General Information

Objects and Scope of the Institute.

The American Institute of Electrical Engineers, an organization of individual engineers, was founded in 1884, when the possibilities which might follow from an organization which would foster and encourage electrical development were beginning to be realized. The objects of the Institute are *the advancement of the theory and practice of electrical engineering and of the allied arts and sciences*, and the *maintenance of a high professional standing among its members*. The Institute has contributed largely toward the remarkable progress that has taken place in the electrical field, and has been an important factor in advancing the personal development of its individual members.

The Institute is governed by a Board of Directors, elected by the membership, consisting of a President, the two surviving Past Presidents most recently retired, ten Vice-Presidents, twelve Directors, and a Treasurer. The terms of the officers are as follows: President and Treasurer, one year; Vice-Presidents, two years; Directors, four years. Fellows of the Institute only are eligible for the office of President, and Fellows and Members only are eligible for the offices of Vice-President, Director, and Treasurer. The Secretary of the Institute is appointed by the Board of Directors, for a term of one year.

How to Become a Member, Transfers, Etc.

The membership of the Institute consists of Honorary Members, Fellows, Members, Associate Members, and Affiliates.

Honorary Members are chosen from among those who have rendered acknowledged eminent service to electrical engineering or its allied arts. They are exempt from all payments.

Applications for admission or transfer must be made on forms prescribed by the Board of Directors of the Institute.

An applicant for admission should read carefully the requirements for the grades of Affiliate, Associate Member, and Member. These requirements may be found in the Constitution; also upon the back of the application blank, to be obtained from the Secretary, or in condensed form in the membership chart on this page.

The grade having been decided upon, the application form should be filled out, taking care to give the requisite number of Institute references of proper grades, who should be selected with a view to their knowledge of the applicant's professional experience, rather than their standing.

Applications should be mailed to Secretary, American Institute of Electrical Engineers, 33 West 39th Street, New York 18.

No payment is necessary until after the candidate's election.

Present Members.

All branches of electrical work are represented in the membership, which includes consulting engineers, professors of electrical engineering, chief engineers, managers, presidents, and other officers and employees of electric lighting, railway, telephone, telegraph, radio, power, and manufacturing companies, and other persons interested in the advancement of electrical engineering.

Meetings.

Four general meetings of the Institute are held during the year—Winter in January, usually in New York City; Summer in June, in different sections of the country to accommodate the wide territorial distribution of membership; the Pacific, in August or September; and the Fall, in the Midwest.

The Annual Business Meeting of the Institute, at which the vote for officers for the ensuing year is announced, is held during the Summer General Meeting in June each year.

Usually, three or four District meetings are held each year, each having a technical program of particular interest to the members in the District.

Membership—Eligibility, Admission Fees, Dues, Etc.

Grade	Minimum Age	Qualifications Years Active Practice of Electrical Engineering	Additional Details in Constitution (See Sections)	References Required	Entrance Fee	Transfer Fee From Next Lower Grade	Annual Dues
Fellow	40	15	4 and 11	Five Fellows			$20
Member	30	7	5 and 12	Five Members, or Fellows	$15	$5	$15
Associate Member	21	Graduate of an engineering curriculum approved by Board of Directors or 5 years engineering experience.	6 and 12	Four Associate Members, Members, or Fellows	$10	$5	$10 for first six years. $15 thereafter
Affiliate	21	Interested in rendering service to electrical engineering or electrical science in fields of commerce, industry, law; science, or the arts.	7 and 12	Three Affiliates, Associate Members, Members, or Fellows	$10		$10 for first six years. $15 thereafter

Student member	Qualifications—Applicant must be registered as a student of electrical studies, undergraduate or graduate, in an educational institution of recognized standing and endorsed by a member of the Institute. (For complete information see Bylaws 52–58.)	Fees—Five dollars ($5.00) annually; term of enrollment shall not extend beyond the end of the fiscal year (April 30) in which the student status ceases, unless the fiscal year ends within six months after graduation, and shall not in any case extend over a period of more than five years. Student member applying for admission to the Associate Member grade before March 1 of fiscal year in which Student membership ceases is relieved of the payment of the usual entrance fee of ten dollars ($10.00).

Special Provision is made for applicants not known to the required number of references (Constitution, Sec. 12). Entrance Fee and Dues are payable on notice of election, and thereafter annually in advance on May 1st, the beginning of the fiscal year. Candidates elected after any portion of the fiscal year has expired, pay dues pro rata for the unexpired quarters of the fiscal year.

Application Forms can be obtained from the Secretary or the Membership Committee.

Publications.

ELECTRICAL ENGINEERING. This is the official monthly publication of the Institute, which is issued to all members and Student members. It includes articles of general interest; all AIEE technical material in complete, condensed, or abstract form; and news of activities of the Institute and of other engineering organizations.

Non-member subscription rates are: $12 per year in the United States, Mexico, Cuba, Puerto Rico, Hawaii, Philippine Islands, Central America, South America, Haiti, Spain, and Spanish colonies; $12.50 in Canada; $13 in all other countries.

BI-MONTHLY TECHNICAL PUBLICATIONS. Three new bi-monthly technical publications include technical papers which have been presented at meetings and have been recommended for publication in the TRANSACTIONS, and discussion, if any, collated with the papers. Formal papers sponsored by the technical committees in the five technical divisions are arranged in the bi-monthly publications as indicated below:

COMMUNICATION AND ELECTRONICS

Communication, and Science and Electronics Divisions

APPLICATIONS AND INDUSTRY

General Applications, and Industry Divisions

POWER APPARATUS AND SYSTEMS

Power Division

Comprehensive information regarding the changes in publication plans appeared in ELECTRICAL ENGINEERING for March 1952, pages 279–80.

TRANSACTIONS. The annual TRANSACTIONS are issued in three parts as follows:

Part 1. ELECTRONICS AND COMMUNICATION
Part 2. APPLICATIONS AND INDUSTRY
Part 3. POWER APPARATUS AND SYSTEMS

PREPRINTS. Advance copies of authors' manuscripts approved for presentation at meetings are prepared by the photo-offset process and sold to members at 30¢ per copy; to nonmembers at 60¢ per copy.

ANNUAL REFERENCE INDEX. A comprehensive index to the contents of ELECTRICAL ENGINEERING is published each year, and is distributed at the close of the year as a supplement to ELECTRICAL ENGINEERING.

AIEE TRANSACTIONS INDEX, in three volumes, covering the years 1911–21, 1922–38, and 1939–49 contains a subject index and an authors index to the papers and discussions published in the TRANSACTIONS: prices upon application to Institute headquarters.

The STANDARDS of the AIEE are devoted chiefly to defining the terms, conditions, and limits which characterize the behavior of electric apparatus, with special reference to the acceptance tests. They are issued in sections, each published as a separate pamphlet and dealing with a specific subject. A number of Test Codes have been prepared and others are in course of development. These will provide in reference form the more generally applicable methods of conducting and reporting tests applying to the guarantees specified in the standards.

Most of the AIEE standards and codes are submitted to the American Standards Association and receive approval as American Standards. Subcommittees of the Standards Committee and of the various AIEE technical committees working on standards projects are likewise engaged in the revision of the American Standards in the electrical field.

In order to provide closer coordination of standardization activities within the Institute, the Standards Committee has appointed a number of Standards Coordinating Committees. These committees serve to tie together the various standards activities of the parent committee and of the various technical committees of the Institute. They are also engaged in developing and more clearly defining the principles of electrical standardization as related to up-to-date practice, and are seeking to bring about closer co-operation with outside organizations.

An up-to-date standards price list should be obtained from AIEE headquarters.

Committees.

As is customary in all large organizations, much of the important work of the Institute is accomplished through committees. Standing general and technical committees authorized under the Constitution and Bylaws are listed in Section 65 of the Bylaws, and the personnel of Institute committees for the year 1953–54 is printed in the front of the Year Book.

The Institute is represented upon many national organizations and other bodies, and a list of present representatives appears in the front of this book.

The work of the committees and representatives is of great and lasting benefit to the electrical profession.

Local Sections.

For the purpose of more effectively carrying out the aims of the Institute, and for the convenience of the members, the Institute has provided for the organization of Sections. Ninety-nine of these have been established in centers of electrical activity, and provision is made whereby 50 members may, by conforming to certain requirements, inaugurate a new Section.

These Sections, because of their local organization, which is similar to that of the parent body, are mutually helpful, and derive much direct beneficial assistance from the national organization. The Sections Committee disseminates information to the Sections, and assists in the coordination of their activities.

In many Sections, technical groups have been organized, such as, Electronics, Industrial Practice, Power, Transportation, Illumination, Communication, etc. Other Sections have organized Subsections to provide meetings for members remote from Section headquarters. These developments not only give opportunities for a wider range of meetings, but also permit the younger members to take more active parts in Section work. Thus there are brought

within reach of all who desire to avail themselves thereof opportunities for hearing, discussing, and presenting various papers relating to the immediate work of the individual or the broader field of engineering, and all the advantages readily recognizable in association with the ablest engineers.

Student Membership and Student Branches.

Students registered in educational institutions of recognized standing pursuing a regular course of study (as graduates, or undergraduates) in preparation for the profession of engineering may enroll as Student members of the Institute for the nominal fee of five dollars ($5.00) per year, which is applied as a subscription to ELECTRICAL ENGINEERING.

Student Branches are organizations of students which have been established in institutions of learning by faculty members who are members of the Institute. These Branches, of which there are now 135, usually hold meetings monthly or more frequently, and afford opportunities for fairly independent activity and initiative on the parts of students and for cultivating many of those qualities needed by the engineer which are not afforded by the classroom and laboratory, such as the preparation and presentation of engineering topics not covered by classroom work, which in many cases are better presented by individual students as a result of their own reading or investigation. They also give opportunities for social, technical, and literary activity. From among the AIEE members in the electrical engineering faculty of each college, the Vice-President of the Institute in the District in which the Branch is located appoints a Counselor to provide for continuity of Branch work. Provision has been made for an annual conference in each geographical District of the District officers and the Counselors and incoming chairmen of Branches to coordinate and develop the Branch activities.

Full details regarding Student membership and Student Branches are covered in a special pamphlet which may be obtained from the Secretary.

AIEE Emblem.

The emblem of the Institute which all Fellows, Members, Associate Members, and Affiliates are privileged to wear is shown in the margin.

The badge is of solid 14-karat gold and finely finished. The enameled background is green for Affiliates, maroon for Associate Members and blue for Members, with letters and border in gold. The Fellow's badge is the reverse in color of that provided for the Members, the lettering and border appearing in blue on a background of plain gold. The emblem is made in various forms for use as a pin, watch charm, or button. Prices may be obtained from the Secretary.

Institute members are entitled to place after their names the following abbreviations to indicate their relation to the Institute:

Honorary Member: Hon. Mem. AIEE **Associate Member: Assoc. Mem. AIEE**
Fellow: Fel. AIEE **Affiliate: Affil. AIEE**
Member: Mem. AIEE

Past Section Chairmen's Badge. A sketch of the official type of emblem for past Section chairmen is shown in the margin. This

award is in recognition of the services of past chairmen of Sections. The badge consists of the standard AIEE small vest pin in color to correspond with the grade of membership, surrounded by a gray enamel band on which appears the inscription "Past Section Chairman" in gold letters. The reverse side of the emblem may be engraved as desired, the engraving to be done by the Sections. The emblem is about the size of a dime and can be used as a lapel or vest pin. It is available at headquarters for purchase by the Sections at $6.00 each, including expense for registered mailing.

Student badge. The cut shown in the margin is an exact reproduction in size and style of the badge which has been provided for

Student members of the Institute. The badge is available in solid 14-karat gold and rolled gold, each being of the same design and color; also in a plated gold key charm. A descriptive circular giving prices may be obtained from the Secretary. A plated vest pin or lapel button is furnished without charge, upon request, to any applicant for Student membership and Student member renewing his membership.

Cooperation With Local Engineering Organizations.

Opportunities for a wider field of usefulness on the part of the Sections have developed through the formation in some of the larger centers of affiliated local organizations. Not only has such local affiliation brought about greater co-operation and unity among engineers—highly desirable objects—but it has given the engineer a higher standing in civic and municipal affairs, in which considerable progress has been made by engineers in a number of the cities where such local affiliated organizations exist. It has also saved duplication of effort and expense, and has increased the attendance and interest at meetings.

The Institute was among the first of the national engineering societies to recognize the many advantages of affiliation among local organizations, and for years it has supported the Sections in establishing such joint relations. It has encouraged discussion of the subject at the conferences of Section delegates at annual summer meetings from year to year.

Engineering Societies Personnel Service, Inc.

This incorporated nonprofit organization assists members of the Founder Societies desiring to secure new positions and employers seeking engineers. Its main office is at 8 West 40th Street, New York. Offices are operated in Chicago, Detroit, and San Francisco also. In addition to the societies named, others co-operate in these offices as follows: Chicago—Western Society of Engineers, Illinois Society of Professional Engineers; Detroit—Engineering Society of Detroit; San Francisco—Engineers' Club of San Francisco; New York—The Society of Naval Architects and Marine Engineers.

The service, supported by contributions of the individual members who are benefited, acts as a medium for bringing together the employer and the employee. To aid in this work, a weekly bulletin issued for those seeking positions is available at a nominal subscription rate.

Headquarters.

The Institute has its headquarters in the Engineering Societies Building, 25 to 33 West 39th Street, between Fifth and Sixth Avenues, New York, which is easily accessible from all parts of the city, by subway and surface lines. It is convenient to most of the principal hotels, theaters, and railway stations, and is the New York headquarters for engineers.

Facilities are provided in the Institute rooms on the tenth floor for correspondence, conferences, and the receipt and forwarding of mail matter for members. Out-of-town members may find it convenient to use the Institute headquarters as their mailing address when in New York.

The Engineering Societies Building was made possible by the gift of $1,050,000 by Mr. Andrew Carnegie to the engineers of America as represented by the American Institute of Electrical Engineers, the American Society of Mechanical Engineers, and the American Institute of Mining and Metallurgical Engineers. The societies purchased the land and provided the remainder of the funds. Each of these societies appointed three members upon a board of trustees, and this board was subsequently incorporated as the United Engineering Society (now United Engineering Trustees, Inc.) for the purpose of administering the building and holding title to the property.

In August 1916, the American Society of Civil Engineers was admitted as an additional Founder Society and now holds with the other three Founder Societies an equal interest in ownership, occupancy, and administration of the building, realizing more fully the purpose of Mr. Carnegie that the building should be the home and headquarters of the engineering profession of America.

The Institute occupies the tenth floor for its executive offices, but due to lack of space in the building, its editorial department is located at 500 Fifth Avenue, New York. Other engineering and scientific organizations besides the Founders have their headquarters in the building.

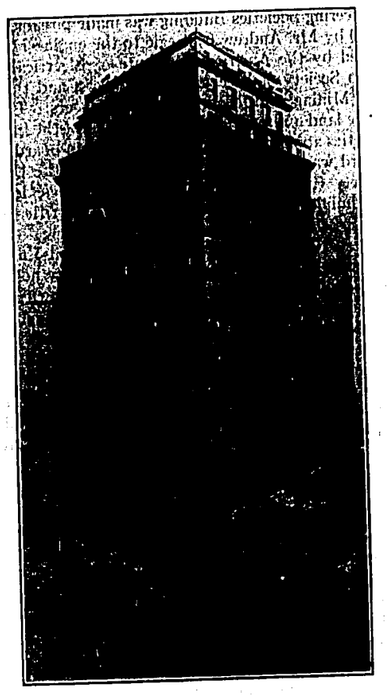
Engineering Societies Library.

The library, which comprises the individual libraries of the four Founder Societies and the United Engineering Trustees, Inc., is located on the thirteenth and fourteenth floors of the Engineering Societies Building. It is conducted as a free public reference library and contains more than 170,000 volumes. In addition to engineering works, it contains the general reference books of the allied sciences such as physics, mathematics, and chemistry. The Latimer-Clark Collection, which was presented to the Institute by Schuyler Skatts Wheeler, President 1905-06, containing many early publications on the subject of electricity, including many rare and valuable volumes published in the sixteenth and seventeenth centuries. The library also contains publications of practically all the engineering societies in the world as well as current and bound sets of engineering periodicals printed in many languages.

In order to place the facilities of this great engineering library at the disposal of persons residing out of town, a Library Service Bureau has been established, and a staff of expert searchers and translators is prepared to cover almost any engineering topic in the following manner: abstracting, translating, bibliographies, statistical searches and reports, searches for patent purposes, copying, preparing reference cards, etc.

All communications should be made as definite as possible so that the information received may be what is desired and not include collateral matter of no interest. The time spent in searching for such collateral matter will be saved, and information sent more promptly and in more usable shape.

Volumes from the library's general collection will be lent to members in good standing, in continental United States and Canada, for a period not longer than two weeks, at a charge of 50¢ per book for a week or a fraction of a week, which includes the transportation cost to members in the United States, the borrowers paying the return postage and insurance charges. Borrowers in Canada pay postage both ways. Serial publications will be lent only after they have been bound.



The library is open to the public from 10 a.m. to 10 p.m., Monday to Friday, 10 a.m. to 6 p.m., Saturdays—except certain holidays throughout the year, and except the summer, from the first of June to approximately the middle of September, when the hours are 10 a.m. to 5 p.m.

Prizes

The following summarizes the awards available each year in each classification:

1. *Institute*

Class	First Prize	Second Prize
(*a*). Power	$100 and certificate	Certificate
(*b*). Industry	$100 and certificate	Certificate
(*c*). Communication	$100 and certificate	Certificate
(*d*). General Application	$100 and certificate	Certificate
(*e*). Science and Electronics	$100 and certificate	Certificate
(*f*). Best Student Paper	$100 and certificate	Certificate

HEADQUARTERS OF AIEE

2. *District*

Class	First Prize	Second Prize
(*a*). Best paper, any class	$75 and certificate	$50 and certificate
(*b*). Best paper presented by undergraduate Student member in District competition	$25 and certificate	Certificate

3. *Section*

$100 to be divided at the discretion of the Section with a maximum of $50 for any one prize, and certificate for each winner.

4. *Branch (Undergraduate)*

Class	First Prize	Second Prize
(*a*). Best paper	$10 and certificate plus an allowance of thirteen cents per mile, one way, for 800 miles or less, and ten cents per mile, one way, for the remaining distance of a trip, to the District Student prize paper competition	Certificate

Institute prizes presented during the year 1952–53 are reported as follows:

COMMUNICATION DIVISION

First Prize, "Fundamental Plans for Toll Telephone Plant" by J. J. Pilliod, American Telephone and Telegraph Company.
Second Prize, "Automatic Toll Switching Systems" by F. F. Shipley, Bell Telephone Laboratories, Inc.

GENERAL APPLICATIONS

First Prize, "The Pennsylvania Railroad Ignitron-Rectifier Locomotive" by C. C. Whittaker, W. M. Hutchison, Westinghouse Electric Corporation.
Second Prize, "A New Electric Locomotive for the Pennsylvania Railroad" by F. D. Gowans, B. A. Widell, A. Bredenberg, General Electric Company.

POWER

First Prize, "Improved Cooling of Turbine-Generator Windings" by R. A. Baudry, P. R. Heller, H. K. Reamey, Jr., Westinghouse Electric Corporation.
Second Prize, "Evaluation of Capacity Differences in the Economic Comparison of Alternative Facilities" by Paul H. Jeynes, Public Service Electric and Gas Company.

SCIENCE AND ELECTRONICS

First Prize, "A High-Sensitivity Ratio Instrument for Industrial Resistance Thermometers" by E. W. Clark, General Electric Company.
Second Prize, "A High-Speed Direct-Writing Oscillograph" by A. R. Eckels, North Carolina State College; I. S. Blumenthal, Northrop Aircraft, Inc.

BEST STUDENT PAPER

Prize awarded to: "Magnetic Tape Sound for 16-MM Motion Pictures" by M. J. Wiggins, University of Florida.

SECOND PRIZE STUDENT PAPER

Prize awarded to: "Characteristics of the Radion Tube Preliminary Report' by Arthur R. Engquist, Richard S. Christy, University of New Mexico.

Charles LeGeyt Fortescue Fellowship

In 1939, the Westinghouse Electric & Manufacturing Company set up, as a memorial to Charles LeGeyt Fortescue, a trust fund of $25,000 to provide graduate fellowships in electrical engineering, to be awarded each year by a committee of the AIEE. The awards provide a minimum allowance of $500 each. Applications for the fellowship must reach the secretary of the Charles LeGeyt Fellowship Committee by February 15 of each year, and the awards will be made not later than April 1. Forms are available at accredited colleges, or can be obtained from the secretary of the Fellowship Committee.

Awards of the Fellowship have been made as follows:

1940 Norman Z. Alcock, Queens University
1945 Morton M. Astrahan, Northwestern University
1947 Paul Kaczmarczik, Drexel Institute of Technology
Theodore G. Mihran, Stanford University
1948 James B. Woodford, Jr., Carnegie Institute of Technology
1949 Edward F. Koncel, Jr., Illinois Institute of Technology
James B. Woodford, Jr., Carnegie Institute of Technology
1950 Robert E. Horn, Washington University
Robert R. Johnson, University of Wisconsin
1951 Clarence J. Baldwin, Jr., University of Texas
1952 Peter A. Rizzi, Yale University
James E. Shea, Univ. of Conn.
1953 Richard C. Heyser, University of Arizona
John M. Tomlinson, Pennsylvania State College

Edison Medal.

The Edison Medal was founded by an organization of associates and friends of Thomas A. Edison, who desired to commemorate the achievements of a quarter of a century in the art of electric lighting with which Edison had been so prominently identified, to serve "as an honorable incentive to scientists, engineers, and artisans to maintain by their works the high standard of accomplishment" which had been set by Edison. The AIEE was invited to undertake the responsibility of making the awards, and accepted. The Medal was established on February 11, 1904, and is awarded once each year by the Edison Medal Committee of the AIEE to some one resident in the United States of America and its Dependencies, or of the Dominion of Canada, for "Meritorious Achievement" in Electrical Science or Electrical Engineering or the Electrical Arts. Awards of the Medal have been as follows:

1909 Elihu Thomson
1910 Frank J. Sprague
1911 George Westinghouse
1912 William Stanley
1913 Charles F. Brush
1914 Alexander Graham Bell
1916 Nikola Tesla
1917 John J. Carty
1918 Benjamin G. Lamme
1919 W. L. R. Emmet
1920 Michael I. Pupin
1921 Cummings C. Chesney
1922 Robert A. Millikan
1923 John W. Lieb
1924 John W. Howell
1925 Harris J. Ryan
1927 William D. Coolidge
1928 Frank B. Jewett
1929 Charles F. Scott
1930 Frank Conrad

1937 Gano Dunn
1938 Dugald C. Jackson
1939 Philip Torchio
1940 George Ashley Campbell
1941 John B. Whitehead
1942 Edwin Howard Armstrong
1943 Vannevar Bush
1944 E. F. W. Alexanderson
1945 Philip Sporn
1946 Lee de Forest
1947 Joseph Slepian
1948 Morris E. Leeds
1949 Karl B. McEachron
1950 Otto B. Blackwell
1951 Charles F. Wagner
1952 Vladimir K. Zworykin

John Fritz Medal.

The John Fritz Medal is awarded annually by a board composed of four representatives of each of the four national engineering societies, the American Institute of Electrical Engineers, the American Society of Mechanical Engineers, the American Institute of Mining and Metallurgical Engineers, and the American Society of Civil Engineers, for notable scientific or industrial achievements, regardless of nationality or sex. It was established by professional associates and friends of John Fritz on August 21, 1902, his eightieth birthday, to perpetuate the memory of his achievements in industrial progress. The first award of the medal was made to John Fritz at a dinner given on his eightieth birthday, August 21, 1902. The other awards have been as follows:

1905 Lord Kelvin
1906 George Westinghouse
1907 Alexander Graham Bell
1908 Thomas A. Edison
1909 Charles T. Porter
1910 Alfred Noble
1911 Sir William Henry White
1912 Robert Wollston Hunt
1914 John E. Sweet
1915 James Douglas
1916 Elihu Thomson
1917 Henry Marion Howe
1918 J. Waldo Smith
1919 George W. Goethals
1920 Orville Wright
1921 Sir Robert Hadfield
1922 Eugene Schneider
1923 Guglielmo Marconi
1924 Ambrose Swasey
1925 John F. Stevens
1926 Edward D. Adams
1927 Elmer A. Sperry
1928 John J. Carty
1929 Herbert Hoover
1930 Ralph Modjeski
1931 Admiral David W. Taylor
1932 Michael I. Pupin
1933 Daniel C. Jackling
1934 John Ripley Freeman
1935 Frank J. Sprague
1936 W. F. Durand
1937 Arthur N. Talbot
1938 Paul D. Merica
1939 Frank B. Jewett
1940 C. F. Hirshfeld
1941 Ralph Budd
1942 Everette DeGolyer
1943 Willis Rodney Whitney
1944 Charles Franklin Kettering
1945 John L. Savage
1946 Zay Jeffries
1947 L. W. Chubb
1948 Theodore von Karman
1949 Charles M. Allen
1950 Walter Hull Aldridge
1951 Vannevar Bush
1952 E. G. Bailey
1953 B. F. Fairless

Lamme Gold Medal.

A bequest was made by the late Benjamin G. Lamme, Chief Engineer of the Westinghouse Electric and Manufacturing Company, to provide for the award by the Institute of a gold Medal annually to a member of the AIEE, "who has shown meritorious achievement in the development of electrical apparatus or machinery."

The award is made in accordance with conditions specified in the Bylaws of the Lamme Medal Committee.

LAMME MEDAL—Established 1924

Awards of the Medal have been made as follows:

1928 Allan Bertram Field
1929 Rudolf E. Hellmund
1930 William J. Foster
1931 Giuseppe Faccioli
1932 Edward Weston
1933 Lewis B. Stillwell
1934 Henry E. Warren
1935 Vannevar Bush
1936 Frank Conrad
1937 Robert E. Doherty
1938 Marion A. Savage
1939 Norman W. Storer
1940 Comfort A. Adams
1941 Forrest E. Ricketts
1942 Joseph Slepian
1943 A. H. Kehoe
1944 S. H. Mortensen
1945 David C. Prince
1946 J. B. MacNeill
1947 A. M. MacCutcheon
1948 V. K. Zworykin
1949 C. M. Laffoon
1950 Donald I. Bohn
1951 Arthur E. Silver
1952 I. F. Kinnard

Washington Award.

The Washington Award was established in 1916 by Past President Alvord of the Western Society of Engineers "to be annually presented to an engineer whose work in some special instance, or whose services in general have been noteworthy for their merit in promoting the public good." The award is made annually by the Washington Award Commission, composed of nine representatives of the Western Society of Engineers and two each from the ASCE, the AIME, the ASME, and the AIEE.

1919 Herbert Hoover
1922 Robert W. Hunt
1923 Arthur Newell Talbot
1925 Jonas Waldo Smith
1926 John Watson Alvord
1927 Orville Wright
1928 M. I. Pupin
1929 Bion J. Arnold
1930 Mortimer E. Cooley
1931 Ralph Modjeski
1932 William D. Coolidge
1935 Ambrose Swasey
1936 C. F. Kettering
1937 Frederick G. Cottrell
1938 Frank B. Jewett
1939 Daniel Webster Mead
1940 Daniel Cowan Jackling
1941 Ralph Budd
1942 William Lamont Abbott
1943 A. A. Potter
1945 Arthur Holly Compton
1946 Vannevar Bush
1947 Karl T. Compton
1948 Ralph E. Flanders
1949 John L. Savage
1950 Wilfred Sykes
1951 Edwin H. Armstrong
1952 Henry T. Heald
1953 Gustav Egloff

Hoover Medal.

The Hoover Medal, established through a trust fund created by the gift of Conrad N. Lauer, is to be awarded periodically by a Board of Award, composed of representatives of the national societies of Civil, Mining, Mechanical, and Electrical Engineers, "to a fellow engineer for distinguished public service."

The following awards have been made:

1930 Herbert Hoover
1936 Ambrose Swasey
1938 John F. Stevens
1939 Gano Dunn
1941 D. Robert Yarnall
1942 Gerard Swope
1944 Ralph E. Flanders
1945 William H. Harrison

1940 Vannevar Bush
1948 Malcolm Pirnie
1949 Frank B. Jewett
1950 Karl T. Compton
1951 William L. Batt
1952 Clarence D. Howe

Alfred Noble Prize.

The Alfred Noble prize, instituted in 1929, is a cash award, with a suitably engraved certificate, from the income of a fund contributed by engineers and others in honor of Alfred Noble, Past President of the American Society of Civil Engineers, and of the Western Society of Engineers. The amount of the prize is fixed from time to time by the Board of Direction of the ASCE, and for the present year is approximately $350. Recipients of the award may be members in any grade of one of the four national societies of civil, mining, mechanical, and electrical engineers, or of the Western Society of Engineers. The basis of selection is the content of a technical paper of particular merit accepted by any of these societies for publication in whole or in abstract. The author may not have passed his 31st birthday at the time the paper is submitted in practically its final form. Selection for this prize is detailed to a committee of five, one from each of the constituent societies. The winning technical paper must have been presented in the publications of one of the societies within the twelve months preceding June 1st of any year.

The following awards have been made:

1931 C. T. Eddy, AIME
1932 Frank M. Starr, AIEE
1933 C. Maxwell Stanley, ASCE
1936 Abe Tilles, AIEE
1937 G. M. L. Sommerman, AIEE
1938 Ralph J. Schilthuis, AIME
1939 Claude E. Shannon, AIEE
1941 Robert P. Hays, Jr., AIEE
1942 George W. Dunlap, AIEE
1943 Benjamin J. Lazan, ASME
1944 W. R. Wilson, AIEE
1945 A. L. Ahlf, ASCE
1946 Martin Goland, ASME
1947 John H. Hollomon, AIME
1948 Robert L. Hoss, AIME
1949 J. C. Fisher, ASME
1950 Ralph J. Kochenburger, AIEE
1951 Eldo C. Koenig, AIEE
1952 Myron Tribus, ASME

The Marston Medal.

The Marston Award, consisting of a suitable gold medal, was established in 1938 by the Iowa State College through the inspiration and generosity of Anson Marston, Dean Emeritus of Engineering. It is awarded, not oftener than once each year, to an engineering alumnus of at least thirty years' standing for achievement in engineering in a broad field. The award will be made each year by a board consisting of four alumni, one honorary member, each of the American Society of Civil Engineers, American Society of Mechanical Engineers, American Institute of Electrical Engineers, and American Institute of Chemical Engineers, and the Dean of Engineering who will serve as *ex-officio* chairman of the board. The presentation will be a feature of the commencement exercises.

Awards have been made as follows:

1938 E. O. Shreve
1939 Thomas H. MacDonald
1940 James W. Hook
1941 Henry John Brunnier
1942 Leroy L. Hidinger
1944 Laurence T. Gaylord
1945 Paul Spencer Clapp
1946 Fred T. Whiting
1947 Thomas Radford Agg
1948 Roy W. Crum
1949 Wilbur M. Wilson
1950 C. E. Prudden
1951 Ralph W. Atkinson
1952 Fred R. White

United Engineering Trustees, Inc.

The United Engineering Trustees, Inc., is a corporate body representing the four Founder Societies in holding title to their joint physical properties: the Engineering Societies Building, the Engineering Societies Library, and trust funds for the Library, The Engineering Foundation, the John Fritz Medal Board of Award, and the Daniel Guggenheim Medal Board of Award. The corporation also serves as treasurer for the Engineers' Council for Professional Development.

The Corporation manages the Engineering Societies Building, and has two principal departments, the Engineering Societies Library, and The Engineering Foundation. The corporate powers are vested in a board of twelve trustees, three from each Founder Society.

The Trustees are now engaged in the study of the problem of providing a new home for the Engineering Profession to replace the present Headquarters building, which is no longer capable of housing adequately the societies that should be accommodated.

The Engineering Foundation.

The Engineering Foundation was established in 1914 by the Founder Societies "for the furtherance of research in science and engineering, and for the advancement in any other manner of the profession of engineering and the good of mankind." It was conceived by Ambrose Swasey, of Cleveland, Ohio, and toward its endowment he made gifts intended as the nucleus of a "community trust" for engineers, to be contributed by many donors. The endowment now has a book value of more than one million dollars. The administration of the principal of the fund lies with the Board of Trustees of the United Engineering Trustees, Inc.

The Engineering Foundation Board has discretionary power in the disposition of the income from the fund, and has sixteen members, two representatives selected by each Founder Society, four Trustees of United Engineering Trustees, Inc. (one from each Founder Society), three members-at-large chosen by the Board of Trustees UET, Inc., and the President of UET, Inc., *ex-officio*.

The Engineering Foundation promotes wisely directed research as a means to scientific and technical progress. It enjoys the co-operation of engineering societies, technical bureaus of the Government, universities, scientific associations, industries, bankers, and individual engineers. Money contributed by others to projects in which it has participated has aggregated hundreds of thousands of dollars; and services, facilities, and materials given in addition were worth several times as much.

It aided in establishing the National Research Council and its Division of Engineering and Industrial Research and participated in the organization of the Highway Research Board, the Bureau of Welding, the Personnel Research Federation, and the Welding Research Council.

Engineers' Council for Professional Development.

This council was organized in 1932 "to enhance the professional status of the engineer through the cooperative support of those national organizations directly representing the professional, technical, educational, and legislative phases of an engineer's life." The Council includes three representatives of each of the eight participating organizations: the national societies of chemical, civil, electrical, mechanical, mining and metallurgical, and chemical engineers. The Engineering Institute of Canada, the American Society for Engineering Education, and the National Council of State Boards of Engineering Examiners.

The principal activities of ECPD include programs for the guidance of young individuals thinking of entering the engineering field, the accrediting of curricula of engineering schools, encouragement and assistance to individuals in their engineering and cultural studies during several years after graduation, and the development of criteria for indicating the attainment of the status of an engineer.

American Standards Association, Incorporated.

The American Standards Association (formerly American Engineering Standards Committee) which was organized in October 1918, by the AIEE and four other societies, serves as a national clearing house for engineering and industrial standardization, and provides an information service on engineering and industrial standardization matters. The ultimate responsibility for and control of the work rests with the organizations whose representatives constitute the Association.

The American Standards Association is primarily for the purpose of insuring adequate procedure in the formulation of standards and establishing rules that must be observed by the co-operating bodies in order that the approval of the Association may be given.

ASA is composed of 110 national trade organizations, technical societies, and consumer organizations, and more than 2300 company members. The Institute is sponsor or joint sponsor for a number of projects in the electrical field and is also participating in many other projects by representation on sectional committees of other sponsors. The offices of the American Standards Association are located at 70 East 45th Street, New York 17, N. Y.

Engineers Joint Council.

The purpose of EJC is to promote co-operation among the branches of engineering by seeking and studying matters of mutual interest to the member societies, to recommend joint action, and to administer activities authorized by a majority of the societies.

During the past year, EJC has been expanded to include eight of the major engineering societies: ASCE, AIME, ASME, AWWA, AIEE, SNAME, ASEE, AIChE. This expansion is a first step toward the unity of the engineering profession and the achievement of effective cooperation in matters of mutual interest among the societies and their members. Each society is represented on the Council in proportion to its membership. AIEE has five representatives elected by its Board of Directors beginning January 1, 1954.

Certificate of Incorporation

OF THE

American Institute of Electrical Engineers

We, the undersigned, a majority of the directors of the American Institute of Electrical Engineers, an unincorporated association, desiring to incorporate pursuant to Section 5 of the Membership Corporations Law, do hereby certify as follows:

That such association was organized for the purpose of promoting the Arts and Sciences connected with the production and utilization of electricity and the welfare of those employed in these industries; by means of meetings for social intercourses, the reading and discussion of professional papers, and the circulation by means of publications among its members and associates of the information thus obtained.

That a regularly called meeting of such association was held on the twenty-sixth day of February, 1896.

That a notice of the time and place of such meeting and that the proposition of incorporating would be considered thereat, was served upon each member of such association whose residence or post-office address was known, at least thirty (30) days before such meeting, either personally or by depositing it in the post-office, postage prepaid, addressed to such member at his last known post-office address.

That a copy of such notice is hereto annexed and made a part of this certificate.

That at such meeting the directors of such association were duly authorized by the unanimous vote of all the members of such association, present and voting at such meeting, to incorporate such association, in pursuance of section 5 of the Membership Corporations Law, under article 1 of such chapter, with the corporate name of American Institute of Electrical Engineers, as more fully appears by the certificates of the chairman and secretary of the meeting, hereto annexed and filed herewith.

That we further certify, as follows, to wit:

First. The name of the proposed corporation is AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS.

Second. The particular objects for which the corporation is to be formed are to promote the Arts and Sciences connected with the production and utilization of electricity and the welfare of those employed in these industries; by means of meetings for social intercourse, and reading and discussion of professional papers, and the circulation by means of publications among its members and associates of the information thus obtained.

Third. The territory in which the operations of the corporations will be principally conducted is the States and Territories of the United States of America.

Fourth. The principal office of the corporation is to be located in the City of New York, county and State of New York.

Fifth. The number of its directors shall be twenty-one (21).

Sixth. The names and places of residence of the persons to be its directors until the first annual meeting are as follows:

NAME	PLACE OF RESIDENCE
Louis Duncan	Baltimore, Md.
William A. Anthony	Dunellen, Middlesex Co., N. J.
Francis B. Crocker	New York City, N. Y.
James Hamblet	Brooklyn, N. Y.

JEAN KENNEDY,
Notary Public (20)
New York County.

We, the undersigned, Louis Duncan, president, and Ralph W. Pope, secretary, of a regularly called meeting of the members of the American Institute of Electrical Engineers, held on the twenty-sixth day of February, 1896, do hereby certify as follows:

That the meeting was organized by such members by choosing Louis Duncan, as chairman, and the undersigned, Ralph W. Pope, as secretary.

That a vote was then taken of those present in person or by proxy upon the proposition of incorporating such association, pursuant to section 5 of the Membership Corporations Law.

That the following resolution was offered:

"Resolved, That the directors of the American Institute of Electrical Engineers be authorized and directed to incorporate such association pursuant to section 5 of the Membership Corporations Law under article 1 of such chapter and to execute and file certificates and take such other and further steps as may be proper and necessary therefor."

That such resolution was adopted by the votes of thirty-nine (39) of the members of such association, being the unanimous vote of all the members thereof present at such meeting and voting thereon.

Dated March 11th, 1896.

LOUIS DUNCAN, Chairman.
RALPH W. POPE, Secretary.

STATE OF NEW YORK, COUNTY OF NEW YORK, } ss.

Louis Duncan, chairman, and Ralph W. Pope, secretary, being severally duly sworn, each deposes and says that he has read the foregoing certificate, subscribed by him, and knows the contents thereof, and that the same is true and correct of his own knowledge.

LOUIS DUNCAN, Chairman
RALPH W. POPE, Secretary.

Sworn to before me, this 11th day of March, 1896,

Majority of Council.

Certification of Incorporation of the American Institute of Electrical Engineers.

I hereby approve of the within certificate and the filing thereof.

HENRY R. BEEKMAN,
Justice of the Supreme Court of the State of New York First Judicial District.

STATE OF NEW YORK,
OFFICE OF THE SECRETARY OF STATE.
Filed and Recorded Mar. 16, 1896.
ANDREW DAVIDSON,
Deputy Secretary of State.

STATE OF NEW YORK,
OFFICE OF THE SECRETARY OF STATE, } ss.

I have compared the preceding with the original Certificate of Incorporation of American Institute of Electrical Engineers, filed and recorded in this office on the 16th day of March, 1896, and do hereby certify the same to be a correct transcript therefrom and the whole of said original.

Witness my hand and the seal of the office of the Secretary of State, at the City of Albany, this twenty-third day of November, one thousand nine hundred and five.

FRANK D. COLE,
Deputy Secretary of State.

Amendments to Certificate of Incorporation

At the annual meeting of the Institute, duly held at headquarters, No. 12 West 31st Street, in the borough of Manhattan, City of New York, on the 21st day of May, 1901, the number of Directors was increased from twenty-one (21), the former number, to twenty-three (23) by a Resolution of the Board of Directors previously passed and by a new Constitution and By-Laws duly adopted by an affirmative vote of at least two-thirds of the members present. A Certificate of Increase of Directors was duly filed and recorded by the Office of Secretary of State, State of New York, on August 6, 1901.

At the annual meeting of the Institute, duly held at the office of the Institute, No. 33 West 39th Street, in the borough of Manhattan, City of New York, on the 21st day of May, 1920, the number of Directors was increased from twenty-three (23), the former number, to twenty-six (26) by a Resolution of the Board of Directors previously passed and an amendment to the Constitution adopted by the affirmative vote of the majority of its members present. A Certificate of Increase of Directors was duly filed and recorded by the Office of the Secretary of State, State of New York, on September 28, 1925.

At a special meeting of the Institute, duly held upon notice pursuant to Section 43 of the Membership Corporation Law, which special meeting was held on the 29th day of November, 1927, Clause 7 of the Certificate of Incorporation, stipulating the date for holding the annual meeting of the Institute on the third Tuesday of May in each year, was amended to provide for holding the annual meeting for the year 1928 on Tuesday, June 26, 1928, and thereafter on such date as shall be fixed in the By-laws of the Institute, this action being pursuant to the direction of the Board of Directors of the Institute and by virtue of the authority conferred by the concurring vote of a majority of the members of the Institute present at the special meeting. A Certificate of Amendment of the date of the annual meeting was duly filed and recorded by the office of the Secretary of State, State of New York, on July 17, 1928.

I. CANONS OF ETHICS FOR ENGINEERS

Being the statement developed and promulgated by the Engineers' Council for Professional Development, as a standard for all national engineering society groups.

Foreword

Honesty, justice, and courtesy form a moral philosophy which, associated with mutual interest among men, constitutes the foundation of ethics. The engineer should recognize such a standard, not in passive observance, but as a set of dynamic principles guiding his conduct and way of life. It is his duty to practice his profession according to these Canons of Ethics.

As the keystone of professional conduct is integrity, the engineer will discharge his duties with fidelity to the public, his employers, and clients, and with fairness and impartiality to all. It is his duty to interest himself in public welfare, and to be ready to apply his special knowledge for the benefit of mankind. He should uphold the honor and dignity of his profession and also avoid association with any enterprise of questionable character. In his dealings with fellow engineers he should be fair and tolerant.

Professional Life

Sec. 1. The engineer will coöperate in extending the effectiveness of the engineering profession by interchanging information and experience with other engineers and students and by contributing to the work of engineering societies, schools, and the scientific and engineering press.

Sec. 2. He will not advertise his work or merit in a self-laudatory manner, and he will avoid all conduct or practice likely to discredit or do injury to the dignity and honor of his profession.

Relations with the Public

Sec. 3. The engineer will endeavor to extend public knowledge of engineering, and will discourage the spreading of untrue, unfair, and exaggerated statements regarding engineering.

Sec. 4. He will have due regard for the safety of life and health of the public and employees who may be affected by the work for which he is responsible.

Sec. 5. He will express an opinion only when it is founded on adequate knowledge and honest conviction while he is serving as a witness before a court, commission, or other tribunal.

Sec. 6. He will not issue ex parte statements, criticisms, or arguments on matters connected with public policy which are inspired or paid for by private interests, unless he indicates on whose behalf he is making the statement.

Sec. 7. He will refrain from expressing publicly an opinion on an engineering subject unless he is informed as to the facts relating thereto.

Relations with Clients and Employers

Sec. 8. The engineer will act in professional matters for each client or employer as a faithful agent or trustee.

Sec. 9. He will act with fairness and justice between his client or employer and the contractor when dealing with contracts.

Sec. 10. He will make his status clear to his client or employer before undertaking an engagement if he may be called upon to decide on the use of inventions, apparatus, or any other thing in which he may have a financial interest.

Sec. 11. He will guard against conditions that are dangerous or threatening to life, limb, or property on work for which he is responsible, or if he is not responsible, will promptly call such conditions to the attention of those who are responsible.

Sec. 12. He will present clearly the consequences to be expected from deviations proposed if his engineering judgment is overruled by nontechnical authority in cases where he is responsible for the technical adequacy of engineering work.

Sec. 13. He will engage, or advise his client or employer to engage, and he will coöperate with, other experts and specialists whenever the client's or employer's interests are best served by such service.

Sec. 14. He will disclose no information concerning the business affairs or technical processes of clients or employers without their consent.

Sec. 15. He will not accept compensation, financial or otherwise, from more than one interested party for the same service, or for services pertaining to the same work, without the consent of all interested parties.

Sec. 16. He will not accept commissions or allowances, directly or indirectly, from contractors or other parties dealing with his client or employer in connection with work for which he is responsible.

Sec. 17. He will not be financially interested in the bids as or of a contractor on competitive work for which he is employed as an engineer unless he has the consent of his client or employer.

Sec. 18. He will promptly disclose to his client or employer any interest in a business which may compete with or affect the business of his client or employer. He will not allow an interest in any business to affect his decision regarding engineering work for which he is employed, or which he may be called upon to perform.

Relations with Engineer

Sec. 19. The engineer will endeavor to protect the engineering profession collectively and individually from misrepresentation and misunderstanding.

Sec. 20. He will take care that credit for engineering work is given to those to whom credit is properly due.

Sec. 21. He will uphold the principle of appropriate and adequate compensation for those engaged in engineering work, including those in subordinate capacities, as being in the public interest and maintaining the standards of the profession.

Sec. 22. He will endeavor to provide opportunity for the professional development and advancement of engineers in his employ.

Sec. 23. He will not directly or indirectly injure the professional reputation, prospects, or practice of another engineer. However, if he considers that an engineer is guilty of unethical, illegal, or unfair practice, he will present the information to the proper authority for action.

Sec. 24. He will exercise due restraint in criticizing another engineer's work in public, recognizing the fact that the engineering societies and the engineering press provide the proper forum for technical discussions and criticism.

Sec. 25. He will not try to supplant another engineer in a particular employment after becoming aware that definite steps have been taken toward the other's employment.

Sec. 26. He will not compete with another engineer on the basis of charges for work by underbidding, through reducing his normal fees after having been informed of the charges named by the other.

Sec. 27. He will not use the advantages of a salaried position to compete unfairly with another engineer.

Sec. 28. He will not become associated in responsibility for work with engineers who do not conform to ethical practices.

II. CODE OF BUSINESS PRACTICE

Being those principles contained in the original code of the Insti-

tute not covered by the Canons of the Engineers' Council for Professional Development.

Character of Enterprise with Which the Engineer Is Identified

Sec. 1. It is the duty of the engineer to satisfy himself to the best of his ability that the enterprises with which he becomes identified are of legitimate character. If after becoming associated with an enterprise he finds it to be of questionable character, he should sever his connection with it as soon as practicable.

Ownership of Engineering Data and Records

Sec. 2. It is desirable that an engineer undertaking for others work in connection with which he may make improvements, inventions, plans, designs, or other records, should enter into an agreement regarding their ownership.

Sec. 3. If an engineer uses information which is not common knowledge or public property, but which he obtains from a client or employer, the results in the form of plans, designs, or other records, should not be regarded as his property, but the property of his client or employer.

Sec. 4. If an engineer uses only his own knowledge, or information which by prior publication, or otherwise, is public property and obtains no engineering data from a client or employer, except performance specifications or routine information, then in the absence of an agreement to the contrary the results in the form of inventions, plans, designs, or other records, should be regarded as the property of the engineer, and the client or employer should be entitled to their use only in the case for which the engineer was retained.

Sec. 5. All work and results accomplished by the engineer in the form of inventions, plans, designs, or other records, that are outside of the field of engineering for which a client or employer has retained him, should be regarded as the engineer's property unless there is an agreement to the contrary.

Sec. 6. When an engineer or manufacturer builds apparatus from designs supplied to him by a customer, the designs remain the property of the customer and should not be duplicated by the engineer or manufacturer for others without express permission. When the engineer or manufacturer and a customer jointly work out designs and plans or develop inventions, a clear understanding should be reached before the beginning of the work regarding the respective rights of ownership in any inventions, designs, or matters of similar character, that may result.

Sec. 7. Any engineering data or information which an engineer obtains from his client or employer, or which he creates as a result of such information, may be considered confidential by the engineer; and while he is justified in using such data or information in his own practice as forming part of his professional experience, its publication without express permission is improper.

Sec. 8. Designs, data, records, and notes made by an employee and referring exclusively to his employer's work, should be regarded as his employer's property.

Sec. 9. A customer, in buying apparatus, does not acquire any right in its design but only the use of the apparatus purchased. A client does not acquire any right to the ideas developed and plans made by a consulting engineer except for the specific case for which they were made.

The Engineer's Relations to the Public and to the Engineering Profession

Sec. 10. It is desirable that the first publication concerning inventions or other engineering advances should not be made through the public press, but before engineering societies or through technical publications.

Sec. 11. It is unprofessional to give an opinion on a subject without being fully informed as to all the facts relating thereto and as to the purposes for which the information is asked. The opinion should contain a full statement of the conditions under which it applies.

Sec. 12. An engineer in responsible charge of work should not permit non-technical persons to overrule his engineering judgments on purely engineering grounds.

III. Use of Membership Designations and Institute Insignia

Sec. 13. The use of a membership designation, such as Fellow, Member, Associate, or Honorary Member, is a purely personal privilege of the individual member. It may be used with the member's name on stationery and in any ethical professional advertising. But a corporation, association, or firm may not itself use any membership designation because of the individual membership status possessed by a representative of a corporation, association, or firm.

Sec. 14. Insignia of the Institute, that is, any symbol such as an imprint of the badge design, or a heading such as "American Institute of Electrical Engineers," should be used only for Institute business and publications. The personal use of Institute insignia by a member should be limited to wearing an officially issued badge of the appropriate grade.

HISTORY OF THE CANONS AND CODE

The Institute Code

At the Milwaukee convention in May 1906, Dr. Schuyler Skaats Wheeler delivered his presidential address on "Engineering Honor." It was the sense of the convention that the ideas contained in this address should be embodied in a Code of Ethics for the electrical engineering profession, and to this end the following committee was appointed in October 1906:

Schuyler Skaats Wheeler, *Chairman*

H. W. Buck — Charles P. Steinmetz

In May 1907, the committee reported a code to the President and Board of Directors for discussion at the June convention at Niagara Falls. It was discussed and approved by the convention, and it was taken up by the Board of Directors on August 30, 1907, revised, printed, and submitted to the membership for suggestions to be sent to a new committee appointed by President Stott.

In June 1911, in accordance with a resolution of the Board of Directors, President Jackson reappointed a committee which was assisted by eighteen advisory members, as follows:

William S. Barstow
Louis Bell
John J. Carty
Francis B. Crocker
Dugald C. Jackson
A. E. Kennelly
John W. Lieb, Jr.
C. O. Mailloux
Ralph D. Mershon
Henry H. Norris
Ralph W. Pope
Harris J. Ryan
Charles F. Scott
Samuel Sheldon
William Stanley
Lewis B. Stillwell
Elihu Thomson
W. D. Weaver

This committee's work was presented in a report to the Board of Directors on February 9, 1912, when the code was tentatively adopted and the title of the committee and of the code was changed from that of Code of Ethics to Code of Principles of Professional Conduct. After a month's careful analysis and consideration of numerous suggestions from the advisory members of the committee and others, the completed code was adopted at the meeting of the Board of Directors on March 8, 1912.

On March 17, 1922, the Board of Directors adopted resolutions re-affirming adherence to the code, and providing that it shall be the duty of the Committee on Code of Principles of Professional Conduct to advise inquirers respecting questions of proper professional conduct, and to investigate and report upon any practice of a member of this Institute which might be prejudicial to the welfare of the Institute, the engineering profession, or the community.

Since 1912 the following have served as members of the Committee on Code of Principles of Professional Conduct:

C. A. Adams

The Canons of the Engineers' Council for Professional Development

A project for a uniform statement of ethics to be formally adopted in the American engineering world was first organized under the auspices of the American Engineering Council, with Dugald C. Jackson as Chairman of a special committee. The Council was dissolved in 1940 but the Engineers' Council for Professional Development had come into existence and took on the responsibility for this

committee which continued with Dr. Jackson as Chairman down to 1948. This committee was made up of a representative of each one of the eight constituent societies of the Council plus the American Institute of Consulting Engineers.

The committee in 1942 came to agreement on a formulation of Canons of Ethics consisting of 31 items. This was approved by the Council and forwarded to the constituent societies with the request that each society through its Board should give the Council its views of the Canons. The American Institute of Electrical Engineers and the National Council of State Boards of Engineering Examiners approved the Canons in principle. The Council of the American Institute of Consulting Engineers advanced changes in phraseology and in arrangement of items, which statement was then referred to as the Alternative Draft. The American Society of Mechanical Engineers accepted the Canons in principle with a preference for the Alternative Draft. The American Society of Civil Engineers approved in principle a committee draft similar to the Alternative. The Engineering Institute of Canada approved a draft largely founded on the alternatives. In April 1947, the Committee of the Council adopted the statement of the Engineering Institute of Canada (which society had the benefit of the preceding years of discussion before making its formulation) with some slight modifications. The Executive Committee of the Council approved this statement and recommended to its constituent societies that it be adopted. The Council in October 1947, in accordance with the assent of seven of the eight constituent societies adopted the revised Canons as the official formulation for the engineering field, and recommended its adoption by the separate societies.

The Board of Directors of the American Institute of Electrical Engineers adopted the revised Canons on November 5, 1947, advising its Committee on Principles of Professional Conduct to revise the Institute's old Code to accord with such action.

The "Statement of Principles of Professional Conduct," as above printed, was recommended to the Directors by the 1949–1950 Institute Committee embodying the Canons and supplementing them with certain rules of business practice from the old code not embodied in the Canons. The Statement was adopted by the Directors on August 4, 1950.

The "Canons of Ethics for Engineers" Part I of this statement, printed on rag paper in a size, 9 inches by 14 inches, suitable for mounting, may be purchased from Engineers' Council for Professional Development, 29–33 West 39th Street, New York 18, N. Y., at a price of 50¢ each—35¢ in lots of ten or more. Please include remittance with order.

of the

American Institute of Electrical Engineers

[Incorporated March 16, 1896]

(Constitution Adopted May 13, 1884; Amended December 8, 1885, September 27, 1892, May 15, 1894, March 16, 1896, May 21, 1901, May 21, 1907, May 21, 1912, May 16, 1916, May 21, 1920, May 15, 1925, June 26, 1928, June 23, 1930, June 24, 1935, June 21, 1938, June 27, 1945, June 23, 1948, June 25, 1951, June 23, 1952, and June 15, 1953)

ARTICLE I

1. The name of this association is the AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS.

2. Its object shall be the advancement of the theory and practice of Electrical Engineering and of the allied Arts and Sciences and the maintenance of a high professional standing among its members.

ARTICLE II

MEMBERSHIP

3. The membership of the Institute shall consist of Honorary Members, Fellows, Members, and Associate Members, who shall be known as Corporate Members, and Affiliates, who shall be known as Non-Corporate Members. Fellows, Members, and Associate Members shall be equally entitled to all the rights and privileges of the Institute, excepting that Fellows only shall be eligible to the office of President; and Fellows and Members only shall be eligible to the offices of Vice-President, Director, and Treasurer. Members shall be entitled to a diploma and when awarded the grade of Fellow shall receive a citation. Affiliates shall be nonvoting (except for Section officers) but entitled to all other rights and privileges except holding offices reserved to Fellows and Members. Honorary Members shall be entitled to the rights and privileges of the Institute other than holding office therein.

4. A Fellow shall at the time of transfer be at least 40 years of age and shall be a Member actively engaged in the electrical field (temporary unemployment excepted). He shall have had at least 15 years of active experience and shall have been in good standing in Member grade for at least 10 consecutive years immediately prior to the date of proposal for transfer to Fellow and shall qualify under paragraph "a" or "b" of this section. A person who at the time of admission to the grade of Member held in good standing in a cognate electrical engineering society of national scope in any country a grade of membership for which the qualifications indicate a standing equivalent to that required for the grade of Member herein, may have such years of prior membership in that equivalent grade to a maximum of nine considered as a part of the requisite ten years in Member grade.

a. He shall have attained distinction in the design, construction, manufacture, or operation of important electrical work or products or in the teaching of a major course in electrical engineering or science in an educational institution whose curriculum is approved by the Board of Directors, and as a measure of such accomplishment he shall have been in responsible charge of such work for at least five years.

b. He shall have attained distinction by reason of inventions, original work in electrical science, arts, or literature, or as an engineering executive of electrical engineering work of large scope, or the application of electricity to important engineering projects.

5. At the time of application for admission or transfer to the grade of Member the applicant shall be at least 30 years of age and engaged in active practice in the electrical field (temporary unemployment excepted). He shall have had at least seven years of active practice of the profession in one or a combination of several branches of the electrical field, indicative of growth in competency and achievement in that field and of a character satisfactory to the Board of Directors. Graduation in an engineering curriculum of an educational institution approved by the Board of Directors shall constitute one year of this requisite of seven years and possession of a license as a Professional Engineer issued by a legally constituted Board whose requirements for licensing are considered adequate by the Board of Directors shall be considered equivalent to three years of the requisite seven years of practice. In addition he shall qualify under one or more of paragraphs "a" to "d" of this Section. To qualify under paragraphs "a," "b", or "c" he shall have been in good standing in the grade of Associate Member for a period of at least two consecutive years immediately prior to the date of application for the grade of Member.

a. An electrical engineer by profession. As such he shall be qualified in and have had responsible charge for at least two years of important electrical design, construction, manufacture or operation.

b. A teacher of electrical engineering or electrical science. As such he shall be capable of teaching a major course in one or more fields of electrical science or engineering and shall have had responsible charge for at least two years of an electrical course in a school of electrical engineering or allied science approved by the Board of Directors.

c. A person working in the field of electrical engineering or electrical science who, by inventions, original work, or by proficiency in electrical science, the electrical arts, or electrical literature or as an engineering executive of an electrical enterprise of large scope or the application of electricity to engineering projects, has attained a standing equivalent to that required for Member grade under paragraphs "a" or "b."

d. A person who holds in good standing in a cognate engineering society of national scope in any country a grade of membership for which the qualifications indicate a standing equivalent to that required for Member grade under paragraphs "a" or "b."

6. At the time of his application for admission or advancement to the grade of Associate Member the applicant shall be at least 21 years of age and shall be: (1) A graduate of an engineering curriculum that is approved by the Board of Directors or (2) if not such a graduate he shall have equivalent attainments, including five years of increasingly important engineering experience indicative of growth in engineering competence and achievement and of a character satisfactory to the Board of Directors. He shall be either:

a. An electrical engineer by profession. As such he shall be qualified under instruction and supervision to undertake electrical design, construction, manufacture or operation.

b. A teacher of electrical subjects. He shall under supervision teach subjects required in a curriculum approved by the Board of Directors.

7. At the time of application for admission to the grade of Affiliate a person shall be at least 21 years of age and shall satisfy the Board of Directors that he is interested in rendering service to electrical engineering or electrical science in the fields of commerce, industry, law, science, or the arts, or is so connected with the applications of electricity that his admission as an Affiliate would contribute to the interests of the Institute.

8. The Board of Directors may in the Bylaws provide for persons having qualifications of an enrolled Student with such privileges, dues, and requirements as the Bylaws may from time to time provide. But, such enrolled Students, though called Student members, shall not be deemed to be members of the Institute in the sense of being corporate members, and may acquire membership only subject to the conditions and requirements of the Constitution.

9. Honorary Members may be chosen from among those who

have rendered acknowledged eminent service to mankind in engineering or other fields.

ARTICLE III

Admission, Transfer, and Expulsion of Members

10. Honorary Members shall be proposed in writing by at least ten members, and may be elected only by the unanimous vote of the Board of Directors, a ballot in writing to be forwarded by members absent from the Directors' meeting. The election of an Honorary Member shall be deemed invalid if an acceptance is not received within six months after the date of his election.

11. Fellow grade of membership shall be conferred by action of the Board of Directors on those members of ten years' good standing in Member grade whose outstanding work in electrical science or electrical engineering in any field is brought to the attention of the Board by five or more Fellows or Members who shall submit data that in the opinion of the Board is sufficient to substantiate the importance of the accomplishment and warrant the issuance of the citation and conferring of the honor. Sponsors shall, when proposing a candidate for Fellow grade, give reference to five (5) Fellows. Transfer to Fellow may not be obtained by application.

12. Except as otherwise provided in this Article, applicants for admission or transfer to any grade of membership shall give reference as follows:

For the grade of Member, five Fellows or Members.

For the grade of Associate Member, four Fellows, Members, or Associate Members.

For the grade of Affiliate, three Fellows, Members, Associate Members, or Affiliates.

Application may be made for transfer from the grade of Associate Member to the grade of Member.

Application may be made for transfer from the grade of Affiliate to the grade of Associate Member.

Should an applicant for admission or transfer certify that he is not personally known to the above specified number of Fellows, Members, or Associate Members who are sufficiently familiar with the applicant's experience to justify him in using their names as references, the Board of Examiners may accept, for the deficiency, other references, preferably engineers of standing in the profession.

13. Regulations as to the form of applications for admission, and for transfer from one grade to another, and as to the method of their consideration, shall be prescribed in the Bylaws.

14. All elections and transfers shall be by vote of the Board of Directors; two negative votes shall exclude a candidate.

15. The Board of Directors may refuse to elect or transfer any applicant whose character, reputation, or professional conduct would make him, in the opinion of the Board of Directors, an undesirable member.

16. A member of any grade in the Institute may resign his membership by a written communication to the Secretary. If all his dues and other indebtedness have been paid his resignation shall be accepted, unless charges have been preferred against him in accordance with Section 17.

17. Upon the written request of ten or more Fellows, Members, or Associate Members that, for cause stated therein, a Fellow, Member, Associate Member, or Affiliate of the Institute be expelled, the Board of Directors shall consider the matter and, if there appears to be sufficient reason, shall notify the accused of the charges against him, by mailing a communication to the address of the accused as it appears in the Institute records. He shall then have the right to present a written defense, and to appear for trial, in person or by duly authorized representative, before a meeting of the Board of Directors, of which meeting he shall be notified at least twenty days in advance. Not less than two months after such meeting, the Board of Directors shall finally consider the case, and if in the opinion of the Board of Directors the charges have been sustained, the accused may be expelled or suspended for such period as the Board may determine, or he may be permitted to resign.

ARTICLE IV

Dues

18. The entrance and transfer fees and the annual dues shall be as prescribed in the Bylaws.

19. Honorary Members shall be exempt from all payments.

20. Persons elected after any portion of the fiscal year shall have expired, shall pay dues pro rata for the unexpired quarters of that fiscal year.

21. A Fellow, Member, Associate Member, or Affiliate who is in arrears for one year for all or any part of his dues, may be dropped from membership, as delinquent, by the Board of Directors. A Fellow, Member, Associate Member, or Affiliate who has been dropped as delinquent, may be reinstated upon payment of all back dues under the conditions specified in the Bylaws.

22. The Board of Directors, under the conditions specified in the Bylaws, may exempt from future annual dues any Fellow Member, Associate Member, or Affiliate who has paid dues for thirty-five (35) years, or who shall have reached the age of seventy (70) after having paid dues for thirty (30) years.

The Board of Directors may, in its discretion, remit the dues of any Fellow, Member, Associate Member, or Affiliate whose name has been upon the membership list for a long term of years.

ARTICLE V

Officers

23. The officers of the Institute shall be a President, one Vice-President from each geographical District as defined in the Bylaws, twelve Directors, a Secretary, and a Treasurer.

24. The President, the Secretary, and the Treasurer shall hold office for one year, the Vice-Presidents for two years, and the Directors for four years. The President, Vice-Presidents, and Directors shall not be eligible for immediate reelection to the same office excepting as provided in Section 26 for filling unexpired terms. No Vice-President or Director who has served continuously in one or more offices, and whose combined terms shall have aggregated six years or more, shall be eligible for immediate election to the office of Director or Vice-President. At each Annual Meeting the President, the requisite number of Vice-Presidents to fill the vacancies caused by expiration of terms, three Directors, and the Treasurer shall be elected by the membership, and their terms of office shall commence on the first of August next succeeding their election. The Secretary shall be appointed by the Board of Directors.

25. At the election of Vice-Presidents held in 1921 there shall be elected one Vice-President from each geographical District, those from the odd-numbered Districts to serve for one year each, and those from the even-numbered Districts two years each. All Vice-Presidents elected thereafter shall serve for two years each. In the event of a change in the geographical Districts, the Vice-Presidents then in office shall complete their terms. In case of revisions of the geographical Districts, the Board of Directors shall have the power to elect a Vice-President from each District not represented, to serve until the next election covering these Districts.

26. All vacancies shall be filled by election by the Board of Directors for the unexpired term. A vacancy in the office of President shall be filled by the election of one of the Vice-Presidents who is a Fellow. A vacancy in the office of Vice-President shall be filled by the election of a Fellow or Member from the geographical District concerned. Such election by the Board of Directors shall not render an officer ineligible for immediate election to the same office unless his combined terms of continuous service as an officer shall have aggregated six years or more.

27. No officer shall receive, directly or indirectly, any salary, compensation, or emolument from the Institute, either as such officer, or in any other capacity, unless authorized by a vote of a majority of the entire Board of Directors.

28. No officer shall be interested, directly or indirectly, in any contract relating to the operations conducted by the Institute, nor in any contract for furnishing supplies thereto, unless expressly authorized by the Bylaws or by the unanimous vote of the members of the Board of Directors present at any meeting.

ARTICLE VI

Election of Officers

29. There shall be constituted each year a Nominating Committee consisting of one representative of each geographical District, elected by its executive committee, one representative of each technical division elected by the division committee, and other members chosen by and from the Board of Directors not exceeding in number the number of technical divisions; all to be selected when and as provided in the Bylaws. The Secretary of the Institute shall be the secretary of the Nominating Committee, without voting power.

30. The executive committee of each geographical District shall act as a nominating committee of the candidate for election as Vice-President of that District, or for filling a vacancy in such office for an unexpired term, whenever a vacancy occurs.

31. The Nominating Committee shall receive such suggestions and proposals as any member or group of members may desire to offer, such suggestions being sent to the secretary of the committee.

The Nominating Committee shall name, on or before January 31 of each year, one or more candidates for President, Treasurer, and the proper number of Directors, and shall include in its ticket such candidates for Vice-Presidents as have been named by the nominating committees of the respective geographical Districts, if received by the Nominating Committee when and as provided in the Bylaws; otherwise the Nominating Committee shall nominate one or more candidates for Vice-President(s) from the District(s) concerned.

32. Independent nominations may be made by a petition of twenty-five (25) or more corporate members sent to the Secretary when and as provided in the Bylaws; such petitions for the nomination of Vice-Presidents shall be signed only by members within the District concerned.

33. On or before April 15 of each year the Secretary shall mail to all qualified voters an official ballot on which are to be listed all eligible candidates, nominated as provided in Sections 31 and 32. The candidates of the Nominating Committee shall be appropriately designated as such. Any nominee may, prior to the printing of the ballots, withdraw his name by written request to the Secretary, whereupon that fact shall be suitably indicated upon the ballot.

The voting for each office shall be restricted to the nominees for that office as printed on the ballot. The ballot shall be accompanied with an envelope on which shall be printed the title of the Institute, the name and address of the Secretary, and the words, "Official Voting Envelope—Enclosing a Ballot Only." All names voted for shall be written, printed, or otherwise marked on a single ticket or ballot, which shall be enclosed in a sealed, unmarked, and unidentified inner envelope of any suitable character, which shall in turn be enclosed either in the "Official Voting Envelope" (received from the Secretary), or any other envelope, marked on its face, "Non-Official Voting Envelope—Enclosing a Ballot Only." The outer envelope of either class shall be identified by the name of the sender on its face, shall be sealed, and, in order to be counted, shall reach the Secretary not later than the first day of June.

34. The President, during the month of May, shall appoint, subject to the approval of the Board of Directors, ten Fellows, Members, or Associate Members, not members of the Board of Directors or of the Nominating Committee, to constitute the Committee of Tellers. Any Fellow, Member, or Associate Member not a member of the Board of Directors or of the Nominating Committee who shall deliver to the Secretary, on or before the first day of May, a written petition signed by at least twenty Fellows, Members, or Associate Members, stating their desire that he be a member of the Committee of Tellers, shall also be a member of that committee, provided that the aforesaid signatures shall not have appeared on another similar petition.

35. The Committee of Tellers shall meet at the office of the Institute as soon after the first day of June as possible, and shall receive, unopened, all ballots from the Secretary, who shall also make to it a written report of the number of ballots received on and before, and after, the first day of June. It shall forthwith proceed, in secret, to count the vote, after first eliminating the ballots of members who are delinquent or otherwise disqualified from voting, and shall prepare and sign in duplicate a report of the results of the vote, which shall be sealed, and of which one copy shall forthwith be filed with the Secretary, and of which the other copy shall remain in possession of the chairman of the committee who shall hand this report to the presiding officer at the ensuing Annual Meeting. In the absence of this report by the chairman of the committee, the Secretary shall produce the duplicate copy, and hand the same to the presiding officer of the meeting. The presiding officer shall cause the report to be read at the first session of the Annual Meeting and shall declare duly elected the eligible persons receiving the greatest number of votes for the respective offices.

ARTICLE VII

Management, Duties of Officers and Committees

36. The affairs of the Institute shall be managed by a Board of Directors under this Constitution and the general provisions of the laws under which it is incorporated. The Board of Directors shall consist of the President, the two surviving Past Presidents most recently retired, the Vice-Presidents, the Directors, and the Treasurer.

37. The Board of Directors shall have such powers and duties as are prescribed by statute for a Board of Directors.

38. The Board of Directors shall direct the investment and care of the funds of the Institute, shall make appropriations for specific purposes, shall pass upon all applications for admission or for transfer, shall act upon all questions of expulsion of members, shall appoint all employees and fix their salaries, and in general shall direct the business of the Institute, either itself or through its officers and committees. The Board of Directors at its first meeting in each fiscal year shall appoint a corporate member of any grade to serve as Secretary of the Institute for one year, commencing on the first of August next succeeding, subject to removal only by an affirmative vote of a majority of the members of the Board. The Secretary shall receive a salary fixed by the Board. He shall take part in the deliberations of the Board but shall not have a vote therein.

39. The Board of Directors shall prepare and adopt a series of Bylaws under this Constitution. Such Bylaws shall be adopted or may be amended by a concurring vote of not less than a majority of the Board of Directors; provided, that the text of a proposed Bylaw or amendment shall be furnished to each member of the Board of Directors at least ten days before the meeting at which a vote on the same will be taken.

40. The President shall have general supervision of the affairs of the Institute, under the direction of the Board of Directors. He shall preside at the meetings of the Institute, and of the Board of Directors at which he may be present, and shall be *ex-officio* member of all committees. He shall deliver an address at one of the general meetings. In the absence of the President, a Vice-President, or, in the absence of all of the Vice-Presidents, a Director, shall preside at meetings of the Institute and the Board of Directors. The President shall appoint the standing committees of the Institute. He may also appoint special committees from time to time.

41. The Secretary shall be the executive officer of the Institute under the direction of the President and the Board of Directors. He shall attend the general meetings of the Institute and all meetings of the Board of Directors, and shall arrange for recording the proceedings thereof. He shall collect and deposit, subject to the order of the Treasurer, all moneys due the Institute, reporting such deposit to the Treasurer, who shall receipt for the same. He shall personally certify the accuracy of bills or vouchers on which money is to be paid, and shall draw and countersign all checks, and these shall be signed by the Treasurer when such drafts are known to him to be proper and duly authorized by the Finance Committee and in accordance with warrants executed by the Secretary. He shall have charge of the books and accounts of the Institute. He shall furnish to the Board of Directors from time to time such statements as may be required. He shall conduct the correspondence of the Institute, and shall keep full records. He shall be in responsible charge, under the President and the Board of Directors, of all the property of the Institute. He shall, with the approval of the Board of Directors, employ such clerical force as may be necessary and shall be responsible for the work of all employees of the Institute. He shall perform such other duties as may be assigned to him. His entire time must be devoted to the affairs of the Institute, unless otherwise authorized by the Board of Directors.

42. The Treasurer and the Secretary shall invest such funds as may be ordered by the Board of Directors. They shall pay bills when approved by the Finance Committee, for expenditures authorized by the Board of Directors. The Board of Directors may authorize the Treasurer and the Secretary to pay certain specified routine expenses in advance of approval by the Finance Committee. The Treasurer shall make an annual report and such other reports as may be prescribed.

43. The Board of Directors may delegate any or all of its powers to an Executive Committee of seven members, consisting of the President and the Treasurer, *ex-officio*, and five other members of the Board of Directors, which committee shall conduct the affairs of the Board of Directors between its meetings.

44. The Board of Directors or the Executive Committee (subject to the direction of the Board) may at any time authorize any officer, director, other person, or committee, to perform any acts or functions, which in the Constitution or Bylaws may be prescribed to be performed by any specified officer, other person, or committee whenever by reason of death, absence, disability, or other cause, sufficient ground therefor shall appear to the Board or Executive Committee.

45. The standing committees to be appointed by the President shall be the Finance Committee, the Board of Examiners, and such other committees as may be so specified by the Bylaws or by resolution of the Board of Directors. The Finance Committee shall have direct supervision of the financial affairs of the Institute. All of its members shall be members of the Board of Directors. The Board of Examiners shall consider the qualifications of applicants for election and for transfer, whose applications have been received by the Secretary and which are in conformity with Article III, and shall

report its findings to the Board of Directors for action. All of its members shall be Fellows of the Institute.

All committees shall be directly responsible to the Board of Directors, shall act under its direction, and shall perform such duties and have such powers as specified in this Constitution, in the Bylaws, and as delegated to them by the Board of Directors. The Board of Directors may, at any time, at its own discretion, remove any or all members of any committee and appoint others. The terms of the members of all standing and special committees shall terminate at the close of the administrative year, July 31, or as soon thereafter as their successors are appointed.

46. All official communications of committees to the Board of Directors shall be made through the Secretary unless otherwise specially ordered by the Board of Directors.

47. The Board of Directors may, at its discretion, appoint Local Honorary Secretaries to represent the Institute in foreign countries. Such appointments shall be made for a period of two (2) years and may be renewed.

48. The following numbers shall constitute a quorum of the Board of Directors:

For all business prescribed by statute for a Board of Directors—a majority or such larger number as the statute may require.

For expulsion of members—fifteen members.

For all other business—five members.

49. Unless otherwise specifically provided in this Constitution, the action of the Board of Directors shall, in all cases, be determined by the concurring vote of a majority of the members present, providing there exists the quorum required for the particular business.

ARTICLE VIII

Meetings

50. The Annual Meeting of the Institute shall be held in 1928 on Tuesday, June 26 (during the Annual Summer Convention), and thereafter shall be held upon such date and at such place as shall be fixed in the Bylaws. At this meeting a report of the activities of the Institute for the past fiscal year shall be submitted by the Board of Directors. This report shall be verified by the Secretary and approved by the Board of Directors. It shall show the whole amount of real and personal property owned, where located, where and how invested; the amount and nature of the property acquired during the past fiscal year and the manner of its acquisition; the amount applied, appropriated, or expended during the year, and the purposes, objects, or persons to or for which such applications, appropriations, or expenditures have been made; and all other essential facts bearing upon the status of the Institute. This report shall be filed with the records of the Institute and an abstract thereof entered in the minutes of the Annual Meeting. The vote for officers and Directors for the ensuing year shall be announced; and any other business may be brought before, and transacted at, this meeting. Notice of the Annual Meeting shall be sent by mail or otherwise to all Fellows, Members, Associate Members, and Affiliates at least ten days in advance.

51. There shall be held each year such general meetings and District meetings as are provided for in the Bylaws, for the presentation and discussion of professional papers, reports, etc., and for the transaction of other business not affecting the organization or policy of the Institute. Questions affecting the organization or policy of the Institute may be brought up for discussion at such general meetings, and may be referred by a majority vote to the Board of Directors, with recommendations. The dates and locations of such general meetings shall be fixed by the Board of Directors.

52. Except otherwise provided by law or by the Constitution, special meetings of the Institute for the transactions of business may be called by the Board of Directors at any time, by written notice stating the specific object thereof, mailed to each Fellow, Member, Associate Member, and Affiliate at least ten (10) days prior to the date of said meeting.

53. Other meetings of the Institute may be held at such times and places as the Board of Directors shall select, at which no business affecting the organization or policy of the Institute shall be transacted.

54. Cushing's Manual shall govern the procedure at meetings of the Institute and of the Board of Directors, when not in conflict with the Constitution and Bylaws.

ARTICLE IX

Institute Sections and Branches

55. Whenever, in the judgment of the Board of Directors, a sufficient number of Fellows, Members, and Associate Members shall petition, in writing, these members may form, subject to the Constitution and all Bylaws and regulations which may be hereafter prescribed by the Board of Directors, a Section organization for the purpose of more effectually carrying out the aims of the Institute.

56. Any Fellow, Member, Associate Member, or Affiliate may become a member of such Section, but a Fellow, Member, Associate Member, or Affiliate shall be entitled to vote, or hold office, in one Section only.

57. The officers of each Section shall consist of a chairman, a secretary, and such other officers as each Section may find desirable. These officers shall be elected by the votes of the Fellows, Members, Associate Members, and Affiliates of the Section, in the manner provided in the Section Bylaws. The election of any Fellow, Member Associate Member, or Affiliate as a Section officer shall not debar him from election or appointment to any other office in the Institute.

58. The chairman of the Section shall perform the duties usually devolving upon the chairman of any organization. He shall have the privilege of appearing before the Sections Committee or the Board of Directors at any meeting, on giving due notice of his intention to do so, for the purpose of conference in regard to any matters pertaining to the affairs of the Institute in his Section. The chairman shall perform such other duties and shall have such other powers as may be delegated to him by the Board of Directors.

59. The secretary shall report the proceedings of the Section to the Secretary of the Institute; he shall, in general, discharge the duties of a secretary both to the Section itself and in its relation to the Institute; he shall perform such other duties as may be prescribed in the Section Bylaws, or in the Bylaws of the Institute, or delegated to him by the Board of Directors.

60. Each Section may have the privilege of being represented at a general meeting, by an official delegate, who shall be the chairman of that Section, or, in his absence or inability to attend, by an alternate delegate selected by the Section. The official delegate attending a general meeting may have his expenditures for transportation refunded by the Institute, as provided in the Bylaws.

61. The Sections may hold meetings at such times and places as may be determined by their officers, for the purpose of carrying on their work.

62. Any Section may adopt for its own government such Bylaws to be known as "Section Bylaws" as it may find expedient, provided that no provision thereof shall be incompatible with the Constitution or the Bylaws of the Institute.

63. Branches may be formed at institutions of learning and Student meetings may be held as provided in the Bylaws.

64. Sections and Branches may be dissolved in the manner specified in the Bylaws for failure to comply with the Constitution and Bylaws of the Institute.

ARTICLE X

General

65. A quorum at the Annual Meeting, or at any special business meeting, present in person or by proxy, shall consist of not less than one hundred (100) corporate members.

66. Every Fellow, Member, or Associate Member entitled to vote at any meeting may so vote by proxy, signed by the Fellow, Member, or Associate Member and filed with the Secretary before the meeting at which it is to be voted. No proxy shall be valid after the expiration of eleven (11) months from the date of its execution, unless the Fellow, Member, or Associate Member executing it shall have specified therein the length of time it is to continue in force, which shall be for some limited period. Every proxy shall be revocable at the pleasure of the person executing it.

67. The fiscal year of the Institute shall terminate with the thirtieth day of April.

ARTICLE XI

Amendments

68. Amendments to this Constitution may be proposed by means of a petition signed by not less than one hundred (100) Fellows, Members, or Associate Members and received by the Secretary not later than the fifteenth day of February; or by means of a Resolution adopted by the Board of Directors not later than the fifteenth day of February; Such proposed amendment or amendments shall be submitted to legal counsel by the Board of Directors, and if, in the opinion of such counsel, they are in accordance with the laws under which the Institute is organized, a copy shall be mailed, with

a letter ballot, to each Fellow, to each Member, and to each Associate Member, not later than the first day of April.

69. Votes, to be considered, shall be written or printed and received, through the mail or otherwise, by the Secretary not later than the first day of June. The Secretary shall hand these votes unopened to the Committee of Tellers, which shall count such votes and make a sealed report to the Board of Directors in duplicate, of which one copy shall forthwith be filed with the Secretary, and of which the other copy shall remain in possession of the chairman of the committee, who shall hand this report to the presiding officer of the Annual Meeting. In the absence of this report by the chairman of the committee the Secretary shall produce the duplicate copy and hand the same to the presiding officer of the meeting. The presiding officer shall then cause the report to be read. If the total vote be not less than twenty per cent (20%) of the total corporate membership of the Institute and if seventy-five per cent (75%) or more of all the Fellows, Members, and Associate Members voting shall declare themselves in favor of the proposed amendment or amendments, the same shall become a part of the Constitution.

70. Amendments shall take effect sixty (60) days after their adoption, but officers and officers-elect of the Institute at the time any amendment becomes effective shall continue in office until the end of the terms for which they were elected.

71. Without changing their import the Board of Directors may number, and from time to time re-number, the various sections of the Constitution so as to serve the purpose of ready reference thereto.

72. The Secretary shall print copies of the amendments as soon as practicable after adoption, and distribute the same to Fellows, Members, and Associate Members.

The Constitution authorizes the adoption of Bylaws as follows:

ART. VII. 30. The Board of Directors shall prepare and adopt a series of Bylaws under this Constitution. Such Bylaws shall be adopted or may be amended by a concurring vote of not less than a majority of the Board of Directors; provided, that the text of a proposed Bylaw or amendment shall be furnished to each member of the Board of Directors at least ten days before the meeting at which a vote on the same will be taken.

BY-LAWS

MEMBERSHIP

SEC. 1. Fellows, Members, Associate Members, and Honorary Members are authorized to use the following abbreviations indicating their grade of membership in the Institute.

Honorary Member, Hon. Mem. A.I.E.E. Member, Mem. A.I.E.E.
Fellow, Fel. A.I.E.E. Associate Member, Assoc. Mem. A.I.E.E.

The term member (when printed without a capital), where used herein, includes Fellows, Members, Associate Members, and Honorary Members.

A member of the Institute may use his membership designation for purely personal purposes only. When used, the designation shall include his membership grade.

A corporation, association, firm, or other organization may not itself use membership designations because of membership in the Institute of its representatives or members of its staff.

Personal use of Institute symbols by a member shall be limited to the appropriate officially issued badge to which he is entitled. Institute symbols, such as imprints of the badge design, may be used only in connection with Institute business.

It shall be the duty of all members to call the attention of the Secretary to the improper use of Institute badges or symbols, or to claims made by non-members that they belong to the Institute. The Secretary shall thereupon investigate the facts and lay the matter before the Board of Directors.

SEC. 2. All applications for admission to the Institute or for transfer to a higher grade shall be made in a form approved by the Board of Directors, and shall embody a full record of the general technical education of the applicant and of his professional career. Applicants shall refer to the required number of members of the grades specified in Article III of the Constitution. Each of these references shall be requested by the Secretary to fill out a prescribed confidential form, for consideration by the Board of Examiners.

The data required by Section 11, Article III, of the Constitution to be submitted to the Board of Directors recommending the conferral of Fellow grade on a Member shall be interpreted to include a full record of education, professional development, and significant experience of the candidate with special emphasis on the accomplishments which evidence the achievement of distinction as required by Section IV, Article II, of the Constitution; and a summary of the candidate's outstanding accomplishments to serve as a basis for the citation to accompany the conferral of the Fellow grade.

SEC. 3. No application for admission or transfer shall be acted upon by the Board of Examiners until the number of replies prescribed in the Constitution is received. In the event of failure to receive replies, or the receipt of unfavorable replies, the Secretary may call upon the applicant to furnish additional names.

SEC. 4. The Board of Examiners shall consider all applications solely upon their merits, without reference to color or sex of the applicants.

SEC. 5. An applicant for admission to the Institute, who in the judgment of the Board of Examiners is not eligible to the grade applied for, but is eligible for admission to a lower grade, may be so notified, and be given the opportunity of changing his application accordingly.

SEC. 6. The names of applicants for admission to the Institute as Members shall be posted in ELECTRICAL ENGINEERING with the request that any member objecting to the election of any of the candidates shall make written communication to the Secretary, who shall refer such communication to the Board of Examiners for consideration.

No action shall be taken by the Board of Directors upon applications until one month after posting in ELECTRICAL ENGINEERING in the case of applicants residing in the United States, Canada, or Mexico, and until three months in the case of all other applicants.

SEC. 7. The names of applicants for transfer to the grade of Member, after being recommended for transfer by the Board of Examiners, shall be posted in ELECTRICAL ENGINEERING, with the request that any member objecting to the transfer of any of the applicants shall make signed communication to the Secretary, who shall refer such communication to the Board of Examiners for consideration and final action thereon shall not be taken by the Board of Directors until one month after such posting, in the case of all applicants residing in the United States, Canada, or Mexico, and until three months in the case of all other applicants.

SEC. 8. Objection to the admission or transfer of any candidate to any grade must be accompanied by reasons for such objection. All such statements shall be treated as confidential.

SEC. 9. The privileges attaching to membership in the Institute shall not be accorded to applicants for admission until they have been duly elected, and have paid their entrance fees and current dues.

SEC. 10. The rights and privileges of each member shall be personal to himself, and shall not be transferable or transmissible by his own act or by operation of law.

SEC. 11. A member whose membership shall terminate for any cause shall have no right or interest in any property of the Institute or any claim or privilege in or against the Institute or pertaining thereto.

ENTRANCE AND TRANSFER FEES AND ANNUAL DUES

SEC. 12. The entrance fees payable on admission to the Institute shall be as follows:

Admission to the grade of Member,	fifteen (15) dollars.
Admission to the grade of Associate Member,	ten (10) dollars.
Admission to the grade of Affiliate,	ten (10) dollars.

The transfer fee from Affiliate to Associate Member shall be five (5) dollars and from Associate Member to Member five (5) dollars. Persons admitted to the Associate Member or Affiliate grade upon the expiration of their term of Student membership shall not be required to pay the entrance fee. Student members of other engineering societies may be similarly admitted to the Associate Member grade under conditions set forth in the Bylaws.

SEC. 13. The annual dues shall be as follows:

For Fellows, twenty (20) dollars
For Members, fifteen (15) dollars
For Associate Members, fifteen (15) dollars; the first six (6) years of membership in Associate Member or Affiliate grade, including any prior membership in either grade, to be at a reduced rate of ten (10) dollars.
For Affiliates, fifteen (15) dollars; the first six (6) years of membership in Affiliate grade to be at a reduced rate of ten (10) dollars.

SEC. 14. A prompt notification of his election, accompanied by a statement of his initiation fee and dues, shall be mailed to each candidate by the Secretary. A second notice of his indebtedness shall be mailed one month later to every candidate remaining in arrears in the United States, Canada, or Mexico, and three months later to all other candidates. The Secretary may, at his discretion, cancel the election of any applicant remaining in arrears three months after the mailing of the second notice.

SEC. 15. Annual dues are payable in advance upon receipt of bills dated May first, the beginning of each fiscal year.

SEC. 16. A bill for annual dues shall be mailed to each member on or about May first. On August first, November first, and February first, notices shall be sent to those remaining in arrears. The annual dues bill and each of the quarterly notices sent to those remaining in arrears shall have Sections 15, 16, 17, and 19 of the Bylaws printed on the reverse side. Any member remaining in arrears on the following May first shall be placed on the Suspended List, shall receive no further Institute publications, and shall be debarred from enjoying its other privileges until reinstated. At the first meeting of the Board of Directors in the fiscal year, the Secretary shall submit to the Board of Directors a list of the delinquents, for its action thereon.

The Secretary shall each year, previous to the mailing of bills for annual dues, select from the membership list the names of all Associate Members who will by May first of that year have held membership of that grade for six years or more, and to such Associate Members mail bills for annual dues of fifteen dollars ($15.00).

SEC. 17. The mailing of such bills or statements to the last address upon the office mailing list shall be considered a valid notice of indebtedness.

SEC. 18. An Affiliate, Associate Member, Member, or Fellow who has resigned in good standing may be reelected after review of his professional record by the Board of Examiners and approval by the Board of Directors. He shall not be required to pay another entrance fee and shall renew his membership privileges upon payment of the dues for the current fiscal year in which he is reelected.

If the applicant so desires, and his lapse of membership is not greater than three years, he may be reinstated, retaining his original date of election or transfer, by the payment of all dues which have accrued during the interim; and he will then be entitled to such Institute publications issued during this period as may be available on the same basis as these publications have been furnished to other members.

SEC. 19. An Affiliate, Associate Member, Member, or Fellow who has been dropped as delinquent may, upon payment of all indebtedness to the Institute for which he was in arrears, be reelected after review of his professional record by the Board of Examiners and approval by the Board of Directors. He shall not be required to pay another entrance fee and shall renew his membership privileges upon payment of the dues for the current fiscal year in which he is reelected.

If the applicant so desires, and his lapse of membership is not greater than three years, he may be reinstated, retaining his original date of election or transfer, by payment of all the dues which have accrued during the interim; and he will then be entitled to such Institute publications issued during this period as may be available on the same basis as these publications have been furnished to other members.

SEC. 20. Any resignations received by the Secretary not later than June first of any year (September first in the case of members residing outside of the United States, Canada, and Mexico), may, at his discretion, be considered as having been received as of May first preceding. A resignation received after June first (or September first for non-resident members) shall involve payment of dues for that portion of the fiscal year ending with, and including, that quarter in which the resignation is received.

SEC. 21. During May of each year the Secretary shall notify each member who has paid dues for thirty-five (35) years or who shall have reached the age of seventy (70) after having paid dues for thirty (30) years, that he is eligible for exemption from future annual dues and that his name has been enrolled upon the records as a "Member for Life." This notice shall accompany the usual bill of membership dues rendered at the beginning of the fiscal year, and such bills shall continue to be issued until the member concerned has indicated his acceptance of exemption from the further payment of dues.

SEC. 22. All amounts now held to provide for the payment of dues of Life Members heretofore made shall be placed in the special fund designated as the "Life Membership Fund." This fund shall be so administered as to insure a reserve at the beginning of the fiscal year of a value such as to provide an annuity sufficient to cover the membership dues for life, based on the American Annuitants' Mortality Table, for all surviving contributors to the fund at their then attained ages. Any excess in the principal of the fund above the amount so required shall be transferable to the general funds of the Institute.

ELECTION OF OFFICERS

SEC. 23. During September of each year, the secretary of the Nominating Committee shall notify the chairman of the executive committee of each geographical District that by December fifteenth of that year the executive committee of each District must select a member of that District to serve as a member of the Nominating Committee and shall, by December fifteenth, notify the secretary of the Nominating Committee of the name of the member selected.

During September of each year, the secretary of the Nominating Committee shall notify the chairman of the executive committee of each geographical District in which there is or will be during the year a vacancy in the office of Vice-President that by December fifteenth of that year a nomination for a Vice-President from that District, made by the District executive committee, must be in the hands of the secretary of the Nominating Committee.

Between October first and December fifteenth of each year, the Board of Directors shall choose five of its members to serve on the Nominating Committee and shall notify the secretary of that committee of the names so selected, and shall also notify the five members selected.

The secretary of the Nominating Committee shall give the fifteen members so selected not less than ten days' notice of the first meeting of the committee, which shall be held not later than January thirty-first. At this meeting, the committee shall elect a chairman and shall proceed to make up a ticket of nominees for the offices to be filled at the next election. To insure that full consideration be given to all suggestions from the general membership, they must be in the hands of the secretary of the committee by December fifteenth. The nominations as made by the Nominating Committee shall be published in the March issue of ELECTRICAL ENGINEERING, or otherwise mailed to the Institute membership not later than the first week in March.

SEC. 24. Petitions proposing the names of candidates as independent nominations for the various offices to be filled at the ensuing election, in accordance with Article VI, Section 32 (Constitution), must be received by the secretary of the Nominating Committee not later than March twenty-fifth of each year, to be placed before that committee for the inclusion in the ballot of such candidates as are eligible.

On the ballot prepared by the Nominating Committee in accordance with Article VI of the Constitution and sent by the Secretary to all qualified voters on or before April 15 of each year, the names of the candidates shall be grouped alphabetically under the name of the office for which each is a candidate.

BOARD OF DIRECTORS

SEC. 25. Meetings of the Board of Directors shall be held at such times and places as decided upon by the Board, the hour of all meetings to be set by the President.

SEC. 26. Seniority of officers of equal rank who were elected to office on the same date shall be determined by the date of their election to the Institute.

ANNUAL MEETING

SEC. 27. The Annual Meeting of the Institute shall be held during the Summer General Meeting, the date and place to be determined each year by resolution of the Board of Directors, approved by not less than a majority of the total membership of the said Board.

GENERAL MEETINGS

SEC. 28. There shall be four general meetings of the Institute each year, namely, the Winter General Meeting, the Summer General Meeting, the Pacific General Meeting, and the Fall General Meeting, with such additional meetings as may be authorized from time to time by the Board of Directors. The Board of Directors shall determine the location and dates of all Institute meetings and, in case of public emergency, may postpone or omit any such meetings.

SEC. 29. The President shall appoint a General Meeting Committee for each meeting. The duties of this committee shall consist of making all necessary local arrangements for the meeting, in co-operation with the Secretary and the Committee on Technical Operations. The programs for the professional sessions are under the jurisdiction of the Committee on Technical Operations. The number of professional sessions and the assignment of definite periods of time for these sessions should be decided after conference with the Committee on Technical Operations, so that the other events may be conveniently arranged in order to provide a well-balanced program. The chairman of the General Meeting Committee will appoint such subcommittees as he deems necessary, as, for example, Committees on Publicity, Finance, Professional Sessions, Inspection Trips, Entertainment Features, Hotel Arrangements, etc.

SEC. 30. The general meetings of the Institute being of a professional nature only, no literature advertising commercial products shall be distributed at such meetings in the spaces under the control of the Institute, nor shall there be any exhibition of commercial products for the purpose of selling or taking orders for such products.

GEOGRAPHICAL DISTRICTS

SEC. 31. There shall be ten geographical Districts numbered and named as follows:

1. North Eastern
2. Middle Eastern
3. New York City
4. Southern
5. Great Lakes
6. North Central
7. South West
8. Pacific
9. North West
10. Canada

With the exception of certain deviations, resulting from the provisions of Sec. 32 of these Bylaws, the territory covered by each of the ten geographical Districts, shall be as shown in accompanying map.

SEC. 32. Wherever the territory of any Institute Section lies in more than one geographical District, as defined in Sec. 31 of these Bylaws, the entire territory of said Section shall be included in the geographical District in which the headquarters of the Section are located.

SEC. 33. To facilitate cooperation among the Sections there shall be an executive committee in each geographical District, including in its membership the Vice-President representing the District on the Board of Directors as chairman, a District Secretary to be appointed by the Vice-President as secretary, the vice-chairman of the Membership Committee, who may be a member of the District executive committee in another capacity also, and the chairman and one other officer selected by the executive committee of each Section within the District; also, a member of the Sections Committee who is resident in the District, and in order to encourage cooperation between Sections and Branches, the chairman of the District committee on Student activities. In case of inability of either representative of a Section mentioned above to attend a District executive committee meeting, the Section may, with the approval of the Vice-President, designate an alternate who shall have full voting power.

At the first executive committee meeting of any District, when a new Vice-President is presiding for the first time, the outgoing Vice-President of that District shall be an active voting member of the District executive committee for this one meeting.

SEC. 34. To facilitate cooperation among Student Branches and Joint Student Branches there shall be a Committee on Student Activities in each geographical District having three or more Branches, consisting of the Vice-President, District Secretary, and the Counselors of all Branches and Joint Student Branches within the District. Not later than April 15th the committee shall elect, from among the Counselors appointed for the next administrative year beginning August 1st, the chairman of the District Committee on Student Activities, and transmit the name of the chairman elect to the Vice-President and to Institute headquarters. The committee may elect such other officers as it deems desirable, particularly a vice chairman who may succeed to the chairmanship. The chairmen of the District Committees on Student Activities shall be appointed members of the Committee on Student Branches and shall be responsible to the officers of the Institute and to the Committee on Student Branches for the conduct of student affairs in their respective Districts.

DISTRICT MEETINGS

SEC. 35. District meetings shall be held, upon the approval of the Board of Directors in each instance, under the supervision of the geographical District officers and committees, in accordance with the following general plan:

Upon expression by a District executive committee of a desire to hold a District meeting, and approval by the Board of Directors, the responsibility for the meeting shall rest with a District meeting committee appointed by the Vice-President, and composed of members within the District, preferably located in the area where the meeting is to be held. This committee shall have full responsibility and authority for organizing and conducting such meeting in all its details, including the arrangement of sessions, the entertainment features, and, subject to Section 101 of the Bylaws, the selection of papers. Papers for a District meeting may be obtained from the District membership by the District meeting committee, and if papers are desired from outside the District they shall be obtained by co-operation with the Committee on Technical Operations. All papers included in the program shall be considered for publication upon the same basis as papers for general meetings. The financing of District meetings shall be in accordance with a consistent general plan approved from time to time by the Board of Directors, after consideration of such recommendations as may be received from the officers and committees concerned.

SECTIONS

SEC. 36. A petition for the formation of a Section shall be signed by not less than 50 members residing within the territorial limits hereinafter prescribed. The Board of Directors may decline to authorize the formation of a Section when in its judgment such an organization would not be compatible with the interests of the Institute.

SEC. 37. In the initial Section organization only petitioners shall have the right to vote.

SEC. 38. A Section shall be known as: the (name of place) Section of the American Institute of Electrical Engineers.

SEC. 39. The principal work of a Section shall be the holding of regular meetings for the presentation and discussion of papers on matters relating to electricity, and to the allied arts and sciences. No action which may purport to represent the policy or organization of the Institute, or of any Section, shall be published or communicated to any party or parties who are not members of the Institute, without the approval of the Board of Directors, unless accompanied by a statement to the effect that as the A.I.E.E. is an international organization, the opinions or recommendations expressed represent only the views of the individual members of the..... Section.

SEC. 40. A Section of the Institute may co-operate with other local engineering organizations in the holding of joint meetings, and may invite members of such organizations to its meetings.

SEC. 41. Unless otherwise authorized by the Board of Directors and approved by the Sections Committee, the territory of a Section shall be defined as follows: A Section shall include those counties lying wholly or partly within a circle having its center at the headquarters of the Section and a radius of 50 miles. With the additional approval of the Vice-President of the District involved, other unassigned counties, to be known as auxiliary Section territory, may be assigned to a Section. If, for the purpose of establishing a new Section, or for any other reason, it becomes desirable to reassign counties in auxiliary Section territory, this may be done without the approval of the Section to which such auxiliary territory is assigned, provided the change meets with the approval of the Sections Committee and the Vice-President of the District. All other questions with regard to overlapping of Section territories shall, if possible, be decided by agreement by the Sections concerned, otherwise by the Sections Committee. Both ordinary and auxiliary Section territories shall be defined by county line boundaries.

SEC. 42. A Section may establish Subsections (or Divisions) in geographical areas within its assigned territory. The operation of such Subsections (or Divisions) shall be in accordance with regulations established by the Section.

SEC. 43. In addition to Institute members the Section Bylaws may admit other persons interested in engineering, who shall have all the Section privileges except those of voting and holding office.

SEC. 44. The chairman and secretary of each Section shall be elected for the term of one year, beginning upon the date specified

in the Bylaws of the Section. The Bylaws of the Section shall determine whether or not these officers shall be eligible for reelection.

SEC. 45. A Section whose membership has become 30 or less as of August first, or a Section which shall have held less than four meetings in any fiscal year (May 1 through April 30), shall be formally advised by the Secretary that, if within the next year this situation has not been materially improved, such Section shall become a Subsection (or Division), effective October 1. The Vice-President of the District shall recommend to the Sections Committee the Section to which the Subsection (or Division) shall be assigned.

The Board of Directors may at any time terminate the existence of any Section when in its judgment the interests of the Institute make such action desirable.

SEC. 46. Speakers at Section and Branch meetings may present informal talks with or without notes or may present formal papers in full or in abstract from prepared manuscripts. Only the latter are designated as *papers* in these Bylaws.

Section officers should endeavor to include a number of formal papers in each year's program, so that, through publication in ELECTRICAL ENGINEERING, a substantial number of high quality Section papers may be made available to the whole membership.

SEC. 47. Section and Branch officers shall be responsible to the Institute for all Section and Branch papers and any recorded discussion of them.

Such papers shall not be released for publication in advance of presentation and, except as a news item, the name of the Institute shall not be used in connection with their publication unless authorized by the Publication Committee.

Section and Branch officers should make a reasonable effort to obtain the manuscripts of papers at the time of presentation, and these should be forwarded promptly to the Secretary, with such recommendations as the Section and Branch officers wish to make with reference to publication.

SEC. 48. Except as a news item, the name of the Institute shall not be used in connection with the publication, elsewhere than in ELECTRICAL ENGINEERING, of subject matter presented as an informal talk before a Section or Branch meeting.

Where publication in TRANSACTIONS of Section or Branch papers by non-members of the Institute is involved, approvals shall be obtained in accordance with Section 100 of the Bylaws.

SEC. 49. Each Section shall conduct its affairs in such a manner as to require for its maintenance only such financial support by the Institute as is consistent with the activities carried on by that Section. Except upon the request of a Section stating specific reasons therefor, and with the approval of the Sections and Finance Committees, the appropriation to any Section of Institute funds during any year shall not exceed in the aggregate a sum to be determined as follows:

(a) Two-hundred dollars basic allotment; also an allotment of one hundred dollars to the Section for each of its Subsections holding regularly scheduled meetings.

(b) One dollar and twenty cents for each Institute member within the Section territory on August first.

(c) An additional amount for a larger number of regularly scheduled Section, Subsection, and Technical Group Meetings held during the preceding fiscal year (ending April 30) as follows:

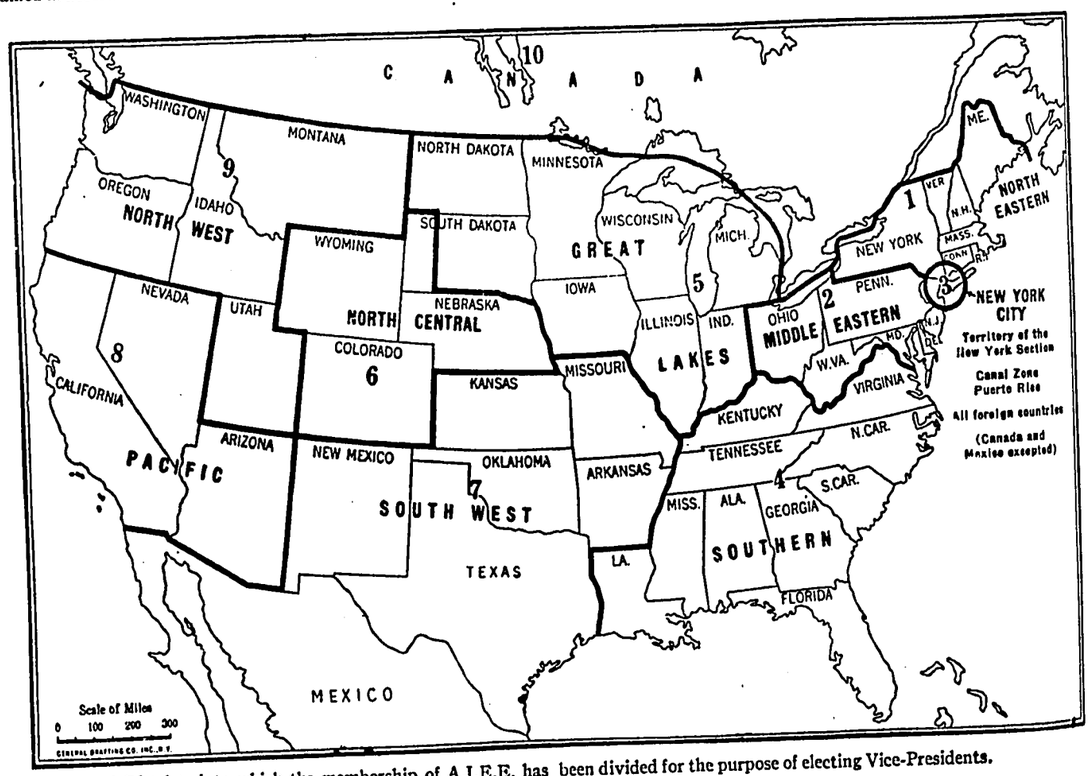
(1) Twelve to seventeen meetings, fifty dollars.
(2) Eighteen to twenty-three meetings, one hundred dollars.
(3) Twenty-four to twenty-nine meetings, one hundred fifty dollars.
(4) Thirty or more meetings, two hundred dollars.

The Treasurer and Secretary of the Institute shall forward in October of each year to the secretary of each Section one-half of the sum to which the Section is entitled under this Bylaw, less any unexpended balance in the funds provided by the Institute during the preceding year and which shall be considered as part of the payment for the current year. An accounting shall be made to the Finance Committee of the Institute, through the Secretary, when these funds have been expended, whereupon the balance of the appropriation for the year shall be sent to the secretary of the Section for which an accounting will be made at the end of the year.

SECTION DELEGATES

SEC. 50. The Section delegates attending the Summer General Meeting shall be members of the Institute. The duties of these delegates shall be as follows:

(a) To attend such meetings of the Sections Committee as may be held during the general meeting.



(b) To exchange views and experiences in connection with activities and management of Sections and to make recommendations of an advisory nature upon such matters, through the Sections Committee, to the Board of Directors.

(c) To exchange and discuss ideas regarding subjects for inclusion in technical programs of future Section meetings.

(d) To advise the chairman of the Sections Committee at least sixty days in advance of the general meeting of questions of interest to the Institute Sections which, in their opinion, should be discussed by the delegates at the meetings of the Sections Committee during the general meeting. The chairman of the Sections Committee shall appoint a subcommittee, consisting of the chairman and three other members of the Sections Committee, who shall prepare in advance of the general meeting a program of such questions for discussion.

(e) Past-chairmen or chairmen-elect of Sections, if in attendance at the general meeting, shall have the privilege of attending all meetings of the Sections Committee, but each Section will be entitled to one vote only, which shall be cast by the chairman of the Section or other official delegate of the Section.

SEC. 51. The expenditures for transportation of Section delegates as referred to in the Constitution, and for all other committees or activities for which such appropriations are provided by the Board of Directors, shall be paid from the Institute treasury at such rate per mile, one way, from the place of residence to the meeting place, as may from time to time be determined by the Board of Directors.

Geographical Districts into which the membership of A.I.E.E. has been divided for the purpose of electing Vice-Presidents.
District 8 and San Francisco Section also include the Territory of Hawaii.
District 9 and Seattle Section also include the Territory of Alaska; District 9 includes the Province of British Columbia, Canada.

STUDENTS

SEC. 52. Any person registered as a student, undergraduate or graduate, in an engineering curriculum which prepares students for the profession of engineering, and which is fully accredited by the Engineers' Council for Professional Development, where such accrediting applies, may be enrolled as a Student member of the American Institute of Electrical Engineers, provided the student is devoting full time preferably, but in no case less than 30 per cent of full time to studies under the supervision of the institutions in which he is registered. If the curriculum is not fully accredited by Engineers' Council for Professional Development, or in geographical areas where ECPD accrediting does not apply, the Board may waive this requirement on the recommendation of the Committee on Student Branches. A graduate Student whose term of enrollment, as specified in Section 54, has expired may not again enroll as a Student member.

SEC. 53. Each application for enrollment as a Student member shall be endorsed by a member of the Institute. It shall be passed upon by the Board of Examiners, and submitted to the Board of Directors for action.

SEC. 54. The annual Student member dues shall be five dollars, payable in advance and shall cover the fiscal year of the Institute beginning on May first. The initial dues payment, upon application for enrollment, shall be:

$5.00 if application is filed at Institute headquarters during period February 1 to following July 31;
$2.50 if application is filed at any other time.

The renewal of Student membership shall uniformly require payment of the dues of five dollars for the fiscal year beginning May first. The term of Student membership shall extend to the end of the fiscal year (April 30) in which student status ceases, or the Student member has attained the age of twenty-one, whichever is later, except in those cases where the fiscal year ends within six months after graduation. In such cases, Student membership may be continued for one additional fiscal year, or to the end of the fiscal year in which the age of twenty-one is attained. Student membership shall not in any case extend over a period of more than five years.

SEC. 55. The annual fee of five dollars paid by each Student member shall be applied as a subscription to ELECTRICAL ENGINEERING for the year covered by such payment.

SEC. 56. Student members enrolled under the provisions of these Bylaws may purchase the current Transactions at the same price extended to members. This privilege may be withdrawn at any time by the Board of Directors.

SEC 57. A Student member changing his mailing address without notifying the Secretary shall be entitled to available duplicate copies of ELECTRICAL ENGINEERING upon payment of twenty-five cents each.

SEC. 58. A Student member must apply for admission to the Associate Member grade before the first of March of the fiscal year in which his Student membership ceases in order to be relieved of the payment of the entrance fee as provided for in the Constitution.

STUDENT BRANCHES

SEC. 59. Any member of the Institute who is a member of the electrical engineering faculty of a university or technical school of recognized standing may, upon the approval of the Board of Directors. organize a Student Branch under the designation (name of institution) Branch of the American Institute of Electrical Engineers.

The Branch activities in a school of recognized standing offering a curriculum in electrical engineering for evening students may, upon the approval of the Committee on Student Branches, be conducted in two divisions to be known as "day" and "evening" divisions, each having officers chosen entirely from the corresponding group of students.

The Board of Directors may at any time terminate the existence of any Student Branch when in its judgment the interests of the Institute make such action desirable.

SEC. 60. Branches shall organize by the appointment or election of an executive committee of any suitable number composed of members and Student members of the Institute. This organization shall be subject to the approval of the Board of Directors. Other students in the engineering curriculum of the institution may attend the meetings under conditions prescribed by the Branch.

SEC. 61. Each Student Branch shall have a Counselor, chosen as follows: Not later than March 1st each Branch shall nominate to the Vice President of the District an Institute member chosen from the electrical engineering faculty of the institution at which the Branch is located for appointment as Counselor for the year beginning on August 1st following. If on April 1st any Branch has not submitted its nomination, the Vice President shall make his own selection and notify the Branch and the appointee of his action. The Vice Presidents shall forward all appointments as Counselor to Institute headquarters. The Counselors shall be eligible for reappointment from year to year. The Counselors shall be responsible to the officers of the Institute and to the Student Branch Committee for the conduct of the affairs of their respective Branches. Reports of the proceedings at each Branch meeting shall be made promptly by the secretary of the Branch to the Secretary, the chairman of the Committee on Student Branches and to any other officers as instructed. In the case of a Joint Student Branch, as further referred to in Section 64, a Counselor shall act jointly with the duly appointed Counselors of other national engineering societies in matters affecting the student society and the welfare of its members.

SEC. 62. At the meetings held by Branches the papers read and discussed may be either original papers, or may be papers read before one of the regular meetings of the Institute.

SEC. 63. The Institute shall publish, from time to time, in ELECTRICAL ENGINEERING, a list of universities and technical schools in which Branches have been organized, and brief notices of the proceedings of their meetings.

SEC. 64. An established student engineering society in a college or technical school of recognized standing may, upon application of its officers and a member of the Institute connected with the school, and the approval of the Board of Directors, become associated with the Institute. A society so associated may also be associated jointly with other national engineering societies approved by the Board of Directors as having similar requirements and interests. If so jointly associated it shall be known as a "Joint Student Branch," otherwise it shall be known as a "Student Branch."

Members of such associated Student Branches who are student members of the Institute or of other approved engineering societies, upon expiration of their Student enrollment may apply for admission to the Associate Member grade in the Institute in accordance with Section 58 of the Bylaws.

The following societies are approved for the purposes of this cooperation in engineering education: American Society of Civil Engineers, American Society of Mechanical Engineers, American Institute of Mining and Metallurgical Engineers, American Institute of Chemical Engineers, Institute of Radio Engineers, together with such other national engineering societies as may be approved from time to time by the Board of Directors as having similar requirements and interests.

COMMITTEES AND DUTIES

SEC. 65. The standing committees to be appointed by the President in addition to the Executive and Finance Committees and the Board of Examiners, referred to in the Constitution, shall include the following:

General Committees

Charles LeGeyt Fortescue Fellowship Committee
Committee on Code of Principles of Professional Conduct
Committee on Constitution and Bylaws
Edison Medal Committee
Committee on Education
Headquarters Committee
Lamme Medal Committee
Committee on Management
Committee on Members-for-Life Fund
Membership Committee
Committee on Planning and Coordination
Committee on Award of Institute Prizes
Publication Committee
Committee on Public Relations
Committee on Registration of Engineers
Committee on Research
Committee on Safety
Sections Committee
Standards Committee
Committee on Student Branches
Committee on Transfers
Committee on Technical Operations

Technical Committees

Communication Division Committee
  Committee on Wire Communication Systems
  Committee on Radio Communication Systems
  Committee on Television and Aural Broadcasting Systems
  Committee on Telegraph Systems
  Committee on Communication Switching Systems
  Committee on Special Communication Applications
General Applications Division Committee
  Committee on Air Transportation
  Committee on Domestic and Commercial Applications
  Committee on Land Transportation
  Committee on Marine Transportation
  Committee on Production and Application of Light
Industry Division Committee
  Committee on Chemical, Electrochemical, and Electrothermal Applications
  Committee on Electric Heating
  Committee on Electric Welding
  Committee on Feedback Control Systems
  Committee on General Industry Applications
  Committee on Industrial Control
  Committee on Industrial Power Systems
  Committee on Mining and Metal Industry
Power Division Committee
  Committee on Carrier Current
  Committee on Insulated Conductors
  Committee on Power Generation
  Committee on Protective Devices
  Committee on Relays
  Committee on Rotating Machinery
  Committee on Substations
  Committee on Switchgear
  Committee on System Engineering
  Committee on Transformers
  Committee on Transmission and Distribution
Science and Electronics Division Committee
  Committee on Basic Sciences
  Committee on Electrical Techniques in Medicine and Biology
  Committee on Electronics
  Committee on Nucleonics
  Committee on Computing Devices
  Committee on Instruments and Measurements
  Committee on Electronic Power Converters
  Committee on Magnetic Amplifiers
  Committee on Metallic Rectifiers

The President shall appoint the members and designate the chairman of each committee, who shall select a vice-chairman and a secretary. Copies of minutes of all meetings and actions of committees shall be forwarded promptly by the committee secretary to the Secretary for his reference file.

The President or the Board of Directors may appoint additional members to any committee.

Each coordinating committee shall include at least one member of the Board of Directors.

At the close of the fiscal year, each committee shall send to the Secretary a report of its activities.

SEC. 66. The Finance Committee shall consist of three members of the Board of Directors and shall, in addition to the duties prescribed in the Constitution, approve all bills before payment and shall make recommendations to the Board of Directors regarding the investment of moneys, and all specific appropriations. No payment other than for routine office expenses shall be made by the Secretary or Treasurer except upon authorization of the Finance Committee. It shall cause to be prepared for the information of the Board of Directors a statement each year, to September 30, showing the financial condition of the Institute, also to submit to the Board of Directors at its October meeting a budget of estimated receipts and expenditures for the ensuing year beginning October first. It shall have the bank books and securities of the Institute examined prior to the annual financial statement made in the month of May, and shall certify to their correctness. It shall employ a competent accountant to audit the accounts at the close of each fiscal year.

SEC. 67. The Board of Examiners shall consist of not less than twelve Fellows of the Institute. The duties of this Board shall be those defined in Section 45 of the Constitution. At least one member of the committee shall be a member of the Board of Directors.

SEC. 68. The Charles LeGeyt Fortescue Fellowship Committee shall consist of six members appointed by the President, with the appointments confirmed by the Board of Directors. The committee shall award each year to a student of electrical engineering, who shall have received a baccalaureate degree from a duly recognized technical school in the United States or Canada, a fellowship for post-graduate work in some special field of electrical engineering, in accordance with the regulations prescribed in the Bylaws of the committee as approved by the Board of Directors.

SEC. 69. The Committee on Code of Principles of Professional Conduct shall consist of seven members, and in addition to the function of formulating and administering a code, it shall be the duty of the committee to advise inquirers respecting questions of proper professional conduct, and to examine into and investigate any practice of any member of this Institute which may be regarded as prejudicial to the welfare of the Institute, the engineering profession, or of the community, and to report its actions and recommendations to the Board of Directors, which shall take such action thereon as it may deem proper.

SEC. 70. The Committee on Constitution and Bylaws shall consist of five members and shall consider all matters relating to the Constitution and Bylaws of the Institute, including the legal status in connection therewith, also all other matters referred to it by the Board of Directors, the President, or the Secretary. The committee shall make reports and recommendations to the Board of Directors for action thereon and may consult legal and technical counsel with reference to any question before it. At least one member of the committee shall be a member of the Board of Directors.

SEC. 71. The Edison Medal Committee shall consist of twenty-one members, including the chairman, of whom fifteen shall be appointed by the President from the membership at large and confirmed by the Board of Directors of the Institute; three to be appointed annually and to serve for a term of five years from August first of the year in which such appointments are made. Six shall be elected by the Board from its own membership, being three annually to serve from August first of the year in which they are elected, for a term of two years, excepting when a member so elected ceases to be a Director prior to the expiration of the two-year term, in which case his membership on the Edison Medal Committee shall terminate with his membership on the Board of Directors, and the Board shall elect a Director to serve the unexpired term.

The duties of this committee shall be to make awards of the Edison Medal, in accordance with the regulations prescribed in the Bylaws of the committee, as approved by the Board of Directors.

SEC. 72. The Committee on Education shall consist of not less than twenty members. This committee shall consider all matters related directly or indirectly to the education of those proposing to enter the profession of engineering, and the educational guidance of those already within the profession (exclusive of the direct sponsorship of subject matter within the scopes of technical committees). To this end, the committee shall focus its attention particularly upon problems that require the coordinated efforts of the engineering teacher, the practicing engineer, and industrial and governmental organizations.

SEC. 73. The Headquarters Committee shall consist of at least three members. It shall have general supervision of the arrangements, furnishings, and maintenance of the Institute headquarters, including historical relics, paintings, and works of art.

SEC. 74. The Lamme Medal Committee shall consist of nine members appointed by the President from the membership of the Institute, with the appointments confirmed by the Board of Directors, three to be appointed each year and to serve a term of three years from August first of the year in which they are appointed.

The duties of this committee shall be to make awards of the Lamme Medal, in accordance with the regulations prescribed in the Bylaws of the committee, as approved by the Board of Directors.

SEC. 75. The Committee on Management shall consist of a minimum of seven members. This committee shall consider problems of management insofar as they may be of importance to electrical engineers. Its scope shall include methods of organizing men, money, materials, and research activities; personnel relations; and consideration of the relations between government, industry, education, and science. The committee shall from time to time arrange general meeting programs or conferences, and shall propose articles of general interest or educational value for publication in ELECTRICAL ENGINEERING. The committee shall co-operate with similar committees of other organizations.

SEC. 76. The Members-for-Life Fund Committee shall consist of not less than five members, one of whom shall be a member of the Board of Directors. The committee shall make recommendations to the Board for the accumulation and disbursement of the Members-for-Life Fund. The fund represents continued payments of dues by Members-for-Life after the date at which they qualify for exemption of dues (in accordance with Bylaw Section 21), together with the returns from investment of unexpended fund principal.

SEC. 77. The Membership Committee shall consist of one vice-chairman from each geographical District and a suitable number of other members, all to be appointed by the President. At least one member of the committee shall be a member of the Board of Directors.

This committee shall bring the advantages of membership to the attention of desirable candidates for admission to the Institute, through such measures as it may consider advisable to interest prospective members who have the standing and qualifications specified for the various grades of membership. Under the general direction of the chairman, the vice-chairman may enlist the co-operation of the Sections and Branches within his District in such work. The committee shall have such other duties as may be delegated to it by the Board of Directors.

SEC. 78. The Committee on Planning and Coordination shall consist of the chairman, who shall be appointed by the President from the Board of Directors, and such other members as the President may appoint. The committee may appoint such subcommittees, including other members of the Institute, as may be needed for specific aspects of planning.

The committee shall give continuous attention to the planning of Institute activities for the future, and submit to the Board of Directors reports and recommendations regarding any developments which, in its opinion, would more effectively meet the needs of the membership as a whole, or afford more adequate provisions for specialized types of activities deemed worthy of specific recognition by the Institute.

It shall also consider and advise on all questions arising with reference to Institute activities of all types, particularly those in which uncertainty, difference of opinion, actual conflict, or duplication may appear to exist, whether referred to it by the Board of Directors or otherwise coming to its attention.

SEC. 79. The Committee on Award of Institute Prizes shall consist of five members-at-large appointed by the President, one of whom shall be the chairman, and two members appointed from each Technical Division. This committee shall award the prizes established by the Institute in accordance with the details of procedure adopted by the Board of Directors.

SEC. 80. The Publication Committee shall consist of at least eight appointed members chosen to represent broadly the Institute activities in the fields of communication, electronics, general applications, industry, power, education, and technical publications. At least one member of the committee shall be a member of the Board of Directors.

This committee shall have supervision of the monthly journal ELECTRICAL ENGINEERING, the TRANSACTIONS, and the other publications of the Institute, including the form, size, arrangement, etc., of these publications; also decisions regarding the publication of papers, discussions, and all other matter available for publication, and the formulation and carrying out of plans for bringing into practice the policies regarding Institute publications that may be determined from time to time by the Board of Directors.

SEC. 81. The Committee on Public Relations shall consist of six or more appointed members, of whom at least one is a member of the Board of Directors.

The committee shall prepare and disseminate information concerning the Institute and its activities, intended for distribution elsewhere than in the Institute's own publications. It shall serve as an advisory body on all questions of Institute public relations. It shall co-operate with other Institute committees and with Section or Branch officers on the publicity phases of their particular activities.

SEC. 82. The Committee on Registration of Engineers shall consist of nine members, appointed by the President. This committee shall keep informed on registration laws and amendments thereto, and shall cooperate with other societies and various examining boards. The committee shall submit reports and recommendations regarding registration to the Board of Directors for such Institute action as appears to be in the best interests of the engineering profession and the community.

SEC. 83. The Committee on Research shall consist of ten or more appointed members. At least one shall be a member of the Board of Directors. The committee shall stimulate research of interest to the Institute; shall act on behalf of the Institute, as authorized specifically by the Board of Directors, to initiate and direct research investigations; shall cooperate, on behalf of the Institute, with departments of national and state governments in the consideration of research investigations; shall submit to the Board of Directors reports and recommendations concerning research investigations for which financial support from the Institute is sought; shall assist university staffs in selecting research projects for graduate students; and shall assist the Committee on Technical Operations, as requested, in the preparation of meetings for the discussion of problems in the field of research.

SEC. 84. The Committee on Safety shall consist of fifteen or more members, and shall consider and investigate matters relating to the protection of persons and property against hazard due to or resultant upon the presence of electricity or the use of electrical apparatus, material, and appliances, and shall report to the Board of Directors such recommendations thereon as it shall deem desirable for action by the Institute. To this end it shall encourage and coordinate safety considerations by other Institute committees in their respective fields, and with the approval of the Board of Directors, may arrange for co-operative relations with other bodies in the consideration of electrical hazard. At least one member of the committee shall be a member of the Board of Directors.

SEC. 85. The Sections Committee shall consist of a minimum of twenty appointed members; each geographical District shall be represented by at least one member and one member shall be a member of the Board of Directors.

The committee shall sponsor and be responsible for the promotion of Section activities and the formation of new Sections and shall recommend changes in Section territory assignments. The committee shall confer with the Section officers and it shall consider, investigate, and make reports and recommendations to the Board of Directors for action on all matters regarding or involving the interest and welfare of the Sections or their relations with the Institute or other organizations. The committee shall arrange for and hold an annual meeting of the Section delegates during the Summer General Meeting of the Institute.

SEC. 86. The Standards Committee shall consist of fifteen or more appointed members, including at least one member of the Board of Directors.

This committee shall consider and investigate all matters relating to units and standards appertaining to or applicable in electrical engineering and in the allied arts and sciences. The committee shall coordinate the work of the technical committees with respect to the making and revising of A.I.E.E. standards. It shall represent the Institute in co-operation with other standardizing bodies in matters relating to units and standards.

The committee shall appoint A.I.E.E. representatives to serve on standardizing committees for which this Institute is sponsor, or on delegations for standardizing purposes which will serve under the sponsorship of other societies or organizations (A.S.A., A.S.M.E., I.R.E., etc.). Such appointments shall be promptly reported to the Board of Directors.

The committee shall give final approval to standards in the name of the Institute unless one or more members of the committee serves notice of dissent with intention of appealing to the Board of Directors. In such event, the committee shall notify the Board, and submit a full report of the case. The committee shall report to the Board all new and revised standards, and shall seek the guidance and approval of the Board upon all policy questions including that of undertaking the preparation of standards in new fields.

SEC. 87. The Committee on Student Branches shall consist of not less than fifteen members, at least one of whom shall be a member of the Board of Directors, five from the membership at large and the chairmen of the District Committees on Student Activities. The committee shall have the general supervision and management of the Student Branches of the Institute. The Committee on Student Branches shall also be concerned with the problems of individual Student members having no Branch affiliation. The committee shall confer with the Branch officers and it shall consider, investigate, and make reports and recommendations to the Board of Directors for action upon all matters regarding or involving the interests and welfare of Branches and Students or the relations between these organizations and the Institute.

SEC. 88. The Committee on Transfers shall consist of a chairman, a vice-chairman, a secretary, and twelve additional members, all appointed by the President. At least one of the fifteen shall be from the Board of Directors and ten, one from each District, shall be recommended by the Vice Presidents or District executive committees. This committee shall encourage the Sections to establish and maintain in continuous operation their own local committees on transfers. The committee shall prepare with the approval of the Board of Examiners a guide for use by the Sections committees on transfers and other interested parties of the procedure to be followed for proposing transfers to Fellow grade. The committee shall also prepare a guide for the functioning of the Sections committees on transfers, for the purpose of encouraging and assisting eligible Affiliates and Associate Members in transfers to higher grades of membership.

SEC. 89. The Committee on Technical Operations shall consist of a chairman, a vice-chairman, a past chairman, a secretary assigned from the headquarters staff, the five technical division chairmen, the chairmen of the Standards Committee, the Publication Committee, the Committee on Education, the Committee on Management, the Committee on Award of Institute Prizes, the Committee on Research, the Committee on Safety, delegate members from the other general committees as they are required, and at least two members-at-large. At least one member shall be a member of the Board of Directors.

The Committee on Technical Operations shall supervise the technical affairs of the Institute. It shall serve as the coordinating agency for the activities of the technical divisions; recommend the formation of new technical committees or the discharge of committees no longer considered essential; assign to one division the administrative jurisdiction of joint activities involving more than one division; coordinate the scopes of all technical committees; coordinate joint activities not specifically assigned to any general committee with technical committees of other societies; coordinate general and District meetings and special technical conferences; coordinate special technical conferences involving more than one division; assign to one division the administrative jurisdiction of preparation of standards and recommended practices involving more than one division; determine the requirements of the divisions and the general committees as to technical papers for guidance of the Publication Committee in preparing the budget; cooperate with the general and District meeting committees; arrange the programs for the technical sessions at general meetings; formulate rules for the presentation and discussion of papers; receive and handle reviews by the technical committees of all papers; and schedule the meetings of and arrange programs for the forum of technical committee chairmen.

SEC. 90. Each division committee shall consist of a chairman, vice-chairman, a past chairman, a secretary assigned from the headquarters staff, the chairmen of the technical committees of the division, delegate members from the general committees as they are required, and at least two members-at-large. At least one member of the division committee shall be a member of the Board of Directors.

The division committee shall supervise the affairs of their respective divisions. They shall serve as the coordinating agency for the activities of the technical committees within each division; recommend to the Committee on Technical Operations the formation of new technical committees within the field of activity of the division, or the discharge of committees no longer considered essential; assign to one technical committee the administrative jurisdiction of subcommittees, working groups, or project committees jointly representing two or more technical committees within the division; establish scopes for the technical committees within the division, subject to coordinating with other divisions by the Committee on Technical Operations; recommend to the Committee on Technical Operations joint activities not specifically assigned to any general committee with technical committees of other societies; cooperate with the Committee on Technical Operations in formulating programs for general and District meetings; coordinate special technical conferences sponsored by technical committees within the division, and initiate, independently or at the request of the Standards Committee, the preparation of Institute standards and recommended practices by assignments to one or more of the technical committees within the division. If the assignment involves other divisions, the assignment shall be handled by the Committee on Technical Operations.

SEC. 91. The technical committees are each composed of a chairman and members recommended by the retiring chairman through the division committee. The incoming chairman shall recommend the vice-chairman, secretary, and additional members as he desires. The technical committees shall promote and coordinate Institute activity in their respective fields, and shall within their scopes have responsibilities as detailed below.

They shall pass on all technical papers; be responsible for the presentation of all papers at general meetings as arranged by the Committee on Technical Operations; arrange special technical conferences either alone or jointly with other committees; within their respective scopes, initiate and prepare standards, recommend actions, and report on standards activities to the Standards Committee. In general, they shall report through their respective division committees. This organizational procedure shall not prevent their bringing any matter which they consider in the best interests of the Institute directly to the attention of the Board of Directors. They shall prepare suitable reports yearly of their operation. They shall cooperate with similar committees of other societies. In case of doubt as to scope, direction shall come from the Committee on Technical Operations.

Each technical committee shall, from time to time, as determined in cooperation with the Committee on Technical Operations, present at a general meeting of the Institute a report including a brief resume of the progress of the art in the particular field within the scope of such committee, with the object that these reports may be authoritative sources of information on the history of electrical engineering development. These reports shall be, whenever practicable, published with discussion.

SEC. 92. A forum of technical committee chairmen shall be held at least once each year. Its honorary presiding officer shall be the President of the Institute. The Committee on Technical Operations shall be responsible for the scheduling and conduct of the forum. Chairmen of general committees having technical interests shall be invited, particularly if their committees might be involved in any discussions. Any action taken by the forum is purely advisory.

SEC. 93. Each temporary committee appointed for any purpose involving expense to the Institute shall prepare an estimate of its probable expenditures and submit it to the Board of Directors for approval.

SEC. 94. The functions of temporary committees shall be defined by the Board of Directors. At the beginning of each administrative year the Secretary shall transmit to all the members of each temporary committee whose duties may be continued, copies of the original resolutions constituting such temporary committee.

SEC. 95. The expenditures of the Institute shall be regulated by annual appropriations which shall begin on the first day of October of each year. Each standing committee shall submit to the Secretary, for the information of the Finance Committee in preparing its annual October budget, an estimate of its requirements for the ensuing year.

SEC. 96. No standing or temporary committee shall, under any circumstances, exceed its authorized appropriation without first obtaining the sanction of the Board of Directors. In addition to the duties and powers ascribed to committees in these Bylaws, these committees shall perform such other duties and shall have such other powers as may be delegated to them by the Board of Directors.

REPRESENTATIVES UPON JOINT COMMITTEES AND OTHER BODIES

SEC. 97. The Board of Directors may, in its discretion, appoint representatives of the Institute upon joint committees, boards, and other local and national bodies, for the purpose of bringing about closer cooperation between the Institute and other organizations. The terms of these representatives shall terminate at the close of the administrative year, July 31, except where the terms are otherwise specified in the regulations of the body to which they are appointed.

JOHN FRITZ MEDAL

SEC. 98. The representatives of the Institute on the Board of Award of the John Fritz Medal shall be the four surviving past presidents most recently retired. Each year the surviving junior past president, on October first, shall become a representative of the Institute on the Board of Award of the John Fritz Medal and the functions of the senior surviving past president of the Institute on this Board shall then cease and determine. In the event of the death or permanent disability of any of the representatives of the Institute on the Board of Award of the John Fritz Medal, the Board of Directors shall be empowered to select his successor from among the surviving past presidents of the Institute, and such successor shall hold office for the term of the representative in whose place he is appointed.

PAPERS AND DISCUSSIONS

SEC. 99. The manuscript of any paper to be presented at a general meeting of the Institute must be received at Institute headquarters for the consideration of the Committee on Technical Operations not less than sixty days before the date of presentation. With a view to setting up a schedule for the orderly conduct of the work, the Committee on Technical Operations may specify such additional periods as may be necessary. The Executive Committee shall have the power to waive the sixty-day requirement upon request of the chairman of the Committee on Technical Operations.

No paper shall be announced for presentation at any general meeting until after the paper has been accepted for presentation by the Committee on Technical Operations.

SEC. 100. Authors and co-authors of general and technical articles which are published in ELECTRICAL ENGINEERING or bimonthly publications will each be given two complimentary copies of the issue containing their contributions. Additional copies will be furnished at the special authors' price of 25¢ per copy post paid, provided the order is placed in advance and five or more copies are shipped to one address at one time.

Reprints of any paper published by the Institute will be furnished at the nominal cost provided orders are placed in advance of publication, and for quantities of 100 or more. The editorial department will quote prices upon application.

SEC. 101. All committees responsible for the preparation of technical programs shall so direct their activities that all authors of technical papers will be members of the Institute in so far as this is consistent with keeping the membership fully informed as to developments in the electrical arts and sciences and in closely allied fields. It is recognized that there may from time to time be situations in which non-member authors or co-authors are desirable in order to obtain an authoritative presentation of the subject matter, particularly in fields foreign but closely allied to the electrical arts and sciences. In such cases, papers by non-members may be accepted under regulations approved by the Board of Directors.

SEC. 102. The President may invite any non-member to discuss any paper presented at a meeting of the Institute, and the chairman of any Section may invite any non-member to discuss any paper presented at the Section of which he is chairman.

SEC. 103. A paper or discussion may be revised editorially under the direction of the Committee on Technical Operations or the Publication Committee, but shall be returned to the author for his consent to publication as revised. In the event of disagreement, the author and the Committee on Technical Operations or Publication Committee shall work out a mutually satisfactory arrangement before publication by the Institute.

SEC. 103a. Only original papers shall be acceptable for presentation and publication. On notification of acceptance, all papers become the property of the Institute. The publications of the Institute are copyrighted but permission to republish is usually granted provided proper credit is given to the authors and the Institute.

SEC. 104. No paper or address approved by the Committee on Technical Operations for presentation at a general or District meeting, or any written contribution to a discussion thereon, shall be released for publication in advance of presentation except by authority of the Board of Directors.

An informal address, District paper or conference paper not approved by the Technical Operations Committee for presentation, but included in the program of a General or District meeting shall not be released for publication in advance of presentation. The name of the Institute shall not be used in connection with the publication of the subject matter of such an address or paper except in ELECTRICAL ENGINEERING or in news items elsewhere unless authorized by the Publication Committee.

SEC. 105. No person shall receive monetary compensation from the reprinting of any paper or discussion presented before the Institute or before any Section or Branch without previous authorization from the Board of Directors.

PUBLICATIONS

SEC. 106. The regular publications of the Institute shall include ELECTRICAL ENGINEERING to be published monthly; COMMUNICATION AND ELECTRONICS, APPLICATIONS AND INDUSTRY, POWER APPARATUS AND SYSTEMS, each to be published every two months, and the TRANSACTIONS to be published quarterly, semi-annually, or annually.

SEC. 106a. Each member may elect to receive one of three bimonthly publications; COMMUNICATIONS and ELECTRONICS, or APPLICATIONS AND INDUSTRY, or POWER APPARATUS AND SYSTEMS, in consideration of payment of dues without additional charge, and two dollars and fifty cents ($2.50) shall be deducted from the dues and applied as a subscription for the year covered by such payment. Additional bi-monthly publications may be obtained by members at an annual subscription price of $2.50 each.

SEC. 106b. The Secretary is authorized to receive from nonmembers annual subscriptions to COMMUNICATION AND ELECTRONICS, APPLICATIONS AND INDUSTRY, and POWER APPARATUS AND SYSTEMS, at the rate of $5.00 each per annum, with an extra postage charge sufficient to cover the mailing costs to all countries to which the bulk rate of postage does not apply. A discount of 25% from the subscription price of $5.00 will be allowed to college and public libraries upon advance subscription sent directly to Institute headquarters; publishers and subscription agencies may be allowed a discount of 15%. Single copies may be obtained when available at $1.00 each.

SEC. 107. ELECTRICAL ENGINEERING may have two principal divisions:

1. For current matter and Institute news;
2. For general articles pertaining to the profession, technical papers, and other matters of an engineering character.

SEC. 108. The TRANSACTIONS shall contain the papers and discussions which have appeared in the bi-monthly publications and such other engineering matter as may be approved for publication in TRANSACTIONS by the Publication Committee.

SEC. 109. From the annual dues paid by each member, six dollars ($6.00) shall be deducted and applied as a subscription to ELECTRICAL ENGINEERING for the year covered by such payment.

SEC. 110. The Secretary is authorized to receive from non-members annual subscriptions to ELECTRICAL ENGINEERING at the rate of $12.00 per annum with an extra postage charge sufficient to cover the mailing cost to all countries to which the bulk rate of postage does not apply. A discount of twenty-five per cent from the subscription price of $12.00 will be allowed to college and public libraries upon advance subscription sent directly to Institute headquarters; publishers and subscription agencies may be allowed a discount of fifteen per cent. Single copies may be obtained when available at $1.50 each.

SEC. 111. The TRANSACTIONS shall be available to members and to non-member subscribers to ELECTRICAL ENGINEERING upon advance subscription at prices approved by the Board of Directors on recommendation of the Publication Committee. The Secretary is authorized to receive from non-members advance combination subscriptions to any two parts of the TRANSACTIONS at an annual rate of $10.00 plus extra foreign postage or to all three parts at an annual rate of $12.00 plus extra foreign postage. The Secretary is authorized to receive from non-members advance subscriptions to Part 1. Communication and Electronics, or Part 2. Applications and Industry, or Part 3. Power Apparatus and Systems, at an annual rate of $6.00 plus extra foreign postage. Discounts from these prices may be allowed to college and public reference libraries (25%) and to publishers and subscription agencies (15%).

Back volumes of TRANSACTIONS as available may be sold to members and non-members at such prices as may be authorized from time to time by the Board of Directors, and which may be secured upon application to Institute headquarters.

SEC. 112. A member shall be entitled to receive single copies of ELECTRICAL ENGINEERING issued during the period covered by his payment of dues. TRANSACTIONS shall be furnished to members who subscribe on such terms as may be decided upon from time to time by the Board of Directors.

SEC. 113. An alphabetical and geographical list of members shall be published annually, or at such longer intervals as may be designated by the Board of Directors. The grade of each member shall be indicated in either list, or both, by a difference in type or otherwise, at the Secretary's discretion. This list, usually in the form of a

Year Book, shall be sent to any member, without charge, upon receipt of request.

GENERAL

SEC. 114. Officers and committees, who consider that publicity regarding any Institute activities under their jurisdiction should be given in the daily or technical press, are urged to prepare such announcements as they may deem desirable, which should then be forwarded, with recommendations, to the Secretary; after being subject to review by the Committee on Planning and Coordination, such announcements may be released by the Secretary to classified lists of publications.

SEC. 115. Without changing their import the Secretary may number and, from time to time when amendments are adopted, may renumber the various sections of the Bylaws so as to serve the purpose of ready reference thereto.

Resolutions

NOTE: The Board of Directors adopted the following resolution on April 9, 1913:

Resolved, that all resolutions controlling or continuing any general action of committees or of the Board of Directors be printed at the end of the Institute Bylaws. In accordance with this action the following resolutions are here printed.

RULING REGARDING ERRORS IN VOTING FOR INSTITUTE OFFICERS

(Adopted March 10, 1911)

Resolved, that the Tellers Committee be notified of the ruling of the Board of Directors on the following point: i. e., where an error is made on the part of the voter in designating his choice for any particular office, the error does not invalidate his vote for all other offices on the election ballot, but will only invalidate his vote so far as the specific office is concerned in which the error occurred.

RECIPROCAL RELATIONS WITH OTHER SOCIETIES

(Adopted April 5, 1912)

Resolved, that the Board of Directors approves the principle of intimate reciprocal relations with coordinate electrotechnical societies: and to that end suggests to future presidents the desirability of appointing upon the several electrotechnical committees some members, who, while being members of the American Institute of Electrical Engineers, are also active members of corresponding committees of the respective coordinate societies.

COOPERATION BETWEEN STANDARDS COMMITTEES

(Adopted April 9, 1913)

Resolved, that it is the sense of this Board that cooperation between the Standards Committee of the Institute and the Standards Committees of other national societies dealing with units and standards appertaining to or applicable in electrical engineering or in the allied arts and sciences, is desirable, and it suggests that the Standards Committee shall take no action on any subject matter outside of the field of electrical or magnetic standardization and within the field of the Standards Committee of another national society, before coming to an agreement with the Standards Committee of that society, provided that a reciprocal courtesy is extended by such Standards Committee of such society.

CORRELATION OF COMMITTEE WORK

(Adopted August 8, 1913)

Resolved, that the principal technical and scientific committees of the Institute be authorized to form subcommittees and that the chairman of any subcommittee may, with the consent of the chairman of his committee, invite the chairman of any other technical or scientific committee or subcommittee to appoint delegate members to take part in the work of his subcommittee, and the chairman of any subcommittee may also apply for representation through delegates upon other technical or scientific committees.

INHIBITION ON EXPRESSION OF VIEWS ON NON-ENGINEERING TOPICS

(Adopted February 18, 1920)

Whereas, many requests are received by the officers of the Institute and its Sections and Branches for support of candidates for political office and for various movements in activities outside of the field of engineering.

Resolved, that the attention of the membership be called to the undesirability of the Institute's expressing views purporting to represent the collective will of the national or any local organization in matters outside of the scope of engineering and upon which the membership may hold conflicting opinions.

TECHNICAL ACTIVITIES IN SECTIONS

(Adopted May 25, 1936)

Resolved, that the Sections be encouraged by all officers of the Institute and by the Technical Program Committee and the national technical committees in particular to take a greater part in the technical activities of the Institute through such proper channels as they may select, examples being the formation of Section technical committees, the holding of specialized technical group meetings, the sponsoring of specific technical courses, and similar arrangements which have been used successfully or may be worked out in the future.

DISCUSSIONS OF SOCIAL AND ECONOMIC QUESTIONS

(Recommendations Approved by Board of Directors May 26, 1939)

(a) That the present general policy with respect to this matter be continued (considering the Institute as primarily a technical organization; expansion of discussions into social and economic fields should be on a very conservative basis);

(b) That, in discussing with the Sections their local affairs, it be pointed out that their meetings are informal and that, therefore, there is no requirement for any restriction in the discussions of these subjects; and

(c) That the forum of the Institute and its publications should be open to comment on public questions involving engineering, particularly large-scale engineering enterprises of government, provided that such comment is limited strictly to engineering and associated facts.

ELECTRICAL EXHIBITS

(Adopted by Board of Directors June 27, 1946)

Voted to define the Board's attitude toward electrical exhibits as follows: The Board of Directors of the AIEE sees no objection to the use by an exhibiting agency of the expression "To be held concurrently with an AIEE meeting."

OFFICIAL VISITS

(Adopted by Board of Directors June 27, 1946)

Resolved that it is the sense of the Board of Directors that:

(a) Attendance of the President at general meetings, District meetings, meetings of the Engineers Joint Council, and other inter-society obligations should take precedence over visits to Sections.

(b) The District Vice-President shall be made fully responsible for the visits to local Sections. It shall be the duty of the District Vice-President to receive all requests for Institute officer speakers and to coordinate these requests for all meetings in his area. If the District Vice-President is not to make the visits personally, he may be free to arrange for other officers or members of the Headquarters staff to be the official delegate when this appears to be the most effective method.

(c) At each summer meeting, it shall be the duty of the Secretary of the Institute to call a special meeting of the hold-over and incoming Vice-Presidents at which they shall be informed of their duties in coordinating the work in the Districts and instructing Sections on the method of obtaining officer speakers.

(d) When the formal visits to Sections are made by either the District Vice-President or by some other officer, the same expense allowance will be paid by the Institute as if the visits were all made by the Vice-President.

(e) The Committee on Planning and Coordination is requested to continue its study of the possibility of greater use of the District organizations.

(Adopted by Board of Directors April 27, 1950)

Voted that it is the sense of the Board of Directors that the President should not be expected to visit Sections or Branches; that those official visits should be made the responsibility of the Vice-Presidents, with the cooperation of Directors, or District Secretaries, or other Institute personnel who may be designated by the Vice-Presidents; and that the President concentrate his attention on general and District meetings, technical conferences, and such other meetings as should, in his discretion, be attended; also, that this action be transmitted to all Sections, and that the Finance Committee be requested to make provisions in the 1950–51 budget for such visits.

DISTRICT MEETINGS

(Adopted by Board of Directors June 27, 1946)

Resolved, that the attention of the Districts be called to the merits of building the program of a District Meeting around a dominant theme based on a subject of timely interest and particularly suitable to the location in which the meeting is to be held; that when this type of program is contemplated the committee in charge of a District Meeting should at the earliest opportunity notify the secretary of the Technical Program Committee in order to take advantage of the assistance which is available to them in the appropriate technical committee or committees, the Technical Program Committee, and the Headquarters staff, and that such an occasion might well afford a favorable opportunity for a meeting of the interested technical committee or committees. It is to be understood that a District Meeting is the responsibility of the District concerned and hence that the initiative in planning and arranging for a meeting of the type suggested lies with the District Executive Committee.

FALL GENERAL MEETING

(Adopted April 20, 1949)

Resolved, that the Fall General Meeting be held in the midwest area, defined generally as from Cleveland to Omaha, and from Canada to the Gulf of Mexico.

INSTITUTE POLICY

(Statement adopted by the Board of Directors June 15, 1950)

1. To work continually for the unification of the profession.
2. To recognize the fact that the Institute finds its chief reason for existence in the technical field.
3. To handle questions on nontechnical affairs as necessary and as they arise, on an emergency basis until through unification they can be handled on a general professional basis.

Scopes of AIEE Technical Committees

The following sections list the names and scopes of the various AIEE technical committees. These committees are organized under the following divisions: **COMMUNICATION; GENERAL APPLICATIONS; INDUSTRY; POWER; AND SCIENCE AND ELECTRONICS,** whose scope was approved by the Board of Directors on January 24, 1952, and is as follows:

SCOPE FOR DIVISION COMMITTEES

Each division committee shall consist of a chairman, vice-chairman, a past chairman, a secretary assigned from the headquarters staff, the chairmen of the technical committees of the division, delegate members from the general committees as they are required, and at least two members-at-large. At least one member of the division committee shall be a member of the Board of Directors.

The division committee shall supervise the affairs of their respective divisions. They shall serve as the coordinating agency for the activities of the technical committees within each division; recommend to the Committee on Technical Operations the formation of new technical committees within the field of activity of the division, or the discharge of committees no longer considered essential; assign to one technical committee the administrative jurisdiction of subcommittees, working groups, or project committees jointly representing two or more technical committees within the division; establish scopes for the technical committees within the division, subject to coordinating with other divisions by the Committee on Technical Operations; recommend to the Committee on Technical Operations joint activities not specifically assigned to any general committee with technical committees of other societies; cooperate with the Committee on Technical Operations in formulating programs for general and District meetings; coordinate special technical conferences sponsored by technical committees within the division, and initiate, independently or at the request of the Standards Committee, the preparation of Institute standards and recommended practices by assignments to one or more of the technical committees within the division. If the assignment involves other divisions, the assignment shall be handled by the Committee on Technical Operations.

Communication Division

COMMITTEE ON COMMUNICATION SWITCHING SYSTEMS

Scope—Treatment of that branch of communications in which the dominant factors are manual and automatic switching facilities and apparatus associated with communication systems.

No subcommittees have been appointed.

COMMITTEE ON RADIO COMMUNICATION SYSTEMS

Scope—Treatment of that branch of communications in which the dominant factors are radio communication systems of all kinds such as point-to-point systems including radio relay for telephone, telegraph, or television; and mobile systems for land, marine, or airborne services.

No subcommittees have been appointed.

COMMITTEE ON SPECIAL COMMUNICATIONS APPLICATIONS

Scope—Treatment of those branches of the communications field which do not logically fall within the scope of the other communication committees such as: electroacoustics, including wire tape and disk recording; railroad communications; and subjects related to materials and components used in communication apparatus. If the field of application of these materials and components falls also within the scopes of other technical committees, action with those committees may be joint.

No subcommittees have been appointed.

COMMITTEE ON TELEGRAPH SYSTEMS

Scope—Treatment of that branch of communications in which the dominant factors are the terminal and intermediate equipment or associated apparatus utilized in providing telegraph services over manual or automatic facilities. It includes also other forms of record communication such as facsimile, telephoto, teletypewriters.

1. Facsimile Subcommittee

Scope—To give specialized attention to the fields of record communication involving facsimile operation (including telephotography).

COMMITTEE ON TELEVISION AND AURAL BROADCASTING SYSTEMS

Scope—Treatment of that branch of communication in which the dominant factors are the broadcasting for entertainment and for instruction, of visual and aural program material. One phase of activity includes such instrumentalities of the television and aural broadcast art as transmitters, studio and mobile pick-up equipment, studio-transmitter systems, and such other facilities as may be employed exclusively for the interconnection of a studio with its directly associated transmitter and program pick-up points. Another phase includes receiving systems and equipment for home, community, and public applications.

No subcommittees have been appointed.

COMMITTEE ON WIRE COMMUNICATIONS SYSTEMS

Scope—Treatment of that branch of communications in which the dominant factors are wire transmission systems and associated apparatus as applied to open-wire lines, land and submarine cables for providing telephone service, and program transmission for aural and television broadcasting.

No subcommittees have been appointed.

General Applications Division

COMMITTEE ON AIR TRANSPORTATION

Scope—Treatment of all matters in which the dominant factors are the design, installation, and performance of airplane equipment, including batteries, generating equipment, voltage regulators, instruments, wiring devices, motors, special controls, reverse current cutouts, bonding, shielding, filtering, inverters, dynamotors, lightning detection and protection, lighting (interior and exterior), system characteristics, weight-power relationships, and heating devices. With respect to communication and navigation; ground lighting; electric testing equipment for measuring strain, vibration, noise, corrosion, and so forth; and electric welding of airplane structures; action should be in co-operation with the respective AIEE technical committees in these fields and similar committees of other organizations.

1. Di-Electric Testing Procedures for Aircraft Electrical Equipment and Insulation Materials Subcommittee

Scope—The purpose of this subcommittee is to formulate test codes for aircraft electric equipment insulation and di-electric materials. It is the intent to investigate di-electric problems arising from aircraft environmental conditions and to specify di-electric test procedures which will insure proper di-electric performance under aircraft environmental conditions.

2. Aircraft Electrical Rotating Machinery Subcommittee

Scope—This subcommittee was organized in 1944 for the purpose of preparing standard test codes for aircraft electric rotating machinery. As a result, AIEE 800, "Proposed Test Code for D-C Aircraft Machines," was published in March 1947 for one year trial use. The subcommittee now is preparing "Rating Standards for Engine-Driven Generators."

3. Rating of Airborne Electrical Apparatus Subcommittee

Scope—Treatment of the effects of flight through the atmosphere on the rating of airborne apparatus. Reports and guides are to be prepared defining the relationships between pressure, temperature, and other atmospheric properties on the performance of electrical apparatus.

4. Aircraft Electrical Systems Subcommittee

Scope—The purpose of this subcommittee is to formulate a report on the basic and accepted considerations involved in the application practice of aircraft electric systems. This report shall contain information of the following character: An explanation of fundamental electrical problems, outlines of systematic procedures for analysis and computation of aircraft electric system performance, and formulation of general application practices which will assure correct co-ordination of equipment.

5. Electrical Control Protective Devices and Cable Subcommittee

Scope—Formation of test codes and operating standards for aircraft electric control, protective devices, and cable. The subcommittee is engaged presently in the preparation of a test code for aircraft circuit interrupting devices and a test code for aircraft d-c generator voltage regulators is being prepared by a working group of the subcommittee.

COMMITTEE ON DOMESTIC AND COMMERCIAL APPLICATIONS

Scope—Treatment of all matters in which the dominant technical factors are the interior supply and utilization of electric power in domestic premises, such as single or multiple dwellings, garages, and other accessory structures, and in institutional buildings such as hospitals, schools, libraries, and so forth. Such subjects as control, interior wiring, heat-operated and motor-operated appliances or equipment for use in domestic, commercial, or institutional premises, including elevators and escalators, are properly within this scope. Subjects relating to the production and application of light, as such, are within the scope of the Production and Application of Light Committee.

1. *Electric Space Heating and Heat Pumps Subcommittee (East)**
2. *Electric Space Heating and Heat Pumps Subcommittee (West)**
3. *Domestic Appliances Subcommittee**
4. *Farm Electrification Subcommittee**

COMMITTEE ON LAND TRANSPORTATION

Scope—Treatment of all matters in which the dominant factors are the requirements, design, selection, relation, and operation of electric apparatus and material for transportation (exclusive of air and marine transportation, which are functions of the Air Transportation and Marine Transportation Committees) of passengers and freight and the economic questions incident thereto. Such subjects as the electrification of steam railways, street railways, pantograph trolleys and overhead catenaries, electric locomotives (oil-electric, gasoline-electric, or 3-power locomotives), multiple-unit cars, electric-traction motors, main and auxiliary control equipment, railway substations, mercury-arc rectifier applications, and railways signaling and automatic train control are within the scope of this committee.

1. Heavy Traction Papers and Plans Subcommittee

Scope—To secure papers and discussions for the various AIEE meetings, covering matters of current interest in the field relating to railroad electrification, diesel-electric locomotives, and all other applications of electricity to railroad rolling stock such as lighting and air conditioning passenger cars. This is accomplished by correspondence and personal contact with the leading manufacturers of equipment, and the engineering personnel of the major electrified railroads and consulting engineering firms engaged in such projects.

2. Heavy Traction Electrification Data Subcommittee

Scope—To collect and tabulate data covering power supply, conversion, distribution systems, and motive power of electrified railroads in the United States and foreign countries.

Projects—(1-1). Catenary overhead systems.
(1-2). Third rail systems.
(1-3). Electric locomotives.
(1-4). Substations.
(1-5). Power supply.

3. Light Traction Papers and Plans Subcommittee

Scope—To secure papers and discussions for the various AIEE meetings, covering matters of current interest in the field relating to local transit, that is, subway, streetcar, and trolley coach systems, and applications of electric propulsion equipment to internally powered local transit vehicles.

*4. Diesel-Electric Traction Papers & Plans Subcommittee**

5. AIEE Committee #11 (A.S.A. C-35, Rotating Electrical Machinery on Railway Locomotives and Rail Cars, and Trolley, Gasoline-Electric and Oil-Electric Coaches)

6. Liaison Representative on Standards Committee

* No Scopes for Subcommittees or Working Groups.

COMMITTEE ON MARINE TRANSPORTATION

Scope—Treatment of all matters in which the dominant factors are the application, relation, and installation of electric machinery and materials of whatever nature on shipboard, and the requirements for specialized devices, materials, or constructions peculiar to such application.

1. Power Generation Subcommittee

Scope—This committee to have cognizance of Sections 3, 5, 12, 15, 51, 52, 101 (except 101.33 and 101.35) of the AIEE Standards 45 dated December 1948. This to include d-c and a-c generator classification, also converters, balancers, and so forth, and a description of each type. The scope of this committee also covers classes of insulation material and description thereof, likewise d-c and a-c equipment and installation.

2. Power Application Subcommittee

Scope—This committee to have cognizance over Sections 4, 6, 7, 8, 9, 10, 24, 25, 26, 28, 45, 60, 61, 63, 78, 102.01 to 102.17 inclusive, 102.21, and 103. This to include d-c and a-c motor classification and application and a description of each type. The scope of this committee also covers d-c electrically operated watertight fire door equipment, d-c and a-c control and application, d-c and a-c ship tests, a-c electric propulsion installations, also trials, operation, and maintenance.

3. Wires and Cables Subcommittee

Scope—This committee to have cognizance over Sections 18, 19, 44.07, 54, 55, 101.33, and 101.35 of the AIEE Standards 45 dated December 1948. This to include a-c and d-c wires and cables covering construction, current carrying capacity, tests, and so forth, as applied to shipboard use.

4. Switchboards and Controls Subcommittee

Scope—This committee to have cognizance over Sections 11, 17, 27, 29, 30, 31, 53, 62, 64, and 65 of the AIEE Standards 45 dated December 1948. This to include control apparatus and switchgear, both a-c and d-c defining each type of control and specifying construction of controls and switchboards, also application.

5. Distribution Subcommittee

Scope—This committee to have cognizance over Sections 13, 14, 20, 21.01 to 21.69 inclusive, 21.81, 22, 23.23, 33.01 to 33.11 inclusive, 36, 44.01 to 44.05 (*a*) inclusive, 56, 57, 58, 67, 70 and 102.19. This to include distribution circuits for light and power, both a-c and d-c, as applied to shipboard; also a-c and d-c lighting equipment.

6. Fittings and Appliances Subcommittee

Scope—This committee to have cognizance over Sections 16, 23 (except 23.23), 32, 33.13 to 33.33 inclusive, 34, 44.05 (*b*) to 44.09 inclusive, 59, 66, 67, and 68. This to include storage batteries covering installation, type, and location; also to include fittings and appliances for lighting and power as applied to shipboard.

7. Communications and Alarms Subcommittee

Scope—This committee to have cognizance over Sections 21.71 to 21.79 inclusive, 37, 38, 71, and 72. This to include interior communication circuits and distribution, d-c and a-c, signal and communication system, including appliances.

8. Navigation Equipment Subcommittee

Scope—This committee to have cognizance over Sections 35, 39, 40, 41, 42, 43, 44.11, 69, 73, 74, 75, 76, and 77. This to include d-c and a-c searchlights, d-c and a-c gyro compass and gyro pilot equipment, installation, wiring, power lines; d-c radio communication equipment, d-c and a-c radio direction finder equipment, d-c and a-c echo depth sounding equipment.

9. Publicity, Personnel, History Subcommittee

Scope—The duty of this subcommittee is to publicize the Marine Committee and submit to the Secretary such items as are of interest to the Institute. This subcommittee is also required to keep a record of the personnel of the committee and recommend additions or changes of personnel to the committee. The subcommittee is also charged with the duty of keeping a history of the main committee.

10. Editing Subcommittee

Scope—The duty of this subcommittee is to edit all motions passed at main committee meetings preparatory for revisions of the AIEE Recommended Practice for Electrical Installations on Shipboard number 45 and to make final check before the revisions are ready for the printer.

*11. International Standardization Subcommittee**

COMMITTEE ON PRODUCTION AND APPLICATION OF LIGHT

Scope—Treatment of those matters in which the dominant factor is the application of electric energy through its conversion into light, including necessary materials, devices, and mechanisms, in so far as these matters are considered of interest and value to the members of the Institute. This committee functions as a liaison between the Institute and various organizations dealing with the production and utilization of light, such as the Illuminating Engineering Society, the Optical Society of America, and others. Its activities include translating the theoretical and technical accomplishments of

* No scopes for subcommittees or working groups

those organizations into terms of the practical aspects of the production and application of light, thereby serving to inform Institute members of important progress in this field. Where problems of electrical supply service, voltage, or distribution are involved, action shall be joint with the Transmission and Distribution Committee.

No subcommittees have been appointed.

Industry Division

COMMITTEE ON CHEMICAL, ELECTROCHEMICAL, AND ELECTROTHERMAL APPLICATIONS

Scope—Treatment of all matters in which the dominant factors are the generation of electricity through chemical processes, and the application of electricity to chemical or metallurgical operations (exclusive of electric welding and the phenomena of the arc in so far as it is concerned with the deposition of metal in welding, which is a function of the Committee on Electric Welding, and exclusive of magnetics, which is a function of the Committee on Basic Sciences), including the relations, installation, and operation of the devices necessary thereto, and the requirements of specialized devices, materials, or construction peculiar thereto.

1. *Electrothermal Processes Subcommittee*

Scope—Study of the application of electrical apparatus in arc furnaces and electrothermal processes to formulate the principles of good engineering practice in these fields. This committee is also studying arc furnace designs, the effects of voltage surges in arc furnace circuits and power supply, and voltage regulation problems in arc furnaces and electrothermal processes.

2. *Storage Batteries Subcommittee*

Scope—This subcommittee has as its function the fostering of technical papers and the establishment of AIEE Standards, where needed, on all phases of storage battery design and engineering.

3. *Cathodic Protection Subcommittee*

Scope—To develop the electrical engineering aspects of the application of cathodic protection. To promote a general understanding of those factors, under the control of designing and operating engineers, that contribute to corrosion and to its mitigation.

4. *Chemical Industry Subcommittee*

Scope—Study of the application of electric apparatus to the chemical industries to establish sound engineering practices in these fields. Particular attention is being given to the application of circuit breakers and control in the hazardous atmospheres which may be encountered.

5. *Electrochemical Processes Subcommittee*

Scope—Treatment of all matters relative to electrolytic processes such as electrodeposition, electrolytic refining, electrolytic reduction, alkali chloride electrolysis, aqueous electrolytic processes. Such subjects as theory, technique, efficiency, plant, electrolytic cells, application of power conversion equipment, specialized equipment, and operating hazards are within the scope of this subcommittee.

6. *Petroleum Industry Subcommittee*

Scope—Study of the application of electric apparatus to petroleum, natural gas, artificial gas, production, refining, and transportation to establish sound engineering practices in these fields.

COMMITTEE ON ELECTRIC HEATING

Scope—Treatment of all matters in which the dominant factors are the requirements, selection, installation, and operation of machines, devices, and equipment relating to electric heating of all kinds, including dielectric and induction, radiation, resistance, and high-temperature furnaces. Design and theory of devices shall be handled by consultation with Electronics or other committees as required.

1. *Induction and Dielectric Heating Subcommittee*

Scope—Study of the problem of interference from electronic heating equipment (with the advance of the Induction and Dielectric Heating Subcommittee, the Federal Communications Commission has formulated regulations, regarding the allowable limit of radiation from electronic heating equipment). Formulation of the principles of good engineering practice to deal with intolerable interference. Development of an AIEE Standard for electronic heating equipment including definitions of electronic heating terms.

2. *Radiant Heating Subcommittee*

Scope—Standardization of industrial radiation heating in all of its phases. The advantages and limitations of infrared heating will be emphasized for the benefit of the engineering profession. It will cover the construction, optics, thermodynamics, and safety considerations associated with all high-temperature sources, correlation with other forms of electric heating, but not to include space heating.

3. *Technical Data Subcommittee*

Scope—To collect and edit useful data relating to electric heating applications.

This is to include tables on recommended heating rates and physical constants of common materials, nomographic charts, sample computations, and performance data on electric heating applications.

COMMITTEE ON ELECTRIC WELDING

Scope—Treatment of all matters in which the dominant factors are the requirements, design, construction, selection, installation, and operation of machinery and devices relating to electric welding, including studies of the electromagnetic phenomena of the arc in so far as it is concerned with the deposition of metal in welding. Such subjects as electric welding methods and the electric machinery and control equipment specially designed for welding are properly within the scope of this committee.

1. *Fundamental Electric Arc Research Subcommittee*

Proposed Scope—To promote fundamental arc research and the interchange of useful fundamental information, including all phenomena which characterize and are essential to the existence and control of high-pressure electric arcs, such as the welding arc.

This subcommittee is to interest itself in: (1) the interchange and evaluation of information on past, present, and future fundamental arc research; (2) by defining fundamental arc problems which need to be solved by future research; (3) by stimulating interest in fundamental arc research in graduate students and other research workers; and (4) by bringing the needs and advantages of fundamental arc research to the attention of industrial management, trade associations, government agencies, and other potential sponsors for fundamental research.

2. *Resistance Welding Instrumentation Subcommittee*

Scope—Provision of basic information relating to power requirements and the effect of resistance welding loads from the standpoint of both users and utilities.

Outline economic considerations in the purchase and utilization as well as provision of power for welding including power factor correction, combined power and welding facilities.

Set up desirable practices and methods of procedure to be used in the selection of adequate power facilities for resistance welding. Publish such material as may be developed in such form that it can be used by the industry.

COMMITTEE ON FEEDBACK CONTROL SYSTEMS

Scope—Treatment of matters in which the dominant factors are the terminology, requirements, design, construction, and operation of equipment and the circuits pertaining to control systems involving feedback such as servomechanisms, regulators, and governors, excluding measuring and recording instruments. This Committee shall cooperate preferably by means of liaison membership, with other technical committees within the Institute interested in servomechanisms, regulators, or other control systems as well as with related committee work in associated Societies.

1. *Subcommittee on Terminology and Nomenclature*

Scope—To prepare proposals on standard terminology, nomenclature, and symbols for feedback control systems for acceptance by AIEE Standards Committee and the American Standards Association.

2. *Subcommittee on Bibliography*

Scope—To compile and prepare for publication a bibliography of pertinent American and foreign technical literature pertaining to feedback control systems. This work is to be done in cooperation with the Bibliography Subcommittee of the Committee on Industrial Control.

3. *Subcommittee on Feedback Control Systems Conference*

Scope—To plan a special technical conference which will attract persons from the various industries concerned with applications of feedback control systems, providing opportunities to discuss recent developments and lines of likely future progress.

COMMITTEE ON GENERAL INDUSTRY APPLICATIONS

Scope—Treatment of all matters in which the dominant factors are the requirements,

selection, installation, and operation of machinery and devices relating to machine tools and to the processing and/or fabrication (assembly) of nonmetallic materials. Such materials include textiles, rubber, paper, plastics.

The problems relating to assembly line processes of all materials are considered within the scope of this committee.

This scope to apply to all subcommittees.

Scope—To stimulate and initiate engineering papers and discussions pertaining to electrical problems in the following named industries; to help organize technical sessions devoted to these problems at AIEE meetings; and, eventually, to promote standards and recommended practices in the electrical engineering field as far as this industry is concerned.

1. *Materials Handling Subcommittee*
2. *Machine Tools Subcommittee*
3. *Rubber and Plastics Industries Subcommittee*
4. *Textile Industry Subcommittee*
5. *Pulp and Paper Industry Subcommittee*

COMMITTEE ON INDUSTRIAL CONTROL

Scope—Treatment of all matters in which the dominant factors are the design, construction, and performance of industrial control, and the way in which it serves to govern in some predetermined manner the electric power delivered to the apparatus to which it is connected.

1. *Electronic Control Subcommittee*

Scope—The treatment of all matters in which the dominant factors are the design, construction, and functioning of electronic industrial controls exclusive of those controls and functions that specifically are assigned to other technical committees.

2. *Paper Prize Awards Subcommittee*

Scope—To review technical papers presented during each administrative year of the Institute for consideration of being submitted to AIEE Headquarters as Transactions and for entering in competition for prize awards.

3. *Regulators and Feedback Systems Subcommittee*

Scope—The treatment of all matters within the scope of the main committee concerning classification, definitions, specifications, standards, design, and application of regulators and feedback systems. This subcommittee will co-operate with any other groups in the AIEE or affiliated societies engaged in similar activities.

4. *Standards Subcommittee*

Scope—This subcommittee will prepare proposals for new and revised standards pertaining to industrial control, in which AIEE is interested. Such proposals are transmitted to the AIEE Standards Committee which will take appropriate action on behalf of AIEE, and which may forward the work of the Subcommittee to other standard-making bodies as official AIEE proposals.

5. *Test Codes Subcommittee*

Scope—To develop test procedure and test methods for industrial control equipment, exclusive of routine or production tests.

COMMITTEE ON INDUSTRIAL POWER SYSTEMS

Scope—Treatment of all matters in which the dominant factors are the requirements, selection, co-ordination, installation, and operation of machines, devices, and equipment necessary for generating and transmitting electric power within an industrial plant for use solely by that plant. (Actual design of devices and equipment not included.) Design of distribution systems within the industrial plant are a part of the scope of this committee.

When such industrial systems are interconnected with public systems, the action shall be joint with the Committee on Power Generation or Committee on Transmission and Distribution.

1. *Executive Subcommittee*

Scope—Assignment of work to subcommittees, advising chairman on committee problems including membership, organizing programs, and presentation of papers at meetings.

2. *Industrial Grounding Subcommittee*

Scope—Investigation and study of grounding, for any purpose, of power systems and electrical circuits and equipment in industrial plants or commercial buildings.

3. *Electric Power Distribution for Industrial Plants Subcommittee*

Scope—General activities in the field of distributing power within industrial plants. A publication group under this subcommittee is set up for revision of the Red Book, "Electrical Power Distribution for Industrial Plants."

4. *Codes and Standards Subcommittee*

Scope—Do liaison work with standard making and code making bodies as affecting electric power supply and distribution in industrial plants and commercial buildings and participate in that work of the Industrial Power Systems Committee pertaining to Codes and Standards.

5. *Distribution Systems for Commercial Buildings Subcommittee*

Scope—Investigation and study in the field of power distribution and wiring in commercial or institutional buildings. A publication group under this subcommittee will be set up when needed for periodic revision of the Green Book, "Interior Wiring Design for Commercial Buildings."

6. *Power Supply Subcommittee*

Scope—General activities in the field of power supply to industrial plants or commercial or institutional buildings, either where power is generated within the industrial plant or building or where power is supplied by a public utility.

COMMITTEE ON MINING AND METAL INDUSTRY

Scope—Treatment of all matters in which the dominant factors are the requirements, selection, installation, and operation of machinery and devices relating to the processing of metal and those relating to mining of any kind.

Matters pertaining to blast furnaces, metal rolling, and metal drawing are properly within the scope of this committee.

1. *Metal Industries Subcommittee*

Scope—Treatment of all matters in which the dominant factors are the requirements, selection, installation, and operation of machinery and devices relating to the processing of metal.

Metal pertaining to blast furnaces, metal rolling, and metal drawing are properly within the scope of this committee.

2. *Eastern Mining Subcommittee (Coal)*

Scope—Treatment of all matters in which the dominant factors are the requirements, selection, installation, and operation of machinery and devices relating to the processing and mining of coal, peat, etc.

3. *Western Mining Subcommittee (Hard Rock)*

Scope—Treatment of all matters in which the dominant factors are the requirements, selection, installation, and operation of machinery and devices relating to the processing and mining of materials other than fuels.

Power Division

COMMITTEE ON CARRIER CURRENT

Scope—Treatment of all matters in which the dominant factors are the design, construction, and operation of equipment and circuits for the application of carrier currents in the generation, transmission, and distribution of electric power. Included in the scope of this committee shall be treatment of the following:

Carrier current equipment and circuits for
- Relaying
- Control (supervisory, load, frequency, and so forth)
- Metering
- Communication as applied to power system use

also

Line traps
Coupling capacitors
Beamed radio systems for system control

1. *Executive Subcommittee*

Scope—To assist the chairman of the main carrier current committee in all matters that he may request in the functioning, direction, and conduct of the work of the main committee.

2. *Subcommittee for Preparation of a General Interest Paper on Carrier Current*

Scope—This paper is to give an historical review of the carrier developments and outline the place the carrier has in present-day system operating practices.

3. *Subcommittee to Report on Application Guidance for Carrier Current*

Scope—To assemble a guide giving detailed information on uses, performance, and limitations of carrier current channels on power lines and to recommend specific details of installation based on practical considerations.

4. *Subcommittee on Methods of Measurements and High Frequency Characteristics of Power Equipment and Transmission Lines.*

Scope—Establishment of methods of measurements. Obtain measurements of impedance, phase angle and attenuation of terminal equipment and transmission lines. Obtain measurements of noise levels found on transmission lines. (Terminal equipment shall include such devices as power transformers, potential transformers, current transformers,

lightning arresters, carrier coupling capacitors, line turners and line traps.)

5. Use of Microwave Equipment for Relaying, Telemetering, and Supervisory Control Subcommittee

Scope—To study and report on microwave applications to the power industry.

6. Operating Experience with Carrier Current Relaying Channels Subcommittee

Scope—To assemble experience data from all sources on which to base an appraisal of operating performance of carrier current relay channels compared to other methods of relaying.

7. Electron Tube Subcommittee

Scope—To obtain information on tube life, methods of extending life, and new technical developments in the art.

8. Subcommittee to Prepare A Carrier Current Bibliography

Scope—To prepare for publications as Technical Paper, a carrier current bibliography covering the period from the nineteen twenties to the present date.

*9. Subcommittee to Prepare Standards for Carrier Radiation**

COMMITTEE ON INSULATED CONDUCTORS

Scope—Treatment of all matters in which the dominant factors are the design, construction, and operation of insulated conductors and the accessories thereto used in the generation, transmission, distribution, and utilization of electric power. Included in this scope shall be treatment of the following:

Cable supply systems (including solid, oil-filled, and gas-filled cables)
Insulated wire and cable
Accessories (including potheads, wiring ducts, and conduit, not including insulated bus runs as in metalclad switchgear)
Structures (joint with Transmission and Distribution Committee)
Cable characteristics
Insulations
Sheaths and coverings
Utilization wiring systems
Special purpose cables
Tests and measurements
Network limiters
Insulated line conductors (specifications)

Matters relating to insulated conductors specifically designed for applications covered by certain other technical committees such as Communication, Transportation, and Electric Heating may be treated jointly with that committee if emphasis is on general principles, or exclusively by the application committee if emphasis is on the particular requirements of the application.

1. Administration Subcommittee

Scope—The activity of the Administration Subcommittee shall be directed to the administration of the policy and general affairs of the committee.

Included in its scope shall be: Selection of location, date, and operational plan of committee meetings; organization and scopes of subcommittees; co-ordination of subcommittee activities; planning of technical sessions for general meetings; approval of distribution of questionnaires; and approval of distribution to the committee membership of papers and publications published by other organizations.

The personnel of the subcommittee shall consist of the committee chairman, vice-chairman, secretary, past-chairman, and the subcommittee chairmen.

2. Standards and Publications Subcommittee

Scope—The activity of the Standards and Publications Subcommittee shall be directed to the compilation of general Standards, editing of technical Standards, and the preparation of publications and articles for publication under sponsorship of the committee.

Included in its scope shall be: Sponsorship of Standard 30, "American Standard Definitions and General Standards for Wire and Cable"; reference books, and bibliographies.

3. Cable Characteristics Subcommittee

Scope—The activity of the Cable Characteristics Subcommittee shall be directed to the physical properties, electrical characteristics, and factors related to the application and rating of insulated cables.

Included in its scope shall be: Calculation constants; cable loading; operating temperatures; sheath bonding; stress distribution; hydraulics of oil-pipe systems; lightning protection for aerial cables (joint with Lightning Protective Devices Subcommittee).

4. Conductors Subcommittee

Scope—The activity of the Conductors Subcommittee shall be directed to the physical construction of conductors used in insulated wire and cable.

Included in its scope shall be: Conductor materials, and conductor specifications (liaison with ASTM Committee B1 on Wires for Electrical Conductors).

5. Insulations Subcommittee

Scope—The activity of the Insulations Subcommittee shall be directed to the properties of dielectric materials used in insulated wire and cable, and their accessories.

Included in its scope shall be: Oil-impregnated paper; varnished cambric; thermosetting materials; thermoplastic materials; and inorganic materials.

6. Sheaths and Coverings Subcommittee

Scope—The activity of the Sheaths and Coverings Subcommittee shall be directed to the sheath, jacket, and covering materials used in insulated wire and cable.

Included in its scope shall be: Lead and lead alloys; jacket materials; electrolysis and corrosion; protective coverings for lead sheaths; armors.

7. Cable Supply Systems Subcommittee

Scope—The activity of the Cable Supply Systems Subcommittee shall be directed to the transmission and distribution of bulk energy by means of insulated conductors whether underground in ducts or pipes or aerially on poles.

Included in its scope shall be: Impregnated-paper cable systems; nonmetallic-sheathed cable; aerial cable systems; buried cable systems; covered line conductors (specifications); cable-movement problems.

8. Utilization Wiring Systems Subcommittee

Scope—The activity of the Utilization Wiring Systems Subcommittee shall be directed to the distribution of energy at utilization voltages by means of insulated conductors.

Included in its scope shall be: National Electric Code developments, wiring materials, and wiring systems (such as bare-neutral, conduit-return).

9. Special-Purpose Cables Subcommittee

Scope—The activity of the Special-Purpose Cables Subcommittee shall be directed to construction and application of insulated conductors designed for special uses.

Included in its scope shall be: Shipboard cable; vertical-riser cable; mining cable; generator-lead cable; other cables in stations; electric-furnace leads; collaborate on Standard 45 on "Recommended Practice for Electrical Installations on Shipboard" (Sections 18, 19, 20). (Co-operate with Marine Transportation Committee, sponsor.)

10. Accessories Subcommittee

Scope—The activity of the Accessories Subcommittee shall be directed to the design, construction, and application of equipment and appurtenances used with insulated conductors.

Included in its scope shall be: Sponsorship of Standard 48, "Cable Potheads"; terminations and potheads; joints; duct splices; filling compounds; oil reservoirs; alarm systems; network limiters; manhole switches.

11. Structures Subcommittee

Scope—The activity of the Structures Subcommittee shall be directed to the design, construction and maintenance of structures used to support or enclose insulated cable systems and their appurtenances.

Included in its scope shall be: Conduit and ducts; manholes; transformer vaults; kiosks; terminal supports; marine and viaduct crossings.

12. Tests and Measurements Subcommittee

Scope—The activity of the Tests and Measurements Subcommittee shall be directed to the development of test methods particularly designed to determine the physical properties of electrical characteristics of insulated conductors and to evaluate their usefulness and life under service conditions.

Included in its scope shall be: Test codes; dielectric strength tests (a-c, d-c, impulse); conductor measurements; dielectric measurements; corona measurements; installation testing; fault localization; operational testing; procedures for testing lead-sheath materials.

13. European Practices Subcommittee

Scope—The activity of the European Practices Subcommittee shall be directed to the procurement of information relating to new, novel, or unusual European developments, practice, or experience on matters coming within the scope of the Insulated Conductors Committee and to the promotion of the participation and cooperation of European engineers in the activities of the Insulated Conductors Committee.

COMMITTEE ON POWER GENERATION

Scope—Treatment of all matters relating to the design, construction, and operation of electric power generating stations, including auxiliary equipment incidental thereto (where such equipment is not otherwise specifically assigned to other technical committees).

Treatment of all matters pertaining to the design, construction, and operation of steam boiler plants, dams, reservoirs, nuclear piles, and other primary sources of energy to prime movers; also the prime movers themselves used in the generation of electric energy.

Treatment of all matters relating to the economics of generation and supply of electric power within individual generating stations.

Included in this scope shall be treatment of the following:

Prime movers (hydro, steam, oil, gas, nuclear, wind power)
Speed governors for prime movers
Station load and frequency control (joint with Systems Engineering Committee)
Control systems (joint with Substations Committee)
Excitation systems and voltage regulators
Station design (generating plant)
Auxiliaries and accessories
Production costs—design and operating economics (separate station)
Co-ordination of prime mover and electric machine design

1. Prime Movers Subcommittee

Scope—To study, review design, installation practices, and other features of all types of prime movers and their associated equipment (except hydraulic units) as related to electric power generation. To sponsor specifications, Standards, and technical sessions, the latter to be devoted principally to new developments or review of existing practices. To co-operate with other committees of organizations such as American Society of Mechanical Engineers and Edison Electric Institute.

2. Speed Governing Subcommittee

Scope—To study, review design, installation practices, and other features of all types of prime-mover governing systems, including hydroelectric. To sponsor specifications, Standards, and technical sessions and co-operate with other committees of the AIEE and other societies.

3. Excitation Systems Subcommittee

Scope—Similar functions as for the speed-governing subcommittee in the field of generating-station excitation systems.

4. Station Design Subcommittee

Scope—To review designs and installation practices in electric generating stations considered as a unit. To sponsor technical sessions covering new or improved practices. To analyze trends and designs and present general interest material of future possibilities, not including hydroelectric stations.

5. Hydroelectric Systems Subcommittee

Scope—Combining the scope of the prime movers and station design subcommittees for hydroelectric stations only.

6. Pacific Coast Subcommittee

Scope—To foster closer co-operation with the western members in all projects undertaken by the main committee. To provide direct contact in the planning of Pacific Coast technical meetings.

COMMITTEE ON PROTECTIVE DEVICES

Scope—Treatment of all matters in which the dominant factors are the design, construction, and operation of devices and equipment to limit or prevent damage to electric power generation, transmission, or distribution systems, or equipment; such damage arising from excessive current, voltage, or from lightning. Included in this scope shall be treatment of the following:

Capacitors (where used as protective devices)
Lightning protective devices (such as arresters, protector tubes, air gaps, and expulsion gaps)
Fault limiting devices (including neutral grounding devices)
Lightning investigations (joint with Transmission and Distribution Committee)
Reactors and grounding transformers (joint with Transformer Committee)

Matters relating to protective devices specifically designed for applications covered by certain other technical committees such as Industrial Control, Industrial Power Systems, or Communication, may be treated jointly with that committee if emphasis is on general principles or exclusively by the application committee if emphasis is on the particular requirements of the application.

1. Lightning Protective Devices Subcommittee

Scope—Treatment of all matters in which the dominant factors are the design, construction, application, and operation of devices and equipment to limit or prevent damage to electric power generation, transmission, or distribution systems, or equipment; such damage arising from lightning. Included in this scope shall be treatment of the following:

Lightning arresters (including the devices which have been or are commonly known as valve arresters, expulsion arresters, protector tubes, and expulsion gaps).
Rod gaps, and so forth.
Fused gaps (one shot and repeater types).
Wave sloping capacitors.
Lightning rods and masts.
Overhead ground wires in so far as used for lightning protective purposes.
Counterpoises in so far as used for lightning protective purposes.

The general terms design, construction, application, and operation as applied to lightning protective devices are interpreted to include theory, nature, and character of materials as affecting performance, preparation of Standards and definitions of ratings, classification, functional possibilities and limitations in relation to system characteristics and to other protective devices, resistance of earthing connections, effect of location with respect to protected equipment, effect of rating as bearing on performance of the devices, methods of field testing and maintenance, records of field performanceas affecting design and application, and field and laboratory research with natural and artificial lightning and their effect on the design, construction and operation of lightning protective devices.

2. Fault Limiting Device Subcommittees

Scope—To study the theory, review installation practices, prepare general application guides, summarize the literature, sponsor technical papers, and interpret the practical and theoretical functioning of power system current and voltage limiting devices and methods. To prepare Standards and definitions on fault limiting devices and methods.

The devices include power system neutral grounding devices, grounding transformers, series current limiting reactors, and so forth. The methods of fault limitation include arrangements of circuits and grounding of neutrals, regardless of whether grounding devices or series reactors are used.

COMMITTEE ON RELAYS

Scope—Treatment of all matters in which the dominant factors are the design, construction, and operation of protective relays including all matters necessary to the functioning of such relays employed in the generation, transmission, and distribution of electric energy. Included in this scope shall be treatment of the following:

Relays and automatic devices (fault and load discriminating)
Relay protective schemes, including relay co-ordination
Network relays (design, application, and performance)

Matters relating to relays specifically designed for applications, covered by certain other technical committees such as Industrial Control, Communication, and Transportation may be treated jointly with that committee if emphasis is on general principles; or exclusively by the application committee if emphasis is on the particular requirements of the application.

*1. Pacific Coast Subcommittee**

*2. Project Committee on Protection of Generators on Unbalanced Current**

3. Bibliography of Relay Literature Project Committee

Scope—This committee prepares lists of references to publications on relaying in the American and foreign press. Periodically (about every three years) these lists are published as formal AIEE papers.

4. Co-ordination of Construction and Protection of Distribution Circuits Project Committee (Joint with Distribution Subcommittee and Edison Electric Institute)

Scope—This is a joint group consisting of members of the AIEE Relay Committee, AIEE Transmission and Distribution Committee, and the EEI. This committee is studying the co-relation of distribution circuit construction and protection practices. The purpose is to collect performance data on representative distribution circuits to study the effects of various construction and protection details on the quality of service rendered by the distribution circuits.

5. Revision of Standards for Power Relays Project Committee

Scope—This committee was organized for the purpose of revising ASA Standard *C-42*, "American Standard for Relays Associated with Electric Power Apparatus." This revision was completed recently, but the committee will continue to function for the purpose of determining what information on performance data should be incorporated in a future revision of the Standard.

6. Transmission Line Protection Project Committee

Scope—This group is studying various methods of transmission line protection, and presenting to the Institute, data which will aid relay engineers in providing the most desirable form of protection on transmission lines.

* No scopes for subcommittees or working groups.

7. *Electronic Relay Applications Project Committee*

Scope—This committee is following the developments in the field of electronic relays for the purpose of bringing to the attention of the Institute new equipment or new ideas in this field.

8. *Project Committee on Coordination of Relay Protection of Industrial Power Systems With Utility Systems*

Scope—This project committee is investigating the special relay problems encountered in the parallel operation of industrial generating systems with larger interconnected power systems.

9. *Relaying Performance of Current Transformers Project Committee*

Scope—This committee is following developments in the field of current transformers with particular emphasis on their characteristics for relay applications.

10. *Remote Tripping Schemes Project Committee*

Scope—This committee was organized to review methods of remote tripping by the use of pilot wire, carrier-current, and other means of communication.

11. *Pilot Wires Project Committee*

Scope—This committee is reviewing experiences on pilot wires used for relaying purposes with the objective of bringing up to date the 1942 report on this subject.

12. *Project Committee On Relaying For Load Shedding**

13. *Profect Committee on Effect of Shock And Vibration on Relays*

Scope—This committee plans to study the effect of vibration and shock on relays used on electric power systems and industrial applications. From the information made available to the committee, it is planned to prepare a paper offering a suggested guide which should be useful to the industry in designing and applying protective relays to avoid difficulty from shock and vibration.

14. *Test Methods Project Committee*

Scope—This committee is collecting data from available sources on portable field testing equipment suitable for testing the more complicated types of relays. From this study, information will be presented on desirable test methods.

COMMITTEE ON ROTATING MACHINERY

Scope—Treatment of all matters in which the dominant factors are the requirements, design, construction, and operation of rotating machinery for the generation of electric energy; its conversion into other forms of energy or the transmission of mechanical energy by rotating electrical machinery. There shall be included in the scope treatment of the following:

Synchronous machines
Induction machines
D-c machines
Single phase and fractional horsepower machines
Motor generator sets
Rotating frequency changers
Rotating phase balancers
Synchronous converters
Electric couplings, brakes, and dynamometers
Insulation and dielectric problems related to rotating machinery

* No scopes for subcommittees or working groups.

Matters relating to rotating machinery specifically designed for applications covered by certain other technical committees such as electric welding, transportation, or communication, may be treated jointly with that application committee if the emphasis is on general principles; or, exclusively by the application committee if the emphasis is on the particular requirements of the application.

1. *Administrative Subcommittee*

Scope—The function of this subcommittee is to plan and co-ordinate the activities of the main committee and its subcommittees. It will consist of the officers of the main committee, the chairmen of the subcommittees, and any other committee members designated by the chairmen.

2. *Synchronous Machinery Subcommittee*

Scope—Treatment of all matters in which the dominant factors are the requirements, design, construction, and operation of synchronous machinery.

Matters relating to synchronous machinery specifically designed for application covered by an application committee may be treated jointly with that application committee if emphasis is on general principles; or exclusively by the application committee if the emphasis is on the particular requirements of the application.

Review and revise test codes as required and suggest any desirable revisions of standards and sponsor papers in the field of synchronous machinery as well as technical conferences to keep engineers abreast of developments in this field.

3. *Induction Machinery Subcommittee*

Scope—Treatment of all matters in which the dominant factors are the requirements, design, construction, and operation of integral horsepower polyphase induction machinery.

Matters relating to integral horsepower polyphase induction machinery specifically designed for application covered by an application committee may be treated jointly with that application committee if the emphasis is on general principles; or exclusively by the application committee if the emphasis is on the particular requirements of the application.

Review and revise test codes as required and suggest any desirable revisions of standards and sponsor papers in the field of integral horsepower polyphase induction machinery.

4. *D-C Machinery Subcommittee*

Scope—Treatment of all matters in which the dominant factors are the requirements, design, construction, and operation of d-c machinery other than fractional.

Matters relating to d-c machinery other than fractional specifically designed for application covered by an application committee may be treated jointly with that application committee if the emphasis is on general principles; or exclusively by the application committee if the emphasis is on the particular requirements of the application.

Review and revise test codes as required and suggest any desirable revisions of standards and sponsor papers in the field of d-c machinery other than fractional as well as technical conferences to keep engineers abreast of developments in this field.

5. *Single-Phase and Fractional Horsepower Subcommittee*

Scope—Treatment of all matters in which the dominant factors are the requirements, design, construction, and operation of single-phase a-c and fractional horsepower a-c and d-c machinery.

Matters relating to single-phase a-c and fractional horsepower a-c and d-c machinery specifically designed for application covered by an application committee may be treated jointly with that application committee if the emphasis is on general principles; or exclusively by the application committee if the emphasis is on the particular requirements of the application.

Review and revise test codes as required and suggest any desirable revisions of standards and sponsor papers in the field of single-phase a-c and fractional horsepower a-c and d-c machinery as well as technical conferences to keep engineers abreast of developments in this field.

6. *Test Code Subcommittee*

Scope—Review of existing test codes applying to rotating machinery and other test codes from which beneficial suggestions can be gleaned. Notation of omissions from and discrepancies between the various test codes. Inspiration of master test codes as required. Setting up a general guide to the scope of test codes.

7. *Insulation Subcommittee*

Scope—Treatment of all matters in which the dominant factors are insulation and dielectric problems related to rotating machinery.

Review and revise test codes as required and suggest any desirable revisions of standards and sponsor papers in the field of insulation and dielectric problems relating to rotating machinery as well as technical conferences to keep engineers abreast of developments in the field.

8. *Electric Coupling Subcommittee*

Scope—Treatment of all matters in which the dominant factors are the requirements, design, construction and operation of electric couplings and such machines used as brakes or dynamometers.

Matters pertaining to electric couplings specifically designed for applications covered by an application committee may be treated jointly with the application committee if the emphasis is on general principles, or exclusively by the application committee if the emphasis is on the particular requirements of the application.

Review and revise test codes as required and suggest any desirable revisions of standards, and to sponsor papers in the field of electric couplings.

9. *Bibliography and Publicity Subcommittee*

Scope—To periodically (about every five years) bring up to date AIEE Special Publication S32, the Bibliography on Rotating Electric Machinery. To prepare news items of Committee activities, and to prepare the annual report on engineering developments in the field of Rotating Electric Machinery for publication in "Electrical Engineering."

COMMITTEE ON SUBSTATIONS

Scope—Treatment of all matters in which the dominant factors are the electrical and structural design, construction, installation, operation, and control of automatic, semiautomatic, and nonautomatic substations, including switching and transformer stations.

Included in the scope of this committee shall be treatment of the following:

Automatic, semiautomatic, and nonautomatic substations
Switching stations
Fundamental single-line wiring diagrams
Open-type bus design, except those incorporated in switchgear assemblies
Automatic and supervisory control systems (joint with Power Generation Committee)
Supervisory control devices
Structural arrangements for substations
Telemetering (joint with Instruments and Measurements Committee)
Insulation co-ordination (joint with Transmission and Distribution Committee)

1. *Executive Subcommittee*

Scope—To plan and co-ordinate the activities of the main committee and its subcommittees including consideration of their scopes, program planning, and assistance in selection of papers.

2. *Transmission Substation Subcommittee*

Scope—Responsible for treatment of all matters pertaining to the design and construction of transmission substations and the application of switching devices, instrumentation and protective and control equipment in transmission substations.

3. *Distribution Substation Subcommittee*

Scope—Responsible for treatment of all matters pertaining to the design and construction of distribution substations and the application of switching devices, instrumentation and protective and control equipment in distribution substations.

4. *Conversion Substation Subcommittee*

Scope—Responsible for the treatment of all matters pertaining to the design and construction of conversion substations and the application of switching devices, instrumentation and protective and control equipment in conversion substations.

5. *Automatic and Supervisory Control Subcommittee*

Scope—Responsible for the treatment of all matters relating to the development and application of supervisory, automatic and manual control to all substations and (with Power Generation Committee) similar supervisory and automatic control features of electric generating stations.

A. *Working Group on Device Function Numbers*

Scope—Responsible for an investigation of the present system of Device Function Numbers in American Standard 037.2-1945 and the necessary revisions to bring it up to date.

B *Working Group on Project 51.1—Recommended Minimum Clearances*

Scope—To study the problem of minimum clearances of live parts in substations.

C. *Working Group on Project 20—Standardization of Factory-Designed Substations*

Scope—Responsible to Committee on Substations for treatment of all problems relating to factory-designed and/or assembled substations.

D. *Working Group on Substation Grounding Practice*

Scope—Responsible for investigation and study of substation grounding system design and testing practice, including consideration of the relative merits of galvanized iron versus copper electrodes.

E. *Working Group on Project 52.1—Location and Design of Distribution Substations in Residential Areas*

Scope—To study the problems of locating distribution substations in residential areas and existing and possible designs for these substations.

F. *Working Group on Project 53.1—Extra High Voltage Substations*

Scope—To study the problems and development of extra high voltage (287 Kv and above) substations and prepare bibliographies, reports and guides on their design.

G. *Working Group on Project 21—Safety Considerations in Substations*

Scope—To study problems in substation design relative to safety.

H. *Working Group on Project 53.2—Design and Utilization of Mobile Substations*

Scope—To prepare a guide on the design of mobile substations and the design of distribution substations to facilitate their use.

COMMITTEE ON SWITCHGEAR

Scope—Treatment of all matters in which the dominant factors are the design, construction, and operation of devices or assembled gear to establish (make), interrupt, or change connections in an electric circuit under normal or abnormal conditions. Included in this scope shall be treatment of the following:

Power circuit breakers
Large air circuit breakers
Low-voltage air circuit breakers
Switchgear assemblies
Switches
Network protectors (design and application)
Metal-enclosed buses and all buses included in switchgear assemblies
Insulation, insulators, and hardware for switchgear
Automatic reclosers
High-voltage fuses and cutouts (above 600 volts)

Matters relating to switchgear or switchgear devices specifically designed for applications covered by certain other technical committees such as industrial control, communication, electronics, and transportation may be treated jointly with that committee if emphasis is on general principles; or exclusively by the application committee if emphasis is on the particular requirements of the application.

1. *Administrative Subcommittee*

Scope—To plan and co-ordinate the activities of the subcommittees and to obtain general uniformity in Standards as to methods of treatment. To recommend desirable lines of activity as the need may arise.

2. *Power Circuit Breakers Subcommittee*

Scope—To treat all matters included in the Switchgear Committee scope so far as they relate to power circuit breakers.

3. *Low Voltage Air Circuit Breakers Subcommittee*

Scope—To treat all matters included in the Switchgear Committee scope so far as they relate to low voltage air circuit breakers.

4. *Switches, Fuses and Insulators Subcommittee*

Scope—To treat all matters included in the Switchgear Committee scope so far as they relate to switches, fuses and insulators.

5. *Automatic Circuit Reclosers and Sectionalizers Subcommittee*

Scope—To treat all matters included in the Switchgear Committee scope so far as they relate to automatic reclosures.

6. *Switchgear Assemblies Subcommittee*

Scope—To treat all matters included in the Switchgear Committee scope so far as they relate to switchgear assemblies.

COMMITTEE ON SYSTEM ENGINEERING

Scope—Treatment of all matters in which the dominant factors are the requirements, planning, co-ordination, operation, and economics of interconnected electric generating, transmission, and distribution systems. Included in this scope shall be treatment of the following:

Interconnected system planning
Frequency and load control (joint with Power Generation Committee)
Load dispatching
Economics of system and unit operation
Engineering of system expansion
Interconnection contracts

1. *Administrative Subcommittee*

Scope—To serve as an executive committee in the assignment of work to subcommittees, to expedite work and to arrange for preparation and presentation of papers at meetings.

2. *System Planning Subcommittee*

Scope—Investigation and study of load growth and generation requirements, interconnection of systems, methods of transmission and interconnection, location and optimum sizes of units, and general system planning studies.

3. *System Economics Subcommittee*

Scope—Investigation and study of interconnection operation, economics of long high-voltage power transmission, co-ordination of operation of units in a plant, between plans in a system, and between systems and other economic studies for improved system operation.

4. *System Operations Subcommittee*

Scope—Investigation and study of load and kilovar dispatching, spinning reserve, emergency procedures, resynchronizing procedures, requirements and usage of communication equipment, safety "hold-off procedures," functions of intersystem operating committees, and other general studies for improvement of system operation.

5. *System Controls Subcommittee*

Scope—Investigation and study of load-frequency control equipment and operation, voltage control, phase angle control, and other general studies of control methods to improve system operations.

COMMITTEE ON TRANSFORMERS

Scope—Treatment of all matters in which the dominant factors are the design, construction, and operation of transformers,

reactors, and other similar equipment. Included within this scope shall be treatment of the following:

Transmission and distribution transformers
Voltage and load regulators (step and induction regulators)
Reactors and grounding transformers (joint with Protective Devices Committee)
Speciality transformers and regulating transformers
Railway service transformers
Test transformers
Constant current transformers
Insulating fluids
Insulation and dielectric problems relating to transformers
Insulators and hardware with transformers
Potential devices, Bushing and Instrument Transformers (with co-ordination with Relay, Switchgear, and Instruments and Measurements Committees)

Matters relating to transformers and regulators specifically designed for applications covered by certain other technical committees such as Relays, Electronics, Protective Devices, Communication, may be treated jointly with that committee if emphasis is on general principles; or exclusively by the application committee if emphasis is on the particular requirements of the application.

1. Dielectric Tests Subcommittee

Scope—To determine test voltage requirements for service conditions or conversely voltage tests that will determine that service requirements are met.

2. Insulation Life Subcommittee

Scope—To determine maximum safe temperatures of insulating materials based on aging characteristics used in all types of transformers, to determine effect of ambient temperatures, safe duration of loads in excess of nameplate ratings, including short circuits, to determine methods of calculating or measuring temperatures reached during both transient and steady loads.

Working Groups:

(A) Life of Materials
(B) Methods of Making Temperature Rise Tests on Transformers
(C) Revision of Guide for Loading Oil-Immersed Distribution and Power Transformers

3. Insulating Fluids Subcommittee (both liquid and gaseous)

Scope—To determine or accept determination of other bodies of acceptable fluids for transformers and for fluids, particularly oils, for use in other power equipment. To determine the effect of various treatments, aging in service, and to determine criteria for service ability.

4. Magnetic Behavior Subcommittee

Scope—To determine no load losses, exciting current, inrush current, exciting current interruption phenomena, and similar matters. Also to determine audio noise characteristics, methods of measurement and to establish criteria for service.

Working Group:

(A) Audible Noise

5. Performance Characteristics Subcommittee

Scope—To determine accuracy and performance standards. To determine methods for measuring and calculating copper losses, resistances, reactances, impedances, and other characteristics. To investigate all other problems pertaining to a particular type of equipment.

Working Groups:

(A) Revision of Reactor Standards
(B) Instrument Transformers

COMMITTEE ON TRANSMISSION AND DISTRIBUTION

Scope—Treatment of all matters in which the dominant factors are considerations of economical and technical design, theoretical and experimental performance, installation, and service operation of that part of electric power systems which serve to transmit electric energy between the generating source or substation and the service.

Treatment of all matters involving substations themselves including switching and transforming stations are not within the scope of this committee, except in the broad aspects of the application of a substation as a whole.

Treatment of matters involving industrial distribution systems shall not be included within this scope unless such systems are interconnected with an electric power utility, in which case the action shall be joint with the Committee on Industrial Power Systems. Included in this scope shall be treatment of the following:

Overhead and underground transmission and distribution systems
Overhead conductors
Fault current studies
System stability
Lightning investigations (joint with Protective Devices Committee)
Network systems and studies
Insulated line conductors (properties related to system problems)
Structural co-ordination
Insulation co-ordination (joint with Substations Committee)
Inductive co-ordination
Corona
Towers, poles, insulators, and hardware
Capacitors (except those used for protective devices)

*1. Capacitor Subcommittee**
*2. Distribution Subcommittee**
*3. General Systems Subcommittee**
*4. Lightning and Insulator Subcommittee**
*5. Towers, Poles, and Conductors Subcommittee**

Science and Electronics Division

COMMITTEE ON BASIC SCIENCES

Scope—Treatment of all matters in which the dominant factor is electrophysics, and which are of such novel character as to be unapplied in any apparatus or field of application within the scopes of the other technical committees, or which are of such generality as to be significant within the scopes of several technical committees. Such subjects as general circuit theory, electrostatics, mathematical treatises, magnetics, general electrical units, and nomenclature are properly within the scope of this committee.

1. Applied Mathematics Subcommittee

Scope—To furnish needed co-operation between mathematicians and engineers, preferably by bringing specific engineering problems to the attention of mathematicians for solution rather than to consider only general problems which might be discussed from an abstract viewpoint. Members of the American Mathematical Society are invited to join with this subcommittee in mutually advantageous conferences and sessions.

2. Electrical Properties of Gases Subcommittee

Scope—To keep abreast of the latest developments in this field and to bring before the Institute such papers and speakers as are deemed necessary to co-ordinate the fundamental and theoretical work being carried on (in many cases by physicists) with the applied work of various Institute technical committees.

3. Electric Circuit Theory Subcommittee

Scope—Considerable work in circuit theory has been done, particularly as a result of the war effort. The function of this subcommittee is to make a thorough review of recent circuit theory developments in all fields directed toward the publication of this material and also to study circuit theory definitions which are needed urgently in view of the almost complete lack of standard circuit theory definitions existing at the present time.

4. Magnetic Subcommittee

Scope—Treatment of theories relating to magnetism and of the development and application of magnetic materials; co-operation with other societies on such subjects as magnetic nomenclature and testing.

5. Dielectrics Subcommittee

Scope—To acquaint engineers with recent investigations and developments in the field of solid and liquid dielectrics; to co-operate with other organizations in this field and to study the behavior of solid and liquid dielectrics both theoretically and experimentally.

6. Semi-conductors and Transistors Subcommittee

Scope—To acquaint engineers with recent investigations in the physics and chemistry of semi-conductors and transistors, and to co-operate with other societies in the study of the theory and applications of these materials.

7. Basic Concepts Subcommittee

Scope—To develop clear and precise concepts of quantities in the Basic Sciences; to encourage logical deductive disciplines in the Basic Sciences as well as in their application to engineering and to co-operate with the Standards Committee in developing precise definitions of terms occurring in the Basic Sciences.

COMMITTEE ON COMPUTING DEVICES

Scope—Treatment of all matters in which the dominant factors are the requirements, design, construction, selection, installation, scope, and operation of machinery and devices relating to computing devices, including studies of the electromagnetic, electronic, and mechanical phenomena of such devices.

Fundamental mathematic, electronic, and properties of materials entering into these devices are not included.

1. Analog Computers Subcommittee

Scope—The treatment of all matters in which the dominant factors are the requirements, design, construction, selection, installation, scope, and operation of machinery and devices relating to computing devices of the continuous-variable type, that is, to devices in which each problem quantity is represented by the magnitude of some computer quantity such as, for example, a shaft rotation or a voltage. This includes studies of the electromagnetic, electronic, and mechanical phenomena of such devices. In particular a great many, though not all, of the continuous-variable computers are based on analogy with the physical system to be studied so that this subcommittee will be concerned with all such analogy computing devices.

*2. Computer Bibliography Subcommittee**

3. Digital Computers Subcommittee

Scope—The treatment of all matters in which the dominant factors are the requirements, design, construction, selection, installation, scope, and operation of machinery and devices relating to computing devices in which the problem quantities involved are represented in the computer by the digital number system. This includes studies of the electromagnetic, electronic, and mechanical phenomena of such devices.

*4. Analog Digital Converters Subcommittee**

*5. Digital Computer Comparisons Subcommittee**

COMMITTEE ON ELECTRICAL TECHNIQUES IN MEDICINE AND BIOLOGY

Scope—The treatment of all matters in which the dominant factors are electrical techniques that are used in medical and biological research, diagnosis, and therapeutics. The Committee is concerned particularly with the intercommunication of problems, and their solutions, between electrical engineers on the one hand and physicians and biologists on the other. In planning papers and programs to this end, the Committee will work jointly with the other interested AIEE Committees and may enlist the aid of consultants in the field of biology and medicine.

No subcommittees have been appointed.

COMMITTEE ON ELECTRONIC POWER CONVERTERS

Scope—Treatment of all matters in which the dominant factors are the design, construction, and operation of equipment and circuits for the conversion of electric power by electronic or equivalent mechanical means. The following types of equipment are specifically included in the scope:

1. Rectifiers and inverters utilizing pool tubes, hot-cathode gas or vacuum tubes and synchronous contacts.
2. Electronic frequency changers.
3. Electronic converters for motor control (jointly with Industrial Control Committee).
4. Electronic controlled reactors and electronic contactors.

The following are excluded:

1. Equipment for welding applications.
2. High-vacuum tube oscillators.
3. Equipment for radio receivers and similar low power applications.
4. Metallic rectifiers.

Matters relating to applications covered by other technical committees may be treated jointly with those committees if emphasis is on the particular requirements of the application.

*No scopes for subcommittees or working groups.

1. Administrative Subcommittee

Scope—The function of this subcommittee is to plan and co-ordinate the activities of the main committee and its subcommittees. It will consist of the officers and the preceding chairman of the main committee, the chairmen of the subcommittees, and any other committee members designated by the chairman.

2. Papers and Speakers Subcommittee

Scope—This subcommittee will complete the bibliography on electronic power converters and will keep it up to date with annual supplements. It will make recommendations on subjects of technical papers and promote the preparation of such papers. It will prepare information on the availability of speakers and educational material on electronic power converters, as an aid to schools, AIEE Sections, and discussion groups.

3. Electronic Converter Circuits Subcommittee

Scope—This subcommittee will handle matters relating to circuit theory, protection, and control of electronic and equivalent mechanical power converters. It will cooperate with other subcommittees and with other AIEE committees (such as Electronics, Switchgear, Protective Devices, Substations) on matters of mutual interest.

4. Mercury Arc Converter Subcommittee

Scope—This subcommittee will handle matters relating to design, characteristics and application of mercury arc rectifying devices used for electronic power converters. It will maintain liaison and co-operate with other technical committees of the AIEE and other organizations which carry on activities relating to such rectifying devices, and it will keep the electronic power converter committee informed on such activities.

5. Hot-Cathode Power Converter Subcommittee

Scope—Preparation of Standards that apply to the following types of converters: Rectifiers utilizing hot cathode gas or vacuum tubes and inverters utilizing hot cathode gas tubes. This scope excludes applications in oscillator circuits and radio receivers.

6. Mechanical Rectifier Subcommittee

Scope—This subcommittee will handle matters relating to mechanical rectifiers; sponsor technical papers on mechanical rectifiers and circuits; guide the development of nomenclature so as to remain reasonably consistent with the nomenclature of electronic power converters; collect material for, and submit recommendations for standards when such action seems advisable. It will maintain liaison and cooperate with other AIEE committees and subcommittees on matters of mutual interest and keep the electronic power converter committee informed of such activities.

7. West Coast Subcommittee

Scope—This is a regional subcommittee operating within the scope of the main committee. Its functions are to encourage and co-ordinate AIEE activities relating to electronic power converters in the West Coast region, to keep members informed on electronic power converter developments, to maintain contact with the main committee and its other subcommittees, and to participate in their activities that are of interest to the West Coast region.

COMMITTEE ON ELECTRONICS

Scope—Treatment of all matters in which the dominant factor is electronics, particularly those dealing with the design characteristics, or behavior of devices of an electronic nature, or of the circuits associated with them. The treatment of complete equipments or systems may be considered within the scope of this committee if they depend predominantly on electronic devices for their operation. If the field of application of such equipments or systems falls also within the scope of other technical committees, action with those committees may be joint.

1. Electron Tube Subcommittee

Scope—Treatment of all technical matters relating to electron tubes, especially those for industrial use.

2. Papers Review Subcommittee

Scope—To review *Transactions*-type papers within the field of the Committee, and to contribute to the Section and Branch activities in the electronics field.

3. High-Frequency Conductors, Cables, and Connectors Subcommittee

Scope—Attention to technical presentation and standards, including test methods, dealing with high-frequency conductors, cables, and connectors, including wave guides.

4. Electrostatic Processes Subcommittee

Scope—Treatment of technical matters in which electrostatics are dominant. Fields included are the following:

(1) Electrostatic precipitation of solid and liquid particles, both in the removal of high concentrations of dust, fume, and smoke, and in air conditioning.
(2) Electrostatic painting and de-tearing.
(3) Electrostatic orientation and deposition of solid particles on surfaces.
(4) Electrostatic separation, grading, and screening of solids.
(5) Electrostatic printing.
(6) Static problems in industry.

5. Infrared Applications Subcommittee

Scope—Encourages interchange of information; publication of infrared advancements; use of standard nomenclature, and adoption of standards of specifications, of testing, and of measurements in the field of infrared radiation; and, in particular, pursues measuring devices and their applications, observation and detection equipments, spectroscopy instrumentation including process control and spectral characteristics of chemical materials and optical materials relative to their use in spectroscopy instrumentation in liaison with other societies.

6. Electronic Semiconductor Devices Subcommittee

Scope—Presentation to the Institute in the form of technical papers and conferences of the latest information on semiconductor devices and to stimulate their application. Standardization of definitions, nomenclature, symbols, operating characteristics, and test conditions for semiconductor devices. It is the intent of this subcommittee to bridge the gap between research and application fields.

7. Education in Electronics Subcommittee

Scope—This subcommittee was formed to co-ordinate the work of the Electronics Committee with electrical engineering education; to aid electrical engineering educators in the teaching of electronics, and to help in introducing the advances in the field into the schools in an orderly and desirable manner. Conversely, the committee acts to inform the Electronics Committee and the AIEE of advances in education produced by the impact of electronics on the electrical engineering field. The committee also provides liaison with the Education Committee.

8. Industrial X-Ray Subcommittee

Scope—Matters pertaining to X-ray tubes, rectifier tubes used in X-ray high-voltage generators, and other electron tubes used in X-ray apparatus and accessories; industrial applications of X-ray and engineering connected with X-ray equipment. This committee is concerned with the preparation of Standards such as graphical symbols for electron devices, standards definition of electrical terms, particularly those related to X-ray equipment. It contemplates work on such projects as standardizing the method of specifying the ratings and characteristics of X-ray and rectifier tubes; standardizing the symbols and forms of presenting the wiring diagrams for X-ray generators; and standardizing the method of specifying the characteristics and ratings of X-ray transformers and generators. It will consider the engineering phases of the industrial application of X-rays which pose special engineering problems.

9. Electronic Aids to Navigation Subcommittee

Scope—To keep the Electronics Committee informed of progress in this field, and where appropriate, to inform AIEE membership of important developments by publication in AIEE channels.

*10. Electronic Methods in Food and Biological Processing Subcommittee**

*11. Passive Components Subcommittee**

*12. Liaison with Magnetic and Dielectric Amplifiers Subcommittee**

13. Liaison with Nucleonics Subcommittee

Scope—Maintenance of adequate interchange of information, as to objectives and activities, between the Electronics Committee and other AIEE groups interested in problems of nuclear instrumentation and nuclear power.

14. Liaison with Electronic Heating Subcommittee

Scope—Maintaining adequate interchange of information, as to objectives and activities between the Electronics Committee and other AIEE groups interested in induction and dielectric heating.

*15. Liaison with Standards Committee**

16. Liaison with IRE Subcommittee

Scope—Liaison representative to provide co-ordination between Electronics Committee and groups in the Institute of Radio Engineers interested in same field.

17. Liaison with JETEC Subcommittee

Scope—The function of this subcommittee is to co-ordinate activities on electron tubes, particularly from a standpoint of preventing duplication and seeing that the work of each group is suitable for use by the other groups.

18. Electronic Circuits and Systems Engineering Subcommittee

Scope—Attention to presentation to the AIEE membership of technical material involving electronic circuits and complete engineering systems including primarily electronic functioning. Particular attention will be given to early presentation of material released from military security in this field.

COMMITTEE ON INSTRUMENTS AND MEASUREMENTS

Scope—Treatment of all matters in which the dominant factor is the measurement of electrical quantities, both absolute and relative, and the measurement of other quantities by electrical methods, including the devices necessary thereto. Where novel instruments and novel methods of electrical measurement are in papers, even though measurement is not the prime objective, then action shall be joint with the respective technical committee concerned.

Telemetering is assigned primarily to the Committee on Instruments and Measurements and handled by a joint subcommittee comprised of members of both the Committees on Substations and Instruments and Measurements. Telemetering problems in connection with automatic stations will be assigned by the chairman of the Committee on Instruments and Measurements to members of the subcommittee who are also members of the Committee on Substations. Telemetering problems of a more general nature will be assigned by him to members of both main committees, and where the problem is simply measurements it will be assigned only to members of the Committee on Instruments and Measurements (as per joint agreement between the Committees on Automatic Stations and Instruments and Measurements, January 29, 1935).

1. Group Subcommittee on General Activities

Scope—Treatment of all matters in which the dominant factor is the organization and administration of the affairs of the Committee on Instruments and Measurements, including the processing of definitions and standards, and the cooperation with other societies.

A. Subcommittee on Organization
B. Subcommittee on Definitions
C. Subcommittees on Cooperation with Instrument Society of America

2. Group Subcommittee on Indicating and Integrating Instruments

Scope—Treatment of all matters in which the dominant factor is the use of electrical methods for the indication or integration of physical quantities, including the devices necessary thereto.

A. Subcommittee on Indicating Instruments
B. Subcommittee on Watthour Meters
C. Subcommittee on Master Test Code for Power Measurements

3. Group Subcommittee on Recording and Controlling Instruments

Scope—Treatment of all matters in which the dominant factor is the use of electrical methods for the recording, controlling, and processing of physical quantities, including the devices necessary thereto.

A. Subcommittee on Recording and Controlling Instruments

4. Group Subcommittee on Electronic and High-Frequency Instruments

Scope—Treatment of all matters in which the dominant factor is the use of electronic or high frequency methods for the measurement of physical quantities, including the devices necessary thereto.

A. Subcommittee on High-Frequency Measurements
B. Subcommittee on Electronic Instruments

5. Group Subcommittee on Special Instruments and Auxiliary Apparatus

Scope—Treatment of all matters in which the dominant factor is the use of electrical methods for the measurement of miscellaneous specialized physical quantities, including the devices, transducers, accessories, and auxiliary apparatus, necessary thereto.

A. Subcommittee on Emission Spectroscopy
B. Subcommittee on Absorption Spectroscopy
C. Subcommittee on Dielectric Measurements in the Field
D. Subcommittee on Revision of Standard No. 4 (Measurement of Test Voltage in Dielectric Tests) (ASA C-68.1)
E. Subcommittee on Instrument Accessories
F. Subcommittee on Master Test Code for Rotary Speed Measurements
G. Subcommittee on Geophysical Instruments and Measurements

6. Group Subcommittee on Telemetering

Scope—Treatment of all matters in which the dominant factor is the indicating, recording, or integrating of a quantity at a distance by electrical translating means.

A. Subcommittee on Stationary Telemetering Activities
B. Subcommittee on Mobile Telemetering Activities
C. Joint Subcommittee on Telemetering Terminology
D. Subcommittee on Telemetering Bibliography
E. Subcommittee on Telemetering Aspects of Recorders and Control Instruments

7. Group Subcommittee on Nucleonic and Radiation Instruments

Scope—Treatment of all matters in which the dominant factor is the use of electrical methods for the measurement of nuclear quantities and alpha, beta, gamma, and X radiations, including the devices necessary thereto.

8. Group Subcommittee on Navigation Instruments

Scope—Treatment of all matters in which the dominant factor is the use of electrical methods for the measurement of navigational quantities, including the devices necessary thereto.

A. Subcommittee for Air Navigation Instruments
B. Subcommittee for Marine Navigation Instruments

COMMITTEE ON MAGNETIC AMPLIFIERS

Scope—Treatment of all matters in which the dominant factors are the fundamental developments, design, and application of magnetic amplifiers and of materials and components as used therein; standardization of definitions, nomenclature, symbols and operating characteristics; encouragement of the exchange of information as by technical papers, conference sessions and demonstrations.

1. *Applications Subcommittee**
2. *Definitions Subcommittee**
3. *Dielectric Amplifiers Subcommittee**
4. *Magnetic Amplifier Theory Subcommittee**
5. *Principal Groups Subcommittee**
6. *Test Codes Subcommittee**
7. *Materials Subcommittee**
8. *Standards Subcommittee**

COMMITTEE ON METALLIC RECTIFIERS

Scope—Treatment of all matters in which the dominant factors are extended surface metallic rectifiers, including applications. If the field of applications of such devices falls within the scopes of other technical committees, action with those committees may be joint.

1. *Technical Information Subcommittee**
2. *Miniature Rectifiers Subcommittee**
3. *Definitions Subcommittee**
4. *Bibliography Subcommittee**
5. *Test Code Subcommittee**
6. *Patents Subcommittee**
7. *Papers and Meetings Subcommittee**

COMMITTEE ON NUCLEONICS

Scope—Treatment of all matters in which the dominant factor is nucleonics, particularly that dealing with the design, characteristics, or behavior of devices of a nucleonic nature, or of the systems associated with them. The treatment of complete equipments or systems may be considered within the scope of this committee if they depend predominantly on nucleonic principles for their operation. If the field of application of such equipments or systems falls also within the scopes of other technical committees action with those committees shall be joint. (Subcommittees not now available.)

Joint Subcommittees

Joint Subcommittee on Application of Probability Methods to Power-System Problems (Joint with Power Generation and System Engineering Committees)

Scope—To study, review, and foster the techniques of probability methods in rational design of power systems for electrical generation. To sponsor technical sessions covering the application of probability methods. To co-operate with other AIEE committees, professional societies, and technical organizations in collecting and analyzing performance data needed in the application methods.

Joint Subcommittee on Carbon Brushes (Joint with AIEE Rotating Machinery and Air Transportation Committees and in co-operation with NEMA on Codes)

Scope—The purpose of this joint subcommittee on carbon brushes shall be: To prepare standard codes for testing carbon brush materials and brushes; to encourage research and development which may lead to improved brush performance; to encourage the preparation of technical papers relating to the manufacture, application, and operation of carbon brushes, and to promote conferences and technical meetings at which such papers shall be presented.

AIEE-ASME Joint Subcommittee on Recommended Specifications for the Speed Governing of Prime Movers

Scope—For preparing recommended specifications for the speed governing of prime movers driving electric generators.

* No scopes for subcommittees or working groups.

SCOPES OF AIEE TECHNICAL COMMITTEES

* No scopes for subcommittees or working groups.
