NOTES

How to Use Our Business and Product Sections

The Business and Product Sections of this Directory are included for the service of members so that this book will be complete as an index of an industry—listing Engineers, the Businesses they have founded, and the Products they have created for radio, television, communications, and electronics.

The following 4 Parts of the IRE DIRECTORY are:

Part		Page
2	Company List of Radio-Electronic Manufacturers	3
3	Product Index of Engineering Equipment and Parts	49 & 108
4	The Radio-Electronic Distribution Field (Class 22)	93
5	Catalogs and Complete-Data-Spreads Section	224

—Advertisers Index—Cover III, 49 & 219—

Part 2

2932 firms have supplied us voluntarily with information about the components, equipment and services which they render the radio-electronic industry. The 1899 manufacturers are listed alphabetically in this section beginning on page 1 and ending on page 48. 1033 non-manufacturers such as distributors and representatives are listed under heading 22 in the product index section. This index therefore gives the names of manufacturers of specific products available for purchase, with their addresses and code numbers indicating 73 types of products which they offer.

The completeness of this list depended on information voluntarily supplied us. Our most vigorous efforts may not have made it complete, but the excellent cooperation received from most of the industry is directly responsible for the up-to-dateness of our product data. We will welcome additions and suggestions for the 1952 edition.

Part 3

The Product indexes start on page 53 and continue through 218. In both the alphabetical and the product indexes advertisers who have made it financially possible to provide a really comprehensive Directory to IRE members, have been listed in bold face type with a cross index to the page on which their display advertisement appears—giving complete information on their products and services. Non-advertisers have been listed in the product indexes giving firm name and state only. For full address the reader must turn to the alphabetical index for these companies.

To find the advertisers of a given product, let us say "Amplifiers" look this product up in the table facing page 48. You will see that it is classification Number 1. A full listing of Amplifier manufacturers starts on page 53. Turn to this classification in part 3.

Part 4

As a service to engineers, both buyer and seller, we have included a list of 1033 firms and individuals who are distributors. Each name is further classified by number to indicate its place in the field—representative, distributor, exporter, etc. This is class #22, starting on page 93.

There are several other helpful indexes. Advertisers are given on Cover III (inside back cover) and page 49; and an index to 1951 Radio Engineering Show Exhibitors, and Proceedings of the IRE Advertisers is on page 219.

To get a comprehensive picture of what a given firm manufactures for engineers in our field, you will find in the alphabetical index of companies that all their products are listed by code number after the firm's name and address. An innovation this year is the inclusion of numbers for sub-classifications in the Product Indexes for all firms listed. We have tried vigorously to make this truly a useful "Radio Engineers Directory."

Part 5

Part 5 is one of the most informative and valuable sections of this Directory. Here manufacturers are supplying engineers with the maximum amount of detailed information possible through the use of double page spreads of their products (see pages 224-243). This is followed by a complete catalog file supplied by 14 manufacturers. These catalogs are filed in alphabetical order. The purpose of this section is to give the engineer a complete and ever available catalog file right in his IRE Directory where he can always see it easily and quickly. We believe that the services of this section will be of the utmost help to you.

Please submit all changes, corrections, additions and classification questions to Industry Research Div., c/o Proceedings of the IRE, 303 West 42nd St., New York 18, N.Y.

How to Use the Machol Edge Index

High speed reference is a major objective of the IRE Directory. To this end we have adopted the Machol Edge Index system, and these indexes:

Advertisers Index, pages 49, 219 and inside back cover.

Key to Products (full) 50 & 51.

Index to Spreads & Catalogs, 224.

Guide to Machol Thumb Indexes facing 48 & 49

The Machol system will help you find both alphabetical and product sections swiftly.

INSTRUCTIONS

1. **Place the four fingers of your RIGHT hand back of the last page of this book.**
2. **Place your RIGHT thumb just below the 1 or 2 line symbol adjacent to the section you want.**
3. **Raise your RIGHT hand slightly and push it to the left bending the pages almost double. *This will spread the edges and cause the edge marks to show more clearly.***
4. **Move your RIGHT thumb across the page edges, fanning the pages until you reach the corresponding symbol.**
5. **Open there—that will be the page you want.**

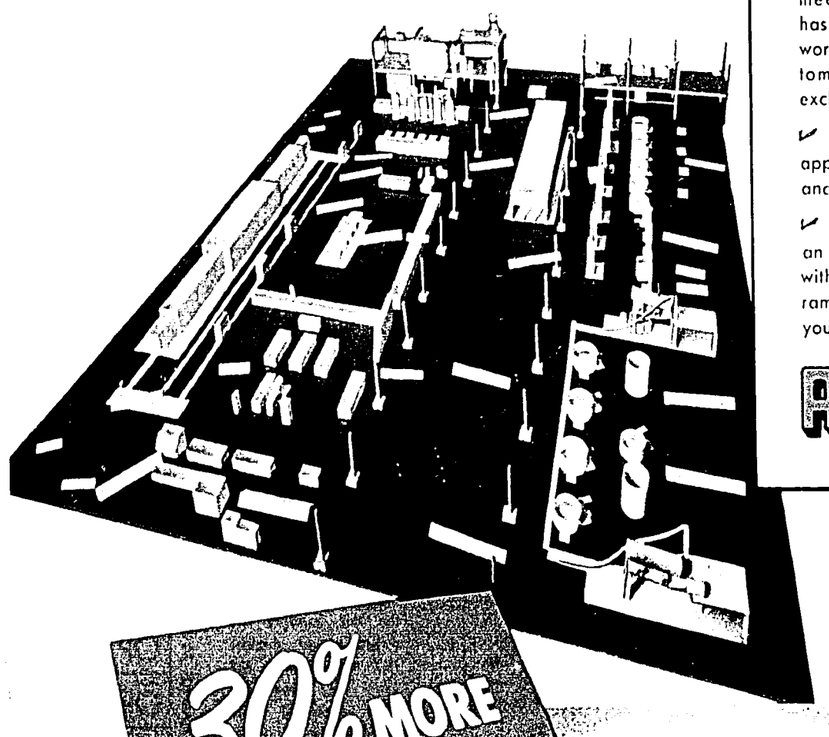
PATENT APPLIED FOR MACHOL EDGE INDEX LICENSE NO. 25

It's a fact that



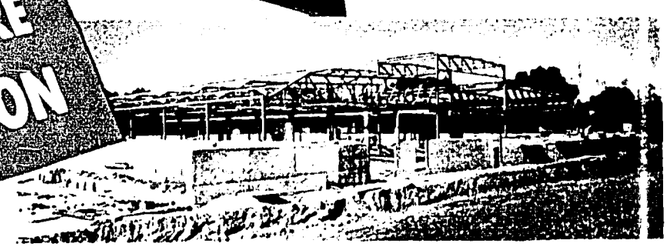
- 30% more production will soon be available from American Lava Corporation as new units rapidly near completion.
- Continuous expansion to meet customers' requirements has made American Lava the world's largest producer of custom made technical ceramics exclusively.
- Average daily production approximates four million parts and is rapidly increasing.
- This expansion program is an all out effort to supply you with custom made technical ceramics in the quality and quantity you need—when you need them.

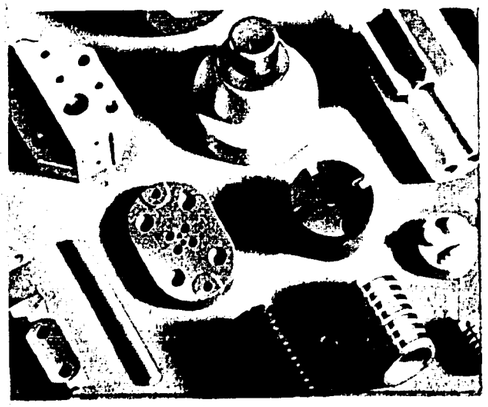
ALSIMAG

"TRADE MARK REG. U.S. PAT. OFF."

This building, photographed in May 1951, will be completed about the time this picture is published. Other units will speedily follow.

30% MORE PRODUCTION





- What is your MOST RELIABLE source for custom made technical ceramics? American Lava Corporation has an enviable reputation for delivery according to specifications—and for ability to produce ceramics of a type and quality which are frequently considered "impossible."
- New production facilities are speeding deliveries. The experience gained in half a century of specialization is available to you on request. You are most apt to find at American Lava Corporation the solution to any problem involving technical ceramics.
- Equipment shown in this mock up is under construction. Carefully selected personnel has been added to the present skilled staff to provide experienced operators for all plants.

AMPHENOL

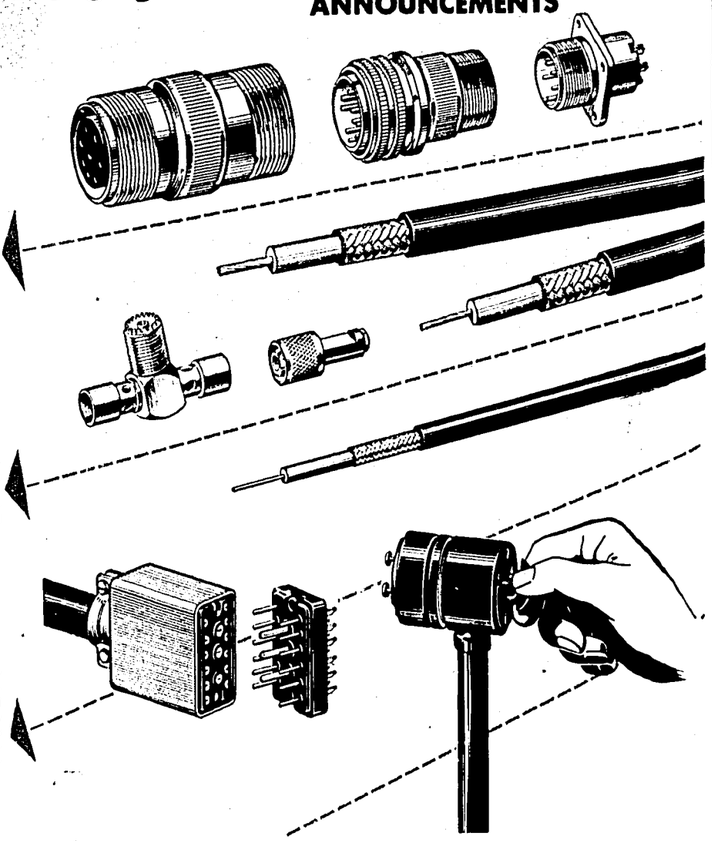
Request

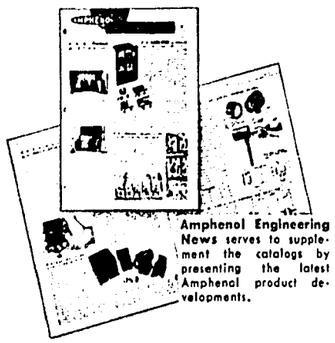
CATALOGS — OVER 9,000 ITEMS CURRENT NEW PRODUCTS ANNOUNCEMENTS

CATALOG A-2 — Complete engineering data and listing of Amphenol "AN" connectors for power, signal and control circuits in aircraft and electronic equipment.

CATALOG D-2 — comprehensive engineering details and classification of Amphenol's Radio Frequency cables and connectors.

CATALOG 74 — greatly condensed listing of products in other Amphenol catalogs and complete listing of radio sockets and connectors and Amphenol TV and FM antennas.





Amphenol Engineering News serves to supplement the catalogs by presenting the latest Amphenol product developments.

The complete line of Amphenol products includes over 9,000 items designed and produced to the exacting standards required by radio-electronic applications. Amphenol's reputation for superior products of outstanding design is the result of rigid quality control from the development laboratory to the model shop; from the engineering department to the field testing laboratory; from production to finished product.

Amphenol quality products include the most complete line of RG cables, RF connectors, AN connectors and fittings, radio sockets and connectors available from any one source in the world today. To facilitate comprehensive listing of the many components Amphenol produces, cataloging is divided into three sections according to product adaptability and usage. Amphenol Engineering News supplements the catalogs with information on the latest Amphenol product developments. Request the catalogs you require.

Choose AMPHENOL — the quality name in electronics!

TYPICAL "Q" CHARACTERISTICS OF BURNELL TOROIDS WOUND ON MOLYBDENUM PERMALLOY CORES

Several years ago we began to specialize in the design and manufacture of toroidal coils and audio filter networks. At that time too few electronic engineers were aware of the full value of toroids (particularly those wound on molybdenum permalloy dust cores) as very little publicity had ever been devoted to a product that was fast becoming one of the most vital in the development of modern communications and control equipment.

We believe that since then through our technical service and advertising methods we have helped thousands of engineers to understand and appreciate the toroid as an essential in network applications.

The resulting popularity and industry acceptance of our toroidal coils and filters have necessitated an expansion of our production facilities to ten times what they were five years ago and we are proud to point to this growth as an expression from our customers of their satisfaction in the quality of our product and our service.

STANDARD SIZES	
TC-1	1⅛" O.D. x ⅜"
TC-2	2¼" O.D. x ⅜"
TC-3	1½" O.D. x 9/16"
MINIATURE SIZES	
TC-0	⅛" O.D. x ⅛"
TC-4	1-3/16" O.D. x 9/16"
TC-5	1-3/16" O.D. x 9/16"
MAXIMUM INDUCTANCE	
TC-1 — Ind.-Up to 10 Hys.	
TC-2 — Ind.-Up to 100 Hys.	
TC-3 — Ind. MHY-Up to 750	
TC-0 — Ind.-Up to 2 Hys.	
TC-4 — Ind.-Up to 10 Hys.	
TC-5 — Ind. MHY-Up to 750

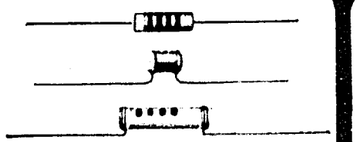
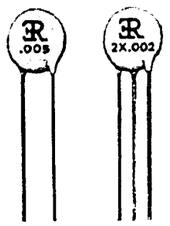
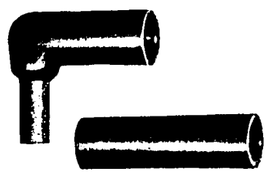
ERIE RESISTOR COMPONENTS



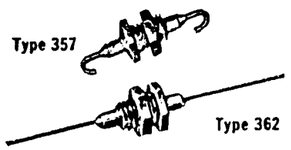
Erie "GP"* Molded Insulated Ceramicons
5 MMF—5,000 MMF
Erie "GP" Dipped Insulated Ceramicons
5 MMF—5,000 MMF
Erie "GP" Non-Insulated Ceramicons
5 MMF—5,000 MMF



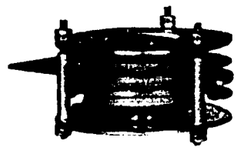
Erie Disc Ceramicons
Up to .01 MFD



Types L-4, L-7, S-5 Suppressors
for Spark Plugs and Distributors

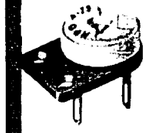


Feed-Thru Ceramicons
5 MMF—1,000 MMF
5 MMF—1,500 MMF

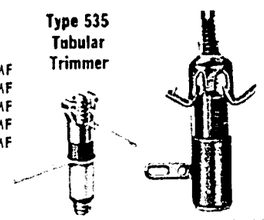


Type 3688
High Voltage Ceramicons
Up to 15,000 Volts
WORKING

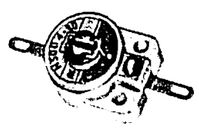
Type 557 Ceramicon Trimmer
1.5-7 MMF
3-12 MMF
5-25 MMF
5-30 MMF
8-50 MMF



Type 535 Tubular Trimmer

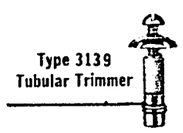


Type 531 and 532 Tubular Trimmers
0.5-5 MMF
1-8 MMF



Type TS2A Ceramicon Trimmer
1.5-7 MMF 3-13 MMF 4-30 MMF
3-12 MMF 5-20 MMF 7-45 MMF

Type 3139 Tubular Trimmer



Erie Resistor Components are designed with definite objectives in mind: they must be accurate and well within the tolerances required for their application; they must be reliable for sustained satisfactory service based on time proven life tests; they must be compact and sturdy for easy installation on the assembly line and in the service shop.

Erie manufactures a complete line of Ceramic and Button Mica Capacitors for transmitter and receiver applications: Fixed Ceramic and Mica Capacitors, Variable Ceramic Capacitors, Carbon Suppressors, Custom Injection Molded Plastic Knobs, Dials, Bezels, Name Plates and Coil Forms. Complete technical information on request.

*Ceramicon, Hi-K, GP, and Plexicon are registered trade names of Erie Resistor Corporation.

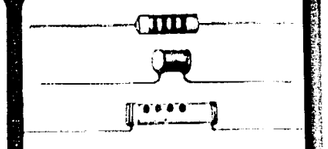
Electronics Division

ERIE RESISTOR CORP., ERIE, PA.

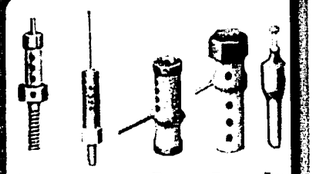
LONDON, ENGLAND • TORONTO, CANADA

Cinch-Erie Plexicon* Tube Sockets with built in by-pass Ceramicons 10 to 1,000 MMF

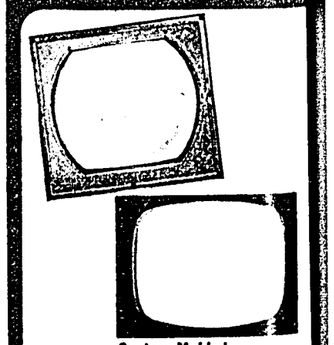
Button Mica Condensers
15 MMF—6,000 MMF



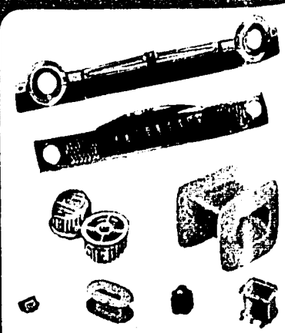
Temperature Compensating Molded Insulated Ceramicons
0.5 MMF—550 MMF
Temperature Compensating Dipped Insulated Ceramicons
0.5 MMF—1,800 MMF
Temperature Compensating Non-Insulated Ceramicons
0.5 MMF—1,800 MMF



Erie Stand-Off Ceramicons
5 MMF—5,000 MMF



Custom Molded Plastic TV Lenses and Frames



Custom Injection Molded Plastic Knobs, Dials, Bezels, Name Plates, Coil Forms, etc.

(Continued on page 11)

The new five channel "totem pole" antenna atop the world's tallest building posed many difficult-to-solve problems. One of these—severe icing conditions—was solved with specially-designed de-icers, manufactured by Electro-Therm, Inc., of Silver Spring, Maryland and installed by RCA engineers. Tophet heating elements in the de-icers effectively prevent ice accumulations. Wherever an extra margin of dependability is required, engineers specify Tophet for greater dependability. For Tophet Resistance Wire has been proven over the years to provide top heat and top performance in applications ranging from household appliances to heavy duty industrial furnaces.

It's TOPHET for Top Heat

For standard
SPECI

HOOK UP

with

"Synkote" R

Right now, of course, there's a heavy emphasis in the electronics field on insulated wires that conform to government procurement specifications.

Naturally, the *standard* line of Synkote wires includes many types that are fully approved for use on specification jobs.

But that's just a *part* of Synkote service to the electronics industry.

We're also prepared, on short notice, to *engineer* and *produce* special wire and cable designs to meet practically any requirement.

The check-list below gives just a few of the service requirements met either by standard Synkote wires, by easily made modifications or by engineered designs. For other wiring needs, consult our Engineering Department.

CHECK UP
on your requirements

"SYNKOTE" INSULATION
is almost completely impervious to water, oils, acids, alkalies, sunlight, cold, fungus growths; vermin-proof; unusually resistant to abrasion, flexing and tearing. Will not support combustion. High dielectric strength; low dielectric leakage.

RADIO HOOK-UP WIRE JAN-C-76	Three approved types: SRIR, SRHV, WL. Details of approved sizes available on request.
AIRCRAFT CABLE AN-JC-48A	Flexible, lightweight cable.
COAXIAL CABLE JAN-C-17A	Flexible and semi-flexible types. Many approved constructions conforming to JAN-C-17A; also special constructions.
HIGH-TEMPERATURE SERVICE	105° C hook-up wire, approved by Underwriters' Laboratories.
TV WIRE	Twin-conductor; flat and flat perforated. Rotary antenna leads and coaxial types.
NYLON JACKETING	For increased abrasion resistance. Can be applied over any type of cable.
SHIELDING	Tinned or bare copper, loose or tight weave, to meet individual requirements.
COLOR STRIPING	1, 2 or 3 stripes as required.
MULTI-CONDUCTOR CABLES	Engineered to meet requirements.

Write us about your requirements

Falstrom Co., 46 Falstrom Court, Passaic, N.J., 8, 13

Fansteel Metallurgical Corp., 220 Sheridan Rd., North Chicago, Ill., 10, 40, 53, 57, 73

Farmers Engineering & Mfg. Co., 549 Brushton Ave., Pittsburgh 21, Pa., 1, 52

Fasco Industries, Inc., P.O. Box 500, Rochester 2, N.Y., 45, 64

(Continued on page 17)

TUBE TEST EQUIPMENT

- Aging and Life Racks
- Vibration—Aging Racks
- Vibration Short Test Racks

CHARACTERISTIC TEST SETS (For Receiving Type Tubes)

- Heater-Cathode Leakage
- Grid Currents
- Plate Current Emission
- Amplification Factor
- Gas
- Trans-Conductance
- Power Output—AF and RF

CHARACTERISTIC TEST SETS (For Special Purpose Tubes)

- Spot Position
- Spot Displacement
- Deflection Uniformity
- Deflection Factor
- Brilliance
- Persistency
- Heater Current
- Anode Current
- Gas
- Voltage Breakdown

COMMUNICATIONS

- Transmitter-Receiver: A.M.; F.M.; P.M.; TV
- Navigational Aids and Devices—Homing and Direction Finding Equipment
- Telemetering; Radar, Sonar
- Micro-wave techniques and applications: Generators; Converters and complete assemblies

ELECTRONIC EQUIPMENT FOR:

- Guided Missiles: Drone Aircraft; Remote Control Devices
- Computers and Calculators • Servo Links
- Velocity Propagation Measurement
- Processing Equipment—industrial applications, quality control

ELECTRONIC MEASURING DEVICES

- Flow indicators—Liquids, gases, solid components
- Sorting, counting and inspection
- Chemical process control; titration; ionization; diffusion
- Flow detection—strains, stresses, inner faults
- X-Ray, supersonic and radio frequency applications to measurement

INSTRUMENTATION

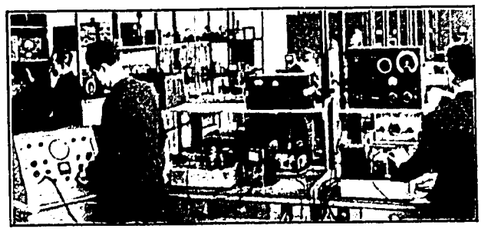
- DC; AC; Audio; RF; Microwaves; Intra-Red; Visible Spectrum; Ultra-Violet; Soft and Hard X-Ray; Cosmic Radiation
- Vacuum Tube Meters • Null Detectors
- RF Audio Frequency Generators
- Bridges
- Multi-Wave Shape Generators
- High Gain Amplifiers • Oscilloscopes
- Power Supplies, Regulated, High & Low Level

SHERRON WILL INITIATE OR DEVELOP AND MANUFACTURE PROTOTYPES FROM YOUR SPECIFICATIONS

SHERRON OFFERS AN OVER-ALL, *START-TO-FINISH* ELECTRONICS SERVICE

RESEARCH · DESIGN · DEVELOPMENT

You get all the benefits of an experienced, integrated, all inclusive electronics service — when you work with Sherron. This definitive service includes . . . research and development in our electronics and electro-mechanical laboratories right through sheet metal fabrication in our block-long plant.



At the top of the Sherron personnel pyramid are physicists with electronic knowledge who will provide the necessary research for your project . . . electronic and mechanical engineers who will develop it . . . technicians who will accredit its workability. These men work hand in hand with our production engineers, who have at their command the necessary sheet metal fabrication facilities and manpower to turn out a finished prototype . . . ready for you to manufacture. Whether we initiate the design — or work from your prints and specifications — our service is confidential.

HYDRO MECHANICAL DIVISION

To design, style, develop and manufacture prototypes and high precision mechanical sub-assemblies, or assemblies involving part manufacture and assembly of units incorporating machine elements of bases, springs, levers, shafts, bearings, cams, valves, regulators, drives, transmissions and controls for:

- JET ENGINE ACCESSORY TEST STANDS
- SPECIAL HYDRAULIC UNITS
- SPECIAL MEASURING INSTRUMENTS
- SERVO MECHANISMS
- KEYERS & COUPLERS
- DRIVING AND CONTROLLING EQUIPMENT
- REGULATORS
- MICRO WAVE APPARATUS
- RADAR MECHANISMS
- COMPUTER MECHANISMS
- MECHANICAL OPTICAL SPECIALTIES
- MECHANISMS OF NAVIGATIONAL DEVICES
- VIBRATION CONTROL MOUNTINGS
- PRECISION GEAR TRAINS

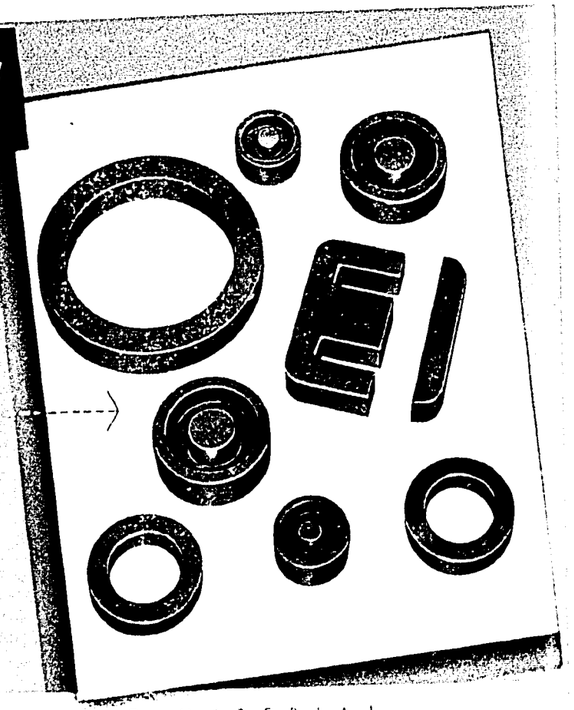
FERRAMIC Cores by GENERAL CERAMICS



Ferramics are soft magnetic materials featuring:

HIGH PERMEABILITY
HIGH VOLUME RESISTIVITY
HIGH EFFICIENCY
LIGHT WEIGHT
ELIMINATE LAMINATIONS

TYPE OF FERRAMIC MATERIAL

PROPERTY	UNIT	A 34	B 90	C 159	D 216	E 174	G 254	H 419	I 141	J 472
Initial permeability at 1mc/sec	—	15	95	220	410	750	410	850	600	330
Maximum permeability	—	97	183	710	1030	1710	3300	4300	1010	750
Saturation flux density	Gauss	840	1900	3800	3100	3800	3200	3400	1540	2900
Residual magnetism	Gauss	615	830	2700	1320	1950	1050	1470	660	1600
Coercive force	Oersted	3.7	3.0	2.1	1.0	0.65	0.25	0.18	0.40	.80
Temperature coefficient of initial permeability	%/°C.	0.65	0.04	0.4	0.3	0.25	1.3	0.66	0.3	0.22
Curie point	°C.	280	260	330	165	160	160	150	70	180
Volume resistivity	Ohm-cm	$1x10^9$	$2x10^5$	$2x10^3$	$3x10^7$	$4x10^5$	$1.5x10^8$	$1x10^4$	$2x10^5$	—

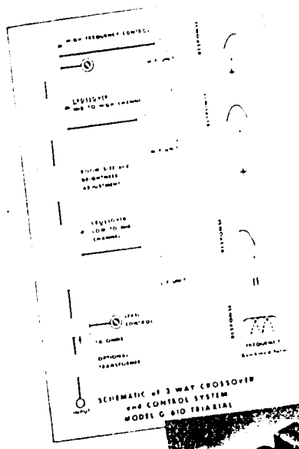
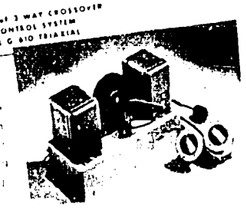
CUTAWAY VIEW

ADVANCED DESIGN FOR ULTRA HIGH FIDELITY



Crossover and Control Network is a separate chassis unit, with all connections for speaker and impedance adjusting transformer (if needed)



The Jensen G-610 is designed to achieve the highest possible quality of sound reproduction, and yet be a compact unitary assembly. This 3-channel system in one package has the widest frequency range and the lowest distortion available today. Typical of the advanced know-how in acoustics represented here are such features as very low crossover plus compactness, due to articulation of mid-channel horn with low-frequency diaphragm . . . the unique precision compression driver unit . . . built-in ruggedness and reliability combined with precision construction throughout. Write for data sheet 160.

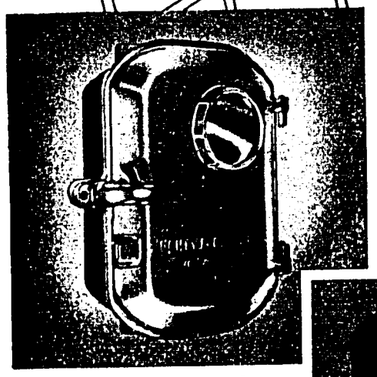
H&P

COMPLETE KITS FOR TOWER LIGHTING

Backed by years of leadership, H & P lighting equipment is today the accepted standard throughout the world. Many exclusive features assure easy installation, low maintenance costs... dependable operation under all climatic conditions.

Everything Needed for any Tower, 150 to 900 feet!

H & P *Complete* Tower Lighting Kits include every item essential to the completed installation — every bolt and fitting... H & P Complete Lighting Kits, in today's critical market, will save you on purchasing, erection, and completion time... The H & P 300 MM Code Beacon (shown left) has 10 exclusive features, is CAA approved.

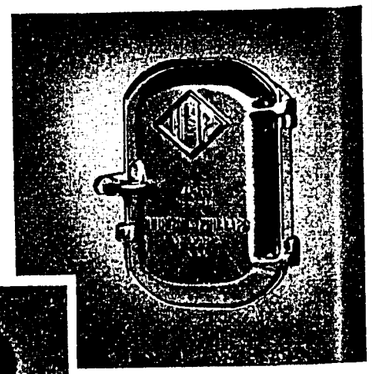


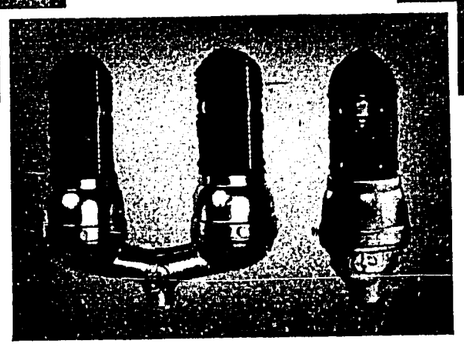
above
"PECA" Series Photo-Electric Control

Factory-set to turn lights on at 35 f.c.; off at 58 f.c. as specified by CAA. Low-loss circuit insulation. High-wattage industrial type resistors. Tube ratings well over operational requirements. Fail-Safe: if any parts fail in service, lights automatically turn on.

Single and double Obstruction Lights below

Bases ruggedly constructed of heavy aluminum alloy castings. Precision machining insures proper light center when used with specified lamp. Prismatic globes meet CAA light specifications. Relamping accomplished without removing prismatic globes. Mounting base designed for standard A-21 traffic signal lamps.





above
Mercury Code Flasher

Only four moving parts which run in lifetime lubricated ball bearings. No contact points to wear out. Speed adjustment, 14 to 52 flashes per minute. Motor separately fused for continuous operation of lights in event of mechanical failure.

Sold only through jobbers and Tower Manufacturers.

Send for FREE Catalog

Write on your letterhead for new, detailed catalog. We will also send you the name of your nearest H & P distributor.

Complete Kits for A-2, A-3, A-4 and A-5 towers include every item essential for complete tower lighting installation.

for VARIABLE RESISTORS to MILITARY SPECIFICATIONS . . .

SPECIALISTS IN PRECISION MASS PRODUCTION FOR 55 YEARS

EXCEPTIONALLY GOOD DELIVERY CYCLE ON MILITARY ORDERS due to tremendous precision mass production facilities.

Electronic engineers all over the world depend upon CTS for:

- A variable resistor engineered to the application.
- *Uniform* high quality on a mass production basis.
- Each variable resistor thoroughly tested electrically and mechanically to assure top performance.
- Delivery when promised.

If you need variable resistors to exacting military specifications, let CTS specialists solve your problem.

Yours for the asking - **THE NEW 20-PAGE**

MYCALEX

CATALOG and ENGINEERS' HANDBOOK

of glass-bonded mica

ELECTRICAL INSULATION

with special section on

MINIATURE *LOW-LOSS* TUBE SOCKETS

A valuable addition to your technical library

COSTS YOU NOTHING — CAN MEAN REAL SAVINGS IN TIME AND MONEY

You'll find this 20-page compilation of technical data and manufacturing criteria a veritable gold-mine of hard-to-get electrical insulation information. Complete in content, it not only encompasses the wide range of MYCALEX Insulation in all its various grades and characteristics, but includes comparative data on other important dielectric materials as well. Write today. Your copy will be forwarded promptly.

FOR QUICK REFERENCE — CONSULT THE 1950 IRE YEARBOOK

For your added convenience the entire MYCALEX 20-page catalog appeared as a section in the 1950 IRE Yearbook. It's the seventh catalog in the special manufacturers catalog section at the back of the 1950 issue.

TABLE OF CONTENTS

THE STORY OF MYCALEX
Its origin and history
TYPES OF MYCALEX
Injection molded·Compression molded
CHARACTERISTICS OF MYCALEX
Comparison to other insulators
PROPERTIES OF DIELECTRICS
A handy comparative chart for the engineer
MYCALEX 410: Injection Molded
Its qualities and engineering specifications
MYCALEX 410X
Engineering specifications as compared to Mycalex 410
DESIGN OF MOLDED INSULATORS
For the engineer
MYCALEX TUBE SOCKETS
9-pin, 7-pin and subminiatures
MYCALEX 400: Compression Molded
Applications and uses, engineering specification and qualities, machining and recommended fabricating methods
DESIGN OF MACHINED INSULATORS
Design criteria for insulators
MYCALEX K: Capacitor Dielectrics
Uses and Engineering data
MYCALEX ADVISORY SERVICE
Customer service available

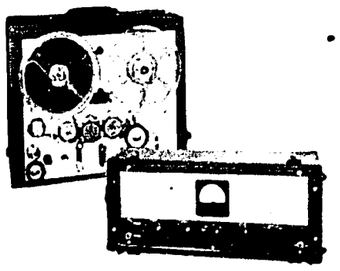
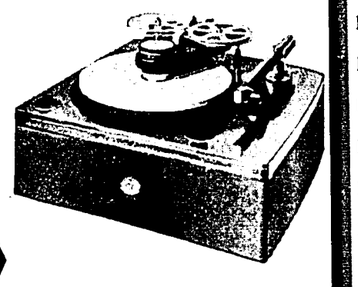
which of these

famous PRESTO instruments meets your precision recording needs?



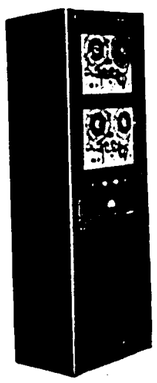
Portable Tape Recorder PT-920

New and improved successor to the famous PT-900. Compact unit with three motors. No friction clutch or tension adjustments. High fidelity, constant speed at 7½"/sec. and 15"/sec. Instantaneous monitoring.



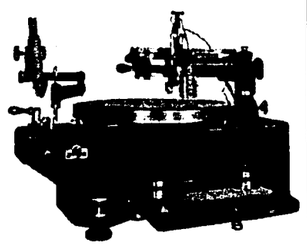
Turntable Tape Reproducer TL-10

Completely new idea in tape reproduction! Operates on any standard 16" turntable, is instantly removable. Turntable acts as motor. Speeds 7½"/sec. and 15"/sec. Plugs into speech input equipment. Professional performance, low cost.



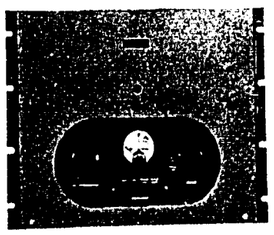
Communications Tape Assembly

Complete monitoring unit for air traffic control, police radio and other systems. Speed: 1" per second. Can record continuously up to 8 hours.



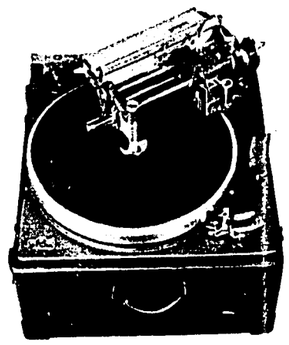
Precision Disc Recorder 8 D-G

Dual motor; direct gear drive: 78 and 33⅓ rpm without deviation: 1-D cutting head (response to 10,000 cps). Seven feed pitches inside out and outside in.



Recording Amplifier 92-B

Power: 60 watts. Frequency response: 20 to 17,000 cps within 1 db. Push-button selection of recording characteristics. Mounts vertically in standard rack, front panel easily removable.



Portable Disc Recorder 6-N

World-favorite . . . also available in cabinet for economical studio use. 1-D cutting head; speeds: 78 and 33⅓ rpm. Microgroove available at additional cost.

Here are six of the most popular most-wanted units in PRESTO'S *complete* line of professional recording equipment. Each is precision designed and constructed to combine faithful sound reproduction with long, dependable service and simple maintenance. Write direct or contact the PRESTO distributor in your area for additional data, or for assistance in meeting your specialized requirements.

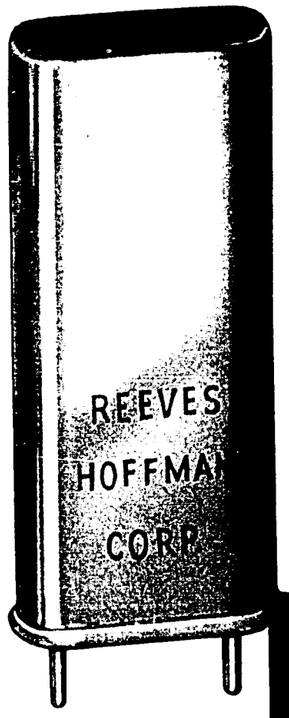
REEVES-HOFFMAN

QUARTZ CRYSTAL UNITS



★ for all Military and Commercial applications from 16 kc to 100 mc

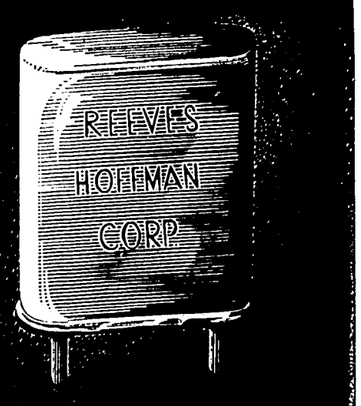
Reeves-Hoffman hermetically sealed, plated crystal units are made to tolerances so accurate as to eliminate the need for heater ovens in most applications. A variety of cuts may be obtained in small, universal holders, with .050 and .093 pins or with wire leads.

Reliability of performance of crystal units in crystal controlled frequency devices is of the utmost importance.

Reeves-Hoffman Quartz Crystal Units are precision-built to meet the most exacting requirements of both military and commercial specifications.

They are the product of skilled engineers and craftsmen . . working with the finest materials and the most modern facilities available.

When you buy . . specify Reeves-Hoffman, the finest name in crystals.



All other types of standard holders are available.

REEVES-HOFFMAN *Corporation*

Carlisle 4, Pennsylvania

THE FINEST NAME IN CRYSTALS

A compact, hermetically sealed unit with pressure mounted, capacity coupled crystal. The capacity is less than four mmfd between pins.

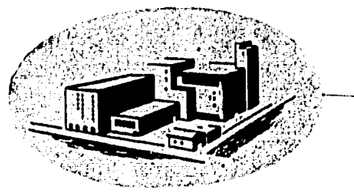
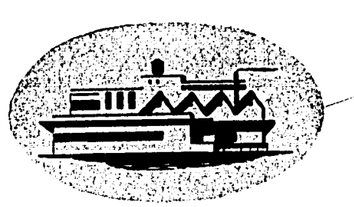
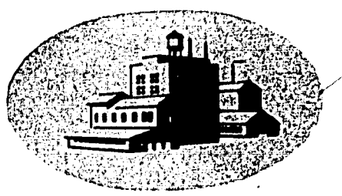
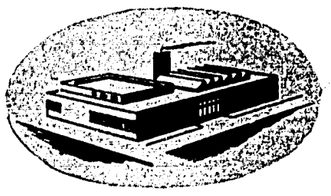
"The Standard Tuner"

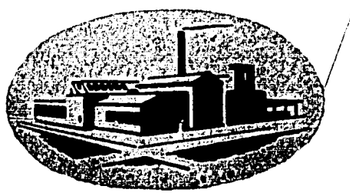
at your service

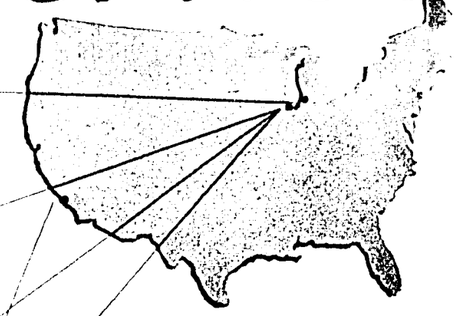












THE company that gave TV the most widely accepted tuner "The Standard Tuner" is at your service. With its vast facilities (five factories strategically located, plus highly experienced engineering development and production staffs), Standard Coil will assist you in any of your military or civilian electronic problems.

MANUFACTURED TO YOUR SPECIFICATIONS

TV Components	*Radio and Miscellaneous Components*
Picture I. F. Transformers	I. F. Transformers
Cathode Trap Coils	R. F., Oscillator, & Solenoid Coils
Video Peaking Coils	Antenna Loops
Heater Choke Coils	Permeability Tuning Pre-selector Assemblies
Sound I. F. Transformers	Miscellaneous Electro-Mechanical Assemblies
Sound Discriminator Transformers	
Horizontal Oscillator Coils

Simpson

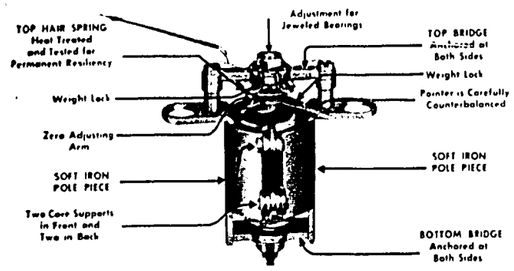
INSTRUMENTS THAT STAY ACCURATE

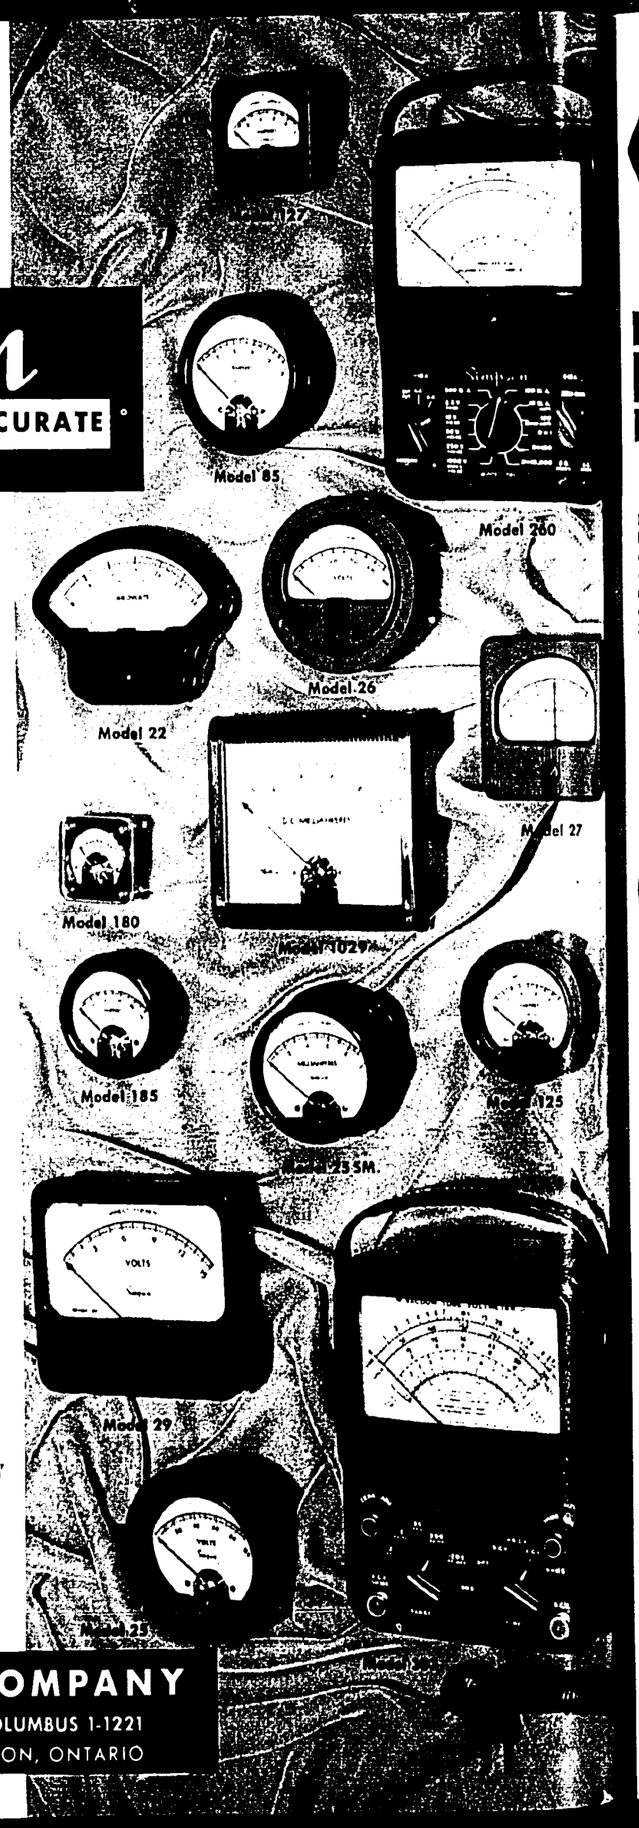
for Accurate, Dependable Electrical Measurements

BECAUSE—Simpson has developed quality control to a new modern high with *this* successful production policy. Design everything that goes into an instrument—make everything that goes into an instrument—keep designing for the future—keep quality steadily higher—keep prices consistent with material and labor costs without exploitation. This quality control is evident in every Simpson instrument whether panel or switchboard, custom-built or stock. The instruments illustrated in panel at right are only a few of the wide variety of instruments in the complete Simpson line. Let Simpson engineers help you solve your panel instrument problems—and for your standard instrument requirements take advantage of our large stock.

Send for complete descriptive literature.

SIMPSON "FULL BRIDGE TYPE MOVEMENT"



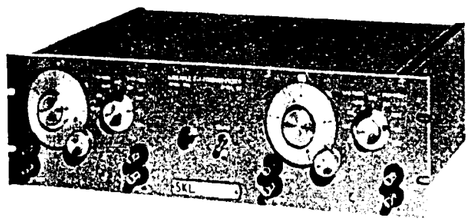


SIMPSON ELECTRIC COMPANY

5200 W. KINZIE STREET, CHICAGO 44 • COLUMBUS 1-1221

IN CANADA: BACH-SIMPSON, LTD., LONDON, ONTARIO

SKL The Finest In PRECISION EQUIPMENT

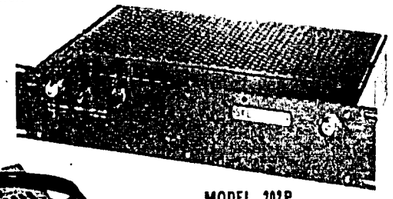


MODEL 302
Variable Electronic Filter

FEATURES

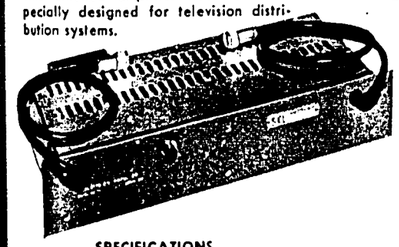
Cutoff Range: Continuously variable from 20 cps to 200 KC.
Sections: Two.
Function: High-pass, low-pass, band-pass.
Attenuation Rates: Band-pass max. 18 db per octave. Series max. 36 db per octave.
Insertion Loss: 0 db.

Providing a continuous choice of cutoff frequencies from 20 cps to 200 KC, the Model 302 Variable Electronic Filter consists of two identical filter sections. Each section has 18 db per octave attenuation. A range switch selects either high or low-pass operation and, when the sections are in series, a band-pass connection. An insertion loss of 0 db and a low noise, well-regulated power supply make the Model 302 ideal for use in the aircraft, automotive, moving picture and radio broadcasting industries as well as in many general laboratory applications. Also available: the Model 300 single-section Variable Electronic Filter.



MODEL 212TV—Amplifier

This untuned amplifier has been especially designed for television distribution systems.



SPECIFICATIONS

Bandwidth: 40 to 225 MC.
Gain: 20 db.
Impedance: 52 or 72 ohms unbalanced.
Response: ± 2 db from 50 to 220 MC.
Power Supply: 115 volts, 60 cycles.

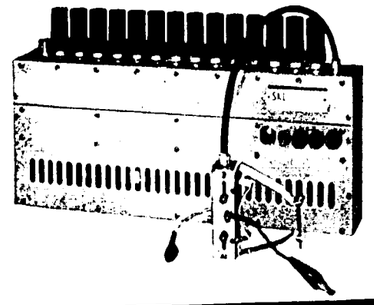
MODEL 202P
Wide-Band Chain Amplifier

A two-stage, traveling wave amplifier designed for high speed pulse amplification.

SPECIFICATIONS

Bandwidth: 100 KC to 200 MC.
Voltage Gain: 20 db.
Impedance: 200 ohms.
Risetime: Less than .003 usec.
Response: ± 1.5 db from 100 KC to 200 MC.
Power Supply: Stabilized, 115 volts, 60 cycles.
Connectors: Standard Type N.
Also available: the Model 200A single-stage, the Model 202 dual-stage.

Designed for use with cathode ray tubes, high speed counters, and other pulse circuits requiring high driving voltages, the Model 214 Chain Pulse Amplifier has a maximum output voltage of 125 volts with a risetime of less than .006 usec. More than one inch of deflection on a cathode ray tube can be obtained for the viewing of high speed pulses. The input impedance of 180 ohms is provided so that the Series 200 Wide-Band Chain Amplifiers may be used where additional gain is required. Supplied with a special output termination at the end of 15" of cable, the input connector is a standard type N for convenient coupling to associated equipment.



MODEL 214
Chain Pulse Amplifier

FEATURES

Response: 40 KC to 100 MC, ±1½ db — 50 KC to 80 MC.
Output Voltage: 125 volts max.
Pulse Gain: 30 db.
Input Impedance: 180 ohms.
Rise Time: Less than .006 usec.
Connector: Standard type N.
Power Supply: 115 v., 60 cyc.

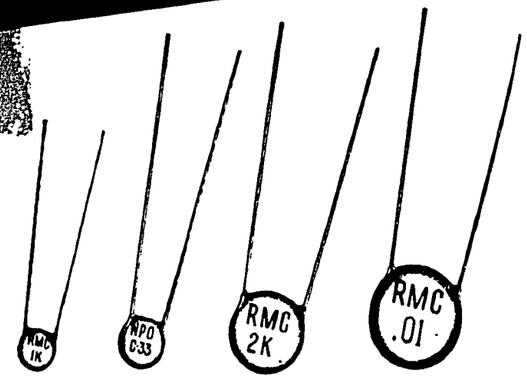
(Continued on page 41)

RMC CERAMIC DISCAPS

. . . THE MONEY-SAVING REPLACEMENT FOR MICA AND CERAMIC TUBULAR CONDENSERS

RMC DISCAPS are approved and used by leading manufacturers of TV sets and tuners, radio receivers and high frequency electronic equipment. In addition to their lower cost, they offer the advantages of small size, low self inductance, low power factor, high working voltage, greater mechanical strength and faster production line handling.



TYPE B DISCAPS

GMV By-Pass Series

Type B DISCAPS are the finest high frequency by-pass capacitors available and are engineered to exceed guaranteed minimum capacity at 85° C with 250 applied V.D.C. Capacity change between room temperature and 65° C is only +18%,—0%. Available in all standard capacities from .001 MFD to .02 MFD and in a number of dual capacity types.

SPECIFICATIONS

POWER FACTOR.....1.5% at 1 KC
WORKING VOLTAGE.....600 V.D.C.
TEST VOLTAGE.....1200 V.D.C.
INSULATION. Durez Phenolic—Vacuum Waxed
RESISTANCE.....Initial 7500 Megohms
After Humidity 1000 Megohms
LEADS.....#22 Tinned Copper (.026 DIA.)
CAPACITY TOLERANCE.....GMV

TYPE C DISCAPS

NPO and TC

Type C DISCAPS are ideally suited to coupling and tuned circuit applications. Their capacity will not change under voltage. Available in a wide range of capacities and temperature coefficients conforming to the RMA specifications for Class I ceramic condensers.

SPECIFICATIONS

POWER FACTOR.....
Less than .1% at 1 Megacycle
WORKING VOLTAGE.....600 V.D.C.
TEST VOLTAGE.....1200 V.D.C.
INSULATION.....
Durez Phenolic—Vacuum Waxed
RESISTANCE.....Initial 7500 Megohms
After Humidity 1000 Megohms
LEADS #22 Tinned Copper (.026 DIA.)
CAPACITY TOLERANCE....
±5%, ±10%, ±20%

TYPE D DISCAPS

STABLE CAPACITY

Specify Type D DISCAPS when a more stable capacity is required for coupling and by-passing filter networks. Available in a capacity range between 150 MMF and 5000 MMF. They feature a very small capacity change between +25° C and +85° C.

SPECIFICATIONS

POWER FACTOR.....1% at 1 KC
WORKING VOLTAGE.....600 V.D.C.
TEST VOLTAGE.....1200 V.D.C.
INSULATION.....
Durez Phenolic—Vacuum Waxed
RESISTANCE.....Initial 7500 Megohms
After Humidity 1000 Megohms
LEADS...#22 Tinned Copper (.026 DIA.)
CAPACITY TOLERANCE....
±20% at + 25° C

Every DISCAP Is 100% Tested for Capacity, Leakage Resistance and Breakdown

RMC production checks eliminate costly service failures. Because RMC produces the complete condenser, even to the processing of the dielectric element itself, it is possible to exercise the finest quality control. If you are interested in improving the uniformity of your product you will be interested in RMC DISCAPS.

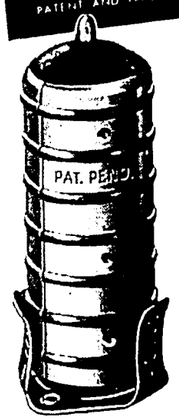
The New STAVER MINI-SHIELD

PATENT AND TRADE MARK REG. PEND



The shield that fits all Miniature Tubes

A flexible shield that snugly fits all miniature tubes because it compensates for all variations in tube dimensions. Mini-Shields are made for both T5½ and T6½ bulb tubes. Send for catalog sheet.

The New STAVER MINI-SPRING

PATENT AND TRADE MARK REG. PEND

Available! Special Improved Types for Military Apparatus

Gives support two ways—Keeps pressure downward and gives sideway support. The spring action is constant and resilient permanently. Send for catalog sheet.

These leading TV set makers use Sylvania Picture Tubes

We're PROUD of this picture!

Today's sales picture shows that 75% of the leading television set manufacturers use Sylvania picture tubes.

This popularity is no accident. It's based on a sure foundation of outstanding performance. For, Sylvania picture tubes have won their prized position through years of research and quality production techniques developed during more than a quarter of a century of leadership in radio, electronics, and lighting.

Remember, too, when you choose Sylvania picture tubes, you choose products of nationally recognized excellence . . . products that carry prestige and sales appeal when listed among your sets' specifications.

Send today for new folder giving complete descriptions and ratings of all Sylvania TV Picture Tubes. Simply write a postal card to Sylvania Electric Products Inc., Dept. R-6351. Emporium, Penna. *Sylvania Representatives are also located in all foreign countries. Names on request.*

WORKSHOP antennas

A Complete Line for all High-Frequency Bands

COMMERCIAL		GOVERNMENT
AMATEUR	RADIO RELAY	RADAR
TELEVISION	MICROWAVE RELAY	GUIDED MISSILE OR ROCKET-BORNE
FM	STL RELAY	COMMUNICATION AND NAVIGATION
EMERGENCY SERVICES	TV RELAY	

The WORKSHOP line covers all bands from 28 mc. up. Our standard antennas fit the majority of applications, but where special situations must be met, slight modifications in design usually accomplish the desired result.

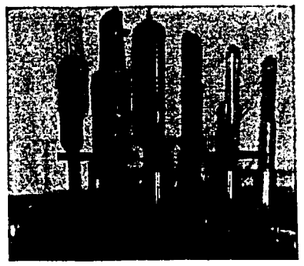
Engineering and Contract Service. The WORKSHOP handles scores of special government and commercial antenna problems every year from design through production. With our new plant and greatly expanded facilities, we are able to handle a larger proportion of this type of contract work than ever before.

TYPE and USE	MODEL NO.	FREQUENCY (MCS.)	GAIN* (DB.)	HALF POWER ANGLE E Plane*	H Plane*
PARABOLIC For radio, microwave, STL and TV relay, radar, and communications.	940	920– 960	19.0–28.0	19.75–7.8	17.75–6.9
	2000	1990–2110	27.0–34.5	10.28–3.65	9.2 –3.25
	6075	5925–6225	36.0–42.0	3.24–1.47	2.86–1.32
	6725	6575–6875	36.8–42.8	2.79–1.47	2.50–1.32
	7275	7125–7425	37.0–43.0	2.70–1.36	2.42–1.21

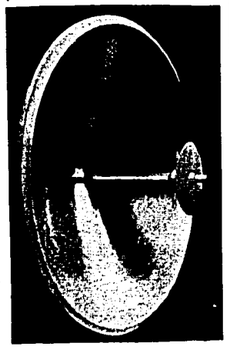
* Gain and Half Power Angles are dependent on size of parabolas, — 4, 6, 8 or 10 foot diameter.

				Horizontal	Vertical
DIRECTIONAL and BI-DIRECTIONAL For police, highway patrol, railway, forestry, utilities, oil fields.	33C	29.5–36.5	7.8	64°	68°
	40C	36.5–43.5	7.8	64°	68°
	47C	43.5–50.5	7.8	64°	68°
	74C	72–76	7.8	64°	68°
	144C	140–146	7.8	64°	68°
	149C	146–152	7.8	64°	68°
	155C	152–157	7.8	64°	68°
	160C	157–162	7.8	64°	68°
	165C	162–168	7.8	64°	68°
	171C	168–174	7.8	64°	68°
BEACON For fire, police, taxicab, aeronautical, and private fleet communications.	2HW	108–144	2.7	31°	
	3HW-B	144–152	4.2	24°	
	3HW-A	152–162	4.2	24°	
	3HW-2	162–174	4.2	24°	
	6HW-A	450–460	8		
	6HW-B	460–470	8		

TELEVISION	A	3-element, high gain (5 db.), directional; a model for each TV channel.
	2A	Two series A's spaced ½ wave apart, connected by cable harness.
	VV	All-channel, high gain, sharp directivity, patented.
	2VV	Double-stacked VV for higher gain, distant reception.
AMATEUR		A complete line for 2, 6, 10 meters and UHF.



A representative group of high-precision radar antennas.

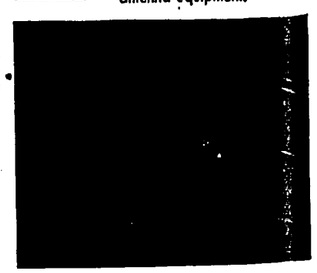


Standard Parabolic Relay Antenna for Studio-to-Transmitter Link on 920-960 mc. band.

Left — High-Gain Beacon Antenna. Recommended by all 152-162 mc. equipment manufacturers. Hundreds are in use throughout the country.

Below — WORKSHOP DUBL-VEE Television Antenna, double-stacked.

Below — 10 over 20 Stacked Array — the last word in amateur antenna equipment.



CABLE FITTINGS AND ACCESSORIES

Model T-72 Matching Transformer. Matches 72 ohm coaxial cable such as RG-59/U to 300 ohm receivers. Voltage step up of 2 : 1, with a flat response over the TV channels from 52-216 mcs. A W-50 solderless cable connector is furnished. Size 2 inches long, 1-inch diameter.

Model T-300 Exterior Matching Transformer. Completely weatherproof device for converting 72 ohm antennas for use with inexpensive 300 ohm Twin Lead transmission line at reasonable efficiency. Can also be used with 300 ohm antennas to realize benefits of 72 ohm coaxial cable.

Model W-50 Silver Plated Solderless Cable Connector (Male). Used with RG-59/U coaxial cable. Specially slotted to withstand considerable strain. Mates with W-60 receptacle (on R-4A switch) and W-80 junction listed below.

Model W-60 Silver Plated Chassis Receptacle (Female). Mates with W-50 cable connector. For chassis or panel mounting. Threaded stem ⅓ inch long. Soldering terminal protrudes from rear.

Model W-80 Silver Plated Cable or Panel Junction (Female). Mates at either end with W-50 male connector. A complete splice requires one W-80 junction and two W-50 connectors which must be ordered separately.

Model W-100 Cable Adaptor. Required when changing from larger size RG-11/U or RG-8/U to smaller RG-59/U coaxial cables. No soldering necessary. W-50 cable connector furnished.

Model R-4A New Coaxial Switch (SP4T). This virtually lossless, constant impedance switch will connect any one of four single-channel TV antennas to a receiver. By simply using additional switches it can also be used for demonstrating any number of TV receivers in a display room, or for low-level audio applications. Size — 2⅝ inches front to back; 2-inch diameter.

If your product or service requires high-frequency antennas—research, design, test, or production—get in touch with the WORKSHOP. Write, or phone Needham 3-0005. No obligation.

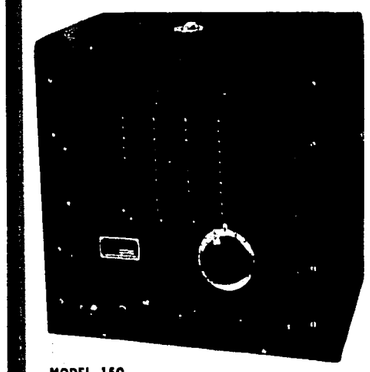
DIVISION OF THE GABRIEL COMPANY

135 CRESCENT ROAD, NEEDHAM HEIGHTS 94, MASSACHUSETTS

KEYBOARD OSCILLATOR SPECIFICATIONS



MODEL 150

This oscillator covers a range from 1 to 100,000 cycles with decades of pushbuttons. It has excellent frequency stability and its output is of low distortion. The instrument is especially useful for checking of filters, since it enables the user to explore a small portion of the curve in detail. For similar reason it has wide applications in tachometry and vibration analysis. Its wide frequency coverage facilitates testing of audio and carrier equipment. Due to its high accuracy and stability, it is commonly used for checking the accuracy of beat-frequency oscillators.

Its outstanding features are:

Ease and speed of frequency selection.

Ease and accuracy of repeating previous settings.

Ability to vary frequency in small steps over a wide range.

On both lower ranges, the frequency is selected by the use of 4 decades of pushbuttons. On the top range, 3 decades of pushbuttons are used together with a continuous control.

Separate trimming controls for each range are readily accessible in the rear. It is possible to track any part of a range against external standards, if an increased accuracy is required over a portion of that range.

Frequency Range: .3 to 100,000 cycles. Range 1—1 to 1,000 cycles in steps of .1 cycles. Range 2—1,000 to 10,000 cycles in steps of 1 cycles. Range 3—10 to 100 kilocycle in steps of 100 cycles, also a continuous fine control covering plus or minus 1% adjustable to 1 cycle.

Frequency Accuracy: 1 to 99.9 cycles, .5% plus .2 cycles. 100 to 999 cycles, .2%. 1,000 to 9,999 cycles, .3%. 10 to 100 kilocycles, 1%.

Frequency Stability: After 30 minutes warm-up, drift less than .02% per hour if room temperature stays within plus or minus 5°F.

Total Distortion: Less than .5% from 20 to 100 cycles. Less than .3% from 100 to 20,000 cycles, for loads above 2,000 ohms.

Output Impedance: One side grounded, internal generator impedance less than 150 ohms, connected to output through 250 MFD coupling condenser, terminals in rear for addition of external coupling condenser.

Panel Finish: Standard black crackle.

Power Requirements: 105-125 volts, 60 cps., 80 watts.

Size: Without cabinet—width 19", height 17.5", depth 13".

Weight: Net 90 lbs., packed for domestic shipment 200 lbs.

At your service – *when* and *where* you want them – these seasoned experts devote their time exclusively to the problems of equipment manufacturers and government agencies.

In addition, the service of three completely equipped application engineering laboratories, in Harrison, N. J., Lancaster, Pa., and Chicago, Ill., are at the disposal of all RCA tube and component customers. Through these laboratory facilities, equipment manufacturers can avail themselves of RCA's extensive engineering skills and tube and component experience.

RCA maintains conveniently located district offices in Harrison, Chicago, and Los Angeles. To put RCA's sales and engineering organization to work for you, phone the nearest office* . . . or write RCA, Commercial Engineering, Section 44FR, Harrison, New Jersey.

RADIO CORPORATION of AMERICA

ELECTRON TUBES — **HARRISON, N. J.**

Part Three—1951

The Business and Product Sections of this Directory are included for the service of IRE Members, so that this book will be complete as an index of an industry—listing Engineers, the Businesses they have founded, and the Products they have created for radio, television, communications and electronics.

Grateful acknowledgement is made to the nearly 3000 firms who so helpfully cooperated by answering our detailed questionnaires, and to the 260 advertisers whose informative advertising, and financial investment in space has made this project possible.

Parts 2 through 5 have been prepared by the Advertising Department, plan and make-up by William C. Copp; supervision Lillian Petranek; research, Frank G. MacAloon; IBM data Florence Diciedue. Part 4 includes information supplied by NEDA and The Reps. All product data is from questionnaires, Product News Stories and salesmen's reports received in 1950 and 1951, and firms not answering within 18 months of publication have been omitted for the sake of accuracy.

An index to Advertisers follows immediately on page 49.

The complete code to products is given on pages 50 and 51 together with cross-references and sub-classifications. The major product class numbers are shown after each firm name in the alphabetical list. Sub-classifications are shown by number after each firm name in the product index, giving much more detail than shown in earlier IRE DIRECTORIES. Addresses are not given for nonadvertisers, but full sub-classifications are shown and the state address is given for identification. Turn to the Part 2 Alphabetical List for addresses.

How to Use the Machol Edge Index

INSTRUCTIONS

1. Place the four fingers of your RIGHT hand back of the last page of this book.
2. Place your RIGHT thumb just below the 1 or 2 line symbol adjacent to the section you want.
3. Raise your RIGHT hand slightly and push it to the left bending the pages almost double. *This will spread the edges and cause the edge marks to show more clearly.*
4. Move your RIGHT thumb across the page edges, fanning the pages until you reach the corresponding symbol.
5. Open there—that will be the page you want.

How to Use the Machol Edge Index

High speed reference is a major objective of the IRE Directory. To this end we have adopted the Machol Edge Index system, and these indexes:

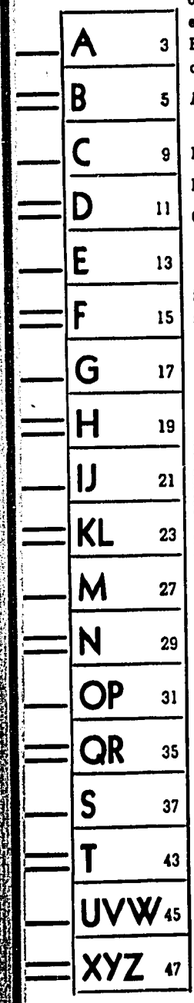
Advertisers Index, pages 49, 219 and inside back cover.

Key to Products (full) 50 & 51.

Index to Spreads & Catalogs, 224.

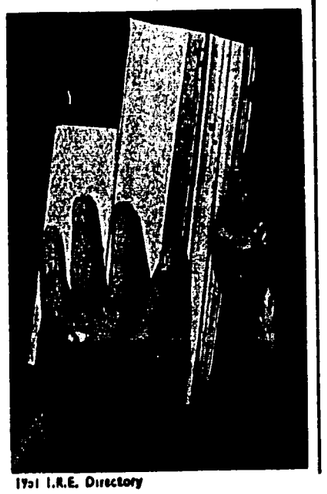
Guide to Machol Thumb Indexes facing 48 & 49

The Machol system will help you find both alphabetical and product sections swiftly.



INSTRUCTIONS

1. **Place the four fingers of your RIGHT hand back of the last page of this book.**
2. **Place your RIGHT thumb just below the 1 or 2 line symbol adjacent to the section you want.**
3. **Raise your RIGHT hand slightly and push it to the left bending the pages almost double. *This will spread the edges and cause the edge marks to show more clearly.***
4. **Move your RIGHT thumb across the page edges, fanning the pages until you reach the corresponding symbol.**
5. **Open there—that will be the page you want.**



1951 I.R.E. Directory

How to Use Our Business and Product Sections

The Business and Product Sections of this Directory are included for the service of members so that this book will be complete as an index of an industry—listing Engineers, the Businesses they have founded, and the Products they have created for radio, television, communications, and electronics.

The following 4 Parts of the IRE DIRECTORY are:

Part		Page
2	Company List of Radio-Electronic Manufacturers	3
3	Product Index of Engineering Equipment and Parts	49 & 108
4	The Radio-Electronic Distribution Field (Class 22)	93
5	Catalogs and Complete-Data-Spreads Section	224

—Advertisers Index—Cover III, 49 & 219—

Part 2

2932 firms have supplied us voluntarily with information about the components, equipment and services which they render the radio-electronic industry. The 1899 manufacturers are listed alphabetically in this section beginning on page 1 and ending on page 48. 1033 non-manufacturers such as distributors and representatives are listed under heading 22 in the product index section. This index therefore gives the names of manufacturers of specific products available for purchase, with their addresses and code numbers indicating 73 types of products which they offer.

The completeness of this list depended on information voluntarily supplied us. Our most vigorous efforts may not have made it complete, but the excellent cooperation received from most of the industry is directly responsible for the up-to-dateness of our product data. We will welcome additions and suggestions for the 1952 edition.

Part 3

The Product Indexes start on page 53 and continue through 218. In both the alphabetical and the product indexes advertisers who have made it financially possible to provide a really comprehensive Directory to IRE members, have been listed in bold face type with a cross index to the page on which their display advertisement appears—giving complete information on their products and services. Non-advertisers have been listed in the product indexes giving firm name and state only. For full address the reader must turn to the alphabetical index for these companies.

To find the advertisers of a given product, let us say "Amplifiers" look this product up in the table facing page 48. You will see that it is classification Number 1. A full listing of Amplifier manufacturers starts on page 53. Turn to this classification in part 3.

Part 4

As a service to engineers, both buyer and seller, we have included a list of 1033 firms and individuals who are distributors. Each name is further classified by number to indicate its place in the field—representative, distributor, exporter, etc. This is class #22, starting on page 93.

There are several other helpful indexes. Advertisers are given on Cover III (inside back cover) and page 49; and an index to 1951 Radio Engineering Show Exhibitors, and "Proceedings of the I.R.E" Advertisers is on page 219.

To get a comprehensive picture of what a given firm manufactures for engineers in our field, you will find in the alphabetical index of companies that all their products are listed by code number after the firm's name and address. An innovation this year is the inclusion of numbers for sub-classifications in the Product Indexes for all firms listed. We have tried vigorously to make this truly a useful "Radio Engineers Directory."

Part 5

Part 5 is one of the most informative and valuable sections of this Directory. Here manufacturers are supplying engineers with the maximum amount of detailed information possible through the use of double page spreads of their products (see pages 225-250). This is followed by a complete catalog file supplied by 14 manufacturers. These catalogs are filed in alphabetical order. The purpose of this section is to give the engineer a complete and ever available catalog file right in his IRE Directory where he can always see it easily and quickly. We believe that the services of this section will be of the utmost help to you.

Please submit all changes, corrections, additions and classification questions to Industry Research Div. c/o Proceedings of the I.R.E, 303 West 42nd St., New York 18, N.Y.

HOW LORD MOUNTINGS improve product performance

MULTIPLANE MOUNTINGS—

isolate vibration from all directions. Light in weight, small in size, they are widely used to mount electronic units.

PLATE FORM MOUNTINGS—

Standard—isolate steady vibrations. Shock-resistant—easily installed. Loads ½ to 320 pounds per mount.

Vibration Control Increases Sales—

Equipment purchasers appreciate smooth performance . . . they like the "feel" of effortless power which makes any product easier to use—more comfortable to live with. Vibration Control puts a star salesman in every demonstration—with every buyer.

Vibration Control Reduces Operating Costs—

Gears and bearings last longer when protected from high vibratory stresses. Instruments and controls require less maintenance and fewer replacements . . . are more accurate and dependable.

Vibration Control Increases Efficiency—

Worker fatigue is reduced, resulting in more production and greater accuracy. Constant vibratory disturbance prevents full efficiency from both men and machines. Vibration Control improves working conditions and boosts production.

TUBE FORM MOUNTINGS—

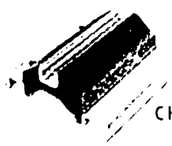
Standard—for steady vibration and severe shock. Have great radial stability. Loads from ½ to several thousand pounds.

TUBE FORM VERTICAL SNUBBING MOUNTINGS—

Isolate steady vibration . . . cushion shock. Good for mobile equipment.

PLATE FORM VERTICAL SNUBBING MOUNTINGS—

isolate steady vibration plus severe shock. Loads up to 610 pounds per mount.



CHAN-L-MOUNTS—

Ready to use—easy to install. Isolate steady vibration and occasional shock. Extremely soft and sturdy, they give superior isolation.

F.H.P. FLEXIBLE COUPLINGS—

have exceptional torsional flexibility . . . accommodate parallel and angular misalignment. Ratings from 1 fiftieth to 1 hp.

METER MOUNTINGS—

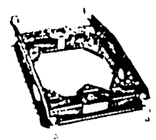
protect small meters and instruments from destructive vibration. One piece construction, easily installed . . . many sizes for most commonly used models.

***TEMPROOF MOUNTINGS—**

For Airborne Electronic Equipment

- Designed for use with JAN-C-172A cases.
- Exceed AN-E-19 drop test requirements.
- Maintain efficiency from −80° to +250° F.

*Temperature-proof



RAD OFOC MOUNTING BASES—

Maximum Protection for Airborne

- Insure protection at steep
- Dampers prevent excessive
- Equipment does not sag or
- Made to fit JAN-C-172A case

IF YOU SUPPLY EQUIPMENT TO THE ARMED FORCES . . .

Lord engineers will assist you to select the type of shock and vibration protection which meets the requirements of applicable specifications. As the major supplier of flexible mountings during World War II, Lord's knowledge and experience will enable you to supply approved equipment protection which is economical, efficient and easily installed.

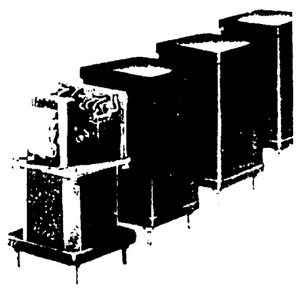
11-54 44th DRIVE, LONG ISLAND CITY, N.Y.

ANNOUNCES

PACKAGED **MAGNETIC AMPLIFIERS**

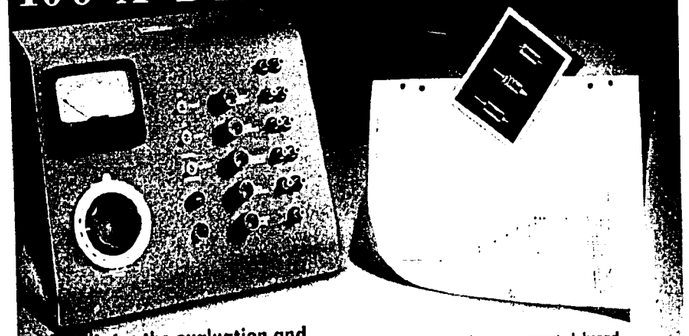


- Standard Units
- Push-Pull or Single
- Completely Self-contained
- As Easy to Install as a Transformer

Other Standard or Specially Engineered Units

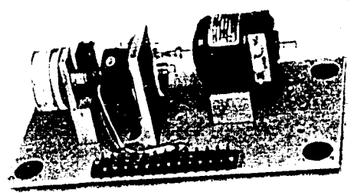
SATURABLE REACTORS, SATURABLE TRANSFORMERS
PRE-AMPLIFIERS, PHASE SENSITIVE DEMODULATORS
HIGH FREQUENCY MAGNETIC AMPLIFIERS

100-A DYNAMIC ANALYZER



- Facilitates the evaluation and adjustment of servo performance in the laboratory and on the production line.
- Determines transient and frequency response of a servo loop or its components.
- Measures phase and amplitude as functions of frequency; damped natural frequency, and first overshoot.

Signal elements mounted breadboard fashion on separate chassis for easy modification.



EACH UNIT CUSTOM-BUILT FOR A SPECIFIC APPLICATION

RANGE OF DATA FREQUENCIES: 1 CPM TO 50 CPS.

RANGE OF CARRIER FREQUENCIES: 50 TO 2500 CPS.

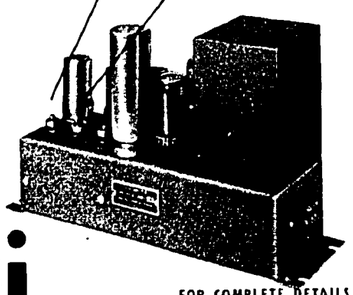
Servo-Mechanisms

Components and Test Equipment

CARRIER FREQUENCY AMPLIFIERS
PHASE DETECTORS
POWER SUPPLIES
MODULATORS

410-B SERVO AMPLIFIER

$J\ddot{\theta} + F\dot{\theta} + K\theta = 0$



- A 60 cycle, carrier frequency servo amplifier.
- Drives 2 phase motor with 5 watt mechanical output.
- Features independent controls on damping, gain, and carrier phase.
- A stock item with universality of application because of its range of adjustment.

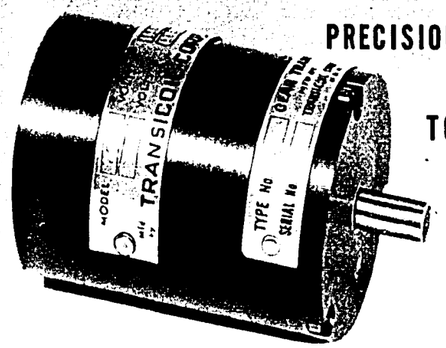
TRANSICOIL



PRECISION COMPONENTS TO *Your* SPECIFICATION

CONTROL MOTORS

Transicoil Servo Control Motors are 2-phase units, available for either 60-cycle or 400-cycle operation, in sizes from fractions of a watt to 10 watts mechanical output. They are precision assembled to operate under difficult conditions. Manufactured to your phase voltage requirements—line operation or plate-to-plate. Plate-to-plate types are a Transicoil development that has reduced weight and size. Moreover, they eliminate the need for output transformers.

PRECISION GEAR TRAINS

Beautifully miniaturized, designed to mount the motor and data elements and to provide the necessary output shaft, Transicoil Precision Gear Trains match a fine watch in their precise construction. Types supplied for all Transicoil and other control motors.

INDUCTION GENERATORS

Designed for operation in electronic equipment in which a variable voltage output must be proportional to a shaft speed having the same frequency as the supply. Output voltage is linear over an extended range. Low residual voltage, as a function of the design, enhances the performance of associated components. Induction generators also furnished with motor gear trains as a complete assembly when desired.

SERVO AMPLIFIERS

There are no fixed restrictions when you use Transicoil Servo Amplifiers! You specify such characteristics as: phase voltage, reduction rate, mounting, gain, phase shift, input impedance, and damping. We confine standardization to physical dimensions! Electromechanical feedback loops can also be built up with Transicoil components.

NOW! GREATLY EXPANDED FACILITIES

To meet the fast-growing demand for its products, Transicoil has recently tripled its production facilities. As in the past, there will be no "standard" Transicoil components. Each unit is designed, electrically and mechanically, to match your specifications *exactly*. Engineering representatives in leading cities. They will be happy to give you information on any specific problem.

- Complete antenna systems with switching units
- Communications antenna supports ... and dozens of special items

Hundreds of installations in all parts of the world, under all conditions of use attest to Trylon Tower dependability. As specialists in antenna supports for over 18 years, Trylon offers a broad, time-tested line of standard units plus complete facilities for the economical production of special types and designs.

Write for literature on any desired type—or, better yet, outline your antenna support problem for recommendation by Trylon specialists.

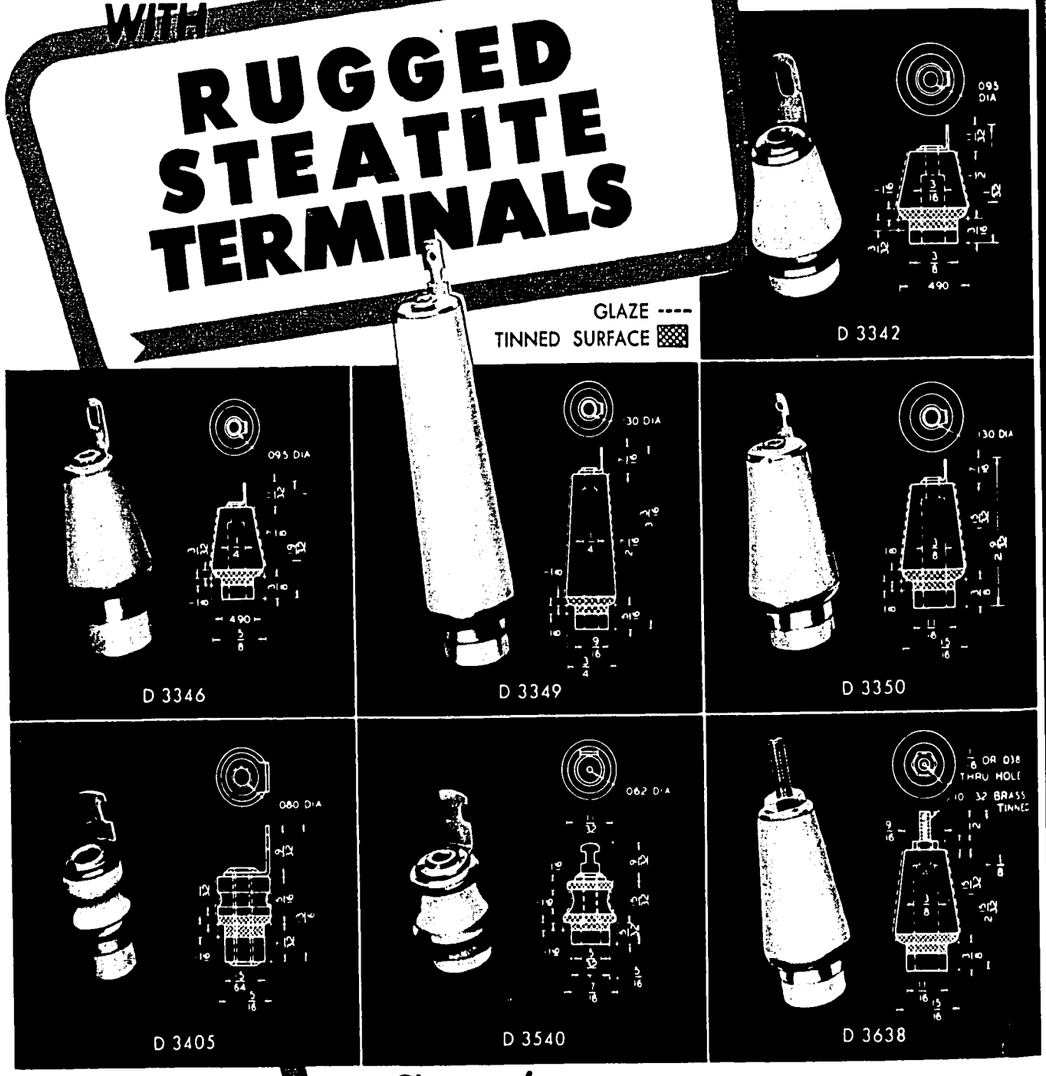
Solve your Hermetic Seal Problems WITH RUGGED STEATITE TERMINALS

GLAZE ----
TINNED SURFACE ▩



STEATITE OFFERS:

EASY ASSEMBLY
SUPERIOR STRENGTH
NON-DETERIORATION
PERMANENT SEALING
RESISTANCE TO HEAT
EXTREMELY LOW-LOSS

Specify General Ceramics and Steatite for complete dependability in critical applications

General Ceramics low-loss Steatite sealed leads feature superior mechanical strength that insures permanent, positive hermetic sealing under practically any operating condition. Immune to severe thermal shock, they are easily soft-soldered to closures without developing the strains that are an incipient cause of trouble in many other types of leads. There are no rubber or plastic gaskets to deteriorate. Resistance to mechanical shock and vibration is excellent. The types shown are standard and can be supplied promptly from stock. For complete information on these and for consultation on custom-made terminals to your specification, phone, call or write today.

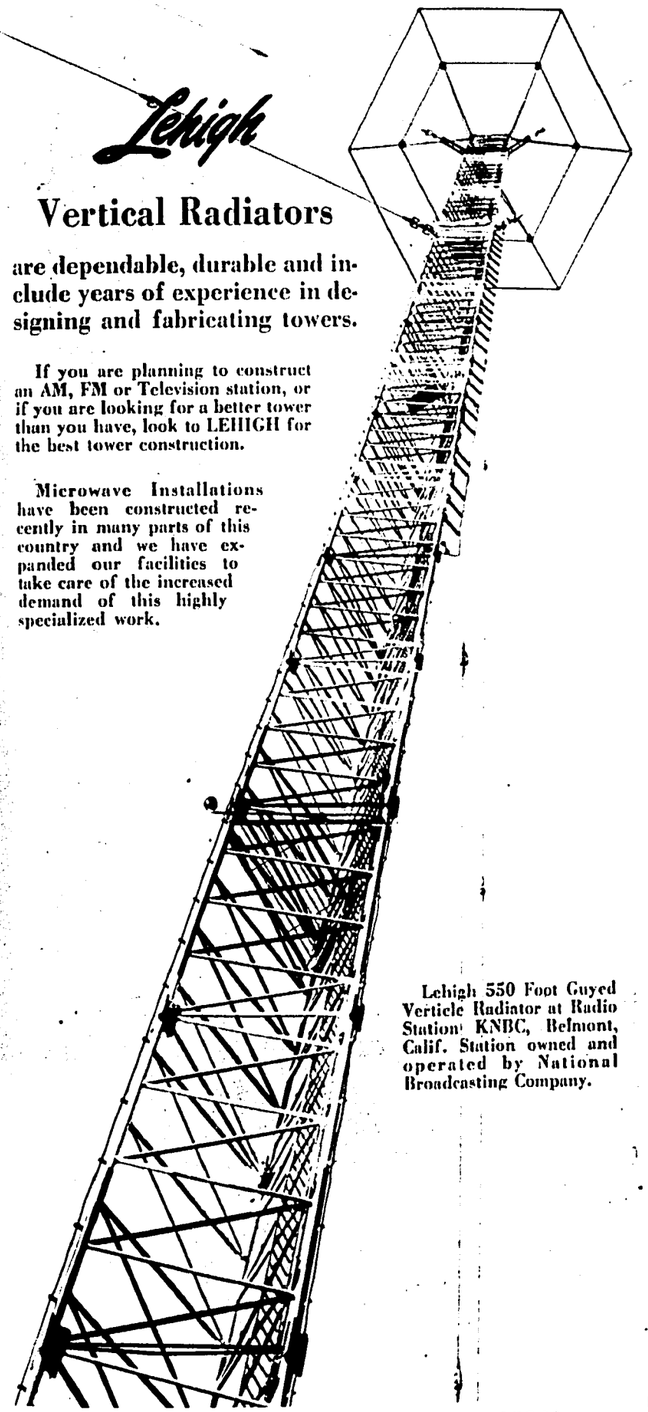
Lehigh

Vertical Radiators

are dependable, durable and include years of experience in designing and fabricating towers.

If you are planning to construct an AM, FM or Television station, or if you are looking for a better tower than you have, look to LEHIGH for the best tower construction.

Microwave Installations have been constructed recently in many parts of this country and we have expanded our facilities to take care of the increased demand of this highly specialized work.



Lehigh 550 Foot Guyed Verticle Radiator at Radio Station KNBC, Belmont, Calif. Station owned and operated by National Broadcasting Company.

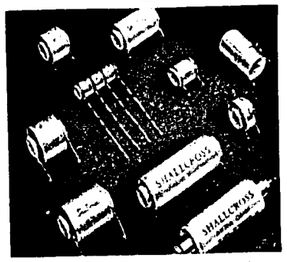
SHALLCROSS

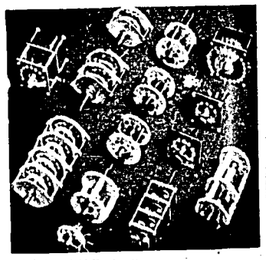


AKRA-OHM PRECISION RESISTORS

Not only are Shallcross Akra-Ohm wire wound precision resistors made to extremely close tolerances; equally important, they are physically protected to maintain their accuracy under difficult operating conditions. Types, shapes, sizes, and mounting styles for JAN and other exacting needs. Guaranteed tolerances from 0.1% to 0.02% and stabilities as low as 0.003% where required. Matched pairs and sets available. Write for Shallcross Resistor Bulletin R3A.

MULTI-POSITION SELECTOR SWITCHES

Shallcross regularly manufactures a wide variety of single or multi-deck selector switches having up to 180 positions and designed for dependable performance up to 250 volts 10 amperes or 2500 volts 1 ampere A.C. Contact resistance ranges from a low of 0.0005 ohms to a maximum of 0.005 ohms depending upon the size and material of the contacts. Outline your requirements on Specification Sheet No. 6 for recommendation. Write for Data Bulletin. L13.



PRECISION ATTENUATORS

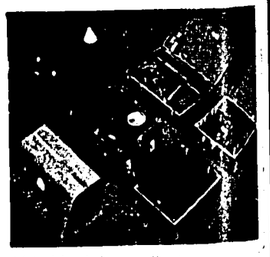
Improved materials and production techniques and careful quality control for Shallcross Attenuators have resulted in a line that sets new, higher standards of attenuation performance for practically every audio and communications use. Included are single and dual potentiometers, variable impedance matching networks, V. U. meter multipliers, cueing attenuators, fixed pads, pre-emphasis and de-emphasis networks, attenuation boxes, ladder and balanced ladder controls, and bridged T, straight T, bridged H, and straight H attenuators. Write for Attenuator Bulletin 4.

PRECISE MEASURING INSTRUMENTS

As long-time specialists in standard and special electrical measuring instruments, Shallcross welcomes your inquiry for any desired type. Standard instruments include:

Resistance Standards • Decade Potentiometers • Decade Resistance Boxes • Bridges, Wheatstone • Bridges, Kelvin-Wheatstone • Bridges, Limit • Bridges, Megohm • Capacitor Analyzers • Decibel Meters • Tone Generators • Telephone Test Equipment • Low-Resistance Test Sets • Insulation Test Sets • High-Voltage Test and Measuring Equipment.

Write for Shallcross Bulletin 10

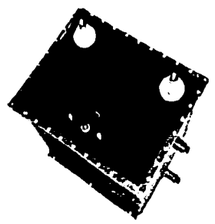


HI-MEG, HI-VOLTAGE RESISTORS

Special resistance elements hermetically sealed in ceramic tubes with ferrule terminals. Three standard sizes offer values to over 100 megohms. Write for Bulletin F.

HERMETICALLY-SEALED NETWORKS

Resistance, capacitance, bridge and inductance types available to meet critical electrical specifications and space requirements. Outline details of your requirements for recommendation by Shallcross Engineers.

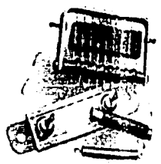


HIGH-RANGE KILOVOLTMETER MULTIPLIERS

Whether for direct high-voltage measurements or for use as standards, Shallcross KV meter multipliers combine close accuracy with safety and dependability. Various types are available for voltages up to 200,000 volts or higher if required. Write for Bulletin F.

CUSTOM-BUILT SPECIALTIES AND ENGINEERING SERVICE

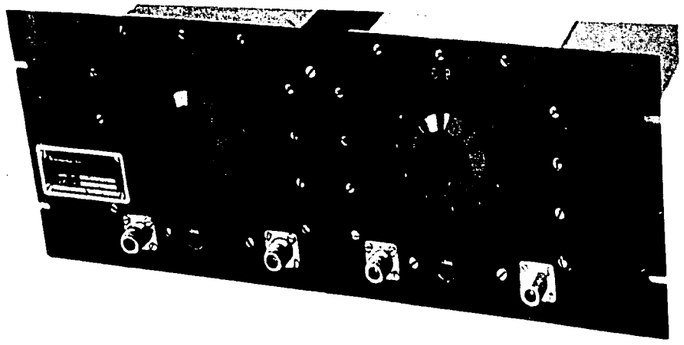
Sealed networks, high voltage measuring equipment, special test sets, thermally controlled networks, precise decades and networks for computer devices, high resistance standards, and critical coil assemblies are designed by Shallcross Engineers and built to meet your requirements. Forward your specifications for further information.



SHALLCROSS MANUFACTURING CO., Dept. PY-61, Collingdale, Pa.

HIGH FREQUENCY STEP ATTENUATORS

MODEL 60 AND MODEL 64



MODEL 60
MODEL 64 NOT SHOWN

These step attenuators exhibit negligible attenuation error over the frequency range of D.C. to 1,000 Megacycles.

Model 60 is supplied with an impedance of 50.0 ohms, and covers a range of 0-60 DB in steps of 1 DB, containing 2 drums, while Model 64 contains steps of .1 DB, using 3 drums.

Coaxial pads are used throughout. The resistance elements of each pad consist of stable, aged conductive films on ceramic or glass. A set of pads is mounted on a drum which is rotated to align any pad with a pair of matched, coaxial switches. The drums are mounted on one panel. Each drum through its switches and associated cables connects to a separate pair of female type "N" connectors located on the front panel. In order to minimize crosstalk, each drum is contained in its own shield.

The calibration is unaffected by operation at relative humidities as high as 95%.

SPECIFICATIONS

Frequency Range: D.C. to 1,000 Megacycles.

Accuracy (each drum): D.C. to 60 Megacycles. Attenuation departs less than plus or minus .2 DB from nominal attenuation.

D.C. TO 1,000 MEGACYCLES

0-10 DB Drum: Attenuation departs less than plus or minus .3 DB from D.C. attenuation.

0-50 DB Drum: Attenuation departs less than minus 1 DB from D.C. attenuation.

0-3-4 DB Drum (Model 64 only): Attenuation departs less than plus or minus .2 DB from D.C. attenuation.

Stability of Resistance Elements: Better than 1% per year and better than 2% per 5 years.

V.S.W.R.: Less than 1.02 at D.C. Less than 1.15 to 1,000 Megacycles when properly terminated. Zero Insertion Loss at 1,000 MC is less than .1 DB.

Attenuation: Model 60 0-60 DB in steps of 1 DB
Drum A, 0 DB, 10 DB, 20 DB, 30 DB, 40 DB, 50 DB.
Drum B, 0 DB, 1 DB, 2 DB, 3 DB, 4 DB, 5 DB, 6 DB, 7 B, 8 DB, 9 DB, 10 DB.

Model 64 Drums A and B same as Model 60.
Drum C 0 DB, 3.0 DB, 3.1 DB, 3.2 DB, 3.3 DB, 3.4 DB, 3.5 DB, 3.6 B, 3.7 DB, 3.8 DB, 3.9 DB, 4.0 DB.

Impedance: 50.0 ohms, unbalanced, non-directive, type "N" connectors.

Power Capacity: 100 milliwatts CW.

Temperature Coefficient of Resistance Elements: Less than .07%/°C.

Calibration Supplied: Insertion Loss, V.S.W.R., at D.C. and 1,000 Megacycles.

Dimensions: Unit panel mounted, supplied suitable for rack mounting, panel 19" x 7", max. depth behind panel 15".

Each pad contains several series pads and shunt disc resistance elements consisting of stable, aged conductive films on ceramic or glass properly protected from atmospheric effects. Connections between terminal strips and resistance elements are soldered. Due to their special construction these elements may be exposed to considerable shock and vibration without damage.

The attenuator pad is provided with one female and one male type "N" connector at opposite ends.

A longitudinal pressure of over 20 lbs. on either center pin is required before damage to the resistive element occurs. Therefore breakage of attenuator elements due to mating with misalignment or out-of-tolerance connectors is minimized.

SPECIFICATIONS

Available Attenuation Range: Any value from 1 DB to 10 DB in 1 DB intervals. Any value from 10 DB to 50 DB in 10 DB intervals. Suffix numerals of model number represent attenuation in DB.

Accuracy: At 60 Megacycles attenuation departs less than plus or minus 1 DB from D.C. attenuation.

D.C. TO 1,000 MEGACYCLES

Range 1-10 DB: Attenuation departs less than plus or minus .3 DB from D.C. attenuation.

Range 10-50 DB: Attenuation departs less than minus 1 DB from D.C. attenuation.

V.S.W.R.: To 1,000 Megacycles less than 1.15.

Impedance: 50.0 ohms, unbalanced, non-directive.

Connectors: One male and one female type "N".

Power Capacity: 100 milliwatts CW.

Temperature Coefficient of Resistance Elements: Less than .07%/°C.

Dimensions: Length 3"±" max. and ½" max.

Pads of terminations having characteristics other than those listed are available on special order. correspondence is invited.

Also available are coaxial pads with type "N" fittings and letters for ¼" lines similar to the following JAN types:

CN-30 to CN-41, inclusive "N" connectors DC to 1,500 Megacycles.

CN-29, CN-42 and CN-43 "N" connectors 2,500 to 3,300 Megacycles.

CN-84 to CN-87, inclusive "N" connectors, 2,000 to 10,000 Megacycles.

CN-79 to CN-81, inclusive.

CN-110, CN-168, CN-169.

¼" line, 1,000 to 4,000 Megacycles.

Your inquiries for special attenuators in production quantities are invited.

HIGH FREQUENCY ATTENUATOR PAD

MODEL 50-1 TO 50-50

These attenuator pads exhibit small attenuation error over the frequency range of D.C. to 2,500 Megacycles.

(Above) Kovar Metal, the ideal alloy for glass sealing, is furnished in the form of tubes, rods, sheet, foil and fabricated shapes.

(Right) Stupakoff Metal-to-Glass Seals are made in a variety of sizes and ratings.

ASSEMBLIES —Stupakoff assemblies include metallized ceramic Induction COILS for radio receivers and transmitters; metallized ceramic SHAFTS for air-tuning condensers; METALLIZED PLATES for making fixed rigid assemblies; ceramic trimmer condensers; printed circuits.

CERAMICS —Stupakoff has long been a leading supplier of ceramic products for a wide variety of electrical and electronic applications—precision made for all voltages, frequencies and temperatures.

RESISTOR CERAMICS —Stupakoff Temperature-Sensitive Resistors are used for temperature indicating or measuring equipment such as Radiosonde, for infra-red light source and for heating elements. Supplied complete with terminals, in the form of rods, tubes, discs, bars, rings, etc.

STUPALITH —A group of ceramics having remarkable ability to withstand extreme thermal shock. STUPALITH may be made to have zero, low-positive or low-negative expansitivities. Formed by conventional methods. Safely used at temperatures up to 2200° F.

CERAMIC DIELECTRICS —Stupakoff makes general purpose Ceramic Dielectrics for by-pass, lead through blocking, standoffs and trimmer applications. Temperature compensating Ceramic Dielectrics have coefficients from P-100 to N-2700, and high K materials up to K-6000. Made in the form of tubes, discs and special shapes, plain or silvered.

PRINTED CIRCUITS —Amplifiers, couplings, filters, integrators.

SEALS KOVAR-GLASS —Terminals; Lead-ins; Standoffs—for hermetically sealing for mechanical construction in radio, television, electronic and electrical apparatus. Single or multiple terminal units, in a wide variety of sizes and ratings.

KOVAR METAL —Kovar is the ideal alloy for sealing to hard glass. Used for making hermetic attachments for electrical and electronic products. Available in the form of rod, wire, sheet, foil—or as cups, eyelets or other fabricated shapes.

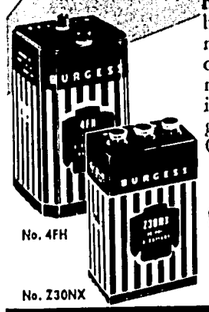
STUPAKOFF CERAMIC AND MANUFACTURING CO.

LATROBE, PA.

Independent Research Proves:

2 out of 3 Engineers Prefer BURGESS BATTERIES!

NO WONDER Burgess is *the* first source for industrial dry batteries. Burgess long-life dependability and uniform, high-level performance are backed by more years of engineering "know-how" than any other batteries. The maintenance of highest quality always is the reason why 2 out of 3 engineers prefer Burgess... by independent survey. Check for your local source of supply or write now!



WRITE FOR ENGINEERING MANUAL AND CHECK SHEET—No obligation. By return mail you will receive the FREE Engineering Manual listing the complete line of Burgess Batteries together with detailed specifications; also the Burgess "Check Sheet" on which you may outline your battery requirements in the event that the battery you need has not already been developed. THESE BOOKS CAN BE HELPFUL TO YOU

THE NEW

Molesworth's Handbook of Engineering Formulae and Data

The new, completely revised, re-illustrated and fully indexed 34th edition of this world-famous handbook is now available at the remarkably low price of $6.50. In its 1623 pages you will find complete, up-to-date data from all branches of engineering—all formulas, standard units and conversion factors, mathematical tables, specifications, and all other reference data.

Micro-Wave Measurements

By Barlow and Cullen. An inclusive, up-to-date reference on the theory and techniques of high frequency measurements, emphasizing practical information needed by engineers working in radar and allied fields. $6.00

Electric Circuits for Engineers

By Kraybill. A basic text and reference on circuit theory and applications, especially useful for the practical electrician. An excellent book for industrial training. $3.85

Television & FM Antenna Guide

By Noll & Mandl. A course in antenna principles and a handbook of data on all types of antennas, including new types recently tested by the authors, with complete installation instruction. $5.50

Movies for TV

By Battison. What to do and what NOT to do to insure the best use of film on TV for all types of programs, commercials, newsreels. All equipment and its operation fully explained. $4.65

THE UNIQUE

Mathematical Engineering Analysis

By Rufus Oldenburger

This book presents new and proved methods of expressing physical engineering situations in mathematical equivalents. It shows you what factors in any problem to consider and which to neglect; what basic laws to use; how to make simplifying assumptions; what kinds of forces to assume in new situations. It coordinates and reduces to a minimum number of basic laws the principles of ALL branches of engineering and gives sample equations and problems showing how to set YOUR problem up. $6.00

Radio & Television Mathematics

By Fischer. A useful review and reference on the formulas to use, the numerical values to substitute, and the solution of all problems involving mathematics commonly encountered in radio, television, and industrial electronics. $6.00

Transmission Lines & Filter Networks

By Karakash. A thorough treatment of theory, using a quantitative approach. Low and high frequency circuits are fully covered and the useful applications of the matrix operator in high frequency problems are explained. Modern transmission line charts are included. $6.00

Television for Radiomen

By Noll. To insure good servicing use this exceptionally clear, thorough, and highly recommended text for training your technicians. $7.00

Two Dimensional Fields in Electrical Engineering

By Bewley. Clear, thorough explanation of concepts fundamental to many engineering problems. $5.50

Fundamental Electronics & Vacuum Tubes

By Albert. A standard, widely used text, now in a revised edition. $6.00

Recent McGRAW-HILL BOOKS

McGRAW-HILL BOOKS CHOSEN "BEST" BY I.R.E. MEMBERS
In a recent survey of technical book users, McGraw-Hill books were selected as best by 85% of I.R.E. members who responded: 25% more than any other publisher named. (See I.R.E. Proceedings, December, 1950.)

✓ *Check these 10 volumes to see which ones can help you most*

THEORY AND APPLICATION OF INDUSTRIAL ELECTRONICS

1. Thoroughly treats the entire field of industrial electronics. Breaks the field down to its basic principles, showing many practical applications of electronic circuits and devices. Covers electronic instrumentation of both electrical and non-electrical quantities, electronic control, and electronic power—including induction heating and dielectric heating. By John M. Cage, Prof. of Elec. Eng., Purdue U.; with the assistance of C. F. Bashe, Research Eng., I.B.M. Corp. 290 pp., 245 illus., $4.75

ELECTRONIC MOTOR AND WELDER CONTROLS

2. Here is practical help for those who must select, install, or service electronic controls for motors and resistance welders. The book explains circuit operation of tube-operated equipment found in two major groups of motor and resistance-welding control. Starts each chapter with an introduction to a complete electronic equipment and then splits it into its component circuits, pinpointing each operation with simple descriptions and diagrams. By George M. Chute, Application Eng., G.E., Detroit. 348 pp., 187 illus., $6.50

THEORY AND DESIGN OF TELEVISION RECEIVERS

3. Gives physical explanations and mathematical theory for the behavior of various television circuits from the engineering viewpoint, as well as discussing their practical design. Covers standards governing television transmission, the operation of every circuit and section, and receiver servicing techniques. Presents numerous tables, graphs, and cross-section schematic drawings. By Sid Deutsch, Polytechnic Research and Development Co., N.Y. 536 pp., 387 illus., $6.50

TELEVISION PRINCIPLES

4. A practical treatise on the principles and theory of television transmission and reception. Emphasizes basic TV transmitter and receiver design, and such subjects as video amplifiers, cathode followers, grounded grid amplifiers, signal-to-noise ratios in headends, intermediate frequency amplifiers, and detection. Contains helpful reference charts, curves, and tables. By Robert B. Dome, Elec., Consultant, Electronics Dept., G.E. Co. 281 pp., 85 illus., $5.50

RADIO ENGINEERING HANDBOOK

5. Completely revised fourth edition brings all detailed data and practice covering all aspects of radio engineering. Emphasizes design data, presented in a profusion of tables, charts, equations, formulas, and diagrams. Covers everything from electric and magnetic circuits to such radio applications as television and facsimile. Prepared by a staff of specialists. Editor-in-Chief: Keith Henney, Editor of Electronics. Fourth Edition. 945 pp., 836 illus., over 1000 tables, $10.00

SHORT WAVE RADIATION PHENOMENA

6. An advanced manual of short-wave radiation phenomena applying to frequencies from about thirty megacycles per second up to the highest radio frequency in practical use. Describes radiation effects in absence of electromagnetic wave obstacles. Effects of obstacles are treated with respect to reflection, refraction, and diffraction of electromagnetic waves. Recent advances are covered, and numerical applications are given by means of charts and curves. By Dr. August Hund, Scientific Radio Consultant. Radio and Communication Series. 2 vols. 1326 pp., illustrated, $20.00

PROPAGATION OF SHORT RADIO WAVES

7. Because of the intensive development during the war of radar and communication equipment operating at frequencies above 100 mc/sec. considerable effort has been directed toward investigating the propagation characteristics of radiation at frequencies too high to be affected by the ionosphere. This book summarizes the results of these investigations in a concise and authoritative form. Edited by D. E. Kerr, Vol. 13, M.I.T. Radiation Laboratory Series. OSRD-NDRC. 729 pp., 296 illus., $10.00

ANTENNAS

8. Thoroughly covers basic antenna theory, methods of antenna measurements, and their engineering applications to antennas for all frequency ranges. Treats point sources—power, field and phase patterns—mutual impedances of antennas—end fire and broadside arrays—linear, loop, slot, helical, and other types . . . stressing practical aspects of antenna problems throughout. Includes scores of diagrams, equations, tables, and formulas. By John D. Kraus. 533 pp., 368 illus., $8.00

WAVEGUIDE HANDBOOK

9. Here in compact form are all the currently available theoretical data and some experimental data on the properties of microwave transmission lines, microwave circuit elements, and structures—presented in the form most easily applied in practical circuit design. Theoretical results are stated in analytical form, but the book contains a profusion of graphs presenting results in numerical form. Edited by N. Marcuvitz. Vol. 10 M.I.T. Radiation Laboratory Series. OSRD-NDRC. 428 pp., 140 illus., $7.50.

THRESHOLD SIGNALS

10. Provides an analysis, both theoretical and experimental, of the factors affecting perception of desired signals in the presence of various kinds of interference, principally inherent receiver noise. Emphasizes signals and interference usually encountered in pulsed systems, and other systems are discussed. Treats pulse trains which are amplitude modulated in some desired manner. Edited by J. L. Lawson, Research Ass't., G.E. Research Lab., and G.E. Uhlenbeck, Prof. of Physics, U. of Mich. Vol 24—M.I.T. Radiation Laboratory Series. OSRD-NDRC. 388 pp., 171 illus., $5.00

IN BUSINESS LENZ SINCE 1904

Wire for Defense Projects!

HOOK-UP WIRES and CABLES for COMMUNICATIONS EQUIPMENT and ELECTRONIC INSTRUMENTS

FOR almost a half century Lenz has been producing insulated Wires and Cables for the Communications Industries, wires that are engineered and designed under high quality standards.

Now, Lenz is prepared to furnish hook-up wire and cables for defense projects, conforming to Government specification JAN-C-76 TYPES WL, SRIR and SRHV.

These Thermo-Plastic Insulated Wires, with or without Lacquered Braids, and the cables constructed of same, are available for use in Communications Equipment and Electronic Instruments.

For a dependable source for your wire and cable requirements, consult Lenz.

INTERFERENCE FILTERS

For military and civilian needs, particularly aircraft and radio-equipped vehicles.

MICA CAPACITORS

Dozens of different types, including low-loss molded casings and the silver micas.

MOLDED PAPER TUBULARS

For extra-severe service. Aerolene impregnant eliminates necessity of stocking both oil and wax tubulars. No deterioration in stock.

OIL CAPACITORS

From tiniest tubulars to giant steel-case units in ratings up to 50,000 volts.

HIGH-TEMPERATURE MINIATURES

Hermetically-sealed with vitrified ceramic seal, in tubular metal case.

METALLIZED-PAPER

Full utilization of space-saving factor, together with self-healing feature.

MICRO-MINIATURES

Molded thermo-plastic tubulars. Two sizes: 3/16" d. x 7/16" l.; 4" d. x 9/16" l.

ELECTROLYTICS

Widest choice of containers, terminals, mountings, combinations. In 85° C. and higher temperature ratings.

SAFE Capacitor Specifications

● From tiniest metallized-paper capacitor symbolizing *miniaturization*, to giant oil capacitor for atom-smashing Betatron, you are SAFE in *specifying Aerovox*. For Aerovox makes *all* categories, types, sizes and ratings. More than that: with a background experience second to none, Aerovox engineers are always ready to study your circuitry, components, operating conditions and anticipated life. Thus capacitor selection is custom-fitted to your exact requirements. And that is why Aerovox capacitors have such outstanding service records.

● *Literature on request. Submit that capacitance problem for engineering aid and quotations.*

AEROVOX CORPORATION

THE HOME OF CAPACITOR CRAFTSMANSHIP

AEROVOX CORPORATION, NEW BEDFORD, MASS., U.S.A.

Export: 41 E. 42nd St., New York 17, N.Y. • Cable: AEROCAP, N.Y. • In Canada: AEROVOX CANADA LTD., Hamilton, Ont.

SALES OFFICES IN ALL PRINCIPAL CITIES

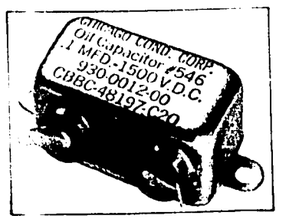
CHICAGO OIL IMPREGNATED VACUUM FILLED CAPACITORS

RECTANGULAR TYPE

APPLICATIONS

INDUSTRIAL • TRANSMITTING
POWER FACTOR CORRECTION
MOTOR CAPACITORS
SIGNAL INSTRUMENTS

CHICAGO CONDENSER'S rectangular type capacitors are hermetically sealed and tested at twice-rated voltage.



BATHTUB TYPE

APPLICATIONS

RADIO • INTERFERENCE
MOTORS • ELECTRONICS
SPECIAL TIMMING

CHICAGO CONDENSER'S bathtub type capacitors are hermetically sealed and tested at three-times voltage.

CHICAGO CONDENSER has engineering and plant facilities to meet specialized military requirements.

Drawings and specifications submitted will receive immediate attention.

IF IN DOUBT,

THROW IT OUT!

That is our rule for raw materials going into Planet electrolytic capacitors. The manufacturing standards set for high-quality Planet capacitors will not allow compromise in the matter of materials and components.

Aluminum foil, condenser paper, chemicals — all items used in our electrolytics — are purchased against strict specifications from thoroughly reliable sources, then subjected to exhaustive analysis and tests before usage.

Screening out all possible trouble at the source makes the finished product trouble-free — eligible to bear the Planet trademark.

For complete information, write for the latest Planet Catalog, C-2.

PLANET MANUFACTURING CORPORATION

PLANET

CORNELL-DUBILIER ELECTRIC CORP.

South Plainfield, N. J. Other plants in New Bedford, Brookline and Worcester, Mass.; Providence, R. I., Indianapolis, Ind., and subsidiary, The Radiart Corp., Cleveland, O.

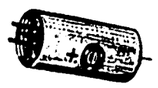
41ST ANNIVERSARY CORNELL-DUBILIER CAPACITORS 1910-1951

CONSISTENTLY DEPENDABLE

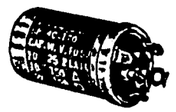
CORNELL-DUBILIER

CAPACITORS — AUTO VIBRATORS
TV AND FM ANTENNAS — ROTATORS — CONVERTERS

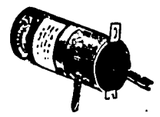
ELECTROLYTICS



"BLUE BEAVER*" Electrolytics — most popular for all applications where dependability and economy are essential. In single and dual capacities at 25 to 500 V.D.C.W.



TYPE UP's for safe operation at temperatures +65°C. or +85°C. In all commercial capacities at voltages from 10 to 500 V.D.C.W.



TYPE EZ universal mounting units. Practical, dependable, economical. In all capacities at voltages from 150 to 450 V.D.C.W.

PAPER CAPACITORS

ROYAL TIGER Polykane Tubulars for operation at −35° to +100°C. A new type tubular in all capacities from 100 V.D.C. to 1000 V.D.C.

TYPE TMC's are also available in all standard capacities and voltage ratings up to 6,000 V.D.C. Can also be furnished to JAN specifications.

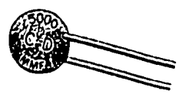
TYPE DYR Oil-filled "bath tub" capacitors. Provided with terminals either side, top or bottom. In all capacity combinations and voltages to 1000 V.D.C.

DYKANOL* TRANSMITTER CAPACITORS

TYPE T's are the finest, most dependable capacitors obtainable for broadcast and commercial transmitting application. In all popular capacities up to 7,500 V.D.C.

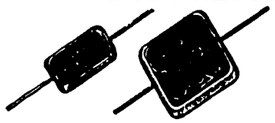
TYPE TQ DYKANOL* CAPACITORS. Hermetically sealed in round aluminum containers. With two insulated terminals available at voltages between 600 and 3,000 V.D.C.

TINY MIKE* CERAMICS



Miniature disc type—highly efficient, low cost. Remarkably rugged. Available in capacity range of 1,000 mmfd. to 5,000 mmfd. guaranteed minimum capacity, at 500 V.D.C.W. Units of between 100 and 150 mmfd. at ±20% or ±10%.

MICA RECEIVING AND TRANSMITTING CAPACITORS

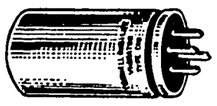


MOULDED MICAS for all requirements. Available moulded in low loss bakelite. "Silver-Mike" micas for use in high Q electronic circuits.

TYPES 4 and 9—for amplifier and transmitter applications. All capacities in voltages to 5,000 V.D.C. test.

TYPE 50 Series Transmitter micas feature world famous series stack construction.

VIBRATORS

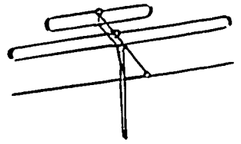


C-D vibrators are quieter, longer lasting, more efficient.

CONVERTERS

FOR D.C. TO A.C.; A.C. TO D.C.; D.C. TO D.C. CONVERSION.

TV, AM, FM, AUTO and ROTATOR ANTENNAS



Sturdily constructed for a lifetime of trouble-free service.

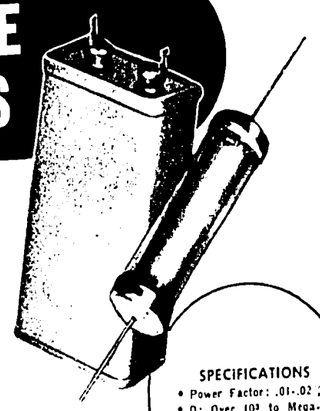
(Continued on page 77)

POLYSTYRENE CAPACITORS



Unicon Polystyrene Capacitors are characterized by extremely low losses. The power factor and the dielectric absorption are so low as to be practically negligible, while the insulation resistance is so high that less than 1% of the original charge on one of these capacitors is lost after a 24 hour period. The capacitance stability is of a high order. Possessing such high electrical qualities, Unicon Polystyrene Capacitors are ideal elements for use in electronic analyzers and computers, in tuned circuits and wave filters, as standards of capacitance, in radiation detection equipment, and in batteryless power supplies.

Unicon Polystyrene Capacitors are available in several different types of housings, including wax-filled cardboard tubes, hermetically sealed glass tubes with metal end caps, hermetically sealed metal cans with low-loss glass or ceramic terminals. They are also available uncased for inclusion in cases holding other components.

Prices on Unicon Polystyrene Capacitors are reasonable, and delivery is excellent.

Key: & = Can be supplied with plastic impregnation for 125°C operation (cap. variation 15%)—improved moisture proof qualities.
= Can be supplied with Duroil impregnate for 100°C.
* = Can be supplied with Silcone oil impregnate for 125°C (capacity variation 3%).

Group a: TR—, TS—, TM— Suitable for high temperatures with high stability and low power factor. Completely molded, otherwise same as above.

Group b: DR—Highly stable low power factor capacitor.
DS—Highly stable low power factor capacitor.

Group c: P6M—, PB, PC Quality low cost commercial capacitor line with long life and low leakage.
PBM Miniature line similar to the above.
PCM Miniature line similar to the above.

Group d: PCF Fireproof capacitor.
PCST Circuit Stabilizer (television).

Group e: P-20, P-21, P-22, P-70 A hermetically sealed line of metal casing capacitors with glass seals, silicone rubber seals, plastic seals, ceramic bushings.

Group f: FPI Flat wax or plastic impregnated adapted to close spacing.
RP2 Round wax or plastic impregnated.

Group g: Super Cap. These electrolytics are available in hermetically sealed cans.

may cure your insulating headaches

TEFLON

MYKROY (glass bonded mica)

KEL-F

You are invited to explore the wide possibilities of these 3 materials. They have limitless industrial and electrical applications. From our experience with many extraordinary high voltage, high frequency and high temperature requirements, we are certain one of the 3 will hold the answer you are looking for.

TEFLON, MYKROY and KEL-F are available to you in sheets and rods or molded and machined to your specifications.

Write for descriptive literature on any or all of these materials. We'll be pleased to quote on your own requirements. No obligation.

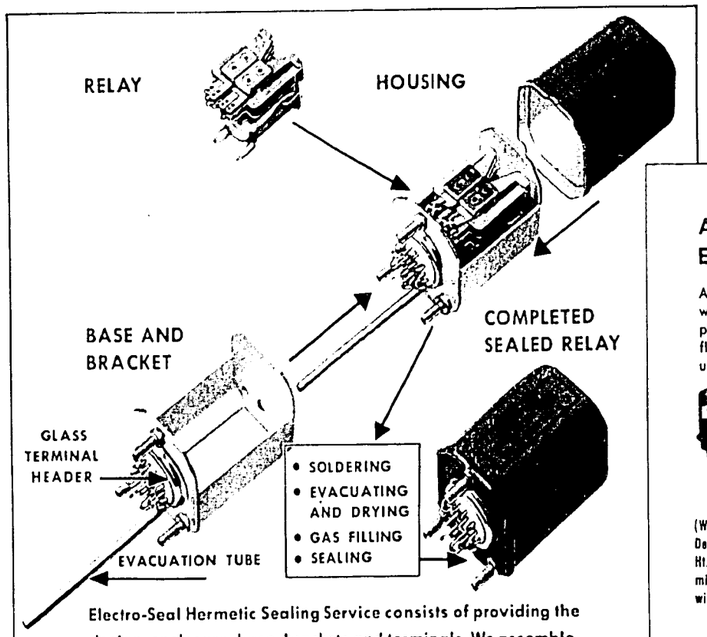
TO CUT COSTS — Or For Miniaturization
. . . Consider Printed Circuits

The low cost, high production aspects of printed circuitry is worthy of your investigation. We will be happy to provide you with samples and information relating to our printed circuit work upon your request.

Complete and cordial co-operation will be given in adapting our printed circuits to your design.

GLASS PRODUCTS CO. 6911 S. South Chicago Ave. FAirfax 4-1050 Chicago, 37, Ill.

Make atmosphere a part of your product



Electro-Seal Hermetic Sealing Service consists of providing the design, enclosure, base, brackets and terminals. We assemble, wire and seal your component in an atmosphere of dry, inert gas. Enclosure is evacuated by high vacuum system and thoroughly tested for leaks by means of a mass spectrometer.

A FEW STANDARD TYPES OF ELECTRO-SEAL ENCLOSURES

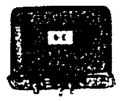
All Electro-Seal Enclosures can be equipped with individual terminals, multiple headers or plug-in arrangements as well as mounting flanges or studs. Dimensions given are inside usable dimensions.

SERIES 5-E

(Dia: 1 ½", Depth: 1 ⅞", Overall Outside Ht.: 2 ⅜"). Normally equipped with octal plug.

SERIES 6-E

(Width: 1 ⅞", Length: 4 ⅜", Depth: 2 $^{15}/_{16}$", Overall Outside Ht.: 3 $^{1}/_{16}$"). Size frequently permits sealing several components within the enclosure.



SERIES 8-E

(Dia: 2 $^{19}/_{64}$", Depth: 2 ⅞", Overall Outside Ht.: 3 ½"). Normally equipped with octal plug. Maximum base area required: 2 ½" x 2 ½".

SERIES 13-E

(Width: 1 $^{9}/_{64}$", Length: 1 $^{33}/_{64}$", Depth: 2 $^{3}/_{16}$", Overall Outside Ht.: 2 $^{3}/_{8}$"). Base provided with three mounting studs.

SERIES 14-E

(Width: 1 $^{9}/_{16}$", Length: 2 ⅝", Depth: 2 $^{11}/_{32}$", Overall Outside Ht.: 2 ½") Size frequently permits sealing of several items within the enclosure.

Electro-Seal Hermetic Sealing Increases Usefulness, Life and Freedom from Maintenance of Many Types of Electrical Products

No matter how efficient and dependable your product . . . relay, transformer, flasher, timer, amplifier, vibrator or other electrical device . . . it will only operate most reliably in "ideal" atmosphere.

Electro-Seal Hermetic Sealing Service permanently surrounds your product with atmosphere free of moisture, dust, fungi or pressure changes . . . makes it tamper-proof.

For aircraft use, hermetic sealing guards against failure caused by varying air pressure and condensation. In industry, it provides a safe enclosure in hazardous locations and complete protection from dirt and dust.

Let us show you how Electro-Seal Hermetic Sealing Service can add to the life and reliability of your product by making atmosphere a "built-in" part of the product.

Enclosures can be made up by temporary tools to provide small quantities for engineering samples or limited production schedules. We invite you to send complete engineering information and samples of parts to be hermetically sealed.

COILS

TO

YOUR SPECIFICATIONS

We manufacture quality coils for the radio and electronics industry. Universal, bank-wound, universal-progressive or solenoid coils made to JAN specifications. Let us know your requirements: We will quote promptly.

FUGLE-MILLER LABORATORIES

399 Main St. METUCHEN — Me 6-2245 NEW JERSEY

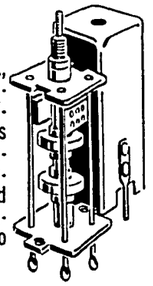
RELY on desco for Quality Engineering!

Desco Coils to JAN Specs

...waxed, varnished, baked, thermo-setting plastic coated, vacuum impregnated, potted, etc.

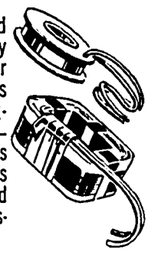
UNIVERSALS

All types I. F., R. F., B. F. O. coils, etc. conforming to latest military design • All sizes Cup Core coils • Special coils—Permeability Tuned—Shielded—Unshielded • Oscillator coils—Video coils—Chokes.



SOLENOIDS

All types—Single and Multiple Layer • Relay Coils • Audio-power transformer windings • Bobbin Coils—Magnetic Head Coils—Recorder Erase Coils Paper Interleaved Coils Hermetically Sealed units in standard transformer cases.



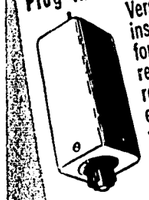
TOROIDS

All sizes including wedding rings—cased or uncased—wound on stabilized cores and heat cycled • Hermetically sealed Filters & Transformers of all types.

Coils also available to usual commercial requirements for TV, FM, AM receivers, etc.

Plug-in Housings—30 Models

Versatile aluminum plug-ins, with threaded bases for stud mounting coils, relays, filters, crystals, resistors, condensers, etc. • Special models with permeability tuned coil forms—various pin arrangements—etc.



Your inquiries handled promptly.

High-quality, Low-cost
TOROIDAL COILS

Universal-developed coil-winding machines produce a *better* toroidal coil, *custom-built* to your blueprint specifications, at considerably *lower unit cost!* Wound on any type cores (any I.D. to ⅜"), in any size wire, Universal toroidal coils are perfectly uniform and fully insulated. Send your blueprint specifications today, and let us quote the lower cost of better Universal toroidal coils on your next order.

Telephone Port Washington 7-3334

ELECTRICAL CIRCUIT CONNECTORS

MONOBLOC* CONSTRUCTION eliminates unnecessary creepage paths and reduces possibility of moisture and dust pockets and provides stronger molded parts.
MOLDED MELAMINE body parts insure greater mechanical strength and high dielectric and arc resistance.
PRECISION MACHINED CONTACTS are gold plated over silver for consistent electrical conductivity, prevention of corrosion and ease in soldering.
MANY FEATURES ARE COVERED BY OUR PATENT NUMBERS: DES 161900, DES 162795, 2466370, 2513080, 2526325, 2532538 and other patents pending.
*Trade Mark

CONNECTORS	DESCRIPTION	Types Available
SERIES A 	LIGHTWEIGHT AIRCRAFT RECTANGULAR Polarized, Rack, Panel or Cable Mounted—with Hood or Clamp and Cable Strain Relief.	Receptacle / Plug A7S / A7P A10S / A10P A15S / A15P A18S / A18P (Figures in above Code Nos. indicate number of contacts.)
SERIES SA 	LIGHTWEIGHT AIRCRAFT RECTANGULAR—SMALL Polarized, Rack, Panel or Cable Mounted—with Hood or Clamp and Cable Strain Relief.	Receptacle / Plug SA7S / SA7P SA10S / SA10P SA15S / SA15P SA18S / SA18P (Figures in above Code Nos. indicate number of contacts.)
SERIES M	MINIATURE For Aircraft, Instruments and Portable Equipment Light Weight, Polarized, Locking Ring, Panel or Cable Mounted with Hood and Cable Strain Relief.	Receptacle / Plug M4S / M4P M5S / M5P PM6S / PM6P M7S / M7P M9S / M9P M12S / M12P (Figures in above Code Nos. indicate number of contacts.)
SERIES MRE 	MINIATURE RECTANGULAR For Aircraft, Instruments and Portable Equipment Light Weight, Polarized, Self-Aligning with special Guide Pins, Rack, Panel or Cable Mounted with Hood and Cable Strain Relief.	Receptacle / Plug MRE7S / MRE7P MRE9S / MRE9P MRE12-2S / MRE12-2P MRE14S / MRE14P MRE18S / MRE18P MRE20S / MRE20P MRE21S / MRE21P MRE34S / MRE34P MRE41S / MRE41P MRE50S / MRE50P MRE75S / MRE75P
SERIES SMRE	MINIATURE RECTANGULAR—SMALL For Aircraft, Instruments and Portable Equipment Light Weight, Polarized, Self-Aligning with special Guide Pins, Rack, Panel or Cable Mounted with Hood and Cable Strain Relief.	Receptacle / Plug SMRE14S / SMRE14P SMRE20S / SMRE20P SMRE26S / SMRE26P SMRE29S / SMRE29P (Other sizes to meet your requirements)
SERIES QRE 	QUICK-DISCONNECTING SELF-ALIGNING Spring Loaded Contacts for ease in separation. Self-Aligning with Special Guide Pins, Rack, Panel or Cable Mounted with Hood and Cable Strain Relief.	Receptacle / Plug QRE6S / QRE6P QRE12S / QRE12P QRE18S / QRE18P QRE24S / QRE24P QRE34S / QRE34P QRE208S / QRE208P (Figures in above Code Nos. indicate number of contacts.)

CONNECTORS	DESCRIPTION	Types Available
SERIES R	WATER TIGHT AND PRESSURE-TIGHT Center Lock Screw with Bale facilitates engagement and disengagement and prevents accidental disconnection. Cable Entry with Strain Relief can be oriented in any desired position.	Receptacle / Plug R4S / R4P R9S / R9P R14S / R14P MR30S-PR / MR30P-PR (Figures in above Code Nos. indicate number of contacts.)
SERIES 200-900 Generally Mounted in A-N Shells	HIGH VOLTAGE HEAVY DUTY PRESSURE-TIGHT Center (H.V.) contacts separated by deep molded barriers and removable in the field for soldering wire leads. Other contacts for lower voltages. Neoprene Ring Sealed Contacts and Inserts for Pressure Tight Sealing in A-N Shells.	Receptacle / Plug 202 / 201 202B / 201B 202B-PR * / 201B-PR 302 * / 301 422 * / 421 451 * / 450 455 / 455 456-PR * / 455-PR 902 * / 921 *Pressure Tight Sealed in A-N Shells
SERIES HM	HERMETIC PLUG (Round Hole) Each special contact fused in glass into special base plate provided for soldering into a round hole in an hermetically sealed housing or bulkhead. Used with Standard "M" Receptacle.	Plug (Used with Standard M5S or M7S Recep'ts) HM5P HM7P
SERIES HMRE	HERMETIC PLUG (Rectangular Hole) Each special contact fused in glass into special base plate provided for soldering into a rectangular hole in an hermetically sealed housing or bulkhead. Used with Standard MRE Receptacle.	Plug (Used with Standard MRE Recep'ts) HMRE7P HMRE9P HMRE14P HMRE18P HMRE20P HMRE21P HMRE34P HMRE41P HMRE50P
SERIES PT	MINIATURE For Instrumentation, Communication and other Electronic Equipment. Compact, Lightweight, Polarized. Plug mounted on flat surface or spun in end of tube. Receptacle mounted on end of cable with special clamping hood and holding screw which also prevents accidental disconnection.	Receptacle / Plug PT4S / (PT4P (PT4P2 PT6S / (PT6P (PT6P2 (First Figure in above Code Nos. indicates number of contacts.)

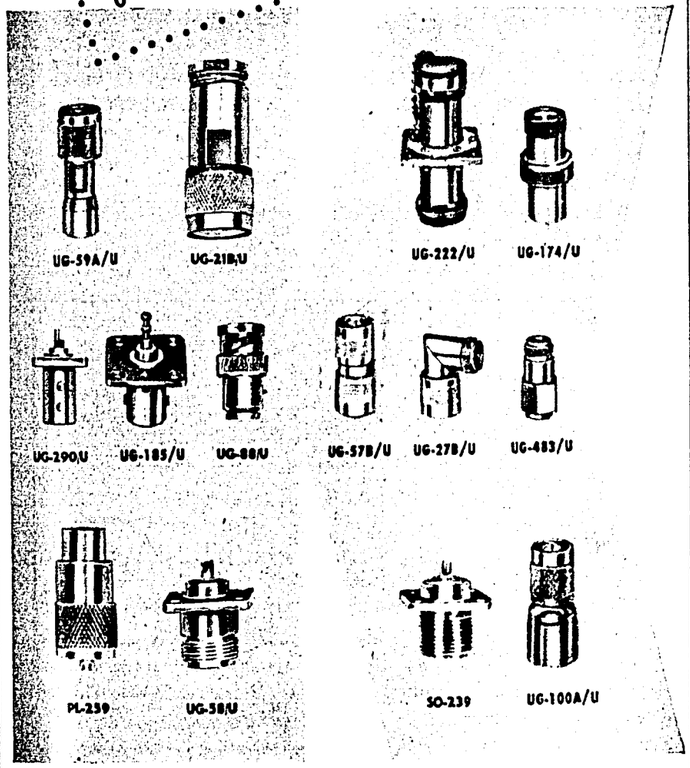
KINGS COAXIAL CONNECTORS



preferred by engineers everywhere

From coast-to-coast, engineers in all fields look to Kings Electronics for the finest coaxial connectors.
Special problems in design and fabrication receive the wholehearted cooperation of Kings own engineering department.
For precision-made, pressurized R.F. Connectors call on Kings—the leader. Quotations on request.

ASCOP

Designer & Producer of New Electronic Devices

- SCIENTIFIC RESEARCH, DEVELOPMENT AND CONSULTATION.
- ASSOCIATED PRODUCTION, PRODUCTION ENGINEERING, AND MODELS.
- COMPARATIVE ANALYSIS OF SPECIFIC EQUIPMENTS AND TECHNIQUES.
- DETERMINATION OF REQUIREMENTS AND THEIR CRITICAL EVALUATION
- GENERAL SYSTEM EVALUATION AND ANALYSIS.

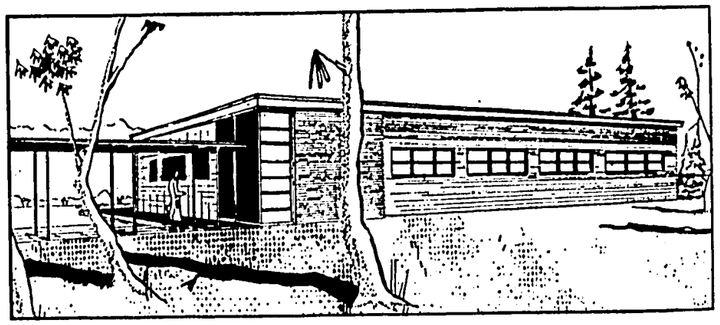
MULTICHANNEL RADIO TELEMETERING SYSTEMS AND COMPONENTS

MINIATURIZED TIME DIVISION & SUBCARRIER TELEMETERING EQUIPMENT

HIGH AND LOW SPEED MULTICHANNEL MECHANICAL SAMPLING DEVICES

DATA TREATING, ANALYZING AND DISPLAY METHODS AND TECHNIQUES

CUSTOM BUILT ELECTRONIC AND ELECTRO-MECHANICAL EQUIPMENT



ASCOP makes its expanded facilities available to you for the application of basic scientific principles to the design and development of electronic and electro-mechanical devices. The new and modern ASCOP laboratory, centrally located on the East Coast, is in the heart of one of the country's leading research centers.

The ASCOP Group offers you experience in many scientific fields—particularly those related to Aircraft and Guided Missile development. A unique combination of theoretical and practical approaches assures the best and latest techniques in product design and development.

The ASCOP Group—as specialists in multichannel instrumentation and remote measurement—has contributed substantially to the development and standardization of methods and techniques used in the Radio Telemetering field.

HOW MAY WE BEST SERVE YOU?

MINIATURIZATION OF ALL TYPES

The benefits of our wide technical experience gained by years of intense research in a highly developed field, are placed at your disposal through engineers with "know how."

We take pride in the assistance we have been able to render our customers in the solution of their problems and can assure you that your inquiries will receive the same prompt and detailed attention as do your orders.

ATLANTIC ELECTRONICS CORPORATION
4A MANHASSET AVENUE
PORT WASHINGTON, NEW YORK
POrt Washington 7-3703

Your files of the "Proceedings" will give you service when you adopt

TIME SAVING *"Authorized BindingS"** **SPACE SAVING**

Compact, readily accessible in handsome new *Authorized Bindings* your technical periodicals can now yield greater service. With the durable, I.R.E. blue buckram binding, your name on the front cover, these enhanced values are permanently preserved.

Important too, is the intangible asset of *Authorized Bindings* —the unfailing impression of taste and organization which they create in the library, office or laboratory.

The economy of cost, $3.45 per volume of twelve issues, January to December inclusive, bears little relation to the convenience they afford. The constantly growing need for the preservation of technical and professional literature in many fields is highly significant to subscribers who are now adopting *Authorized Bindings!*

Ship your journals together with remittance and we will return the bound volumes prepaid.

* *Approved by the publisher.*

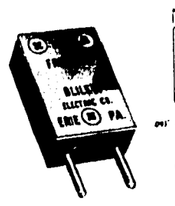
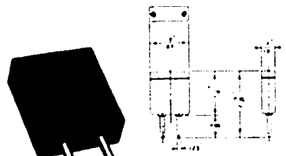
MILITARY REQUIREMENTS — Bliley Crystals — COMMERCIAL APPLICATIONS



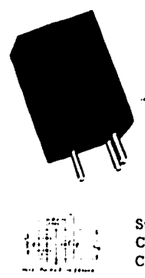
TYPE MC9
RANGE: 1.0-10.0 mc
Supplied per mil type CR-5; CR-6; CR-8; CR-10 when specified.



TYPE SR5A
RANGE: 2.0-15.0 mc
Supplied per mil type CR-1A when specified.

TYPE BH6A
RANGE: 0.8-75.0 mc
Supplied per mil type CR-18; CR-19; CR-23; CR-27; CR-28; CR-32; CR-33; CR-35; CR-36 when specified.

TYPE TCO-1
200-600 kc, 1-100 mc
Dimension "L" is 1½" for TCO—1 oven (single crystal) Dimension "L" is 1 11/16" for TCO—2 oven (two crystals)



TYPE AR23W
RANGE: 0.080-0.19999 mc
Supplied per mil type CR-15; CR-16; CR-29; CR-30 when specified.

TYPE BH7A
RANGE: 15.0-50.0 mc
Supplied per mil type CR-24 when specified.

BLILEY . . . THE STANDARD FOR COMMERCIAL APPLICATIONS FOR OVER TWENTY YEARS!

TYPE SR8

TYPE MC7

TYPE SR10

TYPE CF6

TYPE SR7

TYPE BH9

TYPE FM6

TYPE BC46T

TYPE TC92
Temperature Stabilizer

Whenever precision frequency control is needed . . . Bliley crystals are predominately chosen for dependability and accuracy. For over 20 years Bliley has supplied the crystals used in equipment by research, manufacturing and engineering organizations.

ULTRASONICS: Quartz blanks produced to customer specifications for ultrasonic application or research. Material carefully processed to individual requirements.

DELAY LINES: Fused quartz delay lines custom-built to specifications.

CUSTOM ASSEMBLIES: Facilities are available for *volume* production of complete crystal oscillator subassemblies in accordance with military specifications.

Custom Built Electronic Components

Micro-Wave components include radar filters—cross bar switches—magnetic tuners—crystal holders—crystal converters—dial assemblies—jacks and connectors—coil forms—crystal heater ovens—cavity tuners and cathode-ray tube parts.

Precision machined parts, stampings and castings used in communication and aircraft industries.

Fabricated in beryllium copper, mclybdenum, tantalum, monel, plexiglass and polystyrene.

Competent engineering and experienced design assistance is available.

JOHN GOMBOS CO., INC.
103 Montgomery St. ESSEX 3-6633 Irvington 11, N.J.

LOW-COST Q, BUT QUICK

If you need powder-iron cores quickly, call on Lenkurt. A substantial increase in productive capacity just completed means fast deliveries and *reduced prices*, together with better mechanical and electrical control over quality.

Cylindrical iron-powder tuning-slug cores illustrated are available in all popular sizes between 0.195 and 3.375 in. diameter. Up to 1 inch O.D. with threaded inserts as required. Powder-iron assemblies in other forms — particularly toroids — are also produced for rapid deliveries.

Special sizes and types as well as standard items can be supplied in a wide range of magnetic materials to suit your application. Write today for further data or specific recommendations.

THE Hunt CORPORATION
CARLISLE 2, PENNSYLVANIA

SETTING EVER HIGHER STANDARDS OF PERFORMANCE

STABILIZED CRYSTALS

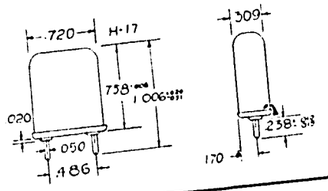
Performance is proof of product quality, and that's why JK STABILIZED CRYSTALS are held in such high esteem by those who depend on them.

Listed here are only a few of the many, many high quality crystals and ovens produced by the JAMES KNIGHTS COMPANY — the company that is constantly pioneering improved crystal performance.

Write now for complete catalog that lists them all, including the outstanding FS 344 Frequency Standard.

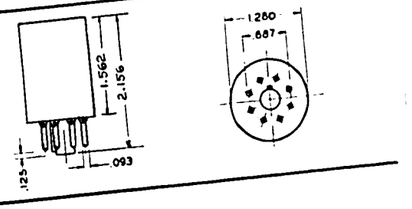
H-17

- Frequency Range 200 kc to 100 mc
- Hermetically sealed metal holders
- Wire mounted, silver-plated crystals
- Two type H-17 holders fit loctal socket.
- H-17 is military type HC6/U, CAATC No. 3R1-3



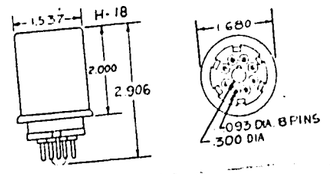
JKO-2

- Holds two type H17 (Military HC6/U)
- Normal temperature 75° ± 2°C
- Ambient range −55 to + 70°C
- Heater 6.3 volts, under 1 amp.
- Standard octal base



H-18

- Frequency range 80 kc to 2 mc
- Hermetically sealed metal holder
- Wire mounted silver-plated crystals
- H-18 has octal base.
- H-18-5 has standard 5 pin tube base.

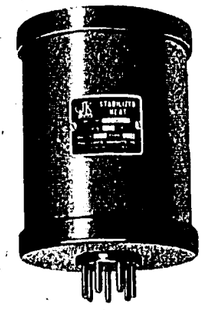


THE JAMES KNIGHTS COMPANY, SANDWICH, ILLINOIS

JK-57-MT

- Frequency range 400 kc to 1750 kc adjustable ± .01%
- Normal temperature 60°C ± 2°C (adjustable ± 10°C)
- Ambient range for 60°C operation, −20 to +58°C
- Heater 6.3 volts at 1-1/2 amp
- JK-57-M has standard 5 pin base, JK-87-M has octal base
- Low temperature coefficient plate will stay within FCC tolerance during warmup from normal room temperature
- F C C approved for broadcast use
- JK-57MT & JK-87MT have thermometer

JK-07



- Will hold any JK type crystal except H-6, H-18T and H-19
- Normal operating temperature 50°C ± 2°C
- Will hold temperature as much as 75°C above the ambient
- Supplied complete with Johnson No. 237 socket
- JKO-7E has sealed-in-glass thermostat for greater precision and longer life
- Available as JKO7 or JKO7E with 6.3 volt 10 watt heater or 115 volt 12 watt heater on either model
- Ideal for frequency standards and broadcast (FM & TV) FCC approved

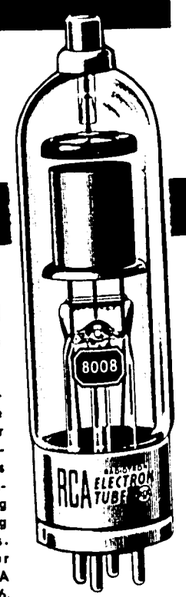
ALLIED

world's largest distributor . . .

RCA

electron tubes for industry



free

Interchangeability Directory

Send for this valuable guide to the selection of proper RCA tube type replacements. Lists 1600 type designations, covering non-receiving electron tubes. Write for your FREE copy of RCA Guide No. 37-046.

Quick, Expert Service on All RCA Tubes

ALLIED maintains in constant stock *for quick shipment*, the world's largest distributor inventory of RCA special-purpose tubes—*of all types.* We specialize in supplying the tube needs of industrial, broadcast, governmental and other users. Phone, wire or write—we ship *from stock* to any part of the nation within hours after we receive your order. Save time, effort and money—fill *all* your tube needs at ALLIED—the *complete, dependable* electronic supply source for industry.

* RCA-8008 Rectifier (illustrated). We stock the full line of famous RCA mercury-vapor rectifiers, including such well-known types as the 575-A, 673, 816, 857-B, 866-A, 869-B, 872-A, and 5558.

Look to ALLIED for RCA:

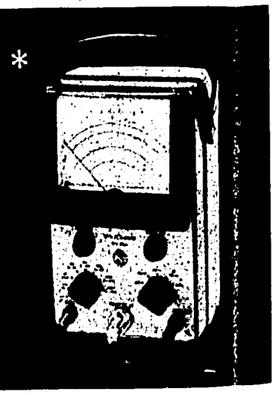
- *Vacuum Power Tubes*
- *Thyratrons*
- *Cold-Cathode Tubes*
- *Oscillograph Tubes*
- *Vacuum & Gas Rectifiers*
- *Ignitrons* • *Phototubes*
- *Camera Tubes* • *Monoscopes*

leading distributor of RCA test instruments

Look to ALLIED for Prompt Service. Order your RCA laboratory measurement instruments from our extensive stocks. We specialize in the supply of electronic test and measurement equipment for research and development requirements, as well as for maintenance and production operations. Simplify and speed your purchasing—send us your consolidated orders for RCA Tubes and Test Instruments—have the advantages of quick, expert shipment from the world's largest stocks of Electronic Supplies for Industry.

* RCA WV-97A Senior Voltohmyst (illustrated). We can supply *all* RCA instruments, including the following well-known lab measurement equipment:

- *WO-56A 7" Oscilloscope*
- *WO-79B 3" Oscilloscope*
- *WO-57B 3" Oscilloscope*
- *715-B 5" Lab Oscilloscope*
- *WV-84A DC Microammeter*
- *WR-39C TV Marker Generator*
- *WR-59B TV Sweep Generator*



NEW FREE 1952 ALLIED CATALOG

COMPLETE 212-PAGE BUYING GUIDE

Send today for the new 1952 complete 212-page ALLIED Catalog—the authoritative buying guide to *all* electronic supplies. ALLIED offers the world's largest stocks of special tubes, parts, test instruments, audio equipment—complete quality lines of electronic apparatus. Save time, energy and money—send your consolidated orders to ALLIED—the single, dependable electronic supply source.

Remote Control and Measurement

Raymond Rosen Engineering Products, Inc., one of the foremost designers and producers of telemetering equipment, can solve your instrumentation problem quickly and surely. Our Engineering Staff can show you the way in these and other typical applications:

- Stress analysis on prototype aircraft
- Guided missile research
- Upper air investigation
- Pilotless aircraft control
- Long-range weather forecasting
- Atomic research
- Chemical process analysis
- Pipe-line flow control
- Flood forecasting
- Physio-medical research
- Flow/contour analysis on test vehicles

RREP commercial telemetering systems are designed using standard RREP units as a foundation . . . standard units which are specifically designed to complement each other . . . these units, by building block incorporation into the over-all system, insure excellence of systems performance as additional needs arise.

RREP offers engineering services to aid in your installation, service and testing problems, including consultation on layout and application . . . emphasis on your particular needs and recommendations for additional usage . . . complete test facilities.

RREP offers recently designed precision units of outstanding characteristics for laboratory use . . . FM Receivers . . . R/C Discriminators . . . Recording Compensation Equipment.

RREP telemetering systems are presently used by State and U.S. Government Agencies, Scientific Laboratories and Research Organizations, and by Industrial Manufacturers.

Your Inquiry is Invited

HUDSON RADIO & TELEVISION CORP.

Formerly Newark Electric Co., Inc. (Of New York)

Authorized Distributor of All Standard Electronic Equipment

ALWAYS HAS A COMPLETE STOCK OF

HUDSON

Has Everything for Users of Electronic Equipment....

FAST SERVICE Quick Delivery Anywhere — Mail Orders shipped Within 24 Hours to Any Part of the World!

COMPLETE STOCK Largest Stock in the East of All Standard Makes of Radio, TV, Electronic and Sound Equipment ... Tubes, Components, Test Equipment, Replacement Parts, etc. etc. If we don't stock it, we'll get it... quickly!

CENTRAL LOCATION A Gigantic New Office, Store, and Warehouse at 48 West 48th Street, Adjoining Radio City, and our large downtown store at 212 Fulton Street, in "Radio Row"... 2 Convenient Locations!

LOWEST PRICES As Authorized Direct Distributors with large volume we can sell at the Lowest Possible Prices!

EXPERT PERSONNEL Our Trained Men know their jobs and can help with your electronic problems. Mail, Phone and Wired Inquiries Receive Prompt Attention!

SOUND STUDIOS Complete Sound Studios at Both Locations! Our New, Ingenious, Remote Controlled Installation at 48th Street is the last word in Sound-Comparison-Selector devices.

CHICAGO

hermetically-sealed TRANSFORMERS and Filter Reactors meet the full requirements of MIL-T-27

the Complete Transformer line that Meets Military Specifications

If you require fully approved MIL-T-27 Transformers and Filter Reactors for prototype models, pilot runs or special applications, and need them in a hurry —call your electronic parts distributor for *quick service* on CHICAGO Hermetically-Sealed units. Chances are he'll have them in stock—and you'll save valuable time and effort. There's a *complete* range of CHICAGO MIL-T-27 Transformers available: *Power, Bias, Filament, Filter, Audio.*

CHICAGO Hermetically-Sealed Transformers are the world's toughest units, preferred by engineers for those rugged applications. These stock transformers may be incorporated in your equipment with full assurance that they meet *complete* MIL-T-27 specifications.

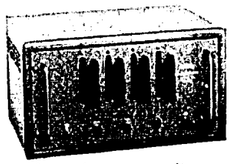
ELECTRONIC INSTRUMENTATION

for **LABORATORY** *or* **PRODUCTION LINE!**

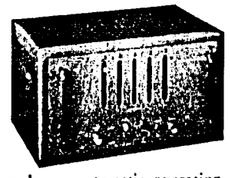
DECIMAL COUNTING UNIT, MODEL 700 is a direct reading electronic counter capable of operating at speeds up to 30,000 counts per second. Digits from 0 to 9 are presented on illuminated front panel. Electrical reset to zero. Plug-in octal mounting for easy interchangeability. The counter operates on input pulse of 100 volt neg. with 2 microsec. max. rise time. Output will drive following unit in cascade. Dimensions 1⅜" x 5" x 5¼". Wt. 12 oz. Other models to a million counts per second.

ELECTRONIC COUNTER, MODEL 10 was developed to meet the need for a rugged industrial counter operating at speeds up to 6000 counts per minute. Total count is displayed on the Decimal Counting Unit and the mechanical register to a maximum capacity of 9,999,999. Unit may be operated from closing contacts, photocell, or any means that will supply a positive potential of at least 3 volts. All circuitry moisture and fungus proofed. Unit is available in a variety of vapor-proof and explosion-proof housings to meet individual requirements. Dimensions 6¼" x 7¼" x 6½". Weight approximately 6 lbs.



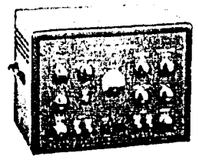
PRESET COUNTER consists of a series of scale-of-10 electronic counting units each in parallel with a 10-position push-button switch. This instrument accepts counts in the conventional manner at rates up to 10,000 cps. Any number from 0 to maximum capacity may be preset merely by depressing appropriate push-button in each column. Upon reaching the preset count, the unit supplies an output pulse to drive a register, close a gate, divert a production line or perform any other desired function. It then resets to 0 and recycles automatically. Available in any desired capacity.

EVENTS PER UNIT TIME METER, MODEL 554 will automatically count and display the number of events that occur during a precise one second interval at rates up to 100,000 events per second. Accuracy is ± one event. Will operate either manually or automatically to count any mechanical, electrical, or optical occurrences, regularly or randomly spaced, that can be converted into changing voltages. Instrument counts for one second and displays the results on illuminated five-digit panel. Will recycle continuously on automatic operation. Convenient test switch permits 2 second self-check of entire unit. Dimensions 20¾" x 10½" x 15". Weight approximately 68 lbs.



TIME INTERVAL METER, MODEL 510 provides a direct reading of elapsed time between any two events in the range of 0.000010 to 1.00000 seconds. Accuracy is ± 10 microseconds. Any occurrences that can be translated into changing voltages may be so timed. Timing may be started and stopped by independent voltages, the polarity of which may be selected by means of toggle switches. Sensitivity control permits selection of the amplitude of start or stop voltages at optimum level for elimination of interference. Dimensions 20¾" x 10½" x 15". Weight approximately 58 lbs.

SINGLE/DOUBLE PULSE GENERATOR MODEL 903 is a general purpose laboratory instrument that supplies either single or paired pulses individually variable in amplitude, width and polarity. Pulse spacing is continuously variable from 0 to 10 microseconds, pulse width from 0.10 to 1.6 microseconds and pulse amplitude from 200 volts maximum negative and 50 volts maximum positive for 1000 ohm load, and 10 volts maximum negative and 50 volts maximum positive for 50 ohm load. Single or double pulses are available through separate panel connectors. Repetition rate internally controlled 1 to 1000 cps. Push-button control single cycle. External signal control for any rate up to 1000 cps.



These are basic descriptions of representative standard instruments. A variety of modifications, both standard and special, are available to meet specific requirements. For complete details write Dept. Y.

Eyelets?
Eyelet machine products?

Here, illustrated full size, are some examples of the parts we make—in a wide variety of metals and finishes. Some are of simple design . . . others are intricate, precision-made parts for industrial, electrical and scientific purposes.

We'll be glad to quote on your requirements, and have thousands of stock tools which may save tooling-up charges. Just send us a sample, drawing or description, together with quantity and other pertinent information.

THE AMERICAN BRASS COMPANY,
Dept. WBG, Waterbury 20, Connecticut. 51269

In Connectors.. *it's Alden First*

The tremendous expansion in electronic equipment, uses and design call for connectors and connecting devices that are more than just holdovers from the battery set era. Here at Alden's we feel we are approaching the connector component problem with a conception most in keeping with the advanced electronic trends.

Our cable connector design avoids heavy plumbing type housings and rat nest wiring. Through the use of the exclusive Alden Top Connected Contacts, our connectors can be quickly supplied in volume—completely furnished with tailored leads—in designs that pack greater performance, higher quality into less space at lower cost.

In a whole new series of designs, Alden has engineered Components for Plug-in Unit Construction that allow the engineer to design electronic equipment so that it can be grouped as individual plug-in unit, sub-assemblies. These components can give electronic equipment instant accessibility for ease in manufacture and in service.

The same Alden design techniques and production approach used in our connectors and connecting devices is proving invaluable in computer component manufacture—as the Static Magnetic Memory, a new pulse handling and storage device best illustrates.

For engineered connections of the most timely design—look to Alden.

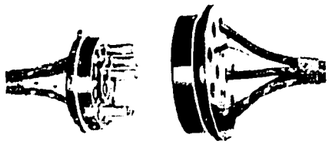
CONNECTORS

Carefully designed, low resistance contacts make top connections to wire leads to give you these exclusive features (1) 100% molded insulation around each clip and lead (2) no bulky housings or waste metal—require less space, less material (3) each lead has individual strain relief (4) mechanical hold means less danger of cold solder joints.

CRT 211/214 Series

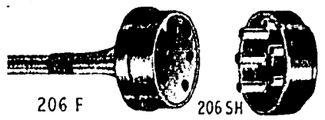
Pioneers in cathode ray tube connectors magnal, duo decal, diheptal—meet highest standards for gov't. instrument or TV work.

Non-Interchangeable 100 200/11 Series



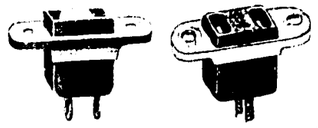
Multiwire connectors with 2 to 11 contacts in variable pin layouts. . . . Commercial replacement for AN connectors.

Plugs & Sockets 200FC/SH Series



Ideal detachable terminal connectors—3 to 7 contacts—UL collars—top engineering.

ELECTRICAL SPECIALTIES



Smallest, most rugged UL approved AC convenience outlets available, 402 AC Series—Saves space and critical material.

RUGGED DIAL LIGHT SOCKETS

80 Series with exclusive NA-ALD "center file" contacts—hold each strand of wire tip against bulb base—for cutting through corrosion—crimps around wire insulation for strain relief.

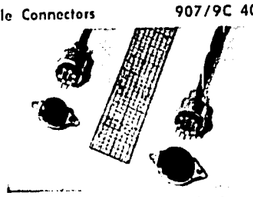
MINIATURE PLUGS & SOCKETS

For all modern designs . . . recognized by top production men and engineers for their design —rivet or eyelet to chassis—UL collars—high voltage breakdown—top appearance.

Metal Seal 121/5P 441/5 Series

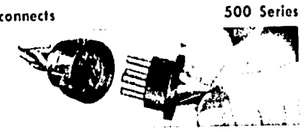
Ideal miniature 2 to 5 contact metal seal plugs and sockets for carrying power or signal—extremely compact and rugged.

Cable Connectors 907/9C 407/9P



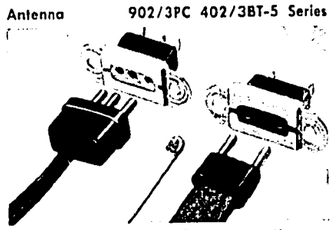
Ultra-compact 7 or 9 pin layout for low voltage applications—less than ¾" diameter—with or without leads—metal shell for easy gripping.

Disconnects 500 Series



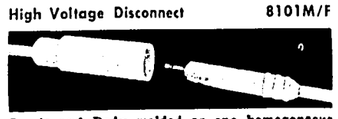
Most compact connector for AC current or signal—2 to 4 contacts.

Antenna 902/3PC 402/3BT-5 Series



In wide use for low voltage connections on instruments and all types of electronic equipment.

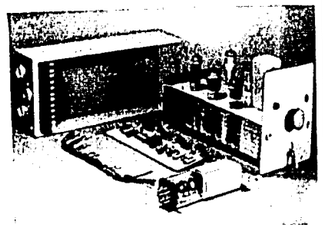
High Voltage Disconnect 8101M/F



Leads and Body molded as one homogeneous unit in low loss polyethylene. Rated at 15,000 volts DC or AC peak.

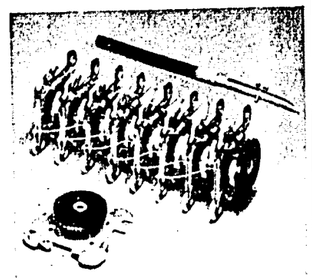
PLUG-IN COMPONENTS

Alden is pioneering a whole series of components for plug-in unit construction . . . (1) accessible, back connected, slide-in lock-in chassis (2) rugged, color coded back connectors (3) dress up housings (4) rugged bases for plug-in units and (5) quick acting, easily operable fastenings and locks for plug-in units (6) terminal card mounting system which allows related circuits to be wired rapidly in open or straight line bench work.



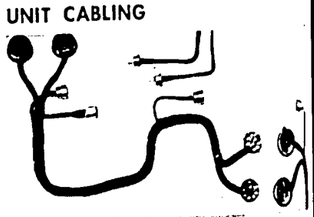
Extremely flexible plug-in kits allow you to design circuits and mount components as ultimate assembly basis. *Send for catalogue "Components for Plug-in Unit Construction."*

COMPUTER COMPONENTS



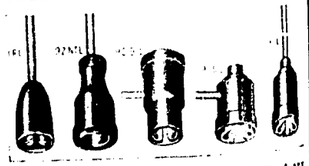
Manufacture of the revolutionary Static Magnetic Memory (a new device for pulse handling and storing developed by Harvard Computation Laboratory) is typical of Alden's ability to take the problem in the idea stage, develop working production design and get into volume production. *For further information*, write for special technical bulletins on the *Alden SMM*.

UNIT CABLING



Alden can take your equipment and design and engineer to your requirements economical and efficient unit cables of good appearance. Cabling built as units allows instant continuity check and rapid replacement in the field.

TUBE CAPS FOR EVERY PURPOSE



Alden has a tube cap connector to meet any need you might have. Contacts are carefully designed; leads have complete strain relief; connectors are fully insulated.

This is only a partial listing—Write Dept. IR for Catalog.

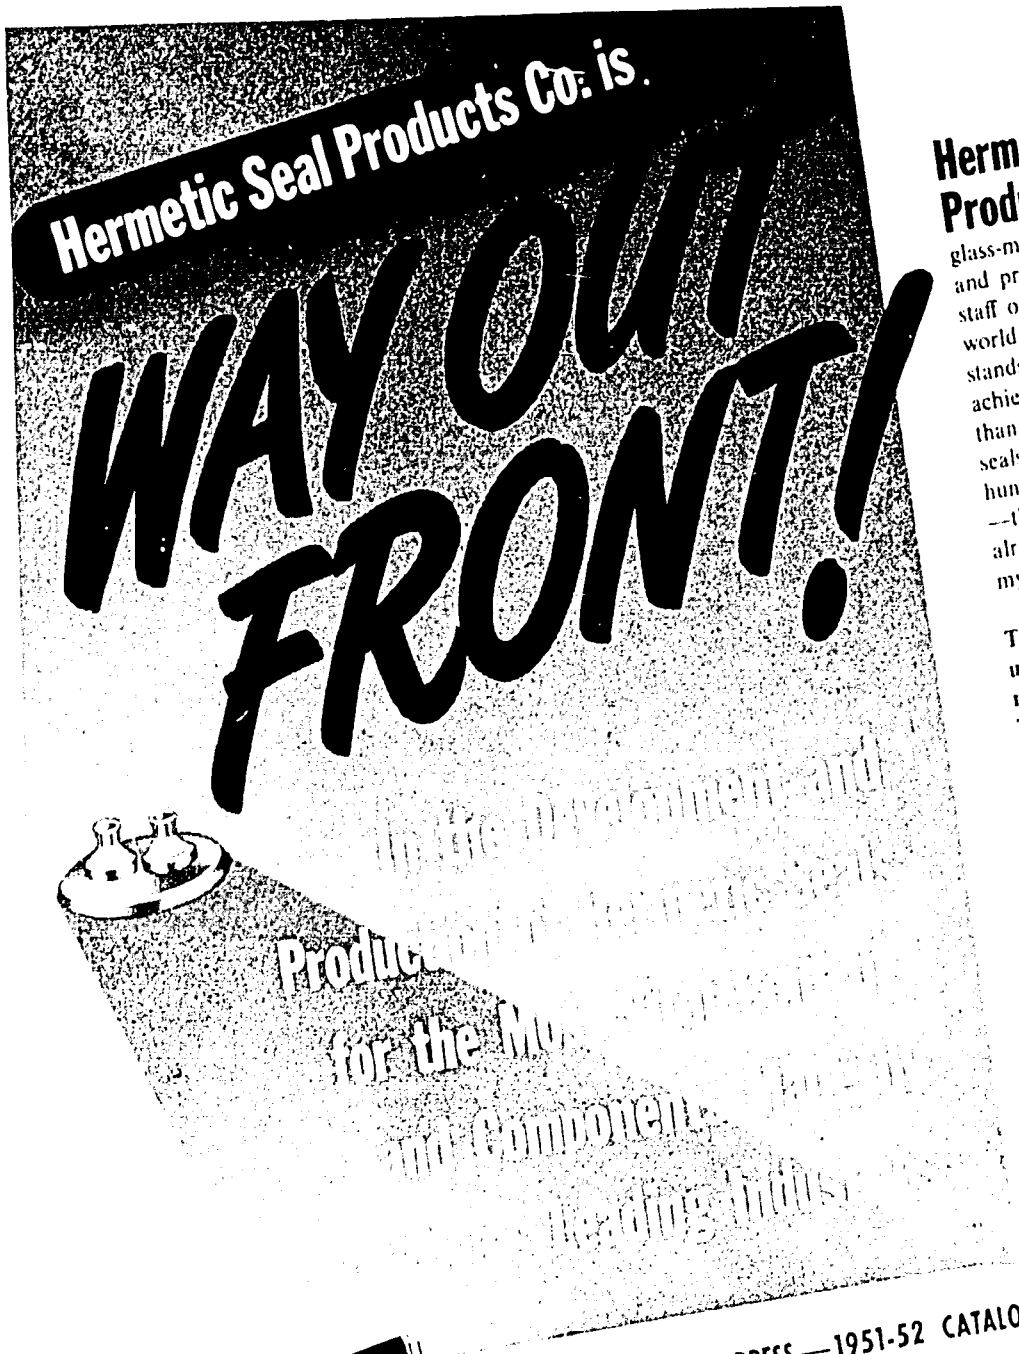
HEPPNER MFG. CO. ROUND LAKE, ILLINOIS



Hermetic Seal Products Co.

makes only glass-metal headers—created and produced by the largest staff of specialist-engineers in the world. This company truly stands alone in its remarkable achievements in smaller-than-small miniature plugs and seals. Its line embraces literally hundreds of new practical designs —thoroughly field tested and already in production for myriad applications.

These headers are available in unlimited shapes and with any number of terminals as required. They are the only seals you can hot tin dip at 525°F. for easy assembly soldering, for a strain and fissure-free sealed part with resistance of over 10,000 megohms. They will also withstand sub-zero conditions, swamp test, temperature cycling, high vacuum, high pressure, salt water immersion and spray, etc.

Important!

Terminals and Headers are available in RMA Color Code.

....JUST OFF THE PRESS—1951-52 CATALOG

Invaluable information on miniatures and hundreds of exclusive new developments in hermetic seals have been incorporated into a greatly needed NEW catalog. This book features many illustrations and complete technical data to make it easy for you to determine the right glass-metal header for the components you are planning. This book is available to you without cost. Write for your FREE copy today.

Remember, too, that Hermetic Seal Products' staff of specialist-engineers is waiting to help you with your problems in this ever-expanding field.

THE HEADER SEAL GUARANTEED IMPERVIOUS TO EVERY ELEMENT

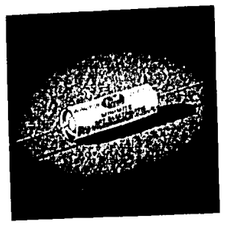
ABSOLUTELY RELIABLE

"METALITE"

METALLIZED PAPER CAPACITORS

DRY ELECTROLYTICS



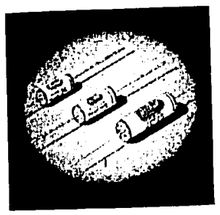
"MINIMITE" Type MM Metal Tubular

For under-chassis and other "limited space" mounting. Multiple paper spacers assure adequate voltage breakdown; riveted cathode tab; hermetically sealed; low leakage, withstand high surge voltage.

Type EY Twist Prong

Hermetically sealed in seamless aluminum cans, single and multiple, for operation at ambient temp. up to 85°C Terminal coding clearly stamped. Electrically welded terminal tabs.

MOLDED PAPER TUBULARS



Rugged—high temp.—humidity proof—heat resistant. Perfectly sealed to meet extreme field conditions, will not cold-flow at 100°C. For TV, radio and other electronic applications.

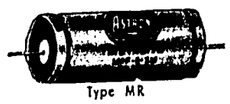
OIL-FILLED BATHTUB

Type ADM Capacitor, non-inductively wound, mineral oil impregnated and filled. Hermetically sealed in metal cans, solder lugs side, top, bottom or ends.

Also type ADH, wax-impregnated and filled.

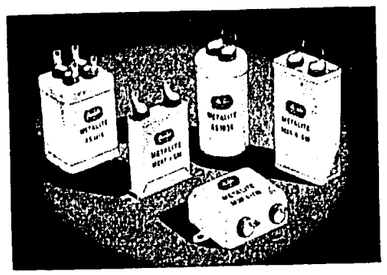
Type ML

Type MQ



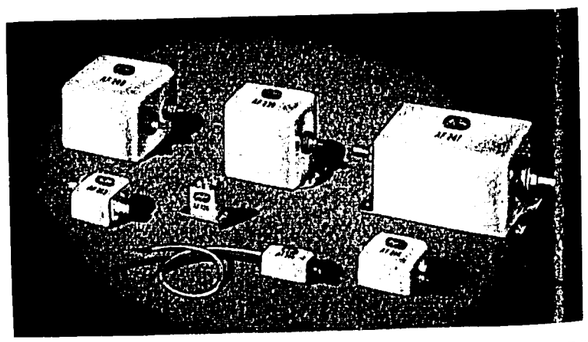
Type MR

We have concentrated in research and development here, until the very term "METALLIZED" is almost synonymous with the name ASTRON. Whether in Cardboard Tubulars . . . in Metal Encased Tubulars, or in special designs engineered to your particular requirements . . . "METALITE" represents supreme ECONOMY and EFFICIENCY in miniature capacitors.



Type MD, MX and other standard and special "METALITES" available in wide range of ratings, multiple as well as single. Special case styles if you wish.

INTERFERENCE FILTERS



Applying the sensationally economical, space-saving "METALITE" capacitors with a success that has made these Filters MUST with leading mfrs. of aircraft, aircraft-electronic and electrical equipment, and all types of electrical systems and apparatus where noise suppression is a vexing problem. We are equipped to design just the Filter for YOU.

WRITE FOR CATALOGUE AC-2

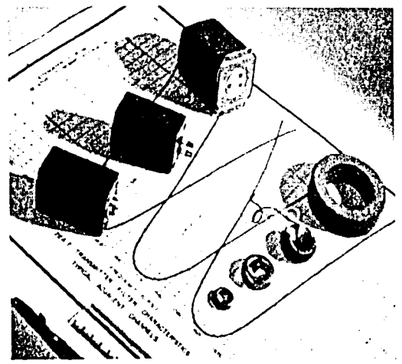
ASTRON CORPORATION - 255 Grant Avenue, East Newark, N.J.

TOROIDS & FILTERS

Toroidal Powder Iron Cores in a wide variety of types and sizes for use over a broad range of frequencies.

Wound Toroidal Coils available with taps and multiple windings; cased or uncased according to your specifications.

Electric-Wave Filters of low-pass, high-pass, band-pass and band-rejection types. Response characteristics and housings to your specifications. Hermetically-sealed units illustrated.



Let Lenkurt help with your special core and coil problems; write:

When It's A Fuse You Need . . . think first of BUSS

For Television . . . Radio
Radar . . . Instruments
Controls . . . Avionics

It's easy to select a BUSS fuse to do the job right for BUSS makes a complete line of fuses and behind each BUSS fuse is the world's largest fuse research laboratory and fuse production capacity. That's why the BUSS trademark has for 37 years stood for fuses of unquestioned quality that can be depended upon to protect but not to blow needlessly.

Every BUSS Fuse Electronically Tested

Each individual BUSS fuse is tested in a highly sensitive electronic device that records if the fuse is calibrated correctly, if the solder joints are properly made, if the mechanical dimensions of the fuse are right, and if the fuse can be depended upon to operate properly under all service conditions.

BUSS Fuses are made to protect . . . not to blow.

SPECIAL FUSES, FUSE CLIPS, FUSE BLOCKS AND FUSE HOLDERS

Sometimes a special fuse or fuse mounting is required. In such cases we welcome your requests either to quote — or to help in designing or selecting the special type of fuse or fuse mounting best suited to your particular conditions.

Submit description or sketch, showing type of fuse to be used, number of circuits, type of terminal, etc. If your protection problem is still in the engineering state, tell us current, voltage, load characteristics, etc.

At any time our staff of fuse engineers is at your service to help solve your problems in electrical protection.

USE THIS COUPON — *Get All The Facts*

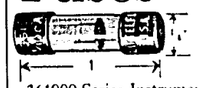
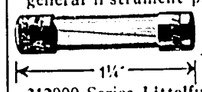
LITTELFUSE

Precision Engineered Fuses



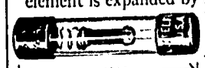
8 AG

361000 Series Instrument **Littelfuses**—You can rely on the efficiency and high speed action of these fuses—always "quicker than a short circuit". Designed for high-speed action. For the protection of delicate electrical equipment—microammeters, galvanometers, milliammeters, wattmeters, radio "B" circuits, thermocouples, voltmeters, test equipment, telephone systems, small rectifier and power tubes, railway signal meters, set analyzers, therapeutic machines and general instrument protection.



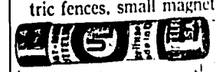
3 AG

312000 Series **Littelfuses**—Quick-acting fuses—for low time-lag applications. Protective-coated elements, on fuses to 3 amperes, prevent oxidation and promote clean break on fusion. Diagonal element alignment of this fuse assures accurate alignment and calibration, even when the fuse element is expanded by heat.



3 AG

313000 Series **Littelfuses**—**Slo-Blo** fuses with high time-lag to withstand heavy surges—quick on shorts. Designed for circuits with equipment having high inductive or capacitative surges, such as magnets, solenoids, etc., and for circuits with heavy starting currents, such as motors and lamp circuits. Anti-fatigue construction (compound element, with spring and resistor) makes these fuses ideal for intermittent-duty circuits on vibrators, control circuits, hi-tension electric fences, small magnets, coils, etc.



3 AB

314000 Series **Littelfuses**—The smallest Underwriters' Laboratory approved fuses in ratings this high. Steatite enclosed, arc-quenching, powder filled fuses. Shatter-proofed against quick shorts. Medium time lag. Recommended for use with amplifiers, rectifiers, battery charging equipment, small generators, control panels, amusement devices, communication and electronic equipment, radios, signal apparatus, small motor circuits, etc.

Also, S.F.E., 4 AG, 4 AB, 5 AG, 5 AB Fuses, Fuse Extractor Posts, Fuse Mountings, Fuse Retainers, Fusible Binding Posts.

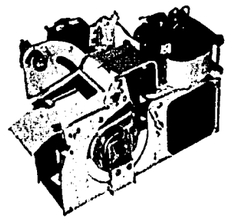
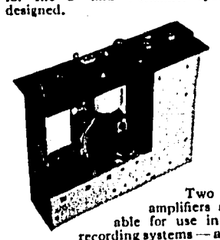
SANBORN

RECORDING SYSTEMS

RECORDERS AND AMPLIFIERS AVAILABLE SEPARATELY



In all Sanborn recorders, tracings are produced by a heated writing stylus in contact with heat sensitive, plastic-coated paper. The paper is pulled over a sharp edge in the paper drive mechanism, and the stylus wipes along this edge as it swings; thus producing records in true rectangular coordinates. The writing arm is driven by a D'Arsonval moving coil galvanometer with extremely high torque movement (200,000 dyne cm/cm deflection). Standard paper speed for the Model 51-600 recorder assembly, shown above, is 25 mm/sec. Slower speeds are available. Paper width 6 cm with 5 cm recording area. The assembly shown above is used in Models 128 and 141 (described above right) and provides the basic principles and methods on which recorders for the 2- and 4-channel systems are designed.

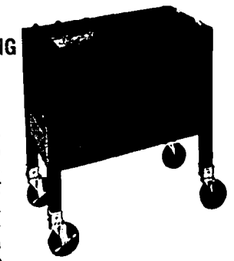


Two types of amplifiers are available for use in Sanborn recording systems — a DC General Purpose Amplifier, and a Strain Gage amplifier (shown above). The amplifiers used in the 2- and 4-channel systems are generally identical with those in the 1-channel system, which are available, as are also all the recorders, for separate application.

1 CHANNEL RECORDING SYSTEMS

Model 128 comprises a DC General Purpose Amplifier in combination with the Recorder Assembly shown below left, to which is added panel, transformer, and controls. Both instruments are contained in a single hardwood carrying case. The complete system is a vacuum tube recording voltmeter capable of reproducing in rectangular coordinates any electrical phenomena from the order of a few millivolts to more than 200 volts. When a Strain Gage Amplifier is specified, the system becomes Model 141. Amplifiers are readily interchangeable. When a built-in timer is included for either, the Model numbers become 128T or 141T.

2 CHANNEL RECORDING SYSTEMS



The two channels of **Model 60** operate independently of each other, but record simultaneously. Ten paper speeds are standard equipment, in pairs of: 5 and 0.5, 10 and 1, 25 and 2.5, 50 and 5, 100 and 10 mm/sec. Ready interchangeability of amplifiers (DC and Strain Gage) and preamplifiers (DC and AC) makes possible the availability of a variety of input circuits. Timing and coding are built-in features. Each channel has a 5 cm recording width.

4 CHANNEL RECORDING SYSTEMS

Model 67 provides for the direct, simultaneous registration of up to four phenomena on one record, using the same principles and methods as the two systems described above. In addition, there is a selection of eight paper speeds: 50, 25, 10, 5, 2.5, 1.0, 0.5, and 0.25 mm/sec., and provision for the use of 4-, 2-, or 1-channel recording Permapaper. As in Model 60, above, amplifiers and preamplifiers are readily interchangeable.

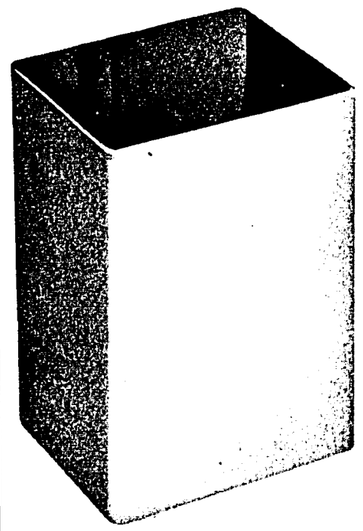
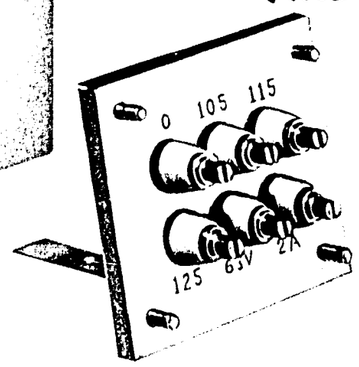
HELDOR
MIL-T-27 CANS
ARE STOCK ITEMS-





- NO DIE COSTS
- NO TOOLING
- FAST DELIVERY

Now you can save die and tooling costs — and get fast delivery — when you specify MIL-T-27 cans from Heldor! These transformer cans are available in all standard sizes and can be supplied with or without brackets, weld studs, centrifugal hot tinned, blind inserts, compression-type hermetic bushings on ⅜", ½", ⅝", ¾" centers, and stamped ratings.

Custom sizes of these cans can also be supplied.

Write for specification, data and price bulletin.

HELDOR
BUSHINGS
FOR POSITIVE HERMETIC SEALING

These steatite-insulator bushings resist thermal and physical shock . . . high dielectric strength. They are assembled with a new silicone type gland material or a newly developed, improved, Neoprene which meet government specifications and give exceptional results. They are easy to install and make for improved hermetic sealing.

Heldor Bushings are regularly supplied in a choice of 10 styles and 28 types with a choice of 5 different stud types.

Ask for the new Heldor *Bushing Bulletin!*

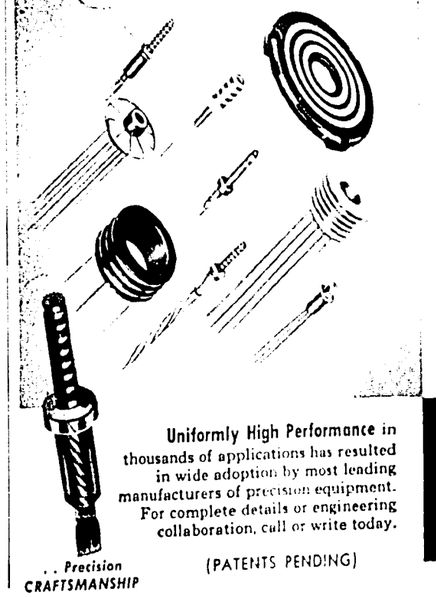
ELECTRO TEC
SLIP RING ASSEMBLIES & COMMUTATORS
for GYROS, COMPUTERS RESOLVERS, MOTORS, SELSYNS, INSTRUMENTS



- ABSOLUTE MINIMUM TORQUE FRICTION
- DIAMETERS FROM .05" TO 24.0"
- MINIMUM 1000 V.A.C. HI-POT INTER CIRCUIT
- HARD SILVER RINGS PLATED TO PRECISION MACHINED PLASTIC FORM
- SPECIAL SURFACE DEPOSITS MINIMIZE FRICTION, PREVENT TARNISH

Electro Tec Miniature Slip Rings and Commutators are the product of an exclusive manufacturing technique that results in precision concentricity, higher dielectric strength, longer life.

Uniformly High Performance in thousands of applications has resulted in wide adoption by most leading manufacturers of precision equipment. For complete details or engineering collaboration, call or write today.

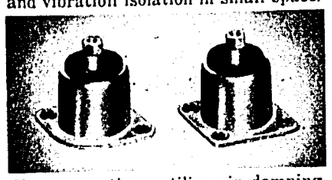
SHOCK and VIBRATION NEWS

BARRYMOUNTS FOR ASSURED CONTROL OF SHOCK AND VIBRATION

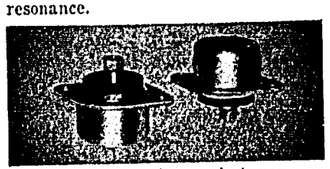
SMALL AIR-DAMPED BARRYMOUNTS

for Miniaturized Airborne Equipment

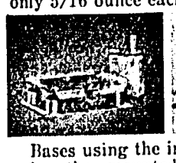
New-series Barrymounts, designed to meet requirements for compact isolators usable with miniaturized equipment, provide effective shock and vibration isolation in small space.

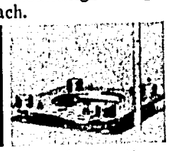


These mountings utilize air damping to minimize shock of aircraft landing and taxiing and to limit excursion so there is no snubber contact, even at resonance.



Upright and inverted types are available for two-hole or four-hole mounting. Unit mountings are one inch in diameter and 1-1/32 inches high under maximum rated load. Load ratings are 0.1 to 3.0 pounds per mount. The mountings weigh only 5/16 ounce each.





Bases using the inverted mountings raise the mounted equipment only 1/2 inch. Either upright or inverted unit mountings can be furnished on bases that conform to your specifications, load-ratings, and dimensions.

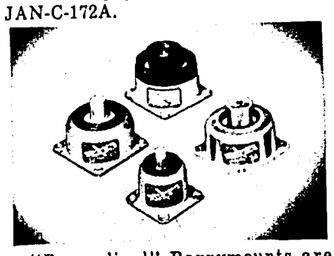
FREE CATALOGS

- 611 — "Ruggedized" Barrymounts and mounting bases tested to meet AN-E-19 shock-test requirements for equipment sizes listed in JAN-C-172A.
- 605-606 — Miniaturized air-damped Barrymounts for use with airborne equipment.

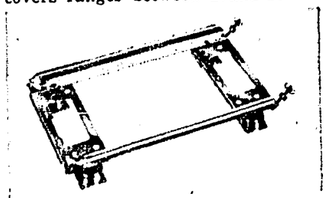
"RUGGEDIZED" BARRYMOUNTS AND MOUNTING BASES

Now Available to Meet Shock Requirements of AN-E-19

Barry vibration isolators and mounting bases are now available in "ruggedized" construction, to withstand the severe shocks of arrested landings in aircraft carrier service and of crash landings. These units are tested to meet the shock-test requirements of Specification AN-E-19, for the equipment sizes listed in JAN-C-172A.



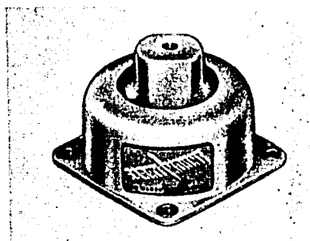
"Ruggedized" Barrymounts are available in both the air-damped type and the ALL-METL type. Air-damped Type 770R covers load ranges between ¼ lb. and 9 lbs. Air-damped Type 780R covers load ranges between 4 lbs. and 35 lbs. ALL-METL Type 6600R covers load ranges between 4 lbs. and 35 lbs. Type M-112R covers ranges between 2. and 10 lbs.



"Ruggedized" mounting bases, equipped with Barrymounts of the above types, are available in standard JAN sizes (JAN-C-172A) and in special sizes to meet customers' requirements. A conspicuous advantage of these "ruggedized" Barry bases is the gain in strength of the base framework itself — beyond JAN requirements — achieved with very little increase in weight for loads up to 60 lbs. by design modification of standard JAN bases. For greater loads, the "ruggedized" Barry bases are of stainless steel instead of aluminum. Write for data sheet.

NEW ALL-METL BARRYMOUNTS

for Unusual Airborne Applications



These new Barrymounts provide the aircraft and electronic engineer with a vibration isolator designed to meet the unusual temperature and environmental conditions encountered in high-altitude, high-speed flight. Employing no organic materials, these mountings are not subject to temperature influences that may affect the performance of other mountings.

ALL-METL Barrymounts offer a wide load range with uniform performance. They have a natural frequency of about 7½ cycles per second, with low horizontal stiffness for maximum isolation of horizontal vibration. Transmissibility at resonance is only 4½. There is no snubber contact nor resonance carry-over when ALL-METL Barrymounts are vibrated at government-specified amplitudes.

These mountings are designed especially for unusual military conditions. They meet the vibration requirement of JAN-C-172A, MIL-E-5272 (USAF), and MIL-T-5422 (BuAer). For details of sizes, ranges, and construction of unit mounts and bases using ALL-METL Barrymounts, see catalog 509.

FREE CATALOGS

- 502 – Air-damped Barrymounts for aircraft service; also mounting bases and instrument mountings.
- 509 — ALL-METL Barrymounts and mounting bases for unusual airborne applications.
- 504 — Shock mounts and vibration isolators for marine, mobile, and industrial uses.
- 607 — How to cut maintenance costs by using Barrymounts with punch presses.

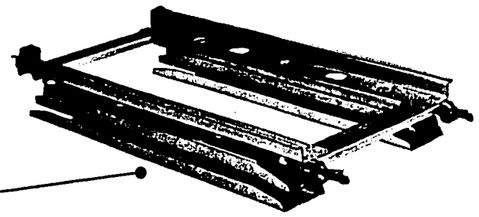
ROBINSON *engineered mounting systems*

SHOCK MOUNTS and VIBRATION ISOLATORS *With* MET-L-FLEX

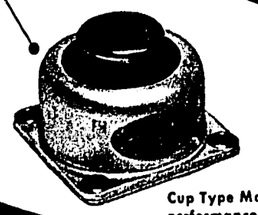
***First** All-Metal All-Weather* **MOUNTING SYSTEMS . . .**

Robinson pioneered, *in 1946,* all-metal, all-weather vibration and shock mounting systems. Built for the electronic and instrument panel installations of today's high performance commercial and military aircraft, more than 50,000 all-metal systems have been delivered. Robinson MET-L-FLEX unit mounts and complete mounting systems meet specifications JAN-C-172A. Mounting systems in JAN form factors and special designs are available—write today for full engineering data.

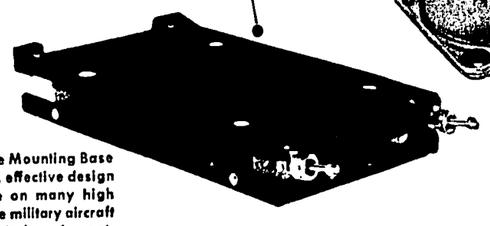


Dual Suspension Mounting Base—provides the ultimate in isolation efficiency. Dual Suspension Mounting Bases are specified for the ART-13, ARC-1, ARC-12 and many other widely known airborne equipments. More than two hundred thousand of these bases have been delivered to the armed services and commercial companies.

Dual Suspension and Single Stage Beam Assemblies—for direct attachment to equipment or mounting trays.



Cup Type Mount, providing performance and balanced equipment protection for sub-base mounting systems.



Single Stage Mounting Base—a rugged, effective design now in use on many high performance military aircraft to protect vital equipment.

GRAPHALLOY TRADE MARK REG. U. S. PAT. OFF.

BRUSH AND CONTACT

Materials for Exacting Applications

The **GRAPHALLOY** family of metal-impregnated graphite brush and contact materials is specially designed for a wide range of applications requiring very low contact drop, very low electrical brush noise level or non-welding contact operation. Made by impregnating metals into solid graphite, they are inherently fitted for high speed, high altitude applications and for low-current circuits. Certain types are valuable for their arc-quenching characteristics in opening inductive circuits.

A few of the more commonly used types are given in the following table:

Material	Typical Current Density* Amperes per Square Inch	Typical Rubbing Speeds Feet per Minute
LOW-METAL GRADES		
Silver GRAPHALLOY	100-150 and higher	5000
Copper GRAPHALLOY	90	3000
Cadmium GRAPHALLOY	75	4000
HIGH-METAL GRADES		
Copper GRAPHALLOY	100-125	3000
Special Copper GRAPHALLOY	150	3000

*Depending on brush size.

Silver GRAPHALLOY, the supreme *brush* material, is widely used in brush applications where low, constant contact drop and low resistance are needed and where a low electrical noise level is imperative. Its high quality results from the use of extremely pure silver for impregnation into the graphite. Adapted for high-altitude brush applications and for low current circuits. It operates best against coin-silver slip rings.

As a non-welding *contact* material, **Silver GRAPHALLOY** is valuable in circuits where a low and constant contact drop are necessary or where contact welding must be prevented.

Copper GRAPHALLOY — This material is widely used as brush material for small and medium sized motors and generators where long brush and commutator life are important.

As a contact, certain types are extensively used for arcing and main contact tips in circuit breakers and contactors.

Cadmium GRAPHALLOY — This material is particularly adapted for commutating or opening circuits which are subject to heavy inductive arcing. The arc quenching characteristics of the Cadmium vapor which is released during arcing make this material very valuable for high duty contactors and for brush applications where wear conditions and arcing are severe.

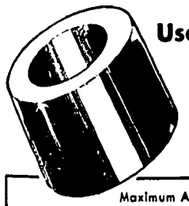
HIGH METAL TYPES

Copper GRAPHALLOY is extensively used for rotary converter slip ring brushes, plating generator brushes and for other applications requiring extremely high current carrying capacity with low or moderate friction.

Special Copper GRAPHALLOY grades have been developed for contacts which are required to carry extremely high operating current without overheating and without sacrificing arc-quenching qualities.

APPLICATION DATA

Upon receipt of a brief description of your contact or brush problem we shall be glad to suggest a suitable design and material. We suggest that you send the current and voltage conditions, proposed rubbing speed, commutator or slip ring width and material. Send for our special brush inquiry sheet which outlines the required information.



Use GRAPHALLOY for OILLESS BUSHINGS

CHARACTERISTICS OF COMMONLY USED GRAPHALLOY GRADES

Material	Maximum Ambient Temperature In Air	Maximum Ambient Temperature In non-oxidizing conditions
Babbitt GRAPHALLOY	300	300
Copper "	700	1700
Bronze "	600	600
Cadmium "	250	550
Silver "	700	1500

Coefficient of friction, .12 to .25, dry; .02 to .13 submerged.

Specify GRAPHALLOY materials which contain *no oil* and *need no oil* for efficient operation dry, submerged in liquids, or at extremely *high* or *low temperatures* where ordinary lubricants would carbonize, congeal or decompose.

Excellent for *current carrying bushings.*

Widely used for pump bushings and vanes, seal rings, stoker and high temperature conveyor bushings.

Ideal for use where ordinary bushing lubricants would contaminate food products.

Send for further information. Or, if you have a specific application, supply us the details of speed, load, shaft material and temperature conditions and we shall be glad to make recommendations or supply test samples.

Call on the accumulated design experience of our engineers for help in solving your problem.

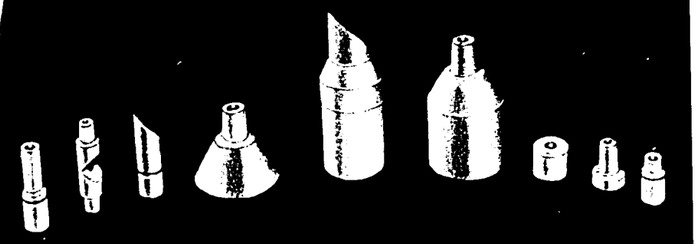
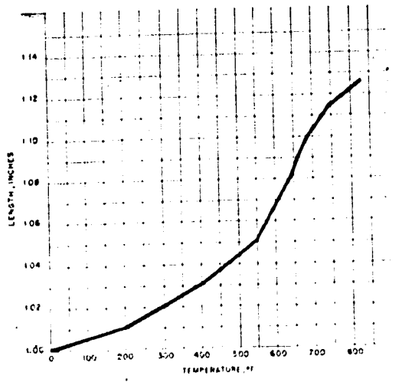
KINGS solves your insulation problems with **TEFLON** and **TEXTOLITE**

Production Facilities Available For Manufacture of Insulation Parts To Your Specifications.





LINEAR EXPANSION OF POLYTETRAFLUOROETHYLENE (TEFLON) TOTAL LENGTH VS. TEMPERATURE

Manufacturers from coast-to-coast call on Kings to produce their insulation parts from machined bar stock made from Teflon or Textolite 1422.

Tolerances are held extremely close. Special lubricants developed by Kings will not affect the dielectric characteristics of these materials.

For most purposes of electrical insulation, in relatively high frequency fields, Textolite 1422 is recommended. Where impact strength, chemical inertness, and resistance to heat are major factors, Teflon is recommended.

Kings fabricates its own Teflon Rod and Tubing which is also available to industry in raw form. Whatever your insulation problem, you can rely on Kings. Distributors inquiries solicited.

KINGS *Electronics*

Plastics Division, BOX 217, TUCKAHOE, N.Y.

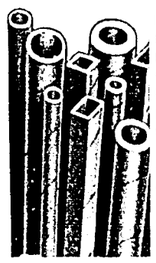
PRECISION offers you...

LABORATORY CONTROL of all materials...

...assures alkali-and acid-free coils that are non-corrosive to copper wire.

PRECISION PAPER TUBES



Precision's Laboratory Control of materials plus spiral winding and heat-treated compression provide better insulation, heat dissipation and resistance to moisture. Also, greater strength is combined with light weight. Made to your exact specifications in any shape—round, square, oval or rectangular—any length, ID or OD.

PRECISION COIL BOBBINS

Plastic-coated core anchors flanges securely, keeps them positioned during winding and avoids crowding of turns—provides more winding space. Plastic coating also improves insulation, makes Precision Bobbins stronger. Any size or shape available. Flanges with leads, slots, holes or plain—furnished flat, recessed or embossed to fit any mounting. Low-cost dies.

Tubes and bobbins made of finest dielectric Kraft, Fish Paper, Cellulose Acetate or combinations.

Write today for free samples and Mandrel list of over 1,000 sizes.

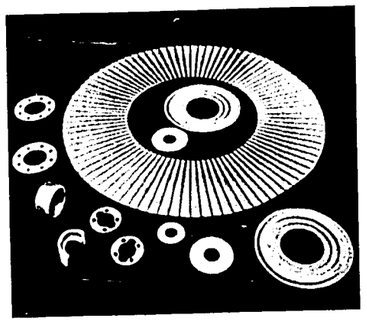
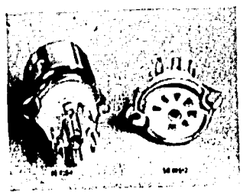
TEFLON

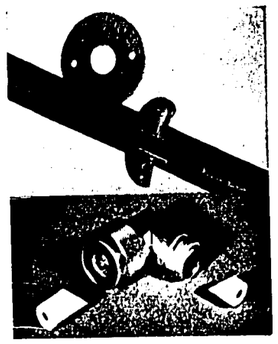
ELECTRONIC PARTS

Teflon's outstanding electrical properties make it an ideal insulating material for high-voltage, high-temperature, high- or ultra-high-frequency service. Component parts fabricated of Teflon are finding a steadily increasing number of applications in radio, radar, TV and other electrical and electronic equipment.





Teflon's loss factor is less than 0.0005; its dielectric constant only 2.0—at all frequencies measured to date. Teflon is serviceable throughout the entire temperature range of —110° F to 575° F. with negligible change in critical electrical characteristics. Teflon is tough, somewhat resilient, weather-proof, has zero water absorption and is absolutely non-corroding.



We manufacture all types of molded or machined Teflon parts including coaxial spacers and coaxial connectors for electronic equipment, component parts for switches, relays, and contactors, as well as tube sockets, high-voltage brackets for power resistors, gaskets, specialties, etc. For more information request Catalog No. 400. Also available — Teflon sheets, cylinders, rods, tubing and bars. *We are the country's foremost manufacturer of Teflon products.*

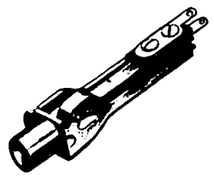
JACKS—PLUGS—SWITCHES—a complete line for industrial or military equipment

"LITTEL-JAX"

Compact, simple design featuring notched Bakelite insulation mechanically interlocking all electrical parts: "V-bend" in tip spring firmly holds mating plug. Available in most common circuits, mounts single 3/8" dia. hole, panels up to 5/32" thick; requires less than 1" behind panel. Available in most common circuits. Military types such as JK-33A (JJ-033), JK-34A (JJ-034) and JJ-089.

"T-JAX"

A long-frame type, commonly referred to as a Telephone Switchboard Jack, especially designed for high quality communication equipment. The T-series features fine silver contacts; the MT-series has welded cross-bar Palladium contacts. Available in all standard circuits; the MT type is furnished in all JAN types, for example JJ-024, etc.



"LITTEL-PLUG"

A unique design, features one-piece cable clamp terminal. Lightweight. Fits all standard Jacks. Two and three conductor types: Tenite or Nickel Plated Brass handles.

Another design of approximately same size available in Military Types PJ-054, PJ-055B and PJ-540.

"FLAT-PLUG"

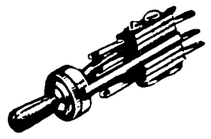
Radically new design—removable cover permits use with screw or solder lug terminals. Available in 2- or 3-conductor types; red or black covers. Ideal for business machines, hard of hearing installations, etc., where projecting handle of conventional plug is objectionable.

"PUSH-BUTTON SWITCH"

"LITTEL-SWITCH" (illustrated) and "FF-SWITCH" in numerous circuits. Bright colored plastic push-buttons. Contacts to suit your application.

"LEV-R SWITCH"

An unusually small, lever-action switch; available in numerable circuits, to provide the simplest in switching design. Requires only one single round hole for mounting; black plastic knob. Made in 2- and 3-position, locking or non-locking types.



For complete details on these and other Switchcraft products write for catalog S-51.

The Consultant's Place in Management Affairs

Every company frequently faces problems beyond the ordinary scope of its specialized facilities—Problems which call for more time, or more energy, or more personnel than can safely be spared from routine operations.

At such times, the services of experienced *outside* help can usually mean a job well done at a considerable saving in operating expenditure. . . .

Regardless of the type of problem met with in your business, if it comes at a time when executive facilities are overloaded, why not call for an interview—in strictest confidence, and without obligation of course.

METER SHIELDS
FUSE BLOCK PARTS
STABLE RESISTORS
CIRCUIT SHIELDING
CONDUCTING CEMENT
DE-ICING ELEMENTS
VACUUM TUBE SHIELDS
ELECTROPLATING BASE
CRYSTAL HOLDER PARTS
LAMP SOCKETS & BASES
PRINTED CIRCUIT WIRING
AIRCRAFT ANTI-STATIC COATINGS

THEY ARE SOLVING NEW PROBLEMS EVERY DAY WHERE THE DESIGN AIMS ARE SIZE AND WEIGHT REDUCTION WITH REAL DURABILITY

- You cannot put a smaller, lighter shield on a miniature or subminiature tube than an easy-to-apply coat of special, heat-radiating Silver Micropaint.
- Conducting materials to REPLACE SOLDER, ALUMINUM, and COPPER.
- Anti-Static paints to eliminate precipitation static on aircraft antenna housings. Optimum resistance value to meet BuAer resistance requirements.
- Close tolerance, high-stability circuit paints for conductors and resistors.

MAY WE SEND DATA ON THESE USES AND ASSIST IN ADAPTING MICROPAINTS TO YOUR PRODUCTS

FOR RESEARCH, DEVELOPMENT, EXPERIMENTATION

Order the S21 Kit of five air-drying silver, copper, and resistance paints (covering the resistance range of 0.05 ohm to 2.5 meg-ohms per square); plus solvent, lacquer, and design manual. $7.27 postpaid in U.S.A. or from your distributor. EVERY INDUSTRIAL AND COLLEGE LABORATORY SHOULD HAVE ONE.

Our S41 INDUSTRIAL KIT of six silver preparations will help you to save copper, solder, and aluminum. Price: $19.50, Postpaid.

QUAM
Adjust-A-Cone
SPEAKERS

FIRST IN REPLACEMENT FIELD
FIRST FOR ORIGINAL EQUIPMENT

ONLY QUAM SPEAKERS
have the U-SHAPED COIL POT *and*
ADJUST-A-CONE SUSPENSION

U-SHAPED COIL POT provides unbroken flux path of cross section sufficient to carry full strength of magnetic field. Fully patented.

ADJUST-A-CONE SUSPENSION permits precision centering of voice coil in final production operation, eliminates most voice coil troubles. Patented.

UNIVERSAL BRACKET for 3½" to 4½" speakers makes difficult installations easy.

ELECTRO-DYNAMIC and P. M. SPEAKERS from 3½" to 12", 4" x 6" to 6" x 9".

PUBLIC ADDRESS P. M. SPEAKERS—8" to 12" sizes.

CO-AXIAL SPEAKERS—12" and 15".

TELEVISION SPEAKERS, Dynamic and P.M. All sizes.

QUAM FOCALIZER UNITS—Permanent Magnet Construction, offer sharper focus and greater stability, than wire wound construction.

WRITE FOR COMPLETE DESCRIPTIVE CAT.

QUAM-NICHOLS COMPANY
Cottage Grove at 33rd Pl. Chicago 16, Illinois
Makers of Quality Speakers for 27 years.

There's a University Loudspeaker
RUGGED! DEPENDABLE! VERSATILE!
FOR EVERY COMMERCIAL AND INDUSTRIAL APPLICATION

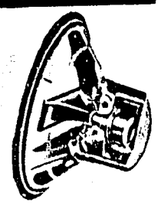
TRUMPETS Model 7102 exemplifies the rugged construction and progressive engineering behind every University product. Model 7102 is the *only* loudspeaker ever approved by Underwriters' Labs for Class II Groups E, F, & G hazardous area duty. Features include re-entrant trumpet (pioneered by University) for compactness and greater efficiency, heavy duty 25 watt driver unit with exclusive University "W" shaped Alnico V magnet, and *built-in* line matching transformer with impedances of 16, 45, 500, 1000, 1500, and 2000 ohms. See general catalog for trumpets of all sizes.

BREAKDOWN-PROOF DRIVER UNITS Model PA-30 embodies features developed by University and never successfully imitated. Ratings are conservative, and construction is to well known University standards which have made our drivers famous for their dependable performance. PA-30 is rated at 30 watts, with response 80-10,000 cps, and is the *first* to have a multi-tap built-in line matching transformer. Exclusive "rim centering" construction of mechanism and use of University "W" shaped Alnico V magnet insures high conversion efficiency, permanent voice coil alignment regardless of shock or vibrations. Weatherproofed throughout.

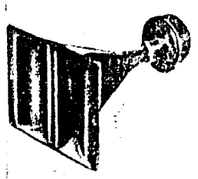
PAGING AND INTERCOM SPEAKERS These feature reflex air columns with hermetically sealed driver units. They are widely used for intercommunication and paging of all types. Efficiency is high and reproduction exceptional at any volume level. Directions, radial, or bi-directional types available. Weather-proof finishes permit use anywhere. Typical of University pace-setting design is the Cobra-12 illustrated, which provides optimum area coverage with minimum power input. Power rating is 12 watts, frequency response 250-10,000 cps, dispersion angle 60° x 120°. Swivel mounting bracket provides full flexibility.

SUBMERGENCE-PROOF SPEAKERS These types are designed for use where extreme ruggedness and immunity to spray, gases, live steam or dust are essential. Function even under water, drain automatically, operate continuously regardless of exposure. Models available for directional or radial projection, wall or bulkhead mounting, swivel mount and with or without built-in line matching transformer and attenuator. Design is ideal for railroad use, shipboard, industries, docks, rough mobile work, etc. Model MM-2, illustrated, is rated at 15 watts continuous IPM, frequency 300-6000 cps, impedance 16 ohms.

FOR ALL HIGH FIDELITY REPRODUCTION REQUIREMENTS



WIDE RANGE CONE SPEAKERS Model 6201 comprises a superb 12" cone speaker with a driver type tweeter mounted coaxially. The cone speaker features a 24 oz. "W" shaped Alnico magnet and edge treated cone for distortion-free low frequency response. Tweeter has wide angle horn. A built-in LC crossover network and external high frequency attenuator are included. Capacity is 25 watts, response 45-15,000 cps, impedance 8 ohms. Other cone speakers for high fidelity, as well as submergence-proof or blast-proof service for commercial and military applications.



HI-FREQUENCY TWEETERS University offers a complete line of single and double tweeter units for both 2000 and 6000 cycle crossover. Exclusive University "reciprocating flare" horn construction assures uniform wide angle dispersion. A complete line of accessories are included—crossover networks, adapter for mounting tweeter on a standard cone speaker, etc. These tweeters may be added to any standard amplifier and speaker to provide the finest in high fidelity reproduction—and at a very low cost.

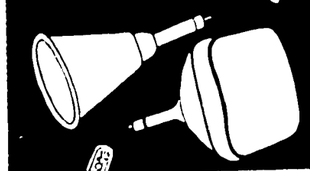
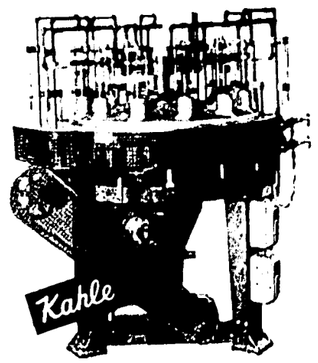
Kahle equipment for manufacturing sub-miniature, miniature, power and cathode-ray tubes

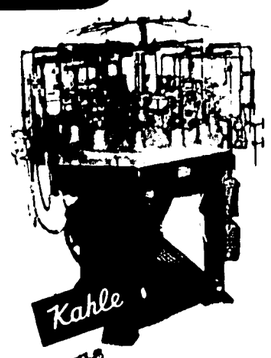


FOR SUB-MINIATURE TUBES



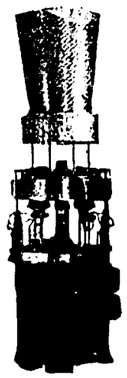
#1384
12-HEAD BUTTON STEM MACHINE

Button ¼" in diameter with 5 long wires. Hand loading and unloading. Dual motor drive. Available for any number of heads and automatic feeds.



#1375
12-HEAD SEALING MACHINE

Also for hearing aid tubes. Kahle Standard Dual Motor Drive. Indexing by barrel cam and rollers. Heads have self-centering bulb holders.

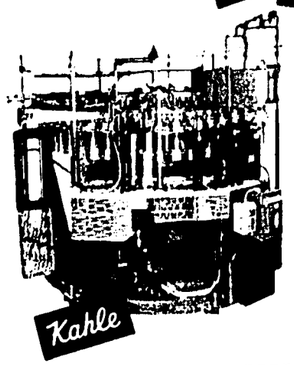


#1502
AUTOMATIC GLASS TUBING CUTTING MACHINE

Vertical type; for soft glass, chill cut, 8-head; indexing. Dual motor drive; variable speed. Single or double cut-off stations. With or without upper structure glass guard. Cap. 1-3,000 pcs. per hour.

Also available for manufacture of sub-miniature tubes:

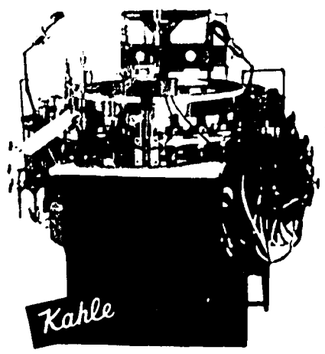
TUBING (BULB) FLATTENING MACHINE to produce tubulated flattened bulbs. TUBULATED BULB CONSTRICTING MACHINE to produce a definitely shaped and sized constriction between the top of the flattened bulb and the tubulation position.



#1463
48-POSITION EXHAUST MACHINE

All degrees of operation from manual to completely automatic. Production limited only by pump equipment or loading speed of operator. Also available with 12 and 32 positions.

FOR MINIATURE TUBES



#1197
24-HEAD BUTTON STEM MACHINE

For 7-pin and 9-pin miniature tubes. Available with automatic wire feed, glass feed and unloading of incompletely filled heads. Cap. 1200 per hour.

Complete range of manufacturing equipment for miniature tubes to be produced.

FOR CATHODE RAY TUBES

#1414
CATHODE RAY TUBE BUTTON STEM MACHINE

Turns out 400-500 TB stems per hour. Fine adjustment of speed, pressure, heat, sequence of operations. Labor saving development for automatic tubulation flaring.

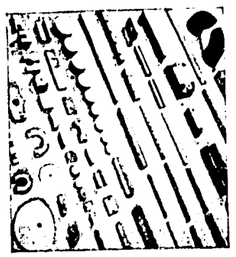
quality magnets from start to finish



From the first engineering drawing to the final inspection and shipping, Crucible Permanent Alnico Magnets receive the same careful attention and workmanship that is found in all Crucible specialty steels. Rigid quality control at every step in the production of Crucible Alnico . . . with a keen devotion to detail . . . is the reason that users of Crucible Permanent Alnico Magnets have found that from Crucible they get a better magnet with *higher gap flux per unit weight.*

Crucible Alnico Magnets are serving successfully in thousands of varied applications. The experience of Crucible's alert staff of metallurgists and engineers is freely available to you. Take advantage of Crucible's half century of specialty steel leadership. When you think of permanent magnets . . . call Crucible. CRUCIBLE STEEL COMPANY OF AMERICA, Chrysler Building, New York 17, N.Y.

CRUCIBLE first name in special purpose steels

The Development of CARBONYL IRON POWDERS

Carbonyl Iron Powder is an extremely pure form of iron, the metal content being over 99.99% iron, produced in the form of almost perfect spheres only one to fifteen microns in diameter—the average diameter being 8 microns (.00032 inches). It has been produced commercially for some years, primarily for use in magnetic cores for electronic equipment. Its production is therefore now under perfect control to give absolute reliability in quality and properties.

The production of Iron Carbonyl, from which Carbonyl Iron Powders are made, depends on a unique reaction, which was discovered in 1890 by the distinguished British chemist, Sir Ludwig Mond. When iron is treated with carbon monoxide it reacts to form iron pentacarbonyl, a rare case of a liquid compound of a metal. Each atom of iron combines with five molecules of carbon monoxide to give a compound with the formula $Fe(CO)_5$. This reaction leaves behind any impurities in the original iron.

This liquid is vaporized and the vapor heated above 200°C, when it decomposes into its constituents. The carbon monoxide is driven off and the iron separates from the vapor phase, first in the form of free atoms, then as ultramicroscopic crystals, finally as microscopic, almost perfect spheres. The particle size distribution can be controlled by temperature, pressure and other operating conditions.

Controlled purity and distribution of particle size is essential for use of the powder in electronics, where minor variations in these properties have exaggerated consequences in delicate electrical and magnetic effects.

The only other elements present are non-metals such as carbon, oxygen and nitrogen. In G A & F Carbonyl Iron Powder, they amount to not more than 0.8% carbon, 0.9% oxygen and 0.7% nitrogen.

The first large-scale production of Iron Carbonyl was undertaken in Germany shortly after 1920. By 1928 the process had been adapted to the continuous commercial production of Carbonyl Iron Powder. Subsequently, detailed studies and meticulous laboratory-type controls in the plant permitted accurate regulation of purity and particle size for the needs of the modern electronic industry.

The first commercial Carbonyl Iron plant in the United States was opened at Grasselli, N. J. in 1941 by the General Aniline & Film Corporation, primarily to meet the large wartime demand for electronic equipment. Newer and finer grades of the powder were developed for use in high-frequency electronic equipment for radar and television. Later a second plant was put into operation at Huntsville, Alabama.

Thus the G A & F Carbonyl Iron Process is now well established and in steady operation. It is an outstanding case of the succesful precision control of a sensitive chemical reaction to produce a unique material that must meet extraordinary specifications of purity, particle shape and size, and uniformity.

Write today for a free book—fully illustrated with performance charts and application data. It will help radio engineers or electronics manufacturers to step up quality, while saving real money. Kindly address your request to Dept. #91.

These unique properties tell why G A & F® Carbonyl Iron Powders are superior:

PROPERTY	ADVANTAGE
Spherical structure . . .	Facilitates insulation and compacting
Concentric shell structure (some types only) . . .	Low eddy current losses
High iron content . . .	Exceptional permeability and compressibility
Absence of non-ferrous metals . . .	Absence of corresponding disturbing influences
Relative absence of internal stress; regular crystal structure . . .	Low hysteresis loss
Spheres of small size . . .	Low eddy current losses; usable for high frequencies
Variations of sphere size . . .	Extremely close packing

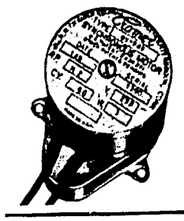
Cramer

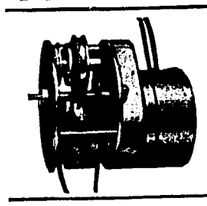
SYNCHRONOUS MOTORS - ELECTRIC TIMERS

A wide range of timing devices, extensively used on electrically-operated commercial and industrial equipment where accurate, dependable timing is essential to insure efficient product performance . . . to add convenience of operation . . . to prevent work spoilage and protect equipment itself. We are frequently called upon to design special equipment to meet specific requirements . . . consult us about your timing problems. Write for complete information.

The R.W. CRAMER Co., Inc., Box #22, Centerbrook, Conn.



TYPE SX SYNCHRONOUS MOTORS — Widely used for instrument and control applications requiring constant speed at a given frequency. Powerful, precision-built. Produce an exceptionally high torque. Available with output speeds from 60 RPM to 1/24 RPH.

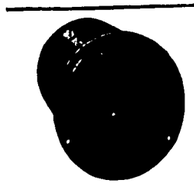


TYPES SCS-SCR CLUTCH MOTORS — Designed to meet the needs of many timing, recording, indicating and switching applications requiring reset operation. TYPE SCS — standard clutch type. Type SCR — reversible clutch type.

TYPE IE INTERVAL TIMERS — Setting to any desired time opens one load circuit, closes another, starting time cycle. Restores to normal position at end of time interval. Designed to control electrically operated equipment such as mixers, X-ray machines, ovens, plating processes, etc.

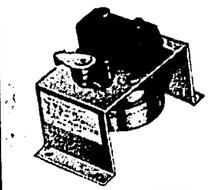
TYPE IG INTERVAL TIMERS — Holds one or two circuits either open or closed for pre-set time and returns them to original position at end of interval. Used for built-in applications in microfilming equipment, battery chargers, therapeutic machines, etc.

TYPE RE RESET TIMERS— Automatically closes one circuit and opens another for a pre-set time when started. Used for control of process work where accuracy of repeat operation is required — on copying machines, laboratory equipment, photo printers, etc.

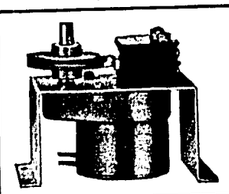


TYPE TE TIME DELAY RELAYS — Provides adjustable time delay between closing of control circuit and subsequent closing or opening of load circuit. Used to control heat treating equipment, shakers, etc.

TYPES TEC - TER TIME DELAY RELAYS — Provide an adjustable time delay between operation of a control circuit and subsequent closing or opening of load circuit. Used in industrial controls for heat treating, lapping, grinding, induction heating, mixing, etc.



TYPE TF2 TIME DELAY RELAYS — Provide a fixed time delay between closing of control circuit and opening or closing of one or two load circuits. Used to protect high voltage electronic tubes, control of signalling devices, machines or process control, etc.

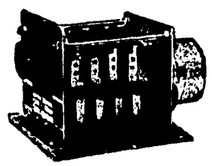


TYPES CF3 - CF6 CYCLE TIMERS — For built-in applications where from one to eight circuits are to be controlled in accordance with a predetermined program — commercial dishwashers, ice-making units, to reverse motors, to operate motors, solenoid valves, etc.

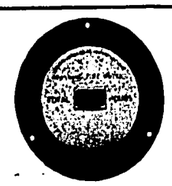
TYPE V PULSE TIMERS — Continuously electrical impulses of a definite set duration at end of successive identical time intervals. Used for control of automatic lubricators, conveyors, pumps, electron tube testing, etc.

TYPE DU DUPLEX CYCLE TIMERS — Designed to open or close one or two load circuits continuously or to perform one complete cycle and stop. Used to control idle and running time of machines, periodic feeding of chemicals to boilers, etc.

TYPE PE PERCENTAGE TIMER — Designed to control percent of time in which electrical circuit is closed or open out of definite time cycle. Used to regulate input to electrically operated furnaces, ovens or heaters, etc.



TYPE M MULTI-CONTACT TIMERS — Designed to control automatically a number of electrical circuits in predetermined sequence. Used to control a series of machine operations, to reverse motors, valves, signals or combinations in sequence, etc.

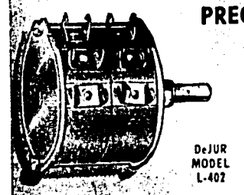


TYPE E RUNNING TIME METERS — Designed to cumulatively register total operating or idle time of any circuit, machine or system. Used to record operating time of vacuum tubes, to forecast need for servicing of machines, etc.

OVER 30 YEARS OF PRECISION ELECTRICAL EXPERIENCE

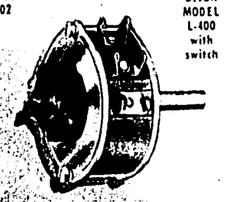
DeJUR

PRECISION *Potentiometers*



SERIES L-400

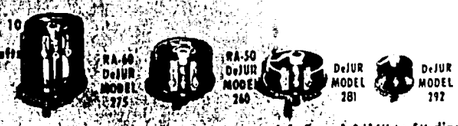
DeJUR MODEL L-402



DeJUR MODEL L-400 with switch

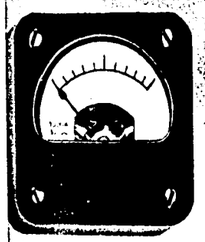
To meet the increasing demand for small compact precision potentiometers for military airborne instrumentation and similar applications, DeJUR is now producing the L-400 series potentiometers, built to rigid mechanical and electrical requirements of JAN-R-19 specifications.

FEATURES:
- 1½" diameter
- 3 watts fully enclosed
- 5 to 125,000 ohms
- accuracy up to 0.5%
- linearity up to 0.1%
- 300° rotation mechanical and electrical
- on-off switch
- ganging up to 10 units
- double end shafts available



RA-60 DeJUR MODEL 275 · RA-50 DeJUR MODEL 260 · DeJUR MODEL 281 · DeJUR MODEL 192

Built to JAN-R-19 specifications. Other models from 1-3/16" to 5" diameter.



1½" *Panel* INSTRUMENTS

Also available • 2½" • 3½" • 4" panel meters in all standard ranges. JAN-1-6 and A. S. A.

- DC VOLTMETERS
- AMMETERS
- MILLIVOLT METERS
- MILLIAMMETERS
- AC RECTIFIER TYPES (self-contained).

DeJUR MODEL 112

DeJUR MODEL 120

Aluminum Case • One Hole Ring Mounting.

FEATURES: Precision built DeJUR 1½" instruments for applications where space must be conserved • DeJUR rugged construction • Both models in all ranges and sensitivities • External shunts and multipliers available for various ranges • Complete magnetic shielding and methods of lighting scale • Approved source for government services meets JAN specifications.

Power RHEOSTATS

Built to JAN-R-22 specifications, DeJUR Rheostats are available in 25 or 50 watt sizes, single or dual ganged. Resistances up to 50,000 ohms in the 25 watt size and 75,000 in the 50 watt size.

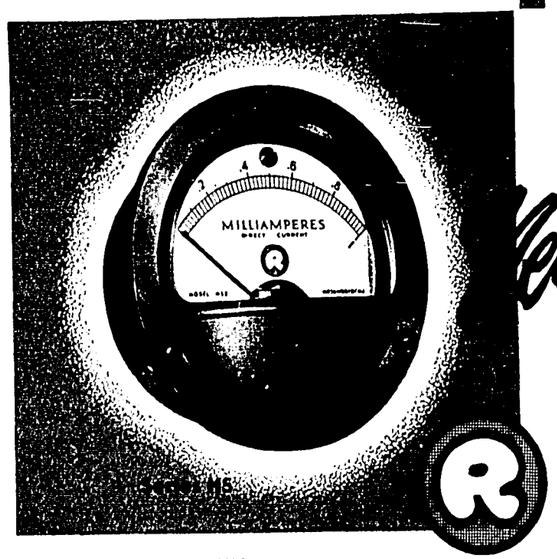
MARION

means the *most* in meters



New MARION *RUGGEDIZED* METERS HERMETICALLY SEALED

Series HS

Standard 1½", 2½" Mr 26 Series, 3½" Mr 36 Series, and 4½" sizes. Extremely accurate and sensitive in any application, even under critical conditions of Shock, Vibration, Mechanical Stress, Strain, Weather Conditions and Climate. Gives faster response time, more sustained accuracy, lower bearing friction and longer life. Meet dimensional requirements of JAN-I-6. Completely interchangeable with standard 2½" and 3½" types.

Series HM

SEALED LIKE A VACUUM TUBE FOR GUARANTEED PERFORMANCE

Magnetically shielded. 2½" & 3½". Hermetically Sealed. Unaffected by heat, cold, humidity, giving peak performance with critical accuracy. Interchangeable round and square colored flanges for different panel needs. One year unconditional guarantee on materials and workmanship. Extra guarantee for replacement of burned out or abused hermetically sealed meter. (On flat fee basis, $1.50 for 200 microamps upward; $2.50 if more sensitive than 200 microamps.)

HM 2 HM 3

Large, 4½" × 4⅛". Gives critical readability on 100° scale. Alnico V magnets for sensitive range; heavy Alnico for standard ranges. Extreme accuracy assured. Designed for permanent and portable test equipment.

Model 55

Marion Null Indicators are extremely sensitive shaded pole piece D'Arsonval type galvanometers. They are used primarily as bridge and potentiometer balance indicators and in any application where an instrument with very high sensitivity about the zero or balance point is desired. We particularly recommend Types HM2 and HM3 because they are hermetically sealed instruments which completely shield the galvanometers from the effects of moisture and dirt, and external factors. Ideal for use in discriminator alignment of FM receivers and as general laboratory balance indicators.

Null Indicators

Space saver, yet has superior damping characteristics. Available in standard 2½" square (Model 52S). Dependable, extra strong — has well-aged Alnico magnet and heavy flanged construction. Popular for pocket test, portable radio, medical equipment and general electrical service where size and dependability count.

Model 52N

Model 56

New 6½" × 5¼" bakelite cased meter. Easy reading at a distance. Large open face has 100° scale in 5½" arc. Room for multirange scale if needed. Milliamp ranges are Alnico II constructed, Alnico V for microamps. Strong, accurate, efficient, dependable.

Model 57S

Superb milliameter — more than a mere overgrown 3 incher. 8½" × 7", open face, extra long scale. Enlarged pole shoes — higher torque movement — higher damping factor. Accurate within 1%. Used in large vacuum tube voltmeters, multitesters and production testing.

Model 53SN

Standard commercial 3½" rectangular type. Also available in 3½" JAN Spec., round case. All Alnico construction. Excellent scale distribution characteristics. Ideal for portable test equipment and general electronic equipment application.

A Special Marion Service

In addition to manufacturing the finest standard electrical indicating instruments money can buy, Marion will design, engineer and manufacture precision products to meet your most exacting requirements. Let Us quote on your specifications. Write the Marion Electrical Instrument Company, Canal Street, Manchester, New Hampshire.

Timers by the A. W. HAYDON CO.

A. W. Haydon's timing devices are specified where performance is paramount. Let us apply our 20 years experience to your electrical timing and control problems.

CHRONOMETRIC D. C. GOVERNED TIMING MOTOR

- Extreme accuracy — 1/10 of 1%.
- Wide range of voltage, temperature, load.
- Light weight . . . Compact.
- Reversible.

TIME DELAY RELAY WITH ADJUSTABLE DIAL A.C. OR D.C.

- Wide selection of time range.
- Features ease of adjustment.
- Flexible, compact design.
- Positive operation.

REPEAT CYCLE TIMER A.C. OR D.C.

- Durable . . . Long Life.
- Wide range of time cycles.
- Multiple controlled circuits.
- Easily adaptable to meet specific requirements.

ELAPSED TIME INDICATOR A.C. OR D.C.

- Exceptionally compact and accurate.
- Registers tenths of minutes, minutes, tenths of hours, hours.
- Also available in aircraft instrument housing.

D.C. TIMING MOTOR

- Rugged Accurate Reliable.
- Compact . . . Reversible . . . Variable Speed.
- Special windings available for operation from vacuum tubes or as tachometer generator.

HERMETICALLY SEALED TIMER

- Maximum protection against weather, humidity, explosive atmospheres and high altitude.
- Light weight, corrosion-resistant enclosure.
- Flexible design.

STANDARDIZED A.C. TIMING MOTOR

- High starting and running torque.
- Synchronous Hysteresis Type.
- Extremely quiet in operation.
- Capillary Lubrication.

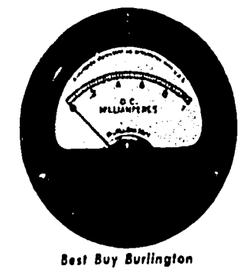
FOLLOW THE PARADE TO THE *New* Burlington *Hermetically Sealed* INSTRUMENT

JUST PLAIN RUGGED . . . yet an instrument of highest QUALITY . . . PRECISION . . . ACCURACY

The Burlington "Hermetically Sealed" *Instrument* was designed and is manufactured to conform to JAN specifications for sealed *instruments*.

- Steel case with heavy copper-cadmium plate and black finish.
- Excellent shielding due to case material and construction.
- Double strength clear glass.
- Black satin onodized aluminum bezel.
- Glass to metal seal under controlled humidity and temperature conditions.
- D'Arsonval permanent magnet type movement for DC applications.
- Designed to enhance panel appearance.
- Available in 1½" square, 2½" and 3½" round case types.
- Guaranteed for one year against workmanship and materials.



Best Buy Burlington

BURLINGTON INSTRUMENT COMPANY
DEPT. 1-51, BURLINGTON, IOWA

There's a NEW SILHOUETTE on the Microphone Horizon . . .

MODEL 55s
List Price $72.50

The New Small Unidyne is approximately only half as large as the Standard Unidyne.

The NEW ULTRA-CARDIOID DYNAMIC 55s "THE PERFECT PERFORMER"

SMALL Unidyne

- Eliminates Feedback Problems
- Permits performer to stand farther from the microphone

This mighty, though little, Microphone, is the *only* small-size, uni-directional moving-coil dynamic microphone! With this "Perfect Performer," all the important directional qualities are retained. This New Small "Unidyne" Model 55s offers superior performance, featured in a streamlined, small, functionally designed case. The 55s is actually a new Microphone retaining all the highly desirable features of the Model 55 "Unidyne."

The internal unit is based on the Shure-patented "Uni-Phase" principle. The moving-coil system has a high over-all efficiency and smooth frequency response. A large air-gap clearance and a rugged coil construction provide immunity of the moving-coil system to abnormal atmospheric conditions and severe mechanical shocks.

The New Small "Unidynes," Models 55s and 556s, are not replacements for the current Models 55 and 556 "Unidynes." The regular "Unidynes" will not be discontinued. Let your customers decide which they prefer of these four outstanding microphones.

"not 2 but 4!"

Model 55s Small Unidyne	Code: RUDOT	List Price: $72.50

SYNCHROS

PRECISION-BUILT BY

ECLIPSE-PIONEER

GUARANTEED ACCURACY TO WITHIN 15 MINUTES ON ALL PRODUCTION UNITS

For more than 17 years Eclipse-Pioneer has been a leader in the development of high precision synchros for aircraft, marine and industrial applications. Today, thanks to this long experience and specialization, Eclipse-Pioneer Autosyn* Synchros give you a *guaranteed* accuracy of 15 minutes (maximum) on all individual AY 200 type 400 cycle transmitters, differential generators, control transformers and resolvers. Furthermore, this phenomenal accuracy, applies to *all production units* in this series. Where special applications are involved, Eclipse-Pioneer will supply Autosyn Synchros with an even *finer* degree of accuracy. And remember, when you buy from Eclipse-Pioneer, this high precision is yours at the lowest possible cost.

*REG. TRADE MARK BENDIX AVIATION CORPORATION

LOOK FOR THE PIONEER MARK OF QUALITY REG. U. S. PAT. OFF.

Typical Performance Characteristics for one AY-201-3 Autosyn Synchro when transmitting to:

	One Control Transformer	Two Control Transformers	Three Control Transformers
INPUT			
Voltage	26-volts, single-phase	26-volts, single-phase	26-volts, single-phase
Frequency	400 cycles per second	400 cycles per second	400 cycles per second
Current	105 milliamperes	130 milliamperes	155 milliamperes
Power	0.99 watts	1.4 watts	1.9 watts
Impedance	85+j240 ohms	80+j180 ohms	77+j149 ohms
OUTPUT			
Voltage max. (rotor output)	18.0 volts	15.5 volts	13.3 volts
Voltage at null	30 millivolts	20 millivolts	20 millivolts
Sensitivity	315 millivolts/degree	270 millivolts/degree	230 millivolts/degree
Voltage phase shift	18.5 degrees	24.5 degrees	28.0 degrees
System accuracy (max. possible spread)	0.5 degrees	0.5 degrees	0.5 degrees

Other E-P precision components for servo mechanism and computing equipment:

Servo motors and systems • rate generators • gyros • stabilization equipment • turbine power supplies • remote indicating-transmitting systems and special purpose electron tubes.

POWER!
IN A SMALL PACKAGE

Ruggedly constructed durable motors (precisionly designed for 400 cycles—60 cycles—variable frequency) operating dependably in equipment requiring specialized performance, are being produced with superior accuracy through the advanced ideas of our designing engineers.

Experimental production, made possible through flexible engineering experience plus experienced production, has resulted in production designs that include motors for fan and blower duty as well as power and drive motors; these will be made exclusively for the electronic industries supplying equipment for military applications.

Our is an experienced organization with engineering model shop and electrical laboratory for prototypes—this means you gain personnel with "know how" to solve your special motor and A.C. power problems.

Rugged construction of our motors demands a one piece solid die cast housing with machined cover for back bearing (ball type used throughout), thru bolts, and riveted stator. This insures a continuation of excellent performance after high impact tests by maintaining a concentric air gap at all times.

We are stocked with fans and blowers of the standard types (as illustrated), and are constantly developing special models to meet your exacting needs.

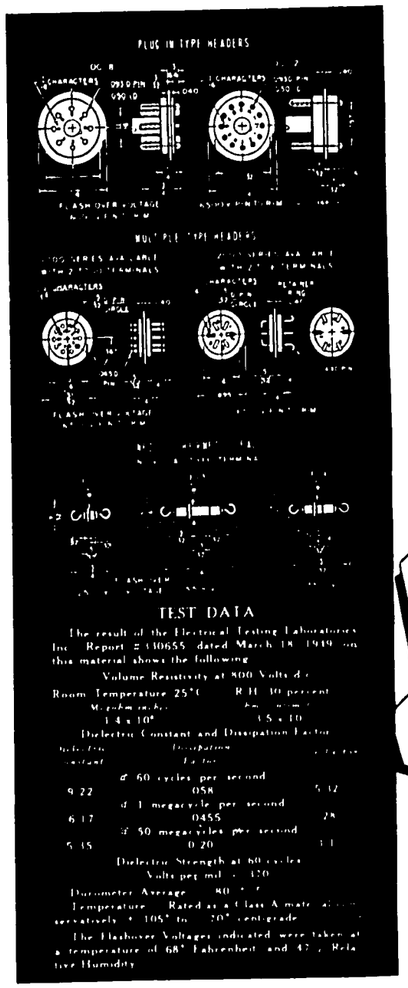
NEO-SIL CORPORATION

Hi Points in Hermetic Sealing!



HERMETIC SEAL TERMINALS — Applicable on MIL requirements. Will withstand thermal shock, vibrations, mechanical strains, and excessive pressures with no impairment of the seal or other functional characteristics. E-3LW terminals are now being used at 1000 psi static oil pressure and undergo 5000 psi tests for two minutes.

OCTAL TYPE PLUG IN HEADERS — Applicable for MIL requirements. These units can undergo sustained vibrations, large temperature changes, and other strains without impairment to the seal or other functional characteristics. Available with eight and twelve pins.

MULTIPLE PIN HEADERS — Applicable for MIL requirements. Presently being used on MIL-T-27 transformers. These units are available with 2 to 10 pins. These units can undergo conditions mentioned above with no impairment to the seal or other characteristics.

FUSE HOLDERS, HERMETICALLY SEALED — Available for 3-AG and 4-AG fuses. These units are completely sealed from moisture with or without the cap or fuse inserted. They are applicable on pressurized and gas filled components.

ROTARY WATERSEAL PANEL ASSEMBLIES — These units have an excellent five year customer history on gas filled pressurized components. They are available for 1/4" shafts and for potentiometers and switch bushings.

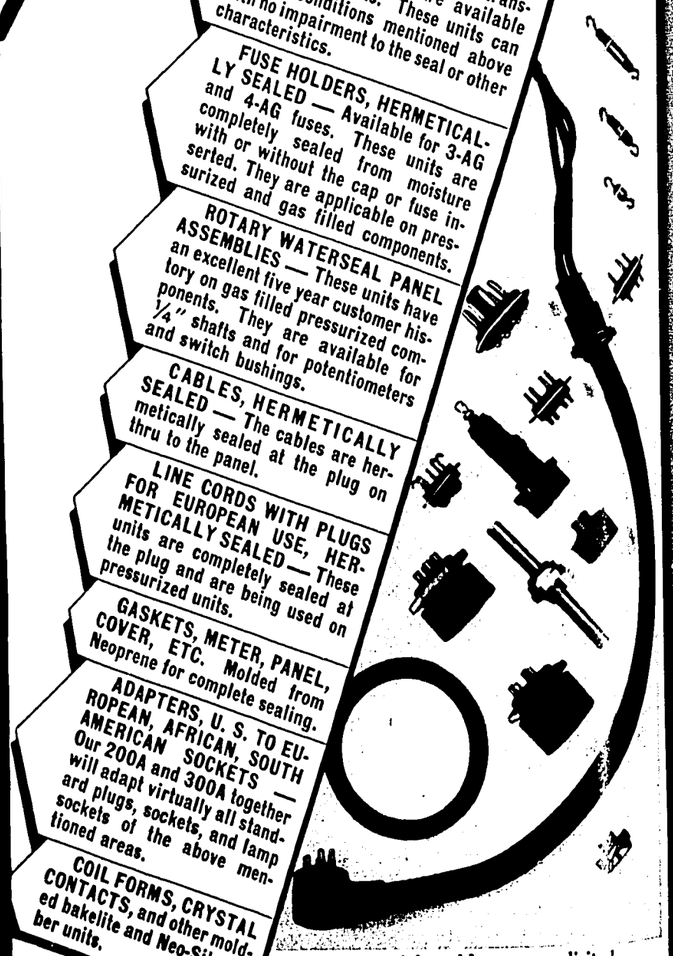
CABLES, HERMETICALLY SEALED — The cables are hermetically sealed at the plug on thru to the panel.

LINE CORDS WITH PLUGS FOR EUROPEAN USE, HERMETICALLY SEALED — These units are completely sealed at the plug and are being used on pressurized units.

GASKETS, METER, PANEL, COVER, ETC. Molded from Neoprene for complete sealing.

ADAPTERS, U. S. TO EUROPEAN, AFRICAN, SOUTH AMERICAN SOCKETS — Our 200A and 300A together will adapt virtually all standard plugs, sockets, and lamp sockets of the above mentioned areas.

COIL FORMS, CRYSTAL CONTACTS, and other molded bakelite and Neo-Sil rubber units.



Your special problems are solicited.

WATERMAN PRODUCTS

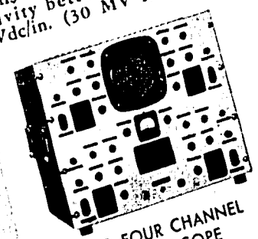
...FOR CRITICAL ANALYSES

H-21 DUAL CHANNEL OSCILLOSCOPE

Indicates 2 independent signals simultaneously. Sensitivity better than 0.085 Vdc/in. (30 MV rms/in.)

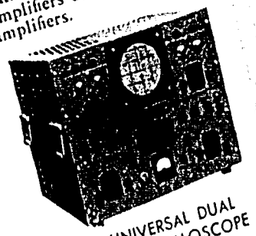
H-45 FOUR CHANNEL OSCILLOSCOPE

Offers choice of any combination of high sensitivity dc amplifiers or wide band ac amplifiers.



H-43 FOUR CHANNEL OSCILLOSCOPE

Designed for strip-film recording of up to 4 variables on a single 5" tube. Readily portable.



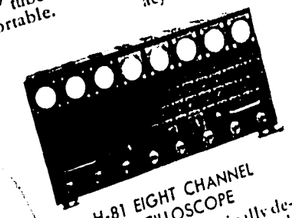
H-22 UNIVERSAL DUAL CHANNEL OSCILLOSCOPE

Plug-in ac or dc amplifiers. Two independent channels on a single tube register phenomena from dc to 1 meg. acycle.

ETC

Multi-Channel Oscilloscopes

As specialists in multi-channel 'scopes, ETC offers a broad line for critical testing, production and research needs. In addition to standard types incorporating 2, 4, and 5 wave forms on a single tube, many special designs and adaptations are regularly produced for specific uses. Full details on any type will gladly be sent on request.



H-81 EIGHT CHANNEL OSCILLOSCOPE

A unique design originally developed for film strip recording of seismographic phenomena. Frequency response 20 to 150,000 cps. A DC model with sensitivity of 2 MV dc in. also available.

MULTI-GUN CATHODE TUBES

The answer to problems involving registration of a multiplicity of transients on a single screen. 2-, 4-, 6-, 8- and 10-gun types. Also a complete line of standard 5" cathode ray tubes.

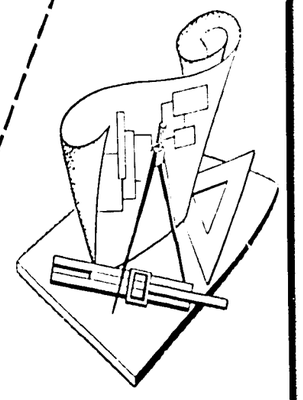
UHF

DEVELOPMENT
DESIGN
MANUFACTURE
EQUIPMENT



. . . **if** UHF design or development is a major problem with you, or . . .

. . . **if** low-unit manufacturing cost is essential to satisfactorily meet competition, or . . .

. . . **if** trustworthy, confidential collaboration is a highly necessary factor . . .

THEN Lavoie Laboratories, Inc. can be of invaluable assistance. We have the Engineering Staff . . . the shop techniques . . . a competent understanding of government contract procedures . . . and the reputation for satisfactorily meeting *all* of these requirements.

We welcome your inquiries on any phase of UHF design, development or production.

LAVOIE PRODUCTS INCLUDE:

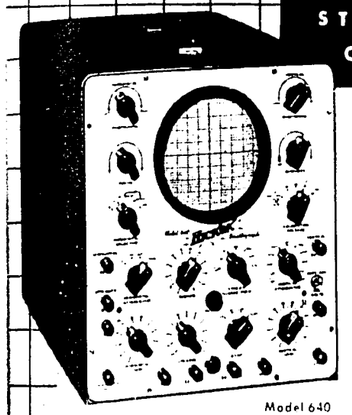
RADAR RECEIVERS
RADIO RECEIVERS
SIGNAL GENERATORS
FREQUENCY METERS
ANTENNA EQUIPMENT
PULSE GENERATORS
OSCILLOSCOPES
RADAR BEACONS
COMMUNICATION SYSTEMS
CRYSTAL IMPEDANCE METERS
ETC., ETC.

Lavoie Laboratories, Inc.

MORGANVILLE, N. J.

HICKOK *new model* 640 OSCILLOGRAPH

STABLE • VERSATILE
OUTSTANDING RANGE



Model 640

For Industrial and Electronic *Laboratories*

The new HICKOK Model 640 Oscillograph with its exceptional design features and characteristics provides an outstanding versatile instrument for the engineer in observing regular recurring or transient phenomena.

Wide Band Amplifier: Frequency response DC, [illegible] to 4.5 mc. (down 3 db.)

Vertical DC and AC Amplifier: 10 MV per inch with sensitivity switch in high position. 25 MV per inch in low position.

Frequency Response: 0 to 1,000,000 cycles (3 db point), in high position. 0 to 4,500,000 cycles (3 db point), in low.

Maximum Input Potential, 1000 volts peak. Input Impedance, 2 megohms. 50 mmf.

Horizontal Amplifier: Deflection Factor—Direct, 20 volts RMS per inch.

Full Gain Setting, 50 millivolts RMS per inch. Frequency Response, 0 to 200,000 cycles (3 db down).

Test Signals: Line Frequency, 3 volts RMS per inch.

Sawtooth available from front panel. Direct connection to both horizontal and vertical deflection plates.

Linear Time Base: [illegible] 2 cycles to 5 [illegible]

Provision for [illegible]

Sweep Speeds: [illegible] per second.

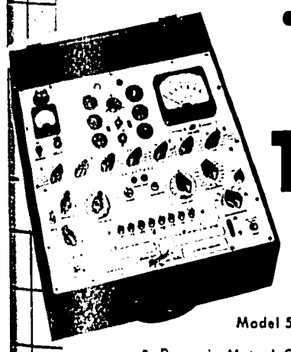
Trigger for [illegible] for external [illegible] in the [illegible] sweeps.

Synchronizing [illegible] frequency.

"Z" Axis Modulation: [illegible] the grid of the [illegible] beam [illegible]

Shielded Shock Mounted Built-in Calibrating Voltages. Excellent Stability and Expandable Sweep. [illegible] several added [illegible] instrument [illegible] Price $355 [illegible]

● Also manufacturers of a complete line of electrical indicating instruments and test equipment. Full information sent [illegible]



DYNAMIC MUTUAL CONDUCTANCE

TUBE TESTER

HIGHLY ACCURATE

Laboratory Model

Model 539

- Dynamic Mutual Conductance circuits . . . Readings in [illegible]
- Permits choice of 3 AC signals, .25, .5 and 2.5 volts
- Vernier adjustment permits accurate setting of grid voltage
- Separate AC meter measures line voltage at all times
- Provision for insertion of plate millimeter for measuring plate current
- Optional self-bias arrangement.
- Tube life and tube gas

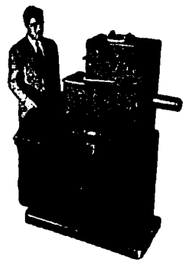
EQUIPMENT FOR AM-FM-TV STATION USE—BY Gray RESEARCH

GRAY professional equipment for broadcast station use is conceived, designed, engineered and built by specialists in the audio-video field. The products here described are widely used, approved and recommended by networks and independent stations. Broad acceptance by the industry is our best testimonial to the high quality and serviceability built into equipment manufactured by Gray.

Gray TELOP *(TELevision Optical Projector)*



Makes PROFITS GROW for TV Stations. The Gray Telop projects low-cost, easily produced TV 'commercials.' Without keystoning, any two photos, titles, slides, etc., or small objects may be broadcast with superimposition, lap dissolve or fade-out. Four optical openings. Strip material may be used horizontally or vertically with Stages #2 and #3. (For full details write for Bulletin T-101.)

Gray STAGE #2

Attaches to three optical openings of the Telop. Accommodates roll stock *vertically* to televise commentary or the commercial in the same way movie introductions are projected.

Gray STAGE #3

Attaches to optical openings of the Telop. News ticker tape fed from 8-mm reels is projected on any part of the screen, top to bottom, horizontally. May be used with test pattern or other commercial.

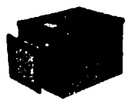
Gray TV CAMERA TURRETS

Enable a Single Camera to Serve up to 8 Projectors

MODEL 556

Centered on a rugged 'square' pedestal, requires a minimum of space. Heavy duty ball bearings. Rotates 360°.

Gray LIGHT BOX for Transparencies



Provides back lighting for Telop use.

Gray REVERSE READING CLOCK

For use where reversal is required. Designed to permit superimposing of the commercial or other copy.

Gray MULTIPLEXER Model 600

A precision arrangement of mirrors for operation of pairs of projectors simultaneously into a single TV camera or individually into two separate cameras. *Enables a greater number of projectors to be used with fewer highly expensive TV cameras.*

Gray TRANSCRIPTION ARMS

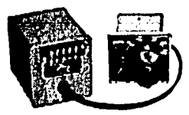
NEW Viscous-Damped
Model 108-B Arm

For all records — 33⅓, 45 and 78 r.p.m. Radically new suspension development on the viscous damping principle *for perfect tracking* of records and elimination of tone arm resonances. Instant cartridge change with automatic correct stylus pressure. Solves all transcription problems. IDEAL FOR LP RECORDS. For Pickering and GE cartridges.

Model 106-SP Arm

Designed to meet strictest requirements of modern highly compliant pickup cartridges. Three cartridge slides furnished enable GE 1-mil, 2½-mil or 3-mil cartridges or Pickering cartridge to be slipped into position in a jiffy. No tools or solder! Superb reproduction of 33⅓, 45 or 78 r.p.m. records. Low vertical inertia, precisely adjustable stylus pressure.

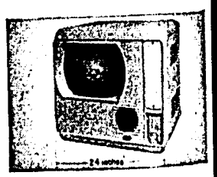
Gray EQUALIZERS



MODEL 602 EQUALIZER has been specially engineered to provide constant velocity frequency response for both conventional and LP records. Four steps—flat, transcriptions, good records, poor records. Gray Equalizers used as standard professional equipment by broadcast stations.

MODEL 603 — Has 5 control positions. For both GE and Pickering cartridges.

Gray Color Television Monitor



This latest product of Gray Research was developed for professional monitoring of color telecast of the CBS field sequential system.

Gray MILITARY PRODUCTS

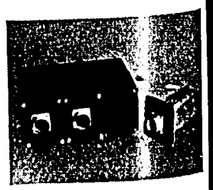


Illustration shows typical airplane controls made for Hamilton Standard, Division of United Aircraft Corporation. Other military developments and products include video indicators, intricate mechanisms, trainers, electronic-mechanical development contracts.

Please write for bulletins describing the above equipment.

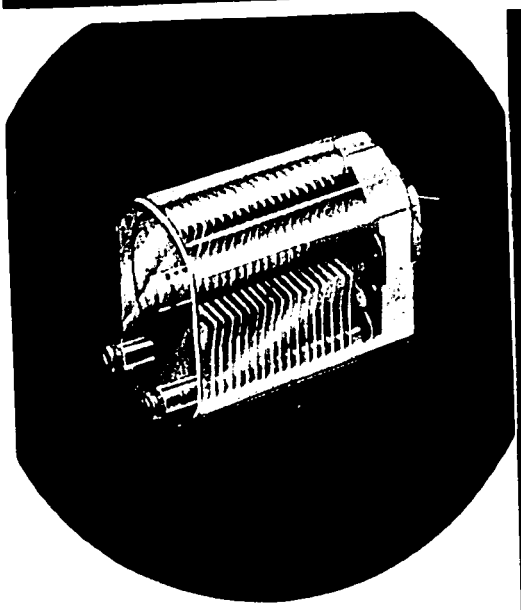
Plastic PA



Condenser Covers

For RCCO, APC and GI Condensers, 25-140 mmf.

PEERLESS plastic condenser protector covers prevent mechanical damage; keep stray wire clippings, solder and dust from shorting the plates; and add eye-appeal to your product. They are made of water-clear high-dielectric plastic material .020 inch thick. Covers are easily applied and securely held in place by our No. 300 cement. Covers are made with two holes spaced .562" or .500", or with one hole, and with or without perforation. Lengths of covers are $\frac{5}{8}$", $\frac{7}{8}$", $1\frac{1}{16}$", $1\frac{1}{4}$", $1\frac{9}{16}$" and $1\frac{5}{8}$". Special sizes and dimensions made to your specifications. Catalog sheet available on request.

Coil Forms

PEERLESS coil forms can be made to your particular specifications from Acetate, Bakelite, Methacrylate, Polystyrene or any of the other plastics. Dimensions will be held to closest tolerances and forms furnished either for random or spaced winding, either with center hole or threaded ends.

In addition to these two special items, production is available in aluminum, brass, copper, steel or other metals, *of parts needed by radio and electronic manufacturers.*

Without obligation, send us your B/P specification today for our quotation and guaranteed delivery.

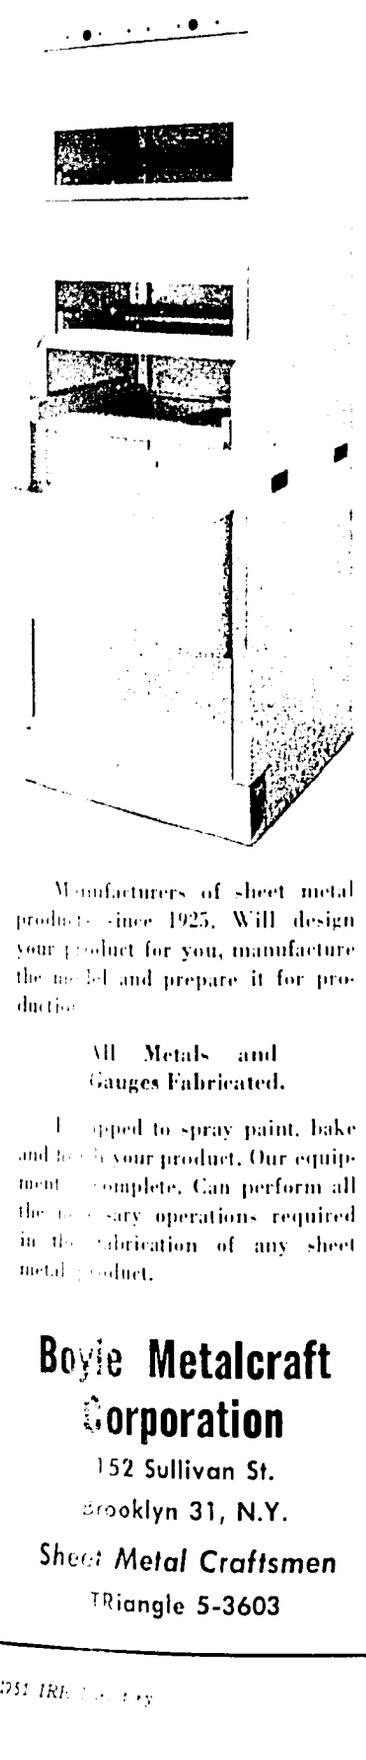
This Cabinet

Is Only One Of Many That We Manufacture

Transmitter and Radar Cabinets, Chassis, Panels, and many special component parts such as are required by laboratories and manufacturers.



Manufacturers of sheet metal products since 1925. Will design your product for you, manufacture the model and prepare it for production.

All Metals and Gauges Fabricated.

Equipped to spray paint, bake and handle your product. Our equipment is complete. Can perform all the necessary operations required in the fabrication of any sheet metal product.

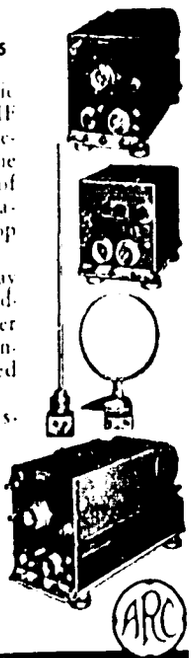
WHEREVER YOU GO
WHATEVER YOU FLY
ARC EQUIPMENT
Meets Your Operational Needs



ARC Type 11A meets basic needs by providing VHF transmission, LF range reception suitable for the exacting requirements of night instrument operation, and rotatable loop navigation.

ARC Type 17 is 2-way VHF equipment, including tunable VHF receiver and one or more 5-channel, crystal controlled VHF transmitters.

ARC Type 12 (illustrated) gives you advantages of both Type 11A and Type [illegible] systems.

All ARC airborne equipment is designed for reliability and performance, not to meet a price.

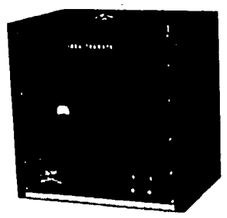
VARIABLE DC HIGH VOLTAGE!

RADIO FREQUENCY TYPE DC POWER SUPPLIES



MODEL 401—Covers a range from below 5KV to 50KV with a maximum power output of 40 watts and an internal resistance of approximately 40 megohms. 500 microamperes of current are available over the entire range. For voltages up to 30 KV, 1 milliampere of current can be obtained. Can also develop voltages higher than 60KV under light load.

MODEL 201—Capable of producing from 1 to 20KV at a maximum power output of approximately 10 watts and an internal resistance of about 30 megohms. This unit can furnish 250 microamperes of current over the entire range. For voltages up to 10KV, currents of 500 microamperes may be obtained.

SPECIAL NOTE: We have recently added a number of new models to our line of High Voltage Power Supplies covering both variable and fixed voltage outputs from 1 KV to 60 KV and current ranges from 50 microamperes to 2 milliamperes. Both self regulating and electronically stabilized DC Power Supplies are available. Write for complete information.

INDUCTOGRAPH PRODUCTS, INC.

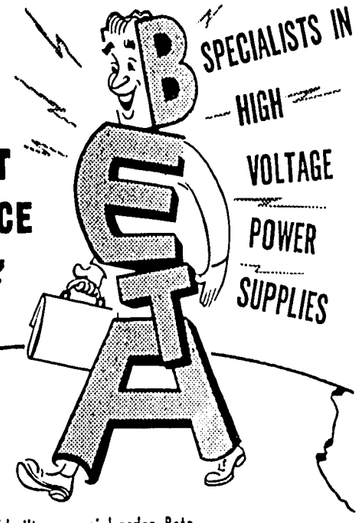
Plant—Brookfield, Conn.

Only **BETA** *gives you* **ON THE SPOT ENGINEERING SERVICE** *Coast to Coast*



Power supplies up to 30 KV in stock . . . up to 250 KV quickly available from standard designs . . . up to 500 KV built on special order. Beta supplies the correct equipment for your job . . . designed for long, accurate, trouble-free life. Beta field engineers will be glad to consult with you on your high voltage power supply problems and will give you expert advice on proper voltage, current, regulation, metering, safety devices, control circuits, etc. for your particular application.

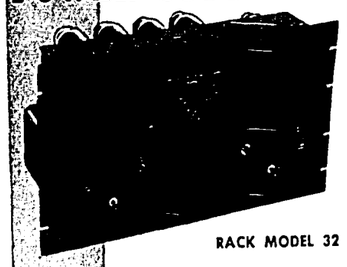
ELECTRONICALLY REGULATED

LABORATORY POWER SUPPLIES



RACK MODEL 32

- STABLE
- DEPENDABLE
- MODERATELY PRICED

STANDARD RACK MOUNTING PANEL SIZE 16½" x 19" DEPTH 9" WEIGHT 38 LBS

- INPUT: 105 to 125 VAC, 50-60 cy
- OUTPUT #1: 200 to 325 VDC at 300 ma regulated
- OUTPUT #2: 6.3 Volts AC CT at 5A unregulated
- OUTPUT #3: 6.3 Volts AC CT at 5A unregulated
- RIPPLE OUTPUT: less than 10 millivolts rms

D. C. POWER SUPPLIES

Selenium Rectifier Power Units

Power Conversion For

- Production and laboratory testing of D.C. apparatus from A.C. power lines, allowing continuous variation of D.C. voltage and current to simulate changing battery or line voltage conditions.
- High current selenium rectifier plate power supplies.
- Commercial operation of D.C. motors, dynamotors, vibrator power packs, relays and other devices which require D.C.
- Replacing storage or primary batteries
- Battery charging
- Electrolytic processing and electroplating

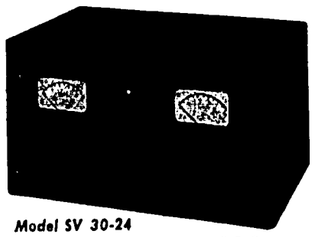
INPUT: 115 volts, 60 cycle, single phase

OUTPUT: (Variable) 0-30 volts at up to 24 Amperes of Filtered D.C.

RECTIFIER: Full wave bridge selenium stack.

FILTER: Single section choke input followed by capacitor. 3% ripple, excellent regulation.

$350.00 Net
F.O.B. Brooklyn



Model SV 30-24

This unit is representative of one of the types we supply. The majority of D.C. power supplies we manufacture are designed to the exact requirements of the user, effecting maximum economy. Prompt delivery of units for your specific job. Thousands of our power supplies now in service attest to the quality and durability of our equipment.

Quotations on your requirements promptly furnished.

MODEL RECTIFIER CORPORATION

1510 Nostrand Avenue
Brooklyn 26, N.Y. Tel. BUckminster 7-0029

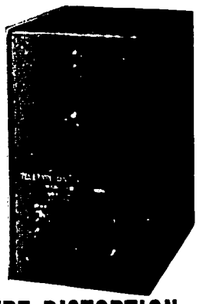
TERMINAL EQUIPMENT

RANGE: Mark or space bias distortion 0 to 50%.

ACCURACY: ± 3%.

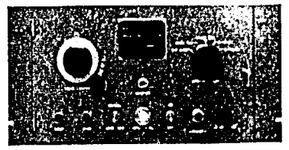
INPUT: 30 or 60 M.A. neutral or polar. 60 WPM teletype signal.

INPUT IMPEDANCE: 200 ohms.



TELETYPE DISTORTION INDICATOR Model 22

A portable unit that measures bias distortions. May be connected in any teletype circuit with teletype-writer printer without disturbing its operation.



DIPLEX RECEIVING KEYER or Regenerative Repeater

Type CA-1447

Double the Number of Teletype Messages on Any Circuit by Time Division

INPUT: 500-10,000 cps tone keyed with diplex signal ODBM to —40DBM level. Compression amplifier permits uniform operation with varying line levels with or without filters in line. Input distortion may exceed 40%. Manual adjustment will allow unit to tolerate over 50% distortion. OUTPUT: Two simplex neutral outputs each in form of relay contacts. Output distortion—less than 2%. POWER: 105-130 V., 80 watts, 50-60 cps. CONSTRUCTION: Rack panel 19" long x 8¾" high x 10¼" deep. Vertical chassis with tubes in rear. All parts available from front door.

TELETYPE TONE KEYER

The Model TTK-10 Tone Keyer provides keyed tone at its output when keyed DC neutral or polar circuit is connected to the input. Keying speeds of 500 wpm are possible with unit. Only vacuum tube keying is employed.

Specifications INPUT: 20 to 60 ma. neutral operation with remote or local (from the unit) battery; either side of line may be grounded. 30 ma polar operation with remote battery; either side of line or center point may be grounded. OUTPUT: Level —15 DBM to + 15 DBM. Tone frequency 400 to 8000 cps. Keying speed to 180 dot cycles. Output tone wave form—less than 5% distortion. Output impedance—600 ohms balanced or unbalanced to ground. Bias distortions of ± 20% at input of unit may be corrected to less than 2% at output. Line voltage variations of ± 10% will not affect local battery current by more than 1% or output distortion by more than 2%. Metering is provided in unit to measure input line current and output tone level. POWER REQUIREMENTS: 115 or 230 VAC, 50 to 60 cps.—90 watts.

TUBES: 1—Type 6Y6-G, 1—Type 12AT7, 1—Type 5R4-GY, 1—Type 6AU6, 1—Type 6X4, 1—Type 6H2, 4—Type 12AU7, 1—Type 6H3

Physical: 19" x 8¾" panel for rack mounting. Chassis extends 12" behind panel. All operating controls available from front panel. Weight—25 lbs. Construction and components—to Govt. specifications.

TELETYPE TONE DEMODULATOR

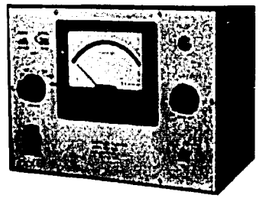
This Model TTD-10 Teletype Tone Demodulator is designed to receive a keyed tone signal and supply either neutral or polar output. Vacuum tube keying circuits used throughout. Output current is regulated to 1% for line voltage variations of ± 10%. Keying speeds of up to 500 words per minute are possible with the unit.

Specifications INPUT: Keyed tone, 300 to 10,000 cps. Line level —25 DBM to + 10 DBM. Balanced or unbalanced 600 ohm. Keying speed—180 dot cycles. OUTPUT: Neutral, 20 to 60 ma., 120 v., either side of line may be grounded or open; battery supplied from unit. Neutral, 20 to 60 ma., either side of line may be grounded or open; remote battery. Polar, 20 to 30 ma., 120 v., either side of line may be grounded or open; battery supplied from unit. Adjustment is provided so that input bias distortions of ± 20% may be corrected to less than 2% at output. Input level variations of ± 5 DBM will cause less than 2% change in output bias distortion. (For square wave keying.) POWER REQUIREMENTS: 115 v. or 230 v. 50-60 cycle AC—130 watts.

TUBES: 4—Type 6Y6-G, 1—Type 6AU6, 1—Type 5R4-GY, 1—Type 6X4, 3—Type 12AU7, 1—Type 0A3, 2—Type 6AL5, 2—Type OB2

Physical: 19" x 8¾" panel for rack mounting. Chassis extends 12" behind panel. All operating controls available from front panel. Meter provided for input level and output current measurements. Weight—30 lbs. Construction and components—to Govt. regulations.

* Model TTD-11 Teletype Tone Demodulator is available with a compression amplifier instead of a clipping amplifier and will provide an output with bias variations under 5% for ± 10 DB line level variations with standard filters in tone line.

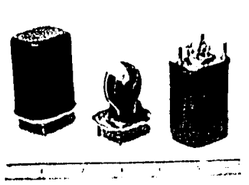


PEAK PULSE VOLTMETER

Model 80A

VOLT RANGES: 0-10, 0-50, 0-100, 0-500, 0-1000, 0-5000 volts.
PULSE WIDTH: 0.25 microseconds to 50 milliseconds.
REPETITION RATES: 10 to 20,000 pps.
ACCURACY: ± 3% of full scale.
INPUT IMPEDANCE: 200,000 ohms.

An automatic slideback instrument which secures rapid and accurate readings at pulse widths of .25 microseconds and at 10 pps. Controls include on-off switch, range selector switch, input polarity switch, zero-set control, and peak to peak switch.



INCREDUCTOR

Newest Component in the Electronic Field

INCREDUCTOR is trademark of new type variable inductor that is:
—electrically controlled—no moving parts.
—variable over useful inductance range of 100 to 1—or 200 to 1—or even more in some applications.
—low in loss—maintains high Q even at megacycles.
—controlled with minimal power, compact and light in weight.
—result of years of intensive research by C. G. S. engineers.

These valuable characteristics of the INCREDUCTOR are attained by use of separate control and signal windings, specially arranged on ceramic core having unusual magnetic properties.

Alternating or direct current variations, through the low power control winding, produce corresponding variations in inductance of INCREDUCTOR signal winding.

The standard line of C. G. S. INCREDUCTORS now available includes units with wide range of starting inductances and frequencies. For applications in which standard C. G. S. INCREDUCTORS will not provide requisite characteristics, C. G. S. will design and produce INCREDUCTORS to meet your specific requirements.

Write us on your letterhead for a descriptive bulletin, including information and prices on standard units, together with helpful design data.

Electronic Associates, Inc., is a coordinated group of electronic engineering consultants fully equipped to perform electronic research, development and production. They include engineering, production, and administrative personnel capable of handling a wide range of problems including design studies, applied research, and the production of highly complex electronic devices.

Plant facilities comprise laboratories; model, welding and machine shops; paint, anodizing, and test departments; assembly and tool rooms; foundry and other contributing functions of production.

A few of the many products the Concern has manufactured are illustrated here.

More detailed information will be furnished on request.

Accurate FABRICATION of FUSED QUARTZ

PRECISION FABRICATED TO SPECIFICATIONS

Specialists in the fabrication of FUSED QUARTZ, ceramics, alumina, norbide, sapphire or any other hard material to closest tolerance. All sizes and shapes for production and research in chemistry, electricity, and physics.

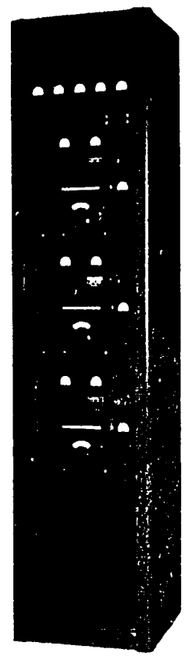
SYNCOR PRODUCTS COMPANY

FACTORY AT 26 IRVING COURT, MALDEN, MASS.

SYNCOR PRODUCTS CO. BOX 51, MALDEN 48, MASS.

Exalted-Carrier Diversity Receiver

A New standard of performance in high-frequency reception



Combines all advantages of the best diversity reception plus new exalted-carrier detection which eliminates selective fading distortion and greatly reduces interference from interfering stations within the received channel.

Supplied in compact three-receiver combination with high continuity-of-service factor and switching flexibility.

New diversity selector chooses strongest of the three signals and completely rejects the weaker signals.

For reception of voice, program, or tone-multiplex transmited by either amplitude or phase modulation.

Exalted-carrier adapters also available for single-receiver use.

SELETRON Selenium Rectifiers are constantly specified by an increasing number of radio engineers in the U.S. and throughout the world because they are so thoroughly dependable under all types of grueling applications. SELETRON engineers will be glad to aid you in the solution of your rectifier problems.

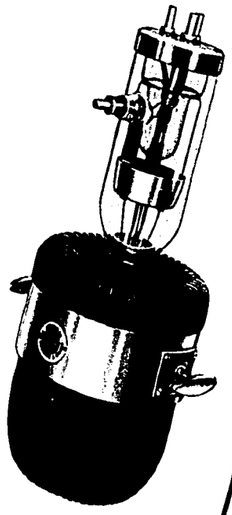
SELETRON DIVISION | RADIO RECEPTOR COMPANY, Inc.

MORE POWER FOR YOU

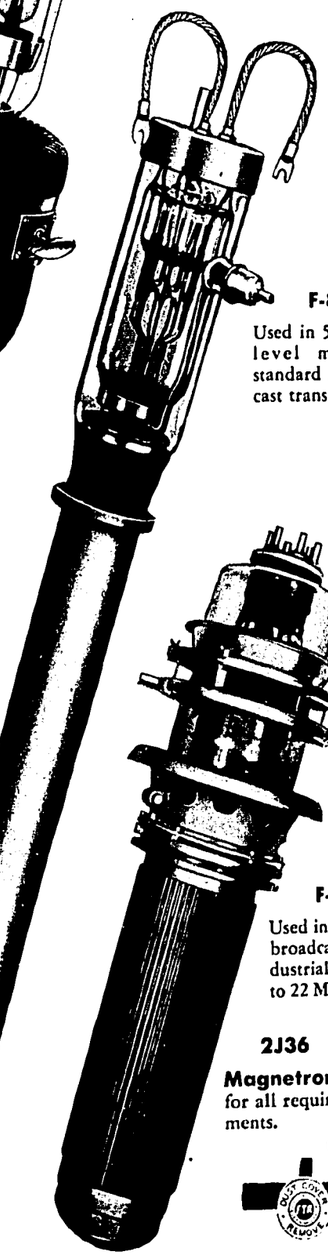
in every

Federal tube

Electronic Vacuum Tubes for all power requirements: Transmitting, Rectifying, Industrial, Special Purpose, Television.



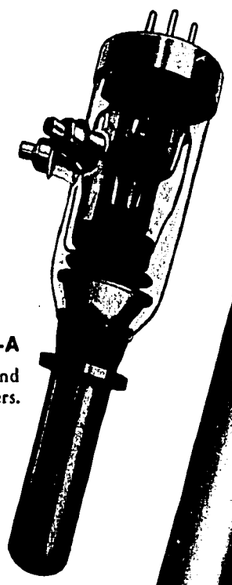
F-892-R
Used in 5 and 10 KW AM transmitters.



F-862
Used in 50 KW low level modulated standard AM broadcast transmitters.

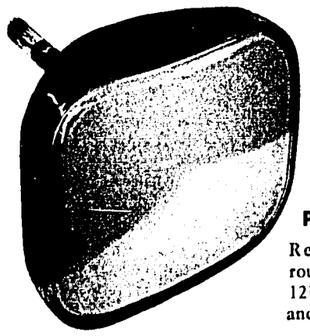
F-5512
Used in FM broadcasting, industrial and research applications up to 110 Mc.

F-5680
Used in broadcasting and industrial applications up to 50 Mc.



F-124-A
Used in 50 KW AM and short wave transmitters.

F-134
Used in high power broadcasting and industrial service up to 22 Mc.



Picture Tubes
Rectangular and round screen types: 12½, 14, 16, 17, 19 and 20 inch.

2J36
Magnetrons for all requirements.

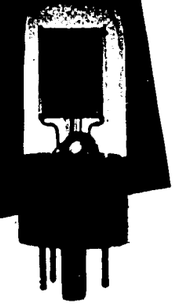
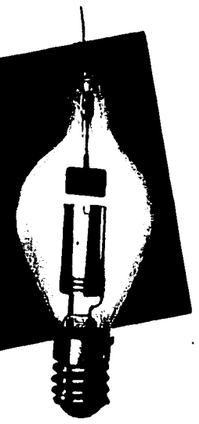
PHOTOTUBES

CETRON engineer perfected phototubes. Many types for innumerable applications. "Insist on CETRON."



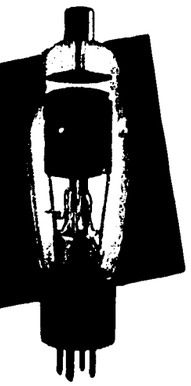
RECTIFIERS

CETRON industrial rectifiers in full and half wave mercury vapor, full and half wave gas filled using both mercury vapor and gas. "Insist on CETRON."



THYRATRONS

CETRON grid controlled thyratrons have a longer life and better performance. "Insist on CETRON."



For over a quarter of a century CETRON phototubes, industrial rectifiers, and thyratrons have been meeting the needs of the industry effectively and efficiently. Send for a copy of our 50 page catalog. It contains all the technical data and specifications of all electronic tubes in our large line.

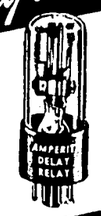
AMPERITE

THERMOSTATIC METAL TYPE

Delay Relays

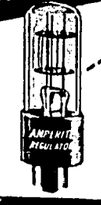


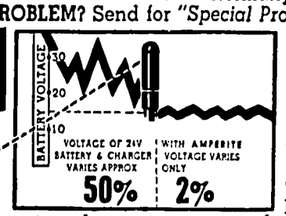
PROVIDE DELAYS RANGING FROM 1 TO 120 SECONDS

FEATURES: — Compensated for ambient temperature changes from —40° to 110° F . . . Hermetically sealed; not affected by altitude, moisture or other climate changes . . . Explosion-proof . . . Octal radio base . . . Compact, light, rugged, inexpensive . . . Circuits available: SPST Normally Open; SPST Normally Closed.

PROBLEM? Send for *"Special Problem Sheet"*

Regulators





Amperite REGULATORS are the simplest, lightest, cheapest, and most compact method of obtaining current or voltage regulation . . . For currents of .060 to 6 Amps. . . . Hermetically sealed; not affected by altitude, ambient temperature, humidity.

Write for 4-page Illustrated Bulletin.

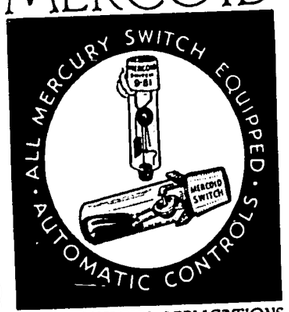
MERCOID



FOR INDUSTRIAL APPLICATIONS REQUIRING POSITIVE CONTROL OF PRESSURE, TEMPERATURE, LIQUID LEVEL ETC.

They Have What Experienced Engineers Want—

POSITIVE SAFETY
EASE OF INSTALLATION
CONVENIENT ADJUSTMENTS
YEARS OF DEPENDABLE PERFORMANCE

TRANSFORMER-RELAYS

Mercoid Relays are unlike the common clapper type relays. All noise and residual magnetism are eliminated. Equipped with mercury switches no open contacts used.

MERCURY SWITCHES

Mercoid switches are not affected by dust, dirt or corrosion. They have many definite applications where open contacts are not suitable. Various types available.

***Plunger Type* MERCURY RELAYS**

APPROVED

★ **POSITIVE** — Hermetically sealed mercury—mercury contact assures silent flickerless operation . . . no pitting, no sticking!

★ **DEPENDABLE** — Hermetically sealed . . . no dust, no dirt, no oxidation . . . means no servicing, no cleaning!

They ALWAYS Work

Available in single, double and triple groups operated by one coil. Coil ratings for every application. Contacts rated conservatively at 35 Amp. 115 V. AC; 25 Amp. 220 V. AC. Available normally open or normally closed.

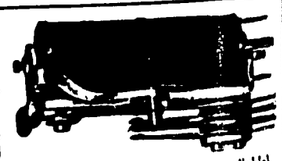
KURMAN RELAYS

Reliable • Powerful • Constant



For all types of Automatic Controls, Keying, Antenna Changeover, Burglar Alarms, Closed Circuit Applications.

Class A (all other types available)

Series 43

TELEPHONE Class A—Multicontact . . . Pin Hinge. Complete range of contacts up to 28 Springs. Wide variety of contact materials. Can be provided for slow operate, slow release, or slow action. 4 x 1-7/32 x 1¾".

Sensitive Miniature Relay—Series 43 . . . Suitable for use in plate circuit and other control applications where low current consumption, small size, and adjustable contacts are important factors. DC sensitivity 30 to 18 milliwatts. Balanced armature. Contacts available—single pole double throw; also available in dust proof 5-prong container.

Prompt deliveries. Prices quoted on request. Write for Issue 2.

MODERN DESIGN AND ENGINEERING

The automobile and aircraft industries owe much of the success of their products to the modern solution of their angular drive problems with flexible shafting. The right application of a flexible shaft can mean greater flexibility in alignment . . . better integration of units . . . less complex gearing.

The result is lower assembly costs and a product that is quiet, smooth, efficient and trouble-free in operation with minimum repair requirements. Circle Ess flexible shafts will stand the most rigid tests and scrutiny. They will help to solve your problems as they have those of many other manufacturers.

CIRCLE ESS

MEPCO, INC. PRECISION RESISTORS

JAN-R-93
LUG TERMINAL TYPES

CERAMIC FORMS: Non-hygroscopic material, high dielectric, low coefficient of expansion. No. 6 screw hole through center.

WIRE: Highest grade alloys; Cu-Ni, Ni-Cr, Cu-Mn-Ni, Ni-Cr-Al-Cu, Ni-Cr-Fe, enamel or fabric covered. Minimum size .0015 standard, .0007 special.

TEMPERATURE COEFFICIENT: ± .002%/°C for ohmages up to approx. 2500; .017%/°C above 2500. .002%/°C may be ordered special on any type resistor.

TOLERANCE: ± 1%, ±.5%, ±.25% standard. ±.1, ±.05 special.

MOISTURE PROTECTION: Standard units thoroughly impregnated with moisture and salt water proofing compounds and fungus resistant acetate label. Vacuum impregnating and other special sealing on request.

INSULATION: Each cross-over wire insulated from winding by acetate cloth. All units receive 500V. breakdown test.

INDUCTANCE: Reversed, balanced winding in each pie section minimizes inductance up to approx 50KC. Special frequency characteristics upon request.

Type		Wattage Rating		Resistance Range			Dimensions (Inches)		Jan Voltage Ratings

MEPCO, INC. 37 Abbett Avenue Morristown, N. J.
Telephone: Morristown 4-5777

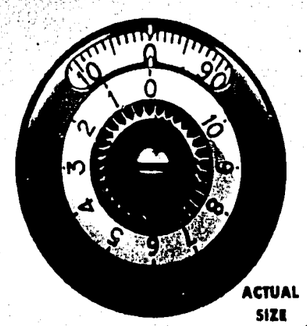
MICRODIAL
TEN TURN-COUNTING DIAL

Microdial is composed of two concentrically mounted dials . . . one for counting increments of each turn and the other for counting turns. The incremental dial has 100 equal divisions and is attached rigidly to the shaft so there is no backlash. Thus the contact position is indicated to an indexed accuracy of 1 part in 1000. Rotation is continuous in either direction. There are no stops on the Microdial assembly.

COMPACT . . . Microdial has same O.D. as Micropot . . . requires no more panel space.

CLEAR READING . . . Forced fast-reading tests showed only 1/20th as many errors with Microdial open window as with next most legible dial. Turn counter distinguishes between 0 and 10 turn readings, and accelerates to avoid confusion on readings near integral turns. Precise readings are made from larger dial with maximum separation of graduations and wide angle visibility.

CONVENIENT . . . delivered completely assembled with dials synchronized. Easily mounted in a few seconds. All dials may be locked.

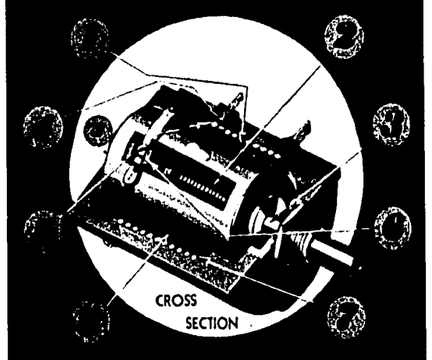


Microdial . . . turn-counting dial, primarily designed for use on Micropot ten turn linear potentiometers . . . use it on any multiturn device having ten turns or less.

BORG EQUIPMENT DIVISION
THE GEORGE W. BORG CORPORATION
DELAVAN • WISCONSIN

MICROPOT
PRECISION TEN-TURN POTENTIOMETER

1. You get permanent accuracy because the resistance wire is locked in place. It is precision positioned and moulded integrally with the housing.
2. You get permanently accurate settings, smooth action and low uniform torque provided by the stainless steel, precision ground, double thread lead screw guiding the moving contact.
3. You get precise positioning of the moving contact because of the two bearings supporting the rotor assembly.
4. You get good rigid terminals because they are moulded integrally with the housing.
5. Terminals soldered to ends of resistance element before moulding. Entire resistance circuit is an integral part of the housing.
6. You get accurate setting and resetting due to anti-backlash spring in contact guide.
7. You get a fine resolution because of the 431⅛" length of resistance wire in the spiral element.
8. You get a resistance output directly proportional to shaft rotation within ±0.1% of the total resistance. Every potentiometer is automatically machine tested for linearity at 101 points.



LINEARITY ACCURACY ± 0.1%

Units for immediate shipment:
1,000 to 30,000 ohm range.
Special resistance values made to order.

sub-miniature AND moisture-proof

IN-RES-CO S-15 & S-30 WIRE WOUND RESISTORS

THE ECONOMICAL SOLUTION where moisture proof resistive elements of comparatively small size are required for commercial applications. Type S-15 is ⅜" long by ¼" diameter; type S-30 measures ¾" by ¼" diameter. Both types are moisture proof and capable of high performance over long periods of continuous service. IN-RES-CO Resistors for every ordnance or civilian requirement are available at a cost that solves circuit design problems both performance-wise and cost-wise. Check up now, on the complete line of IN-RES-CO quality wire wound resistors

TYPE S-15
¼" DIA. x ⅜" LG.

TYPE S-30
¼" DIA. x ¾" LG.

APPLICATION-DESIGNED RESISTORS FOR ELECTRONICS AND INSTRUMENTATION

SPACE SAVERS FOR MODERN CIRCUITRY – MONEY SAVERS FOR PRODUCTION ECONOMICS –

IN-RES-CO TYPE IR WIRE WOUND RESISTORS

The practical, low cost solution for circuit designers striving for the subminiature. Type IR units offer precision resistance values capable of retaining stability through long periods of continuous or intermittent service. Type IR resistors are available at prices based on mass production methods of manufacture. Wound to a tolerance of ±1%, they are permanently accurate. Conservative ratings allow ample safety margin in all classes of service. Special Bakelite forms eliminate shrinking, swelling and temperature effects. IN-RES-CO moisture and fungus proof coating offers absolute protection against climatic extremes. Specify IR Type resistors for all applications where precision performance and limited space are important determining factors.

IN-RES-CO TYPES CX & BX WIRE WOUND RESISTORS

FEATHERWEIGHT! —another IN-RES-CO solution for CIRCUIT DESIGNERS

SEALED IN MOLDED BAKELITE PLUS LIGHTWEIGHT

The dependable resistive elements that combine positive sealing with the important advantage of lightweight Molded Bakelite core reduces weight by one-half compared to ceramics. Positive seal effectively protects the winding against harmful climatic conditions. Additional IN-RES-CO features include long life stability, hard soldered connections to terminals and extra-sturdy, vibration proof terminal leads. Both CX and BX Resistors include space-saving terminal supported axial terminals of tinned wire.

IN-RES-CO TYPE CX NON-INDUCTIVE RESISTOR

IN-RES-CO TYPE BX NON-INDUCTIVE RESISTOR

APPLICATION-DESIGNED RESISTORS FOR ELECTRONICS AND INSTRUMENTATION

IN-RES-CO TYPES SM-15 & SM-30 WIRE WOUND RESISTORS

SUB-MINIATURE weather-tested midgets

Type SM-15 and SM-30 Resistors offer three vital advantages: sub-miniature size, weather resistant construction and high resistance. The elimination of center hole mounting and the inclusion of axial leads increases winding area and results in 25% greater resistance value than resistors of standard design. Special coating is moisture and fungus proof and designed to meet JAN R 93 specifications. Sealed in Bakelite construction affords additional climatic protection. As ratings are conservative, types SM-15 and SM-30 can be specified with confidence for service under rigorous conditions.

TYPE SM-15
5/16" DIA. x ⅜" LG.

TYPE SM-30
5/16" DIA. x ¾" LG.

One Source of Supply—Headquarters for

E-I sealed leads and multiple headers

FOR EVERY APPLICATION

Standard SEALED LEADS

Over 50 standard types to choose from. Made of hard glass, preformed with microscopic air cushioning. Absolutely free from internal strain. Tin dipped for easy soldering. Write for Bulletin 849 for complete information.

Standard MULTIPLE HEADERS

Over 100 standard types available. All headers vacuum tight, with cushioned glass preforms. Completely strain free, tin dipped, silicone treated. Many optional features including CRT closures. Full information can be obtained by writing for Bulletin 850.

CUSTOM SEALS to Specification

Practically any type of sealed terminal or multiple header can be produced to exact customer requirements. Whether your problem involves a new design or the application of a standard item, E-I engineers offer complete collaboration.

SAMPLE KIT for Designers

Contains 81 standard terminals, 11 different headers. All economy priced items—picked to solve practically any problem. Transparent case with labeled bins for easy selection. Complete kit sells for only $10.00—check or money order.

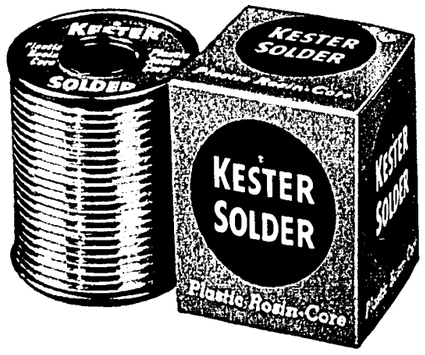
famous KESTER SOLDER PRODUCTS

For The Television, Radio, And Electronics Industry

KESTER "RESIN-FIVE" CORE SOLDER

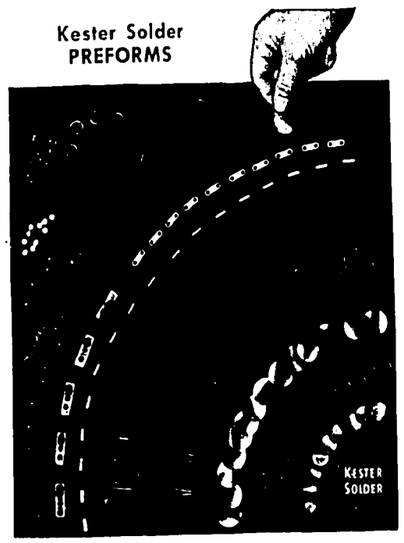
Formulated especially for Radio and TV; will easily solder such metals as brass, zinc, and ferrous alloys. It is non-corrosive and non-conductive.



KESTER PLASTIC ROSIN-CORE SOLDER

The most widely used solder in the TV and Radio fields. All Kester Solders are made from the finest tin and lead available.

Kester Solder PREFORMS



Use Kester *Soft Solder* Preforms for flame, oven, and induction soldering. Write today for samples and complete information.

OTHER KESTER PRODUCTS

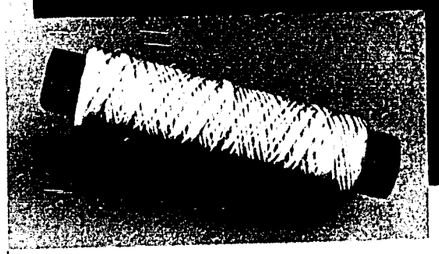
Sensational New NYLON Lacing Cords win approval of "Big Name" Companies*



* names on request

"Never anything like it before", say the big companies in the electronics field. They're referring to Heminway & Bartlett's new fungus-proof Nylon Lacing Cords, specially coated to resist mold and micro-organisms and at the same time retain malleability.

With a tensile strength to suit your particular problem, and a synthetic resin finish with a melting point of over 190°, these new cords meet every installation requirement.

We'll be glad to give you complete information, including samples for field testing. No obligation, of course.

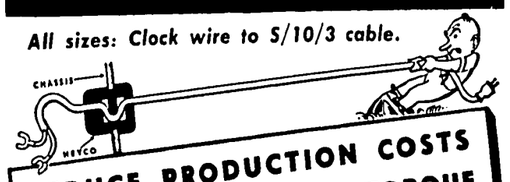
THE HEMINWAY & BARTLETT MFG. CO., 500 Fifth Avenue, New York 18, New York. *Branches*: Chicago, Ill., St. Louis, Mo., Cincinnati, Ohio, Charlotte, N. C., Gloversville, N. Y.

HEMINWAY & BARTLETT FUNGUS-PROOF *Nylon Lacing Cords*

HEYCO STRAIN RELIEFS

Provide permanent protection and anchor cords to chassis or machine housing.

All sizes: Clock wire to S/10/3 cable.



REDUCE PRODUCTION COSTS
PREVENT PUSH, PULL, TORQUE
ELIMINATE ENTRANCE GROMMETS

FREE TEST SAMPLES!

Let us know the size wires you are using...we'll send you free Heyco samples and application data so that you can test them yourself. Many hundreds of products now incorporate UL Approved Nylon Heycos...*accepted standard in Strain Relief Bushings.*

PROTECT YOUR PRODUCT
at point of strain

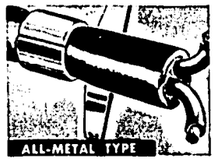
Protect product saleability too—by insuring long life for cords, cables and conductors. Genuine "GRIPMASTER" Strain Reliefs provide these vital features—

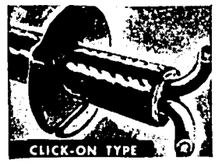
★ Anchor cords to housings
★ Eliminate taping or threading
★ Prevent unraveling
★ Prevent cord pull damage
★ All sizes and styles
★ Easy to apply
★ Inexpensive

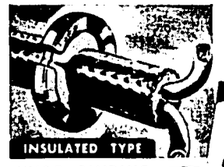
Gripmaster Strain Reliefs are "tremendous trifles" that make good products better!

Ask for samples.

4 WAYS TO END ALL CORD AND CABLE SERVICE FAILURES *Economically*







GRIPMASTER STRAIN RELIEFS

Interruptions due to cable and cord connection failures are eliminated because they anchor the cord to the product at the point of strain. GRIPMASTER Strain Reliefs can withstand pulls up to 100 lbs., and are acceptable to Underwriters Laboratories. All types Reg. U. S. Pat. Off.

WIRE BINDING SLEEVES—Preventing fraying of cord ends, these specially-treated rubber tubes are available in five sizes to fit wires to .790

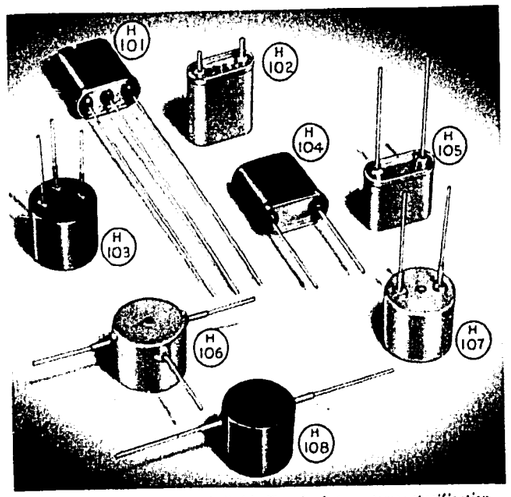
STEVENS HERMETICALLY SEALED THERMOSTATS

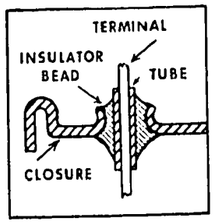


Bright-plated or dull-black finish. Terminals to customer specification.

- fast response
- close control
- operation from -60° to 600°F
- dust, moisture and explosion-proof

Specially engineered for precision control of radio and electronic devices, instruments, cameras and other equipment subjected to dust, moisture or corrosive atmospheres, Stevens hermetically sealed thermostats are enclosed in corrosion-resistant metal cans.

Carefully precalibrated in pots simulating your actual service conditions, Stevens* hermetically sealed thermostats have a tight, permanent seal that *prevents deterioration or sulphiding of contacts*. They can also be sealed in helium or other inert gas atmosphere. Terminals are sweat-soldered into inert alloy tubes interfused with inorganic glass insulator bead.



Stevens hermetically sealed thermostats—featuring an electrically independent bi-metal element that eliminates artificial cycling or life-shortening "jitters"—are available in disc types for controlling higher-wattage circuits, or in strip types for controlling low-wattage circuits or for use in conjunction with disc thermostats.

To insure the satisfactory performance of your product, specify Stevens hermetically sealed thermostats—*they perform better . . . last longer.* A-2914

*Stevens also makes a complete line of semi-sealed and standard bi-metal disc and strip thermostats. Write for data.

HIGHER ATTENUATION . . . at no greater cost

Built to match the most exacting requirements for radio interference reduction, ACE SCREEN ROOMS cost little or no more than home-made rooms of far lower filtering and shielding efficiency. Used and approved by leading laboratories and plants.

SCREEN ROOMS

READY-BUILT · READY TO INSTALL

- Provide attenuations of 100 to 140 db. —at frequencies from 0.15 to 10,000 mc.
- Easy to install—easy to move to a new location or to enlarge.
- Fully proved in more than 6 years of use.
- Standard and special types available for every need.

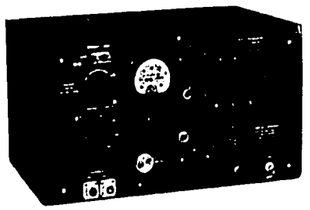
THE NEWEST IN INSTRUMENTS FOR SUB-AUDIO Thru MICROWAVES

These six instruments have been developed and engineered in the interests of providing laboratories and production lines with the newest in instrumentation tehcniques. A postal card or letter will bring you a copy of our new catalog A-51 with complete specifications. Write for it today.

THE MARKA-SWEEP
Model Video

An electronically swept video sweep oscillator covering frequencies up to 20 mc. Crystal positioned marks of pip type are provided at 1, 2, 5, 10, 15 and 20 mc. By use of external signal generator a variable frequency pip type marker is available. Output maximum is 0.3 volt from a 72 ohm internal impedance. Price $495.00.

THE CALIBRATED MEGA-SWEEP

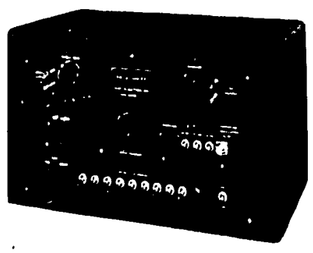


The Widest Range Sweeping Oscillator Available. Single control tuning from 100 kcs to 900 mcs. Approximate center frequency indicated on dial. Sweep width variable 0-30 mcs. Sawtooth sweep—no phasing. Easily pulse modulated. Output approximately 100 mv max. Precision micrometer wavemeter included. Price $425.00.

THE VIBRALYZER

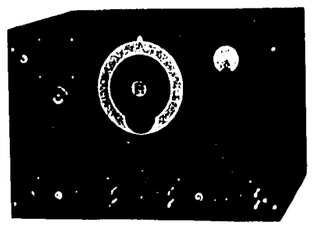
Analyzes signals in the 5-4400 cps region in three frequency ranges, with broad and narrow analysis filters on each range. It is useful for studies of transient and steady state signals on aircraft, ships, rotating and reciprocating machinery, and in fields such as ordnance, ballistics, seismology and acoustics. Displays: 1. Amplitude vs. frequency vs. time; 2. Amplitude vs. frequency at selected times. Price $2500.00.

THE SONALIGNER

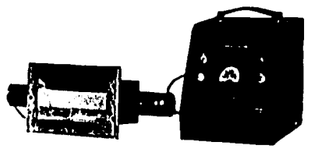


THE RADA-SWEEP

An all electronic sweeping oscillator for use in aligning Radar IF strips. It is swept by a symmetrical sawtooth which is also available for sweeping the oscilloscope. Marks may be individually switched on and off and attenuators are available on the pip and high frequency outputs. A true zero level reference baseline is provided. Price $395.00.



A very stable and accurate oscillator in the ultrasonic range suitable for use in determining the pass band of narrow band ultrasonic filters and other accurate work in this range. Calibration: Crystal Check Points Accurate to 0.01% included—may be externally calibrated—marks every 2, 10, 50, 200 kcs.—Timing "comb" may be used for accurate alignment of Radar range circuits. Output level meter and attenuators included. Price: $695.00.



MICRO-WAVE MEGA-NODE
L-Band, New Model

Provides a primary source of random noise for the L-Band. May be used for measurement of noise figure, receiver gain and calibration of standard signal source. The specifications are as follows:

Waveguide RG-69/U
Flange UG-417/U

Noise Power Output .....at 20° C.—15.84 db
Frequency Range .....1200 to 1400 mc.
Information on Microwave Mega-Nodes and other frequency ranges within the L-Band may be obtained on application.

All Prices F.O.B. Factory.

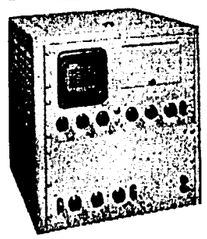
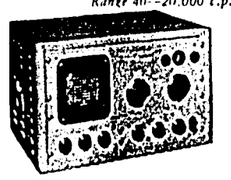
QUICK EASY ACCURATE

SPECTRUM AND WAVEFORM ANALYSIS WITH PANORAMIC INSTRUMENTS



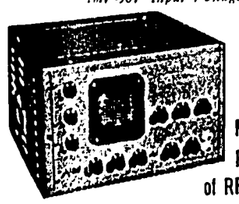
Audio Wave Analysis in 1 Second

Panoramic Sonic Analyzer, Model AP-1
Automatically measures frequency and magnitude of wave components for high speed analysis of vibrations, harmonics, noises, acoustics, and intermodulation under static or dynamic conditions.
Optimum Frequency Resolution Range 40--20,000 c.p.s.



High Speed Spectrum Analysis

Panoramic Ultrasonic Analyzer, Model SB-7
Continuously variable scanning width, 200KC to zero, for channel monitoring, telemetering and investigation of ultrasonic waveform content. Allows overall observation of wide bands; 500 c.p.s. resolution for highly detailed examination of selected narrow bands.
2KC-300KC, Linear Scale
1mV-50V Input Voltage



Maximum Resolution of RF Spectrum

Panadaptor, SA-8 ● Panalyzor SB-8
Variable resolution; variable scanning width. Synchronous and non-synchronous scanning; variable scanning rates. Linear and Log Amplitude scale. Long persistence display. Three types of instruments, maximum scanning widths of 200 KC, 1 MC and 10 MC.
Resolutions down to 100 C.P.S. available

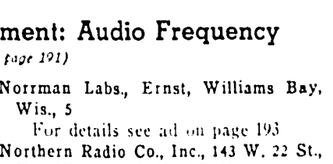
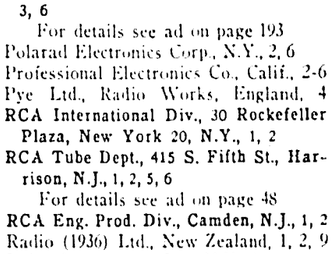
COMMERCIAL FIRMS

and many other applications based on precision timing, sidereal and mean time.

FOR A MORE COMPLETE LISTING OF MODELS SEE OUR AD IN THE 1950 ELECTRONIC BUYERS GUIDE. LOOK FOR THE DESCRIPTION OF MODEL 105 AND OTHERS.



Model 127. This is a unit on an 11¼ x 4¼ inch mounting plate COMPLETE WITH POWER SUPPLY. It can be had with an output frequency as low as 60 cps. Temperature controlled crystal if required.



Model 125. This unit is built on a mounting plate 9 x 4½ inches. It has sine wave outputs at BOTH 400 CPS AND 60 CPS.

We now have 25 standard models and we are expanding our line at the present time.

Catalog or further information gladly furnished on request.

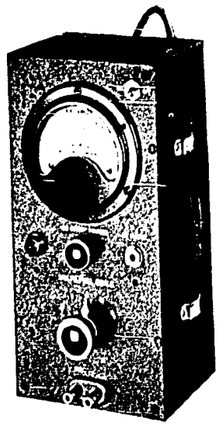
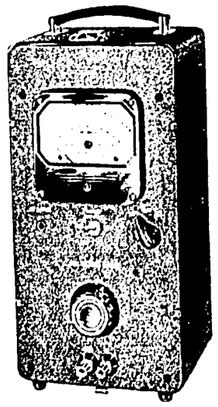
WILLIAMS BAY, WISCONSIN
20 Years of Specialization in Constant Frequency

BALLANTINE

STILL THE FINEST IN ELECTRONIC VOLTMETERS

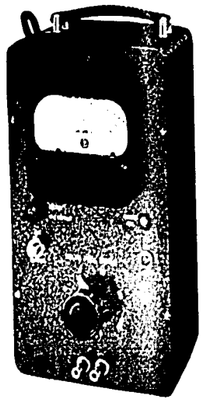


MODEL 300

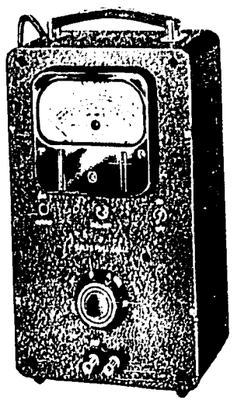


MODEL 302B

MODEL 304

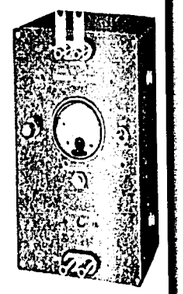


MODEL 305



MODEL 310A

MODEL	FREQUENCY RANGE	VOLTAGE RANGE	INPUT IMPEDANCE	ACCURACY
300	10 to 150,000 cycles	1 millivolt to 100 volts	1 2 meg. shunted by 30 mmfds.	2% up to 100 KC 3% above 100 KC
302B Battery Operated	2 to 150,000 cycles	100 microvolts to 100 volts	2 megs. shunted by 8 mmfds. on high ranges and 15mmfds. on low ranges	3% from 5 to 100,000 cycles; 5% elsewhere
304	30 cycles to 5 [illegible] megacycles	1 millivolt to 100 volts except below 5 KC where max. range is 1 volt	1 meg. shunted by 9 mmfds. on low ranges. 4 mmfds. on highest range	3% except 5% for frequencies under 100 cycles and over 3 megacycles and for voltages over 1 volt
305	Measures peak values of pulses as short as 3 microseconds with a repetition rate as low as 20 per sec. Also measures peak values for sine waves from 10 to 150,000 cps.	1 millivolt to 1000 volts Peak to Peak	Same as Model 302B	3% on sine waves 5% on pulses
310A	10 cycles to 2 megacycles	100 microvolts to 100 volts	Same as Model 302B	3% below 1 MC 5% above 1 MC



MODEL 220A
BATTERY OPERATED DECADE AMPLIFIER gives exact voltage gains of 10 or 100 permitting a corresponding increase in voltmeter sensitivity from 10 to 150,000 cycles.

PRECISION SHUNT RESISTORS

Four different types of Precision Shunt Resistors, varying from 1 to 1000 ohms, permit the Voltmeters to be used to measure currents from 1 ampere to one-tenth of a microampere.

MULTIPLIERS

Five different types of Multipliers, whose input resistance varies from 5 to 40 megohms, permit the voltage range of the Voltmeters to be increased 10 or 100 times.

1300A

1300R

BALLANTINE pioneered circuitry and manufacturing integrity assure the maximum in

SENSITIVITY • ACCURACY • STABILITY

- All models have a single easy-to-read logarithmic voltage scale and a uniform DB scale.
- The logarithmic scale assures the same accuracy at *all* points on the scale.
- Multipliers, decade amplifiers and shunts shown above extend range and usefulness of voltmeters.
- Each model may also be used as a wide-band amplifier.

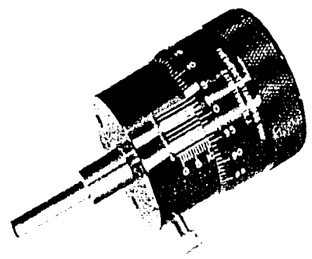
BALLANTINE LABORATORIES, INC.

102 FANNY ROAD, BOONTON, NEW JERSEY

FSC MICROMETER HEAD for the Electronics Industry

[illegible] thoroughly job-tested and field checked by electronics engineers for many diversified applications. Reports continue to indicate that it is successfully meeting the requirements in those fields and applications for which it was designed.

1. Elimination of back-lash for positive resetting in either direction of rotation.
2. Automatic compensation for wear of spindle and nut thread.
3. Large, legible, easy to read calibrations.
4. Temperature compensation construction.
5. Thimble stop to prevent thread jamming.
6. Positive spindle lock.
7. Convenient means of resetability for calibrated instruments.
8. Vernier scale on all models.
9. Furnished in either English or Metric scale.
10. A degree of accuracy in reading, hitherto unattainable in any micrometer head.
11. Non-corrosive finish.



Low coefficient Invar nut and spindle with precision ground threads, hard chromium-plated for wear on spindle and thread-form.

Patented thread-form with radially-loaded nut for elimination of back lash and wear compensation.

Black anodized aluminum barrel and thimble with yellow filled scales and numbers.

A VITAL

TESTING SERVICE

FOR

GOVERNMENT SUPPLIERS

The specifications of most Government contracts make it advisable to pre-test components and related equipment before submitting to Government test. We offer Government suppliers testing programs in the following Environmental and Functional Testing Fields, designed to meet official contract specifications:

- **VIBRATION** (Standard High Frequency)
- **SALT SPRAY** (Corrosion)
- **FUNGUS**
- **HUMIDITY** (Varying Condition)
- **SAND & DUST**
- **LOW PRESSURE** (Altitude Testing)
- **HIGH & LOW TEMPERATURE**

Write or call, and we will arrange technical discussions without obligation.

dependable Electronic measurements

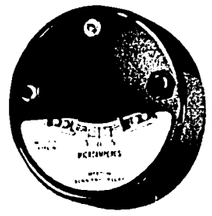
FOR LABORATORY—PRODUCTION TESTING—MAINTENANCE

MUTUAL CONDUCTANCE TUBE ANALYZER

(Model 686 Type 9B) A complete "all purpose" tube analyzer that provides accurate testing of true mutual conductance of all receiving tubes in accordance with manufacturers rated operating conditions, as well as at other values not conforming to standard ratings and conditions. Ideal for electronic laboratories, and production quality control.

ULTRA SENSITIVE PORTABLE TEST INSTRUMENTS

(Model 622) High sensitivity, large scale A-C and D-C instruments of double pivoted type, ideal for precision measurement of low potentials and minute current. Available in single or multi range as D-C voltmeters, millivoltmeters, milliammeters, microammeters; and milliammeters and voltmeters in thermo and rectifier types for RF and A-C.



SUPER-SENSITIVE SENSITROL® RELAYS

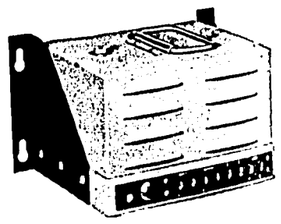
(Model 705) Operate reliably on values as low as ½ microampere, direct from photocells, resistance bulbs, thermocouples and other generators of minute energy. Control up to ten watts at 120 volts on non-chattering magnetic contacts. No standby power required, no batteries, tubes, transformers. Available in single and double contact types—manual or solenoid reset.

HIGH FREQUENCY ELECTRONIC ANALYZER

(Model 769) A three-in-one instrument providing a self-contained Volt-Ohm-Milliammeter, a high impedance electronic D-C Volt-Ohmmeter, and a probe type vacuum tube voltmeter for use to 300 megacycles. Exceptionally stable and accurate. Has specially designed extremely small RF and D-C probes.

PANEL INSTRUMENTS OF HIGH SENSITIVITY

In all types, sizes and ranges for all critical measurements encountered in electronics, nuclear research and general testing. All D-C, rectifier type A-C and RF instruments have built-in magnetic shunts for minor adjustments if necessary.



INDUCTRONIC® D-C AMPLIFIER

(Model 1411) A new, stable D-C Amplifier which employs new Induction galvanometer and provides high degree of resolution even at fractional loads. Reaches steady, full-scale deflection in a fraction of a second. Interchangeable plug-in range standards for either microamperes or millivolts. Uses standard tube components.

Literature on these and other WESTON instruments for electrical and electronic requirements sent on request.

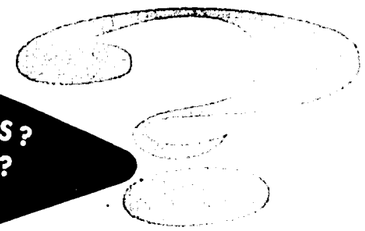
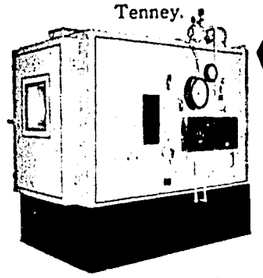
TEMPERATURES? ATMOSPHERES? PRESSURES?



for the finest in Test Chambers

TEST WITH Tenney

Tenney has combined years of specialized experience with the most advanced engineering methods. Results have convinced industry that Tenney testing equipment is the finest available. For complete confidence, specify Tenney.

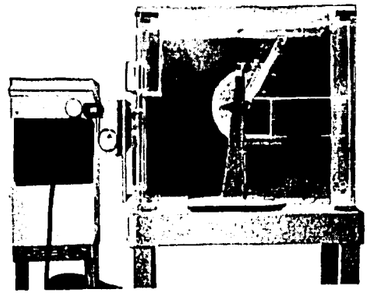


TENNEYZPHERE ALTITUDE CHAMBERS

Designed to withstand atmospheric pressure and to simulate global conditions of pressures, temperatures and humidities. Altitudes from sea level to approx. 75,000 ft. Temperature range from plus 200°F to minus 100°F. Also simulates desired relative humidity.

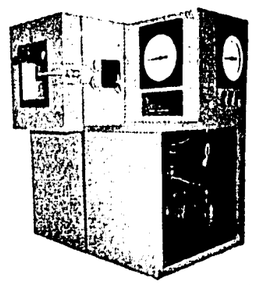
TENNEY SERVO UNIT

Portable air conditioning unit which may easily be attached to various types of laboratory enclosures—impact machines; tension machines; torsion testers; cold boxes and similar equipment. Through its use, articles undergoing testing, aging or weathering can be subjected to wide variations of humidity, heat and cold.



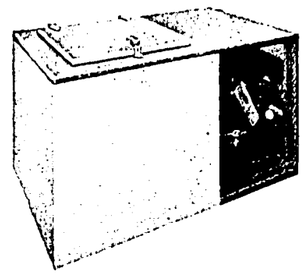
TENNEY TEMPERATURE AND HUMIDITY CHAMBER

Designed for positive control of temperature, humidity and air circulation. Permits the accurate checking of physical quality, fragility, tension and other factors.



TENNEY SUB-ARCTIC INDUSTRIAL CABINETS

Designed for low-temperature testing of metals, radios, instruments, plastics, liquids, chemicals and pharmaceuticals. Temperature ranges of −40°F, −60°F, −95°F and −150°F are standard for each size.



For further information on these and other Tenney test equipment, write to Tenney Engineering, Inc., Dept. N, 26 Avenue B, Newark 5, New Jersey.

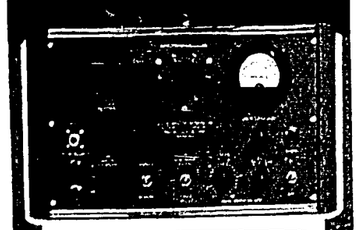
EMPIRE DEVICES



UHF IMPULSE GENERATOR

Model IG-102

Pulse width less than 0.001 microseconds, spectrum flat within 0.5 DB from 0.01 MC to 1000 MC; Pulse repetition rate 2 to 2500 CPS; Output level continuously adjustable from 7 to 70,000 microvolts per megacycle bandwidth; Impedance 50 ohms; Permanent accuracy and stability.

Application: Standard signal source for study and measurement of RF interference. Calibrating standard for noise meters. Bandwidth measurements. Transient response and receiver alignment.

STEP ATTENUATOR

Model AT-100

50 ohm resistive networks; VSWR-1.2 from DC to 1000 MC; Six positions; Up to 80 DB attenuation.

UHF ATTENUATOR

Model AT-50

50 ohm precision pad; VSWR-1.1 from DC to 4000 MC; Attenuation from 1 DB to 80 DB; Accuracy—3%.

NOISE AND FIELD INTENSITY METER

Model NF-105

Frequency range 20 to 400 MC; Built-in standard impulse noise and sine wave calibrators; Regulated "A" and "B" supply; Slide back and meter indication; True peak reading meter; Sensitivity 2 to 100,000 microvolts.

Accessories: Broad band antenna, Dipoles, Magnetic and electric field probes, Line probes, Inverter for battery operation and Remote indicator.

with SIGNAL GENERATORS
by AIRCRAFT RADIO CORPORATION

TYPE H-14
108-132 Megacycles
24 omni courses
Left-center-right phase localizer

Left-center-right 90/150 cps localizer

Signal source for bench or ramp testing of VHF airborne omnirange and localizer receivers. RF output for ramp checks, 1 volt into 52 ohms; for bench checks, 0-10,000 microvolts.

Price $885.00 net, f.o.b. Boonton, N.J.

TYPE H-12 900-2100 mc. RF signal source, CW or pulse amplitude-modulated. Equal to military TS-419/U.

Price: $1,950.00 net, f.o.b. Boonton, N.J.

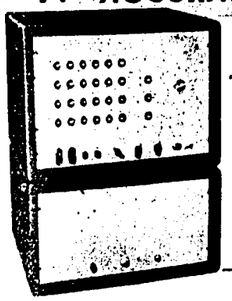
NEW! FREQUENCY AND TIME MEASUREMENTS ACCURATELY . . . CONVENIENTLY!



-using $f=\frac{n}{t}$

ANY FACTOR MAY BE MEASURED FOR FIXED VALUE OF THE OTHER

Universal 6-in-One
MEGACYCLE FREQUENCY-TIME COUNTER

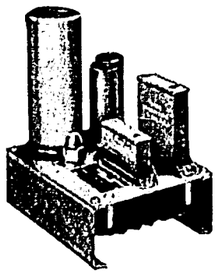
Model 801 by Potter

Now, the Potter Instrument Company offers all in one equipment, the features heretofore available only in separate counting systems. Two complete counting channels, a 100 kc crystal oscillator time base and unique gating circuits are combined to provide the new FREQUENCY-TIME COUNTER.

FREQUENCY MEASUREMENTS	0 to 1 mc range by counting cycles per pre-selected time or by measuring time per pre-selected count. Accuracy 0.001% minimum.
TIME INTERVAL MEASUREMENTS	0 to 10 seconds ± 10 microseconds.
FREQUENCY RATIO MEASUREMENTS	Ratio of two external frequencies can be measured.
SECONDARY FREQUENCY	100 kc crystal oscillator with divided frequencies available at 10, 1 kc and 100, 10, 1 cps.
TOTALIZING COUNTER	Six decades, pulses 0 to 1 mc, sine wave 10 cps to 1 mc.
DIRECT RPM READING TACHOMETER	Through the use of an external 60 count per revolution photoelectric disc generator an accuracy of ± 1 rpm is obtained.

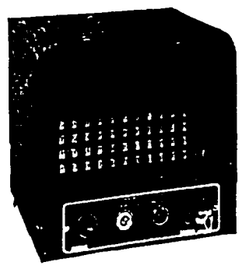
Please address inquiries to Dept. 5 YB

POTTER INSTRUMENT COMPANY
INCORPORATED
115 CUTTER MILL RD., GREAT NECK, NEW YORK



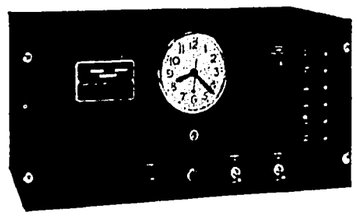
TYPE 2001-2, BASIC UNIT

Frequencies 200 to 2500 cycles. Dividers and Multipliers available for lower and higher frequencies. Miniaturized and JAN construction. Output, 6 volts.



TYPE 2005, UTILITY UNIT

Consists of Type 2001-2 and booster to provide 10 watts at 110V at precision frequencies from 50 to 500 cycles at input power frequencies of 50 to 500 cycles, 45 watts.



TYPE 2121-A, LAB. STANDARD

Outputs, 60 cycle, 0-110 Volts, 10 Watts; 120-240 cycle impulses. Input, 50-400 cycles, 45 Watts.

Precision FREQUENCIES

GUARANTEED ACCURATE TO 1 PART IN 100,000 (.001%)

TYPE 2111, POWER UNIT

50 Watt output. 0-110-220V at 60 cycles, or any frequency 50 to 1000 cycles. Input, 50-100 cycles, 275 watts.

THE basis of these frequency standards is an electronic fork which is temperature-compensated and hermetically sealed against humidity and barometric pressure.

Type 2001-2 and similar units are available independently. Complete instruments of our manufacture are used extensively by industry and the armed forces where unvarying, dependable high precision is required, such as for bombsights and fire control.

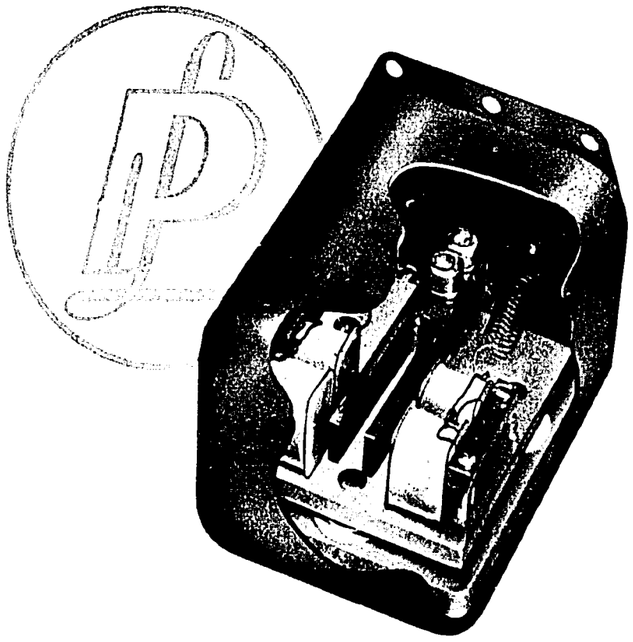
WIDELY USED IN SUCH FIELDS AS:

Aviation
Astronomy
Ballistics
High-Speed Photography
Viscosity Measurement
Nuclear Physics
Telemetering
Radiation Counting
Fluid Flow
Chemical Reaction
Navigation
School Laboratories
Industrial Research Labs.
Accurate Speed Control

WHATEVER YOUR FREQUENCY PROBLEMS, OUR ENGINEERS ARE READY TO COOPERATE. PLEASE REQUEST DETAILS BY TYPE NUMBER.

American Time Products, Inc.

580 Fifth Avenue OPERATING UNDER PATENTS OF WESTERN ELECTRIC COMPANY **New York 19, N. Y.**



Tuning Forks

for precision frequency control

A complete line of tuning fork resonators to meet your reference standard . . . timing . . . or speed control requirements.

ACCURATE...Manufactured in accuracies up to 1 part in 10,000 for operation from −40 to +75°C.—and up to 1 part in 100,000 for operation from 0 to +75°C.

COMPENSATED . . . Thermal compensation method employed maintains fork accuracy throughout rated operating temperature range without benefit of oven control or warm-up time.

RUGGED . . . Internally shock-mounted using relatively permanent, semi-inorganic, silicone rubber—a desirable feature for stringent shock and vibration applications.

HERMETICALLY SEALED... Solder-sealed evacuated container prevents barometric pressure and relative humidity variations from affecting fork accuracy.

FREQUENCIES . . . 400 cycles and from 700 to 3,000 cycles for accuracies up to 1 part in 10,000—from 1,000 to 3,000 cycles for accuracies up to 1 part in 100,000.

Available individually—as a part of compact subassemblies—or in completely engineered equipment constructed to your specifications.

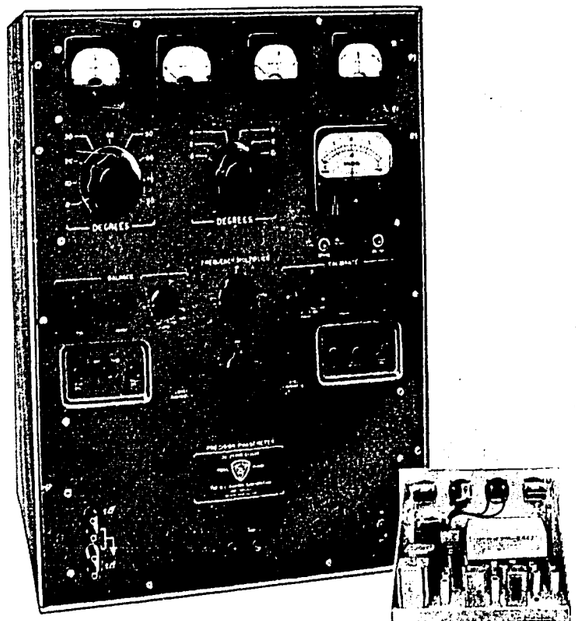
PRECISION PHASE METER



for precise measurement of phase difference at audio frequencies

THE MODEL P-1060 PHASE METER is invaluable wherever precise knowledge of phase relationships in the audio-frequency range must be obtained. It has found increasing acceptance in the design of reactive components or of equipment using them, and in such analytical applications as measurement of residual inductance in "non-inductive" resistors, measurement of stray capacitance across resistors, and investigation of phase relationships in navigational and data-transmission systems.

Employing the phase-comparison method, the instrument exhibits a high degree of accuracy and incremental discrimination. The calibration may be checked with auxiliary equipment available in most laboratories. Even-order harmonic distortion is cancelled and odd-order distortion up to 1% will not affect accuracy of reading.

SPECIFICATIONS

Equipment, when removed from cabinet, is suitable for mounting in standard 19" relay rack.

Frequency range	30 to 20,000 cps
Phase range	0 to 360 degrees
Accuracy	0.1 degree
Incremental discrimination	0.01 degree
Signal level	0.5 to 10 volts rms
Input impedance	10 megohms shunted by 25 μμf
Display	Decade null system
Output jack	Can be provided for operating external recorder
Power requirements	200 watts at 105-125 volts, 60 cycles
Size	19½" wide, 16¼" deep, 25" high
Weight	110 pounds
Cabinet	Internally shielded walnut cabinet.

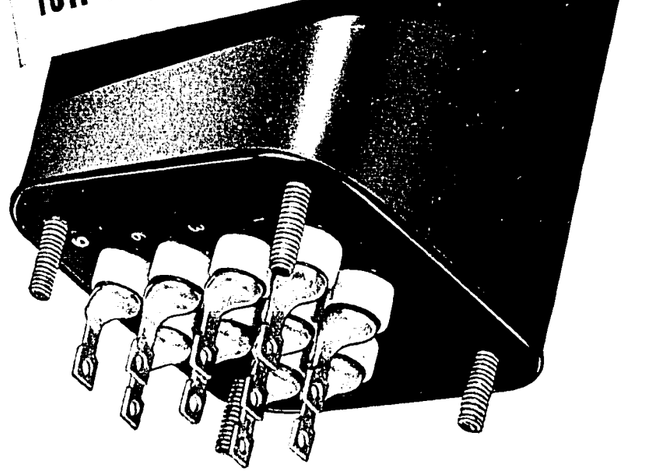
CHICAGO

hermetically-sealed TRANSFORMERS and Filter Reactors meet the full requirements of MIL-T-27



the Complete Transformer line that Meets Military Specifications

If you require fully approved MIL-T-27 Transformers and Filter Reactors for prototype models, pilot runs or special applications, and need them in a hurry—call your electronic parts distributor for *quick service* on CHICAGO Hermetically-Sealed units. Chances are he'll have them in stock—and you'll save valuable time and effort. There's a *complete* range of CHICAGO MIL-T-27 Transformers available: *Power, Bias, Filament, Filter, Audio.*

CHICAGO Hermetically-Sealed Transformers are the world's toughest units, preferred by engineers for those rugged applications. These stock transformers may be incorporated in your equipment with full assurance that they meet *complete* MIL-T-27 specifications.

SEND FOR "NEW EQUIPMENT" TRANSFORMER CATALOG

Have the full details at your fingertips on CHICAGO'S *New Equipment Line*—covering all MIL-T-27 units as well as famous Sealed-in-Steel transformers engineered for every application and geared to today's circuit requirements. Write for your free copy of this important catalog today, or get it from your distributor.

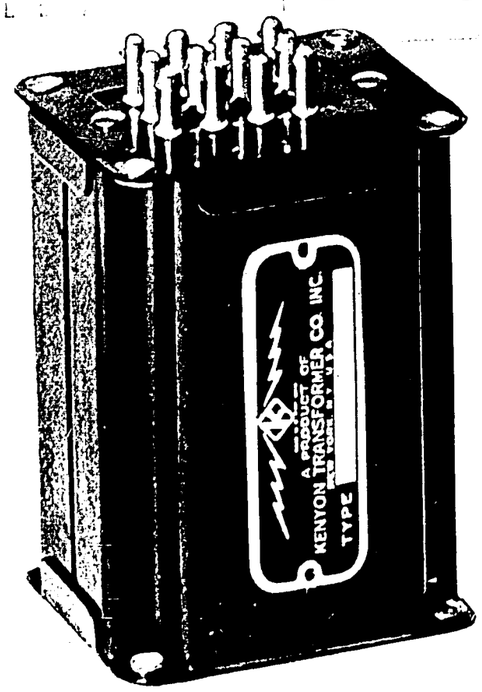
ONE OF THE OLDEST NAMES IN TRANSFORMERS...

Kenyon



FOR OVER TWENTY-FIVE YEARS, KENYON has been selling engineering ability and know-how, as well as transformers and associated products. Yes, the KENYON "K" is a sign of quality, dependability and sound construction.

Whether it be the standard KENYON "T" Line or "specials" custom-built to your requirements — practically at catalog prices, you are always assured of skillful engineering, progressive design and rugged construction.

Leading manufacturers and engineers specify KENYON Transformers for many industrial, communication, sound and electronic applications such as:

JAN APPLICATIONS	AUDIO AMPLIFIERS
BROADCAST	RADAR
INDUSTRIAL MACHINERY	EXPERIMENTAL LABORATORIES
AUTOMATIC CONTROLS	ATOMIC ENERGY EQUIPMENT

Consult our engineering staff on any of your "special" problems at no obligation. Call or write now for our engineering representative.

For a complete story about specific ratings on KENYON transformers, send for your copy of the latest KENYON catalog edition now!

To: PRIME CONTRACTORS and SUBCONTRACTORS on GOVERNMENT WORK . .

Invitation
TO RECEIVE A
PRODUCTION SAMPLE
Transformer
BUILT TO YOUR SPECIFICATIONS

this is our offer to you . . .

WE WILL, without cost or any obligation whatever, design a PRODUCTION SAMPLE transformer (hermetically sealed to JAN-T-27 or MIL-T-27 Government specifications), or open type construction, if unit is to be used for awarded prime or sub-contract work. Our approach stresses quality of product, efficiency in service and an alertness to techniques that discard the old for more functional methods.

CHATHAM ELECTRONIC TUBES and EQUIPMENT

TUBES LISTED ON THIS PAGE CAN BE SUPPLIED DIRECT FROM STOCK—MOST OF THESE TUBES ARE TO JAN SPECIFICATIONS

Many other types are also available for immediate delivery. Write for the completely illustrated catalog today. CHATHAM also designs, develops and manufactures special tubes to exact customer specification. Inquiries regarding this service are invited.

RUGGEDIZED TUBES

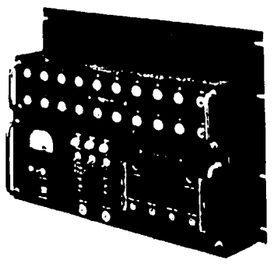
2050W	5R4WGY	OD3W	25Z6WGT
2D21W	6AL5W	OC3W	6H6WGT

HYDROGEN THYRATRONS

VC1257	VC1258	VC1754	VC1907

CONVENTIONAL TUBES

3B28	395A	BS101	1B46
4B32	1Z2	338A	323B

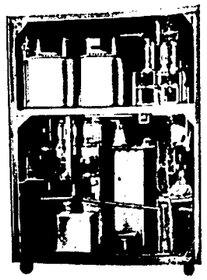


• Pulse life test equipment built by CHATHAM checks receiver type tubes under pulse operating conditions.

CUSTOM BUILT ELECTRONIC EQUIPMENT

CHATHAM specializes in the development, design, and construction of custom-built electronic equipment to exactly meet customers' requirements. Our capable staff of engineers will furnish prompt estimates or, if desired, will call to discuss your problem personally. Call or write today for complete information.

Write today for the informative CHATHAM catalog. For free copy address requests on company letterhead — no obligation.



• 5 Megawatts radar modulator built by CHATHAM to rigid government standards.

FOR POSITIVE AND INEXPENSIVE SHIELDING
—use Metex "Electronic Weather Strips"

Because they combine exceptional *resiliency* with good *conductivity*, Metex Electronic Products made of knitted wire mesh offer an unusually effective means of sealing and shielding a wide variety of types of electronic equipment.

As closures for sheet metal cabinets, for instance, the resiliency of "Metex" assures positive conductive contact *at every point* between cover and cabinet —eliminating costly machining for close tolerances. Metex Gaskets also assure resilient metal-to-metal contact between flanges, and can be combined with rubber compounds to function both as a shield and as a seal.

Applications in which "Electronic Weather Strips" have already proved their effectiveness include pulse modulator shields, wave-guide choke-flange gaskets, replacement of beryllium-copper fingers and springs on TR and ATR tubes.

We will be glad to put our experience at your disposal. A letter to Mr. R. L. Hartwell, outlining your problem, will receive immediate study. For preliminary information, write for bulletin "Metex 'Electronic Weather Strips.'"

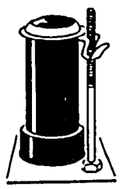
METEX

METAL TEXTILE CORPORATION

653 EAST FIRST AVENUE, ROSELLE, N.J.

Recommended for use in Army, Navy and Air Force equipment.

TOP HAT RETAINERS



. . . for holding tubes and other plug-in components securely in position . . . are made in a variety of sizes to fit almost any type tube . . . will not loosen under the most extreme condition of shock or vibration.

CORNING GLASS WORKS

Electronic Sales Department — Electrical Products Division

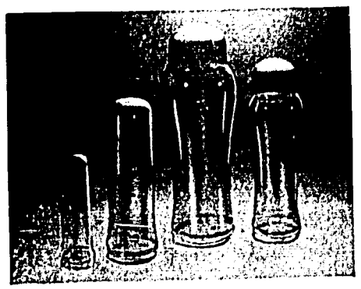
CORNING, N. Y.

ELECTRONIC AND TELEVISION TUBE BLANKS—ELECTRONIC GLASSWARE—METALLIZED GLASS

CORNING TELEVISION TUBE BLANKS

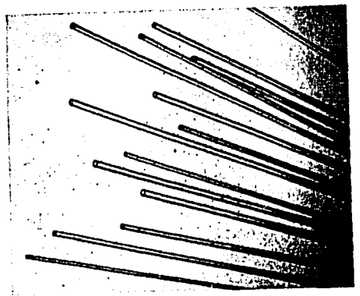
Corning Television Tube Blanks are made of strong, lightweight, lead-free glass with electrical properties ideal for television reception. They are produced automatically to uniformly close tolerances in both round and rectangular design. One-piece construction of neck and funnel provides additional strength. This also improves alignment, eliminating neck shadow and interference with yoke assembly. Large face plates are electrically sealed to prevent distortion, boiling or unsightly variations and again increase overall strength. Round T. V. bulbs—8½", 10", 12½", 16" and 19" in diameter; rectangular 14", 16" and 20" diagonal.

CORNING ELECTRONIC TUBE BLANKS



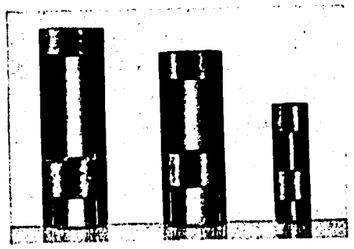
Electronic Tube Blanks are available in hundreds of sizes and shapes which are low in cost and of uniform high quality. Special glass formulas insure bulbs with desirable electrical properties for applications involving high frequency, high voltage, and ultraviolet transmission. In addition, special sealing characteristics for temperature requirements can be obtained.

CORNING ELECTRICAL GLASS TUBING



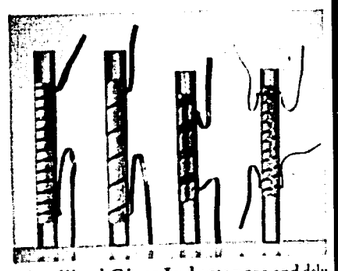
Electrical Glass Tubing performs a multitude of services in the Electronics Industry from supporting and sealing tube elements to providing inductance and capacitor forms. It is available in a wide range of diameters and at low cost. It provides an unusually versatile material for the design engineer.

CORNING HERMETICALLY SEALED BUSHINGS



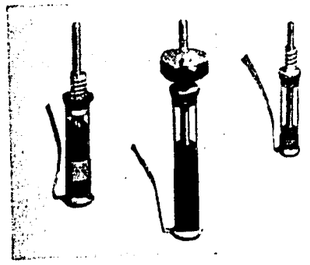
Corning Metallized Glass Bushings provide high quality hermetically sealed terminals for high voltage transformer and capacitor applications. Ease of installation reduces production costs. Although a complete standard line is available, special designs can be made to individual requirements.

CORNING HIGH FREQUENCY INDUCTANCES



Metallized Glass Inductances and delay line coil forms have high temperature stability and low loss—contribute negligible drift characteristics. They can be obtained with uniform, variable, or double pitch windings and for fixed tuned, permeability tuned or permeability tuned inductance trimmer combinations. They are easily duplicated within very close tolerances in any quantity.

CORNING MIDGET TRIMMER CAPACITORS



Metallized Midget Trimmer Capacitors are especially suitable for high frequency work where co-axial trimmers are desirable. Small size saves space. Low temperature coefficient insures stability. Design is arranged to make fine adjustments possible.

TECHNICAL SERVICES

Specialists in glass working, quality control, product engineering or design are available to tube and set manufacturers on glass problems.

Electron Tube GETTER *Specialists*

KING LABORATORIES, INC. has been a leading supplier of GETTERS for "electron tube" production for many years. Throughout tube development we have produced better and more economical GETTERS to the most stringent specifications.

Typical examples of KING LABORATORIES firsts are in the Subminiature and Cathode Ray tube fields. As further subminiaturization and the electrostatic Cathode Ray tube developments place even more exacting requirements on tube performance, KING LABORATORIES fundamental research and production facilities can be the answer to your most critical needs.

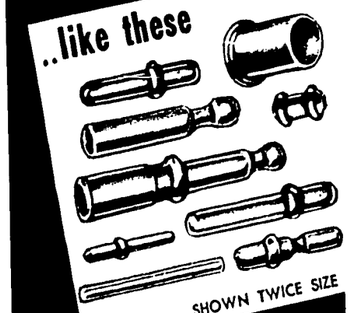
Important
SAVINGS
to **VOLUME** users
of small parts

..like these



SHOWN TWICE SIZE

thanks to
MULTI-SWAGE

If you need small tubular metal parts like these in large VOLUME, Bead Chain's MULTI-SWAGE Process can mean important savings to you.

Much Cheaper Than Solid Pins

Many prominent users of solid pins for electronic and mechanical purposes have cut costs by switching to Multi-Swaged *tubular* pins . . . without sacrificing strength or accuracy.

Typical Applications—

As terminals, contacts, bearing pins, stop pins, male-female connections, etc., in a wide variety of products such as Business Machines, Ventilator Louvres, Toys, Radio and Television Apparatus, Terminal-boards, Electric Shavers, Phonograph Pickups, etc.

Send part (up to ¼" dia. and to 1½" length) and your specs for a quotation or write for DATA BULLETIN.

Ribbons—Strips and Formed Pieces of

Pure Tungsten—Thoriated Tungsten Molybdenum and Tantalum

TUNGSTEN RIBBON

SIZES:
Widths
from .004" up to .125"
Thicknesses
from .040" down to .001"
Down to .0008" at widths up to .060"
Down to .0005" at widths up to .015"
Below .0002" at widths up to .006"
Tungsten ribbon made to above sizes is manufactured from round, ductile wire.

CHEMICAL PURITY:
99.9% pure

FINISH:
Roll finish—black or cleaned

CAMBER:
Approximately 1/16" in 2' lengths

EDGES:
Slightly rounded and smooth

TOLERANCES:

Thicknesses:	.0005"	to .001"	± .00005"
	.002"		± .0001"
	.003"		± .00015"
	.004"		± .0002"
	.005"	to .006"	± .00025"
	.007"	to .010"	± .00035"
	.011"	to .030"	± .0005"
	.031"	to .040"	± .001"
Widths:	.006"	to .010"	± .0005"
	.011"	to .020"	± .001"
	.021"	to .030"	± .0015"
	.031"	to .060"	± .002"
	.061"	to .093"	± .003"
	.100"	to .125"	± .005"

Supplied to mg. wgt.—if required.

MOLYBDENUM RIBBON

SIZES:
Widths from .006" up to .250"
Thicknesses from .060" down to .0006"
Molybdenum Ribbon made to above sizes is manufactured from round, ductile wire.

CHEMICAL PURITY:
99.9% pure

FINISH:
Roll polished finish, cleaned

CAMBER:
Approximately 1/16" in 2' lengths

EDGES:
Slightly rounded and smooth

TOLERANCES:

Thicknesses:	.0004"	to .001"	± .00004"
	.0011"	to .010"	± .00025"
	.011"	to .030"	± .0003"
	.031"	to .060"	± .0005"
Widths:	.006"	to .010"	± .0005"
	.011"	to .020"	± .001"
	.021"	to .030"	± .0015"
	.031"	to .090"	± .002"
	.091"	to .125"	± .003"
	.126"	to .160"	± .0035"
	.161"	to .250"	± .005"

Supplied to mg. wgt.—if required.

STRIP

Widths up to 1½" with thickness down to .001" in random lengths 6" and up. This is rolled from heavy strip. Larger sizes also available.

STRIP

Widths up to 2" with thicknesses down to .001" in random lengths 6" and up. This is rolled from heavy strip. Larger sizes also available.

THORIATED

Widths up to .125" down to .001" thick
Widths up to ½" down to .002 thick

TANTALUM

Strip and ribbon available from .008" to 1½" wide at thickness from .001" down to .0004".

INQUIRIES on formed pieces made of tungsten or molybdenum ribbon and strip, thoriated tungsten, or tantalum will receive prompt attention.

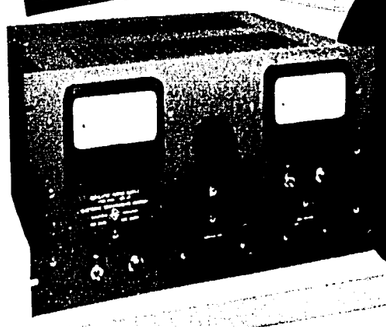
REGULATED D. C.
UP TO 1000 VOLTS AT 500 M. A.

featuring continuously variable output voltage Without Switching

Here are four power supplies especially designed to cover a wide range of applications in development and production. These instruments feature continuously variable output voltage, good regulation, low hum level, good stability and overload protection. Models 200-B, 204-A 205-A and 207-B will operate from line input of 105 to 125 volts A.C. 50-60 cycles and provide rated regulation within this change. Examine the specifications carefully and you may find that one or more of these units has an application in your research or production program.



MODEL 204-A
0-500v D. C. at 300 MA.

Output Voltage
0-500v D.C. at 300 Ma. regulated
6.3v A.C. at 6 Amps. unregulated
Regulation Within 1% from 30-500 v
Hum Within 10 millivolts at full load
Meters 0-500v D.C.
0-300 Ma. D.C.
Negative or positive side of high voltage output may be grounded.

MODEL 207-B
200-1000v D. C. at 500 MA.

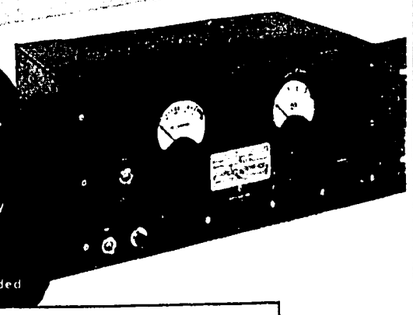
Output Voltage
200-1000v D.C. at 500 Ma. regulated
Regulation: Within 1% from 200-1000 Volts
Hum: Within 20 millivolts at full load
Meters: 0-1000v D.C.
0-500 Ma. D.C.
Negative side of high voltage grounded.

MODEL 205-A
100-325v D. C. at 150 MA.

Output Voltage:
100-325v D.C. at 150 Ma. regulated
0-150v D.C. at 5 Ma. regulated by VR tube
6.3v A.C. at 6 Amps. unregulated
Regulation: Within 1% from 100-325v D.C.
Hum: Within 10 millivolts at full load
Meters: None
Negative or positive side of high voltage output may be grounded.

MODEL 200-B
0-325v D. C. at 125 MA.

Output Voltage
0-325v D.C. at 125 Ma. regulated
6.3v A.C. at 6 Amps. unregulated
Regulation Within 1% from 20-325 V
Hum: Within 10 millivolts at full load
Meters: 0-500v D.C.
0-150 Ma. D.C.
Negative side of high voltage grounded



Detailed information on any or all of the instruments above will be sent upon request. Price and delivery information will also be forwarded at the time of your request. Send for Catalog "A"—there is no obligation.

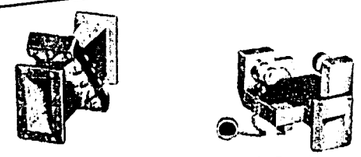
Titeflex has the experience

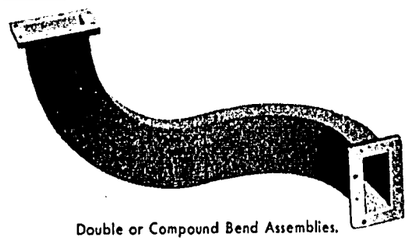
in WAVEGUIDES COMPONENTS ASSEMBLIES

Regardless of the types of waveguides and components you require, Titeflex can supply them. As an A-N approved source, our engineering and testing facilities are available for developing new designs. Titeflex *has the experience!*

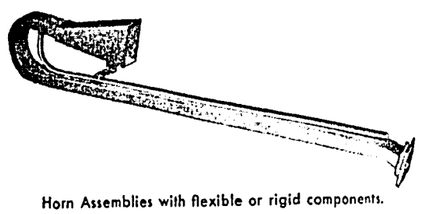
Rotary Joints, long, short or special.



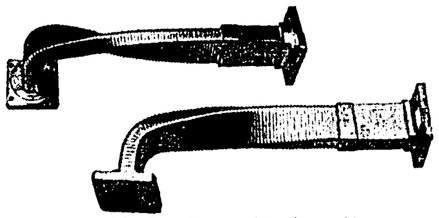
Mitred Joints and Directional Couplers.



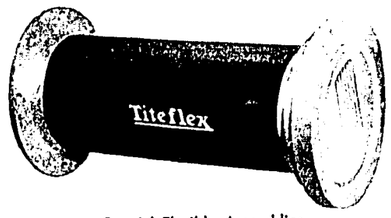
Double or Compound Bend Assemblies.



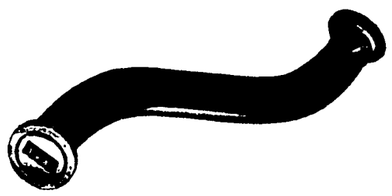
Horn Assemblies with flexible or rigid components.



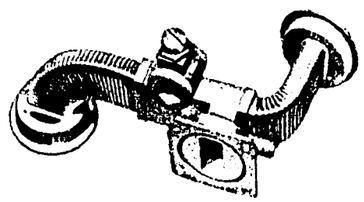
Twisted Single or Compound Bend Assemblies.



Special Flexible Assemblies.



Flexible Waveguides—all types. Twistable and Non-Twistable.



Flexible to Rigid Combinations.

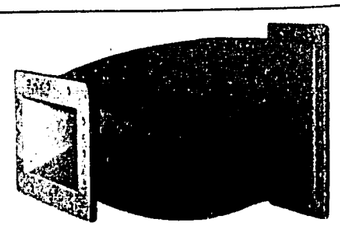
TITEFLEX FILLS YOUR WAVEGUIDE REQUIREMENTS TO A . . . T

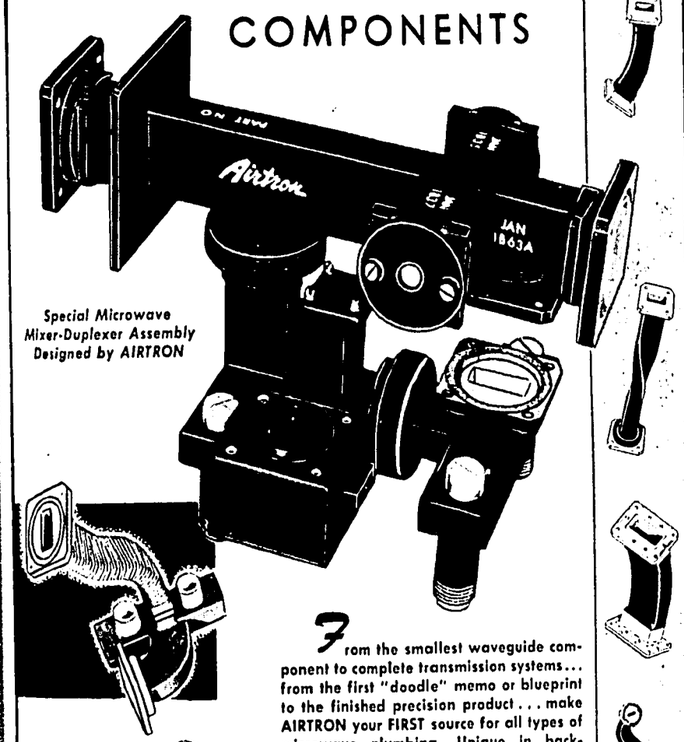


Rigid Twisted Sections, custom built.

Airtron DESIGNS AND PRODUCES

Flexible and *Rigid*

WAVEGUIDE COMPONENTS



Special Microwave Mixer-Duplexer Assembly Designed by AIRTRON

From the smallest waveguide component to complete transmission systems... from the first "doodle" memo or blueprint to the finished precision product . . . make **AIRTRON your FIRST source for all types of microwave plumbing. Unique in background, technical savvy, plant facilities and the WILL to SERVE, this organization is prepared to engineer and manufacture your staple or special requirements in:**

Mixers
Duplexer Assemblies
Magic Tees
Waveguide Switches
Elbow Bends
Elbow Miters
Twisted Sections
Rigid Twists
Choke Fittings
Flexible Waveguides
Straight Section
Rotary Joints

COMPOUNDS

Scientifically compounded for specific applications from waxes, resins, asphalts, pitches, oils, and minerals. Available in wide range of melting points and hardnesses. Special potting compounds are heat conducting and crack resistant at extremely low temperatures. Recommendations, specific data, and samples will be furnished on request.

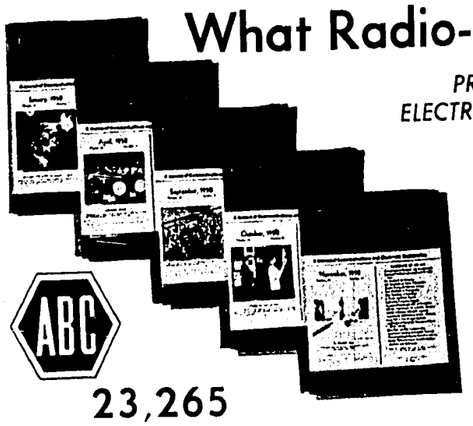
To SELL the Radio Industry, TELL the Radio Engineers!

What Radio-Electronic Engineers Read!

PRE-SPECIFICATION SELLING IS THE KEY TO THE ELECTRONIC MARKET — — AN ENGINEERING JOURNAL IS THE AVENUE TO SUCH SALES.



23,265

Research and Engineering in print —

has been the vital job of "Proceedings of the I.R.E" in its service to its members and to industry since 1913.

Published by The Institute of Radio Engineers so that the knowledge of technical radio in all its branches might be shared and spread world-wide, this journal ranks first in accuracy, authority, and volume of material published. In 1950 it printed 1480 pages of technical data, the word-count equivalent of five 600 page textbooks. This is the way that the engineer keeps up-to-the-minute in his professional knowledge of a rapidly expanding science.

"Proceedings" articles cover twenty-two fields of application of the radio tube, but IRE is truly an "Institute of Related Electronics" serving engineers from Broadcasting to Nucleonics, from Television to Industrial Electronics.

Covering a "Key Man" audience —

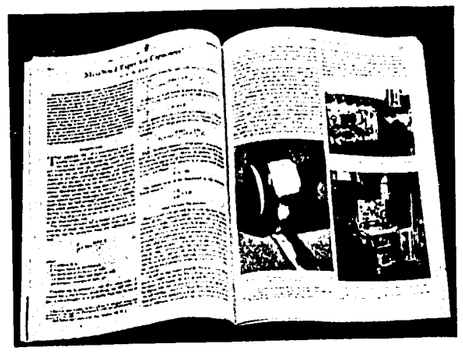
is the marketing function of "Proceedings of the I.R.E"

Strict membership requirements, and an annual investment of from $10. to $15. per member serves to cut out the uninterested and keep the reader audience controlled to active engineers — the kind who read to learn, and are qualified by education and experience to rate as "engineers". The non-member subscription is $18.00. Total net paid including 20,420 members is 23,265 ABC, giving "key-man coverage" in 5000+ firms.

Only the engineer can qualify to "set-the-specs" for buying in a technical industry. This is the man who must be sold, and he can be reached through his engineering journal, economically and effectively.

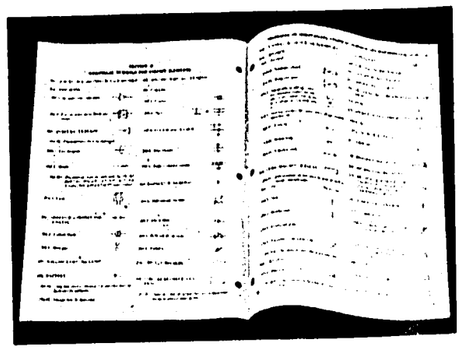
Advertisers have found it pays —

to tell their story to the engineer, if they would sell this industry. 276 different advertisers used "Proceedings of the I.R.E" in 1950. They used 869 pages, and invested over $209,000, an all-time high, to tell their stories. Results have been good, fully in keeping with the quality of the publication and its unequalled audience.



By Engineers — for Engineers —

is the secret to the power and influence of this oldest, yet ever youngest of journals. Its articles are literally years ahead of manufacture, in research; and as practical as the engineer, in application. 298 different authors, most of them members of the IRE contributed 272 articles or features in 1950, covering some 491 engineering topics. Written strictly for engineers, by engineers, and screened by editorial boards of engineers, these articles are authentic, and immensely valuable.



Extra Reader Services — *"Standards" shown above* beyond the valuable research and engineering application articles, add to the value of this magazine. The member is deeply interested in "Institute News and Notes" and the stories of fellow members in "IRE People". He uses the "Abstracts and References" to watch out for papers on his specialty in other books and periodicals which are checked on a world-wide basis. "Product News" and "Industrial Engineering Notes" broaden the news coverage.

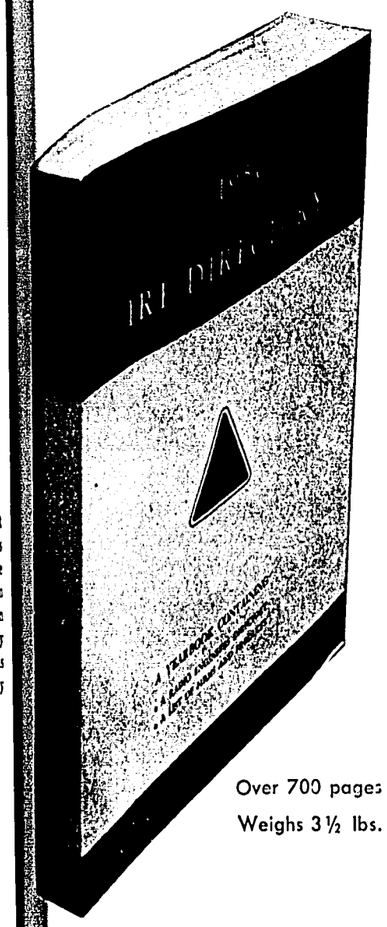
SELL RADIO INDUSTRY TELL RADIO ENGINEERS

Proceedings of the I.R.E

The Institute of Radio Engineers, Inc.

Advertising Dept. 303 West 42nd St., New York 18, N. Y.

What Radio-Electronic Engineers use for Product Reference



Over 700 pages

Weighs 3½ lbs.

Electronic Facts Fast!

The Engineer knows how to use a reference book. He wants his facts, right and fast! Fundamental classifications save him the time of useless duplication of listings typical of "terminology listings" directories. The IRE DIRECTORY of firms and of products is written the way an engineer wants it!

In this directory, a comprehensive picture of the firm and what it makes is given by 76 basic product classes, code amplified to specify 353 products and services. Simple, clean-cut product grouping "by use" speeds "look-up time". Bold-faced type and skillful cross-reference to the ad itself gives advertisers the chance to tell their own story in full.

Pre-Specification Selling —

is soundly promoted by advertising where the buyer looks for information. Advertising in "Proceedings of the I.R.E." is what we call "product promotion" but the IRE DIRECTORY is "product reference" and is fundamental or basic to any campaign. Always make it easy for the buyer to find your firm and product and you have bought business insurance. The IRE Engineer "sets-the-specs" and an ad in his own personal directory will be used exactly when, and as often as he needs such product information. Thus, you sell, when he wants data.

3 Directories in 1:

Nothing in the radio-electronic industry matches the completeness of service and usefulness of the IRE DIRECTORY. It lists 20,420 IRE members both alphabetically and geographically, with data on each member. It provides much Institute information on men, committees and activities.

The Directory of Firms gives names, addresses and code to all electronic products of 3000 organizations, a very complete picture of each firm's part in this industry.

The Product Index shows each firm, its state and sub-classification for the 76 basic classifications. Here the advertiser is shown in bold with full address and cross reference. The less-than-page ad units face these listings. In fact, all advertising faces listings of related value except spreads and catalog inserts.

Expert Compilation —

is a necessary requisite of an engineer's own directory. The year-round research of Frank MacAloon, transferred to a 5000 card master wheeldex; and Miss Florence Decidue's accurate IBM tabulations, keep our listings up-to-the-minute by the combination of skill and modern methods.

Catalog Section —

is a most useful, well used, and economical service of the IRE DIRECTORY. Preprinted inserts supplied by the advertiser (standard 8½" x 11" catalog page) will be bound in complete for $300 for 4 pages, $540 for 8 pages. This cost is competitive to postage and addressing. It provides complete coverage, permanent filing in an accessible book, and maximum reference value. The IRE DIRECTORY is issued annually in September, and closes June 30th. It is part of the IRE "balanced promotion package".

Distribution:

The IRE DIRECTORY is an annual issued to all IRE Members above student grade. 20,420 guaranteed. Distributor and Purchasing Agent edition is 1500. A balance to serve new members brings the total to 23,000.

The qualifications of IRE Members insures you that these men are active engineers, approved by experience, education, and occupation before they can be members. High dues and the technical nature of "Proceedings of the I.R.E" safeguard the quality of this "key-men-of-an-industry" list, insuring you a buying audience.

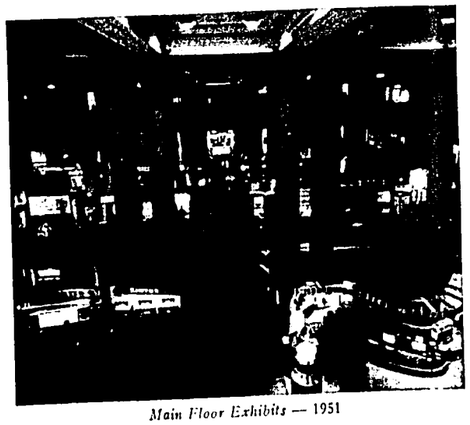
What Radio-Electronic Engineers come to see —

Audience at Technical Papers Session



Main Floor Exhibits — 1951

The Radio Engineering Show —

held each March in Grand Central Palace, New York City, attracts thousands of radio engineers from all parts of the world. In March 1951, the EAAB audited attendance was 22,814, of which 7,416 were IRE Members. Nearly one-third of the total membership attended this annual Convention and Exhibition. They came to hear technical papers on every phase of electronics and communications; for truly IRE is an *Institute of Related Electronics.* They came to see 277 exhibitors use 369 units totalling 45,672 square feet of exhibit space to show products.

The Show proves engineers are buyers —

because only definite results in sales would support so tremendous a market-place. Year-after-year, both the Radio Engineering Show and its audience has grown, until today this event is the "big date" of an entire industry — toward which the time-table of production and research points new models and product advances.

All types of interests are served. The exhibits include an Audio Center, a Nucleonic Center, practically a floor of Instrument and Test and Measurement Equipment Exhibits, and every component known to radio. Large scale apparatus exhibited includes color television transmitters, cameras and studio equipment, all kinds of communication equipment, computors, and even electronic manufacturing machinery.

The Show brings manufacturer and engineer together to the profit of both. Admissions are strictly limited, and the registration is carefully analyzed. Here the exhibitor meets the IRE audience face-to-face and finds that engineers control buying in this industry.

A balanced promotion package —

is thus provided to industry by the marketing services of the IRE. "Proceedings of the I.R.E" gives *product promotion*, helping the manufacturer sell the radio industry by telling the radio engineer. The IRE DIRECTORY delivers *product reference*, insuring that the men who "write the specs" can easily find full data on your product when they need it. The Radio Engineering Show completes the package with *product presentation.* All three services can be purchased as a program, putting strength, stability and economy into your campaign.

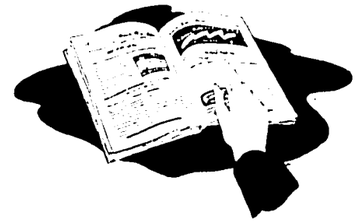
What it Costs to Advertise in the IRE Directory or in "Proceedings of the I.R.E"



Here is the answer—

given in some detail because engineers like the complete facts.

In the center column the unit ad rates are shown. The price of most advertising is based on "circulation" or the number of readers reached. Real costs, therefore, are determined by dividing the number of readers into the rate to find the cost per reader.

Figured this way, in the IRE DIRECTORY a page costs 1⅓ cents, and a column ad 4⅓ mills per copy, or reader, which is less than a one-cent postal! The same economy occurs in "Proceedings of the I.R.E" where the reader cost is even a little less, omitting all students. 6 and 12 time advertisers earn 10% and 20% discounts, reducing costs even lower.

The catalogs bound into the DIRECTORY cost advertisers less for that service than the cost of addressing and mailing to the same number of engineers.

IRE keeps these rates economical as a service to the Industry and its member engineers.

RATES

In "Proceedings of the I.R.E" and the IRE DIRECTORY

One page costs	$300.00
a 2/3 page	200.00
a column or 1/3	100.00
a 1/6 page	60.00

Quantity discounts:

Advertisers using six or more units in "Proceedings of the I.R.E" earn 10% off; and using every issue get 20% off (within 1 year). Bulking is permitted. Directory ads do not help earn this rate, but do receive the discount if it is earned in a "Proceedings" schedule.

Extra charges:

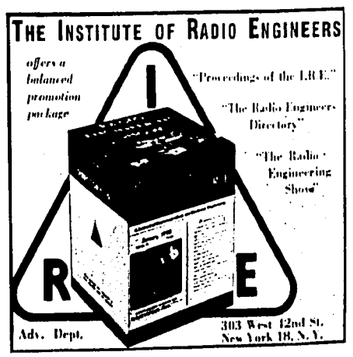
Color costs $60.00 extra for red or blue (standard) and $138.00 for any other color. Bleed costs $10.00 and "guaranteed positions" $25.00 extra.

Catalogs in the IRE DIRECTORY:

Such literature is supplied preprinted by the advertiser, charges prepaid to Menasha, Wis. Quantities increase each year (22,500 in 1951). Catalogs are carefully cross-referenced in listings, receive permanent filing, are bound in the DIRECTORY, and are distributed to all IRE Members except students. Rates are:

4 pages $300.	16 pages $960.
8 pages $540.	20 pages $1000.
12 pages $720.	24 pages $1200.

Detailed rate card and mechanical requirements cheerfully sent on request.



What the Advertiser gets—

These publications render two different kinds of service. The IRE DIRECTORY gives "product reference" usefulness; while "Proceedings of the I.R.E" gives the advertiser "product promotion." Each medium reaches the cream of radio-electronic engineers, and lends prestige value through the association of a firm's product with the progress and accuracy of IRE's publications.

What the Reader gets—

is of the utmost importance. These publications are of great service to the reader. Good advertising adds to the scientific worth of engineering application articles (in "Proceedings"), and listing usefulness (in the DIRECTORY), the value of "product information." This is of practical importance because the apparatus, components and materials advertised are essential to the carrying out of "theory" into engineering applications. Advertising tells the story of tools and materials, with which the engineer must work! The reader wants such information.

Part Five—1951
Catalogs and Complete-Data-Spreads

The full spirit of the IRE DIRECTORY is to give the reader-engineer "facts" in complete detail, and specific enough to be of useful service. Our advertisers have recognized this, and many have made their copy presentation full of useful specifications and illustrations.

Actually, a Directory Publisher cannot hope to adequately describe products in standardized listings. Only the Advertiser, using display space, and with his own intimate knowledge of his service or product, can do that job right.

The Part Five Advertisers, listed below, have done their utmost to provide the reader with engineering data in full detail, through spreads and catalogs filed in this book for easy access and permanent reference. This can prove to be the most useful part of the 1951 IRE DIRECTORY to you.

More and more—engineers, designers, production men and purchasing officials have come to regard Plasticord and Plasticote Wires and Cables by Chester as the standard of comparison. This is because every inch of these dependable insulated conductors is made to conform to exacting quality controls that assure long service life, and performance as specified by the factory. That's the reason electrical men, everywhere, look for the Chester trademark when they're looking for the best!

"Chesty" says—

Our new catalog is a complete guide to plastic insulated wire and cable for every purpose. Write for a copy of this important data compilation for your files today.

SPEECH EQUIPMENT AND ACCESSORIES

Collins has everything for AM and FM broadcasting and is often called on to equip complete stations. The Collins Broadcast Speech Equipment and Accessories book is a standard reference work of 65 pages which should be kept in the files of all engineers in the broadcast field. It pictures and describes a wide variety of high quality speech input consoles, remote equipment, rack mounted audio units, test and control apparatus, custom designed equipment, transducers, power supplies, meter and rack panels, terminal boards, cabinets — everything which conceivably could be needed in building a new station or modernizing an old one. If you haven't a copy of this book, your nearest Collins office will be glad to supply it.

AMATEUR EQUIPMENT

75A-2 double conversion superheterodyne receiver, advanced design throughout, covers 160, 80, 40, 20, 15, 11 and 10 meter bands, permeability tuned crystal controlled oscillator dial calibrated directly in frequency, selectivity, sensitivity, stability and tuning accuracy, signal to noise ratio 50 db, image rejection on all bands, noise limiter, amplified, delayed AVC with operation tubes, price, less speaker

50 speaker in matching cabinet

KW-1 transmitter — One kilowatt input AM, SSB and CW, covers 160, 80, 40, 20, 15, 11 and 10 meter bands designed to avoid TVI with additional attenuation, output network and filtered control leads; complete assembly, usual excellent Collins audio with speech, high level low pass filter for bandwidth limitation, single control tuning, single bandswitch for entire tuning dial, similar to 75A-2, output 50 ohms, 3 to 1 SWR, PA tubes conservatively rated at one kilowatt

Price

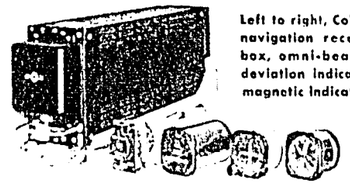
32V-3 transmitter — 150 watts input CW, 120 watts Collins 70E-8A VFO controlled, bandswitching, designed for maximum reduction of TVI by use of shielded circuits in the exciter and an added L network, balanced pi output network, plus double shielding on all leads. Price

75S-3 low pass filter — inserted in well shielded line from 32V-1, 2, or 3, provides approximately 80 db reduction of harmonic emissions at the television frequencies

Price

51SB-1 narrow band FM adapter — plugged into VFO of the 32V-1, 2, or 3, it is suitable for FM on 6 meter bands. Price

AIRBORNE COMMUNICATION AND NAVIGATION EQUIPMENT



Left to right, Collins 51R-2 VHF navigation receiver, control box, omni-bearing selector, deviation indicator, and radio magnetic indicator.

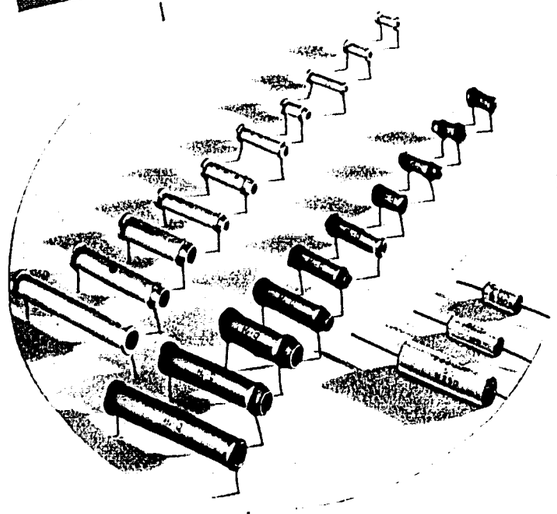
Hi-Q*

PRODUCED BY THE MILLIONS



Hi-Q BC TUBULAR CERAMIC CAPACITORS

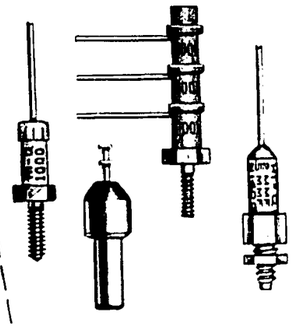
For coupling, by-passing and filtering where frequency control is not a critical parameter. Readily replace mica and paper condensers of corresponding value. (Not to be confused with Hi-Q close tolerance, temperature compensating units.) Available in capacity ranges from 5 mmf. to 33,000 mmf.

Hi-Q TEMPERATURE COMPENSATING CAPACITORS

Tubular ceramic construction with pure silver electrodes precision coated. Capacities from .25 mmf. to 1830 mmf. and a temperature coefficient range from P 100 to N 1400.

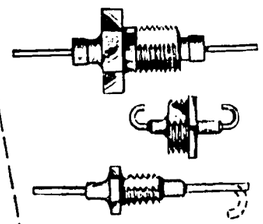
Insulation: Both Hi-Q BC Tubular and Hi-Q Temperature Compensating Capacitors are available with any of three types of insulation:—Clear non-hydroscopic styrene coating (CN) . . . Durez impregnated with low-loss microcrystalline wax (SI) . . . or a ceramic (Steatite) cover tube sealed with a specially developed end seal where applicable (CI).

Hi-Q STAND-OFF CAPACITORS



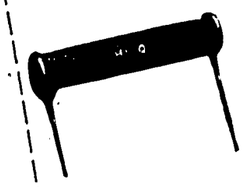
Basically, these are tubular units with a screw fixture for mounting to chassis or common ground. Type MCS has a ceramic tube enclosed in husky cadmium plated metal case with a specially developed end seal for protection against humidity and temperature changes. Close coupling and their unique construction make them excellent for by-passing RF in the high frequencies. Standard capacity tolerances are ± 10%, ± 20%, and GMV for "stand-off" capacitors and —20%, + 30%, and GMV for multiple tap units. MCS has a capacity of 1500 mmf. ± 500 mmf. All units flash tested for 1000 volts DC, power factor under 3% maximum. Insulation resistance is above 10,000 megohms.

Hi-Q FEED-THRU CAPACITORS



Provide perfect transmission through shields or ground potentials and simultaneously by-pass unwanted frequencies. Extremely rugged to withstand severe vibrations such as those encountered in aircraft, missiles and automotive requirements.

Hi-Q HIGH VOLTAGE TUBULAR CAPACITORS



Available in capacities from 25 mmf. to 250 mmf. Units with working voltage of 3,000 V. D. C. are 1.840" in length and .375" in diameter. Units with working voltages between 500 V. D. C. and 3,000 V. D. C. can be slightly smaller. All are Durez coated and are selected from ceramic bodies having good dielectric characteristics.

Hi-Q* COMPONENTS

Capacitors
Trimmers • Choke Coils
Wire Wound Resistors

BETTER 4 WAYS

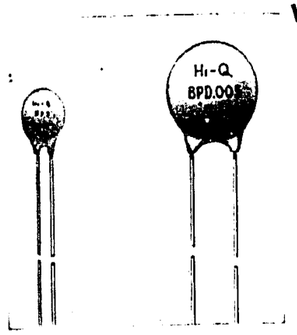
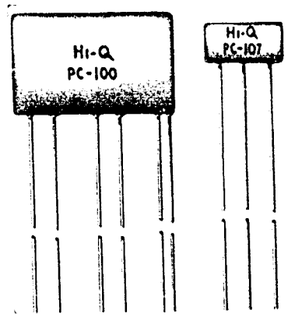
Trade Mark Registered, U. S. Patent Office

— by the top specialists in the ceramic field . . .



Hi-Q CERAMIC DISK & PLATE CAPACITORS



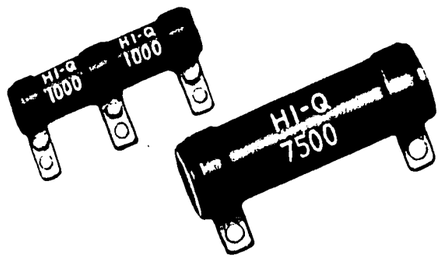
Hi-Q Disks are high K dielectric by-pass, blocking or coupling capacitors. Multiple capacities may be fabricated on a single disk to eliminate two or more conventional units. Insulated with Durez and high temperature microcrystalline wax for protection against moisture and high humidity. Available in a wide range of capacities and sizes.

Hi-Q Plates are essentially similar to Disks other than in shape. Multiple units do *not* require a common ground as do Disks and the number of capacities on a plate is limited only by the K of the material and physical size of the unit. Guaranteed minimum capacity values up to 33,000 mmf. per sq. in. are available.

Hi-Q TUBULAR TRIMMERS

Hi-Q Steatite adjustable, high-frequency capacitors are noted for their simplicity of design, mechanical strength and electrical stability. Available in two sizes: ½" with two capacity ranges, 0.5 mmf. to 3.0 mmf. and 1.0 mmf. to 4.0 mmf.; and ⅜" with capacity 1.0 mmf. to 6.0 mmf.

Hi-Q WIRE WOUND RESISTORS



Hi-Q Resistors are made by winding special resistance wire upon a high refractory ceramic core. Element is anchored at each end to copper terminals and silver soldered for good contact. Wattage rated according to dissipation of heat each Hi-Q Resistor will handle without exceeding 300°C (570°F) at its hotspot from a starting ambient temperature not exceeding 40°C (104°F).

Hi-Q NON-INSULATED CHOKE COILS

Hi-Q non-insulated choke coils are a solenoid type of winding on forms moulded from mineral filled moulding material, powdered iron cores, metallic oxides such as titanium, or on a steatite core. Available in many sizes.

Hi-Q INSULATED CHOKES

Available in various values insulated either by a Steatite cover tube or with Durez and high temperature crystalline wax, assuring maximum protection against high humidity and temperature change.

Hi-Q SPECIAL WINDINGS

Available in certain types and combinations of special windings. C and L combinations of capacity and inductance are available in many values.

Write FOR THE Hi-Q DATALOG

giving complete details of these and other Hi-Q Components. Please feel free to consult our engineers at any time concerning specific applications. We assure you of complete and fullest cooperation.

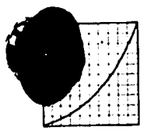
FAIRCHILD precision potentiometers

Expertly designed and built with extreme mechanical precision to meet individual specifications, Fairchild Precision Potentiometers offer:

COMPACTNESS • LONG LIFE • SUSTAINED ACCURACY • LOW NOISE LEVEL • HIGH RESOLUTION • MULTIPLE GANGING

Unique Facilities for Unsurpassed Precision



The outstanding performance of Fairchild Precision Potentiometers is the result of careful design and scrupulous attention to every phase of manufacture from the selection of materials to the precision machining of mechanical components.

Precision windings are custom-made by an exclusive technique on machines built expressly for the purpose. Wiper arm contacts are made of precious metal alloys. Mechanical parts are machined to extremely close tolerances. For example, diameters of shafts and pilot bushings are held to a tolerance of +.0000, —.0005 inch, and radial shaft play is held to a maximum of .0005 inch or better at full indicator reading. Taps are accurately located to within ±1°, and in some cases to ±0.5°.

Since performance requirements vary with each individual application, complete standardization of units is impossible. For this reason the facilities of the Fairchild Potentiometer Sample Laboratory and the services of its specially trained personnel are available for analyzing customers' application problems.

Described on this page are four basic designs now available with linear or non-linear windings tailored to meet the individual requirements of virtually any application.

FAIRCHILD TYPE 746 PRECISION POTENTIOMETER

This new unit offers a number of unusual features never before available to precision potentiometer users. It has low torque, a new, more accurate phasing adjustment, and a new method of stacking that permits ganging up to 20 cups on a shaft. Individual cups in a gang are easily replaced where necessary. Supplied with linear or non-linear windings to meet your specifications.

SPECIFICATIONS (Nominal Values)

Resistance—Linear, 100,000 ohms max.; non-linear, as specified
Electrical Function Angle—310° ±1° max.
Electrical Contact Angle—325° max.
Mechanical Rotation—continuous
Functional Tolerance (guaranteed)—±0.5% (linear), ±1.0% (non-linear)
Mechanical Accuracy—*concentricity* (shaft to pilot bushing)—.001 in. FIR max.; *radial shaft play*—.0009 in. FIR max.; *Shaft*—centerless ground to .2500 diam. (+.0000, —.0005 in.) *pilot hub*—machined to .5000 (+.0000, —.0005 in.)
Torque—1.5 oz-in. per cup
Wattage (rated at +40° C ambient temperature)—2.5
Terminal Voltage—400 max.
Voltage Breakdown at sea level (60 cycles)—900 RMS
Taps—One per cup*; location accurate to ±1°; ±0.75° max. width
Operating Ambient Temp. Range— —55°C to +71°C
Guaranteed Service Life (Nichrome Wire)—1,000,000 cycles
Dimensions—diam. 1.750; length (1 cup) .800 in. ±.005 in.; added length per unit ganged, .580 in. ±.002 in.
Case—grey anodized aluminum for greater accuracy

**Two taps can be provided by slight design modification using terminal board clamp screw modified for wiper terminal; 19 taps can be provided by addition of dummy cup section.*

FAIRCHILD TYPES 747 AND 748 PRECISION LINEAR POTENTIOMETERS

The Type 748 is a linear potentiometer with a guaranteed functional tolerance of ±0.10%! The Type 747, similar in nearly all respects except size, has a guaranteed functional accuracy of ±0.15%. Type 747 has a nominal diameter of about 2 inches, while the 748 is about 3 inches in diameter. Flexibility of these units permits their combination with other units having non-linear windings to meet special application problems.

SPECIFICATIONS (Nominal Values)

Resistance—747, 75,000 ohms max.; 748, 125,000 ohms max.
Electrical Function Angle—747, 351.3° ±1°; 748, 354.5° ±1°
Electrical Contact Angle—747, 351.3° +4°, —0°; 748, 354.5° +4°, —0°
Mechanical Rotation—continuous
Functional Tolerances (guaranteed)—748, ±0.15%; 747, ±0.10%
Mechanical Accuracy—*concentricity* (shaft to pilot bushing)—.0025 in. FIR max.; *radial shaft play*—.0015 in. FIR max.; *shaft*—centerless ground stainless steel to .2500 diam. (+.0000, —.0005 in.); *pilot hub*—machined to .7500 (+.0000, —.0005 in.)
Torque—1.0 oz-in. per cup
Wattage (rated at +40°C ambient temperature)—747, 4 watts; 748, 5 watts
Terminal Voltage—400 max.
Voltage Breakdown at sea level (60 cycles)—900 RMS
Taps—747, 12 per cup*; 748, 16 per cup*; location accurate to ±1°; ±5° max. width
Operating Ambient Temp. Range— —55°C to +71°C
Guaranteed Service Life (Nichrome Wire)—1,000,000 cycles
Dimensions—diam., 747, 2.093 in.; 748, 3.093 in.; length (1 cup) 1.156 max.; added length per unit when ganged, .594 in.

**Depends on spacing requirements. Without moving bridge or wiper terminal.*

FAIRCHILD D-C-P*

***Differential Computing Potentiometer**

The Fairchild Differential Computing Potentiometer is virtually two precision linear potentiometers in one. With it, you can combine two input variables and obtain an output that is proportional to their sum or difference. Instead of using terminal lugs, the D-C-P provides for external connections to winding ends and wiper by means of three coin-silver slip rings to permit continuous rotation of body as well as shaft.

SPECIFICATIONS (Nominal Values)

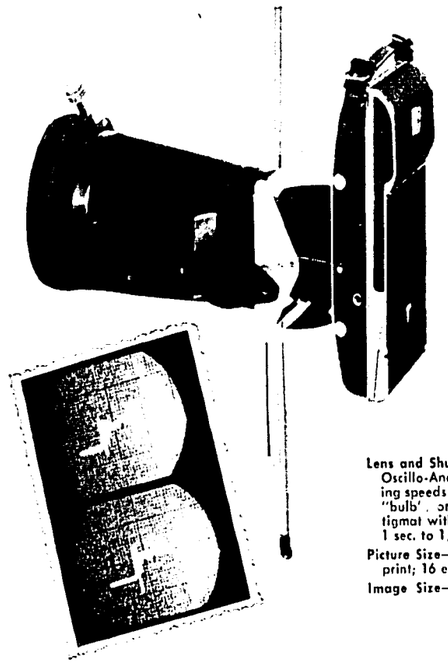
Resistance—125,000 ohms, max.
Electrical Function Angle—354.5° ±1°
Electrical Contact Angle—354.5° +4°, —0°
Mechanical Rotation—continuous
Functional Tolerance (guaranteed)—±0.10%
Mechanical Accuracy—*concentricity (shaft to pilot bushing)*—.0025 in. FIR max.; *radial shaft play*—.0015 in. FIR max.; *shaft*—centerless ground stainless steel to .2500 diam. (+.0000, —.0005 in.); *pilot hub*—machined to .7500 (+.0000, —.0005 in.)
Torque—1.0 oz-in. per cup
Wattage (rated at +40°C ambient temperature)—5 watts
Terminal voltage—400 max.
Voltage Breakdown at sea level (60 cycles)—900 RMS
Taps—number per cup* (see note); location accurate to ±1°; ±.5° max. width
Operating Ambient Temp. Range— —55°C to 71°C
Guaranteed Service Life (Nichrome wire)—1,000,000 cycles
Dimensions—diam. 3.093 in., length 1.219 max.

**No slip rings provided for taps, but 16 taps can be provided within the cup depending on spacing requirements and without moving bridge or wiper terminal.*

WRITE TODAY FOR COMPLETE INFORMATION

FAIRCHILD oscilloscope cameras

For Permanent Oscilloscope Records—on the spot!



THE FAIRCHILD-POLAROID® OSCILLOSCOPE CAMERA PRODUCES A PHOTOGRAPHIC PRINT IN ONE MINUTE

When you need Oscilloscope records in a hurry, you can't beat this new camera. It's a special Fairchild adaptation of the Polaroid-Land principle of "a photographic print in one minute." Because these prints are immediately available to the engineer, lab work can proceed continuously without the interruptions or long waiting periods required with conventional methods.

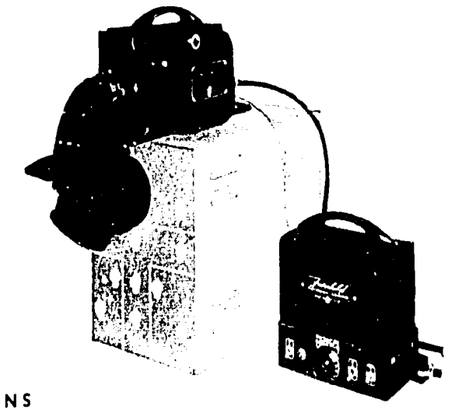
For the first time, the camera makes it economically practical to record many traces that were formally sketched or carried in the engineer's memory. No focusing or special training is required—just snap the shutter, pull down a paper tab, and remove the finished print 60 seconds later. Each 2¼ x 3¼ print records two traces at exactly one-half life size for easy comparison and measurement.

SPECIFICATIONS

Lens and Shutter—Choice of 75mm f2.8 Wollensak Oscillo-Anastigmat with ±2 Alphax shutter having speeds of 1/25 sec. to 1/100 sec., "time" and "bulb"; or, 75mm f1.9 Wollensak Oscillo-Anastigmat with ±3 Alphax shutter having speeds of 1 sec. to 1/100 sec., "time" and "bulb".
Picture Size—3¼ x 4¼ in. (2 or more images per print; 16 exposures per roll of film.)
Image Size—One-half reduction of scope image.
Writing Speed—With f2.8 lens, up to 1 in./usec at only 3000V accelerating potential; higher speeds at higher voltages. With f1.9 lens these values are approximately doubled.
Dimensions—Camera, 10½ x 5¼ x 6¼ in.; hood, 11 in. length, 7½ in. dia.; adapter, 2 in. width, 6⅝ in. max. dia.
Weight—Complete, 7¾ lb.

For both still and continuous-motion Oscilloscope Recording on 35-mm film or paper

THE FAIRCHILD OSCILLO-RECORD CAMERA



The Fairchild Oscillo-Record Camera is the first specifically designed for the purpose of recording cathode-ray oscilloscope images. The unit is designed for both still and continuous motion photography on standard 35 mm film. No special experience is necessary to set up the equipment.

Dynamic braking stops film instantly when switch is turned off. Remote control connection provides automatic means of monitoring random transients without necessity of having camera run continuously.

Other features: Written data record, film speed continuously variable from 1 to 3,600 in./min., remote control provision, protective interlock.

SPECIFICATIONS

Assembly—Consists of: (a) camera; (b) electronic film speed control unit; (c) periscope cone; (d) standard mount; (e) data card unit; (f) cables.
Lens—50mm f/2.8 Wollensak Velostigmat; 50mm f1.5 Wollensak (optional at extra cost).
Shutter—Wollensak ±2 Rapax Between-the-Lens Shutter; speeds from 1 second to 1/200th second. (Wollensak ±3 shutter supplied with f1.5 lens; speeds from 1 second to 1/400 second.)
Film Size—Any standard 35mm motion picture negative film; or recording paper.
Film Capacity and Negative Size—(a) Standard 100-foot roll; (b) External Magazines (optional at extra cost)—400-ft. or 1000-ft. When single exposures are made on stationary film, negative size is .953" high x .937" wide. However, film may be advanced from ¼ of a standard 35mm frame height to the full advance of a double 35mm frame (5 to 39mm).
Data Record—Illuminated data card on which any data may be written is provided. Data may be recorded photographically at the beginning or end of each run.
Electronic Control Unit—Provides direct film speed settings over a range of 1 to 3,600 in./min.
Remote Control—Connector is provided for remote control of film-drive motor.
Spacing Bars—Permanently attached to oscilloscope for quick and easy attachment or removal of complete camera and mount assembly.
Approximate Weight—Camera 15 lbs.; Electronic Control, 10¼ lbs.; Periscope and Mount Assembly, 7¾ lbs.; Total, 33 lbs.
Approximate Dimensions—Camera, 9⅛ x 11½ x 7½ in.; Electronic Control, 9¼ x 10 x 5½ in.; Periscope and Mount Assembly, 21¼ x 11⅝ x 5½ in.
Film Speed—Continuously adjustable from 1 in. per min. to 3,600 in. per min. Film movement is continuous, not intermittent.
Interlock—Prevents starting motor when camera is set for single exposures; and vice versa.
Power Requirements—Approximately 135 watts of 110 volt, 60-cycle a.c. are required for the variable speed drive.

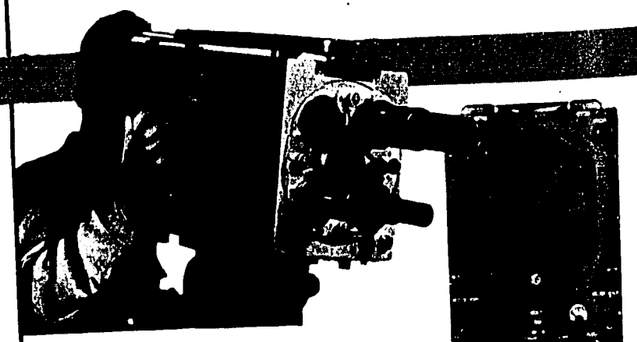
GPL
the Complete NEW LINE for Studio and Field that Increases TV Efficiency

YOU CAN DO *More*— DO IT *Better* WITH GPL TELEVISION EQUIPMENT

Introduced only last year, this GPL equipment has already received wide industry acceptance for its flexibility, convenience and advanced design features. Developed for easy, attention-free operation, built with watchmaker's precision, the GPL line will do more, do it better, for years of dependable service. Write now for full details . . . act now for early deliveries.



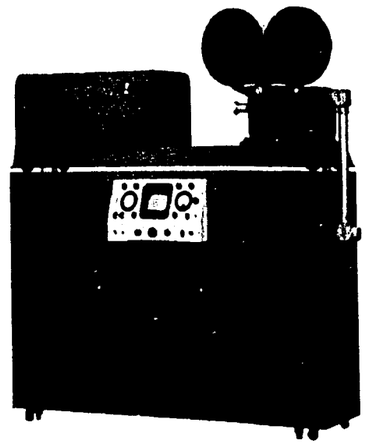
Compact Camera Chain Gives Improved Picture Control

Camera, control unit, power unit make up world's smallest, lightest broadcast chain. Improved picture quality with remote control iris, uniform focus adjustment for all lenses. Remote lens change, focus, pan and tilt also available. Simplified adjustments. Better accessibility. 8½" monitor tube.

TV CAMERA CHAINS—TV FILM CHAINS
TV FIELD AND STUDIO EQUIPMENT
THEATRE TV EQUIPMENT

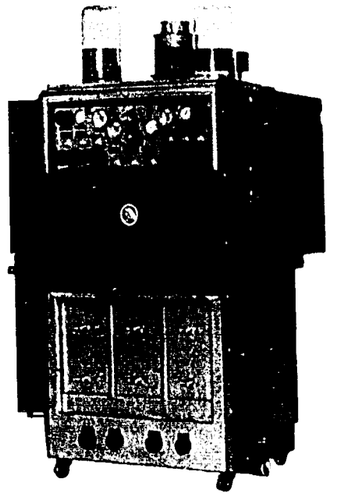
Single-Unit Sync Generator Requires No Adjustment

This unit, complete with power supply, is packaged for field use, may be removed from case for rack mounting. With binary counting circuits and pulse width controlled by delay lines, it provides circuit reliability better than present studio equipment and eliminates operator adjustments.



Video Recordings of Live-Program Quality

Precision electronic shutter provides steady interlace and eliminates shutter bar. High-fidelity sound recorded on the film simultaneously. New vacuum gate camera runs continuously without emulsion pile-up. Telecast recording looks and sounds like a live show.

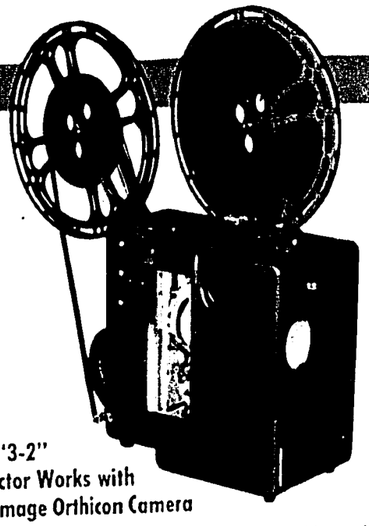


Film Permanently Processed in 40 Seconds

The GPL Rapid Processor develops, rinses, fixes, washes, dries and waxes 16-mm film synchronously as it comes from the Recorder, or its own feed magazine. This facilitates rebroadcasts to other time zones. Operation is fully automatic, gives uniform, highest quality results.

First Professional Sync Projector for 16-mm Film

Designed for TV studio use. Has the reliability of professional 35-mm equipment. Sharper, steadier pictures, finer sound. Uniform illumination, ample light, with 100 foot-candles delivered to camera tube. May be used with any full-storage type film pick-up. Fully enclosed, 4,000 foot film magazine provides for 110 minutes of continuous operation—an entire feature.



New "3-2" Projector Works with Any Image Orthicon Camera

A portable unit of tremendous utility. Used with standard studio or field cameras without special phasing, it makes transmission of motion pictures as simple as stills. Handles film features with results comparable to specialized iconoscope chains. Projects rear-screen effects. Projects commercials to cameras in the field, eliminating expensive studio stand-by facilities. For preview work, its synchronous motor simplifies sound scoring.

General Precision Laboratory

PLEASANTVILLE **NEW YORK**

WRITE, WIRE OR PHONE FOR DETAILS

frequency measurements
accurate to 1 part in 10 Million
over a large portion of the RF Spectrum

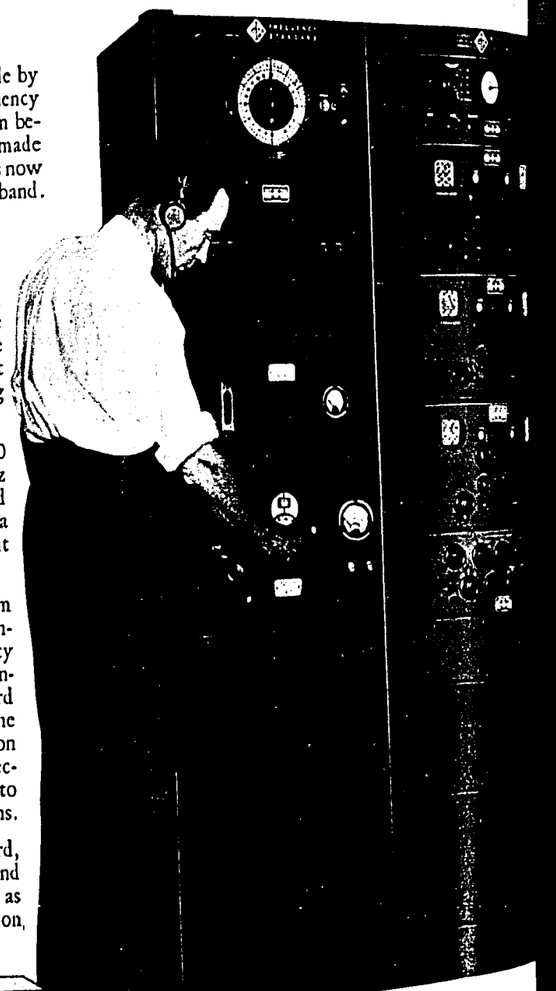
Frequency standards and measuring equipment made by General Radio Company make accurate frequency measurements possible throughout the radio spectrum below 3,000 Mc. Measurements in the v-h-f range can be made with only slightly less accuracy and convenience than is now considered routine in the standard a-m broadcast band.

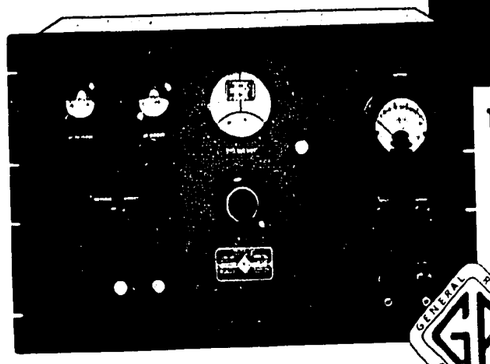
The Type 1100-AP Primary Standard (*at the left of the large photo*), with its associated Type 110-5A Frequency Measuring Assembly (*at the right*), provides hundreds of known frequencies up to 100 Mc with an accuracy of one part in ten million. With the minimum number of adjustable controls and the maximum of convenience, this equipment is the most accurate commercially-available frequency measuring assembly obtainable.

The Type 1100-AP Primary Standard comprises a 100 kc oscillator, with temperature-controlled quartz bar, multivibrator units for 100 kc, 10 kc, 1 kc and 100 cycles, with a-c operated power supply and a Syncronometer clock with micro-dial arrangement for comparison with standard time signals.

The Measuring Equipment, which operates from the Standard, contains three transfer units each containing a tuned detector and heterodyne frequency meter. Beat frequency differences between the frequency under measurement and the nearest standard frequency harmonic are measured by means of the calibrated interpolation oscillator and the comparison oscilloscope. A circular sweep, with radial deflection, can be used on the oscilloscope in addition to the usual Lissajous figures, for frequency comparisons.

Various combinations of the Primary Standard, Secondary Standard, Interpolation Oscillator and auxiliary measuring equipment are available as catalog items. For complete and detailed information, write us, without obligation of course.

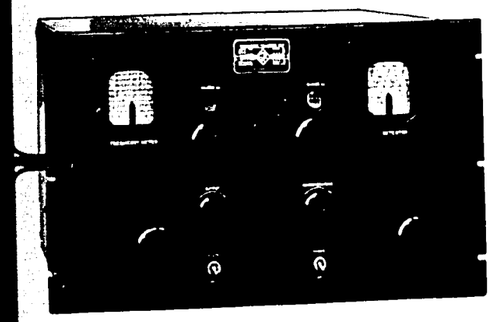




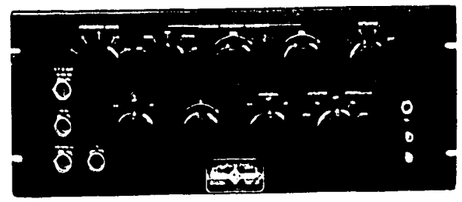
Type 1107-A Interpolation Oscillator is used to measure the difference between the unknown frequency and a known harmonic of the Standard. The direct-reading linear scales of 0 to 5,000 and 5,000 to 10,000 cycles make possible the rapid evaluation of the frequency difference *by addition only*. The actual frequency range is 0 to 5,000 cycles.

Since 1915 — *Designers and Manufacturers of Electronic Test Equipment*

Type 1109-A Comparison Oscilloscope is used as an aid in making interpolations, or in checking calibrations with high accuracy. It contains a 3-inch, radial deflection cathode-ray tube and its power supply. Circular sweeps can be obtained at power line, 0.1, 1 and 10 kc from the Standard, and at variable frequencies from the Interpolation Oscillator. A radial deflection amplifier is provided for showing the input signal on the circular sweep base.



Type 1106-A Frequency Transfer Units, of which there are three, contain a heterodyne frequency meter and heterodyne detector, with direct-reading scales. The ranges of the three units are: 100 kc to 2,000 kc; 1 Mc to 10 Mc and 10 Mc to 100 Mc. Harmonic output of the frequency meter can be used at frequencies considerably higher than those covered by the dial ranges.



Type 1108-A Coupling Panel provides a centralized control panel for quickly and conveniently interconnecting those units of the equipment used in a particular measurement. It carries the necessary switches and volume controls for all operations in making frequency measurements. The bottom panel contains a Type 1105-P1 Speaker for audible monitoring of beat frequencies.

GENERAL RADIO Company

275 Massachusetts Avenue, Cambridge 39, Mass.

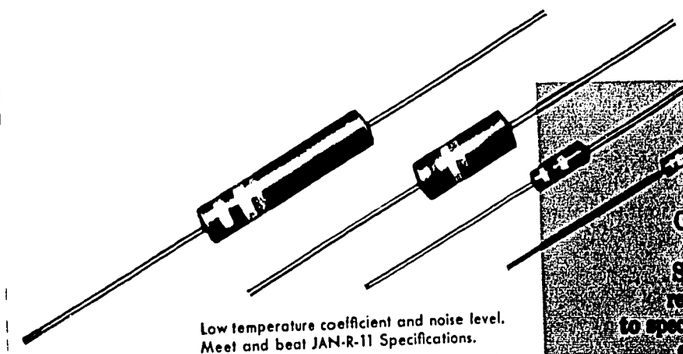
90 West Street NEW YORK *920 S. Michigan Ave.* CHICAGO *1000 N. Seward St.* LOS ANGELES

A number of years ago General Radio Company instituted a continuous research program looking to the development of an improved primary frequency standard, a commercial standard requiring little attention or maintenance and supplying usable frequencies of high and known accuracy over an extremely wide frequency range. The current G-R standard and associated measuring equipment are known the world over for their reliability and high accuracy.

In addition to the equipment shown here, G-R manufactures a number of auxiliary frequency measuring devices such as an interpolation frequency standard, heterodyne frequency meters, frequency deviation monitors, f-m monitors, audio-frequency meters, precision tuning forks and general-purpose wavemeters.

Low temperature is essential *in resistors too!*

Any resistor can reduce voltage and dissipate heat. Amazingly few can do it without overheating themselves! Chief among those who *can* are IRC Resistors. Advanced, yet practical design—unusual use of heat-dissipating materials—and a rigid quality control system—all combine to give these resistance units low operating temperatures, greater efficiency and longer life.



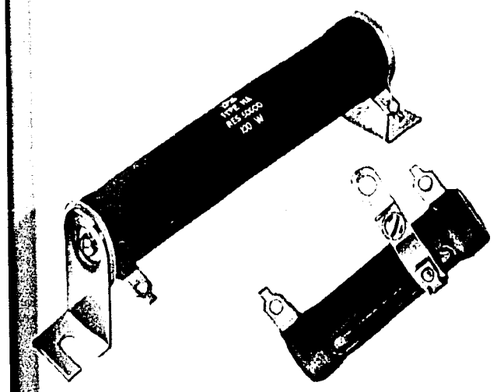
Low temperature coefficient and noise level. Meet and beat JAN-R-11 Specifications.

⅓, ½, 1 and 2 watts—available in ±5%, ±10%, and ±20% tolerance.

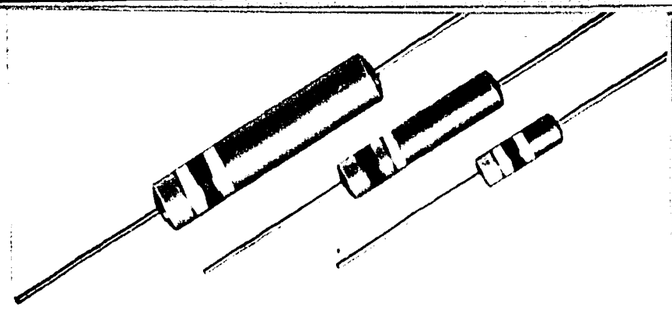
Easily meet critical requirements of television.

Fully tested by independent agencies under actual field conditions.

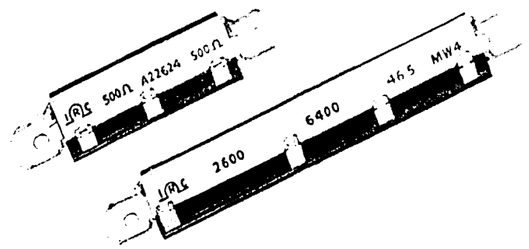
Extremely low operating temperature only one feature of Advanced Type BT Composition Resistors. These compact, light fully insulated units actually surpass JAN Specifications at ⅓, ½, 1 and 2 watts! In BT resistance material is permanently cured and to special glass. Leads extend into filament for conductivity. Molded bakelite seals element moisture and prevents grounding. BT available as standard RTMA resistance Send for full details in 12-page technical data Bu



Besides unusually rapid dissipation of heat, IRC Fixed and Adjustable Power Wire Wound Resistors give balanced performance in every characteristic. Special cement coatings are designed for low range high temperature requirements—or for maximum protection against extreme atmospheric conditions. For exacting, heavy-duty applications—high voltage bleeders, bias supply, grid and filament dropping resistors—PWW's are available in a full range of sizes, types and terminals. Leading industrial, aircraft and broadcasting users have specified them for more than 14 years. Technical data Bulletin C-2 gives complete information.



Temperature coefficients cover many resistance values in IRC Type BW Insulated Wire Wound Resistors. At ½, 1 and 2 watts, they are exceptionally stable, economical units for low range applications such as meters, analyzers, spark suppression units, TV circuits, low power ignition circuits. Resistance elements are wound uniformly on insulated core. Molded phenolic housing protects against humidity and grounding. Noise and aging are negligible. Technical data Bulletin B-5 contains full details.



For extremely fast heat dissipation, the unique mounting brackets of Type MW Wire Wound Resistors actually transfer heat from chassis to outside. Other radical departures from conventional design give MW's widest adaptability to individual requirements. MW's are flat wire wound resistor strips, permanently enclosed by high pressure molding in a special mica-filled phenolic compound. Special feet permit mounting on any flat metal surface. Low initial cost, lower mounting cost, flexibility in providing taps at low cost, and savings in space, all offer amazing economies. Ask for technical data Bulletin B-2.

When you're in a hot spot and need experimental or maintenance quantities of standard resistors *double-quick*, phone your IRC Distributor. IRC's Industrial Service Plan provides him with a full stock of uniformly dependable standard resistors; he can give you fast, round-the-corner delivery of small-order requirements. We'll be glad to send you his name and address.

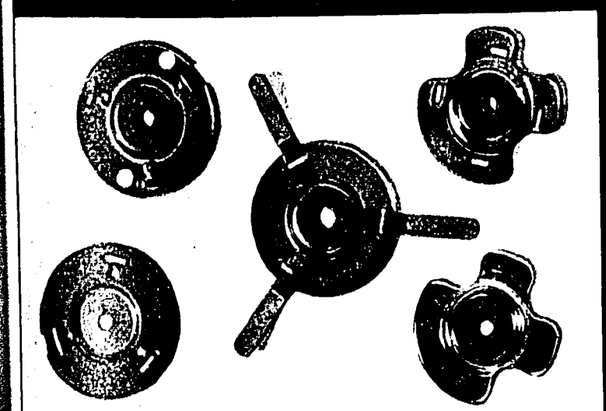
ONE PIECE CATHODES, STEM LEAD EYELETS, APERTURE CUPS, CATHODE RETAINERS, CATHODE SPACERS, POLE PIECES, SUPPORT STRAPS.



TOP APERTURE SPACERS FOR MAGNETIC AND ELECTROSTATIC FOCUS GUNS

Illustrated are typical examples of our wide range of parts and assemblies employed by leading TV and receiving tube manufacturers. J & H Seamless Anodes and Grids are produced on precision deep drawing machines from high quality strip material—entirely free of contaminent lodging seams and crevices. Our completely equipped tool and die shop in conjunction with high speed automatic production facilities is prepared to undertake your most critical and exacting parts problems from design to completed product.

J & H Cathode Ray Tube Parts and Assemblies have been specified for original and advanced gun designs. The new revolutionary zero voltage electro-static focus gun design soon to be announced by the industry will feature especially developed J & H components.

Looking for Subminiature Tube Parts?

J & H in anticipation of defense tube requirements is in a position to supply critically required parts for tubes now specified in equipment for armed services. Investigate J & H facilities for your standard and special electronic parts requirements today. Write or phone—Rockville Centre 6-0500.

INJECTION MOLDED GRADES:

MYCALEX 410

MYCALEX 410 IS APPROVED FULLY AS GRADE L-4B UNDER NATIONAL MILITARY ESTABLISHMENT SPECIFICATION JAN-1-10 "INSULATING MATERIALS, CERAMICS, RADIO, CLASS L.". CAN BE INJECTION MOLDED, WITH OR WITHOUT METAL INSERTS, TO EXTREMELY CLOSE TOLERANCES.

CHARACTERISTICS

Power Factor, 1 megacycle	0.0015
Dielectric Constant, 1 megacycle	9.2
Loss factor, 1 megacycle	0.014
Dielectric Strength, volts/mil	400
Volume Resistivity, ohm/cm	$1x10^{15}$
Arc Resistance, seconds	250
Impact Strength, Izod ft-lb/in of notch	0.7
Max. Safe Operating Temp. °C	350
°F	650
Water Absorption, % in 24 hours	nil
Coefficient of Linear Expansion, °C	$11x10^{-6}$
Tensile Strength, psi	6000
Compression Strength, psi	27,000

★ ★ ★

MYCALEX 410X

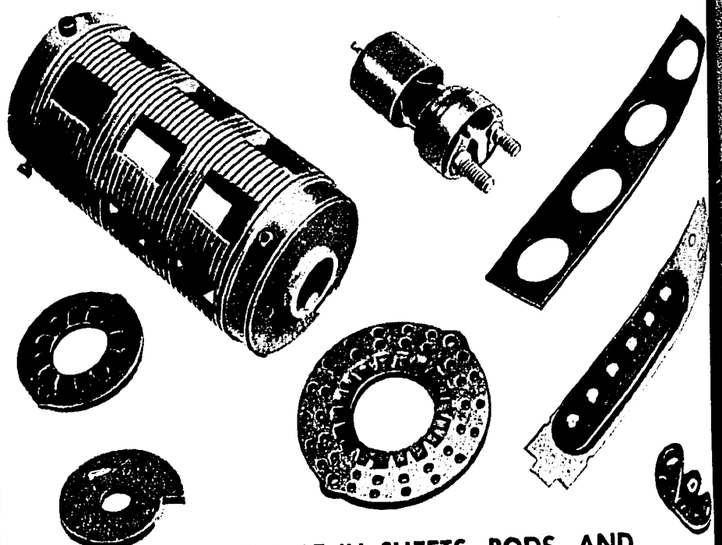
MYCALEX 410X CAN BE INJECTION MOLDED, WITH OR WITHOUT METAL INSERTS, TO EXTREMELY CLOSE TOLERANCES.

CHARACTERISTICS

Power Factor, 1 megacycle	0.012
Dielectric Constant, 1 megacycle	6.9
Loss factor, 1 megacycle	0.084
Dielectric Strength, volts/mil	400
Volume Resistivity, ohm/cm	$5x10^{14}$
Arc Resistance, seconds	250
Impact Strength, Izod, ft.-lb/in of notch	0.6
Max. Safe Operating Temp., °C	350
°F	650
Water Absorption, % in 24 hours	nil
Coefficient of Linear Expansion, °C	$12x10^{-6}$
Tensile Strength, psi	6000
Compressive Strength, psi	28000

—a non-organic glass-bonded mica insulation featuring—

- LOW LOSS — HIGH EFFICIENCY
- HIGH DIELECTRIC STRENGTH
- IMPERVIOUS TO OIL OR WATER
- FREEDOM FROM CARBONIZATION
- PERMANENT DIMENSIONAL STABILITY
- WITHSTANDS HIGH TEMPERATURE
- IMMUNE TO HUMIDITY
- EXCELLENT MECHANICAL CHARACTERISTICS



AVAILABLE IN SHEETS, RODS, AND FABRICATED TO SPECIAL SHAPES

MYCALEX

LOW-LOSS MINIATURE TUBE SOCKETS

These sockets cost no more than ordinary phenolic types yet electrical characteristics are far superior. Dimensional accuracy and uniformity are unexcelled.

PRODUCED IN TWO GRADES

MYCALEX 410 is approved fully as Grade L-4B under N.M.E.S. JAN-1-10 "Insulating Materials, Ceramic, Radio, Class L."

MYCALEX 410X is lower in cost but it's insulating properties greatly exceed those of general purpose phenolics.

Both types available in 7-pin, and 9-pin and subminiature. All are injection molded to high precision. For MYCALEX 410 and 410X physical properties see opposite page.

SINCE 1919 MYCALEX THE INSULATOR TRADE MARK REG. U.S. PAT. OFF.

MYCALEX CORPORATION OF AMERICA
Owners of "MYCALEX" Patents and Trade-Marks

—economical, widely applicable machines and molds to close tolerances

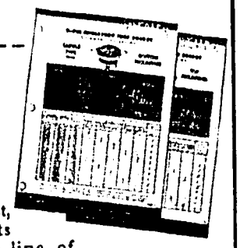
Mycalex is a highly developed glass-bonded mica insulation backed by over a quarter-century of continued research and successful performance. In its present high state of development, MYCALEX combines every important characteristic demanded of a modern, permanent, efficient electrical insulating material. MYCALEX is supplied in sheets or rods, can be injection or compression molded to close tolerance, is readily machineable, and can be fabricated in practically any size or shape. Dielectric losses are very low from 60 cycles to 24 kilomegacycles per second, arc resistance, volume resistivity and other electrical characteristics meet the most rigorous requirements. Physical properties are equally advantageous.

CAN BE TAPPED, DRILLED, THREADED GROUND, OR MOLDED WITH INSERTS

MYCALEX

GENERAL CATALOG

Your copy of the new up-to-the-minute MYCALEX CATALOG and ENGINEERS HANDBOOK will be sent promptly on request. Tells the entire MYCALEX insulation story — contains 70 pages of factual information including design, engineering, and practical manufacturing data.



TUBE SOCKET DATA SHEETS

Available on request, these data sheets cover the entire line of MYCALEX tube sockets. MYCALEX tube sockets offer outstanding advantages over practically every other type yet are priced competitively with the cheapest sockets available anywhere. Get the facts today.

ENGINEERING COLLABORATION

MYCALEX engineers are always at your service for assistance in solving design problems with MYCALEX insulation. Their wide experience can be helpful in reducing the cost and increasing dependability and saleability of your product.

MACHINEABLE GRADES:

MYCALEX 400

MYCALEX 400 IS APPROVED FULLY AS GRADE L-4A UNDER NATIONAL MILITARY ESTABLISHMENT SPECIFICATION JAN-1-10 "INSULATING MATERIALS, CERAMIC, RADIO, CLASS L."

CHARACTERISTICS

Power Factor, 1 megacycle	0.0018
Dielectric Constant, 1 megacycle	7.4
Loss Factor, 1 megacycle	0.013
Dielectric Strength, volts/mil	500
Volume Resistivity, ohm/cm	$2x10^{15}$
Arc Resistance, seconds	300
Impact Strength, Izod, ft.-lb./in of notch	1.85
Max. Safe Operating Temp., °C	370
°F	700
Water Absorption, % in 24 hours	nil
Coefficient of Linear Expansion, °C	$10.2x10^{-6}$
Tensile Strength, psi	6000
Compressive Strength, psi	35000

★ ★ ★

MYCALEX K-10

MYCALEX K-10 CONFORMS FULLY TO GRADE HIC5H4 UNDER NATIONAL MILITARY ESTABLISHMENT SPECIFICATION JAN-1-12.

CHARACTERISTICS

Dielectric Constant, 1 megacycle	10.6
Q Factor, 1 megacycle	300
Loss factor, 1 megacycle	0.034
Volume Resistivity, ohm/cm	$3.0x10^{14}$
Dielectric Strength, volts/mil (0.10 in. thickness)	270
Fractional Decrease of Capacitance with Temperature Change	0.0056
Fractional Increase of Capacitance with Temperature Change	0.0076
Max Safe Operating Temperature, °C	400

MYCALEX K embraces an entire series of capacitor dielectrics, each with specific characteristics. These can be supplied on special order in sheets 14" x 18" in area and from 1/8" to 1" in thickness, also available in rods. MYCALEX K can be machined to close tolerance or molded.

Commerce and the Military write THEIR SPECIFICATIONS to...

The Industry's Complete Line of High Quality Communications Equipment

In war or peace, in Commerce or the Military, the men who make the decisions have always known the vital importance of the "nerve network." Now, in these days of modern high-speed telegraph and tele-printer radio communications equipment—especially unattended and multi-channel—these men demand the highest precision, speed and dependability—**without compromise.**

And they **get** it—from **NORTHERN RADIO!**

During and directly following World War II, the engineers at Northern Radio pioneered and concentrated research against the classic enemies of dependable communications—transients, parasitics, spurious and undesired side-bands, susceptibility to atmospherics, adjacent channel interference, static, fading, etc.

The result of this exhaustive, specialized research was to demonstrate the superiority of the **Frequency Shift System** of transmission and reception. And today, many of the items in the complete Northern Radio line are based upon Frequency Shift.

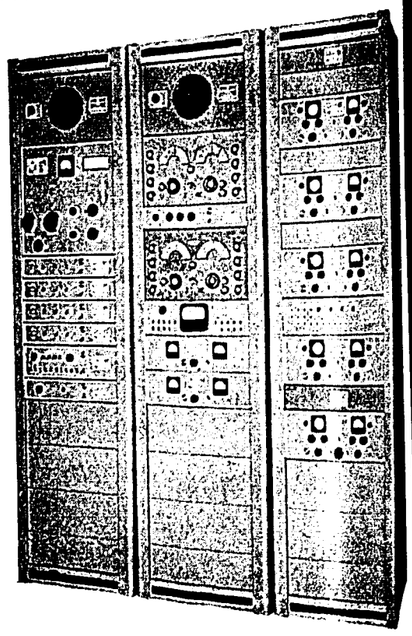
Further, Northern Radio's consistent research continues to push Frequency Shift to newer, ever-greater heights of achievement.

—So that, when Commerce or the Military write their equipment specifications, they draw them directly from many of the features of Northern Radio units.

Around the globe today, from the Poles to the Equator, there is hardly an important station where Northern Radio equipment is not on day-after-day duty—serving the needs of Commerce and the Military with communications of the fastest speed and highest fidelity.

RADIO MULTIPLEX SYSTEM

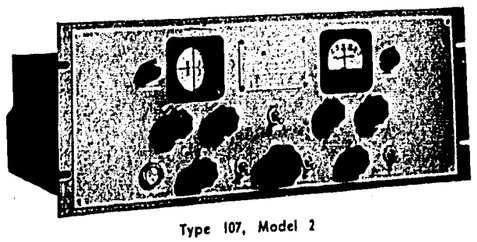
Multi-Channel Equipment for Standard Communications Frequencies. Adapts existing transmitting and receiving facilities for radio multiplex.



The system illustrated is a four-channel unit, used for transmitting and receiving radio tele-printer, telegraph or other similar low speed keying intelligence, where a limited assigned carrier band-width may be utilized. The two bays at the right are the complete receiving units; left, the transmitter terminal and exciter facilities. The system may be adjusted for band widths of 3 to 12 kc and is intended to take advantage of periods of time where propagation conditions give signals which are better than the minimum required for one channel of normal frequency shift operation. Simple operation of key switches will insert as many channels as the conditions permit. These switches automatically maintain the pre-set bandwidth regardless of the number of channels in use. The system also provides front panel switching to standard 850 cycle frequency shift operation. However, experience indicates that when propagation conditions permit frequency shift operation, they will usually allow at least two channels of multiplex.

★ ★ ★ ★

FREQUENCY SHIFT CONVERTER



Type 107, Model 2

A dual channel unit, used with frequency shift receiving systems to convert the mark and space tones from the output of single or diversity receivers, into DC pulses capable of operating a tele-printer, tape recorder or other device so operated. Also used as a demodulator when receiving make and break CW or ICW signals.

2" oscilloscope tuning pattern indicates proper receiver adjustment of both mark and space frequencies, either during initial setup or under actual keying conditions. This pattern and a specially designed discriminator, coupled with a high degree of limiting, make it the outstanding performer in its field.

INPUT FS LIMITS 100 to 1000 cps. frequency shift. Mark frequency set at 2975 cps.

CW-ICW INPUT 400 to 7500 cps.

KEYING SPEED Up to 600 w.p.m.

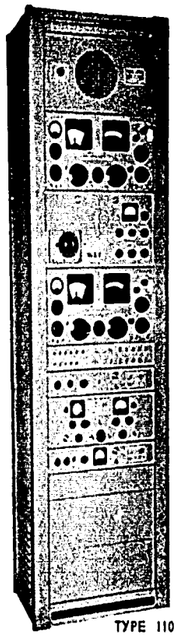
OUTPUT: 1. Neutral DC pulses, 0 ma in 1800 ohm external load. One side grounded.

2. Polar DC pulses ± 9 ma in 1800 ohms load. Center grounded.

3. May be operated into any impedance from 100 to 100,000 ohms.

NORTHERN RADIO COMMUNICATIONS EQUIPMENT

RADIO MULTIPLEX SYSTEMS ★ MULTI-CHANNEL TONE SYSTEMS ★ DIVERSITY RECEIVERS ★ STANDARD FREQUENCY SHIFT KEYERS ★ LOW FREQUENCY SHIFT KEYERS ★ FREQUENCY SHIFT CONVERTERS ★ TONE FILTERS ★ TONE KEYERS ★ DEMODULATORS ★ LINE AMPLIFIERS ★ MASTER OSCILLATORS ★ MONITORS



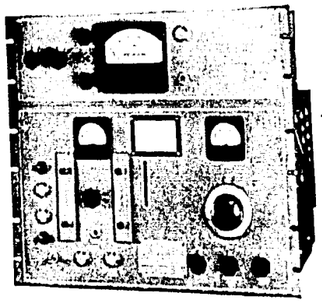
TYPE 110

DUAL DIVERSITY RECEIVER

Used for dual spaced diversity reception in high speed radio tele-printer, telegraph or telephone service, using any common modulation, such as FS, CW, ICW, phone, etc. Complete receiver is housed in a rack type, fully enclosed cabinet. Provided with specially modified receivers, monitor speaker, IF monitor, master oscillator, and the necessary patching arrangements. Can be supplied with any combination of terminal equipment for reception of radio tele-printer, undulator tape and program service, or for remote use where the intelligence is transmitted via landline or UHF link.

Receiver is shown with terminal equipment as recommended for general communications usage. The units are (top to bottom) Monitor speaker, Receiver #1, Variable Master Oscillator, Receiver #2, Patching Panel, IF Monitor, Converter, Tone Keyer, Blank panels. For special features of this receiver see individual units described on this and the preceding page.

FREQUENCY and SHIFT MONITOR SYSTEM



METER: TYPE 127 MODEL 2
MONITOR: TYPE 106 MODEL 4

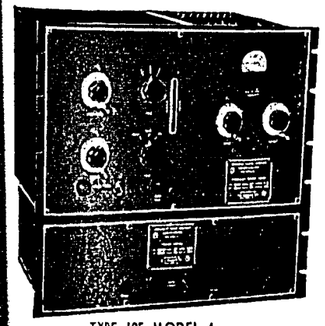
This system consists of a Type 106 Frequency and Shift Monitor and a Type 127 Frequency Meter. It is designed as a secondary standard to monitor the frequency and amount of shift of transmitter carrier outputs. It is particularly intended to measure the frequency shift of a mark and space (FS) signal either when setting up for traffic or under normal keying conditions.

The Monitor's stability is better than 2 cycles per megacycle **over an ambient temperature range of 0-50° C**—using crystals having a temperature coefficient of only 3 parts/million/**degree C.** Range is 2.5-30 mc with 10 crystal-controlled frequencies (separate panel trimmers for each); use of external oscillator also provided for. Frequency Shift range is 10-10,000 cps. Less than 100 millivolts RF input needed for 2 volts audio output.

The Frequency Meter is specially designed with selectable normal and fast-acting damping factors, permitting frequency measurements of signals **while keying.** Its accuracy is 2% of full scale for the ranges 0-200, 500, 2000, 5000, 20,000 cps.

FREQUENCY SHIFT KEYER

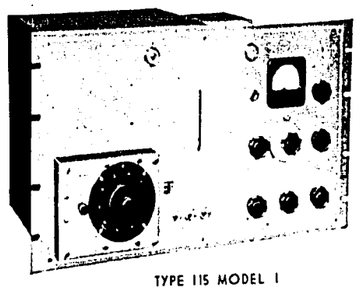
incorporates the following outstanding features:



TYPE 105 MODEL 4

Frequency shift dial adjusts "mark" and "space" frequencies equally above and below the carrier position, which remains fixed. • Simplified frequency setting permits only the upper side band tuning indication to be visible on the meter over substantially all of tuning range. • Direct reading frequency calibration of shift from 0 to 1000 cycles. • Direct reading frequency calibration of mixer and output tuning dials from 2.5 to 6.7 mc. • Direct reading of calibration of output frequency vernier ± 600 cycles. • Pulse shaping circuit to permit operation within assigned bandwidth with no adjacent channel radiation. • Highly stable temperature controlled oven with temperature control of ±0.1° C. at 60° with heaters on 4 sides of inner oven. • Component ratings according to JAN Specs provide greater assurance of trouble-free operation.

VARIABLE MASTER OSCILLATOR



TYPE 115 MODEL 1

Principally used in diversity reception to supply local common oscillator injection voltage to receivers. Crystal oscillator for BFO. The Variable High Frequency section gives stability equivalent to that of non-temperature controlled crystal oscillators. It is also equipped with three crystal controlled frequencies for operation of receivers on a fixed frequency basis. The variable high frequency oscillator is provided with local crystal oscillator for spot checking of twenty points within its range.

TECHNICAL DATA

Variable HFO output frequency	2-32 mcs continuous
Fixed Frequency crystals	2-4 mcs for output frequencies of 2-32 mcs
Output impedance	72 ohm coaxial cable
Output level	2 watts 2-4 mcs, 0.5 watts 4-32 mcs
Variable HFO Stability	20 cps per mc for ambient change +25° C. 5 cps per mc for ± 10% Line Voltage 20 cps per mc for resetability 20 cps per mc for readability

This unit can also be used as a transmitter exciter or for laboratory measuring purposes.

TONE CHANNELING SYSTEMS

Complete package systems of Multi-Channel Tone Equipment (both AM and Frequency Shift) are available for application to land line or radio link systems.

Augmented by many new components, the PRD line of RF Test Equipment is presently the most complete line available covering the entire frequency range from .01 to 40 kilomegacycles per second. The units listed indicate the wide diversity and applicability of PRD equipment. In addition to the standard line, PRD specializes in the design and manufacture of special equipment to meet special requirements. A skilled staff of engineers is available to analyze your requirements and to assist in the application of standard or special components to your test problem. PRD equipment is engineered and manufactured to the highest attainable standards. No effort has been spared to make this equipment the finest available anywhere with the result that PRD equipment is now used in leading laboratories all over the world.

FREQUENCY MEASURING DEVICES

Frequency Meters	Frequency Range (kmc/sec)	Type No.	Transmission Line Size (Nominal O.D.—inches)	R—Reaction T—Transmission
General Purpose	0.47–0.95	584	⅜	T

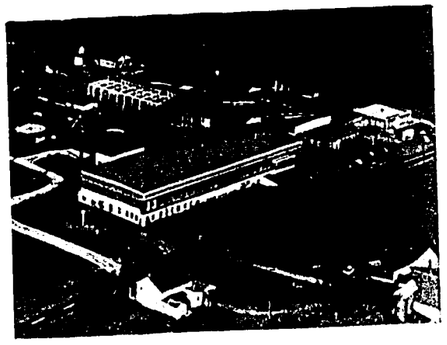
Electronic Tubing—Tailored to Your Needs

"Quality" is the keyword to success in electronics applications. It is also a synonym for Superior in fine small tubing for the Electronics Industry. The newest addition to the Superior plant, at the left in the picture, (more than 50,000 square feet) houses the Electronics Division's production facilities. It is devoted to research, engineering and production of tubing and finished parts to do a better job in tough electronics applications.

For many years the Electronics Industry has come to Superior for tubing and tubular parts tailored to specific needs. We have been able to assist materially in the development of many of these parts. We are now ready, willing and able to work closely with manufacturers toward the solution of any problems which may be solved through such development and refinement. Elsewhere on these pages are some details about a few of the many kinds and types of parts we now make. If you desire more information about them, or wish to consult us about a problem, please write—no obligation, of course.



NICKEL CATHODES

Seamless

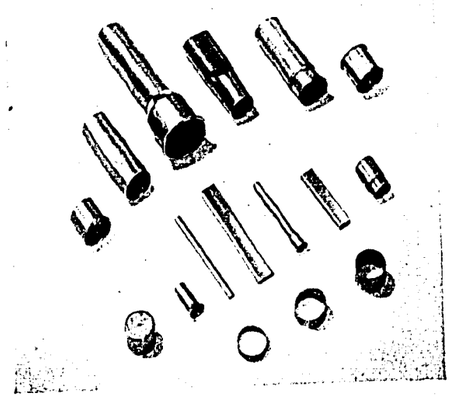
Standard production calls for an O.D. range of .010" to .121" inclusive with wall thickness from .0015" to .005" inclusive (most generally used, .002" ± .00025"). Cathodes with larger diameters and heavier walls can also be produced. The International Nickel Company's #220 grade of Seamless Nickel is the most widely used material. Seamless cathodes may be cut to practically any length required. Bead (emboss) may be located anywhere on the Cathode, .040" minimum. Seamless Nickel Cathodes are available in round, oval, elliptical or rectangular shapes.

For information about #220 grade of Seamless Nickel ask for Data Memo #5-2. For detailed data on standard cathode tolerances ask for Specification EM-2.

Lockseam*

This type of cathode is produced from nickel strip especially rolled for the purpose. Present standard range of sizes is .040" to .100" O.D. inclusive with wall thicknesses of .0021" ± .0001" and .0025" ± .0001". Lengths are from 11.5MM to 42MM inclusive. Various analyses of nickel strip are used, depending upon characteristics required. Bead or emboss may be located anywhere on the cathodes, .040" minimum. A vertical bead or emboss can also be furnished on certain sizes. Lockseam Cathodes are available in round, oval or rectangular shapes. Most recent Lockseam Cathode development at Superior is integral tabbed sleeves. For information about various analyses of nickel strip write for Data Memo #5-2.

*Manufactured under U. S. Patents.



FABRICATED PARTS

Research, engineering experience, production know-how and highly specialized equipment are the factors that have made Superior fabricated parts the standard for the Electronics Industry. At the left are shown a handful of the hundreds of parts we can make.

All of this experience, know-how, and equipment is at your service in the development of a part or parts to suit your particular needs.

We have specialty, automatic and semi-automatic, equipment for cutting, stamping and drilling operations, as well as excellent tumbling equipment. Together with our rigid quality control system, this machinery permits the high-speed production of anodes, grid cylinders and other parts for television and cathode ray gun structures. Parts may be rolled at either end, to meet any requirement. We will be glad to send detailed information promptly upon request.

Superior TUBE COMPANY
Electronics Division

DISC CATHODE ASSEMBLY

The Superior Disc Cathode which has proved so satisfactory during the past several years has recently been improved by the addition of the following new feature:

1—The end of the nickel shank opposite the emission cap has been given a slight flare. This insures easier insertion of the coated heater wire and cuts down considerably on heater shrinkage.

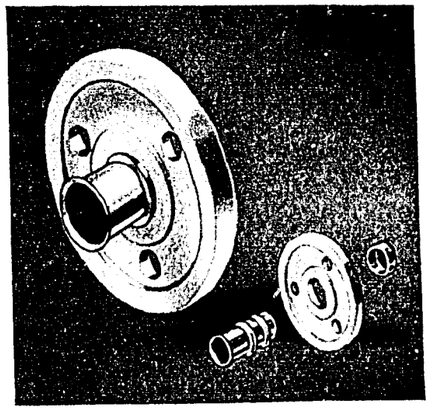
To this new feature add the following "old" details which made the Superior assembly outstanding and the result is a product that is truly superior in every respect.

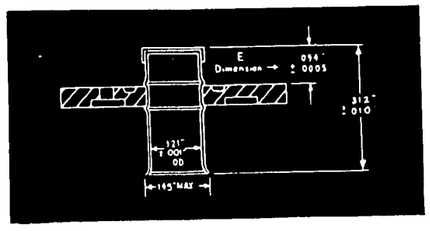
1—Double beaded construction for attaching the ceramic insulator to the nickel shank. This insures the minimum loss of heat and forms a *tight* construction that will not come loose in use.

2—The "E" dimension (distance between top of ceramic and top of emission cap) is held to the rigid tolerance of ± .0005". This cuts down on the number of spacer combinations that have to be used, and gives better cut-off characteristics.

3—The emission cap has no flange—does not touch the ceramic insulator at all—thus eliminating any additional danger of heat loss.

For information about the Disc Cathode Assembly, ask for Superior print ED-3.



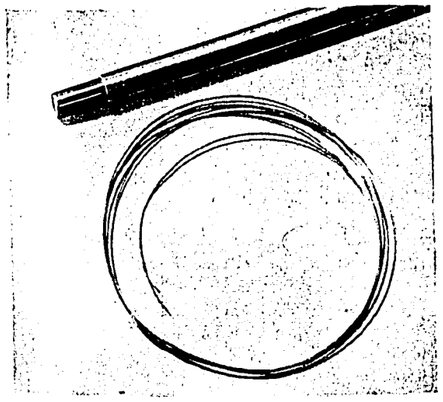


KULGRID†

a product of *Sylvania Electric Products, Inc.*

Pictured at the top of the illustration below is a section of ⅜" O.D. x .0273"/.02955" wall "A" Nickel(1) tubing drawn by Superior over OFHC (oxygen free high conductivity) copper rod. This is the raw material from which Sylvania Electric draws their KULGRID nickel clad wire shown at the bottom of the picture.

KULGRID is a conductor suitable for application in close proximity to high operating temperatures. It provides good electrical conductivity plus the protection afforded by heat and corrosion resistant nickel. Stranded conductors of this wire may be used as electrical leads for aircraft, electric furnaces, appliances, jet engines and a wide variety of laboratory and industrial equipment.



Export Representatives: Driver-Harris Company, Harrison, New Jersey, and affiliated European companies. Phone, Harrison 6-4800.

Superior, by cold drawing, can produce composite tubing or rod of many different materials. We cold draw tubing over plastics, insulated wire, mesh and many other materials which may or may not possess ductility. We are small diameter tubing specialists who have licked many materials problems in cooperation with our customers' engineers.

Just as we were able to assist Sylvania Electric in the production of the material for their KULGRID we may be able to help you. We will welcome the opportunity to do so.

NICKEL CATHODES

Seamless

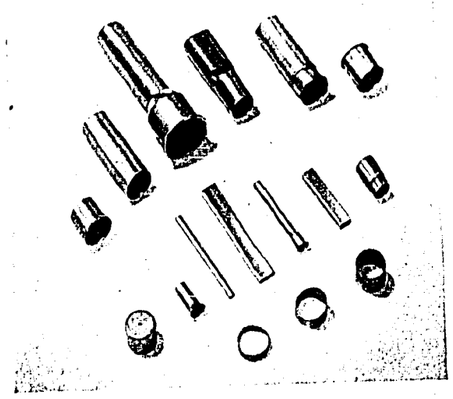
Standard production calls for an O.D. range of .010" to .121" inclusive with wall thickness from .0015" to .005" inclusive (most generally used, .002" ± .00025"). Cathodes with larger diameters and heavier walls can also be produced. The International Nickel Company's #220 grade of Seamless Nickel is the most widely used material. Seamless cathodes may be cut to practically any length required. Bead (emboss) may be located anywhere on the Cathode, .040" minimum. Seamless Nickel Cathodes are available in round, oval, elliptical or rectangular shapes.

For information about #220 grade of Seamless Nickel ask for Data Memo #5-2. For detailed data on standard cathode tolerances ask for Specification EM-2.

Lockseam*

This type of cathode is produced from nickel strip especially rolled for the purpose. Present standard range of sizes is .040" to .100" O.D. inclusive with wall thicknesses of .0021" ± .0001" and .0025" ± .0001". Lengths are from 11.5MM to 42MM inclusive. Various analyses of nickel strip are used, depending upon characteristics required. Bead or emboss may be located anywhere on the cathodes, .040" minimum. A vertical bead or emboss can also be furnished on certain sizes. Lockseam Cathodes are available in round, oval or rectangular shapes. Most recent Lockseam Cathode development at Superior is integral tabbed sleeves. For information about various analyses of nickel strip write for Data Memo #5-2.

*Manufactured under U. S. Patents.



FABRICATED PARTS

Research, engineering experience, production know-how and highly specialized equipment are the factors that have made Superior fabricated parts the standard for the Electronics Industry. At the left are shown a handful of the hundreds of parts we can make.

All of this experience, know-how, and equipment is at your service in the development of a part or parts to suit your particular needs.

We have specialty, automatic and semi-automatic, equipment for cutting, stamping and drilling operations, as well as excellent tumbling equipment. Together with our rigid quality control system, this machinery permits the high-speed production of anodes, grid cylinders and other parts for television and cathode ray gun structures. Parts may be rolled at either end, to meet any requirement. We will be glad to send detailed information promptly upon request.

Superior TUBE COMPANY

DISC CATHODE ASSEMBLY

The Superior Disc Cathode which has proved so satisfactory during the past several years has recently been improved by the addition of the following new feature:

1—The end of the nickel shank opposite the emission cap has been given a slight flare. This insures easier insertion of the coated heater wire and cuts down considerably on heater shrinkage.

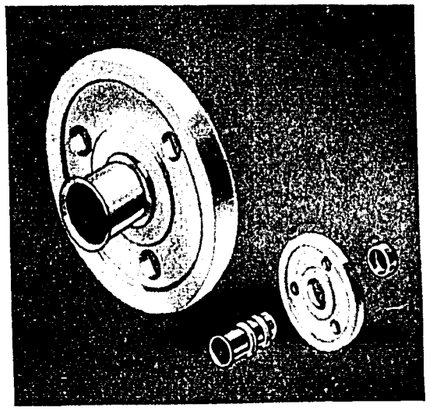
To this new feature add the following "old" details which made the Superior assembly outstanding and the result is a product that is truly superior in every respect.

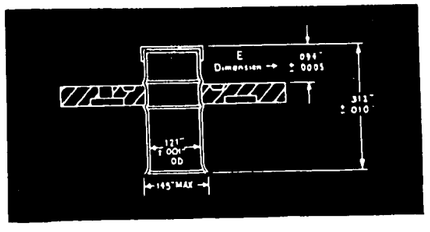
1—Double beaded construction for attaching the ceramic insulator to the nickel shank. This insures the minimum loss of heat and forms a *tight* construction that will not come loose in use.

2—The "E" dimension (distance between top of ceramic and top of emission cap) is held to the rigid tolerance of ± .0005". This cuts down on the number of spacer combinations that have to be used, and gives better cut-off characteristics.

3—The emission cap has no flange—does not touch the ceramic insulator at all—thus eliminating any additional danger of heat loss.

For information about the Disc Cathode Assembly, ask for Superior print ED-3.



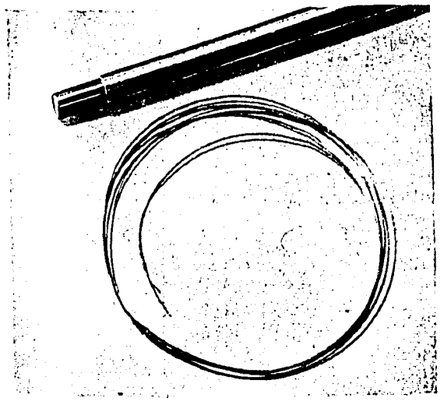


KULGRID†

a product of *Sylvania Electric Products, Inc.*

Pictured at the top of the illustration below is a section of ⅜" O.D. x .0273"/.02955" wall "A" Nickel(1) tubing drawn by Superior over OFHC (oxygen free high conductivity) copper rod. This is the raw material from which Sylvania Electric draws their KULGRID nickel clad wire shown at the bottom of the picture.

KULGRID is a conductor suitable for application in close proximity to high operating temperatures. It provides good electrical conductivity plus the protection afforded by heat and corrosion resistant nickel. Stranded conductors of this wire may be used as electrical leads for aircraft, electric furnaces, appliances, jet engines and a wide variety of laboratory and industrial equipment.



Export Representatives: Driver-Harris Company, Harrison, New Jersey, and affiliated European companies. Phone, Harrison 6-4800.

Superior, by cold drawing, can produce composite tubing or rod of many different materials. We cold draw tubing over plastics, insulated wire, mesh and many other materials which may or may not possess ductility. We are small diameter tubing specialists who have licked many materials problems in cooperation with our customers' engineers.

Just as we were able to assist Sylvania Electric in the production of the material for their KULGRID we may be able to help you. We will welcome the opportunity to do so.

STACKPOLE
ELECTRICAL AND ELECTRONIC COMPONENTS

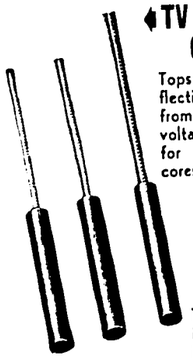
Ceramag® FERRITE CORES

"U" and "E" TYPES FOR FLYBACK TRANSFORMERS and DEFLECTION YOKES

These units assure permeability on the order of 10 to 1 by comparison with conventional iron cores. They are much smaller, have high resistance and operate cooler.

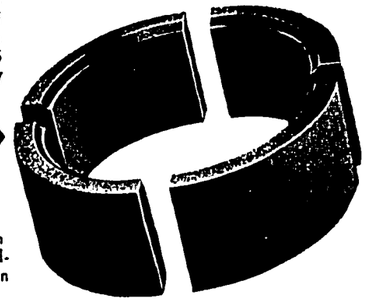
◀TV IMAGE W-I-D-T-H CONTROL TYPES

Tops for TV horizontal image deflection circuits. Give ratios of from 1 to 8 or more in low line voltage areas compared with 1-5 for ordinary high permeability cores.



SEGMENTED ▶ DEFLECTION YOKE CORES

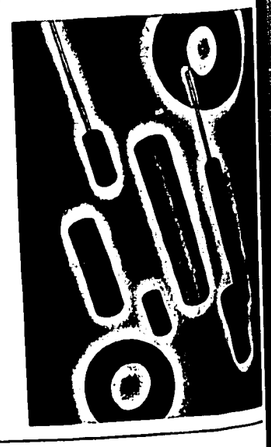
This popular 4-segment design is highly efficient and can readily be handled in set production with little breakage.



Advantages of Stackpole Ceramag (ferrite) cores include much higher permeability, lower losses with higher efficiency and lower operating temperatures, less corona effect, lower cost, lighter weight and smaller sizes. All types can be supplied in two standard grades:

CERAMAG 5N —A medium Q material temperature stabilized for minimum permeability change at temperatures up to 100° C. Primarily designed for low flux density uses.

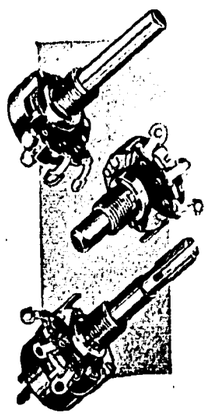
CERAMAG 7 —Ideal for high flux densities as in television flyback transformer applications. Temperature stabilized.



STANDARD AND SPECIAL IRON CORES

The rapid increase in the use of molded iron cores throughout electronic engineering has resulted in large part from Stackpole engineering that has made new and improved types available in a wide assortment of shapes, sizes and ranges. Special Stackpole manufacturing techniques assure cores of outstanding dependability for exacting specifications. Write for details on any type.

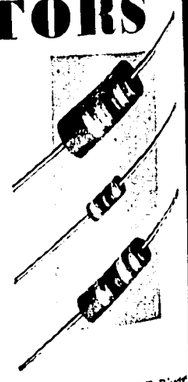
STANDARD AND HIGH-FREQUENCY TYPES — SIDE-MOLDED CORES
HIGH-RESISTIVITY CORES — IRON CORES FOR CHOKE COILS
IRON SLEEVE CORES — THREADED CORES — CUP CORES
INSULATED CORES — MOLDED COIL FORMS — CERAMAG® CORES



FIXED AND VARIABLE RESISTORS

Stackpole Variable Resistors offer a fully proved selection of types and sizes for volume control, tone control, potentiometer and similar applications in values from 500 ohms to 5 megohms and in ratings to .6 watt. Recent developments include exceptionally small units conservatively rated at .5 watt and concentric shaft controls for TV.

Fully insulated and moisture-protected by phenolic sleeves, Stackpole molded carbon composition fixed resistors are available in ½-, 1- and 2-watt sizes in all standard and many special values for electrical, radio, TV and other uses. Special Stackpole resistors include capacitor discharge, surge, lightning arrester, ignition suppressor and other types.



MILITARY TYPES— Need fixed or variable resistors for JAN or MIL specification uses? Send details of your requirements for recommendation by Stackpole engineers.

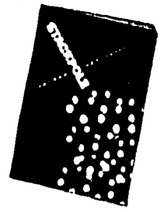
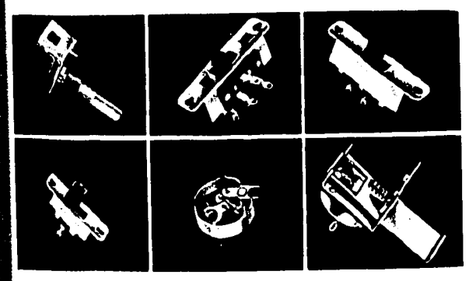
CARBON-GRAPHITE SPECIALTIES

The unique electrical, mechanical, physical and chemical properties of Stackpole carbon, graphite and molded carbon-graphite products solve countless problems of friction, temperature, arcing, corrosion, shaft sealing, voltage regulation and others. So broad is the line of Stackpole products in this field, so extensive the facilities for "specials" that it is practical to list only a few of them here. Stackpole engineers welcome the opportunity to assist in adapting any of these products to your specific design, engineering or production needs.



GET THIS DATA BOOK! Stackpole Booklet 40 contains a wealth of helpful data on carbon, graphite and carbon-graphite engineering uses. Write on company stationery.



INEXPENSIVE LINE AND SLIDE SWITCHES

including new 3 amp. types

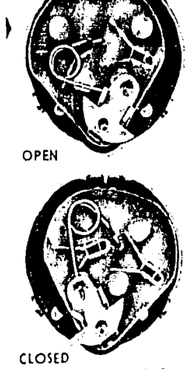
Dress up your product—add to its convenience and "salability" with these sturdy, low-cost switches! 18 fractional amperage and new 3 amp. types are available. Modifications can be produced economically for quantity users. Write for Bulletin RC7C. State details of your application for samples.

SEND FOR COMPLETE DATA

Catalog RC-8 listing the complete line-up of Stackpole Electronic Component Specialties will gladly be sent on letterhead request. Write for your copy today.

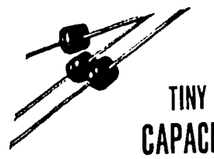
LINE SWITCHES for Stackpole Controls

Only .888" in diameter by .312" thick, the Stackpole A-10 DP ST line switch fits even the smallest Stackpole variable resistor controls. Rated 1 amp. 250 volts AC-DC or 3 amps. 125 volts it combines outstanding ruggedness with ample-sized contacts and positive contact wiping action. Ideal for long, trouble-free service for portable and auto radios and numerous other uses. A similar single-pole design, Type A-11, with or without dummy terminal, will soon be available.



OPEN

CLOSED



TINY GA CAPACITORS

Stackpole GA Capacitors cost no more than "gimmicks" and assure far greater stability, higher Q, better insulation resistance and higher breakdown voltage. Moreover, they are mechanically superior and eliminate the inductive characteristic of twisted wires. Capacities of 0.5; 0.68; 1.0; 1.5; 2.2; 3.3 and 4.7 mmfd. are available. ±20% tolerance.

BAKELITE COIL FORMS

Stackpole molded coil forms are the modern answer to the need for inexpensive mechanical supports for windings. Cost is low, space factor is reduced, assembly is easier and point-to-point wiring is feasible with far fewer soldered connections. Write for details and samples to your specifications.

PRODUCTS

1952 EDITION

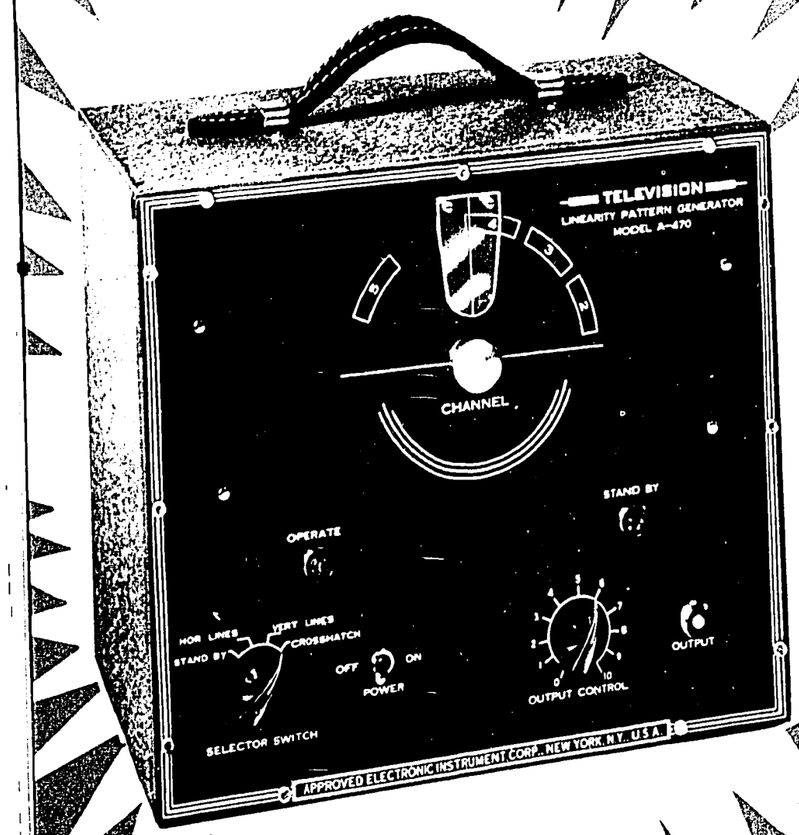
ROVED ELECTRONIC INSTRUMENT CORP. 142 LIBERTY STREET . NEW YORK 6, N. Y.

Approved TELEVISION LINEARITY PATTERN GENERATOR

Model A-470 is a testing device th
provides a complete video signal t
the adjustment of TV receivers wh
no station pattern is available.

CRYSTAL CONTROLLED

ANYWHERE
ANYTIME



FEATURES

- Without test pattern from station, adjust deflection, horizontal and vertical controls, sweep width, linearity, ion trap adjustment, etc.
- Provides 3 different types of signals.
- Crystal control for line frequency oscillator.
- Vertical, horizontal and cross-hatch pattern available.
- Shielded attenuator control.
- 100-6,000 MV output voltage.
- Approx. 50 ohm output impedance.
- Matches 72 or 300 ohm inputs.

Model A-470 is the latest test instrument available to the television service engineer to assist in the proper adjustment and installation of TV receivers, when no station pattern is on the air. Many tests may be performed with Model A-470 that would be otherwise impossible unless a station pattern is available.

Fig. 1, Fig. 2 and Fig. 3 show the various signals provided by this instrument. The above illustrations are based on a conventional TV receiver with a 4:3 aspect ratio. With the aid of Model A-470 all routine adjustments can be made, such as:

- Adjustment of vertical and horizontal linearity.
- Setting of hold control.
- Checking for hum in deflection circuits.
- Relative sensitivity measurements.
- Trouble shooting without station pattern available.

TECHNICAL SPECIFICATIONS

- Power supply — 105-125 volt, 60 cycles.
- Power consumption approximately 25 watts.
- Voltage regulated power supply.
- Variable output frequencies.
- Channels 2-5 available.
- Large, easy to tune dial.
- Output voltage — 100-6000 m/v.
- Shielded output attenuator.
- Coaxial output cable.
- Selection of 8 or 9 horizontal lines or 12 vertical lines or as a cross-hatch pattern.
- Excellent stability.
- Simple to operate.
- Rugged steel case, battleship gray finish.

TUBE COMPLEMENT

1	12AU7 (½)	line freq. osc.
	12AU7 (½)	horizontal osc.

  F_3—27-75 Megacycles
- External Modulation possible at from 40 to 30,000 Cycles.
- Internal Modulation at 440 Cycles (same as WWV Standard).
- Phase Shift Audio Oscillator and Internal Modulator.
- A.C. Operation. 105 to 120 Volt. 50 to 60 Cycles.
- Extremely Low Leakage on All Bands (Power Transformer Electrostatically Shielded).
- Completely Isolated from Power Line.
- Special Wide Spacing, Low Drift "Invarmetal" Hammarlund Variable Condenser Used as Frequency Selector, Ceramic Insulation Throughout.
- 3 Step RF Attenuator.
- Continuously Variable RF-AF Fine Attenuator Control.
- Heavy Gauge Non-Warping Lucite, Fabricated Dial Pointer.
- Tubes used are as follows.
  1—6SN7—RF Oscillator
  1—6SH7—AF Oscillator and Modulator
  1—6SH7—Cathode Follower Output Stage
  1—7Y4—Rectifier
- Negligible Harmonic Output (2nd Harmonic 28 DB Down as measured against higher priced units).
- Specially Designed Ultra Stable Two Terminal RF Oscillator.
- Pilot Light Line Indicator.
- Cathode Follower Output Tube (attenuator settings have no effect whatever on frequency).
- Modulation Percentage continuously variable from front panel, internal or external, 0 to 100%.
- Co-Axial Output Lead Furnished.

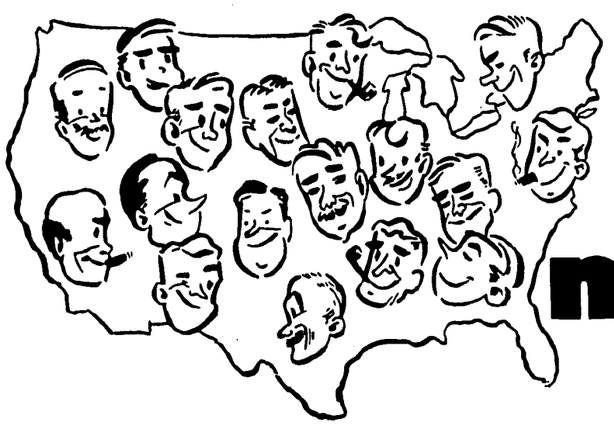
ARROW is sure to have it! New ideas and equipment are being developed daily . . . advancements that insure better results and simplify production. These new products, whether it be a new micro-miniature capacitor or a complete test equipment laboratory, are available at ARROW without waiting . . . because ARROW has always made certain to check every recent development to insure being among the first to have it.

more



and

more engineers co

Naturally...ARROW has all of them... and in substantial quantities. Our extensive and complete stocks are available at a moments notice insuring prompt delivery. You may know from your own experience the annoyance and time lost looking for either a lone component or equipment you needed in large quantities...save yourself this irritation in the future and check with ARROW first...they're sure to have it.

Any source of supply is judged by the size and diversity of its stocks . . . and ARROW has one of the largest in the country. Our 3 New York warehouses are jam packed with every conceivable type of electronic equipment, both JAN and commercial. From such supplies you can be certain that we will have anything you would want. Call, write or teletype us for your immediate requirements or future specs.

Service is another prime consideration in choosing your supply house. We pride ourselves on the speed and accuracy with which we process an order . . . a complete staff of sales technicians, warehousemen, expediters and shippers go into action immediately upon receipt of your order. With such service we couldn't help but make hordes of friends. Learn the miracle of ARROW service, where each order is treated as if it were the most important order in the house.

Of course no service can be properly executed unless handled by thoroughly experienced men and women. Each department at ARROW, whether it be Industrial, Sound, Television, Shipping or Clerical, is headed by a man, with long experience and thorough knowledge, who works with a hand-picked staff trained in the fine details of their job . . . and all give courteous and sincere attention to even the smallest request.

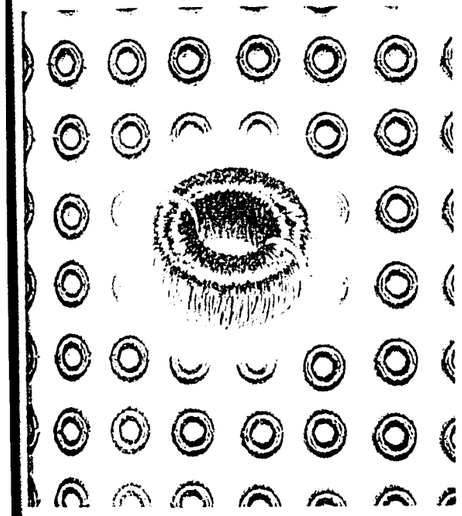
B&W

TOROIDS



B&W is equipped to design and manufacture toroidal coils in frequency ranges from 1000 cycles to 2[illegible] KC, with inductance and Q value to your specific application requirements. Sizes for these toroids range from ¾" to 3" diameter.

These coils have a specific application in low and medium frequency ranges and provide a high degree of stability vs. voltage and temperature. When required, they may be designed to compensate for conditions of extreme temperature variations.

Barker & Williamson's long background in coil design, engineering and manufacture, assures a quality product, manufactured to rigid specifications. Available in either open, cased, potted or hermetically sealed types, wound on cores having any desired properties, including the latest high permeability cores.

*Trade Mark

Barker & Williamson is constantly developing new and improved components for the design, engineering and manufacture of electronic components and [illegible] equipment.

Filters, Discriminators, Toroidal [illegible] many other components are utilized over the [illegible] Television and Short Wave [illegible] are designed and manufactured by [illegible] with the name [illegible] a trademark of excellence in the electronic industry.

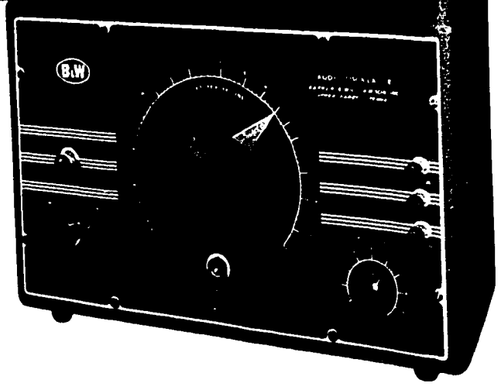
B&W TEST INSTRUMENTS

B&W AUDIO OSCILLATOR

MODEL 200

Net Price: $138.00. Dimensions: 13¾" x 7¼" x 9½"

Ideal for use in distortion measurements, frequency measurements or in any application where a stable, accurately calibrated source of frequencies between 30 and 30,000 cycles is required. No zero reset or line calibration is required. Self-contained power supply. Housed in an attractive black crackle finished steel cabinet with carrying handle and rubber feet. Panel is of 1/16" reverse etched aluminum.



FEATURES

Voltage Output: 10 volts into a 500 ohm load.

Wave Form: RMS harmonics at 3 volts on 500 ohm load less than 1% on all frequencies between 50 and 15,000 cycles.

Frequency Response: Better than ±1 D.B. from 30 to 15,000 cycles with 500 ohm load.

Stability: Better than 1%.

Calibration: ±3% of scale reading.

B&W LINEAR DETECTOR

MODEL 404

Dimensions: 8¾" x 7½" x 5"

Net Price $85.00

Provides combined RF detection and audio bridging circuits for use with any distortion meter, to measure distortion or noise in AM carriers or in balanced and unbalanced audio circuits. Includes a bridging transformer, a vacuum tube rectifier, a 40 D.B. pad adjustable in 10 D.B. steps, and a function selector switch.

FEATURES

RF Operating Range: 400 kc. to 30 mc.

Input: Single-ended; impedance 10,000 ohms.

Bridging Impedance: 6000 ohms; insertion loss 1 D.B.

Frequency: Essentially flat from 20 to 50,000 C P S.

B&W SINE WAVE CLIPPER

MODEL 250

Dimensions: 2" x 4" x 5½"

Net Price $10.00

Speeds accurate analysis of audio circuits by providing a test signal for examining transient and frequency response at a fraction of the cost of a square wave generator. Designed to be driven by an audio oscillator.

B&W DISTORTION METER

MODEL 400

Net Price: $168.00. Dimensions: 13¾" x 7¼" x 9½"

A sensitive instrument having a wide range of applications in the audio frequency measurements field. Ideal for measuring low level audio voltage and determining noise and harmonic content of same. Variable frequency selective filter provides a single frequency suppression circuit for the frequency range of 30 to 15,000 cycles. Small size, light weight and outstanding performance make this instrument an ideal unit for either laboratory or field work. Panel is of 1/16" reverse etched aluminum.

FEATURES

1. Frequency Range:

(a) Distortion meter, for fundamentals from 30 to 15,000 cycles, measuring harmonics to 45,000 cycles.

(b) As a voltmeter and D.B. meter from 30 to 45,000 cycles.

2. Sensitivity:

(a) Noise and distortion measurements, minimum input .3 volts.

(b) Voltmeter, full scale readings of .3, .1, .03, .01, .00 volts.

3. Calibration:

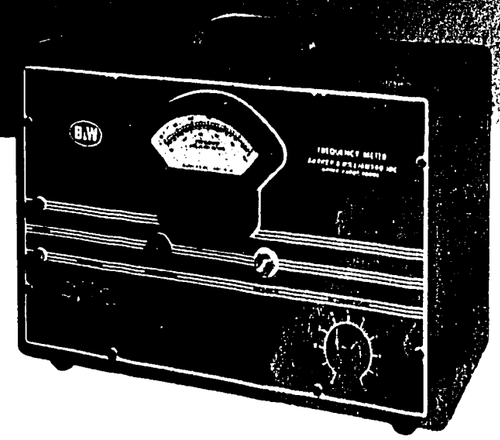
For distortion measurements: ±5 D.B. For voltage measurements ±5% of full scale at 1000 cycles.

B&W FREQUENCY METER

MODEL 300

Net Price: $126.00.

Dimensions: 13¾" x 7¼" x 9½"



An accurate and convenient means of making direct measurements of unknown audio frequencies up to 30,000 cycles. Integral power supply. Extremely useful for routine checking of audio oscillators or tone generators. Housed in an attractive black crackle finished steel cabinet with carrying handle and rubber feet. Panel is of 1/16" reverse etched aluminum.

FEATURES

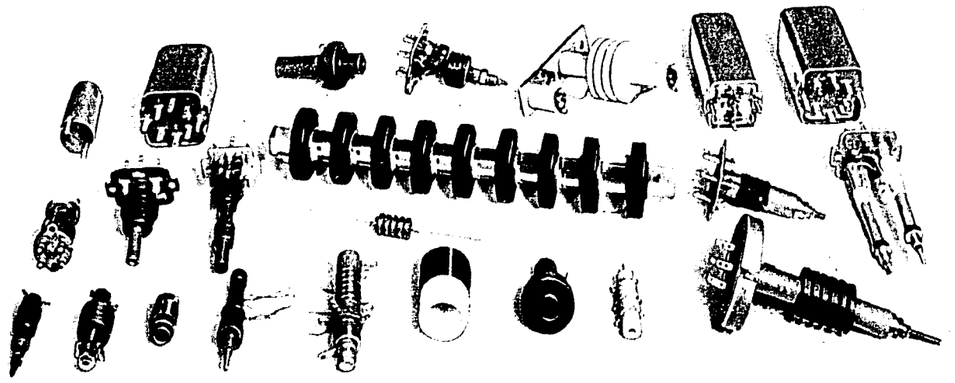
Frequency Range: 0 to 30,000 cycles in 6 ranges.

Sensitivity: Minimum .25 volts input.

Wave Form: Will operate on any wave form with peak ratios of less than 8 to 1.

Calibration: When referenced against 60 cycles line frequency, all other frequencies will fall within 5%.

B&W INDUSTRIAL COILS



- Single layer solenoid coils
- Universal wound coils of single, multiple pie, and progressive construction
- RF, IF, and Oscillator Coils
- Traps, Discriminators, Filters, RF and Delay Line Chokes

These are but a few of the many types of industrial coils which can be designed and built to answer your specific needs.

Whether your problems are in the research, design, development, or production stage . . . in electronics, television, radio broadcasting, or radio communications . . . you'll find the complete facilities of Barker & Williamson ready, willing and able to answer your coil problems. Distinctive production methods make it possible for us to fulfill your specifications no matter how exacting, no matter how long the production run.

PIONEERS IN PRECISION LECTROFORMING

BART LABORATORIES CO., INC.

227 Main Street, Belleville 9, New Jersey

Intricate Parts and Precision Components can be

The art of LECTROFORMING* and its contribution to industry was extensively developed by BART LABORATORIES during World War II.

Intricate parts such as Sonar feed tubes requiring extremely close tolerances and high interior surface finish were developed and mass produced by BART LABORATORIES. Since that time, many applications and new techniques have been found to serve the electronic industry.

Precision equipment designed by engineers to close tolerances are reproduced with extreme exactness by LECTROFORMING. BART LABORATORIES is now producing many parts of intricate design, accurate interior dimensions and with high interior surface finish up to 5 RMS. For specific applications combinations of metals may be used such as silver, gold, copper, nickel and iron — for conductivity, strength and corrosion resistance. LECTROFORMING assures close tolerances otherwise impossible by any other process. Many precision parts can be made faster and more economically than by other methods.

LECTROFORMING can answer most difficult problems.

We invite your inquiries.

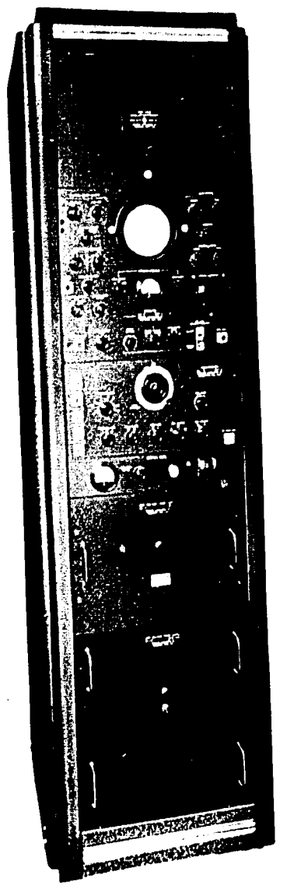
BROWNING INSTRUMENTS *Precisioneered* FOR EFFICIENT PERFORMANCE

OSCILLOSYNCHROSCOPE MODEL OJ-17



This instrument meets the demand for an oscillosynchroscope producing satisfactory traces in high-speed pulse work. The 'scope, synchronizer, high-voltage power supply, low-voltage power supply, and control panel are mounted in a rack cabinet on casters with space at the top for a Fairchild Oscillo-record camera.

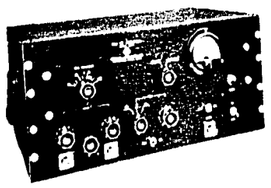
Vertical amplifier band width—16 mc; deflection sensitivity—.05 volts/inch at maximum gain; video delay circuit with delay of 0.2 microsecond. Horizontal amplifier: band width 2 mc; deflection sensitivity .25 volts/inch at maximum gain. Uses 5RP or 5XP with anode voltage variable from 10 to 20 KV. Driven sweep: 0.05 to 500 microseconds per inch; may be triggered from (1) external pulses of 0.1 volt or higher, (2) video amplifier signals, (3) scope trigger generator. Sawtooth recurrent sweep: 5 to 500,000 cycles per second. Trigger generator: pos... and negative output of 100 volts from $00 ... running rate — 20-20,000 cps. Markers: ... internal blanking or deflection type: 0.1, 10... 100 microsecond ranges. Blanking: external ... nection to grid provided. Variable delay ... operates from internal trigger generator or ... ternal sync.; provides positive and negative ... layed output triggers; may be used to ... sweep from external sync. or internal ... generator. Delay continuously variable to ... microseconds. Adjusts by 4-1/2", directly ... ibrated dial. Voltage calibration circuit ... ures input signals by substituting voltages ... form of 1000-cycle square waves. Size: ... x 25-3/8" x 24". Weight: 500 lbs.; ... weight: 750 lbs.

$5000.00

OSCILLOSYNCHROSCOPE MODEL OL-23

The specifications of this new oscillosynchroscope will be announced about Dec. 1, 1951.

MODEL TAA-16A AMPLIFIER



High-gain AC voltmeter for measurement of standing wave ratios with slotted lines.
Range: 500-5000 cps. — broadband or selective controls on front panel; 15 microvolt sensitivity in broadband position and 10 microvolts in selective position. Input tube shock mounted for low microphonics. Meter scales 0-10 and standing-wave voltage ratio. Panel switch for bolometer voltage application. Master gain control switch provides attenuation factors of 1, 10 and 100. 115-volt, 50/60 cycle, regulated power supply. Rack panel in black wrinkle steel cabinet, 9" x 20" x 12". Weight 30-1/2 lbs. Shipping weight 45 lbs.

$415.00

MODEL TVN-7 POWER SUPPLY and SQUARE WAVE MODULA...

The basis of a signal generator in the super-high-frequency range. Square-wave modulator for low-powered velocity-modulated tubes such as the 417A, 2K28 and 2K25.

Regulated cathode voltage continuously va... able 280 to ... volts; provision is made for 180 to 300 volt ra... e. Reflector ... tage 15 to 150 volts, controllable from panel. ... rovision is ... for grid pulse modulation or reflector pulse mod... tion. Grid ... amplitude 60 volts; reflector pulse voltage 1... volts maxim... FREQUENCY METERS

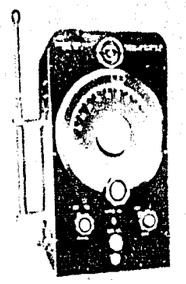
MODEL S-4



Custom-built and hand-calibrated for up to five specified frequencies, from 1.5 to 70 mc. AM or FM. Accuracy: .0025% of specified frequency.
One Band — $170.00
Each Addition Band — $20.00

MODEL S-6

General coverage frequency meter for measurements between 100 kc and 50 mc. Accuracy: .025%. Audio detection of zero beat. $195.00

MODEL S-7

Custom-built, hand-calibrated for one or two frequencies in the 72-76 and/or 152-162 mc bands. Thus one meter may be used to check both central and mobile units. Aural indication of zero beat. Accuracy: .0025% of specified frequency with proper pre-checking.

One Band . . .	$195.00
Two Band . . .	220.00

FM MODULATION MONITOR MD-25A

For monitoring modulation of all fixed or mobile FM transmitters in the 30-162 mc. bands; simple, inexpensive means for compliance with FCC regulations on carrier swing and for reduction of channel interference. Coverage — 30-40, 40-50, 72-76, 152-162 mc. Flasher — indicates peak modulation (peak carrier deviation) in excess of 15 kc. Panel meter indicates modulation swing to 20 kc. Sensitivity approximately 1 millivolt at antenna. $245.00

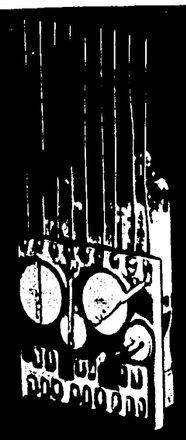
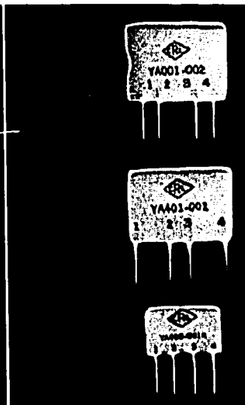
Look to Centralab
DIVISION OF GLOBE-UNION INC., MILWAUKEE, WIS.

Save space, simplify manufacture, step-up production with Centralab's "Printed Electronic Circuits"!

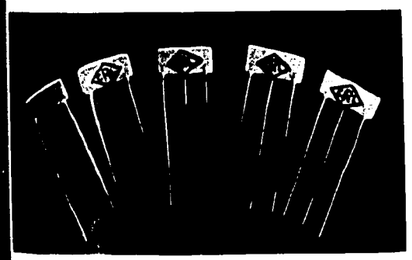


AMPEC
A highly efficient, dependable 3 stage audio amplifier. Can be designed for hearing aids, mike preamps or any amplifier application where small size, high efficiency and reliability is required.

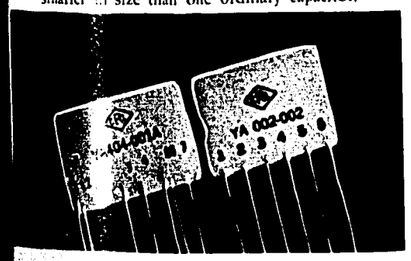


TRIODE COUPLATES
An assembly of 3 capacitors and two resistors bonded to a dielectric ceramic plate. This one unit replaces 5 components normally used in audio circuits, thus saving space and many soldered connections—speeds production!

VERTICAL INTEGRATORS
Vertical integrator for TV application 3 resistors and 3 capacitors bonded to a small 3 lead ceramic plate.



FILPECS — Diode load filters consisting of two capacitors and one resistor — capacitor and resistor plates — lighter in weight, smaller in size than one ordinary capacitor.



AUDET (left)—An audio-detector plate furnishing values of all components which generally comprise the out-put stage of AC-DC radio receivers. 4 capacitors, 3 resistors on a small 7 lead plate.

PENTODE COUPLATE (right) — A complete pentode interstage coupling circuit. Consisting of 3 capacitors, 3 resistors on a 6 lead plate.

For use where miniature size is of utmost importance, more and more manufacturers of electronic equipment are turning to CRL Printed Electronic Circuits because they combine ruggedness, dependability and resistance to humidity in one small unit package.

WORKING with your engineers, Centralab may be able to fit its Printed Electronic Circuit to your specific needs.

Integral Ceramic Construction: Each CRL Printed Electronic Circuit is an integral assembly of "Hi-Kap" capacitors ... sistors, closely bonded to a steatite ceramic plate and ... connected by means of metallic silver paths, "printed" on the base plate. All leads are always the same length, each plate is an exact duplicate of the original or "master."

Write to Centralab for complete information on this important new electronic development, or get in touch with your nearest Centralab representative.

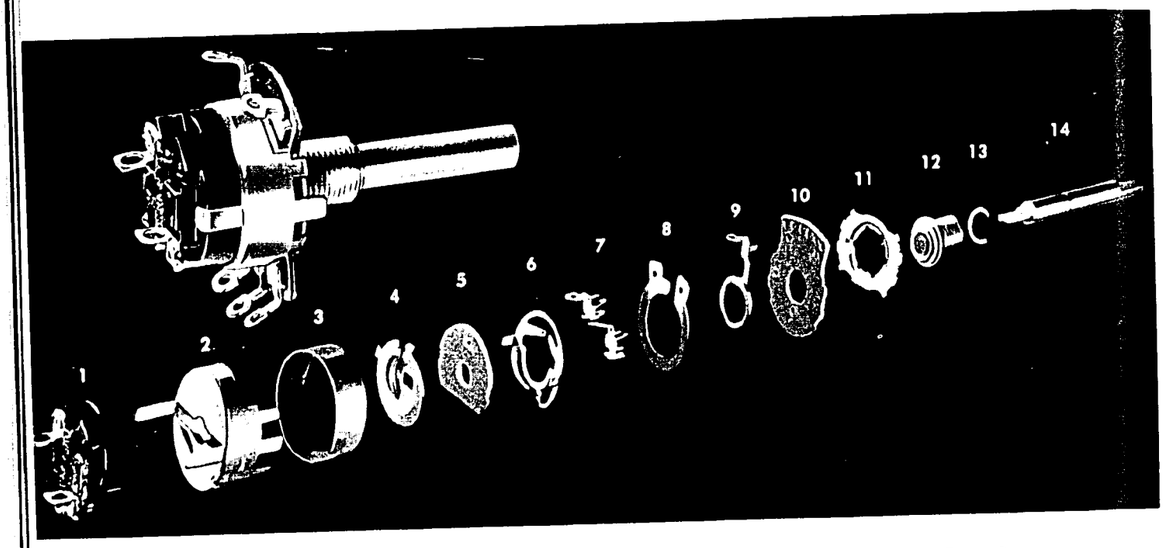
CENTRALAB'S MODEL 2 RADIOHM



Model 2 Radiohm's 14 Points of Superiority

1. **Switch** — with positive detent in both on and off positions. **Terminals** — with surfaces elevated to eliminate danger of shorting to cover legs . . . 1/8" hole diameter for simplified wiring . . . hot tin dipped for easy soldering . . . mechanical lock to prevent loosening in soldering operations.
2. Cadmium plated steel **cover** completely shields resistor.
3. **Insulator's** high dielectric strength permits breakdown test at 1000 volts R. M. S. Dust and dirt can't get in.
4. **Stop,** of cup design, provides superior switch shielding . . . gives you excellent torque strength without distortion.
5. High grade laminated phenolic **shoe** maintains high insulation resistance under humidity conditions.
6. Contact Spring gives you double wiping contacts on both resistor and center terminal ring . . . is accurately formed to maintain uniform pressures and minimize noise.
7. Electro tin-plated **terminals** provide soldering ease. Tightly crimped terminals give you direct contact to resistor . . . assure constant contact under humidity and soldering conditions.
8. **Resistor** is made of special resistance material bonded to high quality phenolic for smooth operation, low noise level, outstanding humidity characteristics.
9. Cadmium-tipped **center terminal** provides easy soldering . . . good shelf life without oxidation. Adequately lubricated for good rotation life, center terminal is finished to give you smooth take-off . . . minimum noise.
10. Laminated phenolic **base** maintains high insulation resistance under humidity conditions.
11. Cadmium-plated steel **ground plate** assures positive grounded cover.
12. Cadmium-plated steel **bushing** is accurately finished and fit to shaft for smooth rotation.
13. **Retaining ring.**
14. **Shaft.** Unlimited variations available to meet your specifications.

Switch Type, Tapped. Exploded View: Switch Type, Untapped.

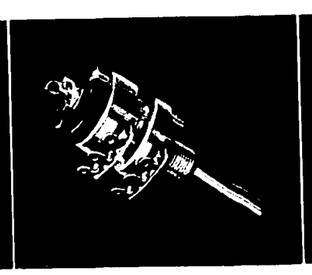
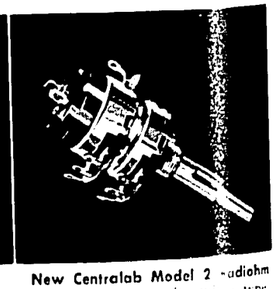
New Centralab Model 2 Radiohm Control—control shown is a single unit switch type, tapped. Control has single shaft.



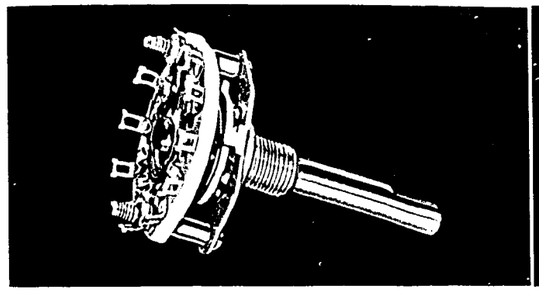
New Centralab Model 2 Radiohm Control — this control is a twin unit switch type, untapped. It has a single shaft.



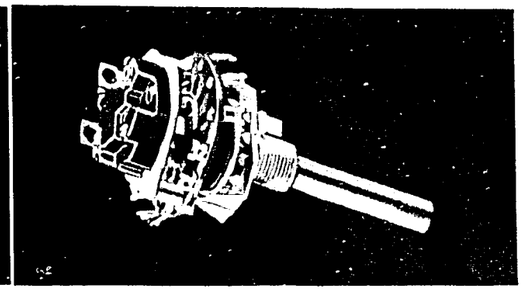
New Centralab Model 2 Radiohm Control — twin unit switch type, rear section tapped. Units are concentric shafts.

First in component research that means lower costs for the electronic industry!

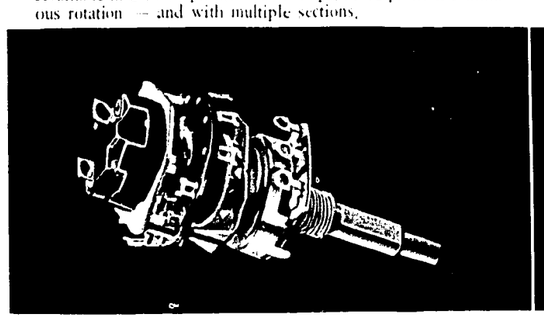
CENTRALAB'S NEW MINIATURE ROTARY SWITCH



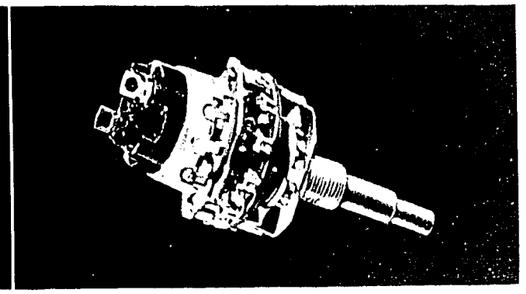
New Centralab Series 20 miniature single steatite section switch Available in 2 to 11 positions with stops, or 12 position continuous rotation — and with multiple sections.



Here's standard Series 20 miniature switch — plain [illegible] with off-on switch added. Standard shaft. Also available with multiple sections.



Combination Series 30 miniature switch unit with dual concentric shaft — permits independent operation of miniature switch including off-on switch, and Model 2 variable resistor.



Same combination Series 30 unit as the [illegible] Model 2 variable resistor is [illegible] Position of resistor provides [illegible]

Now Centralab offers a completely new, unusually small rotary switch line — available in a variety of multi-pole, multi-position, multi-section models and in combination with line switches and variable resistors.

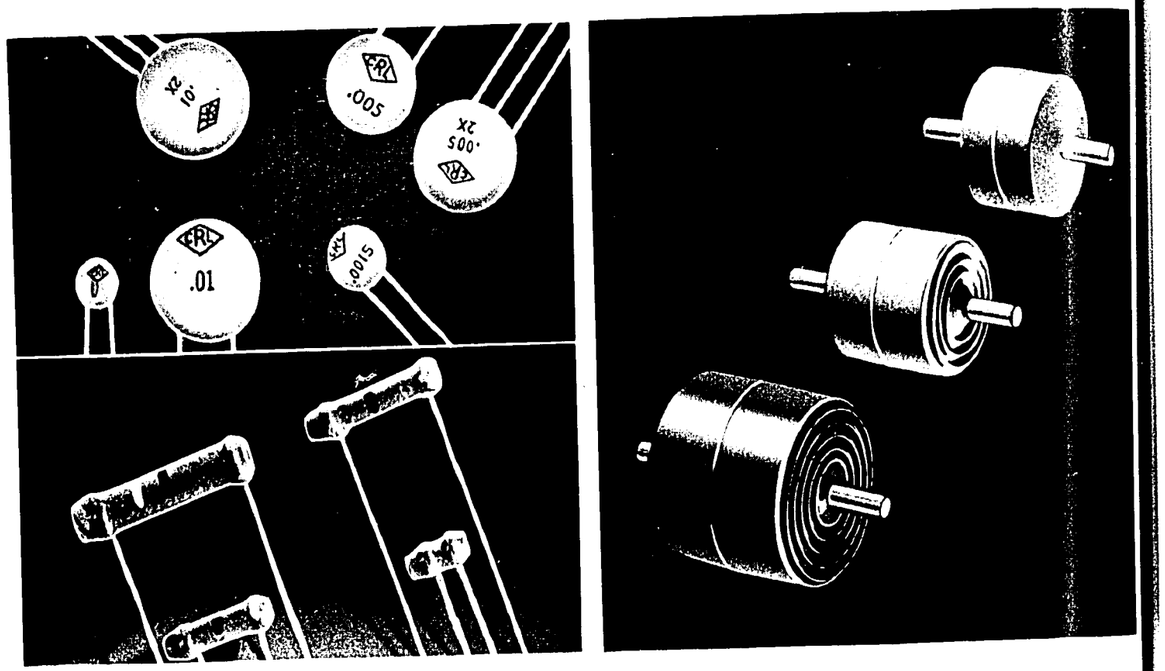
New Centralab Miniature Switches Give You Top-Quality Construction & Performance

Centralab's new Series 20 and Series 30 miniature switches have every quality-construction feature every quality-performance characteristic as furnished with the larger standard size Centralab switch line. Clips and contacts are spring brass with heavy silver plating or coin silver. All other metal parts are adequately plated to meet commercial or government specifications. Sections are finest quality laminated phenolic or Centralab's own grade L-5 Steatite. Switches have positive 30° indexing, available in 2 to 11 positions with stops, or 12 position continuous rotation — and with multiple sections. Also available with plain or dual concentric shafts, attached line switches, and in combination with famous Model 2 Radiohm variable resistors mounted either at front or rear of switch according to wiring need.

If your prime consideration in modern electronic [illegible] performance and [illegible] facts on these [illegible] Series 30 miniature [illegible] Centralab. You'll find [illegible] among the world's [illegible] most reliable [illegible] size, plus the [illegible] and industry engineers [illegible] Centralab Division [illegible] E. Keefe Avenue, Milwaukee 1, Wis.

Centralab Ceramics

YOUR MOST PERMANENT-TYPE CAPACITORS



Choose from the world's widest line of disc and tubular ceramic capacitors

Ceramic capacitors are a well established necessity for the exacting requirements of television and radio circuits. They offer a permanence — a freedom from service troubles — not obtainable with old style paper or mica condensers.

Centralab not only introduced ceramic capacitors, but has constantly devoted more research and larger laboratory and production facilities to this field, than any other firm. Research has included experimentation with over 20,000 different ceramic compounds, of which all but 250 have been discarded. With these 250, a wide variety of formulas has been perfected for highest standards of capacitor performance.

Special advantages of ceramic capacitors —

Highest dependability — The most permanent type of capacitor.

Space saving — Ceramic capacitors are generally less than 1/7 the size of ordinary condensers.

Impervious to moisture — Centralab's Ceramic-X, used for the ceramic body, is nonhygroscopic. Moisture absorption is .00% or less.

Excellent under high temperatures — 80° C. will not harm the ceramic capacitor. High capacity is well maintained under wide temperature variants.

Low power factor — initial, 6%. After 100 hours at 95% humidity, 3%, and will return to normal.

High accuracy — Ceramic capacitors of unusually close tolerance can be supplied for many values.

Temperature compensating qualities — For FM circuits, where frequency drift is critical, and likely to be caused by temperature changes, stabilization can generally be effected by application of temperature compensating capacitors.

New Centralab "HI-VO-KAPS" offer you high voltage ceramic capacitors for television circuits

Designed and developed by Centralab, *Hi-Vo-Kaps* combine high voltage, small size and a variety of terminal connections to fit virtually any television application. The new additions to CRL's line are for use as filter by-pass capacitors in video amplifiers for high DC voltages and small component AC voltages (not for use in peaking compensation or resonant circuits).

Integral Ceramic-X construction features positive protection to moisture, solid brass terminals, soldered direct electrodes...metallic silver electrodes fired directly to the dielectric constant Ceramic-X . . . low loss, mineral paint coating. For complete information write for Bulletin 1R-1-5.

Ratings: Type A — 30,000 WVDC, 40,000 VDC test. Capacity 500 mmf. Diameter 1.4" max., length 1.250". Overall length 2 1/4" max.

Type B — 20,000 WVDC, 30,000 VDC test. Capacity 500 mmf. Diameter 1" max., length .750". Overall length .9" max.

Type C — 10,000 WVDC, 15,000 VDC test. Capacity 500 mmf. Diameter 1" max., length .750". Overall length 1.75" max.

Centralab introduced carbon controls to the radio industry 25 years ago! Today, there's no substitute for Centralab control research and development.

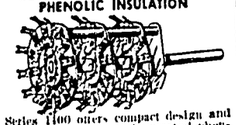
SWITCHES

Centralab®

Division of GLOBE-UNION INC.
934 East Keefe Avenue
Milwaukee 1, Wisconsin

Centralab offers a complete line of switches to meet nearly every low-power and medium duty requirement.

ROTARY SELECTOR SWITCHES PHENOLIC INSULATION



Series 1400 offers compact design and quality construction. Laminated phenolic insulation. Mtg. bushing, ⅜" x 32 thread, ⅜" long. Shaft, 1¾" long. Index, positive, 30°. Adjustable stop. Revisions are easily made, if later required, due to availability of all parts separately. See listing under hardware. Packaged with mtg. nut, lockwasher and 1¼" black bar knob.

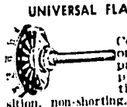
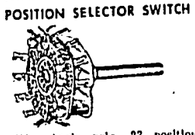
UNIVERSAL FLAT SWITCHES



Compact. Requires only ⅝" behind panel. Laminated phenolic insulation. 4 pole, 2 position, non-shorting. CAT. NO. 1450 with positive index. List $1.00. CAT. NO. 1451 — similar to 1450, but with spring return index. List $1.75.

23 POSITION SELECTOR SWITCH



Long life, single pole, 23 position, shorting type. Double wipe contacts. 15° positive index.
CAT. NO. 1443 — 23 Position Selector Switch. List Price $3.25.

ROTARY SWITCH KIT

A 4 drawer cabinet holds 33 standard rotary switch phenolic sections (1400 series), 16 index assemblies and all necessary parts which will produce the following, or variations which may meet a sudden requirement: two one condenser decade switch of 2 sections, and one resistor decade switch of 1 section. Refills can be ordered from the Hardware list on this page. CAT. NO. 1500 — Complete Rotary Selector Switch Kit. LIST PRICE $50.00.

4 section rotary switches, two 3 section, four 2 section, six 1 section,

CERAMIC CAPACITORS

Centralab offers the widest variety of ceramic capacitors on the market today for all ranges of voltage and frequency—for any application in circuitry.

Centralab®

Division of GLOBE-UNION INC.
934 East Keefe Avenue
Milwaukee 1, Wisconsin

Centralab introduced ceramic capacitors and has constantly devoted more research and larger laboratory and production facilities to this field, than can be said of any other firm. Ceramics are known as the most permanent type of capacitors.

BC HI-KAP TUBULARS

For bypass, coupling and general use. Tolerance ± 20% through 2200 mmf.; higher cap. Guaranteed Minimum Values (GMV). 85° C. plus operation. Tropicalized. 1000 volts d.c. test; 600 volts d.c. working. Minimum order quantity, 5.

PRINTED ELECTRONIC CIRCUITS

Centralab
®
Division of GLOBE-UNION INC.
934 East Keefe Avenue
Milwaukee 1, Wisconsin

Centralab Printed Electronic Circuits — no other electronic development offers such tremendous time, material and cost saving advantages in low-power applications.

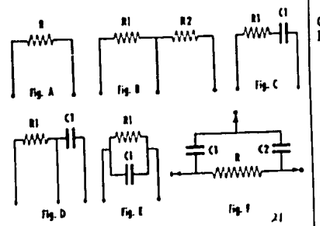
PRINTED ELECTRONIC CIRCUITS

For the first time, Centralab's famous Printed Electronic Circuits (P.E.C.) are now made available as stock items. P.E.C. units, in simplest form for application as components, consist of resistance materials and pure metallic silver fired to sturdy Ceramic-X plates, including integral "printed" circuit connections, brought out to convenient external leads which are mechanically anchored to the plate. The complete unit is protected with a moisture-proof phenolic coating. The result is a combination of resistors and capacitors of ultra compactness and permanence. No other modern development in electronic circuitry offers so many advantages in low powered applications as regards small size, low cost assembly and utmost reliability.

RESISTOR AND RESIS.-CAP. UNITS

Plate size, $\frac{11}{32}$" x $\frac{3}{32}$" x $\frac{3}{64}$" thick, max. Capacitors, 150 v.d.c.w. Resistors, ½ watt.

Cat. No.	Dwg.	Consists of	List Price
PC-2	A	2 meg. Resis.	$ .35
PC-21	B	½ meg.; 110,000 ohms	.50
PC-30	C	R-240,000 ohms. C-1000 mmf.	.50
PC-33	D	R-1 meg. C-1000 mmf.	.50
PC-36	E	R-100,000 ohms. C-100 mmf.	.50

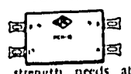


FILPEC BALANCED DIODE LOAD FILTER

Plate size, $\frac{13}{32}$" x $\frac{3}{32}$" x $\frac{3}{64}$" thick max. Capacitors, 100 v.d.c.w. Resistors, ½ watt.

Cat. No.	Dwg.	Consists of	List Price
PC-50	F	C1=100 mmf. C2=100 mmf. R=47,000 ohms	$ .60
PC-51	F	C1=150 mmf. C2=150 mmf. R=47,000 ohms	.60

TELEVISION H-PADS FOR ATTENUATION OF SIGNAL STRENGTH



These handy Centralab P.E.C. units are specially designed for use in television antenna installations where signal strength needs attenuation to secure optimum performance. The proper H-Pad, in many instances, will match the signal strength to the requirements of the receiver. This can prevent overloading, can eliminate tearing of the image, and improve both audio and video results. They are especially valuable where the television set is located too close to the broadcast station. In connection with a switching arrangement, they are helpful to balance signals from stations which, because of high power or location, are too strong in relation to other stations. H-pads also are useful in matching impedance between the antenna and the receiver.

The H-Pad has four terminals, and is for installation in series with the standard 300 ohm antenna. Full directions are included.

SIZE — 1¼" x $\frac{13}{16}$" x $\frac{3}{16}$" thick.

TERMINALS — Solder terminals, $\frac{3}{32}$" long.

PACKAGED — Singly in envelopes. In sets of four, in a plastic box.

Cat. No.	Type	Attenuation Rating	List Price
PCH-10	H-Pad	10 db.	$ .80
PCH-20	H-Pad	20 db.	.80
PCH-30	H-Pad	30 db.	.80
PCH-40	H-Pad	40 db.	.80
PCH-100	SET OF FOUR H-PADS, one each of the above, in plastic box		3.00

TRIODE COUPLATES P.E.C. INTERSTAGE COUPLING PLATES MIDGET NO. 2 COUPLATE

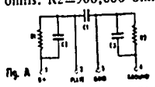
Plate size, $\frac{13}{32}$" x $\frac{3}{16}$" x $\frac{3}{32}$" thick max. Capacitors, 450 v.d.c.w. Resistors, ⅛ watts.

Cat. No. PC-70 MIDGET #2 COUPLATE

Consisting of (See Fig. A)	List Price
C1=.005 mfd. C2 and C3=250 mmf. R1=500,000 ohms. R2=500,000 ohms.	$ .70

Cat. No. PC-71 MIDGET #2 COUPLATE

C1=.005 mfd. C2 and C3=250 mmf. R1=250,000 ohms. R2=500,000 ohms. .70



STANDARD TRIODE COUPLATE

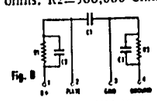
Plate size, $1\frac{3}{32}$" x $\frac{13}{16}$" x $\frac{3}{64}$" thick, max. Capacitors, 450 v.d.c.w. Resistors, ⅛ watt.

Cat. No. PC-80 STANDARD COUPLATE

Consisting of (See Fig. B)	List Price
C1=.01 mfd. C2 and C3=250 mmf. R1=500,000 ohms. R2=500,000 ohms.	$ .75

Cat. No. PC-81 STANDARD COUPLATE

C1=.01 mfd. C2 and C3=250 mmf. R1=250,000 ohms. R2=500,000 ohms. .75



PENTODE COUPLATES

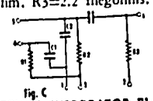
Cat. No. PC-90 PENTODE COUPLATE

Plate size, $1\frac{11}{32}$" x ⅞" x .045" thick max. Capacitors, 450 v.d.c.w. Resistors, ⅛ watt.

Consisting of (See Fig. C)	List Price
C1=.005 mfd. C2=50 mmf. C3=2000 mmf. R1=4.7 megohms. R2=1 megohm. R3=2.2 megohms.	$ .90

Cat. No. PC-91 PENTODE COUPLATE

C1=.005 mfd. C2=100 mmf. C3=.005 mfd. R1=4.7 megohms. R2=1 megohm. R3=2.2 megohms. .90

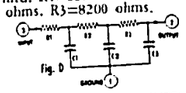


VERTICAL INTEGRATOR PLATES

Due to great saving in assembly costs, this Centralab printed circuit is being used widely in television vertical integrator networks. Two forms are available. Either one has only three external leads. Size, PC-100 $1\frac{3}{32}$" x $\frac{13}{16}$" x ⅛" thick max. PC-101, 1⅝" x $1\frac{1}{16}$" x $\frac{3}{16}$" thick max. Capacitors, 450 v.d.c.w. Resistor, ½ watt.

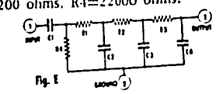
Cat. No. PC-100 VERTICAL INTEGRATOR

Consisting of (See Fig. D)	List Price
C1=.002 mfd. C2=.005 mfd. C3=.005 mfd. R1=22000 ohms. R2=8200 ohms. R3=8200 ohms.	$1.10

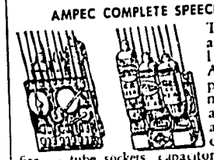


Cat. No. PC-101 VERTICAL INTEGRATOR

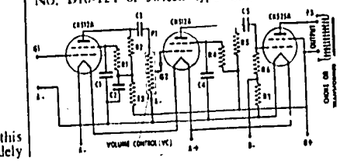
Consisting of (See Fig. E)	List Price
C1=.01 mfd. C2=.002 mfd. C3=.005 mfd. C4=.005 mfd. R1=22000 ohms. R2=8200 ohms. R3=8200 ohms. R4=22000 ohms.	1.25



AMPEC COMPLETE SPEECH AMPLIFIER



There's never been an electronic device like Centralab's Ampec. In the compact unit — permanently bonded to a master plate—are all the components of an audio amplifier — tube sockets, capacitors, resistors, wiring — a three tube, three stage speech amplifier. Similar Centralab units are widely used in hearing aids, for the most trouble-free performance ever attained. Ampec has other interesting applications, as mike preamplifier, etc. Size, 1¼" x $1\frac{1}{16}$" x .340" over tube sockets. Capacitors, 100 v.d.c.w. Resistors, ⅛ watt. Recommended tube complement, T-1 and T-2 (see dwg.) Raytheon type CK512AX; T-3, Raytheon type CK525AX. Gain frequency performance — A voltage 1.2; input voltage, 1 millivolt; B voltage 22. 50,000 ohm load. At 1000 cycles per second, the amplification factor is 4000. Volume control (VC in dwg.) not furnished. The ideal control is Centralab Cat. No. B16-124 or switch type Cat. No. B16-221.

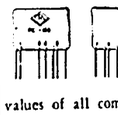


Cat. No.	Type	Consisting of	List Price
PC-200	AMPEC	Complete Three Stage Speech Amplifier, including three built-in sockets, less tubes.	$15.00
PC-201	AMPEC	Same as PC-200, but furnished complete with tubes, two CK512AX and one CK525AX.	26.00

TUBES — Listed separately as a matter of convenience.

Cat. No.		CRL List Price
CK512AX	Raytheon Subminiature Voltage Amplifier Pentode Tube	$3.40
CK525AX	Raytheon Subminiature Output Pentode Tube	4.25

AUDET OUTPUT STAGE FOR AC-DC RADIO RECEIVERS



Audet is a P.E.C. audio-detector plate, with seven leads, and furnishes the values of all components which quite generally comprise the output stage of AC-DC radio receivers. Where there is trouble with old style components in this part of the set, it is easy to replace the entire audio-detector stage with Audet. Plate size, 1⅛" x ⅞" x ⅛" thick max. Capacitors, 450 v.d.c.w. Resistors, ⅛ watt.

Cat. No. PC-150 AUDET

Consisting of (See drawing)	List Price
C1=.002 mfd. C2= 220 mmf. C3 and C5=220 mmf. C4=.005 mfd. R1=6.8 megohms. R2=470,000 ohms. R3=470,000 ohms.	$1.00

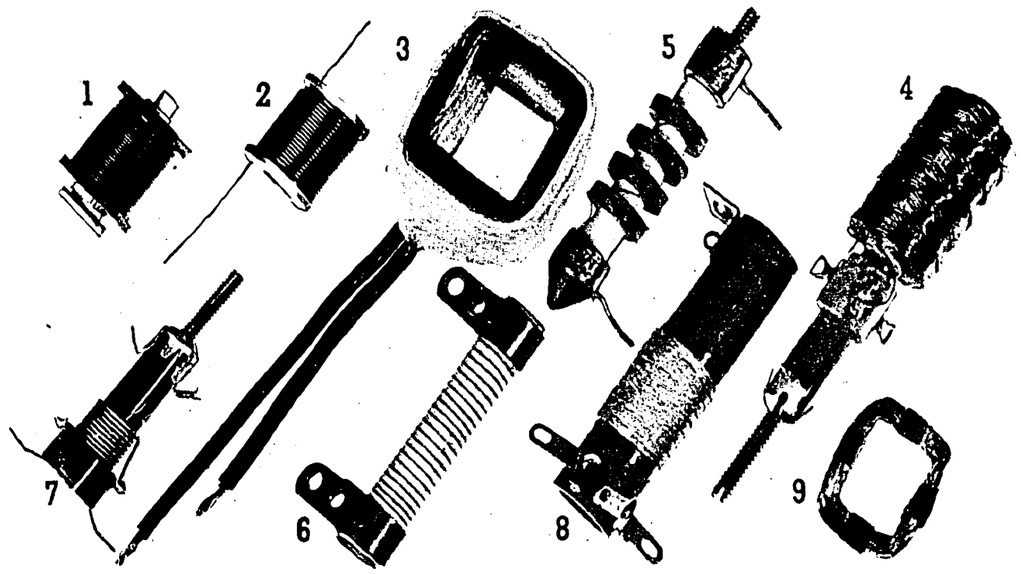
Long Life–High Speed–Coil Winding Machines

TYPE OF COIL As illustrated below	RECOMMENDED MODELS Laboratory	Mod. Production	Max. Production	Typical Application
1. BOBBIN (Solid Core)	W	CRS, CS, W	C, CR*	Relays, Solenoids TV Focus Coils Precision Resistances
2. BOBBIN (Hollow Core)	W	C, CR, W	C, CR	
3. PAPER INTERLEAVED	W	CR, CRS, C-1	AL, AM	Transformers, Reactors
4. LATTICE (Single Pi)	U, W	U, W	U, W*	Flybacks, Antenna and I.F. Coils R.F. Power Supplies
5. LATTICE (Multiple Pi)	U, W	W	W*	
6. SINGLE LAYER (Space Wound)	B, P, W	B, P, W	B, P	Resistors R.F. Coils
7. SINGLE LAYER (Close Wound)	A, AA, W W, L, LL	A, AA L, LL	A, AA L, LL	
8. PROGRESSIVE UNIVERSAL	W	W	W	R.F. & I.F. Inductances Slug Tuned Coils
9. RANDOM	A, AA, W L, LL	L, LL	L, LL*	Motor Fields TV Deflection Coils

* Maximum production of Solid Core Coils is provided by the use of 4 Station Machines.

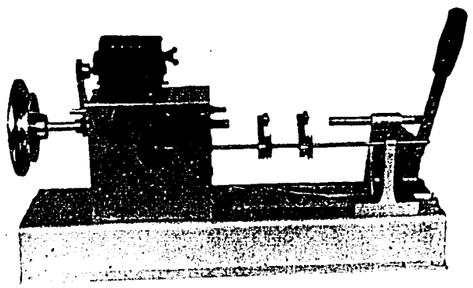
Illustrated below are nine general types of coils wound on Coil Winding Equipment models as indicated above. Other similar coils not illustrated may also be wound on these basic machines which are more fully described in the following pages.

Models recommended for laboratory use and moderate production are equally accurate and rugged but lack some of the convenience of the maximum production machines.



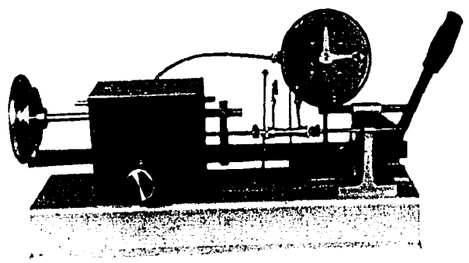
Coil Winding Equipment Co.

OYSTER BAY, NEW YORK. Phone OYster Bay 6-1285



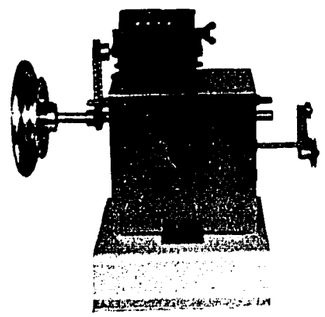
Model C. Bobbin Winder

A high speed winder for bobbins or random wound coils. Change gears permit winding of exact number of turns per layer and accurate cam design assures level wound coils. Hollow core coils may be multiple wound on this machine.



Model W. Progressive Universal Winder

This machine combines the lattice winding mechanism of our Model U with a progressive feed to wind so-called "progressive universal" coils. The full utilization of these two motions makes it possible to wind a wide variety of other coils.



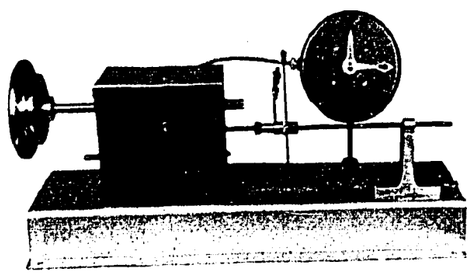
Model CS. Bobbin Winder

Same head as Model C but without bed or tailstock. Especially suited for solid core coils as several of these heads can be mounted conveniently for a single operator. Greater flexibility than multiple spindle machines without increased cost.

LABORATORY WINDERS

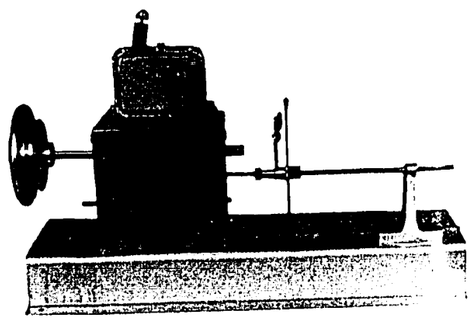
While all of the models illustrated on these pages are designed as production machines the ease of set up and adjustment makes them suitable for laboratory and experimental work as well. When the nature of the work is known in advance a production model will often fill the need. Often a machine can be supplied that combines the features of two models. For example we are supplying a combination bobbin winder and lattice winder under the designation of Model CU.

Most versatile of all models is our Model W which is widely used in schools and laboratories. With a few simple accessories this machine will wind virtually every coil used in the electrical and electronics industries. Write for detailed listing and description.



Model U. Universal Winder

Designed for the rapid production of lattice wound (universal type) coils, this machine has had wide application in the winding of r.f. and i.f. coils. Suitable for T.V. flyback or high voltage coils.



Model UX. Universal Winder

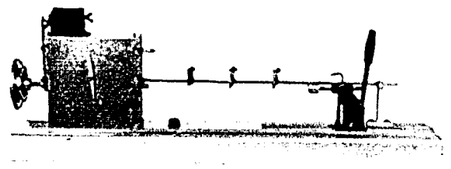
A lattice winder with continuously variable gain for the rapid production of sample or short run coils. This machine automatically indicates the gears required for the duplication of sample coils on standard change gear machines.

Coil Winding Equipment Co.

OYSTER BAY, NEW YORK. Phone OYster Bay 6-1285

Model AL. Transformer Winder

A rugged and dependable machine for the rapid production of coils in which the paper may be inserted manually. Automatic stop at end of traverse; micrometer traverse adjustment spiralling feed; indicating light; and complete compensation for wear.

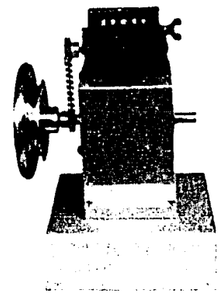


Model C1. Bobbin and Transformer Winder

A larger version of our Model C with the winding fingers in the rear making it suitable for paper interleaving as well as bobbin winding. An indicating hand shows the position of the cam at all times and visual or audible signals can be supplied.

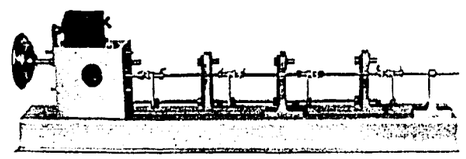
CAMS AND GEARS

We are in a position to supply cams and gears of any size for use in our machines or similar equipment. Our large stock assures prompt handling of your order. If you are purchasing a machine for general or laboratory work, we recommend you include in your order a complete set of gears from 25 to 106 teeth. We also stock gears smaller and larger than those included in the standard set, and when used in conjunction with idler gears of 2-1, 3-1, and 5-2, ratios, the range of the various machines is considerably extended.



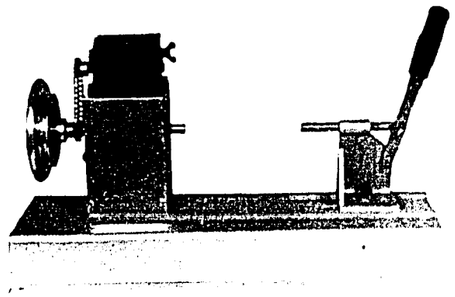
Model L. Hand Winder

An economical winder for random wound or hand spaced coils, such as motor fields, T.V. deflection yokes and other coils of this nature. A predetermining counter stops the machine when the coil is complete.



Model U4 Multiple winder

For the winding of solid core coils we can supply machines with a separate spindle for each coil. Shown here is our Model U set up to wind four coils at a time on resistor type forms. All of our models may be used as multiple winders when the nature of the form permits.

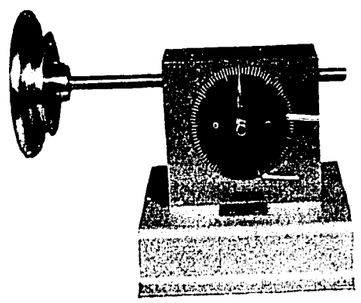


Model LL. Hand Winder

This is a Model L head mounted on a base and equipped with a tailstock for the support of longer forms. For shaped coils such as T.V. deflection yokes, half of the forming block is carried on the tailstock to affect rapid unloading.

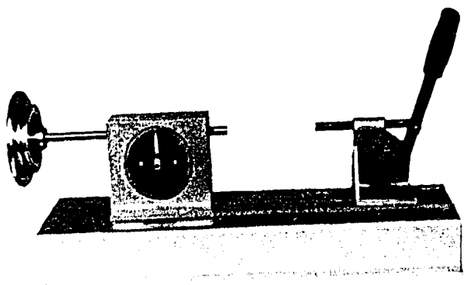
Coil Winding Equipment Co.

OYSTER BAY, NEW YORK. Phone OYster Bay 6-1285



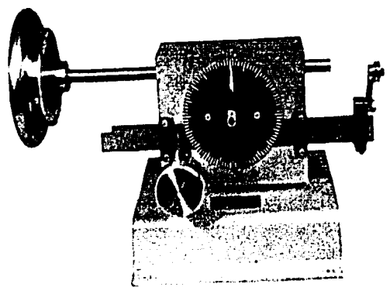
Model A. Hand Winder

An economical model for the production of hand wound coils, including single layer close wound coils and bobbins. Also suitable for limited production of transformer type windings. Available with pulley or hand crank.



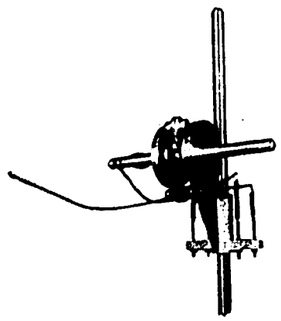
Model AA. Hand Winder

A model A head supplied with bed and tailstock. This permits the winding of long or flexible coils and permits the design of more rapid loading devices. Rugged ball bearing spindle and accurate built-in counter.



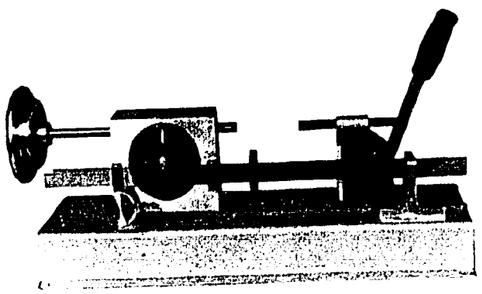
Model B. Space Winder

Accurately spaces or close winds single layer coils, such as resistors, flashers, and solenoids. Accessories include automatic stop, and a feed reverse that permits winding in either direction on transformers, etc.



Model 299. Tension

Illustrated is our 3" sensitive double tension for wire as small as .001" diameter. Precision type instrument bearings avoid undesirable friction. Unique brake design avoids fluctuations in tension with change in spool diameter. Single and double tensions available for 3", 4", and 6" spools.



Model P. Space Winder

This is a Model B head mounted on a bed and supplied with tailstock, to provide support for extra long or flexible forms. Change gears supply thousands of feeds of extreme accuracy from 7 to 1500 turns per inch.

All Coil Winding Equipment coil winding machines are built of finest materials and evidence the best of design and workmanship. Spindles are of stainless steel and run in precision ball bearings. Transverse shafts run in high quality bronze bushings pressed into holes line reamed in the castings, permitting easy replacement. All parts are made to close tolerances and parts may be shifted from one machine to another with complete interchangeability.

All models are built with high speed production in mind but incorporate features that make them attractive for the small shop or laboratory. Among these are their ease of setup, compact design, low cost, and long accurate life.

Accessories and replacement parts are available for all models of our manufacture, regardless of age and we are prepared to suggest such features and details as will assure the maximum production for your present machine.

Coil Winding Equipment Co.

OYSTER BAY, NEW YORK. Phone OYster Bay 6-1285

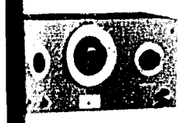
hp OFFERS COMPLETE COVERAGE in electronic test instrumentation

Choose the exact electronic test equipment you need from the -hp- line — the world's most complete line of over 200 test instruments. Enjoy the engineering economies of fast, accurate measurements, sturdy dependability, broad application. Enjoy, too, the "family characteristics" of -hp- instruments—simple operation, minimum adjustment, independence of line voltage and tube changes, generous overload protection, trouble-free performance.

These pages give brief details of major -hp- instruments. For specific data or catalogs, write to factory on your letterhead or see your local -hp- representative.

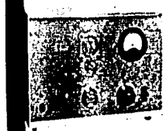
hp Oscillators — Generators — .01 to 10,000,000 cps

-hp- 200 SERIES AUDIO OSCILLATORS



Six standard models. 200A, 200B have transformer-coupled output, deliver 1 watt into matched load. 200C, 200D and 202D (for sub-audio, audio, supersonic and carrier measurements) have resistance-coupled output, supply constant voltages over their entire frequency ranges. 200I, spread-scale oscillator for interpolation or where frequency must be known precisely.

-hp- 650A TEST OSCILLATOR



Highly stable, wide band (10 cps to 10mc) multi-purpose test oscillator for audio, supersonic, video and rf measurements. Output flat within 1 db. Range 0.00003 to 3 v. Output impedance 600 ohms or 6 ohms with voltage divider. $475.00

Instrument	Primary Uses	Frequency Range	Output	Price
-hp- 200A	Audio tests	35 cps to 35 kc	1 watt 22.5 v	$120.00
-hp- 200B	Audio tests	20 cps to 20 kc	1 watt 22.5 v	$120.00
-hp- 200C	Audio and supersonic tests	20 cps to 200 kc	100 mw 10 v	$150.00
hp 200D	Audio and supersonic tests	7 cps to 70 kc	100 mw 10 v	$175.00
-hp- 200H	Carrier current, telephone tests	60 cps to 600 kc	10 mw 1 v	$350.00
-hp- 200I	Interpolation and frequency measurements	6 cps to 6 kc	100 mw 10 v	$225.00
-hp- 201B	High quality audio tests	20 cps to 20 kc	3 w 42.5 v	$250.00
-hp- 202A	Low frequency measurements	.01 cps to 1 kc	20 mw 10 v	$450.00
-hp- 202B	Low frequency measurements	.1 cps to 50 kc	100 mw 10 v	$350.00
-hp- 202D	Low frequency measurements	2 cps to 70 kc	100 mw 10 v	$275.00
-hp- 204A	Portable, battery operated	2 cps to 20 kc	2.5 mw 5 v	$175.00
-hp- 205A	High power audio tests	20 cps to 20 kc	5 watts	$390.00
-hp- 205AG	High power tests, gain measurements	20 cps to 20 kc	5 watts	$425.00
-hp- 205AH	High power supersonic tests	1 kc to 100 kc	5 watts	$550.00
-hp- 206A	High quality high accuracy audio tests	20 cps to 20 kc	+15 dbm	$550.00
-hp- 650A	Wide range video tests	10 cps to 10 mc	15 mw 1 v	$475.00

hp Vacuum Tube Voltmeters — 2 to 700,000,000 cps

-hp- 410B VACUUM TUBE VOLTMETER

Wide range, flat response performance 20 cps to 700 mc. Convenient, simple to use, occupies minimum bench space. Handy compartment for detatchable probe and leads. Diode probe design places approximately 1.3 μμfd capacity across circuit under test. Low, plus high shunt impedance (10 megohms at low frequencies) means circuits under test are not disturbed, and true voltage readings are assured. Hi accuracy, 20 cps to 700 mc. Also measures dc voltage to 1000 v. and resistances to 500 megohms. $245.00

Instrument	Primary Uses	Frequency Range	Voltage Range	Input Impedance	Price
-hp- 400A	General purpose ac measurements	10 cps to 1 mc	.005 to 300 v 9 ranges	10 megohms shunted by 24 mmfd	$245.00
-hp- 400B	Low frequency ac measurements	2 cps to 100 kc	.005 to 300 v 9 ranges	10 megohms shunted by 24 mmfd	$245.00
-hp- 400C	Wide range ac measurements High sensitivity	20 cps to 2 mc	.0001 to 300 v 12 ranges	10 megohms shunted by 24 mmfd	
-hp- 404A	Portable, battery operated	2 cps to 50 kc	.0005 to 300 v 11 ranges	10 megohms shunted by 24 mmfd	
-hp- 410B	Audio, rf, VHF measurements; dc voltages; resistances	20 cps to 700 mc	1 to 300 v 7 ranges	10 megohms shunted by 1.3 mmfd	

-hp- Voltmeter Accessories (not listed) include voltage dividers, connectors, shunts and multipliers to extend useful range of your equipment.

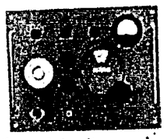
HEWLETT-PACKARD hp INSTRUMENTS

Signal Generators—10 to 7,600 mc

-hp- 618A SHF SIGNAL GENERATOR

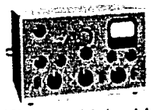


3,800 to 7,600 mc. Provides a 1 mw signal into a 50-ohm coaxial load (zero dbm). Output attenuator directly calibrated in dbm and volts, reduces output level to less than −100 dbm. Frequency dial directly calibrated, accuracy ½ of 1%. Repellor voltage automatically tracked. No adjustment during operation. CW, pulsed and FM output. $2,250.00

Instrument	Frequency	Characteristics	Price
-hp- 608A	10 to 500 mc	Output 1 v to .1 μv. Amplitude modulated, pulsed and CW output. Direct reading.	$850.00
-hp- 610B	450 to 1,200 mc	Calibrated output, .1 v to .1 μv. Internal pulse modulation. Direct calibration	$925.00
-hp- 614A	800 to 2,100 mc	Direct reading. Pulse modulation, CW & FM. Output 1 mw or .223 v to .1 μv	$1,950.00
-hp- 616A	1,800 to 4,000 mc	Direct reading. Pulse modulation, CW & FM. Output 1 mw or .223 v to .1 μv	$1,950.00
-hp- 618A	3,800 to 7,600 mc	Direct reading. External pulse modulation, C W & FM. Output .223 v to 2.23 μv	$2,250.00

Distortion, Wave Form Analyzers—20 cps to 20 kc

-hp- 330B DISTORTION ANALYZER



Measures distortions as low as 0.1% at any frequency, 20 cps to 20 kc. Measures noise voltages as low as 100 μv. High sensitivity, high stability, broad applicability for broadcast, laboratory or production problems. Wide band 20 db gain input amplifier. Built-in vacuum tube voltmeter usable separately. $395.00

FM, AM-FM MODELS

-hp- 330C, for FM broadcasters, includes VU meter meeting F.C.C. requirements. *-hp- 330D*, for AM-FM broadcasters, includes AM detector to rectify AM carrier, plus VU meter employed in model 330C. 330C, $425.00. 330D, $440.00

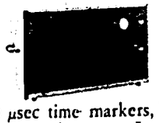
Analyzer	Primary Uses	Frequency Range	Characteristics	Price
-hp- 300A	Wave form analyzer	30 cps to 16 kc	Variable selectivity; measuring range 1 mv to 500 v.	$695.00
-hp- 320A	Measures total distortion	400 cps and 5 kc	Requires external detector	$ 75.00
-hp- 320B	Measures total distortion	50, 100, 400 cps, 1, 5 and 7.5 kc	Same as above	$150.00
-hp- 330B	Measures total distortion	20 cps to 20 kc	Includes input amplifier, VTVM	$395.00
-hp- 330C	For FM measurements	20 cps to 20 kc	Special VU meter to meet F. C. C. requirements	$425.00
-hp- 330D	For AM, FM measurements	20 cps to 20 kc	AM detector and VU meter to meet F. C. C. requirements	$440.00
SQUARE WAVE GENERATOR				
-hp- 210A	Transient and frequency response	20 cps to 10 kc	Output 50 v. peak-to-peak. 1,000 ohm impedance	$150.00

Frequency Measuring Equipment—.01 cps to 10 mc

-hp- 524A FREQUENCY COUNTER

Instantly, automatically, directly measures unknown frequencies, 0.01 cps to 10 mc! One instrument combines functions of frequency standard, interpolating system and detector! Amazingly simple operation—just connect unknown to input terminal, and exact frequency appears automatically on front panel. High speed decade scalers count unknown frequency over measured, crystal-controlled time interval. Accuracy of measurement ±1 count ± crystal stability (2/1,000,000 per week). External higher accuracy standard usable if desired. Minimum of unknown, 1 v peak. $2,000.00

-hp- 100D SECONDARY FREQUENCY STANDARD



Swift, sure frequency comparison, new convenience in standardizing with minimum external equipment. 100 μsec time markers, built-in oscilloscope, sine or rectangular waves. Low output impedance, short-time stability 1/1,000,000. Performs most functions of expensive primary standards in audio, rf or supersonic ranges. $600.00

Instrument	Primary Uses	Frequency Range	Characteristics	Price
-hp- 524 Frequency Counter	Frequency, interval, time measurements	.01 cps to 10 mc	Direct reading, no interpolation, accuracy about 2/1,000,000	$2,000.00
-hp- 100D Secondary Standard	Frequency, time measurements	100 kc, 10 kc, 1 kc, 100 cps, 10 cps	Stability 1/1,000,000 (short-time). Sine or rectangular output. Marker pips	$ 600.00
-hp- 100C Secondary Standard	Audio, supersonic calibration	100 kc, 10 kc, 1 kc, 100 cps	Accurate within ± .001%. Sine waves only.	$ 450.00
-hp- 500A Frequency Meter	Rapid frequency measurements	5 cps to 50 kc	10 ranges ± 2% accuracy. Input 0.5 to 200 volts.	$ 210.00
-hp- 505A Tachometer	Measurements of high speed machinery	300 to 3,000,000 rpm	10 ranges ± 2% accuracy.	$ 300.00
-hp- 505B Tachometer	Same as above	5 to 50,000 rps	Same as 505A except calibrated in rps.	$ 300.00

Frequency monitors available for FM broadcast, 88 to 108 mc, TV aural broadcast 59.75 to 215.75 mc; and for communications systems, 30 to 175 mc.

Data Subject to Change Without Notice. Prices f. o. b. Factory.

Complete Coverage! HEWLETT-PACKARD

Microwave Test Equipment—10 to 18,000 mc!

Basic, low cost elements offer utmost flexibility for assembly of exact instrumentation required. Each unit covers entire range of its waveguide size. Simple, sturdy mechanical design; accurate, multi-purpose operation.

Instrument	Coaxial Type N. Conn.	"S" 3" x 1½" 2.6 - 3.95 kmc.	"G" 2" x 1" 3.95 - 5.85 kmc.	"J" 1½" x ¾" 5.85 - 8.2 kmc.	"H" 1¼" x ⅝" 7.05 - 10.0 kmc.	"X" 1" x ½" 8.2 - 12.4 kmc.	"P" .702" x .391" 12.4 - 18.0 kmc.

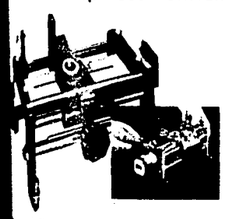
Broad Band Probe, Untuned	444A $50.00	All Frequencies					

*For use with bolometer only. †For use with bolometer or crystal. *Complete assembly including carriage §Mounts in 809B carriage

-hp- 809B UNIVERSAL PROBE CARRIAGE



Now—a single all-purpose probe carriage operates with 5 different *-hp-* slotted sections—waveguide and coaxial. Mounts sections covering frequencies 3,000 to 12,400 mc—*sections can be interchanged in 30 seconds!* Carriage calibrated in mm. to 0.1 mm.; dial gauge may be mounted for more accurate readings. Operates with *-hp-* 442A Broad Band Probe and *-hp-* 440A Coaxial Detector in combination; or with *-hp-* 444A Untuned Probe. *-hp-* 809B, $160.00

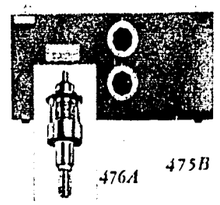
-hp- COAXIAL SLOTTED SECTIONS

-hp- 805A B. 500 to 4000 mc. High accuracy, high stability, negligible slope, minimum leakage. Exclusive parallel plane design with non-bowing center conductor. VSWR of basic section and connectors less than 1.04. *-hp-* 805A, 50 ohms, Type N connectors for flexible cables. *-hp- 805B*, [illegible] ohms, for 3" rigid transmission lines. $475.00

-hp- 806B. 5,000 to 12,000 mc. Same parallel plane design as 805A B. For use with 809B Carriage. VSWR of section and connectors 1.06 to 10,000 mc. 50 ohm impedance, negligible slope. Type N connectors for flexible cable. $200.00

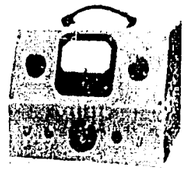
-hp- 803A VHF Bridge reads impedance magnitude and phase *directly* 10 to 500 mc. Rapid operation, for comparative measurements to 1,000 mc. Impedance range 2 to 2,000 ohms. Phase angle −90° to +90° 952 mc and above. $495.00

-hp- 417A VHF Detector, for use with 803A Bridge; or general laboratory readings. Super-regenerative receiver, 10 to 500 mc, 5 bands. Approx. 5 μv sensitivity over entire band. Direct reading frequency control, thoroughly shielded. $200.00



476A 475B

New -hp- 476A Universal Bolometer Mount measures rf power 10 to 1,000 mc. No tuning or adjustment. VSWR less than 1.15, 20 to 500 mc; 1.25, 10 to 1,000 mc. $125.00. *-hp- 475B Tunable Mount*, continuous 1,000 to 4,000 mc. $200.



-hp- 430A Microwave Power Meter provides instantaneous rf power readings *direct* in db or mw at all bolometer mount frequencies. No calculations, no adjustment except zero set. For *-hp-* bolometer mounts: 475B, 476A, 485. $250.00

-hp- 415A Indicat[illegible] of standing wave ratio. Gives direct reading VSWR [illegible] quarter wavelength [illegible] 50 ohm nominal [illegible] cable [illegible]

Data Subject to Change Without Notice. Prices f. o. b. Factory.

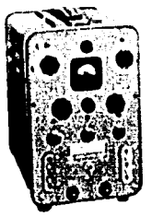
INSTRUMENTS Complete Coverage!

-hp- AMPLIFIERS

Complete instrumentation for distortion-free, fast pulse measurement. *-hp- 460A Wide Band Amplifiers*, in cascade with *-hp- 460B Fast-Pulse Amplifiers* offer up to 90 db gain, 125 volts open circuit output. This permits full deflection of 5XP CRT, or 2-inch deflection of 5CP tubes. Rise time 0.0026 μsec; can amplify milli-microsecond pulses; gives over 100 mc bandwidth to your standard oscilloscope. 460A, $185.00; 460B, $225.00. Connecting cables, plugs, accessories—prices on request.

-hp- 450A Amplifier—general purpose instrument, 20 db or 40 db gain, for use wherever wide frequency range and high stability are needed. 10 cps to 1 mc. Negligible phase shift, no spurious responses. $140.00

-hp- POWER SUPPLIES

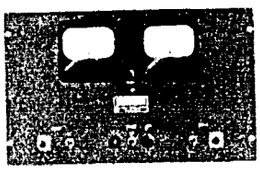


-hp- 715A (illustrated) is a versatile source of regulated beam and reflector voltage for operating most test bench klystron tubes. Beam voltage 250 to 400 v; reflector voltage 10 to 900 v; 6.3 v filament. Internal, 1,000 cps square wave modulation, also 60 cps FM modulation, both on reflector voltage. $300.00

-hp- 710A—Highly stable regulated dc supply, output variable 180 to 360 v at 75 ma., 6.3 v filament. Either terminal may be grounded. Total hum and noise less than 5 mv. $85.00

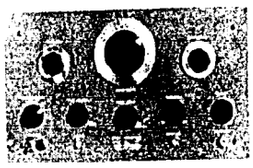
-hp- 712A. Stabilized, variable power supply providing 0 to 500 v at 200 ma and 1/2% regulation. Also variable bias voltages, 0 to 150 v at 5 ma, and 6.3 v filament at 10 amps. Main supply completely metered. Either terminal may be grounded. Hum less than 8 mv. For laboratory, production or general use. $350.00

-hp- 520A NUCLEAR SCALER



-hp- 520A is a new, high-speed 10 mc scaler offering utmost reliability in nuclear counting and frequency measurements. Capable of scaling pulses at rates up to 10,000,000 pps. Has double-pulse resolving time of 0.1 μsec; triple-pulse resolving time of 0.2 μsec. Two-decade circuit gives scaling factor of 100; residual counts are indicated by two panel meters with combined capacity of 100 counts. Instrument may be used with existing low speed scalers to provide any desired count capacity. $600.00

-hp- 212A PULSE GENERATOR



Provides continuously variable high power "fast pulses" of superior wave form. Combines broad general usefulness with 0.02 μsec rise and decay time to meet requirements of radar, TV and nuclear work. Pulse length variable 0.07 to 10 μsec; minimum overshoot; 50 watt peak power (50 v to 50 ohms loads). Low impedance means accurate pulses can be delivered at a distance from the instrument. Repetition rate variable 50 to 5,000 pps; controlled internally or externally. Synchronizing pulses available in advance of or following, output pulse. $550.00

Data Subject to Change Without Notice. Prices f. o. b. Factory.

TYPE ML—	DESCRIPTION
2C39A	Forced-air-cooled triode for use as an UHF oscillator, frequency multiplier or r.f. amplifier. Suited to cavity-type circuits. Features include low interelectrode capacitances, high (closely-controlled) transconductance, and high plate dissipation. Cathode is indirectly heated, oxide-coated disc.
4/125A	Convection-cooled tetrode for use as a modulator, amplifier, or oscillator in broadcast or communication service. Forced-air cooling of the envelope is required at frequencies above 30 megacycles. Thoriated-tungsten filament.
4/250A	Convection-cooled tetrode for use as a modulator, amplifier, or oscillator in broadcast or communication service. Forced-air cooling is required on the plate. Forced-air cooling of the envelope is required at frequencies above [illegible]. Thoriated-tungsten filament.
207	Water-cooled triode for use as a modulator, amplifier, or oscillator in broadcast, communication or industrial service. Grid and plate incorporate [illegible] glass seals. Pure-tungsten filament.
212E	Convection-cooled triode for use as a modulator, amplifier, or oscillator in broadcast or communication service. Thoriated-tungsten filament.
220C	Water-cooled triode for use as a modulator, amplifier, or oscillator in broadcast or communication service.
220CA	Forced-air-cooled triode for use as a modulator, amplifier, or oscillator in broadcast and communication service. Pure-tungsten filament.
228A	Water-cooled triode for use as a modulator, amplifier, or oscillator in broadcast or communication service. Pure-tungsten filament.
232B	Water-cooled triode for use as an amplifier or oscillator in broadcast or communication service. Pure-tungsten filament.
240B	Water-cooled triode for use as a modulator, amplifier, or oscillator in broadcast, communication or industrial service. Incorporates integral-anode water jacket. Pure-tungsten filament.
241B	Convection-cooled triode for use as a modulator, amplifier, or oscillator in broadcast or communication service. Thoriated-tungsten filament.
242C	Convection-cooled triode for use as a modulator, amplifier, or oscillator in broadcast or communication service. Thoriated-tungsten filament.
279A	Convection-cooled triode for use as a modulator, amplifier, or oscillator in broadcast or communication service. Thoriated-tungsten filament.
298A	Water-cooled, high-power triode for use as a modulator, amplifier, or oscillator in broadcast or communication service. Incorporates integral-anode water jacket. Pure-tungsten filament.
298B	Water-cooled, high-power triode for use as an amplifier or oscillator in broadcast service. Incorporates integral-anode water jacket. Pure-tungsten filament.
342A	Water-cooled triode for use as an amplifier or oscillator in broadcast, communication service. Pure-tungsten filament.

BROADCAST, COMMUNICATIONS, and INDUSTRIAL POWER TUBES

TYPE ML—	DESCRIPTION
343A	Water-cooled triode for use as a modulator, amplifier, or oscillator in [illegible] or communication service. Pure-tungsten filament.
343AA	Forced-air-cooled triode for use as a modulator, amplifier, or oscillator [illegible] cast or communication service. Pure-tungsten filament.
356*	Water-cooled triode for use as a modulator, amplifier, or oscillator in [illegible] communication and industrial service. Replaces Type 5771 tube [illegible] Type 880 tube with reduction in filament power. Includes sturdy kovar [illegible] seals. Thoriated-tungsten stress-free filament.
357B	Convection— or forced-air-cooled triode for use as a modulator, [illegible] oscillator in AM and FM broadcast or communication service. Thoriated [illegible] filament.
379A	Convection-cooled triode for use as a modulator, amplifier, or oscillator [illegible] cast or communication service. Thoriated-tungsten filament.
381	Forced-air-cooled triode for use as a UHF plate-pulsed oscillator, frequency [illegible] plier, or power amplifier. Suited to cavity-type and parallel-line circuits. [illegible] include low interelectrode capacitances, high (closely-controlled) [illegible] ance, and high plate dissipation. Cathode is indirectly-heated, oxide-coated.
450TH	Convection-cooled triode for use as a modulator, amplifier, or oscillator [illegible] cast, communication, or industrial service. Thoriated-tungsten filament.
805	Convection-cooled triode for use as a modulator, amplifier, or oscillator [illegible] cast or communication service. Thoriated-tungsten filament.
813	Convection-cooled beam-power pentode for use as a modulator, amplifier, [illegible] lator in broadcast or communication service. Thoriated-tungsten filament.
814	Convection-cooled pentode for use as a modulator, amplifier, or oscillator [illegible] broadcast or communication service. Thoriated-tungsten filament.
833A	Forced-air or convection-cooled triode for use as a modulator, amplifier or [illegible] in broadcast, communication, or industrial service. Thoriated-tungsten [illegible]
846	Water-cooled triode for use as an amplifier or oscillator in broadcast or [illegible] cation service. Pure-tungsten filament, redesigned for improved life.
880	Water-cooled triode for use as a modulator, amplifier, or oscillator in [illegible] communication, or industrial service. Incorporates sturdy kovar-to-glass [illegible] ruggedized electrode structures. Pure-tungsten, stress-free filament.
889A	Water-cooled triode for use as a modulator, amplifier, or oscillator in [illegible] communication, or industrial service. Incorporates sturdy kovar-to-glass [illegible] ruggedized electrode structures. Pure-tungsten, stress-free filament.
889RA	Forced-air-cooled triode for use as a modulator, amplifier, or oscillator in [illegible] communication, or industrial service. Incorporates sturdy kovar-to-glass [illegible] ruggedized electrode structures. Pure-tungsten, stress-free filament.
891	Water-cooled triode for use as a modulator in broadcast or communication [illegible] Incorporates kovar-to-glass seals. Pure-tungsten filament.
891R	Forced-air-cooled triode for use as a modulator in broadcast or communication [illegible] service. Incorporates kovar-to-glass seals. Pure-tungsten filament.

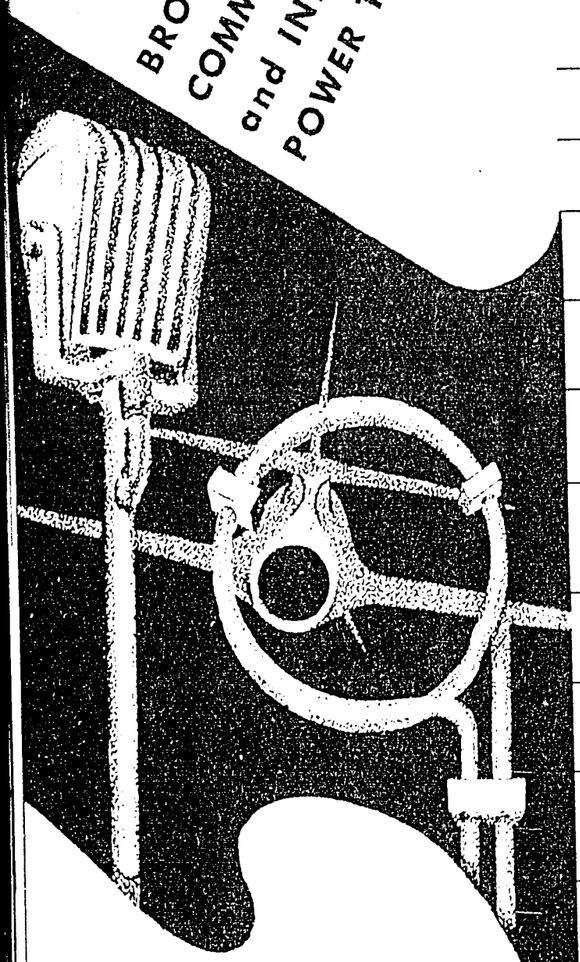
BROADCAST, COMMUNICATIONS, and INDUSTRIAL POWER TUBES



TYPE ML—	DESCRIPTION
892	Water-cooled triode for use as a modulator, amplifier, or oscillator in communication, or industrial service. Incorporates kovar-to-glass seals, thoriated-tungsten filament.
892R	Forced-air cooled triode for use as a modulator, amplifier, or oscillator in communication, or industrial service. Incorporates sturdy kovar-to-glass seals. Pure-tungsten filament.
893A	Water-cooled triode for use as a modulator, amplifier, or oscillator in communication, or industrial service. Pure-tungsten filament designed for use from single-, three-, or six-phase power supply.
893AR	Forced-air-cooled triode for use as a modulator, amplifier, or oscillator in communication, or industrial service. Pure-tungsten filament designed for use from single-, three-, or six-phase power supply.
5530*	Forced-air-cooled triode for use as a modulator, amplifier, or oscillator in communication, or industrial service. Especially suited to high-quality FM operation. Incorporates sturdy kovar-to-glass seals. Thoriated-tungsten stress-free filament.
5541*	Forced-air cooled triode for use as a modulator, amplifier, or oscillator in communication, or industrial service. Especially suited to high-quality FM operation. Incorporates sturdy kovar-to-glass seals. Thoriated-tungsten stress-free filament.
5604*	Forced-air cooled triode for use as a modulator, amplifier, or oscillator in communication, or industrial service. Designed especially for pulsing applications. Incorporates sturdy kovar-to-glass seals, ruggedized electrode structures and heavy-wall anode. Pure-tungsten filament.
5606*	Water-cooled triode for use as a modulator, amplifier, or oscillator in communication, or industrial service. Replaces Type 892 tube electrically. Pure filament is not required. Designed especially for industrial applications. Incorporates sturdy kovar-to-glass seals and ruggedized electrode structures. Pure-tungsten, stress-free filament.
5619*	Water-cooled triode for use as a modulator, amplifier, or oscillator in communication, or industrial service. Designed especially for pulsing applications. Incorporates sturdy kovar-to-glass seals, ruggedized electrode structures, and heavy-wall anode. Pure-tungsten filament.
5658*	Water-cooled triode for use as a modulator, amplifier, or oscillator in communication, or industrial service. Replaces Type 880 tube electrically. Designed especially for industrial heating applications. Incorporates sturdy kovar-to-glass seals and ruggedized electrode structures. Pure-tungsten filament.
5666*	Water-cooled triode for use as a modulator, amplifier, or oscillator in communication, or industrial service. Uses Machlett automatic seal. Directly replaces Type 892A electrically. Designed especially for pulsing applications. Incorporates sturdy kovar-to-glass seals, ruggedized electrode structures, and heavy-wall anode. Pure-tungsten, stress-free filament.
5667*	Forced-air-cooled triode for use as a modulator, amplifier, or oscillator in communication, or industrial service. Replaces Type 892RA tube electrically. Designed especially for industrial heating applications. Incorporates sturdy kovar-to-glass seals, ruggedized electrode structures, and heavy-wall anode. Pure-tungsten, stress-free filament.
5668*	Water-cooled triode for use as a modulator, amplifier, or oscillator in communication, or industrial service. Uses Machlett automatic seal. Directly replaces Type 892 tube electrically. Designed especially for pulsing applications. Incorporates sturdy kovar-to-glass seals, ruggedized electrode structures and heavy-wall anode. Pure-tungsten, stress-free filament.
5669*	Forced-air-cooled triode for use as a modulator, amplifier, or oscillator in communication or industrial service. Replaces Type 892R tube electrically. Designed especially for industrial heating applications. Incorporates sturdy kovar-to-glass seals, ruggedized electrode structures and heavy-wall anode. Pure-tungsten, stress-free filament.
5681*	Water- and forced-air-cooled, all-ring-seal triode for high-power AM broadcast, particle-accelerator, and industrial-heating service. Incorporates high-conductivity, gold-plated kovar-to-glass seals, sturdy electrodes, integral water jacket, quick-change water coupling, and heavy-wall copper anode strand, self-supporting, thoriated-tungsten filament.
5682*	Water- and forced-air-cooled, all-ring seal triode for high-power AM and TV broadcasting, particle-accelerator, and industrial heating service. Incorporates high-conductivity, gold-plated kovar-to-glass seals, sturdy electrodes, integral water jacket, quick-change water coupling, and heavy-wall copper anode strand, self-supporting, thoriated-tungsten filament.

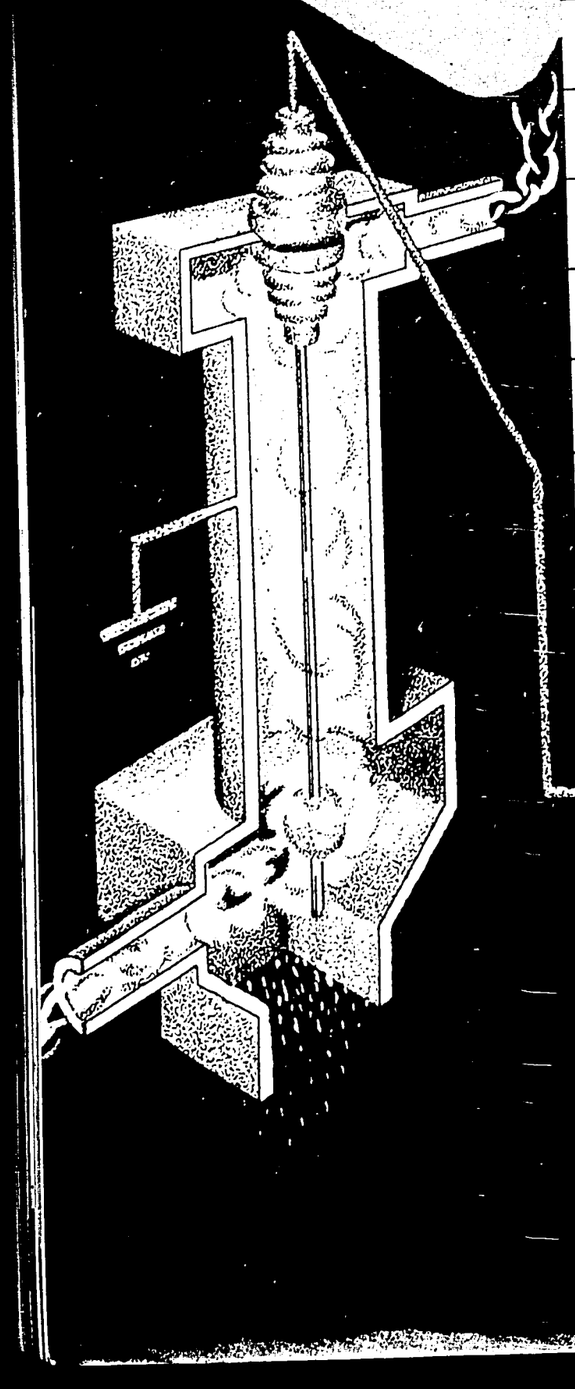
HIGH-VOLTAGE INDUSTRIAL RECTIFIER TUBES



TYPE ML—	DESCRIPTION
102	Air-insulated, high-vacuum, half-wave rectifier tube. Used in smoke, dust, small particle electrostatic precipitation. Sturdy, catenary type, pure filament.
103	Oil-insulated, high-vacuum, half-wave rectifier tube. Used in industrial tions requiring high-voltage, low-current power. Pure-tungsten filament
106	Oil-insulated, high-vacuum, half-wave rectifier tube. Suitable for h cable testing and small particle electrostatic precipitation. Pure-tungsten
108	Oil-insulated, high-vacuum, half-wave rectifier tube. Used in smoke, dus small particle precipitation applications. Sturdy, loop-type, pure-tungsten
110	Air-insulated, high-vacuum, half-wave rectifier tube. Used in industrial tions requiring high-voltage, low-current power. Sturdy, loop-type, pure filament.
115	Air-insulated, high-vacuum, half-wave rectifier tube. Suitable for small electrostatic precipitation and other applications requiring high-v current power. Sturdy, loop-type, pure-tungsten filament.
121	Oil-insulated, high-vacuum, half-wave rectifier tube. Used in industrial requiring high-voltage, low-current power. Sturdy, loop-type pure filament.
120 126	Air-insulated, high-vacuum, half-wave rectifier tube. Used in smoke, dust small particle precipitation applications. Sturdy, loop-type, pure-tungsten ML-120 designed to withstand 140 peak inverse kilovolts, ML-126 inverse kilovolts.
170 180	High-vacuum, half-wave rectifier tube. Useful in high-voltage cable testing of process and exhaust atmospheres, and other small particle precipitation Sturdy, loop-type, pure-tungsten filament. ML-170 designed for air operation, ML-180 oil insulated operation.
222A	Water-cooled, half-wave rectifier for use in broadcast or communication Anode dissipation rating, 25 kilowatts. Pure-tungsten filament.
5575 /100	Air-insulated, high-vacuum, half-wave rectifier tube. Widely used in process and exhaust atmospheres and many particle precipitation Sturdy, catenary type of pure-tungsten filament.
5576 /200	Air-insulated, high-vacuum, half-wave rectifier tube. Widely used in particle precipitation and many high-voltage, high-power applications catenary type of pure-tungsten filament.

NOTES:

Ratings are for CCS, unless otherwise specified.

*Unfiltered—Load current ratings are based on sine-wave voltage input and resistance load without inductive or capacitive effects.

**Filtered—Load current ratings are based on sine-wave voltage input and infinite inductance choke input filter.

MERCURY VAPOR RECTIFIER TUBES

TYPE ML—	DESCRIPTION
255B	Convection- or air-cooled, half-wave rectifier for use in broadcast or comm... equipment. Oxide-coated filament.
266B	Convection- or air-cooled, half-wave rectifier for use in broadcast or comm... equipment. Oxide-coated filament.
267B	Convection-cooled, half-wave rectifier for use in communication equipment. ...coated filament.
315A	Convection-cooled, half-wave rectifier for use in broadcast or comm... equipment. Oxide-coated filament.
319A	Convection-cooled, half-wave rectifier for use in broadcast or comm... equipment. Oxide-coated filament.
321A	Convection-cooled, half-wave rectifier for use in broadcast or comm... equipment. Oxide-coated filament.
575A	Convection-cooled, half-wave rectifier for use in broadcast, commun... industrial equipment. Oxide-coated filament.
673A	Convection-cooled, half-wave rectifier for use in broadcast, commun... industrial equipment. Oxide-coated filament.
857B	Convection- or air-cooled, half-wave rectifier for use in broadcast, comm... or industrial equipment. Oxide coated filament.
866A	Convection-cooled, half-wave rectifier for use in broadcast, commun... industrial equipment. Oxide-coated filament.
869B	Convection- or air-cooled, half-wave rectifier for use in broadcast, comm... or industrial equipment. Oxide-coated filament.
872A	Convection-cooled, half-wave rectifier for use in broadcast, commun... industrial equipment. Oxide-coated filament.
8008	Convection-cooled, half-wave rectifier for use in broadcast, commun... industrial equipment. Oxide-coated filament.

POWER TUBE ACCESSORIES

CATALOG NUMBER	DESCRIPTION	AVAILABLE FOR TUBE TYPES ML—
R-1001	Filament Terminal Connectors, pair, without straps. Assure minimum I^2R loss connections and provide adequate finned cooling area.	356, 5604, 5606, 5619, 5666, 5667, 5668, 5669, 889A, 889RA.
R-1002	Filament Terminal Connectors, pair, complete with straps. Connecting straps are of silver-plated flexible copper provided in 25 inch lengths, unless otherwise specified.	356, 5604, 5606, 5619, 5666, 5667, 5668, 5669, 889A, 889RA.
R-1012	Filament Terminal Connectors, pair, complete with straps. Connecting straps are of silver-plated flexible copper provided in 25 inch lengths, unless otherwise specified.	880, 5658.
R-1003	Grid Terminal Connectors, pair with jumper, without strap.	5604, 5606, 5619, 5666, 5667, 5668, 5669, 889A, 889RA.
R-1009	Grid Terminal Connectors, pair with jumper, without strap.	356, 880, 5658.
R-1004	Grid Terminal Connectors, pair with jumper, complete with strap. Connecting strap is of silver-plated flexible copper provided in 25 inch lengths, unless otherwise specified.	5604, 5606, 5619, 5666, 5667, 5668, 5669, 889A, 889RA.
R-1005	Grid Terminal Connectors, pair with jumper, complete with strap.	356, 880, 5658.
R-1006	Filament and Grid Terminal Connectors, two pairs, with grid jumper but without connecting straps.	5604, 5606, 5619, 5666, 5667, 5668, 5669, 889A, 889RA.
R-1010	Filament and Grid Terminal Connectors, two pairs, with grid jumper but without connecting straps.	356, 880, 5658.
R-1007	Filament and Grid Terminal Connectors, two pairs, with grid jumper and connecting straps.	5604, 5606, 5619, 5666, 5667, 5668, 5669, 889A, 889RA.
R-1008	Filament and Grid Terminal Connectors, two pairs, with grid jumper and connecting straps.	356, 880, 5658.
R-1019	Water Jacket, complete with O-ring gasket and helical water guide.	5619.
R-1058	Water Jacket, complete with O-ring gasket.	356, 880, 5658.
R-1066	Water Jacket, complete with O-ring gasket and helical water guide.	5666.
R-1068	Water Jacket, complete with O-ring gasket and helical water guide.	5668.
R-1020	O-ring Gasket, for R-1019, R-1066, R-1068 water jackets.	5619, 5666, 5668.
R-1021	O-ring Gasket, for R-1058 water jacket.	880, 5658, 5771.
R-1038	Gasket, for water jacket.	889A.
R-1043	Gasket, for water jacket.	207, 891, 892, 5606.
R-1046	Gasket, for water jacket.	846.
R-1049	Gasket, for water jacket. Flat-ring type.	356, [illegible]
R-1052	Gasket, for water jacket.	893A.
R-1022	Gasket, for water jacket. (Small)	220C, 232B, 343A
R-1023	Gasket, for water jacket. (Large)	220C, 232B, 343A
R-1028	Gasket, for water jacket. (Small)	228A.
R-1029	Gasket, for water jacket. (Large)	228A.
R-1048	Gasket, for water jacket.	298A.
R-1030	Mounting Plate with Mounting Clamp, for R-1019, R-1066, R-1068 water jackets.	5619, [illegible]
R-1032	Mounting Plate, for mounting of R-1019, R-1066, R-1068 water jackets.	5619, [illegible]
R-1034	Standoff Insulator with Mounting Clamp, for R-1019, R-1066 water jackets.	5619, [illegible]
R-1067	Air-Deflector, for deflection of anode cooling air to dish, terminal seals and terminal connectors.	5667, [illegible]
R-1064	Air-Deflector, for deflection of anode cooling air to dish, terminal seals and terminal connectors.	5667, [illegible]

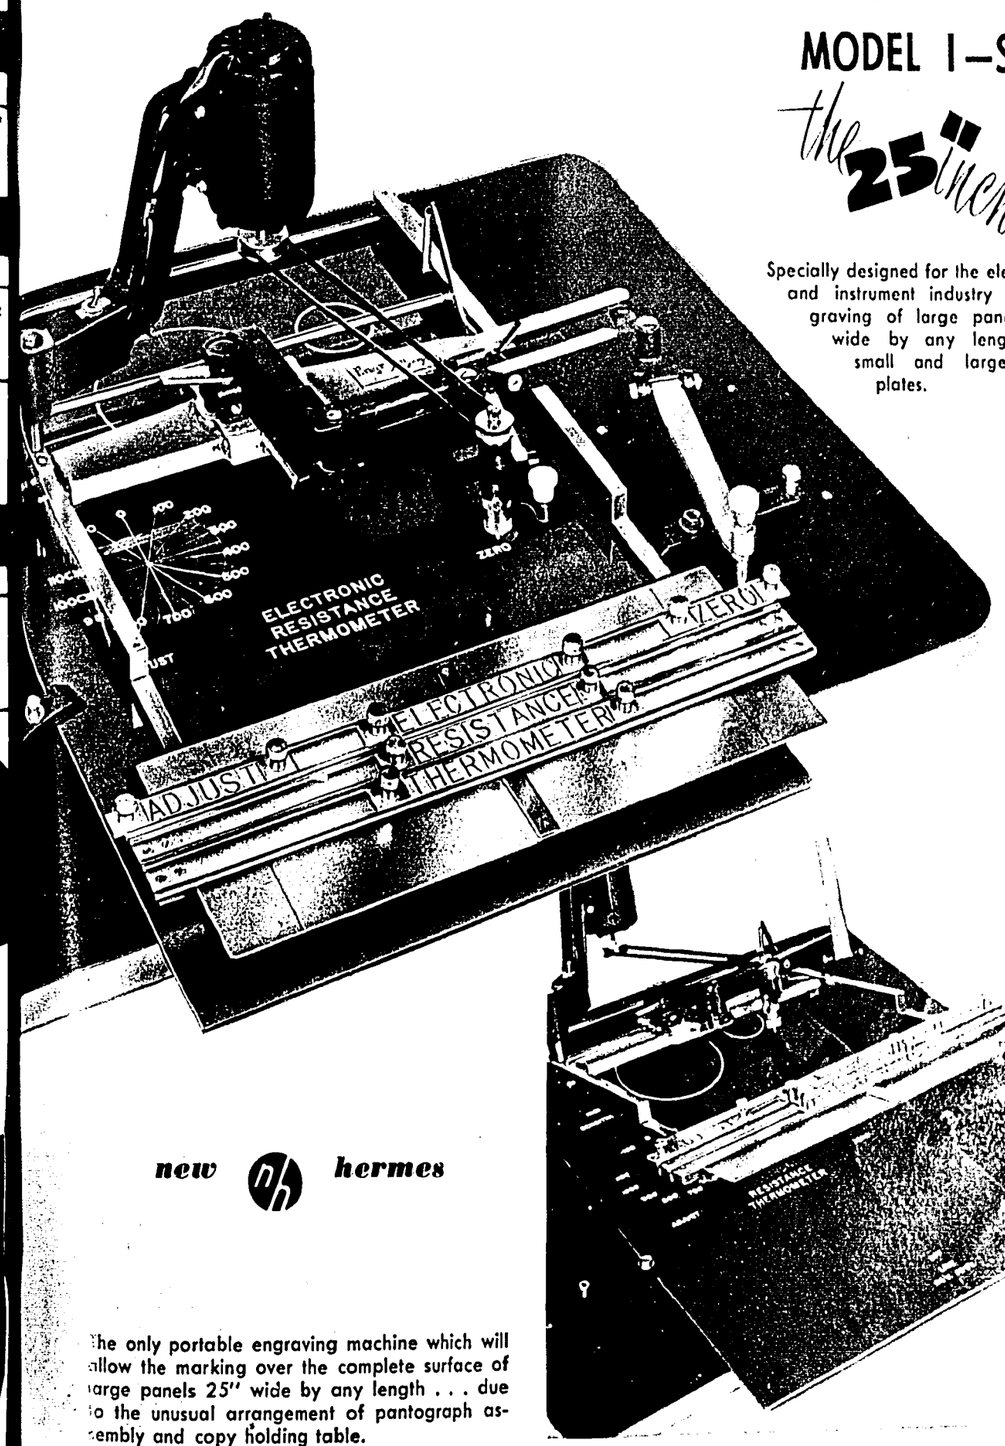
Introducing the new Engravograph

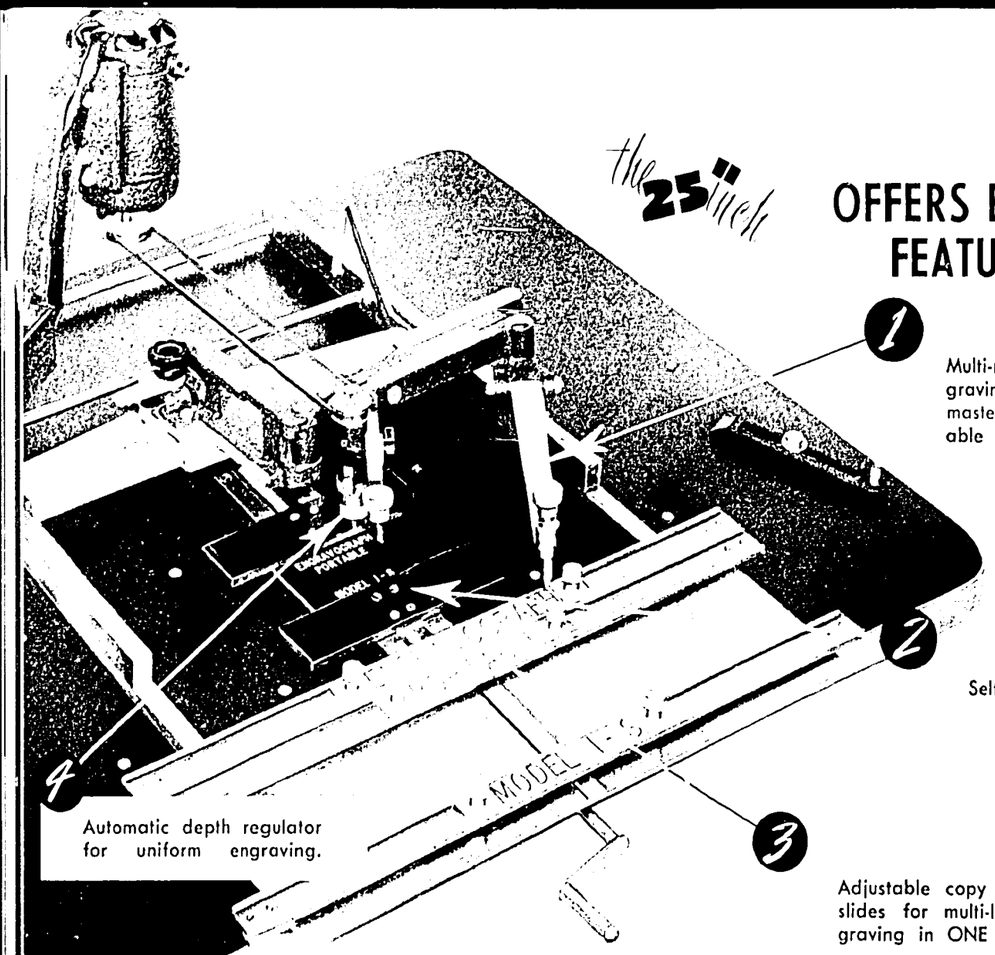


MODEL 1–S
the 25 inch

Specially designed for the electronics and instrument industry for engraving of large panels 25" wide by any length and small and large name plates.

new nh *hermes*

The only portable engraving machine which will allow the marking over the complete surface of large panels 25" wide by any length . . . due to the unusual arrangement of pantograph assembly and copy holding table.



the 25" OFFERS EXCLUSIVE FEATURES . . .

1. Multi-ratio tracing arm for engraving of 15 sizes from ONE master template - easily adjustable without disassembling.
2. Self-centering work holder.
3. Adjustable copy holding slides for multi-line engraving in ONE set up.
4. Automatic depth regulator for uniform engraving.

Tracer guided FOR UNSKILLED LABOR

SPECIFICATIONS

Tracing Arm	Adjustable to 15 sizes from ONE master template	Ratios from 1.2½ up to 1:6 and all intermediates
Cutter Spindle	Sealed ball bearings	⅛" cutter
Depth Regulator	Adjustable for uniform engraving	Micrometer setting from .001 depth up to .015
Engraving Area	Maximum area which can be covered in ONE set up using ratio 1 2½	9" x 2" or 6" x 3"
Work Capacity	Panels up to ½" thickness can be engraved over the whole surface up to	25" wide by any length
Work Holder	Self-centering	Maxim. opening 8" removable for larger sizes
Copy Table	Stainless steel	6" x 16"
Copy Holding Slides	Adjustable for any spacing. Accepting copy type ⅝"	18" long
Motor	Universal continuous duty	1/12 h.p. 115V*
Machine Base	Formica	24" x 30"
	Weight - Net 41 lbs. Gross 61 lbs.	

* 220 volt motors can be supplied

OUR SPECIALTY

SCIENTIFIC ELECTRIC

105-119 MONROE STREET GARFIELD, NEW JERSEY

DESIGNERS AND MANUFACTURERS OF HIGH FREQUENCY AND HIGH VOLTAGE EQUIPMENT SINCE 1921

During this time we have built up the technical "know-how" and engineering experience which can prevent you from making costly errors in equipment selection and application.

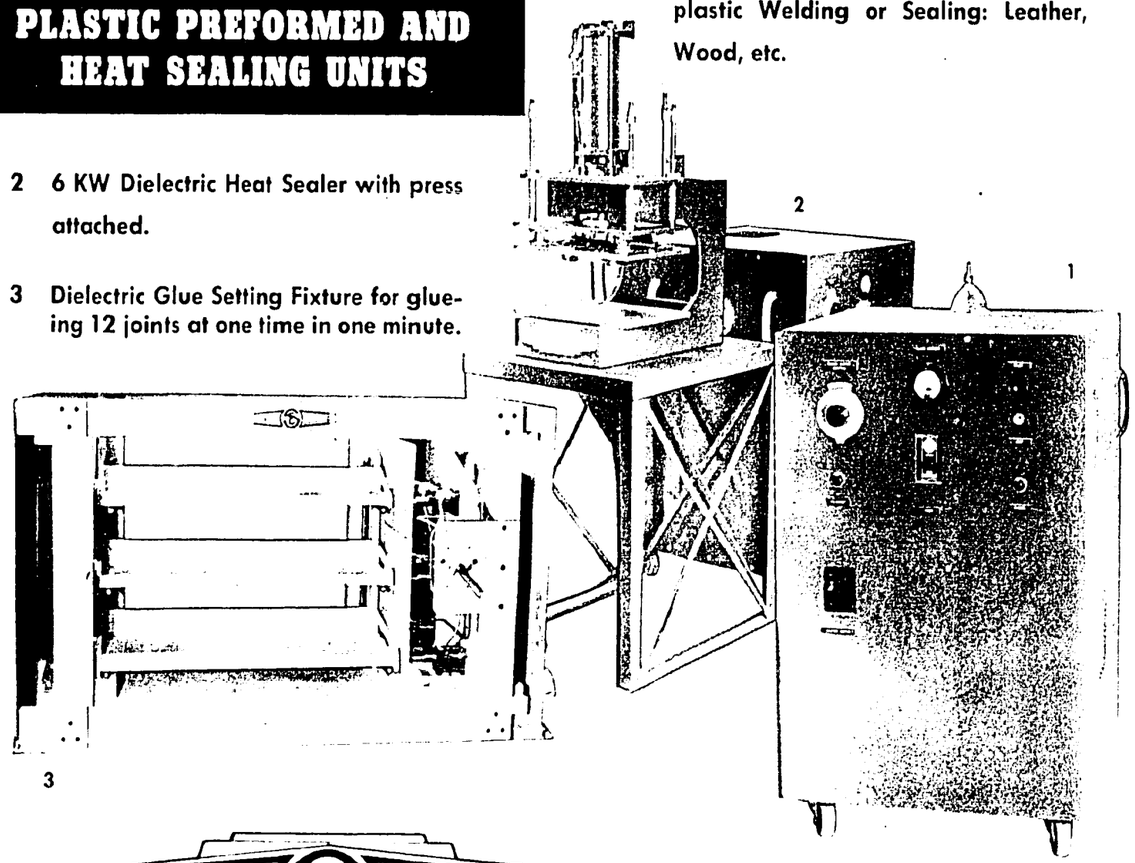
Our units are "standard" in the general usage of the term. They are the products of exhaustive research and field use—and are also made to your individual requirements. Let us solve your electronic equipment problems by giving you exactly the right machine to do a specific job. You'll find our engineers completely qualified to make sound recommendations which generally result in better, faster, quality-controlled production at lower unit cost. Your samples and requirements will bring immediate expert recommendations.

HIGH FREQUENCY DIELECTRIC PLASTIC PREFORMED AND HEAT SEALING UNITS

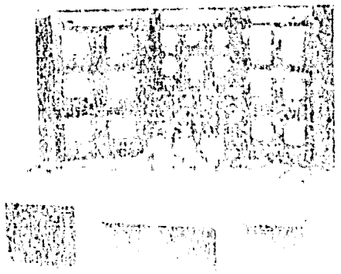
1 **6 KW Dielectric Heat Sealer for Thermoplastic Welding or Sealing: Leather, Wood, etc.**

2 **6 KW Dielectric Heat Sealer with press attached.**

3 **Dielectric Glue Setting Fixture for glueing 12 joints at one time in one minute.**

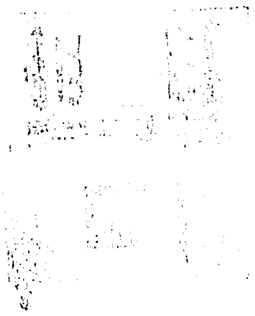


TEST UNITS



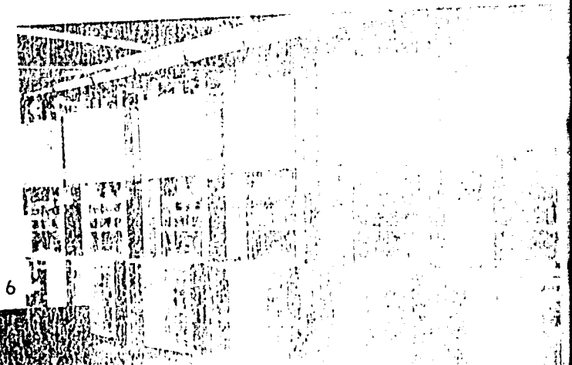
4 This set is designed to give maximum flexibility for development laboratory testing of small multi-element vacuum tubes. Three positive D.C. Power supplies of the series tube regulated type are available. These are continuously variable from 0 to 450 v. at 200 ma. Two negative glow tube regulated supplies are also available and controllable from 0 to 300 v. D.C. Filament supplies variable to 120 v. A.C. and D.C. are also incorporated. A separate regulated supply is available for emission tests. Static characteristics as well as mutual conductance, Mu, and Rp. can be read on a General Radio bridge. Conversion conductance from cut-off to zero bias can be made under standard J.A.N. conditions.

4



5

5 This Universal Cathode Ray tube test set is designed to accommodate all magnetically deflected, magnetically focused types through the 24" size. All power supplies are completely variable regulated and designed for 24 hour per day operation. Scanning is designed to accommodate 55 degree and 70 degree types up to 30 kv second anode. A wide band-pass video amplifier is contained to picture modulate the tube under test. A monoscope signal generator is recommended for supply of video to the set. All standard R.M.A. tests including gas can be made on this set.

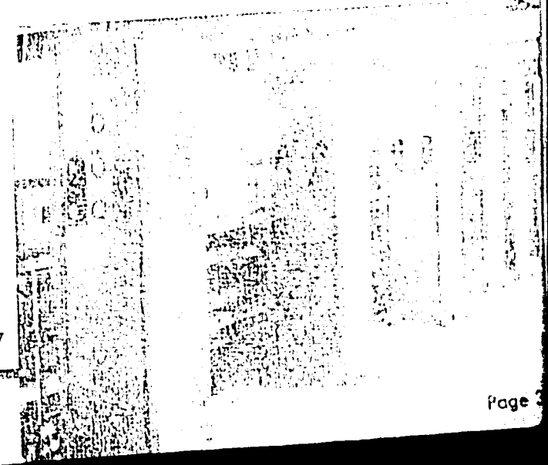


6

SCIENTIFIC ELECTRIC BOMBARDERS

6 Scientific Electric Bombarders in production at one of the largest radio receiving tube manufacturing plants in the East. Approximately 250 Scientific Electric Bombarders are now in use at this plant.

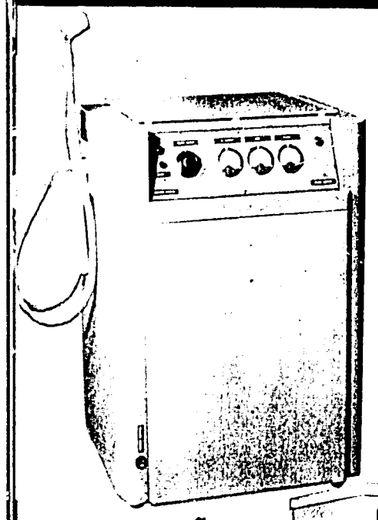
7 Eight 5 KW Bombarders connected to an inline exhaust unit for cathode ray tube production.



7

Bombarders

(Induction Heaters)



a

Although electronic heating is generally regarded as an entirely new technique and the number of manufacturers of equipment for the process is not very large, Scientific Electric enjoys the distinction of being a pioneer in the field. We are designers and manufacturers of electronic heaters of the Induction and Dielectric types; and one of the first to build any kind of equipment for this technique. For more than three decades, leading manufacturers of Electronic, Neon, X-ray, Fluorescent and Cathode Ray TV tubes, have used our custom built equipment for such operations as: Degassing, sealing glass to glass or glass to metal. And in the greater field of electronic heating Scientific Electric High Frequency Generators of all types are now performing a great variety of specific heat treating jobs—economically, faster, and with better results over all previous methods.

Of particular interest to the prospective buyer of electronic heating equipment is the fact that the maximum economies effected by the application of the technique to manufacturing processes, can only be realized by utilizing equipment of the correct frequency and power combination. It is significant that only Scientific Electric in the present market, can offer you a selection of frequencies depending on power required, in wide power range . . . 3½-5-6-7½-10-12½-15-18-25-40-60-80-100-125-250 KW. This means that electronic heating equipment produced by Scientific Electric is tailored to your needs . . . fitted perfectly to the task entrusted to it, enabling you to keep your initial investment in equipment to a minimum while affording you all the proven advantages of electronic heating.

PROOF BY TRIAL...is the motto of Scientific Electric

In our factory showroom we are ready to demonstrate the operation of any Scientific Electric Electronic Heater in its application to your own specific heating problem. Our laboratory engineers will gladly, and without obligation, make a study of the process to which you wish to apply electronic heating. They will then make recommendations and demonstrations on the equipment best suited for your needs. Before you invest in any electronic heating equipment, you will be able to observe at first hand how your heat treating jobs can be accomplished better . . . faster . . . and more economically with Scientific Electric equipment. You will be able to estimate the actual saving in cost of operation to a degree that will make it possible to approximate the time required to amortize the cost of equipment with the savings resulting from its use.

Submit your heat treating problems to Scientific Electric with the assurance that absolute secrecy will be observed, if so desired. Investigate the possibilities of applying Electronic Heating in your manufacturing processes now. Make a survey and consult with us at your earliest opportunity.

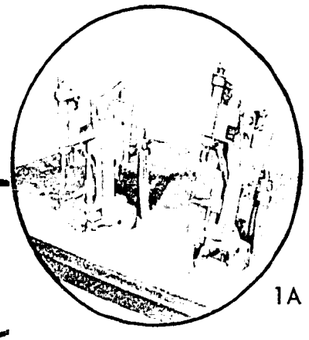
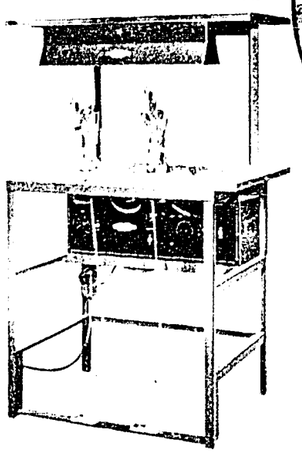
SPOT WELDERS



1A

1A–**Model J Spot Welder** complete with 2 K.V.A. 110 Volt, 50 or 60 Cycle Power Supply, including Power Control, Foot Pedal and Electronic Timer.



1

1—**Model JT Spot Welder** complete with 2 K.V.A. 110 Volt, 50 or 60 Cycle Power Supply including Power Control, Foot Pedal and Electronic Timer. Unit mounted ready for operation with metal framework bench designed for side by side production or may be used individually. For convenience of operator a fluorescent lamp is mounted on each bench and serves as a work light and pilot for the electronic timer.

FEATURES:

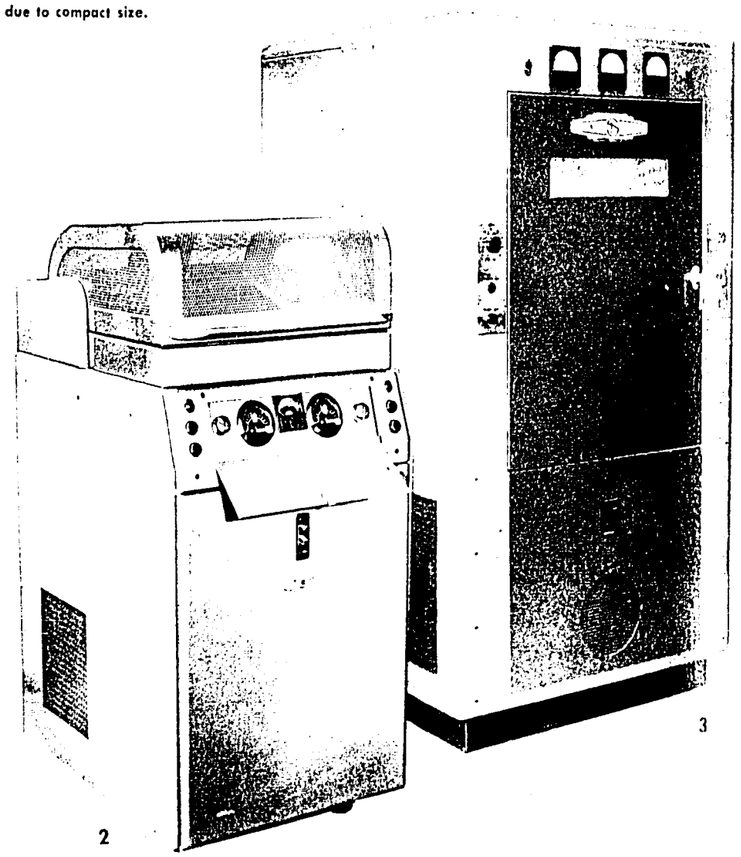
1) Micrometer pressure adjustment ½ to 9 lbs. 2) 30 degree adjustable base. 3) Oiless bearings. 4) Adjustable master micro switch for timer. 5) Heavy duty aluminum frame. 6) Adjustable electrode holder. 7) Vertical motion eliminates rocker arm roll. 8) Sturdy chucks allow quick and simple electrode adjustment. 9) Narrow width suitable for side by side mounting (3½ inches). 10) Substantial work area due to compact size.

DIELECTRIC HEATERS

2 10 KW Preform Dielectric Heating unit with two timers

3 30 KW Dielectric Custom Built High Frequency Heating Unit

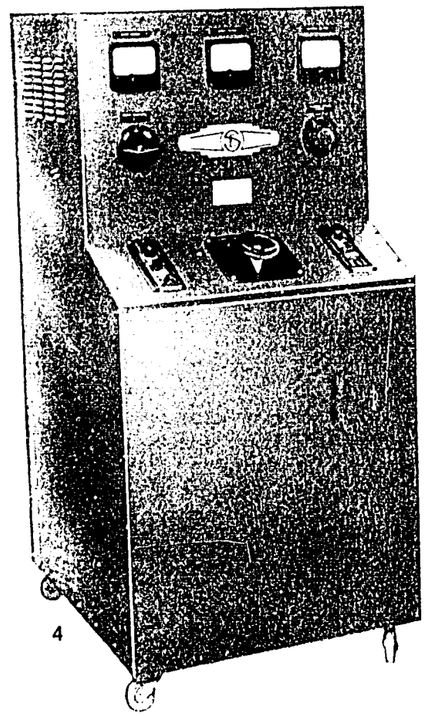
These units are custom built to meet your specific requirements. Their tremendous advantage in production speed and quality make them a necessity to many fields of manufacturing. No technical skill is required by the operator. Working conditions are cleaner.
We will be glad to advise you on the particular type of unit needed to perform the job you need. Let us have your requirements.



2

3

INDUSTRIAL HIGH VOLTAGE POWER SUPPLIES



4

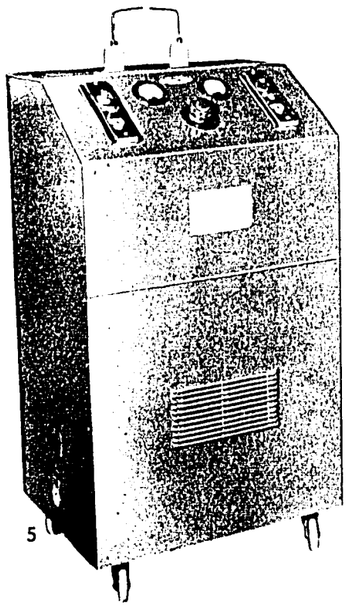
4 High Voltage Rectifier, 0-40 KV Stepless, 100 MA input 3 phases 220 volts 50-60 cycles

5 High Voltage Power Supply Stepless 0-20 KV 35 MA, 1 phase 110 volts 50-60 cycles custom built

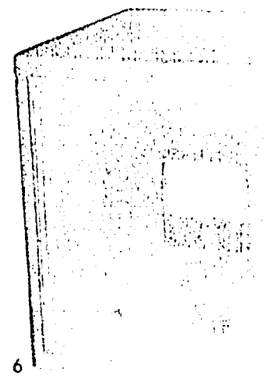
6 40 KV at .25 MA High Voltage R.F. Power Supply

High Voltage .... low current positive or negative ground up to 140 KV units, are used in laboratories and on production lines for electrostatic coatings, insulation cable and cathode ray tube testing, etc.

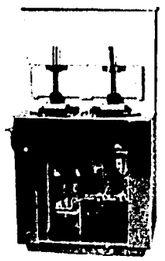
We will welcome the opportunity to give you complete information on this unit and any other one shown here and make recommendations to your specific requirements.



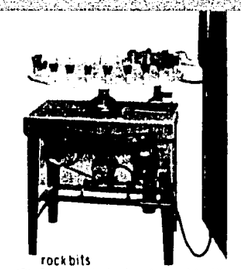
5



6

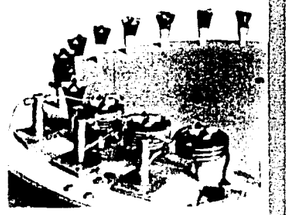


(1) Setup for induction soldering battery cable lugs.

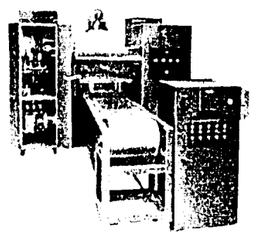


rock bits

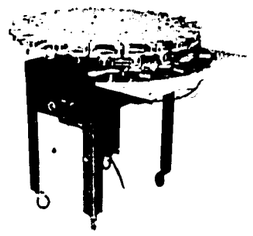
(2) 24 head indexing turntable illustrating the coils loaded and ready for operation. The production is determined by the size of the part and the power employed.



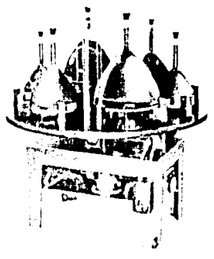
(2)(3) Close view of 24 head indexing turntable illustrating the coils loaded and ready for operation. The operator loads and unloads the rock bits into the water quench when the parts are indexed out of the range of the heating coils.



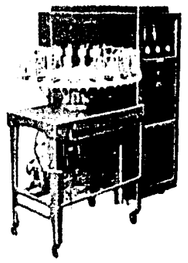
(4) Front view of Belt Conveyor using 3-6 KW dielectric heating units and control cabinet showing exposure of one 6 KW dielectric heating unit.



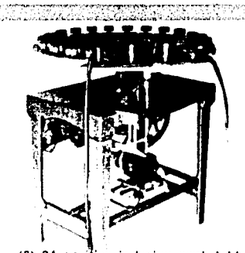
(5) Fully automatic fixture for induction soldering loudspeaker magnets to frames.



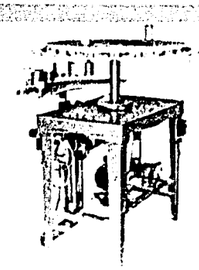
(6) Preheating turntable for cathode ray tubes unit used for pre-heating filaments before testing.



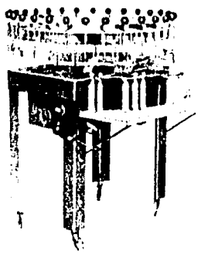
(7) 18 KW induction heater and automatic soldering turntables for cigarette lighters.



(8) 24 position indexing work table for soft soldering automatic sprinkler safety links. A special solder which will melt at 165° is used. Production of this table with a 10 KW high frequency induction heating unit is 4 every 6 seconds.

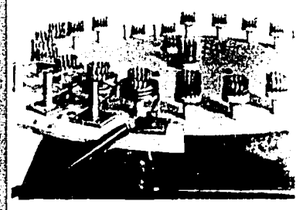


(9) Melting metal for production of precision castings with a 24 position indexing turntable used with 6 25 KW high frequency induction heating units.

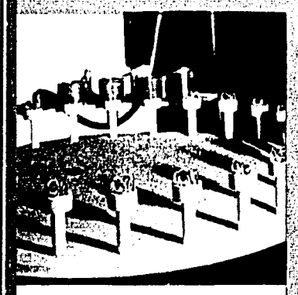


(10) Automatic soldering turntable for cigarette lighters.

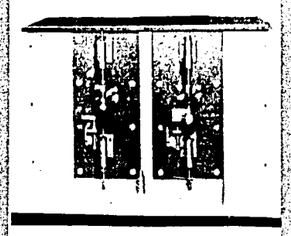
(11) Soldering cigarette lighters with a 25 KW Induction Heater (with turntable).



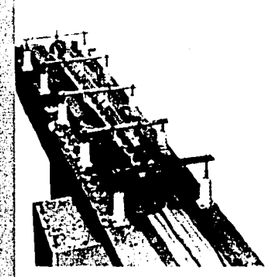
(12) Soldering radio trimmer condensers at a rate of 15 pieces per six seconds with a 25 head turntable. The brass condenser is attached to a specially treated glass tubing preloaded on a special fixture.



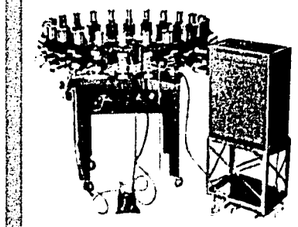
(13) 24 position indexing work table for silver soldering sterling silver rings on a 6 cycle for 5 rings.



(14) Sealing glass to metal for "Lighthouse" Tube manufacturing.



(15) Continuous conveyor silver soldering unit.



(16) 24 position plastic high frequency belt sealer.

APPLICATIONS Here are a few typical examples of Scientific Electric custom built electronic equipment on the production line. Each one is designed and built expressly to meet specific requirements. We welcome the opportunity to discuss your need for similar machines.

SCIENTIFIC ELECTRIC

105-119 MONROE STREET GARFIELD, NEW JERSEY

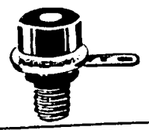
It's Sound Planning to Count On SMITH Components

INSULATED PHONE TIP JACK

Accommodates all standard insulated and non-insulated phone tip plugs. Recommended for use with our Nos. 200 and 201 phone tip plugs. Available in Black, Red, Yellow, Green and Blue. Mounts in a 5/16" hole. Complete with insulating shoulder washer and nut. Specify color.

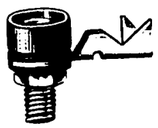
No.	Head Dia.
202	5/16"
223	1/2"

INSULATED BANANA JACK



Accommodates all standard banana type plugs. Mounts in a 5/16" hole in panels up to 3/8" thick. Insulated head 7/16" dia. available in Black, Red, Yellow, Green and Blue. Complete with insulated shoulder washer, soldering lug, and nut. Specify color. No. 205

INSTRUMENT BANANA JACK



Made of brass, nickel plated. Jack receptacle countersunk to accept all standard Banana type plugs for a snug and positive contact. Insulated head 1/2" diameter, supplied complete with insulating washer, lock washer, heavy duty soldering lug and nut. Available in Black, Red, Yellow and Green. Specify color.

No. 219

INSULATED MIDGET BANANA JACK

Accommodates all standard banana type plugs. Mounts in a 3/8" hole in panels up to 1/4" thick. Supplied with soldering lug; overall length 1 1/4". The insulated head as well as the washer insulates the body of jack from the panel to prevent possibility of shock or grounding. Insulated head 3/8" dia. Available in Black and Red colors. Specify color. No. 221

INSULATED COMBINATION JACK

This combination jack accommodates all standard plugs, of the phone tip type or banana type construction. Mounts in a 5/16" hole in panels up to 1/2" thick. Overall length 1 3/8". Complete with insulating shoulder washer and nut. Insulated head available in Black, Red, Yellow and Green. Specify color.

No. 206

BANANA PLUG AND TIP JACK COMBINATION

Insulated banana type plug of the spring type construction. Fits all standard banana type jacks. Rear of plug has standard phone tip jack inserted which assures positive contact and accommodates all standard phone tips so that a phone tip plug can be converted to a banana plug. Insulated handle 1 1/8" long, overall length 1 5/8". Available in Black, Red, Yellow and Green colors. Specify color.

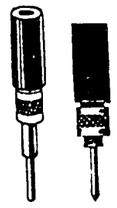
No. 214

COMBINATION BINDING POST

Knurled insulated head binding post. Top of post accommodates standard banana plugs. Hole in side of stud accommodates any standard phone tips. Length 1 3/8" overall with head open, 1 1/4" with head closed. 6-32 x 1/2" long stud supplied with 2 hex nuts. Black and Red. Specify color.

No. 220

INSULATED SOLDERLESS TIP PLUGS



#200 #201

Insulated sleeve 3/4" long, available in Black, Red, Yellow, Green and Blue. Fits all standard phone tip jacks. Wire is fed through sleeve of plug and wrapped around screw portion. The sleeve and the knurled nut provide insulation where unnecessary. Specify color.

No.	Length
200	1"
201	1 1/2"

FIBRE HANDLE SOLDERLESS PLUGS

Fibre handles available in Black and Red colors.

No.	Length
230	1 1/8"
231	1 5/8"

INSULATED SOLDERLESS BANANA PLUGS

Spring type construction designed to fit all types of banana jacks. Plug portion made of Hexagon brass, designed to set into our No. 219 Banana Jack. Small machine screw stud screws into rear of plug so that wire can be wrapped around and tightened without soldering. All external set screws removed to prevent possibility of shock or grounding. Insulated handle 1" long, overall length 1 1/4", cable opening 3/16". Available in Black, Red, Yellow and Green. Specify color. No. 212

Spring type construction with machine screw stud. Same as described above except that plug portion is not Hexagon but made of round brass. Handle is only 3/4" long, overall length 1 1/4", cable opening 3/16". Available in Black, Red, Yellow and Green. Specify color. No. 211

INSULATED BANANA PLUG
Spring Type

Fits all standard banana type jacks. Wire is provided in side of plug to solder or without soldering. Cable opening 3/16". Available in Red, Black, Yellow and Green. Specify color.

No.	Sleeve	Overall
204	1/2"	1"
214	1 1/4"	1 3/4"

INSULATED BANANA PLUG
Split Type

Fits all standard banana type jacks. Wire is provided in side of plug to solder or without soldering. Cable opening 3/16". Available in Red, Black, Yellow and Green. Specify color.

No.	Sleeve	Overall
213	1/2"	1"
215	1 1/4"	1 3/4"

PHONO PLUG

Insulated sleeve 1/2" long, available in Black, Red, Yellow, Green and Blue. Fits all standard phono tip jacks. Wire is fed through sleeve of plug and wrapped around screw portion. The sleeve and the knurled nut provide insulation where unnecessary. Specify color.

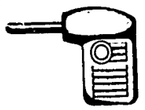
No.	Description
241	Solderless
242	Solder

WE MANUFACTURE A COMPLETE LINE OF ELECTRONIC COMPONENTS. ITEMS SHOWN ARE FROM OUR STANDARD LINE OF PRODUCTION. **SEND TODAY FOR OUR COMPLETE 1951 CATALOG.** WE ALSO MANUFACTURE TO MEET YOUR SPECIAL REQUIREMENTS. INQUIRIES WELCOMED.

HERMAN H. SMITH, INC.

436 18th STREET, BROOKLYN 15, N. Y.

MOLDED METER TIP PLUG



Molded Meter Type plug molded in two halves for easy assembling with screw and nut. Brass nickle plated tip fits in all standard tip jacks. Available in Red and Black. Specify color. Also available on attractive display card consisting of 24 envelopes, one each Red and Black Tip per envelope.

No. 235 Tip Plug

METER TIP TEST LEAD

Test Leads with 50" rubber covered kinkless test lead wire. Molded Plastic finger-grip tips on one end and 5" plastic test prod handles on other end. Supplied in two types, solderless tip or needle tip prod handles.

No.	Type
625	Solderless Prods
626	Needle Tip Prods

INSULATED ALLIGATOR CLIP

Embodies our No. 300 Alligator Clip. Insulated handle ¾" long and will accommodate all standard banana type plugs. Insulated handle available in Black and Red colors. Specify color. No. 301

ALLIGATOR CLIP PHONE TIP JACK

Insulated alligator clip with phone tip jack in rear of handle. The jack portion will accommodate all standard phone tip plugs. Handle 1" long, overall length 2⅝". Available in Black and Red colors. Specify color. No. 304

ALLIGATOR CLIP COMBINATION JACK

Insulated alligator clip with combination jack in rear of handle. Jack will accommodate standard phone tip plugs or banana plugs. Handle 1⅛" long, overall length 3". Available in Black and Red colors. Specify color. No. 305

ALLIGATOR CLIP

Clips are made so that the jaws match accurately, permitting them to grip all sizes wire securely. The barrel of clip will accommodate all standard banana type plugs. Made of steel, cadmium plated. Overall length 2". No. 300

SOLDERLESS TEST PRODS

Insulated handles, available in Black and Red colors. The wire is fed through the insulated handle, and is wrapped around the screw portion of the plug, and then tightened with the knurled nut provided, making soldering unnecessary. Specify color. Cable opening ⅛".

No.	Overall length
302	5¼"
303	6¾"

PHONO NEEDLE TEST PRODS

Insulated handles available in Black and Red colors. Wires can be assembled to the metal tip by unscrewing the tip from the prod handle. Removable chuck for replacing broken needles. Specify color. Cable opening ⅛".

No.	Overall length
317	5"
318	6⅜"

INSULATED SPADE LUG

Insulated sleeve ¾" long, overall length 1⅝", cable opening ⅛". Available in Black and Red. Barrel of the insulated sleeve accommodates all standard type banana plugs.

No.	Type
218	Insulated Lug
129	Lug only

INSULATED SHORT PHONE TIP

Fits all standard phone tip jacks of the insulated or non-insulated types. Insulated sleeve ¾" long, overall length 1¼", cable opening ⅛". Available in Black, Red, Yellow and Green. Specify color.

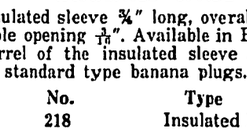
RUBBER TACK BUMPERS



No. 2190 No. 2191

RUBBER FEET BUMPER

—⅝" diameter x 3/32" thick. Recessed to accommodate a self-tapping screw, machine screw, wood screw or a tack. No. 2184

FELT FEET

Available in two types, either with a 6-32 x ⅜" machine screw or with an "Anchor Fast" nail, which will stay in place, and will not back up, pull out, or "pop."

No.	Type
2181	With Machine Screw
2182	With Stronghold Nail

WE MANUFACTURE A COMPLETE LINE OF ELECTRONIC COMPONENTS. ITEMS SHOWN ABOVE ARE ONLY A SAMPLING OF OUR PRODUCTION. **SEND TODAY FOR OUR COMPLETE 1951 CATALOG.** WE ALSO MANUFACTURE ELECTRONIC COMPONENTS TO YOUR SPECIAL REQUIREMENTS. INQUIRIES WELCOMED.

It's Sound Planning to Count On
SMITH Components

BANANA TYPE PLUG

This plug is hexed brass, nickel plated. The spring is made of spring brass assuring positive and lasting contact. Plug is constructed with a 6-32 female thread inside and is supplied with a 6-32 screw and soldering lug. No. 100

BANANA PLUG SPLIT TYPE

Made of hexed brass, heavily nickel plated overall. Will fit all standard banana type jacks. Overall length 1¼". Threaded portion 6-32 x ½" long. Supplied with two 6-32 hexagon nuts.

No. 104

BANANA TYPE PLUG Spring type

Plug and spring are made of brass, nickel plated. The spring type of construction assures positive and lasting contact. Plug is threaded 6-32 and the threaded portion is ½" long. Supplied with two 6-32 hexagon nuts. No. 103

BANANA PLUG JACK

Recommended as the mate for the No. 100 Banana type plug, but will accommodate all standard banana type plugs. Jack is made of brass, heavily nickel plated overall. Mounts in a ¼" hole and will fit in panels up to 1/16" thick. Jack is furnished with ¼-32 nut and soldering lug. No. 101

BANANA PLUG JACK

Will accommodate all standard banana type plugs and specially recommended as the mate for Nos. 103 and 104 banana plugs. Made of brass, nickel plated, and mounts in ¼" hole in panels up to ⅜" thick. Supplied with nut and soldering lug. No. 109

MINIATURE WAFER SOCKETS

Miniature bakelite sockets with brass cadmium plated contacts. XP bakelite top plate 1/16" thick, bottom plate 3/64" thick; high grade spring brass cadmium plated contact; .095 dia. mounting holes.

SEVEN PIN

No.	Description	MTG. Cen.
880	Eyelet only	⅞"

842	Grd Strap and Shield	1"

NINE PIN

890	Eyelet only	1⅛"
891	Eyelet and Shield	1⅛"
892	Grd Strap and Shield	1⅛"

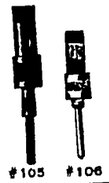
MOLDED MINIATURE SOCKETS

Seven Pin — Saddle Type

Molded of general purpose black bakelite steel cad. plated saddle, .015 thick; contacts high quality spring brass, cad. plated; .098 mtg. holes, 7/32" mtg. centers. Supplied with center shield.

No.	Type
895	Bottom Mount
896	Top Mount

SOLDERLESS PHONE TIPS



These tips are constructed so that the wire fits through the body of the tip, and is wrapped around the screw portion, and tightened with the knurled nut provided, making soldering unnecessary.

No.	Length
105	1⅝"
106	1⅛"

PHONE TIP JACK

Will accommodate all standard phone tip plugs of insulated and non-insulated types. Made of brass, nickel plated. Mounts in a ¼" dia. hole in panels up to ⅜" thick, and is supplied with hexagon nut. No. 107

SOLDER TYPE PHONE TIPS No. 108

Made of brass, nickel plated. Overall length 1". Dia. of tip will fit all standard phone tip jacks.

LARGE DIAMETER PHONE TIP

Material of Brass and Nickel-plated finish. The barrel is drilled extra large to accommodate heavy wire. Diameter hole ⅛"—length of barrel ½" and overall length 1". No. 123

MIDGET PLUGS AND JACKS Banana Type

Midget banana type plugs and jacks, for use where a minimum amount of space is available. Both plugs and jacks made of brass, nickel plated. A hexagon nut is provided with each plug and jack.

No.	Item
111	Plug
112	Jack

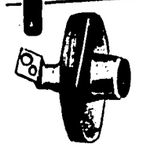
MIDGET PHONE JACK

Signal Corps type J 670—Single open circuit midget phone jack. Mounts in ⅜" hole in panels up to ¼" thick. Bushing is brass, nickel plated. Springs made of phosphor bronze, and the springs are insulated from the frame by heavy duty bakelite washers. No. 122

PHONO ADAPTER ATTACHMENT PLUG

R.C.A. type phono plug. For use with record players, recording and reproducing equipment, etc. Extra long pin for new type jacks and large hole in cap for coaxial cable. No. 125

PHONO JACK



Female for No. 1201 plug. Single open positive grip jack mounted on ¾" bakelite with 1¼" mounting center.

No.
1203

DUAL PHONO JACK

Two positive grip jacks mounted on ¼" bakelite. Double mounting holes spaced ½" x 1½". Jacks are ¾" center to center. Used on recording units and phono players, etc., where dual application is necessary. No. 1214

WE MANUFACTURE A COMPLETE LINE OF ELECTRONIC COMPONENTS. ITEMS SHOWN ABOVE ARE ONLY A SAMPLING OF OUR PRODUCTION. **SEND TODAY FOR OUR COMPLETE 1951 CATALOG.** WE ALSO MANUFACTURE ELECTRONIC COMPONENTS TO YOUR SPECIAL REQUIREMENTS. INQUIRIES WELCOMED.

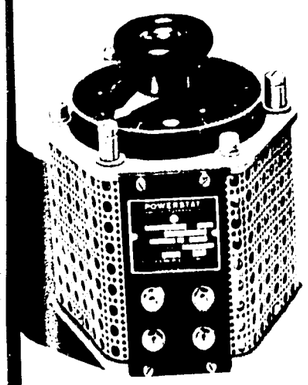
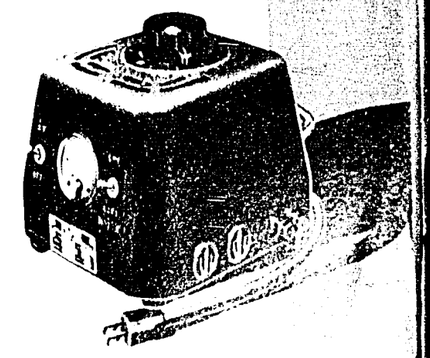
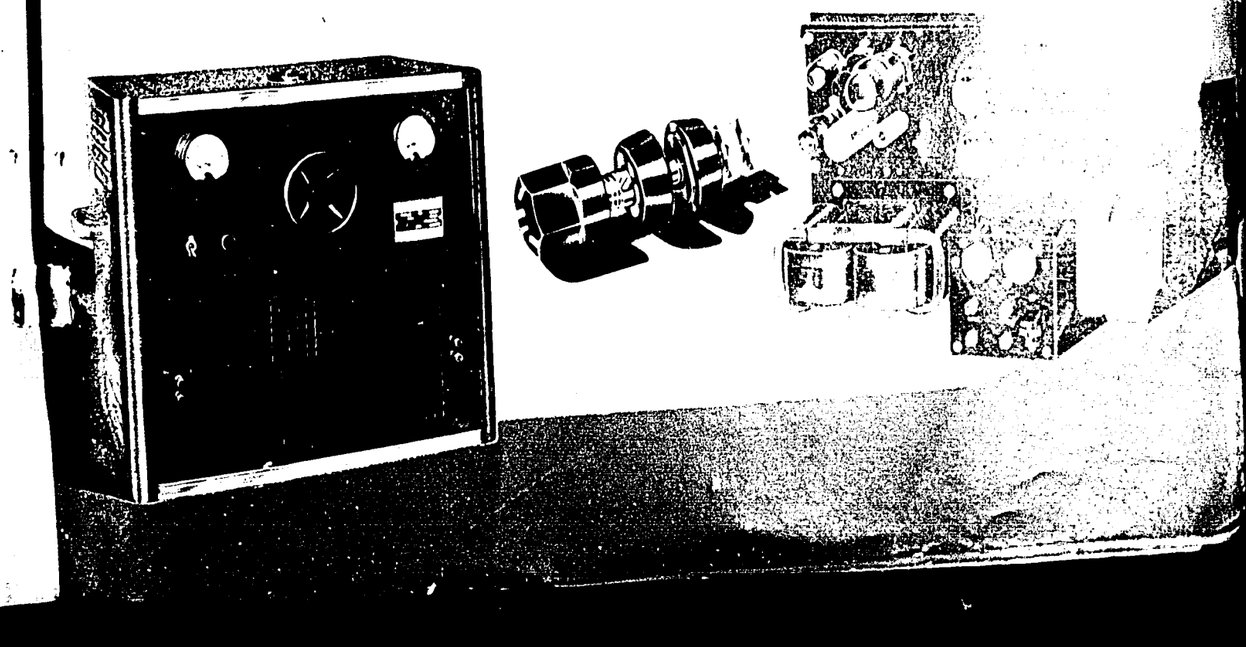
VOLTAGE CONTROL APPARATUS



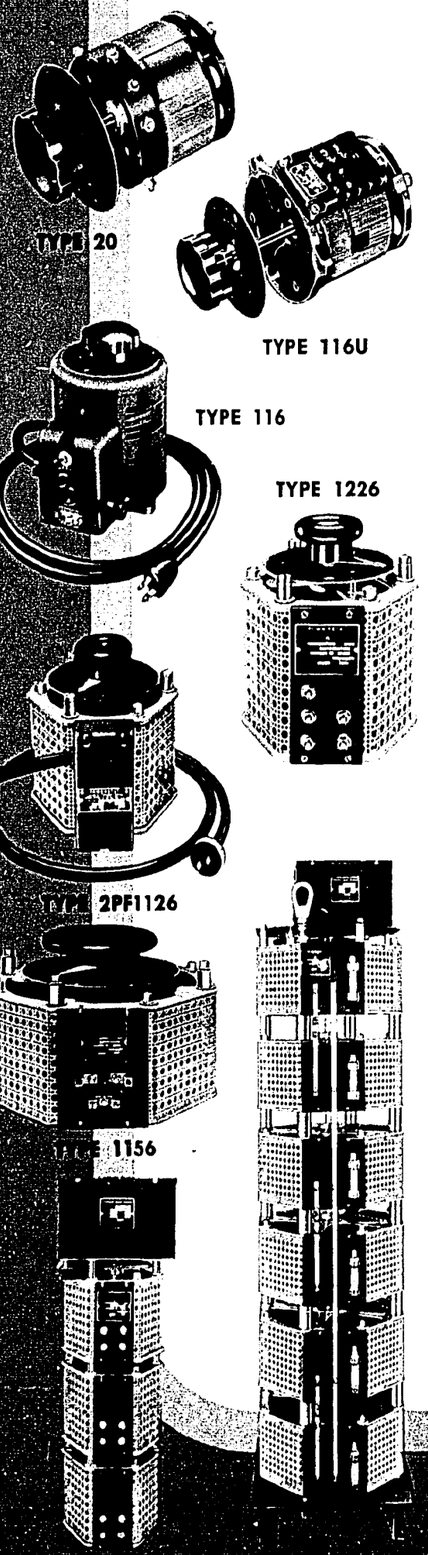
The increased precision performance demanded of electrical apparatus dictates the practice of voltage control. Input voltages must remain constant for proper operation of sensitive equipment. It is necessary to provide variable voltage to components to achieve peak operating characteristics. In the laboratory, shop, inspection department and any other place where a-c power is used the control of voltage is a prime necessity. The Superior Electric Company's line of POWERSTATS, STABILINES and VOLTBOXES offers equipment for any a-c voltage control application. Look to Superior first for the finest selection of voltage control equipment.





A Complete Line of POWERSTAT

VARIABLE TRANSFORMERS AT YOUR SERVICE



POWERSTAT variable transformers are autotransformers of toroidal core design with a movable brush tap which rotates to deliver a continuously adjustable output voltage from a-c power lines. Features of every POWERSTAT are excellent regulation, high efficiency, conservative ratings, zero waveform distortion, rugged mechanical construction, smooth control and standard mountings. Numerous types are available for 115, 230 and 460 volts, single and three phase operation in ratings from 405 VA to 100 KVA. Most models are offered for either manual or motor-driven operation. In the chart are listed some of the standard types. In addition, oil-cooled and explosion-proof types are available. Therefore, if one of the units listed does not suit your particular need, consult us. There's a POWERSTAT for every variable a-c voltage control requirement.

* These units are supplied with an "L" terminal which allows connecting in the field to limit the output voltage to the applied voltage. If "L" type connection is required on other models, the "L" must be included in the type number when ordering.

‡ When these POWERSTATS are "L" connected so that the output voltage does not exceed the applied voltage, the frequency range is 50/60 cycles.

** When a motor-drive is required, prefix the letter "M" together with the speed designation letter to the type number. T — 5 seconds, Z — 6 seconds, Y — 14 seconds, X — 19 seconds and W — 45 seconds for full range travel. Since the driving motors are frequency sensitive, be sure to specify whether 50 or 60 cycles is required. Only manually-operated unit weights are listed. For motor-drives add 10, 11 and 14 pounds to the 116-216, 1126-1226 and 1156-1256 types, respectively.

STABILINE

VOLTAGE REGULATORS

Two types of automatic voltage regulators are built by The Superior Electric Company to meet the requirements of maintaining constant voltage to electrical equipment. Type IE is instantaneous in action with no moving parts. Type EM, while not instantaneous, corrects faster than most regulators and is ideal for maintaining constant voltage to large loads without waveform distortion.

INSTANTANEOUS ELECTRONIC MODELS

Completely electronic, instantaneous in action, with no moving parts. Waveform distortion never exceeds 3%. Output voltage is held to within ±0.1 per cent of nominal for wide line variations; to within ±0.15 per cent of nominal for any load current change or load power factor change from lagging .5 to leading .9. Listed below are standard types.

Output Voltage Range	Input Voltage Range	Frequency In Cycles	Load Range In Amperes	Load Power Factor Range	Rated Output KVA	Type	List Price

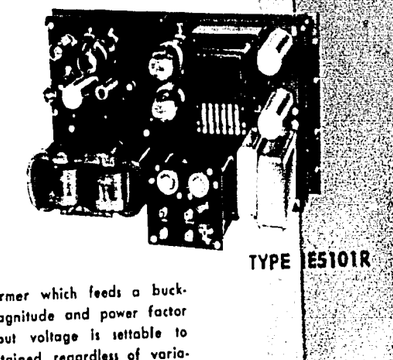
TYPE IE51002R



TYPE IE5101R

ELECTROMECHANICAL MODELS

Consists of an electronic detector circuit controlling a motor-driven POWERSTAT variable transformer which feeds a buck-boost auxiliary transformer. Features zero waveform distortion together with insensitivity to magnitude and power factor of load. Has no effect on system power factor. There are no critical adjustments and the output voltage is settable to different values. High efficiency is an inherent characteristic. Constant output voltage is maintained regardless of variations in input voltage or load current.

Varicell

THE DEVELOPMENT OF A NEW DC VOLTAGE

Essentially, the basic components of the VARICELL are a POWERSTAT variable transformer, a fixed-ratio rectifier transformer, a saturable core reactor, a rectifier stack and an electronic control circuit. It operates from an a-c source to deliver a variable range of d-c voltages. Any setting of output voltage is not affected by line voltage changes or load current variations. Type 13015, illustrated, is rated 95-135 volts, 60 cycles, 1 phase, a-c input and 0-30 volts, 15 amperes d-c output. Stabilization and regulation is ±0.25 volts and R.M.S. ripple voltage never exceeds 0.1 volts for the output range of 6 to 30 volts. List Price: $765.00.

VOLTBOX A-C TO D-C VOLTAGE STABILIZER

As a compact, portable source of variable a-c voltage, the VOLTBOX provides a much needed instrument for the laboratory, inspection, test and plant maintenance departments. In the cast aluminum case are all the necessary components. Type UC1M is rated 115 volts, 50/60 cycles, 1 phase input; 0-135 volts, 7.5 amperes output. Type UC2M operates from a 230 volts, 50/60 cycles, 1 phase line to deliver 0-270 volts, 3.0 amperes. List Price: UC1M, $46.00; UC2M, $52.00.

TERMINAL BOARDS

Offers complete insulation, a current capacity of 30 amperes, and a working voltage of 1000 volts. Easy to install. Available in black or red phenolic for permanent clamping, spade lug, clip-lead, banana plug, or looping and clamping. List Price $.40 each.

LITERATURE

Comprehensive booklets and folders covering Superior products, ratings, and technical data, with many illustrations and graphs, are available for the asking.

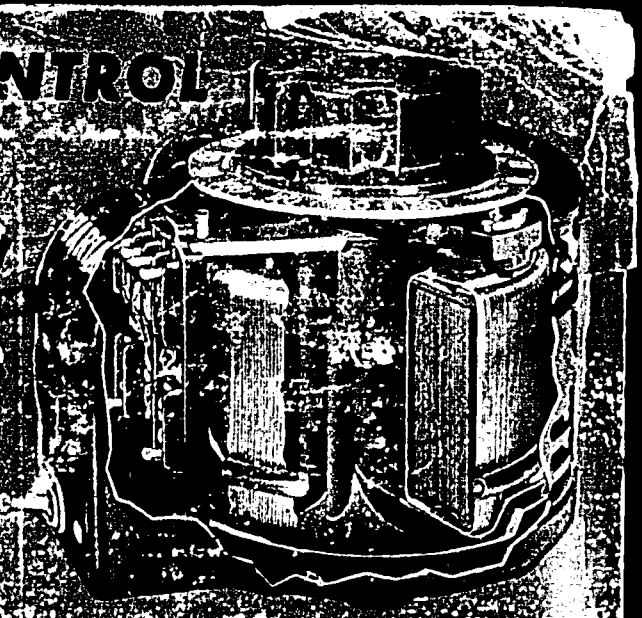
for SMOOTH VOLTAGE CONTROL

Variac®

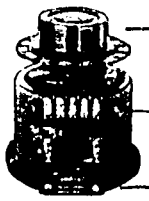


the original continuously adjustable auto-transformer — is the ideal device for controlling any a-c operated equipment. VARIACS not only supply perfectly smooth control of voltage from zero but also furnish output voltages 17% above line voltage. VARIACS are correctly designed for many years of trouble-free operation.

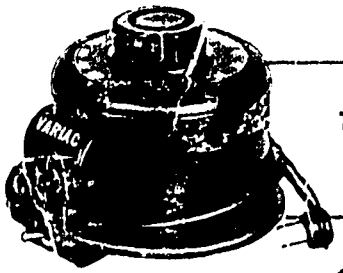
Data below are for single-phase operation. Polyphase and other ganged assemblies are available.

Single-Phase Data

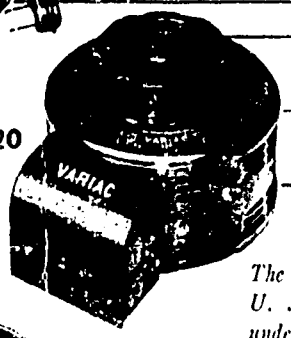
Type 200-B



Type V-5



Type V-10



Type V-20

Type 50

	Input Voltage	KVA	OUTPUT Output Voltage	OUTPUT Amperes Rated	OUTPUT Amperes Maximum	Type of Mounting*	Type	Price

The trade name Variac is registered at the U. S. Patent Office. Variacs are patented under U. S. Patent No. 2,009,013 and are manufactured and sold only by General Radio Company or its authorized agents.

* 1 Unmounted model.
2 Protective Case around windings.
3 Protective Case, terminal cover line switch, convenience outlet and line cord.
4 Protective Case, terminal cover and BX outlet.
5 Two gang assembly — requires type 50-P1 choke — $12.00.
