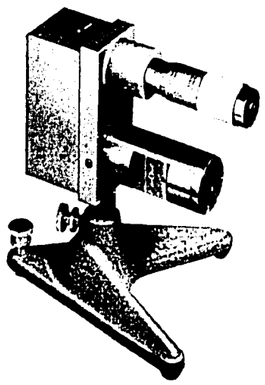
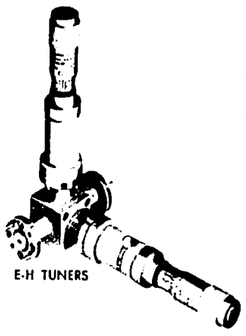
# 140 KMC

## ULTRAMICROWAVE® EQUIPMENT BY DE MORNAY-BONARDI



*—it works—it's accurate—it's available*

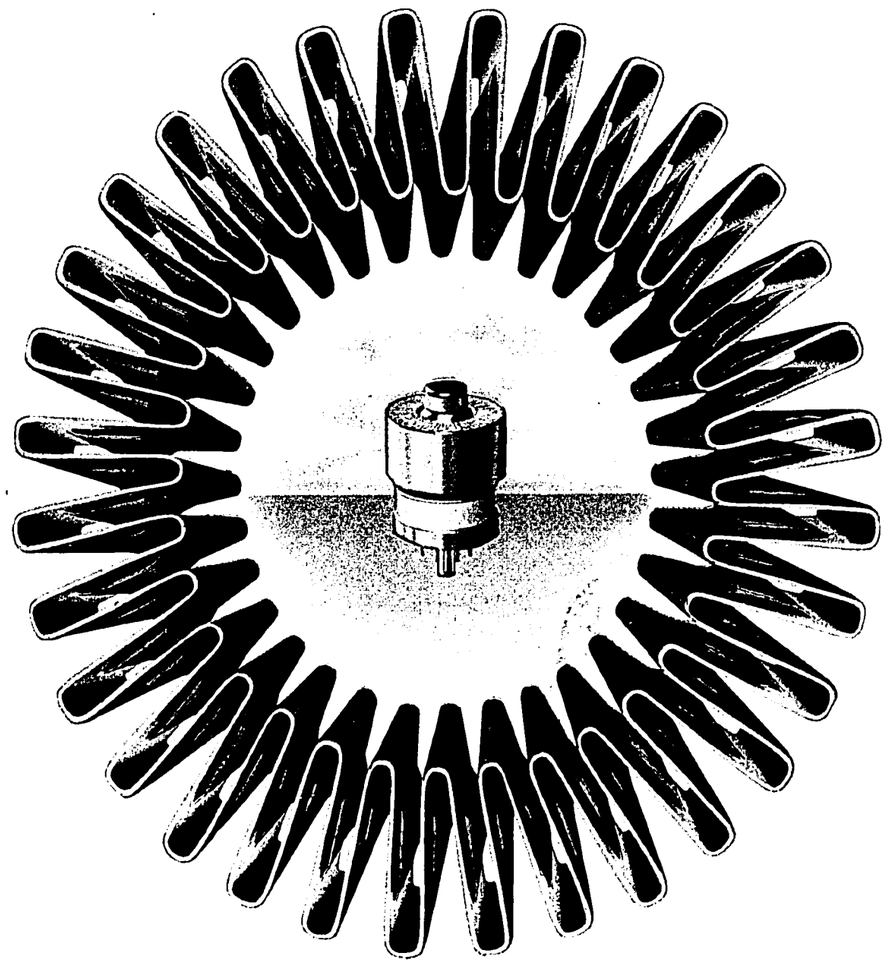


STANDING WAVE DETECTORS

CRYSTAL MOUNTS

CAVITY WAVEMETERS

E-H TUNERS



Recent advances in physical research have created an interest in the highest attainable microwave frequencies—an interest which requires the use of millimeter wave components and instruments beyond the scope of those currently available. Just as in 1954, when De Mornay-Bonardi was the first to offer commercially available instruments and components of A and B sizes (50-90 KMC), now for first time D-B offers instruments and components for the W size—90 to 140 KMC. These units truly represent a major breakthru in the microwave art, and can greatly enlarge your scope of microwave activity.

# RCA radiator efficiency allows you to cut blower horsepower in half

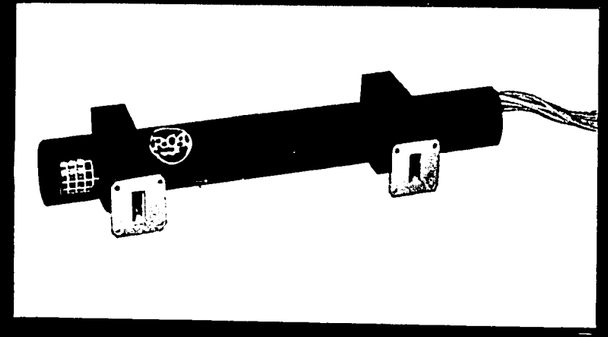
**Resulting space and weight savings permit more compact packaging, greater design versatility**

Recently a leading manufacturer of communications equipment ran a comprehensive series of tests comparing the heat dissipating capabilities of RCA-7203/4CX-250B, with integral radiator, to a standard JAN/4X-250B. The results: the JAN/4X-250B required twice as much blower horsepower.

The integral radiator on RCA-7203 is an exclusive RCA development. It is used on many types of RCA tubes for air-cooled operation. Its remarkably efficient louvered construction is a logical development in radiator design . . . but only RCA has mastered the complex manufacturing problems involved.

This high-efficiency integral radiator is one of the things that makes RCA power tubes so popular in designs where space and weight are critical considerations. For further information about this and other pace-setting features of RCA power tubes, including the new Cermolox* line, write:

The Marketing Manager, RCA Electron Tube Division, Industrial Tube Products Department, Lancaster, Pa.



*RCA's line of coaxial, precision-aligned grid, beam power tubes of ceramic and metal construction. See RCA's forthcoming advertisement on this complete line.

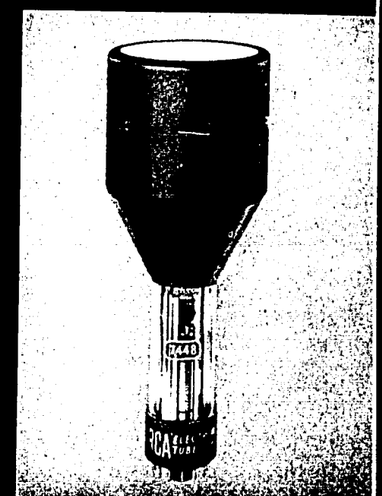
DESIGN FOR DEPENDABILITY...



## Specify RCA tubes for industrial and military applications

Whatever your electronic-design problems in military and industrial applications, look to RCA for the tubes you need. RCA's broad line of industrial tube types cover the field—from photoelectronics and microwave propagation to control and communications systems. Every RCA tube type is performance-proved to give you the maximum in dependable operation. And if you're working in advanced areas, RCA's development team will work with you to produce new tube types to meet your specific requirements. Get in touch with your RCA Field Representative today for complete information.

For technical data on specific RCA commercial tube types, write RCA Electron Tube Division, Commercial Engineering, Section 1-22-Q, Harrison, N. J.

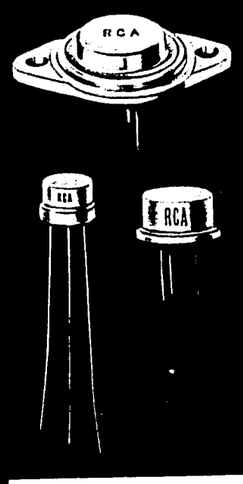
## Whatever your design needs

...INDUSTRIAL ...ENTERTAINMENT
...MILITARY ...COMPUTER



# specify RCA semiconductor products

**RCA FERRITES**
**...a comprehensive line of memory cores, switching cores, transfluxors, memory planes, and aperture plates for computer and data processing equipment. RCA's wide experience in the manufacture and application of ferrite materials can be of valuable help to you in your computer designs.**

**RCA MICROMODULES**
**...an important, new concept in electronic parts packaging makes possible electronic equipment having a parts density of 600,000 parts per cubic foot —resulting in a size reduction to 1/10 that of existing miniature equipment.**

**RCA TRANSISTORS**
**...RCA Transistors cover a wide range of applications from DC to VHF, for RF, IF, AF and switching functions in entertainment, industrial, military and computer applications. They are produced and controlled to meet the most critical performance requirements and have built an enviable record of electrical uniformity and long life.**

**RCA DIFFUSED-JUNCTION SILICON RECTIFIERS**
**...a wide range of types for entertainment, industrial and magnetic-amplifier service featuring rugged design, high-efficiency performance and electrical uniformity. Precision-controlled diffused-junction process provides high reliability. New types are constantly being added to this line.**

**AVAILABLE TOO THROUGH YOUR RCA DISTRIBUTOR**

## TECHNICAL DATA AND APPLICATION ASSISTANCE

For technical data on developmental Micromodules, or if you would like to have a specific circuit reduced to Micromodule design, please contact your Field Representative at the RCA Field Office nearest you. He will be glad to pass your design requirements on to our Application Engineers for their recommendations.

For technical data on RCA Semiconductor Products and Ferrite Cores, contact the RCA Field Office nearest you, or write for technical data to Commercial Engineering, Section I-22-NN, Somerville, N. J.

# RCA Announces Four New Silicon Mesa Power Transistors in the Popular TO-36 Case

**Available immediately in quantity...four new NPN Diffused-Junction Types... 2N1511, 2N1512, 2N1513, 2N1514 • electrically equivalent to 2N1487, 1488, 1489, 1490 respectively • utilize the industry-preferred JEDEC TO-36 single ended stud package with cold-weld seal • Designed for a wide variety of military and industrial applications**

With RCA's new Silicon Mesa Power Transistors in the JEDEC TO-36 case, you gain all of these design advantages:

- **More positive heat sink contact** and excellent high-temperature performance up to 175°C plus the greater application flexibility of JEDEC TO-36 stud mounted case.
- **Low saturation-resistance** characteristics with high collector-current and voltage ratings.
- **Wider application** in military and industrial equipment—in power switching circuits, oscillator, regulator and pulse-amplifier circuits.
- **The dependability** of the cold-weld seal, proved by RCA through years of experience.
- **Coordinated line of 16 RCA Silicon Power Transistors.** These four new RCA transistors together with the 12 RCA Silicon Power Transistors shown in the accompanying table provide the designer of Industrial and Military equipment with a comprehensive selection of types to fit his specific needs.

**ELECTRICAL CHARACTERISTICS**
Minimum and Maximum Values at Case Temperature = 25°C

| RCA Type | Min $V_{CEX}$ volts | Min $V_{CEO}$ volts | Max $I_C$ amps | Max $I_{CBO}$ (at) | Max Saturation Resistance ohms | $h_{FE}$ | Max. Dissipation Watts 25°C Case | Max. Dissipation Watts 100°C Case |
|---|---|---|---|---|---|---|---|---|
| | | | | $V_{CB}$ = 30v | $I_C$ = 1.5 amps | $I_C$ = 1.5 amps | | |

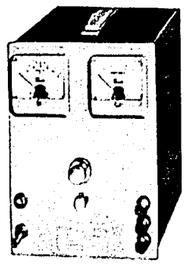
# HLAB

# regulated transistorized power supplies

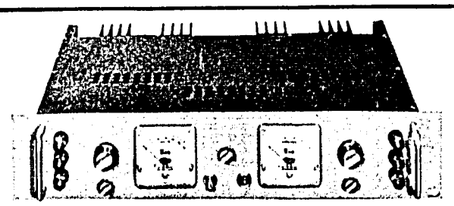
800A-2 $580.00



### TWIN SUPPLY — BENCH MODEL

DUAL 0-36 VOLTS @ 0-1.5 AMPS
LOAD REGULATION: Less than 5 millivolts
LINE REGULATION: Less than 5 millivolts
RIPPLE AND NOISE: Less than 200 microvolts
SIZE: 7" W x 9" H x 10½" D

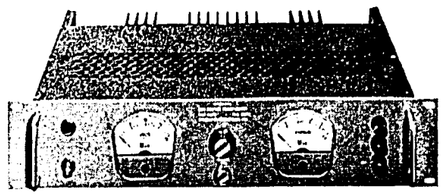
FEATURES: Two sides may be connected in series for 0-72 volts @ 0-1.5 amps. 10½" high panels for rack mounting one or two units available.



### 2.5 AMP BENCH SUPPLY

0-36 VOLTS @ 0-2.5 AMPS
LOAD REGULATION: Less than 10 millivolts
LINE REGULATION: Less than 5 millivolts
RIPPLE AND NOISE: Less than 250 microvolts
SIZE: 7" W x 9" H x 10½" D

800B-2 $339.00

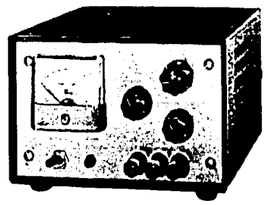


FEATURES: Inexpensive precision laboratory type supply of medium current capability. 10½" panels for rack mounting one or two units available.

802B $580.00

### TWIN SUPPLY — RACK MODEL

DUAL 0-36 VOLTS @ 0-1.5 AMPS
LOAD REGULATION: Less than 5 millivolts
LINE REGULATION: Less than 5 millivolts
RIPPLE AND NOISE: Less than 200 microvolts
SIZE: 3½" H x 15" D x 19" W
FEATURES: Two sides may be connected in series for 0-72 volts @ 0-1.5 amps. Output terminals on both front and rear of supply.

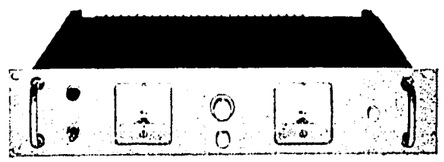


806AM (with meters) $350.00

### PROGRAMMABLE SUPPLY

0-20 VOLTS @ 0-2 AMPS
LOAD REGULATION: Less than 3 millivolts
LINE REGULATION: Less than 3 millivolts
RIPPLE AND NOISE: Less than 200 microvolts
SIZE: 3½" H x 15" D x 19" W
FEATURES: Output terminals on both front and rear of supply. Remote programming. Remote sensing.

### COMPACT BENCH SUPPLIES



855: 0-18 VOLTS @ 0-1.5 AMPS
865: 0-40 VOLTS @ 0-0.5 AMPS
LOAD REGULATION: Less than 5 millivolts
LINE REGULATION: Less than 5 millivolts
RIPPLE AND NOISE: Less than 500 microvolts
SIZE: 8" W x 5 1/16" H x 8" (mounted in case)

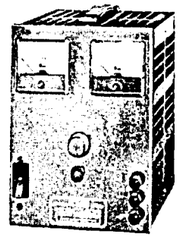
| | |
|---|---|
| 855 (without case) | $163.00 |
| 865 (without case) | $173.00 |
| C-855/865 (case) | $ 12.00 |

FEATURES: Switch enables meter to monitor output voltage or current. Remote programming. 865 overload protection circuit features adjustable current limit. 5¼" high rack mounting panels available.

CAN BE OPERATED IN SERIES OR PARALLEL

808A $425.00

### NEW GENERAL PURPOSE SUPPLY

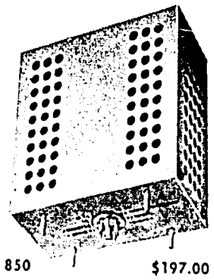


0-36 VOLTS @ 0-5.0 AMPS
LOAD REGULATION: Less than 10 millivolts
LINE REGULATION: Less than 5 millivolts
RIPPLE AND NOISE: Less than 1 millivolt
SIZE: 3½" High x 15" Deep x 19" Wide (Rack Mounting)
FEATURES: Continuously variable output voltage; adjustable current limit set by front panel knob. Output terminals on rear of supply. Remote programming. Remote sensing.

For details, circle #58 on Reader Service Card

- CONSERVATIVELY DESIGNED — BUILT-IN RELIABILITY
- FULL OVERLOAD PROTECTION — SHORT CIRCUIT PROOF
- LOW IMPEDANCE AT ALL FREQUENCIES
- 50-100 MICROSECOND RECOVERY TIME
- ALL SUPPLIES FLOATING — GROUND EITHER SIDE
- ALL TRANSISTORIZED — NO TUBES
- GLASS-EPOXY PRINTED CIRCUIT BOARDS
- COMPUTER-QUALITY ELECTROLYTIC
- 3 WIRE POWER CORD ON ALL UNITS
- ONE YEAR WARRANTY

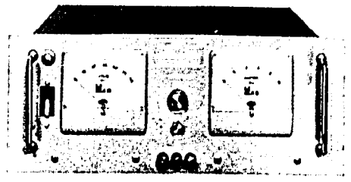
880 $375.00



### 0-100 VOLT BENCH SUPPLY

0-100 VOLTS @ 0-1 AMP
LOAD REGULATION: .01% or 5 millivolts
LINE REGULATION: .02% or 5 millivolts
RIPPLE AND NOISE: Less than 1 millivolt
SIZE: 7" W x 9" H x 10½" D

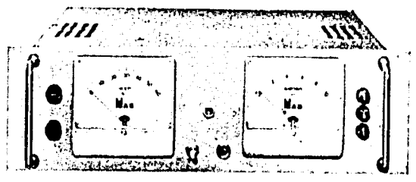
FEATURES: Continuously variable output voltage — no range switching. 10½" high panels for rack mounting one or two units available.



### CHASSIS MOUNTING SUPPLIES

850: 0-15 VOLTS @ 0-1.0 AMPS
860: 0-36 VOLTS @ 0-0.5 AMPS
LOAD REGULATION: Less than 3 millivolts
LINE REGULATION: Less than 3 millivolts
RIPPLE AND NOISE: Less than 500 microvolts
SIZE: 6½" L x 3" W x 6" H

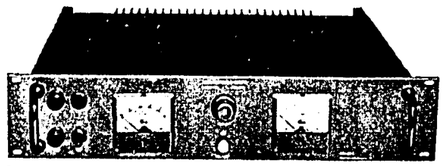
| | |
|---|---|
| 850 | $197.00 |
| 860 | $197.00 |



FEATURES: All connections made to octal plug shown in photograph. Remote programming. Remote sensing. 3½" high panels for rack mounting available.

810A $895.00

### VARIABLE HIGH CURRENT SUPPLY



0-50 VOLTS @ 0-7.5 AMPS
LOAD REGULATION: Less than 10 millivolts
LINE REGULATION: Less than 5 millivolts
RIPPLE AND NOISE: Less than 1 millivolt
SIZE: 7" H x 17" D x 19" W
FEATURES: Continuously variable output voltage. Output terminals on both front and rear of supply. Remote sensing.

812C $550.00

### FIXED* VOLTAGE HIGH CURRENT SUPPLY

SELECTABLE 0-32 VOLTS @ 0-10 AMPS
LOAD REGULATION: Less than 0.02 volts
LINE REGULATION: Less than 0.01 volts
RIPPLE AND NOISE: Less than 1 millivolt
SIZE: 5¼" H x 16" D x 19" W
FEATURES: *Output voltage is variable over narrow range about some nominal value; range is easily changed to meet new requirements. Front and rear terminals. Remote sensing. Marginal checking provision available.

890A $595.00

### 300 VOLT TRANSISTORIZED POWER SUPPLY

0-300 VOLTS @ 0-600 MILLIAMPERES
LOAD REGULATION: 0.001% (from no load to full load)
LINE REGULATION: 0.001% (from 105 to 125 VAC)
RIPPLE AND NOISE: 0.005%
SIZE: 3½" High x 15" Deep x 19" Wide (Rack Mounting)
FEATURES: Output voltage continuously variable. All semiconductorized — no tubes. Remote sensing. Remote programming.

(Above data is tentative; production quantities of 890A and other 300 volt transistorized supplies of higher current rating will be available during the fourth quarter of 1960.)

801B $115.00

### STRAIN GAGE POWER SUPPLY

0-15 VOLTS @ 0-200 MILLIAMPERES
LOAD REGULATION: Less than 5 millivolts
LINE REGULATION: Less than 5 millivolts
RIPPLE AND NOISE: Less than 100 microvolts
SIZE: 4 15/16" H x 11½" D x 1 13/16" W
FEATURES: Nine modules can be mounted on a 5¼" high relay rack panel. Insulation resistance greater than 10,000 megohms. Low capacity to ground insured by triple-shielded transformer; one shield surrounding entire supply is brought out for external guard ring connection.

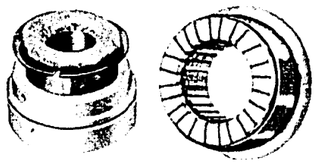
*Design, Development*

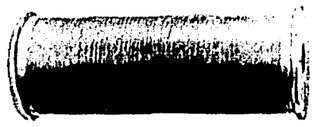
# Celco DEFLECTION YOKES TRANSFORMERS



## For...Military and Commercial Avionics

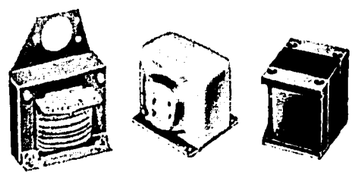
**Leading system manufacturers now depend on CELCO for their difficult and critical applications on many of these components.**

**Our design development, production and quality control experience – combined with CELCO's highly skilled operators, production foremen and engineers – comprises a team that has proven their outstanding performance for quality components.**

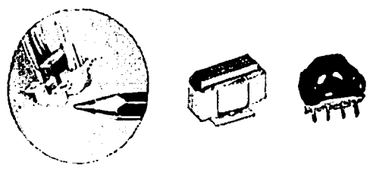


**Apply the CELCO "know-how" to your production requirements!**

**Celco** We specialize in the design and manufacture of **PRECISION DEFLECTION YOKES** for military and commercial applications.
CELCO can give you immediate engineering evaluation on your critical display problems.

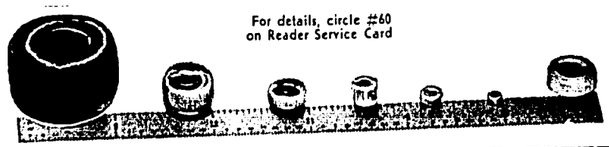


**Celco** **COILS FOR TRAVELING WAVE TUBES –** precision wound for minimum transverse magnetic fields. High temperature windings are a CELCO engineering development –



Unit illustrated is 12" long.

**Celco** **HIGH TEMPERATURE TRANSFORMERS–** high temperature windings and impregnations on CELCO TRANSFORMERS permit high operating temperature with reduced size and weight.



**Celco** **MINIATURE TRANSFORMERS & SATURABLE REACTORS –** specially produced for the Transistor and Plug-in type amplifier assembly. CELCO designs these units wherever reduction in size and weight must be made.

**Celco** **TOROIDAL COILS –** CELCO is equipped to cover an extremely wide range of toroidal windings.

**No. 50 wire on a .062" ID Toroid**
**No. 15 wire on 9" OD Toroid**

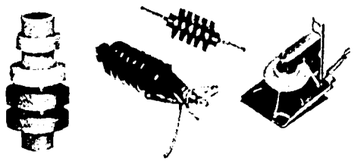
*and Production of:*

# MAGNETIC AMPLIFIERS AIRCRAFT MOTOR COMPONENTS

## ...Nuclear and Computer Industries

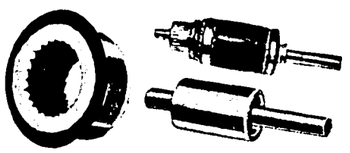
**Celco** **MAGNETIC AMPLIFIERS**–encapsulated with epoxy resins or silicone rubber. CELCO experience with proper treatment of Toroidal Coils assures designed performance.

**Celco** **TOROIDAL COMPONENTS –** for use in system assemblies. Sub-assemblies of chokes, Transformers and Saturable Reactors are manufactured at CELCO for packaging into a single unit.



**Celco** **PRECISION TRANSFORMERS –** CELCO develops Precision Transformers for such applications as Computer Components with high accuracy of turns ratio and output voltages.

**Celco** **HERMETICALLY SEALED MAGNETIC AMPLIFIERS & TRANSFORMERS –** with various types of terminations, evacution and inert gas pressurization give CELCO components minimum weight with high-breakdown voltage resistance.



**Celco** **R.F. CHOKES, TRANSFORMERS–** specialized universal winding types of coils and assemblies. These CELCO windings are used when minimum distributed capacitance is required and space does not permit use of mechanical supports.

**Celco** **MOTOR COMPONENTS–**Centrifugally cast squirrel cage rotors for low inertia motors, armatures, stators, field coils and special type rotor coils – are a CELCO production specialty.

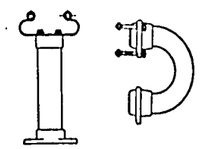
# Lapp

## TUBE SUPPORTS
### for air-cooled tubes

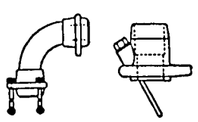
No longer is it necessary for equipment manufacturers to design supports for forced-air-cooled tubes. After producing many such special designs, Lapp has engineered and built a complete series of insulating supports for air-cooled tubes. Use of these supports facilitates design of transmitter and other high-power circuits. Simple, compact, efficient and attractive in appearance, in porcelain or steatite, they make for economical production, easy interchangeability, and availability of replacement units. Write for Bulletin 301, with complete description and specification data.

For details, circle #62 on Reader Service Card

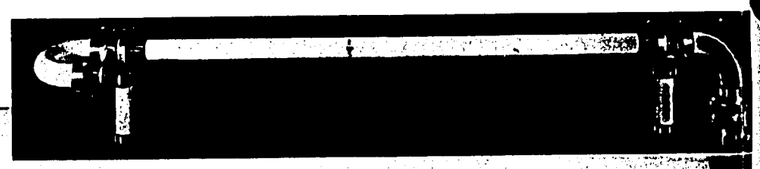


## INSULATION FOR WATER-COOLED SYSTEMS

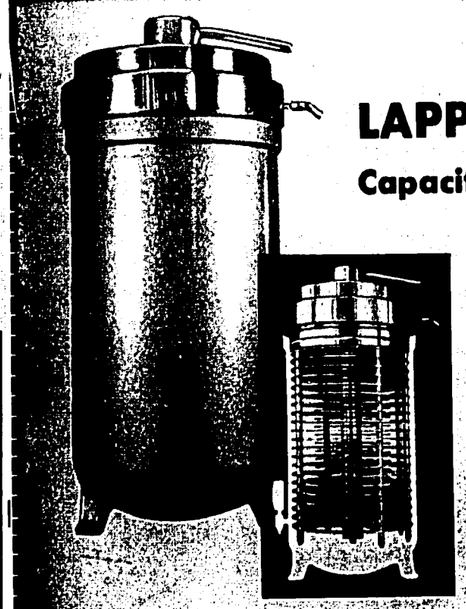
For carrying cooling water which must undergo a change in potential, use of Lapp porcelain eliminates troubles arising from water contamination and conductivity, sludging and electrolytic attack of fittings. Permanent cleanness and high resistance of cooling water is assured—for positive cooling and long tube life.



## LAPP PORCELAIN WATER COILS



Twin-hole and single-hole models in sizes to provide flow of cooling water from 2 to 90 gallons per minute. Cast aluminum mounting bases, lead pipe or flexible metal hose for attachment.

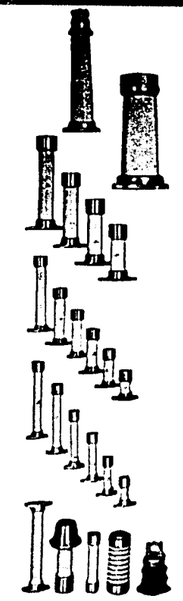


## LAPP PORCELAIN PIPE

Inside diameters ¾" to 3", in straight, 90° and 180° elbows, fittings. Swivel-type connections. Standoff insulators attach directly to fitting bolts. *Write for Bulletin 301 with specifications for Lapp Porcelain Water Coils and Porcelain Pipe.*

## LAPP GAS-FILLED CONDENSERS
### Capacitance for high-voltage, high-current duty

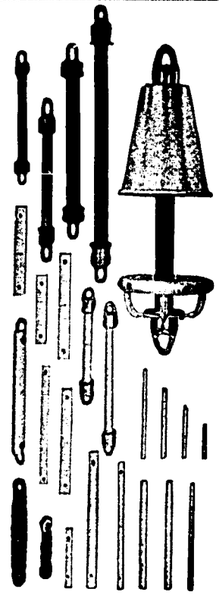
The record of more than 18 years' service, in thousands of installations, proves the reliability of the Lapp Gas-Filled Condenser. For duty at high voltages and high currents, this unit offers the advantages of extreme compactness . . . low loss . . . high safety factor . . . constant capacitance under temperature variation . . . grounded tuning shaft . . . and rugged sturdiness. Units available in four tank diameters, 7" to 18" . . . in fixed or variable capacitance . . . capacitances to 30,000 mmf; current ratings to 390 amps at 1 mc; voltages to 85 Kv peak. Write for Bulletin 302.



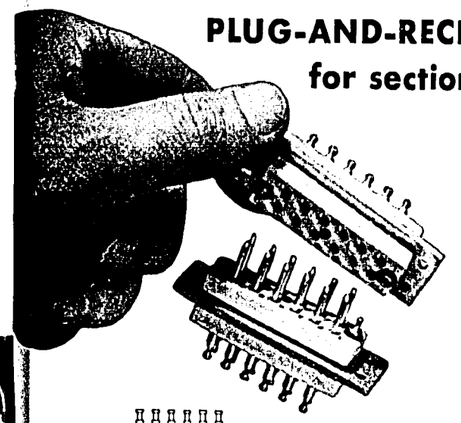
## ENTRANCE INSULATORS

To eliminate losses which occur in ordinary types of bushings at radio frequency, Lapp units use air as major insulation, porcelain path being lengthened by its "bowl" shape. In wide variety of types for most electrical and mechanical requirements.

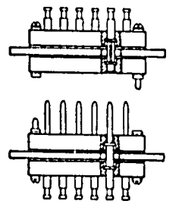
## STAND-OFF INSULATORS



Dependable mechanical and electrical performance—and trim good looks. Hundreds of standard and special types available.



*Write for Bulletin 301, listing entrance and stand-off insulators.*

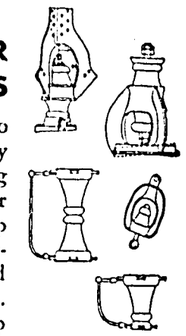


## ANTENNA STRAIN INSULATORS

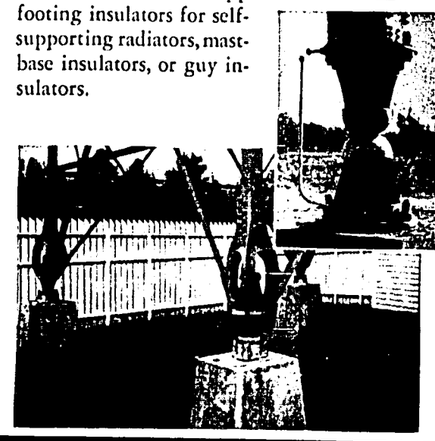
The largest of the porcelain rod insulators shown develops 12,000 lb. strength. Available, as specified, with rain shield and/or corona rings. Smaller units, in porcelain or steatite, for all strain or spreader use. Engineering and production facilities also available for special performance units See catalog 301.

## PLUG-AND-RECEPTACLE UNITS
### for sectionalizing circuits

For panel-rack or other sectionalized circuits, Lapp offers a variety of plug-and-receptacle units. Any number of contacts can be provided (in multiples of twelve). Male and female contacts are full floating, for easy alignment and positive contact. Contacts silver plated, terminals tinned for soldering. Insulation is steatite, the low-loss ceramic . . . non-carbonizing even under leakage flashover resulting from contamination, moisture or humidity. Write for complete electrical and mechanical specifications and recommendations.



For details, circle #63 on Reader Service Card



## SPECIAL ASSEMBLIES

Lapp business is electrical porcelain, its application, design, manufacture, and assembly. Our skill is in our knowledge of the capabilities, and limitations, of ceramic insulation . . . in engineering ingenuity to meet specified requirements . . . and in efficient production. If you have need for insulating parts and associated subassemblies, we may be able to show you how they can be made most economically, to perform most efficiently.

## ANTENNA TOWER INSULATORS

Most of the world's radio towers are supported by Lapp insulators, including the tallest guyed mast ever built. Through the Lapp "compression cone," immense loads can be carried by electrical porcelain. Write for data on Lapp footing insulators for self-supporting radiators, mast-base insulators, or guy insulators.

| | AVR | 0.002-0.025 | ††1 to 15 |
| | AMC | 0.210-0.280 | 0.300-0.345 |
|  **CLASS C** This compact relay combines unusual dependability and surprisingly long service life in a space about half of the size of the average relay of equal rating. Can be used for high-speed or delayed operation. | CQA | 0.005-0.035 | 0.005-0.025 |
| | CSA | 0.010-0.040 | 0.015-0.200 |
| | CMS | 0.010-0.035 | 0.010-0.050 |
|  **CLASS S** Specify this relay for aircraft use, where a small, light relay is required, resistant to shock and vibration. It features fast pulse response because of its small mass and slight self-inductance. Series SQPC available for printed circuits. | SQA | 0.002-0.016 | 0.005-0.085 |
| | SQD | 0.002-0.030 | 0.005-0.085 |
| | SQPC | 0.002-0.030 | 0.005-0.085 |
| | S-Power | 0.005-0.016 | 0.005-0.010 |
|  **CLASS Z** Choose Class Z relays where a small, light relay is needed but long life or time delay is of greater importance than extremely small size. Similar to Class A relay, but smaller and less sensitive. | ZQA | 0.002-0.025 | 0.005-0.025 |
| | ZSO | 0.010-0.050 | 0.050-0.150 |
| | ZSR | 0.003-0.010 | 0.050-0.200 |
| | ZSA | 0.010-0.040 | 0.050-0.200 |
| | ZMS | 0.010-0.040 | 0.005-0.200 |
| | ZFA | 0.010-0.025 | 0.008-0.020 |
| | Type 18 (Aircraft) | 0.002-0.025 | 0.005-0.025 |
|  **CLASS F** An a.c. relay, for use when the number of relays doesn't justify a rectifier, and when operate and release time delays are not a factor. When operate and release timing is required, an inexpensive rectifier can be used with any of the above d.c. relays. | FQA | 0.002-0.025 | 0.005-0.040 |
| | BFA | 0.010-0.025 | 0.008-0.020 |
| | EFA | 0.005-0.025 | 0.005-0.025 |
| | FMS | 0.002-0.020 | 0.002-0.020 |
| | FMC | 0.298-0.333 | 0.290-0.350 |
| | ZFA | 0.010-0.025 | 0.008-0.020 |
|  **POLARIZED** Series PHD and PLD offer "2-position" or "3-position" operation; Series PTW provides "2-position" only. "2-position" relays "stick" operated until current is reversed; "3-position" have neutral position in absence of current. | PLD | 0.003-0.010 | 0.022-0.047 |
| | PHD | 0.006-0.027 | 0.065-0.075 |
| | PTW**** | 0.007 Minimum | 0.0002 Approx. Travel Time |
|  **SPECIAL PURPOSE**—We can usually make assemblies of Automatic Electric relays with modifications to suit your special applications. The Class E Video relay, illustrated here, is an example. Others are designed for power applications, electro-mechanical interlocking, marginal operation, mechanical locking, micrometer adjusting, and the simultaneous closing of up to 35 circuits (BAR relay). | | | |

## AE STEPPING SWITCHES

### FAST STEPPING, SMOOTH RUNNING, POSITIVE STOPPING

**TYPE 44**

The Type 44 is a small switch with a large, flexible capacity. Use this switch in almost any d.c. application—for impulse controlled response or self-interrupted operation. Though it's only slightly larger than a pack of king-size cigarettes, the Type 44 rotary stepping switch accommodates up to six 10-point bank levels.

**TYPE 45**

In every feature of its design, the Type 45 rotary stepping switch provides for adaptation to varied requirements, including a.c. operation. The one-piece, open-type flat frame occupies only one side of this switch, so the 25-point contact banks can be built up level by level as needed, up to twelve.

**SERIES OCS RELAY**

Here's a shock-resistant relay which can be used for cam-switching...for alternate on-off operations...or as a "stepper." When you order Automatic Electric's OCS relay, you specify the programming. This compact unit simplifies engineering and wiring—cuts space, weight and maintenance costs.

*More contacts can be used at a sacrifice of speed.
**Up to 0.600 sec. release time on BSO relay with 6 springs max.
***With 1 snap-action switch and 1 contact assembly (8 springs max.)
****Octal or pin-type plug (to fit WE Co. 255 applications) available.
†Higher wattage obtainable with oversize coils.
††Timing value in conjunction with a Series ASO relay.
†††Most relays can be furnished with special heavy-duty contacts.

Automatic Electric, pioneer in the use of telephone-type relays for industry, has the experience, reputation, manufacturing facilities, research staff, and down-to-earth, practical "know how" to solve your knottiest control problem. We specialize in the hermetic sealing of relays and switches, as well as in the design, circuitry and assembly of industrial control "packages" and systems. Our representative and facilities are at your command.

# SWEEP GENERATORS

Telonic INDUSTRIES INC.

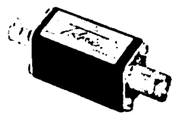
The ultimate check on RF circuit quality is frequency response. Telonic Sweep Generators permit accurate, rapid measurements of frequency response under both laboratory and production-line conditions.

A Telonic Sweep Generator scans the entire frequency range in a 60th of a second, replacing the tedious point-to-point testing normally required. At the same time, the amplitude of the swept signal is precisely controlled to produce a constant voltage input to the circuit under test.

The circuit output is normally demodulated and presented as a continuous oscilloscope trace. Precision attenuators allow quantitative measurements of the results. Internal and external markers provide automatic frequency calibration. Telonic Sweep Generators may be used to perform rapid frequency-response tests on filters, mixers, amplifiers, and a wide variety of other RF circuits.

## GENERAL SPECIFICATIONS

Flatness.....5%
Zero Base Line.....Oscillator off during return sweep
Sweep Rate.....Line frequency (50-60 cps)
Horizontal Sweep.....20 volts
Vernier Attenuation.....0-10 db.
Physical Description.....Panel—7/8" x 8¾" x 19"
Chassis — 2" x 14½" x 17"



Power.....115 v. 50/60 cycle, approx. 120 watts
Display Linearity.....Better than 1.2:1
Radiation.....Less than 10 microvolts
Source VSWR.....Below 1.3:1
Markers.....Birdy-By-Pass Marker System
Variable Markers.....Available on LD, LR, SD & ED Models

Model TA-50—$65.00

THE TELONIC MODEL TA-50 TURRET ATTENUATOR is a highly accurate, six-position unit providing 0, 10, 20, 30, 40 and 50 db attenuation of RF signals from DC to 900 mc and above.
Other Telonic Turret Attenuators are available that provide accurate attenuation in the 0-5, 0-10 and 0-25 db ranges.
BULLETIN No. T-212

Model XD-3—$35.00
Model XD-8—$45.00

Telonic RF Detectors are used whenever the circuit under test lacks "built-in" demodulation or "look" points. The Telonic RF Detectors are available in a wide range of impedance values. Model XD-3 is a 1-1250 mc detector generally recommended for use with the HD-1, HD-3 and SD Telonic Sweep Generators. Model XD-8 is recommended for use with the HD-4, HD-7 and LD Telonic Sweep Generators.

# RF FILTERS

Telonic ENGINEERING CORPORATION

MINIATURE LOW PASS — TLP Series
MINIATURE BAND PASS — TBP Series

TELONIC TLP-4 Miniature Low Pass Filters are available at any cut-off frequency from 200 to 2000 mc. in 5 mc increments. The filters feature an exceptionally rugged mechanical design, making them ideally suited to missile and other military applications. At the same time, the inherent simplicity of the units makes them appropriate for general laboratory and commercial uses where low-cost, dependable performance is a prerequisite.

**TYPICAL SPECIFICATIONS FOR A 4-SECTION LOW PASS FILTER**

CUTOFF FREQUENCY.....200-2000 mc., measured at point where insertion loss equals 1.5 db.
PASS BAND ATTENUATION.....Less than 1.5 db
STOP BAND ATTENUATION.....Over 50 db. at 1.65 xFco. and above; over 30 db. at 1.4xFco.
PASS BAND VSWR.....Less than 1.5:1
IMPEDENCE.....50 ohms
MAXIMUM POWER INPUT.....Over 15 watts
CONNECTORS.....Type BNC (Standard
MATERIAL.....German Silver
WEIGHT.....Approximate 5 ounces

**HOW TO SPECIFY TELONIC FILTER**

Filter model numbers indicate type of filters, cut-off frequency, number of sections, and type of connectors.

EXAMPLE:

TLP — Telonic Low-Pass Filter
275 — 275 mc cut-off frequency
4 AB — Connectors; Number of sections

TLP low pass filters $75.00 down to $22.00 depending on type and quantity

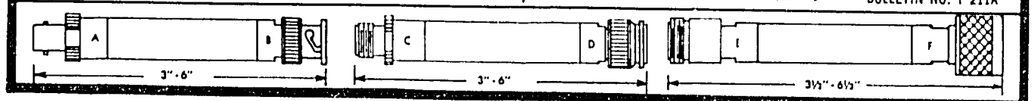
BULLETIN NO. T 211A

TELONIC TBP BAND PASS FILTERS cover the frequency range from 200 mc to 2000 mc. Bandpass may be set at any value between 2.5% and 25%. The number of sections may be varied from 2 to 4, depending upon the bandpass and rejection requirements. The electrical performance of the filters corresponds to resonant cavities or tank circuits having unloaded Q's of over 200. The D.C. resistance of the filters is essentially infinite both to ground and from input to output.

**TYPICAL SPECIFICATIONS FOR A 4-SECTION BAND PASS FILTER**

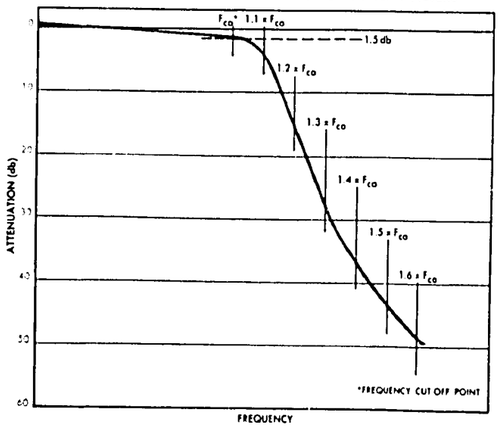
CENTER FREQUENCY.....200-2000 mc.
PASS BAND WIDTH.....2.5-25%
PASS BAND ATTENUATION.....0.5DB ±.2 db per section at 3% B.W. — 0.2 ±.1 per section at 12.5% B.W.
PASS BAND VSWR.....Less than 1.5:1
IMPEDANCE.....50 ohms
NOMINAL POWER INPUT.....Over 15 watts
CONNECTORS.....Type BNC, TNC or N
MATERIAL.....18% Silver Nickel
WEIGHT.....Approximately 5 ounces

**HOW TO SPECIFY TELONIC FILTER**



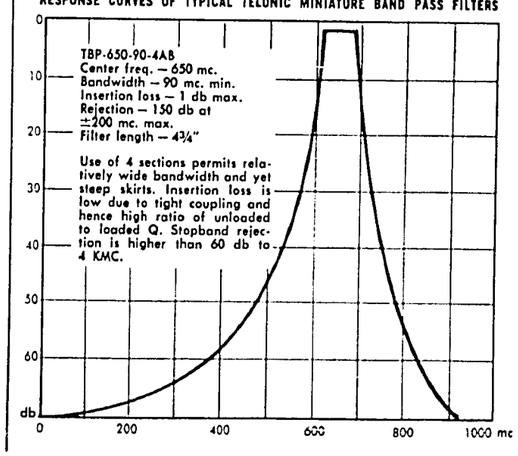
Filter model numbers indicate type of filters, center frequency, bandwidth, number of sections, and type of connectors.

EXAMPLE:



TBP — Telonic Band Pass Filter
275 — Center Frequency — 275 mc
10 — Bandwidth
4 AB — Connectors; Number of Sections

TBP band pass filters $125.00 down to $30.00 depending on type and quantity



BULLETIN NO. T 211A

# Specify "ARNOLD"

## for your PERMANENT MAGNET requirements

Typical group of Arnold permanent magnets, both cast and sintered types.

Typical group of permanent magnet assemblies, aluminum jacketed.

## ALNICO MAGNETS

Arnold permanent magnets are available in all types of Alnico material, in sizes ranging from large castings weighing over 80 pounds to very small sintered parts weighing less than one gram.

Alnico V can usually be depended upon to deliver the greatest energy product to the magnetic circuit per unit weight of magnet material. It is therefore generally the first choice for a magnetic material except where special physical considerations are paramount.

Special assemblies such as rotors, traveling wave tube magnets, magnetron magnets, etc. may be supplied in an aluminum jacket to facilitate mounting and supply an added protection to the magnet.

Large magnet assemblies may also be supplied for mass spectrometer and other measuring applications where a high degree of stability and uniformity of field is required.

Many sizes and types of Alnico magnets are carried in stock for immediate delivery. For more information, *write for Bulletin GC-106C.*

## SPECIAL PERMANENT MAGNET MATERIALS

### ARNOX III

Arnox III is a molded-type magnet having high coercive force and moderately low residual induction and energy product. Principal uses are for magnetic requirements which are not stringent, and for a relatively short magnet of reasonable cross section. Accurate dimensions and close tolerances can be economically obtained. These magnets can be premagnetized before assembly, and have very high resistance to demagnetization. Slightly better magnetic properties are obtained in the pressing direction than in other directions.

### ARNOX V

Arnox V is a ceramic permanent magnet material composed of highly oriented barium ferrite. It has many times the energy product of Arnox III and is comparable in many applications to Alnico V. Because of its high coercive force, its use is recommended in applications where a short magnetic length is desirable or where extremely high demagnetizing forces may be encountered. In many applications, it may be magnetized prior to assembly.

### VICALLOY

Vicalloy is a carbon-free permanent magnet alloy containing about 10% vanadium, 50% cobalt and the balance iron.

Vicalloy may be fabricated in the form of castings, hot rolled bars and forgings, or cold rolled strip, wire and tubing. After suitable heat treatment, the material is quite readily machinable. Vicalloy is available on special order in bar, strip and thin tape for recording purposes. *For more information, write for "The Magneteer," Vol. 2, No. 1.*

### CUNIFE

Cunife is a permanent magnet alloy of copper, nickel and iron which is malleable, ductile and machinable, after final heat treatment. The magnetic properties of Cunife are developed by cold working and are directional, with the best magnetic properties found only in the smaller sizes of rods or wires.

## for your MAGNETIC CORE requirements

Top to bottom: Tape wound cores, Silectron C, E and O cores, and bobbin cores.

Top to bottom: Mo-Permalloy powder cores, iron powder cores, and Sendust cores.

**SILECTRON C-CORES, E-CORES and TOROIDS** Arnold C and E cores are made from precision-rolled Silectron strip in 1, 2, 4 and 12 mil thicknesses.

They are supplied in a wide variety of shapes, and in sizes from a fraction of an ounce to several hundred pounds. In addition to standard transformer applications, they may also be supplied for special applications such as saturable reactors, instrument transformers and pulse transformers.

Over 1,000 stock cores are listed in the Arnold Silectron catalog. A wide selection of preferred sizes are carried in stock for immediate shipment. For complete data on C and E cores and Silectron toroids, *write for Bulletin SC-107A.*

**TAPE WOUND CORES of High Permeability Materials** Arnold tape wound cores are available made of Deltamax, 4-79 Mo-Permalloy, Supermalloy, Mumetal, 4750 Electrical Metal, Silectron, or the new rectangular-loop material, Supermendur. All except Supermendur cores are available in standard tape thicknesses of 1, 2 and 4 mils; also in special tape thicknesses of ½ mil, 12 mil or other, as required or feasible. Supermendur is presently available in 4 mil cores.

Toroidal cores are made in 30 standard sizes with protective nylon or aluminum cases. Special sizes of toroidal cores are produced to individual requirements. *Write for Bulletin TC-101A.* (*TC-113A for Supermendur Cores.*)

**BOBBIN CORES** Arnold bobbin cores are available in a wide range of sizes, tape thicknesses, widths and number of wraps to suit the ultimate use of the core in electronic computer assemblies. Magnetic materials usually employed are Deltamax and Square Permalloy in standard thicknesses of 1, ½, ¼ and ⅛ mil. Bobbins are supplied in ceramic or stainless steel. *Write for Bulletin TC-108A.*

**MO-PERMALLOY POWDER CORES** Available in a wide range of sizes, from .260" OD to 5.218" OD. They are given various types of enamel and varnish finishes, some of which permit winding with heavy Formex insulated wire without supplementary insulation over the core.

These powder cores are supplied in four standard permeabilities: 125, 60, 26 and 14 Mu. They provide constant permeability over a wide range of flux density, and in many cases may be furnished stabilized to provide essentially constant permeability over a specific temperature range. Large warehouse stocks of preferred sizes are carried for immediate shipment. *Write for Bulletin PC-104C.*

**IRON POWDER CORES** A wide selection of cores is available, from simple cylinders to special cores of complicated design. The line includes all standard types of threaded cores, cup, sleeve, slug and cylindrical insert cores: for use in antenna and RF coils, oscillator coils, IF coils, perm tuning, FM coils, television coils, noise filter coils, induction heating and bombarder coils, and other low frequency applications. Preferred sizes are carried in warehouse stock for quick shipment. A standard series of iron powder toroids is also manufactured, conforming to the standard sizes proposed by the Metal Powder Industries. *Write for Bulletin PC-109.*

**SENDUST POWDER CORES** Available in a wide selection of sizes, ranging from .800" OD to 3.346" OD, and in permeabilities of 10, 13, 25, 30, 50 and 80, although not all sizes are available in all permeabilities. They possess magnetic properties generally superior to iron powder cores, but inferior to Mo-Permalloy powder cores in the audio and carrier frequency range. *Write for Bulletin SDC-110.*

## SPECIAL MATERIALS

**2V PERMENDUR** . . . a ferromagnetic alloy of cobalt, vanadium and iron that possesses high flux density saturation properties. Its magnetostrictive properties are useful in many transducer applications. *Write for Bulletin EM-23.*

**VIBRALLOY** . . . a ferromagnetic alloy of nickel, molybdenum and iron whose temperature coefficient of elastic modulus is controllable over a wide range. It has high ferromagnetic permeability, and a rather high coefficient of magnetostriction. Used in applications where a zero or controlled thermo-elastic coefficient is desired.

**BARIUM TITANATE** . . . A piezoelectric ceramic widely used in accelerometers, phono pickups, microphones, ultrasonic grinding and cleaning devices and underwater signaling devices. For more information, *write for Bulletin CM-116.*

# TUNG-SOL

## TUNG-SOL/CHATHAM SPECIAL-PURPOSE TUBES

**VACUUM SWITCH**

Used in high-voltage test equipment and airborne radar units.

**Types available:** 1S22

**RECTIFIERS**

Used throughout industrial electronic equipment and broadcasting operations—AM, FM and TV.

**Types available:** 1Z2, 3B25, 3B28, 4B32, 5AT4, 5R4GY, 5R4WGA, 5R4WGB, 6H6WGT, 6X4W, 25Z6WGT, 26Z5W, 83, 583, 5517, 5726/6AL5W, 5726/6AL5W/6097, 5829WA, 3B29, 576A.

**VOLTAGE REFERENCE TUBES**

Used in radios and other electronic gear with regulated power supplies. Especially in high-accuracy units.

**Types available:** 5651, 5651WA. 5783, 5783WA, 5783WB.

**TELEPHONE TUBES**

Used in hand sets and carrier equipment.

**Types available:** 313C, 338A, 407A, 426A, 5842/417A, 5847/404A, 6028/408A.

**TWIN TRIODES**

Used widely in equipment handling frequencies from the audio level through the frequency band.

**Types available:** 5670, 5670WA, 6SU7GTY, 12AT7WA, 12AY7, 53, 6SC7GTY, 5687, 5687WA, 2C51, 6188/6SU7WGT, 5814, 5814WA, 5751, 5751WA, 6SN7WGTA, 6021.

**HYDROGEN THYRATRONS**

Used in radar modulators and missile tracking beacons. Miniatures in airborne units.

**Types available:** 1258, 5948, 5949, 7190, 7191, VC1257, 7192, 7240, 7454, 5948A, 5949A.

**VOLTAGE REGULATORS**

Used in Radio and other electronic equipment with regulated power supplies.

**Types available:** OB2WA, OB2, OC3W, OD3W, 6542, 6627/OB2WA, 6074, 7099.

**POWER PENTODES**

Used in public address systems, hi-fi amplifiers, radio transmitters and receivers.

**Types available:** 2E22, 3A4, 5A6, 6AR6, 6L6WGB, 5881, 26E6WGB, 6098/6AR6WA, 6146, 6550, 6883.

**THYRATRONS**

Used in power supplies, radio transmitters, motor controllers and spot welders.

**Types available:** 2A4G, 2D21W, 3C23, 6D4, 323B, 393A, 394A, 395A, 885, 2050W, 5594, 5696, 2D21, 2050, 5727/2D21W, 5643, 6012, 6901.

## * SPECIAL-PURPOSE TUBES
## * SEMICONDUCTORS
## * ENTERTAINMENT TUBES
## * LAMPS

**PENTODES**

Used in military and other communications equipment.

**Types available:** 1AD4, 6AJ5, 6AK5WB, 6AS6, 6AU6WA, 5636, 5636A, 5639, 5654/6AK5W, 5654/6AK5W/6096, 5672, 5678, 5725/6AS6W, 5725/6AS6W/6187, 5749/6BA6W, 5875.

**VHF TRIODES**

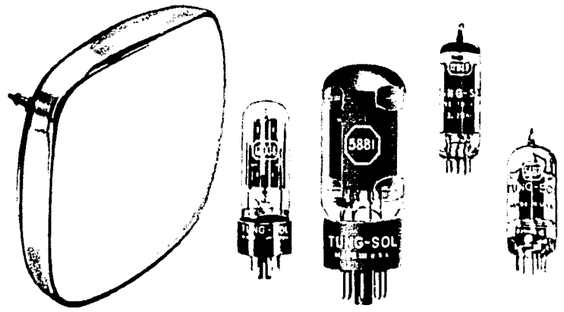
Used in military VHF radio and test equipment.

**Types available:** 5676

**POWER TRIODES**

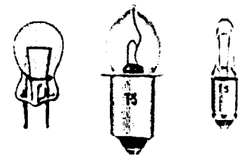
Used in high current regulated power supplies and radio and industrial gear with built-in power supplies.

**Types available:** 6AS7G, 5998, 6080, 6080WA, 6082, 6336, 6336A, 6394A, 6520, 7105, 6528, 7241, 7242.



**INDICATOR THYRATRONS**

Used in relay service wherever a small, lightweight, self-indicating tube is needed.



**Types available:** 7400, 7401, 7323.

## ENTERTAINMENT TUBES

**Tung-Sol Blue Chip** quality tubes are available for virtually every entertainment need — cathode ray, series-string, hybrid auto radio, TV, radio and hi-fi.

## LAMPS

Miniature incandescent lamps for all instrumentation applications up to 40 volts. Available in a wide variety of base configurations.

## SEMICONDUCTORS

## SILICON RECTIFIERS

Tung-Sol's select line assures the utmost in uniformity and electrical and mechanical stability. Ranging from 250 ma to 100 amps, these outstanding units operate with undiminished reliability over a −65 to +150°C case temperature range. Tung-Sol silicon rectifiers feature low forward voltage drop . . . low reverse leakage . . . low thermal resistance . . . and high surge handling ability. They are built with extra heavy ruggedness for rough-and-tough industrial and military applications . . . and are designed to meet the most rigorous military specifications.

U.S. Patent No. 2,922,093

Here is your ready reference to JFD Variable Trimmers and LC Tuners.
Detailed data sheets on any of these components selected from the extensive JFD line are yours for the asking. Our engineering staff is at your service for consultation on your particular application.

Write for samples, specifications and prices or complete file-size catalog.

Whether it is miniature variable trimmer piston capacitors . . . LC Tuners . . . Delay Lines . . . or Pulse Forming Networks . . . it pays to specify JFD Filters, or Diplexers.

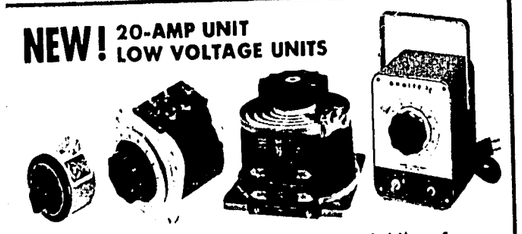
# OHMITE® THE QUALITY LINE OF

## write for

# INDUSTRY-PREFERRED COMPONENTS



## catalog and engineering manual 58

Long life and dependability are synonymous with the name Ohmite. When you specify Ohmite components . . . you build reliability into your product. This reliability is backed by Ohmite's continuing research programs which explore new product ideas, improve present products, and develop more efficient manufacturing processes. All this plus the fact that Ohmite is the world's leading specialist in the manufacture of power-type resistance components—high quality rheostats and wire-wound resistors in the most complete range of sizes and types available to industry. Reliability is also characteristic of Ohmite tap switches, precision wire-wound resistors, metal film resistors, general-purpose relays, variable transformers, subminiature tantalum capacitors, and R. F. chokes.

**RHEOSTATS** Complete range of vitreous-enameled, close control, power rheostats from 12½ to 1000 watts. Single or tandem. Many additional features. Also available to meet MIL-R-22A requirements. All sizes from stock in a wide range of resistance values including an enclosed 12½-watt rheostat.

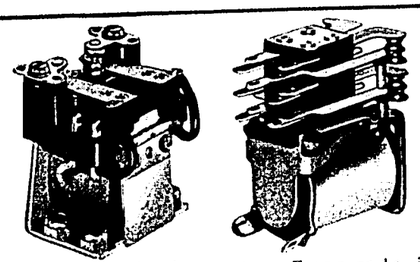
**NEW! 20-AMP UNIT LOW VOLTAGE UNITS**

**VARIABLE TRANSFORMERS** Newly expanded line of seven basic models with current ratings that meet a large percentage of industrial applications. Includes *enclosed units and tandem assemblies.* A sizeable "bonus" in current is given in all sizes when the overvoltage feature is not required ("N" suffix, see below).

**Advanced Features**— Positive current transfer achieved with direct brush to slip-ring, pigtail connection; table or panel mounting on Models VT4, VT8, and VT20 (adjustable shaft moves to brush or base side); interchangeable with other popular types both electrically and "mounting-wise"; rhodium plating on brush track for longer life.

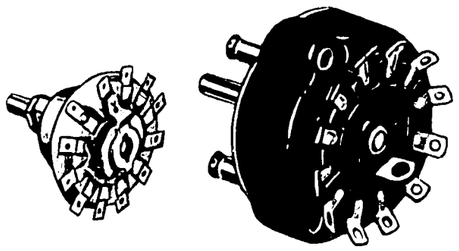
**Specials**— Various shaft lengths, auxiliary switches, taps on transformer winding, and motor drives.

**NEW Low Voltage Units** (no overvoltage)—Input, 36 volts or less. Output: VT2LN, 5 amp; VT4LN, 12 amp; VT8LN, 22 amp.



**Basic Models** with *Overvoltage*, 120 VAC input*

| OUTPUT | Model VT2 | Model VT4 | Model VT8 | Model VT20 |
|---|---|---|---|---|
| Volts | 0-120/132 | 0-120/140 | 0-120/140 | 0-120/140 |
| Amp | 1.5 | 3.5 | 7.5 | 20 |

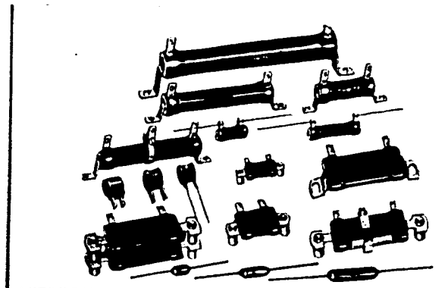


**Basic Models** *without* Overvoltage, 120 VAC input

| | | | | |
|---|---|---|---|---|
| Volts | 0-120 | 0-120 | 0-120 | ..... |
| Amp | 1.8 | 4.75 | 10.0 | ..... |

*Units supplied for 240-volt input also

**RELAYS** Compact relays in many types. For a.c. or d.c., in a wide range of contact combinations and coil voltages. Four stock models in 65 types. Also nine standard types promptly made to order. Available in hermetically sealed or dust-protective enclosures. Models TT and TS relays, with "molded module" contact springs, are designed to meet MIL-R-5757C and MIL-R-6106C respectively.



**TAP SWITCHES** Ceramic insulated, rotary selector switches for a-c use. High-current, silver-to-silver contacts. Single or tandem. Five sizes: 100, 50, 25, 15, and 10 amperes available from stock.

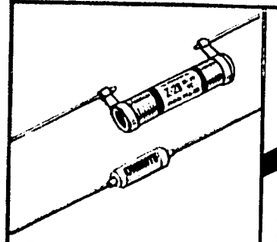
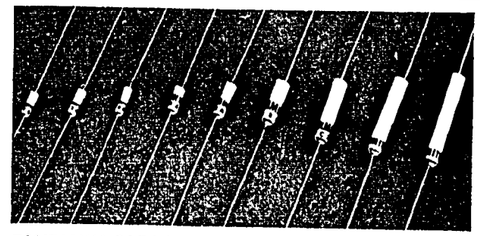
OHMITE® QUALITY Components



**VITREOUS-ENAMELED RESISTORS** Tremendous variety of types and sizes. Fixed, adjustable, tapped, noninductive, and precision resistors available in a wide range of wattages and resistances. Complete range of sizes and resistance values available from stock. Also available to meet MIL-R-26C requirements.

**MOLDED WIRE-WOUND PRECISION POWER RESISTORS** Insulated units with "Ohmicone" silicone-ceramic molded covering. Now available in 1-watt (2 physical sizes), 3, 5, 7, and 10-watt sizes. Tolerances: 0.1%, 0.25%, 0.5%, 1%, 3%. Maximum resistance: 1-watt, 4500 or 6500 ohms; 3-watt, 10,000 ohms; 5-watt, 25,000 ohms; 7-watt, 30,000 ohms; 10-watt, 51,100 ohms. Many 1% stock values selected from MIL Standard MS90169, MIL-R-10509 and Bell Telephone Laboratories.

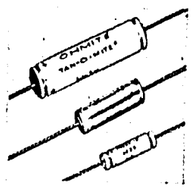
**METAL FILM PRECISION RESISTORS** Wattage ratings at 125°C and 150°C ambient; excellent high frequency characteristics; low temperature coefficient of resistance. Long-term load and shelf stability. Styles to meet MIL-R-10509C and MIL-R-19074B (Ships). Many 1% stock values selected from MIL Standard MS90169, MIL-R-10509 and Bell Tel. Labs.



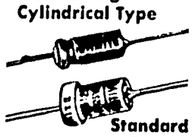
**R. F. CHOKES** Radio-frequency chokes in seven stock sizes for 3 to 520 megacycle applications. Single-layer wound. Other single-layer chokes and vitreous-enameled chokes can be made to order.

**GERMANIUM DIODES** Gold whisker wire welded to Germanium pellet. General-purpose and computer types (1 to 4 characteristics). Special computer type (10 characteristics). Hermetically sealed in glass. Stock and made-to-order.

For details, circle #79 on Reader Service Card



**TANTALUM CAPACITORS Series TW** (tantalum wire capacitors) available in thirteen subminiature sizes; .01 to 80 mfd. over-all capacitance range. Smallest size .060 x .150 inch; largest .134 x .812 inch. Insulated units standard. Working voltages to 150 volts. Wide range of stock sizes, capacitance values, and voltage ratings.



**Series TF** (tantalum foil capacitors) available in five sizes; .25 to 580 mfd. over-all capacitance range. Working voltage to 150 volts. For —55°C to +85°C operation. Available in polar and nonpolar units. Available for vibration ranges 0-55 and 0-2000 cps. Meets MIL-C-3965B. Styles CL-24, CL-34 and CL-25, CL-35. Wide range of stock units in polar type.

**Series TS** (tantalum, porous, slug type capacitors) available in three sizes; 1.75 to 330 mfd. over-all capacitance range. Working voltage to 125 volts. For —55°C to +85°C or —55°C to +125°C operation. Meet MIL-C-3965B, Grade 3 and Styles CL44, CL45. *New Style SUB, straight side type,* available for —55°C to +85°C operation. Many stock values.

**Etched and Plain Foil Types**

**New! Straight Cylindrical Type**

## PREFORMED CONTACT FINGER STOCK

A prepared strip of silver-plated spring material, slotted and formed into a series of fingers designed to make sliding contact.

| Single Edge | Width | U.S.A. Price per Pc. |
|---|---|---|
| CF-100 | 1/32" | $4.95 |
| CF-300 | 3/32" | 5.40 |
| CF-500 | 1 3/8" | 6.00 |
| CF-900 | 31/64" | 4.95 |
| **Double Edge** | **Width** | **U.S.A. Price per Ft.** |
| CF-200 | 13/64" | $6.30 |
| CF-400 | 1 17/32" | 7.65 |
| CF-600 | 2 1/4" | 8.85 |
| **Klystron Types** | **Width** | **U.S.A. Price per Ft.** |
| CF-700 | 17/32" | $5.70 |
| CF-800 | 13/32" x 7/16" | 5.55 |

Used as contact between klystrons and externally-tuned cavities. Available in 3-foot lengths only.

## PULSE MODULATORS

## HEAT DISSIPATING CONNECTORS

| Type | Hole Diameter | U.S.A. Price |
|---|---|---|
| HR-1 | .052 | $ .60 |
| HR-2 | .062 | .77 |
| HR-3 | .072 | .77 |
| HR-4 | .102 | .80 |
| HR-5 | .127 | .80 |
| HR-6 | .367 | .80 |
| HR-7 | .127 | 1.60 |
| HR-8 | .575 | 1.60 |
| HR-9 | .569 | 3.00 |
| HR-10 | .510 | 1.60 |

## TUBE EXTRACTOR

A spring-steel extractor for use with the 4X150 series, 4X250 series and 2C39 series tubes. SK-604 U.S.A. Price $ .57

## VACUUM SWITCHES

Single-pole double-throw switch within a high vacuum adaptable for high-voltage switching. Contact spacing .015". Switch will handle R-F potentials as high as 20 Kv. In D-C switching will handle approximately 1.5 Amps. at 5 Kv.

| Type | U.S.A. Price | Coils | U.S.A. Price |
|---|---|---|---|
| VS-2 | $23.93 | 12V | $10.29 |
| VS-4 | 29.00 | 24V | 10.29 |
| VS-5 | 38.55 | | |
| VS-6 | 34.25 | | |

## 100 IG IONIZATION GAUGE

For measuring pressures from $10^{-3}$ to less than $10^{-8}$ mm of mercury. U.S.A. Price $71.45

## HV-1 DIFFUSION PUMP

Triple-jet, air-cooled vacuum pump of the oil-diffusion type. Capable of reaching an ultimate vacuum of $4 \times 10^{-7}$ mm of mercury when used with suitable forepump. U.S.A. Price $292.50

## AIR SYSTEM SOCKETS

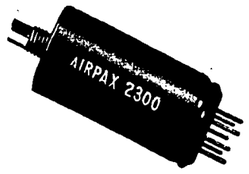
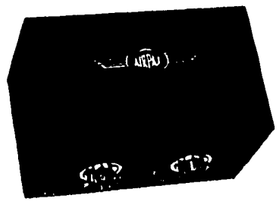
# AIRPAX ELECTRONICS
INCORPORATED

**Types 175 and 300.** The miniature choppers which set the standards for the chopper industry. Type 175 uses a 6.3 volt, 60 CPS drive; Type 300 requires a 6.3 volt, 400 CPS drive. Both are hermetically sealed, stable, long-life choppers.

**Types 6010 and 6025.** Transistor choppers. Type 6025 includes the drive transformer. It is encased in a miniature can with a 7 pin header. Drive for the 6010 may be as high as 100 KC; the type 6025 drive is 6.3 volts at 50 to 5000 CPS.



## Airpax produces CHOPPERS for every purpose

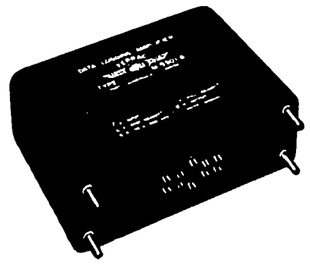


**Type 371.** For reliability under extreme conditions of shock and vibration Airpax provides a center pivoted type which functions during vibrations of 15 G amplitude, over a frequency range of 10 to 2500 CPS.

**Type 5600.** Designed for transistor drive. Drive coil is tapped at its electrical center and requires only 8.5 milliamperes of drive current from a 9 volt, 400 CPS source. Eliminates drive transformer.

**Type 2300.** This low noise chopper is ideal for use in null seeking servo systems, instrument amplifiers and applications where noise must be less than four microvolts, average. Drive is 6.3 volts, RMS at 400 CPS.

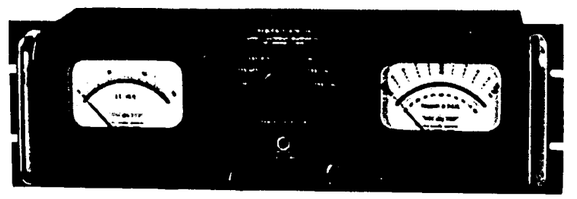
CUSTOM TRANSFORMERS. Airpax designs and manufactures custom transformers. The Fosterite facility at Cambridge is the largest in the country. Small size or large, bring your transformer requirements to Airpax.



Magnetic inverse time delay CIRCUIT BREAKER. Only slightly larger than an "ON-OFF" switch, this circuit breaker provides power control and positive circuit protection. Available in ratings from 50 ma. to 10 amps.

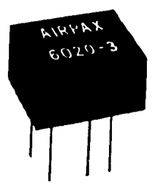
AIRPAX ELECTRONICS INCORPORATED
CAMBRIDGE, MARYLAND FORT LAUDERDALE, FLA.

CAMBRIDGE, MARYLAND — AIRPAX ELECTRONICS INCORPORATED — FORT LAUDERDALE, FLA.

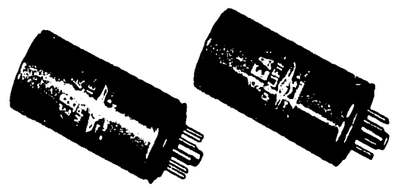


DATA LOGGING AMPLIFIER. A three-stage high accuracy, molded magnetic amplifier designed to deliver ± 5 volts at a linearity better than 0.1%. Voltage gains from 100 to 10,000 are obtainable in this differential type magnetic amplifier.

TACH-PAK. The Airpax TACH-PAK is a completely self-contained, highly sensitive unit which makes possible the accurate measurement (0.25%) of the speed of any rotating, reciprocating or oscillating shaft. Also available with AN plug type connector.



MAGMETER. Frequency to voltage converter. Output current is linear with input frequency. Operates servo and similar type recorders.



FREQUENCY MONITOR. For the precise measurement of 400 CPS power frequencies. Uses the frequency detecting characteristics of the Airpax MAGMETER.

PRINTED CIRCUIT COMPONENTS. Airpax meets the latest developments in advanced circuitry with miniature units. T–1968 is a miniature drive transformer for use with transistor choppers. Type 6020-3 is a transistor chopper.

FERRAC Magnetic Amplifiers. Available in plug-in or molded types. Faster response—wider dynamic range—higher gains.

PREAC. Airpax PREAC amplifiers, for 60 or 400 CPS operation, have power gains of over 50 db. Unit is hermetically sealed.

IN PRECISION DISPLAYS

# YOKES

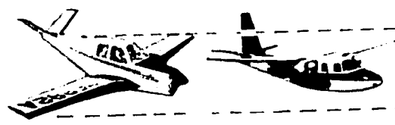
## YEARS AHEAD IN DESIGN PERFORMANCE!

### Celco YOKES FOR CHARACTER DISPLAYS & HIGH RESOLUTION APPLICATIONS

Deflection yokes for difficult character display and high resolution problems are another achievement in advanced design and engineering at Celco.

Celco Deflection Yokes permit rapid presentation of random character and alpha numeric displays. Low hysteresis, high accuracy and fast Recovery time with emphasis on spot approach to absolute zero, assures highest performance of magnetic deflection character displays.

Celco High Sensitivity Yokes minimize the deflecting currents required from the deflection drivers, resulting in high efficiency for your system.



For best utilization of the New High Resolution CRT's CELCO YOKES assure minimum defocusing at large deflections.

The construction of our yokes makes it possible to achieve **sensitivities, linearities, responses and distortion-free deflecting fields** not possible with the usual types of yoke.

*For critical applications, many of our customers have saved years of trial and error in YOKE selection by specifying CELCO YOKES.*

Write for CELCO DEFLECTION YOKE Catalogue & Design Sheets or for assistance Call your nearest CELCO Plant listed below.

### Celco FOR STANDARD, COMMERCIAL & MILITARY APPLICATIONS

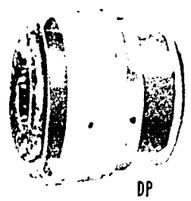
For details, circle #85 on Reader Service Card

Single units or production quantities immediately available in wide range of inductance–resistance–Recovery time–pin cushion corrected or optimum focus as required. Also available 2-1/8" and 2-1/2" neck CRT yokes.

**TYPE BY**
Transistorized encapsulated yokes for 0 7/8" neck CRT and 1" neck image storage tubes.

**TYPE AY**
Push pull or single ended yokes for 52, 70 and 90 deflections for 17 16" neck CRT.

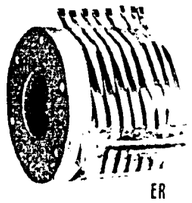
**TYPE RY**
Rotating deflection yokes for PPI displays. Gears, bearings, slip rings and contact assembly included.



**TYPE CF**
Electromagnetic focusing coil for 7/8", 1" and 17 16" neck CRT

**TYPE MY**
Miniature light weight deflection yoke coils or assemblies for incorporation into customer housings.

### Celco ENGINEERED YOKES FOR PRECISION DISPLAYS



**DP**
Dual purpose yoke custom designed. Deflection system plus axial off centering coils.

**HS**
Special high sensitivity deflection yoke with critical damping provisions.

**PI**
Plug in type encapsulated deflection yoke for rapid insertion.

**ER**
Encapsulated rotating, 4 axis slip ring precision deflection yoke

**MS**
Miniature deflection yoke for rotating or fixed coil radar system

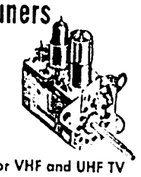
# before you freeze your design...call on OAK engineers!

**OAK "EARLY-BIRD" ENGINEERING HELPS YOU GET BETTER COMPONENTS . . . FASTER!**



By calling on Oak engineers early, you take full advantage of their 25 years of specialization in electro-mechanical devices. This intensive background enables them to save you costly re-engineering time. Even on seemingly simple components, Oak engineers have been able to make valuable suggestions that resulted in better performance and lower costs. Combine this thorough engineering with Oak's manufacturing skills and facilities, and you can feel assured of getting the *exact* component you need . . . and in a lot less time.

**appliance timers**

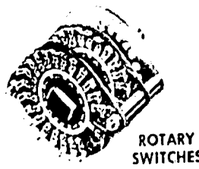
For automatic washers and dryers

**tuners**

For VHF and UHF TV receivers and radios

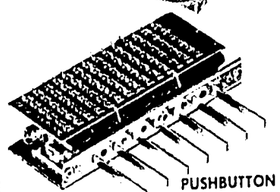
## ELECTRO-MECHANICAL COMPONENTS ENGINEERED AND MANUFACTURED TO YOUR EXACT REQUIREMENTS!

### low-current switches



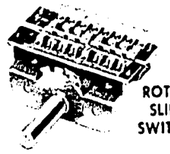
MINIATURE ROTARY TYPE A

Mounts in a 1" diameter circle



**NEW THUMBWHEEL SWITCH**

Provides in-line read-out of switch positions in a space-saving size



ROTARY SWITCHES

PUSHBUTTON SWITCHES

PRINTED CIRCUIT SWITCHES

ROTARY SLIDER SWITCHES

LEVER OPERATED SWITCHES

MULTIPLE SHAFT SWITCHES

***NEW!***
**STOCK ROTARY SWITCHES**

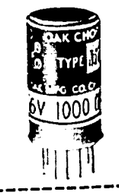
- 124 Sizes and Types
- Fully Assembled or as Subassemblies
- Phenolic and Steatite Grade Insulations
- 1 to 4 Sections, 2 to 23 Positions

*Write for Catalog 399 Today!*

### choppers

*smallest...lightest in its class*

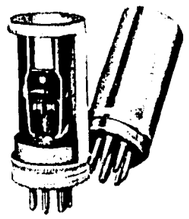
**Series M**
DC-AC
Low Level Inverter



Withstands 30 G vibrations from 0-500 cps and −55° to +100°C temperatures. Custom-built in an unusual variety of packages.

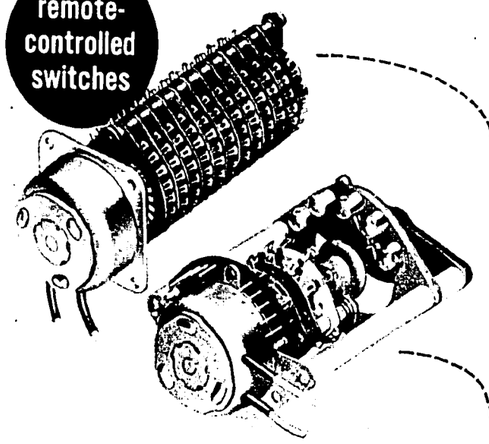
**Type 605 Chopper Eliminates Phase-Shift Circuit**

Has 0° (or 180°) phase-lag "designed-in." Available with side or vertical flange mounts, flattened pierced pins, solder loops, or standard socket pins.



**NC 600 Series of Oak Choppers**

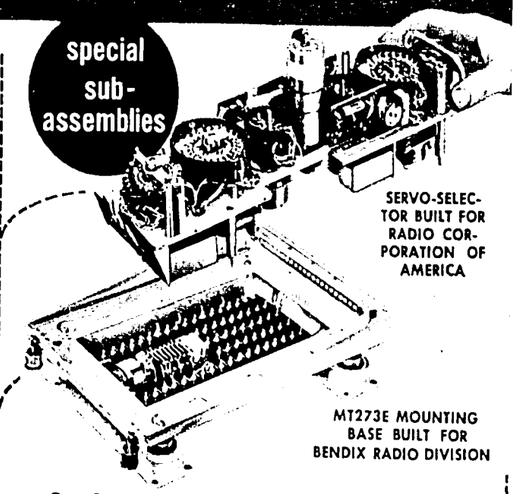
Available for frequencies from 15 to 600 cycles. Operates up to 125°C. High contact rating. Exceptional stability. Low voltage starting.



### VIBRATORS

**Custom-Designed and Custom-Built**

Basic Oak designs cover practically any application. The V6000 Series is a versatile, general purpose vibrator. Type 94 is designed primarily for auto radios. Type 95 is a small, medium power shunt drive interrupter. The MV Series is designed for portable radios and similar applications. All can be supplied for military needs.

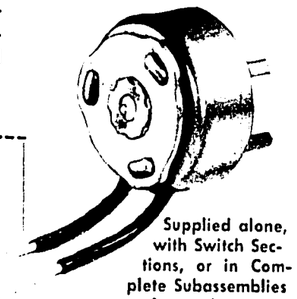


### remote-controlled switches

**Thousands of Combinations**

Oak remote-controlled switches are custom combinations of Oak rotary solenoids* and the many types of Oak rotary switches. They are unusually reliable, giving a positive stepping action even under conditions of shock and vibration. Ideal for mobile and military equipment.

### special sub-assemblies



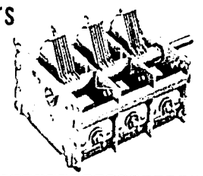
SERVO-SELECTOR BUILT FOR RADIO CORPORATION OF AMERICA

MT273E MOUNTING BASE BUILT FOR BENDIX RADIO DIVISION

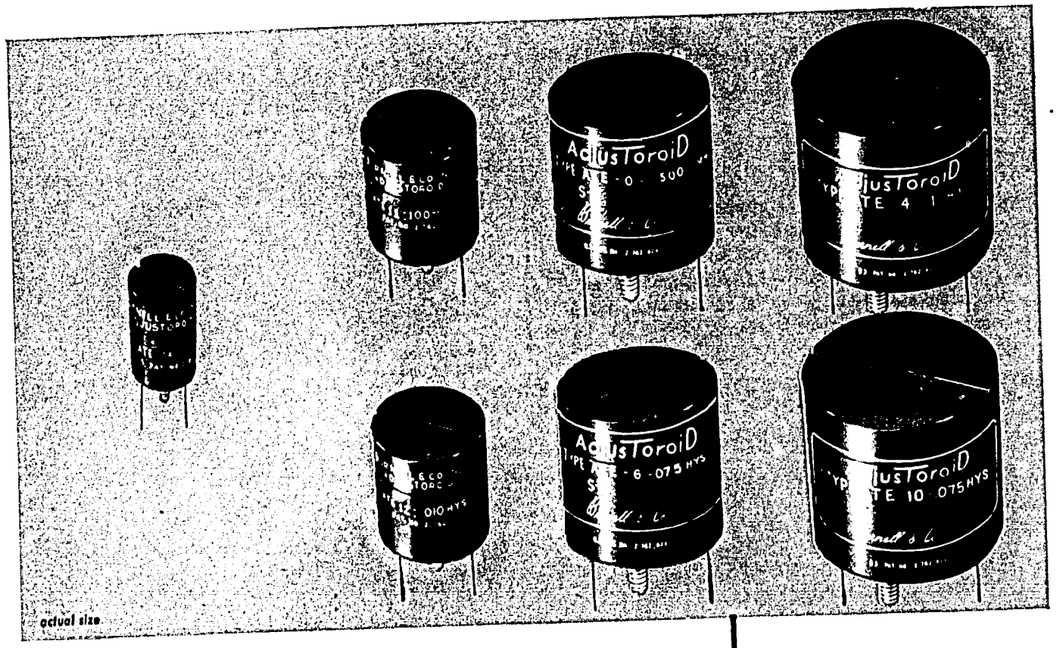
*One Responsibility . . . One Source*

Turn your prototype over to Oak engineers. They will analyze it, test it, redesign for optimum performance, and convert it into a manufacturable device. Oak's modern production facilities then build your subassembly, and run any life and environment tests which may be required.

### rotary solenoids*



Supplied alone, with Switch Sections, or in Complete Subassemblies as shown above.



Oak rotary solenoids are ideal actuators for remote control of complex circuits under the severe conditions of MIL-S-4040A and similar specifications. They are compact, rugged and extremely adaptable.

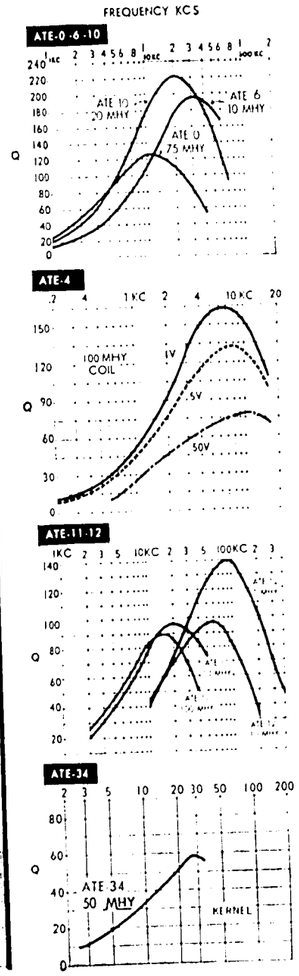
### quality variable capacitors

- Custom-built
- Up to 603 MMF max. capacity per section
- Five models including band spread and split stator units
- Meet MIL specifications

# NOW—Two important contributions to printed circuit design—



## The Microminiature Kernel ATE-34 Adjustoroid® and a New Line of Miniature Encapsulated Adjustoroids

Newest addition to the Burnell Adjustoroid line is the microminiature Kernel® ATE-34 and the miniature ATE-11, ATE-0 and ATE-4. One of the unique features of these new Adjustoroids is a flush slotted head providing for ease of adjustment and economy in height.

The new microminiature Kernel ATE-34 Adjustoroid and the miniature ATE-11, ATE-0 and ATE-4 are variable over a 10% range of their inductance. Fully encapsulated, they will withstand high acceleration, shock and vibration environments. All of the above meet MIL-T specifications, 27 Grade 4 Class R and MIL-E 15305 A. Write for Stock Sheet AT-34.

# TAMING OF THE SCREW

Newest additions to the Burnell Adjustoroid® line, the microminiaturized Kernel ATE 34 and the miniatures ATE 11, ATE 0, ATE 4, represent an important contribution to printed circuit design.

These new Adjustoroids possess the exclusive advantage of flush-slotted heads which serve to eliminate adjusting screws – provide maximum economy of height – insure ease of adjustment. Besides high Q, they also offer high stability of inductance versus dc.

The new microminiature Kernel ATE 34 and the miniature ATE 11, ATE 0 and ATE 4 Adjustoroids are variable over a 10% range of their inductance. Fully encapsulated, they will withstand high acceleration and vibration environments. These Adjustoroids meet specifications MIL-T 27 Grade 4, Class R and MIL-E 15305 A as well as MIL-E 5272 for humidity and thermal shock. Write for Adjustoroid Bulletin ATE-7.

**SEND NOW FOR HANDY 24" x 36" TOROIDAL INDUCTOR WALL REFERENCE CHART**

# DOUGLAS has it !

# DOUGLAS MICROWAVE CO., Inc.

**manufacturers of a complete variety of standard microwave test equipment and components,**

*is pleased to announce the addition of a new and complete line of*

# MACRO WAVE

TRADE MARK

## (LARGE WAVEGUIDE WR77 to WR2300) TEST EQUIPMENT and COMPONENTS

which include the following:

| | | | | |
|---|---|---|---|---|
| adapters | signal samplers | terminations | phase shifters | transitions |
| test horns | crystal detector mounts | loads | slotted lines | tuners |
| attenuators | | tees | switches | wave meters |
| bends | twists | | | |

These units will be supplied in the following EIA designated tubing sizes: WR77, WR975, WR1150, WR1500, WR1800, WR2100, WR2300.

*Meeting the challenge of tomorrow...*

## Spectra Electronics Corp.

a division of Douglas Microwave Co., Inc.

**Specialists in the fields of ultraviolet, visible and infrared systems with focus on creative engineering in:**

**• COMMUNICATIONS • TELEMETRY • SECURITY • COUNTERMEASURES**

**(1) VOLUME AND PERIMETER INTRUSION SYSTEMS** utilizing ultraviolet and infrared energy;

**(2) ULTRAVIOLET PULSED ENERGY SYSTEMS** for missile tracking, vehicle ranging, distance measurements and cloud-height measurements;

**(3) ULTRAVIOLET ENERGY DENSITY MEASURING AND MONITORING EQUIPMENT.**

**(4) NON-GYROSCOPIC PITCH AND ROLL STABILIZER.**

**Write for descriptive brochure without cost or obligation.**

**Spectra Electronics Corp.**
**250 East Third Street, Mount Vernon, N.Y.**

**Your inquiries** invited for design, development and production of MICROWAVE RADAR component parts and test equipment in the frequency range of 100 - 90,000 megacycles.

**WRITE TODAY** for your copy of the latest Douglas catalog featuring more than 1,500 standard microwave components -- more than any other source in the field.

## CRYSTALS

| SERIES | FREQUENCY RANGE | DESCRIPTION | BULLETIN |
|---|---|---|---|
| BH6 | 200 kc to 150 mc | Holder is equivalent to MIL Type HC-6 U. Can be supplied with all MIL Type crystal units, and for commercial requirements. Special models for high shock, temperature and vibration applications. Also available with wire leads. | No. 493 |
| BX | 5 mc to 125 mc | Holder is equivalent to MIL Type HC-18 U. Can be supplied with all MIL Type crystal units and for commercial requirements. Also available with plug-in pins. | No. 502 |
| BH9 | 2 kc to 200 kc | Holder is equivalent to MIL Type HC-13 U. Can be supplied with all MIL Type crystal units. Also available with wire leads. Special models for high shock, vibration and temperature applications. | No. 501 |
| BG6 | 3 mc to 100 mc | Glass mounted crystal unit has minimum ageing and high reliability. Also supplied with wire leads when part of BTC-2 crystal oven assembly. Special model BG61A-5 at 5 mc has maximum stability for time standards. | No. 496A<br>No. 505A<br>No. 519 |
| BG7 | 4 kc to 3 mc | Advanced design in all glass mounting for plug-in or with wire leads in Bliley TCO-11C oven assembly. Exceptional stability with low ageing and low resistance. | No. 503A |
| BG9 | 100 kc or 1000 kc | Glass mounted crystal unit developed for secondary standards. Has minimum ageing and high Q for stability. | 100kc-No. 492<br>1000kc-No. 491 |
| BG12 | 100 kc | Glass mounting for GT-cut crystals at 100 KC. Supplied with wire leads in TC97 oven assembly for primary standards. | No. 498 |

## ULTRASONIC DELAY LINES

Bliley ultrasonic delay lines for the range 2 to 4500 microseconds are custom engineered for each application. Exceptional performance characteristics such as low loss and attenuation of spurious responses result from a complete appreciation of the critical factors involved.

A new series of low loss short delay lines (2 to 50 microseconds) for carrier frequencies up to 30 mc utilizes barium titanate transducers. Loss levels of these lines, into terminations of 100 ohms, range from 6 db to 10 db compared to 35 db for quartz transducers. Bliley is completely equipped to design, produce and test ultrasonic delay lines for your application. Request Bulletins No. 48 and No. 513

## OVENS

| SERIES | HEATER VOLTAGE | DESCRIPTION | BULLETIN |
|---|---|---|---|
| TCO-14 | 6.3, 12.0, 26.5 or 115 | High stability (±1°C.) oven for use with Bliley crystal series BH6 or BH9 (MIL-Holders HC-6 U or HC-13 U) | No. 514 |
| TCO-141 | 6.3, 12.0 or 26.5 | Crystal and component oven with stability ±1.5°C. features snap-action thermostat for reliable performance and low circuit interference. For use with Bliley crystal series BH6 or BH9 (MIL-Holders HC-6 U or HC-13 U) | No. 515 |
| TC90 | 6.3, 18 or 115 | Precision crystal ovens for frequency standards. Single stage models hold ±1°C.; Dual stage models hold ±.25°C. | No. 500 |
| BTC-1 | 6.3 | An hermetically sealed crystal and oven subminiature plug-in package which maintains frequency ±3 ppm with ambient temperature variation from −55°C. to +70°C. Freq. range: 5 mc to 125 mc. | No. 494 |
| BTC-2 | 6.3 or 26.5 | An hermetically sealed plug-in package consisting of oven and glass mounted crystal for high reliability, high stability and low ageing. Freq. range: 4 kc to 125 mc. | No. 497 |
| BCO-10 | 12.6, 26.5 or 115 | A compact component oven providing temperature control for up to 10 diodes. Stability ±1°C. with ambient temperature −10° to +50°C. | No. 517 |
| BPCO-1 | 26.5 | High stability transistorized proportional controlled plug-in oven for crystals and components. Stability ±.01°C. from +10°C. to +50°C. For use with Bliley crystal series BG6, BG7 and BG9. | No. 518 |
| TCO-11C | 115 | Precision oven designed for use with Bliley BG6 and BG7 series glass mounted crystals. Temperature stability ±.1°C. | No. 508 |

## CRYSTAL FILTERS

Bliley filter networks are available in three standard designs with characteristics selected for general application as shown in the following tabulation:

| MODEL | FREQ. | BW-6db | BW-60db | FORM FACTOR | IMPEDANCE |
|---|---|---|---|---|---|
| BFN-5 | 5.0 mc | 3.5 kc | 12 kc | 3.5 | 1600 ohms |
| BFN-11 | 10.7 mc | 30.0 kc | 55 kc | 1.8 | 2700 ohms |
| BFN-13 | 13.0 mc | 30.0 kc | 55 kc | 1.8 | 1500 ohms |

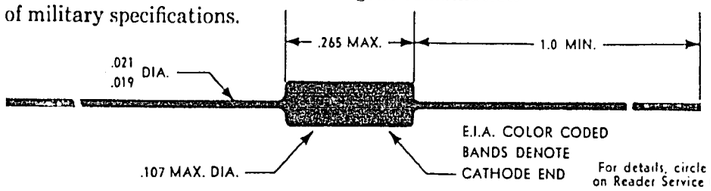
### CUSTOM ENGINEERED FILTERS

Bliley facilities are available for analysis, design and production of crystal filter networks for specialized applications over the range from 100 kc to 40 mc. Depending upon functional requirements, bandwidths from 50 cycles to 100 kc are attainable. With an unsurpassed background in the development and manufacture of quartz crystal resonators, Bliley is in a unique position to utilize modern crystal filter synthesis techniques in combination with special quartz resonators having low spurious response characteristics. Request Bulletin No. 509.

For details, circle #93 on Reader Service Card

## PACKAGED OSCILLATORS

The Bliley Model CCO-7 is an ultra-stable, packaged oscillator combining transistorized circuitry, temperature control and a precision quartz crystal at 1 mc, mounted in glass, for stability of 4 parts in 10 million.



For other frequencies, Bliley is prepared to quote on custom engineered designs necessary to meet application requirements. Bliley has extensive experience in packaged oscillators providing high stability performance in range 2 kc to 100 mc.

Request Bulletin 516 for detailed specifications on the 1 mc packaged oscillator.

**BLILEY ELECTRIC CO.** UNION STATION BUILDING **ERIE, PA.**

# RUGGEDIZED SILICON DIODES

All Rheem diodes are tested per MARK X master test specification for ruggedized silicon diodes.
MARK X tests exceed the most stringent combination of military specifications.

For details, circle #94 on Reader Service Card

*** Measured in Rheem millimicrosecond recovery circuit switched from +10mA to −5V
**** Measured in Rheem high current recovery circuit switched from +500mA to −50 V
† Tested at 125°C
†† Measured in 256 JAN circuit switched from +5mA to −40V
††† Measured in 256 JAN circuit switched from +30mA to −35V
‡ Tested at 150°C
‡‡ Measured in modified IBM "Y" circuit switched from +30mA to −35V

# SILICON MESA TRANSISTORS

Rheem transistors are tested to exceed the requirements of MIL-S-19500B. All are stabilized by storage at 300° C and by three temperature cycles from -65° C to 200° C.

For details, circle #95 on Reader Service Card

# MANSON SYSTEMS ENGINEERING IN MICRO-WAVE & POWER

Power Supply: 0-20 KV @ 4 amps Model #214

- **OUTPUT:** 0 to 20 kilovolts DC @ 4 amps
- **REGULATION:** 15% maximum from no load to full load
- **RIPPLE:** Less than 1% of full output voltage
- **DUTY:** Continuous
- **METERS:** DC output voltage and current; AC line voltage and current; HV transformer primary-coil voltage and current; rectifier filament voltage; elapsed time
- **CONTROLS:** Main power switch; overload trip control; control and filament power ON and OFF buttons; high voltage ON, OFF, RAISE and LOWER buttons; surge test standby and surge test buttons
- **FEATURES:** Overload relay removes high voltage when load exceeds any preset value from 200 to 5000 ma, continuously adjustable; over-voltage circuit removes high voltage when voltage exceeds any preset value from 10 to 25 kv, continuously adjustable; solenoid-operated automatic shorting circuit discharges high voltage to ground after equipment is de-energized; voltage control motor automatically re-cycles output voltage to zero on overload; interlock on HV control requires control to be at the minimum output position before high voltage can be applied; all switches may be operated from a remote control unit; design and layout of internal circuitry permits easy checking and servicing of all parts; easy access to inside from three sides; rugged console construction, welded angle-iron frame with ⅛" thick sheet screening and panels

**Power pulse applications from kilo- to megawatts...**
**according to your specifications, to suit your needs!**

Soft-Tube Modulator,
30-Megawatt Unit #237

- **POWER (peak):** 30 megawatts
- **VOLTAGE (peak):** 200 kilovolts into 1300 ohms
- **CURRENT (peak):** 150 amps.
- **PULSE WIDTHS:** ½, 1, 2, 4, 6 and 8 microseconds, measured at 90% voltage points
- **PULSE REPETITION FREQUENCY:** 50 to 1800 pps, continuously variable with higher PRFs at reduced power
- **MAXIMUM AVERAGE POWER:** 60 kilowatts
- **MONITORING:** Current-viewing resistor for T.U.T. primary; capacitance voltage dividers for viewing (1) primary of auxiliary pulse transformer, (2) primary of T.U.T., (3) secondary of T.U.T. and (4) grid drivers to thyratrons

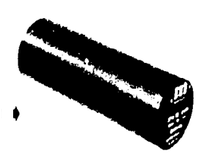
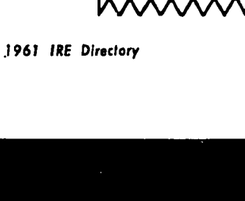
# MANSON CUSTOM ENGINEERING IN PRECISION COMMUNICATIONS INSTRUMENTATION

**MINIATURIZED HIGH STABILITY OSCILLATOR, MODEL RD-149**



**OUTPUT FREQUENCY:** 100 kilocycles and 1 Mc, adjustable +6 cycles. (Other frequencies available when specified: 80 kc to 600 kc and 800 kc to 1.2 Mc)
**OUTPUT:** Sine wave 1 volt rms into 20 K ohms for 1 Mc output; 5 K ohms for 100 kc output.
**POWER REQUIREMENTS:** 200-250 volts DC @ 20 ma; 6.3 volts AC @ 1.1 amps, or DC when specified
**OPERATING AMBIENT TEMPERATURE RANGE:** −20°C to 55°C
**OVERALL DIMENSIONS:** 3¼" x 3¼" x 5¾" (Also available: 1 Mc only, Model RD-145)



**PROPORTIONAL CONTROLLED OVEN MODEL RD-130**

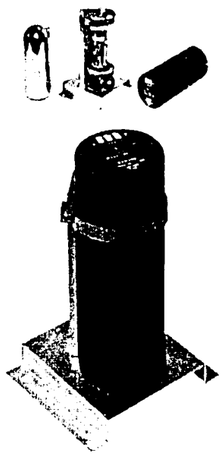
**ULTRA-ACCURATE CRYSTAL OVEN MODEL RD-134**

**HIGH STABILITY OSCILLATOR MODEL RD-140A**

**OUTPUT FREQUENCY:** 1 Mc, adjustable 6.5 cycles. Requirements for frequencies from 0.8 to 1.2 Mc can be met on special order.
**FREQUENCY STABILITY:** Short Term (circuit noise) — ±5 parts in $10^{10}$. Vibration and Shock — 2 parts in $10^9$ per MIL-T-17113. Ambient Temperature Change — ±2 parts in $10^9$ from 0°C to 50°C. Change in B+ or Filament Voltage — ±2 parts in $10^9$ for ±20% B+ change or ±5 parts in $10^9$ for ±10% filament voltage change.
**OUTPUT:** Sine wave, 1 volt rms into 10 K ohms.
**TUBE COMPLEMENT:** Two 12AT7, two 6AQ5, one 6AH6.
**POWER REQUIREMENTS:** 250 volts dc @ 60 ma; 6.3 volts ac @ 1.8 amps; 115 volts ac @ 5 watts.
**MOUNTING:** Complete assembly mounted on a 3½" high standard 19" relay-rack panel, with handles.

**CRYSTAL FREQUENCY SYNTHESIZER, MODEL N-317**

**ZERO ERROR READABILITY AND RESETTABILITY**
**OUTPUT FREQUENCY RANGE:** 2 Mc to 34 Mc in 4 bands
**TUNING INCREMENTS:** 125 cps from 2-4 Mc; 250 cps from 4-8 Mc; 500 cps from 8-16 Mc; 1000 cps from 16-34 Mc
**FREQUENCY STABILITY:** 1 part in $10^8$ per day, with higher stability available using external reference
**SPURIOUS SIGNALS:** down 80 db, except harmonics of the output
**100 MILLIWATTS MINIMUM INPUT** across 50 ohms
**NEW DISCRIMINATOR*** gives automatic and equal pull-in and hold-in without moving parts
**ALL-ELECTRONIC SYSTEM** eliminates mechanical servos

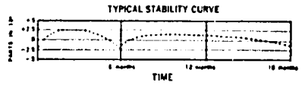


*Pat. No. 2,871,349

**Masters in the art of frequency synthesization, Manson engineers can build to your specifications... or research your problems... to supply your needs in this field!**

**TRANSISTORIZED OSCILLATOR MODEL RD-144**

**FREQUENCY:** 1 Mc, adjustable 5 cycles (also available at any frequency from 800 kc to 1.2 Mc on special request)
**STABILITY:** Drift rate less than 1 part in $10^8$ per day
**OUTPUT:** .05 volt rms into 500 ohms (minimum)
**INPUT POWER REQUIREMENTS:** 24 volts DC ± 10%; approx. 1.8 watts maximum; 0.9 watts average power consumption @ 25°C ambient (available for other voltages on request)
**OPERATING AMBIENT TEMPERATURE RANGE:** 0°C to +50°C
**VIBRATION & SHOCK:** Meets MIL-T-945A specifications



**NEW...** stability 5 parts in $10^8$ or less per annum!

**ULTRA LOW-DRIFT OSCILLATOR, MODEL RD-147**

**OUTPUT FREQUENCY:** 1 Mc, adjustable for 6.5 cycles (requirements for frequencies from 0.8 to 1.2 Mc can be met on special order)
**FREQUENCY STABILITY:** Long term — 5 parts in $10^8$ or less per annum (see Stability Curve). Short term (circuit noise) — ±5 parts in $10^{10}$
**OUTPUT:** Sine wave, 1 volt rms into 10 K ohms
**POWER REQUIREMENTS:** 250 volts DC @ 60 ma; 6.3 volts AC @ 1.8 amps; 115 volts AC @ 5 watts
**MOUNTING:** Complete assembly mounted on a 3½" high standard 19" relay-rack panel, with handles

# TANTALUM

**Quality Features for Maximum Reliability of Solid Electrolyte Tantalum Electrolyte Capacitors — Type STP**

1. 100% stabilized by 250 hour "burn-in"
2. at full voltage
3. and high test temperature
4. with low series impedence

**OTHER ADVANTAGES;**

• −55°C to +125°C operation • ±10%, ±20% tolerance • Polar Operation • Positive Hermetic Seal • Meets or exceeds MIL-C-26655A electrically and mechanically • Minimum size, long life and stable operation.

**PRINCIPAL PARAMETERS:**

**DC LEAKAGE LIMITS***

+ 25°C – 0.02 μA/MFV
+ 85°C – 0.2 μA/MFV
+125°C – 0.25 μA/MFV

*Initial limit and prior to 250 hour stabilization. For fully stabilized capacitor Type STP this limit is increased by 25%.

**DISSAPATION FACTOR (DF)**

− 55°C – 8%
+ 25°C – 6%
+ 85°C – 8%
+125°C – 9%

**VOLTAGE RATINGS — VOLTS**

| +25°C | | +85°C | | +125°C | |
|---|---|---|---|---|---|
| WVDC | Surge | WVDC | Surge | WVDC | Surge |
| 6 | 8 | 6 | 8 | 4 | 5 |
| 10 | 12 | 10 | 12 | 7 | 9 |
| 15 | 17 | 15 | 17 | 10 | 12 |
| 20 | 23 | 20 | 23 | 13 | 16 |
| 35 | 41 | 35 | 41 | 23 | 28 |

**CAPACITY CHANGE FROM 25°C**

−55°C – −12%
+85°C – +12%
+125°C – +15%

**LIFE TEST:**

Capacitors will withstand a life test of 2000 hours when tested per MIL-C-26655A, as amended March 10-11, 1960 with not more than 1 failure in each 24 units tested.

**STANDARD RATINGS AND CASE SIZE TABLE:**

# FILM CAPACITORS

## for industrial, military and commercial applications

**A complete line of quality capacitors is now available from EFCON in tolerances of ±20%, ±10%, ±5%, ±2%, ±1% and closer upon request. Strict quality controls and material selection ensure you of reliable maximum performance.**

### Mylar® Miniature Capacitors

Type MH — hermetically sealed metal case, −60°C to +85°C
Type MHH — hermetically sealed metal case, −60°C to +125°C
Type MC — cardboard tubular, −60°C to +85°C Type MW — tubular construction, Mylar tape wrap, epoxy-resin end-seals, −60°C to +85°C

### High Temperature Teflon Dielectric Capacitor

Type TH — hermetically sealed, −55°C to +200°C. These high reliability capacitors meet MIL-C-26086/4 (USAF) and MIL-C-19978A (NAVY). Type TH features unusually high insulation resistance, excellent humidity resistance, low dielectric absorption, low dissipation factor and small capacitance change with temperature.

### Polystyrene Miniature Capacitors

Type PH — hermetically sealed metal case, −65°C to +85°C
Type PC — cardboard tubular, −65°C to +85°C Efcon Polystyrene Capacitors were developed for use where high insulation resistance, low power factor and low dielectric absorption are necessary.

### Polystyrene High Stability Capacitor

Type RH — Hermetically sealed metal case −65°C to +70°C Polystyrene construction, for applications requiring high stability, high insulation resistance, close retrace, greater dependability . . . Standard tolerance is ±5%. Tolerances of ±2%, ±1%, ±0.5% or closer are available.

### Glasscon® Acetate Capacitors

Type AG — glass-to-metal or type AE — ceramic to metal cased, high voltage, −60°C to +125°C. Voltage range from 600 to 60,000 volts D.C. Standard Tolerance ±10%. Tolerance of ±5%, ±2% and ±1% are available upon request.

**POPULAR STYLES**

**MYLAR AND POLYSTRENE**

**STYLE A** — Grounded, uninsulated case.
**STYLE B** — Grounded construction, case with insulating sleeve.
**STYLE C** — Screw neck mounting, grounded, uninsulated case.
**STYLE D** — With tangential mounting bracket, grounded case.
**STYLE K** — Two 6-32 studs (radial), grounded case.
**STYLE M** — Single 6-32 stud (axial), grounded case.
**STYLE Q** — Two 6-32 studs (radial), both leads insulated.
**STYLE V** — Both leads insulated, with tangential mounting bracket.
**STYLE W** — Both leads insulated, with screw neck mounting.
**STYLE Y** — Both leads insulated, case with insulating sleeve.
**STYLE Z** — Both leads insulated, uninsulated case.

EFCON Patterson Place • Roosevelt Field Garden City • L. I., New York

# Sperry Microline® NEWLY DESIGNED IN 1960

Sperry has created new designs for its entire line of Microwave Instruments to make this the most complete and up-to-date inventory in the industry.

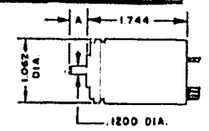
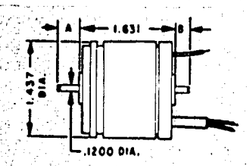
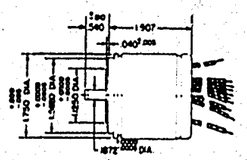
Eclipse-Pioneer also manufactures size 18, Corrosion resistant, two speed Transmitters and Control Transformers.



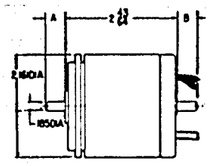
**Size 5**
For detailed electrical characteristics, consult individual specification sheets.



**Size 8**
Available in long housing length of 1.692" or short housing length of 1.241".
All are corrosion resistant.
Available with 0.090" or 0.120" dia shaft.



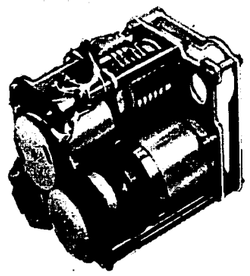
**Size 10**
Available with loose leads or terminal lugs.
For dimensions not shown, consult individual specification sheets.



**Size 11**
Receiver not normally furnished in corrosion resistant construction.
For dimensions not shown, consult individual specification sheets.
Available with leads or terminal boards.

**Size 15**
Available with leads or terminal boards.
For dimensions not shown, consult individual specification sheets.

**Size 18**
For detailed electrical characteristics, consult individual specification sheets.



**Size 22**
Available with leads or terminal boards.
For dimensions not shown, consult individual specification sheets.

**ALL UNITS EXCEPT SIZE 5 ARE AVAILABLE WITH DOUBLE-ENDED SHAFTS.**

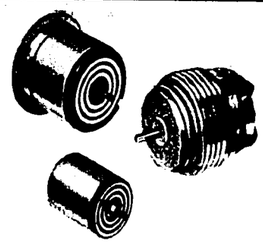
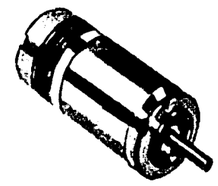
# COMPONENT PACKAGING

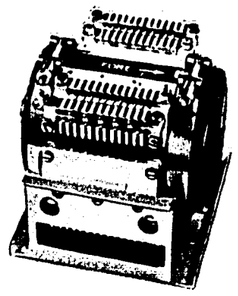


Whatever the component packaging requirements, Eclipse-Pioneer probably has the solution in its extensive line by adapting past and current production packages to meet specific systems requirements.
Should the problem be entirely new, Eclipse-Pioneer will design, develop, and produce a component or a complete system to solve the most intricate of problems.

**FOLLOW-UP MECHANISM WITH CAM COMPENSATOR,** basically designed for use in compass systems, has broad use in applications requiring a mechanical means of compensating or correcting the output data shaft in relation to either servo-loop errors, sensing errors, or known environmental factors. Adjustable from 0° to 9°, it eliminates adjustment of remotely placed or inaccessible units.

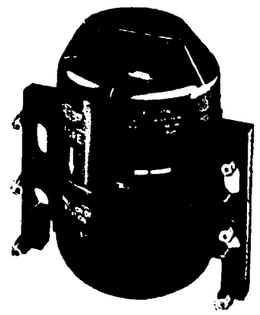


**GEARHEAD MOTORS,** comprised of a gearhead and a standard low inertia motor or motor damping tachometer combination, provide speed reduction and torque amplification with minimum space requirements and maximum flexibility. Quick connect and disconnect coupling features provide broad interchangeability of separately available gearheads and motors for desired combinations of reduction ratios, torques, and electrical characteristics. Gearheads are available in reduction ratios from approximately 5:1 to 80,000:1, in sizes 5, 8, 10, 11, and 15. Motors are described on the last page of this publication.

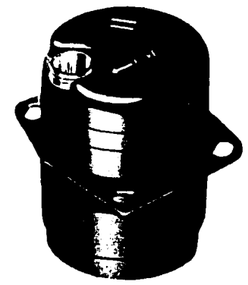


**EXTERNAL SLIP-RING AUTOSYN* SYNCHROS** permit rotation of the housing (stator) in addition to or instead of rotation of the shaft (rotor), to provide for the introduction of an additional variable into a system. The location and configuration of the slip rings depends upon the requirements of a particular application. Any of the Eclipse-Pioneer standard winding configurations and impedances can be provided in slip-ring configuration.
*Registered Trademark of Bendix Aviation Corporation

**RESOLVER CHAINS** developed by Eclipse-Pioneer utilize size 10 and smaller resolvers to solve coordinate transformation problems, with performance exceeding that of resolver chains utilizing size 23 resolvers and feedback buffer amplifiers. Eclipse-Pioneer's design philosophy is based on twenty years of resolver experience and upon the premise that all component parameters fluctuate with predictable variations in excitation, voltage, frequency, and ambient conditions, so that the resultant signal variations can be closely predicted through analysis.



# PRECISION GYROS



Still pacing the accelerating air age, and already launched into the widening space age, Eclipse-Pioneer produces a variety of gyros to meet all applications — basic vertical, rate, free, and directional — as reference components in complete navigation, radar, compass, automatic flight control, and guidance systems for aircraft and missiles.

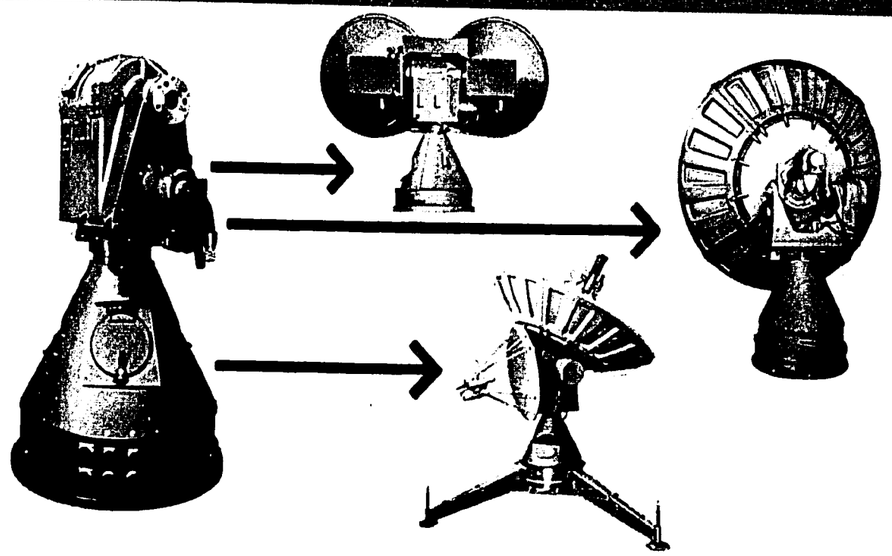
**MINIATURE VERTICAL GYRO TRANSMITTER** is a two-degree-of-freedom gyro for accurate vertical reference in stabilization or control systems. It consists essentially of an electrically-driven, torque-erected, vertical-seeking gyro, with synchro-type pickoffs on the roll and pitch axes. — Electrolytic switch detectors — Hysteresis synchronous motor — Needs no erection amplifier — Hermetically sealed — Completely self-contained

**CAGEABLE ROLL FREE GYRO** is a two-degree-of-freedom gyro designed specifically for missile application. Its 350° F operating temperature permits location near the missile skin. — Solenoid-link, jam-proof caging mechanism — Caging at high roll rates — Operating temperature range from —55° F to +350° F

**DIRECTIONAL GYRO TRANSMITTER** is a miniature directional gyro that provides an output signal proportionate to the displacement of the outer gimbal with respect to the instrument case. — Roll brake prevents damage to gimbals during run-down — Clutching arrangement permits null reference heading without repositioning outer gimbal with respect to frame.

# RADAR ANTENNA DEVICES

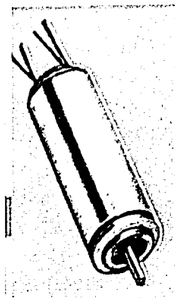
Eclipse-Pioneer has integrated years of experience in servomechanisms and packaging techniques with specialized facilities to produce military and commercial radar antenna devices for a wide range of exacting requirements. The use of magnesium castings, an Eclipse-Pioneer exclusive, results in precise radar antenna devices, substantially lighter in weight, yet strong and durable to meet rugged environmental conditions. Eclipse-Pioneer will supply radar antenna devices to include only the mechanical drive, or to include the complete reflector assemblies and feed systems. These are manufactured in three general categories:
—Airborne weather and navigational radar, gyro-stabilized, and available with a variety of reflector sizes and scanning patterns for military and civilian aircraft.
—Ground or trailer types for mortar and aircraft tracking, missile ranging, and countermeasures.
—Specialized devices and pedestals for specific applications.



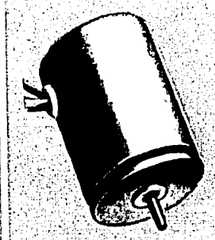
**AIRBORNE WEATHER RADAR ANTENNA** is gyro-controlled for line-of-sight stabilization of the roll and pitch axes. Pilot can switch from pencil-beam storm detection operation to a cosecant squared ground mapping pattern for navigation. Available for operation in both C and X bands.

For details, circle #104 on Reader Service Card

**GROUND ANTENNA PEDESTAL** is easily modified to a variety of radar antenna applications. Weighing only 700 pounds, it is readily transportable by air or land. With an accuracy better than 0.5 mils, it is already designed, tooled, and available for immediate needs. Basic pedestal design permits maximum flexibility in interchangeability of antenna configurations and mountings.



For details, circle #105 on Reader Service Card



## MOTORS AND GENERATORS

The general characteristics that follow cover each category collectively. Full information about specific types within each category is available on individual specification sheets. Eclipse-Pioneer will modify or design components to customers requirements.

| | FRAME SIZE | | | | | | |
|---|---|---|---|---|---|---|---|

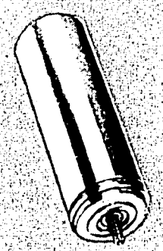
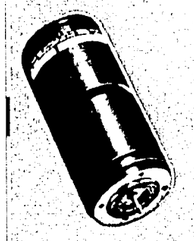
| TACHOMETER GEN. — TEMPERATURE COMPENSATED AND INTEGRATING | | | ● | ● | ● | ● | |
| MOTOR DAMPING TACHOMETER | | ● | ● | ● | | ● | ● |



**LOW INERTIA SERVO MOTORS**
- Fixed Phase: 18 to 115 volts
- Control Phase: 18 to 230 volts
- Maximum Power Input: 3 to 70 watts
- No-load Speed: 3600 to 10,000 RPM
- Maximum Torque: 20 oz-in.
- All types are corrosion resistant
- Specific types are provided with drag cups, various types of shaft configuration, and extended ranges of temperature operation.



**TACHOMETER GENERATORS — DAMPING**
- Excitation: 18 to 115 volts
- Output per 1000 RPM: 0.34 to 0.55 volts
- Linearity: 0.5% to 4000 RPM
- Temperature Range: —55°C to +125°C

**STEPPER MOTORS**
- Operation Range: 10 to 50 volts
- Pulse Rates: up to 120 pulses per second
- Center-tapped control windings
- Specific types are reversible, permit half- or full-voltage operation, and provide various torque outputs.
- Permanent magnet pickups

**MOTOR TACHOMETERS — TEMPERATURE COMPENSATED AND INTEGRATING**
- Motor Rated Voltages (Phases 1 and 2): 26 to 115 volts
- Motor No-load Speed (Gen. Excited): 4000 to 9500
- Generator Excitation: 26 to 115 volts
- Generator Output per 1000 RPM: 0.3 to 3 volts
- Generator Input Power: 1.5 to 6.5 watts
- Frequency Range: 60 to 2000 cps
- All types are corrosion resistant
- Specific types are temperature compensated within ranges of —55°C to +125°C
- Specific types are provided with permanent magnet generator or pulse generator for speed measurement

**SERVO AND STEPPER MOTOR COMBINATION**
- Motor section is 115-volt unit with center-tapped control phase and a no-load speed of 4000 RPM.
- Step voltage of 26 volts advances stepper motor in increments of 45 degrees at maximum pulse rate of 30 pulses per second.
- Induction motor section slews to proper quadrant; stepper section provides for exact positioning of rotor.

**TACHOMETER GENERATORS — TEMPERATURE COMPENSATED AND INTEGRATING**
- Generator Excitation: 26 to 115 volts
- Generator Output per 1000 RPM: 0.3 to 3 volts
- Power Input: 1.5 to 6.5 watts
- Linearity: 0.1% to 3600 RPM
- Frequency Range: 60 to 2000 RPM
- Specific types operate in temperature ranges within —55°C to +125°C

**MOTORS — CENTER-TAPPED AND SPLIT-PHASE WINDINGS**
- Control Phase: 26 to 115 volts
- Fixed Phase: 26 to 115 volts
- No-load Speed: 6000 to 10,000 RPM

**MOTOR DAMPING TACHOMETERS**
- Fixed Phase: 18 to 115 volts
- Control Phase: 18 to 230 volts
- Maximum Power Input: 3 to 70 watts
- No-load Speed: 3700 to 20,000 RPM
- Generator Excitation: 18 to 115 volts
- Generator Output per 1000 RPM: 0.25 to 0.5 volts
- Maximum Torque: 20 oz-in.
- High temperature characteristics
- All types are corrosion resistant
- Specific types are provided with permanent magnet generator or pulse generator for speed measurement

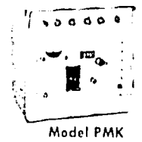
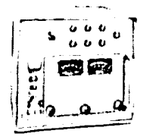
## FOR MICROWAVE SIGNAL GENERATION
## 500 to 50,000 mc

500 to 21,000 mc. Polarad generators in this range feature • continuously variable attenuators calibrated directly in dbm • internal pulse, FM and square wave modulation, external pulse and multi-pulse modulation • Delayed and undelayed sync outputs • UNI-DIAL tuning • direct-reading frequency dials accurate to 1% • high stability non-contacting klystron cavity chokes for noiseless tuning and accurate calibration.



**UHF SIGNAL GENERATOR**

Model PMR



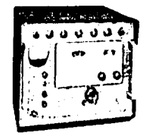
500 to 1,000 mc
Single unit covers entire frequency range.
Internal pulse and square wave modulation from 10-10,000 pps.
Internal FM with separate modulator.
Calibrated output 0 dbm .1 mw to —127 dbm.

**MICROWAVE SIGNAL GENERATOR**

Model PMK

10,000 to 21,000 mc
Two interchangeable generator units.
Internal pulse and square wave.
10-10,000 pps. Output to 10 mw. DIGITAL frequency indicator.

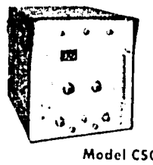
Model PMX



**MICROWAVE SIGNAL GENERATOR**
4,450 to 11,000 mc
Two interchangeable generator units.
Internal pulse and square wave.
10-10,000 pps. 0 to —127 dbm output.

Model MSG-34

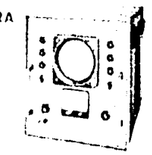
**ULTRA-BROADBAND MICROWAVE SIGNAL GENERATOR**
4,000 to 11,000 mc in one instrument.
Internal pulse and square wave.
10-10,000 pps.
0 to —127 dbm.
DIGITAL frequency indicator.



**MICROWAVE SIGNAL GENERATOR**

Models MSG-1, MSG-2A, MSG-2P

MSG-1 650-2,000 mc
MSG-2A 2,000-4,150 mc
1 mw min. power output
MSG-2P 2,150-4,000 mc
10 mw min. power output
MSG-1 & MSG-2A with 40-4,000 pps internal pulse and square wave modulation.
MSG-2P with 10-10,000 pps range.



**FOR INSTANTANEOUS MICROWAVE ANALYSIS** At single frequency or over a wide range

Model CSG

Model CSG Electronic Sweep Generator. 1,000 to 10,000 mc in 5 tuning units. Provides high power microwave signal adjustable from single frequency to 2:1 frequency range. 100 to 1,000 cps sweep rate. Int. AM 1,000 cps & 45% square wave.

Model VS-2A

Model VS-2A Rapid Scan Ratio Scope. Displays ratio of two input signals as a function of frequency, or as a function of time at a single frequency, or over an entire sweep range. Calibrated 7" CRT. For use with Model CSG Sweeper.

12,400 to 50,000 mc. Units in this range can be cascaded. 1,000 cps internal square wave, external modulation, and [illegible]

EHF SIGNAL GENERATOR [illegible] to 50,000 mc. [illegible] High power output.

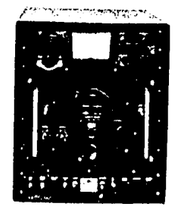
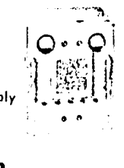
## FOR MICROWAVE RECEPTION



Model R

**EXTENDED RANGE MICROWAVE RECEIVER**
400 to 46,700 mc in 8 tuning units

Four instruments in one:
- AM-FM receiver
- Field intensity receiver
- Pulse, pulse-time or pulse-position demodulator
- Sensitive power meter



Receives AM, FM, cw, mcw and pulse signals. Direct-reading frequency dial accurate to 1%. AFC and AGC. Audio, video, recorder and trigger outputs. Sensitivity —90 to —55 dbm depending on frequency.
For all monitoring and quantitative analysis of microwave signals.

Model RW-T

**MICROWAVE ANTENNA PATTERN RECEIVER** 2,000 to 75,000 mc in a single unit

AM, FM, cw and pulse reception. External mixer may be located up to 75 feet from receiver unit; eliminates need for cumbersome rigid waveguide. Operates into any standard antenna pattern recorder. Linear response over 40 db dynamic range. Sensitivity —85 to —70 dbm, depending on frequency.

Power Supply

Monitor and Tuning Unit

Calibrated Antenna (Supplied with Model FIM)

**CALIBRATED MICROWAVE FIELD INTENSITY RECEIVER SYSTEM**

1,000 to 10,000 mc in 4 tuning units — Model FIM

For accurate measurements of frequency and absolute power level of conducted or radiated microwave energy. Combines calibrated receiver, internal calibrated signal generator and calibrated antenna system. First single test system to measure both r-f interference and susceptibility to interference. Approved Class A MIL SPEC under MIL-I-26600 and Ramo-Wooldridge Weapons System Specification WDD-M-PRO-2.

Features UNI-DIAL control: single knob tunes both receiver and internal signal generator. Direct-reading frequency dial. Calibrated meter indicates average, peak or quasi-peak value of r-f signals. Signal generator (1 mw calibrated power output) can be externally modulated. Audio, video, recorder outputs. Sensitive and extremely rugged. Supplied with 5 calibrated antennas.

## FOR MICROWAVE SPECTRUM ANALYSIS
## 10 to 44,000 mc

### DIRECT READING SPECTRUM ANALYZER

**10 to 44,000 mc in 5 tuning units**

Model TSA

To test missiles, radar, microwave components, telemetering and multi-pulse transmission. Features:

- Dispersion, 400 kc to 25 mc
- Resolution, 25 kc
- R-F and I-F attenuation
- Sensitivity —95 to —50 dbm depending on frequency

**ALL POLARAD ANALYZERS FEATURE:**

1 to 30 cps sweep rate
Direct reading UNI-DIAL tuning
Frequency accuracy ±1%
Stable accurate internal frequency marker
High accuracy and sensitivity
Flat-face 5" CRT

### COMBINATION SYNCHROSCOPE-SPECTRUM ANALYZER

**10 to 44,000 mc in 5 tuning units**

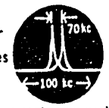
**PROVIDES TIME AND FREQUENCY DISPLAY**

**Time display:** Shows signal wavetorm

**Frequency display:** Shows power-frequency spectrum

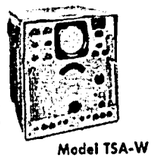
Model TSA-S

Bandwidth 5 kc, 50 kc, 500 kc, 5 mc. Synchroscope sweep rate: 2, 10, 100, 1,000, 10,000 and 100,000 μsec per screen diameter.



### WIDE DISPERSION SPECTRUM ANALYZER

**10 to 44,000 mc in 5 tuning units**



**FOR NARROW AND WIDE PULSE ANALYSIS**

**Wide Dispersion Band:** 70 mc dispersion, 50 kc resolution, displays pulses as narrow as 0.1 μsec.

**High Resolution Band:** 100 kc dispersion, 7 kc resolution, ideal for wide pulse analysis and signal discrimination.

Model TSA-W

Linear or log screen display for measurements over a wide dynamic range.

### UNIVERSAL SPECTRUM ANALYZERS

**10 to 40,880 mc in single self-contained units. No additional tuning units needed.**

Features a choice of wide or narrow dispersion, and linear or log screen display. Dispersion: **wide band,** 1 mc to over 80 mc, fully adjustable, for narrow pulse analysis; **narrow band,** 100 kc to 7 mc, adjustable, for wide pulse analysis. **Resolution:** 7 kc to 50 kc automatically set by dispersion control. Crystal controlled markers throughout range. Accurate I-F attenuator.

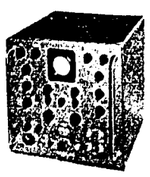
Model SA-84W

also MODEL SA-84

**Adjustable dispersion:**
in 10 to 55 mc range: 500 kc to 5 mc,
in 55 to 40,880 mc range: 500 kc to 25 mc.

Resolution: 20 kc. Expanded, direct reading slide rule dial showing only the frequency band in use.

### MULTI-PULSE SPECTRUM SELECTOR



Model SD-1

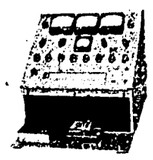
For use with any Polarad spectrum analyzer. Permits spectrum analysis of individual microwave pulses in a pulse group. Any pulse in a complex coded signal may be isolated and intensified for examination.

## FOR GENERAL LABORATORY USE

### PULSE JITTER TESTER

Model PJ-1

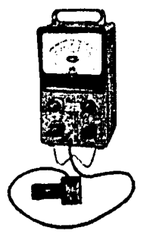
Measures:
**Relative jitter and pulse width jitter:** 5, 10 and 100 millimicroseconds full scale.
**Repetition rate jitter:** 5, 10 and 100 millimicroseconds, and 1, 10 and 100 microseconds full scale. Displays jitter magnitude and waveform.



### SERVO ANALYZER

Model SV-1

Tests amplitude, phase and transient response in magnetic and servo amplifiers and all AC and DC servo systems. Feeds test signal through servo or computer circuit, compares response on calibrated CRT. Wide variety of output test signals.



### KLYSTRON TUBE TESTER

Model K-200

Tests all microwave tubes as easily as ordinary vacuum tubes.

### TRANSISTORIZED MICROWAVE POWER METER

Model P-3

**10 to 40,000 mc in 5 thermistor mounts**

Measures absolute r-f power instantly without tuning. Line or internal battery operated. Rugged, only 6 pounds. Meter ranges: 0.1 mw to 10 mw full scale.

### PRECISION NOISE GENERATOR

Model N-1

Provides a stable, accurate noise output simultaneously over a 1,000 cps to 500 mc frequency range. Output level adjustable 1 to 20 db, accurate to ± 0.25 db. For direct noise figure measurements in vacuum-tube and transistor amplifiers and receivers.

### ALL-CERAMIC KLYSTRON TUBES

Maximum shock, vibration and heat resistance. Guaranteed operation up to 250°C with no cooling required. Low noise figure. High frequency accuracy, stability and freedom from microphonics.

| Tube Number | Frequency Range |
|---|---|
| ZV 1012 | 500 to 3,000 mc |
| ZV 1010 | 700 to 3,000 mc |
| ZV 1009 | 1,500 to 6,000 mc |

## DIGITAL VOLTMETERS

Model 501 4-Digit, Over-ranging DC Digital Voltmeter

**MEASURE DC WITH 0.01% ACCURACY**

The 501 measures DC from ±0.0001 to ±1000.0 volts with 0.01% ± 1 digit (of reading) accuracy. Ranging and polarity indication are automatic. An extra fifth digit in the left decade indicates "0" or "1" to provide 100% over-ranging and ten times greater resolution at decade (1, 10, 100, 1000) voltage points than standard 4-digit voltmeters. The measured voltage is displayed in direct numerical form on an in-line, single-plane readout – no superimposed outlines of "off" digits. Input impedance is 10 megohms on all ranges at null. Printer drive for ten-line, parallel entry printers is built in. A control permits decreasing sensitivity to allow reading noisy or unstable inputs. Stepping switch drive coils are energized with DC as in telephone-type service to provide long, trouble-free operation. The reference voltage is supplied by a chopper-stabilized supply which is continuously and automatically referenced to an internal standard cell. Price $2995.

Model 452 AC Converter

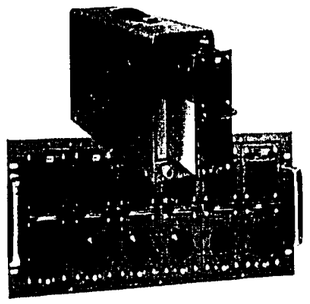
Added to the basic 501 DC digital voltmeter, the 452 permits 4-digit measurement of 0.001 to 999.9 RMS volts AC from 30 to 10,000 cps. Accuracy is 0.2% of full scale. Ranging is manual (autoranging models available). Price $850.

Model 459 Differential DC Preamplifier

Fixed gain of −100 extends digital voltmeter sensitivity to 1 microvolt DC, provides 0.15% ±5 digits overall system accuracy. Maximum output is 10 volts. Input resistance is 5 megohms. Input may be floated up to ±250 volts. Common-mode rejection is 130 db for 60 cps. Price $1475.

Model 458A AC-DC Preamplifier

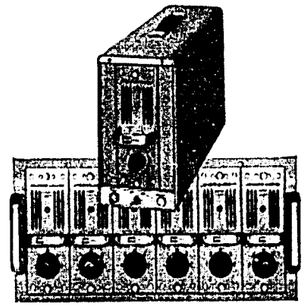
Fixed gain of −100 extends voltmeter sensitivity to 1 microvolt DC, 10 microvolts AC (30 to 2000 cps); provides overall system accuracy of 0.1% ±2 microvolts DC, and 0.25% of full scale AC. Additional +1 gain provides >10,000 megohms input impedance with 0.001% gain accuracy. Maximum output ±40 volts DC, 35 volts AC. Price $1225.



Model 453M Multi-channel Input Scanner/Programmer

Automatically or manually scans up to 400 one-wire, 200 two-wire, 100 four-wire inputs. Slave scanners permit scanning additional inputs. Price $2500.

*Other Digital Instruments include* rugged, militarized AC/DC voltmeters; ratiometers; all-electronic tracking-logic voltmeters; and accessories for driving card punches and other output equipment.



## DC AMPLIFIERS

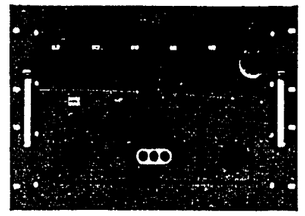
Model 112A Wideband DC Amplifiers

**AMPLIFY DC TO 40 KC WITH 2 MICROVOLT STABILITY**

Wideband, single-ended DC amplifier permits extremely accurate measurement of strain temperature and other phenomena. Accepts plug-ins to permit use as standard adjustable gain amplifier (unit described), +1 amplifier, filter, etc. Equivalent input drift is less than 2 microvolts for 400 hours. Noise is less than 5 microvolts P-P from 0 to 3 cps, less than 5 microvolts RMS from 0 to 750 cps, less than 12 microvolts RMS 0 to 50 kc. Input impedance is 100,000 ohms, output impedance less than 1 ohm. Gain is in ten steps from 20 to 1000 with continuous 1 to 2 times vernier adjustment of each setting. Gain accuracy is 0.5%. Micro-Gain control permits adjusting individual gain settings to 0.01% gain accuracy. Gain stability and linearity are 0.1%. Frequency response is ±0.1% to 2 kc, ±0.3 db to 10 kc, less than 3 db down at 40 kc. Output capability is 40 ma into 10 to 400 ohms, ±35 volts into 1000 ohms, ±45 volts into 10,000 ohms. Each amplifier contains integral power supply. Six amplifiers mount in 190 rack module, single amplifier mounts in 191A rack module or 195 cabinet. Prices: 112A amplifier with 112A-A adjustable gain plug-in $625; 190 module $295; 191A module $150; 195 cabinet $125.

Model 114A Differential DC Amplifiers

**RESCUE MICROVOLT SIGNALS FROM VOLTS OF NOISE**



A true differential DC amplifier with input isolated from output and both input and output completely floating and isolated from chassis ground. Ideal for thermocouple systems, virtually eliminates ground loop problems and allows amplification of microvolt level signals in the presence of volts of common-mode noise. Common-mode rejection is 180 db for DC, 130 db for 60 cps with up to 1000 ohms input unbalance. Equivalent input drift is less than 3 microvolts for 40 hours on 300 gain or above, 5 microvolts on gain of 100, 10 microvolts on gain of 30, and 30 microvolts on gain of 10. Gain is 10 to 1000 in five steps. Bandwidth is 100 cps. Input resistance is greater than 5 megohms. Output impedance is less than 2 ohms. Output capability is 10 volts at 10 ma. Gain accuracy is 1.0%. Gain stability is 0.1%, and linearity is 0.1% of full scale 10-volt output into 1000-ohm or greater load. Each amplifier contains an integral power supply. Six amplifiers mount in 190 rack module, single amplifier mounts in 191A rack module or 195 cabinet. Prices: 114A amplifier $775; 190 module $295; 191A module $150; 195 cabinet $125.

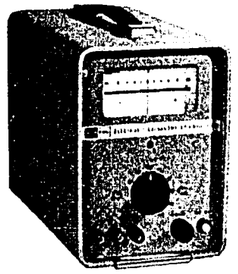
## AC STANDARD

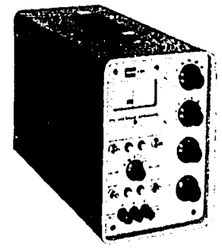


Model 601A AC Voltage Standard

**0.1% ACCURACY AC VOLTAGE SOURCE**

Exceptionally stable and accurate AC calibration source. Output is 1 to 501 volts RMS AC, adjustable in 0.1 volt steps and between steps with a potentiometer. Output frequencies are 60, 400, and 1000 cps. Power output is 5 amps up to 5 volts, 25 watts above 5 volts. Voltage accuracy is 0.1% or 5 millivolts, with 0.01% short-term stability. Frequency accuracy is 1.0%, harmonic distortion less than 0.3%. The output is floating, guarded, and exceptionally well isolated from chassis ground and AC line. Output impedance with a constant resistive load is approximately 0.01 ohm. (Output impedance for a varying load is a function of the frequency of load variation, and the 601A voltage and frequency settings.) Price $1500.

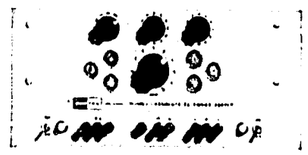
## ELECTRONIC GALVO



Model 204A Electronic Galvanometer

**RUGGED DC NULL DETECTOR, MICROVOLTMETER, AMPLIFIER**

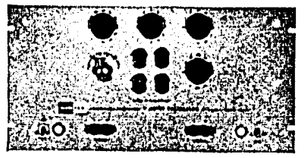
The 204A is functionally equivalent to the most sensitive suspension galvanometers, but is insensitive to shock, vibration, microphonics, earth's magnetic field and stray pickup. It is all transistorized, does not require leveling, can withstand severe overload with no offset on return to zero, and has rapid response. A built-in Ayrton shunt provides seven decaded ranges which cover from ±10 microvolts to ±10 volts full scale, and from 0.001 microampere to 1 milliampere full scale. Input resistance is 10,000 ohms on all ranges. Power sensitivity is $10^{-14}$ watts. The input is floating. Drift is less than 2 microvolts. Output as an amplifier is ±1 volt at 1 ma for full scale on any range. Price $425.



## DC STANDARDS

Model 301 DC Voltage Standard and Null Voltmeter

**MEASURE AND SUPPLY DC VOLTAGE TO 0.02%**



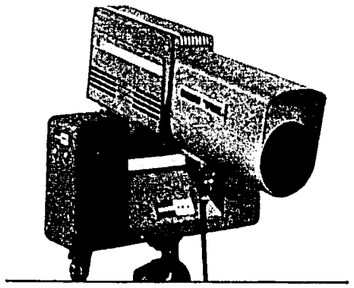
Measures 1 to 501 volts, supplies 1 to 501 volts at up to 20 ma. Output is floating. Output voltage calibration is 0.02% or 2 mv. Long-term stability is 0.01%. Load regulation is 0.002% no load to full load. Line regulation is 0.002% for 10% line voltage change. Output hum and noise are less than 100 microvolts. Less than 0.01 ohm DC output impedance, and 0.2 millisecond response time. Available as rack or cabinet model. Price $795.

Model 50B-25 DC Power Supply

**HIGH-POWERED "STANDARD CELL"**

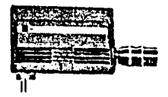
Above unit supplies 1.02 to 502 volts at up to 250 ma. Others available with same basic performance specifications. Stability 100 ppm long term, 50 ppm short term. Accuracy 0.02% or 5 millivolts. Less than 0.5 mv hum and noise; 0.01% load and 0.002% line regulation. Less than 0.01 ohm DC and 0.5 ohm AC (to 200 kc) output impedance. Response time 0.2 millisecond. Either positive or negative output. Price $895.

Model M10A-10 DC Meter Calibrator



**0.01% STABILITY CURRENT OR VOLTAGE SOURCE**

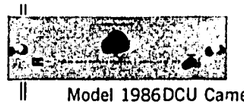
Above unit supplies 0-100 volts, 0-100 ma as voltage or current source. Model M100A-20 supplies 0-1000 volts, 0-200 ma. Accuracy is 0.05%, line regulation 0.01%, hum and noise less than 2 mv. Other specifications same as power supplies. Price of M10A-10 (control unit illustrated) $1495.



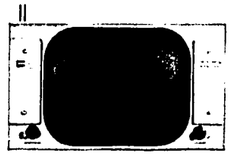
## INDUSTRIAL TV

**VERSATILE, AUTOMATIC, CLOSED-CIRCUIT TV**

Used by hundreds of leading firms for safe observation of missile tests, nuclear reactors, environmental tests...for surveillance of freeways, tunnels, runways, security areas...for transmission of printed data, meter indications, signatures. Operation is fully automatic. The only control the operator has to touch is the on-off switch. Monitor pictures are photo sharp – twice the resolution of the best home TV. Equipment is



rugged, designed for continuous duty operation in severe environments. Sharp, clear pictures are provided in extremely low-light levels. Installation is simple. The basic system shown below can be easily expanded with additional cameras, monitors, and accessories without obsoleting present equipment.

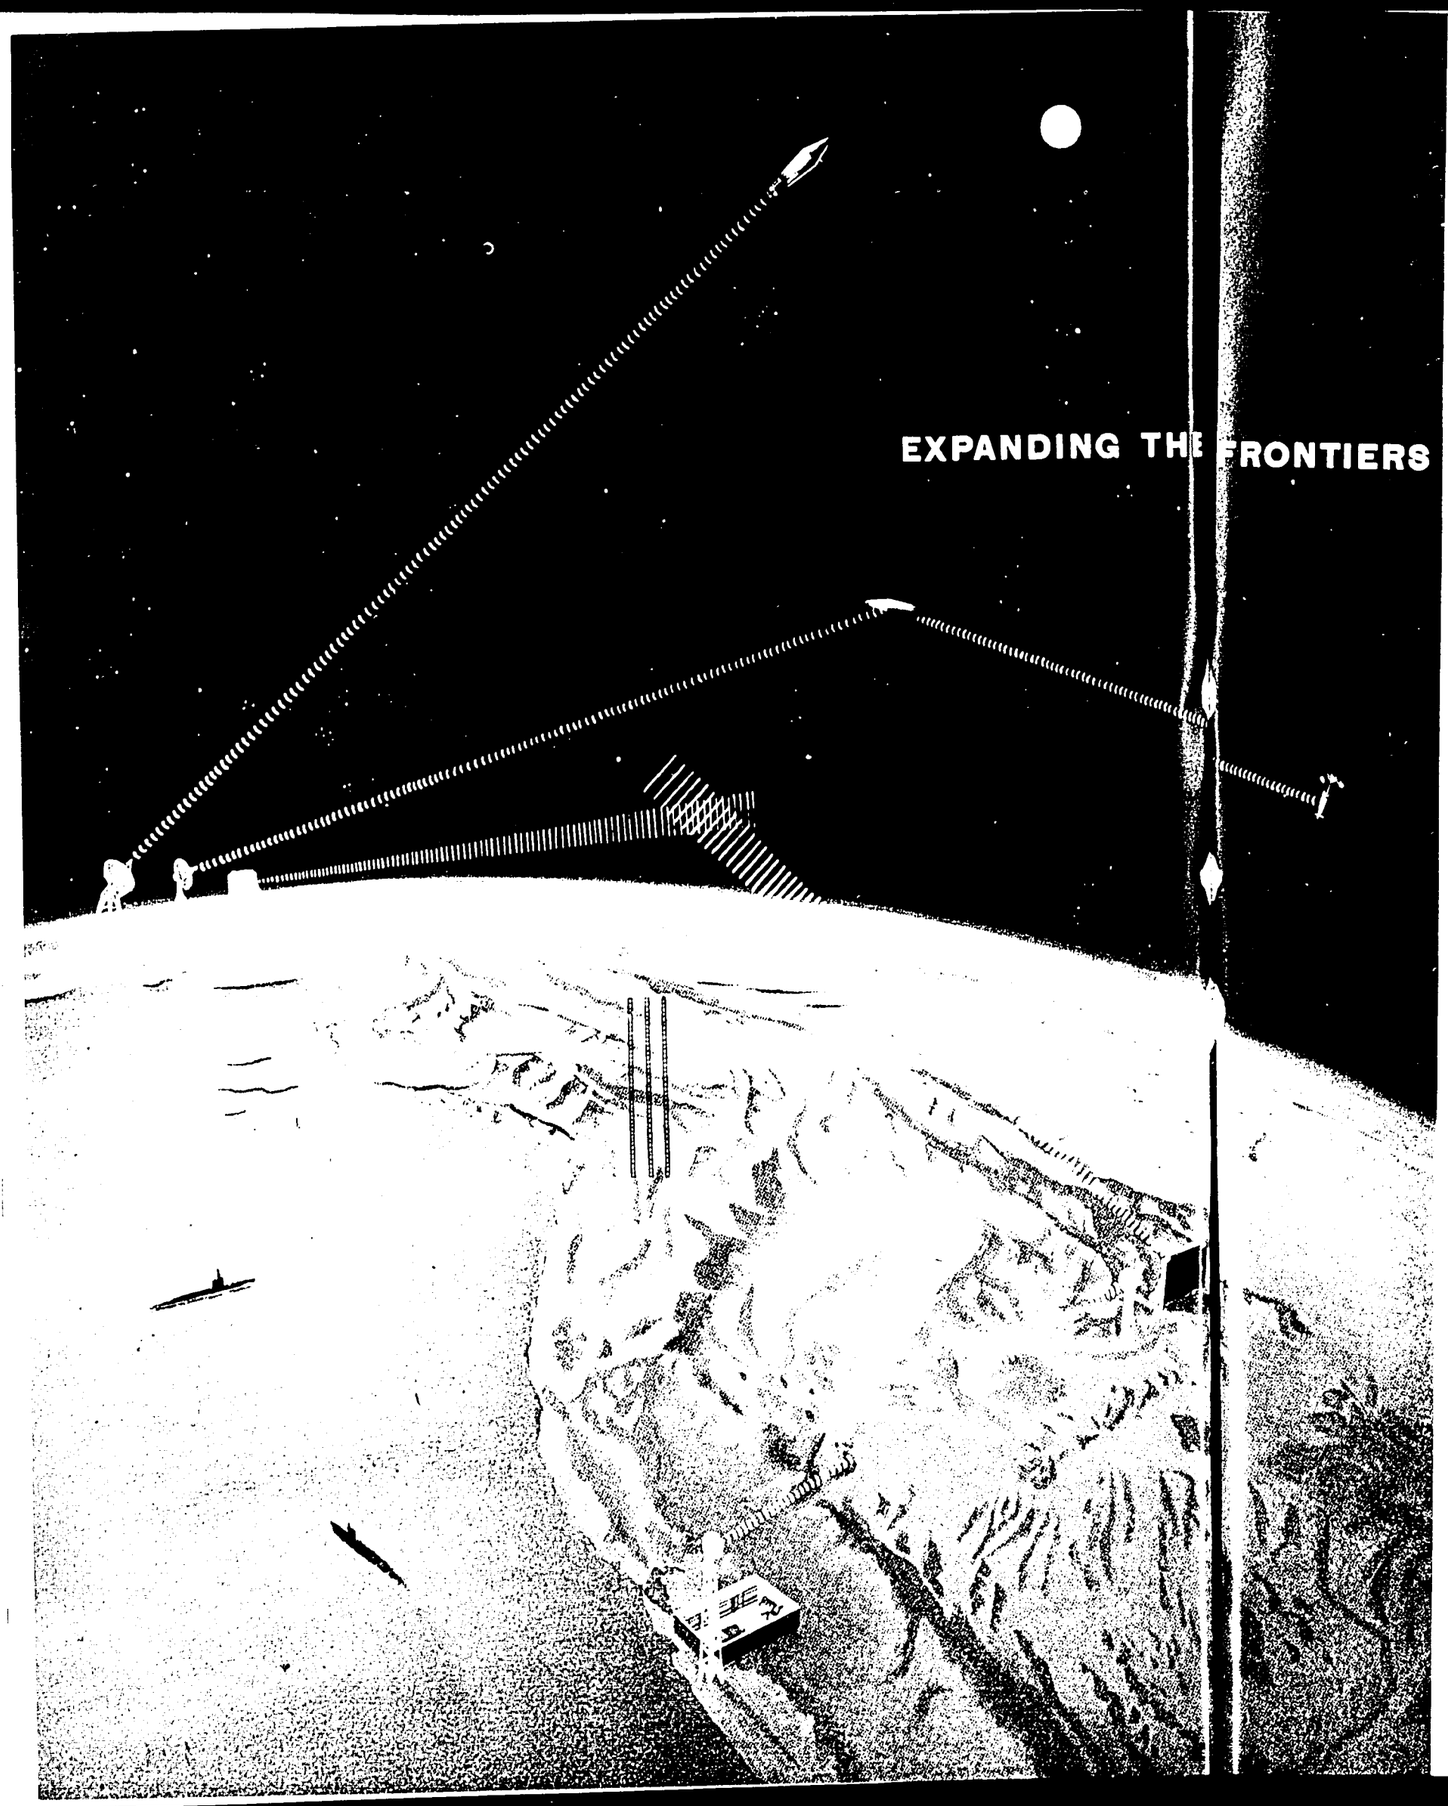


Model 1986C TV Camera

(up to 1500 feet of cable)

Model 1986DCU Camera Control

(up to 3000 feet of cable. More with amplifiers)



Model DRM-14R Monitor

*TV Accessories include* pan-tilt units, zoom lenses, special housings, many others. A variety of monitors, different cameras and more than a hundred other system components are available.

## WIDE BAND SWEEP FREQUENCY GENERATORS

### THE MOST VERSATILE SWEEP GENERATOR MODEL 900-A

**SWEEP WIDTHS**—as wide as 400 mc... from 0.5 mc to 1200 mc. The Jerrold Model 900-A, Wide Band Sweep Frequency Generator is an instrument of unusual versatility. In two ranges—0.5 mc to 400 mc and 275 mc to 1200 mc—the instrument supplies sweep signal with center frequency from 500 kc to 1000 mc and with sweep widths as broad as 400 mc and as narrow as 100 kc. The rf output is flat within ±0.5 db at full sweep width up to 800 mcs and ±1.5 db from 800 mcs to 1200 mcs. The output voltage is 0.5 volts rms across a 50 ohm load at the upper range and 0.25 volts at the lower range. The instrument features provisions for external markers employing "birdie bypass" circuitry, and a plug-in rf detector that can be used in remote applications.....Price **$1260.00**

### THE ULTRA FLAT SWEEP GENERATOR MODEL 707-*

The model 707-* is a precision variable rate sweep generator with an extremely flat rf output (±5/100 db over highest single octave) for use in the laboratory or production test. It is particularly adaptable for use with an X-Y plotter. The 707-* features; plug-in oscillator heads covering the range from 2 to 265 mcs; high output power (+20 dbm below 150 mcs); variable sweep rate (60 per sec. to 1 per 2 min.); and harmonics down 40 db over highest single octave (down 30 db over the entire range).

*Order Model 707-1, 2, or 3 shipped respectively with oscillator heads H-71 (4-100 mcs), H-72 (12-220 mcs), H-73 (2-50 mcs) .....Price **$795.00** each

Model 707-4 shipped with H-74 (any single octave 2-265 mcs) special order.....Price **$845.00** each

*Additional oscillator heads for any model 707*
H-71, H-72 and H-73 .....Price **$250.00** each
H-74 special order.....Price **$275.00** each

### PORTABLE GENERAL PURPOSE SWEEP GENERATORS MODELS 601 and 602

Designed for the test and alignment of if and rf circuitry. The Generators feature an electronic, saturable reactor sweep circuit with a maximum sweep deviation of approximately 120% c.f. Fundamental frequency on all ranges.

**MODEL 601**—12 mc to 225 mc in eleven overlapping ranges. RF output of 1.0 volt rms. Output flat ±½ db over widest sweep width and as flat as 1/5 db at sweep widths of 40 mc or lower.

**MODEL 602**—4 mc to 112 mc in eleven overlapping ranges. RF output of 2.5 volts rms. Output flat within ±½ db. .....Price **$295.00**

Other Generators available on special order to cover any portion of the frequency range from 2 mcs to 265 mcs

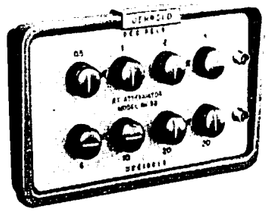
## MARKER GENERATORS

### PORTABLE CRYSTAL MARKER GENERATOR

*(not illustrated)* **MODEL CM-6**

The CM-6 provides your choice of any six crystal-controlled marker signals between 2 and 100 mcs. In the higher frequencies, up to the 20th harmonic will be visible and up to the 10th harmonic will be visible in the lower frequencies. Proper choice and proper mixing will provide harmonic, sideband, or "birdie bypass" markers across a wide band width. This portable instrument features individual amplitude control, scope pre-amplifier, and provisions for the addition of external markers.....Price **$285.00**

**MODEL CM-10** is similar to CM-6 but is rack mounted and provides 10 crystal-controlled marker signals. Price **$425.00**

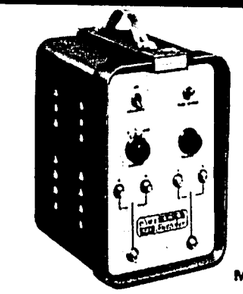


For details, circle #114 on Reader Service Card

# for QUANTITATIVE Measurements Using Sweep Frequency Techniques

## VARIABLE ATTENUATORS

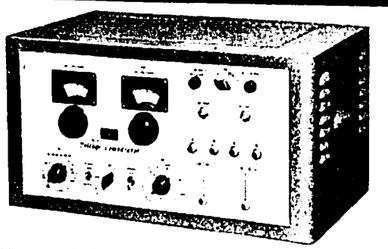
### PRECISION ATTENUATORS—MODELS AV-50—AV-75



Featuring long life rotary switches with dual wiping silver contacts on "Kel-F" dielectric. Models AV-50 and AV-75 are precision laboratory attenuators covering the frequency range from dc to 500 mcs. Matched to 50 and 75 ohms respectively with VSWR less than 1.15 from dc to 250 mcs and of less than 1.4 at 500 mcs. Provides attenuation settings from 0 to 62.5 db in 0.5 db steps. Insertion loss is 0.25 db at 250 mcs and 0.5 db at 500 mcs.....Price **$150.00**

### STANDARD ATTENUATORS—MODELS A-52—A-72

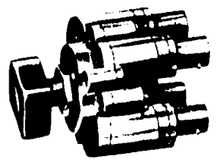
These economy type units provide attenuation over a frequency range from dc to 250 mc. Matched to 50 and 75 ohms respectively with a VSWR of less than 1.2, each model contains 8 selector switches for attenuation settings from 0 to 82 db in 1 db steps. Insertion loss is 0.5 db.....Price **$55.00**



## MEASUREMENT COMPARATORS

**MODEL FD-30**

### HIGH-SPEED COAXIAL SWITCH



Displays two channels or voltages simultaneously on an oscilloscope. Frequency range of coaxial circuit is from dc to 250 mcs with a VSWR of less than 1.08 at 50 or 75 ohm impedance. Fully-shielded "Clare Mercury-Wetted" switch elements have a life expectancy of over one billion operations. Switch rate is adjustable to 10, 15, or 30 cps.....Price **$250.00**

### PRECISION VOLTAGE COMPARATOR — MODEL VC-12

A 3-section instrument providing simultaneous dc and rf voltage reference traces on a sweep frequency display. The switch section contains two SPDT coaxial mercury relays with a VSWR less than 1.08, dc to 250 mcs. The dc section's positive or negative output is variable from 1 mv to 12 v. The rf section features an accurately-calibrated 2 mc signal variable from 1 mv to 12 v. rms which, compared with the rf output of the device under test, provides a measurement free from errors due to detector square law characteristics, scope calibration or non-linearity.....Price **$375.00**

### RF COAXIAL TRANSFER SWITCHES

**MODEL CS-250** is a manually-operated, rotary, coaxial, rf-transfer switch for switching rf energy. The insertion loss is less than .1 db, the input and output VSWR is less than 1.15, and the isolation is 60 db at 100 mc. The range is from 0 to 1,000 mcs. Equipped with BNC connectors, the CS-250 is matched to 50 ohms.....Price **$19.60**

**MODEL CS-275** is similar to the CS-250 except that it has a range of from 0 to 500 mcs, is equipped with Jerrold F-series fittings, and is matched to 75 ohms.....Price **$18.50**

### DETECTORS

Voltage doubling, feed thru type. Equipped with terminating load. Excellent sensitivity for VSWR measurements as well as other applications.

| Model | Impedance | Range | Connectors | VSWR | Price |
|---|---|---|---|---|---|
| D-50 | 50 ohms | .5-1200 mcs | BNC | 1.1 | $45.00 |
| D-75 | 75 ohms | .5-1200 mcs | "N" | 1.1 | $55.00 |
| D-86 | 50/75 ohms | .5- 250 mcs | BNC/"F" | 1.1 | $30.00 |

All units available with 50 ohm impedance and BNC connectors or 75 ohm impedance and Jerrold "F" connectors. Price and data subject to change without notice. Write for technical data sheets and Newsletter series on measurements using sweep frequency techniques.

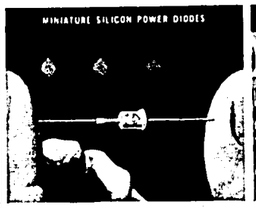
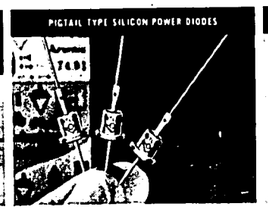
# YOUR 1961 I.R.E. DIRECTORY TO SEMICONDUCTOR RECTIFIERS FOR ALL DC REQUIREMENTS...FROM MICROWATTS TO MEGAWATTS!

## A PARTIAL LISTING OF INTERNATIONAL RECTIFIER CORPORATION PRODUCTS



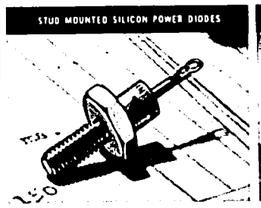
## ...THE MOST EXTENSIVE LINE OF QUALITY RECTIFIERS ON EARTH!

*All designed and manufactured to meet the most rigid military requirements!*

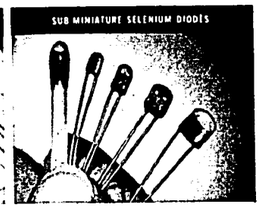


## ELECTRONIC TYPES FOR INDUSTRIAL AND MILITARY APPLICATIONS

### SILICON AND SELENIUM LOW CURRENT TYPES TO 1 AMP.

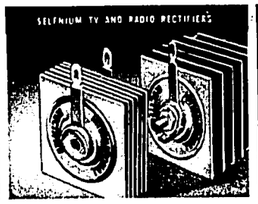


*SPECIAL MILITARY TYPES Special configurations and high reliability rectifiers for military applications may be obtained under our Prescribed Reliability Program. Address inquiry to: Military Products Dept.

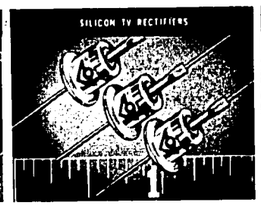


**Ratings: 100 to 600 PIV, Up to 500 ma.**
Specifically designed for missile and airborne equipment applications where miniaturization and reliability are prime factors. Hermetically sealed, all-welded, pigtail lead construction. Manufactured to meet the most rigid military requirements. Request **Bulletin SR-203**

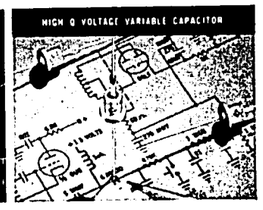
**Ratings: 50 to 600 volts PIV • 250 to 750 ma.**
An extensive line of silicon power diodes for military and industrial applications featuring all-welded, hermetically sealed construction. All designed and manufactured to meet the most rigid military requirements. For complete technical data, write for **Bulletin SR-202.**



**Ratings: 50 to 600 volts PIV • 400 ma. to 1 amp.**
Industrial and military types including the 1N253, 1N254 and 1N255. Stud mounted, hermetically sealed, all-welded construction. Operating temperature range: –55°C to +150°C. Designed and manufactured to meet most rigid military specifications. **Bulletin SR-135C**

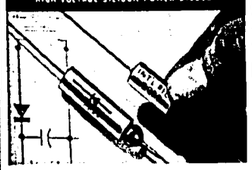


**Ratings: 20 to 160 volts • 100μa to 11 ma.**
Ideal components for bias supplies, sensitive relays, computers etc. High resistance, (10 megohms and higher at —10 volts). Excellent linear forward characteristics. Extremely small, low in cost. Encapsulated to resist adverse environmental extremes. **Bulletin SR-163.**

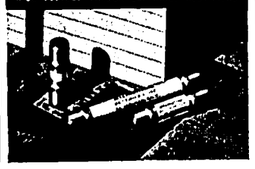


**Ratings: From 100 ma. to 50 Amps.**
Low forward voltage drop and low leakage characteristics make this series ideal for a wide variety of power applications. For details request **Bulletin C-349,** (26 volt cells); **Bulletin SR-160,** (45 to 52 volts per cell) and **Bulletin SR-152,** on high current density cells.

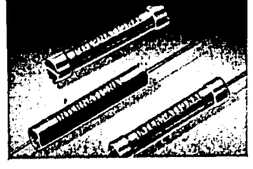
**Ratings: 25 to 156 volts AC, 50 to 1,200 ma. DC**
The widest range in the industry! Designed for Radio, Television, TV booster, UHF converter and experimental applications. Input ratings from 25 to 156 volts AC and up. DC output current 50 to 1,200 MA. Write for application information. **Bulletin ER-178-A**



**Ratings: 400 PIV, up to 750 ma.**
SD-500. A hermetically sealed, all-welded silicon junction rectifier offering maximum reliability in the high temperatures encountered in TV applications. Pigtail leads eliminate the need for brackets, blocks, etc., simplify installation. For complete data: **Bulletin SR-201**



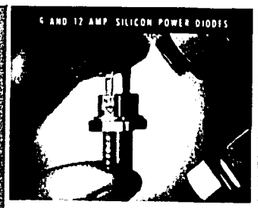
**Ratings: Q of 1000, 200 PIV DC**
*Semicon*'s small size, light weight, high reliability and low power requirements make it ideal for automatic frequency control, frequency modulation oscillators and filter networks. All-welded hermetically sealed, shock-proof housing. Request **Bulletin SR-205.**



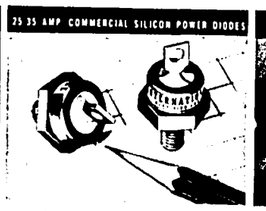
### SILICON AND SELENIUM HIGH VOLTAGE TYPES

**Rating: 600 to 2400 volts PIV • 100 to 125 ma.**
Three types available. Hermetically sealed, pigtail construction. Style J rated at 600 to 1000 volts PIV at 125 ma. **Bulletin SR-138B** Styles K and L with PIV ratings from 600 to 2400 volts at 100 ma. dc output current are described in technical detail—**Bulletin SR-137.**

**Ratings: 1000 to 20,000 volts PIV @ 45 to 440 ma.**
Especially suited for miniaturized military equipment where optimum reliability is a prime factor. Standard types for normal convection cooling and high current types for forced air or oil cooling. Hermetically sealed, metallized ceramic housing. Request **Bulletin SR-225.**

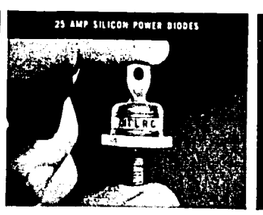


**Ratings: 20 to 20,000 volts • 0.2 to 195 ma.**
Designed for long life and reliability in half-wave, voltage doubler, bridge, center-tap circuits, and 3-phase circuit types. Phenolic cartridges and hermetically sealed types available. Operating temperature range: –65°C to +100°C. For details specify **Bulletin H-2.**

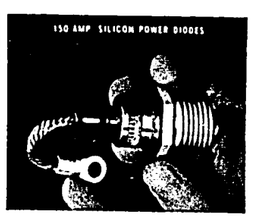


**Ratings: 65 to 600 ma • 1500 to 6000 PIV.**
Highly reliable series of tube replacement rectifiers rated from 1500 to 6400 PIV; 65 to 600 ma (including the ST-7 replacement for the M6 Tube) offer the superior characteristics of silicon on a wide range of high voltage applications.
For complete data: **Bulletin SR-209.**

## POWER TYPES FOR INDUSTRIAL AND MILITARY APPLICATIONS



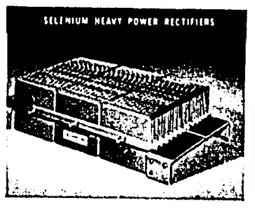
### SILICON AND SELENIUM MEDIUM CURRENT TYPES TO 150 AMPS.



**Ratings: 6 and 12 Amps • 50 to 500 PIV.**
Precision controlled diffusion process insures optimum operation and high uniformity of characteristics over the entire operating temperature range. Full 6 or 12 ampere output current over a PIV range from 50 to 500 volts. Rugged, all-welded construction.
**Bulletin XSR-308.**

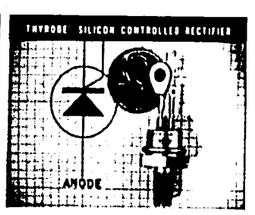
**Ratings: 25 to 35 Amps • 50 to 500 PIV.**
50 to 500 PIV Rated "Quad Sealed" power diodes are low in cost yet provide extremely stable operation on a wide range of commercial applications. 4 Layer "Quad-Seal" process assures high resistance to humidity, shock, vibration and temperature extremes.
**Bulletin SR-310.**

**Rating: 50 to 500 volts PIV • 25 to 45 Amps.**
Advanced ceramic techniques assuring excellent thermal characteristics and mechanical stability are used in the production of these highly reliable, hermetically sealed rectifiers for military or industrial applications. For complete technical data, request **Bulletin SR-304**



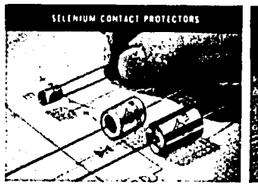
**Ratings: 50 to 800 volts PIV • 45 to 150 Amps.**
An extensive series of standard and reverse polarity types. Optional mounting bases including machine thread and pipe thread types. Machine thread base types: **Bulletin SR-300,** Pipe thread base types. **Bulletin SR-301,** Complete stack assemblies: **Bulletin SR-302**

### SILICON, SELENIUM AND GERMANIUM HIGH CURRENT TYPES TO 670 AMPS. PER JUNCTION

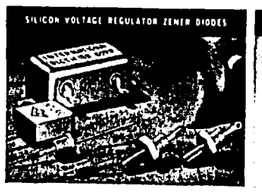


**Ratings: 50 to 500 volts PIV • 75 to 250 Amps.**
Standard and reverse polarity types offered in a series of machine thread and pipe thread mounting styles. Complete assemblies in all circuit configurations also available. Rugged construction and hermetic sealing assure long life and reliability. Ask for **Bulletin SR-305**

**Ratings: 6 to 30,000 volts • 50 to 2,300 Amps.**
Specifically designed for industrial DC power needs. Patented construction features assure long life. Descriptive bulletins available are: **Bulletin C-349,** (26 volt cells); **Bulletin SR-160,** (45 to 52 volts per cell) and **Bulletin SR-152,** on high current density cells.

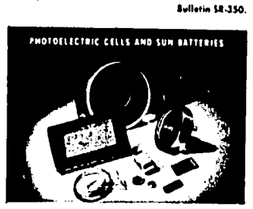


**Ratings: 500 amperes • 26 to 66 volts rms**
High capacity junctions especially designed for high-current, low-voltage electrochemical installations. Air cooled, these hermetically sealed junctions provide efficiency to 98.5%. Cast aluminum airfoil housing effects maximum heat transfer. Request **Bulletin GPR-25A.**



**Ratings. 10 Amps • 20 to 200 PIV.**
A completely new miniature control device capable of replacing the thyratron and similar units that proportionately control power to a load from an ac source. Units currently available with output currents up to 10 amps, PIV ratings from 20 to 200 volts.
**Bulletin SR-350.**

### SPECIAL SEMI-CONDUCTOR DEVICES



**Complete series of AC and DC types.**
Designed to eliminate arcing and erosion across the contacts of relays, switches, etc. A complete series in each of three basic types: diode type, cartridge type and hermetically sealed types for industrial application. For complete data: **Bulletin SR-150-A**

**Ratings: From 600 milliwatts to 10 watts**
A complete series in 6 types. Miniature single junction types, multiple junction types and double anode units. 750 milliwatt and 1 watt types: **Bulletin SR-251,** 3.5 and 10 watt types: **Bulletin SR-252,** Multiple junction 5 watt types: SR-253, Double anode types: SR-254

**Voltage Regulation: ±0.01%**
Built to withstand environmental extremes, and operable up to 125°C, these miniature, highly stable reference packs provide output voltages of either 8.4 or 16.8 volts dc—are available in 6 distinct types allowing operation from varied power sources.
Request **Bulletin SR-401.**

**(Wide range of silicon and selenium types.)**
Self-generating cells available in standard and custom sizes, mounted or unmounted. For details on wide selection of selenium types, request **Bulletin PC-649A.** Silicon solar cells with efficiencies as high as 10%. Designed to rugged military specifications. **Bulletin SR-275A.**

# International Rectifier Corp.

**EXECUTIVE OFFICES: EL SEGUNDO, CALIF.**

BASIC BUILDING BLOCKS FROM KEARFOTT

## FLOATED RATE INTEGRATING GYROS

Specifically designed for missile applications, these Kearfott miniature gyros operate efficiently at unlimited altitudes. Their outstanding accuracy and performance make them superior to any comparably-sized units on the market. Hermetically sealed within a thermal jacket, these gyros are ruggedly designed and completely adaptable to production methods. Performance characteristics that are even more precise can be provided within the same dimensions.

**TYPICAL CHARACTERISTICS**

Mass Unbalance:
- Along Input Axis: 1.0°/ hr maximum untrimmed

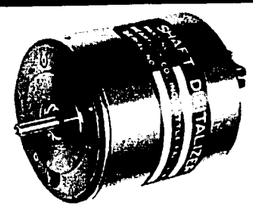
Standard Deviation (short term):
- Azimuth Position: 0.05°/hr
- Vertical Position: 0.03°/hr

Drift Rate Due to Anisoelasticity
- Steady Acceleration: .015°/hr./g² maximum

Vibratory Acceleration: .008°/hr./g² maximum

Damping:
- Ratio of input angle to output angle is 0.2

Characteristic Time: .0035 seconds or less



Weight: 0.7 lbs.

Warm-Up Time: 10 minutes from −60°F

Life: 1000 hours minimum

*Write for complete data.*

BASIC BUILDING BLOCKS FROM KEARFOTT

## ANALOG-TO-DIGITAL CONVERTERS

Kearfott's rugged shaft position-to-digital converters are resistant to high shock and vibration and high and low temperature environments. Ideally suited for missile applications, these converters are available for many uses, including latitude, longitude, azimuth or conventional angular shaft displacement conversion and decimal count conversion. Exclusive drum design provides large conversion capacity in smallest size. Combination counter converter assemblies for both visual and electrical readout also available.

**TYPICAL CHARACTERISTICS**

Kearfott Unit No. ..... P1241-11A
Code ..... Cyclic Binary
Range ..... 0-32,768 ($2^{15}$)
Bits per Revolution ..... 16
Revolutions for Total Range ..... 2,048
Volts D.C. ..... 10.5
Current (ma.) ..... 20
Inertia (gm. cm.²) ..... 20
Unit Diameter (in.) ..... 1 7/16
Unit Length (in.) ..... 3
Life 10⁸ Revolutions or $10^3$ hours
Static Torque (in.-oz.) .. 2 (break) 1 (running)
Weight (oz.) ..... 5
Maximum Speed (RPM) ..... 600

*Write for complete data.*

BASIC BUILDING BLOCKS FROM KEARFOTT

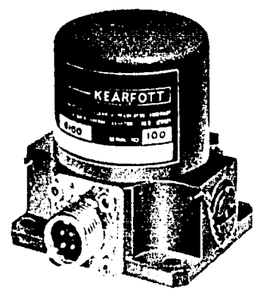
## 20 SECOND SYNCHRO

This synchro, just one of a broad line offered by Kearfott, provides the extreme accuracy required in today's data transmission systems. Kearfott synchro resolvers enable system designers to achieve unusual accuracy without the need for 2-speed servos and elaborate electronics. By proper impedance, matches up to 64 resolver control transformers can also operate from one resolver transmitter.

**TYPICAL CHARACTERISTICS — SIZE 25**

| | Transmitter | Control Transformer |
|---|---|---|
| Type Resolver | | |
| Part Number | Z5161-001 | Z5151-003 |
| Excit. Volts (Max.) | 115 | 90 |
| Frequency (cps) | 400 | 400 |
| Primary Imped. | 400/80° | 8500/80° |
| Secondary Imped. | 260/80° | 14000/80° |
| Transform. Ratio | .7826 | 1.278 |
| Max. Error fr. E.Z. | 20 seconds | 20 seconds |
| Primary | Rotor | Stator |

*Write for complete data.*



**Kearfott is your most dependable source for a complete line of servo and synchro components, gyros, analog and digital computers and their components, ground support equipment and guidance systems.**

For details, circle #120 on Reader Service Card

BASIC BUILDING BLOCKS FROM KEARFOTT

## ELECTROHYDRAULIC SERVO VALVE

Kearfott's unique approach to electrohydraulic feedback amplification design has resulted in a high-performance miniature servo valve with just two moving parts. Ideally suited to missile, aircraft and industrial applications, these anti-clogging, 2-stage, 4-way selector valves provide high frequency response and proved reliability even with highly contaminated fluids and under conditions of extreme temperature.

**TYPICAL CHARACTERISTICS**

Quiescent Flow ..... 0.15 gpm
Hysteresis .. 3% of rated current
Frequency Response 3 db @ 100 cps
Supply pressure....500 to 3000 psi
Temperature-Fluid & Ambient −65° F to +275° F
Flow Rate Range .... .3 to 10 gpm
Weight ..... 10.5 ounces

*Write for complete data.*

BASIC BUILDING BLOCKS FROM KEARFOTT

## PRECISE ANGLE INDICATOR

Consisting of an angle position indicator, motor and servo amplifier, this small, versatile, rack panel mounted unit provides angular position indications for laboratory, production and field use. Input signals proportional to unknown angular position of synchro device being measured are resolved as an error voltage, which is amplified and used to drive an internal servo loop to null. Counter mechanism then provides direct visual readout of angular position.

**TYPICAL CHARACTERISTICS**

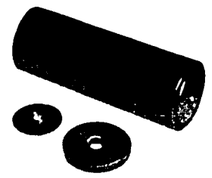
Input Signal: $S_1$, $S_2$, and $S_3$ of external synchro transmitter.

Repeatability: Within 0.6 minute in either a clockwise or counterclockwise direction for any angular position.

Readability: 0.5 minute through full range from zero to 360° Rotation is continuous.

Accuracy: ± 6 minutes in the standard unit. Other accuracies available on request.

Sensitivity: 0.5 minutes maximum.



Slewing Speed: Phase sensitive, 180° in 7 seconds.

Input Voltages: 115 volts, single phase, 400 cycles, 23 VA max.

Size: Standard Rack Mounting— 1¾" x 9½" x 8½"

*Write for complete data.*

BASIC BUILDING BLOCKS FROM KEARFOTT

## FERRITES

Kearfott's Solid State Physics Laboratory formulates, fires and machines permanent magnet ferrite materials of various compositions. Typical high-efficiency array utilizes Kearfott PM-3 ferrite material with specially designed pole pieces to produce a design both smaller and lighter than other arrays of equivalent magnetic field strength. Because magnets may be custom engineered to specific requirements, user is not restricted to stock magnet types, thereby providing greater latitude in parameters for focusing arrays. Pole pieces may also be provided according to specification, with the added assurance that, because of special Kearfott design techniques, B axial magnetic fields approximately 10% higher than those generally obtained in standard types may be produced.

**TYPICAL CHARACTERISTICS**

| | |
|---|---|
| Peak Magnetic Field Strength | 1200 gauss |
| Period | 0.560 in. |
| Length | 5.64 in. |
| Inside Diameter of Pole Pieces | 0.400 in. |
| Outside Diameter | 2.0 in. |
| Weight | 3.2 pounds |

*Write for complete data.*

# FAIRCHILD DIFFUSED SILICON TRANSISTORS

**Providing an unmatched combination of speed, power and reliability in computer switching and in RF and video amplifiers and oscillators.** Today's widespread preference for diffused silicon transistors in high-performance, high-reliability applications has resulted from their unique combination of characteristics: very high gain-bandwidth product, large power dissipation, low saturation resistance, uniformity of parameters and outstanding reliability (300°C stabilization is standard Fairchild production practice). Their high performance applies over a very wide range of current, frequency and temperature, hence one Fairchild type can replace numerous earlier, more restricted types. Fairchild pioneered large-scale production of diffused silicon transistors and today offers the broadest line.

| Types | Description | JEDEC Outline | $f_T$ Typical | $P_C$ @ 25°C Case Temp. | $P_E$ @ 25°C Free Air Ambient | $h_{FE}$ Min. | $h_{FE}$ Max. | $h_{FE}$ Cond. $I_C$ | $h_{FE}$ Cond. $V_{CE}$ | $V_{CER}$ | $V_{CBO}$ | $V_{EBO}$ | $V_{BE}$SAT (Max.) | $V_{BE}$SAT Cond. # FAIRCHILD DIFFUSED SILICON PLANAR DIODES

You can now get volume delivery — in any quantity — on all types in the Fairchild diode catalog. Even the very highest performance types are now immediately available as a result of Fairchild's Planar Structure development and manufacturing breakthroughs. The combination of Fairchild's high-conductance Planar FD200 (100 mA at 1.0V; 50mμsec recovery) and Planar FD100 (2mμsec reverse recovery) will cover advanced switching applications at high and low current levels and speeds. New diffusion techniques developed by Fairchild successfully reconcile high conductance with fast switching, low capacitance and uniformity of parameters. Fairchild's Planar Structure with surface passivation assures you the ultimate in reliability in the entire Fairchild diode line.

## INDUSTRY'S NEWEST, MOST ADVANCED TYPES (FD100 & FD200) PLUS THIS BROAD RANGE OF ESTABLISHED 1N NUMBERS*

# CHESTER

## SPECIALISTS IN QUALITY CABLE CONSTRUCTION FOR THE ELECTRONIC INDUSTRY

**Single conductors or any number of pairs . . . for coaxial and control applications.** As a "specialist in specials" Chester concentrates on meeting the increasing demands of both military and commercial electronics for plastic insulated wire and cable – particularly coaxial cables and multi-conductor constructions. Typical types are shown here. All Chester products may be varied in conducting, insulating, jacketing, shielding or armoring materials to meet your particular needs.

### RG TYPE COAXIAL CABLES

Chester RG Type Coaxial Cables are made in both military and non-military versions, single or multi-conductor. Miniature designs are available in a choice of foam and solid polyethylene or in Teflon insulations, and in variations which include double shielding with polyethylene separator and jacket for TV systems or other low loss, all weather, signal transmission applications. Military types meet MIL-C-17 and all other applicable government specifications.

### MULTI-CONDUCTOR CABLES

Chester is the recognized leader in the manufacture of multiple-conductor cables for computers and related electronic equipment. These cables can be supplied to *your* design —ranging in size from miniature to large diameters, shielded or unshielded, in a wide selection of thermoplastic insulating and jacketing materials. Any combination of appliance wire, hook-up wire and military approved wires, as well as coaxial cables and shielded conductors can be grouped to meet your specific needs. Send us your requirements for prompt engineering cooperation and price quotation.

**Complete data** on Chester's full line of wires and cables for military and commercial electronic service available on request. Ask for Bulletin No. ELT-1.

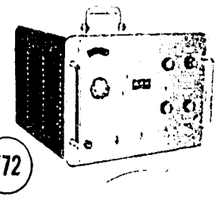
# MICROWAVE ELECTRONIC INSTRUMENTS

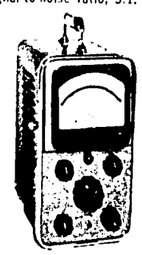
By

F X R, Inc.



### SWEEP SIGNAL SOURCE

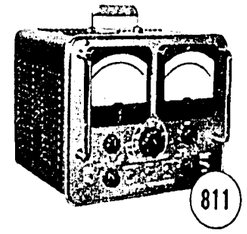
- Frequency Range: 8200 to 12400 Mc.
- Power Output: Adjustable 0 to 10 MW min.
- Sweep Rate: Linear with time —300 Mc to 300 K Mc.
- Sweep Range: Continuously adjustable 0-4.2 K Mc.
- Direct reading dial settings for upper & lower frequencies.
- Modulation: Square wave 800 to 1200 cps.
- Provisions for A.G.C.



### SIGNAL SOURCES

- Model L771B: 950 to 2000 MC.
- Model S771B: 1900 to 4000 MC.
- Model C772A: 3950 to 8200 MC.
- Model X772A: 7000 to 11,000 MC.
- Power Output: 10-100 MW CW, MAX into matched load. Variable through level-set attenuator.
- Modulation: pulse, square wave both internal and external.

### STANDING WAVE AMPLIFIER



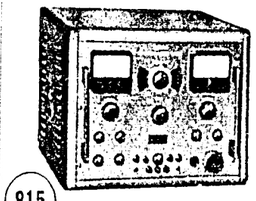
- A 5-inch removable meter with 1% linearity provides high resolution and accuracy.
- A filter, tunable between 950 and 1050 CPS, aligns instrument with output frequency of signal source.
- Range: 70 DB in six decade steps. Normal and expanded scales for VSWR and DB.
- Gain automatically maintained when switching from normal to expanded scales.
- Detectors: crystal or bolometer.
- Full scale sensitivity, 0.1 μV: signal-to-noise ratio, 3:1.

### UNIVERSAL RATIOMETER

RATIO METER AND STANDING WAVE AMPLIFIER IN ONE COMPACT PACKAGE

- Two-cycle Precision Logmeter VSWR reflectometer readings of 1.02 to ∞ on only two scales.
- VSWR, DB and reflection coefficient scales eliminate conversion tables.
- Full 70 DB standing wave amplifier operation, expanded VSWR scales.
- Crystal and bolometer operation.

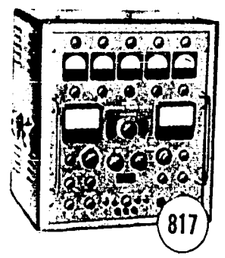
### TEMPERATURE COMPENSATED POWER METER



- Power Range, full Scale.
  - —20 DBM or 0.010 MW.
  - —15 DBM or 0.030 MW.
  - —10 DBM or 0.10 MW.
  - — 5 DBM or 0.30 MW.
  - 0 DBM or 1.00 MW.
  - + 5 DBM or 3.00 MW.
- Maximum possible accumulative error ±3%.
- FXR Series 218 Temperature Compensated Thermistor Head a required accessory.

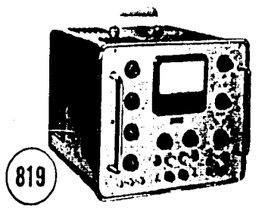
Note: Also available is the B832T, a battery powered transistorized power meter, with similar specifications.

### UNIVERSAL KLYSTRON POWER SUPPLY



- Beam: 200 to 2000 V at 0 to 125 MA, 1800 to 3600 V, 100 MA, 250 W MAX.
- Control Grid: Pos. 0 to 150 V, Neg. 0 to 300 V.
- Reflector: 0 to 1000 V.
- Regulation: 0.01%.
- Ripple: 1 MV, RMS, MAX.
- Internal Modulation: pulse, sawtooth, square wave, sinewave.

### UNIVERSAL MICROWAVE POWER SUPPLY



- Helix beam: 0 to 1500 V, 0 to 100 MA, 1700 to 2500 V, 0 to 100 MA, 2500 to 3500 V, 250 W MAX.
- *Grid 1: 0-300 V DC, 0 to 5 MA.
- *Grid 2 (reflector): 0-1200 V DC, 0 to 1 MA.
- *Grid 3 (focusing electrode): 0 to 750 V DC, 0-1 MA.
- *Grid 4 (focusing electrode): 0 to 500 V DC, 0-1 MA.
- Collector: 0-300 V DC, 0-100 MA.
- *Anode: 0-600 V DC, 0-60 MA.
- Filament: 0-15 V DC, 0-3 AMP at 20 W MAX.
- Regulation: 0.005%, Ripple: 3 MV.

*May be internally modulated: pulse, sawtooth, square wave, sinewave.

### KLYSTRON POWER SUPPLY

- Beam: 300-1000 V at 85 MA. Grid: —300 to —150 V at 0 to 5 MA. Built-in limiting resistor.
- Reflector: 0-900 V at 10-20 μA.
- Regulation: 1%.
- Internal Modulation: pulse, sawtooth, square wave.

THAT FANSTEEL'S SHOULDER AND CURL DESIGN* PROVIDES THE **BEST** METHOD OF SEALING A TANTALUM ELECTROLYTIC CAPACITOR

BEFORE TEST AFTER TEST

This unretouched photo (twice actual size) shows a Fansteel "PP" type tantalum capacitor before and after being subjected to internal pressures of 600 psi. As shown, the test resulted in a stretching and deformation of the silver case, *but no failure or leakage whatsoever in the seal.*

***What Every Designer and Engineer Should Know About This Seal***

FANSTEEL

FANSTEEL METALLURGICAL CORPORATION North Chicago, Ill., U S A

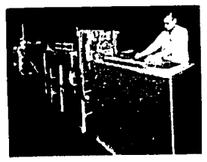
# NEW! PRECISION HERMETIC SEALS



**DAGE** precision glass-to-metal seals withstand extreme pressures, temperatures and vibration; seal out moisture; resist solvent action and corrosion to insure hermetic sealing of encapsulated components.

## DAGE delivers . . .

DAGE engineers and representatives are specialists in engineering to specifications. They will work with you at your plant or in the field to help solve problems involving the design and application of glass-to-metal seals.

New controlled atmosphere furnace permits production of 24,000 precision hermetic seals hourly. It is typical of the highly specialized equipment that enables Dage to achieve laboratory precision in volume production.

Dage precision hermetic seals are produced under the same rigid production standards as the complete line of Dage coaxial and triaxial cable connectors. For further information, write or phone . . .

*complete line of triaxial connectors for*

- isolated ground systems
- high impedance probe assemblies
- two separate grounds
- remote switch-to-ground situations
- two signals in same cable

**DAGE delivers...**

The emphasis DAGE places on engineering services is unique even in the electronics field.

DAGE engineers and representatives are specialists in engineering to specifications. "On call" at all times, they will work with you at your plant or in the field to help solve problems involving connector design and application.

DAGE offers facilities for the design, production and testing of coaxial and triaxial connectors and precision hermetic seals. The new DAGE Facilities Brochure gives full details . . .

## re-entrancy miniature

**REMI means the best in... REmovability, REliability, REentrancy**

- Mechanical stresses are confined between metallic elements rather than between metal and plastic insulation.
- Sleeve, which is part of connector block, allows for interchangeability of male and female contacts on the same connector, at will.
- Additional polarization and keying can be accomplished with ease by use of dummy pins.
- Conforms to Mil Spec MIL-C-25955.
- Contacts are removed from mating or terminal side of connector at your discretion without tools.
- Terminals are designed to meet all types of crimp-on requirements. Terminals can be provided with solder cup, turret, eyelet design.
- All REMI design features combine to offer the ultimate in reliability under extreme environmental conditions.

## for using the IRE DIRECTORY

A few minutes' study of the basic layout of the IRE DIRECTORY will help you to find the information for which you are looking more quickly and more accurately. At first glance, the IRE DIRECTORY may seem to be confusing, but by using the various portions of the book as listed below, you will find your way around easily, and will discover that it is actually a very simple arrangement, and a much more logical one than a purely alphabetical terminology listing.

***PINK SECTION*** at the front of the products and firms section contains a terminology index listing every product, major and minor, for which a list of manufacturers is given. Page numbers refer you to the page on which the listings for that product begin. Following this alphabetical index is a copy of the questionnaire which is sent to the firms who have furnished us with product information. A quick look through this questionnaire will help greatly in understanding the product arrangement. At the top of the first page of the pink section is a small index referring you to the opening page of the complete-data spread section, the alphabetical directory, and each of the three product directories.

***THE COMPLETE DATA SPREAD SECTION*** (pages 1-134) contains product advertisements of great usefulness to the reader. Most of these advertisements are two pages or more, and all of them contain complete information on the products manufactured by the advertising firms—specifications, prices, illustrations, and suggested applications.

***ALPHABETICAL DIRECTORY OF MANUFACTURERS*** (pages 135-240) contains a list of 3,843 firms representing the majority of buying and selling power in the radio-electronic industry. Each firm listing contains the complete mailing address and telephone number for the firm. Following the state name in the firm address, a list of code numbers is given. These numbers refer to the 104 major products listed in the book (for quick reference to the meaning of the codes, use the questionnaire form in the pink section). Following the telephone number is the year in which the firm was founded, the total number of employees, the number of IRE members employed, and the net radio-electronic sales during the last fiscal year.

***THE THREE DIRECTORIES OF PRODUCTS ARE:***

1. Complete Equipment
2. Components
3. Materials and Services

This breakdown into three directories saves you from traveling through many products in which you are not interested at the moment, and helps you to turn immediately to the listings for the type of product you want, following a straight line to your destination. Use the Machol edge index at the top of the first page of the pink section to locate immediately the first page of the appropriate directory, then use the Machol edge index at the beginning of each directory to find the specific product you want. You don't even have to know the page number—the index will find it for you automatically!

***104 MAJOR PRODUCTS*** are listed within these three Directories. Each product listing contains a number of sub-headings so that you may know specifically what each firm makes. To interpret the code numbers shown after each firm's listing, consult the first page of that product class, where the sub-headings are defined. You will note that advertisements are positioned throughout the book in the most appropriate listing section, so that the advertisement for a relay manufacturer will appear in the relay section, to help you with further information on his product. Every advertiser's listing shows you the page number on which his advertisement may be found, and you will derive more value from this book if you consult these advertisements for facts you cannot find in the listings.

***COMPLETE ADDRESS LISTINGS*** are given only for advertisers in this section. If you wish to locate the address and telephone number for any other firm, it will be necessary to use the alphabetical directory.

***THE DISTRIBUTION SECTION*** is class 105, the last class in the book. This section contains a list of 2014 manufacturers representatives, distributors and jobbers, grouped geographically. See page 707 for a more complete explanation of the use of this section.

***ADVERTISER'S INDEX*** appears on pages 129-134 and on pages 766-768.

## How to Use the Machol Edge Index

High speed reference is a major objective of the IRE DIRECTORY. To this end we have adopted the Machol Edge Index system, and these indexes:

Advertisers Index, pages 129-134 and 766-768.

Key to Products, Pink Section.

Index to Spreads, 1.

| | |
|---|---|
| 1 | COMPLETE DATA SPREADS |
| 135 | ALPHABETICAL DIRECTORY |
| 241 | DIRECTORY I COMPLETE EQUIPMENT |
| 359 | DIRECTORY II COMPONENTS |
| 597 | DIRECTORY III MATERIALS & SERVICES |

Detailed Machol edge indexes will be found on the first page of the alphabetical Directory and each of the three major product Directories, pages 135, 241, 359, and 597. The Machol system will help you find both alphabetical and product sections swiftly.

### HOW TO USE

1. Bend the Directory almost double with the front cover page on the inside.
2. Hold in your right hand with your four fingers near to the bound edge and your right thumb near the middle of the open side of this page.
3. From the heavy or light line symbol adjacent to the subject you seek, run your eyes across the page edges until you reach the horizontally corresponding symbol.
4. OPEN THERE!

PINK SECTION
gives a guide to the products and services listed in the Product Directories.

COMPLETE DATA SPREADS 1

ALPHABETICAL DIRECTORY 135

PRODUCTS AND SERVICES
I. Complete Equipment 241
II. Components 359
III. Materials & Services 597

○ ○ ○

For complete listings of over 900 major and minor products listed in the "Products and Services" sections of this Directory, see the pink section preceding page 1.

Aeroprojects Inc., 310 E. Rosedale Ave., West Chester, Pa., 96, Tel: OWen 6-4710, Yr: 1949, Emp: 120, ▲5, $200,000

Aeroquip Corporation, 300 S. East Ave., Jackson, Mich., 83, 91, 99, Tel: STate 2-0361, Yr: 1940, Emp: 2100, $100,000

Aerotronic Assoc. Inc., P.O. Box 367, Contoocook, N.H., 10, 14, Tel: COntoocook 190-3, Yr: 1958, Emp: 56, $240,000

Aerovox Corp., 740 Belleville Ave., New Bedford, Mass., 11, 14, 43, 64, 69, 71, Tel: WYman 4-9661, Yr: 1922.

Aetna Electronics Corp., Readington Rd., North Branch, N.J., 3, 14, 30, 45, Tel: RAndolph 5-1000, Yr: 1954, Emp: 7, ▲1, $100,000

**See ad on page 277**

Affiliated Manufacturers, Inc., Box 211, Oldwick, N.J., 4, 96, Tel: OLdwick 211, Yr: 1957, Emp: 6, $200,000

Aid Associates, 972 Elsinore Ct., Palo Alto, Calif., 88, 100, Tel: DAvenport 4-0360, Yr. 1954, Emp: 12, ▲2

**Ainslie Corporation, 531 Pond St., South Braintree 85, Mass., 39, 83, 89, Tel: VIctor 8-0850**

**See ad on page 368**

Air Control Installations Limited, Victoria Road, Ruislip, Middlesex, England, 42, Tel: VIking 1222, Yr: 1936, Emp: 600

**Air-Marine Motors, Inc., 369 Bayview Ave., Amityville, N.Y., 42, 60, Tel: AMityville 4-3700, Yr: 1950, Emp: 155, ▲4**

**See ad on page 386**

Air-Maze Corporation, Subsid. Rockwell-Standard Corp., 25000 Miles Road, Cleveland 28, Ohio, 40, 84, 102, Tel: MOntrose 2-8000, Yr: 1925, Emp: 490

Air-O-Tronics Engineering Co., P.O. Box 31, Lancaster, Calif., 55, 71, 96, Tel: WHitehall 3-1651, Yr: 1955, Emp: 14, ▲2

Air-Shields, Inc., Hatboro, Pa., 14, 84, 89, Tel: OSborne 5-5200, Yr: 1938, Emp: 100, ▲2

Airborne Accessories Corporation, 1414 Chestnut Ave., Hillside 5, N.J., 4, 30, 38, 43, 47, 52, 60, 63, Tel: MUrdock 8-0250

Airborne Instruments Laboratory, Div. Cutler-Hammer, Inc., Comac Road, Deer Park, L.I. N.Y., 3, 4, 14, 16, 20, 21, 23, 27, 28, 38, 39, 40, 64, 83, Tel: MYrtle 2-6100, Yr: 1945, Emp: 3000

**Aircom, Inc., 48 Cummington St., Boston 15, Mass., 21, 36, 38, 39, 40, 46, 52, 63, 76, 80, 83, Tel: COpley 7-9115, Yr: 1954, Emp: 25, ▲2**

**See ad on page 309**

Aircraft Armaments, Inc., Cockeysville, Md., 9, 21, 30, 36, 39, 63, 83, 84, 88, 94, Tel: NOrmandy 6-1100, Yr: 1950, Emp: 800, ▲23, $4,500,000

Aircraft Electronics, 6219 South Sears Blvd., Tucson, Ariz., 2, 12, 14, 17, 22, 32, 38, 57, 63, 76, 89, 94, 96, Tel: MA 4-6348, Yr: 1955, Emp: 3, ▲1, $10,000

Numbers after address show the product and service classes in which firm appears. These classified listings follow the Alphabetical Directory. For complete instructions on use of this Directory, see pink sheets preceding catalog section. Yr = Year of founding. Emp = Total employees. ▲ = Number of IRE members. $ = Net radio-electronic sales during last fiscal year.

Aircraft Radio Corp., Boonton, N.J., 1, 28, 39, 46, 52, 55, 63, 64, Tel: DEerfield 4-1800, Yr: 1928, Emp: 650, ▲50, $15,000,000

Airdesign Corp., 600 W. Washington St., Norristown, Pa., 38, 47, 52, 55, 63, 73, 76, 85, 104, Tel: BRoadway 9-4100, Yr: 1942, Emp: 75, ▲1, $325,000

Aireco, Inc., 2323 Second Ave., Carman, Schenectady 3, N.Y., 14, 88, Tel: ELgin 5-6545, Yr: 1940, Emp: 10, $225,000

**Airflyte Electronics Co., 537 Ave. "A", Bayonne, N.J., 9, 36, 46, 64, 72, 89, 91, Tel: HEmlock 6-2230, Yr: 1949, Emp: 75, $600,000**

**See ad on page 408**

Airmec Limited, High Wycombe, Bucks., England, 2, 3, 4, 9, 14, 24, 25, 28, 33, 38, 63, 72, Tel: HIgh Wycombe 2501, Emp: 300

**Airpax Electronics Incorporated, Cambridge Div., Jacktown Road, Cambridge, Md., 36, 38, 45, 47, 72, 76, Tel: AC 8-4600, Yr: 1948, Emp: 350, ▲20, $4,000,000**

**See ad on pages 82-83**

**Airpax Electronics Incorporated, Seminole Div., Fort Lauderdale, Fla., 3, 4, 9, 23, 30, 38, 45, 47, 58, 60, 63, 72, 76, Tel: LUdlow 3-6160, Yr: 1948, Emp: 300, ▲25**

**See ad on pages 82-83**

**Airtec, Inc., 139 E. First Ave., Roselle, N.J., 21, 38, 39, 40, 46, 52, 63, 72, 76, 80, 83, 88, 102, Tel: CHestnut 5-2990, Yr: 1956, Emp: 28, $650,000**

**See ad on page 589**

Airtron, Inc., Div. Litton Industries, Inc., 200 E. Hanover Ave., Morris Plains, N.J., 20, 21, 38, 39, 40, 46, 52, 63, 72, 76, 80, 83, Tel: JEfferson 9-5500, Yr: 1946, Emp: 750, ▲50

Airtronics International Corp., 6900 West Road 84, P.O. Box 8576, Fort Lauderdale, Fla., 3, 4, 14, 33, 38, 50, 51, 64, 94, 98, Tel: LU 3-4541, Yr: 1958, Emp: 126

Ajax Condenser Co., Inc., 932 West Wrightwood, Chicago 14, Ill., 43, Tel: GRaceland 7-0660

# BALLANTINE ELECTRONIC VOLTMETERS

## Famous since 1935 for Accuracy, Sensitivity and Reliability

Ballantine Voltmeters feature the same accuracy of reading on a logarithmic voltage scale. Alone or in combination with Ballantine accessories, they may be used to measure AC voltages from 20 microvolts to 28,000 volts, DC voltages from 10 microvolts to 100 volts and AC and DC currents from 0.1 microampere to 10 amperes.

Prices for modifications in mountings, finishes, special scales, terminal arrangements, etc., will be furnished on request.

All prices shown are net, F.O.B. Boonton, New Jersey, and are subject to change without notice. Write or call for a brochure on any of the instruments listed below.

| MODEL | FREQUENCY RANGE | VOLTAGE RANGE | INPUT IMPEDANCE | ACCURACY OVER ENTIRE SCALE | APPLICATIONS | PRICE |
|---|---|---|---|---|---|---|
| 300 Voltmeter | 10 CPS–150 KC | 1 MV–100 V | 0.5 meg shunted by 30 pf | 2% | General purpose, precision laboratory AC VTVM. | $220 |
| 300-D Voltmeter | 10 CPS–250 KC | 1 MV–1000 V | 2 meg shunted by 15 or 25 pf, depending on voltage range | 2% | General purpose, precision laboratory AC VTVM, a product improvement on the Model 300. | $255 |
| 300-E Voltmeter | 30 CPS–100 KC | 300 μV–300 V | 2 meg shunted by 20 or 30 pf, depending on voltage range | 2% | For mounting on 9½ inch relay rack. Rear connections for input, power, and decade switching. | $255 |
| 300-G Voltmeter | 10 CPS–250 KC | 1 MV–1000 V | 2 meg shunted by 15 or 25 pf, depending on voltage range | 1% 20 CPS-20 KC, 1 MV-250 V; 2% elsewhere | General purpose, precision laboratory AC VTVM, the most precise instrument in the Ballantine line. | $315 |
| 302-C Voltmeter, Battery Operated | 2 CPS–150 KC | 100 μV–1000 V | 2 meg shunted by 10 or 25 pf, depending on voltage range | 3% 5 CPS–100 KC; 5% elsewhere | Portable, battery-operated; no hum, with gain to 60 db. May be used on ungrounded or symmetrical circuits. | $255 |
| 305-A Voltmeter Peak Reading | 5 CPS–500 KC, sine waves. Pulses, 0.5 μs up and 5 PPS up | 1 MV–1000 V Peak or Peak-to-Peak | 2 meg shunted by 10 or 25 pf, depending on voltage range | 2%, sine waves 20 CPS to 200 KC; 4% elsewhere. 3% pulses above 3 μs and 100 PPS, and up to 5% other conditions | Measures Peak or Peak-to-Peak value of any repetitive waveform, distorted or undistorted sinewaves, or pulses. Its operating mode can be selected to respond to a peak to peak and positive or negative peak of the waveform. | $395 |
| 310-A Voltmeter | 10 CPS–2 MC or 5 CPS–4 MC as a null detector | 100 μV–100 V (Down to 40 μV at reduced accuracy) | 2 meg shunted by 9 or 19 pf, depending on voltage range | 3% 15 CPS–1 MC; 5% elsewhere | Multi-purpose broadband VTVM for measurements such as low and high-level acoustics, low-level vibration, carrier telephone transmission, ultrasonic, and rf measurements. For use as an extremely sensitive null detector for signals as low as 10 microvolts. | $250 |
| 314 Voltmeter Wide Band | 15 CPS–6 MC | 1 MV–1000 V (100 μV–1 MV without probe) | 11 meg shunted by 8 pf with probe, or 1 meg shunted by 25 pf without probe | 3% 15 CPS–3 MC; 5% elsewhere | Wide-range unit of great sensitivity to facilitate development and servicing of equipment in video applications, and R.F. heating, vibration, ultrasonics, piezo-electricity, etc. | $300 |
| 316 Voltmeter Very Low Frequency | 0.05 CPS–30 KC | 0.02 V–200 V Peak-to-Peak | 10 meg shunted by 17 or 40 pf, depending on voltage range | 3% | For development, design and routine testing of automatic control systems involving low frequency servomechanisms and where sub-audio frequencies down to 0.01 cps are encountered. Minimum pointer "flutter" down to 0.05 cps. | $330 |
| 320 Voltmeter True RMS | 5 CPS–500 KC | 100 μV–320 V | 10 meg shunted by 8 or 18 pf, depending on voltage range | 3% 15 CPS–150 KC; 5% elsewhere | Determines true root-mean-square magnitudes of periodic complex waves or voice potentials. Built-in calibrator. Crest factor range at full scale is 4.5 for high voltage scale and 15 for low voltage scale. Immune to severe overload. | $445 |
| 220-C Decade Amplifier, Battery Operated | 10 CPS–150 KC | Amplifies precisely 10 times or 100 times, as selected | 5 meg shunted by 15 pf | 2% | To increase sensitivity of Model 300 to 20 μv. Provides no-hum pre-amplifier of accurate gain over wide band. Output source impedance less than 900 ohms in series with 2 μf for 10 x gain, and less than 7000 ohms in series with 2 μf for 100 x gain. | $110 |

**420 DC and AC Precision Calibrator**

Provides accurate, convenient way of calibrating voltmeters, oscillographs, and other voltage-sensitive devices. Voltage Range: 0-10 V RMS, Peak-to-Peak, or DC. Frequency: 1 KC. Accuracy: better than 0.5% above 1 MV. Distortion and Hum: less than 0.25%. Setting Resolution: approaches 0.01% above 10 MV. Output Impedance (AC): 2-20 ohms depending on range setting. Output Impedance (DC): 0-4000 ohms depending on dial setting. Price: $365

**520 Direct Reading Capacitance Meter**

Provides one of the most convenient ways of measuring capacitance over an extremely wide range of values as encountered in paper, plastic, mica, ceramic, and air-dielectric types. Capacitance Range: 0.01 pf to 12 μF. Accuracy: 2% above 0.1 pf; 5% below 0.1 pf with dissipation factors as high as 0.05. Test Frequency: 1 KC. "Go-No-Go" acceptance limit pointers may be set to any desired limits, making it easy for completely untrained personnel to make accurate selections. Price: $295

**700 Sensitive Inverter**

A stable, precise voltmeter accessory that permits the measurement of DC potentials as low as 10 microvolts by converting the DC into a precisely amplified AC signal to which a Ballantine voltmeter is responsive. Input Voltage Range: 10 μv — 100 V DC. Features a built-in calibrator of 0.25% accuracy. Accuracy: better than 1% above 100 μv; Input Resistance: 10 meg for 1:100, or 50 meg for 10:1. May be used with Ballantine series 600 Shunt Resistors to measure DC from 0.01 μa to 10 a. Price: $365

**710 Linear AC to DC Converter**

Converts an AC voltage to a precise DC voltage which can be measured with a DC device such as a Type K Potentiometer, Digital DC Voltmeter, Recorder, etc. Features accuracy better than 0.25%. Input Voltage Range: 1 MV — 1000 V. Frequency Range: 30 cps — 250 KC. Input Impedance: 2 meg shunted by 15 pf, except 2 meg shunted by 25 pf on most sensitive range. Accuracy: ±0.25% 50 cps — 10 KC; ±0.5% 30 cps — 50 KC; ±1% above 50 KC. Price: $450

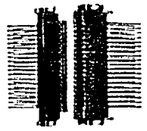
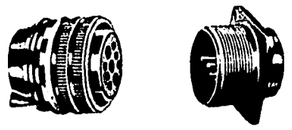
...these New Product Developments at Amphenol

MIL-C-26500 **48 SERIES**



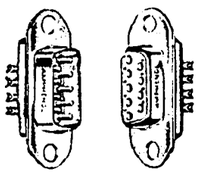
Complete family of miniature environmentally resistant connectors unaffected by 1000 hours of 200°C. Performance and design of the future!

*Micro Min*



Contacts on .050" Centers. Smallest connectors ever developed for microminiature circuitry—50% size, 80% weight reduction from standard "miniatures."

19 contacts or 38 contacts



STUB R POKE "R" 69 SERIES

*Stub R:* MIL-C-5015D "R," with nine "plus" features. *Poke R:* "R"-types with Poke Home crimp contacts. 1 cycle altitude immersion resistant.

*Min Rac 17* SERIES

Miniature rack & panel connectors with AMPHENOL-developed crimp or solder Poke Home contacts. Five insert arrangements in three shell variations.

MINNIE 67 SERIES

MINNIE family continued to expand. Addition of 67-00 wall mounted receptacles and two new hermetically sealed configurations in industry's first true miniature "E" types.

Seven New Cable Additions

Teflon, Polyethylene, Polyfoam and revolutionary 1000°F cable systems. First miniature Cujak cable, other significant advances in cable art!

# SPECIALISTS IN THE 3 C's OF ELECTRONICS

## CABLES

**Complete** versatility of design plus extra reliability characterize Bendix® Cable Assemblies. Types include encapsulated or braided missile control cable, thermocouple harness, fuel cell, ground cabling, high temperature, and flat conductor cable.

## CAPACITORS

**Count** on Bendix High Temperature Capacitors for premium performance on missile and high-speed aircraft applications. Proved operation from −55°C. to +400°C. with no voltage derating and low capacitance variation.

## CONNECTORS

**Can** you use the finest electrical connectors in the business? Then try ours. Wide range of sizes and types available, including Pygmy® Miniature, Rack and Panel, QWL, and MS-R, and connectors for special applications.

*For fast service on Cables, Capacitors, and Connectors, contact:*

Get the complete story on microwave tubes and components in these two new booklets from **BOMAC**

What's new in microwave? You'll find full information in these 2 new Bomac booklets. One is a complete product catalog in a new, more convenient format (tubes are listed first by band, then by type) to make it easier and quicker for you to find the tube you want. The second booklet gives you facts and figures on Bomac's new components and test equipment. Put together, they provide a concise picture of [illegible] for 1960. Write for copies today.

# QUALITY AND

Standard, sub-miniature and high temperature electronic components for military and commercial applications.

Built to your specifications, or available from stock, in industrial quantities, at factory prices, through your local CENTRALAB distributor.

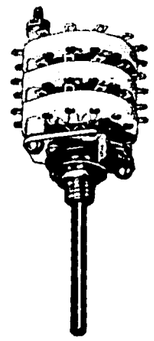
**VARIABLE RESISTORS**

1/4W. Linear Motion, wirewound 100 to 20K ohms and composition 10K to 2.5 meg. .250" x .325" x 1.250".

1/10W. Microminiature, 0.286" diam: Ultra-miniature, 0.502" diam; sub-miniature, 5/8" diam; 500 ohms to 10 megs.

1/4 W. and 1/2W. Sub-miniature—For instruments and military. 43/64" diam. 500 ohms to 2.5 megs.

1/4W. Multiple-miniature—Up to 4 variable and 9 fixed resistors on a 3/4" x 2-1/4" steatite plate. 1000 ohms to 5 megs.



1/2W. Standard—For radio, TV. Single, Twin or dual-concentric. 15/16" diam. 250 ohms to 10 megs.

1-1/2W. Wirewound—for military and instruments. 11/16" diam., 5/16" deep. 4 ohms to 30K ohms.

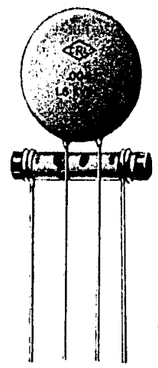
2-5W. Wirewound—For instruments and TV. Single or dual-concentric. 1-5/32" diam. 1 ohm thru 100K ohms.

*Write for Group B bulletins.*

# RELIABILITY

**ELECTRONIC SWITCHES**

Sub-miniature rotary—15/16" diam. for military and high reliability applications. Rating 0.5 amp. at 6VDC, 100 ma. at 110VAC, Laminated phenolic, steatite, single or multiple sections.



Standard rotary—1-5/16" diam. laminated phenolic or steatite insulation, single or multiple sections. Rating 2 amps. at 15VDC. 150 ma. at 110VAC. (Resistive load.)

Heavy-duty power—For transmitter, industrial control, laboratory testing, military, commercial. 2-13/16" diam. 7-1/2 amp. rating at 110VAC. 25,000 cycles minimum.

Spring return—1-5/16" diam., coil or C-type springs, phenolic, steatite, single or multiple sections.

Specialized—Lever, slide, tone, tuner sections, others.

*Write for Group P bulletins.*

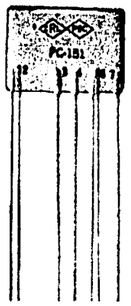
**CERAMIC CAPACITORS**

Ultra-miniature—3 to 12 VDC, 0.22—2.2 mfd.—for low power factor transistor applications.

Temperature compensating—Discs, tubulars, 150 v to 6,000 VDCW, 1 mmf.—0.1 mf. Capacitance +100 to −5250 ppm.

Bypass—Coupling—Discs, tubulars, 150 v to 6,000 VDCW, 1 mmf.—0.1 mf.

High Voltage—High Accuracy—High Voltage types, up to 30,000 VDCW. High Accuracy types, ± 1% tolerance, 500 VDCW, up to 2,500 mmf.



Trimmer—Tubular or flat. Meet JAN-C-81 specifications. 1 mmf. to 400 mmf. 500 VDCW.

Feed-thru—10—5000 mmf., 500—1,500 VDCW, bushing, shoulder, ring, eyelet, resistor-capacitor combinations.

Specialties—Stand-off, button-shape, potted, other capacitors.

*Write for Group D bulletins.*

# IN ELECTRONICS

**PACKAGED CIRCUITS**

Complete computer and Radio-TV circuits, amplifiers, oscillators, detector networks, resistor networks—including transistors, capacitors, resistors, wiring and inductance, manufactured to your specific performance limits.

PEC® circuits result in substantial savings in assembly costs. These high reliability packaged circuits can be supplied in a wide variety of terminals for printed circuit board applications.

1/2W. resistors meet applicable MIL-R-11 specifications, 50 ohms to 50 megs. Capacitors up to .01 mmf.

*Write for Group Y bulletins.*

**ENGINEERED CERAMICS**

High alumina—85%, 95%, 99%—for high frequency, high temperature applications, close tolerance (± .00025") designs. Jan I-10-L6A grade.

Grade Jan I-10-L5A steatite, Grade L2A Corderite, and Grade L2A Electrical Porcelain. For applications where high dielectric and compressive strength, high dimensional stability, low loss and low power factor are required, there is a CENTRALAB ceramic material for the job.

CENTRALAB also specializes in metalizing of ceramics, for hermetic seals or mechanical attachment of other ceramic or metal parts.

Numbers after address show the product and service classes in which firm appears. These classified listings follow the Alphabetical Directory. For complete instructions on use of this Directory, see pink sheets preceding catalog section. Yr = Year of founding. Emp = Total employees. ▲ = Number of IRE members. $ = Net radio-electronic sales during last fiscal year.

# Radar Echoes from Venus...

Continental Electronics' giant transmitter at M.I.T. Lincoln Laboratory is the most powerful on earth. With it, man has made his first contact with another planet – by bouncing a radar signal off Venus for a space round trip of 56,000,000 miles.

This is a significant forward step since it means we have pushed our radio signals a hundred times further than ever before. It means we can measure space distances with amazing new accuracy. The powerful pulses from this transmitter were beamed into space from a huge antenna 84 feet from rim to rim. It is the same radar used to sight and track earth satellites and for other space probe programs.

Continental Electronics is proud indeed to be part of this 56 million mile broadcast.

Correlation curves showing radar returns from Venus. The central peaks indicate the exact time of the radar waves from Earth to Venus and back (about five minutes). Each peak is the result of elaborate calculations by a high-speed digital computer on many thousands of tiny echoes originally beamed by Continental Electronics' transmitter

*Another Continental Electronics Contribution in Super Power Radio*

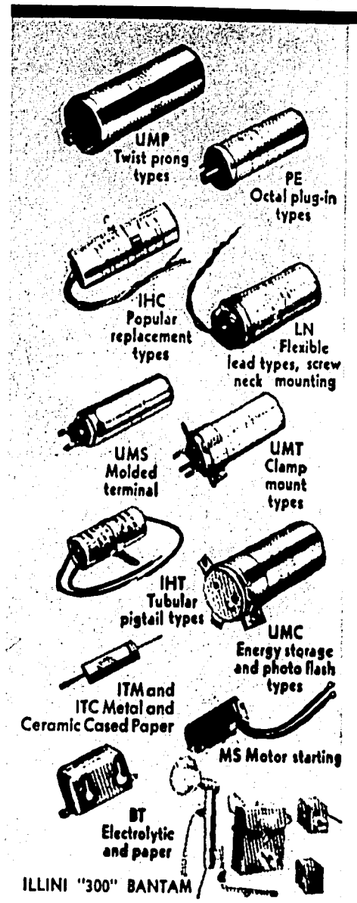
# ILLINOIS CAPACITORS

KNOWN THE WORLD OVER FOR



# Time Tested Quality

For over 25 years ILLINOIS CONDENSER COMPANY has been foremost in the development of ever greater dependability and longer life in all types of capacitors. Listed below are only a few of the more popular—and most recently developed ILLINOIS types.

**305 Miniature Electrolytic Capacitors**

A complete line for low voltage D.C. circuits. Have many advantages including Aluminum Cases patented construction; hermetically-sealed; immersion-proof; excellent life characteristics; low leakage currents; shock and vibration-resistant; ideal for applications requiring minimum size and weight.

**TYPE UMP** Standardized twist-prong type. Patented molded terminal construction for efficient, stable operation under extreme temperature ranges. Capacity ranges from 10 to 3,000 MFD and from 6 to 525 WVDC.

**TYPE PE** Hermetically sealed plug-in octal base type. Especially useful in fixed or mobile communications equipment. Operating temperature range —40°C to +85°C. Available in wide ranges of capacities and voltages.

**TYPE IHC** Popular multiple section types with flexible leads, insulating sleeves and mounting straps. Equally adaptable for original equipment or replacement purposes. Available in capacities from 10 to 250 MFD at 25 to 500 WVDC.

**TYPE LN** Extruded aluminum can type with screw neck mounting and flexible leads. Capacity ranges from 8 to 80 MFD and from 450 to 600 WVDC.

**TYPE UMS** Hermetically sealed inverted can type with screw neck mounting and molded-in terminals. Wide ranges of capacities and voltage ratings. Meets all government specs.

**TYPE UMT** Inverted can type with clamp mounting. Hermetically sealed, shock resistant with new molded terminal construction. Ideal for use in highest quality equipment. Meets all government specs. Wide capacity and voltage ranges.

**TYPE IHT** Popular tubular aluminum can, pigtail type electrolytic. Internal riveted construction. In capacity ranges of 1 to 2000 MFD and from 6 to 600 WVDC. Also available with solder lug terminals. Supplied with insulating sleeves.

**TYPE UMC** Low leakage-high capacity electrolytic for power filter packs, voltage stabilization, energy storage and photo flash. Capacity ranges up to 10,000 MFD to 50 V. and 1000 MFD at 450 V.

**TYPES IMT and SMT** Newly developed "miniature" and sub-miniature electrolytics with hermetic seals. Especially designed for printed circuits, portable equipment, transistor equipment and any application where size and weight must be kept at an absolute minimum. Capacity ranges from .5 to 100 MFD and from 3 to 50 WVDC. Ceramic case and aluminum case types.

**TYPE MS** Motor starting capacitors available in bakelite and aluminum cases. Long wire leads with terminals. Capacities to 5,000 MFD at 115, 220 and 320 VAC.

**TYPE BT** Hermetically sealed bathtub type especially designed to withstand vibration and shock. Available in electrolytic and paper capacitor types for government and commercial use.

**ILLINI 300 ELECTRONIC FLASH KIT** A new high intensity, low voltage electronic photoflash kit featuring latest advances in tube, capacitor and reflector design. 100 watt second output. Uses standard type batteries. Easily assembled, rugged, reliable and economical to operate. AC Power Pack also available.

Emp = Total employees. ▲ = Number of IRE members. $ = Net radio-electronic sales during last fiscal year.

## What types of RF CONNECTORS are you looking for?

The 19 IPC RF Connector Series shown above provide you with over 1000 individual connectors that meet varied application and environmental conditions. Whatever your requirements are in size, weight, coupling method, voltage or temperature limits, you can depend on IPC for top availability and top performance.

IPC Engineering, Laboratory, Quality Control and Manufacturing are concentrated under one roof in the most modern, best equipped facility of any connector manufacturer—a 100,000 square foot completely air conditioned plant with dust and humidity controls.

In availability, engineering service and modern manufacturing methods, IPC continues to be *first* in RF connectors.

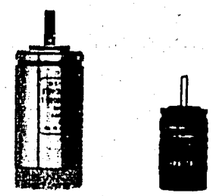
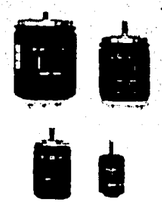
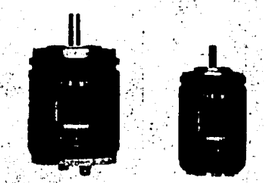
## complete lines of precision servo components



You can depend on one reliable source, American Electronics Instrument Division, for servo components that meet your highest standards of **precision performance** and **maximum reliability.** Only a manufacturer that offers **complete component experience** can assure you products of unmatched quality, accuracy and dependability. Specify from five complete lines—Resolvers, Synchros, Servo Motors, Motor Tachometers, and Stepper Motors—or call on AEI capabilities to design special servo components for your unique applications. For detailed information write the Instrument Division at the address below.



**RESOLVERS**
Sizes 8 through 32



**MOTOR TACHOMETERS**
Sizes 8 through 18

**SYNCHROS**
Sizes 8 through 23

**SERVO MOTORS**
Sizes 8 through 18

**STEPPER MOTORS**
Sizes 8 through 18

**AMERICAN ELECTRONICS, INC.**

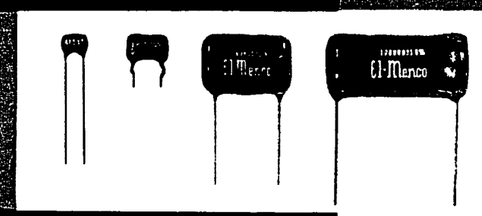
For Capacitors with GREATER RELIABILITY . . .

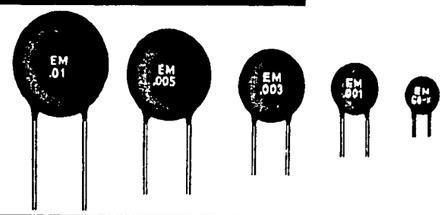


Choose El-Menco

The Capacitors You Find Wherever There's Electronics!

**EL-MENCO DUR-MICA CAPACITORS**

**Only 1 Failure Per 43,000,000 Unit-Hours!**



- It has been computed that "debugged" DM30, 10,030 M.M.F units, when subjected to 257,000 hours of life at 85°C with 100% of the rated DC voltage applied, will yield only 1 FAILURE PER 43,000,000 UNIT-HOURS!
- DM10, DM15, DM16, DM19, DM20 . . . perfect for miniaturization and for new designs using printed wiring circuits. Also available in DM30, DM42, and DM43.
- New "hairpin" parallel leads insure easy application.
- Exceed all electrical requirements of military specification MIL-C-5A.

**EL-MENCO CERAMIC DISC CAPACITORS**

**Toughest Ever!**

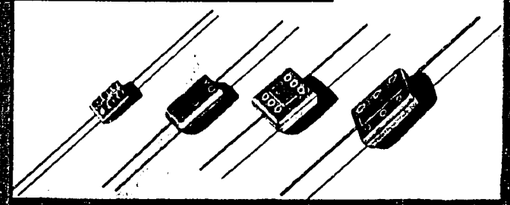
- Available in 500 working volts DC and 1,000 working volts DC ratings.
- Low-loss phenolic coating that is wax impregnated.
- Flat design assures reduced self-inductance . . . particularly adaptable to very high frequency applications.
- Insulation resistance far exceeds the 10,000 megohms minimum requirement.
- Exceed all electrical requirements of E.I.A. specifications RS-198.

**EL-MENCO *MYLAR-PAPER DIPPED CAPACITORS**

**Only 1 Failure in 7,168,000 Unit-Hours!**

- Life tests at 100°C with rated voltage applied have yielding only 1 FAILURE PER 716,800 UNIT-HOURS for 1 MFD. Since the number of unit-hours of these capacitors is inversely proportional to the capacitance, 0.1 MFD Mylar-Paper Dipped capacitors will yield only 1 FAILURE PER 7,168,000 UNIT-HOURS!
- Working volts DC: 200, 400, 600, 1000 and 1600.
- Durez phenolic resin impregnated.
- Tolerances: ± 10% and ±20% (closer tolerances available).
- Dielectric strength: 2 or 2½ times rated voltage, depending upon working voltage.
- Exceed all electrical requirements of E.I.A. specification RS-164 and military specifications MIL-C-91A and MIL-C-25A.

*Registered Trademark of DuPont Co.



**EL-MENCO MOLDED MICA CAPACITORS**

**Superior Performance!**

- Unmatched for excellent stability, dielectric strength, high insulation resistance, extremely high "Q" and correspondingly low power factor.
- Units can be subjected to a short "debugging" life test at elevated voltage and temperature for removal of early life failures and for improved reliability.

*Write for Free Samples and Booklets on Any of The Above Capacitors*

**Chromel-R**—A modified 80-20 nickel-chromium alloy for use in potentiometers and precision wire wound resistors. Possesses resistivity of 800 ohms/cmf at 20° C., temperature coefficient controlled within 0 ± 10 ppm/°C., exceptional linearity and stability from —65° to +150° C.

Chromel-P/Alumel—The world's standard base metal thermocouple combination for measuring operating temperatures in laboratory and heat treat furnaces—jet engines, nuclear reactors. Accuracy is guaranteed to close specified limits over the entire range from —300° to +2300° F.

Chromel-A—The original 80-20 nickel-chromium resistance alloy that first made electric heating practical. Widely used in major appliances, industrial furnaces and many other devices requiring heating elements capable of operating up to 2150° F. under adverse conditions.

Alloy 815-R—A lower density, higher resistivity iron-chromium-aluminum resistor material that gives you 14% more ohms per pound. Noted for strength, ductility, resistance to wear and corrosion. Resistivity: 815 ohms/cmf at 20° C. Temp. Coeff.: 0 ± 10 ppm/° C. from — 65° to +150° C.

**Chromel-P/Copel-XM**—A basic thermo-electric alloy combination used primarily as thermopiles to actuate and control operating temperatures of domestic furnaces, hot water heaters, stoves, ranges and other types of heating equipment. Noted for accuracy and reliability in service.

Chromel-AA—A new modified 80-20 type nickel-chromium resistance alloy developed especially for use in controlled atmosphere furnaces. It is highly resistant to corrosion, carburization, oxidation and "green rot" over the entire range of operating temperatures up to 2150° F.

Copel—A 55-45 copper-nickel alloy for use in edge-wound resistors, rheostats, motor starters and many other types of devices where operating Temperatures do not exceed 1000° F. Has resistivity of 294 ohms/cmf at 68° F., low temperature coefficient and exceptional mechanical stability.

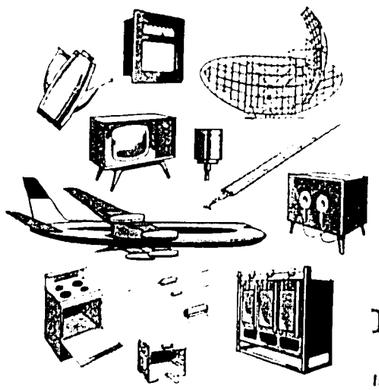
Hoskins Cunife—A new improved copper-nickel-iron ductile permanent magnet alloy. Possesses high coercive force and energy product values, greater uniformity. Readily stamped, machined or otherwise formed by conventional methods for economical production of close tolerance parts.

Chromel-C—A 60-16 nickel-chromium-iron alloy used primarily as heating elements in small domestic appliances and other devices that require high resistance in limited space for operating temperatures up to 1700° F. Also used as cold resistor alloy in current-temperature controls.

Unequalled for uniformity, performance, reliability

**HOSKINS**

Custom Quality



**ALLOYS**

Chromel-D—A time proven low nickel heating element alloy developed for use in controlled atmosphere furnaces required to operate in the critical temperature range between 1500° and 1800° F. It is highly resistant to corrosion, possesses exceptional mechanical stability.

Alloys 815, 835 and 875—Three superior iron-chromium-aluminum resistance alloys for use at operating temperatures up to 2150°, 2250° and 2350° F. respectively. Suitable for certain types of appliances, industrial furnaces and kilns where proper supports can be provided.

DETAILED TECHNICAL DATA on these and other Hoskins Custom Quality Alloys are yours for the asking. Hoskins metallurgical research, development and customer engineering services are also available to help you solve special design and application problems. Write or call today!

**For Electrical Resistance, Resistor, Thermo-Electric and Magnetic Applications**

Developing and producing custom quality alloys is a specialty at Hoskins—and has been for over 50 years. Some, like Chromel-A, have been responsible for the birth and growth of entire industries. Others have made possible many technological advancements in the design and performance of countless different end-products.

Regardless of their application, however, of this you can be sure: Each in its particular field is unsurpassed for uniformity, durability and reliability in service—developed and produced especially to help make your products better!

**HOSKINS MANUFACTURING COMPANY**

4457 Lawton Avenue • Detroit 8, Michigan • TYler 5-2860

In Canada: Hoskins Alloys of Canada, Ltd., 45 Racine Rd., Rexdale P.O., Toronto, Ontario

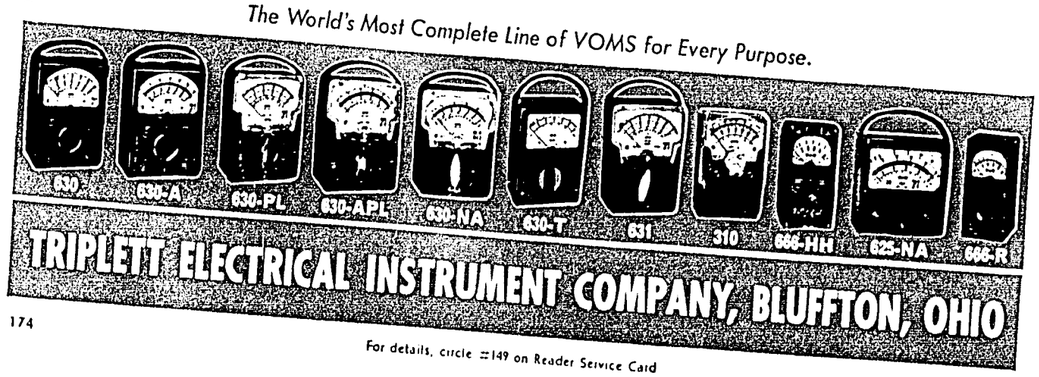
BAR-RING TYPE MOVEMENTS (Exclusively Triplett)

- Self Shielded
- Not affected by magnetic panels or substantially by stray magnetic fields.
- More Torque
- Lower Terminal Resistance
- Faster Response
- Exceedingly Rugged and Accurate
- All Case Sizes

TRIPLETT
Quality First to last

TRIPLETT—For over 56 years, a leader in the field of meter and test equipment design and manufacture.

TRIPLETT offers a complete line of:



- Panel Instruments
- Portable Instruments
- Test Equipment: Radio, TV, Electrical and Electronic

All standard Triplett products available nationally through authorized Triplett Distributors.

For information on special application instruments write direct to: TRIPLETT ELECTRICAL INSTRUMENT COMPANY, BLUFFTON, OHIO

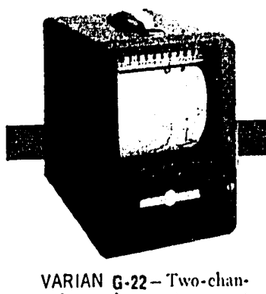
# COMPACT PANEL & PORTABLE RECORDERS

## VARIAN 1 & 2 CHANNEL POTENTIOMETER TYPE



Moderate cost recorders of very compact size that use the same time-proven potentiometer principle with which expensive chart recorders achieve superior stability, sensitivity, ruggedness and high input impedance. Versatility features include zero adjustment, span adjustment and interchangeable input chassis. Chart is rectilinear. Pen driving power is ample, even for inkless recording, since it is independent of the source being measured.

### VARIAN G-10 SPECIFICATIONS VARIAN G-22

VARIAN G-10 – Horizontal chart position provides greatest accessibility for notes. Designed for bench use. Easily portable.

| MODEL | FIXED-SPAN G-10 (span permanently set) | ADJUSTABLE-SPAN G-10 (continuous adjustment with inside controls) | G-22 DUAL CHANNEL with A21 or A22 input chassis |
|---|---|---|---|
| Base Price (not including options or accessories) | $365.00 | $420.00 | A21 $ 975.00<br>A22 1075.00 |
| Span (millivolts across chart) | 100 mv., d.c., fixed | As specified within 10-100 mv. d.c. range | 10-100 mv., d.c., as specified |
| Full Scale Balancing Time | Standard 2½ seconds<br>*Optional 1 second* | Standard 2½ seconds<br>*Optional 1 second* | 1 second |
| Limit of Error | 1% of span | 1% of span | 1% of span |
| Sensitivity (½ deadband) | ¼% of span | ¼% of span | ¼% of span |
| Reference System | Mercury cell | Mercury cell | A21 Mercury Cell<br>A22 Continuous Electronic |
| Input & Source Resistance | Null balance potentiometer provides input resistance greater than 500K when system is off null, approaching infinity at null. Maximum permissible source resistance ranges from 50K ohms at 10 mv. to 100K ohms at 100 mv. | | Same as G-10 |
| Input Circuit | Ungrounded. Signals floating above ground by as much as 200 volts d.c. are permissible with proper considerations. | | Two channels electrically independent and ungrounded. Each may be floated by 200 volts d.c. |
| Input Polarity | Positive-going signals cause left-to-right pen travel. *Optional reversed polarity: positive-going signals cause right-to-left pen travel.* | | Positive-going signals cause left-to-right pen travel. |
| Chart Dimensions | Calibrated width nominally 5"; Overall 6¾"; Length 85'. | | Same as G-10 |
| Chart Speeds | Single speed standard. *Dual speed optional.* 1, 2, 4, 8, 12, 16"/min., 1, 2, 4, 6, 15, 16, 24, 30, 40, 48"/hr. *Any combination available on dual speed.* | | Sce G-11A speeds; chart-speed shifter standard on G-22; dual motors optional; high speeds optional (12", 15" & 16"/min.) |
| Power Requirements | 110-120 volts, 1 ph, 58-62 cps, 55 volt-amp. max., power factor approx. 0.7. Also 50-cycle version, 115/230 volts. | | 110-120 volts, 1 ph,58-62 cps |
| Overall Dimensions | 7" high x 10¾" wide x 10" deep. | | 11⅜" high x 8⅜" wide x 12¾" deep |
| Weight | Basic recorder 15 lbs. net. Maximum shipping weight 25 lbs. | | Basic Recorder 33 lbs. net |
| Accessories Available | Inkless charts, stylii, card-type charts, chart take-up unit, carrying case, replaceable chart drive motor assemblies. | | Retransmitting slidewires available as an option. Event markers, alarm contacts, additional input chassis under development. |

VARIAN G-22 – Two-channel recorder, most compact and low cost of its type. Quick plug-in input chassis. Portable and panel mount versions.

### VARIAN G-11A SPECIFICATIONS

| MODEL | G-11A with A1 or A2 input chassis | G-11A with B1 input chassis | G-11A with F1 input chassis | G-11A with T2 input chassis |
|---|---|---|---|---|
| Base Price (not including options or accessories) | A1 $470.00<br>A2 $515.00 | $515.00 | $470.00 | $545.00 |
| Type | Gen. purpose null-balance potentiometer | Gen. purpose potentiometer with input attenuator | Current-type for use as general purpose recording milliammeter | Thermocouple potentiometer with reference junction compensation. |
| Span | 9-100 mv. d.c. as specified | Nine-step adjustable 10 mv. to 100 volts d.c. | 1 milliampere, d.c. | 0°F to 400, 600, 750, 1100, 1800 or 2200°F; 30° to 220°F, −150°F to +250°F, and −200°C to +50°C |
| Field Span-Adjust | Continuous, with inside controls | Knob on front panel | Fixed<br>No adjustment | Front-panel plug-in range elements |
| Full-scale Balancing Time | 1 second | 1 second | 1 second | 1 second |
| Limit of Error | 1% of span | 1% of span on 10 mv.<br>2% on all others | 1% of span | 1% of span |
| Reference System | A1 – Mercury cell<br>A2 – Cont. electronic | Mercury cell | Mercury cell | Continuous electronic |
| Sensitivity (½ deadband) | ¼% of span | ¼% of span | ¼% of span | ¼% of span |
| Input Resistance | Same as G-10 | 100K ohms minimum | 1350 ohms | — — |
| Maximum Source Resistance | Same as G-10 | — — | — — | — — |
| Input Circuit | Ungrounded. Signals floating above ground by as much as 200 volts d.c. are permissible with proper considerations. | | | |
| Chart Dimensions | Calibrated width nominally 5"; Overall width 6¾"; Length 85' | | | |
| Chart Speeds – Standard<br>Optional<br>Optional<br>Optional | Single Speed<br>*Dual chart motors*<br>*1-4 chart speed shifter*<br>*Quadruple chart speeds* | ½, 1, 2, 3, 8, 12, 15, 20, 24 and 30"/hour; 1, 2, 4, 6 and 8"/ minute.<br>*Dual Motors provide most combinations of two speeds.*<br>*Chart speed shifter divides any basic speed by four. Quadruple speeds achieved by two motors plus shifter.* | | |
| Case dimensions | Portable – 10½" high x 8¼" wide x 7¾" deep.<br>Panel mounting – 10⅜" high x 8⅝" wide x 7¾" deep with 5¼" behind front panel. | | | |
| Power Requirement | 110-120 volts, 1 phase, 58-62 cps, 55 volt amperes max., power factor approximately 0.7. 50-cycle version available, 110-120 volts only. | | | |
| Weight | Basic recorder 15 lbs. net. Maximum shipping weight 25 lbs. | | | |
| Accessories Available | Inkless charts, stylii, solenoid-operated event marker pen, extra input chassis, replaceable chart drive motor assemblies. | | | |

SPECIFICATIONS AND PRICES SUBJECT TO CHANGE WITHOUT NOTICE.

VARIAN G-11A – Ideal form for portable use or panel or rack mounting. Many interchangeable input chassis and versatility features.

*Varian recorders are sold and serviced by representatives in principal U.S. cities and abroad. Prices are F.O.B. Palo Alto. Prices and specifications subject to change without notice. Write today for literature. Address Instrument Division.*

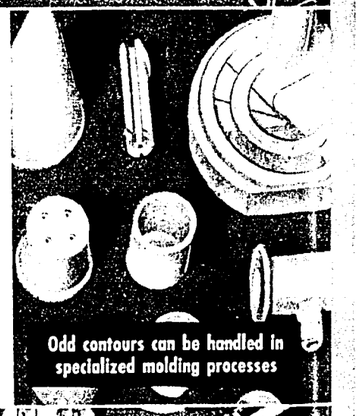
Numbers after address show the product and service classes in which firm appears. These classified listings follow the Alphabetical Directory. For complete instructions on use of this Directory, see pink sheets preceding catalog section. Yr = Year of founding. Emp = Total employees. ▲ = Number of IRE members. $ = Net radio-electronic sales during last fiscal year.

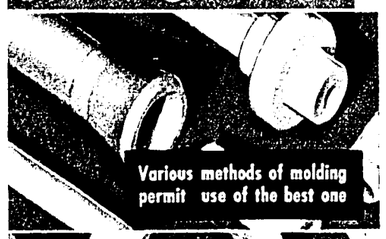
ALSiMag®

**offers...**

***the widest variety of technical ceramics from any single source***



Specialized engineering talent in depth • The quantity you need . . . deliveries and quality as agreed • Special speedy service on prototypes • Specialized equipment for smaller quantity production • Unequaled facilities for volume production when you really need volume.



***from one source . . .***

These are typical samples picked up in our Inspection Department over a week end. They illustrate the great variety of technical ceramics constantly flowing through our ultra-modern plants.

Parts are shown approximately ½ size.

***Property Chart Sent on Request.***

## To simplify your design problems –

**COMPLETE ENGINEERING AND SAMPLE SERVICE PLUS A NATIONWIDE NETWORK OF FIELD ENGINEERS—**

E-I glass-to-metal seals are the industry standard for dependability . . . have been service-proven on vital space age projects and in critical commercial equipment. If you have a seal problem ask E-I for a recommendation. Sales engineers are located in all principal cities.

1. STANDARD SEALS —The most complete range of economical standard seals affords widest design latitude. Includes single lead terminals, headers, miniature closures and threaded end seals.

2. SPECIAL SEALS— For unusual requirements, E-I engineers will design seals to specifications or modify standard types for your particular application. Complete engineering facilities available.

3. CUSTOM SEALING —Complete facilities for sealing components or assemblies of your own manufacture. Send samples or drawings for quotations. Fast service on reasonable quantities.

Numbers after address show the product and service classes in which firm appears. These classified listings follow the Alphabetical Directory. For complete instructions on use of this Directory, see pink sheets preceding catalog section. Yr.: Year of founding. Emp.: Total employees. ▲: Number of IRE members. $: Net radio-electronic sales during last fiscal year.

C-A-C Communication Accessories Company

# Reliability in Components

## precision elivery uality

**a** Sub-miniature Toroids

Uncased, plastic encapsulated, hermetically sealed. Inductances from .05 to 3000 mh. For sub-audio to 5 MC applications. Many values from stock. Also custom designs to your specific applications.

**b** Standard Toroids

A wide variety of inductance values, Q's and permeabilities to fulfill your requirements. Advanced winding techniques assure the finest performance obtainable. Many types and values available from stock.

**c** Power Transformers—Laminated Transformers—Reactors—Foil Wound Transformers

Many types designed to MIL-T-27A. High quality commercial specifications, hermetically sealed or encapsulated. Custom designed to circuit and mechanical requirements.

**d** Low Pass—Band Pass—Telegraph—Aircraft Navigation Filters and Delay Lines

L-C filters utilizing high Q toroidal inductors. C-A-C's years of experience in the design and manufacture of tight tolerance networks results in superior performance and reliability. C-A-C engineers welcome your inquiries.

**e** Magnetic Amplifiers

C-A-C specializes in development of magnetic amplifiers for specific applications—in conjunction with servo-motors, computers—both low and high level.

**f** Plastic Packaged Inductors

As a pioneer in the plastic packaging of inductors, C-A-C has developed practical techniques assuring high performance in the smallest physical size. For printed wiring and chassis-mounted applications.

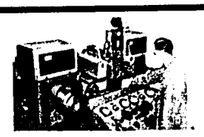
Numbers after address show the product and service classes in which firm appears. These classified listings follow the Alphabetical Directory. For complete instructions on use of this Directory, see pink sheets preceding catalog section. Yr = Year of founding. Emp = Total employees. ▲ = Number of IRE members. $ = Net radio-electronic sales during last fiscal year.

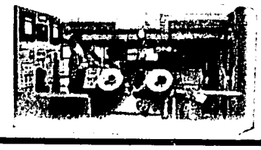
Specifying WBD precision alloys means quality alloys delivered quickly, in the quantities you require. Backing up the WILBUR B. DRIVER reputation for reliable performance are two complete manufacturing plants, a fully-equipped research and engineering facility, sales offices and warehouses strategically located across the nation, and in Canada. When you need alloys—in wire, rod, ribbon or strip—check with WBD for *complete* dependability!

**WILBUR B. DRIVER CO.**



NEWARK 4, NEW JERSEY
Telephone: HUmboldt 2-5550

Branch Offices and Warehouses in Principal Cities. Manufacturing Plants: 1875 McCarter H'way, Newark 4, N. J.; 2734 Industrial Way, Santa Maria, California; Canadian Wilbur B. Driver Co., Ltd., Rexdale (Toronto), Canada.

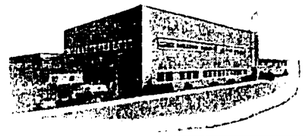


...ALWAYS AVAILABLE!

# Precision Alloys

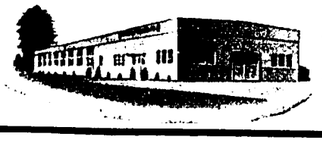
engineering / production facilities

Wilbur B. Driver Company's Sendzimir Mills produce high accuracy in rolling



The WBD vacuum melting installation is the largest in the industry

This entire building is devoted to research and engineering at WBD



...plus fast service nation-wide

The Newark plant incorporates executive and general offices

Cleveland warehouse is a typical WBD regional headquarters

West coast manufacturing plant located in Santa Maria, California

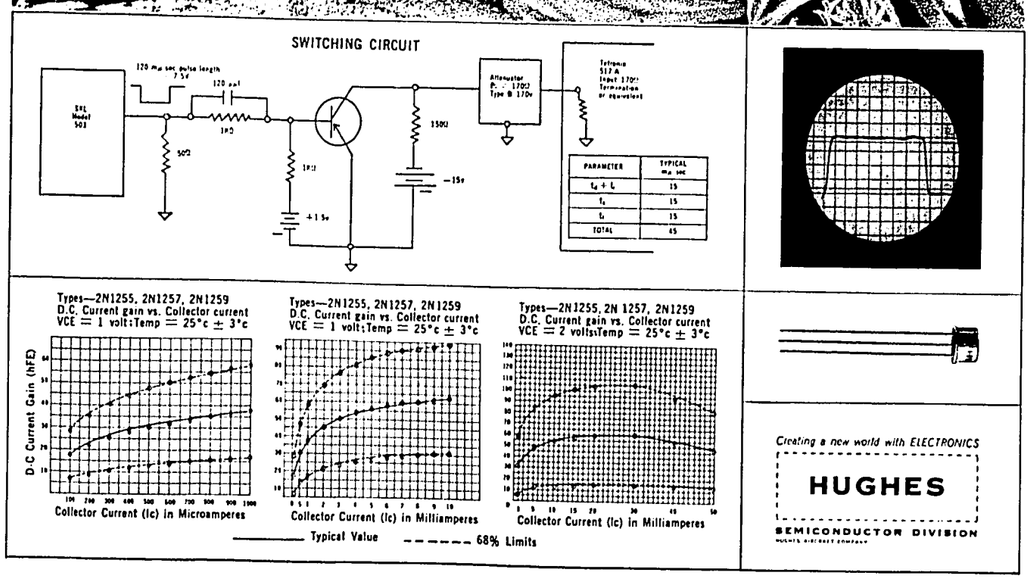
# WHEN YOU NEED FAST SWITCHING specify new Hughes 2N1254-2N1259 P-N-P transistors



Here are the fastest switching p-n-p silicon mesa transistors ever developed. Look at these outstanding features: Typ. $f_T$ of 75MC... thin base region... low stored base charge... low $t_d$ $t_r$ $t_s$ $t_f$... $\beta$ of 1.5 min at 50MC... $\beta$ of 1.75 typ. at 50MC... low collector capacitance. These transistors have good high-level gain characteristics, exceptional low-level gain characteristics, plus high breakdown voltage. They give excellent performance at low voltages, and they are *outstanding* for high-voltage switching.*

These new high-speed transistors are available in production quantities—right now!

*The series is also available with the same electrical characteristics in a collector—grounded configuration with a free air power dissipation of 750 MW.

*There is a Hughes sales office or authorized distributor in your area. Give them a call today. Or, if you prefer, write Hughes Semiconductor Division, Marketing Department, Newport Beach, California.*

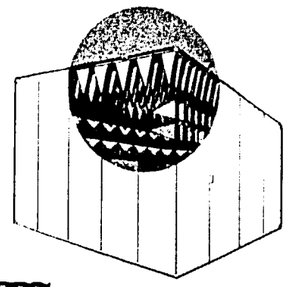
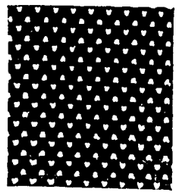
# Shielding, Inc.

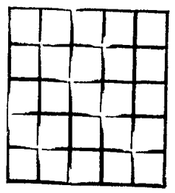
# enclosure experts*



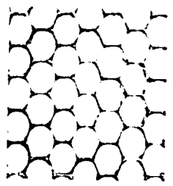
Experts [illegible]



SHIELDING'S RF Enclosures are available in an unlimited variety of sizes, these enclosures are designed and engineered to provide maximum attenuation and durability. Incorporated into these enclosures are such special features as: complete erection from the inside, solid floor construction (tile finish), interchangeable panel construction, versatile door design with four way swinging action or our special flush threshold door design, waveguide-type ventilation, filter panel or solid construction, etc.



SHIELDING'S Dust-free Enclosures are designed to provide the highest degree of "freedom from contamination" (particles removed down to ½ a micron). Shielding's design and engineering know-how combine to produce a hermetically sealed enclosure which may be both temperature and humidity controlled. (RF Shielding Feature — optional).



SHIELDING'S Anechoic Chambers are offered with 24 gauge zinc clad steel Electro-Armorply panels. Two types are available — shielded or partially shielded. Recognized and tested absorber materials can be supplied to meet mechanical and power dissipation requirements. Unique magnetic backing allows ease in installation and provides exceptional versatility of arrangement. Present applications are found in the simulation of free space conditions and for indoor radiation pattern measurements for frequency ranges of a few hundred megacycles and up.

AEEL Gasket material effectively suppresses seam leakage despite contact with anodized, oxidized or coated surfaces.

Square Venting Material (up to 2") and Honeycomb Venting Material is now available. With these new venting materials, many variations in waveguide air vent sizes are possible.

# MOTOROLA SEMICONDUCTORS

## *for maximum reliability . . . highest efficiency*

You can incorporate Motorola Semiconductors in your circuits with complete confidence that they will provide highest efficiency . . . maximum reliability. Motorola's unique combination of solid-state knowledge and production skill accomplishes volume production, yet maintains exacting standards of quality. Look to Motorola's rapidly expanding product line for all your semiconductor needs.

| 2N695 & 2N705 | Ultra-high speed switching transistors |
| 2N710 & 2N711 | Low cost Mesa switches |
| 2N700 | VHF-UHF transistor fmax 1000mc. |
| 2N741 | VHF transistor |
| 2N1561 & 2N1562 | Driver and amplifier Mesas ½ watt at 160 mc. |
| 2N706B & 2N706A | Silicon switching Mesas |

**INDUSTRIAL POWER TRANSISTORS**

Over 75 different amplifier and switching types. 3, 5, 10, 15 and 25 amp series. Up to 120 volts. Military types 2N297A, 2N1011 and 2N1120. New "Meg-A-Life" types offer military quality assurance for industrial applications. One of the world's largest suppliers of power transistors.

**INDUSTRIAL MILLIWATT TRANSISTORS**

Over 25 audio and switching types. High level of reliability assured by 125°C vacuum bake before sealing and 120 hours stabilization at 100°C. New "Meg-A-Life" units offer military quality for industrial applications.

**SILICON ZENER DIODES**

World's most complete line. Over 1,700 types. ¼ watt to 50 watt units. Up to 200 volts. Tolerances of 5%, 10% and 20%. Temperature-compensated units. Military units. Matched pairs to 1%.

**SILICON RECTIFIERS**

Wide selection of high-quality rectifiers available in quantity. Stud, top-hat and new flangeless units with PIV range of 50 to 600 volts. Military units. Offering outstanding reliability and uniformity.

# A real heel might test a Fusite Terminal like this

## ...but he won't make it leak!

The adherence between glass and metal in a Fusite Hermetic Terminal is an easily demonstrated fact. There are several theories as to *why* our exclusive V-21M glass actually chemically bonds to the metal components. Cobalt and certain other metallic oxides in the glass oxidize the iron in the metal which is taken into solution. It is believed that through the solution of iron, a gradual decrease of the difference of thermal expansion between the glass and metal takes place at the glass-metal interface. This inter-fusion of the two dissimilar materials gives Fusite Terminals their ability to withstand great mechanical and thermal shock and still pass Statiflux tests for glass cracks, hydrostatic pressure tests and helium mass spectrometer leak detection.

This fusion is reinforced by a strong compression of the metal ring around the glass made possible by a favorable thermal expansion balance of the glass, pins and housing.

The combination of fusion and compression provides a terminal so rugged that leaker rejection rate of components into which our terminal is fabricated is practically nil, even when roughly handled and subjected to extreme temperature changes.

*Samples for your own testing are yours for the asking.*

Krylon, Inc., Ford & Washington Sts., Norristown, Pa., 95, Tel: BR 9-1950, Yr: 1949, Emp: 140

Numbers after address show the product and service classes in which firm appears. These classified listings follow the Alphabetical Directory. For complete instructions on use of this Directory, see pink sheets preceding catalog section. Yr = Year of founding. Emp = Total employees. ▲ = Number of IRE members. $ = Net radio-electronic sales during last fiscal year.

Shaping the future–

# Lockheed's Program Diversification

We are in an era when methods, materials and machines must meet the complex systems characteristic of tomorrow's air/space vehicles. Lockheed's diversification extends from space and atmospheric vehicles to studies of dangers lurking at ocean depths—and how to protect against them.

Such projects start a chain reaction of creativity. They provide new challenges to men of vision. Here are examples of Lockheed's programs that range from research to final development and production:

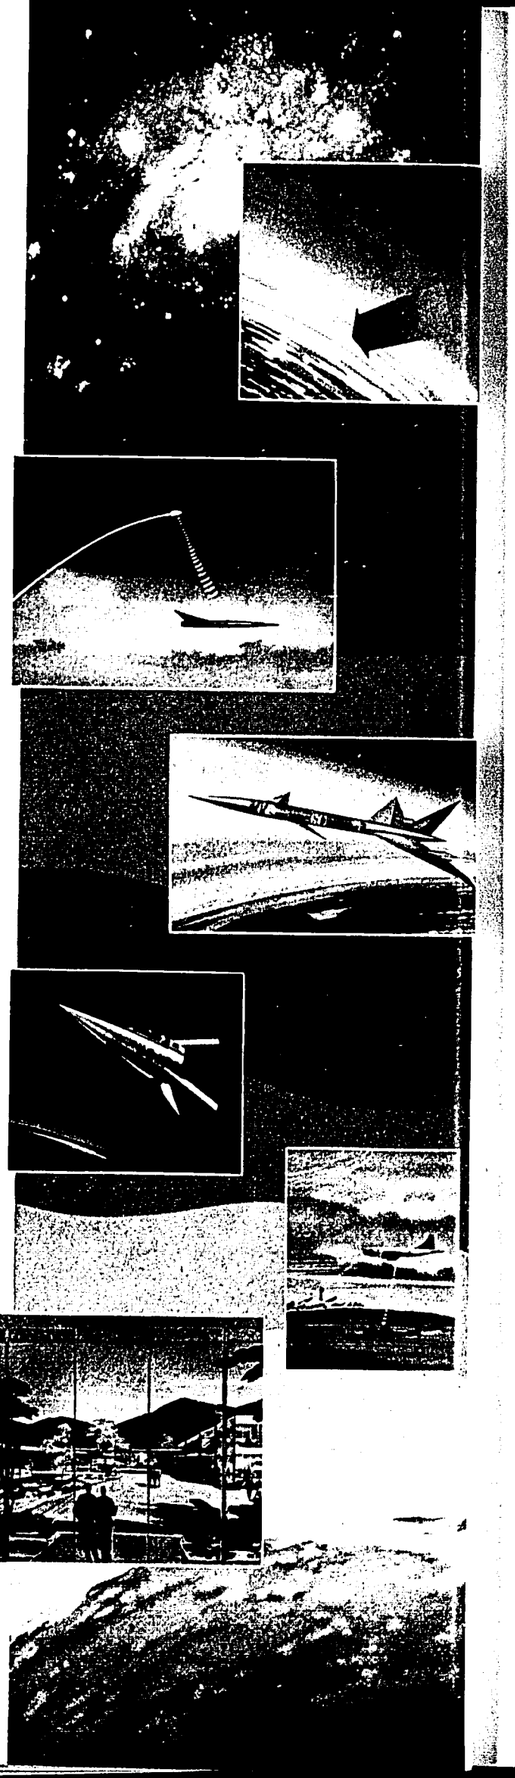
**REENTRY STUDIES** pertaining to landing manned space vehicles from orbit or edge of space glide path.

**INFRARED STUDIES** for advanced systems and subsystems for missile and aircraft detecting, tracking, ranging, and eventually surveillance.

**MACH 3 AIR TRANSPORTS** operating from present day airports would cruise at altitudes of 70,000 feet or higher.

**ESCAPE CAPSULE** developed under U.S.A.F. sponsorship to enable pilots of tomorrow's ultra-high performance aircraft to escape safely. The capsule will allow the pilot to escape at extremely high altitudes and speeds. Control stabilizers, a small rocket engine and survival equipment assure the pilot's safe return.

**ANTI-SUBMARINE WARFARE** systems studies to develop new techniques for neutralizing the submarine menace.



**NEW RESEARCH CENTER** dedicated solely to advanced research on atmospheric and space flight. Partially finished now, the new multimillion-dollar center will house most of the Division's research facilities.

**SCIENTISTS AND ENGINEERS** of outstanding ability are invited to investigate opportunities offered by a company that always looks far into the future. Please address your inquiry to: Mr. E. W. Des Lauriers, Manager Professional Placement Staff, Dept. 1810, 2402 No. Hollywood Way, Burbank, California.

Numbers after address show the product and service classes in which firm appears. These classified listings follow the Alphabetical Directory. For complete instructions on use of this Directory, see pink sheets preceding catalog section. Yr = Year of founding. Emp = Total employees. ▲ = Number of IRE members. $ = Net radio-electronic sales during last fiscal year.

where precision counts—it's S.E.C. first!

# PLASTIC PRECISION CAPACITORS

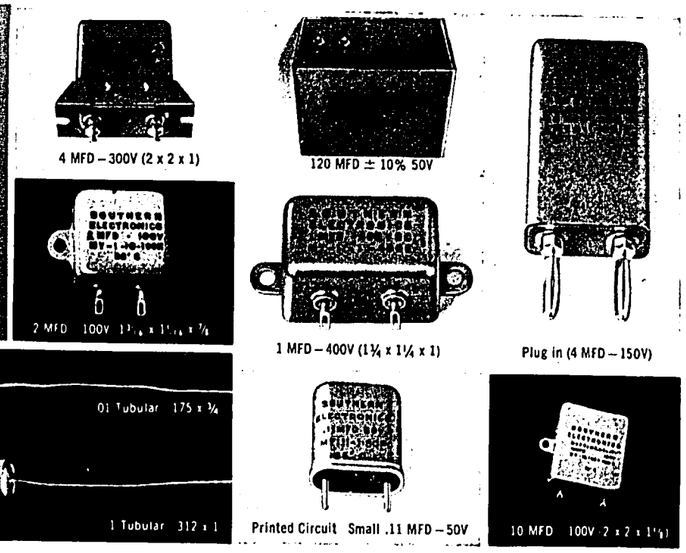
## 1. POLYSTYRENE

with these outstanding properties:

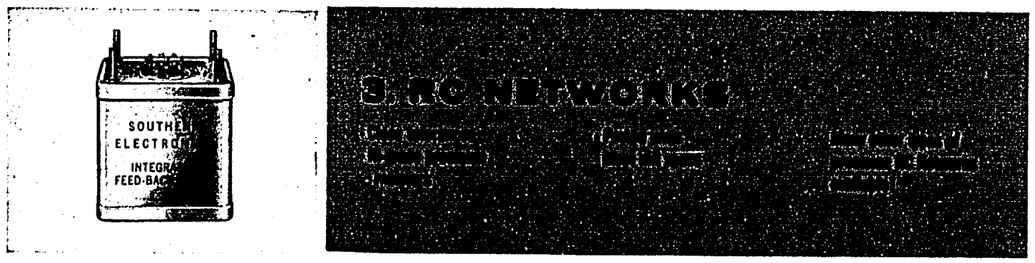
- Tolerances as close as .01%
- Insulation Resistance as HIGH as 1 x 10¹²
- Dielectric Absorption as LOW as .0001
- Dissipation Factor as LOW as .0002
- Temperature Coefficient . . . 100PPM per °C
- Stability as close as .05% drift in 1 yr.
- Voltage Derating . . . none to 170°F
- Hermetically sealed for ordering accuracy!

also available:

- Many other case styles or mounting brackets
- Any capacitance from .001 to 50 MFD (incl. special values)
- Voltages from 50 to 5000



## 2. POLYESTER



with these outstanding properties:

- Tolerances as close as 1%
- Insulation Resistance as HIGH as 1 x 10¹²
- Dielectric Absorption as LOW as .001
- Dissipation Factor as LOW as .010
- Temperature Coefficient . . . 500 PPM per °C
- Stability as close as .5% drift in 1 yr.
- Voltage Derating . . . none to 125°C
- Hermetically sealed for ordering accuracy!

also available:

- Many other case styles or mounting brackets
- Any capacitance from .001 to 10 MFD (incl. special values)
- Voltages from 50 to 1000

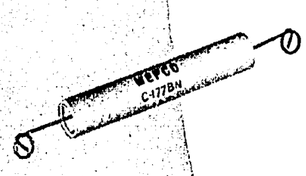
**Use the Reader Service Card at the back of this book for information on advertised products**



WIRE WOUND (MIL-R-93B) — These ruggedly constructed lug type and axial lead precision resistors provide the accuracy and stability necessary for todays high reliability applications.

EXTERNAL METER MULTIPLIERS (JAN-R-29) — The answer to that special requirement in the design of kilovolt panel meters, for transmitters and power supplies, where an accuracy of .5% or closer is required.

WIRE WOUND (MIL-R-9444/A) — Manufactured to meet the requirements of this Air Force military specification primarily calling for axial lead type resistors — can be self supporting or clamp mounted.

CARBON FILM (MIL-R-10509C) — For that important application where precision and stability at a reasonable price is a must.

NETWORKS — Completely packaged resistor assemblies. Ideal for usage as attenuator summing or dividing networks. Can be manufactured to your specifications or designed to fit your requirements.

**MANUFACTURERS AND ENGINEERS OF PRECISION RESISTORS**

# Discouraged by excessive rejects?

You're in business to produce quality devices, not rejects!

One cause for low yields may be due to the use of compensated silicon crystals. With such compensated material, impurities can change from crystal to crystal and such changes are undetectable with standard control techniques.

You can deal with a known quantity by using Merck Float-Zone Refined Single Crystal Silicon . . . IT'S UNCOMPENSATED. Phosphorus-doped Merck Crystals contain less than one boron atom per six billion silicon atoms. Boron-doped Merck Crystals contain less than one atom of phosphorus per ten billion silicon atoms.

Why settle for anything less than Merck purity? Help eliminate worry over costly rejects. Know what you're buying. Next order, specify Merck for Single Crystal Silicon. Write, wire or phone today for specifications.

Numbers after address show the product and service classes in which firm appears. These classified listings follow the Alphabetical Directory. For complete instructions on use of this Directory, see pink sheets preceding catalog section. Yr = Year of founding. Emp = Total employees. ▲ = Number of IRE members. $ = Net radio-electronic sales during last fiscal year.

Skydyne, Inc

# CASE HISTORY

The total background of Skydyne's 20 years of pioneering in the design and manufacture of transit and operational cases, consoles and benches is expressed in every unit produced — whether specially engineered, or part of a modified standard line.

## SANDWICH MATERIAL FIELD AND MOBILE TRANSIT CASES

Skydyne's "Unistruc" construction of sandwich type transit cases produces completely bonded units of minimum weight and maximum strength. Individually engineered cases are particularly effective for use with ground support and other military equipment, and are designed to meet specifications MIL-T-945/A, MIL-T-4734, MIL-T-21200 and MIL-C-4150/E, as required. They assure greatest possible protection of sensitive equipment under widely varied circumstances and environment.

**FEATURES**

- Integrated structural frame
- Panels bonded to frame members
- No limitation on size or design
- Sandwich panel types to meet individual requirements
- Shock absorbed by entire case.

## MOLDED FIBERGLASS HAND PORTABLE INSTRUMENT CASES

Skydyne molded fiberglass hand portable instrument cases are available in 16 standard sizes — each capable of modification to meet individual requirements. Interior packing or mounting devices are custom-designed for protective cushioning. Molded fiberglass cases were developed by Skydyne to house and protect all types of portable optical, electric and electronic instruments and equipment. Cases meet all applicable MIL-T-945A and MIL-T-108C specifications

**FEATURES**

- Standard sizes, which can be modified for specific uses
- Durable material — waterproof and oil and acid resistant
- High strength to weight ratio
- Corner impact resistance
- Molded in color — no surface finish required

Send us your specifications for estimate.

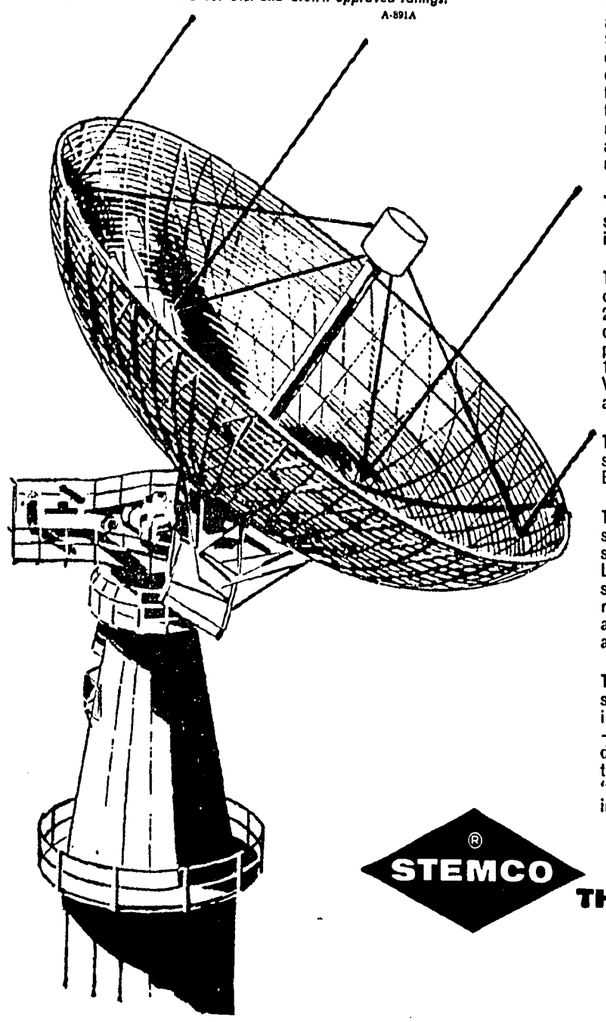
# STEMCO THERMOSTATS

RANK FIRST
IN
PRECISION TEMPERATURE CONTROL

In today's military and commercial projects, you can't afford to overlook any one of these important areas: Reliability, Size, Availability, Economy.

And because Stevens is in production now on the largest number of different types and styles of bimetal thermostats, all these advantages are yours automatically when you specify Stemco thermostats.

1st in Reliability. Proven designs, latest production techniques, most stringent inspection procedures.



1st in Size. Stemco thermostats score in compactness and lightness without sacrificing performance.

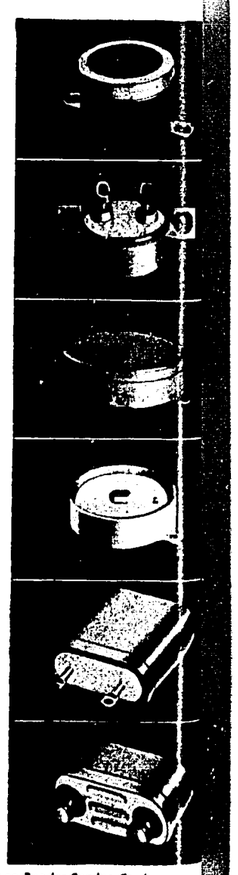
1st in Availability. Tooling for most types is in existence. Flexibility of design cuts lead time on other types.

1st in Economy. Mass production of many standard Stemco types with hundreds of terminal arrangements and mounting brackets cuts your costs.

*Refer to Guide 400EO for U.L. and C.S.A. approved ratings.

A-891A

**TYPE A* semi-enclosed.** Bimetal disc type snap action thermostats; give fast response to temperature changes. Can be made to open on rise or close on rise. Single-throw with double make and break contacts. Operation from -20 to 300°F. Lower or higher temperatures on special order. Average non-inductive rating 13.3 amps, 120 VAC; 4 amps, 230 VAC and 28 VDC. Various mountings and terminals available. Bulletin 3000.



**TYPE A hermetically sealed.** Electrically similar to semi-enclosed Type A. Various mountings, including brackets, available. Bulletin 3000.

**TYPE MX hermetically sealed.** Snap acting bimetal disc type units to open on temperature rise. 2 to 6°F differentials as standard. 1 to 4°F differentials available on special order. Depending on duty cycle, normal rating 3 amps, 115 VAC and 28 VDC for 250,000 cycles. Various terminals, mountings and brackets available. Bulletin 6100.

**TYPE MX semi-enclosed.** Construction and rating similar to MX hermetically sealed type. Bulletin 6100.

**TYPE M-hermetically sealed.** Bimetal disc type, snap acting thermostats. Also available in semi-enclosed. Operation from -20 to 300°F. Lower and higher temperatures available on special order. Depending on application, rated non-inductive 10 amps, 120 VAC; 3 amps, 28 VDC. Various terminals, wire leads and brackets available. Bulletin 6000.

**TYPE C hermetically sealed.** Also semi-enclosed styles. Small, positive acting with electrically independent bimetal strip for operation from -10 to 300°F. Rated at approximately 3 amps, depending on application. Hermetically sealed type can be furnished as double thermostat "alarm" type. Various terminals and mountings. Bulletin 5000.

# Classifications with a System!

THE IRE Directory Product Classifications have both a pattern and a purpose. They differ widely from most product indexes, deliberately. They aim to organize the hundreds of products and services of a complex technical industry according to the way engineers think. The result is a division of all products and services into three fundamental indexes into which 104 basic classifications have been organized.

For detailed identification, these 104 products and services, grouped in 3 indexes, are further defined into 932 named products. We have tried to avoid oversimplification, and a tremendous amount of information is given by our product number system. But, the basic indexing adds speed. Purely alphabetical directories are as slow and cumbersome as a telephone book. IRE engineers have liked our system better!

You will note that we here differ from most directory compilers, for we do not mix meters with motors simply for alphabetical reasons. Products which are in the form of "Complete Equipment" form the first fundamental group. Yet, the same manufacturer may also appear in the "Component Parts" section. This system gives subject grouping for speed and convenience. A directory should aid a man who has forgotten some detail, or product name. Ours helps by grouping products as one would *think*.

For safety, an alphabetical "terminology" index is given in the pink pages. You will note also that after each firm, its products are listed by number code in the alphabetical list, and that sub-classifications shown by number code in the product indexes give much detail. Just a little study of the system will help you get great good from this book.

## The IRE DIRECTORY is four directories in one

**Alphabetical • Complete Equipment • Components • Materials and Services**

# 1961 IRE DIRECTORY

# Directory I

# Complete Equipment

## Communication— Computation— Instrumentation— Test

### 37 major groups
### 281 products

The products and services of the radio-electronics industry have been organized into three basic directories:

I. Complete Equipment
II. Components
III. Materials & Services

Within these three basic directories, 104 major product and service groups are numbered consecutively throughout. Under each of these 104 classes a further breakdown is given, showing in detail by a system of code numbers after each firm listed what specific products within the class are manufactured by that firm.

For a terminology cross-index listing the 932 sub-products in alphabetical order, consult the pink section preceding page 1.

### The first few times you use this EDGE INDEX

follow the "How to use" instructions slowly—one step at a time. After that you will be able to open easily and almost instantly to the section that you seek.

Machol edge indexes covering the alphabetical section and each of the three major directory groups will be found on pages 135, 241, 359, and 597.

### HOW TO USE

1. Bend the Directory almost double with the back cover page on the inside.
2. Hold in your right hand with your four fingers near to the bound edge and your right thumb near the middle of the open side of this page.
3. From the heavy or light line symbol adjacent to the subject you seek, run your eyes across the page edges until you reach the horizontally corresponding symbol.
4. OPEN THERE!

LICENSE NO. 25G
MACHOL EDGE INDEX PATENT #2680630

For complete list of products and services, arranged alphabetically for fast reference, see the pink section preceding page 1.

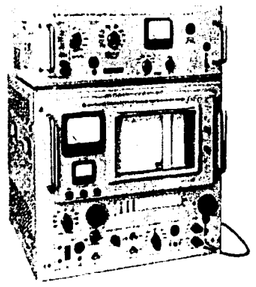
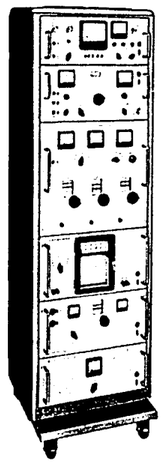
ALLISON LABORATORIES
Audio Frequency Test Instrumentation



*Model 3MAN9 Noise Generator and Octave Band Equalizer*



A controlled, calibrated audio noise source, as well as an octave band analyzer. 20-19,200 cycles. Unique continuously-variable passive filters of every type. Noise Generators, Octave-Band Equalizers, Band-Elimination Filter sets. Extremely high rejection, smooth flat-topped characteristics.

An Audio-Frequency Spectrograph

A Decade Frequency Measuring System

The Polyskop - - A Swept Frequency Generator

# A SELECTED LINE OF UNIQUE INSTRUMENTS FOR ELECTRONIC MEASUREMENTS AND COMMUNICATION

**MEASURING EQUIPMENT**

- Frequency Synthesizers and Decade Frequency Measuring Systems 0-12.6 kmc
- Time Standards and Portable Crystal Clocks
- Impedance Measuring Devices - - Diagraphs
- Power Signal Generators
- Audio-Frequency Spectrograph
- Swept Frequency Generators and Indicators - Polyskop
- Wave Analyzers
- Capacitance, Inductance and Resistance Bridges
- Teraohmmeters
- Standard Attenuators
- Selective Voltmeters and Amplifiers
- Standard Capacitors
- Power Meters
- Equipment For Measurement of Dieletric Losses
- Field Intensity Meters

**Communications Equipment**

- Multicouplers 60 kc - 400 mc
- FM Relay Receivers
- Dummy Antennas
- Frequency Synthesizers and Exciters

Within its scope, this equipment represents some of the most refined and precise available. Each of the equipment groups is described in detailed special catalogs or leaflets which are available on request.

All the equipment offered is backed by high engineering competence and field experience. Skilled repair personnel and a generous reservoir of spare parts assure that all equipment sold by Rohde & Schwarz will meet warranties and give long years of service.

Write for literature covering your special areas of interest. Quotations promptly furnished.

IN USE... AROUND THE WORLD

**SPECIAL KEYBOARDS**

**Any number of keys, bars, switches or lights in any arrangement you require—wired to your specifications.**

Concord Keyboards can be found working with many different types of equipment throughout the United States and Canada. Only proven components with exceptionally long life characteristics are used. A typical example: a keyboard that has twelve keys and one bar, wired to a cable and connector with a steel case painted grey—$220. Delivery three to five weeks. Send us a sketch of your desired key layout and wiring specifications for an immediate estimate.

**Also call upon us for your special requirements for paper tape or magnetic tape input equipment.**

**CONCORD CONTROL INC**
1282 Soldiers Field Road, Boston, Mass.

You can now measure alpha and admittance parameters of transistors accurately (within 2%) and easily under small signal conditions.

The addition of 5 special transistor adapters to the revolutionary Wayne Kerr RF Bridge, a two or three terminal transformer ratio arm bridge, makes these measurements possible. The direct currents and voltages required are furnished by a separate Wayne Kerr Control Unit which also provides for monitoring. Write for technical information.

**FOR TRANSISTOR MEASUREMENTS** Measure input, output admittance and current gain in grounded base configuration, and input and transfer admittance in grounded emitter configuration.
**FOR GENERAL MEASUREMENTS** Measure complex impedance, balanced and unbalanced, or balanced with the center point grounded and the impedance between any pair of terminals in a 3-terminal network.
Measure resistance, capacitance and inductance over 15 kc to 5 mc.
**Capacitance range:** 0.01 μμf to 20,000 μμf in 6 ranges
**Resistance range:** 10 ohms to 10 megohms in 6 ranges
**Inductance range:** 0.5μH to 50 mH in 6 ranges
Extreme stability due to fact that impedance looking back into the terminals and impedance to ground at balance are both exceedingly low.
Accuracy of bridge: 1% over most of range; with adapters—within 2%.
RF Bridge B-601 $640.00
Transistor Adapters Q-601 A to E $300.00
**OTHER INSTRUMENTS:** AF, VHF Bridges; AF, UHF Oscillators; Microwave Equipment; Attenuators; Wave Analyzer; Distance and Vibration Meters.
**Send for complete W-K catalog showing other instruments**

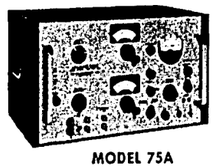
# INSTRUMENTS FOR LABORATORY and PRODUCTION

WIDE RANGE PRECISION
**INDUCTANCE BRIDGE**

- .002 μh to 1.1 h inductance
- Accuracy to 0.25%
- Resolution to 0.01%
- .002 to 110K ohm series res.
- Self contained 1-100KC osc-det.
- No false or sliding nulls

MODEL 63A
PRICE $1500



ACCEPTED THROUGHOUT THE INDUSTRY!
**SENSITIVE RF VOLTMETERS**

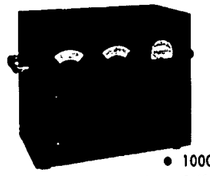
- 10KC — 600 MC frequency range
- 300 μv — 3V range: 91CA
- 1 μv — 3V range: 91C
- RMS reading below 0.1V
- HI-Z Probe and 52 ohms Adapter supplied

MODEL 91CA Price $495
MODEL 91C Price $395

THREE TERMINAL **CAPACITANCE BRIDGE** FOR 1 MC USE

- .0002 to 1000 μμf capacitance
- Accuracy to 0.25%
- Resolution to 0.01%
- .01 to 1000 μmhos conductance
- 1000 ohms to 100 megohms resistance
- Self contained 1 MC osc-det.
- Built-in DC bias for semiconductor testing available

MODEL 75A
PRICE $990



**SENSITIVE DC NULL DETECTOR**
FOR MAXIMUM READOUT ON WHEATSTONE BRIDGES

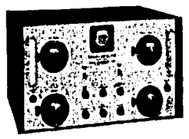
- 1 μv to 100 v sensitivity
- Input: 10 megohms constant
- Floating input
- Amplifier Gain: 100 db

MODEL 56A
PRICE $395

THREE TERMINAL
**CAPACITANCE BRIDGE**
FOR 100 KC USE

- .0002 to 11,000 μμf capacitance
- Accuracy to 0.25%
- Resolution to 0.01%
- .001 to 1000 μmhos conductance
- 1000 ohms to 100 megohms resistance
- Self-contained 100KC osc-det
- Built-in DC bias for semiconductor testing available

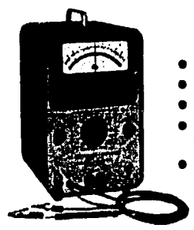
MODEL 74C
PRICE $935



**SENSITIVE DC METER**
ULTRA SENSITIVITY IN VOLTAGE & CURRENT MEASUREMENTS

- 1 μv to 1000 v in 17 ranges
- 0.1 μμa to 1 a in 25 ranges
- Input: 10 megohms constant
- Floating input
- Amplifier Gain: 100 db

MODEL 95A
PRICE $495



**TUNED AC NULL DETECTOR**

- Useful as a detector for low frequency impedance bridges Balance can be observed on either built in CRT or external meter
- 20 cycles to 200 KC tuning range
- 10 μv sensitivity
- 1 megohm shunted by 100 μμf input
- Discrimination to 40 db against 2nd harmonic
- Phase sensitive

MODEL 51A
PRICE $1900

**DC VOLTMETER**

- 10 μv to 1000 v in 14 ranges
- Input: varies 10-100 megohms
- Amplifier Gain: 70 db
- Amplifier Output: ±0.5 ma into 1500 ohms
- Zero center meter eliminates polarity switch

MODEL 97A
PRICE $325

RF DISTORTION METER & VOLTMETER

- 1-100 MC:85B
- 0.1-6 MC:85C
- Sensitivity: 60 db below 1 v
- Accuracy: ±2 db
- RF Voltmeter: Same as 91C

MODEL 85B & C
PRICE $740

UHF GRID DIP METER

- Highest sensitivity to L & C coupling
- 300 to 1000 MC
- Accuracy: 2%

MODEL 101B
PRICE $275

**DIFFERENTIAL DC VOLTMETER**

- 10 μv to 1000 v in 14 ranges
- Input: varies 10-50 megohms
- DC common mode rejection = 80 db
- Critically balanced attenuators provide true differential measurements

MODEL 98A
PRICE $395

# Shallcross

## PRECISION WIREWOUND RESISTORS

Small, Shallcross "P-Type" encapsulated resistors offer unmatched stability and reliability for critical applications. All are reverse-pi wound on multiple-section epoxy resin bobbins then hermetically-sealed in a tough epoxy coating.

"P-Type" resistors are offered in a complete range of commercial and military types with radial leads, axial leads, or lug terminals. Military types meet or exceed MIL-R-93A (85°C ambient) and MIL-R-9444 (125°C ambient) requirements—including salt water immersion tests. Standard tolerances—1%, 0.5%, 0.25%, 0.1%, and 0.05%. Close tolerances and matched pairs a specialty. *Write for Bulletin L-30.*

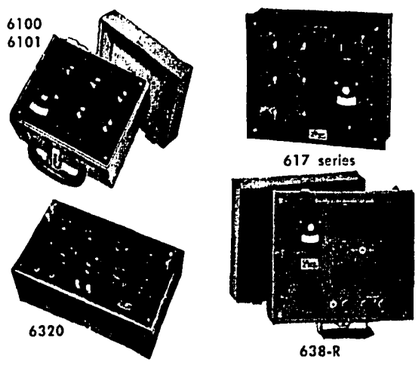
## ROTARY SELECTOR SWITCHES

### STANDARD SWITCHES

Single-Pole, instrument-type switches using silicone-impregnated steatite or phenolic desks. ⅛" laminated silver or solid brass contacts and multiple-leaf wiper arms. Positive, long-life ball-bearing detent. Up to 4 decks. Many optional special features. *Bulletin L131.*

### OVAL CERAMIC SWITCHES

Assembled by Shallcross from stock, interchangeable parts, the "12,000" Series offers custom-built quality without the delay and cost of specials. Solid silver contacts and collector rings on steatite decks. 0.0025 Ω contact resistance. 1 to 3 poles per deck, up to 10 decks. Adjustable stop. Optional detent. *Bulletin L-32.*



### MINIATURE SWITCHES

Only 1⅞" square by 1" deep for first deck, ⅝" for additional decks. Silver alloy button contacts and multi-leaf wipers maintain low contact resistance. Glass fiber Silicone-laminate decks for outstanding humidity, moisture and salt-spray resistance. 1 to 4 poles per deck. 1 or 2 hole mounting. Easily-positioned, adjustable stops. *Bulletin L-45A.*

## BRIDGES

Field & Lab Types for
Precise DC Resistance Measurements
. . . 1 micro-ohm to $10^{9}$ megohms.
*Bulletin L-19B*

| Model Number | Measurement Accuracy | Maximum Setting | Minimum Setting | Circuit | Special Features |
|---|---|---|---|---|---|
| 6100 | ±0.1% +0.01Ω (.1Ω to 1.011 MegΩ) | 1.011 MegΩ | 0.001Ω | Fault Location—Wheatstone | Fault Location by Murray, Varley, Hilborn & Fisher Loop Tests. |
| 6101 | ±0.1% +0.01Ω (1Ω to 11.11 MegΩ) | 11.11 MegΩ | 0.001Ω | Wheatstone | Four dial rheostat usable as decade box. |
| 6320 | ±0.02% +0.01Ω (1Ω to 11.11 MegΩ) | 111.11 MegΩ | 0.00001Ω | Wheatstone | Most accurate five dial Shallcross bridge for direct resistance measurement. |
| | ±0.05% to ±20% on separate "+" and "—" percent selectors. (1Ω to 10 MegΩ) | 11.111 MegΩ | 0.0001Ω | Percent Limit | Rapid "GO-NO GO" percent limit testing. Built-in adjustable comparison standard. |
| 638-R | ±0.75% or better (.001Ω to 1Ω) | 11.11Ω | 0.000001Ω | Kelvin | Overlapping Kelvin and Wheatstone ranges selected with single ratio dial. |
| | ±0.2% +0.01Ω (1Ω to 11.11 MegΩ) | 11.11 MegΩ | .001Ω | Wheatstone | |

| 617 Series | ±0.1% to ±20% on separate "+" and "—" selectors from a minimum resistance consistent with number of dials in use to the maximum settings. | 111,111Ω 1,111,110Ω 11,111,100Ω | 0.1Ω *1Ω 10Ω | Percent Limit | For rapid "GO-NO GO" percent limit testing. Hand or foot operated for production testing. All models also usable for direct resistance measurements. Binding post for external d-c power supply. |
| | †±0.2% +0.01Ω from a minimum consistent with number of dials in use to the maximum setting. | 111,111Ω 1,111,110Ω 11,111,100Ω | 0.1Ω *1Ω 10Ω | Wheatstone | |

† Except 617B and 617J ±0.1% ±0.01Ω. * Except 617G, 0.01Ω.

## DECADE RESISTANCES

Available as single unmounted decades or as complete decade resistance boxes with 1 to 6 dials. Steps as low as 0.01 ohm; total resistance as high as 11,111,100 ohms.

Remarkably rugged and accurately-calibrated for maintained stability in rough lab, classroom and production line work. Uses impregnated Shallcross precision wirewound resistors mounted on steatite switch decks. Large button contacts of silver or brass. *Write for Bulletin L-17A.*

## DECADE VOLTAGE DIVIDERS

Laboratory-type voltage dividers used in bridge circuits, for measuring rotary potentiometer linearity, in synchro-test delta bridge circuits, and in other uses requiring maintained accuracy and high resolution. Kelvin-Varley or Potentiometer circuits available in eight 4 and 5 dial models.

Impregnated Shallcross precision wirewound resistors used throughout. Steatite instrument switches assure uniformly low contact resistance. *Bulletin L-16B.*

## PIPELINE TO PRECISION

**Model WWVT RECEIVER**
*transistorized and rugged*
**3½" RACK MOUNT** *also available*

A portable receiver for utilizing transmissions of WWV and WWVH. It is battery operated, small (9"×12"×5"), light weight (6 lbs.), rugged-sealed metal case and encapsulated components, and designed especially for remote operations under extreme environmental conditions; meets MIL-B180B Specifications. It features instantaneous crystal controlled frequency selectivity, self-contained antenna and 2 microvolt sensitivity.

**Model WWVC STANDARD FREQUENCY COMPARATOR**

A highly sensitive (better than 1 uv on all frequencies) crystal controlled receiver for utilizing transmissions of the National Bureau of Standards stations WWV and WWVH. Used for precise audio and radio frequency standards work as well as accurate time interval measurements. Available in cabinet or for rack mounting using a 5¼" panel.

**Model SR-7 WWV RECEIVER**

This receiver is the dual conversion type. Dimensions: 3-15/16" × 11" × 8½" deep. Available in upright or vertical models, or as rack mounted model. Noise limiter, antenna trimmer and provision for an oscilloscope or head phone are incorporated.

**Model AK-8 ANTENNA KIT**

This special antenna is designed to provide optimum response to signals from WWV and WWVH on 2.5, 5, 10, 15 and 20 mc. Includes modification kit for receiver with all wire, 50' of coaxial cable and suitable fittings to provide outstanding performance. Antenna is completely assembled; needs only one support for satisfactory operation.

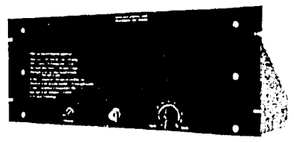
Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 135-240.

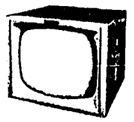
# SCAN-A-GRAPH®



**DISTORTION-FREE**

**CLOSED CIRCUIT TV WITHOUT CAMERA OR LIGHT...**

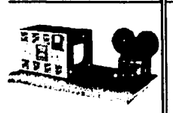
**to as many as 500 MONITORS simultaneously!**



Yes, without camera or light, Scan-a-graph, a self-contained TV transmitter provides instant, accurate visual communication with as many as 500 locations simultaneously. Scan-a-graph guarantees needle sharp, telescopic brightness essential for closed circuit systems in science, industry, and education.

**VIDEO LINE AND DISTRIBUTION AMPLIFIER**

Versatile, one chassis unit with internal switching permits use as distribution or line amplifier or a combination of both - Adjustable frequency compensation-Electronically regulated power supply.



**VIDEO MONITORS**

800 L. definition, aluminized CRT for brightness and detail. Exclusive "syncrolace" for perfect interlace. Sizes: 8, 14, 17, 21, 24, 27 inches.

**SYNC GENERATOR**

Self contained, regulated unit with exclusive sync pulse mixing for perfect interlace. Separate H and V and mixed H and V outputs.

**KINESCOPE RECORDER**

A high quality kinescope recorder, completely self contained, providing an inexpensive method for the filming of telecasts.

**PULSE CROSS MONITOR**

Inputs permit viewing both remote and local sync signals simultaneously. Provides a visual check of signal.

*Also manufacturers of "OFF THE AIR" tuners and "REGULATED POWER SUPPLIES"*

**TELEVISION UTILITIES CORP.**
**DIVISION OF NORD**
New Hyde Park, L.I., N.Y.

TWining 8-1000 • Cable Address: NORDNEWHYDEPARK

GE MEMORY PACKS

General Electric's *Memory Pack* is a completely encapsulated memory storage plane for computer systems. Built to withstand considerable shock and vibration and extreme variations in humidity, altitude and temperature, the enclosed construction of the Memory Pack allows it to be easily stacked into multiples of the basic number of bits. Tested packs are available in virtually any size, usually at no increase in cost over open planes. 2721

# MODULARIZED PULSE GENERATING EQUIPMENT

**Time Delays and Gates**

**1310A:** Single channel, repetition rate variable 0.1—1000 CPS, delay variable 10 μs to 10 seconds.

**2300 Series:** 1, 2 or 3 channels, 1—10,000 μs delay from external trigger or 10 CPS—100 KC internal oscillator.

**Single Pulses**

**3450C:** 2 CPS—2 MC repetition rate, 0—10,000 μs delay, .05—10,000 μs width, .015 μs rise, ±50 v into 50Ω (slightly less at 2 MC).

**3450C/Y:** Provides two simultaneous pulses similar to flip-flop plate outputs. 1.7 MC repetition rates, widths to 1 second, .02 μs rise, ±45 v from 470Ω.

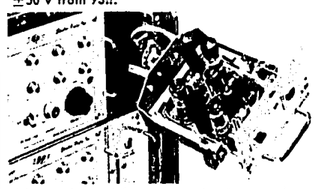
**3450C/X:** Offers pulse pairs and pulse trains. 1 MC repetition rate, pair separation is 0.5 μs—1 second, train separation/duration 0.2 μs—1 second, .015 μs rise, ±50 v into 50Ω.

**4120B:** .5 CPS—500 KC repetition rate, .05 μs—10,000 μs delay, 0.1—10,000 μs width, .03 μs rise, ±35 v into 100Ω.

**4550A:** 100 CPS—10 MC repetition rate, .02—1000 μs delay, .05—1000 μs width, 0.01 μs rise, ±8 v into 180Ω (12 v open circuit).

**2120B:** Single shot—100 KC repetition rate, 0—10,000 μs delay, .05—10,000 μs width, .02 μs rise, ±50 v into 50Ω.

**1410A:** 0.1—1000 CPS repetition rate, .01—100 MS width, 1 μs rise, ±25 v from 5000Ω.



**Double Pulses**

**4565A:** 10 MC unit with 0.01 μs rise; delays, widths to 1000 μs. Separate outputs ±8 v into 180Ω (12 v open circuit).

**2140B:** Single shot—100 KC, 1—10,000 μs separation, 0.05—10,000 μs width, .02 μs rise, ±50 v into 50Ω.

**Code Groups (PPM)**

**2130B-2150B:** Three to five outputs, single shot—10 KC, 0—100 μs delays, .04 μs rise. Mixed outputs ±50 v from 93Ω.

E-P plug-in modular construction is versatile and highly accessible and permits easy extension of standard instruments to special requirements.

**DIGITAL PULSE EQUIPMENT**

**Single and Double Pulses**

**5620A, 5632A, 5650A:** For high accuracy and low jitter. Pulse repetition rates, delays, and widths are controlled by gating through selected clock pulses, which may be provided from a crystal oscillator or variable repetition rate module.

**Code Groups (PCM)**

**5632A:** Sync repetition rate 1—10,000 clocks, two groups with three pulses each. Group and pulse delays to 1000 clocks. Clock periods determined by accessory modules.

**Word Generators**

**5500A:** Clock rates to 1 MC, 1—40 serial bits, 0.1—1000 μs output width, 4.5 v into 600Ω.

**5510A:** Same as 5500A, except 1—80 serial bits.

**Pulse Trains**

**5632A:** Two trains. Sync repetition rate is 1—10,000 clocks, 1—1000 pulses per train, train delays 1—1000 clocks, 0.2 μs wide pulses, 5 v into 600Ω.

**CURRENT GENERATING and CORE TESTING EQUIPMENT**

**5100B:** Two positive, two negative drivers; two delayed, four direct coding channels; 100 CPS—1 MC programming; +5 ma to 2.4 amperes, −5 ma to 4 amperes driver outputs; .04—.5 μs rise times; .1—100 μs widths. Program: 10 bits plus repeats. Model 81 jig permits test of .50 ID and larger cores.

**5120B:** Same as 5100B except two delayed coding channels only, one positive & one negative driver.

**3000A:** Same as 5120B except: driver input is external triggers or pulses at rates to 3.3 MC.

**3010A:** Same as 3000A except two positive and two negative drivers.

**6020B Calibrator:** Measures pulse amplitude to 0.5%, minimum-maximum comparison ±0—500 v, 0—1000 ma in five ranges.

**CA100:** Same, but single comparison. ±0—100 mv, 1 v ranges.

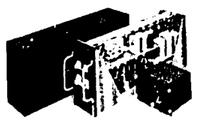
# DIGITAL TIMING EQUIPMENT

## Companion units for all types of recording media

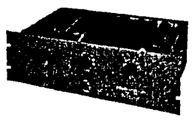
### For Data Acquisition



**DIGITAL TIMING GENERATOR**

Price: $7,950.00

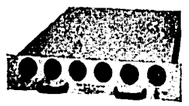
Model 270 is an all solid state device which generates binary coded decimal timing signals. These signals are recorded on magnetic tape throughout the data recording periods, providing a precise digital index in terms of elapsed time. The Generator also visually displays the exact time in hours, minutes, and seconds as illuminated digits.



**AIRBORNE DIGITAL TIMING GENERATOR**

Price: $7,450.00

Model 206A is designed specifically for airborne applications. Its output is the same as Model 270. All essential requirements of MIL-E-5400 specifications are met.

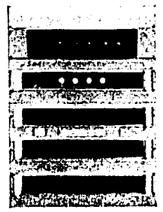


**RETARDED BIT RATE UNIT**

Price: $5,250.00

Model 220 operates in conjunction with Timing Generators, Models 270 and 206A, for providing a pulse-height, pulse-width signal to record time on equipments other than magnetic tape recorders.

**RUN CODE SELECTOR**



Price: $2,500.00

Model 225 is used with Model 270 Timing Generator inserting data run code numbers, or year, month, and day, in between timing words.

### For Data Reduction

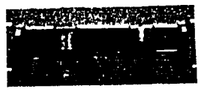
**UNIVERSAL MAGNETIC TAPE SEARCH UNIT**

The Series 2000 Universal Magnetic Tape Search Unit is used to control a magnetic tape transport during periods of data reduction for automatically searching the tape on the basis of time indices previously recorded. Changing from one time code to another is accomplished by changing time code detectors. All tape times are displayed in decimal regardless of tape time code format.

Price: Dependent upon Time Code Formats Specified.

## Solid State BINARY TO DECIMAL CONVERTER

### for data processing systems



All solid state device for converting any 4 bit code to decimal illuminated display. Latching circuits provide memory for binary information. No preventive maintenance is required.

Price: $95.00 (Nixie Bulb not included – Discounts for Quantity Purchases)

**DIGITAL LANGUAGE TRANSLATORS** for converting angular encoders of N bits of binary or Gray code to decimal readout including conversion multiplier. Accuracy equivalent to accuracy of encoder. Conversion of 16 bits in 5 ms.

## ULTRA STABLE OSCILLATOR

### Guaranteed stability of 5 parts in $10^{10}$ per day.

Price: $2,350.00

With a history of over 4 years in installations throughout the world, the Model 101C Ultra Stable Oscillator has established an unexcelled performance record as a precision 1 Mc crystal controlled Frequency Standard of almost unbelievable stability. Every unit is pre-aged in the factory until the frequency drift rate is less than 5 parts in $10^{10}$ per day.

**MULTIPLIERS AND DIVIDERS** for providing frequencies in decade steps from 1 Kc to 100 Mc are available as standard equipment. Other frequencies can be obtained on special order.

**SHIFT REGISTERS**
**. . . custom designed**

General Electric custom designs shift registers between 0 and 700 kc/s. With shift pulse power as low as .001 watts per kc, *voltage controlled* registers can deliver shift rates from 70 to 700 kc, to customers' specifications. Up to 100 kc, core-diode registers can be tailored to your exact needs. Most important, G. E.'s short cycle design service delivers first prototypes within a matter of days after specifications are received. 227-25

*32 years of experience . . . unequalled craftsmanship spell unchallenged leadership in the design and production of precision flight instruments, automatic celestial navigation, electromechanical, and avionic systems for the aviation industry.*

There's a Kollsman instrument aboard almost every known aircraft. Proof of dependability. Proof of craftsmanship. Proof of acceptance in a field which can't tinker with chance. Kollsman engineering and manufacturing complexes produce precision instruments, flight systems, missile modules, and ground support equipments of unmatched excellence. Kollsman leads the world in automatic celestial navigation systems. More than three decades of Kollsman specialization serve as a springboard to the stars.

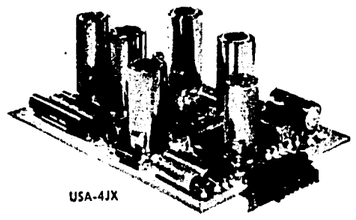
# PHILBRICK ANALOG COMPUTING INSTRUMENTS

Philbrick has the most complete line of dc operational amplifiers for computor, industrial and military applications available anywhere today. Besides the usual analog computing operations of addition, integration, and inversion, they comprehend function generation, isolation amplifying and current driving. Models with differential inputs also allow such dogmatic experiences as flipping, flopping, clipping, tripping, and the like . . . at dc accuracies limited only by external circuitry.

K2-W

## LOW COST PLUG-INS: K2 SERIES



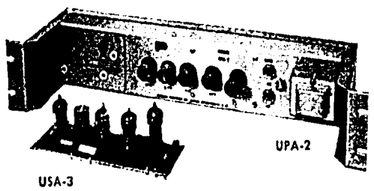
**K2-W** — An efficient, fool proof operational amplifier for all feedback computations, fast and slow; features differential inputs. $24*

**K2-P** — When used with K2-W, it makes a chopper-stabilized amplifier with gain of more than 15 million, coupled with sub-millivolt stability. $60*

**K2-XA** — Similar to K2-W, but with twice the output voltage, and three times the current capabilities. $28*

*Military equivalents of K2 series* are available, "ruggedized" to withstand most severe operating conditions. Open frame construction provides optimum free-air ventilation. Epoxy glass terminal boards, Blue Ribbon type connectors and provisions for secure chassis mounting. These include K2-WJ (price $58.), K2-YJ ($62.) and K2-PJ ($85.).

## FOR EXTRA-HIGH PERFORMANCE: USA-4 SERIES



USA-4JX

**USA-4** — Highest performance, coolest running amplifier in the world. Sharply improved drift, noise, gain, bandwidth, plus elimination of grid current make it a "best buy" for critical applications. ± 100 volt output, minimum gain, 100 million. Turret terminals for permanent wiring or plug-in models designed for slide mounting.

**The USA-4JX** (for *military* applications) features MIL-STD components, greatly reduced internal dissipation density, teflon insulated standoff terminals, machined aluminum plate. Tubes and resistors operate at much less than half their wattage ratings, capacitors at less than half their voltage rating. $170

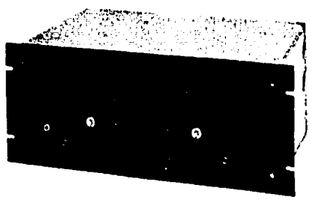
## ECONOMICAL PRINTED CIRCUIT AMPLIFIERS: USA-3 SERIES

USA-3 UPA-2

**USA-3** — Available with various housings, combines high performance and reliability with 100 $\mu$V dc stability and gain of $10^7$ v/v. Output exceeds ± 100 volts. Mounted in your chassis, it imparts precision to quality instrumentation. $95*

**USA-3-M3** — Self-contained, complete, ventilated, plug-in unit with Blue Ribbon connector, and sufficient space for mounting passive computing components. $125*

**PACKAGE UNITS AND MANIFOLDS**



Requiring only external computing impedances, in rack-mounting or table-top forms, units come *ready-to-operate*. Housings contain balance adjustments and heater transformers. Banana jack terminals give access to input and output of each amplifier. Typical units are:

**UPA-2** — Utility Packaged Amplifier, with USA-3 .....$149*
**HK** — Operational Manifold, 10 K2's (normally K2-W) .....$425
**HKR** — Operational Manifold (self-powered) .....$600
**K7-A10** — Operational Manifold (stabilized) 10 USA-3's ....$1200

## REGULATED POWER SUPPLIES

Performance typical of the best quality reference supplies commercially available, in a complete range of well-regulated units. For instrument applications they feature superb transient response. Internal temperature rise averages only about 20 degrees when running at 30% overload; noise is typically less than 200 microvolts.

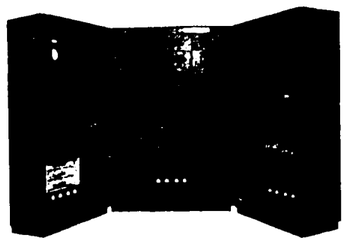
**Model R-100B** — Rated at 100 milliamperes, ± 300 vdc .....$189
**Model R-300** — Conservatively rated at 300 milliamperes .....$390
**Model R-500** — Doubles as a high accuracy reference voltage source ....$875

R-300

FOR FREE 24-PAGE MANUAL AND COMPLETE INFORMATION ON PHILBRICK COMPONENTS, WRITE DEPT. EAD

*OEM's: Write, wire, or phone for quantity discounts.

GEORGE A.
# PHILBRICK
RESEARCHES, INC.



*285 Columbus Ave., Boston 16, Mass.*
*COmmonwealth 6-5375, TWX: BS1032, FAX: BSN*

Philbrick uses these components in its own computing modules and systems, even the most sophisticated ones. With them, you can buy a computor of *precisely* the capacity you need — and add to it as requirements become more demanding. (Right): Typical installation, shown with Model K5-U Universal Linear Operator, basic building block of larger Philbrick installations.

For information on Philbrick computors and applications, please address your request to Dept. DHS.

**alfax** is revolutionizing graphic recording!

"ELECTRICITY IS THE INK"

ALFAX PAPER AND ALDEN ADJUSTERLESS RECORDING TECHNIQUES MAKE POSSIBLE —

• ***New Accuracies and Resolution in Direct Graphic Recording!***

Record full range of your electronic signal outputs — monitor processes and operations directly and instantaneously on Alfax Paper — no pens or ink — up to 18 step permanent tone shades.

**Multi-Channel Fact Finder — 30 Channels Plus Timing**

Record thirty channels of on-off data by merely supplying current to writing stylI — no pens or inks — simple motion switches are easily installed to make or break writing current to Alfax Paper. Ideal for monitoring production operations and processes, this compact, rugged recorder is portable for lab, factory and field use. Also available in 2 channel Magazine Fact Finder.

**Alden "Flying Spot" Component Recorders**

Get hi-resolution tone shade recordings on Alfax Paper of detecting instruments using scanning or sweep methods to collect data; Synchronize Alden "Flying Spot" with sweep or rep rate of your equipment—use direct signal outputs to mark Alfax with tone shades proportional to signal variations. Ideal for sonar, radar, facsimile, ultrasonic and magnetic flaw detection etc.

**Alden 5" Graphic Presentation Lab.**

An Alden "Flying Spot" helix Recorder, easy coupling drive motors and plug-in electronics suitable for a range of applications at speeds of 60 to 1800 sweeps/minute with 100 sweeps/in. definition are arranged as flexible building block components in this compact, mobile lab.

**Precision Graphic Recorder**

Instant, direct graphic recording of underwater energy propagations embracing full range of applications including seismic profiling, layer studies, echo sounding and ranging, bottom mapping, finding underwater objects, broad oceanographic studies.

• ***Fastest, Most Accurate Means of Communication!***

New high and low speed Alden facsimile recording systems using Alfax Paper are the most accurate means of communication today — are simple to install and operate virtually unattended.

**High Speed Selective Dispatch Facsimile System**

Specially designed to permit selection of pertinent data from any copy — letters, dispatches, reports, etc. — for instant transmission to wherever needed — yet complete reproductions can also be sent. 72 square inches of copy, 1800 words of newspaper type, or 900 words of typewriter text can be transmitted and received per minute.

**Continuous Reproduction Facsimile System**

Extremely high quality reproduction of large copy; such as newspapers, weather maps, blueprints, finished advertising layout, drawings, photographs, etc., can be transmitted easily with this equipment. Copy is scanned flat and reproduction automatically on remote continuous recorder.

**Alden Giant Bulletin System**

Fastest, accurate means of disseminating information to large groups of people. Automatically provides changing "up to the minute" bulletins 4 feet wide and up to 10 feet high and as much as 12 square feet of copy per minute, enlarged 10 times from remote flat-copy scanner as sent either by wire or a microwave system.

**WRITE FOR LITERATURE**

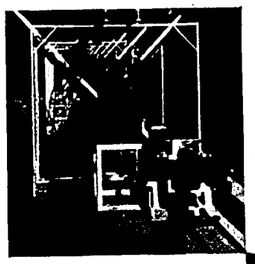
# LOOK TO AVCO...
## for use-proven space age research tools

Now available from Avco are advanced products and systems in the fields of Hypervelocity Instrumentation, Rocket-Environment Test Equipment, and Plasma Research Facilities. Represented by local agents throughout the United States and the world, these products are fully use-proven in research and development laboratories across the nation.

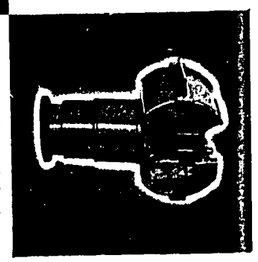
### PLASMA RESEARCH FACILITIES



**Plasma Generator PG-500,** operating with air as the working fluid, duplicates all essential conditions of atmospheric re-entry, consumes up to 1.5 megawatts of power, produces enthalpies up to 12,500 Btu/lb. Uses include plasma research, materials testing and re-entry simulation.

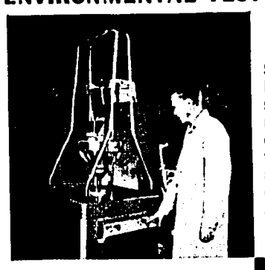
**Plasma Generator PG-030,** designed as ultra-reliable powder spray tool for industrial applications and as laboratory heat source for scientific applications, consumes from 4 to 50 KW of power, sprays tungsten, carbides, alumina, zirconia, etc. Available with pistol grip or pedestal.

### HYPERVELOCITY INSTRUMENTATION

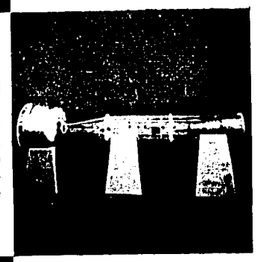


**Shadowgraph and Schlieren Systems** record events associated with hypervelocity aerodynamic phenomena; include light source, lenses, catadioptric light screen, Kerr Cell Shutter and Camera. Record shock waves, flow patterns and impact deformations of space age research.

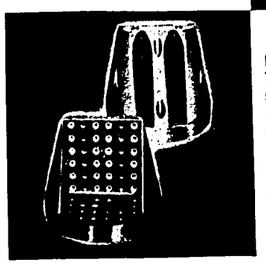
**Avco Kerr Cell Shutter** permits any exposure from .005 to .1 μsec., is available as an independent module. Large 2-inch aperture unit may be remotely positioned for maximum utility. Useful for ultra-high speed shuttering in ballistic, chemical and thermal research. Can be synchronized to Package Light Source.



**Package Light Sources,** providing from .3 to 1 μsec. light pulse durations, are general purpose, spark-type units of cylindrical construction with coaxial discharge path; predetermined triggering; also provide synchronized output pulse for balance of system.



**Rotating Mirror and Drum Cameras** for accurate position-versus-time recording of hypervelocity events. Mirror camera writes at rate of 4mm/μsec. on 70 mm film; Rotating Drum Camera writes at rate of .19 mm/μsec. on 76mm film for streak and Schlieren recording.



### ENVIRONMENTAL TEST EQUIPMENT

**Shock Machines,** 100 and 500-lb. capacity machines with shock pulses up to 1500 g's, meet ballistic missile test specifications by providing saw-tooth, quarter- and half-sine, and triangular pulses. 20-lb. capacity machine available June, 1960.

**Acoustic Noise Test Systems** available in a variety of configurations to meet specialized requirements. Systems available with random noise outputs of 163, 150, 140, and 120 db. Larger systems feature Avco Acoustic Noise Generator AG-012, simulating random noise of rocket engine firing.

**Environmental Test Fixture** TF-006-1 is compact and versatile, virtually resonance-free up to 2000 cps, mounts on standard vibration exciters, centrifuges and shock machines; also handles several specimens along three mutually perpendicular axes.

## TEST INSTRUMENTS for ELECTRICAL EQUIPMENT

**Laboratory**
**Production**
**Maintenance**

### Voltage Breakdown Tests

Bench HYPOT* Test Sets, a-c and d-c models, have outputs to 30 kv. Separate 4½" meters for test voltage and leakage current. Wide selection of models.
Model 424 Bench HYPOT* provides 0-5000 v d-c. For testing cables, condensers, coils, transformers, motors, and assemblies. Measures leakage current from 0.1 microampere to 100 microamperes over four scale ranges. Rapid testing of capacitors with output of 5 milliamperes under short circuit. Operates from 110-120 v 50/60 c outlet with long-life selenium high voltage supply.
Net complete . . . . . $497.50

- **Insulation Materials Tester**
  Dielectric strength determined to laboratory precision. Interchangeable test fixtures for varnishes, porcelain, tape, acetate sheet, films, tubing and cloth. Write for Bulletin, Model 4501 HYPOT* Materials Tester.
- **Insulating Oils Tester**
  New portable design, only 42 lbs., for testing insulating oils at point of application as well as in the laboratory. Test potential variable from 0 to 35 kv, with 2 kva rating. Write for bulletin Model 4505 HYPOT* Oil Tester.
- **Measure Resistance to FIVE MILLION MEGOHMS**
  VIBROTEST* megohmmeters provide direct reading measurements to FIVE million megohms and higher with electronic power supply that eliminates tedious cranking. Write for bulletin "VIBROTEST".
- **Test Electrical Grounds**
  VIBROGROUND* measures resistance to ground of electronic, telephone, and power equipment. Direct reading. Operates from self-contained battery. Write for Bulletin "VIBROGROUND"*
- **Special Instruments**
  A. R. I. engineers have developed instrumentation to meet many specialized research, development, and production applications. Your inquiry for special equipment will receive prompt attention.

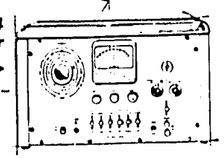
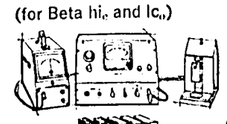
# Baird-Atomic MEETS THE TEST

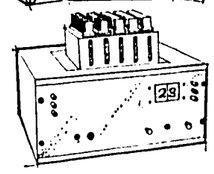
WITH THE MOST COMPLETE LINE OF TRANSISTOR & SEMICONDUCTOR TEST EQUIPMENT AVAILABLE



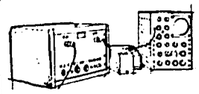
**CURVE TRACER, MODEL MW-1** *(Shown with tube adapter)*
*Baird-Atomic's Curve Tracer, Model MW-1, is the finest of its type. It is designed to display families of characteristic curves for PNP and NPN transistors in either common base or common emitter configurations. Both input and or output current or voltage may be selected as components of the curves displayed. Its operational range includes the* ***highest maximums*** *(30A collector current continuous duty—50A intermittent and 450 watts maximum) and the* ***lowest impedances*** *(minimum observed .001 ohms to 10 megohms) presently available. Maximum input drive current is 5 amperes and the MW-1 features* ***automatic overload protection.*** *These features make B/A's New Curve Tracer the most versatile on the market.*



***MODEL KP-2 SERIES GENERAL PURPOSE TRANSISTOR TEST SET ▶***
(for medium power transistors up to 2A)



***MODEL GP-4 TRANSISTOR TEST SET ▶***
(for low power transistors—h parameters)



***◀ MODEL KT-1 BETA TESTER***
(for Beta $h_{fe}$ and $I_{co}$)

***◀ MODEL JJ SEMICONDUCTOR MINORITY CARRIER LIFETIME TEST SET***

***◀ MODEL JN RESISTIVITY TEST SET***

***◀ MODEL NA-1 COMPONENT SELECTOR***
(for inspection of 2 or 3-terminal components)

Select the transistorized **DYNA-EMPIRE** GAUSSMETER best suited to your needs

Completely transistorized Dyna-Empire gaussmeters accurately measure flux density and determine "flow" direction. Ideal for measuring and locating stray fields, plotting variations in strength and performing rapid comparisons of production lots against a standard. Easy-to-operate,—no jerk, pull, ballistic readings or circuit breaking required.

**NEW TRANSISTORIZED GAUSSMETER MODEL D-874**

This precision instrument reads from 300 to 30,000 gauss full scale, with an accuracy of ±3.5%. It fulfills all needs of a quality gaussmeter at a modest price.

*Special Features:*

FIVE RANGES: 300 gauss full scale, 1,000 gauss full scale, 3,000 gauss full scale, 10,000 gauss full scale, 30,000 gauss full scale.
LINEAR OVER ENTIRE OPERATING RANGE
PORTABLE, OPERATES FROM OWN SELF-CONTAINED BATTERIES
BATTERY LIFE—1,000 HOURS
REQUIRES NO EXTERNAL POWER SOURCE
INTERNAL CALIBRATION STANDARD
WEIGHT—4 LBS.
UNIVERSAL PROBE SUPPLIED IS 0.025" THICK BY 0.200" WIDE. ACTIVE AREA IS ONLY 0.0079 SQUARE INCHES LOCATED NEAR THE TIP OF THE PROBE.

Complete with Universal probe $195.

**TRANSISTORIZED GAUSSMETER MODEL D-855**

This quality precision built Gaussmeter reads flux densities to 30,000 Gauss full scale ±2.5%. It is a highly sensitive instrument and provides tremendous flexibility. Complete with two linear probes—one high sensitivity probe for measurement of low density fields and one probe for measurement of high density fields. Special probe available for reading 3 gauss full scale.

**NEW high voltage INSULATION TEST SET**

**120 KILOVOLTS DC**

- Input: 115 Volts, 60 cycle.
- Output: 5 MA current at 120 KV.
- Either positive or negative polarity.
- Completely mobile unit.
- Oil Insulation.
- Coarse or fine adjustment of output voltage.
- Complete safety features.
- Electronic overload circuits settable over full range.
- Ripple of less than 2% RMS.
- Instrumentation: 4 1/2" 3-range KV and MA meters.
- Automatic stored energy discharge switch.
- Also available at 80 KV at 10 MA.

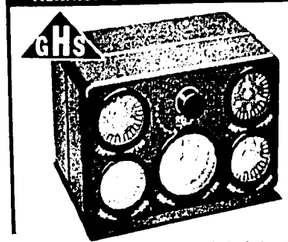
ELECTRONIC SUB-SYSTEMS
TOGGLE SWITCHES • GASEALS*
*TM of GHS CORP



**MEGPOT MEGOHM-METER AND HIGH POTENTIAL TEST SET**

Non-destructive testing assured through quick acting relay, cuts current from tested components in milliseconds. Provides for continuously variable leakage test, with settings from 20 microamperes to 3 milliamperes. Reduces costs substantially for testing transformers, relays, capacitors and complete assemblies. Rugged, portable.
Voltage Ranges: Variable ranges to 0-5000V avail.
Megohm-Meter Ranges: Up to 4 million megohms at 100 or 200V DC, up to 10 million megohms at 500V DC.
Size: 16¼" wide x 10½" high x 12¼" deep.
Weight: 26 lbs. BULLETIN No. 158

**MEGPOT HIGH POTENTIAL TEST SET**

Lightweight portable for non-destructive testing. Full scale output with 0.0025 mfd load capacitance.
Voltage Ranges: Variable ranges to 0-5000V avail.
Size: 11¼" wide x 8½" high x 9¼" deep.
Weight: 12 lbs. BULLETIN No. 570

**HERMETIC SEALING SERVICES**

This high altitude timer is typical of the many "problem packages" resolved by the exclusive GHS system of hermetic sealing with Mass Spectrometer Leak Testing. Protects against 7 major causes of product failure. GHS hermetically enclosed units could outlast ordinary similar products by more than 10 to 11 Complete engineering and manufacturing facilities for rapid, economical service in any quantity. BULLETIN No. 426

**HERMETICALLY SEALED AND PANEL SEALED TOGGLE SWITCHES**

Military approved. Meets applicable requirements of Mil-S-3950.
Electrical Rating: 10 amps at 125V AC or 30V DC.
Endurance: Greater than 10,000 cycles at +85°C.
Dielectric Strength: Over 1000V—60 C.P.S. AC.
Insulation Resistance: Over 1000 megohms.
Temperature Range: —55°C. to +85°C.
BULLETIN No. 540

**RESILIENT, METALLIC GASEALS**

Re-usable, pressurized, leak-tight static sealing against gases and liquids under extremes of temperature and environment.
Service Temperature Range: From below —200°F. to above +800°F.
Tube Cross-Section: Minimum 1/16" O.D.; Maximum depending on seal size.
Seal Size: Minimum 1½" I.D.; Maximum over 36" O.D.
Seal Squeeze: .015 inch ±.005
Clamping Force: Approx. 150 p.l.i.
BULLETIN No. 258

**GREIBACH**
**PRECISION METERS**

GIVE YOU
**BETTER THAN**
**¼% ACCURACY**
*...DESIGNED-IN, CONSTANT, GUARANTEED*

Greibach-patented Bifilar no-friction movement and weightless light beam pointer use no pivots, no jewels, no hairsprings, no amplifiers. Greibach meters start with near-perfect accuracy. Accuracy is ***unaffected even by overloads of 100,000%*** (to 125,000,000% in some cases). Rugged, shock-proof design cradles the coil; withstands up to 500 G's. There's nothing to wear, vary or age with use, so accuracy remains high over long periods. Most meters leave our plant with measured accuracy of better than 1/10%.

**OTHER EXCLUSIVE GREIBACH PRECISION METER FEATURES:**

- Sensitivity to 0.2 μamp. full scale
- Resistance to 1/300th of conventional meters
- Energy drain as low as $4 \times 10^{-10}$ watt
- No parallax errors from any reading angle
- Multiple Ranges—up to 23 in one meter.

The secret of Super-Precision Performance is in this cartridge, containing unique Bifilar Suspension.

For full details on the thousands of range-combinations available, write, wire or phone today for detailed 20-page catalog.

# PHASE ANGLE AND RATIO INSTRUMENTS

## PHASE ANGLE VOLTMETER
MODEL VM-202

FOR DIRECT READING OF...
- Phase angle
- In-phase voltage
- Quadrature voltage
- Fundamental voltage
- Total voltage
- Nulls

A unique, multi-functional instrument that combines in one compact package a phase-sensitive voltmeter, AC vacuum tube voltmeter, phase meter and phase-sensitive null detector. Permits simple laboratory or production line measurement of total, fundamental, in-phase and quadrature voltage components; phase-sensitive nulling of in-phase or quadrature components; direct dial reading of phase angle without ambiguity. Characteristics include high input impedance, high sensitivity and wide voltage range. Optional parallel rear connectors, built-in reference channel isolation, built-in signal isolation for balanced or single-ended inputs, panel finishes to user specifications. Plug-in modules for reference isolation, signal summing and signal bridging available as optional accessories.

**MODEL VM-233 PORTABLE TRANSISTORIZED VOLTMETER.** All features of VM-202 in an all-transistor, ruggedized, low power unit for general field use and other applications where small size and light weight are essential.

## SPECIFICATIONS
These specifications describe the Model VM-202 Phase Angle Voltmeter only. The wide range of available standard and custom models are shown on this page. Detailed specifications for other models will be supplied promptly on request.

| | | | |
|---|---|---|---|
| NULLING SENSITIVITY | 5 microvolts | VOLTAGE RANGE | 1 mv. to 300V, in 12 ranges |
| HARMONIC REJECTION | 55 db (with filters) | VOLTAGE ACCURACY | ±2% of f.s. |
| SCALE | 3-0-3, 10-0-10, linear | PHASE ACCURACY | dial: ±1° meter: ±3% of f.s. degrees |
| PHASE ANGLE DIAL | 4 scales, 90° (elec.) apart | SIGNAL FREQUENCY | 1 freq., 30 cps-10 kc. |
| POWER | 60 watts, 115V, 60-400 cps. | INPUT IMPEDANCE | 10 megohms |
| DIMENSION | 5¼" h. x 19" w. x 7⅞" d. | REFERENCE INPUT | 100,000 ohms, 0.25V min. |
| MOUNTING | bench or rack | OVERLOAD | 5:1 |

MODEL VM-204

**THREE-FREQUENCY VOLTMETER.** For use where signals of known frequencies are encountered repeatedly. Similar to VM-202, but accommodates any three pre-specified signal frequencies, typically 400, 800 and 1000 cps. Choice of frequencies from 60 to 4500 cps in standard models; to 10 kc on special order. Panel size and configuration as VM-202, but 2" deeper case.

**BROADBAND VOLTMETER, MODEL VM-301.** For laboratory and other applications where a wide range of signal frequencies must be instrumented with highest accuracy. Accommodates signals from 10 cps to 100 kc. Phase shift accuracy 0.2° absolute, 0.01° with special techniques, uniform over full 360°. Phase shift can be read while sweeping frequency in full decade steps. Plug-in rejection filters eliminate harmonic effects. Null indications are insensitive to changes in signal level. Rack or bench mount.

MODEL VM-230B

**TRANSISTORIZED VOLTMETER.** Miniature, ruggedized version of VM-202 for modular inclusion in ground support and similar systems requiring small size and dependable performance in severe environments. Range down to 300 microvolts on special order. Input impedance 1 megohm direct; 120h, 0.5 meg. at 400 cps with isolation transformer. Frequency response 20 cps to 20 kc as VTVM.

## AC-to-DC CONVERTER
MODEL PSC-410

Transistorized, phase sensitive AC-to-DC converter features high linearity and sensitivity, flat frequency response, high output. Single- or double-ended output proportional to total, fundamental, in-phase or quadrature components. Compact modular, plug-in configuration readily integrates with ground or airborne instrument systems.

## RATIO BOXES

| RATIO BOX SPECIFICATIONS | | | |
|---|---|---|---|
| Ratio Range | —0.111111 to +1.111111 | Input Volts | 0.35f to 1.0f (350V max.) |
| Frequency Range | 25 cps to 10 kc | Series Z | 3.5 to 7.5 ohms |
| Accuracy | from 10 ppm to 1 ppm | Resonant Frequency | 400 cps to 10 kc. |
| Input Z | 300 k to 1.0 meg. | Size (typical) | 3¼" h. x 19" w. x 8½" d. |

Table shows range of available characteristics. Specific combinations of characteristics differ with particular models and will be quoted on request.

Precision inductive AC voltage dividers to meet all range, accuracy and cost requirements. Rack and portable bench models, deviation, binary, automatic stepping types and ratio standards. Maintain rated accuracy over specified frequency range; feature in-line readout, high input and low series impedance.

**CVR 550 COMPLEX VOLTAGE RATIOMETER** Provides direct reading of in-phase transformation ratio to 0.0001% with phase angles to 0.2 radians, unaffected by quadrature. Combines ratio box and phase angle voltmeter in a single efficient unit. For signals at any three frequencies from 400 to 2000 cps.

INSTRUMENTATION AND CONTROL SYSTEMS

## SEMI-CONDUCTOR TEST EQUIPMENT

### MODULAR BUILDING BLOCKS
- Constant current and voltage sources from micro-amps to amperes and microvolts to kilovolts.
- D.C. Comparators capable of .1% comparison accuracies in the millivolt regions.
- Programmers for multiple test scheduling.
- A.C. and D.C. Test modules covering a wide variety of semiconductor parameters.
- Automatic Sorters for product grading.
- Component Handling Devices.

### "TURN-KEY" SYSTEMS
- High Volume, Automatic Transistor-Diode Testers.
- Elevated Temperature Diode Test Sets.
- Life Test System for tubes, diodes, transistors, varistors and thermistors including digital programming, and punch-card readout.
- Wafer and Wire Bonding equipment.
- Component assembly, handling and sorting machines.

*Specialists* in the solution of difficult measurement problems, MRC offers engineering assistance in answering your test requirements. Write, wire or phone for details to Measurements Research Company, Castor & Kensington Aves., Phila. 24, Penna. JE 5-3700.

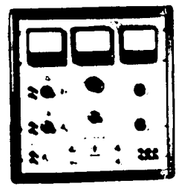
**GOERZ Presents the *Unigor 3***

**MULTIRANGE INSTRUMENTS**

**GOERZ** announces the world's most versatile line of multirange instruments—the **UNIGOR** series. Accuracies of 1.0% on D.C., 1.5% on A.C., automatic overload cut-out protection. Current and voltage measurements on *both* D.C. and A.C. Some models measure temperature, some models measure capacitance in addition to resistance on *all* models.

**FEATURES *Unigor 3***



- 25,000 Ω/v on D.C.; 2000 Ω/v on A.C.
- ±1.0% on D.C.; ±1.5% on A.C.
- D.C. current from 100μa to 5 amp.; A.C. current from 500μa to 5 amp.
- D.C. voltage from 100 mv to 5000 volts; A.C. voltage from 500 mv to 5000 volts.
- *Resistance* up to 50 megohms; *Capacitance* from 100μμf.
- *Full automatic overload protection.*
- 48 ranges in all including output from −34 db to +56 db.

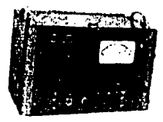
**PE HIGH VOLTAGE TEST EQUIPMENT**

**DC OVERPOTENTIAL TESTERS**

MODEL S50 DC 0-50 KV, 5 ma.
MODEL S100 DC 0-100 KV, 5 ma.
MODEL S120 DC 0-120 KV, 5 ma.
MODEL S150 DC 0-150 KV, 5 ma.
MODEL S200 DC 0-200 KV, 5 ma.



*Features:*
- Non-destructive testing
- Small, light weight units
- Rugged design for industrial use
- Use of selenium rectifiers
- Plug-in type HV output shielded cable
- Control cabinet stacks on top of HV tank (May be separated for remote control)

— Also available in heavier current models —

**SENSITIVE HIPOT TESTERS, DELUXE SERIES "H"**

H2 AC/DC 0-2 KV Peak AC/DC, 1 ma.
H5 AC/DC 0-5 KV Peak AC/DC, 1 ma.

*Features:*
- 5 microamp circuit breaker (adjustable to 1000) deenergizes HV
- Non-destructive testing
- Dual output, AC and DC
- Dual scale KV meter, directly at output
- Portable, safe
- Guarded or straight ground return

Also available in larger cabinets with 19" panel in 10 KV, 20 KV, and 30 KV models, with two meters, plus other extra features. (See general catalog.)

*Send for catalog of complete line, including: low-cost S & D hipot testers, high power HV test sets, cable fault locaters, and wire sparkers.*

**HIGH VOLTAGE TEST SETS, SERIES "K" HIGH CAPACITY AC, or DC**

Many sizes: 2 KV to 200 KV and 1 to 100 KVA or KW

For dielectric tests on: Insulating materials, motors and generators, transformers, wire and cable, HV bushings and other apparatus.

*FEATURES:*
- High current capacity to meet ASTM, IPCEA Standards
- Metering at output for greatest accuracy
- Complete safety and convenience controls, including external interlock
- 4" meters with dual scales
- Motorized output control optionally available
- Separate control section for remote control

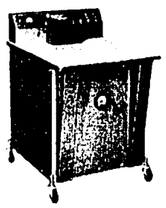
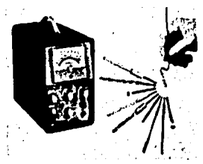
## For MAGNET CHARGING, TREATING and CALIBRATION



MODEL 1221 is used for small magnets. Its 10,000 ampere-turn output will saturate about 2" of Alnico V. Operates by condenser discharge method thru plug-in fixtures. Uses only 30 watts at 115 v. For continuous duty; charging cycle averages 3 sec. Price $195.

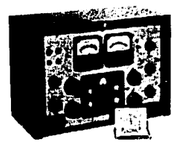
MODEL 107A is a versatile, condenser discharge magnetizer for most medium size magnets of either simple or complex pole configuration. It provides ranges of 12,000 and 24,000 ampere-turns and is capable of saturating most instrument magnets, including the core type mechanisms, using the standard flat bar, adapters or wire-wound fixtures. Can be used for continuous duty production magnetizing; average charging cycle is under 5 sec. Weight is 75 lbs. Size 12 x 7 x 17. Operates from 115-volt, 60-cycle line. Price $590.



MODEL 1500 is designed for production, research and instrument repair work. It will magnetize the new cobalt platinum and barium ferrite materials as well as all the Alnicos. It will saturate large switchboard meter assemblies and all panel type instruments and uses most existing adapters designed for the Model 107A. Wire-wound fixtures are plugged into the front panel through a safety interlock system providing maximum operator protection. Operates from 115-volt, 60-cycle line. Size 11 x 20 x 15; weight 125 lbs. Price $995.

MODEL 942 will saturate Alnico magnets weighing up to 34 lbs. and high flux ceramic magnets of any shape or pole configuration. Operates on condenser discharge principle from regular 115-volt, 60-cycle line. Produces charging outputs (depending on number of 100 μf condensers employed) from 100,000 to 200,000 ampere-turns through plug-in transformers, up to 3600 watt-seconds using wire-wound fixtures. Adapters for multi-pole rotors, rod, bar, ring and various other shapes available. Equipped with extensive system of safety interlocks for complete operator protection. Designed for continuous production use with low power consumption. Price of basic unit is less than $2100.

MODEL 889A de-magnetizes saturated magnets to any desired level of flux. Provides a precision method for rapidly treating permanent magnets, including the new core type instrument mechanisms. Used with Model 206A Booster or Model 107A Charger. Price $247.



Ten rigid and flexible, flat and axial (Bi and InAs) probes shown offer selection to solve almost any magnet or flux field measurement problem. Axial probes supplied w/ spec. ref. magnets. Prices from $30 to $180.

MODEL 1295A transistorized Gaussmeter measures magnetic fields to ±3% accuracy over 9 full-scale ranges: 0-100, 200, 500, 1K, 2K, 5K, 10K, 20K and 20K+ gausses. Operates from 115-V, 50-400 cps or access. bat. Price with 1000-gauss ¾% ref. magnet $390.

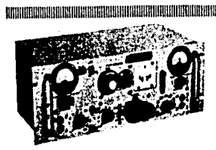
RFL Radio Frequency LABORATORIES, INC. Boonton, New Jersey, U.S.A.

## For ELECTRICAL INSTRUMENT CALIBRATION

*A Model for Every Purpose and Price Range*

MODEL 829 checks AC and DC meters of all types and ranges. Compact cabinet contains power supply, special Weston standard meters, Wheatstone Bridge and all circuits for quick, convenient instrument calibration to 0.5% accuracy by non-technical personnel. Automatic protection for both operator and instrument under test is provided by interlocks and high voltage discharge circuits. Net price $2650.

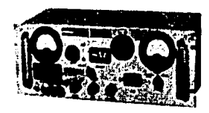
MODEL 829A is a higher accuracy version of the Model 829. Separately housed, horizontally mounted Weston or Sensitive Research Standard meters are employed in place of the vertical standards. Full-scale accuracy on all AC and DC ranges is 0.25%. Covers 1.5 mv — 1500 V, 1.5 ma — 20 amp. AC; 0.25 mv — 2000 V, 2 uA — 20 amp. DC. Price $3150.



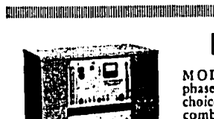
MODEL 1605 is a self-contained, AC-DC calibration/transfer standard capable of measuring AC (up to 50 kc) and DC voltages and currents up to 1500 volts and 15 amperes with high precision. It includes a volt-box, shunt-box, precision potentiometer, standard cell, galvanometer, thermal converter, plus all necessary compensating and switching circuits. 45 full-scale ranges are provided. Calibrated accuracy: ±0.03% DC, ±0.05% AC. Price $2450.

Nine additional, self-contained console type calibration standards having various accuracies and employing both electrical and electronic circuits are available. They offer three basic methods of calibration: visual comparison against a standard meter, digital presentation, and introduction of a selected, precise voltage or current to the instrument being calibrated. Models are 260C, 261B, 262B, 454, 643, 1294, 1487, 1900 and 1967. Prices from $5000 to $20,000.

## For CRYSTAL TESTING

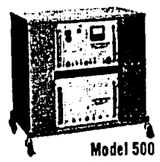


FOUR MODELS developed for Signal Corps under national crystal testing standardization program to measure resonance and anti-resonance resistance of quartz crystals including those covered by MIL-C-3098B. Capacitance, inductance and PI of crystal can be determined.



MODEL 459A (Improved TS-330/TSM) covers 800 kc to 15 mc, for 0.002% crystals, 0-9900 ohms. Operates from 115/230 v, 50-1000 cps. Price $1175.

MODEL 531 (TS-683/TSM) Crystal Impedance Meter covers range of 10-140 mc for 10-150 ohm crystals. Twelve fixed calibrating resistors of 10, 22, 30, 40, 51, 60, 68, 82, 91, 100, 120 and 150 ohms, plus a 100-ohm var. resistor for determining crystal resistance. Anti-resonance adapter also provided. Operates from 115/230 v, 50-1000 cps source. Price $725.



MODEL 541A (TS-710/TSM) for 10-1100 kc range crystals with resistances from 200 ohms to 0.5 megohms. An internal load capacitance is calibrated from 15 to 105 mmf with accuracy better than ±0.5 mmf. Power dissipated in crystal measured by built-in VTVM and ohmmeter. For 115/230 v, 50-1000 cps operation. Price $950.

MODEL 1207 (AN/TSM-15) covers range of 75-200 mc for 10-125 ohm crystals. Crystal voltage at series resonance is measured within 10%, effective resistance within ±5 ohms, and the power calculated. 18 $C_o$ cancellation inductances and 1 uncompensated var. resistor supplied; 5 compensated var. resistors available. 115/230 v, 50-1000 cps. Price $1295.

## POWER SUPPLIES

Model 500

MODEL 500 is a single phase, 500 VA supply with choice of 4 plug-in osc. for combinations of variable output power, frequency and voltage. Has high stability, low harmonic distortion and excellent voltage regulation. Output frequency range 40-3000 cps; output voltage 0-130; harmonic distortion better than 0.5% at 200 VA to less than 1% at 450 VA; amplitude regulation 0.5% for 5% line kick. Price $1550.

Model 150

MODEL 150 is a stable, 1 phase, 150 VA supply with choice of LC regulating osc. producing output frequencies from 380-2400 cps at 115 volts or a precision 400 cps ±0.01% osc. Price $595.

## SPECIAL HARDWARE

**Chassis Slides H-5798**

Will support 200-lb. chassis, quickly removable by pulling two pins. Complies w/ MIL Specs; has Iridite on cadmium plated steel rails, bronze rollers, stainless steel pins, nylon bushing. Price according to quantity ordered.

**Sealnuts**

*Seal out Water, Dirt & Corrosion*

Mount and seal electrical switches. Eleven styles fit most toggle, rotary and push-button types; provide metal-to-metal contact w/panel; Silicone sleeve and O-ring seal against 200 psi ext.; stay flexible at −65°C; comply w/MIL-B-5423.

**Model 10 Cart**

Inside shelf adjusts any vert. position for 2-level support of equipment; interior is 33 x 16½ x 26. One side takes 19" panels per RETMA standards. Heavy gauge steel w/baked enamel over prime coat. Acc. drop-leaf shelf fits either side.

**TIMING GENERATOR...**

**TRIANGULAR-WAVE AND MARKER-PIP SWEEP-RASTER GENERATOR**

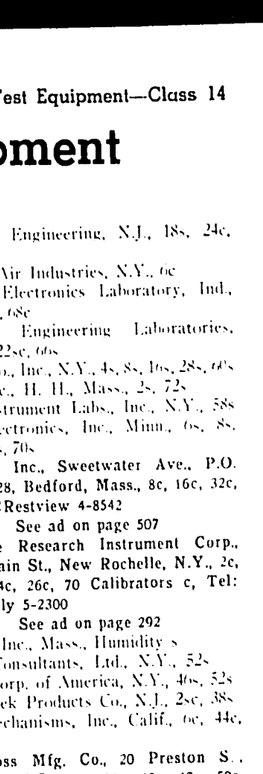
RADIONICS Model TWM-2A provides a simple and inexpensive method for achieving high-accuracy timing of single-shot, multiple-signal phenomena by substituting a high-precision triangular-wave timing raster for the usual X-axis sweep on a modern scope. Interpolating marker pips modulate the CRT Z-axis, with 10 pips per triangle period. Sweep expansion and timing accuracy are limited only by the number of triangles appearing in the timing raster.

*Write for complete information.*

**HIGH POWER PULSED OSCILLATOR FOR ULTRASOUND GENERATION**

**Model PUG-3**

Some pertinent characteristics: Supplies 0 to 9000 volts p-p rf to quartz plates up to 3.5 inches diameter, or 250 watts rf to a low impedance load, either pulsed or cw CCS . . . frequency range, 600 kc to 5 mc . . . precision pulse modulator . . . internal and external triggering . . . preset pulse counter and aural monitoring. Three-inch plate transducers and focussing lenses available as accessories for biomedical or industrial research.



Other models: Lower power modularized rf pulsers and modulators for versatility and economy. Frequency ranges from 500 kc to 500 mc.

*Write for complete details.*

**ULTRASONIC ANALYZER**

Model UTS-2 is a modularized assembly of instrument components needed for ultrasonic analysis. The components are available separately or grouped. Components are: Wide range pulsed rf phase-stable oscillator . . . pulse forming circuits, delay and trigger generators . . . preamplifiers, preselector, and matching network . . . step attenuator, 1db/step . . . wide band rf amplifier, detector, video amplifier . . . elementary triggered-sweep scope to obviate buying or tying up expensive laboratory models . . . transducers (custom built) and matching networks.

When desired, these components may be integrally mounted as shown in the photo.

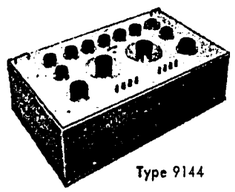
# NEW INSTRUMENTS *by Sensitive Research*

## RF VOLTMETER CALIBRATOR

Model RFVC

**Model RFVC** — Radio Frequency Self Checking RMS voltmeter for the certification of VTVM's from DC to 10 Mc. Accuracy .3% of full scale ± .2% frequency influence. Ranges .01/.1/1/3 V. Checks its own accuracy against a .05% stable internal standard source.



## CALIBRATION CONSOLES

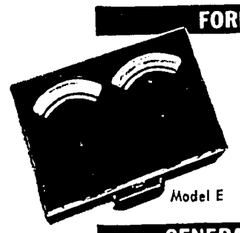
**Model LTC** — AC-DC/DC. Accuracy .05% of actual reading. Ranges .5 V. to 1111 V.; 1 Ma (2 Ma on AC) to 11.11 amps. Resolution .01%. Frequency range DC to 25 KC. Direct % Error Readout. Model LT-PS — AC power supply to full capabilities of console. Harmonic distortion less than .1%. Other consoles available.

Model LTC

## DC POTENTIOMETERS

Type 9144

A new line of 6 figure instruments guaranteed 10X more accurate than any potentiometer commercially available today, having a subdivision of 1 part in $10^6$ of the 1 volt setting and calibrated to be usable to an accuracy of ± .0002% or better. Absolute accuracy guaranteed to ± .001% nominal or better. Resolution excellent for comparison of saturated standard cells. Temperature controlled. High sensitivity Galvanometer, 4 terminal NBS Type resistors, ratio boxes and other primary standards available.

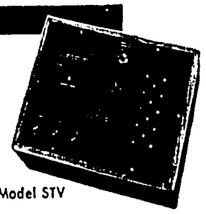


## EXPANDED SCALE INSTRUMENTS

**Model INCRE** — Differential incremeter. A NEW .05% f.s. accurate expanded scale DC standard for rack panel mounting or portable use. Combines the high comparison accuracy of the differential instrument with a .005% stable source. Scale has an effective length of 63" or 70", and a resolution of 1000 divisions. Each 10% of any range is expanded over the instrument's actual 6.3" or 7" scale length. Direct reading. No balancing or nulling. Single or multirange combinations from 200 ua. to 30 amps. and 200 mv. to 1 kv.

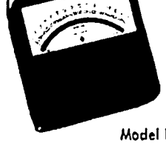
Model INCRE

## FORM FACTOR INSTRUMENT



Model E

**Model E** — supplies a direct reading correction factor for instruments affected by non-sinusoidal wave form deviation. Indicates ratio of true RMS values to average, positive peak, and negative peak values. Determines the true RMS values of average and peak reading instruments that are used on a distorted wave. Accuracy: .2% between 25-500 cps.

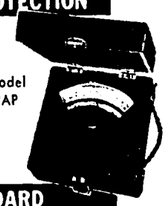


## DC VOLTAGE STANDARDS

**Model STV** — Nominal output 1.0000 V. and 1.0185 V. Accuracy ± .01%. Actual output certified within ± .001% and guaranteed stable within ± .005%. 115 V. 60 cps input. Unaffected by extremes of temperature, short circuiting, and vibration. Replaces the standard cell. OEM types available.

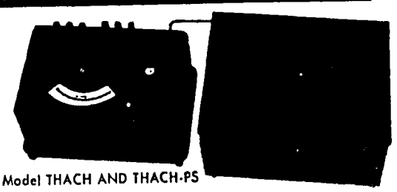
Model STV

## GENERAL PURPOSE PORTABLES



Model N

**Model N**—economically priced, stable and rugged .5% accurate DC current and voltage instrument. Long 6.1" scale. Employs a shielded "U" shaped magnet and not the common center core type characteristic of instruments in its price range. Model NP is for panel mounting. Model NSI is an AC version. All have molded bakelite cases and are available switch controlled.



## AUTOMATIC OVERLOAD PROTECTION

**Model 2 AP** — AC-DC Polyranger. Thermocouple type. Automatically protected for overloads of at least 5000%. Accuracy: .75%. Ranges from 2 ma. to 1 amp. and 2 V. to 500 V. Sensitivity: 500 ohms/V. Diamond Pivoted. Other Polyrangers with as many as 88 ranges available.

Model 2AP

## AC-DC LABORATORY STANDARD AND POWER SUPPLY

Model THACH AND THACH-PS

**Model THACH** — AC/DC Self Checking Volt-Amp Milliammeter. Accuracy ± .2% f.s. to 4 kc. Ranges — 10/20/50/100/200/500 ma.; 1/2/5 Amps; 1/2/5/10/20/50/100/200/500/1000 V. f.s. Checks its own accuracy against an internal standard cell. Model THACH-PS — special regulated THACH Power Supply (optional) automatically shuts off power to the THACH when switching ranges, reducing possibility of accidental overloads. Output is DC or 60 cps. (50-2500 cps. can be plugged in). Combination serves as a calibrator, measuring instrument, and general purpose power supply.

**Primary and secondary standards** for the accurate measurement or certification of AC-DC current, voltage, power, power factor, frequency and magnetic quantities. All electrical indicating instruments have hand-drawn mirrored scales and most are Diamond Pivoted, of course!

Not illustrated above, but available, are a complete line of portable and panel types including: • **Wattmeters** • **Electrostatic Voltmeters** • **Peak Voltmeters** • **Thermocouple Instruments** • **Differentials** • **Ratiometers** • **Test Sets** • **Flux-meters** • **Panel Instruments** and **Multipliers.** **accessories such as Shunts** All SRIC instruments have their certification directly traceable to the National Bureau of Standards and are unconditionally guaranteed.

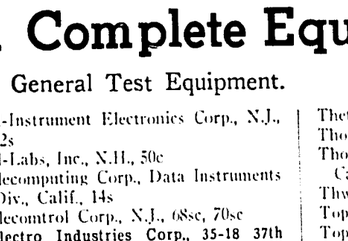
MODEL 200 SHAKER

Complete systems from 175 to 5000 pounds force, automatic control, minimum distortion or lateral motion. Systems for 100 g. testing; environmental chambers; or explosive atmosphere; and limited Random testing with minimum accessories.

Dial-A-Gain Sensitivity Standardizer and Cathode Follower for Accelerometer Readout. Dial accelerometer sensitivity and get 1 volt per g. Also available with meter, Driven Shield Cable, velocity and displacement outputs.



LINHOLTZ DICKIE CORPORATION
2994 Whitney Ave.
Hamden 18, Conn.

For details, circle #221 on Reader Service Card

*The Model 88 . . . . A New Combination*

**TRANSISTOR RADIO TESTER and DYNAMIC TRANSISTOR TESTER**

The Model 88 is perhaps as important a development as was the invention of the transistor itself, for during the past 5 years, millions of transistor radios and other transistor operated devices have been imported and produced in this country with no adequate provision for servicing this ever increasing output.

The Model 88 was designed specifically to test all transistors, transistor radios, transistor recorders, and other transistor devices under dynamic conditions.

**AS A TRANSISTOR RADIO TESTER**

We feel sure all technicians will agree that the instruments and methods previously employed for servicing conventional tube radios and TV have proven to be impractical and time consuming when used for transistor radio servicing. The Model 88 provides a new simplified rapid procedure—a technique developed specifically for radios and other transistor devices.

An R.F. Signal source, modulated by an audio tone is injected into the transistor receiver from the antenna through the R.F. stage, past the mixer into the I.F. Amplifier and detector stages and on to the audio amplifier. This injected signal is then followed and traced through the receiver by means of a built-in High Gain Transistorized Signal Tracer until the cause of trouble whether it be a transistor, some other component or even a break in the printed circuit is located and pin-pointed. The injected signal is heard on the front panel speaker as it is followed through the various stages. Provision has also been made on the front panel for plugging in a V.O.M. for quantitative measurement of signal strength.

The Signal Tracing section may also be used less the signal injector for listening to the "quality" of the broadcast signal in the various stages.

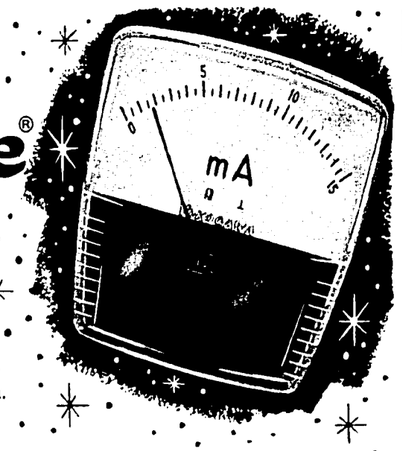
**AS A TRANSISTOR TESTER**

The Model 88 will test all transistors including NPN and PNP, silicon, germanium and the new gallium arsinide types, without referring to charactistic data sheets. The time-saving advantage of this technique is self evident. A further benefit of this service is that it will enable you to test new transistors as they are released!

The Model 88 will measure the two most important transistor characteristics needed for transistor servicing; leakage and gain (beta).

The leakage test measures the collector-emitter current with the base connection open circuited. A range from 50 ohms to 100,000 ohms covers all the leakage values usually found in both high and low power transistor types.

The gain test (beta) translates the change in collector current divided by the base current. Inasmuch as the base current is held to a fixed value of 50 microamperes, the collector current calibrated in relative gain (beta), is read directly on the meter scale.



Model 88 comes housed in a handsome portable case. Complete with a set of Clip-On Cables for Transistor Testing, an R.F. Diode Probe for R.F. and I.F. tracing; an Audio Probe for Amplifier Tracing and a Signal Injector Cable. Complete—nothing else to buy! Only ..... **$38.50**

SICO SUPERIOR INSTRUMENTS COMPANY
2435 White Plains Road New York 67, N. Y.

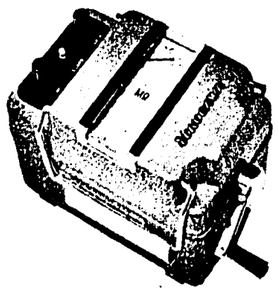
# The Prince® is here...

The Royal line in small panel meters... the PRINCE is a triumph in modern industrial design.

Thoroughly planned, developed and field tested with features that have made YEW panel instruments superior throughout the world.



- *CORE MAGNET mechanism—except Movable Iron Type*
- *EZ-READ® dial—extra long scale*
- *LOC-QWIK® one screw mount*
- *YEW RELIABILITY SINCE 1915*

- *AVAILABLE in a complete line of 2½", 3½" and 4" models both AC & DC*

# EVERY USER OF OSCILLOGRAPHS Should have this FREE PORTFOLIO

This portfolio, yours for the asking, tells eight ways you'll benefit by standardizing on GC direct-writing charts. It holds a sheaf of samples to give you the "feel" of the ultra-smooth, specially milled paper on which GC Charts are printed. On the back is a handy guide for ordering the GC direct-writing charts that will meet your needs.

GC direct-writing charts are made from special chart paper that is smooth, tough, and dimensionally stable. And they are made by specialists who use the most modern techniques and refinements in chart printing. That's why you can count on GC for accuracy, for uniformity, and for perfectly even edges.

For unique convenience, you can place a single order for a whole year's supply of GC direct-writing charts specifying periodic shipments to meet your needs. Right now, get the complete story. Write:

**HR-92 X-Y**
**X-Y RECORDER**
**Unconditionally Guaranteed For One Year**

# LOW $595.00 COST

- Flat bed — Full Chart visibility
- Unitized Construction
- Critically damped response
- Clip-on pen — Interchangeable for multicolor traces
- Standard 8½ x 11 paper

**RUGGED "All Purpose" X-Y RECORDER**

The HR-92 is a null-seeking servo-type plotter designed to draw curves in Cartesian coordinates on regular 8½ x 11 graph paper. Control panel has zero set and continuously-variable attenuator for each axis. Separate standby and power switches are provided. Two axes are electrically and mechanically independent.

- Amplifiers easily removed if servicing ever becomes necessary. Electrical connections all contained in two plugs for each amplifier.
- Each amplifier channel (including transformer power supply) independent of rest of system.

# Kodak optical and detection elements for infrared systems

**Kodak Irtran Optical Material**

800°C doesn't blind it.

This is a new development in infrared-transmitting materials for the 1- to 8μ region, with the following characteristics:

- transmission in structurally adequate thickness of more than 90% of impinging energy from 3 to 6 microns
- excellent resistance to severe heating, thermal shock, weathering, humidity, and abrasion
- retention of high transmittance at 800°C and beyond, to counter the "hot window" problem
- low waste of energy by reflection
- useful microwave properties in several frequency ranges.

Kodak Irtran Optical Material is readily ground and polished into lenses, domes, prisms, and flats.

Interference filters can be produced on Kodak Irtran substrates.

**Kodak Far Infrared Filters**

They transmit to 30μ in the far infrared.

At the short wavelength they are supplied with standard cut-ons between 1 and 5μ in 0.5μ steps. (The cut-on point is defined as the wavelength at which transmission reaches 3%.)

The filters are made by applying a suitable coating to both sides of a silver chloride substrate. Because silver chloride is hygroscopic, it is often desirable to mount the filters in plastic to prevent saline corrosion. Most plastics serve the purpose. Or, the filters may be ordered with a polystyrene coating which both reduces corrosion and protects the coating from abrasion.

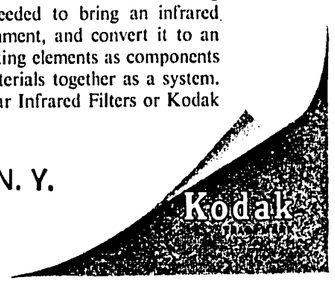
Kodak Far Infrared Filters are available in standard sizes, round and square, from 1" x 1", or 1" diameter to 5" x 5" or 5" diameter. Non-standard sizes are available on special order.

**Kodak Ektron Detectors**

They can be made very tiny and in complex arrays.

These semi-conductive resistors consist of lead sulfide or lead selenide deposited on glass.

Fitted with leads, they are available either unmounted, mounted in pronged housings, or embedded in infrared-collecting lenses. Photosensitive area may be of any size or shape. Kodak Ektron Detectors provide the following unique combination of characteristics:



- Wide spectral response • high signal-to-noise ratio in the infrared • over-all ruggedness and insensitivity to vibration • availability in very small size and in complex, precise arrays and mosaics.

Order of response of Kodak Ektron Detectors to tungsten illumination approximates emissive-type phototubes of same sensitive area. Sensitivity peaks at about 2.2μ in the infrared. Various kinds have time constants from 10 to 1000 microseconds, some with appreciable sensitivity to 5μ when cooled.

Whether you are concerned with an exotic guidance system or a commercial heat-sensing and actuating mechanism, Kodak can furnish everything needed to bring an infrared signal into a system, to separate the signal from its environment, and convert it to an electrical impulse. We will be glad to work with you in selecting elements as components of a system. In addition, we have the capability to put the materials together as a system.

For further information on Kodak Irtran Optics, Kodak Far Infrared Filters or Kodak Ektron Detectors, write Special Products Sales,

**EASTMAN KODAK COMPANY,** Rochester 4, N. Y.

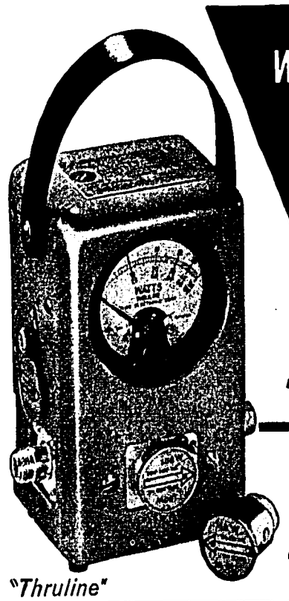
**L. LEVINTHAL ELECTRONIC PRODUCTS**
Subsidiary of Radiation Incorporated



Levinthal designs and builds troposcatter communications systems in all sizes and frequency ranges.

One example of such a system is an $800,000 project including four troposcatter power amplifiers for Page Communications Engineers. These are part of a 500-mile link between England and Spain for the U. S. Air Force.

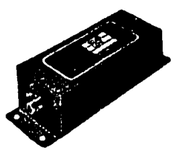
# when rf power must be absorbed or accurately measured...

"Thruline"

50 OHM NOMINAL

**NEW** 2-30 mc plug-in elements usable with new or existing Model 43 Wattmeters



You will find dependable coaxial line instruments and accessories at Bird Electronic. Specialization in this field, backed by a constantly growing engineering staff and enlarged physical facilities, has resulted in the continuous development of new designs to meet specific requirements. If you are searching for more than a standard product for field or laboratory use, turn to Bird Electronic. Our years of experience in this field may assist you in the solution of your problem.

## DIRECTIONAL RF WATTMETERS

Direct reading . . . "thru" type . . . for measuring forward or reflected power in complete systems under operating conditions . . . inserted between transmitter and antenna or load . . . full scale power and frequency range determined by plug-in elements.

| Model | Line | Impedance | Frequency ELEMENTS Power | | Connector |
|---|---|---|---|---|---|
| 43 | RG-8/U etc. | 50 ohms | 25-60; 50-125 100-250; 250-500; 400-1000 mc | 10; 25; 50; 100; 250; 500 W | N; C; HN; UHF |
| 4712 | 1⅝ | 50 ohms | 200-500 400-1000 mc | .5; 1.0; 1.5; 2.5; 5.0 KW | Rlma Std. |
| 460 | 3⅛ | 50 ohms | 200-500 mc | 1; 2.5; 5; 10 | Flange |
| 480 | 3⅛ | 51.5 ohms | 400-1000 mc | 25; 50 KW | Sleeve Bullet |
| 490 | 6⅛ | 51.5 ohms | 200-500 mc | 25; 50 and 100 KW | |

## COAXIAL RF FILTERS

Designs utilize both distributed and lumped constant . . . insertion loss and VSWR are very low in pass band . . . high attenuation in stop band . . . new miniature filters as light as 5 ounces. Will produce in quantity to your specs.

| | Low Pass | Low Pass | Low Pass | Low Pass | High Pass | Band Pass |
|---|---|---|---|---|---|---|
| Models | 5310 | 5311 | 522 | 819-1200 | 530 | 5131 |
| Cut Off | 90 mc | 160 mc | 400 mc | 1200 mc | 420 mc | 45 mc & 105 mc |
| Stop Band | 100-180 mc | 180-320 mc | 500-1200 mc | 1900-4000 mc | 100-375 mc | 33.7-39.7 mc 120-1000 mc |
| Max. Power | 100W | 100W | 150W | 3.5KW | 50W | 25W |
| Min. Stop Band Atten. | 55db | 55db | 55db | 40db | 60db | 25db 40db |
| VSWR in p.b. | 1.5 | 1.5 | 1.35 | 2 to 1 | 2.5 | 1.6 |
| Connectors | Female N | | Male-Female N | | | Female BNC |

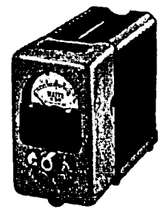


Chart shows characteristics of typical Filters

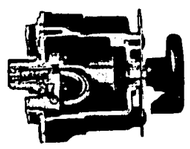
## "Termaline" RF ABSORPTION WATTMETERS

Portable . . . direct reading . . . non-radiating "load" type wattmeter . . . used in field or laboratory to measure and absorb power . . . accuracy ± 5% of full scale . . . VSWR 1.1 to 1 maximum over operating range.



| Model | Freq. Range | Max. Power | Power Range Scales | Input Connector |
|---|---|---|---|---|
| 611 | 30-500 mc | 60W | 0-15; 0-60 | Female N |
| 612 | 30-500 mc | 80W | 0-20; 0-80 | |
| 67 | 30-500 mc | 500W | 0-25; 0-100; 0-500 | Coplanar with Adapter to UG-21/U (optional) RG-17 & RG-19 cable assemblies: adapters to rigid lines |
| 67C* | 30-500 mc | 2500W | 0-100; 0-500; 0-2500 | |
| 824* | 30-220 mc | 5000W | 0-5000 | |

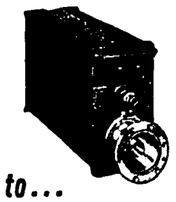
## COAXIAL SWITCHES



Small compact design permits the "Coaxwitch" selector to be incorporated into many electronic units where repeated channel switching is required. Finger-tip operation: pull knob, rotate and push in to make contact.

| Model | 74 | 71B | 72R | 62-2 |
|---|---|---|---|---|
| Positions | Six | Eight | Reversing Switch | Two |
| Coaxial Circuits | One | One | Two | Two |
| Connector | Type N female connectors are standard on all models to receive UG-21/U series plug. Use adapters with other cables and connectors. | | | |

## "Termaline" RF LOAD RESISTORS

Reflection-free terminations for 50 ohm coaxial lines . . . low VSWR . . . non-radiating . . . water cooled ratings 2500 W to 50 KW . . . air cooled rating to 1500 W.

| Model | Max. Power | Freq. Range | Max.* VSWR | Connector |
|---|---|---|---|---|
| 80 | 5W | 0-1KMC | 1.1 | "N", "C", "BNC" |
| 80A | 20W | 0-500MC | 1.1 | |
| 81 | 50W | 0-1KMC | 1.1 | N Female |
| 81B | 80W | 0-1KMC | 1.1 | |
| 82A | 500W | 0-1KMC | 1.1 | Coplanar with Adapter to UG-21/U |
| 883 | 1.2KW | 0-1KMC | 1.1 | LC |
| 888 | 1.5KW | 0-1KMC | 1.1 | 3⅛ Flanged |

*Other VSWR requirements can usually be met by special selection.

# BROADBAND POWER DENSITY METER Model NF-157

*For fast, accurate determination of RF power density and location of areas presenting RF hazards to personnel*

*Description:* A broadband device providing direct reading of RF power densities from 1 mw/cm² to 1000 mw/cm² (mid-scale readings), over the continuous frequency range from 200 to 10,000 MC.

*Features:*

- Direct reading of power density insures immediate awareness of hazardous areas.
- Broad frequency range and high accuracy permit universal application to mapping of high level RF fields from VHF to X-Band.
- Accurate built-in step attenuator provides capability of handling power densities over a dynamic range of 10,000 to 1.
- Three constant-gain calibrated probes permit direct reading in mw/cm² over the continuous frequency range from 200 to 10,000 MC.
- Physical separation of probes from main unit vastly increases flexibility of applications.
- Battery-powered, light-weight design permits complete portability.
- Convenient carrying case simplifies transportation of instrument.
- Efficient shielding prevents stray RF pick-up.
- Conservative design insures resistance to over-load.
- Main unit may be used independently as an accurate, rugged RF power meter over a wide power range.

*NEW! HI-POWER COAXIAL*

## CALORIMETRIC POWER METER

**DIRECT READING—5 to 50 KW**

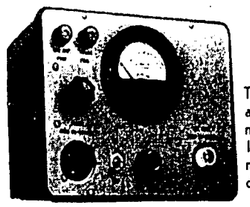
**DC—1000 MC • VSWR less than 1.3**

These power meters are greatly simplified Calorimeters which use water to carry the heat away, for economy of space and cost.

The instrument is fully self-contained, portable, water cooled and requires only connection to the power line and water supply. It does not use any flow meters, thermometers or any other controls. There is only the "ON" and "OFF" switch for the operator to use on the front panel, when a measurement is to be made. A sensitive thermopile and microammeter measure the power dissipated in the R.F. load. The microammeter is calibrated in watts, is direct reading and can be remotely located.

The radio frequency load has a low VSWR between DC to 1000 MC. This feature makes it possible to calibrate this instrument at 60 cps against an accurate laboratory type wattmeter, and then use it at any frequency up to 1000 MC. Thus an accuracy at 2% can be easily accompished. This recalibration is necessary only when measurements are made at extreme temperatures or when wear is suspected.

This calorimeter is particularly recommended for field service where a rugged and yet accurate Power Meter is required for use by unskilled personnel.



| Model | Power Rating | Connector | Max. VSWR | Water Supply | Price |
|---|---|---|---|---|---|
| CX-5 | 5 KW | 1-5/8" | 1.3 | 1.5 G.P.M. | $1050.00 |
| CX-10 | 10 KW | 3-1/8" | 1.3 | 3 G.P.M. | 1250.00 |
| CX-20 | 20 KW | 3-1/8" | 1.3 | 6 G.P.M. | 2250.00 |
| CX-50 | 50 KW | 6-1/8" | 1.3 | 15 G.P.M. | 4500.00 |

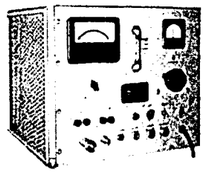
## Average Reading R.F. POWER METERS

These broad band R.F. Power Meters are of the absorption-type consisting of an oil filled, air cooled, coaxial load resistor and a voltmeter calibrated to read watts. The power meter is suitable for use as a field or laboratory test instrument, is completely shielded and non-radiating, permitting transmitter testing and adjustment without interference. The meter box is easily detached, permitting location of the load resistor at a remote point. In cases where power measurements are not required the load resistor may be used as a dummy load. No correction curve is necessary to cover the frequency range. The spurious response usually associated with directional couplers and capacitative voltage dividers is absent in this purely resistive voltage divider. Since this is a resistive voltage divider which has the same voltage division at DC, 60 cycle AC, and at high radio frequencies, this instrument can be calibrated and its calibration can be checked frequently on 60 cycle supply voltages.

| Model | Power Ranges In Watts | Max. Power Dissipation | Price |
|---|---|---|---|
| PM-3 | 60, 150 | 150 watts | $220.00 |
| PM-6 | 1.5, 6 | 10 watts | 95.00 |
| PM-7 | 150, 600 | 600 watts | 285.00 |
| PM-8 | 1.5, 6, 15, 60 | 100 watts | 225.00 |
| PM-9 | 2.5, 10 | 10 watts | 105.00 |
| PM-10 | 15, 60 | 90 watts | 145.00 |
| PM-14 | 25, 100, 500 | 500 watts | 325.00 |
| PM-16 | 150, 600, 1500 | 1500 watts | 375.00 |
| PM-18 | 1.5, 6, 15, 60, 150, 600 | 600 watts | 485.00 |
| PM-19 | 1.5, 6, 60, 150 | 100 watts | 275.00 |

## PEAK READING R.F. POWER METERS

The peak reading power meters listed are designed to accurately measure the peak power of pulsed R.F. signals in the range of .2 to 700 MC with PRF of 800 to 10,000 pps and pulse duration of .5 microseconds or more, and less than specified maximum average power dissipation.



| Model | Peak Range | VSWR | Max. Average Power Dissipation | Connector | Impedance | Supply Voltage | Accuracy | Freq. Range | Price |
|---|---|---|---|---|---|---|---|---|---|
| PM-12 | 0-50kw | 1.15 | 60 watts | Type HN | 51.5 | 115V,60-1600cps | ±10% | .2-700Mc | $350.00 |
| TS-305 | 0-50kw | 1.15 | 50 watts | Type HN | 51.5 | 115V,60-1600cps | ±10% | 220-330Mc | $350.00 |
| PM-13 | 0-100kw | 1.15 | 100 watts | Type HN | 51.5 | 115V,60-1600cps | ±10% | .2-700Mc | $425.00 |

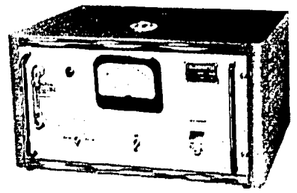
## CALORIMETER BRIDGE



**with Self-Contained Calorimeter Loads, Cooling System & Circulating System.**

This Calorimeter is completely self-contained with its own circulating system, cooling system and the radio frequency dummy load and requires only connection to the regular power line. The R.F. power is read directly on a 4½" meter in watts. A single coaxial dummy load is available to cover the frequency range from DC to 10,000 Mc and for the power range from 1 to 1000 watts. The overall accuracy of this Calorimeter is 3%. However, this accuracy can be improved greatly by calibrating the Calorimeter by means of an external laboratory-type wattmeter.

| Model | Range | Frequency | Price |
|---|---|---|---|
| CB-11 | 1 watt | DC-4 KMC | $1100.00 |
| CB-12 | 5 watts | " | 1100.00 |

| CBW-4 | 150 watts | 2.4-12 KMC | 1400.00 |
| CBW-5 | 750 watts | 1-12 KMC | 1500.00 |
| CBW-6 | 3000 watts | " | 2400.00 |
| CBW-7 | 6000 watts | " | 3000.00 |

*DIRECT READING*

## Calorimetric Power Meter

These power meters are greatly simplified Calorimeters, which use an accurate metering pump of the gear type driven by an over-powered synchronous motor to keep the fluid flow constant. The instrument is fully self-contained, portable, self-cooled and requires only connection to the power line. It does not use any flow meters, thermometers or any other controls. There is only the "ON" & "OFF" switch for the operator to use on the front panel when a measurement is to be made. A sensitive thermopile and microammeter measures the power dissipated in the R.F. load. The microammeter is calibrated in watts and is direct reading. These Calorimeters are available with either a coaxial or a waveguide load.

**COAXIAL CALORIMETERS**

| Type | Full Scale Power | Freq. Range KMC | Price |
|---|---|---|---|
| CPM-10 | 10 | DC-10 | $880.00 |
| CPM-50 | 50 | DC-10 | 880.00 |
| CPM-100 | 100 | DC-10 | 880.00 |

LAVOIE LABS SHOWS

# four roads to precision analysis

In the field of precision analysis, Lavoie Laboratories has combined bold theory and proven techniques to evolve many promising concepts. Such concepts continue to yield new laboratory instruments of predicted accuracy and reliability. The four quality instruments shown are acknowledged the most recently recorded triumphs in the field of precision analysis. They represent trails blazed by Lavoie research, development, and engineering know-how to aid you in solving test problems of the present and to improve your efficiency in approaching problems in the future.

**SPECTRUM ANALYZER LA-20W**

New wide-frequency dispersion instrument featuring 70-mc window. Frequency range from 1 to 40 Kmc in one instrument. Selection of square law, linear or log detection. 10 or 50-KC resolution at 3 db points. Regulated filament and plate supplies. Unit illustrated is only one of a full line of spectrum analyzers.

**LA-303 ROBOTESTER**

Makes possible unprecedented ranges of economy, speed, and accuracy in volume equipment checking through time-tested comparator techniques refined and accelerated to meet today's analytic requirements. Automatic circuit analysis from pre-programmed tape, punched by your engineers.

**LA-70A FREQUENCY METER**

For generation and measurement in frequency range 10 KC to 3000 MC (direct reading) with accuracy to one cycle per megacycle. Thermostatically controlled 1 MC precision quartz crystal for oscillator stability. Weight of 42 lbs. stresses application for mobile service.

**LA-80 ELECTRONIC COUNTER**

Components are greatly reduced in this counter by a new concept in circuitry that employs beam switching tubes as decade dividers and scalers. The LA 80 provides optimum reliability and versatility for 8-place in-line readout of time intervals, voltage, and measured frequencies from 10 cycles to 10 mc.

RAMCOR

*...for advanced concepts in microwave instruments and system components.*

Organized, staffed and equipped to meet the most critical requirements of government and industrial programs, Ramcor offers the scientific knowledge, engineering experience and production capabilities needed to provide next generation concepts—today.

Some of the microwave instruments and system components which have originated at Ramcor are shown on this page. Detailed data on these and other Ramcor products are available on request.

*Densiometer Model 1200*
Specifically engineered to detect unsafe levels of VHF, UHF, L, S, C and X-band energy from tubes and antennas. Battery-powered, direct reading, easily used by non-technical personnel.

*Waveguide Switches*
Covering all frequency ranges. Isolation 50 db or better over entire band. Fully interlocked for magnetron protection. Switching time .05 seconds.

*Coaxial Couplers*
Wide range of models for 10, 20, 30 and 40 db coupling, for frequencies from 225 mc. to 11 k mc. Broadband design permits use at frequencies below specified range with little variation in directivity.

*Also from Ramcor...*

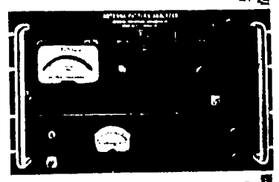
For details, circle #238 on Reader Service Card



WEINSCHEL

ANTENNA PATTERN ANALYZER MODEL BA-7

Measure 45 db (r. f.) in one step using a maximum of 1 microwatt r. f. power*

*100% square wave modulated at 1000 cps ± .1 cps. Observation time approximately 45 seconds for 45 db; only .2 seconds for 30 db.

Bandwidth variable from 2 to 15 cps with constant gain

MODEL BA-7

The BA-7 is the heart of a video detector system designed primarily for r. f. crystals. For greater versatility, a d. c. biasing circuit is included to permit use of conventional barretters, requiring a d. c. bias between 0 and 10 ma. The unit can be used to measure very high power ratios such as occur in making antenna pattern measurements, to determine the rejection coefficients of r. f. filters, and to calibrate attenuators. It has a wide dynamic linear range, a low noise level, and a wide r. f. frequency range where video crystal mounts are available.

For complete specifications, write for Bulletin No. 141.

Weinschel Fixed Coaxial Attenuators cover the frequency range of DC to 12.4 KMC. Write for complete catalog, specifying frequency range of interest.

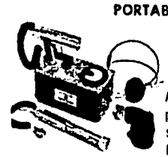
**AVAILABLE FROM ANTON**

**ALPHA, BETA, GAMMA AND NEUTRON DETECTORS**

More than 100 types of detectors covering the entire range of nuclear radiation . . . unique configuration and "special application" devices. The Anton Neutron Detector Catalog and the Anton a, b, γ Detector Catalog belongs in your radiation facility reference file.

**AIR PARTICLE MONITORS**



Portable and rack mounted a, b, γ air particle monitoring units. Moving paper and fixed paper instruments available. Produced to latest AEC and military specifications.

**PORTAL "CHECK-OUT" MONITORS**

Convenient, complete uninterrupted "head-to-toe" b, γ monitored exiting. Effective rapid portal monitor offers eight individual alarm channels. Complete with long-lived, thin-walled Anton halogen quenched stainless steel detectors.

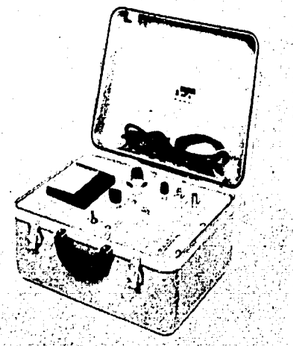
**PORTABLE TRANSISTORIZED SURVEY METERS FOR LABORATORY OR FIELD USE.**

Available with beta-gamma probe, headset, carrying-strap, batteries (standard flashlight "D" cells) and complete manual. Type 700. Also available as above with interchangeable end-mica window alpha, beta, gamma probe in place of standard probe. Type 701.

**HAND AND FOOT MONITORS**

For a, b, γ detection and measurement. Equipped with scaler or ratemeter read-out. Auxiliary probes available. Incorporate long-lived, Anton halogen quenched stainless steel counters.

**ANTON ELECTRONIC LABORATORIES, INC.**



**1226 FLUSHING AVE., BROOKLYN 37, N. Y.**

**Analab Oscilloscopes and Recording Cameras**

Analab, the originator of precision null-readout oscilloscopes, presents the most flexible series of oscilloscope building blocks yet produced. Sixty-four contacts between the main frame and the plug-in offer the widest versatility for both standard models and special-purpose oscilloscopes. The Analab standard units are:

The New Analab Type 1100/700 Oscilloscope with Type 3000 Oscilloscope Camera.

**Type 1100 Main Frame** as a basic cathode-ray indicator and X-Y plotter. Standard and Rack-mounted units. **Price: $385.00**

**Type 700 Dual-Channel Plug-in** with precision null-readout on sweeps and on identical, high-gain, dual-channel, d-c amplifiers, 100 μv per cm. **Price: $310.00**

**Type 200 Single-Channel Plug-in** with 1 mv per cm calibrated vertical amplifier and calibrated sweep time.

**Type 100 X-Y Plotter** with Type 1100 offers identical amplifiers, d-c to 500 kc, 40 mv per cm. **Price: $37.50**

**Type 3000 Series Oscilloscope Cameras** are designed with equally ingenious building blocks. A complete line of single-frame cameras with Polaroid® and/or Graflex backs, 35 mm or 70 mm continuous-motion backs, and 35 mm or 70 mm electric-pulsed film advance backs. **Price: $340.00-445.00**

**This PANEL MOUNTED OSCILLOSCOPE, Model 32APM, mounts in a hole 5⅛" wide by 4⅜" high and extends 10½" beyond the front panel. The front panel dimensions are 6" wide by 5¾" high. The input impedance is 1 megohm and the frequency response is linear from 10 cycles to 40,000 cycles. The unit employs identical vertical and horizontal amplifiers, push-pull. The gain is approximately .1-.25 volts RMS per inch. This oscilloscope is complete with low and high voltage power supplies. Weight is 6 lbs.**

FOR YOUR OSCILLOSCOPE AND CATHODE RAY TUBE NEEDS

**SYSTEMATS®**—The up-to-date custom approach to multi-function monitoring. Any number of modules may be mixed or matched. Built to industrial or military standards and uses PANELSCOPES as building blocks.

**PANELSCOPES®**—Standard and custom designed panel mounted oscilloscopes in modular form of 5 7/16" x 5¼". Amplifiers from 2½ mv/inch, up to 10 mc; triggered, repetitive or expanded sweeps; and automatic portrayal available. Rugged and military construction.

**PANELPACKS®**—Power supplies for PANELSCOPES and SYSTEMATS.

**RAKSCOPES®**—Standard and custom built rack mounted industrial and military type oscilloscopes.

**PULSESCOPES®**—A series of versatile pulse synchroscopes for Laboratory, Field and Airborne use.

**CRAFTSCOPES®**—A series of direct reading portable industrial oscilloscopes featuring 5-inch displays, small size (½ to ¾ cu. ft.) and weights as low as 18 lbs.

**POCKETSCOPES®**—A series of extremely portable time-tested industrial oscilloscopes less than ¼ cu. ft. and weight as low as 8 lbs. with wide performance specifications.

**RAYONIC® CATHODE RAY TUBES**—A complete line of 3-inch and 5-inch tubes made to EIA or MIL specs. with rectangular and round cross sections. Tube lengths: from 7 inches. P1, P2, P7, P11 and special phosphors available.

DATA COMMUNICATIONS CAPABILITIES

RIXON

## SPECIFICALLY DESIGNED TO SOLVE YOUR PROBLEMS*

### THE SEBIT-24 DATA TRANSCEIVER

For wireline and other voice communications circuits—up to 2400 bit per second in a 3 kc bandwidth. A fully transistorized transmitter-receiver plus a fast acting AGC and self-contained continuously variable delay equalizer in a single unit—for standard rack mounting—contains integral signal monitor and highly stable, automatically synchronized clock for detection and regeneration of received data pulses. Data input and output is serial, ground-referenced. Features low error rate and reliable performance under wide-range of adverse transmission conditions.

A recent development incorporating design refinements evolving from years of development and field test experience. In addition, emphasis is placed on high reliability.

### FILTERS—NETWORKS

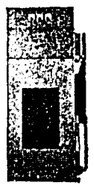
Passive and tunable electronic filters. All types of special designs, prototypes, and production runs. We maintain our own toroidal winding and encapsulating facilities that supplement our extensive design experience.

### SEMICONDUCTOR POWER SUPPLIES

1500 models of packaged supplies available in prototype or production quantities on short notice. High reliability, reasonable pricing and superb service based on modular packages—proven circuits.

### DELAY EQUALIZERS

Improves data transmission accuracy by compensating for envelope delay distortion introduced by voice communications circuits. Relative delays, max. at mid-band and min. at band edges. Frequency of max. delay and compensating delay characteristics can be selected from standard models. Delay range greater than 0.8 to 3.5 ms continuously variable. Input and output 600 ohms. All models for standard 19" rack mounting.



### DATA MODULATORS/ DEMODULATORS

For low cost (non-synchronous) operation at up to 1000 baud (bits/sec) and on-off tone keying for data and signaling, completely transistorized, carrier frequency can be selected. Axis crossing jitter less than ±50 micro seconds.

### LOW NOISE PREAMPLIFIERS

Reliable low noise amplifiers for remote location at or near antenna terminals, provide maximum signal-to-noise ratio. No need for expensive low loss transmission lines and low noise receiver front-ends. Models available for 15-25 mc, 30-40 mc, 36-51 mc, 70-100 mc, 100-170 mc and 400-500 mc.

**DUMMY ANTENNAS** A series of water-cooled dummy-load resistors for 50 kw dissipation over a 2 to 60 mc frequency range. Consists of a carborundum resistor assembly and impedance transforming network to provide wide range of input-impedances. Self-contained calorimeter. Also RELATED HIGH POWER TRANSMITTING EQUIPMENT.

* **DEVELOPMENT ENGINEERING** A wide variety of transistor and other circuit design applications for data processing equipment, instrumentation, high speed switching and signalling relays, and power supplies.

**SUBCONTRACT PRODUCTION** Electronic assemblies ranging from miniature modules to high power transmitters. Complete model shop, assembly, potting and core winding facilities available.

*Write for Engineering Bulletins on any of the above items.*

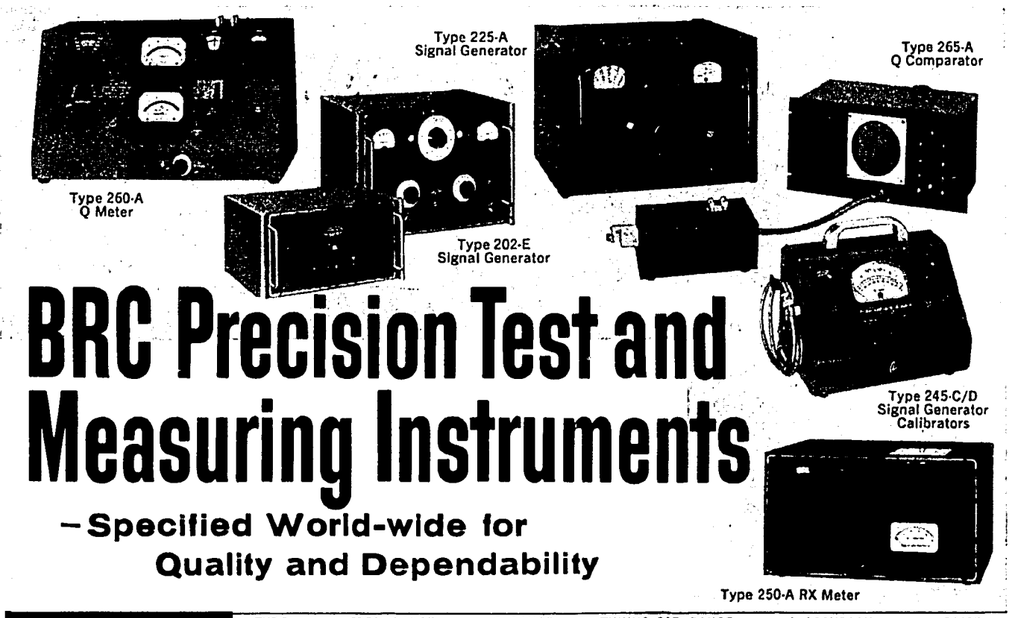
L. LEVINTHAL ELECTRONIC PRODUCTS
Subsidiary of Radiation Incorporated



*Levinthal Model 215T Klystron Transmitter for long-range radar. In the 700- to 900-mc band, it produces 50KW peak power with 45db power gain*

One example from the many custom-produced Levinthal radar systems ranging from kilowatts to multi-megawatts. An expert capability has been developed for klystron power amplifiers and modulators as well as large power supplies.

## SPECTRUM ANALYSIS

*Sona-Graph*®

| INST. | DESCRIPTION | FREQ. RANGE | FEATURES | PRICE* |
|---|---|---|---|---|
| VIBRALYZER® | Vibration Frequency Analyzer. | 4-4400cps | Displays amplitude vs frequency vs time. Provides permanent record. | $2495.00 |
| SONA-GRAPH® | Sound spectrograph for frequency analysis of audio energy. | 85-8000cps | Records frequency and intensity to time. | $2410.00 |
| ECHO-VOX® SR. | Provides variable periods of time delay at audio frequencies. | 40-12,000cps | 20 to 1600 millisecond delay range. | $2150.00 |
| SONALYZER®<br>MODEL 30 | A 30-Channel all-electronic spectrum analyzer providing immediate visible display of complex waveforms up to 20,000 cps. | | | $1995.00 |
| SONOGRAM<br>DISPLAY UNIT | Accessory for use with Sonalyzer to provide a 3-dimensional—frequency vs intensity vs time—display on long persistence scope. | | | $495.00 |
| VARI-VOX® | A compressor and expander for audio signals; slows to 1/3 or doubles normal tempo with no loss of intelligibility. | | | $1695.00 |

## OTHER INSTRUMENTS

*Transalyzer*®

| INST. | RANGE | RANGE OF MEASUREMENT | FEATURES | PRICE* |
|---|---|---|---|---|
| DRD METERS® | 1.1-18Kmc | Direct reading digital frequency meters with coupling elements for waveguide or coaxial line. Accuracy ±0.1%. | | $465.00-<br>$785.00 |
| MICROLTER 50 VTVM | 100cps-50mc | Full scale: 1mv-1V in 7 ranges. May be used as 50mc video amp. | | $695.00 |
| TRANSALYZER | 50kc-50mc | Measures Alpha and Alpha Cutoff-Collector and Emitter Current, 3 Voltages—Emitter to Base, Emitter to Collector, and Base to Collector. | | $2195.00 |
| MEGA-MATCH® | 10mc-1000mc | Contin. tuned sweeping oscillator. | Displays reflected energy. Checks matching impedance. | $895.00 |
| UTILATOR | 4.5-220mc | Fundamental Freq. Utility Oscillator. | 0.7V rms into 70 ohms metered AGC'd. | $395.00 |
| GAIN SET® | Complete Equipment for Making Precision Measurements of Gain or Loss in Components and Systems. | | | $2195.00 |
| MEGA-PIX® | TV Sound-Picture. | Color or Black and White Transmitter. | .25 output into 70 ohms. | $995.00 |
| RADA-PULSER® SR. | Pulsed-Carrier pulse width. | Generator, 12-80mc. Continuously variable carrier frequency and | | $795.00 |
| AUDIOLATOR | 15cps-15kc | Transistorized audio oscillator, battery operated. Flat to ±0.5 db over range. Output 1.0V rms at 600 ohms. | | $1995.00 |
| TRANSIFIER® | 15cps-25mc<br>20cps-15mc | Transistorized battery operated amplifier giving 10db and 20db gain. | | $1295.00 |
| MEGAVOLTER | 1kc-200mc | ±1%—1kc-10mc<br>±2%—to 50mc<br>±3%—to 200mc | | $295.00 |

For details, circle #251 on Reader Service Card

Model PCS-1A

## PULSE POWER CALIBRATOR

Model PCS-1A is a precision instrument for the direct measurement of radio frequency peak pulse power with greater accuracy than heretofore achieved by other than calorimetric means. The functions are independent of duty ratio.

The display, essentially a notch-watt-meter, is free from parallax. This equipment provides laboratory performance with simplicity adaptable to the production line.

Similar equipment for other frequencies under development.

*Frequency Range:* 925 mcs to 1225 mcs
*Power Level Range:* −10 dbm to +63 dbm
*Accuracy:* 0.5 db

## Other Typical Products...

### RADAR BEACONS

**"S" Band Beacon — Model RCX**

Radar Beacon RCX is a miniature S-band transponder equipment for use in tracking missiles, drones and other types of aircraft. It has excellent selectivity and sensitivity characteristics and can be used as a transmission medium for telemetering information from auxiliary systems. Many new and unique features make it a reliable and versatile equipment, keeping pace with the current progress in the guided missile field.

### MICROWAVE COMPONENTS

The General Communication Company makes a very complete line of high quality coaxial switches (manual, motorized and relay operated) that meet a variety of applications, including transmit/receive selection of antennas, and other features required in the field of guided missiles.

### MICROWAVE TEST EQUIPMENT

Test Set BDS is a portable equipment combining the features of a signal generator, power meter and frequency meter. Its design assures ease and versatility in testing radar and beacon equipments in the 8500-mc to 9600-mc frequency range.

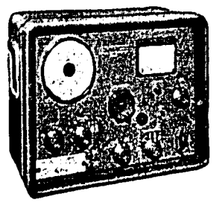
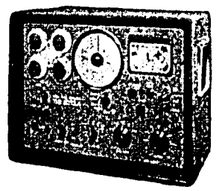
# MORE THAN 120 MARCONI INSTRUMENTS FROM VLF TO EHF



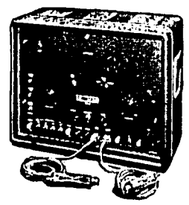
**DESIGNED TO MEET YOUR NEEDS**

For a quarter of a century, Marconi Instruments have set a standard of reliability and accuracy in the design and manufacture of precision electronic equipment. We offer more than 120 instruments, many of them unique, designed to meet the needs of military and civilian communications engineers. The latest short-form Catalog is now freely available.



**UNIVERSAL BRIDGE**
**Model 868B**

Measures inductance and capacitance at 1 or 10 kc, resistance at d.c. Direct reading: 1μH to 100 henrys; 1μμF to 100μF; 0.1 ohm to 100MΩ.

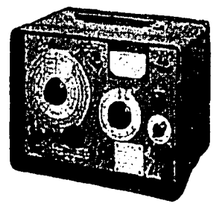


**CARRIER DEVIATION METER**
**Model 791D**

4 to 1,024 Mc, directly calibrated. Crystal-lock facilities. Can be supplied for rack mounting.

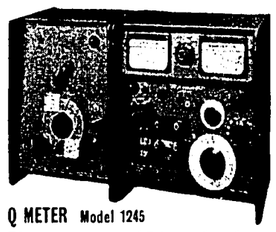
**FM/AM SIGNAL GENERATOR**
**Model 995A/5**

1.5 to 220 MC. Narrow-deviation model for mobile radio; stepped as well as fine incremental tuning gives discrimination better than 0.5 kc.



**20-MC SWEEP GENERATOR**
**Model 1099**

A high-quality video-response analyser providing 100-kc to 20-MC sweep signal, 1-MC marker pips, and time-base drive for external 'scope.



**FM SIGNAL GENERATOR**
**Model 1066A**

10 to 470 MC. Rack mounting version, Model 1066A/1, available.

**VHF SIGNAL GENERATOR**
**Model 1064A/2**

For mobile radio testing. RF outputs of 30 to 50, 118 to 185, and 450 to 470 MC.

**Q METER Model 1245**

Direct measurement of Q-factors from 5 to 1,000 over the frequency range 1 kc to 300 MC. Indirect measurements: inductance, capacitance, dielectric loss, phase angle, resistance power factor, etc.

**NOW AVAILABLE**
**—The Marconi short-form catalog**

Newest—
Low Capacitance Bridge Model 1342: 0.002μμF to 1,111μμF; 3-terminal transformer ratio-arm bridge designed for precision measurement of extremely low capacitance.

PHAZOR PAT PEND

**PHASE METER**

MODEL 200AB

PRICE $449.00

- 2° absolute accuracy
- Readings not affected by noise and harmonics
- Frequency range 15 CPS — 30KC
- Accuracy to .01 degree with simple circuit techniques
- High sensitivity on input & reference channels
- Can measure in-phase & quadrature voltage component

RADIO PRODUCTS, INC.

**PANORAMIC BROADBAND SPECTRUM ANALYZERS—0.5 cps to 25 mc.**
A matchless series of 5 easy-to-operate direct reading instruments plot amplitude vs. frequency of input signals with display on 5" CRT or chart. Features include: "quick look" broadband plus highly selective narrow band analysis with adjustable center frequency, sweep width, and selectivity (resolution). Linear and 40-db log calibrated amplitude scales.

**APPLICATIONS:** vibration-noise analysis, distortion measurements and general Fourier analysis.

**Model LF-2a.** 0.5 cps to 2,500 cps. Exceptional stability, to 0.05 cps/hr. for narrow-band analysis with 0.1 cps resolution. Built-in recorder gives 12" x 4½" chart. **Model LF-2aM** with automatic center frequency advance thru 0.5-2,000 cps range.

**Model LP-1a.** 20 cps to 22,500 cps. Exceptional stability: better than 5 cps/hr. "Quick look" 40 cps-20 kc log sweep in 1 sec, plus magnifying linear sweeps. Famous for noise and vibration analysis. **Auxiliary Function Unit C** adds variable IF filter bandwidth (10 cps-1 kc), smoothing filter and 10 second scan interval for more convenient analysis of random signal spectra and other critical applications.

**Model SB-7bZ.** 200 cps-300 kc (Similar to Analyzer KS 15872 specified by Bell System). Features discriminator linearized and stabilized sweep circuitry. Resolution capability to 100 cps. Proven reliable and easy-to-use under extreme environmental conditions for over a decade.

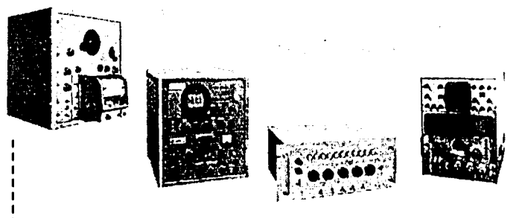
**Model SB-15a.** 100 cps-600 kc. Complete, compact, yet only 8¾" high. Many advanced features. 100 cps resolution capability.

**Models SPA-3,** 200 cps-15 mc; and **SPA-3/25,** 200 cps-25 mc. Resolution capability is 200 cps. For application where broad frequency coverage is a must.

**ACCESSORIES for PANORAMIC Broadband Spectrum Analyzers:**
Increase Application Areas

**Spectral Density Analyzer, Model PDA-1** for random waveform analysis. **Time-Frequency Analyzers, Models PS-20** and **TFA-1,** for 3-dimensional time-frequency-amplitude studies of transients. Valuable for high intercept probability of intermittent signals.

**Recorder and Sawtooth Wave Generator, Model RC-3a Series,** for unattended graphic spectrum plots. **Also Signal Alternator, Model SW-1; Triangular Wave Generator, Model TW-1; Multi-Bandwidth Crystal Filter, Model CF-1; Oscilloscope Camera SM-200A,** and many others.



**Automatic FREQUENCY RESPONSE PLOTTERS 0.5cps to 15mc**
Automatically plot amplitude response vs. frequency of amplifiers, transducers, filters, etc. Combines Panoramic Spectrum Analyzer and companion sweep generator for these unique advantages: single-line display, unlimited dynamic range, response to **fundamental frequency** only, discrimination against spurious and noise. Use **Model G-5** with **LP-2a, G-2** with **LP-1a, G-3a** with **SB-7bZ, G-15** with **SB-15a, G-6** with **SPA-3** and **SPA-3/25.**

**Communications Systems Analyzers**
**Panalyzor**—for wide range RF Spectrum Analysis. **Three models: SB-3, SB-8b,** and **SB-12a** (in various types) cover the frequency range up to 1000 mc (use external mixer above 1000 mc), supplying broad choice of sweep widths up to 10 mc, sensitivity, resolution capabilities up to 10 cps, and other factors. Widely used for analysis of locally generated AM, Single Sideband, FM, and pulsed transmissions, for general RF spectrum study, and spotting spurious frequency components.

**FASTER SINGLE SIDEBAND SPECTRUM ANALYSIS** with preset operational modes: **the new Model SSB-3a** incorporates a 60 db dynamic range Panalyzor with a stable 2-40 mc tuning head, new and improved two-tone audio source (**Model TTG-2,** see below), unique self-checking features. High selectivity allows hum sideband measurements to —60 db. **Model REC-1** (optional) extends SSB-3a range down to 100 cps.

**Two-Tone AF Generator, Model TTG-2.** New, distortion-free modulation source. Also for filter linearity and distortion measurements. Continuously variable 100 cps-10kc, metered output.

**Two-Tone RF Generator, Model TTG-5.** Low distortion output tones (2mc-40mc) for receiver linearity tests and as exciter driver for RF power amplifiers and filters.

**PANADAPTORS—Basic Models SA-8b and SA-3 (in over 20 types).** Used with Communication and Special Purpose Receivers, provides continuous monitoring for detecting interference, spurious, intermittent and off-frequency transmissions, as tuning aid for telemetry and SSB signals. Adaptable to receivers with non-standard IF. Specify companion receiver when inquiring.

**PANORAMIC MICROWAVE SPECTRUM ANALYZERS 10 mc to 44 kmc**
Direct-reading instruments for pulsed AM, FM and CW signal analysis, with ± 1% frequency accuracy. Features: continuously adjustable IF filter bandwidths and sweep speeds; linear, log, and power amplitude scales; calibrated frequency markers, and others.

**Model SPA-4a,** 10 mc to 44 kmc. Single tuning head. Highly stable, with 0-70 mc and 0-5 mc dispersion ranges. Extreme sensitivity. Calibrated on 8 individual slide rule scales. IF bandwidth range variable 1 kc to 80 kc.

**Model SPA-1,** 50 mc-4 kmc. Two plug-in tuning heads, 0-10 mc dispersion. Extreme sensitivity to —100 dbm with optional preamplifier. IF bandwidth range is 9 kc to 100 kc.

**TELEMETERING TEST INSTRUMENTS (for IRIG FM/FM Systems).**

**Model TMI-1a,** Telemetering Indicator, analyzes 350 cps-85kc band. Used for subcarrier spectrum analysis, pre-emphasis, distortion measurement.

**Model TMC-1,** Telemetering Subcarrier Deviation and 3-point calibrator. Used with TMI-1a for precise analysis of individual channel deviation; also provides 3 frequencies for each channel (including ± 15% upper channels) for discriminator calibration to 0.5% (0.002% optional).

**Model TMC-11,** Simultaneous 11-Point Frequency Calibrator. Low cost, completely transistorized, only 7½" high. Provides 11 precise equally spaced frequencies for all standard plus ± 15% (3 KC) IRIG FM/FM channels, multiple frequency references in data reduction. Accuracy better than 0.01%. Composite 18 channel output permits simultaneous calibration of a complete telemetry package.

# EXTENDED FREQUENCY RANGE

## with these STANDARD SIGNAL GENERATORS

**MODEL 80**
**2 Mc to 400 Mc**
**MODEL 80-R**
**5 Mc to 475 Mc**

**FEATURES**

- Direct-Reading scales and dials; individually calibrated.
- Convenient microvolt and DBM output scales.
- Accurate indication of output voltages at all levels.
- Low residual FM due to hum and noise.
- Provision for external pulse modulation.

**SPECIFICATIONS**

**FREQUENCY RANGE:** (Model 80) 2 to 400 Mc in 6 bands. (Model 80-R) 5 to 475 Mc in 6 bands.
**FREQUENCY ACCURACY:** ± 0.5%
**FREQUENCY DRIFT:** Less than .1% after warm-up.
**OUTPUT VOLTAGE:** Continuously variable from 0.1 to 100,000 microvolts (—7 to —127 DBM).
**OUTPUT ACCURACY:** ±10% at 0.1 volt from 5 to 200 Mc. ±15% at 0.1 volt from 200 to 475 Mc.
**MODULATION:** AM is continuously variable from 0 to 30%. Internal modulation, 400 and 1000 cycles. External modulation, 50 to 10,000 cycles.
**RESIDUAL FM:** Less than 500 cps at 450 Mc for Model 80-R, and correspondingly lower for both models at lower frequencies.
**POWER SUPPLY:** 117v, 50-60 cycles, 70 watts.

# Megacycle Meter

**0.1 Mc to 940.0 Mc**

Determines resonant frequency of tuned circuits, antennas, transmission lines, by-pass condensers, chokes, etc. Measures inductance and capacitance. Also used as a signal generator, wave meter, frequency meter, and in many other applications.

This compact, lightweight grid-dip meter is available in the frequency ranges indicated.

# INTERFERING

## conducted energy or radiated electromagnetic energy within the frequency range of 30 cps to 10.7 kmc

**...can be investigated, analyzed, monitored and measured to the highest practical degree of accuracy with Stoddart RFI Measuring Systems.**

Stoddart RFI Measuring Equipment is approved for use by all departments of the Department of Defense. Military and commercial equipments are identical . . . were designed and manufactured to Military Equipment Specifications to meet the requirements of Military Measurement Specifications. Equipments are portable, dripproof, dustproof, and ruggedized for all-weather field use . . . precise and dependable for sensitive-selective laboratory measurements.

Applications include interference measurement and location, frequency conservation and allocation studies, spectrum signatures, antenna propagation studies, field intensity surveys, RF energy surveillance and monitoring, and verification of the electronic compatibility of modern weapons systems, i.e., missile firing and guidance, computer, telemetering and communications; the measurement of all rotating electrical devices, transmitting and receiving equipment, or any system or equipment capable of producing unwanted radiated or conducted electrical disturbances.

Stoddart instruments are available as individual self-contained units covering specific frequency ranges, or in rack-mounted console systems for laboratory, mobile, airborne and marine use.

Equipments are approved for interference measurements required by the following Mil-Specs:

MIL-I-16910A (Ships), Amend. #2, Class 1; MIL-I-26600 (U. S. A. F.), Category A; MIL-I-6181B and MIL-I-6181D, Class 1, Category A; MIL-I-11748B (Sig. C.). Approved by S.A.E.; supplied with C. I. S. P. R. recommended detector time constants.

**NM-40A (AN/URM-41)**

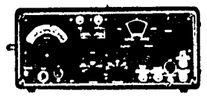
30 cps to 15 kc

**SELECTIVE OPERATION / Specifications**

**Sensitivity:** For a one-to-one signal-to-noise ratio, the sensitivity of the NM-40A is better than 0.15 $\mu$v from 1000 to 15,000 cps, 0.25 $\mu$v from 300 to 1000 cps and 1.0 $\mu$v from 30 to 300 cps, when used as a sensitive frequency-selective voltmeter with its narrowest bandwidth and an input impedance of 100,000 ohms.

**Spurious Responses:**

$2\ F_o' > 60$ db down from $F_o$
$3\ F_o' > 55$ db down from $F_o$
All others $> 75$ db down
} where $F_o$ is any input signal using selective operation



**WIDEBAND OPERATION / Specifications**

**Frequency Response:** 30 cps to 15 kcs, $\pm 0.5$ db.

**Sensitivity:** 15 $\mu$v sensitvity at input impedance of 100,000 ohms.

**Input impedance:** 50, 600, 10,000 and 100,000 ohms.

The NM-40A may also be used as an ultra-sensitive AUDIO frequency WAVE ANALYZER.

**NM-10A (AN/URM-6B)**
14 kc to 250 kc

**SPECIFICATIONS:**

**Sensitivity and voltage measurement range:** As a sensitive frequency-selective voltmeter, either balanced or unbalanced, one $\mu$v to one volt. Using rod antennas, one $\mu$v/meter to 2 volts/meter. Using shielded loop antennas, 10 $\mu$v/meter to 100 volts/meter.

**Effective random noise bandwidth:** Varies from approximately 55 cps to 400 cps over the frequency range.

**Image rejection:** $>50$ db.

**I-F rejection:** $>60$ db.

**NM-20B**
**(AN/PRM-1A)**

150 kc to 25 mc

**SPECIFICATIONS:**

**Sensitivity and voltage measurement range:** As a sensitive frequency-selective voltmeter, either balanced or unbalanced, one $\mu$v to one volt. Using rod antenna, 2 $\mu$v/meter to 2 volts/meter. Using shielded loop antenna: SMALL LOOP, 10 $\mu$v/meter to 10,000 $\mu$v/meter; LARGE LOOP, 2 $\mu$v/meter to 20,000 $\mu$v/meter.

**Image rejection:** $>50$ db.

**I-F rejection:** $>45$ db.

**BFO** is provided for CW reception.

**NM-30A (AN-URM-47A)**

20 mc to 400 mc

**SPECIFICATIONS:**

**Sensitivity:** Radiated pickup using a calibrated, tuned dipole (without reflector), 0.3 to 60 $\mu$v/meter, depending on frequency. Conducted pickup via 50-ohm matched coaxial line, 0.5 to 2 $\mu$v from 20 to 240 mc, less than 6 $\mu$v from 240 to 400 mc.

**Spurious response rejection:** $>40$ db.

**I-F rejection:** $>60$ db.

**NM-52A**

375 mc to 1000 mc

***NEW***

**SPECIFICATIONS:**

**Sensitivity:** 50-ohm input, 1 to 2 $\mu$v; tuned dipole antenna, 10 to 60 $\mu$v/meter. **Bandwidth:** 6 db bandwidth is 480 kc and constant within $\pm 3\%$ over the tuning range. **Oscillator radiation:** $<10$ micro-microwatts, over 40 times better than Mil-Specs require. **I-F rejection:** $>100$ db, band 1; $>70$ db, band 2. **Spurious response rejection:** $>80$ db. **Single knob tuning. New power supply:** 0.5% regulation for filament, bias and plate voltages; 50, 60 or 400 cycles, single phase operation. **Panel outputs:** Video, audio, I-F, remote meter and recorder.

Stoddart is the manufacturer of the AN/URM-42 radio interference-field intensity measuring system covering the frequency range of 1000 mc to 10.7 kmc.

OUR SALES ENGINEERING DEPARTMENT will give you individual consideration and information in the areas of interference problems or measurement with which you are particularly concerned . . . provide engineering bulletins, Military Specification information, descriptions of new measurement techniques and applications . . . class or individual instruction in the operation, calibration, and maintenance of Stoddart instruments. For prompt service please call "Sales Engineering," HOllywood 4-9292.

Lease-purchase and lease-rental agreements available. Immediate delivery from stock. Send for complete literature.

# TELTRONICS
INC.

Presenting MICRO-SWEEPER—The stable sweep and frequency generator that attaches directly to your oscilloscope without cables or batteries! Ready for immediate operation, any sweep up to 1 µs/cm can be used from those on your scope—five ranges are available that cover the IF frequencies, and by range switching, most wide band amplifiers can be tested. Write for complete details.

Capably staffed with qualified engineering personnel, we can assist you in varying fields ● transistor circuit design ● ultrasonics-magnetostriction transducer type applications ● customer specified test equipment ● design & development toward complete systems.

MODULAR MAGNETIC TAPE SYSTEMS

Telectro Recorders/Reproducers Now Provide New Dimensions in Versatility and Performance

Building modular magnetic tape systems is Telectro's major occupation . . . has been for over a decade. The advancement in reliability and performance reflected in a Telectro-built magnetic tape recorder reproducer is the culmination of years of experience. Hundreds of evolutionary units, each successively improving the Telectro breed, have given today's Telectro equipment the finest heritage of all tape systems ■ Telectro Modular Magnetic Tape Recording Systems are used in Data Processing • Satellite Tracking • Professional Sound Systems • Laboratory • Traffic Control • Computers • Simulators • Ground Checkout • Automatic Processing • Numerical Machine Tool Control ■ For full technical data write

by BOWMAR

Optimum performance and reliability of precision electronic control systems are dependent upon the components and servo packages of which they are comprised.

Bowmar's sound, imaginative approaches to components and package design have led many projects to new high levels of reliability and accuracy, while often reducing critical weight and size. This experience and pioneering have improved the state of the art in many types of precision systems including **weapons control, inertial guidance, navigation, autopilot** and **tracking.** Bowmar experience is displayed by its successful history of performance in the most advanced missile and aircraft programs.

Why not let Bowmar skills contribute to your project? Bowmar's engineering and production capabilities are equal to any task, regardless of complexity.

RADIONICS Model SPA-1 VELOCITY SERVO POWER AMPLIFIER

is a 90 watt amplifier specifically designed for use with low inertia close coupled a.c. servo tachometer combinations to provide a truly high performance velocity servo system.

The following performance characteristics substantiate the above:

- Undistorted power output: 90 watts at 60 cps.
- Output impedances: Output voltages of 70 and 115 volts, with a buck-boost winding of 5, 10, and 20 volts, for maximum stall-torque adjustment.
- Inputs: AC servo drive signal and a-c tach signal mixed with separate gain controls. 20 mv to either channel for full output. Amplifier hum and noise referred to input is 20 microvolts.
- Provisions for velocity servo operation:
  - Excitation and reference phase shift networks for both servo motor and tachometer.
  - Center-tapped drive-signal voltage source for direction of rotation reversal.
  - Adjustable tachometer feedback release control to allow maximum slewing rates as a straight servo.
  - Compensation for tachometer residual hum prevents motor drift with no signal.

*For further information write for technical data on Model SPA-1 amplifier.*

40,000 WATTS

SEND FOR BULLETIN 206C

The TMC transmitter, Model GPT-40K, is a completely self contained unit including all power supplies and ventilating equipment. All components are housed in four modular assemblies occupying only 40 square feet of floor space.
The transmitter includes equipment for immediate monitoring and testing of all vital operating points.
To provide for complete flexibility in operation, 1 Kw or 10 Kw outputs are readily available for reduced power or emergency operation.
The unit is available with or without synthesizer control.

THE TECHNICAL MATERIEL CORP.
MAMARONECK, NEW YORK

## Laboratory Instruments of Exceptional Precision

### IMPEDANCE MEASUREMENT

**TYPE 310-B Z-ANGLE® METER** — Measures in polar form the impedance, phase angle, dissipation factor, and storage coefficient of any RLC combination. One balancing control permits accurate analyses to be made more quickly and easily than with conventional ac bridges. Measures impedances from 0.5 to 100 k ohms. Frequency range: 30 cps to 40 kc. Accuracy of impedance magnitude is ±1% to 20 kc and ±2 degrees for phase angle. Unit has internal 400 cps and 60 cps signals.

**TYPE 314-A LOW-IMPEDANCE Z-ANGLE® METER** — Frequency of 30-1000 cps, impedance-magnitude range of 0.005-1000 ohms accurate to ±1%, and dissipation-factor range of 0 to infinity. Phase angles measured from −90° to 0° to +90° with accuracy of ±1° from 30°-90° and ±2° from 5°-30°.

### TRANSMISSION AND DELAY MEASURING SETS

Measures the absolute amplitude and relative delay characteristics of 600 ohm transmission circuits in the frequency range from 200 cycles to 24 kc. The instrument consists of two basic units: the 451-A Transmitter and the 452-A Receiver. Overall precision and accuracy of ±50 microseconds and a drift rate not exceeding ±50 microseconds per 30 minutes.

**NEW**

**TYPE 453-A TRANSMISSION AND DELAY MEASURING SET** — Frequency range 500 cycles to 50 kc. Accuracy ±5 microseconds.

### PACKAGED PRECISION DRIVE UNITS

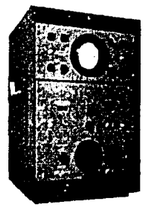
**TYPES PDW-1, DSD-2, DSD-3** — Complete units in themselves, requiring no additional parts or assembling. Type PWD-1 is worm gear, shaft positioner, accuracy 1 min. of arc. Type DSD-2 is dual speed drive, accuracy 6 mins. of arc. Type DSD-3 is dual speed drive, accuracy 12 mins. of arc. All meet Mil-E-4970(USAF), feature no backlash. Use with syncros, potentiometers, inductors, capacitors, tuning coils, etc.

### RESEARCH AND DEVELOPMENT

Acton Laboratories, Inc., also has complete facilities and experienced engineering staff to provide specialized research in and development of electronic components and instruments.

### ENVIRONMENTAL TESTING

Testing to military and commercial specifications in a fully equipped Environmental Testing Laboratory is another important service provided by Acton Laboratories, Inc.



### PHASE MEASUREMENT, GENERATION

**TYPE 320-AB PHASE METER** — Measures phase difference between 2 signals (10 cps to 100 kc) of any wave shape and indicates phase angle on large meter with separate ranges of 360°, 180°, 90°, and 36°. Accuracy is ±(1% of full scale + 3 degrees). Requires no adjustments, corrections, or balancing operations. Amplitude range is .7 to 120 volts rms. Input impedance of 10 meg and 13 mmf. Modifications allow operation to 1 cps. Also available as 320-ABR (rack mount).

**TYPE 328-A TRANSISTORIZED PHASE METER** — Frequency range 10 cps to 50 kc. Direct reading from 0 to 360° in 6 ranges of 60° each on large 5" meter scale. Absolute accuracy of 1° from 10 cps to 10 kc. Amplitude range .25 to 170 volts peak except at low frequencies. Input impedance: one megohm shunted by 20 mmf. for each channel. Internal output impedance is approx. 100,000 ohms. Recorder connector provided. Power: 105-125 volts, 60 cycle ac, 20 watts. Terminals provided for operating from an external 45 volt battery, 50 mil drain.

**TYPE 709-A BROADBAND SECONDARY PHASE STANDARD** — Accurately calibrates phase measuring instruments but can also measure phase when used in conjunction with oscilloscope. Develops 2 sinusoidal signals continuously variable from 0° to 360° with respect to each other when fed from oscillator. Range is 20 cps to 20 kc. Accuracy of ±1° from 20 cps to 10 kc; ±3° from 10 kc to 20 kc. High input impedance, low output impedance. Inherent distortion less than 1%. 0.5 to 5-volt output varies less than ±2% with phase shift. Also available as 709-AR (rack mount).

**TYPE 7000-B AUDIO PRIMARY PHASE STANDARD** — Designed for calibration of phase detectors and phase shifting devices but can also be used to measure phase shift. Consists of Type 703-A Oscilloscope, Type 704-B Secondary Phase Standard, and Type 707-B Lissajous Generator. Supplies 2 sinusoidal signals of same frequency whose phase relationship is continuously variable from 0° to 360° with ±0.05° accuracy. Any single frequency available from 30 cps to 20 kc. Output of 1 to 12 volts rms from impedance of approximately 200 ohms.

**TYPE 706-A ULTRA-SONIC PRIMARY PHASE STANDARD** — Calibrates high frequency phase meters, phase detectors, and phase-shifting devices. Generates 2 sine-wave signals having variable phase difference 0° to 360° at any specified single frequency 20 kc to 200 kc. Phase angle accuracy of ±0.1 degree set by observation of multiple frequency Lissajous pattern on built-in scope. Also available as 706-AR.

**NEW**

**TYPE 714-A PRECISION PHASE STANDARD** — A fixed frequency (400 cps) device that produces accurately-known phase angles at its output terminals. Can be used as a phase shifter or phase standard, does not require application of precise input frequency. Has excellent phase angle stability, and is extremely simple to operate. Phase angle selector offers choice of settings: 0°, 30°, 60°, 90°, 120°, 150°, and 180° with others on special order. Is accurate to ±0.1°. Also available as 714-AR (rack mount).

**TYPE 335-A ULTRA-LOW FREQUENCY PHASE METER** — Covers from .0001 cps. to 1 cps. Direct reading from 0° to 360° in 6 ranges of 60° each on large 5" meter scale. Accuracy ±1°

### POTENTIOMETER TESTING EQUIPMENT

**TYPE 394-A PONOGOMETER®** — Measures equivalent noise resistance (ENR) of single or multiturn precision potentiometers. Provides for establishing threshold level of ENR from 10-2000 ohms. ENR's above threshold level established produce both visual and audio indication. Frequency response flat to 50 kc. Accuracy is ±(3% of threshold value + 3 ohms). Recovery time is 1.5 seconds maximum. Also available as 394-AR (rack mount). Ideal for incoming inspection of laboratory analysis.

**TYPE 395-C PONOGOMETER® STANDARD** — Calibrates 394-A.

**TYPE 396-B PONOGOMETER® ATTENUATOR** — Extends range of threshold resistance of 394-A to 100 k ohms. Available as 396-BR (rack mount).

# FREQUENCY STANDARDS AND FORK OSCILLATOR UNITS

Our instruments, 40 to 30,000 cycles, are used extensively by industry and on government projects where enduring accuracy and maximum durability are required. Your inquiries on related products are invited.

## PRECISION FORK OSCILLATOR UNITS

### TYPE 2003

*Size 1½" dia. x 4½" H. Wght. 8 oz.*

Frequencies: 200 to 4000 cycles

Accuracies:—
Type 2003 (±.02% at —65° to 85°C)
Type R2003 (±.002% at 15° to 35°C)
Type W2003 (±.005% at —65° to 85°C)

Double triode and 5 pigtail parts required.

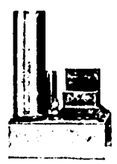
Input, Tube heater voltage and B voltage

Output, approx. 5V into 200,000 ohms

### TYPE 2007-6

TRANSISTORIZED, Silicon Type

*Size 1½" dia. x 3½" H. Wght. 7 ozs.*



Frequencies: 360 to 1000 cycles

Accuracies:
2007-6 (± .02% at —50° to + 85°C
R2007-6 (±.002% at +15° to + 35°C
W2007-6 (±.005% at —65° to + 85°C

Input: 10 to 30 Volts, D. C., at 6 ma.

Output: Multitap, 75 to 100,000 ohms

### TYPE 2001-2

*Size 3¾" x 4½" x 6" H., Wght. 26 oz.*

Frequencies: 200 to 3000 cycles

Accuracy: ±.001% at 20° to 30°C

Output: 5V. at 250,000 ohms

Input: Heater voltage, 6.3 - 12 - 28

B voltage, 100 to 300 V., at 5 to 10 ma.

### ACCESSORY UNITS FOR 2001-2

L—For low frequencies multi-vibrator type, 40-200 cy.

D—For low frequencies counter type, 40-200 cy.

H—For high freqs, up to 30 KC.

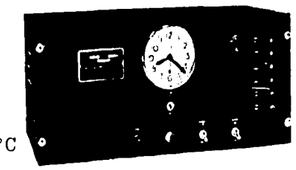
M—Power Amplifier, 2W output.

P—Power supply.

## PRECISION FREQUENCY STANDARDS

### TYPE 2005A

*Size 8" x 8" x 7¼" High*
*Weight, 14 lbs.*



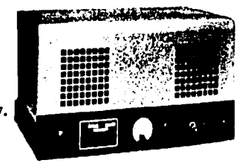
Frequencies:
50 to 400 cycles (Specify)

Accuracy:
±.001% from 20° to 30°C

Output, 10 Watts at 115V

Input, 115V. (50 to 400 cy.)

### TYPE 2121A



*Size*
*8¾" x 19" panel*
*Weight, 25 lbs.*

Output: 115V
60 cycles, 10 Watt

Accuracy:
±.001% 20° to 30°C

Input,
115V (50 to 400 cy.)

### TYPE 2111C

*Size, with cover*
*10" x 17" x 9" H.*
*Panel model*
*10" x 19" x 8¾" H.*
*Weight, 25 lbs.*

Frequencies: 50 to 1000 cy.

Accuracy:
(±.002% at 15° to 35°C)

Output: 115V, 75W.

Input: 115V, 50 to 75 cy.

# MODEL 111 FREQUENCY-TIME STANDARD

*Space Satellite Timer*

After over a year's extensive testing and comparison with other units the SMITHSONIAN INSTITUTION selected the unit pictured above for their satellite tracking stations located around the earth. It was established that this unit will keep time within 1/10,000 second per day. We guarantee a stability of 1 x $10^{-9}$ and supply a continuous record to prove this. DON'T BUY ANY FREQUENCY STANDARD CLAIMING THIS STABILITY UNLESS THE SUPPLIER PROVIDES A *CONTINUOUS* RECORD TO PROVE IT. DO NOT ACCEPT ASSERTIONS OR EVEN "PLOTTED CURVES."

## GENERAL SPECIFICATIONS

Frequency Stability .....1 x $10^{-9}$ per day
Time Stability .....1/10000 second/day
Time Measuring Resolution .....
10 micro-seconds

Time Transmission Synchronized with WWV (mechanical cam) accurate to ....
1/1000 second

Time Transmission by electronic seconds pulse (repetition stability) .....
10 micro-seconds

| OUTPUTS | Sine Wave | Pulse |
|---|---|---|
| | 1 mc | 1 mc |
| | 100 kc | 100 kc |
| | 10 kc | 10 kc |
| Single phase | 1 kc | 1 kc |
| 3-phase | 1 kc | |
| | 100 cps | 100 cps |
| Single phase | 60 cps | 10 cps |
| 3-phase | 60 cps | 1 cps |

## TIME-OF-DAY CLOCK

Shows hours, minutes and seconds.

## MICRO CLOCK

Reads time to 0.001 second. Micro-clock is provided with a cam system that can be synchronized with WWV time signal ticks and used as a time signal repeater. Can be used to study and measure outside phenomena.

## OSCILLOSCOPE

*Circular sweeps of 100 cps, 1 kc, and 10 kc time received pulses within a few micro-seconds. Separate inputs to study outside phenomena.*

## TIME SIGNAL AMPLIFIER

Amplifier designed to receive time signals through heavy interference. Filter eliminates tone signal modulation on WWV signals so "ticks" can be received when tone is on. A switch cuts out filter from the circuit when not desired.

## PHASE SHIFT CIRCUIT

Electronic phase shifter provided to change phase of outputs.

## 50 other Models of FREQUENCY STANDARDS

1. SUBASSEMBLIES: Models 52, 54, 56, 124, 126 and many others not listed here.
2. GENERAL PURPOSE UNITS: Models 61, 63, 65, 67, 128
3. MOTOR AMPLIFIERS: Models 71, 101-6L6, 103, 104, 119, 140, 141, 200-IN, 201-IN.
4. FREQUENCY MEASUREMENT UNITS: Models 105, 110, 129, 138
5. TIME KEEPING UNITS: Models 25L6B, 35L6B, 103, 104, 110, 111
6. FREQUENCY DIVIDERS: 107, 115, 117, 130
7. TRANSISTOR STANDARDS Models 73, 301, 302, 304, 309
8. CRYSTAL CLOCKS FOR SIDERAL TIME

**PROVEN RELIABILITY—**
**SOLID-STATE POWER INVERTERS**
**over 260,000 logged hours— voltage-regulated, frequency-controlled, for missile, telemeter, ground-support, 135°C all-silicon units available now—**

Interelectronics all-silicon thyratron-like gating elements and cubic-grain toroidal magnetic components convert DC to any desired number of AC or DC outputs from 1 to 10,000 watts.

Ultra-reliable in operation (over 260,000 logged hours), no moving parts, unharmed by shorting output or reversing input polarity. Wide input range (18 to 32 volts DC), high conversion efficiency (to 92%, including voltage regulation by Interelectronics patented reflex high-efficiency magnetic amplifier circuitry).

Light weight (to 6 watts/oz.), compact (to 8 watts/cu. in.), low ripple (to 0.01 mv. p-p), excellent voltage regulation (to 0.1%), precise frequency control (to 0.2% with Interelectronics extreme environment magnetostrictive standards or to 0.0001% with fork or piezoelectric standards).

Complies with MIL specs. for shock (100G 11 misc.), acceleration (100G 15 min.), vibration (100G 5 to 5,000 cps.), temperature (to 150 degrees C), RF noise (I-26600).

AC single and polyphase units supply sine waveform output (to 2% harmonics), will deliver up to ten times rated line current into a short circuit or actuate MIL type magnetic circuit breakers or fuses, will start gyros and motors with starting current surges up to ten times normal operating line current.

Now in use in major missiles, powering telemeter transmitters, radar beacons, electronic equipment. Single and polyphase units now power airborne and marine missile gyros, synchros, servos, magnetic amplifiers.

Interelectronics—first and most experienced in the solid-state power supply field produces its own all-silicon solid-state gating elements, all high flux density magnetic components, high temperature ultra-reliable film capacitors and components, has complete facilities and know how—has designed and delivered more working KVA than any other firm!

For complete engineering data, write Interelectronics today, or call LUdlow 4-6200 in New York.

# 1961 IRE DIRECTORY

# Directory II Components

## 46 major groups 457 products

The products and services of the radio-electronics industry have been organized into three basic directories:

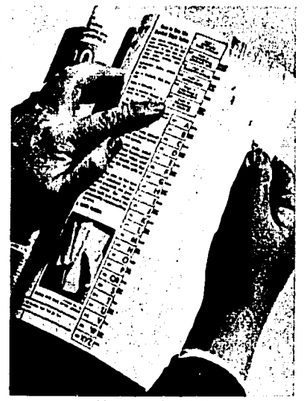
I. Complete Equipment

II. Components

III. Materials & Services

Within these three basic directories, 104 major product and service groups are numbered consecutively throughout. Under each of these 104 classes a further breakdown is given, showing in detail by a system of code numbers after each firm listed what specific products within the class are manufactured by that firm.

For a terminology cross-index listing the 932 subproducts in alphabetical order, consult the pink section preceding page 1.



### The first few times you use this EDGE INDEX

follow the "How to use" instructions slowly—one step at a time. After that you will be able to open easily and almost instantly to the section that you seek.

Machol edge indexes covering the alphabetical section and each of the three major directory groups will be found on pages 135, 241, 359, and 597.

### HOW TO USE

1. Bend the Directory almost double with the back cover page on the inside.
2. Hold in your right hand with your four fingers near to the bound edge and your right thumb near the middle of the open side of this page.
3. From the heavy or light line symbol adjacent to the subject you seek, run your eyes across the page edges until you reach the horizontally corresponding symbol.
4. OPEN THERE!

LICENSE NO. 25G
MACHOL EDGE INDEX PATENT #2680630

For complete list of products and services, arranged alphabetically for fast reference, see the pink section preceding page 1.

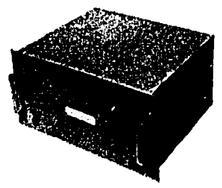
# RF



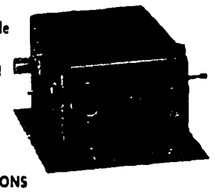
components demonstrating exceptional performance characteristics

broadband amplifiers • low noise amplifiers
tunable amplifiers • bandpass filters
multicouplers • multiplexers • converters
coaxial attenuators • terminations
impedance matching transformers

## Broadband RF Amplifiers

**40-1500 mcps**

Model HFW Amplifiers cover an octave of frequency. Their truly exceptional performance features low noise, high gain with low power drain.



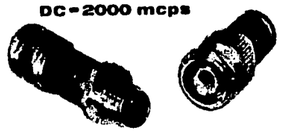
SPECIFICATIONS (condensed)

| | |
|---|---|
| Freq range | 40-1500 mcps |
| Z in/out | 50 or 75 ohms |
| Noise figure | 5-11 db |
| Gain | 10-30 db or greater if desired |

## Bandpass Filters

**30-2000 mcps**

Model HFF and HFF-T Bandpass Filters are rugged, reversible in operation, remarkable in performance (which approximates theoretical expectations). Advanced filter designs are also available for antenna couplers and diplexers.



SPECIFICATIONS (condensed)

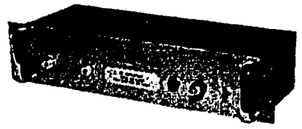
| | HFF | HFF-T |
|---|---|---|
| $F_o$, mcps | 30-1000 | 200-2000 |
| Bandwidth | 5-25% $F_o$ | 1-15% $F_o$ |
| Insertion loss | ≦1 db | ≦1 db |
| VSWR | ≦1.2 in passband | |

## Attenuators and Terminations

**DC-2000 mcps**

Impedances of 52.5 and 75 ohms
VSWR 1.2 maximum
Nominal attenuation from 1 to 20 db
BNC, TNC, or N connectors

## Impedance Transformers



DC to 1000 mcps
VSWR 1.2 maximum
Minimum loss
Matching any pair of 50, 75, 93 ohms
BNC connectors

## Low Noise RF Amplifiers

**30-300 mcps**

Model UH-2(A)SP Amplifiers offer broadband response, high gain, and low noise figure, with additional advantages of simplicity, high reliability, ruggedness, small size and low weight.

SPECIFICATIONS (condensed)

| | |
|---|---|
| Freq. range | $F_o$ preset between 30 and 300 mcps |
| Gain | Greater than 20 db |
| Bandwidth | Up to 10% of $F_o$ |
| Noise Figure | <1 db at 30 mcps to <3 db at 300 mcps |

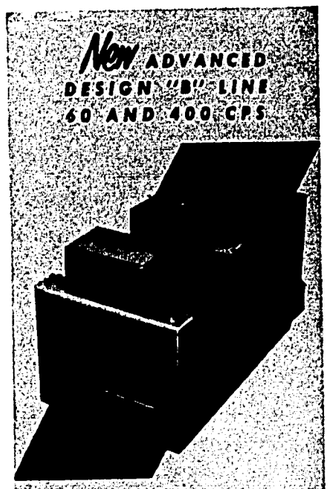
**Magamps**

*also:* CURRENT TRANSFORMERS
PULSE TRANSFORMERS
CONTROL REACTORS
FILTERS
TOROIDS *to your specifications, or we will design them.*

**DESIGN CAPABILITY:** Specialized experience in high performance magnetics qualifies us to design your problem components. (Details of past achievements on request.)



**PRODUCTION FACILITIES:** Controlled environment areas for stick, bobbin and toroid winding, hermetic sealing, and encapsulation.

**RELIABILITY:** Proven production capability to meet Mil-T-27A airborne and missile requirements with tight quality control.

**FAST DELIVERY**

**GENERAL MAGNETICS, INC.**
2641 Louisiana Ave., Minneapolis 26, Minn.

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 135-240.

**HIGH POWER TRANSISTOR MAGNETIC SERVO AMPLIFIER**

For AC servo motor control — 50 watts to 3000 watts

FEATURING
- Extreme reliability
- Wider ambient temperature range
- Faster response
- Smaller size at higher power ratings
- Higher gains
- Improved core design
- Silicon rectifiers used exclusively
- Greater flexibility
- Ideally suited for operating with Diehl Servo Motors

Signal Input AC or DC
Military Specifications
Provisions for System Feedback • Completely Static • Output 115V AC
Phase Reversible

For complete 60 cps and 400 cps specs request Bulletin S-961.

LEVINTHAL ELECTRONIC PRODUCTS
Subsidiary of Radiation Incorporated

*As a power amplifier in the 300- to 500-mc frequency range, the Model 241T Levinthal system provides 45-db gain and 50KW c-w output.*

Here is an example of r-f packaging with extreme flexibility. Either c-w or pulse operation can be served with a series of amplifiers ranging downward through 10-, 2-, and 1-kw models. Supplied with appropriate signal-source drivers, they become complete transmitters, applicable over a broad frequency spectrum.

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 135-240.

ANTENNAS by Ainslie CORPORATION

NOW — available from Ainslie Corporation, a new remote control positioning pedestal capable of handling our antennas up to 18 feet in diameter in frequencies from 100 to 10,000 mc. Modifications available for a variety of tracking applications. Whatever your antenna or reflector requirements may be, contact us at our new facilities.

Ainslie CORPORATION

*531 Pond Street*
*South Braintree 85, Massachusetts*

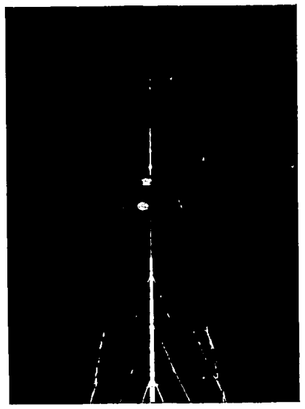
# ANTENNA TOWERS & STRUCTURES

## *Dresser-Ideco Designs, Fabricates, Erects A Wide Variety of Large Land-Based Antenna Structures*

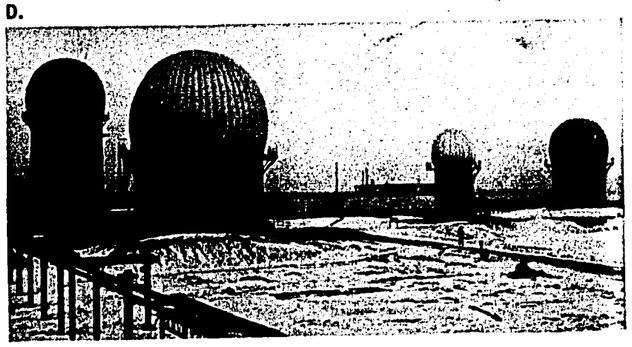
Whatever the antenna tower or structural problem, Dresser-Ideco can handle the job. A large technical service staff, more than a quarter-million square feet of well-equipped production area, extensive research and development facilities, and many years experience designing and erecting steel and aluminum structures qualify Dresser-Ideco as a major contractor for any type of antenna tower . . . from 100 to 2000 feet. Below are some of the many types of Dresser-Ideco towers serving the nation's communications and military electronics facilities.



A.

B.

C.



**A.** Multiple antenna tower. This big 729' tower in Baltimore supports three television antennas on a 105' wide platform at the top.

**B.** Antenna test range tower for height finding radar.

**C.** Microwave antenna tower typical of those used in systems built for the Ohio Turnpike and the Illinois Toll Road.

**D.** Surveillance radar towers on the DEW line. Designed for hurricane force winds and heavy ice and snow loads. These are some of more than 1,000 radar towers built by Dresser-Ideco for the nation's early warning systems.

D.

*Dresser-Ideco offers a complete tower and structural service—design, application, field installation. Call or write for consultation on your structural problems at no obligation. Send for booklet "Facilities For Defense Production". Dresser-Ideco Company, A Division of Dresser Industries, Inc., 875 Michigan Avenue, Columbus 15, Ohio. Branch: 8909 So. Vermont Avenue, Los Angeles 44, Calif.*

# weather conditioned microwave

**ANDREW RADOME EQUIPPED ANTENNAS DEFY ICE . . . SNOW . . . WIND.** Andrew radomes provide excellent 2-way year-round protection for Andrew microwave antenna systems. First, they protect feed and reflecting surface against the attenuating effects of snow, ice and debris accumulation. Secondly, for tower mounted antennas they reduce the effects of wind thrust by 35%.

All Andrew radomes are lightweight and easy to install — clip directly to the dish rim of existing antennas. Unheated radomes are suitable for all but exceptional cases. In areas where freezing rain occurs, heated radomes can be provided.

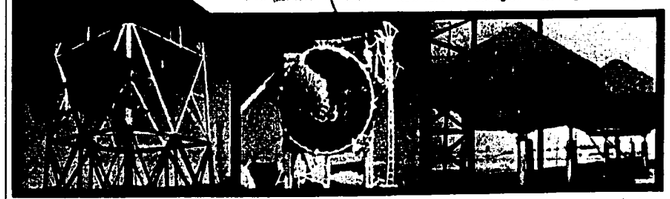
**SPECIFICATIONS**

**STANDARD RADOMES**

| Dia. Feet | Type No. | Attenuation @ 6 kmc. db | VSWR Contribution @ 6 kmc. | Thrust at* 30 psf (Flats), lbs. |
|---|---|---|---|---|
| 10 | R10 | 0.4 | 0.02 | 1,990 |
| 8 | R8 | 0.4 | 0.02 | 1,270 |
| 6 | R6 | 0.4 | 0.02 | 714 |
| 4 | R4 | 0.4 | 0.02 | 320 |
| 2 | R2 | 0.4 | 0.02 | 75 |

*Including antenna

**HEATED RADOMES**



| Dia. Feet | Type No. | Atten. @ 6 kmc. db | VSWR Contr. @ 6 kmc. | Thrust at* 30 psf (Flats), lbs. | Power** Reqmts. |
|---|---|---|---|---|---|
| 10 | HR10 | 0.7 | 0.02 | 1,990 | 3,400 W. |
| 8 | HR8 | 0.7 | 0.02 | 1,270 | 2,400 W. |
| 6 | HR6 | 0.7 | 0.02 | 714 | 1,200 W. |
| 4 | HR4 | 0.7 | 0.02 | 320 | 550 W. |
| 2 | HR2 | 0.7 | 0.02 | 75 | 150 W. |

*Including antenna
**Power requirements for HR10 and HR8 are 3 wire single phase 60 cycle 220 volts. Power requirements for HR6, HR4 and HR2 are single phase 60 cycle 115 volts

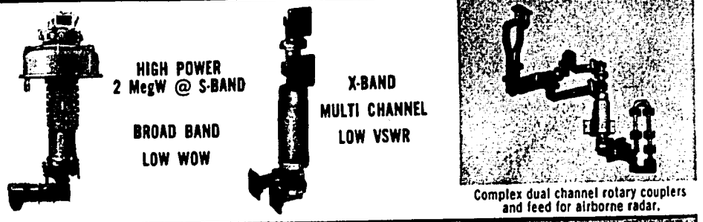
## POINT TO POINT COMMUNICATIONS

Gabriel's ruggedized PUBLIC UTILITY LINE and industrial COMMERCIAL LINE parabolic antennas offer plus values in Microwave systems requiring top performance and maximum versatility.

THE PUBLIC UTILITY LINE . . . 4, 7, and 11 KMC . . . THE NEW COMMERCIAL LINE

3 Point Suspension — Anti icing propane heater.

## ANTENNA SYSTEMS



Gabriel has designed and produced hundreds of medium size radar antenna systems ranging between 10 and 45 feet in diameter — fan beam — cosecant squared — and true paraboloidal in shape for shipborne, and land based search and surveillance radar applications.

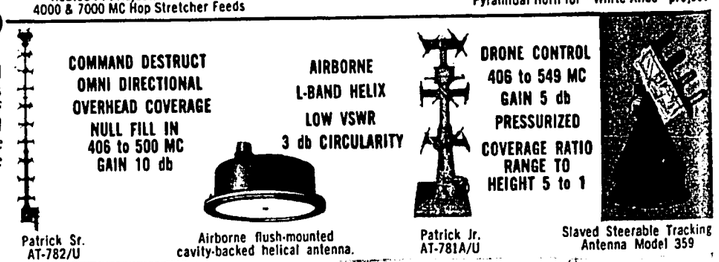
ASR-4 Radar — High powered shipborne long range search radar antenna — servo controlled. — High power land based 45 ft. search radar antenna.

## ROTARY JOINTS

Gabriel rotary couplers are designed for present and future sophisticated, ultra-long range search and detecting radar, and radio astronomy systems. Fifteen years of custom design and manufacture of all types and sizes give Gabriel leadership in this specialized field.

Complex dual channel rotary couplers and feed for airborne radar.

## HORNS AND FEEDS



Gabriel's Horns and Feeds and other antenna components are in use extensively throughout the world — in tropo scatter — in dual polarized ultra long range radio-astronomy — in advanced slotted arrays and corporate structures — L to X-Band.

Heated . . . Adjustable — 360° 4000 & 7000 MC Hop Stretcher Feeds — Pyramidal Horn for "White Alice" project

## AERO SPACE ANTENNAS

Gabriel's line of Ground Support and Aero-Space circularly polarized antennas includes a series of ruggedized UHF omni's, a complete line of L, C, S and X Band aircraft, drone, and missile antennas, and UHF slaved steerable tracking antennas.

Patrick Sr. AT-782/U — Airborne flush-mounted cavity-backed helical antenna. — Patrick Jr. AT-781A/U — Slaved Steerable Tracking Antenna Model 359

## RESEARCH AND DEVELOPMENT

Gabriel's team of engineers and scientific staff places particular emphasis on research and development. In the past 5 years many "firsts" have been achieved in microwave art. Among these are re-entry, high velocity missile tracking, electronic scanning and an extension of the art in passive reflectors.

**COMPLETE TESTING FACILITIES** — on 80 acre site which houses a 73,000 sq. ft. ultra modern research, engineering, and manufacturing center. Microwave dark room — six centrally located pattern ranges 200, 400, 1000, 1200, 2200, and 3400 are in operation — three additional ranges are being established.

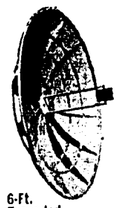
# Antennas

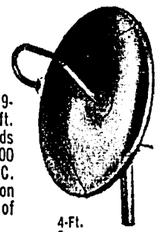
**MINITRACK ANTENNAS**



Horizontally or vertically mounted arrays similar to this MINITRACK antenna can be designed for individual beam requirements or you can select from a number of existing designs.

**TACO** offers unsurpassed facilities for the design, development and manufacture of military and commercial antenna systems. Mechanically, Taco is currently handling antenna arrays in the area of 2000' dimensions. Electrically, Taco is equipped and experienced in the design and manufacture of antennas from 30 MC to X-band. Modern laboratory and manufacturing facilities include long-range test sites, complete measuring and testing equipment, automatic constant potential welding equipment, and provision for competent field service and installation service anywhere.

**RUGGEDIZED YAGI**



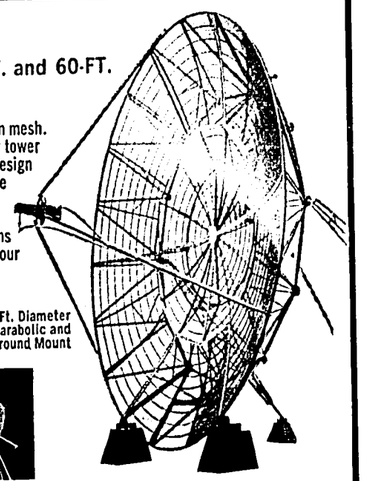
From 30 MC to 500 MC. Available as individual units or stacked systems.

6-Ft. Expanded Aluminum Mesh

**PARABOLIC ANTENNAS**

Mesh sizes from 4-ft. to 19-ft. and spun sizes from 4-ft. to 6-ft. Frequency bands from 806-960 MC, 1700-2400 MC and 5925-7450 MC. Other bands available on special order. Variety of mountings.

4-Ft. Spun Aluminum



**WAVE GUIDE COMPONENTS**

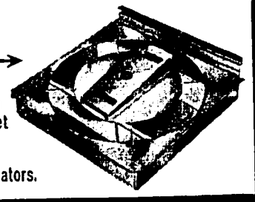
Large Wave Guide Components for 10½" and 21" in the form of wave guide bends, feed horns, are available. Certified welders assure quality units fully tested to meet the most stringent electrical and mechanical requirements.

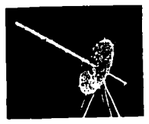
**28-FT., 32-FT. and 60-FT. PARABOLICS**

Expanded aluminum mesh. Ground mounted or tower mounted. Unique design allows rapid, simple erection.

Dual polarized horns supplied to meet your requirements at reasonable cost.

28-Ft. Diameter Parabolic and Ground Mount





**AIRBORNE ANTENNAS**

←**Antenna AT-256-A/ARC** Type and Construction: Streamlined blade type antenna. Heat treated permanent mold aluminum castings with Teflon insulators.

**Antenna G-833**→

Type and Construction: Flush mounted annular slot antenna for communication band. Sheet aluminum, spot welded construction per Air Force specifications. Fibreglas insulators.

**HELICAL ANTENNAS and MOUNTS**

Mechanical mount for azimuth and elevation. Electromechanical remote mounts also available. Helicals available in 4, 6, or 8 turns from 215-265 MC. Other frequencies on special order. Mount illustrated is H-M-1.

*When Reliability is a must...*
**specify EMPIRE**

**BROADBAND COAXIAL ATTENUATORS**
**DC to 10 KMC**
Pads, 6 and 12 position step attenuators (manually and motor operated), attenuator panels. 1 watt to 15 watts. Also 50 watt power attenuators. Large range of values. Low VSWR, high accuracy. Long term stability. Conservative power ratings.

**COAXIAL TERMINATION**
**Model TE-80 • DC to 10 KMC**
Low VSWR throughout. Many special versions available.

ARRA TLINE
CONTINUOUSLY VARIABLE ATTENUATORS

New
**ULTRA BROADBAND**

*Exclusive Features:*

- Bandwidth: 1.0 to 9.0 KMC with a single unit
- Continuously variable for all values of attenuation
- VSWR: 1.5 max. at all frequencies for all values of attenuation
- Attenuation: 10 db min. at 1 KMC
- Insertion Loss: 0.5 db max.
- Power: 10 w. average
- Size: 5" diameter by 1" high
- Drive: micrometer or shaft
- Model 3-6414-10

PRICE **$150**

**In addition, other standard models available are**

| Model No. | Freq. KMC | Max. Atten. | Max. VSWR | Unit Price |
|---|---|---|---|---|
| 1414-10 | .25-.50 | 10 | 1.5 | $290. |
| 2414-20 | .50-1.0 | 20 | 1.5 | $290. |
| 2-3414-30 | .8-2.5 | 30 | 1.5 | $290. |
| 3414-30 | 1.0-2.0 | 30 | 1.4 | $270. |
| 4414-30 | 2.0-4.0 | 30 | 1.3 | $250. |
| 4-5414-30 | 2.0-6.0 | 30 | 1.3 | $260. |
| 5414-30 | 4.0-7.0 | 30 | 1.3 | $270. |
| 6414-30 | 7.0-11.0 | 30 | 1.3 | $280. |

100 watts
Minimum size
Constant impedance

**LINE STRETCHERS**
DC to 5000 mc
1.2 max. VSWR
Constant impedance
Locking clamp

**MONITOR TEES**
Used to separate DC or video currents from an RF signal. Indispensable for monitoring helix intercept current in traveling wave tubes.

**SIGNAL SAMPLERS**
Used to monitor signals present in coaxial systems. Permits small signal to be taken from system without adding discontinuity. Coupling continuously adjustable.

**DC SHORTS**
Sections of constant impedance transmission line with built-in DC bypass, to ground low frequencies while allowing RF to pass unattenuated.

**DC BLOCKS**
Uniform lengths of constant impedance transmission line with DC blocking condenser in series with center conductor.

**COAXIAL CONNECTORS**
**Now Available!**
A Complete Line of UG and Special Coaxial Connectors.

# STODDART fixed UHF coaxial Attenuators and Terminations

## ATTENUATORS

**Description:** Available in any combination of Types "N" or "C" male or female connectors. Any female connector may be flanged for panel mounting. Values from 0.1 db thru 1.4 db are series resistive elements; from 1.5 db thru 60 db are T-section resistive networks.

**Specifications:**

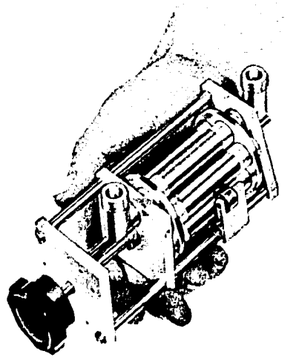
**Frequency range:** dc thru 3000 mc on all values thru 60 db.

**Characteristic impedance:** 50 ohms.

**Maximum average power:** 1 watt

**Available insertion loss:** any value from 0 db thru 60 db.

**VSWR:** <1.2 on values of 10 db and above.



**Insertion loss tolerance:** ±0.5 db on values of 1.5 db thru 50 db.

**Temperature coefficient of insertion loss:** .005 db/°C at 25°C.

**Dimensions:** ¾" dia. x 3" max. length.

**Price: from $37.50 to $45.00**

## TURRET-TYPE STEP ATTENUATORS

**Description:** 2, 6 and 10-position turrets are compact assemblies composed of resistive networks each arranged in a tube 9/16" dia. x 3" long. One tube provides a straight-thru section for zero attenuation. Tubes are turret-mounted about a central shaft; assembly has radial and linear motion requiring a "Pull-turn-push" sequence, positively positioned by spring-loaded detent.

Any combination to 60 db is available, including fractional values of db.

**Specifications:**

**Frequency range:** dc thru 3000 mc on all values thru 60 db.

**Characteristic impedance:** 50 ohms.

**Maximum average power:** 1 watt.

**Available attenuation:** any value from 0 db thru 60 db.

**VSWR:** <1.2 on values of 10 db and above.

**Insertion loss tolerance:** ±0.5 db on values of 1.5 db thru 50 db.

**Temperature coefficient:** .005 db/°C at 25°C.

**Price:** 2-position, $175.00
6-position, $295.00
10-position, $435.00

## TERMINATIONS

**Types "N" or "C" connectors**

Available with male or female connectors, 50 or 70-ohm impedance

**Specifications:**

**Frequency range:** dc thru 7 kmc.

**Maximum average sine wave power:** 1.0 watt.

**Maximum peak power:** 200 watts.

**Termination accuracy at dc:** ±0.5 ohm.

**Temperature coefficient of resistance:** 70 ppm/°C at 25°C.

**Maximum VSWR (Type "N" Connectors, 50-ohm):** 1.15 (dc thru 1 kmc), 1.20 (1 kmc thru 7 kmc).

**Dimensions:** ¾" dia. x 1½" long (approx.).

**Price: from $30.00 to $35.00**

**Types "BNC" or "TNC" connectors**

Available with male or female connectors, 50-ohm impedance

**Specifications:**

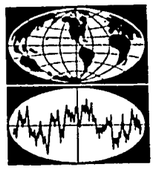
**Frequency range:** dc thru 1000 mc.

**Characteristic impedance:** 50 ohms.

**VSWR:** <1.2

**Maximum average sine wave power:** 0.5 watt.

**Maximum peak power:** 1.25 kw.



**Dimensions:** 9/16" dia. x 1 5/16" long (approx.).

**Price: $17.50**

# FACILITIES
## make the Difference

■ Creative microwave engineering talents work best when equipped with *extensive test and production facilities.* Here at PREMIER, our inventive, experienced engineers have at their disposal test and production equipment on a par with the most advanced in the entire microwave industry.

These integrated facilities enable PREMIER to exercise complete control over all steps of production from theory to finished component, thereby assuring complete uniformity . . . and over-all excellence.

Whatever your problem in advanced microwave development, you can expect to find your most efficient . . . and economical . . . solution at PREMIER. Some typical PREMIER products are depicted at the right.

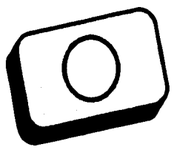
# What's YOUR Portable Power Problem?

BURGESS has more than 5000 battery types to choose from



ZINC-CARBON NICKEL-CADMIUM
MERCURY
WATER-ACTIVATED

Each with the highest measure of uniform dependability! These are why 2 of 3 electronic engineers specify

## BURGESS BATTERIES

## BURGESS
IS THE MOST COMPLETE ONE-SOURCE LINE OF *Portable Power!*

**EXCLUSIVE WAFER CELL CONSTRUCTION**

. . . offers compactness, long shelf life, exceptional service life. A 30% increase in battery life at no increase in size.

**TRANSISTOR ACTIVATORS**

Burgess Activator Batteries for transistor circuits are smaller and more compact in size! Yet they deliver 30% more power because of the patented "Wafer-Cell" construction! Burgess Activators give you compact power, uniform performance, longer shelf life . . . all combined with modern packaging.

**RESERVE BATTERIES**

High energy output in a compact power source. Can be stored dry for years! Activated only when immersed in water. No handling of dangerous electrolyte, no spilling or leaking! Wide range of efficient operating temperatures. Designed for your specific applications.

**MERCURY ACTIVATORS**

Burgess constructional features provide uniform quality and dependable service! Burgess exclusive patents offer sealed-in-steel protection, wide temperature range efficiency, controlled venting, patented inner cell connector, and flat discharge curve.

**SEALED NICKEL-CADMIUM BATTERIES**

A secondary rechargeable battery system which delivers high energy output from a small package! Hermetically sealed-in-steel cells eliminate annoying maintenance and addition of liquids. Can be recharged many times, by trickle or quick charge, for long lasting economical power!

*Check with your Burgess Distributor for complete local stocks of fresh BURGESS BATTERIES! Or your distributor can order from Burgess the special battery needed for your specific application!*

## *FREE DESIGN SERVICE*

For special applications, skilled Burgess Engineers offer you a FREE battery design service. Burgess will manufacture the exact battery to fit your needs, regardless of quantity required.

**NEW ENGINEERING MANUAL**

New 100-page dry battery handbook now available! Engineers engaged in the design of battery-powered equipment are invited to write to Burgess Battery Company Dept. IRE Freeport, Ill., to secure a copy. Others may buy the manual for $1.00.

# BF SERIES

**BF Series Transistor Battery Holder accommodates batteries and cells with diameters up to 1⅜" and lengths from 1 19/64" to 7 3/16" making it possible to use different battery combinations to obtain a wide selection of DC voltages. Batteries can be exchanged simply by unscrewing the holder cap. Designed for mounting up to a 1¾" diameter hole and ⅜" thick panel.**

Inquiries for special battery holder length and diameters are invited.

300 SERIES: (B SERIES SHOWN) • Accommodates batteries ranging up to 7/16" diameter and lengths from 1.300 to 5.850.

400 SERIES: (F SERIES SHOWN) • Accommodates batteries ranging from 1" to 1⅛" diameter and lengths from 1 11/16" to 6 3/16".

500 SERIES: (B SERIES SHOWN) • Accommodates batteries ranging from 1 3/16" to 1 3/8" diameter and lengths from 2 3/16" to 7 3/16".

OUR FIELD ENGINEERS WILL GLADLY ASSIST YOU IN YOUR COOLING PROBLEMS

BLOWER AND FAN TYPES OFFERED

Centrifugal and Vane Axial Blowers, Blower Housings, Axial Flow Fans.

TYPES OF SUB-FRACTIONAL MOTORS MANUFACTURED:

Induction, Hysteresis Synchronous, Reluctance Synchronous, Servo, Gear and High Slip Induction.

**BLOWERS**

| | |
|---|---|
| C F M | to 750 max |
| Types | Single, double, inverted |
| Housings | 2¼" to 11½", vertical, overall |
| Mountings | Flange, foot, cone |

**MOTORS**

| | |
|---|---|
| Horsepower | 1/500th to ½ h.p. |
| Speeds | 3600 rpm max. at 60 cps<br>24,000 rpm max. at 400 cps<br>Dual and Variable Speed Units |
| Frequency | Fixed . . . 50, 60 or 400 cps<br>Variable . . . 50 to 450 cps, and 320 to 1,000 cps<br>Special . . . as required |
| Voltage | Standard 115V and 230V<br>Special . . . as required |
| Phase | 1, 2 or 3 phase |
| Size | 1" O.D. to 4⅜" O.D. |

**FANS**

| | |
|---|---|
| C F M | to 1000 max |
| Types | Axial, vane axial, ALTIMATIC ® |
| Blades | 2" to 12" dia. |
| Mountings | Venturi, foot. |

Air-Marine motors and cooling units have been designed and tested to meet the specifications of both the military and industry.

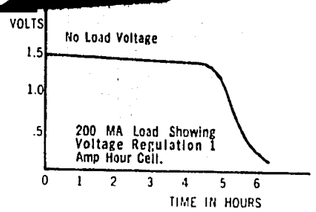
SILVER CHLORIDE



CALORO + + − − VOLT

BATTERIES

The newest development in batteries, these miniature units are capable of delivering large peak currents (10 amps/sq. in.) . . . May be recharged at 1 amp per sq. in. . . . Rapid depolarization. . . . Will withstand short circuits for sustained periods, recovering full potential in fraction of a second. Available in 5 sizes from ¼"D x ¼" to 2"D x ½" and from 300 to 6,000 MA hours.

Silver-Chloride, zinc, sea-water activated batteries also available . . . no gassing, no magnesium used.

We invite inquiries on special applications for unusual power source requirements.

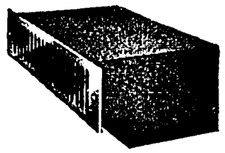
# McLEAN
*Your Best Source For...*



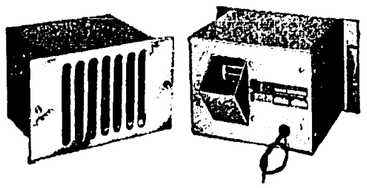
RACK MOUNTED
# FANS and BLOWERS*
*PATENTED

## STANDARD RACK MOUNTED FANS & BLOWERS

Over 15 models available in panel heights of 3½" to 12¼" in increments of 1¾". Range, 80 to 1200 cfm. All units feature quiet operation, no electrical noise and maximum air delivery. Blower units provide better air delivery against pressure and higher velocity for faster cooling. Highly reliable, rubber mounted, 115 volts, 60 cycle motors. Also Mil. Spec. and DC motors available. Permanent filters. Smart, heavy gauge, stainless steel grilles.

### RECESSED MODELS

Provide higher performance with minimum panel height. Filter and blower are recessed into the unused portion of the open base commercial type rack. Fit 3½", 5¼", 7", 8¾" and 10½" panel heights and deliver 150 cfm to 1200 cfm. Highly reliable, rubber mounted, 115 volts, 60 cycle motors. Mil. Spec. and DC motors available. Permanent filters.



### REVERSIBLE FAN

Easy-to-install Filter Box Propeller Fan gives wide choice of cfm's and great mounting flexibility. Operates as blow or suck without rework. Compact, low-cost. Long, service-free life. Operates from various power sources.

### HALF PANEL WIDTHS

For narrow racks or where space is a problem. Fit half the width of standard 19" racks leaving balance of space for other components. Blower model (5¼" high) delivers 100 cfm. Fan model (7" high) delivers 225 cfm. Powered by highly reliable, rubber mounted, 115 volts, 60 cycle motors. Mil. Spec. and DC motors available. Permanent type filter.

HALF PANEL WIDTH FILTER-GRILLE ASSEMBLIES ALSO AVAILABLE

### MIL. SPEC. BLOWERS

Meet most rigid specifications. Mount in any position. Deliver 10 cfm. Fit 3¾" cube. Continuous duty, totally enclosed motor, 1/300 hp. 115 volts, 60 cycle, 3400 rpm.

### RING TYPE FANS

175 to 395 cfm. Fan diameters 6½" and 8". Motors totally enclosed, highly reliable, 115 volts, 60 cycle, 3000 rpm. Mil. Spec. and DC motors available. Other sizes available.

**FREE!** Engineering Booklet on Forced Air Cooling. Describes air convection methods. Includes design data, tables, charts, etc.

**FREE!** 31 page catalog loaded with helpful data. Shows complete line of fans, blowers.

# HI VOLTAGE LOW INDUCTANCE CAPACITORS

Designed as high temperature gas discharge sources for Thermonuclear and similar type power research. Suitable for high peak energy within a short time constant and for blocking, bi pass service, power supply filters and similar applications.

### FEATURES

- Voltage Ratings up to 150KV.
- High energy content up to 4000 joules.
- Ringing frequency as high as 1.25 mcs.
- Hermetically sealed. Low cost per joule.

# GLASS CAPACITORS by CORNING

## CY Capacitors

**Rugged, reliable, extreme miniaturization:** MIL-C-11272A: Only complete mechanical destruction will alter their values. Temperature coefficient is plus 140 ± 25 ppm/°C. from −55°C. to +125°C. Absolute retrace. TC variation is less than 10 ppm between units. Capacitance drift is negligible. Values: 1 to 10,000 uuf.

**Fusion-sealed type:** Glass encapsulation with glass-to-metal leads to protect against severe environments, particularly moisture and vibration.

## Medium-Power Transmitting Capacitors

**Small, light, strong:** Ideal for mobile RF transmitters. Most ratings take less space than mica types. Heavy metal lugs provide minimum contact resistance plus heat dissipation for higher power handling ability.

## Miniature Wafers

Smallest, high-stability capacitors from any source. With tab or wire leads for printed circuits. 1 to 10,000 uuf.

## Trimmer Capacitors

**Direct traverse:** Non-rotating cores for smooth, linear tuning. High Q. Low TC. No backlash. Only 0.4 to 0.6 *uuf* change per turn. Three designs: Standard, DT Mini-Trimmer for tight spaces. PDT for really tight spaces behind panel. 5 ratings to 1-30 *uuf*.

**Rotary:** Three models for high-frequency, tuned circuits. Standard to 12 *uufd*. Split bushing to 12 *uufd*. Precision to 4 *uufd*. Also custom designs.

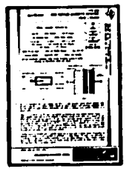
★ Type SCM units are lot sampled. Type SCM-E units are individually "burned in".

Military and Industry Standard Ratings and Case Sizes



Operating Temperature Range: −80°C to +85°C at rated voltage, +125°C at 2/3 rated voltage.
DC Leakage Limits (Initial): 0.04μa/μfv @ 25°C
0.4μa/μfv @ 85°C
0.5μa/μfv @ 125°C
Dissipation Factor: 6% maximum @ 25°C
Surge Voltage Rating: 130% of rated
TI Stability Test Specification:
★ *Each capacitor shall be operated for 250 hours at rated temperature and voltage prior to final acceptance and shipment.*
Dynamic DC Leakage Test:
Capacitors are tested at rated voltage and temperature for intermittent leakage instability (noise, scintillation, arcing, etc.)
Life Test:
Lot tested for 2000 hours at rated temperature and voltage.
Units meet or exceed MIL-C-55057 (Sig C) and/or MIL-C-21720A (Navy).
Reverse Voltage Capability
Hermetically sealed, corrosion resistant case
Solid electrolyte eliminates leakage and dehydration
High stability with respect to time and temperature permits maximum circuit design use.
Performance proved in exacting commercial, industrial, and military applications.

Complete specifications available upon request.

T.M.

micro-miniature

CERAMIC CAPACITORS

- Decimal dimensioned case
- Max. volumetric efficiency
- Contiguous flush-mount
- 47-10,000 mmf
- 200 vdc without derating
- −55°C to 150°C operation

"VK" capacitors are designed with square precision molded cases in only two sizes and a single standard 0.2" lead spacing for all values. Continuous life and environmental testing, plus 100% tests for Dissipation Factor, Insulation Resistance, and Capacitance guarantee that each "VK" capacitor in your circuit will perform as predicted.

ALSO UNCASED FOR COMPLETE ASSEMBLY ENCAPSULATION

Same electrical characteristics as standard "VK" series. Each unit coated with a resilient protective compound. Dimensions: 47-100 mmf, .100" square; 120-270 mmf, .130" square; 330-1000 mmf, .150" square; 1200-3300 mmf, .250" square; 3900-10,000 mmf, .265" square.

One Reliable Source for:

- High voltage capacitors to 120KV cataloged. Higher voltages available.
- Highly accurate polystyrene capacitors in 4 case styles.
- Small, compact, medium voltage capacitors 2KV to 50KV.
- Metallized Mylar* Capacitors, the smallest and most reliable in the low voltage range.
- Pulse forming networks . . . power and high REP rate type . . . 600 volts to 40KV.
- Miniature paper dielectric capacitors.
- High voltage power supplies: output: 500 to 75 KVDC. inputs: any voltage 60, 400, 1000 and more cps as well as 5 to 50 volts DC.
- Oil-filled, air-operated and the compact potted types are available.

COILS INDUCTORS

**MINIATURE COILS, EXACTLY AS YOU SPECIFY**

. . .manufactured on a production basis

We have the facilities to produce consistent quality miniature coils, components, and Luxolene molded fine wire coils on a production basis, and engineered to fit your exact specifications.

The Miniature Products Division was founded to furnish electrical and electronic manufacturers with bobbin wound miniature coils—molded fine wire coils—self supported coil assemblies—completed assemblies (plain or encapsulated)—molded inductors—printed circuit board assemblies, etc.

The facilities of the Miniature Products Division are especially designed and equipped to produce up to and including 56 gauge ultra-fine wire coils and other custom built components.

Luxolene encapsulated fine wire coils resist moisture, acids and abrasive conditions.

COMPLETE ENGINEERING SERVICE to assist you in the development of exactly the right coil for your particular application, starting at the design stage.

Endicott Coil has successfully supplied top quality coils to some of America's major industries for a decade . . . Made to exacting specifications . . . Continuously inspected in every stage of production . . . Competitively priced . . . Delivered on time in high production quantities and sample lots.

**Endicott Coil Co., Inc.**

# Encapsulated Inductances

Millen DESIGNED for APPLICATION encapsulated coils provide another advance in the r-f inductor field. Modern application requires miniature, heat and cold resistant, hermetically sealed, and abrasion resistant r-f inductor assemblies. The James Millen Manufacturing Company has pioneered many advances in the r-f inductor field, including the now standard 4-pi r-f choke, the axial lead r-f choke, and the miniature r-f choke. Developments have now made possible another advance, the No. 34301 and No. J301 encapsulated inductors—hermetically sealed—miniature size. Ambient temperature minus 55 degrees to plus 100 degrees C.

## NO. J301 MINIATURE ENCAPSULATED INDUCTANCES

DESIGNED for APPLICATION miniature inductances are: extremely small (see table at right)—hermetically sealed—wound on axial lead Carbonyl cores—color coded. Coils are available in EIA standard values plus 25, 50, 150, 250, 350, 500, and 2500 microhenries. Current rating 100 to 1450 milliamperes depending on coil size.

## NO. 34301 STANDARD ENCAPSULATED INDUCTANCES

Encapsulated DESIGNED for APPLICATION axial lead phenolic form r-f inductances. Hermetically sealed—heat resistant—abrasion proof—color coded. 0.15 to 2500 microhenries available in EIA standard values plus 25, 50, 150, 250, and 350 microhenries. Inductance ± 5%. Values available in same progression as J301 coils listed in the table at the right. Current rating 250 to 2800 milliamperes, depending on coil size. Ambient temperature range—minus 55 degrees to plus 100 degrees Centigrade. Size 3/16 inches diameter × 9/16 inches long to 3/8" × 3/8".

| COIL NUMBER | INDUCTANCE MICROHENRIES | DIAMETER INCHES | LENGTH INCHES |
|---|---|---|---|

# VARI-L ELECTRICALLY-VARIABLE INDUCTORS

The accepted means for non-mechanical control of inductance, reactance, and resonant frequency.

We have over seven years experience in this exclusive field. Let us assist you in the selection of a Vari-L unit suitable to your purpose.

**STANDARD VARI-L CONFIGURATIONS** illustrated here include approximately 30 tried-and-proven designs of broad utility. All are encapsulated and hermetically sealed, often meet customer requirements as is, and are carried in stock. Their characteristics are tabulated below. In addition we have tailored some 200 "specials" to exact and varied specifications, including subminiature and printed-circuit types.

Send us your specifications for evaluation without obligation.

*High Quality*
**TOROIDAL COILS and COMPONENTS**

Universal Toroidal Coil Winding Service comprises *custom design* and of production of inductors, transformers, magnetic amplifiers, oscillator coils, filters, potentiometer windings, etc. We specialize also in high frequency toroidal inductors and transformers, featuring extremely low distributed capacity and high coupling coefficient. Universal components are produced in open, encased, encapsulated, MIL-T-27A, or commercial construction.

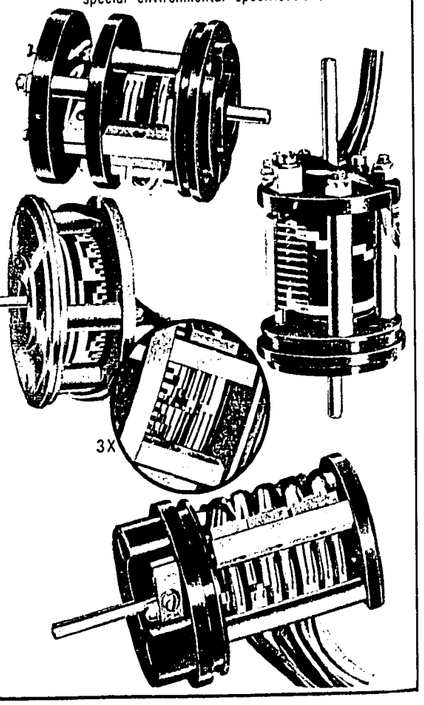
# Airflyte ELECTRONICS CO.

## SLIP RING ASSEMBLIES

## BRUSH BLOCK ASSEMBLIES



Shown here are just a few examples of our products. We invite your inquiry on the development and production to your specifications. Avail yourself of our engineering facilities to carry-through from design . . . to prototype . . . to mass production. Hundreds of stock molds eliminate tooling in most cases.

## COMMUTATING SWITCHES

**HIGH SPEED ROTARY SWITCHES FOR TELEMETERING, SAMPLING, PROGRAMING AND ANALOG-DIGITAL CONVERSION.**

Airflyte's production facilities are geared to produce standard and non-standard commutators at "off-the-shelf" prices. Featuring noise-free performance through the use of solid gold alloy commutating surfaces . . . and exclusive drum construction for maximum life, uniform wear and close angular tolerance. We will supply packaged units (as illustrated) or component commutators and/or brush blocks. All products designed to meet MIL-E 5272 and MIL-E 5400 and other special environmental specifications.

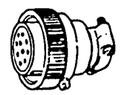
*27,000 CANNON PLUG DESIGNS*

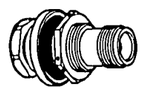
# FOR EVERY CONCEIVABLE APPLICATION

**AIRCRAFT AND ELECTRONIC INSTRUMENTATIONS—MS, MS-A, MS-B, MS-E, MS-R SERIES,** conforming to Specification MIL-C-5015D. Vibration-proof—Lightweight—Plugs are available with from 1 to 100 contacts. 15 different insert diameters and 260 contact layouts. 6 shell styles, MS 3100 to MS 3108 with all accessories. Environmental-Resisting MS-E and MS-R Series have interfacial sealing at mating faces and integral grommet seal at wire entry plus—grounding lugs and integral cable clamp.

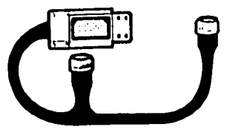
**GENERAL CIRCUITRY AND QUICK DISCONNECT—K, RK SERIES,** with special acme thread. The all-purpose series with eight insert diameters available. Conduit and cable clamp entry types. 1 to 110 contacts. 10, 15, 30, 40, 60, 80, 115 and 200 amp. silver plated contacts. High quality phenolic, melamine, and formica insulators. Cadmium-plated aluminum alloy shells.



**UNIT-PLUG-IN RACK/PANEL-DP, DPB, DPD, DPD2, DPD2R, DPJ, DPS SERIES,** available with from 2 to 180 contacts in rectangular inserts. With and without shells; coaxial and high voltage contacts. Permit quick disconnect, interchange, replacement, testing, and inspection of assemblies and sub-assemblies.



**AUDIO AND LOW-LEVEL CIRCUITS—P, XLR, XK, O, UA, BRS SERIES,** in many shell styles and insert layouts. Straight and 90° angles. Latch-lock types. Wall-mounting, panel, locknut mounting, and adapter receptacles, single and two-gang. 10 and 30 amp. contacts, coaxials.



**MINIATURE AND SUB-MINIATURE—D, US, DPA, DPX, AND K-MINIATURE SERIES,** designed for amplifiers, miniature indicators, computer circuits, telemetering equipment, and general instrumentation of limited space requirements. Variety of shell styles, junction shells, and insert arrangements. Available with from 2 to 50 contacts, plus coaxials.

**COAXIAL RF SERIES**—available in a wide range of Series and types from sub-miniature to large cable applications. New Cannon adapters available for use with latest cable developments. Cannon's latest RF Plugs include aluminum versions designed for use where weight-saving is a critical design criteria.

**GM AND PLUG HARNESS SYSTEMS**—Cannon produces a wide range of GM Plugs to fit specific missile applications, ranging from straight umbilical dis-connects to stage-separation dis-connects. Cannon also produces Plug Harness Systems featuring MS or other specified plugs and cables as one unit, available with various contact types and sizes. From 8 to 140 contacts. Highest quality and proven reliability. Varied remote disconnect methods actuated by hydraulic, pneumatic, explosive, or manual means.

**The Cannon Electric Company** also has available a wide variety of plugs for Battery-Power, Fire-wall, Watertight, Printed Circuit, and other applications, as well as "Kwik-Term" Terminals and DC Solenoids.
FOR ADDITIONAL INFORMATION on the typical designs illustrated . . . other configurations for your specific applications . . . or the design, engineering and manufacture to your special needs . . . write to Cannon Electric Company—3208 Humboldt Street, Los Angeles 31, California. Please refer to Dept. 425.

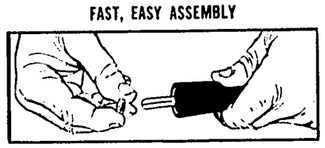
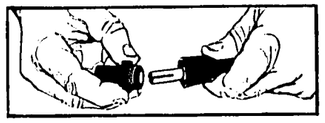
## SUPERCON®
*Electrical Connectors*



**25, 50, 100 AND 250 AMPERE TYPES**

**GOLD-PLATED BRASS PARTS**

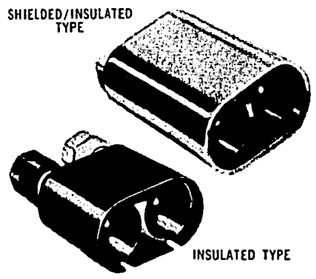


**NEW, POSITIVE-GRIP PLUG DESIGN**

**RED, WHITE, BLUE, YELLOW, BLACK AND GREEN CORROSION-RESISTANT NYLON**

**FAST, EASY ASSEMBLY**

After attaching the cable to the pin plug with the two fastening screws or by soldering, 50 and 100 ampere pin plugs are assembled by slipping the grip over the pin plug and tightening in place with the assembly nut.

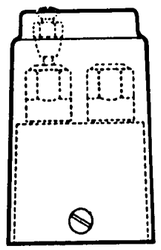


On 25 and 250 ampere pin plugs and all socket plugs, the grip is slipped over the cable and the cable is attached to the socket or pin plug with the screws or by soldering. The shield and grip are then easily screwed together securely.

After the panel hole is opened, the color-matched nylon receptacle cap and base are screwed together securely. Wiring is attached by lug, clip-lead, wrap-around or by soldering depending upon the load or individual requirements.

## DUB-L-PLUG
*Dual Electrical Connectors*

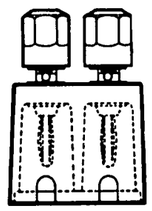
**SHIELDED/INSULATED AND INSULATED TYPES AVAILABLE**



**ALL CONDUCTING METAL PARTS GOLD-PLATED**

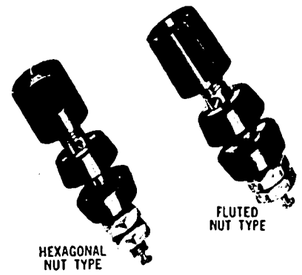
**NYLON BODIES ON INSULATED TYPES AVAILABLE IN 6 COLORS**

DUB-L-PLUG Dual Electrical Connectors are valuable accessories for making quick connections to SUPERIOR 5-WAY and similar binding posts mounted on 3/4" centers. Completely recessed integral banana plugs prevent accidental shorting. Captive black and white thumbnuts permit ready circuit and polarity identification. Wiring connections to insulated DUB-L-PLUGS can be made by center hole clamping, spade lug, cliplead, banana plug or looping and clamping.



### SHIELDED/INSULATED DUB-L-PLUG

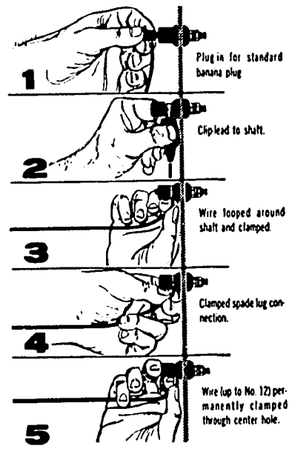
Used where protection from stray fields is desired as in high impedance testing. Supplied with sturdy die-cast chrome-plated case that can be removed if only insulated plug is needed. Has grounding banana plug that can be removed when used with 2-wire ungrounded circuits. Nylon body supplied in black only.



### INSULATED DUB-L-PLUG

Ideal for making rapid connections in power circuits and electronic and electrical applications where shielding is not required. All metal parts are recessed for maximum safety of user and equipment. Design permits stacking of several DUB-L-PLUGS if desired. Nylon bodies supplied in red, white, blue, yellow, green or black.

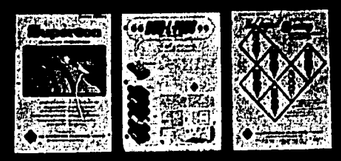
## SUPERIOR 5-WAY®
*Binding Posts*



**FIVE WAYS TO CONNECT**

**GOLD-PLATED BRASS PARTS**

**SIX COLORS AVAILABLE**



**FAST, EASY INSTALLATION**

These are the original SUPERIOR 5-WAY® Binding Posts and are the first choice of electrical and electronic equipment manufacturers. Their 30 amperes current capacity and 1000 volt working voltage satisfy a wide range of user requirements. Finely machined brass parts are gold-plated for long life, resistance to corrosion, stable electrical contact and faster soldering. Metal parts are recessed for protection of user and equipment. Offered with either hexagonal or fluted type thumbnut. Available in six colors for more attractive panels and easier circuit identification. Nylon plastic is compounded to meet military specification MIL-P-17091B. SUPERIOR 5-WAY Binding Posts with nickel-plated metal parts are available on special order. Can be mounted and securely locked in any panel from 1/6" to 1/4" thick. Adapter spacers are available for thinner panels. Complete insulation from the panel is provided.

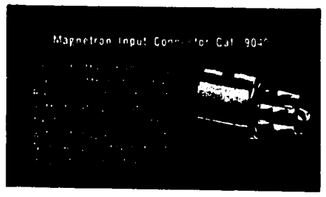
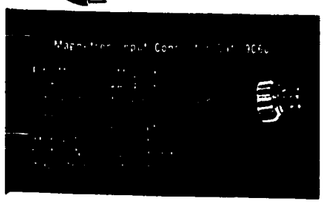
# MAGNETRON CONNECTORS
by jettron®



**Specify JETTRON for all types of magnetron connectors for vital military or commercial equipment. Complete facilities for the design and production of "specials" and other precision components including sockets and cable assemblies.**

**Magnetron Input Connector Cat. 9005-C**



**Fits 4J52A and similar Magnetrons. Features identical to Cat. 9000-C. In addition has 75 mil thick silicone insulated cables for higher potential applications. Made with 4700 $\mu\mu f$ built-in capacitor.**

**Magnetron Input Connector Cat. 9050**

**Fits Miniature Magnetrons such as L-3028B. Beryllium copper heater and cathode contacts assure dependable contact. Silicone cup fits snugly over magnetron input end. Leads insulated with silicone.**

**Call or write for bulletins on special sockets, magnetron and other connectors**

# CONNECTOR SYSTEMS FOR FLAT CONDUCTOR CABLE

T&B ENGINEERED

## POS-E-FLEX™ SYSTEM

Inter-Connect . . . Tap . . . Terminate flat multi-conductor cable in new or *old* equipment, with the T&B-Engineered Pos-E-Flex System. Designed for low-voltage, low-power commercial and house-wiring applications. One connector takes any conductor spacing in a given cable width —conductors *always* align perfectly. A complete line.

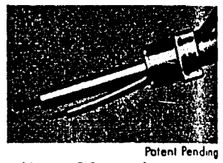
***Easy to install or disconnect***

No special tooling needed. Adapters available for connecting flat conductor cable to conventional wiring or plugging into new equipment. Provides direct cable-to-cable contact.

## POS-E-KON™ SYSTEM

patents pending

For military and other precision applications, basic connector is custom-adapted for any installation. Interconnect or terminate flat multi-conductor cable or flexible printed circuitry with this completely dependable, easily installed fitting. Designed to your requirements, the Pos-E-Kon Line is as versatile and extensive as your needs. Many standard items to choose from.

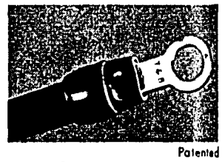


WRITE FOR COMPLETE INFORMATION TO T&B's POS-E-KON DIVISION.

## THE THOMAS & BETTS CO.
INCORPORATED

ELIZABETH, NEW JERSEY — IN CANADA, THOMAS & BETTS, LTD. MONTREAL

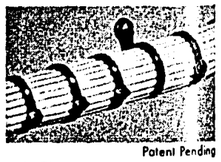
SOLD COAST TO COAST EXCLUSIVELY BY YOUR LOCAL T&B DISTRIBUTOR



# electronic product news

Patent Pending

## Grounding Sheath Connectors



For simply and effectively grounding braid of shielded or coaxial cable, this reliable T&B connector is now available with new duPont TEFLON Insulation for high temperature applications, as well as in standard materials. A complete line of connectors is available for standard and special applications.

Patented

## STA-KON® Terminals

For small wire terminating, T&B presents a full selection of terminal styles, sizes and tongue shapes — including the popular new quick-disconnect . . . and many aircraft type joints and splices. The exclusive T&B type of staking — by hand tool or high-speed machine — insures a dependable, sound installation.

Patent Pending

## TY-RAP™ Cable Ties and Straps

This new modern method for tying wire bundles and harnesses — or mounting electronic components — obsoletes the use of string, cord or tape by virtue of its extreme ease of application (tool or hand applied) and the resulting economies in time and dollars.

# IT'S A BREEZE

**Time Required to Attach Connector to the Cable Greatly Reduced with K-GRIP®**

***Plus all these other advantages***

1 Superior strength of connection. Both cable braid and dielectric are firmly held by K-Grip.
2 Uniformity of performance from unit to unit.
3 Ease of inspection or replacement in the field.
4 No highly skilled assembly personnel required.
5 Present inventories of connectors do not become obsolete.

ESCO ELECTRIC SPECIALTY COMPANY
Pioneers in Power

*Multi-output airborne MG set for gun turret drive.*

Conversions: AC-DC, DC to low or high voltage DC, AC or DC to specified frequency or special wave shapes, plus special combinations of all these on the same shaft. Precise Power Sets minimize cost, size, and maintenance—optimize performance and reliability.

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 135-240.

*New* PRECISION FREQUENCY

**STATIC INVERTER SUPPLY**

INPUT 28V D.C. ± 10%
OUTPUT *Nom.* 115V ± 2%
400 CPS ± 0.01%
1 Ø (2- or 3-phase output available)
RATINGS: 30VA 50VA 100VA
*Higher-ratings available.*

**APPLICATION:**
***For gyro wheel supplies and where precise 400 cycle voltages are required in aircraft, radar and missile computers.***

**FEATURES:**
*PRECISION OUTPUT FREQUENCY*
*RUGGED*
*EXCELLENT WAVEFORM*
*SIMPLICITY OF CIRCUITRY*
*FAST STARTING TIME*
*GOOD VOLTAGE REGULATION*
*throughout an adjustable range*
*ISOLATED CASE DESIGN*
*HIGH RELIABILITY*
*VIBRATION ISOLATED*
*COMPACT*
*LIGHTWEIGHT*
*MILITARY SPECIFICATIONS*

**You find facts faster with the IRE DIRECTORY**

**Because the product listings in the IRE DIRECTORY are logically arranged the way an engineer thinks, under three great major classifications that cover the entire radio-engineering field, you can find the product you want, and the names of the firms who make it, faster and more easily than in "terminology-index" types of listings. Advertisements are logically positioned near the product listings which describe them, to give you more information on the companies you'll want to deal with, and the easy-to-use Reader Service Card brings you quick additional data.**

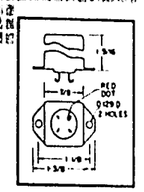
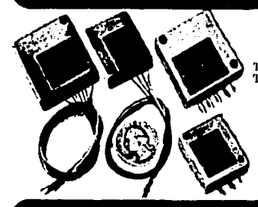
**MF TRANSISTORIZED ASSEMBLIES**



**FIXED FREQUENCY AUDIO TONE OSCILLATORS**

**RC Pretuned Sine Wave—Reliable and hermetically sealed.**



**Series 101, 102**—Standard frequencies from 100 cy. to 20 kc with any intermediate frequency available. Weight .35 grams; operating temperature, 25 to +55°C. Dimensions ⅝" sq. x 1-9/16". Volume 1½ cubic inches.

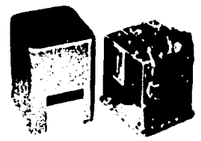
Uses: Include aircraft, space vehicle, portable equipment; in telemetry, tims circuits, bridge circuits and test equipment.
May be supplied with noval plug if desired.

0.5% TOLERANCE AVAILABLE ON SPECIAL ORDER

| Electrical Specifications: | Series 101 | Series 101A | Series 102 | Series 102A |
|---|---|---|---|---|
| Input Volts, nominal | 12 | 28 | 12 | 28 |
| Input Current, ma. | 7 | 7 | 7 | 7 |
| Output Frequency | as specified | | | |
| Initial Freq. Accuracy at 25°C (percent) | ±2½ | ±2½ | ± ½ | ± ½ |
| Freq. Drift, max., over combined conditions of voltage and temperature variations (percent) | ±2½ | ±2½ | ±1½ | ±1½ |
| Maximum Load to meet Drift spec. (kilohms) | 10 | 20 | 10 | 20 |
| Maximum Load (kilohms) | 1 | 2 | 1 | 2 |
| Output Impedance, Nom. (ohms) | 100 | 200 | 100 | 200 |
| Total Harmonic Signal Distortion, Typical (percent) | 1 | 1 | 1 | 1 |
| Output voltage, minimum, RMS | 1.0 | 2.0 | 1.0 | 2.0 |

**TRANSISTORIZED FLIP FLOPS & BINARY DIVIDERS**
Operating Temperature: −25 to +60° C.

**Group 1**—Microminiature Units, commercial, 1/5 cubic inch
Type 11—20 kc, 6 v. or 12 v. Type 11B—Binary Divider, 20 kc.
Type 11A—300 kc., 6 v. or 12 v. Type 11C—Binary Divider, 300 kc.



**Group 2**—Non-Military Units, in can, 1-1/16 x 1-1/4 x 1/2"
Type 21—30 kc, with two steering diodes and one reset diode. Both collector and base leads brought out.
Type 23—Same as Type 21 but 300 kc.
Type 24—130 kc., 12 v., using 2N78*s.
Type 26—Frequency Divider.
Type 27—Monostable Multivibrator.

**Group 3**—Military Units, designed to meet the specification of MIL-164000 Class 4.

**TRANSISTORIZED DC to AC INVERTERS**

These are Precision AC Power Supplies operating from battery voltages of 12 to 28 volts. All are controlled by isolated oscillators similar to Series 101/102, or by other internal frequency sources. Output is separated from oscillator by a power amplifier; power factor correction included where necessary.

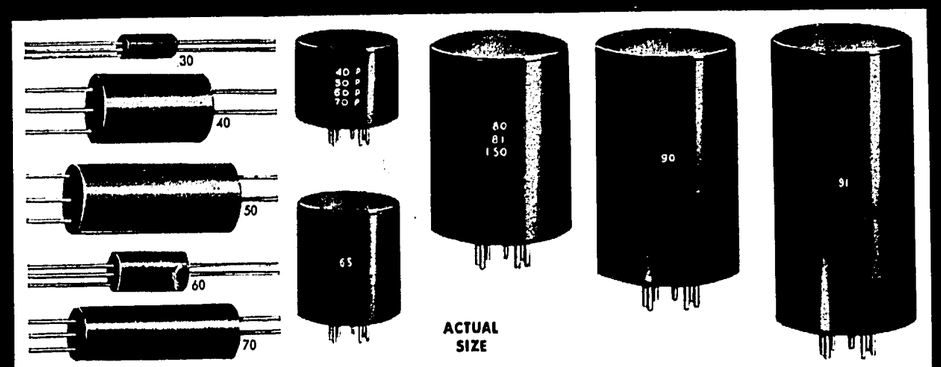
USES—Power Source for Synchronous Motors in Servo Systems
Power Source for Precision Recorders
Packaged for original equipment or for field and laboratory use.

**TRANSISTORIZED MICROMINIATURE MODULES**

Precision modules made up with whole components and printed wiring board. Units are encapsulated for protection against shock and humidity.

Size: 1/5 cubic inch
Weight: 9 grams

Typical stock types are Amplifiers, Multivibrators, Saw-tooth Generators, Flip-Flops, Binary Dividers, Oscillators.



Modifications or special units to your specifications.

MF Electronics Co. 122 East 25 St. New York 10, N. Y. GRamercy 3-5899

# THE MOST COMPREHENSIVE LINE OF SOLID STATE ELECTRONIC CHOPPERS

| | | | | | |
|---|---|---|---|---|---|
| microminiature | lightweight | low power | high speed | rugged | indefinitely long life |
| non-mechanical | inertialess | low level | high efficiency | linear | temperature stable |

The transistor chopper (or modulator) is a solidly encapsulated unit designed to alternately connect and disconnect a load from a signal source. It may also be used as a demodulator to convert an a.c. signal to d.c. It is capable of linearly switching or chopping voltages over a wide dynamic range which extends down to a fraction of a millivolt and up to 150 volts or more. Unlike mechanical choppers which can only be designated to operate over a narrow and comparatively low frequency range due to mechanical limitations, this transistorized chopper is an inertialess device that can be driven from d.c. to hundreds of kilocycles.

The switching circuitry used operates the transistors in a manner which provides stability and freedom from drift over a wide temperature range. Only carefully selected and matched transistors are utilized.

The Models 30, 40, 40P, 50, 50P, 60, 60P, 70 and 70P are direct-coupled so as to provide the circuit designer with the most basic chopper from which to synthesize solutions to special circuit problems. The Models 65 and 150 are transformer-coupled for isolation purposes. The Model 65 is for low-level voltages and the Model 150 for high-level signals. The Models 80, 81, 90 and 91 VIBRACHOPPERS are unique in the chopper field in that they require DC rather than AC drive.

These units are practically immune to the effects of shock and vibration making them ideal for military, space vehicle and portable applications; or where power conservation, miniaturization and elimination of maintenance are a necessity. The transistor chopper has an inherently long life and is not subject to contact bounce, wear, pitting or burning.

## CHOPPER MODEL SPECIFICATIONS

| Model | Type | Max. Signal Voltage (Volts) | Max. Signal Current (MA) | Drive Frequency Range | Max. Drive Voltage (600Ω Source) (Volts) | Drive Input Impedance (Ohms) | Ambient Temp. Range (°C) | Size (Inches) | Weight (Grams) | Remarks |
|---|---|---|---|---|---|---|---|---|---|---|
| 30 | Ge | ±10 | 10 | DC to 100 kcps | 25 pk-pk | 200 | −55 to +90 | .38 X .16 Dia. | ½ | Micro-Min Hi-Freq |
| 40 | Si | ±20 | 40 | DC to 50 kcps | 40 pk-pk | 2K | −55 to +150 | .7 X .44 Dia. | 2 | Sub-Min Hi-Temp |

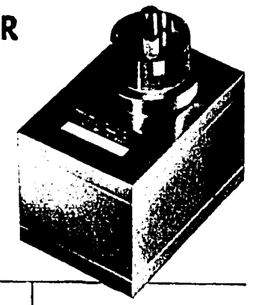
## DC-AC CHOPPERS

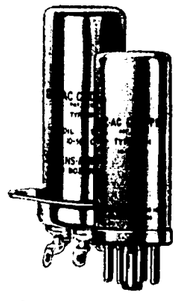


**For 50/60/94/120 Cycle Use**

There are twenty-two miniature types, both single and double pole, built to rigid commercial specifications with the emphasis on long life, low noise level, and extreme reliability. Please write for Catalog 515.

## MICROVOLT MODULATORS

### VIBRATING CAPACITOR



A vibrating-reed type capacitance modulator used to measure currents as low as $10^{-16}$ amperes. Drift never exceeds ±0.2 millivolts per day, noncumulative. Thus it is ideal where stable performance without recalibration is required for periods of a month or more. Write for Catalog 523.

### ULTRA HIGH SPEED RELAYS

Operating time 200 microseconds. Mount in any position. Will cover the range of −65°C to +85°C factory sealed. Please write for Catalog 337.

### 0-500 CYCLE DC-AC CHOPPERS

Liberal factors of safety. Before any Chopper is shipped, it is tested twice over the range of −65°C to +85°C to give double proof of stamina. Please write for Catalog 280.

### RESONANT RELAYS

Permit remote control by radio or carrier through frequency discrimination. Relays operate only when energized at rated frequencies and reject all others. Please write for Catalog 335.

MAGNETICS inc.®

# PERFORMANCE-GUARANTEED PRODUCTS

## TAPE WOUND CORES

Magnetics, Inc. offers high permeability tape wound cores with guaranteed maximum and minimum performance limits. Made from Orthonol*, Hy Mu-80* (square loop and high initial permeability), or 48 Alloy, cores are dry hydrogen annealed to meet a wide range of performance specifications. These cores are available immediately from stock.

*For complete details:* **Write for Catalog TWC-200**

**TAPE WOUND SILICON (Magnesil) CORES** are available in 2, 4 or 12 mil gauges for use in current transformers, magnetic amplifiers, saturable reactors and other applications. Available cased or uncased.

*Write for complete details.*

**TAPE WOUND BOBBIN CORES,** capped with tough glass polyester (Poly Cap), offer permanent seal, do not distort with temperature, yet allow normal potting techniques. Available in stainless steel or ceramic bobbins, in all catalog sizes.

*For complete details:* **Write for Bulletin BC-203**

**Hy Mu-80, reg. trademark of The Carpenter Steel Co.*

## MOLYBDENUM PERMALLOY POWDER CORES

Magnetics, Inc. guarantees practical inductance limits for both stabilized and non-stabilized powder cores. Available with standard baked enamel and wax-tight finishes; cores can be numerically coded within the guaranteed inductance limits at slight extra cost. Furnished in eight standard sizes, with outside diameters from .500-in. to 1.570-in.; and inside diameters from .300-in. to .950-in.

*For complete details:* **Write for Bulletin PC-203**

**160 MU MOLY-PERMALLOY POWDER CORES,** for audio filter low frequency applications, gives circuit designers advantages of higher inductance, higher Q, and miniaturization.

*For complete details:* **Write for Bulletin 160-mu**

**LINEAR PERMALLOY POWDER CORES** offer low-cost frequency stability over wide temperature range. Used with polystyrene capacitor, core produces frequency stability on order of 0.5% for temperature swings between −55°C and +85°C at half the cost of previous techniques.

*For complete details:* **Write for Bulletin LPC**

## MAGNETIC LAMINATIONS

Available in Orthonol*, Hy Mu-80 and 48 Alloy in 29 standard shapes for every application. Standard gauges are 0.014-in. and 0.006-in. Laminations are dry hydrogen annealed to meet specifications. Special shapes can be produced to fit specific needs including rotor, stator, and recording head laminations using customer-owned dies.

*For complete details:* **Write Applications Engr. Dept.**

## MAGNETIC SHIELDS

Made from Mu Metal, 48 Alloy, or from other commercially available magnetic and non-magnetic materials, dependent on your application.

*For complete details:* **Write Applications Engr. Dept.**

## ORTHO-SIL® WOUND CORES

● "C" CORES ● THREE PHASE CORES
● TOROIDAL CORES

**THOMAS & SKINNER OFFER A FULL RANGE OF STANDARD AND SPECIAL DESIGNS**

Ortho-Sil® Wound Cores are available in gauges 1, 2, 4, and 12 mil oriented silicon steel. We invite your inquiry on special designs. ORTHO-SIL®—T&S registered name for oriented silicon steel.

**WRITE:** Send for complete information on our special insulation coating "EPON-CLAD"—plus Ortho-Sil® Wound Core catalog and prices.

## Powdered Iron Toroids

**APPLICATIONS**

**High Q circuits for**
a Transformers — I.F., etc.
b Precision filters
c Delay lines
d Linear Networks

**TOROIDAL FEATURES**

1 Reduces stray fields and proximity effects to obtain better stability.
2 Permits small coil construction
3 Higher effective permeability
4 Coupling not affected by tuning circuit
5 High stability with temperature and time
6 Low harmonic distortion
7 Improved insulation results in high Q
8 Manufacturing methods permit close control of permeability and Q
9 Finishes of tough thermosetting resins minimizes moisture absorption and provides insulation suitable for winding enameled wire directly on the core.

**CORE SIZES**

Cores are available in diameters from 9/32 OD to 2" OD.
Permeability: From 8 to 45
Recommended frequencies:
Materials are available which will provide good Q from 0.1 to 25 MC

*Write for samples and further information.*

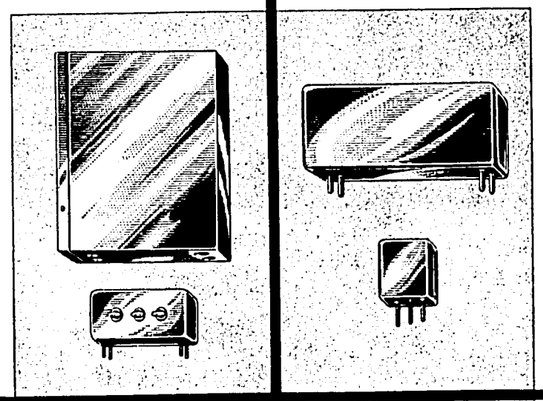
BULOVA

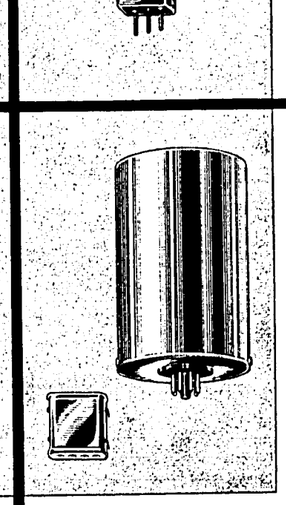


## SYNONYM FOR QUALITY, RELIABILITY AND STABILITY!

### Frequency control SYSTEMS AND OSCILLATORS .3 cps to 100 mc

Bulova frequency control systems and oscillators are custom-engineered for the most exacting military and industrial applications.

Bulova systems and oscillators span the frequency range from .3 cps to 100 mc and in stability ± 15 pp million without oven to ± 1 pp $10^9$ with proportional oven control ...are available in either tube type or transistor construction.



They graduate in size from the MB-100 (1" x 1" x 2") to complete systems. The MB-100 compensated crystal oscillator assures single frequency output with a stability of ± 15 pp million from −50° C. to +90° C. without oven control. Complete systems may include power supply, oscillator, gated and resetting circuitry, binary stage, voltage regulator and pulse or power amplifiers

### Crystal FILTERS 7 kc to 20 mc

Bulova crystal filters are designed to solve filtering problems at center frequencies with bandwidths of 0.01% to 8% and slope factors of 60/6 db as steep as 1.4 to 1.

Bulova filters shave the frequency range from 7 kc to 20 mc, inclusive ...are available as bandpass, reject and single side band. They graduate in size from the 2E2 SM (1 7/16" x 1 1/16" x 1⅛") for frequencies of 175 kc through 20 mc to the OE6 (5½" x 3¼" x 3¾₄"), a single side band for frequencies of 7 kc through 500 kc.

### CRYSTALS 2 kc to 100 mc

Bulova crystals are designed and produced for use wherever reliable, close-frequency control is essential.

Bulova crystals assure exacting control from 2 kc through 100 mc with 100 g shock resistance and 30 g to 2000 cps vibration resistance in most frequencies. They graduate in size from the HC-13/U (1 1/32" x 2 3/32" x 3") for 2 kc to the HC-18/U (.50" x .400" x .510") for 100 mc. The HC-18/U is now available to cover 450 kc through 1100 kc and 2 mc through 100 mc.

The majority of Bulova MIL Type crystals may be obtained in miniature holders.

### OVENS

Bulova ovens are engineered to maintain ±.1° C. of operating temperatures so as to assure superior results in electrical stability of crystals, components and circuitry.

Bulova ovens graduate from the AM-100ED (external measurements: 3" diameter with a 7" maximum height; internal: 1.96" diameter with a 6" height) to the BHC-18-1 (external: 1 3/32" x 1 3/32" x 1¼"; internal 1 3/32" x ½" x 7/32"). The AM-100 maintains a temperature stability of ± .1° C. and is used for Bulova Type 74 glass crystal holders (Military Type HC-15/U), or complete systems. The BHC-18-1 holds temperature to ± 2° C. (−55° to +90° C. ambient) and has a capacity for a single HC-18/U plug-in type crystal holder or four crystal diodes, such as the IN658.

Complete information on all Bulova components and systems is available from your nearest Sales Representative, or by writing – *Department A-1376, Electronics Division, Bulova, 61-10 Woodside Ave., Woodside 77, New York.*

# FROM CRYSTALS TO "BLACK BOXES" HEEMCO OFFERS 3-SIGMA RELIABILITY

The 3-sigma reliability for which Heemco products have long been recognized is available not only in crystals, but in filters and frequency sources as well as all types of associated circuitry and "black boxes".

## CRYSTALS

Heemco crystal units, both standard and high vibration types, are available from 400 cps up, to fill a wide variety of commercial and military requirements.

## FREQUENCY SOURCES

From standard designs, Hill Electronics custom designs and manufactures frequency sources to your particular requirements. Frequencies range from less than 1 cps to above 100 mc. Sizes range from ¾"x¾"x1½".

Specifications for a typical standard unit are:

FREQUENCY: from 150 cps up
OPERATING TEMPERATURE: −65 to +125°C
FREQUENCY ACCURACY: ±.001%
VIBRATION: 5 to 2000 cps at 20g
SHOCK: 100g
SIZE: 2"x2"x4"

ONE OF HILL ELECTRONIC'S RECENT DEVELOPMENTS IS A 3-PHASE FREQUENCY SOURCE, SPECIFICATIONS FOR WHICH ARE AVAILABLE UPON REQUEST.

## FILTERS

**A. CRYSTAL BANDPASS FILTERS**

Center frequency: 400 cps to 30 mc
Band Width: .01% to 13% of center frequency
Selectivity: Ratio of 60db to 6db band widths as steep as 1.4:1
Insertion loss: Usually less than 6db for wide band filters and less than 3db for narrow band filters
Wide Impedance Range
Attenuation: As much as 80db
Passband Variation: ± ½db

**B. SINGLE SIDE BAND CRYSTAL FILTERS**

Center frequency: 400 cps to 30 mc
Band Width: .6% to 10% of center frequency
Steep Side Slope: As steep as 1.0026:1
Wide Impedance Range
Attenuation on steep side: As much as 60db
Passband Variation: ±1db

**C. CRYSTAL NOTCH FILTERS**

Center frequency: 400 cps to 30 mc
Band Width at 6db: .01% to .8% of center frequency
Insertion loss: Usually less than 3db
Attenuation in the notch: As high as 60db
Passband Variation: Less ±1db

**D. CRYSTAL DISCRIMINATORS**

Center frequency: 400 cps to 30 mc
Band Width (peak to peak): .01% to 10% of center frequency
Wide Impedance Range
Output Voltage: Up to 20 volts peak to peak

**E. "COMB" SETS**

Because of rigid quality controls and long experience in the design and manufacture of our own crystals, we have been particularly successful in production of "comb" sets.

*Hill Electronics specializes in the design and manufacture of "black boxes" which utilize frequency sources and/or filters.*

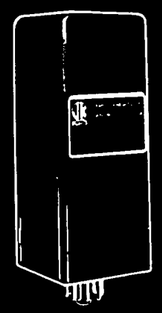
## J K SULZER FREQUENCY STANDARDS



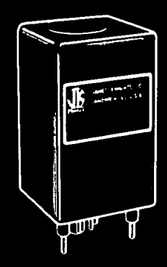
**Fully-transistorized FS-1100T Frequency Standard:** Normal output is 1.0 mc. and 100 kc. simultaneously with 1 volt available to 50 ohm loads. Provides minimum stability of $5 \times 10^{-10}$ per day after initial aging. Features double proportional control oven.

**Companion FS-1100TP Power Supply:** Operates on 115 V. AC. Features internal nickel-cadmium battery for stand-by power up to 12 hours. Permits transport of operating unit.

**Supplemental FS-1100TD Frequency Divider:** All sub-harmonics commonly used — 1000 cycles, 400 cycles, 60 cycles — have same order of stability, $5 \times 10^{-10}$ per day or better. Frequencies as low as 1 pulse per second available.

**Time-proven FS-1000 Frequency Standard: (not shown):** 1 mc. tube type precision frequency standard for 100 volt AC operation. Stability of $1 \times 10^{-9}$ per day or better. Optional divider and multiplier outputs available. Ideal for laboratory uses.

## J K OSCILLATORS



**Compact, precision plug-in signal sources. 60 cps through 75 mc. Sine and square wave outputs. Stabilities $1 \times 10^{-7}$/Day to $1 \times 10^{-4}$/Day. Silicon transistors.**

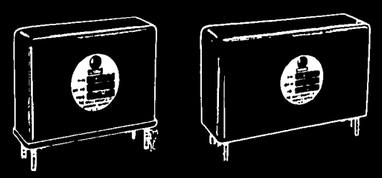
**JKTO-PIP:** For frequency stability of 1 part in 100 million per day under normal conditions. Transistorized proportional control oven hermetically-sealed, shock and vibration resistant. Other frequencies available on special order.

**JKTO-PIA:** Meets applicable aircraft equipment specifications with maximum frequency deviation of $4 \times 10^{-7}$. Long-life oven. Hermetically-sealed.

**JKTO-9:** Popular, compact, general-use, wide-range oscillator.

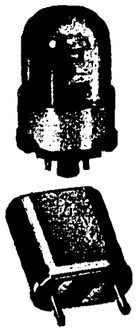
## J K THERMYSTALS

**Precision-matched crystal and oven combination:** Maximum stability, accurate calibration and high "Q". Type JKO23T: Frequency range 50 kc to 400 kc with stability of 1 PPM. Frequency range 950 kc to 1200 kc with stability of $1 \times 10^{-7}$. Other models available.



## J K OVENS

**Versatile, precise, compact:** Available with snap-action or glass-sealed thermostats, or proportional control, depending on application. Wide range of sizes and shapes for virtually any requirement.



## FREQUENCY MANAGEMENT

## CERTIFIED PERFORMANCE

## J K CRYSTAL FILTERS

**Compact, rugged, hermetically-sealed and stable:** Frequency Range 1 kc to 40 mc available to 150 mc. Band widths as narrow as .01% up to as high as 10% for certain frequencies.

## J K CRYSTALS

**Precision Glasline Crystals:** From 1 kc. to 150 mc. Designs for frequency standards available at 1 mc. to 5 mc. (with stabilities of $1 \times 10^{9}$) and at 100 kc. (with stability of $1 \times 10^{8}$).

**Military Crystals:** Meet all requirements outlined in specifications — MIL-C-3098B, MIL-C-16C, MIL-C-17167, etc.

**Standard Crystals:** Manufactured to a variety of specifications. Used as replacement crystals and as original equipment components.

**Amateur and Citizens' Band Crystals:** For transmitters, receivers, calibrators, etc.

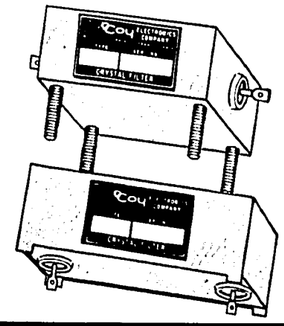
## ALL-GLASS CRYSTAL UNITS



Shown Actual Size

HC-18/U type. Meet new CR-73/U and CR-74/U specs. Available 5000 kc to 200.0 mc.

## CRYSTAL FILTERS

Band pass types from 1.0 mc to 30.0 mc center frequency with 6 db band widths of 0.01% to 4.0% of center frequency. Single side band types from 1.0 mc to 20.0 mc frequency with 3 db bandwidths from 1.0 kc to 10.0 kc.

Write for free illustrated catalog

*Regardless of size, weight or shape McCoy crystals and filters will deliver the utmost in stability under extreme conditions of shock and vibration. Our research section will be pleased to assist you.*

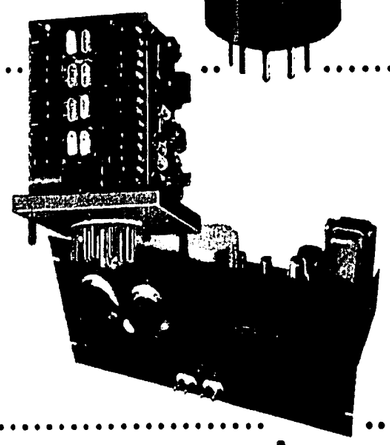
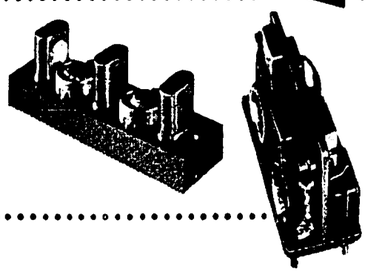
REEVES-HOFFMAN

# CRYSTALS, FREQUENCY SOURCES, FILTERS, OVENS



## CRYSTALS

STANDARD TYPES of Reeves-Hoffman crystals, for all commercial and military applications, are available in a frequency range from 1 kc to 100 mc. Hermetically sealed in metal holders.



PRECISION TYPES of Reeves-Hoffman crystals, for use in high precision oscillators and secondary frequency standards, are available in a frequency range from 1 kc to 5 mc. Hermetically sealed in glass holders with standard radio tube bases.

## FREQUENCY SOURCES

TRANSISTORIZED AND HARD TUBE TYPES of Reeves-Hoffman frequency sources are available in a frequency range from 100 cps to 100 mc. Stability is up to 1 part in $10^7$. Packaged to your specifications.

PRECISION FREQUENCY STANDARDS have a basic frequency of 5 mc and are available with auxiliary circuitry for division to 100 kc, 1 mc and 10 mc. Stability is up to 1 part in $10^9$ per day. Packaged to your specifications.

## FILTERS

CRYSTAL OR LC TYPES of Reeves-Hoffman filters are available in a frequency range from audio to 30 mc.

## OVENS

OVENS for precise temperature control are available in three types:

PROPORTIONAL CONTROLLED, for precise frequency standards, hold within 1/100th of 1° C at any fixed ambient.

THERMOSTATICALLY CONTROLLED, for high reliability requirements, hold within 1/10 of 1° C at any fixed ambient.

SNAP-ACTION CONTROLLED, for rugged military requirements, hold within 1° C at any fixed ambient.

**Compact, rugged and highly reliable Reeves-Hoffman components are available in standard types or will be designed and manufactured to your specifications. Most units can be designed to withstand up to 10 g at 5 to 2000 cps. Write for complete details.**

# FOREMOST IN DELAY LINES

## Columbia Technical CORPORATION

Faster rise time, lower attenuation, smaller volume, greater stability, rugged construction, reliable performance . . . these are some of the characteristics distinguishing COLUMBIA Delay Lines from conventional delay elements.

COLUMBIA offers you two products: Delay Lines of the **highest quality** and **service. And we mean SERVICE:** assistance in determining your exact delay requirements; engineering advice on the delay line kind best suited to meet your needs most economically; custom design of delay elements; manufacture of prototypes — usually in a matter of a few days, reliable and fast delivery on production runs.

Through the years COLUMBIA has designed and manufactured thousands of different delay lines. Some of our more important delay line types are listed here. Please write for additional literature which is available for many types.

**Write for Bulletin No. 18 — "How to Use Delay Lines Efficiently."**

## Q-LINES *

Lumped-constant delay lines with high Q factor. Q represents the ratio of total delay to rise time, and denotes the quality of the delay line. COLUMBIA Q-Lines with delay-to-rise time ratios of up to 100:1 are in regular production.

Depending on specific requirements COLUMBIA lumped-constant delay lines are engineered for maximum Q, lowest attenuation or smallest volume. Many Q-Line types represent an optimum combination of electrical characteristics, small volume and outstanding environmental properties. Several hundred designs are available — the chart lists a few typical examples.

Write for Bulletin D40 — "Q-Lines".

*T.M. Reg. Applied For

| Type | Imped. Ohms | Delay μsec | Q | Atten. db | Size Inch , | Remarks |
|---|---|---|---|---|---|---|
| L773C | 75 | 6.0 | 34 | 1.5 | 2⅛x2¼x2¾ | Med. Q-factor. Low atten. |
| L734C | 100 | 1.0 | 10 | 0.2 | 1⁹/₁₆x1⁹/₁₆x2½ | Small volume. Low atten. |
| L655C | 150 | 0.3 | 15 | 0.5 | 1⁹/₁₆x1⁹/₁₆x3 | Small volume |
| L748C | 470 | 6.5 | 50 | 1.5 | 3x6x2¹⁵/₁₆ | Med. Q-factor. Mult. taps. Low atten. |
| L759C | 470 | 20.25 | 100 | 1.5 | 5¼x5½x3⅞ | High Q-factor. Low atten. |
| L694C | 1000 | 1.0 | 13 | 0.75 | 1x1x3 | Extremely small volume. Low atten. |
| L673C | 1000 | 9.0 | 16 | 0.6 | 1⁹/₁₆x1⁹/₁₆x3 | Small volume. Low atten. |
| L691C | 2000 | 50.0 | 27 | 2.0 | 1⅝x1⅞x3¾ | Med. Q-factor. Small vol. Low atten. |
| L784C | 2000 | 19.85 | 40 | 2.0 | 3⅜x4½x2¼ | Med. Q-factor. Low atten. |
| L771C | 2200 | 4.0 | 33.4 | 1.0 | 1⅝x1⅞x3¾ | Med. Q-factor. Low atten. Small vol. |

## MINILINES *

These miniaturized delay elements are completely resin-encapsulated and combine in a minimum volume excellent electrical characteristics with extreme mechanical strength.

MiniLines are designed for operation within a temperature range from —55°C to +125°C and are characterized by unusual electrical stability. Because of their small volume and constancy of properties MiniLines are widely used in computer applications.

Write for Bulletin No. 78 "MiniLines—Miniaturized Delay Lines". Typical examples of MiniLine types are listed in the charts below.

**Type A — 0.250 inch O.D.**

| Model No. | Imped. (ohms) | Delay (μsec) | Length (in.) | Rise Time (μsec) | Pulse att. (db) | Bandwidth (mc) |
|---|---|---|---|---|---|---|
| 550 | 560 | 0.20 | 3¼ | 0.04 | 0.5 | 12 |
| | | 0.10 | 2 | | | |
| 551 | 1000 | 0.30 | 3¼ | 0.04 | 1.0 | 12 |
| | | 0.20 | 2½ | | | |
| | | 0.10 | 1⅝ | | | |
| 552 | 1500 | 0.20 | 3¼ | 0.04 | 0.5 | 12 |
| | | 0.10 | 2 | | | |
| 553 | 2000 | 0.20 | 3¼ | 0.04 | 0.5 | 12 |
| | | 0.10 | 2 | | | |

**Type B — 0.300 inch O.D.**

| | | | | | | |
|---|---|---|---|---|---|---|
| 554 | 560 | 0.50 | 5½ | 0.08 | 1.3 | 10 |
| | | 0.40 | 4¾ | | | |
| | | 0.30 | 3¾ | | | |
| 555 | 1000 | 1.00 | 5½ | 0.10 | 1.2 | 5 |
| | | 0.80 | 4¾ | | | |
| | | 0.60 | 3¾ | | | |
| | | 0.40 | 2¾ | | | |
| 556 | 1500 | 0.80 | 5½ | 0.09 | 0.8 | 5 |
| | | 0.60 | 4½ | | | |
| | | 0.40 | 3½ | | | |
| 557 | 2000 | 0.80 | 5½ | 0.09 | 0.7 | 5 |
| | | 0.60 | 4½ | | | |
| | | 0.40 | 3½ | | | |

## MAGNETIC-CORE DELAY CABLE

—a proven COLUMBIA standby! Here is economical delay by-the-foot and off-the-shelf! Ideal for breadboard and prototype work. Five high-impedance delay cable types are available, ranging from fast rise time Type HH-1500A to compact type HH-4000. Delay-to-rise time ratios of up to 100 : 1 can be achieved with HH-1500A and HH-2000 delay cables.

Ready-to-mount calibrated sections of Magnetic-Core Delay Cable are available with molded end-caps and tinned leads. Phenolic endcaps can be furnished for terminating the cable in the laboratory.

Delay cables are available from stock in 100 ft. coils. Custom made calibrated sections can be promptly furnished.

Write for Bulletin No. 17 — "High-Impedance Delay Lines with Magnetic Core".

| Type | Imped. ohms | Delay μsec/ft. | B-width (3 db down) mc † | DC-resist. ohms/μsec | Insert. loss db/μsec | Max. Oper. V DC | O.D. Inch | Wt. Lbs./Ft. | Min. Bend. Rad. |
|---|---|---|---|---|---|---|---|---|---|
| HH-1500A RG-266/U | 1500 | 0.08 | 15 | 30 | 0.20 | 5000 | 0.40 | 0.12 | 2" |
| HH-1600 | 1700 | 1.0 | 6 | 80 | 0.40 | 300 | 0.28 | 0.07 | 3" |
| HH-2000 RG-176/U | 2200 | 0.11 | 15 | 70 | 0.25 | 5000 | 0.40 | 0.12 | 2" |
| HH-2500 | 3000 | 0.60 | 8 | 125 | 0.30 | 500 | 0.28 | 0.07 | 3" |
| HH-4000 | 3900 | 1.0 | 6 | 85 | 0.20 | 1000 | 0.32 | 0.09 | 4" |

**NOTE**—Temperature range of all types — 40°C to +85°C.
†Bandwidth measured for a delay of 1 usec with resistive terminations.

## DELAY-LINE FLATS *

. . . Another Columbia development! Through the choice of an elliptical core a combination of unusual electrical and mechanical properties can be achieved. The "Flat" design makes it possible to produce with one standardized 5" long core delay lines with delays up to 1.0 microsecond per inch, and to cover a wide impedance range from 100 to 10,000 ohms.

Write for Bulletin No. 29 "Delay-Line Flats". Many hundreds of "Flat" designs are available. The chart below summarizes the characteristics of some typical units.

| Design No. | Imped. (ohms) | Delay (μsec) | Rise Time (μsec) | Atten. (db) |
|---|---|---|---|---|
| 169 | 120 | 0.1 | 0.02 | 0.1 |
| 486 | 2000 | 1.5 | 0.15 | 1.2 |
| 618 | 2500 | 5.0 | 0.80 | 3.0 |
| 560 | 3300 | 2.0 | 0.20 | 1.0 |
| 413 | 7500 | 2.0 | 0.25 | 0.6 |

## AUDIO DELAY LINES

Precision engineered and custom-manufactured lumped-constant delay elements designed for use in the audio frequency range, characterized by long delays (often in the 5,000 to 10,000 microsecond range), low attenuation (e.g., 3 db at mid-frequency point), and excellent phase linearity (±1% over entire useful frequency range). Housed in standard EIA (RETMA) cabinets suitable for rack mounting.

Write for Bulletin D10.

## HUMISEAL * Protective Coatings for Electronic Applications

HumiSeal coatings protect electronic components and assemblies from temperature extremes, humidity, fungus attack, dust, saline atmosphere and other environmental stresses. The table below lists our standard types.

| TEMP. CLASS. | TYPE | SYSTEM DESCRIPTION |
|---|---|---|
| Class O 95°C | 1A14 | Single comp., air drying, solderable acrylic base. |
| | 1A11 | Single comp, fast air drying, flux type, solderable. |
| Class A 105°C | 2A51 | Solvent-free, two-comp., modified epoxy base. |
| | 1A27 | Single comp., fast air drying, solderable, polyurethane base, |
| Class B 130°C | 1B12 | Single comp., fast air drying, solderable, all-purpose. |
| | 2B13 | Two-comp. coating of superior mech., chem. and elect. properties, |
| | 2B52 | Solvent-free, two-comp., modified epoxy base. |
| Class F 155°C | 1F18 | Single comp., fast air drying, all-purpose acrylic base. |
| Class H 180°C | 2H55 | Solvent-free, two-comp., high temp. resistant. |
| | 1H34 | Single comp., fast air drying, high temp. resistant. |

**Bulletins C99 — "HumiSeal Protective Coatings" and #79 — "How to Use Protective Coatings" are available on request.**

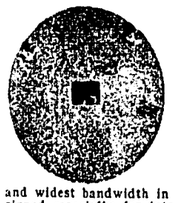
## New High Power Pulsed Oscillator PG-650-C

The successful introduction of the PG-650 pulsed oscillator to many test applications has led to an improved model of interest to workers in utrasonics, r.f. transient analysis, nuclear magnetic resonance, Kerr Cells, etc. The following characteristics and features are available only with the PG-650-C.



R.F. output Voltage (Min.)
into 93 ohms .....0—300 p to p
into 27 K .....2000v p to p
Pulse length
continuously variable ..... .....1½—15 usec
Rise and Fall times (Max.) .....0.5 usec
Pulse Droop .....5% Max.
Noise Output between
Pulses .....Thermal Noise from Termination
Harmonic Content (Max.) mostly 3rd .....10%
R.F. Leakage ..... ....Negligible
Trigger to Pulse Jitter .....005 usec

SPECIAL FEATURES

Pulse Lengths Available from ½ to 50 usec.
Internal Delay Ranges available from calibrated Helipot .....200, 1100, 11,000 usec
Gate Pulse output available for intensifying and blanking purposes.
External modulation of r.f. oscillator using varying pulse length and p.r.f.'s for Carr-Purcell Method.
Fine controls of P.R.F., Pulse length, and delay times.

*Usable as C.W. Oscillator or Pulsed Amplifier.*
*Range can be extended from 100 KC to 150 MC.*

## ULTRASONIC DELAY LINES

Advanced designs in solid delay lines has been the feature of ARULAB products. This organization has always been the leader in a highly competitive field in improving the performance in all respects. The model shown has the lowest secondary level and widest bandwidth in history and was designed especially for integration applications.

SPECIFICATIONS:

Delay time .....900 usec
Average Max. Secondary level .....70 db
Triple Travel level .....60 db
Bandwidth for Operation .....10 MC
Center Frequency .....40 MC
3 db Bandwidth .....20 MC
Size .....14½" diam. x 1"

## Model "C" Miniaturized Line

The Model "C" series delay lines were developed to reduce the weight and cost of the longer delays needed for radar applications. These units represent a 20% reduction in diameter and 40% in weight over older models. Typical Specifications:

Delay time .....1500 usec
Center Frequency .....32 MC
Bandwidth 3 db .....20 MC
Insertion Loss (50 ohms) .....60 db
Capacity .....100 uufd
Max. Secondary level—5 MC-BW .....43 db
Max. Secondary level—20 MC-BW .....40 db
Aluminum Case .....8¼" diam. x 7⅞"
Weight .....2 lbs.-14 oz.

Please write for our bulletins on other test equipment: Wide Band Amplifiers, Preamplifiers, and Precision Attenuators.

## ELECTRICALLY VARIABLE DELAY LINES

A unique General Electric product, *Electrically Variable Delay Lines* are suitable for general signal processing applications and as modulating devices for FM communications equipment. Highly adaptable to transistorized circuitry, EVDL's can be produced within a wide range of operating characteristics to give delays up to 12 microseconds. Tailored to defense electronics equipment, the EVDL will withstand extreme humidity, shock and vibration. 227-24

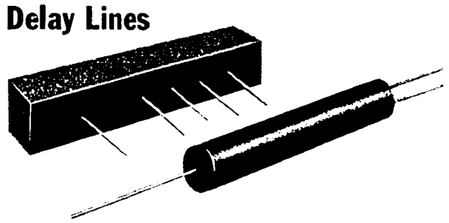
# ESC World Leader in Custom-Built Delay Lines

- **First** in sales
- **First** company devoted exclusively to the manufacture of custom-built and stock delay lines
- **First** in research, design and development of custom-built delay lines, variable delay lines and continuously variable delay lines.

## LUMPED CONSTANT Delay Lines

**Standard LC Series**

This series has delay time/rise time ratios from 10 to 30 for delays of .25 usec. to 50 usec.

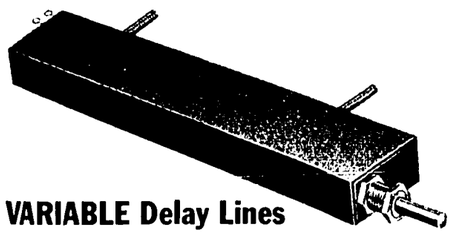


**Millisecond Series**

Long delay, low attenuation characteristics with delay time/rise time ratios from 20 to 50 for delays of 10 usec. to 5 msec.

**Custom-Built**

Custom-built Lumped Constant Delay Lines are available with delay time/rise time ratios as high as 170/1.



## DISTRIBUTED CONSTANT Delay Lines

Cylindrical or rectangular (for printed board mounting) shapes.

Delays varying from .02 to 1.2 usec. covering impedance ranges from 100 ohms to 1,800 ohms, exhibiting excellent pulse characteristics—at low cost.

Custom-built, distributed lines are also available.

## VARIABLE Delay Lines

**Continuously Variable Delay Lines: 400 Series**

Delays from .1 to .7 usec. with resolution better than .001 usec. Adjustable by 10 turns of the shaft. Dimensions: $6^{17}/_{32}$" x $^5/_8$" x $1^1/_4$".

**Step Variable Delay Lines: 200 Series**

Step variable pushbutton-type units for rack mounting or in instrument cabinet, with delays available from 5 to 50 usec., with extremely low resolution and fast pulse rise time.

**Continuously Variable Delay Lines: 500 Series**

Delays from .9 to 15.0 usec. with resolution of 1/1,000 of maximum delay or less. Adjustable by 10 turns of the shaft. Dimensions: $7^1/_4$" x 1" x $1^5/_8$".

**Custom-Built**

Custom-built Variable Delay Lines of all types and configurations are available.

## COMPLETE LABORATORY REPORTS

With every delay line prototype, ESC gives you a complete laboratory report that includes submitted electrical requirements, photo-oscillograms (which indicate input and output pulse shape and output rise time), the test equipment used and an evaluation of the electrical characteristics of the unit.

**For literature and technical data on any of these products, write to**

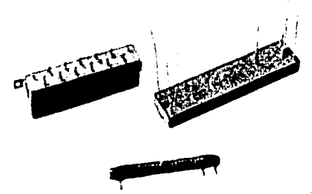
## WIRE SONIC DELAY LINES



New in the field of delay devices, *Wire Sonic Delay Lines* employ a special alloy wire as the delay medium. WSDL provides long delay per unit volume (up to 10,000 μsec) and adjustable or fixed delay. *Plus* values such as shock and vibration resistance, stability over wide temperature ranges and the availabilty of output taps give this advanced type of delay device unlimited applications at relatively low cost. 127-23

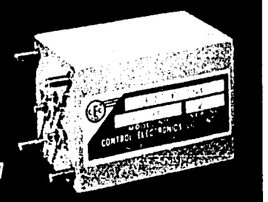
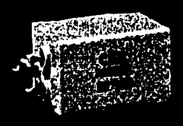
# CONTROL ELECTRONICS' BUYERS' GUIDE



*C.E.C. has for years been engaged in the design and production of quality components and systems for both military and industry. A member of our engineering group will be happy to meet with you on any problems you now face.*

## FILTERS & TOROIDS

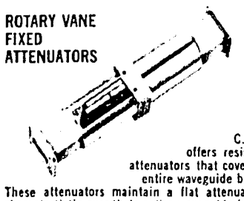


**BF-139**

45 mc band pass filter—3 db bandwidth @ 2.5% center freq—40 db rejection at $2F_0$ and $0.5F_0$—Input and output impedance 1500Ω—Hermetically sealed in accordance with applicable MIL specifications—Dimensions: 4½" x 2" x 2½"

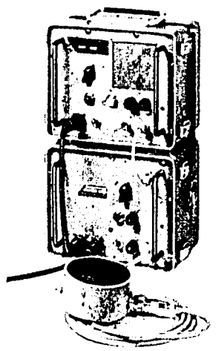
**LF-197**

3000 cps low pass filter—3 db @ 3000 cps—40 db @ 4000 cps—Attenuation at other frequencies specified—Input and output impedance 10,000Ω—Dimensions: 1⅛" x 1⅛" x 2⅛"



**BF-128**

45 kc resonant circuit—Max 3 db bandwidth: 4500 cps—Entire package requires only 0.4 cubic inches—Units available from 20 kc to 100 kc—Source impedance 3000Ω—Dimensions: ⅝" x 1⅛" x 1"



Hundreds of versions of the units shown as well as many other types of filters are offered by C.E.C. Our engineering group will be happy to meet with you and discuss your particular needs

## MICROWAVE COMPONENTS AND INSTRUMENTS

**ROTARY VANE FIXED ATTENUATORS**

C.E.C. offers resistive attenuators that cover an entire waveguide band. These attenuators maintain a flat attenuation characteristic over their entire waveguide band. ATTENUATION: 3 db, 10 db or 20 db are offered as Standard. Other attenuation values can be preset to your specifications.

**VHF-UHF FREQUENCY CALIBRATOR MODEL 121**
