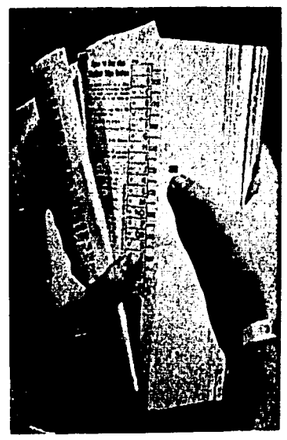
The first few times you use this EDGE INDEX

follow the "How to use" instructions slowly—one step at a time. After that you will be able to open easily and almost instantly to the section that you seek.

Machol edge indexes covering the alphabetical section and each of the three major directory groups will be found on pages 161, 265, 365, and 597.

HOW TO USE

1. Bend the Directory almost double with the back cover page on the inside.
2. Hold in your right hand with your four fingers near to the bound edge and your right thumb near the middle of the open side of this page.
3. From the heavy or light line symbol adjacent to the subject you seek, run your eyes across the page edges until you reach the horizontally corresponding symbol.
4. OPEN THERE!



LICENSE NO. 25
MACHOL EDGE INDEX PATENT #2680630

For complete list of products and services, arranged alphabetically for fast reference, see the pink section preceding page 1.

HELICOP-HUT COMMUNICATION STATIONS IN FLIGHT.

TYPICAL CRAIG MOBILE ELECTRONIC INSTALLATION.

A problem in systems mobility? ASK CRAIG!

Craig has had long experience in packaging all types of complete communication, navigation and missile control systems in lightweight, high-strength, shelters and vans for maximum mobility with minimum bulk.

Equally important: Craig service goes *all* the way — offers all the convenience of a complete "package" — from design and manufacture of shelters and vans to military specifications (or yours); through layout and installation of electronic components, cabinetry, and hardware; to final checkout of the complete system for electrical continuity.

Craig SYSTEMS, INC.

Dept. H-1, 361 Merrimack St., Lawrence, Mass., Tel: MUrdock 8-6961

Los Angeles 45, California, 6214 W. Manchester Ave. SPring 6-0025

Haddonfield, New Jersey, 1016 Berlin Road HAzel 8-2400

Washington, D. C., The LaSalle, Suite 815, 1028 Connecticut Ave., N.W., District 7-1575

Ask for information on any of these Craig products or services:

PRODUCTS: Shelters • Vans • Antenna Masts • Transit Cases • Spare Parts Cabinets • Electronic Equipment Racks

SERVICES: Complete system layout and installation • Shock Isolation • Air Conditioning • Heating • System test and checkout.

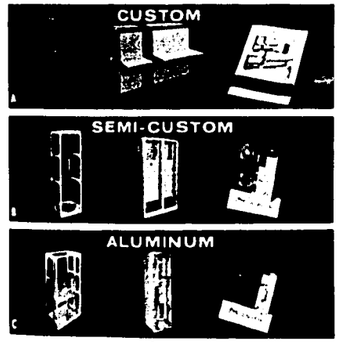
THE AMCO MODULAR INSTRUMENT ENCLOSURE SYSTEM



TWO COMPLETELY NEW LINES ADDED IN STEEL AND ALUMINUM TO GIVE 3 COMPLETE MODULAR FRAME LINES IN ONE OVER-ALL SYSTEM

A. Custom Line. Removable multi-panel, cowlings (19" width increments). Custom appearance for series mounting—space-saving and ideal for complex consoles. Double channel 16 gauge steel. Meets EIA standards.

B. Semi-Custom Line. Multi-width cowlings for single-unit appearance with frames in series. 19" wide panels, any thickness, can be recessed to any depth. Extra rugged, 14 gauge steel, box-type channel construction. Conforms to EIA mounting.

C. Aluminum Line. Box extrusions, cast corners for fast, easy assembly of cabinets any size from 7" to 20" in height, width or depth. Lock by hand, built-in locking device. All sizes standard.

D. Accessories. A full line of Amco integrated accessories (blowers, slides, mounts, lighting, etc.)

Cost savings. Orders can be grouped for best discount. Free Amco pre-assembly. **3 week delivery on standard parts!**

HUDSON WIRE COMPANY

makers of quality fine wire for over 55 years

America's pioneer wire specialists offer you wire products conforming to MIL and NAS specifications in the types and sizes you need!

HIGH TEMPERATURE TEFLON* INSULATED MAGNET WIRES (−90°C to +250°C)

Conductors: Soft or Annealed Copper per JAN-W-583. Insulations: Single, Double, Triple or Quad thickness. Sizes 18 to 50.

FILM & FABRIC INSULATED MAGNET WIRES

Conductors: Conventional Copper. Film Insulations: Enamel, EZ-Sol (nylon), Hud-Sol (polyurethane), Formvar, Siliclad (silicone) & Isonel 175, all single and heavy. Film Sizes AWG 14 to 50. Fabric Insulations: Celanese, Nylon, Silk, Cotton and Orlon, all single & heavy over bare wire or film. Fabric Colors: All solids and tracers. Fabric sizes AWG 20 to 40. All combinations of Film & Fabric insulations are available.

THERMO-PLASTIC INSULATED HOOK-UP & ELECTRONIC WIRES (105°C, 90°C, 80°C)

Conductors: Tin Plated Copper and other metals. Constructions: Solid, Stranded or Multi-Harness. Insulations: Polyvinyl and Polyethylene. Colors: All solid. Sizes AWG 16 to 26.

SPECIAL INSULATED WIRES

High Frequency Litzendraht. Voice Coil. Bifilar & Trifilar Formvar. Pig-Tail Leads. Braided Wires. Loop Wires. Silver Plated Nickel. Aluminum. Special Servings of Nylon & Celanese in colors.

STRANDED & BUNCHED WIRES

Conductors: Bare wires in a wide choice of non-ferrous metals. Coated and Clad wires in Silver Plated, Tin Plated, Nickel Plated and Copperclad. Concentric stranding, Bunched stranding, Rope stranding in finished Sizes AWG 6 to 32.

Hudson also manufactures a full line of Solid Round Bare Wires, Silver Plated Wires, Fuse Wires and Flat Wires, Electrical and Mechanical

Phone or Write Hudson NOW for spec quotes or help on problems.

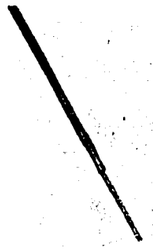
LEWIS WIRE PRODUCTS



TEFLON* INSULATED HOOKUP WIRE, —90°C to +250°C
MIL-W-16878B, TYPES E and EE

For Missiles, Computers and Electronic Assemblies

Miniaturization and complex electronic assemblies are simplified with the use of Teflon insulated wire. It is unaffected by soldering-iron temperatures, has a low coefficient of friction and will not heat-age as it contains no plasticizers to cause failure due to brittleness. Resistant to chemicals and solvents, Teflon insulated wire provides superior dielectric strength with minimum wall thickness. Manufactured with silver coated copper conductor in 600 volt and 1000 volt ratings in A. W. G. sizes from 32 thru 10.

600 VOLT AIRCRAFT WIRE TO MIL-W-7139A

A qualified product for high temperature applications requiring superior solvent resistance, high insulation resistance and circuit reliability.

Silver coated copper conductor, insulated with Teflon and Teflon-glass tapes, covered with a Teflon-glass braid having a Teflon finish. Manufactured in A. W. G. sizes 22 thru 4/0, also available in sizes 6 thru 22 with a type 302 stainless steel braid applied over all.

* Dupont trademark

Finest line of High Frequency Cables in the communications field!

- No radiation
- Low attenuation
- Excellent frequency response
- Uniform electrical properties over wide temperature variations
- Unlimited operating life
- Continuous 1000′ lengths

Matching fittings for all cables are available from several sources.

A CROSS SECTION SHOWS . . .

Spir-O-line® COAXIAL CABLE

for Maximum Efficiency in RF Transmission

Take a cross section of world-wide engineering opinion and you'll find that Prodelin's Spir-O-line* — aluminum sheathed, semi-flexible air dielectric coaxial cable — is preferred because it offers:

- Power Ratings Comparable to Solid Dielectric Line
- Very Low Attenuation Similar to Rigid Air Dielectric Line
- Consistent, Low VSWR Typical of Solid Dielectric Line
- Superior Strength — All Aluminum Outer Conductor
- Choice of Regular, Hi-Temp, or Corrosion-Proof Versions

50 Ohm Lines Available
in 3/8", 1/2", 7/8", 1 5/8", and 3 1/8" diameters

Spir-O-lok® CONNECTORS

These unique connectors for Spir-O-line coaxial cable form the world's fastest, strongest joint. Spir-O-lok* eliminates the use of special tools, welding, soldering, and special assembly techniques . . . and a Spir-O-lok connection can be re-made repeatedly without redressing the cable end or replacing connector parts.
All cable sizes, connectors, adapters, and couplings in stock and available now.

Tensolite
RELIABLE HIGH TEMPERATURE WIRE & CABLE

Tensolite facilities are devoted exclusively to the engineering and manufacturing of miniature plastic insulated wire and cable—featuring Teflon insulation for high temperature (—90 deg. C. to +250 deg. C.) applications. 100 percent inspections before, during and after manufacture, part of the most rigid quality control program in the industry, assures reliability of the finished product.

"TEFLON"® INSULATED CABLE

From large sizes using 6 AWG wire, down to subminiature cables with 36 AWG single conductors, Tensolite makes multi-conductor cables to your specifications. Tensolite cables utilize the maximum number of conductors in a minimum of area—saving weight and space. They're available as ribbon cable or in standard round configurations. For demanding applications, we recommend individual conductors of our FLEXOLON wire.

HOOK-UP WIRE

TYPE E-EE TO MIL-W-16878

FLEXOLON WIRE

A new concept in high temperature insulation developed by Tensolite's research and development laboratories. FLEXOLON wire provides the best properties of wrapped and extruded fluorocarbon insulation. Important features of this versatile hook-up and lead wire are:

- Solid colors and striped combinations.
- Most flexible of all hook-up wire construction.
- High temperature range of —90 deg. C. to +250 deg. C.
- Greatest miniaturization in MIL-SPEC hook-up wire (smallest hook-up wire in the world).
- High dielectric strength (far exceeds required 600 V and 1000 V ratings).
- Consistent concentricity.
- Superior cut-through resistance.

TENSOLON WIRE

Insulated with TFE fluorocarbon high temperature resin.

Choose from:

Spiral wrapped...with special cross-lapped construction and unlimited color coding; striping that meets commercial and military specifications.

Extruded...featuring an extruded homogeneous Teflon TFE resin (solid and inked stripe combinations).

TENSOLEX WIRE

Insulated with extruded vinyl plastic.

Types B and C meet MIL-W-16878. They are high temperature hook-up wires rated for continuous use from —55 deg. C. to +105 deg. C. with or without nylon jackets.

TENSOLEX WIRE

Types WL and SRIR are manufactured in accordance with the joint Army-Navy specification JAN-C-76 (Qualification approval Certificates Nos. 13725 and 13606A).

Types LW and MW are general purpose hook-up wires specifically designed for radio, instrument, and military electronic applications. Designed to meet MIL-W-76A, they are recommended for use at temperatures up to 80 deg. C. in the internal wiring of electrical and electronic equipment.

TENSOLITE WRAPPED VINYL WIRE

Super-flexible wire designed for miniaturization applications at operating temperatures from —40 deg. C. to +60 deg. C.

AIRFRAME WIRE

TENSOLON AIRFRAME WIRE

Insulated with high-temperature resin, it is manufactured in compliance with MIL-W-7139A. Important features are:

- —90 deg. C. to +250 deg. C. temp. range.
- 600 Volt and prescribed overload operation.
- Rugged, abrasion resistant construction.
- Short-time operation in event of fire.
- High resistance to chemicals.
- Excellent flexibility.

COAXIAL CABLE

TENSOLON MINIATURE COAXIAL CABLE

Designed to meet MIL-C-17B, it is ideal for high frequency operation from —90 deg. C. to +250 deg. C. Insulation assures extremely low loss, high dielectric strength, and complete resistance to moisture and chemicals. A great variety of outer jackets permits the selection of cable well suited for many application requirements.

MAGNET WIRE

TUFFLON MAGNET WIRE

High temperature Teflon insulated magnet wire—designed to meet MIL-W-19583—is ideal for coils and windings requiring high temperature application. It is supplied in wall thicknesses ST, HT, TT and QT and AWG sizes 18 through 44.

FLEXIBLE AND EXTRA FLEXIBLE
CABLES TO "MIL. SPEC."
With Certificate of Compliance and Source Inspection

- We normally maintain stock in the following mil. spec. cables; MIL.-W-C-3432A, W-16878, W-76A, C-3884 and many others.
All are available with Certificate of Analysis and Certificate of Compliance.
- We also specialize in long and short runs of special items with excellent delivery.
- In stock also: Phelps Dodge Spirafil, Styroflex, and Foamflex.
- Also available: Special cables, telephone constructions, hook-up wire, power cords, shielded constructions, and special materials—all in stock. Or we will fabricate . . . large or small runs.
- We also have facilities to cut, strip, lug, notch, slot or perform other operations on various types of wire and cable. Write today for more information . . .

CERAMICS & FERRITES
General Electric ceramic and ferrite materials are specifically designed for special applications. Four dielectric compositions of *Barium Titanate* are complemented by three kinds of a new piezoelectric ceramic, *Lead Metaniobate*, for applications requiring high Curie temperature and broad bandwidths. *Dielectric Loss Ferrites* for phase modulators and separate *Microwave Ferrites* for C, S and X bands provide tailored electrical properties.

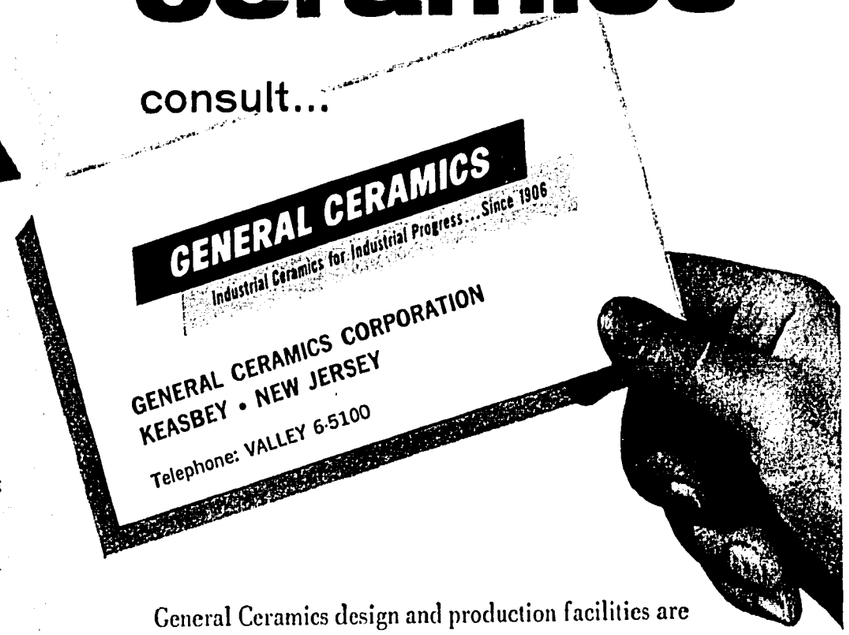
When you need

industrial ceramics

consult...



General Ceramics design and production facilities are geared to today's electronic and electrical requirements. In many cases, standardized designs and production methods can reduce costs and facilitate delivery. When specifications call for new designs and engineering, General Ceramics' half century of ceramic manufacturing experience is available to help solve your problem quickly, and economically!

For Complete information, call or write Department ID

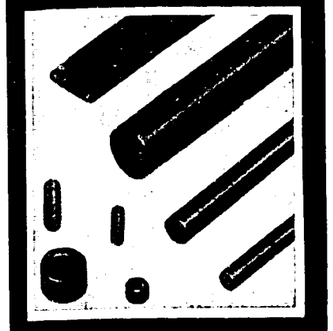
KRYSTINEL FERRITES



K-401 Antenna Rods

Now in production quantities, high "Q" ferrite material designed especially for use as antenna rods in the broadcast band.

- excellent magnetic properties
- stable shock and aging characteristics
- low "Q" and permeability drift with respect to temperature
- consistently uniform

Krystinel offers a comprehensive line of ferrite materials covering a wide range of electronic applications and frequencies. Write for Technical Bulletin Series "F".

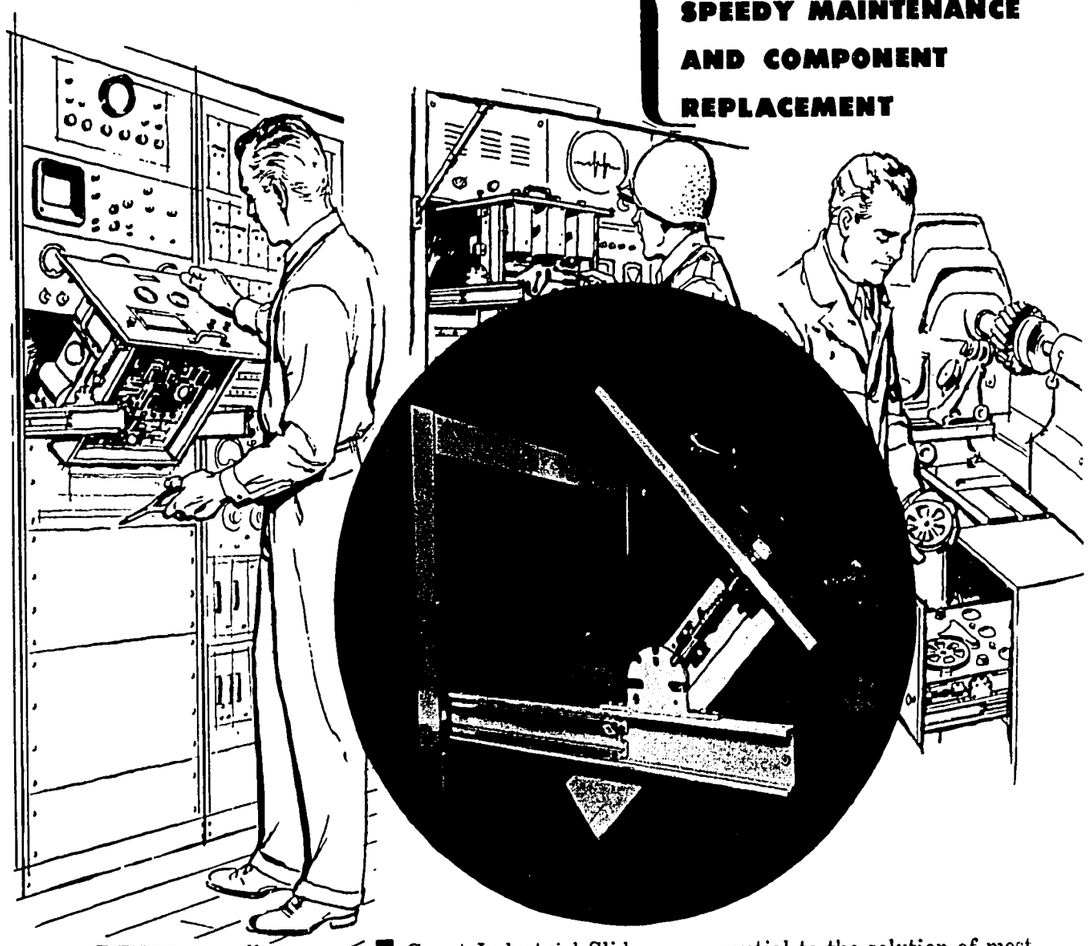
GRANT INDUSTRIAL SLIDES *provide*

the key factors in design

- ACCESSIBILITY
- COMPACTNESS
- PROVISION FOR EASY, SPEEDY MAINTENANCE AND COMPONENT REPLACEMENT



More Than 100 Pages of Important Working Data

The Grant Industrial Slide Catalogue—outlines principles, details, of more than 100 standard and custom-made slides. A working manual on built-in accessibility.

Grant Industrial Slides are essential to the solution of most problems centering on these design factors—so highly emphasized in this automation era. Grant Slides provide skillfully developed, competently engineered sliding, pivoting mountings for nearly all types of assemblies—electronic, hydraulic, pneumatic, mechanical.

Grant engineers and representatives are located in all important industrial centers—their valuable store of specialized experience is yours for the asking.

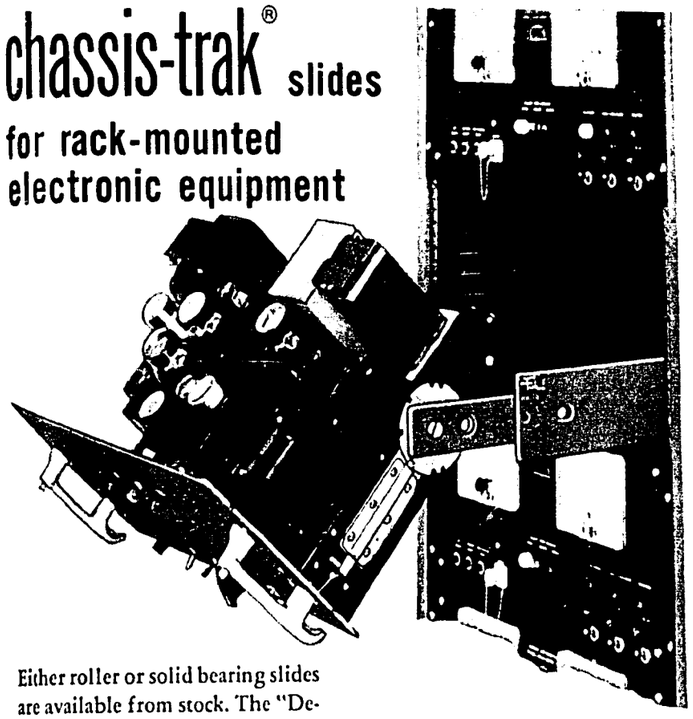
chassis-trak® slides

for rack-mounted electronic equipment



Either roller or solid bearing slides are available from stock. The "Detent" model locks in 7 tilt positions. The "Basic" model tilts with no lock assembly. The "EZ Mount" model tilts from mounting on front cabinet rail. These models are available in either lightweight or heavy-duty styles.

Chassis-Trak slides, formed from cold rolled-steel, give complete accessibility and faster servicing . . . and the ultra-thin design means you can cut engineering costs by mounting 17" chassis in 19" standard stock racks. Plus, a wide bearing area design increases rigidity and reduces the possibility of binding due to misalignment.

In addition to the standard slides in stock, Chassis-Trak engineers will custom-build slides for special installations. All slides meet specifications for government or military projects and RETMA standards.

Select the right slide for your application

ROLLER BEARING SLIDES	MODEL	SLIDE LENGTH 10	11	12	14	16	18	20	22	24	LBS. MAX. LOAD

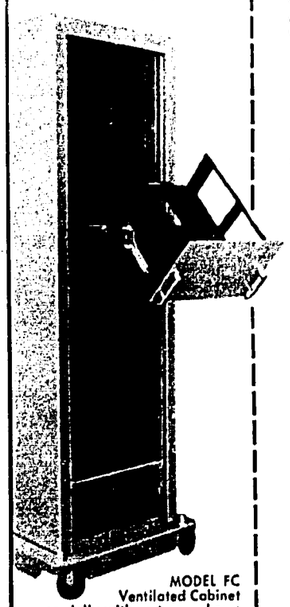
ONE SOURCE

MIL SPEC QUALITY



MODEL FC
Ventilated Cabinet on dolly with casters...shows air flow control panel, panel-mounted blower, modular universal chassis mounted on 'Chassis-Trak' with manual 'Detent' tilt control, plain handles.

VENTILATED RELAY RACK CABINETS
• Modular construction • Fully controlled built-in cross-ventilation system • 19", 24", 30" panels • Vertical panel space as needed.

MODULAR CONSOLES—Customer may specify: Shape to fit 'U' or 'L' floor plan; Panel angle 15°, 30°, 45°, 60°; Panel spaces in multiples of 1¾".
Customer may also specify, for cabinets or consoles: 12-gauge or heavy duty 3/16" steel frame; Channel base, casters or dolly with casters; Depths: 18", 24", 28", 30", 36"; any MIL or commercial finish.

PANEL MOUNTING BLOWERS—Cooling capacity 600-1200 CFM output • ¼ or ½ HP • Compact—mount as standard 8¾" RETMA panels.

REFRIGERATED BLOWERS—automatically maintain pre-set cabinet temp. 6000 BTU capacity.

UNIVERSAL CHASSIS—two types: Full Chassis Plate or Modular Multiple Sub Chassis • Steel or aluminum .062 side frames; ⅛" or 3/16" aluminum front panels • All parts drilled for assembly • Customer may specify all dimensions, materials.

HANDLES: blank, push-button panel lock, trigger for tilt lock, positive screw-down clamp type.

CHASSIS-TRAK®—easy access to entire chassis • Extra strong • Ultra thin—mount 17" chassis in 17¾" opening • Finger touch releases chassis for removal • 10"—24" long—double extension • MIL Spec finish • Roller & high capacity types available.

CABLE RETRACTORS—prevent snagging upper-chassis cables on lower-chassis components.

TELECOMMUNICATIONS CONSULTANTS
- For 8 years, MSI has been serving the industry including U.S. and International Governments.
- MSI has served Oil and Gas Companies, Power and Telephone Utilities, Broadcast and Industrial users, Federal, State and Local Governments, Transportation companies and Foreign Countries.
- MSI makes feasibility studies, does physical terrain surveys, engineers systems and supervises construction of Telecommunication networks—wire, carrier, radio, microwave, scatter, and television.
- MSI has also successfully done Independent Market Research and advised on advanced product development for the largest manufacturers of electronic communications equipment.
- MSI provides expert consultation in the preparation of proposals for extensive telecommunications networks in related military projects.
- We will gladly furnish our client list and the MSI successful performance history. Our experience is worldwide.

Neededness!*

More engineers *NEED Proceedings of the IRE* than need any other radio-electronic engineering magazine. 61,880 (ABC June 30, 1959) plus 13,976 students, to be exact. This is not promised—but delivered circulation.

*Engineers *NEED* the unabridged, factual, working information of which *Proceedings of the IRE* supplies over 1,900 pages a year. This is more than a WANT but a vital need, satisfied since 1913 by

Proceedings of the IRE
THE INSTITUTE OF RADIO ENGINEERS
Adv. Dept. 72 W. 45th St., New York 36, N. Y. • MU 2-6606

ACTIONCRAFT WIRE MARKERS

CUSTOM MADE TO MEET ANY REQUIREMENT

STAMPED VINYL PLASTIC SLEEVING
LAMINATED SNAP-ON SPLIT SLEEVES
STAMPED SILICONE RUBBER SLEEVING

Permatag wire markers are furnished in bulk or carded in sequence according to blue prints or wiring diagrams.

Phone or write for samples and quotations.

AUTHORIZED DISTRIBUTOR FOR Resinite

RESINITE SOFT-WOUND INSULATION SLEEVING IS AVAILABLE FROM STOCK

"Soft-Wound" is a new concept in spooling and coiling insulation sleeving. It is carried in stock to meet the following mil specs: MIL-I-631C, MIL-I-7444A(2), MIL-I-3190.

"Soft-Wound" reduces costs—saves time—eliminates waste. An exclusive feature found only in Resinite insulation. Request our Borden Company bulletin RS 113 for complete details showing how "Soft-Wound" saves time and money.

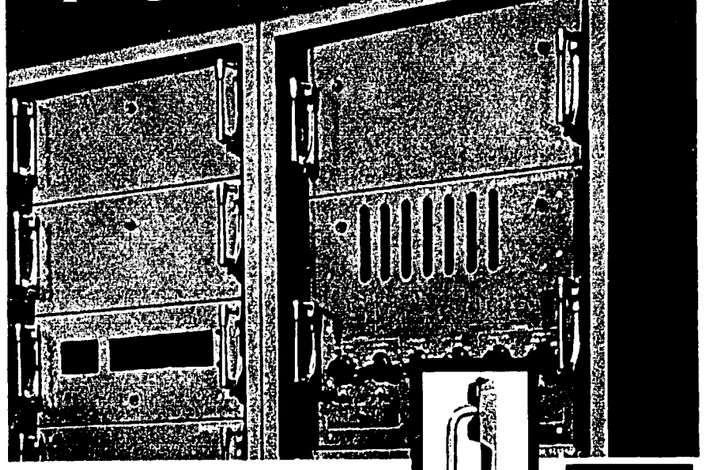
DATICO "digital automatic tape intelligence check out" is made by the Nortronics Div. of Northrop Corporation for the U. S. Air Force and U. S. Army Rocket & Guided Missile Agency. This money and man saving tool provides rapid weapon system evaluation. Note Camloc Chassis Latches.

IT'S EASY to
open ▪ close ▪ carry ▪ connect & disconnect plug-in chassis



with CAMLOC
multi-function CHASSIS LATCHES

Thirty-eight strong, simple, attractive Camloc multi-function Chassis Latches are used on the 24 equipment filled plug-in chassis that make up DATICO, the military's new universal automatic field service checkout system. Here is a perfect example of designed-in fastener serviceability, flexibility, ease of handling and economy in interconnected "black-box" systems. When the Camloc push-button handles are released and pulled down, the chassis is automatically disconnected and ejected. Then the latch becomes a carrying handle. When replacing the equipment the latch firmly pulls the chassis back in place, making perfect, automatic reconnection of multiple-pin units. It is quick, safe, reliable, vibration-proof. Camloc Chassis Latches consist of only two parts—a handle and a fork—mounted with standard screws. Several handle and fork designs are currently available, all interchangeable. *Write for Camloc's new Bulletin 35L today.*

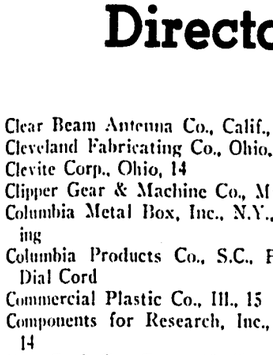
BRADY *Self-Sticking*
PERMA-CODE WIRE MARKERS



Positive "around-the-wire" identification for the electronic industry. Brady markers tell which wire goes where—quickly . . . increase production, cut costs . . . conform to NEMA-ASA, and MIL specifications. 3 stock sizes: 1½", ¾" and ½". 9 job tested materials.

- **MINIATURE MARKERS** permanently identify wires under 5/32" dia.
- **BLUE-STREAK® RELEASE COATING** assures fast distortion-free application.
- **WRITE FOR *FREE* WORKING SAMPLES!**

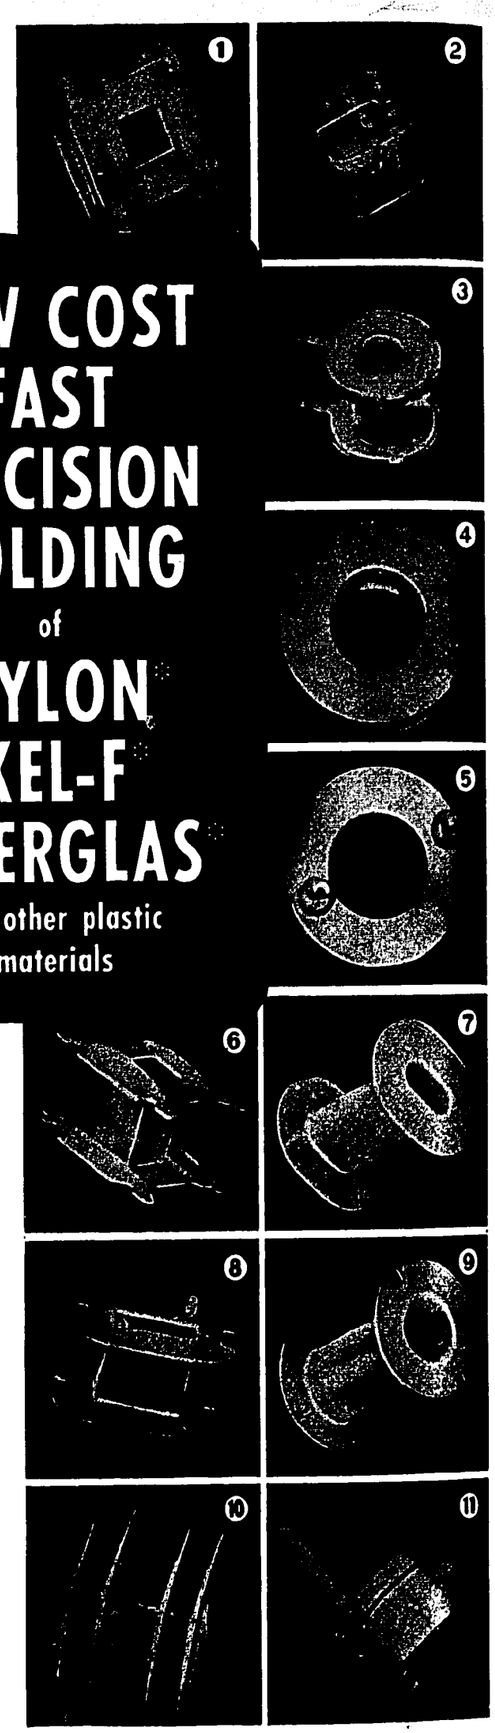
Specialists in Precision Molding of Intricate

COIL FORMS

HYDRO ENGINEERED PLASTICS

and other ELECTRONIC COMPONENTS comprising delicate MOLDED-IN METAL INSERTS

LOW COST FAST PRECISION MOLDING of NYLON KEL-F FIBERGLAS and other plastic materials



The use of "universal" molds of exclusive HYDRO design assures low-cost tooling and quick delivery of all types of coil forms. Precision tooling insures a flash-free product held to close tolerances. This service is particularly attractive for short runs where high mold costs can raise unit prices of component parts substantially. Similar savings are possible on many other electronic components. *May we quote on your requirements?*

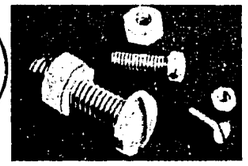
NOW AVAILABLE

GRC



NYLON NUTS AND SCREWS

● Brand new nylon hex nuts in ten sizes (#2 thru 5/16") added to GRC's complete line of nylon screws. GRC's single cavity molding technique gives exceptional uniformity, accuracy, and economy to the outstanding properties of nylon fasteners.

● Take advantage of nylon's high strength to weight ratio, built-in electrical insulating properties, stability, resilience and elasticity. GRC molded nylon fasteners—nuts and screws, set screws, screw insulators, washers, etc.—are available from stock in a wide range of types, sizes and lengths.

DIMCO-GRAY SNAPSLIDE FA

PROVIDE VIBRATION-PROOF HOLDING AND QUICK, FOOL-PROOF RELEASE!

APPROVED UNDER ARMY-NAVY STANDARDS

Here's a simple, easy means of securely fastening assemblies to withstand shock or vibration, *and yet allow quick removal for inspection or repair.* Instant snap action engages or releases fastener . . . no tools are required! After installation, fasteners never need adjustment . . . even with repeated use.

Three sizes available for different load requirements. Large and medium sizes are made of corrosion-resistant *stainless steel.* Small size is made of nickel-plated brass. Stock parts fit various thicknesses of flanges and mounting plates . . . special parts can also be supplied.

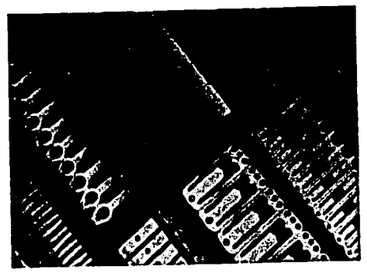
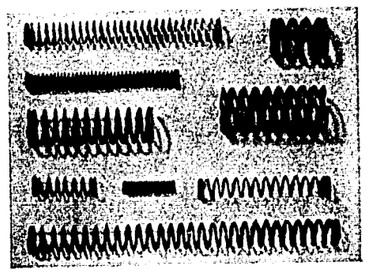
I-S SPRINGS of beryllium copper *can help you*

IMPROVE YOUR PRODUCT'S QUALITY, REDUCE YOUR COST, INCREASE YOUR PRODUCTION

Instrument Specialties Company specializes in the design and custom manufacture of age-hardened alloy springs. With our specially developed processes and machines, our engineers are able to realize the fullest performance potential from the superior spring materials around which I-S service to designers and manufacturers has been developed.

FOR HIGH PRODUCTION





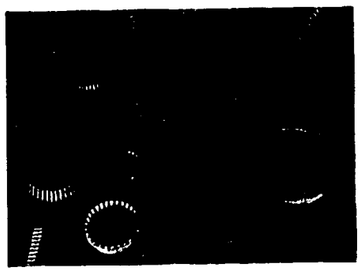
STRIP SPRINGS

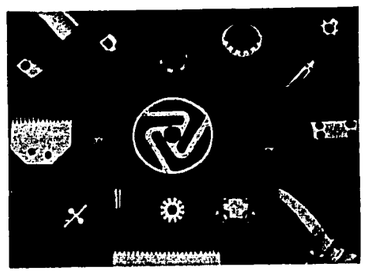
Fabricated from beryllium copper.
Easily handled, readily broken apart by hand or used in automatic or semi-automatic assembling devices and contact riveting machines.
Individual pieces may be broken off without trace of burr.
Eliminate sorting, untangling and handling of loose pieces.
Springs may be produced in strips to various shapes; formed angles may be held within plus or minus one degree.
Heat treated in multiple fixtures to insure uniformity, close tolerances and elimination of variations in spring-back.

COIL SPRINGS

Made from laboratory tested beryllium copper wire.
Special coiling and heat treating equipment insures 100% uniformity.
Guaranteed rigid tolerances held on diameter and load tests at specified deflection.
These factors combine to assure increased service life through higher endurance strength – make products perform more consistently by eliminating drift, set or fatigue. Furthermore, they eliminate expensive hand adjustment and reduce inspection costs of finished product.

FOR LOW ACTIVITY





HIGH FREQUENCY SPECIALTIES

We are equipped to supply standard mating parts for use with 2C-39, 2C-40, 2C-43 and 3C-37 tubes, or custom made parts in related fields.
Grounding strips and contact fingers can be supplied in standard or special contours.
"Flea" contacts for co-planer type subminiature tubes and transistors.

SHORT-RUN SERVICE

For those who need quick delivery of parts in pilot quantities or require a low-cost proving ground for spring designs. I-S methods eliminate expensive tooling. Laboratory controlled, precision produced—yet at lower cost than is possible with permanent, high-activity tools.
We are equipped to handle conventional beryllium copper stampings and screw machine products in short runs or in high production.

A COMPLETE ENGINEERING AND SAMPLE SERVICE

When your product is in the design stage, let us show you how I-S springs of beryllium copper may be designed to fit your needs. Ample stock, flexible facilities, short set-up time speed production of sample lots and trial orders.

lacing tapes *ENGINEERED for TEMPERATURE* by GUDEBROD

375°C GUDE-GLASS

Flat braided of glass fibers, Gude-glass is recommended for use where high temperature is a factor. Available with special finishes for non-slip characteristics, it is non-toxic, resists fungus and is flexible within its complete range: −40°C to 375°C.

220°C TEMP-LACE

Manufactured of pure TEFLON*, Temp-Lace is the latest addition to the Gudebrod line. Chemically inert, it is available in natural finish, with a fungistatic rubber coating or with a silicon dispersion finish. In five sizes, it is flexible from −40°C to 220°C.

160°C STUR-D-LACE H

Flat braided of DACRON** with non-corrosive rubber finish or wax finish, Stur-D-Lace H meets the most severe requirements for fungus-resistance. It is non-toxic, knots tightly, is unaffected by most chemical solvents. In five sizes, all with high dielectric strength.

90°C GUDELACE

The original Gudebrod lacing tape, flat braided of nylon with special wax finish, Gudelace has become the standard where excessive high temperatures are not encountered. In seven sizes, Gudelace also comes in six colors for circuit coding.

Write for new Data Book with complete specifications of All *Gudebrod Lacing Tapes.*

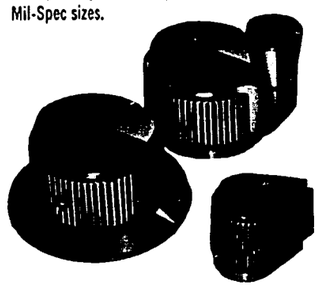
NATIONAL

MIL-SPEC KNOBS

In stock! For immediate delivery! And produced by National!... a complete line of standard plastic control knobs made in conformance with MS-91528. There are four basic types: round, pointer, spinner (each with or without skirts) and dial skirted round ... available in three different shaft sizes. Finishes are gloss, matte, or to your color specifications ... in all Mil-Spec sizes.



Knobs: Made of plastic, type III, class H2, per Specification L-P-349. Set Screws: Cadmium plated, class 3, type II, per Specification QQ-P-416. Inserts: Brass, composition 4, hard, per Specification QQ-B-613.

NATIONAL CHOKES

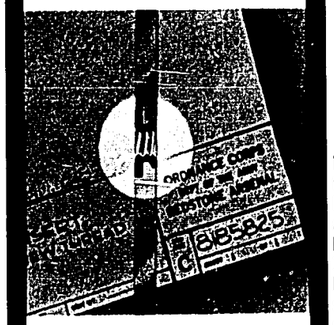
R-45 series, a new family of ferrite bead chokes for use as filament chokes, parasitic suppressors, and series elements of low-pass filters for frequencies from 5 to 200 mc. Insulated with an impregnated fiberglass sleeving, these chokes will handle 2 amperes of filament current with voltage drop of less than 0.02 volts, temperatures to the Curie point of 125°C.

R-40 series ferrite-core chokes... extremely high Q for small size. They are primarily for use in networks and filters at frequencies from 50 kc to 1500 kc, and as resonant elements in IF and RF circuits. Fungus-proof varnish impregnation per MIL-V-137A.

R-25 series MIL-inductance chokes for high frequency circuits, as filament chokes and peaking coils, inductance per MIL-C15305A, coil forms per MIL-P-14, and impregnation per MIL-V-173A.

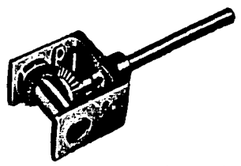
R-33, R-50 and R-60 series RF coils are wound on molded phenolic forms per MIL-P-14 and coated with a tough, fungus-resistant varnish. R-50-10 choke is wound on a powdered-iron coil form instead of phenolic.

NATIONAL'S EXCLUSIVE "FLUSH MOUNT" CAPTIVE NUTS

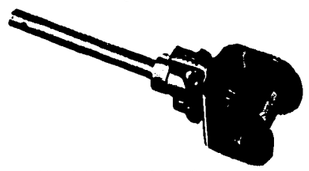


Flush fit on **both** sides of aluminum sheet to provide permanent tapped holes.
Available in Five sizes for use in metal thickness from 1/16" up—in thread sizes from 2/56 up. No special tooling required. Drilled or Punched round hole ± .002 only requirement.
MATERIAL: Stainless steel 303 as per MIL S-853A.
FINISH: Passivated as per MIL P-12011.
Four additional types also available, including one type which provides a permanent thread in thin aluminum that meets MIL SPECS P-11268, E-5400 and E-16400. A complete line of CAPTIVE STUDS is also available.

PRECISION RIGHT ANGLE AND VERNIER DRIVES



Type PRAD: Right angle drive for remote operation of low torque units. Designed for continuous low-speed operation (loads up to 50" ounces), and intermittent high speed operation (up to 500 RPM) with loads up to 100" ounces. Less than 1½° backlash; drives and shafts of various lengths; various size output hubs; brass gears; stainless steel shafts, bushings and sleeves; die cast zinc housings.



Type RAD: Right angle drive. For ganging capacitors, potentiometers or other parts in heretofore inaccessible locations on chassis. Die cast zinc housing gears.

Type AN: Time-tested vernier mechanism. Designed for use with any 3/16" National knobs and others. Drive ratio: 5 to 1; drive shafts: 3/16", 1/4" or to specifications; fully insulated output shaft coupling; output hub fits ¼" shaft; readily adaptable to many types of drives.

Type AVD: Vernier mechanism. Similar to type AN (above) except that output-shaft is non-insulated. Dimensions: over-all diameter 2-9/16", length 1-15/32"

OTHER NATIONAL COMPONENTS

In addition to knobs, chokes, drives and captive hardware, National Radio Company also manufactures a complete line of dials, coil forms, condensers, tanks, grid and plate caps, IF transformers, tube and crystal sockets, ceramic insulators, bushings, spreaders, couplings, terminal assemblies, other electronic and electro-mechanical components. For specific design or development applications problems, write or call.

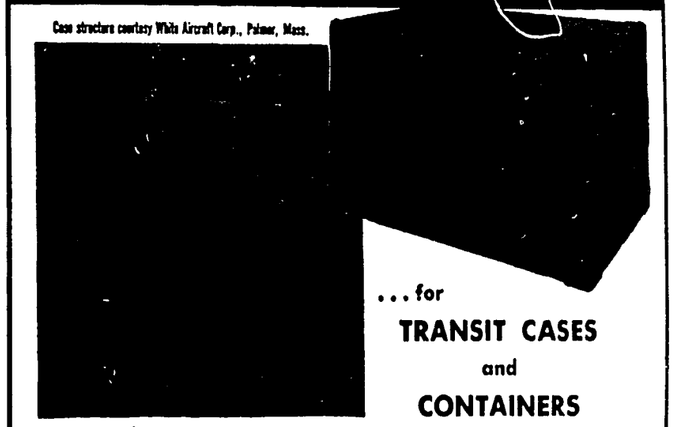
NEW ADJUSTABLE CATCHES HANDLES TO ARMED FORCES SPECIFICATIONS



Case structure courtesy White Aircraft Corp., Palmer, Mass.

...for TRANSIT CASES and CONTAINERS

ADJUSTABLE CATCH NO. 250-45. Also available for flush mounting and with other variations.

Secure Holding • Easy Engagement
RAPID RELEASE
Designed to function at 500 lbs.
Stress strength to 3000 lbs.

Above illustrated case, 30" x 30" x 36", with eight Nielsen 250-45 catches passed armed forces drop test of 4 feet on all corners, protecting 236 lbs. of instruments, also meeting requirements for waterproof seal and screening from elements.

A VARIED LINE OF CATCHES AND HANDLES

Descriptive literature on request. Design features to meet your specific requirements. Inquiries invited on application problems.

COMPRESSION SPRING DRAW PULL CATCH No. SC-B-83314-42 with springs concealed. Provides 70 lbs. holding tension on standard specification.

RECESSED HANDLE No. H560 shown mounted on case above. Available in steel or aluminum.

SURFACE HANDLE No. H845 to meet Armed Forces Specification MIL-T-945.

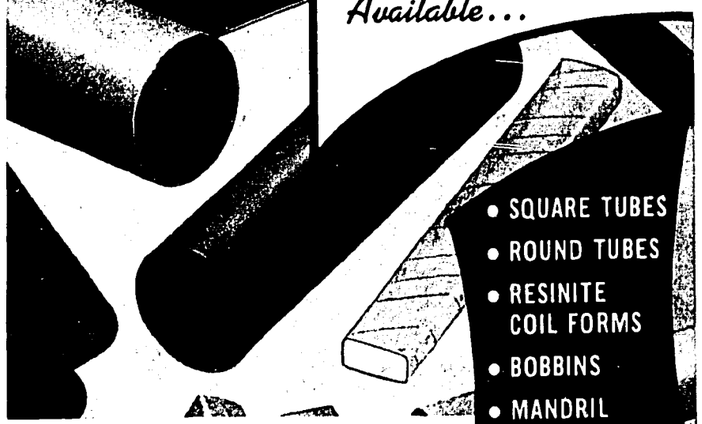
PRECISION

The Only **COMPLETE COIL FORM SERVICE** *Available...*



- SQUARE TUBES
- ROUND TUBES
- RESINITE COIL FORMS
- BOBBINS
- MANDRIL SERVICE
- FABRICATING SERVICE

SQUARE AND RECTANGULAR TUBES

Produced in any length, shape or size from 1/16" to 8", wall thickness from .010 to .125. Fabricated from dielectric kraft, fish paper, acetate, other patented materials or combinations. Bowed sidewall or Di-Formed construction.

ROUND TUBES

Produced in any decimal size up to 8" I.D. Fabricated from kraft, fish paper, cellulose acetate, mylar, polystyrene, quinterra, fibre glass and other dielectric materials.

RESINITE COIL FORMS

These coil forms have the highest resistivity of any resinated product. Furnished plain, embossed, internally threaded or triangular shape . . . also flyback transformer forms.

BOBBINS

Supplied round, square or rectangular. Cores fabricated from any of the above materials. Metal, asbestos, plastic or fibre flanges. Constructed to fit smaller spaces and permit multiple winding.

MANDRIL SERVICE

Accurately ground steel and aluminum coil mandrils at cost economy comparable to commonly used undependable wood or undersized steel mandrils.

FABRICATING SERVICE

We have modern high speed equipment to provide you with any special shape or form . . . rolled, spun, flared, punched or formed to your particular requirement.

Ask about Precision's complete coil form service. Request informative bulletin.

how to instruct, label or identify?

A...*use North Shore* *pressure sensitive, etched and anodized* ALUMINUM FOIL NAMEPLATES

THERMA-MARK®...Peel backing and press onto any surface without fasteners. No water ...no heat...no chemical solvents needed.

THERMA-CAL®...For problem surfaces such as curved, painted or crinkle finishes. May be heat or solvent activated in seconds to form a permanent bond.

SPEEDY-CAL®...For non-critical applications like smooth or flat surfaces. Simply immerse in water at room temperature, remove backing and press into place.

North Shore nameplates can be obtained in any color or color combination, with matte or shiny finishes. No limitation on style of type face or design. Colors are etched and anodized permanently into the metal surface, will not fade or run. Widely used for insignia, trade marks, installation and operating plates, dials, schematics and instructions. North Shore nameplates meet weather, salt-spray, abrasive and temperature requirements of Mil Specs.

Contact your local General Electric Supply Company for samples, literature, complete information, or wire, write or phone direct to:

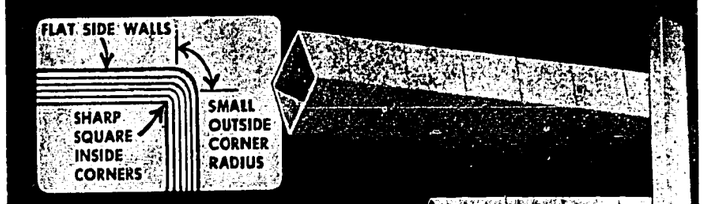
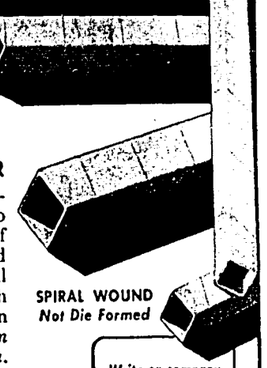
Better Coils begin with PARAFORMED PAPER TUBES



- *No sharp outside edges to cut wire*
- *No need for wedges to tighten wire*
- *Permits winding coils to closer tolerances*
- *Allows faster stacking of wound coils*
- *Has full rigidity and physical strength*



ANY SIZE—SQUARE OR RECTANGULAR

PARAFORMED paper tubes simplify coil winding operations and speed production, yet cost no more. In the exclusive PARAFORM method of tube making, no artificial heat or pressure is used —*Paraforming* takes place at the time of spiral winding. Hi-Dielectric. Hi-Strength. Kraft, Fish Paper, Acetate, Red Rope or any combination wound on automatic machines. *Produced from stock arbors or special sizes engineered for you.* Can also be supplied in regular or with slight bow.

Write on company letterhead for STOCK ARBOR LIST *of over 2000 sizes*

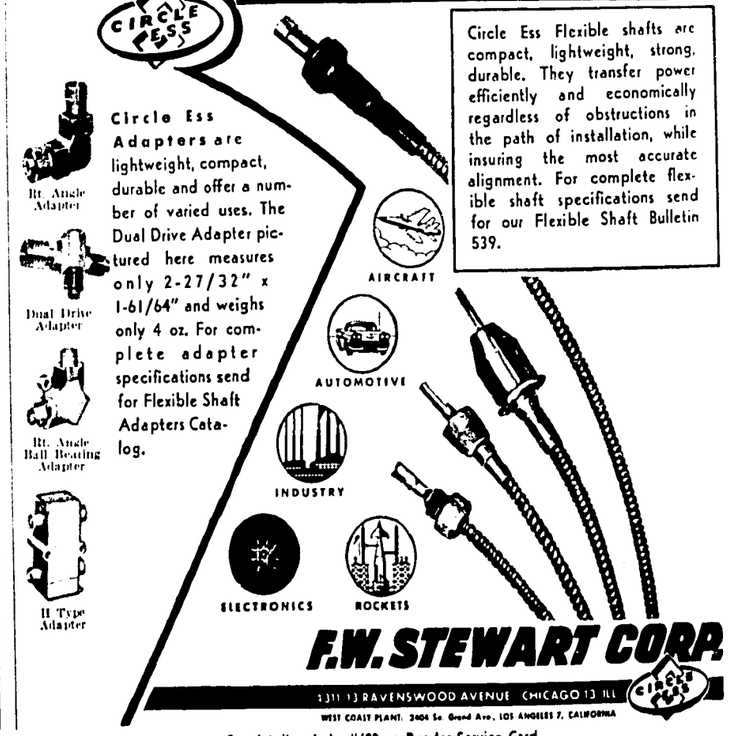
Flexible Shafts

FOR MANY FIELDS

CIRCLE ESS

Circle Ess Flexible shafts are compact, lightweight, strong, durable. They transfer power efficiently and economically regardless of obstructions in the path of installation, while insuring the most accurate alignment. For complete flexible shaft specifications send for our Flexible Shaft Bulletin 539.



Circle Ess Adapters are lightweight, compact, durable and offer a number of varied uses. The Dual Drive Adapter pictured here measures only 2-27/32" x 1-61/64" and weighs only 4 oz. For complete adapter specifications send for Flexible Shaft Adapters Catalog.

PROTECT YOUR PRODUCT

at point of strain

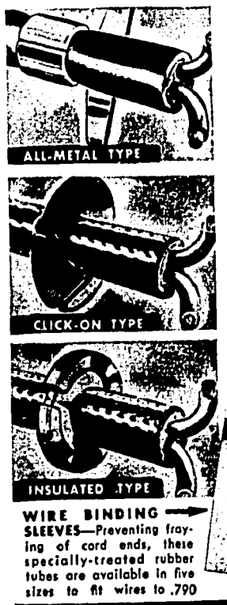
Protect product saleability too — by insuring long life for cords, cables and conductors. Genuine "GRIPMASTER" Strain Reliefs provide these vital features—

- ★ Anchor cords to housing
- ★ Eliminate taping or threading
- ★ Prevent unraveling
- ★ Prevent cord pull damage
- ★ All sizes and styles
- ★ Easy to apply
- ★ Inexpensive

Gripmaster Strain Reliefs are "tremendous trifles" that make good products better!

Ask for samples.

4 WAYS TO END ALL CORD AND CABLE SERVICE FAILURES *Economically*



GRIPMASTER STRAIN RELIEFS

Interruptions due to cable and cord connection failures are eliminated because they anchor the cord to the product at the point of strain. GRIPMASTER Strain Reliefs can withstand pulls up to 100 lbs., and are acceptable to Underwriters Laboratories. All types Reg. U. S. Pat. Off.

WIRE BINDING SLEEVES—Preventing fraying of cord ends, these specially-treated rubber tubes are available in five sizes to fit wires to .790

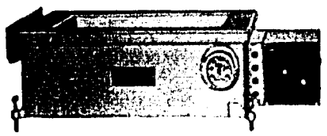
DEE PRINTED CIRCUIT SOLDER POTS WITH MECHANICAL TYPE DIAL THERMOMETERS



MANY SIZES MEET ALL REQUIREMENTS

New proven design with all controls on end of pot. Mechanical type dial thermometers to indicate solder temperature. Hydraulic thermostats. Walls and bottom of the solder cavities are smooth and free of all obstructions.

Temperature range 300° to 600° F. Temperature swing ±2°. Wide variety of sizes up to eight feet long. All Voltages.

DEE SOLDER POTS

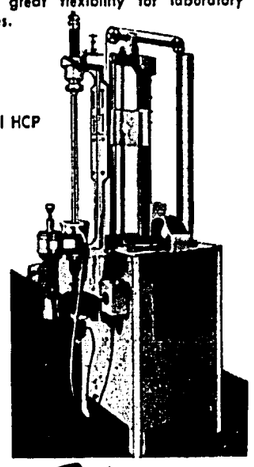
FLOATING ZONE UNIT FOR METAL REFINING AND CRYSTAL GROWING

A new floating zone fixture for the production of ultra-high purity metals and semi-conductor materials. Purification or crystal growing is achieved by traversing a narrow molten zone along the length of the process bar while it is being supported vertically in vacumm or inert gas. Designed primarily for production purposes, Model HCP also provides great flexibility for laboratory studies.

Model HCP



Features

- **A smooth, positive mechanical drive system with continuously variable up, down and rotational speeds, all independently controlled.**
- **An arrangement to rapidly center the process bar within a straight walled quartz tube supported between gas-tight, water-cooled end plates. Placement of the quartz tube is rather simple and adapters can be used to accomodate larger diameter tubes for larger process bars.**
- **Continuous water cooling for the outside of the quartz tube during operation.**
- **Assembly and dis-assembly of this system including removal of the completed process bar is simple and rapid.**

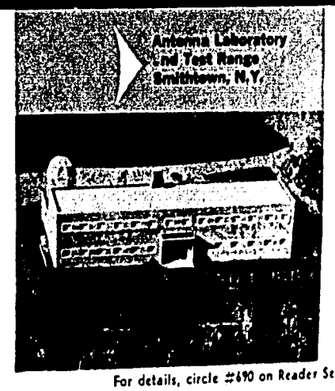
WL

In the field of microwave engineering, Wheeler Laboratories occupies a unique position as an independent laboratory devoted exclusively to consulting and development.

WHEELER LABORATORIES, INC.
ON LONG ISLAND



As a service to many prominent laboratories and manufacturers, WL has designed antennas, waveguide components, and microwave assemblies. Your inquiries are invited.

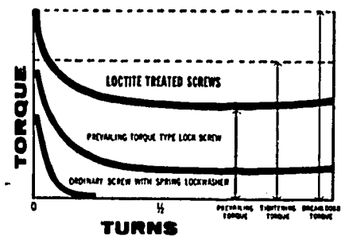
Stake screws with LOCTITE ...a retaining compound designed for thread locking!

Insulating varnishes and mechanical punching have been widely used for years for the lack of a better method. Now there is a retaining compound designed specifically for thread locking. Consider these advantages:

1. LOCTITE provides complete resistance to loosening under shock or vibration because it fills and locks engaging threads, providing *both* breakloose and prevailing torque.
2. LOCTITE has several times the holding power of locknuts or lockscrews because locking action extends over entire engaged surface and persists for several turns.
3. LOCTITE is easy to apply . . . not sticky . . . no mess . . . does not air dry! Hardens only in absence of air. Large batches of threaded parts can be treated and stored for days . . . lock only when assembled. No heating or mixing is necessary.
4. LOCTITE comes in different strengths which apply any required locking torque—ranging from a light drag suitable for adjustment screws to a locking force exceeding the torsional strength of the screw. Provides greater uniformity than mechanical staking.

LOCKING CHARACTERISTICS OF LOCTITE



LOCTITE is a thin liquid that hardens when confined between closely fitting metal parts. It forms a tough, heat and oil-resistant, bond that secures threaded parts better than any mechanical locking device. Write for literature and free sample.

WAXES and COMPOUNDS made to YOUR SPECIFICATIONS for

- **ENCAPSULATING** coils, electronic component assemblies.
- **IMPREGNATING** radio, ignition and transformer coils; paper tubes and forms; porous ceramics.
- **SEALING** condensers, batteries, switch base terminals, socket terminals, light sockets.
- **DIPPING** coil windings, transformers, condensers.
- **POTTING** power transformers, ballast transformers, coil windings, condensers.
- **BLENDING** to meet your requirements.
- **EPOXY** and **POLYESTER** formulations.
- **SPECIAL COMPOUND PACKAGING.**

BIWAX is available in a wide range of melting points, penetration, viscosity, cold flow and specific gravity. Special potting compounds are heat conducting and crack resistant at extremely low temperatures.

Write or phone today for our comprehensive brochure showing available products and their specification ranges.

Clean precision parts more safely

New Freon* solvents by Du Pont minimize cleaning hazards

- **Low toxicity**—"Freon" solvents are odorless and much less toxic than ordinary solvents—vapors won't cause nausea or headaches.
- **Won't burn or explode**—Underwriters' Laboratories report "Freon" solvents non-explosive, non-combustible and non-flammable.
- **Non-corrosive**—"Freon" solvents remain neutral through repeated degreasing use without the need of inhibitors.
- **Negligible effects on plastics, elastomers, insulation and color codes**—"Freon" solvents remove oil and grease with minimum swelling of plastics or rubber and without crazing or softening paint, wire coatings or insulation.
- **Leaves no residue**—"Freon" solvents evaporate completely, leave no deposit.

New "Freon" solvents by Du Pont degrease sensitive mechanical and electronic assemblies without damage to delicate parts. Since no inhibitors are needed, no residue is left on the parts, and "Freon" solvents can be recovered and reused without reinhibiting. Write for free "Freon" solvents booklet. E. I. du Pont de Nemours & Co. (Inc.), "Freon" Products Division 56, Wilmington 98, Delaware.

**Freon is Du Pont's registered trademark for its fluorinated hydrocarbon solvents.*

FREE BOOKLET! No obligation—write for booklet which tells how new "Freon" solvents by Du Pont minimize cleaning hazards.

BUILDING THE FUTURE IS A BIG JOB!

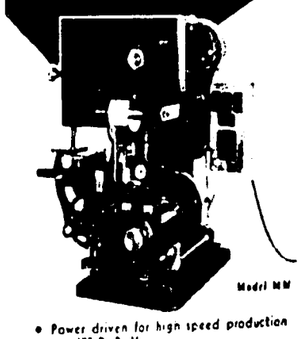
The radio-electronic engineers who form the membership of the Institute of Radio Engineers must remain years ahead of actual production, in order to pave the way for the products of tomorrow, through research and development today.

The special issues of "Proceedings of the IRE" help these men transform the theory of today into the production lines of tomorrow. Pictured above are the October 1951 Color Television Issue; November 1952 Transistor Issue; and January 1953 UHF Issue (all now out of print). In 1959, IRE published special issues on Government Research (May), Infrared (September), and Biomedical Electronics (November).

Special issues on special subjects are more than usually helpful, but every issue of "Proceedings of the IRE" is filled with facts and figures!

HIGH SPEED ☆ **MARKING MACHINE**

for imprinting on coated wire and tubing!



Model MM

- Power driven for high speed production ... 175 R. P. M.
- Fully automatic. Imprints spaces and feeds the material.
- Can be Manually operated for special requirements.
- Can be equipped with cut-off attachments to cut plastic tubing.
- Can be modified to meet special requirements.

Plus Many More Models. MM-4 Vinyl Tubing Marker • MM-2 Hand Operated Wire Marker • HTT Portable Wire Marker

For all your identification marking machine needs call:

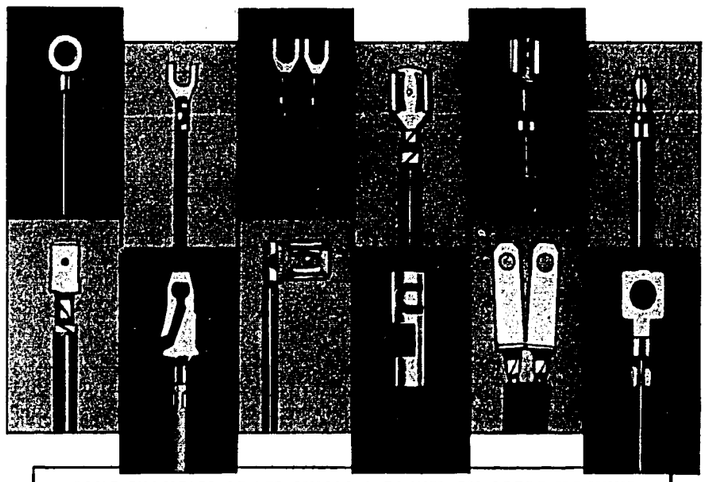
DO YOU NEED *Automation* FOR FINISHING WIRE LEADS WITH TERMINALS ATTACHED?



SOME EXAMPLES OF TERMINALS ATTACHED BY ARTOS MACHINE

NEW ARTOS TA-20-S Performs 4 Operations *Automatically!*

Artos TA-20-S with guard raised

1. Measures and cuts solid or stranded wire 2" to 250" in length.
2. Strips one or both ends of wire from 1/8" to 1".
3. Attaches any prefabricated terminal in strip form to one end of wire. (Artos Model CS-9-AT attaches terminals to BOTH ENDS OF WIRE simultaneously.)
4. Marks finished wire leads with code numbers and letters. (Available as optional attachment.)

PRODUCTION SPEEDS up to 3,000 finished pieces per hour. Can be operated by unskilled labor. Easily set up and adjusted to different lengths of wire and stripping—die units for different types of terminals simply and quickly changed.

ENGINEERING CONSULTATION... recommendations without obligation. Special adaptations made to fit requirements of your product. Machines for all types of wire lead finishing.

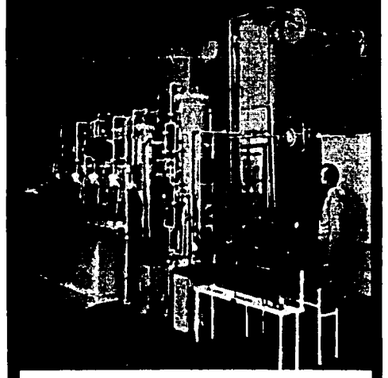
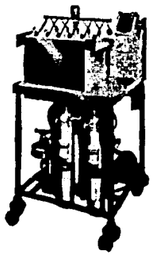
BARNSTEAD WATER PURIFICATION EQUIPMENT



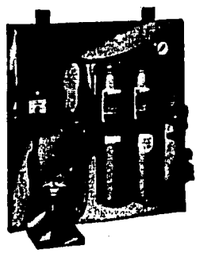
18,000,000 *ohm* WATER

This Barnstead equipment in series consists of sand and carbon filter, high-capacity 4-bed demineralizer, 2 Barnstead® high-purity Stills, tin-lined tank, mixed-bed demineralizer, MF® Submicron filter, tin-lined heater. RESULT: 18,000,000 ohm water in production quantities, free from organics, bacteria, and submicroscopic particles down to 0.15 micron.



TRANSISTOR WASHER

Rinses transistors, diodes, and other small components in hot, ultra pure water. Filters out particles to 0.15 micron. Continuous repurification system conserves water, results in substantial savings. Write for Bulletin 146.



COOLING WATER RE-PURIFYING SYSTEM adds thousands of hours to UHF transmitting tube life. Maintains cooling water at high purity level. Write for Bulletin 119.

CHART-PAK precision tapes and die-cut symbols made these conductor paths and terminal pads for a printed circuit layout in 9 minutes 40 seconds!

HOW LONG WOULD IT TAKE YOU TO DRAW THEM?

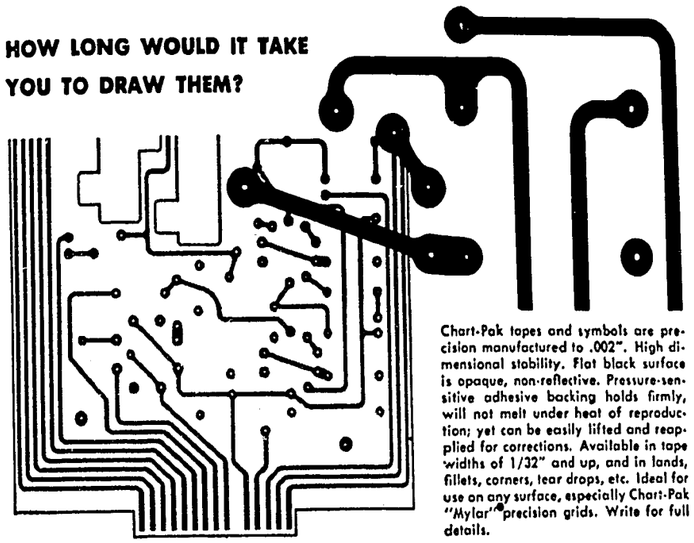

Chart-Pak tapes and symbols are precision manufactured to .002". High dimensional stability. Flat black surface is opaque, non-reflective. Pressure-sensitive adhesive backing holds firmly, will not melt under heat of reproduction; yet can be easily lifted and reapplied for corrections. Available in tape widths of 1/32" and up, and in lands, fillets, corners, tear drops, etc. Ideal for use on any surface, especially Chart-Pak "Mylar"® precision grids. Write for full details.

CHART-PAK Saves time... Saves money!

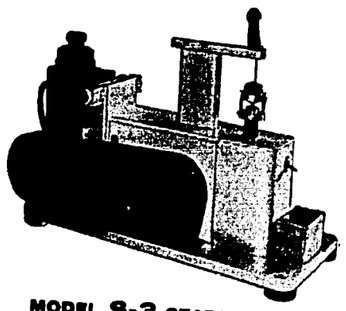
The most advanced coil winding equipment in the world today!

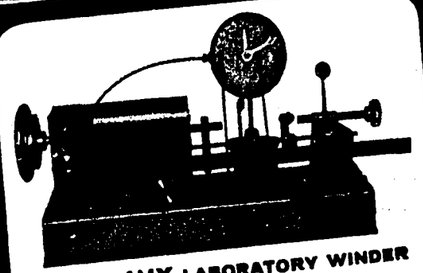


MODEL S-3 STATOR WINDER

Smallest of our family of machines for both internal and external winding in lamination stacks.

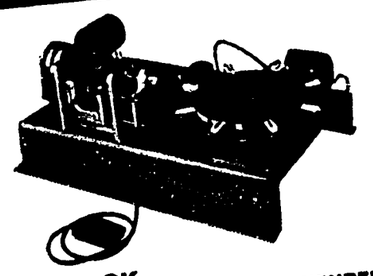
MODEL T TOROID WINDER

One of several types of toroid winders for inductances, auto transformers, rheostats, etc.



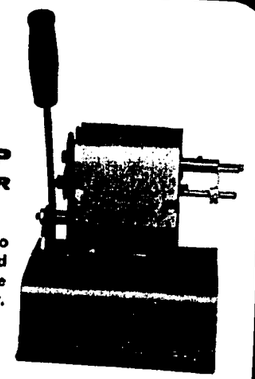
MODEL WX LABORATORY WINDER

The world's most versatile winding machine for all types of radio frequency coils as well as bobbins, transformers, resistors, etc. Features continuous gain or feed adjustment and our exclusive adjustable cam.



MODEL MP HAND WINDER

Coils with up to 60 turns produced in a single stroke of the lever.



MODEL CK AUTOMATIC TURRENT WINDER

One of our several models to wind many coil types on a completely automatic or semi-automatic basis.

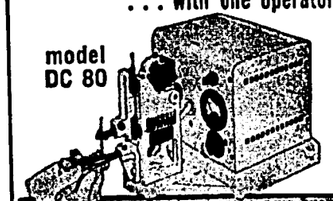
COWECO

TWEEZER WELD

Precision Resistance Welding Equipment

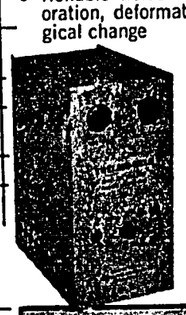
NOW produce up to 6,000 welds per hour . . . automatically . . . with one operator.

model DC 80



BENCH MOUNTED STORED ENERGY WELDER

- New TW5 low friction welding head
- Stored energy panel of 80 Watt second capacity
- Discharge time of 0.0008 to 0.0012 second
- Permits welding of difficult materials, i.e.: copper, silver, tungsten, etc.
- Reliable welds without discoloration, deformation, metallurgical change



COMPACT SYNCHRONOUS WELDING TIMER
6" wide
10½" high
8½" deep

model T-3

TRANS-SYNC WELDER

- 1 KVA capacity utilizing semiconductors.
- Also ideally suited with high speed automatic machinery.
- Operates at a rate up to 1200 welds per minute . . . welds partially oxidized materials with ease.
- Welding time: ½ cycle (8 milliseconds) to 10 cycles (160 milliseconds).

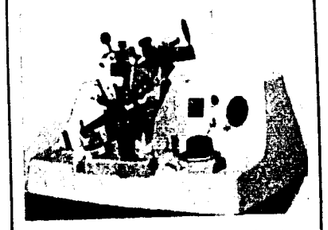
GORMAN Coil Winding Machine produces toroids 0.062 in. id. to 2 in. od.



Model 400 handles No. 46 to No. 26 wire. Three rollers support core to be wound. Core is rotated evenly through 360 deg. with assembly tilted toward the operator so he can see through it to readily view winding process. Rollers open outward at the same angular rate to coil will maintain its same center relation to wire-holding nozzle.

Position of core holder assembly can be moved forward, backward, upward. Each winding can be done automatically. Speed is variable from 0 to 1,200 turns per min. A counter drives a Selsyn receiver to show the number of turns. There is also provision for instant stopping.

Model 400 operates on 115 v., 50/60 cy. Weight: 50 lbs. Dimensions: 22 in. long by 10 in. high.

CUT WINDING COSTS
automatically
WITH THE MOST COMPLETE LINE OF AUTOMATIC COIL WINDING EQUIPMENT EVER OFFERED TO THE ELECTRICAL ELECTRONICS INDUSTRIES

MICAFIL

RWP
For automatic winding of high precision sine-cosine and linear potentiometers.
FEATURES:
Automatic shut-off
Adjustable wire tension
Winding speeds adjustable 0–250 R.P.M.
Core feed adjustable in increments from .00004" to .024" per revolution
Provisions for sector winding to 300°, or continuous

RWO
For continuous and sector winding of regular and miniature (narrow opening) toroids.
FEATURES:
Friction driven shuttle and wire guiding for controlled winding tension
Adjustable winding speed
Automatic cut-off, pedal on-off
Large magazine storage — holds enough 32-44 A.W.G. for winding several toroids

AWO
Semi-automatic for winding 2, 4 or 6 pole straight or skewed slot armatures.
FEATURES:
Quick set-up and change-over
Adustable wire guide blades
Automatic cut-out at pre-set number of turns
Hand controlled starting and automatic slot to slot advance
Provisions for V-winding

OFA-PE
For automatic or semi-automatic winding of multi-layered coils requiring paper interleaving.
FEATURES:
Can be set for automatic and semi-automatic interleaving of insulating paper
Stepless adjustment of wire guide even when machine is winding
Automatic paper length control as diameter increases
Automatic cut-off at pre-set number of turns with accurate 5 figure turn counter and zero set-back
Winds up to 4 flangeless coils simultaneously

There is a MICAFIL winder for every winding job.

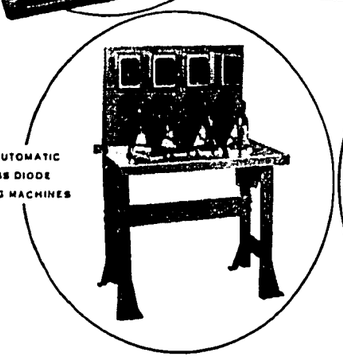
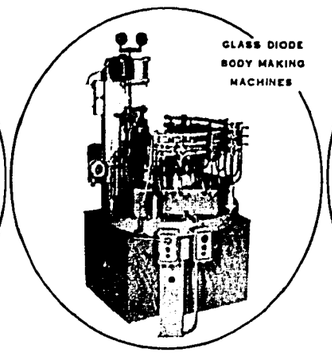
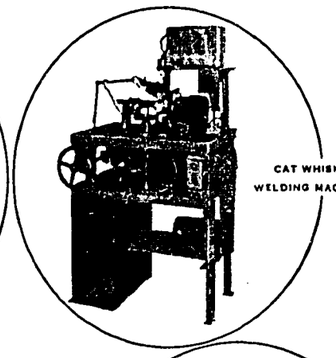
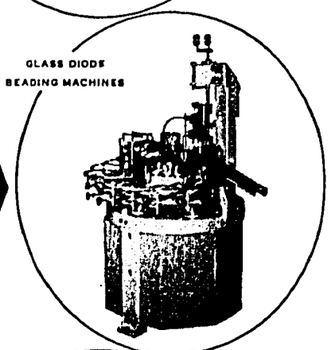
We have created over one thousand DIFFERENT KINDS of electronic production machines!

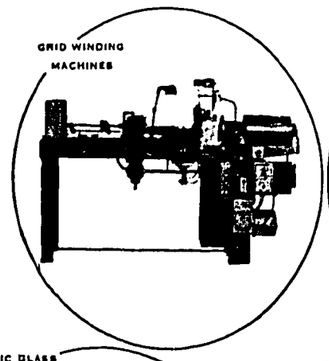


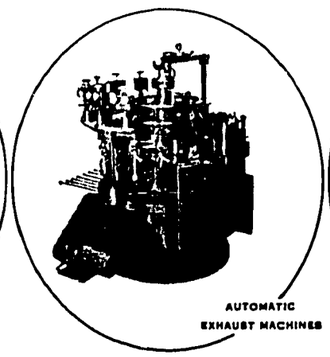


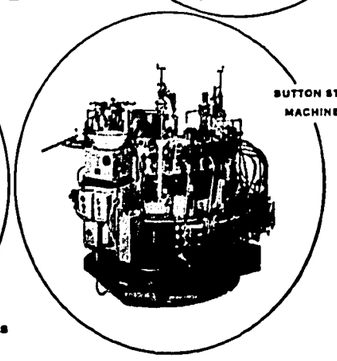


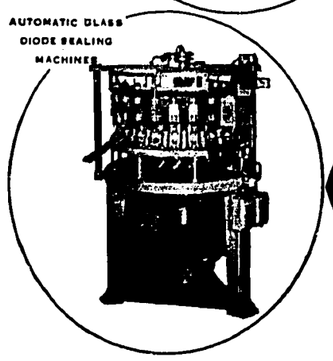
Whether for semiconductor or electronic tube production, each has exceeded customers' specifications. And each was tested under actual operating conditions before shipment.











Can you use this kind of engineering service and cost saving automation on YOUR business? CALL OR WRITE US.

KAHLE
ENGINEERING COMPANY
WORLD'S LARGEST EXCLUSIVE BUILDER
OF MACHINERY FOR THE ELECTRONIC INDUSTRY

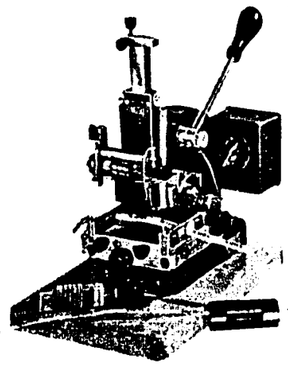
ELIMINATE COSTLY COLOR CODING



CODE MARK YOUR OWN WIRE WITH A KINGSLEY WIRE-MARKING MACHINE

Now you can permanently mark each wire with its own individual circuit number, at any desired spacing. You can reduce wire inventories because only one color of wire is necessary for as many codes as desired.

Simplify your assembly methods and speed production with the same machine that has proved so successful in the aircraft industry. Special machines are available for marking flexible vinyl sleeves.

Write for complete information.

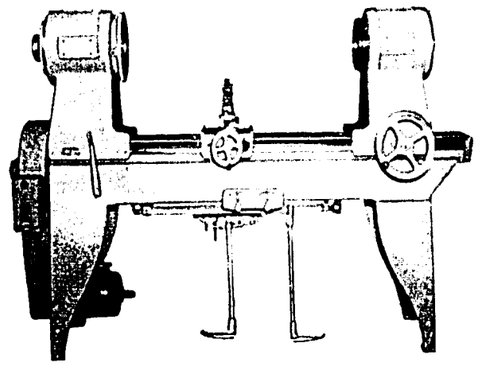
GLASS WORKING LATHES



NEW **MODEL ESA $3200.00** Price f.o.b. Grass Valley **NEW**

STANDARD EQUIPMENT

Two face plates
One collet draw-in bar
One 6-fire seven jet burner assembly
Hand carburetion control
Foot pedal control of air or nitrogen supply and of oxygen-gas volume
Main air valve controlling air in either or both spindles
½ h.p. Motor, 230 volt, three phase, single speed, 60 cycle, AC
Face plate wrench
One motor belt
One motor pulley

General Specifications

Variable Speed Drive — Electronic Control (As shown) Available at extra cost

Maximum length overall	84"	Spindle hole diameter	7⅛"
Maximum width overall	24"	Radial clearance above apron	13¾"
Maximum length spindle nose to spindle nose	47"	Net weight	Approx. 1250 pounds
		Approx. shipping weight	1500 pounds

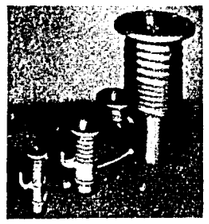
ONE CONVENIENT SOURCE
for ALL Your High and Ultra-High Vacuum Needs

Now that you've decided that you can make a better product cheaper by using high or ultra-high vacuum processing, why not do it the easy way? Save time, money, and frustration by taking advantage of the "one stop" service offered by NRC. This is your one convenient source of a complete line of high and ultra-high vacuum components, equipment, and systems, PLUS a wealth of practical information on how to use them profitably.

VACUUM PUMPS, GAUGES, VALVES



VACUUM PUMPS

NEW DIFFUSION PUMPS
Up to 50% more speed and less height. Permit more compact construction of furnaces, coaters, or other high-vacuum equipment. Can double capacity of your present installation.

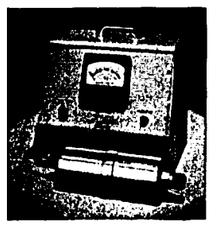
MECHANICAL
Single and two-stage from 1.25 to 400 CFM. Gas Ballast keeps pump oil uncontaminated by condensables.

BOOSTER AND DIFFUSION
Oil and mercury. Capacities 10 to 60,000 CFM. Pressures below 10^{-7} mm Hg. Special low backstreaming models available.

MECHANICAL BOOSTER
Provides "clean" vacuum to below 10^{-4} mm Hg. Capacities 250 to 4,500 CFM.

ULTRA-HIGH VACUUM PUMPS
Molecular drag, titanium adsorber, and ion pumps for very clean vacua to 10^{-12} mm Hg.

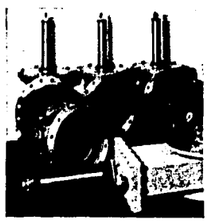
VACUUM GAUGES



Model 520 Alphatron® Ionization Gauge. Range 1000 — 0.0001 mm Hg.

Wide line of direct reading, total pressure gauges for accurate measurement from atmosphere to less than 10^{-12} mm Hg. Thermocouple, Pirani, and ionization gauges, including Alphatron®, burn-out proof, ultra-high vacuum, and conventional types.

VACUUM VALVES AND HARDWARE



Air release, ball, throttling, high conductance, angle, wye, globe, and slide valves. Manual and air operation. Bronze, mild and stainless steel, aluminum. Bellows and O-ring sealed. Sizes from ¼" to 36". ALSO seals, flexible connectors, cold traps, and accessories.

TANTALUM SINTERING AND OTHER VACUUM FURNACES

High temperature resistance furnace Model 2915. 4400°F in three minutes. Pressures to 1 x 10^{-5} mm Hg. Large 6" I.D. x 10", three phase, long life heating element.

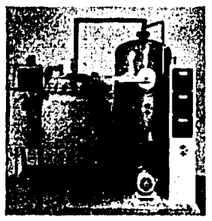
NRC has built and operated more high vacuum furnaces than any other organization in the world. Among these are batch and semi-continuous, resistance and induction, tantalum sintering furnaces. Other induction and resistance furnaces with capacities from 2 to 5000 lbs. Cold mold and skull arc furnaces with capacities from 2 to 10,000 lbs.

LEAK DETECTORS AND SYSTEMS

Inexpensive Model 4902 finds leaks as small as 10^{-8} cc/sec. Rugged, convenient, simple, fast recovering, it guarantees repetitive results.

Bench, rotary, in-line, etc., systems for production line quality control of relay cases, transistor housings, hermetic and glass to metal seals, wave guides, etc. Halogen and helium sensitive detectors for leak locating in manufactured products and in vacuum and other process equipment.

VACUUM IMPREGNATING AND DRYING



Pilot plant or production line drying, degassing, and impregnating systems for improving the dependability and electrical characteristics of capacitors, transformers, cables, and other components.

HIGH ALTITUDE TEST CHAMBERS

Standard chambers with diameters, 12" to 66" for simulating altitudes to 100 miles. Special chambers for altitudes to 400 miles.

SEMI-CONDUCTOR PRODUCTION EQUIPMENT

Low-cost standard furnace for growing single crystals of silicon, germanium, and intermetallic compounds.

Belljar and tank vacuum metallizers, diameters 12" to 66", for depositing thin films to precisely controlled thicknesses of from one molecule to several mils.

Two-zone 5" diameter muffle vacuum heat treating furnace.

ULTRA-HIGH VACUUM SYSTEMS

Standard and special systems for pressures to 10^{-12} mm Hg. incorporating improved ultra-high vacuum components.

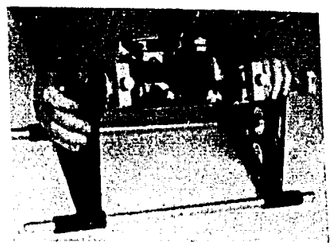
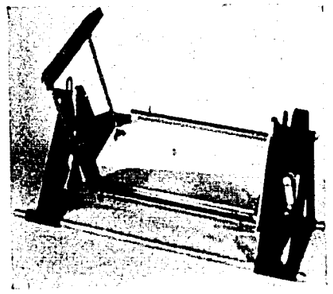
PRODUCTION FIXTURES

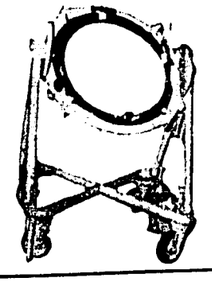


Attention Methods Engineers

Production Tool and Fixture assemblies save you time and money in your wiring and assembly departments. "Tiny-Fix," your third hand, positions miniature chassis, terminal boards and connectors in proper alignment which results in quicker and more efficient work.



The S-12-W above differs from our standard friction and index models in that it offers worm drive that gives positive positioning even under heavy stress. The PF-20-C floor model precision fixture is designed to level and rigidly support the bulky but delicate chassis assemblies required by recent developments in the missile and related industries. 36 inch height at pivotal centers permits the rotation of assemblies as wide as 50 inches through 360 degrees in two planes.



Adapters similar to those shown in the assembly fixtures above are designed by our engineering staff to meet your specific requirements.

Write us for our catalog and current list of firms now using our equipment in the electronic industry.

THE Silbhite

INDUSTRIAL AIRBRASIVE® UNIT

...cool, shockless, precise way to cut...abrade...debur...clean hard, brittle materials

The Industrial Airbrasive is doing jobs that were previously thought impossible! By gas-propelling a precise stream of fine particles it gives a *fast, cool, shockless* cutting or abrading action. It is equally useful as a laboratory instrument or a mass-production tool. Every day new applications in the electronics field are being found.

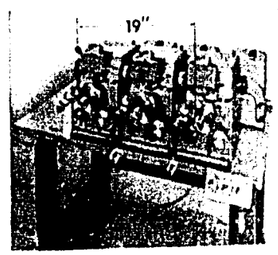
FRONT LOADING MULTIPLE HEADER BOBBIN WINDER
Adjustable Length

Up to 4 heads easily handled by operator without shifting position. Each head winds random wound Bobbin Coils, Solenoids, Repeater Coils or Resistors up to 2½" long and up to 4" OD. Each head individually motorized and easily portable.

Exclusive time-saving convenient front loading—spindle faces operator. Winding traverse infinitely adjustable—no cam changing.



Note extreme compactness

Up to 7000 RPM winding speed. Exclusive features: 1) Slow-start eliminates wire breakage. 2) Extra economy positive stopping magnetic brake. 3) Instant automatic brake release.

Other time-saving features: 1) Instant re-setting automatic counter. 2) Faster gear changing—gear box handily located on top of head. 3) One motion by operator re-sets counter and starts machine—starting switch located directly opposite counter re-set lever. 4) No oiling necessary—all parts automatically lubricated. 5) Tension conveniently mounted below spindle.

Increase production, lower costs, lessen down time with Model 314-AM.

GEO. STEVENS MANUFACTURING CO., INC.

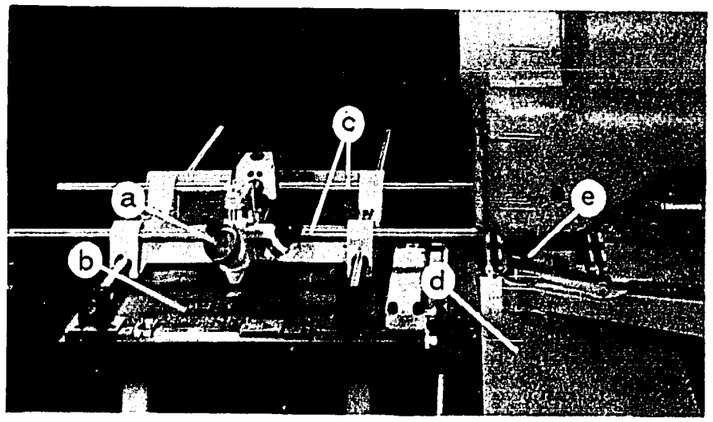
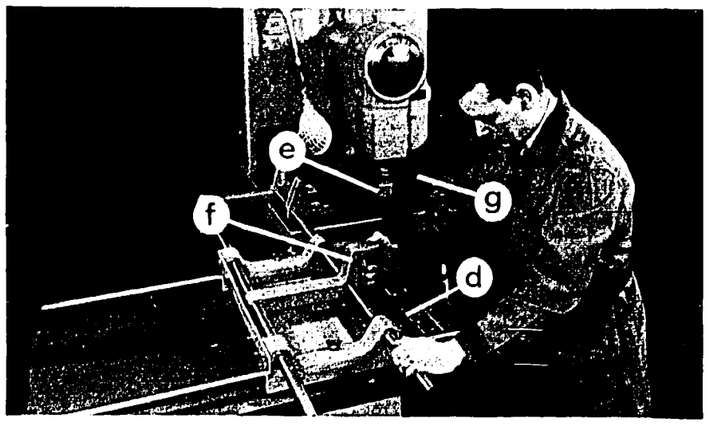
COLD-PUNCH PRINTED CIRCUITS

...this profitable STRIPPIT way!



1. PUNCH THE TEMPLATE. The Strippit Dupl-O-Scope (a), precision 4-power optical locator is mounted on Strippit pantograph-like Duplicator. As the Dupl-O-Scope is "sighted-in" on drawing or sample (b), the Duplicator arms (c) position template blank (d) under Strippit Fabricator punch (e) to accurately locate and punch pilot holes in a fraction of conventional layout and template making time.



2. RAPID-FIRE DUPLICATION FROM TEMPLATE. Duplicator with Stylus (f) replaces Dupl-O-Scope. As Stylus enters each pilot hole in template (d), it automatically positions work (g) under the punch (e) and trips the punch to produce a hole of desired shape and size in the proper location. Tool changes in the Fabricator punch holder are made in seconds, and anyone can learn to operate the Duplicator in a few minutes. For small to medium runs, there is no easier, faster or more economical method of making clean, accurate perforations in laminates or in chassis up to ¼" mild steel.

WRITE FOR DEMONSTRATION AT YOUR PLANT! At no obligation, a Strippit Mobile Unit will demonstrate the cost-cutting Strippit Fabricator, Duplicator and Dupl-O-Scope. Write today!

Here's how to wind cross-wound coils

FASTER, BETTER

The new Leesona No. 111 Coil Winder is today's most efficient machine for cross-wound coils — specially designed for automatic production and fast, accurate setup to cut your costs and raise your profits.

Read the new bulletin about No. 111's *exclusive* features — automatic programming attachment — automatic pie-winding attachment — change gears that drop onto fixed centers without use of tools — and many more.

Cash in on coil windings' latest cost cutter. Send now for bulletin No. 111.

TOROIDAL WINDING MACHINE

FOR ACCURACY USE TOROYD

- Specializing in the tightest and most precise 360° continuous or 270° segmental traversing toroidal windings, the UNIVERSAL machines have proven to be the finest in the field.
- For the same hole size, "TOROYD" models will wind heavier wire than other machines presently on the market.
- UNIVERSAL "TOROYD" positive-drive toroidal coil winding and taping machines can be designed and custom-manufactured for your special requirements.
- ALL precision-cut shuttles, magazines and roller assemblies are of Molybdenum alloy steel with a Wear-Resistant Hard Chrome Finish.
- The machines and parts are designed and manufactured to jig-borer accuracy by UNIVERSAL.
- All models equipped with VARIACS for speed control.
- Ask to be included on our mailing list so as to receive important latest releases.

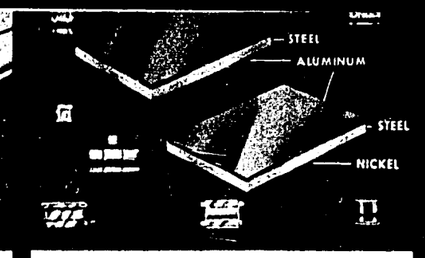
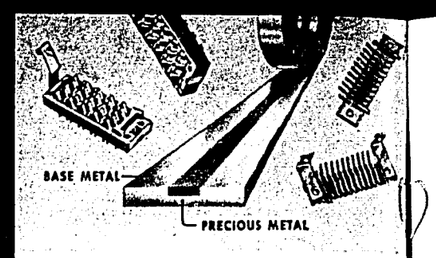
ALIRON® Copper-Base and Copper-Cored

Three-layer and five-layer materials used for anodes in rectifier and amplifier tubes. Provide longer power output life . . . uniform heat dissipation . . . high electrical conductivity . . . improved anode reradiation . . . and reduce costs.



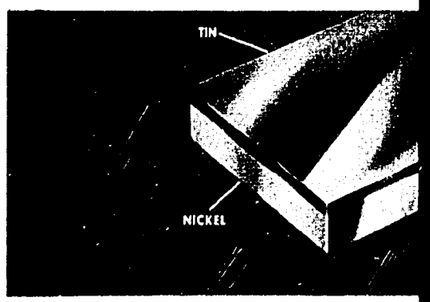
ALNIFER®, NIFER®

These clad metals are used as alternate materials for solid pure nickel in electron tubes. They conserve critical material . . . reduce costs substantially. Supplied in annealed coils ready for your production.



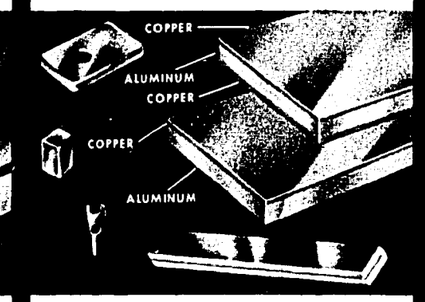
CLAD PRECIOUS METAL CONNECTOR MATERIALS

High reliability of connectors, clips, terminals obtained by using gold and other precious metal alloy stripe materials . . . place high performance materials in the contact areas . . . cost-savings and improved performance over gold electroplated parts.



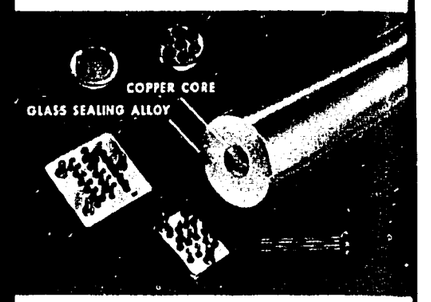
TIN CLAD METAL STRIP and other Semiconductor Clad Metals

A number of combinations of clad metals are available for use on base tabs, lead wires, whisker wires, base materials and enclosures in silicon and germanium diodes, transistors and germanium power transistors.



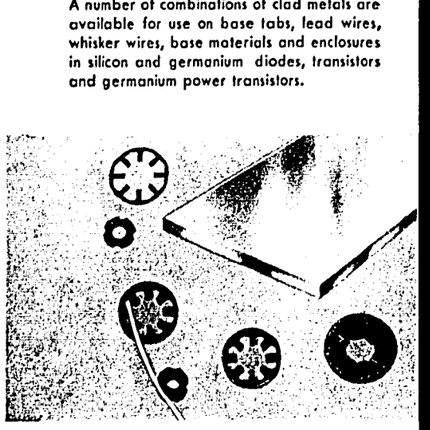
ALCUPLATE®

Easily formed, deep drawn or spun. Used for waveguides, component cases, variable condenser blades, chassis and electrical or thermal conductive parts. Light in weight, saves up to 30% over the cost of solid copper.



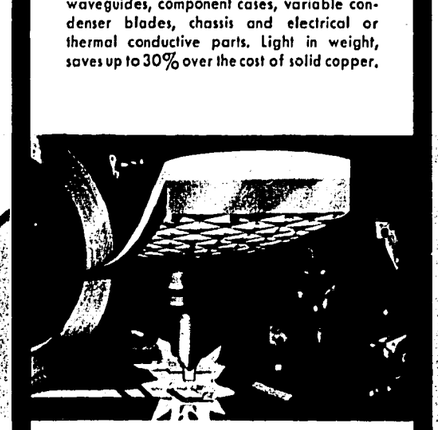
COPPER-CORED GLASS SEALING WIRES

Featuring a sound metallurgical bond, these wires give three times greater conductivity than solid 52 alloy wire of equal diameter . . . they facilitate miniaturization. Features include: leakproof seal between alloy and core, high electrical and thermal conductivity, lower costs.



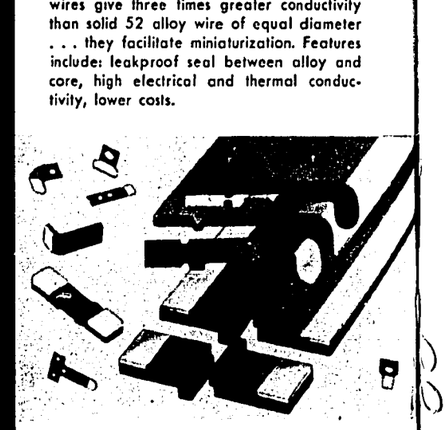
ALUMINUM-IRON ALLOYS

For magnetic applications requiring low core losses and high permeability at low flux densities in current and pulse transformers, relays, gyro mechanisms, servo mechanisms, missile guidance systems, etc.



CLAD ELECTRICAL CONTACT TAPES

For products you want to automate, this *modern* contact form permits greater latitude in contact assembly design . . . automatic assembly of two or more parts in a single operation. Tape contacts are easily attached by spot welding . . . are self-aligning . . . and allow broader assembly tolerances. Save up to 40% in contact costs.



CLAD CONTACT MATERIALS

Single and double inlay, overlay and toplay provide better electrical performance, longer operating life and lower fabrication costs. Complete assemblies can be made to close tolerances by single blanking and forming operations.

General Plate

Clad Metals and Clad

Electrical Contact Materials

Solve Design Problems...

Provide High

Performance Reliability

General Plate clad precious-to-base or base-to-base metals are inseparably bonded by a patented solid-phase bonding process without the use of brazing alloys or other intermediate material.

If you are seeking metals with useful characteristics that can't be found in a single metal or alloy, investigate clad metals. If you want stronger or lighter components — or better electrical and mechanical properties — or fewer corrosion problems — or if you are interested in conserving critical metals or reducing parts costs, you can profit by using General Plate Clad Metals.

Write for a General Plate Clad Base Metals catalog today. Or better yet, why not talk over your requirements with a competent field engineer? His knowledge of the applications of clad metals is yours for the asking. No obligation, of course.

Make your **Ferrites** with

HIGH PURITY **MAPICO®** FERRIC OXIDES

for TOP performance

These reactive synthetic MAPICOS, some especially developed for ferrite manufacture, are over 99% pure Fe_2O_3. Choice of suitable characteristics is made easy—many variations in particle-size and shape are available. Careful control contributes to uniformity of packing and shrinkage. Our iron oxide production experience and our ferrite research can help you accomplish best results. Manufactured in modern plants by modern methods. Experienced Columbian technicians are ready to cooperate in any problem involving the use of iron oxides for ferrite manufacture. For full data write today. Samples for testing provided on request.

COLUMBIAN CARBON COMPANY • MAPICO IRON OXIDES UNIT • 380 MADISON AVENUE NEW YORK 17, N. Y.

greater RELIABILITY through complete CONTROL

THAT'S WHY NEY MANUFACTURES

- precious metal alloys
- precious metal parts
- molded assemblies
- all under one roof

A manufacturer of precious metal products for over 145 years, The J. M. Ney Company offers unusually broad precious metal research experience and facilities. Ney is unique in that it controls production of Ney precious metal parts and assemblies *from the alloying of the metals themselves right through to the manufacture of finished part or assembly.* This control is reflected in the *extreme reliability* of Ney's standard molded brush assemblies and in the many assemblies made to customers' specifications.

Ney's design engineering service works closely with customers' design and production engineers in the development of parts and assemblies for specific uses, and their help is frequently sought in the design phase of product development. Ney's modern new plant is ideally equipped to serve manufacturing needs for the simplest part of the most intricate assemblies.

Ney products, either standard or made to customers' specifications (for low level contact applications), include molded contact assemblies particularly for use with rhodium or gold surface printed commutators, relay contacts, contacts for switching devices and switching assemblies, slip ring assemblies, small screw machine and headed contacts and precious metal resistance wire.

- Molded assemblies
- Fine wire (resistance)
- Precious metal wire and plate
- Fabricated parts and assemblies using precious metal with base metal blades
- Welded assemblies
- Small screw machine and headed contacts
- Research and Engineering facilities
- Refining of precious metals

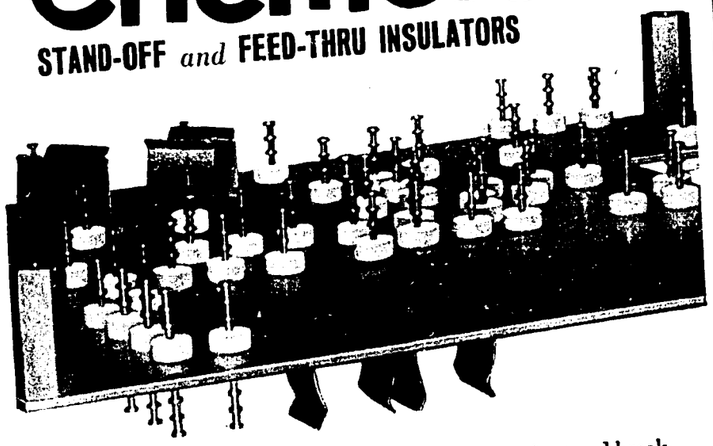
Where reliability is critical...

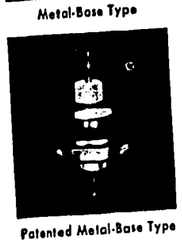
Chemelec*

STAND-OFF *and* **FEED-THRU INSULATORS**



Compression-Mounted Type

Metal-Base Type



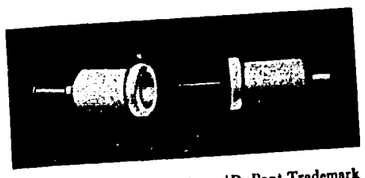
Patented Metal-Base Type

Simple to install, resistant to heat and breakage, and—above all—reliable under any conditions, Chemelec Stand-Off and Feed-Thru Insulators are the obvious choice in missile guidance, fire control, tracking, and radar systems . . . nearly all critical electronic circuits. DuPont TEFLON†—unmatched for electronic applications—is used as the insulator body. TEFLON has exceptional dielectric properties, is chemically inert, resists heat to extreme temperatures, won't break under severest shock or vibration. And, Chemelec Compression-Mounted Stand-Off and Feed-Thru Insulators are designed for easy installation. You simply press them into pre-drilled holes; they become self-fastening, requiring no additional hardware for adjustment. Available in compression-mounted, metal-base, miniature and subminiature types . . . standard R.M.A. colors with a wide range of sizes and terminal designs.

For further information, write for Catalog EC-559. Garlock Electronic Products, The Garlock Packing Company, Camden 1, New Jersey.

Chemelec* CONNECTORS

—Teflon Insulated for Outstanding High Frequency Service



Chemelec TEFLON-insulated male and female connectors are used mainly as breakaway connectors . . . plug-in crystal diodes, plug-in coils and forms, test probes. Once compressed into chassis holes, the connectors need no further adjustment or hardware. Chemelec Connectors have all the fine TEFLON characteristics, and are available in the .040, .050, and .064 pin size. Female connectors are also available in the .080 size.

TEFLON STOCK SIZES AVAILABLE

ROD
Diameter: ⅛" to 7¼"
in various lengths

TUBING (rigid)
O.D. ½" to 12"
I.D. ¼" to 6½"
depending on O.D.

SHEET
Thickness: 1/16" to 2"
Sizes: 12" x 12", 24" x 24", and 48" x 48"

TAPE
Thickness: .001" to .125"
Widths: ¼" to 18"
Ten fade-proof colors

SPAGHETTI TUBING
AWG sizes 30 to 0.
Thin and regular wall thickness
Ten fade-proof colors for coding

THIN WALL TUBING
I.D. ⅛" to 1"
Wall thickness: .030" to .050"

ROUND AND SQUARE BEADING
Round: Diam. .030" to .150"
Square: .020" to .156"
across the sides

For 100% Controlled Quality —Specify POLYPENCO®

. . . a complete range of TEFLON* and other TFE Fluorocarbon Stock Shapes

You make the most of the valuable properties of TFE fluorocarbon resin products when you specify POLYPENCO. The reason? All stock produced by The Polymer Corporation of Pennsylvania is inspected and tested from the raw material to the finished product. Thus, constant electrical and physical properties, and maximum dimensional stability are maintained.

New, exclusive Ultrasonic testing provides quick, dependable detection of internal voids and flaws to assure you uniformly dense shapes "clear through" for cost saving production and reliable finished products.

POLYPENCO Teflon rod, tubing, sheet and tape are available nation-wide in the sizes to meet your requirements. Custom fabrication is also available, if desired.

POLYPENCO's engineering staff stands ready to help you solve any specific problem. For their assistance or for technical information and purchase specifications write to The Polymer Corporation of Pa., Department RB, Reading, Pa.

Prompt Delivery from Sales Representatives and Distributors coast-to-coast.

POLYPENCO

NETIC CO-NETIC

TAPE DATA PRESERVERS

Keep Data Clear, Distinct, Without Distortion

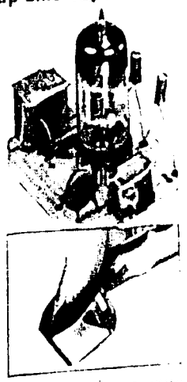
Permanently maintain original fidelity of recorded data on automation programming tapes, telemetering, broadcast, video and hi-fi tapes by diverting all damaging magnetic fields. Magnetic shielding qualities not affected if sturdy Netic Co-Netic containers are dropped or vibrated. Containers do not retain residual magnetism nor require periodic annealing.

Successfully provide simultaneous high and low intensity shielding plus high and low frequency shielding from all damaging extraneous fields produced by generators, power supplies, transformers, magnetic tables on surface grinders, magnetic chucks, de-gaussers, soldering irons, motors, power lines, welding machines, solenoids, etc. around factories, laboratories, military installations, and radio and TV stations. Available in many convenient round or rectangular shapes. Write for sizes and prices today.

MAGNETIC SHIELD DIVISION PERFECTION MICA CO.
1322 No. Elston Avenue • Chicago 22, Illinois

LOWER COST MAGNETIC SHIELDING

Co-Netic & Netic Foils Permit Max. Miniaturization, Improved Performance ... Extremely Versatile—Readily Cut to Any Shape, Wrap Like Tape



How Co-Netic & Netic foils lower your magnetic shielding costs: 1- You use less shielding material because our foils are only .004" thick and they tailor easily to exact shape required, minimizing waste. 2- Permit simple shielding of odd shapes and hard-to-get at components, saving valuable time and eliminating tooling costs and inflexibility of rigid metals. These advantages make possible much smaller and less costly systems, as components may be positioned in close proximity without interference from damaging magnetic fields.

These foils are non-shock sensitive, non-retentive, require no periodic annealing. They effectively shield electrostatic and magnetic fields over a wide range of intensities. Both foils available from stock in any desired length in various widths.

Co-Netic & Netic foils are successfully solving many types of magnetic shielding problems in numerous critical satellite, missile, magnetic tape and other military, airborne, electronic and laboratory applications. These foils can help you solve your magnetic shielding problems.

MAGNETIC SHIELD DIVISION PERFECTION MICA CO.
1322 No. Elston Avenue • Chicago 22, Illinois

KESTER SOLDER

FIRST CHOICE FOR EVERY APPLICATION...

Kester "44" Resin-Core Solder

The Solder that's widely used in the electronic industry for TV, radio and similar applications. Has a new activated resin flux that permits the fastest soldering operation. Absolutely non-corrosive and non-conductive. Supplied on 1-, 5- and 20-lb. spools.

Kester "Resin-Five" Core Solder

Standard "accelerated" resin flux for easy soldering of such metals as copper, zinc, brass, nickel-plate and others. Ideal for printed circuit work. Available in all tin and lead combinations. Non-corrosive and non-conductive. In 1-, 5- and 20-lb. spools.

Kester Plastic Rosin-Core Solder

Time-proved "standard" in the electrical-electronic industry. Kester's Plastic Rosin is plasticized, preventing decomposition and permanently preserving the full fluxing quality of the original rosin; it's completely non-corrosive, non-conductive and fungus resistant. Available in wide range of tin-lead combinations, core sizes. In 1-, 5- and 20-lb. spools.

KESTER "SOLDERFORMS"

The original pre-formed solder, supplied in exact sizes, shapes and formulations for every production line or assembly requirement. Flux-filled or solid washers, discs, rings of every description, engineered to your needs.

KESTER SPECIALIZED FLUX-CORE SOLDERS

The formulation and production of special flux-core solders for any specific application is a famous Kester feature . . . the logical outgrowth of over 60 years' experience in serving the soldering needs of all types of industry.

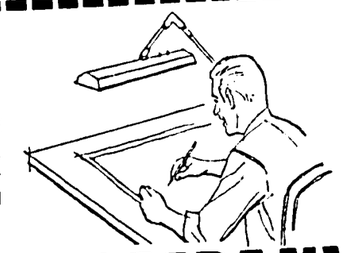
KESTER SOLDERING FLUXES

Scientifically compounded to make all soldering operations easier, faster, more economical, the four basic types of Kester Fluxes include 160 different formulations.

FREE: WRITE today for 78-page Kester technical manual, "Solder . . . its Fundamentals and Usage."

CALL ON KESTER FOR ENGINEERING ASSISTANCE

Since 1899, Kester's business has been SOLDER. With this background, your particular soldering problem is quickly solved to your entire satisfaction. There's no obligation of any kind . . . ever! Call —write—wire for the details.



KESTER SOLDER COMPANY

KULKA

TERMINAL BLOCKS

MOLDED BARRIER CONSTRUCTION

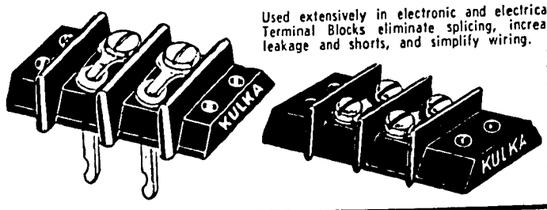
Kulka terminal blocks, used extensively in electrical and electronic assemblies, eliminate splicing, increase insulation, stop leakages and shorts, and generally simplify wiring work.

Molded of high tensile strength bakelite for general commercial use, they are available in other materials made in full compliance with latest military specifications, MIL-M-14E, covering CFG, MFE, MME, MDG, MAI-60, GDI-30, PM14, and other types of special plastics.

Kulka terminal blocks are made in many styles and sizes for varied applications. With 1 to 26 terminals, depending on size. Supplied with or without marker strips which may be printed or plain, or blocks can be engraved.

Write for Latest Kulka Terminal Block Catalog!

WIDEST SELECTION OF TYPES AND SIZES



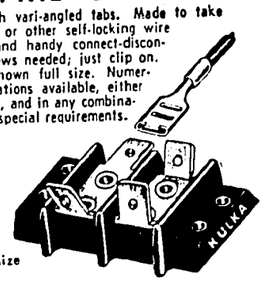
Used extensively in electronic and electrical assemblies, Kulka Terminal Blocks eliminate splicing, increase insulation, stop leakage and shorts, and simplify wiring. In widest range of types, sizes, insulating materials, terminals, etc. Here shown are two types of popular 600 Series. There's a Kulka Terminal Block for every need!

MINIATURE BLOCKS

409 Series is ideal for miniaturization. Shown full size. Only 4⅜" long for 21 terminals. 5/16" wide with barrier. Also available with one-sided and two-sided soldering lug. Also with threaded holes taking 4-40 screws for mounting through chassis, if desired.

"KILPTITE" BLOCKS

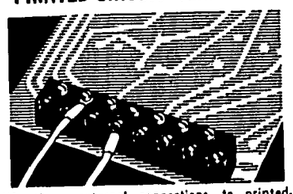
Available with vari-angled tabs. Made to take AMP, Burndy or other self-locking wire lugs. Fast and handy connect-disconnect; no screws needed; just clip on. 800 Series shown full size. Numerous tab variations available, either flat or angled, and in any combination to meet special requirements.



SERIES 800

Shown full size

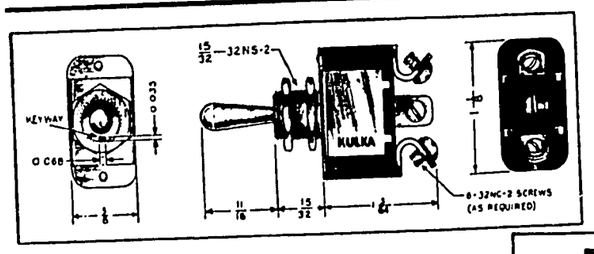
PRINTED-CIRCUIT TERMINALS



Simplify those external connections to printed-circuit boards, no matter how jammed up. Kulka 520 Series miniature terminal blocks mount on board. Terminal pins below slip into standard mounting holes for dip-soldering. Screw terminals. Readily connected or disconnected. 2 to 24 terminals. Entire assembly can be encapsulated.

NAVY BOARDS

Heavy-duty terminal blocks in the widest range of types, materials, sizes. Here shown one-quarter size is a Navy Terminal Board made to drawing 9000, Series S6505 B, 73214, Rev. H. Supplied in MAI-60 glass-filled Alkyd as per MIL-M-14 with latest revision. Threaded studs of manganese-bronze, molded in plastic. Slotted brass nuts. Typical of the "specials" developed and produced by Kulka.



Single-Pole Switches: Series ST 40, with screw terminals, shown at left. Widest choice of types in concise tabular form presented in Kulka literature available on request.

Double-Pole Switches: Series ST 52 with solder lugs, shown below. Wide choice of types in concise tabular form presented in Kulka literature available on request.

ELECTRONIC SWITCHES

Made to Joint Army-Navy specifications—JAN-S-23, MIL-S-21195, MIL-S-6745 and MIL-S-3950A, for electronic, aircraft and communication uses. Designed for quick, easy, one-hole mounting. Ruggedly built for long, trouble-free service. Operating cycles are above minimum required by specifications.

All metal parts treated against corrosion. Switches come with mounting nuts and sleeve lock-washer. All switches made to MIL-S-3950A and MIL-S-6745 are supplied with toggle seal. Units are tested regularly by quality control in production procedure, insuring top performance.

Design Electronic Controls for RELIABILITY IN SERVICE with Alden Components for PLUG-IN UNIT CONSTRUCTION

Be sure your Engineers are working with the Alden Handbook of plug-in unit design. Presents complete line of basic components of tremendous flexibility for adapting your equipment to plug-in construction.

REQUEST FREE 250-PAGE "ALDEN HANDBOOK"

1. *Unitize your circuitry in compact vertical planes using Alden Terminal Card Mounting System.*

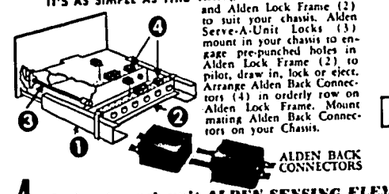
You can use Alden Terminal Mounting Card with Alden Miniature Terminals, Jumper Strip and Sockets staked to accommodate any circuitry — making complete units ready for housing. Components snap into unique Alden Terminals, are held ready for soldering.

2. To mount this vertical circuitry, ALDEN PLUG-IN PACKAGES AND CHASSIS give tremendous variety with standard components

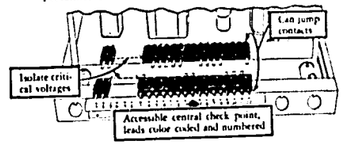
Alden components provide standard plug-in or slide-in housings—with spares, your circuits become units replaceable in 30 seconds.

3. Give chassis easily traceable interconnects and 30-second replacement with ALDEN SERVE-A-UNIT KIT

IT'S AS SIMPLE AS THIS Arrange Alden Side Rails (1) and Alden Lock Frame (2) to suit your chassis. Alden Serve-A-Unit Locks (3) mount in your chassis to engage pre-punched holes in Alden Lock Frame (2) to pilot, draw in, lock or eject. Arrange Alden Back Connectors (4) in orderly row on Alden Lock Frame. Mount mating Alden Back Connectors on your Chassis.



GIVING YOU 1) Chassis that plugs in, locks and ejects with half turn of the wrist. 2) leads so beautifully organized, accessible and identified that non-technical personnel can service.



4. *Assign to each unit ALDEN SENSING ELEMENTS — to spot trouble instantly:*

1210 N. Main St., Brockton 64, Mass.

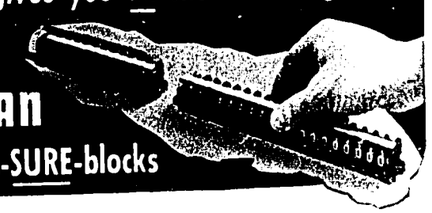
No other terminal block — sectional or one-piece gives you all the advantages of



BUCHANAN

MD sectional pres-SURE-blocks

NO WASTE CIRCUITS—Reduce material costs, save space. Supplied assembled in 20 snap-fit section lengths. Pull off or add groups for any length block.

SMALLER INVENTORY—Only 2 different parts (contact and end sections). No running out of needed items.

MORE CIRCUITS IN AVAILABLE SPACE—Increase contact capacity, decrease jumpering. Group common wires (equivalent to 1 #22 thru 1 #8) in tubular contacts. Contacts on 7/16" centers. 10 circuits 4 7/16", plus 2 1/32" for each complete block.

NO TERMINALS OR LUGS—Eliminate lugging costs. Tubular contacts provide secure, efficient connections.

NO HIDDEN CIRCUIT MARKINGS—Unobscured top marking area minimizes errors. Integral or separable strips.

QUICKER TO INSTALL AND CHANGE—Hand assembled, no fixtures or hardware. Mount only every 12 sections. Add circuits without removing mounting screws.

LOW INSTALLED COST—Competitive with conventional blocks of similar rating.

Separate Sections or Factory-Assembled Blocks
Flat Base or Channel Mounting • Tubular or Strap-Screw Contacts
Fanning Strips • Conservative 750-volt A.I.E.E. rating

Tubular contacts fully approved.

Sealectro PRESS-FIT® TEFLON* TERMINALS

ONE-PIECE Sealectro Teflon Terminals (eliminating hardware, such as screws, nuts, washers, lockwashers, sealing) save material, labor, time, trouble.

Here is the outstanding selection of types and sizes—over 800 different miniature and subminiature standoffs and feedthrus; jacks and plugs; connectors; taper-pin receptacles. Wide choice of lug styles and platings. And available in nine RETMA code colors for circuit and function designations.

Sealectro Insertion Tool Directory assures correct insertion of each Press-Fit type, while Sealectro's application-engineering service insures complete satisfaction.

Small Quantities: For the convenience of prototype designers, development labs, special equipment builders, experimenters and others, Sealectro Press-Fit terminals are stocked by industrial distributors. Sixty-odd types most generally used, are available locally.

Production Quantities: Deal directly with the Sealectro plant. The local Sealectro field representative is always "at your service!"

STANDOFFS

Wide selection of miniature sizes in voltage ratings up to 4000. For components stressing higher voltages rather than space-saving. Choice of lug styles and platings. In nine RETMA code colors.

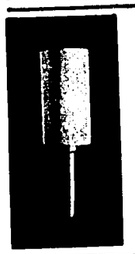
Also in subminiature sizes for miniaturization programs. Operating voltages up to 750. Choice of lugs, platings, colors.

FEEDTHRUS

In miniature sizes and choice of lugs including hollow-tube style, facilitating connections through metal chassis or casing. Voltage ratings up to 5500 in larger sizes. Subminiature sizes for ultra space-saving, in voltage ratings up to 750. Choice of lug styles, platings, code colors.

JACKS

Rugged miniature and subminiature test-point jacks featuring either stamped or machined beryllium-copper contact members with bull-dog grip. Take standard instrument test probes or companion plug. Ideal for test points on metal panels, connecting to circuitry or components for external testing, and for unbreakable metal-plate patch-cord boards. In nine RETMA code colors. Plus New Right-Angle Printed-Circuit Jack. Write for samples.



PLUGS

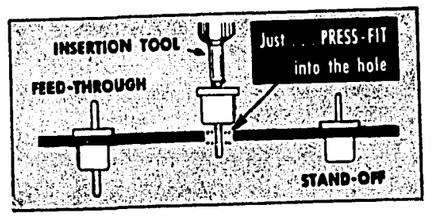
Choice of types and sizes. Used in conjunction with Press-Fit jacks, and also as male member of breakaway connectors. Connecting wire slips through hollow-tube probe and is dip-soldered. In nine RETMA code colors.

TAPER PIN

Individually-insulated precision-machined receptacles for standard taper pins, taking advantage of the simple, fast, economical Press-Fit installation. Available in feedthru and standoff types, as well as high-voltage designs with extra-long leakage path. In nine RETMA code colors.

* REG. T.M. PEND.

Install them FAST and TO LAST!



Fastest, simplest, most economical terminal installation, in three steps: (1) Punch or drill hole; (2) Countersink entrance edge according to Sealectro's time-tested specs; (3) With Sealectro-approved insertion tool in chuck of drillpress (power off) or hand arbor press, center over hole and apply pressure, smoothly and easily seating the Press-Fit terminal in place. That's all there is to it. And genuine Sealectro Press-Fit terminals stay put—for keeps!

Sealectro CONHEX

SUB-MINIATURE R.F. CONNECTORS

Radically different. Probably *better*. And you can tell them at a glance—by their *hexagonal* bodies. The only connectors that can be wired and rewired in factory, lab, shop or field, *without special tools*. Typical advantages:

Successfully withstand pull-out strain in excess of 20 lbs.

Captivated contacts insure proper engagement of mating parts.

Clamping parts, insulators and contacts readily assembled on cable before insertion in connector body.

Gold-plated hex stock allows assembly with usual pliers or small wrench.

Contacts soldered to center conductor of cable, insuring proper connections.

No distortion of cable insulation that might affect electrical characteristics.

Flexible design accepts all RG-188/U MIL cable diameters.

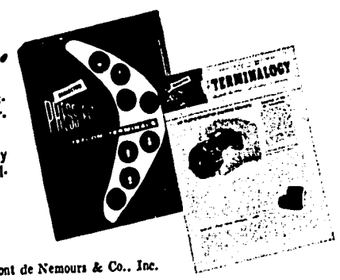
50-OHM "CONHEX" TYPES SHOWN

Type 3000 Cable Plug	Type 3002 Panel Receptacle	Type 3004 Cable Feedthru
Type 3001 Cable Jack	Type 3003 Panel Jack	Type 3005 Right-Angle Plug

In several other popular types.
Also available in 75- and 95-ohm impedance sizes.

* TM reg. pend.

Send for them . .



The big Sealectro "Press-Fit" catalog acknowledged as the "bible" of Teflon terminals — is yours for the asking.

Also a free subscription to the bi-monthly TERMINALOGY, dealing with terminal developments, applications, installations.

CHOOSE IERC—THE ONLY COMPLETE LINE OF HEAT-DISSIPATING ELECTRON TUBE SHIELDS FOR MINIATURE, SUBMINIATURE, OCTAL & POWER SIZE TUBES!

For fast service by a highly trained Engineer-representative to solve your electron tube failure and reliability problems, call the nearest Sales Office in your area as listed below.

1. **JOHN B. ANDERSON CO.**—209 W. 5th Ave., Columbus 1, Ohio—AXminster 9-9523.
   Branch: P.O. Box 4507, Pittsburgh, Pa.—GRant 1-3399.
2. **HATHAWAY ELECTRONICS, INC.**—238 Main St., Cambridge 42, Mass.—Kirkland 7-0380.
   Branch: P.O. Box 797, Canaan, Conn.
3. **WILLIAM JONES**—1107 Echo Court North, Hampton Village, Towson 4, Md.—VAlley 3-2434.
   Branches: 332 S. Forklanding Rd., Maple Shade, N.J.—NOrmandy 3-2450.
   1437 Kenilworth Dr., S.W., Atlanta, Ga.—PLaza 5-5318, 711 Magnolia Ave., Orlando, Fla.—GArden 4-6298, 70 N.W. 36 Court, Miami 35, Fla.—Highland 8-0349.
4. **G. S. MARSHALL COMPANY**—2065 Huntington Dr., San Marino, Calif.—MUrray 1-6781.
   Branches: San Diego, Calif.—CYpress 8-8234, Redwood City, Calif.—EMerson 6-8214. Tucson, Ariz.—MAine 2-4719.
5. **MAGNUSON ASSOCIATES**—3347 W. Irving Park Rd., Chicago 18, Ill.—KEystone 9-7555.
   Branch: St. Paul 16, Minn.—MIdway 6-7943.
6. **FRED A. PEASE CO.**—4921 E. 38th Ave., Denver 7, Colo.—FRemont 7-2336.
7. **REED-TOLLEFSON CORPORATION**—2815 Monroe Ave., Rochester 18, N.Y.—HIllside 5-0450.
   Branch: Alexander, N.Y.—FIllmore 3-5898.
8. **DON SMITH SALES CO.**—2320 No. 45th St., Seattle 3, Wash.—MElrose 3-3160.
9. **B. B. TAYLOR CORPORATION**—2270 Grand Ave., Baldwin, N.Y.—BAldwin 3-8000.
10. **THOMSON ENG. SERVICE**—2520 Oak Lawn, Dallas 19, Tex.—LAkeside 6-8741.
11. **R-O-R ASSOC. LTD., J. S. ROOT**—1470 Don Mills Rd., Don Mills, Ont., Canada—HIckory 4-4429.
    Branch: Montreal, N.D.G., Quebec—HUnter 1-0700.

Neededness!*

More engineers *NEED Proceedings of the IRE* than need any other radio-electronic engineering magazine. 61,880 (ABC June 30, 1959) plus 13,976 students, to be exact. This is not promised—but delivered circulation.

*Engineers *NEED* the unabridged, factual, working information of which *Proceedings of the IRE* supplies over 1,900 pages a year. This is more than a WANT but a vital need, satisfied since 1913 by

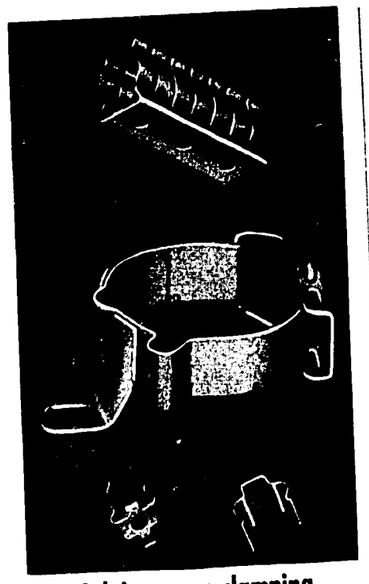
Proceedings of the IRE

THE INSTITUTE OF RADIO ENGINEERS

Adv. Dept. 72 W. 45th St., New York 36, N. Y. • MU 2-6606
Chicago • Minneapolis • Los Angeles • San Francisco

Member of ABC

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. Complete addresses will be found in the Alphabetical Directory, pages 161-264



Solving your clamping problems is our specialty!

AUGAT offers:

- *Elastaclamp* for subminiature tubes
- Crystal socket assemblies
- Subminiature relay assembly
- Transistor and diode clips
- Component clips
- Vacuum tube clamps
- Potentiometer clamp rings

If you have a clamping problem, why not consult us? Our engineering staff specializes in designing and producing clamps to suit your particular requirements. All inquiries and orders receive our immediate attention.

For quick, efficient service, call our representative in your area.

Checklist of New McGRAW-HILL Books

LOGICAL DESIGN OF ELECTRICAL CIRCUITS

Thorough, systematic treatment of Boolean methods for analyzing relay, diode, and vacuum-tube circuits—particularly as used in the design of automation systems, computers, telephone dialing systems, etc. By R. R. Higonnet and R. A. Grea. 194 pp., over 300 illus., $10.00.

DIGITAL COMPUTING SYSTEMS

Fully covers principles, design, operation, and applications of digital computers. Especially written for readers with engineering backgrounds and others familiar with electrical circuits and apparatus. Requires no knowledge of mathematics. By Samuel B. Williams. 231 pp., 168 illus., $7.75.

DIGITAL COMPUTER PRIMER

Written in non-specialist's language, this book clearly explains digital computer fundamentals. Shows how computers work, what they can do, and their important mathematical, engineering, electronic, and accounting aspects. Special care taken in defining computer terminology. By E. M. McCormick. 205 pp., 63 illus., $7.50.

SEMICONDUCTORS AND TRANSISTORS

Describes the physics of semiconductors, discusses their characteristics, and shows the way that transistors and diodes operate—by means of the working of the basic p-n junction. Applications given to a variety of useful circuits. By D. M. Warschauer. 267 pp., 201 illus., $6.50.

SAMPLED-DATA CONTROL SYSTEMS

Develops essential theory in a way which helps you apply it not only to synthesis of control systems, but also to communications, data processing, filtering, and other areas. Makes extensive use of the z-transform. By J. R. Ragazzini and G. W. Franklin. 331 pp., 186 illus., $9.50.

PRINCIPLES OF CIRCUIT SYNTHESIS

Introduces the principles of modern circuit synthesis, together with the key aspects of classical filter theory. Give representative system applications and reviews the salient features of circuit analysis in the time and frequency domains. By E. S. Kuh and D. O. Pederson. 244 pp., 300 illus., $8.50.

VACUUM-TUBE AND SEMICONDUCTOR ELECTRONICS

Ties in the transistor story with vacuum-tube electronics, and provides a clear understanding of each vacuum-tube and semiconductor device as a circuit element. Covers internal physical behavior and external circuit characteristics. By J. Millman. 644 pp., 407 illus., $10.00.

INTRODUCTION TO NONLINEAR ANALYSIS

Gives essential information on many basic techniques for finding solutions for nonlinear differential equations having a single independent variable. Includes material on physical systems of many types and of highly practical interest. By Walter J. Cunningham. 349 pp., 175 charts, diagrams, and tables, $9.50.

TRANSFORM METHOD IN LINEAR SYSTEM ANALYSIS

Shows how to apply the transform method in effectively analyzing and solving problems for a wide range of linear systems. Gives many useful mathematical techniques, tying them together by means of the concept of system function. Explains applications of the Laplace transform, Fourier transform, z-transform, etc. By J. A. Aseltine. 300 pp., 259 illus., $8.50.

ANALOG SIMULATION Solution of Field Problems

Provides a unified treatment of analog simulation, based on the similarity of problems in heat transfer, electrostatics, electromagnetic theory, and other areas. Construction of mathematical models fully described, including formulation of partial differential equations and finite-difference approximation. Many convenient tables of data. By W. J. Karplus. 434 pp., 295 illus., $10.00.

PREDICTION OF BALLISTIC MISSILE TRAJECTORIES FROM RADAR OBSERVATIONS

Develops methods based on the statistical theory of parameter estimation which can be used to describe ballistic missile trajectories. Emphasizes method of maximum likelihood, and also analyzes random errors. By I. I. Shapiro. 200 pp., $7.00.

PROGRAMMING FOR DIGITAL COMPUTERS

A step-by-step approach to the preparation of problems for stored-program calculators. Covers everything from the general organization of a calculator to problem planning and the use of "languages" in instructing the computer. Uses a simple, standardized "building block" technique that can be adapted to any machine or problem. By J. Jeenel. 517 pp., 163 illus., $12.00.

ELECTRONIC DIGITAL COMPUTERS

Shows how basic circuits and devices are assembled and interconnected to form the main units of a computer. Includes practical information on digital-computer arithmetic, general considerations of systems, static and dynamic cells, large-scale memory devices, shifting registers, adders, accumulators, etc. By Charles V. L. Smith. 443 pp., 203 illus., $12.00.

INTRODUCTION TO MONOPULSE

Presents a completely general theory of monopulse direction finding which makes clear the underlying relationships of all its forms. Dual-plane monopulse systems, monopulse antenna principles, class I system characteristics, and other topics are explored. Illustrates concepts by the inclusion of representative systems. By Donald R. Rhodes. 119 pp., 53 illus., $6.00.

SOUNDING ROCKETS

A thorough treatment of high-altitude research rockets—their uses, methods of application to research, problems encountered, and solutions devised. Covers all principal upper air sounding rockets. Includes theory, research results, instrumentation techniques, etc. By H. E. Newell, Jr. 334 pp., 190 charts, tabes, and illus., $12.50.

FEEDBACK CONTROL SYSTEMS

A sound, basic reference providing a synthesis of the most important servo problems. Unites in a single book the over-all theory (linear and nonlinear) and the components of servo systems. Explains how a servo system can be systematically designed. By J. C. Gille, M. J. Pelegrin and P. Decaulne. 793 pp., 930 illus., $16.50.

NUCLEONICS FUNDAMENTALS

Provides a broad view of the field of nuclear physics and engineering—the accomplishments, applications, problems and limitations associated with the use of radioactive substances in science and industry. Includes coverage of nuclear reactors and other nuclear devices. By David B. Hoisington. 410 pp., 159 illus., $9.50.

PRINCIPLES OF ANALOG COMPUTATION

An advanced, practical treatment on how to use the analog computer. Component devices are introduced and the mathematical operation performed by each device is stressed. Tells how to plan and program your problem; simulate linear systems; make use of diodes and function relays in computation circuits; etc. By G. W. Smith and R. C. Wood. 240 pp., 192 illus., $7.50.

Wiley BOOKS

1. HANDBOOK OF AUTOMATION, COMPUTATION, AND CONTROL
Vol. 2: Computers and Data Processing

Edited by **E. M. GRABBE, SIMON RAMO,** and **DEAN E. WOOLDRIDGE,** Thompson Ramo Wooldridge Inc. Full details on design of analog and digital computers and their applications in science, engineering, and business. *Computers and Data Processing* is the latest volume in a full treatment of all aspects of computers and automation, giving practical design data for research, design, and development.

Vol. 2, 1959. Approx. 1096 pages. $17.50. Vol. 1, Control Fundamentals, 1958. 1020 pages. $17.00. Vol. 3, Systems and Components, In Press.

2. SPACE TECHNOLOGY

Edited by **HOWARD S. SEIFERT,** Space Technology Laboratories, Inc. Here all phases receive serious analytical attention. Material is grouped into 5 areas: ballistics, flight dynamics; propulsion; communications, guidance; man in space; scientific uses of space. **1959. Approx. 1172 pages. $22.50**

3. MASERS

By **J. R. SINGER,** Univ. of California. The first on quantum mechanical amplifiers, with applications to radar, other forms. Summarizes years of research and unifies material on induced emission amplifiers. **1959. 148 pages. $6.50**

4. LINEAR NETWORK ANALYSIS

By **SUNDARAM SESHU** and **NORMAN BALABANIAN,** both of Syracuse Univ. A mathematically precise treatment, *unifying* steady state and linear transient analysis, using thoroughly modern methods, philosophy, and point of view. **1959. 571 pages. $11.75**

5. ANALYTICAL TRANSIENTS

By **T. C. G. WAGNER,** Univ. of Maryland. Intensive coverage of the mathematics of transient analysis, broadening the Laplace transform into a more general discussion, based upon the Fourier transform. Gives both limitations and applications. **1959. 202 pages. $8.75**

6. SERVOMECHANISMS AND REGULATING SYSTEM DESIGN, VOL. I

Second Edition, by **HAROLD CHESTNUT** and **ROBERT W. MAYER,** both of General Electric Co. Thoroughly revised. Starts with basic mathematics, describes nature of the physical problems involved, then proceeds to solutions of advanced designs. **1959. 680 pages. $11.75**

7. ELECTRONIC CIRCUIT THEORY

Devices, Models, and Circuits, by **HENRY J. ZIMMERMAN** and **SAMUEL J. MASON,** both of M.I.T. Primarily methods of analysis, stressing the model concept. Uses a generalized theory approach, rather than treating separate theories to meet specific conditions. **1959. 564 pages. $10.75**

8. CIRCUIT THEORY OF LINEAR NOISY NETWORKS

By **HERMANN A. HAUS** and **RICHARD B. ADLER,** both of M.I.T. Explores a rational approach to the characterization of amplifier spot-noise performance. Coverage is unified around a single hypothesis. A Technology Press Research Monograph, M.I.T. **1959. 79 pages. $4.50**

9. SAMPLING INSPECTION TABLES

Single and Double Sampling, Second Edition, by **HAROLD F. DODGE,** Rutgers Univ. and **HARRY G. ROMIG,** Hoffman Electronics Co. Vastly revised and improved, includes probability of acceptance curves; destructive inspection; forms for statistical analyses and control. **1959. 224 pages. $8.00**

10. SOME LIMITATIONS OF LINEAR AMPLIFIERS

By **RICHARD D. THORNTON,** M.I.T. Formulates certain limitations in terms of the power that can be dissipated by an available linear amplifying device. A Technology Press Research Monograph, M.I.T. **1959. In Press.**

11. BASIC DATA IN PLASMA PHYSICS

By **SANBORN C. BROWN,** M.I.T. A treatment based on fundamental processes necessary to understand any work in gas discharge. Data and background information are given in the form of graphs and tables. A Technology Press Book, M.I.T. **1959. Approx. 350 pages. Prob. $6.50**

12. SCIENTIFIC RUSSIAN

A Concise Description of Scientific and Technical Russian, by **GEORGE E. CONDOYANNIS,** St. Peter's College. **1959. 228 pages. $3.50**

JOHN WILEY & SONS, Inc. 440-4th AVENUE, NEW YORK 16, N.Y.

From servo-mechanisms to electronic computers, "RADIO" is a way of THINKING!

Far-reaching progress in the radio-electronic field is no "happy accident." Television, electronic computers and the "radiation" power of the atom, rapidly being harnessed to industry, were not discovered . . . they were engineered.

From "fission" to "computation," these engineering achievements are accomplished through an enormous process of information exchange—the methodical and brilliant teaming together of engineering *thinking* to solve a problem. In radio this work has been done deliberately by a growing engineering society, through its meetings and published proceedings, which unleash the creative minds of men.

In 1958, "Proceedings of the IRE" published nearly 2000 text pages, exclusive of product news and departmental features. This is the word-count equivalent of eight 500-page textbooks on radio-electronics for engineers. It exceeds the contents of the next two contemporary publications put together. This "high" in genuine reader service was logically matched by advertising worth over a half-million dollars, by firms investing in the engineers' reading interest and benefiting by it.

Engineers are educated to specify and buy!

THE JUNCTION TRANSISTOR AND ITS APPLICATIONS
Edited by E. Wolfendale
394 pages $7.50

"Mathematical analyses, charts, schematics and design examples tell the complete story . . . an excellent guide and reference for engineers, physicists and students."
—Radio-Electronics

ELECTRON PHYSICS AND TECHNOLOGY
By J. Thomson and E. B. Callick
527 pages $10.00

". . . combining basic principles on which modern electron physics is founded with description of the way in which various devices function, and how they are made."
—Science News Letter

FEEDBACK THEORY AND ITS APPLICATIONS
By P. H. Hammond
348 pages $7.00

". . . a concise, clearly written, well-balanced text which covers the basic theory of linear and nonlinear feedback systems . . ." —Proceedings of the I.R.E.

TRANSISTOR INDEX

- Eleven parameters for sorting
- Simple, instantaneous transistor comparison
- Avoids frustrating data sheet searches
- Compact central file of all transistor data
- Transistor selection in less than three minutes
- Quarterly up-dating
- Pays for itself immediately

The TRANSISTOR INDEX, by utilizing keysort card sorting techniques, can in seconds sort out all transistors of a given characteristic.

The characteristics of each transistor together with other pertinent manufacturing data, are printed on individual cards, indexed and cross-referenced by means of holes and slots at the edge of the card.

By merely inserting the sorting needle into the hole corresponding to the desired characteristic and lifting the needle, a selection of ALL transistors bearing those characteristics is made.

THE ZECO INDEX contains transistor data from more than 20 manufacturers.

The TRANSISTOR INDEX is updated quarterly by a subscription service which provides additional cards for new transistors and the serial numbers of obsolete transistors, which can be removed from the deck. Purchase of the INDEX also includes a keysort needle and storage box. Quarterly subscription service is renewed annually.

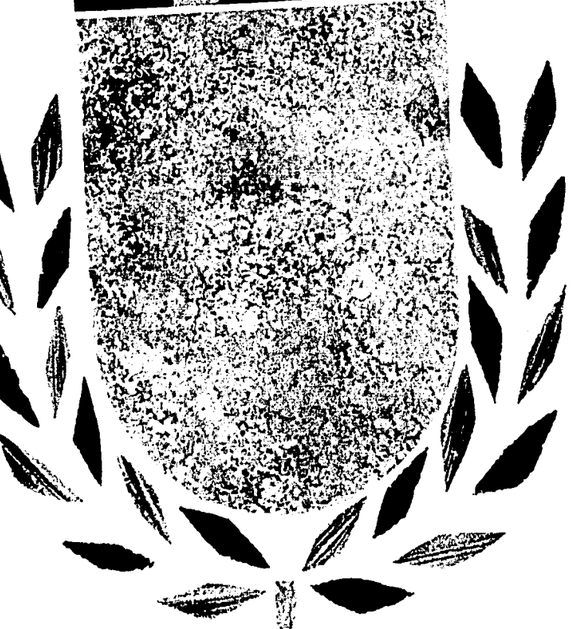
Meet an IRE award winner for 1959:

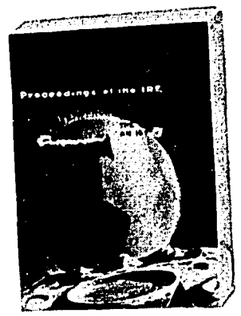
IRE REMEMBERS THE MAN

for his dedication to education

Behind every accomplishment, there is a man. In the field of education – so important in today's scientific race – E. Leon Chaffee is such a man. This year, IRE's highest technical award, **The Medal of Honor,** goes to Dr. Chaffee "for his outstanding research contributions and his dedication to training for leadership in radio engineering." Congratulations to Dr. Chaffee – Rumford Professor of Physics, Emeritus and Gordon McKay Professor of Applied Physics, Emeritus, Harvard University.



And behind the cold statistics of the 67,369 (ABC 12/31/58) circulation Proceedings now enjoys, are 54,557 **professionally qualified men,** plus 12,812 student members in 156 Engineering Colleges, now awaiting your message in their own journal. If you buy space in the radio-electronics field, you should meet them.



For a share in the present, and a stake in the future, make your product NEWS in

Directory III. Materials & Services

102. Distribution

5. Export & Import
10. Jobbers & wholesalers
15. Manufacturers representatives
20. Sales and service
25. Surplus dealers

The final section of the IRE DIRECTORY is the complement to manufacturing, which is distribution. It has proved to be a real service to IRE member engineers and executives to put into this book a list of annually checked jobbers, wholesalers, manufacturers representatives, and distributors. Many of these firms are identified further by the initials ERA, as members of the Electronic Representatives Association, NEDA as members of the National Electronic Distributors Association. Permission from these organizations to use their membership lists in order to make this section of the IRE DIRECTORY as complete as possible is gratefully acknowledged. For convenience in location and distributional firms, the listings are arranged geographically under individual state names, the listings within each state being grouped by city names in alphabetical order, so that all firms located in any one city may be grouped together for quicker reference. Listings for foreign firms follow the listings for the United States.

ALABAMA

Radio Dist. & Supply Co., 125-27 W. 10th St,. Anniston, Ala., 10 (NEDA)

Representing in the Six New England States:

Triad Transformer Corporation
Catalog and custom-engineered Transformers and Reactors, MIL and commercial specs. Geophysical Transformers. Transistor Transformers. Toroidal Inductors. Wave Filters. Pulse Transformers.

Zero Manufacturing Company
Military Transit Cases, Catalog and custom Precision Deep-Drawn Instrument Cases, containers, and cans of *aluminum* or *magnesium*.

Midland Manufacturing Company, Inc.
Manufacturers of Quartz Crystals for Electronic Frequency Control, Crystal Filters.

Stepper Motors Corporation
Stepping Motors, Automatic Pulse Timers, Synchro-Positioners.

Birtcher Corporation (Industrial Division)
Tube and Component Retention and Cooling Devices, Transistor or Diode Heat Radiators.

Berthold Sales Co., 4411 Maple Ave., Dallas 19, Tex., 15 (ERA)

Branum Co., P.O. Box 14348, Dallas 34, Tex., 15 (ERA)

Campion Sales Co., 9002 Chancellor Row, Dallas 35, Tex., 15 (ERA)

Central Electronics, 4117 Maple Ave., Dallas, Tex., 10 (NEDA)

Crabtrees Wholesale Elec., 2608 Ross Ave., Dallas, Tex., 10 (NEDA)

Corry Co., Hal F., 6314 Hillcrest Ave., Dallas 5, Tex., 15 (ERA)

Crockett-Lund & Co., 2204 Griffin St., Dallas 2, Tex., 15 (ERA)

Danby Co., Robert W., 2517 Cedar Springs Rd., Dallas, Tex., 15 (ERA)

Delzell-Maynard Sales Co., 2013 Cedar Springs, Dallas 1, Tex., 15 (ERA)

Equipment & Service Co., 7118 Envoy Ct., Dallas, Tex., 15, 20

Gross & Co., Fred, 14025 Denton Dr., Dallas, Tex., 15 (ERA)

Guenther, John B., P.O. Box 1926, Dallas 21, Tex., 15 (ERA)

Hart Co., Sam, 1210 Old Gate Lane, Dallas 18, Tex., 15 (ERA)

Hays Co., W. R., 3416 Rosedale St., Dallas, Tex., 15 (ERA)

Kantenberger Co., 711 Reverchon Dr., Dallas, Tex., 15

Lawrence Sales Co., P.O. Box 13026, Dallas, Tex., 15

Lieberman & Assoc., Hank, 6005 Northwood Rd., Dallas, Tex., 15 (ERA)

Lucas Sales Co., Chas., 2004 S. Beckley, Dallas 16, Tex., 15 (ERA)

McKinney Sales Co., J. F., 1330 N. Industrial Blvd., Dallas, Tex., 15 (ERA)

Nesbitt Co., Robert E., 1925 Cedar Springs, Dallas 1, Tex., 15 (ERA)

Packard Assoc., 404 Love Field Air Term., Dallas 35, Tex., 15 (ERA)

Schoonmaker Co., J. Y., 5328 Redfield Ave., Dallas 35, Tex., 15 (ERA)

Sinks Co., R. M., P.O. Box 11726, Dallas 18, Tex., 15 (ERA)

Smith Co., J. Earl, P.O. Box 35331, Dallas 35, Tex., 15 (ERA)

Southern Rad. Supply, Inc., 3137 Ross Ave., Dallas, Tex., 10 (NEDA)

Southwest Elect. Indust., 4515 Prentice, Dallas, Tex., 15 (ERA)

Texport Co., 2147 Farrington, Dallas 7, Tex., 15 (ERA)

Thomson Engrg. Service, 2712 W. Mockingbird Lane, Dallas, Tex., 15

Wholesale Elect. Supply, 2800 Ross Ave., Dallas, Tex., 10 (NEDA)

Wilkinson Brothers Co., P.O. Box 1169, Dallas, Tex., 10 (NEDA)

Wyborny & Yount Co., 408 Merchandise Mart, Dallas 1, Tex., 15 (ERA)

The IRE DIRECTORY is four directories in one

Alphabetical

Components

Complete Equipment

Materials and Services

Information at high speed! "Data the way an engineer thinks" is the key to IRE DIRECTORY classifications. All products are divided into three fundamental groups. The grouping plan makes this the fastest working directory you ever used! No components are mixed with test equipment—you turn right to a section where each item belongs.

Yet good engineering detail is maintained. 102 basic classes of products under these three sectional product directories keep listings from becoming cumbersome, but clearly define products. Overlapping listings are skillfully eliminated. Simplicity makes this book easy to work with—insures faster finding of facts when forgotten. Thus the faults of terminology listings are avoided.

Completeness is insured! Most firms make many products in a single classification. Wasteful, eye-confusing relisting of the same firms over and over is quite sensibly solved by using a system of codes under the 102 basic headings which actually provide 857 separate classifications. A more complete picture of what each firm's full line is results, but you travel through fewer listings. The "Copp Principle" of directory indexing makes these lists wide, well marked highways to information—fast.

Machol Edge Index is just one more modern service to help the user find information fast.

Ads positioned with reason! In a DIRECTORY where ads play an important part in supplying information the user wants and needs, it makes good sense to cross-reference every advertiser in each listing so that the user can quickly find more detail. Ads are also placed facing company alphabetical listings, or in the product section in which they properly belong. No effort is spared to "organize" ad information.

THE DIRECTORY

Advertising Dept., 72 W. 45th St., New York 36, N.Y.
Murray Hill 2-6606

102. Distribution.

Denison Radio Supply, 310 W. Woodard, Denison, Tex., 10 (NEDA)
McNicol, C. C., 811 N. Estrella St., El Paso, Tex., 10 (NEDA)
R & R Supply Co., Inc., 2531 E. Yandell, El Paso, Tex., 10 (NEDA)
Engineering Assoc., Inc., 2912 Stanley, Ft. Worth, Tex., 15 (ERA)
Scooters Rad. Supply Co., S. Freeway & Vickery, Ft. Worth, Tex., 10 (NEDA)
Spears Co., Mitchell, 3801 Westcliff Rd., S., Ft. Worth, Tex., 15, 20
Swieco, Inc., 1518 E. Lancaster, Ft. Worth, Tex., 10 (NEDA)
Angie Radio & TV Supply, 2005 Crawford St., Houston, Tex., 10 (NEDA)
Beyer & Co., A. R., 1318 Polk Ave., Houston, Tex., 10 (NEDA)
Hall, Inc., R. C. & L. F., 1901 Chenevert, Houston, Tex, 10 (NEDA)
Klicpera Co., M. F., P.O. Box 3113, Houston, Tex., 15 (ERA)
Sterling Radio Prods., Inc., P.O. Box 1746, Houston, Tex., 10 (NEDA)
Wofford Electronics Parts, 3808 Crawford St., Houston, Tex., 10 (NEDA)
B & L Radio-TV Supply, Inc., 2424 Texas Ave., Lubbock, Tex., 10 (NEDA)
R & R Supply Co., Inc., P.O. Box 1360, Lubbock, Tex., 10 (NEDA)
Rio Radio Supply Co., 608-10 S. Broadway, McAllen, Tex., 10 (NEDA)
Greater Texas Elect., Inc., 30 Industrial Loop, Midland, Tex., 10 (NEDA)
Diehl Radio & TV Supply, 2120 Seventh St., Port Arthur, Tex., 10 (NEDA)
Modern Electronic Co., 2000 Broadway, San Antonio, Tex., 10 (NEDA)
Radio & TV Parts Co., 1828 N. St. Marys St., San Antonio, Tex., 10 (NEDA)
Sherman Electronics Supply, 720 San Pedro, San Antonio, Tex., 10 (NEDA)
South Texas Rad. Sup. Co., 647 S. Presa St., San Antonio, Tex., 10 (NEDA)
McCulloch Wholesale TV, 811 W. 13th St., Texarkana, Tex., 10 (NEDA)
Best Electronics, 324 N. 18th St., Waco, Tex., 10 (NEDA)
Hargis Co., Inc., 1205 Washington Ave., Waco, Tex., 10 (NEDA)

UTAH

Ballard Supply Co., 3109 Washington Blvd., Ogden, Utah, 10 (NEDA)
Tri-State Electronic Supply, 2217 Liesel Ave., Ogden, Utah, 10 (NEDA)
Gates Co., F. Y., 200 S. Main St., Salt Lake City, Utah, 15
O'Loughlins Radio Supply, 113 E. 3rd South St., Salt Lake City, Utah, 10 (NEDA)
Stevenson Co., Ralph, 2045 Walker Lane, Salt Lake City, Utah, 15

VERMONT

North Radio, 211 North St., Bennington, Vt., 10 (NEDA)

VIRGINIA

Industry Services, Inc., 122-126 S. Wayne St., Arlington, Va., 10 (NEDA)
Jay Company, 2420 Wilson Blvd., Arlington, Va., 15
Rucker Elect. Prods., Co., 1213 Wilson Blvd., Arlington, Va., 10 (NEDA)

Directory III. Materials & Services

Virginia Radio Supply Co., 715 Henry Ave., Charlottesville, Va., 10
Womack Electronics Corp., P.O. Box 521, Danville, Va., 10 (NEDA)
Lee Assoc., Inc., 1107C W. Broad St., Falls Church, Va., 15
Cain Electronics Co., 14th & Monticello Ave., Norfolk, Va., 10 (NEDA)
Priest Electronics, Inc., 6431 Tidewater Dr., Norfolk, Va., 10 (NEDA)
Radio Parts Dist. Co., 128 W. Olney Rd., Norfolk, Va., 10 (NEDA)
Radio Supply Co., 711 Granby St., Norfolk, Va., 10 (NEDA)
Banner Electronics, Inc., 2224 Chamberlayne Ave., Richmond, Va., 10 (NEDA)

Pointon Co., Charles G., 6 Alcina Ave., Toronto 23, Canada, 15
McLennan, Ltd., D. Eldon, 1624 W. 3 Ave., Vancouver 9, Canada, 15
S & T Sales, Ltd., 120 E. Cordova St., Vancouver, Canada, 5, 10, 20

JAPAN

Technical Factors, Ltd., 1, Nishi-Nanachome, Ginza, Tokyo, Japan, 15

MEXICO

Brena & Cia, Jones, Apartado 2250, Mexico, D.F. Mex., 15 (ERA)
Oskam Representaciones, William L., Charles Ave., Mexico L.D.F. Mex., 15 (ERA)

"Distribution" listings are arranged alphabetically by states and by cities within each state. For names and addresses of manufacturing firms, see Alphabetical Directory, pages 161-264.

28 Fields of Special Interest-

The 28 Professional Groups are listed below, together with a brief definiton of each, the name of the group chairman, and publications to date.

* Indicates publications still available

Aeronautical and Navigational Electronics

Annual fee: $2.

The application of electronics to operation and traffic control of aircraft and to navigation of all craft.

Mr. Lewis M. Sherer, Chairman, RTCA, Washington, D.C.

31 Transactions, *5, *6, *8, & *9, and *Vol. ANE-1, Nos. 2 and 3; Vol. 2, No. 1-3; Vol. 3, No. 2; Vol. 4, No. 1, 2, 3; Vol. 5, No. 2, 3, 4; Vol. 6, No. 1, 2.

Antennas and Propagation

Annual fee: $4.

Technical advances in antennas and wave propagation theory and the utilization of techniques or products of this field.

Mr. Arthur Dorne, Chairman, Dorne & Margolin, Westbury, L.I., N.Y.

26 Transactions, *Vol. AP-2, No. 1-3; AP-4, No. 4; AP-5, No. 1-4; AP-6, No. 1, 2, 3, 4; AP-7, No. 1, 2, 3.

Audio

Annual fee: $2.

Technology of communication at audio frequencies and of the audio portion of radio frequency systems, including acoustic terminations, recording and reproduction.

Dr. A. B. Bereskin, Chairman, EE Dept., Univ. of Cincinnati, Cincinnati 21, Ohio

48 Transactions, *Vol. AU-1, No. 6; *Vol. AU-2, No. 1, 4-6; Vol. AU-3, No. 1, 3, 5; Vol. AU-4, No. 1, 5-6; Vol. AU-5, No. 1, 2, 3, 4, 5, 6; AU-6, No. 1, 2, 3, 4, 5, 6; AU-7, No. 1, 2, 3, 4.

Automatic Control

Annual fee: $2.

The theory and application of automatic control techniques including feedback control systems.

Mr. John E. Ward, Chairman, Servomechanisms Lab., MIT, Cambridge 39, Mass.

7 Transactions, PGAC-3-4-5-6, AC-4, No. 1.

Broadcast & Television Receivers

Annual fee: $2.

The design and manufacture of broadcast and television receivers and components and activities related thereto.

Mr. Gilbert C. Larson, Chairman, Raytheon Mfg. Co., River Road, Waltham, Mass.

23 Transactions, *7, 8; BTR-1, No. 1-4; BTR-2, No. 1-2-3; BTR-3, No. 1-2; BTR-4, No. 2, 3-4; BTR-5, No. 1, 2.

Broadcasting

Annual fee: $2.

Broadcast transmission systems engineering, including the design and utilization of broadcast equipment.

Mr. George E. Hagerty, chairman, Westinghouse, 122 E. 42nd St., New York 17, N.Y.

13 Transactions, No. 2, 4, 6, 7, 8, 9, 10, 11, 12, 13.

Circuit Theory

Annual fee: $3.

Design and theory of operation of circuits for use in radio and electronic equipment.

Mr. Sidney Darlington, Chairman, Bell Tel. Labs., Murray Hill, N.J.

24 Transactions, CT-2, No. 4; CT-3, No. 2; CT-4, No. 2-4; CT-5, No. 1, 2, 3, 4, CT-6, No. 1, 2.

Communications Systems

Annual fee: $2.

Radio and wire telephone, telegraph and facsimile in marine, aeronautical, radio-relay, coaxial cable and fixed station services.

Mr. J. E. Schlaijker, Chairman, IT&T, 67 Broad St., New York 4, N.Y.

14 Transactions, CS-2, No. 1; CS-5, No. 2, 3; CS-6, No. 1, 2; CS-7, No. 1, 2.

Component Parts

Annual fee: $3.

The characteristics, limitation, applications, development, performance and reliability of component parts.

Mr. J. J. Drvostep, Chairman, Sperry Gyroscope Co., Great Neck, N.Y.

16 Transactions, Vol. CP-3, No. 2; CP-4, No. 1, 2, 3-4; CP-5, No. 1, 2, 3, 4; CP-6, No. 1, 2.

Education

Annual fee: $3.

To foster improved relations between the electronic and affiliated industries and schools, colleges, and universities.

Dr. R. L. McFarlan, Chairman, 20 Circuit Rd., Chestnut Hill 67, Mass.

7 Transactions, Vol. E-1, No. 3, 4; E-2, No. 1, 2, 3.

Electron Devices

Annual fee: $3.

Electron devices, including particularly electron tubes and solid state devices.

Dr. W. M. Webster, Chairman, RCA Labs., Princeton, N.J.

25 Transactions, *Vol. ED-1, No. 3-4; ED-3, No. 2-3-4; ED-4, No. 2-3, 4; ED-5, No. 1, 2, 3, 4; ED-6, No. 1, 2.

Electronic Computers

Annual fee: $2.

Design and operation of electronic computers.

Mr. Richard O. Endres, Rese Engineering Co., 731 Arch St., Philadelphia, Pa.

30 Transactions, EC-4, No. 4; EC-6, No. 2, 3; EC-7, No. 1, 2, 3, 4; EC-8, No. 1, 2.

Engineering Management

Annual fee: $3.

Engineering management and administration as applied to technical, industrial and educational activities in the field of electronics.

Dr. Henry M. O'Bryan, Sylvania Elec. Products, 730 3rd Ave., New York 17, N.Y.

15 Transactions, EM-3, No. 2, 3; EM-4, No. 1, 3, 4; EM-5, No. 1-4; EM-6, No. 1, 2.

Engineering Writing and Speech

Annual fee: $2.

The promotion, study, development, and improvement of the techniques of preparation, organization, processing, editing, and delivery of any form of information in the electronic-engineering and related fields by and to individuals and groups by means of direct or derived methods of communication.

Mr. T. T. Patterson, Jr., Chairman, RCA Bldg. 13-2, Camden, N.J.

4 Transactions, Vol. EWS-1, No. 2; EWS-2, No. 1, 2.

Human Factors in Electronics

Annual fee: $2.

Development and application of human factors and knowledge germane to the design of electronic equipment.

Mr. Curtis M. Jansky, Chairman, Royal McBee Corp., Port Chester, N.Y.

-IRE's 28 Professional Groups

Industrial Electronics

Annual fee: $3.

Electronics pertaining to control, treatment and measurement, specifically, in industrial processes.

Mr. J. E. Eiselein, Chairman, RCA Victor Dev., Camden, N.J.

10 Transactions, *PGIE-1-3-5-6-7-8, 9, 10.

Information Theory

Annual fee: $3.

Information theory and its application in radio circuitry and systems.

Dr. Peter Elias, Chairman, MIT, Cambridge 39, Mass.

17 Transactions, PGIT-4, IT-1, No. 2-3; IT-2, No. 2, 3; IT-3, No. 1, 2, 3, 4; IT-4, No. 1, 2, 3, 4; IT-5, No. 1, 2.

Instrumentation

Annual fee: $2.

Measurements and instrumentation utilizing electronic techniques.

Mr. L. C. Smith, Chairman, Image Electronics Inc., 2300 Washington St., Newton Lower Falls 62, Mass.

14 Transactions, 4; Vol. 1-6, No. 2, 3, 4; Vol. 1-7, No. 1, 2, 3, 4; Vol. 1-8, No. 1.

Medical Electronics

Annual fee: $3.

The use of electronic theory and techniques in problems of medicine and biology.

Mr. W. E. Tolles, Chairman, Airborne Instruments Lab., Mineola, N.Y.

14 Transactions, 8, 9, 11, 12, ME-6, No. 1, 2.

Microwave Theory and Techniques

Annual fee: $3.

Microwave theory, microwave circuitry and techniques, microwave measurements and the generation and amplification of microwaves.

Dr. A. A. Oliner, Microwave Research Institute, 55 Johnson St., Brooklyn 1, N.Y.

26 Transactions, MTT-4, No. 3-4; MTT-5, No. 2, 3, 4; MTT-6, No. 1, 2, 3, 4; MTT-7, No. 2, 3.

Military Electronics

Annual fee: $2.

The electronics sciences, systems, activities and services germane to the requirements of the military. Aids other Professional Groups in liaison with the military.

Mr. Henry Randall, Chairman, Office of Asst. Secy. Defense, Pentagon, Washington, D.C.

6 Transactions, MIL-1, No. 1; MIL-2, No. 1; MIL-3, No. 2, 3.

Nuclear Science

Annual fee: $3.

Application of electronic techniques and devices to the nuclear field.

Dr. A. B. Van Rennes, Chairman, Bendix Aviation Corp., Detroit 35, Mich.

13 Transactions, NS-1, No. 1; NS-3, No. 2, 3; NS-4, No. 2; NS-5, No. 1, 2, 3, NS-6, No. 1, 2.

Production Techniques

Annual fee: $2.

New advances and materials applications for the improvement of production techniques, including automation techniques.

Mr. L. M. Ewing, Chairman, General Electric Co., Syracuse, N.Y.

6 Transactions, No. 2-3, 4, 5, 6.

Radio Frequency Techniques

Annual fee: $2.

Origin, effect, control and measurement of radio frequency interference.

Mr. J. P. McNaul, Chairman, Signal Corps, USA's RDL, Ft. Monmouth, N.J.

1 Transaction, RF-1, No. 1.

Reliability and Quality Control

Annual fee: $3.

Techniques of determining and controlling the quality of electronic parts and equipment during their manufacture.

Mr. P. K. McElroy, Chairman General Radio Co., West Concord, Mass.

16 Transactions, *3, 4-5-6, 10, 11, 12, 13, 14, 15, 16.

Space Electronics and Telemetry

Annual fee: $2.

The control of devices and the measurement and recording of data from a remote point by radio.

Mr. C. H. Hoeppner, Chairman, Radiation, Inc., Melbourne, Fla.

12 Transactions, TRC-1, No. 2-3; TRC-2, No. 1; TRC-3, No. 2, 3; TRC-4, No. 1; SET-5, No. 1, 2.

Ultrasonics Engineering

Annual fee: $2.

Ultrasonic measurements and communications, including underwater sound, ultrasonic delay lines, and various chemical and industrial ultrasonic devices.

Dr. Wilfred Roth, Chairman, Roth Lab., Hartford, Conn.

7 Transactions, PGUE-1, 3, 5, 6, 7.

Vehicular Communications

Annual fee: $2.

Communications problems in the field of land and mobile radio services, such as public safety, public utilities, railroads, commercial and transportation, etc.

Mr. A. A. MacDonald, Chairman, Motorola, Inc., 4545 W. Augusta Blvd., Chicago 51, Ill.

12 Transactions, 5, 8, 9, 10, 11, 12.

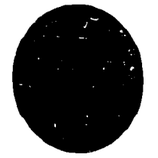
TANTALUM
Solid electrolyte, foil, wire and slug types.

MYLAR
Unsealed, molded Steatite-cased, or film-encased units.

HIGH RELIABILITY
Computer quality, plug-in twist-prong base electrolytics. Meet MIL-C-11272A and MIL-C-26244 (USAF).

IMPREGNANTS
A guide to the selection of capacitors for specific applications.

TRANSISTOR CIRCUIT
Tubular electrolytics in ultra-small paper, metal and phenolic cases.



OIL
High voltage, transmitting, power-factor correction and pulse networks.

ELECTROLYTICS
Computer quality, micro-miniature units; plug-in, snap-in, for transistorized and printed circuits.

METALIZED PAPER
"High Temperature" units, in metal paper and "bathtub" type cases.

MOTOR START-RUN
Design Data. Aluminum can and bakelite case units.

FILTERS
R. F. attenuation feed-thru, and pi, in a variety of ratings and mountings.

MICA
Encapsulated, high-voltage high temperature, transmitting and receiving types.

MICA PAPER DIELECTRIC
Steatite-cased miniature and sub-miniature.

C-D HAS THE SOLUTION WHEN IT COMES TO CAPACITORS

Any one of the above CORNELL-DUBILIER ENGINEERING BULLETINS can lead to the quick, dependable selection of just the right CAPACITOR for the application at hand. Concise, detailed data to save you hours of fruitless search. Just check off – on the coupon below – the class of capacitor on which you need information. There's no charge, of course – and our engineering staff is always at your service for consultation.

The Most Significant Advance in Bridge Design in many years

Completely Transistorized
UNIVERSAL IMPEDANCE BRIDGE

With Orthonull* to speed balance — eliminates sliding null.

Wide Ranges — **R** 0.001Ω to 10MΩ, **L** 1 μh to 1000 h, **C** 1 μμf to 1000 μf, **D** 0.001 to 50 at 1 kc **Q** 0.02 to 1000 at 1 kc

Basic 1% Accuracy for R, L, C — 5% for D and Q Not reduced at range extremes

Ready to Use — battery operated with built-in null detector and 1-kc generator (20-c to 20-kc frequency range with external generator)

Unique Carrying Case allows panel to be tilted to any convenient angle . . . closes for complete protection.

Price: $440.
