1954 Year Book

of the

AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS

33 West 39th Street New York 18, N. Y.

SCOPE OF THIS BOOK

The primary purpose of this book is to publish a roster of Institute members, arranged in two sections: (1) an alphabetical index giving the name of each member and the city of his membership registry; (2) a catalog of membership, subdivided geographically and arranged alphabetically within each subdivision.

Information relating to general activities of the Institute also is included, but events of the past year are not particularly emphasized. A brief record of each year's work appears in the report of the Board of Directors presented at the annual meeting, a copy of which is available to members upon request.

The summary on page 580 serves also as a geographical index.

(Corrected to May 1, 1954)

Instructions for Use

Information regarding any member may be obtained by ascertaining first the city and state of residence from the alphabetical index, and then referring to the geographical section (beginning on page 110) covering such location. Running heads on all pages, and other guide headings, should facilitate ready identification of all entries.

With the name of each city is given the name of the Section within the territory of which that city falls. Conversely, cities and other entries for which no Section name is given are not in Section territory.

Catalog of Membership

(Corrected to May 1, 1954)

For Alphabetical Index to Members See Pages 1-109
For Geographical Index See Page 580

This catalog is arranged alphabetically according to geographic divisions and subdivisions. Information regarding any member may be obtained by ascertaining from the alphabetical index, printed on pages 1 to 109 the city and state under which the member is listed, and then referring to the catalog for such location. Running heads on all pages, and other guide headings, should facilitate ready identification of all entries. City headings also indicate the name of the Institute Section within the territory of which it falls; if no Section is mentioned, the city does not lie within Section territory.

The following list contains the names of members of all grades. The letter and yearly date following immediately after each name indicate the grade to which the member was admitted to the Institute and the year of admission; additional letters and dates signify transfer to a higher grade and the year of such advancement; the last letter, of course, shows the grade the member now holds.

(HM) designates the grade of Honorary Member; (F) Fellow; (M) Member; (AM) Associate Member; (AFFIL) Affiliate.

† Indicates registered professional engineer.
