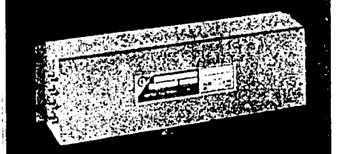
Range: 50 mc to 11,000 mc in crystal controlled steps of 50 or 100 mc.

Output Level: In excess of —70 dbm minimum for all markers.

Accuracy: ±0.005% at any frequency, unaffected by temperature or power input variations.

**HARMONIC MULTIPLIER AMPLIFIER ADAPTER**

Output Waveform: CW or Pulse.



Output Level: increases amplitude to —30 dbm in frequency range from 1,000 to 11,200 mc with marker spacing of 1,600 mc. Lower amplitude (—60 dbm) markers are generated with a spacing of 400 mc.

**BROADBAND ANTENNA**

Designed for use with the Harmonic Adapter, this broadband antenna covers the entire range from 1,000 mc through 11,200 mc.

Used in combination, the three units provide a fast go-no go, remote calibration check on aircraft radar receivers, without the need for connecting cables to the aircraft.

## DELAY LINES

ILLUSTRATED: CODING TYPE 20.3μsec

**LUMPED CONSTANT FIXED & VARIABLE**

5 millimicro sec to .1 secs
Impedance to 20,000 Ω
Bandwidth to 250 mc

**DISTRIBUTED CONSTANT FIXED & VARIABLE**

Delays to 30 μ sec
Impedance to 10,000 Ω
Bandwidth to 20 mc

**MAGNETOSTRICTIVE FIXED & VARIABLE**

2-10,000μsec

Also available are driver & output circuits for the reshaping of pulses.

Numerous versions of the above models as well as a capability to meet all specifications enables C.E.C. to consistently supply the needs of industry. Our engineering staff is always at your service. Write today for complete literature on our product line.

# HERMES OFFERS THE LARGEST AND MOST COMPLETE LINE OF CRYSTAL FILTERS IN THE INDUSTRY

## CRYSTAL FILTERS AND DISCRIMINATORS

### SYMMETRICAL BANDPASS

| MODEL NO. | CENTER FREQUENCY | BANDWIDTH 6 DB | BANDWIDTH 60 DB |
|---|---|---|---|
| 100KPA | 100Kc | 30cps | 200cps |
| 2215KA | 2215Kc | 2.8Kc | 12Kc |
| 2215KB | 2215Kc | 250cps | 1000cps |
| 9MA | 9Mc | 3Kc | 12Kc |
| 10MA | 10.7Mc | 30Kc | 60Kc |
| 10MB | 10.7Mc | 15Kc | 30Kc |
| 10ME | 10.7Mc | 6Kc | 15Kc |
| 10MF | 10.7Mc | 3.5Kc | 10Kc |
| 13MA | 13Mc | 30Kc | 56Kc |
| 13MB | 13Mc | 15Kc | 27Kc |
| 30MJ | 30Mc | 40Kc | 125Kc |
| 30MK | 30Mc | 25Kc | 62Kc |
| 30MP | 30Mc | 5Kc | 15Kc |

Hermes Bandpass Crystal Filters are widely used in commercial and military mobile FM receivers, spectrum analyzers, doppler radar, FSK systems, TRF receivers and other equipment requiring high selectivity and stability. Hermes Crystal Filters maintain the specified attenuation throughout the stopband region.

### SINGLE SIDEBAND

| MODEL NO | CENTER FREQ | SIDEBAND | PASSBAND | MINIMUM ATTENUATION (UNWANTED) |
|---|---|---|---|---|
| 100KUC | 100Kc | upper | 300 to 6000cps (2 db) | 60db |
| 100KLC | 100Kc | lower | 300 to 6000cps (2 db) | 60db |
| 3MUA | 3.2Mc | upper | 300 to 3000cps (3 db) | 40db |
| 2MUA | 2Mc | upper | 300 to 6000cps (2 db) | 60db |
| 2MLA | 2Mc | lower | 300 to 6000cps (2 db) | 60db |

Hermes Single Sideband Filters are recognized for their rapid carrier and adjacent sideband cut-off characteristics. These Crystal Filters simplify SSB generation by reducing the number of frequency conversions.

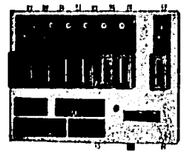
### CRYSTAL DISCRIMINATORS

| MODEL NO. | BANDWIDTH | CENTER FREQ | IMPEDANCE OHMS |
|---|---|---|---|
| 13M.DM | 50Kc peak to peak | 13Mc | Input 10K Output 500K |
| 10M.DC | 50Kc peak to peak | 10.7Mc | Input 10K Output 500K |

Hermes Crystal Discriminators are used in the construction of high-frequency, low distortion FM detectors at the first IF. The extreme stability of crystal discriminators makes them ideal for use in high- frequency AFC circuits.

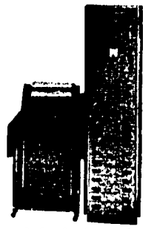
## HERMES CUSTOM FILTERS

Hermes has successfully produced more different models than any other manufacturer. The experience acquired in producing tens of thousands of crystal filters can be used to your advantage. If your requirements differ from those met by Hermes Stock Filters, send us your specifications for center frequency, bandwidth, selectivity, and impedance level. Our proposal will be submitted promptly.



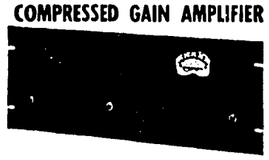
## NEWLY DEVELOPED CRYSTAL DEVICES

### VOLTAGE CONTROLLED CRYSTAL OSCILLATORS



Hermes "VCXO" Voltage Controlled Crystal Oscillator provides greater stability, percentage deviation and linearity than similar devices offered in the past. These characteristics make VCXO especially suitable for FM generation and frequency control circuits.

### FREQUENCY SYNTHESIZERS



Custom-designed Frequency Synthesizers for transmitters and receivers can be built to operate at frequency ranges from 10Kc to 50Mc. These devices utilize a reference oscillator in conjunction with crystal filters to achieve stable multiple-frequency outputs.

### SPECTRUM ANALYZERS

Hermes has designed and produced Spectrum Analyzers having as many as 256 channels or more. Operating in real time, these Analyzers can be used for precise audio analysis, missile tracking, and frequency monitoring. Built-in programmers control the rate and deviation of scan. Solid-state circuitry and parallel output channels insure maximum reliability.

### COMPRESSED GAIN AMPLIFIER

Hermes Model 110 Compressed Gain Amplifier is used to measure and display attenuation vs frequency characteristics of frequency selective electronic components and equipment over a frequency range from 10Kc to 50 Mc.

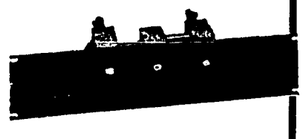
# OFC *components*

*for defense and industry!*

**TOROIDS** **In addition to standard toroid features, O.F.C. units have—**

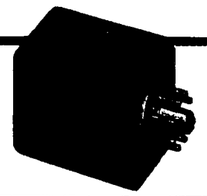
• Winding to minimize distributed capacity. Coil may be used at higher frequencies with higher "Q" factors. • Winding to inductance value on self-calibrating winding equipment yielding 1% units as standard tolerance at no cost premium for core calibrating, etc. • Availability of waxed, encapsulated, encased or taped units • Complete line of stock core sizes. Fast delivery on special orders • Facilities for winding from #44 to #10 AWG wire.

**HIGH TEMPERATURE TRANSFORMERS**



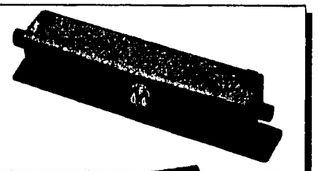
**In addition to meeting requirements of MIL-T-27A, grade 4, Class T, O. F. C. high temperature transformers feature—**

• Reduced iron losses • Large heat-radiating surface area • Very small height dimension • Negligible radiation of power frequency components • Reduced copper loss • Ability to use higher ambients because of smaller unit temperature rise • High reliability, simple construction, excellent shape factor • Excellent regulation and reduced weight.



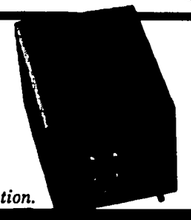
**VARIABLE RF ATTENUATORS** **These rotary adjustable variable attenuators are extremely accurate over wide frequency range. Available as individual unmounted units or in various combinations on rack-mounted panels, featuring—**

• Gold contacts • Resistive networks that function from D. C. to maximum operating frequency • Each resistor mounted in cavity. This eliminates reactive components over the unit's useful frequency range • Highly stable. Installed to prevent any element value shift due to heat • Fully tested for insertion loss and voltage standing wave ratio.
• Conservatively rated. Guaranteed for full year under normal conditions.



**PLUG-IN FILTERS**

• Standard octal socket makes interchange simple • Low distortion
• Toroid coil construction provides 70 db min rejection hum pickup
• Available, from stock, in wide range of frequencies
• Hermetically sealed.



**ANTENNA FILTERS**

• Cutoff frequency range up to 450 MC • Attenuation of 40 to 90 db over stop band • Insertion loss less than 1.0 db over entire pass band • VSWR less than 1.5 over entire pass band • Designed to your size, weight, termination, power and impedance specifications • Slope of cutoff 60 db at 1.2 of cutoff frequency.

**MAGNETIC AMPLIFIERS** **Built to customer specifications, Ortho Filter's high voltage and high temperature units feature—**

• Use from milliwatt to kilowatt ratings • Special test procedures to insure excellent balance and minimum mill voltages • Tape wound toroids and cut cores to facilitate low cost prototypes promptly
• Controlled winding techniques that guarantee uniformity with respect to distributed capacity and leakage inductances.

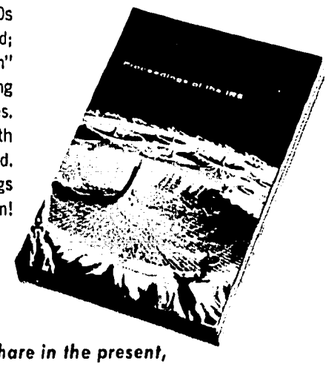
*Honoring the Minds that meet the Challenge of the '60s...*

**IRE remembers the MAN**



*...for*

*Improvements in Communications*

*J. A. Rajchman*

1960's *Morris Liebmann Memorial Prize* goes to J. A. Rajchman, of RCA Laboratories, for helping develop magnetic devices to process information. IRE is proud to honor Mr. Rajchman, and to salute all who, in this challenging decade of the '60s, work for the advancement of the radio art and apply it to the betterment of our lives.

Your company, too, has to meet the challenge of the '60s in the vast radio-electronics field; to do so, it too must "remember the man" — must reach the top-level minds who control purchasing for electronic equipment, components and supplies. 68,362 (ABC) of them read **Proceedings** every month — ACT on what they read. Present your company's facts in **Proceedings** — and watch the reaction!

***For a share in the present, and a stake in the future, make your product NEWS in***

REMEMBERS THE MAN — I R E

# filters networks

**ACTIVE FILTERS** Plug-in amplifier-feedback network pairs for use as filters or bandpass amplifiers. Widely used where LC filter sections are impractical. Available with tuned circuit response Q to 40, center frequency 1 cps to 500 cps, bandpass response with center frequency 5 to 500 cps. Ask for bulletin 212, 572.

**TWIN-T NETWORKS** For harmonic rejection, low-pass filtering, feedback circuits. Hermetically sealed, stable, plug-in or stud-mounted. Null frequencies 1 cps to 50 kc, wide range of impedance levels. Ask for bulletin 500.

**TOROIDAL WAVE FILTERS** Hermetically sealed LC filters with stable toroidal inductors. Low, high, bandpass models available over wide impedance and frequency ranges. Stud-mounting and plug-ins. Stock and special designs such as interstage filters. Ask for LC bulletins.

Complete engineering service for special filter and network designs. Instrumentation and control problems invited. Manufacturing facilities for prototypes or a thousand units. Fast delivery at competitive prices. Let us put you on our mailing list for our "Network Notes" and technical bulletins.

# . . . You'll find the Type and Size Fuse you need

## • • • IN THE COMPLETE LINE OF BUSS AND FUSETRON FUSES

The following is only a representative selection. The complete BUSS line of fuses includes: single-element, quick-blowing type; single-element for normal circuit protection type; dual-element, slow blowing type and signal or visual indicating types . . . ranging in size from 1/500 ampere up — plus a companion line of fuse clips, blocks and holders.

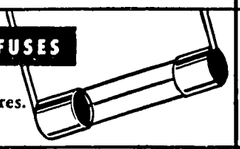
**BUSS AGX FAST ACTING FUSES**

¼ x 1 in. Glass tube 1/500 to 2 amp.

**BUSS GLD SIGNAL ACTIVATING FUSES**

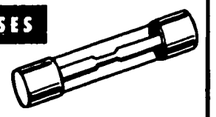
¼ x 1¼ inch. Silverplated pin pops out when fuse is blown and activates signal or alarm.

**FUSETRON MDL FUSES**



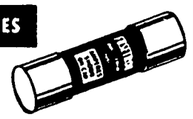
¼ x 1¼ inch. Dual-element — slow blowing type 1/100 to 30 amp.

**BUSS ABC CERAMIC TUBE FUSES**



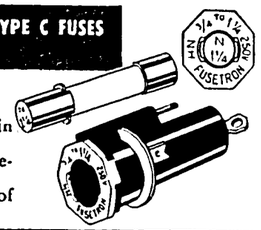
¼ x 1¼ inch. High interrupting capacity fuses ¼ to 30 amp.

**BUSS GJV PIG TAIL FUSES**



⅛ to 6 amp. Solder into circuit wires.

**BUSS SFE STANDARD FUSES**

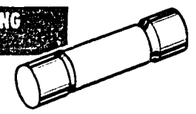


Fuses of different amperages are different lengths — to make it impossible to insert too large a size.

**FUSETRON FNM FIBRE TUBE FUSES**

1 3/32 x 1½ inch. Dual-element — slow blowing type.

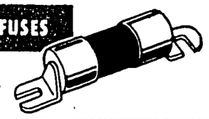
**FUSETRON TYPE N and TYPE C FUSES and FUSEHOLDERS**



*Especially suitable for protection of TV*

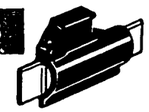
Ears on fuses match slots in holder.

Marking on fuse and fuseholder in direct view.



Safeguard against use of wrong size and type of fuse.

**BUSS KTK HIGH INTERRUPTING CAPACITY FUSES**

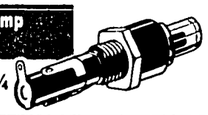


1 3/32 x 1½ inch. Capable of safely interrupting 68,000 amps.

**FUSETRON ACK CLAMP TYPE FUSES**

20 to 300 amp., Dual-element type.

**BUSS ACO AIRCRAFT FUSES**

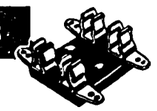


Mechanical Indicating — Limiter type 1 to 75 amp.

**BUSS Series HJ and HK Non-Indicating FUSEHOLDERS**

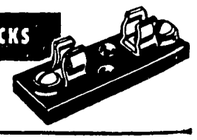
Panel mounted for ¼ x 1 inch and ¼ x 1¼ inch fuses.

**BUSS Series HJ and HK Lamp Indicating FUSEHOLDERS**



Panel mounted for ¼ x 1 inch and ¼ x 1¼ in. fuses.

**BUSS No. 4051 ONE-PIECE CLIP and TERMINAL**



Solder type terminal for ¼ inch fuses.

**BUSS No. 4409 FUSE BLOCKS**

Small Base, solder type Side Terminals.

**BUSS No. 4512 FUSE BLOCKS**

Full Base, Screw type Terminals.

For more detailed information to help you select fuses and fuseholders to meet your electrical protection needs . . . Write for BUSS bulletin SFB.

Or tell us your problem and let our Fuse Engineers assist you in getting the protection you require.

**Bussmann Mfg. Division,** McGraw-Edison Co. University at Jefferson, St. Louis 7, Mo.

FUSETRON — TRUSTWORTHY NAMES IN ELECTRICAL PROTECTION — BUSS

*Makers of a complete line of fuses for home, farm, commercial, electronic and industrial use.*

BTI

FUSE CLIPS

**BTI Fuse Clips** are available from stock in a wide range of sizes and designs to accommodate the NEC and SAE standard fuses. Integral lug type or specially designed fuse clips and non-standard parts made to meet your custom requirements.

Write for Bulletin #E-101.

BRAUN TOOL & INSTRUMENT Company, Inc. 141 Fifth Ave., Hawthorne, N. J.

For details, circle #393 on Reader Service Card

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 135-240.

# Hermetically Sealed Connectors

CONSECO connectors represent an achievement of more experience in design and manufacture of glass-sealed hermetic items than can be found in any other organization in the United States.

"MINIKAY" CONNECTOR

"MINCON" HERMETICALLY SEALED CONNECTOR

MULTIPLE CONTACT "MS" CONNECTOR

Really rugged, CONSECO connectors provide genuine hermetic sealing. They are engineered out of top technical experience to meet military specifications and to perform under the toughest shock, vibration, and environmental conditions.

# Glass-to-Metal... Ceramic-to-Metal... Hermetic Seals for *EVERY* Electronic Use!

- Multiple Headers
- Recon Connectors
- Single Lead Terminals
- Crystal Bases
- Transistor Stems
- Diode Closures
- Custom Seals

Hermetic Seal Corporation is your prime source for seals in all sizes, terminations and shapes to fit your specifications. Hermetic is the pioneer in this specialized field and the originator of more than 10,000 different seals. Precision, quality-control from design, manufacture, and precious metal plating is assured.

**EXTREME THERMAL SHOCK won't damage these CERAMASEAL HERMETIC TERMINALS**

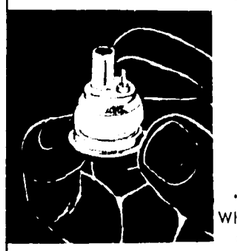
**SOME HAVE EVEN WITHSTOOD A SUDDEN 460°C CHANGE**

With an alumina content up to 99%, CERAMASEAL terminals are not only mechanically strong, but some have even been transferred directly from liquid nitrogen into hot solder without cracking!

The CERAMASEAL molecular bond between the ceramic and metal flanges, caps or tubes is stronger than the high alumina ceramic.

Easy to install too, by conventional brazing, heli-arc welding or soldering techniques.

FOR COMPLETE INFORMATION, catalog and spec sheets, write Ceramaseal, Inc., New Lebanon Center, N. Y. or phone: West Lebanon 3-5851.



Hermetic Ceramic Terminals, Magnetron Wells, Sapphire-to-Metal Seals

**CERAMASEAL, inc.**

For details, circle #396 on Reader Service Card

**SEAL PROBLEMS?** *A CASE IN POINT*

**PROBLEM:**
GENERAL ELECTRIC required development of a current compact high current hermetic seal CONTROLLED RECTIFIER housing, constructed of materials and processes to withstand temperatures above solder range—design involves 5 seals to dissimilar materials.

**SOLUTION:**
Mechanical requirement dictated use of 3 metal cups, #52, OFHC and Ge "A" No. Braze material selected above 1335°F, so that subsequent welding or brazing can be done without detrimental effect. Tapered seals eliminate voids, provide uniformity.

**CERAMIC TO METAL ASSEMBLIES BY MITRONICS ARE:**

• More precise • More compact • More economical • More durable

Why struggle with metallizing problems when Mitronics' complete engineering facilities are at your disposal.

*METALLIZING SPECIALISTS* *Write, phone or wire for technical assistance, information*

## JACK PANELS and PATCH CORDS

Standard broadcast (audio and video) as well as custom built jack panels as used in a wide range of instrumentation and control applications requiring either regular switchboard or coaxial types of jacks. A complete selection of patch cords to fill all types of applications. Size range of special panels from two up to jumbo sizes with about one thousand jacks per panel.

## JACKS — PLUGS — KEYS

A complete selection of standard types of jacks and plugs plus an extensive line of coaxial types suitable for pulse circuitry, microwave, and video applications. Push button and turn type keys with a very wide variety of circuit combinations using well established telephone switchboard designs are available.

## HEADSETS

Thirty-five years of continuous production has produced fourteen basic types ranging from substantially all military types to specialized low cost units suitable for incorporating in toys as a sound generating device. All basic types produced in a wide assortment of variations.

Write for bulletins on these and the many additional standard stock items as well as an almost unlimited variety of manufactured-to-order products falling within the product classifications shown above.

# TELEX

SUPERIORITY IN SOUND

**1. DYNAMIC HEADSET (DYNA-TWIN®)**—For hi-fi monaural or stereo listening, radio and TV monitoring; for audiometers, for classroom uses. Weighs only 9 oz. Available with choice of boom mikes for special applications.

**2. MAGNETIC HEADSET (MAGNA-TWIN®)**—For language learning, aircraft, ham and commercial broadcasting. Choice of boom mikes. Completely adjustable, weighs only 9 oz. Entire set easily sterilized.

**3. TWINSET®**—For amateur, commercial, and industrial uses. FAA approved—standard on many airplanes. Light and comfortable. Less background noise, less signal loss—signal is piped directly into ears. Weighs just 1.6 oz.

**4. BOOM MIKE HEADSET**—For ham radio, TV, airline, ship-to-shore, classroom, secretarial uses. Used on Pan America's Boeing 707 Jet Clipper. Just 3½ oz., yet rugged for long use. Choice of reluctance, dynamic, crystal, carbon, ceramic mikes. Various impedances available.

**5. PILLOW SPEAKER**—For private audio listening, for sleep learning and in hospitals, rest homes, hotels, railroads and airlines. *Dynamic* unit has stainless steel housing with hanger. *Magnetic* unit has molded case. Hermetically sealed. Can be sterilized by submerging in alcohol.

**6. MINI-MIKE®**—Dynamic speaker and mike only 1" x 1" x ¾". For uses requiring miniature electro-acoustic transducers—dictation machines, trans-receivers, communications, etc.

**7. MINIATURE RECEIVER**—For hearing aid, transistor radio, and group hearing uses. Available as a cartridge unit in earsets, hearing aids, headsets, etc. Weight: 2.5 grams. Dimensions: cased, .26" thick, .51" diameter; uncased, .13" thick, .49" diameter.

*For complete information on these and other TELEX listening devices and accessories, write:*

a measure of perfection...

**IDEAL PRECISION**
**Panel Meters**
*a complete line for every application*

IDEAL Panel Meters are assembled in controlled atmospheric and climate conditions and 100% inspected at every step of production to insure highest quality and dependability

- D'Arsonval movements guarantee minimum accuracy of 2% (full scale)
- Rugged construction means trouble-free, long-lived service
- Durable plastic meter cases provide greater clarity, easier readability

**VIBRATING REED FREQUENCY METERS**

J-B-T

Used wherever constant or known frequency is important to efficient operation of equipment.

Model 30-F

- *Permanently Accurate within ±0.3% or better at reference temperature, depending on the model. This accuracy is not affected by poor wave form, external magnetic disturbances, or voltage fluctuations.*
- *Size and Type for Every Service.* Made in many portable and panel styles and reed groupings; 12-650 cycles and above.
- *Rugged Construction* simplified, patented.
- *Suitable for Electronic Circuits.* Power consumption is comparatively low, and J-B-T reeds have high Q with prompt, sharp response.

**ELAPSED TIME METERS**

Model 31-EHXX

J-B-T elapsed time (or running time) meters provide a convenient means for timing tests, checking tube or machine life, and scheduling maintenance. Available in many case styles including round, square, clear plastic front, sealed, and others, compatible with all modern panel instruments. Standard models for 60 cycles, 100-130 volts register in 1/10 hour steps to 9999.9 hours then resets automatically. Variations such as 50 cycles, 230 volts 0-99,999 hours or 0-9999.9 minutes are also available.

Purchase of standard items through authorized electronic distributors is strongly recommended.

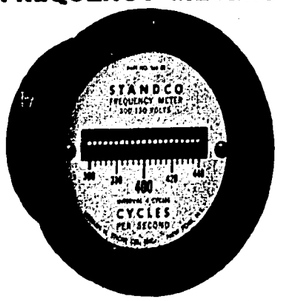
**RAWSON METERS**

**MULTIMETERS® and REGULAR METERS**
AC and DC types, multiple ranges, accuracy — ½ of 1%. 2 microamperes to 1 ampere DC. 2 milliamperes to 3 amperes AC.

**ELECTROSTATIC VOLTMETERS**
Ranges 100 V to 35,000 V, AC or DC. Resistance exceeds million megohms. Can measure static electricity.

**R. F. VOLTMETERS**
DC to 100 megacycles's. Thermocouple type. Ideal for laboratory standards. New bulletin.

**FLUXMETERS**
Laboratory and production measurements on magnets and magnetic circuits. Single push button return-to-zero.



**ROTATING COIL GAUSSMETERS**
Our most recent development for measuring magnetic field strengths. Measures from a few gausses to 120 kilogausses.

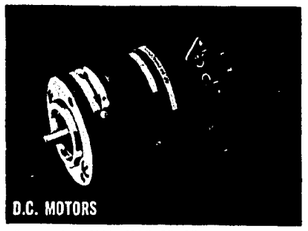
# imc

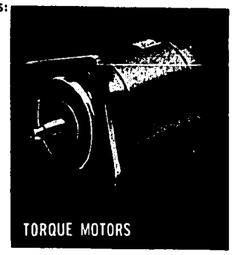
## precisioneered motors



Centrifugal, propeller fan, vaneaxial. 1 cfm to 2000 cfm, pressures up to 20 in $H_2O$. High slip characteristic for altitude use. Non-stall vaneaxial characteristic powered by AC (60 - 400 cps) or DC.

SERVO MOTORS & SERVO MOTOR GENERATORS

Sizes 5 through 18.
Encapsulated for most rigid applications.
High acceleration at stall characteristic.
AVAILABLE WITH BROAD RANGE OF GEAR RATIOS.



D.C. MOTORS

Frame sizes 1¼", 1½", 2", 3".
Permanent magnet or wound fields: shunt, series, or compound.
1/1000 to ½ H.P., 6V to 220V.
Gear reducers, clutches, radio noise filters.

HYSTERESIS MOTORS

SINGLE — DUAL — THREE & FOUR SPEED.
Ball Bearing or Sleeve Bearing
1/2500 H.P. to ¾ H.P. 60 - 400 cps.

TORQUE MOTORS

1 oz. in. to 300 oz. in.
2 - 4 - 6 - 8 poles.
60 - 400 cycle, 24V to 230V.

SPECIAL DESIGNS

Motors available with gear-clutch and brake.
Motor driven gear pump.
Governor controlled motors.

**IMC motors are manufactured to meet all MIL specs. and environmental conditions.**

**FULLY HOUSED FREQUENCY CONVERTING SYSTEM!**

The demand for a compact "All in One" Frequency Converting Center that offers utmost convenience, looks neat and conserves space, has been met by Kato Engineers.

Compactly enclosed are a Kato Motor Generator and all the necessary controls that include the Kato manufactured Regociter, static exciter regulator as well as reduced voltage synchronous motor starter.

KATO'S SYSTEMS APPROACH to power conversion offers the advantage of the size and type of motor generator set with the necessary controls to meet your exacting requirements.

A COMPLETE LINE OF AC GENERATORS ADAPTABLE TO ANY INDUSTRIAL ENGINE

# SLO-SYN® Synchronous Motors

- **INSTANT STARTING, STOPPING, REVERSING**
- **72 RPM SHAFT SPEED WITHOUT GEARS**
- **CAN BE USED AS D-C STEPPING MOTORS**
- **START AT FULL RATED TORQUE**

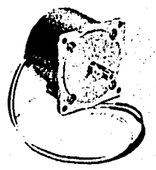
A SLO-SYN is a synchronous permanent magnet type motor having instant start, stop and reverse characteristics and a basic shaft speed of 72 RPM with 60 cycles applied. Although used extensively as a constant speed a-c motor, its use as a d-c stepping or incremental positioning device offers control system designers, machine tool and process control engineers unlimited application possibilities. It is compact and economical, has almost negligible overshoot, no ratchets or detents. A single-pole, three-position switch can give complete forward, reverse and "off" control because the motor has three leads only. Starts or stops in less than 0.025 seconds or approximately 1.5 cycles. There is no need for electrical or mechanical braking because it will stop in less than 5° of motor shaft rotation. The starting and operating currents are nearly identical and there is no excessive inrush current when the motor is turned on. All types have a ⅜" diameter shaft. Types having speed reduction assemblies are available.

TYPES SS150, SS150M, SS152, SS250

## Types SS150 and SS152

SLO-SYN types SS150 and SS152 are designed for 150 ounce-inch duty. Types are available also with a resistor and a capacitor integrally mounted in an enclosure on the end of the motor (suffix RC when ordering).

## Militarized Type SS150M

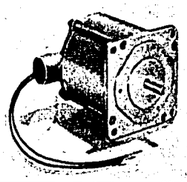


SLO-SYN type SS150M has a rating of 150 ounce-inches and is designed to meet or exceed applicable military specifications regarding materials (CCM-636-A), shock (MIL-T-17113), vibration, salt spray, humidity, and temperature (MIL-E-4970A).

## Type SS250

SLO-SYN type SS250 has a torque rating of 250 ounce-inches and is designed primarily for heavier duty applications. Its high torque makes it particularly well-adapted for duty as a prime mover for controlling valves, machine tool carriages and similar applications.

| | TYPES SS150 AND SS150M | TYPE SS152 | TYPE SS250 |
|---|---|---|---|
| INPUT | 120 volts, 40/70 cycles, 1 phase | 240 volts, 40/70 cycles, 1 phase | 120 volts, 40/70 cycles, 1 phase |
| OUTPUT SPEED* | 72 RPM | 72 RPM | 72 RPM |
| MAX. CURRENT* | 0.4 ampere | 0.2 ampere | 0.6 ampere |
| TORQUE* | 150 ounce-inches | 150 ounce-inches | 250 ounce inches |
| WEIGHT | 6.5 pounds | 6.5 pounds | 6.5 pounds |
| RESISTOR | 250 ohms ±5% 25W | 1200 ohms ±5% 25W | 150 ohms ±5% 50W |
| CAPACITOR | 3.75 mfd ±6%, 330 VAC | 1.0 mfd ±6%, 660 VAC | 6.5 mfd ±6%, 330 VAC |



*Ratings for 60 cycle single-phase operation. Motors will operate satisfactorily at any frequency between 40 and 70 cycles with proportional change in speed and some reduction in torque.

## TYPE SS50

The small size of the 50 ounce-inch SLO-SYN type SS50 makes it particularly adaptable as an original equipment component where space is limited. Especially useful for actuating selector switches, tape handling and process timing. Uses Class B insulation and is rated for 75° C temperature rise from 40° C maximum ambient under continuous duty.

| | |
|---|---|
| INPUT | 120 volts, 40/70 cycles, 1 phase |
| OUTPUT SPEED | 72 RPM at 60 cycles |
| MAX. CURRENT | 0.3 ampere at 60 cycles |
| TORQUE | 50 ounce-inches |
| WEIGHT | 3 pounds |
| RESISTOR | 250 ohms ±5%, 25W |
| CAPACITOR | 2.6 mfd ±6%, 330 VAC |

## EXPLOSIONPROOF TYPE X250

Explosionproof type X250 has a torque rating of 250 ounce-inches. Provides safe operation in hazardous areas where a small arc or spark could cause an explosion. Underwriters' Laboratories Approved for Class 1, Group D service. Uses Class B insulation and is rated for 75° C temperature rise from 40° C maximum ambient under continuous duty.

| | |
|---|---|
| INPUT | 120 volts, 40/70 cycles, 1 phase |
| OUTPUT SPEED | 72 RPM at 60 cycles |
| MAX. CURRENT | 0.6 ampere at 60 cycles |
| TORQUE | 250 ounce-inches |
| WEIGHT | 7-3/4 pounds |
| RESISTOR | 150 ohms ±5%, 50W |
| CAPACITOR | 6.5 mfd ±6%, 330 VAC |

## AS A D-C STEPPING MOTOR

When used as an incremental positioning device, one revolution of the motor shaft can be divided into 200 precise increments through the use of a d-c power source and a suitable switching arrangement.

The motor will advance 1.8° for each change in polarity if the d-c voltage applied to the windings is switched in the proper sequence. Request SLO-SYN Data Sheet No. 1 for complete stepping information.

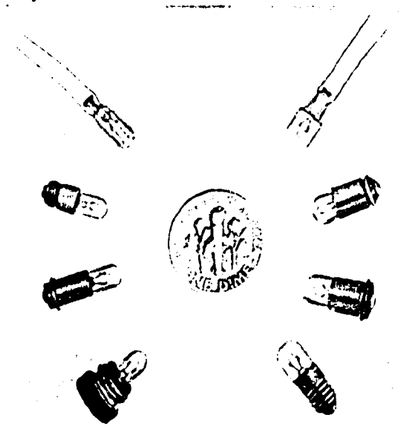
STANDARD OR SPECIAL DESIGN / QUALITY BUILT MINIATURE LAMPS for all purposes



LAMPS FOR:
- Instrument and Meters
- Aircraft
- Indicators, Radios, Coin Machines
- Flashlights, Lanterns
- Appliances, Industrial Equipment
- 6-8 Volt, 12-16 Volt Automotive and Motor Coach Lamps

Whether your requirements call for a standard type miniature lamp, or if a special lamp for some new product development is needed, Chicago Miniature Lamp Works is a dependable source of supply.

In addition to many years of experience in its field, this company has the engineering "know-how" and the facilities to produce any style or size of miniature lamp. The standard or conventional miniature lamps are available in more styles than offered elsewhere, and in any quantities.

Chicago Miniature Lamp Works will be your most dependable source of supply for all your miniature lamp requirements.

1910 1960

*Typical lamps especially designed and produced by Chicago Miniature Lamp Works.*

Shown in this illustration are several models of each of two lamps especially engineered by Chicago Miniature Lamp Works to perform a specific function for which standard lamps proved inadequate. Available for voltage ranging from 1.35 V to 28.0 V and with several types of base as shown, these lamps have a life expectancy that varies from 30 hours to an extremely long life approaching infinity.

**NOW...FOR THE FIRST TIME...A COMPLETE LINE OF MODERN INDICATORS FOR MODERN DESIGNERS**

MTL SERIES
**MINI-LITES**
Transistor driven neon indicator, self-contained and operating from signals as small as two volts. With fourteen standard models the MINI-LITE fits most small signal indicator applications. Mounts in 3/8" hole. Back panel length 1 1/8". Special variations available.

TML SERIES
**MEMO-LITES**
Thyratron indicator complete with tube, holder and circuitry. The TML features a high impedance input, brilliant light. Its memory, when used on DC, makes it ideal for core circuitry, test and error circuits.

MBL SERIES
**MINIATURE BUTTON-LITES**
Combination neon indicator-push button switch eliminates need for separate switch and lamp holder. Choice of neon lamps; series limiting resistors. Normally open OR normally closed contacts in conjunction with indicator; both if lamp is omitted. Mounts in 3/8" hole.

MDL SERIES
**MINIATURE DISPLAY LITES**
Quality MINIATURE DISPLAY LITES conforming to all applicable MIL specifications. Choice of neons or incandescent lamps, with or without series resistors. Mounts in 3/8" holes on 7/8" centers. Colored lenses available upon request.

LVN SERIES
**LOW VOLTAGE NEON INDICATORS**
A new NEON indicator which generates its own firing voltage from any applied DC voltage of 4 or more volts. May be operated directly from the supply or may be additionally controlled by a high impedance signal. Ideal for any low voltage and low current applications.

TND SERIES
**TRANSISTORIZED DIGITAL READOUT UNIT**
A completely self-contained digital readout unit consisting of a digital display tube and drive circuitry. May be driven directly from low level transistor signals. Built-in drive circuitry eliminates need for external driver assemblies. Saves time, space, and wiring costs.

**ATR PLUG-IN TYPE PORTABLE INVERTERS**
A.C. HOUSEHOLD ELECTRICITY Anywhere . . . in your own car!
Operates Standard A.C.
• Record Players
• Dictating Machines
• Small Radios
• Electric Shavers
• Heating Pads, etc.
In your own car or boat!
MODELS
6-RMF (6 volts) 60 to 85 watts. Shipping weight 12 lbs. DEALER NET PRICE. . . . . $33.00
12T-RME (12 volts) 90 to 125 watts. Shipping weight 12 lbs. DEALER NET PRICE. . . . . $33.00
*Additional Models Available

**ATR "A" Battery ELIMINATOR**
For Demonstrating and Testing Auto Radios—TRANSISTOR or VIBRATOR OPERATED!
Designed for testing D.C. Electrical Apparatus on Regular A.C. Lines—Equipped with Full-Wave Dry Disc-Type Rectifier, assuring noiseless, interference-free operation and extreme long life and reliability.
MAY ALSO BE USED AS A BATTERY CHARGER
MODEL 610C-ELIF . . . 6 volts at 10 amps. or 12 volts at 6 amps. Shipping weight 22 lbs.
DEALER NET PRICE . . . . . $49.95
MODEL 620C-ELIT . . . 6 volts at 20 amps. or 12 volts at 10 amps. Shipping weight 33 lbs.
DEALER NET PRICE . . . . . $66.95

AUTO-RADIO **VIBRATORS**

By every test ATR Auto-Radio Vibrators are best! . . . and feature Ceramic Stack Spacers, Instant Starting, Large Oversized Tungsten Contacts, Perforated Reed, plus Highest Precision Construction and Workmanship and Quiet Operation!
There is an ATR VIBRATOR for every make of car!
Ask your distributor for ATR's Low Priced type 1400, 6 volt 4-prong Vibrator; and 1843, 12 volt 3-prong; or 1840, 12 volt 4-prong Vibrator. THE WORLD'S FINEST!

There is a trim plate kit for YOUR CAR!

**ATR CUSTOMIZED KARADIO**
Vibrator-Operated with Tone Control
ATR KARADIO . . . is ideal for small import cars or compact American cars! Unit is completely self-contained—extremely compact! Powerful 8-tube performance provides remarkable freedom from engine, static, and road noises. The ATR Customized Karadio comes complete with speaker and ready to install. Can be mounted in-dash or under-dash—wherever space permits! No polarity problem. Neutral Gray-Tan, baked enamel finish. Overall size, 7" deep, 4" high, and 6½" wide. Shipping weight, radio set, 7 lbs.
Model K-1279—12 for 12V Dealer Net Price. $33.57
Model K-1279— 6 for 6V Dealer Net Price. $33.57

Airplane Style Overhead Mounting under Cab Roof
NO PRINTED CIRCUITS!

**ATR TRUCK KARADIO**
Excellent Tone, Volume, and Sensitivity!
Compact, yet powerful. Fits all trucks, station wagons, most cars and boats. Just drill a ⅝ inch hole in roof and suspend the one-piece unit (aerial, chassis and speaker) in minutes. Watertight mounting assembly holds antenna upright. Yoke-type bracket lets you tilt radio to any angle.
Extra-sensitive radio has 6 tubes (2 double-purpose) over-size Alnico 5 PM speaker for full, rich tone. Big easy-to-read illuminated dial. Fingertip tuning control. Volume and tone controls. 33-in. stainless steel antenna. Neutral gray-tan enameled metal cabinet, 7 x 6½ x 4 in. high over-all. Shipping weight 10½ lbs.
Model TR-1279—12 A for 12V Dealer Net Price $41.95
Model TR-1279— 6A for 6V Dealer Net Price $41.95

**NOW** ... from the pioneering R & D experience and skilled manufacturing hands of the developers of R/P/M Regulated Power Modules

# 36 NEW R|P|M*

Regulated Power Module

Patent applied For

**fills the void...** with higher reliability for Military applications... higher environmental immunity to shock, vibration and humidity... 5 year life expectancy in continuous use... extended operating temperature −20°C to +65°C, wide choice of D.C. Voltages.

**fills the void...** with higher reliability for Industrial applications... super-rugged construction and MIL hardware... all tubes clamped. Wide choice of voltage and current ranges, 125–425 volts... 50 to 400 milliamps. 6.3VAC OUTPUTS at ample capacities. RPM units are custom designed for compactness and most efficient use of space.

**FOR MILITARY (MIL-E-16400-B) AND INDUSTRIAL APPLICATIONS**

## SPECIFICATIONS – all models

**input** 105-125 V.A.C., 50/60/400 cycles.

**outputs** Voltage ranges as shown in the table, continuously variable. Current zero to full load as shown. Outputs floating—either positive or negative may be grounded. 6.3 V.A.C. centertapped at Currents shown in table.

**regulation** 0.05% regulation for NL to FL, or line changes of ±10%, under any conditions of load current or line voltage within limits stated.

**ripple** 1 mV RMS maximum under any conditions of load current or line voltage within limits stated.

**transient response** Output voltage returns to within regulation limits within 25 microseconds in response to a 50% step change in the load.

**stability** Maximum long term stability is assured by the use of 20 ppm error-sensing resistors, and by pre-aging every RPM unit.

**output impedance** Maximum values as shown in the table.

**remote sensing** Terminals for remote sensing are brought out on the terminal board.

**multiple operation** RPM's may be paired off in series or parallel to achieve additional voltage or current capacities.

**ambient temperature** Industrial units: 0-50°C operating. Military units: −20° to +65°C operating. All units: −55° to +85°C Storage.

**construction** One-piece, cast aluminum housing, baked enamel finish. Input and output terminals compactly grouped for access through single, round access hole in chassis. Mounting by four 10-32 screws in any position.

**ELECTRONICALLY REGULATED D. C. CONSTANT VOLTAGE POWER SUPPLIES**

The output voltage is continuously variable from 200 to 325 volts D.C. for load currents of 0 to 100 M.A. with an input voltage of 105 to 125 volts 60 cycle. Regulation is better than 1%. An isolated A.C. voltage of 6.3 volts at 3 amperes is available at the output terminal connections.

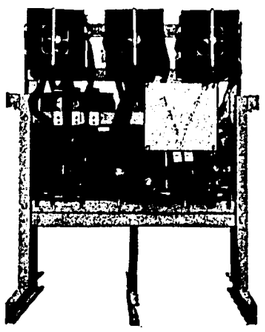
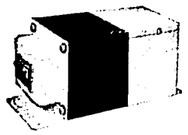
# ENGINEERED AND BUILT BY ACME ELECTRIC *Means* DEPENDABILITY

When dependable performance is the major factor, your best source of supply is Acme Electric. We offer the cooperation of an engineering staff well qualified by experience to assist in your design problems. These engineers have at their command all the modern facilities essential to manufacturing magnetic components. We invite your inspection of these facilities.

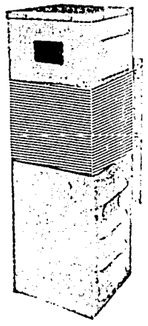


## DC REGULATED POWER SUPPLIES

Individually designed to the specific power requirements of the application. Acme Electric designed units are used with electronic business machines, industrial, research and military systems.

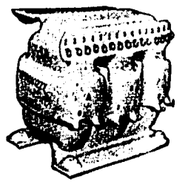


A typical production design incorporating transistorized panel, transformer, saturable reactor, rectifier and components into a compact dependable power supply.

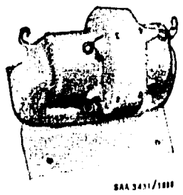


Magnet power supply module designed for an Alternating Gradient Synchrotron research project. Output power rating 175 KW dc. Also available in ratings to 1000 KW dc.

## CONSTANT VOLTAGE STABILIZERS



All designs are for continuous duty service with regulation ±1% of normal regardless of variations of input voltage. Current limiting design protects unit against overloads. Available in standard stock models from 15 va thru 2 kva. Primary voltage 95-130; 190-260. Secondary voltage: 6.3; 120; 240. Write for catalog.



## MINIATURE AND HIGH TEMPERATURE TRANSFORMERS

Our experience in designing and producing transformers for high temperature operation is of definite value if you need a supply source for such components. Several hundred designs have been produced successfully. Write for catalog.

**INVERTRON**
from
Behlman

From a wide variety of "meet your needs" models, off the shelf or on special order, you can choose an electronically tailored **INVERTRON** for research, development and testing. Total harmonic distortion 1% max. with lower distortion on special order. Voltage regulation: 1% no load to full load standard; to .01% available on special order. Standard output voltage on single, two and three phase models, 0-130 variable. Response time: 20 milliseconds.

[1] Has modulation input.
[2] Has additional 0-150 V DC output and 6.3 V AC CT output.
[3] Equivalent to two Model 212A's.

Why programmable? Because Regatron Programmable Power Supplies give the design engineer an extra margin of versatility. For example, in automatic test work, the programmable feature reduces control circuitry. In critical laboratory application, the programmable feature permits near-perfect reproducibility of test voltages.

There are other advantages too. The programmable feature provides for remote sensing. This provision eliminates the effect of voltage drops in power leads . . . places the point of regulation at the load terminals. And there's more.

For complete descriptions and specifications ask for Specification Sheets 3010B and 3023B.

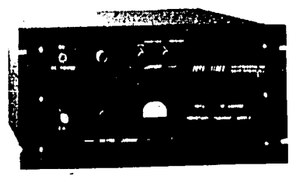
Note 1: All models furnished with meters for current and voltage at $10.00 additional.
Note 2: Voltage adjustable ±10% unless otherwise indicated
** Max Imp Source

P-250M

P-20-05



P-62M

P-15-15M

P-158 has 3 modules in 19" rack mount frame 5¼" high. Two P-58's + one P-91

## NEW 0-50 AMPERE CONSTANT-CURRENT SUPPLY

- High Current; 500-Watt
- Regulation 0.5% full scale
- Silicon Rectifiers; Power Transistors
- Emitter current for each pass transistor independently monitored

P-87

- Short-circuit protected; Heat sink thermal relays for added safety
- Current Ranges: 0.75, 1.5, 3.0, 7.5, 15, 30 and 50 amps; 10-12 volt output.

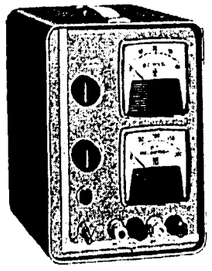
## MID-EASTERN'S NEWEST LINE OF TRANSISTORIZED POWER SUPPLIES . . .

### THE ST SERIES

- Extremely high reliability
- Incomparable ease of servicing — interchangeable plug-in modules
- Economy — on a dollars-per-watt basis Mid-Eastern Power Supplies are the best buy on the market.

**MID-EASTERN ELECTRONICS POWER SUPPLIES AND INSTRUMENTS**

### SPECIFICATIONS



**INPUT:** 100-135 VAC, 60 cps. single phase
**LINE REGULATION:** 0.005% of max. rated V for 100-135 VAC change
**LOAD REGULATION:** 0.05% for 18V units, 0.03% for 36V units, 0.02% for 60V units, 0.01% for 100V units
**RIPPLE:** < 500 microvolts, rms.
**SIZE:** 19" rack panels 15" deep
**DELIVERY:** stock to 3 weeks
**PROTECTION:** no fuses — automatic variable current cut-off point
Complete troubleshooting and adjustment data provided.

### 19 NEW STANDARD MODELS

| DC OUTPUT | P.H. IN INS. | PRICE | DC OUTPUT | P.H. IN INS. | PRICE |

| 36V @ 22A | 8¾ + 8¾ | 1225 | | | |

## THIS TRANSISTORIZED MINIATURE PORTABLE POWER SUPPLY SERIES GIVES MAXIMUM PERFORMANCE AT A MINIMUM PRICE . . .

### MP 40-.2 *

- Electronic overload protection
- Continuously variable electronic current limiting
- Completely programmable from a distant point
- Compact — only six inches wide
- Both current and voltage meters

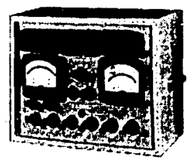
### SPECIFICATIONS

**INPUT:** 105-125 VAC, 50-440 cps, single phase
**OUTPUT:** 0-40 VDC @ 0-200 ma, continuously variable
**REGULATION:** 0.05% 0-full load, 0.1% line
**RIPPLE:** less than 500 microvolts, rms.
**TERMS:** net 30 days F.O.B. Springfield, N. J.
**DELIVERY:** from stock
**QUANTITY DISCOUNTS START AT 25 UNITS**

**PRICE: $159.**

### APPLICATION

Primarily designed for convenient bench use to provide bias and other voltages, the MP 40-.2 can also be used as a component of an automatic system since it can be programmed at 500 ohms/volt from a distant point.

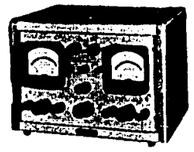


*Models with other current-voltage combinations available (please write).

## INSTRUMENTS

### UHR STANDARD BRIDGE MODEL 801

- The only standard in the Ultra High Resistance range
- 1000 Ω to 110 Million Megohms
- Accuracy 0.08% below 1100 megohms
- Completely self-contained



**PRICE:** $3495.00
**DELIVERY:** 90 days
**TERMS:** net 30 days F.O.B. Springfield, N. J.

### MEGATROMETER

- For the direct measurement of insulation resistance up to 5000 million megohms
- 0 to 1000 VDC continuously variable
- Built-in Calibration Standard 0.2%

**PRICE:** Model 710 — $865.00
Model 710H (to 5 x 10¹⁰ Ω) — $1495.00
**DELIVERY:** 45 days
**TERMS:** net 30 days F.O.B. Springfield, N. J.

**RESISTOR STANDARDS UP TO 10 MILLION MEGOHMS**

## D.C. POWER SUPPLIES

**IMMEDIATE DELIVERY**

### 0-32 V.D.C. 100 Mv. Ripple

Input: 115 V.A.C. 60 Cycles, Single Phase

| Amps. | Model | Style | H | W | D | Fig. |
|---|---|---|---|---|---|---|
| 5 | KM75 | Rack | 8¾" | 19" | 9½" | D |
| | KM75B | Bench | 9" | 17" | 9" | E |
| 10 | KM81 | Rack | 8¾" | 19" | 9½" | D |
| | KM81B | Bench | 9" | 17" | 9" | E |
| 20 | KM87 | Rack | 8¾" | 19" | 9½" | D |
| | KM87B | Bench | 10½" | 22" | 12" | F |
| 40 | KM93 | Rack | 12¼" | 19" | 13" | — |
| | KM93B | Bench | 14" | 22" | 15" | B |

**FEATURES**

- Vacuum Varnish Impregnated Magnetic Components.
- 4½" Rectangular 2% Accuracy, D.C. Panel Meters (3½" on small units).
- Controls include power switch, line and load fuses, pilot light, voltage control knob, output binding posts.
- Voltage Regulation: 1/10 Load 35 Volts, Full Load 32 Volts
- Panel Type Carrying Handles.
- Convection Cooled Continuous Duty Ratings.

Bulletin No. 102A

### 0-125 V.D.C. 1% Ripple

Input: 115 V.A.C. 60 Cycles, Single Phase

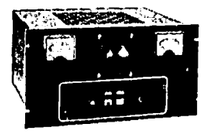
| Amps. | Model | Style | H | W | D | Fig. |
|---|---|---|---|---|---|---|
| 2.5 | RS10 | Rack | 8¼" | 19" | 9" | D |
| | RS10B | Bench | 10½" | 22" | 12" | F |
| 5 | RS20 | Rack | 10½" | 19" | 13" | D |
| | RS20B | Bench | 12¼" | 22" | 15" | F |
| 10 | RS30 | Rack | 12¼" | 19" | 13" | — |
| | RS30B | Bench | 14" | 22" | 15" | B |
| 20 | RS40 | Rack | 17½" | 19" | 13" | — |
| | RS40B | Bench | 19¼" | 19" | 15" | C |

**FEATURES**

- Vacuum Varnish Impregnated Magnetic Components.
- Non-Aging Rectifiers (Germanium or Silicon).
- 4½" Rectangular 2% Accuracy D.C. Panel Meters (3½" on small units).
- Controls include Power Switch, Line and Load Fuses, Pilot Light, Voltage Control Knob and Output Binding Posts.
- Both D.C. Terminals above ground and isolated from A.C. Line.
- Panel Type Carrying Handles.
- Convection Cooled Continuous Duty Ratings.

Bulletin No. 204A

### 0.32 V.D.C. 4% Ripple



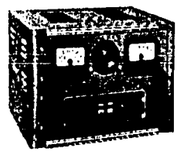
Input: 208 V.A.C. 60 Cycles, 3 Phase

| Amps. | Model | Style | H | W | D | Fig. |
|---|---|---|---|---|---|---|
| 100 | FR100 | Floor | 46" | 22" | 18" | A |
| 200 | FR200 | Floor | 46" | 22" | 24" | A |

**FEATURES**

- Fully Self-Protecting Circuit.
- Pushbutton Operated Magnetic Contractor.
- Indicating Type AC Input Fuses.
- Adjustable Overcurrent Control in D.C. Circuit.
- Thermal Overload Device on Rectifier.
- Overload Warning Light and Reset Button.
- 4½" Rectangular, 2% Accuracy Panel Meters.
- Low Voltage Regulation: Approx. 5-8%.
- Ball Bearing Type Casters.
- Input Receptacle and Mating Plug.
- All receptacles, terminals and controls clearly designated.
- Budget Priced.

Bulletin No. 155



### New! TRANSISTOR REGULATED POWER SUPPLIES

| 4-32 Volts DC | | 24-32 Volts DC | |
|---|---|---|---|
| AMPS | MODEL | AMPS | MODEL |
| 1½ | TR10 | 5 | BR20 |
| 4 | TR20 | 10 | BR30 |
| 10 | TR30 | 20 | BR50 |
| 15 | TR40 | 30 | BR70 |
| Bulletin No. 105 | | Bulletin No. 107 | |

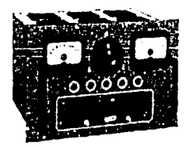
**FEATURES**

- Regulation ± ½% line & load.
- Input 105-125 V. AC. 60 CPS single phase.
- Zener Diode Reference.
- Ripple less than 5 M.V.
- Vacuum varnish impregnated magnetic components.
- Short Circuit Protection.
- Controls include power switch, fuses, pilot light, voltage control knob and output binding posts.
- 2% Accuracy Panel Meters.
- Both output terminals above ground and isolated from A.C. line.
- Panel type carrying handles.
- Continuous duty ratings.
- High efficiency.

**GENERAL PURPOSE UNITS**

OUTPUT: 0-30 Volts D.C. Unfiltered Full Wave.
INPUT: 115 V.A.C., 60 C.P.S.I. ϕ.
Model GM72 5 Amperes
Model GM78 10 Amperes
Model GM84 20 Amperes
Model GM90 50 Amperes
FEATURES: 2% accuracy Panel Meters. Line and Load Fuses. Switch. Pilot Light. Binding Posts. Many other standard models available.

Bulletin No. 178A



**AIRCRAFT BATTERY SUBSTITUTE**

Specifically designed to operate rotating equipment

OUTPUT: 0-30 V.D.C., 20 Amperes.
RIPPLE: Less than 1%.
INPUT: 115 V.A.C., 60 C.P.S. 1 ϕ.
REGULATION: 1/10 Load 35 Volts, Full Load 30 Volts
FEATURES: Ammeter overcurrent protection circuit prevents needle 'slam' when starting inverters & motors.
MODEL KM88 ...Rack Mount
MODEL KM88B...Bench

Bulletin No. 100A

**DUAL RANGE POWER SUPPLY**

OUTPUT: 0-32/64 V.D.C., 40/20 Amps.
RIPPLE: Within 1% of aver. DC.
INPUT: 115 V.A.C., 60 C.P.S. ϕ.
FEATURES: Thermal overload protection, indicating line and load fuses, overload warning light, dual range voltmeter.
MODEL KM95 ...Rack Mount
MODEL KM95B...Bench

Another reliable GENERAL MAGNETICS "MAG MOD" Miniature

TYPE MCM 515-1 SHOWN ACTUAL SIZE. COMPLETELY RUGGEDIZED, VIRTUALLY SHOCK AND VIBRATION PROOF. WEIGHS ONLY ONE OZ.

NEW **MAGNETIC** *multiplying* **MODULATOR**

Specifically designed to deliver an analog output voltage which is the continuous product of two variable input voltages. One of these is an excitation voltage which varies over a pre-determined range; in this case, 0 to 1 VRMS 400 cycles per second. The other signal is a DC current which varies between 0 and ± 400 μa. The output voltage is 400 cycles AC, and is always in phase or 180° out of phase with the variable excitation or fixed reference, i.e., in phase when the variable amplitude DC signal is positive, and 180° out of phase when the DC signal is negative.

*THERE IS NO SUBSTITUTE FOR RELIABILITY!*

Specify "MAG MOD" miniature components for infinite life, faster response time, negligible hysteresis and extreme stability. Call or write for new Brochure 102 on "MAG MOD" Miniaturized Magnetic Modulators and Magnetic Multiplying Modulators.

**ELECTRON ARC**

Typical compact DC power pack with output 70 to 265v DC in 5v steps, 45 amps max. Automatic on-off sequence isolates on-off transients from silicon rectifier. Fast acting current overload circuit automatically shuts down the system in proper sequence. Typical uses: Ionics processes for purification of brackish water, electroplating, charging high energy capacitor banks and other applications requiring exceptional dependability and compactness.

**SPECIAL TRANSFORMERS AND POWER SUPPLIES**
- Up to 100 kw and higher
- Wide range of frequencies and voltages

**DC POWER SOURCES AND RECTIFIERS**
- Accurately controlled outputs
- Wide range of voltages and currents

**SPECIAL ELECTRONIC EQUIPMENT**
- With transistorized circuitry where required

**HIGH INTENSITY LIGHT SOURCE POWER SUPPLIES**
- Infrared or visible light
- Controls for voice communication by light beam
- 2 to 300 watts; light source diameters from 0.005" to 0.110"; brightness from 15,000 to 30,000 candles/sq. in.

For your specialized electrical or electronic equipment needs, send complete specifications. Our Engineering Department will submit a firm quotation with performance guarantee and delivery date.

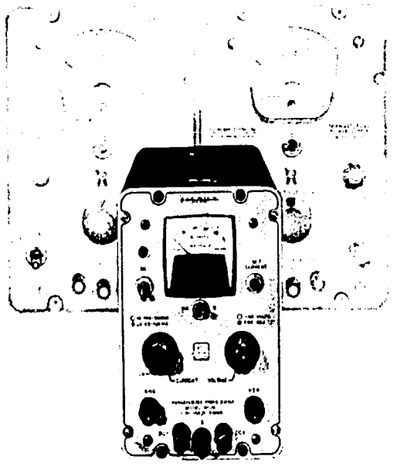
Actual Size

*For complete specifications and application data on "Mag Mod" Miniature and Standard Components, call or write.*

Miniaturized design permits engineers to employ these new components in transistorized printed circuit assemblies and wafer type structures. All models offer maximum reliability, fully ruggedized construction and conform to MIL-T-27A specifications.

- COMPLETE RELIABILITY
- INFINITE LIFE
- FASTER RESPONSE TIME
- NEGLIGIBLE HYSTERESIS
- EXTREME STABILITY (Ambient Temp. Range from −75° to +135°C)
- COMPACT SIZE
- LIGHTWEIGHT



Typical circuit applications for Magnetic Modulators are algebraic addition, subtraction, multiplying, raising to a power, controlling amplifier gains, mechanical chopper replacement in DC to fundamental frequency conversion, filtering and low signal level amplification.

## FROM THE SAME TERMINALS!

The Power Designs Inc. Model 4005 Power Supply adds a new dimension to the application of d-c sources for laboratory instrumentation. Truly universal, the Model 4005 may be operated as a *constant voltage* source, a *constant current* source, a *constant voltage* source with *automatic current limiting* or a *constant current* source with *automatic voltage limiting*.

The Model 4005 employs semiconductor devices exclusively in a new proprietary circuit called.....*AMBITROL

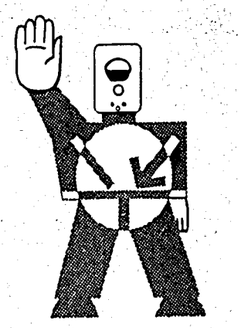
AMBITROL* is a dual regulator system permitting continuous control of voltage or current with automatic electronic cross-over to either mode of operation.

The supply also features remote voltage programming, dual concentric controls for both coarse and fine adjustment of voltage or current and the HEATRAN® circuit for electronic control of power transistor dissipation.

*TM

**MODEL 4005 SPECIFICATIONS**
INPUT: 105-125 volts, 55-440 cycles single phase.
TEMPERATURE: Continuous duty at full load 0-50° C. ambient
POLARITY: Positive or negative output terminal may be grounded
DIMENSIONS: 5¾" W x 8⅛" H x 11¾" D.

**CONSTANT VOLTAGE**
Range: 1-40 vdc, 0-0.5 amperes.
Regulation: .05% or 10 millivolts max. for line or load variations.
Ripple: .001% or 500 microvolts max.
Response Time: Less than 50 microseconds.
Source Z: 0.1 ohms to 20 kc, 0.5 ohms to 1 mc.



**CONSTANT CURRENT**
Range: 25 to 500 milliamperes.
Voltage compliance: Output current constant to full rated output voltage of 40 volts
Regulation: .05% or 250 microamperes max., for line or load variations.
Ripple Content: .01% or 25 microamperes max.
Source Impedance: 100,000 ohms approx.

**PROVEN RELIABILITY—**
**SOLID-STATE POWER INVERTERS**
**over 260,000 logged hours— voltage-regulated, frequency-controlled, for missile, telemeter, ground-support, 135°C all-silicon units available now—**

Interelectronics all-silicon thyratron-like gating elements and cubic-grain toroidal magnetic components convert DC to any desired number of AC or DC outputs from 1 to 10,000 watts.

Ultra-reliable in operation (over 260,000 logged hours), no moving parts, unharmed by shorting output or reversing input polarity. Wide input range (18 to 32 volts DC), high conversion efficiency (to 92%, including voltage regulation by Interelectronics patented reflex high-efficiency magnetic amplifier circuitry).

Light weight (to 6 watts/oz.), compact (to 8 watts/cu. in.), low ripple (to 0.01 mv. p-p), excellent voltage regulation (to 0.1%), precise frequency control (to 0.2% with Interelectronics extreme environment magnetostrictive standards or to 0.0001% with fork or piezoelectric standards).

Complies with MIL specs. for shock (100G 11 misc.), acceleration (100G 15 min.), vibration (100G 5 to 5,000 cps.), temperature (to 150 degrees C), RF noise (I-26600).

AC single and polyphase units supply sine waveform output (to 2% harmonics), will deliver up to ten times rated line current into a short circuit or actuate MIL type magnetic circuit breakers or fuses, will start gyros and motors with starting current surges up to ten times normal operating line current.

Now in use in major missiles, powering telemeter transmitters, radar beacons, electronic equipment. Single and polyphase units now power airborne and marine missile gyros, synchros, servos, magnetic amplifiers.

Interelectronics—first and most experienced in the solid-state power supply field produces its own all-silicon solid-state gating elements, all high flux density magnetic components, high temperature ultra-reliable film capacitors and components, has complete facilities and know how—has designed and delivered more working KVA than any other firm!

For complete engineering data, write Interelectronics today, or call LUdlow 4-6200 in New York.

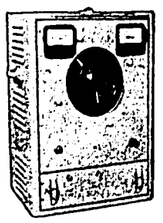
FROM MILLIWATTS TO KILOWATTS

# HIGH VOLTAGE POWER SUPPLIES AND EQUIPMENT

We have sold quantities of these power supplies to laboratories, industrial concerns, the government and universities. Only the best available selected material goes into these units, so that you will have many years of dependable service. Only a few of our standard models are shown below. Quotations on special supplies cheerfully given.

# PRECISE MEASUREMENTS COMPANY

## HIGH VOLTAGE POWER SUPPLIES

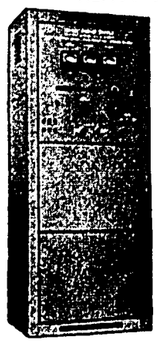


One of the most popular power supplies on the market. Completely redesigned for greater ruggedness and convenience of operation. Widely used for powering electronic equipment and for routine breakdown and insulation testing. Output voltage is well filtered D.C. which is adjustable with convenient front panel control. Input is 115 Volt, 60 cycle A.C. Equipment is available without meter, with one meter (4½"), with two meters, or with larger 6" precision 1% mirror scale movement. Regulated models offer closely stabilized output voltage regardless of line or load changes.

| Model | | Maximum Voltage | Price | Price Regulated Model |
|---|---|---|---|---|
| 6001 | With Kilovolt Meter | 1,000 | $ 75.00 | |
| 6000 | | 2,500 | 60.00 | |
| 6000-A | With Kilovolt Meter | 2,500 | 80.00 | $120.00 |
| 6005 | | 5,000 | 75.00 | |
| 6005-A | With Kilovolt Meter | 5,000 | 95.00 | 135.00 |
| 6010 | | 10,000 | 85.00 | |
| 6010-A | With Kilovolt Meter | 10,000 | 105.00 | 145.00 |
| 6015 | | 15,000 | 95.00 | |
| 6015-A | With Kilovolt Meter | 15,000 | 115.00 | 155.00 |
| 6025-A | With Kilovolt Meter | 25,000 | 175.00 | 205.00 |

MIRROR SCALE HIGHER ACCURACY METERS: Recommended where more exact settings or measurements are needed. Meter size has been increased to 6 inches for easier reading. Price $35.00 additional on any meter equipped model.
TWO METER MODEL ..... ADD $35.00

## INDUSTRIAL POWER SUPPLIES



These industrial type power supplies are built for service and efficiency. All are of the transformer type and employ husky components that have been selected for their power handling capacity. Controls are arranged so that operation is greatly simplified and a number of safety features are built in for maximum protection of personnel and equipment. Output is continuously variable from zero to full rated value. Polarity reversing models (as illustrated) can be had at additional cost.

**Regulated Types Available**

Standard hum level 5% or less. .01% to 1% ripple available. All power supplies have automatic overload cutout control circuits. Regulated models available.

| Model | Voltage | Current | Price |
|---|---|---|---|
| F-500V | 0-500 | 3 Amp | $800.00 |
| F-6001 | 0-1000 | 2 Amp | 975.00 |
| F-6002 | 0-2000 | 1 Amp | 985.00 |
| F-6003-A1 | 0-3000 | 100 MA | 375.00 |
| F-6003-AV | 0-3000 | 500 MA | 550.00 |

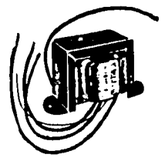
| F-6005-A1K | 0-5000 | 1 Amp | 1200.00 |
| F-6010-A1 | 0-10,000 | 100 MA | 800.00 |
| F-6020-A05 | 0-20,000 | 50 MA | 975.00 |
| F-6050-T | 0-50,000 | ½ MA | 600.00 |
| F-6100-T | 0-100,000 | ½ MA | 1100.00 |

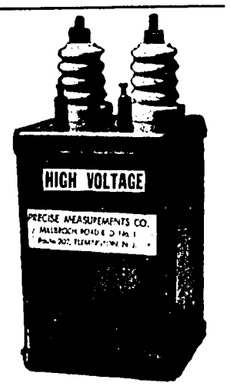


## HEAVY DUTY POWER SUPPLIES

For use in applications where high voltages at extra high currents are required. Illustrated is our 100 KW Model, rated for 0 to 7,000 Volts at 14 Amperes DC. This unit is housed in a single convenient cabinet. Output voltage is regulated against line and load changes. Voltage is smoothly adjustable from zero to full output. Automatic circuits protect against overvoltage or over current conditions, turning off main power in a split second. Use of special transformer construction allows constant load drain at full rated output. All power supplies in this series are available with fixed or adjustable output and with or without regulation.

| Model | Voltage | Current |
|---|---|---|
| A-10 | 0-1000 | 5 amperes |
| A-30 | 0-3000 | 5 amperes |
| A-31 | 0-3000 | 10 amperes |
| A-32 | 0-3000 | 20 amperes |
| A-50 | 0-5000 | 5 amperes |
| A-51 | 0-5000 | 10 amperes |
| A-72 | 0-7000 | 15 amperes |
| A-100 | 0-10,000 | 5 amperes |
| A-110 | 0-10,000 | 10 amperes |
| A-300 | 0-30,000 | 5 amperes |

## TRANSFORMERS, HIGH VOLTAGE

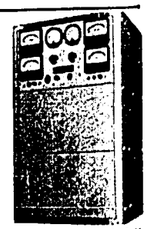


For experimental, industrial, or production use. These units are small and compact and rated for constant service. Primary designed for 115 Volts, 60 cycle. Secondary is isolated. Only standard models are listed. We can wind Specials for any frequency or voltage.

| Model | Voltage | Model | Voltage |
|---|---|---|---|
| 1 KVT | 1 KV | 10 KVT | 10 KV |
| 2 KVT | 2 KV | 15 KVT | 15 KV |
| 3 KVT | 3 KV | 25 KVT | 25 KV |
| 5 KVT | 5 KV | 50 KVT | 50 KV |

## PACKAGED POWER SUPPLIES

These conveniently packaged power units will be found ideal for applications requiring minimum size and weight. Features isolated high voltage terminals permitting either the positive or negative side to be grounded. Rectifier tubes are operated from separate filament transformers so that DC output voltage can be varied from zero to full rated value. Selenium rectifier types have extra cells to assure operation under high line voltage or light loading. All standard units have well filtered DC output. Power packs with AC output available on order.



| Model | Output Voltage | Current | Model | Output Voltage | Current |
|---|---|---|---|---|---|
| 05-KV-5MA | 500 Volts DC | 5 Ma. | 20-KV-1MA | 20 KV DC | 1 Ma. |
| 1-KV-5MA | 1 KV DC | 5 Ma. | 20-KV-5MA | 20 KV DC | 5 Ma. |
| 2-KV-5MA | 2 KV DC | 5 Ma. | 30-KV-1MA | 30 KV DC | 1 Ma. |
| 5-KV-1MA | 5 KV DC | 1 Ma. | 30-KV-5MA | 30 KV DC | 5 Ma. |
| 5-KV-5MA | 5 KV DC | 5 Ma. | 50-KV-1MA | 50 KV DC | 1 Ma. |
| 10-KV-1MA | 10 KV DC | 1 Ma. | 50-KV-5MA | 50 KV DC | 5 Ma. |
| 10-KV-5MA | 10 KV DC | 5 Ma. | 75-KV-1MA | 75 KV DC | 1 Ma. |
| 15-KV-1MA | 15 KV DC | 1 Ma. | 100-KV-1MA | 100 KV DC | 1 Ma. |
| 15-KV-5MA | 15 KV DC | 5 Ma. | | | |

## CONSTANT CURRENT POWER SUPPLIES

Designed for application where output current must remain constant regardless of loading resistance changes. Used for magnet fields, plating applications, gaseous lamps. Dependable magnetic current stabilizer has no moving parts, no tubes, no transistors to replace. Simply set current to desired level, no balancing or other adjustments needed. Ideal for lamp operation since operating state ionizing voltage in no way affects lamp current. Standard hum level 5%. Lower hum levels available on order.

| Model | Maximum Voltage | Maximum Current |
|---|---|---|
| C-25-700 | 25 Volts | 700 Amperes |
| C-70-70 | 70 Volts | 70 Amperes |
| C-500-10 | 500 Volts | 10 Amperes |
| C-Duel 500-10 | 500 or 1,000 Volts | 10 or 20 Amperes |
| C-800-2 | 800 Volts | 2 Amperes |
| C-1000-100 | 1000 Volts | 100 Amperes |

Duel 500 V - 500 V, 10 Ampere Power Supply. Isolated outputs may be seried or paralleled.

## AC INSULATION and BREAKDOWN TESTERS

Used in testing insulation where AC voltages are desired. Dual instruments are also available which provide choice of AC or DC output with simple toggle switch selection. Units include kilovoltmeter, current meter and automatic overload cutout circuits.

| Model | Voltage | VA | AC | AC and DC Price |
|---|---|---|---|---|
| 3000 | 0 to 3,000 | 75 | $150.00 | $ 250.00 |
| 3010 | 0 to 3,000 | 300 | 250.00 | 400.00 |
| 3050 | 0 to 3,000 | 1,500 | 500.00 | 650.00 |
| 3100 | 0 to 6,000 | 3,000 | 700.00 | 1,100.00 |

**L. LEVINTHAL ELECTRONIC PRODUCTS**
**Subsidiary of Radiation Incorporated**

*Levinthal Model 225P Power Supply is rated for 6 kw at 15 kv*

Levinthal's power-supply capabilities are specialized in the kilovolts-at-amperes level.
In this area there are available a number of standard designs that meet many routine requirements. Where needs are more specialized, custom designs can be produced. Ask for a proposal on your particular problem.

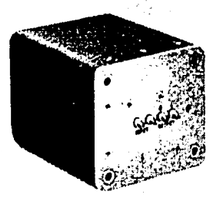
**KUPFRIAN**
**TRANSISTORIZED POWER SUPPLIES**

**STANDARD AND SPECIAL**

For low-cost standard supplies and special custom built units, consult Kupfrian Manufacturing Corp. The years of engineering and design experience by the Kupfrian organization guarantee a quality product economically priced.



- STANDARD TRANSISTORIZED POWER SUPPLIES — Converters and Inverters (similar to above unit) available from stock. Outputs range from 20 to 750 watts.
- CUSTOM BUILT UNITS — Designed and engineered to commercial and military specifications. Send your requirements for a prompt quotation.
- STANDARD FEATURES INCLUDE — 80% efficiency — wide temperature range — excellent voltage regulation — approximately .4% ripple solid state design.

Write for Bulletin 6074 giving details and prices.

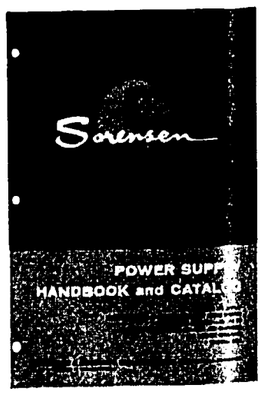
Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 135-240.

**Model QM6.3-.32.** Miniature Transistorized Regulated D-C Supply features regulation to ±0.05% for combined line and load variations. This is one of more than 180 miniature component-type power packs offered by Sorensen. They include, in addition to highly regulated d-c supplies, dc-to-ac inverters and dc-to-dc converters.

**Model Q12-15A.** One of the 15 Sorensen Q Series high-precision transistorized low-voltage supplies, features voltage regulation to ±0.05% for combined line or load variations. Models for 6, 12, 28 vdc out, with power capacities up to approximately 240 watts. Similar QR Series features precision regulation with wide output voltage adjustment range. Two models: 0-75vdc at 2 amps max and 0-36vdc at 4 amps max.

**Model 2150-5 (Control Section).** This is just one of a tremendous variety of Sorensen high-voltage d-c supplies, high-voltage a-c and a-c/d-c testers, and electrostatic-generators. Models completely cover the voltage range from 1000 to 600,000 volts. Power outputs range up to 60 kilowatts.



# 3 out of 400 power supplies

## listed in the BIG, NEW SORENSEN "Power Supply Handbook and Catalog"

**32-pages of important specifying data on...**

• Regulated d-c supplies • Frequency changers (variable frequency power sources) • High-voltage products—to 600 kv • Miniature transistorized inverters and converters • Line-voltage regulators.

More than 400 models are covered . . . plus important technical selection and application data. Write for your copy of the new Sorensen catalog today. Sorensen & Company Inc., Richards Avenue, South Norwalk, Connecticut. 0.12

# FLEXIFORMER® *Packaged Transformer Primary*

"A *Do-it-yourself*" TRANSFORMER

- A MULTIPLE SOURCE OF A-C VOLTAGES
- A CURRENT TRANSFORMER

TYPE TP150

This "do-it-yourself" transformer is a self-contained toroidal primary coil complete with SUPERIOR 5-WAY Binding Posts for connections. The binding posts are colored for relative polarity identification. The primary consists of a strip-wound silicon steel core having a coil of 400 turns of #24 B&S gauge copper wire. When used as a source of a-c voltage, the center opening permits hand threading the proper number of secondary winding turns to obtain the desired output voltage. When used as a current transformer, the FLEXIFORMER winding becomes the secondary winding with the current induced by a wire passing through the center opening.

**. . . AS A CURRENT TRANSFORMER**

FLEXIFORMER type TP150 becomes the secondary winding when used as a current transformer. A current carrying conductor passing through the center opening serves as the primary. When used with a 0-1 ampere ammeter, currents up to 400 amperes can be measured with an accuracy of 1% at 60 cycles. Can be portable or fastened permanently in place.

**. . . AS A SOURCE OF A-C VOLTAGE**

FLEXIFORMER type TP150 has an input rating of 120 volts, 50/60 cycles single phase and an output rating of 150 VA. The voltage of the secondary is proportional to the number of turns hand wound through the center opening. The correct number of turns is determined by dividing the desired output voltage (plus approximately 25%) by 0.3.

## POWERSTAT® *Decade Line Corrector*

Type DLC1005

**INPUT: 120 v., 50/60 cycles, single phase**
**OUTPUT: 5.0 amperes maximum**

| | OUTPUT RANGE | |
|---|---|---|
| | Line Corrector* | Variable Low Voltage Supply* |
| DIAL #1 | 90%-110% | 10%-0-10% |
| DIAL #2 | 99%-101% | 1.0%-0-1.0% |
| DIAL #3 | 99.9%-100.1% | 0.1%-0-0.1% |

*Percent of line voltage.

Can be used as either a variable low voltage supply or as a line corrector. Essentially consists of three POWERSTAT variable transformers individually connected to three buck-boost fixed-ratio transformers. SUPERIOR 5-WAY binding posts with jumpers are provided and arranged so that outputs can be inserted in the line or removed as desired. The output voltage adjustments can be made in any combination or individually as desired.

## EXEL *Loading Reactor*

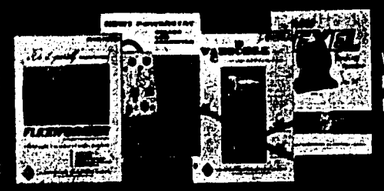
Type LR2

120 volts, 60 cycles
2.0 amperes at 120 volts
Inductive reactance 60 ohms
D-C resistance 4.0 ohms
Inductance 0.16 henrys

Designed to provide a convenient inductive load which can be made adjustable when used in conjunction with a POWERSTAT variable transformer. Used primarily for testing apparatus at various lagging power factors, i.e., to simulate an inductive load. Essentially consists of a gapped, strip-wound silicon steel toroid core, wire-wound and imbedded in epoxy compound. Entire assembly enclosed in a self-contained, durable, high grade phenolic case having two SUPERIOR 5-WAY binding posts for connections. At 60 cycles, the EXEL has essentially a linear current curve from 0 to nominal 2.0 amperes for continuous duty and up to 3.0 amperes for intermittent duty.

## VARICELL® adjustable *A-C/D-C Power Supply*

Type V4050-3



A-C INPUT: 240 v., 50/60 cycles, 3-phase (Primary delta connected) 480 v., 50/60 cycles, 3-phase (Primary wye connected)

A-C OUTPUT: 0-25 v., 40 amps., 3-phase (Secondary delta connected) 0-50 v., 25 amps., 3-phase (Secondary wye connected)

D-C OUTPUT: 0-35 v., 50 amps. (Secondary delta connected) 0-60 v., 30 amps. (Secondary wye connected)

Provides a source of adjustable low a-c or d-c voltage from a-c power lines. Essentially consists of a 3-phase. low voltage POWERSTAT variable transformer combined with a static d-c power supply. Power supply uses highly efficient silicon rectifier cells connected for full-wave 3-phase operation. The a-c and d-c outputs cannot be simultaneously loaded or externally interconnected. The a-c output can be used either single or three-phase.

ALDEN

# Plug-in components for electronic systems

Alden plug-in components offer far more than the convenience and ease of modular packaging . . . the prime advantage of these basic building blocks is that they make possible **more reliability in service.**

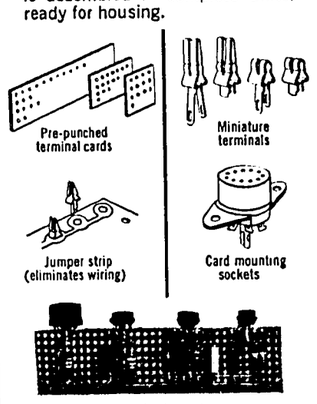
**More in-service reliability through:**

**Tell-tale monitoring** — all controls easily accessible, up front. Tiny tell-tales spot trouble instantly, isolate it to a specific modular unit.

**Quick removal** — malfunctioning unit can be removed with a half turn of the wrist, reducing down-time to 30 seconds with plug-in spare.

**Quick replacement** — malfunctioning component can be snapped out and replaced in seconds.

**In-service checks** — Alden Adapter Cable brings chassis out into the open while in operation for quick checking.



**Single point of check** — all leads brought to single checkpoint — makes possible color coded, vividly illustrated circuit legends.

**Quick repair** — rugged, portable carrying case protects chassis. Replacement of malfunctioning chassis is only air mail time away from service center.

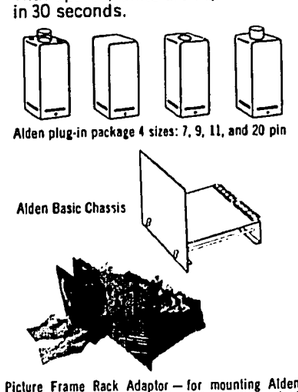
## From layout to finished equipment...in just 3 steps:

**1**

Unitize circuitry in compact, vertical planes with Alden Terminal Card Mounting System — Your circuitry is assembled in complete units, ready for housing.

Pre-punched terminal cards

Miniature terminals



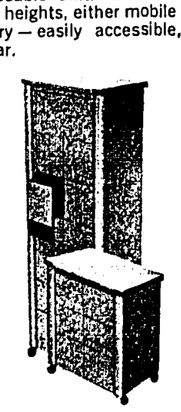
Jumper strip (eliminates wiring)

Card mounting sockets

Complete circuits ready for plug-in package or chassis

**2**

Mount cards in Alden Basic Chassis for tremendous variety with standard components — Alden provides standard plug-in or slide housings. With spares, units are replaceable in 30 seconds.



Alden plug-in package 4 sizes: 7, 9, 11, and 20 pin

Alden Basic Chassis

Picture Frame Rack Adaptor — for mounting Alden Basic Chassis in any combination. Mounts in standard rack or Alden UniRacks.

**3**

Mount sub-assemblies in Alden UniRacks — UniRacks fully utilize all the features of plug-in construction, give you a more compact, serviceable unit. Furnished in 2 basic heights, either mobile or stationary — easily accessible, front or rear.

### Assign Alden testing and sensing elements to each unit to spot trouble instantly

Miniature test jacks — Miniature indicator lights — Miniature Pan-i-lite Switch (momentary contact) — Stacking and patch cord

**Write today for new Alden Plug-in Booklet and handy, up-dated Quick Order Guide.**

### Two time saving, money saving, "GET STARTED" KITS

**Terminal Card Mounting Kit #42** — Includes new Alden Staking Tool plus prepunched terminal cards, ratchet terminals, eyelets, brackets, and card mounting tube sockets —everything for simplified, time saving circuitry layout. **$49.95**

**Basic Chassis and Terminal Card Assortment Kit #37** — All necessary components to mount, house, fasten and monitor your electronic circuitry. Makes sense, save time, establishes reliability. **$249.50**

Other kits from **$11.50**

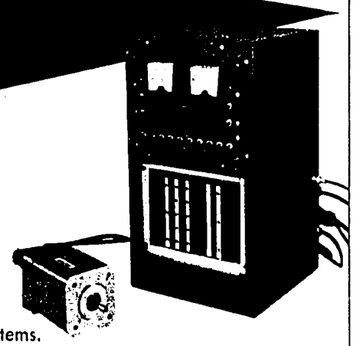
19" Relay Rack Housing with new Series 300 5" x 6" modules

5 Stage Reversible Binary Counter SERIES 300

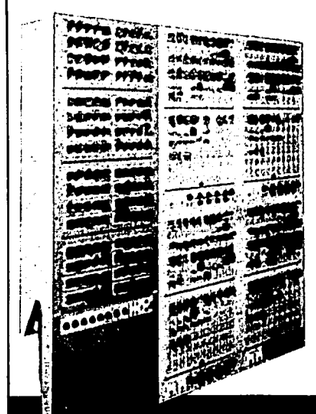


Pulse Delay Tri-Unit SERIES 100

Shift Register Decade Unit SERIES 100

# TRANSISTORIZED DIGITAL SYSTEMS BLOCKS

**FREE**



Send for complete data and specifications on either the 100 Series or 300 Series systems blocks.

Creative engineering by NAVCOR has successfully developed the 100 Series transistorized modules - for digital test equipment and prototype development, and the newer 300 Series card modules - for constructing complete data handling systems. Delivered complete and attractively packaged, these economical systems modules are ready to operate with a minimum of inter-unit wiring.

NAVCOR can engineer and manufacture complete systems to your requirements. Years of experience, devoted exclusively to semiconductor digital systems design, have produced well over 100,000 operating logic stages.

**UNITS AVAILABLE**

- PULSE GENERATORS
- PULSE DELAYS
- FLIP-FLOP STORAGE REGISTERS
- SHIFT REGISTERS
- REVERSIBLE SHIFT REGISTERS
- BINARY COUNTERS
- COMPLEMENTING FLIP-FLOPS
- REVERSIBLE BINARY COUNTERS
- BINARY DECIMAL COUNTERS
- PULSE STANDARDIZERS
- AMPLIFIED NOR LOGIC
- COMPARATORS
- ELECTRONIC SWITCHES
- PULSE SORTERS
- LOW LEVEL AMPLIFIERS
- DIGITAL TO ANALOG CONVERTERS
- DIGITAL DECODERS & ENCODERS
- DIODE GATES
- DELAY MULTIVIBRATORS
- INVERTERS, EMITTER FOLLOWERS

## GENERAL CHARACTERISTICS

**100 SERIES**

Time proven 100 Series modules have been used extensively for bench top test equipment and for rapidly building system prototypes. Complete 10 stage BINARY COUNTERS, SHIFT REGISTERS, etc., are attractively packaged in 2¼" x 10½" slide-in units, which assemble into portable cabinets or relay rack housing.

The completely compatible 100 Series transistor circuitry is operable from D. C. to 200KC.

**300 SERIES**

The completely compatible 300 Series transistor circuitry is operable from D. C. to 300KC and is packaged on 5"x6" glass epoxy cards, with neon indicators and pull handles. There are five stage BINARY COUNTERS, SHIFT REGISTERS, etc. per card.

As many as 100 bits of logic circuitry may be contained in a single 19" relay rack housing. Gold taper pin connectors facilitate inter-unit wiring.

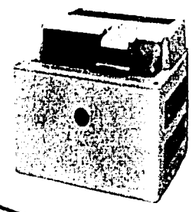
**TUF-PLATE HOLES**
reliable thru-hole construction

PC's famous plated-thru holes are substantially more reliable than eyelets under experimental cycling. Will pass MIL-E-5272A without a failure. Plating is dense, ductile and fine grained. Tuf-Plate holes assure reliable dip soldering as a homogenous portion of your circuitry.

**PRINTED DC SERVO MOTORS**
provide direct drive

PMI permanent magnet dc motors feature a disc-type armature with no rotating iron. They are ideal for instrument applications requiring unusually low inertia, smooth torque, high pulse torque capability, and minimum inductance. Applications include positioning servos, tape reel drives, numerical positioning devices, and intermittent motion systems.

**MINIFY**
tested and proven miniaturization



Landless, plated thru-hole construction saves up to 80% of board space. Components are the size limiting factors, not the circuitry. Each board has the same Tuf-Plate reliability—production proven in thousands of military uses.

PC

**PHOTOELECTRIC TAPE READER**
whisper-quiet operation

This completely transistorized reader has only one moving part (the PMI printed drive motor), thus guaranteeing high reliability. Reading speeds up to 60 characters per second in Model #100, and block reading up to 80 bits in the Model #200 photoelectric tape reader are available. Whisper-quiet operation without brakes or clutches reduce maintenance to a minimum.

Timely tech bulletins written for engineers and designers who wish to keep pace with the newest developments in printed circuitry. Bulletins give specifics on materials, layout, design, assembly, etc. To receive them contact your nearest PC field office.

Streamlined prototype system puts finished boards in your hands quickly. From quote to shipment, your requirements are handled rapidly . . . in a matter of hours. Complete and separate from general production, the Proto-Circuits Division is staffed by experts to help you with money-saving pre-production boards.

ENCAPSULAYER: a multiple layer printed sandwich allows high packaging densities through TUF-PLATE plated hole interconnections. Ideal for miniaturized back panel wiring.
CERAMICIRCUITS: provide ceramic-based printed circuits for applications requiring special mechanical and electrical stability.

**NEW PRODUCT DEVELOPMENTS**
Encapsulayer . . .
Ceramicircuits

**TECHNICAL BULLETINS**
up-to-the-minute literature

**PROTO-CIRCUITS DIVISION**
fast service on prototypes

**CUSTOM PACKAGING**

General Electric's Custom Packaging Service creates small, lightweight, high density electronic circuit modules tailored to specific application and space requirements. Expert engineering and proven manufacturing knowledge transform customer requirements into small, self-supporting electronic packages — inverters, flip-flops, encoders, amplifiers. Provide only your design requirements and receive tested prototypes in the shortest possible time. 217-26

Proven Leadership in PNPN Technology

SSPI SOLID STATE Products, Inc.

ONE PINGREE STREET
SALEM, MASSACHUSETTS • PIONEER 5-2900

- Trigistors
- Controlled Switches
- Miniature Controlled Rectifiers

For details, circle #485 on Reader Service Card

RADIO RECEPTOR

Ideal for all medium and heavy D.C. power applications

Tri-Amp

The SELENIUM RECTIFIER that does not age!

Tri-Amp is superior in every way to conventional stacks. Our special manufacturing process forms a true P-N junction, removing the need for an artificial barrier layer, thus eliminating the cause of deterioration due to aging.

RADIO RECEPTOR COMPANY, INC.
*Subsidiary of General Instrument Corporation*
242 Wythe Avenue, Brooklyn 11, N. Y. EVergreen 8-6000

For details, circle #486 on Reader Service Card

SYNTRON
*"Industrial Rated"*

SELENIUM or SILICON DIODES AND POWER RECTIFIERS

Dependable high quality diodes and rectifiers for all types of industrial applications—welders, battery chargers, wave shaping, clippers, blocking valves, arc suppressors, cathodic protection, etc.

Send your particular Rectifier Requirements for analysis and quotation to the attention of the Rectifier Division.

SYNTRON CO., 83 Lexington Ave., Homer City, Pa.

For details, circle #487 on Reader Service Card

SOLITRON
hermetically sealed, diffused
SILICON RECTIFIERS

Solitron Devices—the first to introduce a hermetically sealed, diffused silicon rectifier by a new process of pressure molding and bonding under heat and vacuum—our own thermal set formula.

- Hermetically sealed — miniature up to 10,000 volts PIV, up to 750 MA. Solidpaks available to higher voltage, and to customer specifications.
- Will exceed MIL-STD 202-103-A humidity test 90% relative humidity at 40°C for 240 hours.
- Will exceed thermal shock test 150°C to —65°C with cycling.
- Will exceed pressure bomb test 120 lbs. of pressure under water for over 4 hours.

*Tested by a leading independent laboratory for hermetically-sealed qualities.

*Sales representatives in all key cities, write for literature.*

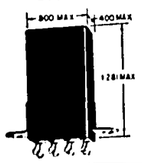
# ALLIED CONTROL RELAYS

## MILITARY RELAYS

**SUBMINIATURE**
**TYPE KHJ-6D**
**DPDT ● DC**



**OPERATING CONDITIONS for KHJ-6D**

**Contact Rating:** Low level up to 2 amps. non-inductive at 29 volts d-c or 115 volts a-c. 3 amp. contacts available on request.
**Ambient Temperature:** —65°C to +125°C
**Vibration:** 5-28 cps at 0.5 in. double amplitude, 28-2000 cps at 20g.
**Shock:** 50g operational.
**Terminals:** 0.2 in. grid spaced plug-in, printed circuit or hooked type solder terminals.

| OTHER RELAY TYPES | Electrical Characteristics: Maximum Contact Pile-Up | Contact Rating Amps. | Coil Operation | Max. Basic Dimensions: Width & Length | | Seated Height |
|---|---|---|---|---|---|---|
| JH-6D | DPDT | 5 | DC | .400 | .800 | .906 |

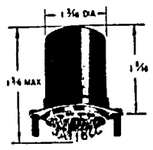
| KHY-6D | DPDT | 2 | DC | .359 | .797 | .759 |

**SENSITIVE**
**TYPE JSH-6D**
**DPDT ● DC**

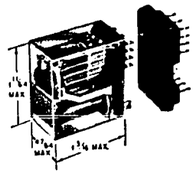


**OPERATING CONDITIONS for JSH-6D**

**Average Pull-in Power at 25°C:** SPDT-25 milliwatts; DPDT-40 milliwatts.
**Contact Rating:** 2 amps. non-inductive at 29 volts d-c or 1 amp. at 115 volts a-c. Low level contacts are available on request.
**Ambient Temperature:** —65°C to +125°C
**Vibration:** 5-55 cps at 0.12 in. double amplitude; 55-2000 cps at 20g.
**Shock:** 50g operational.
**Weight:** 1.1 ounce maximum.

| OTHER RELAY TYPES | Electrical Characteristics: Maximum Contact Pile-Up | Contact Rating Amps. | Coil Operation | Max. Basic Dimensions: Width & Length | | Seated Height |
|---|---|---|---|---|---|---|
| RSH | DPDT | 2 | DC | .765 dia. | | 1.609 |
| SW | DPDT | 5 | DC | .906 | 1.406 | 1.625 |

**MINIATURE**
**TYPE MHJ-18**
**6PDT ● AC or DC**



**OPERATING CONDITIONS for MHJ-18**

**Contact Rating:** Low level up to 5 amps. non-inductive at 29 volts d-c or 2 amps. at 115 volts a-c.
**Ambient Temperature:** —65°C to +125°C
**Vibration:** 5-28 cps at 0.5 in. double amplitude; 28-2000 cps at 20g.
**Shock:** 50g standard.
**Weight:** 4.2 ounces maximum.
**AC:** This relay is supplied with self contained diodes for 60 to 400 cps operation.

| OTHER RELAY TYPES | Electrical Characteristics: Maximum Contact Pile-Up | Contact Rating Amps. | Coil Operation | Max. Basic Dimensions: Width & Length | | Seated Height |
|---|---|---|---|---|---|---|
| CH-12 | 4PDT | 10 | AC or DC | 1.203 | 1.203 | 1.718 |

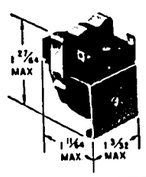
## COMMERCIAL RELAYS

**TELEPHONE**
**TYPE T-154**
**4PDT ● DC**



**OPERATING CONDITIONS for T-154**

**Contact Rating:** 2 amps. resistive or 1 amp. inductive at 29 volts d-c or 115 volts a-c. Low level or 5 amp. contacts available.
**Nominal Coil Power:** 700 milliwatts.
**Minimum Coil Power:** DPDT-125 milliwatts; 4PDT-300 milliwatts.
**Dielectric:** 1000 volts rms at sea level.
**Terminals:** Open relay—plug-in solder lugs or octal plug. Sealed relay—hooked type solder terminals, 14-pin miniature plug or octal plug.
**Enclosure:** Open, dust cover or hermetically sealed.

| OTHER RELAY TYPES | Electrical Characteristics: Maximum Contact Pile-Up | Contact Rating Amps. | Coil Operation | Max. Basic Dimensions: Width & Length | | Seated Height |
|---|---|---|---|---|---|---|
| GK | 6PDT | 2 | DC | 1.140 | 1.687 | 1.828 |

# New miniature telephone-type DC relay!

Takes less space... available up to 4PDT!

Designed to occupy less than ½ the space needed for similar type relays, this compact Aemco Series 142 relay is only 1 1/16" wide! Open and enclosed types available from SPST to 4PDT with coil resistances up to 10,000 ohms. Type G5 or G10 insulation for temperatures up to +125°C. All coils tested for 1000 V breakdown to ground—vacuum varnished and baked on open types. Rugged armature design reduces magnetic loss—boosts relay's efficiency. Silver, palladium or gold alloy contacts are rated up to 3 amps. Contact springs are beryllium copper—all metal parts are cadmium plated with cronak finish.

*Type "K" enclosure...*

The 142 Series Miniature Telephone-Type Relay is also available with a Type "K" enclosure—either as a hermetically sealed unit or with a removable dust cover. Your choice of plug-in or solder terminals.

**Need relays?**
Here's why hundreds of manufacturers choose ... AEMCO

Many manufacturers consider AEMCO a prime source for relays . . . and here's 3 reasons why! 1. We're easy to work with—offer you prompt, personal service and close coordination! 2. Prototype delivery is fast—product reliability and quality is excellent! 3. Imaginative engineering plus a complete line of standard relays in a wide choice of spring and coil combinations, contact arrangements and ratings to choose from!

Your inquiries are invited. Write for our newest relay catalog today, or send specs. for information and prices on specials to your requirements!

# TIME DELAY RELAYS

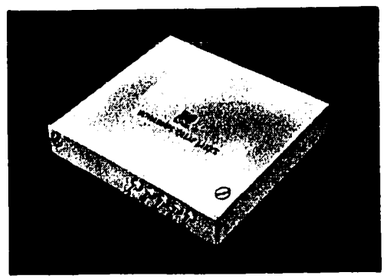
SNAP-ACTION • INSTANT RESET • VOLTAGE AND TEMPERATURE COMPENSATED

Precision built to meet a wide range of military and industrial requirements, these snap-action relays are factory pre-set for delays from 3 to 180 seconds. Features are small size, chatter-free, hermetically sealed with instantaneous resetting contacts. All are metal-cased except "G" and "K" series, glass.

STR Series

G & K Series hermetically sealed in glass

H and S Series for military applications



TIME DELAY SELECTION CHART

| RELAY SERIES | "H" | "S" | "G & "K" | "IR" | "MR" | "CR" | "STR" |

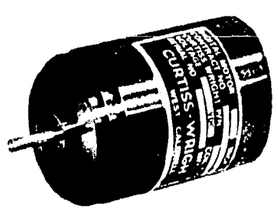
| INPUT VOLTAGE | 6.3, 26.5 117 | 6.3, 26.5 117 | 6.3, 26.5 117 | 22-32 | 28 | 28,117 | 22-32 |
| INPUT FREQUENCY | AC or DC | AC or DC | AC or DC | DC | DC | AC or DC | DC |
| VIBRATION CPS | 5-55 5-500 | 5-55 | — — | 5-500 | 5-500 | 5-55 | 5-500 |
| AMBIENT TEMP. °C. | −65+125 | −55+100 | −55+85 | −65+125 | −65+125 | −55+85 | −65+125 |

**WRITE OR PHONE FOR FREE CATALOG #260E**

Special recommendations on your application requirements available.

## DELAY LINES



Small, lightweight, hermetically-sealed magnetostrictive delay lines with delays from 5 to 12,000 microseconds. Ambient temperature range, −55° to +100° C. A ratio of delay to pulse rise time up to 800:1 with storage capacity up to 6,000 bits. Input and output impedances from 50 to 2,000 ohms with carrier or pulse frequencies up to one megacycle. An adjustment of ±3 microseconds is supplied on standard units. Taps are available with or without the adjustment feature. Withstand vibration to 500 cps at 15 g and shock to 50 g.

## STEPPING MOTORS

### DM SERIES

**Bi-Directional**
**Dynamically Balanced**
**Temperature −65° F. to +165° F.**
**Vibration—20 g to 500 cps**
**Shock—30 g**
**Voltage—28V DC, other voltages available**

For—Missile, Aircraft, Computors, and Navigational Devices—Flight Controls—Automation Feeds for Machine Tools and Controls for positioning and synchronization of aerial cameras, actuator for automatic pilots, controls for food processing machinery. Withstand severe environmental requirements, operate under high shock and vibration. Positive indexing and locking. low power requirement.

**VOLTAGE:** Standard voltage 28 volts DC, other voltages available upon request.
**LIFE:** In excess of five million operations in each direction at rated load.
**TEMPERATURE:** −65° F. +165° F.

**RELIABILITY:** The unit does not fail to convert a single pulse in 1,000,000 operations into equivalent angular rotation.
**VIBRATION:** 20 g to 500 cps.
**SHOCK:** 30 g for 11 milliseconds along each axis.

| | ANGULAR ROTATION | PULSING RATE | WEIGHT | TORQUE |
|---|---|---|---|---|
| MODEL DMA | 36° Bi-directional per pulse | To 40 pulses per second | 8.5 oz. | 8 in. oz. |
| MODEL DMB | 30° Bi-directional per pulse | To 30 pulses per second | 28 oz. | 24 in. oz. |

DESIGN TIMING RELIABILITY INTO YOUR CIRCUITS *specify...*

**NEW MINIATURE AGASTAT®**

**time/delay/relays**

- **Recycling virtually instantaneous—less than .020 seconds**
- **Unaffected by Voltage fluctuations (from 18 to 32 volts DC)**
- **Repeat Accuracy ±5%**

This new AGASTAT meets the environmental requirements of MIL-E-5272A. Built to withstand the rugged conditions of missile and aircraft applications. Lightweight—less than 15 ounces. Space saving—4⅛" tall . . . 1 3/16" wide . . . 1½" deep. Adjustable, with time delays from .030 to 120 seconds. Choice of operation for energizing or de-energizing. For complete specifications, write Dept. A37-76

HILLBURN RELAYS

for Reliability—

HILLBURN relays are the result of careful design, evaluation, and the thorough inspection, adjustment and testing of every completed product.

Your order for HILLBURN relays assures you of a quality product, "on-time" delivery and reliable performance.

HILLBURN manufactures relays to your special requirements plus a complete line, including:

- General Purpose
- Plate Circuit
- Industrial Control
- Printed Circuit
- Latching—Mechanical
- Midget 4—Pole
- Telephone
- Sensitive
- Stepping
- Antenna
- Power
- Plug-in

*More than 25 types*—over 500 variations to meet specific applications.

*Write Dept. RE for catalog covering all relay types.*

Since 1945

Series GMP Plug-In

Series 500 Stepping Relay-Counter Electrical Read-out

Series BC - Control

Series ML - Power

Heart of the Control System

"DIAMOND H" Relays

Look into the heart of the control system for a missile, a computer, a nuclear submarine, or a great many other critical applications. You might be surprised how often you'll find "Diamond H" relays.

Unless, of course, you're one of the increasing number of engineers who've already selected "Diamond H" relays for a spot where they just have to work despite all sorts of adverse conditions.

Hart makes relays of three basic types: miniature, hermetically sealed, aircraft-missile relays (Series R/S); high speed, sensitive, polarized relays (Series P), and general purpose AC, DC relays (Series W).

Technical literature outlining the wide range of characteristics available with each type relay is yours for the asking. You'll find "Diamond H" engineers uncommonly adept at working out a variation of the basic designs to meet your set of specific requirements.

Tell us your needs . . . by phone, wire or letter.

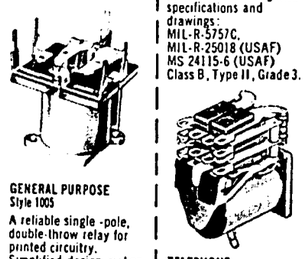
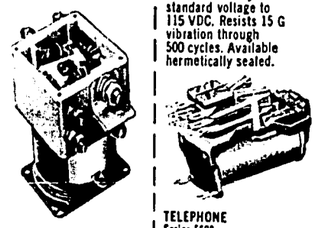
## ... Reliable Relays

**MICRO-MINIATURE**



**Style 6**
Lightweight, crystal can type relay is simple, reliable and versatile. Ideal for miniaturized assemblies. Termination can be provided to meet most requirements.

**Style 6A**
Designed specifically for use in printed circuitry. Installed height is approximately 0.44". Meets applicable portions of MIL-R-5757C and MIL-R-25018 (USAF) Class B, Type II, Grade 3.



**SUB-MINIATURE**
**Style 506**
For Low Level Circuits and General Purpose use. Meets requirements of MIL-R-25018. Available with solder or plug type termination.

**MINIATURE**
**Style 520**
A 6 PDT General purpose relay of simple design and high reliability. Available with isolated contact chamber for low level circuitry use. Meets the following MIL specifications and drawings:
MIL-R-5757C,
MIL-R-25018 (USAF)
MS 24115-6 (USAF)
Class B, Type II, Grade 3.

**GENERAL PURPOSE**
**Style 1005**
A reliable single-pole, double-throw relay for printed circuitry. Simplified design makes it ideal for television and automotive control circuits.

**TELEPHONE**
**Series 5400**
For communications and other circuit control applications. Available in any standard voltage to 115 VDC. Resists 15 G vibration through 500 cycles. Available hermetically sealed.

**HIGH CURRENT**
**Series 8200**
200 amp, high shock relay for aircraft and missile use. Temperature range from —65° C to +125° C. DC only.

**TELEPHONE**
**Series 5600**
New series with bifurcated contacts. Provides high contact reliability. Ideal for computer circuitry. Available in standard voltages. Contact combinations to 6 PDT.

Price Electric has a complete line of relays to meet your requirements. Write for literature and specifications.

# OPTEL

SINGLE LENS PHOTO-ELECTRIC RELAY

For High Speed Reflection Counting

MODEL FT

Capable of sensing lines and filaments of less than .001" section at rates to 1.5 KC. A focused beam is projected against the plane on which the lines or threads lay. Changes in light reflectance during the scanning process are translated into square wave pulses. Gear teeth can be counted in the same manner. Light is projected and returned through the same lens. Other reflex models for pulse or relay output operating with special corner reflectors or from light-dark contrasts. Also scanning beam reflex systems for sensing of random spots in line and for counting small and oddly shaped objects.

# reson-ator

## FREQUENCY SELECTIVE DEVICES

**RESONANT REED RELAYS AND OSCILLATOR CONTROLS**

Reson-ator Resonant Reed Relays and Oscillator Controls are precision electro-mechanical devices engineered to provide the finest, most economical method of detection and generation of frequencies in the audio range. Ideal for any application requiring the stability and long life characteristic of this tuning fork type device.

***Brief Specifications—***

Frequencies: 20 cps to 1600 cps
Coil Resistances: 1 to 1500 ohms DC
Temperature stability: ±.0025%/C °from −40°C to +100°C.
Reference 25°C
Enclosure: Drawn copper can, .750"x .750"x3.281" overall. Provided with standard 7 pin hermetic seal header.
Relay Bandwidths: To suit customer's requirements. From ±.1% to ±4%
Complete specifications and application data available upon request.

and hundreds of Telephone, Railway and Communications companies throughout the world

*This* TELEPRINTER RELAY *is*

The TREPAC Model SSR-530-C works in ANY Teleprinter.

THREE YEARS OF FIELD EXPERIENCE PROVE ABSOLUTE DEPENDABILITY!

TESTED in hundreds of communication circuits, world-wide.

PROVEN RELIABLE by complete dependability under extremes of temperature, shock, vibration, humidity.

ADOPTED as superior replacement for electromechanical polar relays by major telecommunication networks . . . Telephone Companies, Railroads, Gov't Agencies, many others.

ELIMINATES RELAY PROBLEMS.
NO MOVING PARTS —
NO ADJUSTMENTS —
NO MAINTENANCE.

INPUT polar, neutral, either polarity, 15-100 mils. SSR-530-C actually corrects characteristic signal distortion, works perfectly on marginal signals!

OUTPUT Isolated Adj. 60-80 mils (independent of input level!) into any load from 44-2100Ω. Increases teleprinter range.

SPEED Tested to 800 WPM! Suitable for high-speed teleprinter or data circuits.

**FORTY-EIGHT YEARS OF RADIO-ELECTRONIC HISTORY**

are recorded in "Proceedings of the IRE." The photo above shows the issues from 1912 through 1947—thirteen years of rapid advances and earth-shaking accomplishments are not even included in this panorama of progress! Since publication of its first issue, "Proceedings of the IRE" has paced and pioneered in every field of radio from the first vacuum tube through today's giant computers and tiny transistors. The engineers who write, read and use this magazine have transformed the world in forty-eight short years! Is it any wonder that so many advertisers believe these engineers must learn about their products in the fact-packed advertising pages of "Proceedings of the IRE"?

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 135-240.

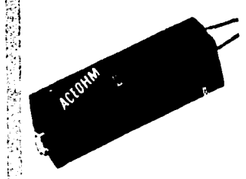
## Potentiometers - Trimmers

## RELIABILITY IN MINIATURIZATION

### ACEPOT®-500 ACEPOT X-500*

Sub-miniature, linear and non-linear potentiometers. Single turn unit, ½" size, ±2% resistance tolerance and ±0.3% ind. linearity.



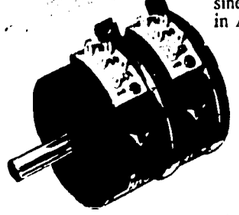
actual size

| | |
|---|---|
| Size | ½" x ½" |
| Weight | 0.25 ounce |
| Resistance Range | 2Ω to 500K |
| Resistance Tolerance | ±2% |
| Linearity | ±0.3% ind. standard |
| Temperature* | −55°C to 125°C* |
| Mechanical Rotation | Continuous or with stops |
| Electrical Angle | 325° std. ≷ available |
| Resolution | 0.12% for 50 K Others comparable |
| Torque | .05oz./in. at 20°C (Bronze) .035oz./in. (Ballbearing) |
| Power | 2W for 60°C rise or 2.5W for 65°C (X-500) |
| Mounting | Threaded bushing, servo, flush or flanged. Ganged up to 6 cupt. |

* X-500 standard high temperature potentiometer. Range: −55°C to 150°C.

### ACEOHM®

Sub-miniature trimmers . . . high temperature, humidity proof for severe environment.



actual size

| | |
|---|---|
| Size | 1¼" x ¼" x 5/16" Standard Mounting holes |
| Weight | 0.2 ounce |
| Resistance Range | 10Ω to 75K — Special to 100K |
| Mechanical Rotation | 25 Turns on lead screw, adjustable over 100% of winding |
| Power Rating | 1.6W at 40°C Derates to 0 at 225°C |
| Temperature Range | −55 to 225°C |
| Resolution | .13% for 75K. Other resistances comparable |
| Dielectric Strength | 1000 volt DC for 60 sec. |
| Load Life | 1000 hours at 180°C |
| Capacitance | Extremely low distributed capacity (moulded hitemp. phenolic case & cover) |

Completely sealed element. Meets and surpasses all applicable requirements of MIL-E-5272A and MIL STD. 202A.

### ACEPOT®

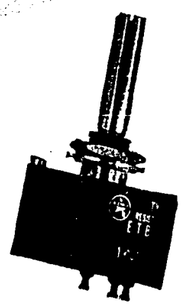
Standard non-linear and linear potentiometers. 0.25% terminal conformity with out padding resistors. Immediately available in sine, cosine, square law and log functions in AIA sizes.

| Typical Spec's: | Sine-cosine | Double Sided Square-law |
|---|---|---|
| Size | 3" | 3" |
| Resistance | 20K ±5% driving | 25K ±5% driving |
| Conformity | ½% pk-pk | ±0.25% |
| Function angle | 360° | ±180° |
| Power | 4 watts | 3 watts |
| Mounting | Servo | Servo |

Submit your design requirements to our Engineering Group for evaluation and quotations.

### ACESET®

Sub-miniature Trimmers. Heat dissipation . . . 2 watts at 60°C. Immediate delivery in resistances of 50Ω to 50 K.



actual size

| | |
|---|---|
| Size | ½" x 5/16" |
| Weight | ½ ounce, including lock washer and nuts |
| Resistance Range | 50Ω to 100K ±10% std. tol. |
| Linearity | ±5% |
| Temperature Range | −55°C to +125°C |
| Mechanical Rotation | 330° Nominal |
| Electrical Angle | 320° Nominal |
| Power | 2 watts for 60°C. rise |
| Mounting | ¼"-32 threaded bushing |

### ACEMHO®

Conductive plastic element. Infinite resolution. Extremely long life. No sudden open-circuit failure possible. Low, low noise. Meets JAN & MIL specs. Patents pending. In sizes from ½" to 1 5/16".

| | |
|---|---|
| Size | 1 5/16" |
| Weight | 3.5 ounces |
| Resistance | to 250K ohm |
| Linearity | 0.5% Ind. standard 0.1% Ind. special |
| Resolution | essentially infinite |
| Power | 3W at 65°C |
| Mounting | bushing and servo |

### ACETRIM*

Sub-miniature trimmers . . . A wide range of resistances are available in this low-cost, space and weight saving unit.

actual size

| | |
|---|---|
| Size | ½" x ½" |
| Weight | 0.25 ounce |
| Resistance Range | 2Ω to 250K ±5% std. tol. |
| Linearity | ±3% |
| Temperature | −55°C to 125°C (to 150°C (X-500) |
| Mechanical Rotation | continuous or with stops |
| Electrical Angle | 325° std. ≷ available |
| Power | 2W for 60°C rise or 2.5W for 65°C |
| Mounting | Threaded bushing, printed circuit, flush, flanged, ganged. |

*Trade Mark

Exact requirements for your particular applications, can be custom designed and mass produced with short lead time. All units are anti-fungus treated and fully sealed against dust, moisture and humidity. Meets applicable JAN-MIL specs including shock and vibration. Send us your specifications for engineering assistance on designs and applications. Complete Fact File and Application Data Sheets available on request. CALL, wire or teletype Dept. A3 at Ace Electronics Associates, Inc., 99 Dover Street, Somerville, Mass. SOmerset 6-5130, TWX SMVL 181.

# TIN OXIDE RESISTORS by CORNING

## Type N

**MIL-R-10509B**—½, 1, 2W at 40°C. Derating to 140°C. Up to 4.2 megohms.

**MIL-R-10509C** New fusion-sealed resistor. ⅛ and ¼-watt. Can be boiled in water without failing moisture specs. 100 ohm to 360 K ohm at 70°C., derating to 150°C.

## Low-Power

For radio, television and similar applications. LPI-3: 3W, 125-40 K. LPI-4: 4W, 125-90 K. LPI-5: 5W, 180-110 K. LPI-7: 7W, 180-90 K. LPI-10: 10W, 180-70 K.

**Also C-42 resistor:** a low-cost, 2W, 70°C. resistor to meet the performance requirements of MIL-R-11B; 130 ohm to 1.4 K.

## High-Power

**Type R** 7 to 115W at 40°C., derate to 235°C.; 10 ohms to 1 megohm. To MIL-R-11804C.

## High Temperature

**Type S** High-temperature to MIL-R-11804C. 1, 2, and 4W at 40°, derate to ½-power at 120°C. Up to 4.2 megohms.

**Type WC-5** Water-cooled HF. Can mount direct on coax line and at RF ground potential. 10 to 300 ohms with ± 15% standard; 10%, 5%, and 1% also available. Dissipates up to 5 KW.

**Type H** High-frequency for dummy antennas, circuit loading, damping, and terminating. 10 ohms to 1 megohm. 5 to 140W.

**Type ST** for highest wattage-to-volume ratio of any metallic oxide resistor. 2½, 5, and 10 W at 25°C., derating to 350°C. 2% and 5% tolerances.

For more information on any or all of these resistors, write for data sheets. Corning Glass Works, 550 High Street, Bradford, Pa.

**FILMOHM**

***microwave resistors***

**FILMOHM Metal Film Resistors offer:** high stability • low temperature coefficient • tinned electrodes • micro-thin resistance film (even at highest frequencies) • quality-controlled dimensions, electrical and high temperature characteristics. Choose from a wide variety of shapes, sizes and base materials for a precision-engineered FILMOHM Microwave Resistor to suit your requirements.

•

**FILMCARD**
Metal film Fibreglass resistance card for all low power attenuators and terminations. Available in a wide range of resistivities. Easily fabricated. Ask about new FILMCARD KIT. Bulletin P-2.

**COAXIAL DISCS AND RODS**
Metal resistance film fused to PYREX base, sealed with micro-thin quartz coating. From BNC to largest line size. Bulletin M-1-1.

**METALLIZED GLASS ATTENUATOR ELEMENTS**
Standard plates available for L through K bands. Bulletin A-1.

**FOTOCERAM* ATTENUATOR ELEMENTS**
Ruggedized precision attenuator elements. Withstands severe shock and vibration. Bulletin FCA-1.
*Reg. T.M. Corning Glass Wks., Corning, N. Y.

**FILMOHM METALLIZED MICA**
For use as rotary and guillotine attenuator elements. Ideal for mm. frequencies. Available in large sheets or fabricated parts. From .001" to .005" thick. Bulletin C-1.

**COAXIAL TERMINATION RESISTORS**
Metal film, ceramic base resistors for ⅜" line coaxial terminations. Useable up to 10 KMC. Bulletin CT-1.

**CERAMIC DISC RESISTORS**
New, low cost, ruggedized disc resistors for coaxial terminations. Bulletin CD-1.

**FLEXIBLE RESISTANCE CARD**
Completely flexible thin plastic resistance card. May be laminated to cavities for use as mode suppressors. Bulletin FR-1.

**HI-POWER COAXIAL LOAD RESISTORS**
Metal film tubular glass resistors, non-inductive, for dummy loads and terminations. Standard and special sizes to 2' long. Bulletin HP-1.

**STRIPLINE RESISTORS**
Mica-base resistors as thin as copper stripline. Cement directly into stripline circuits. Bulletin SL-1.

**MICRO-MODULE RESISTORS**
Available on special order utilizing glass, ceramic or mica base. Custom-designed to suit your microminiature applications. Bulletin FRC-4.

**OTHER PRODUCTS AVAILABLE**
FLEXIBLE DISC RESISTORS • METAL FILM CERAMIC TUBULAR RESISTORS • CRYSTAL RESISTORS

**PRECISION RESISTORS**

RESISTORS, PRECISION, WIRE-WOUND

General purpose, steatite forms
Encapsulated to MIL-R-93-A
Encapsulated resistor assemblies
High voltage to 1000 kv
Air- or oil-immersion applications
Matched pairs to 0.01%
Zero—temperature—coefficient sampling resistors
Shunts
Compensating resistors—nickel, Balco, and copper
Fixed attenuators

POTENTIOMETERS, PRECISION, WIRE-WOUND

Military and civilian applications
General EIA dimensioning

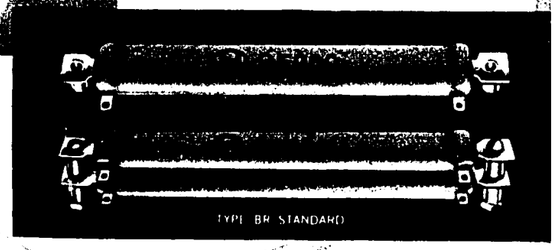
Space Problem?



SPECIFY Blue Ribbon PRECISION SPACE-SAVER RESISTORS

...the Complete Line of Flat and Stack Mounting Wire Wound, Power Resistors

Available in Wattage Ratings from 10 to 75 W
Resistance Range from .10 to 100,000 Ohms

These High Reliability Space-savers feature matched coefficient of expansion with gray vitreous enamel covering for complete protection from overloads and environmental conditions. Aluminum thru-bracket improves heat dissipation, minimizes hot spots, allows a higher wattage rating per unit of space. Bracket construction facilitates stacking and saves additional space.

For Complete Specifications and illustrated bulletin on H-H Blue Ribbon Resistors, call or write, today!

'Gray Line' RHEOSTATS

Complete range from 25 to 1000 watts. Shock resistant construction. High temperature enamel bonding withstands greater overload.

'Gray Line' RESISTORS

Fixed, adjustable, ferrule and axial lead types for all commercial and military applications. Super-ruggedized for complete reliability.

# PRODUCTION POTS WITH CUSTOM SPECS*

**for...**

- * sine-cosine
- * secant
- * square law
- * empirical functions

Designed for exacting requirements in analog computations, Micro-Lectric's Series C-550 servo mount potentiometers provide exceptional conformity to specified mathematical functions—eliminate the need for cams, padding, or other shaping devices.

Single units, or stacked assemblies, in a wide range of resistance values to meet your specific needs.

**Typical Sine-Cosine Characteristics**

| | |
|---|---|
| size | 2 inches |
| resistance range | 200 ohms to 70K per quadrant |
| conformity | 0.25% peak to peak |
| temperature range | —55° to +85° C. |
| noise | less than 100 ohms |
| starting torque | 0.6 oz. in. max. |
| running torque | 0.35 oz. in. |
| life | 1,000,000 rev. |

When the job calls for custom performance plus prompt availability, it will pay you to contact Micro-Lectric. Write today for complete data in Bulletin 550-1.

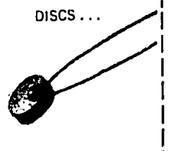
**BREAKTHROUGH!** IN THERMISTOR DESIGN

**Fenwal Electronics' new "identical" thermistors permit complete interchangeability!** What do you need from a thermistor in the way of performance? Reliability? Extreme stability? High shock resistance? Long life? Fenwal Electronics can supply it. But Fenwal Electronics' thermistors provide an additional important characteristic all their own: **they can be supplied with identical resistance temperature curves.**

That means that now, for the first time, you can have complete interchangeability. It means you can rely absolutely on consistently accurate resistance changes versus temperature of Fenwal Electronics' thermistors. It means also you can now achieve accurate, multi-point temperature indication or control through a single system without having to calibrate out each individual sensor.



**FROM FENWAL ELECTRONICS** ... THE MOST COMPLETE LINE OF PRECISION THERMISTORS

GLASS PROBES & BEADS

— 0.006" to 0.100" diameter. Resistance values: 500 ohms to 100 megohms

DISCS ...

— 0.1" to 1" diameter. Resistance values: 5 ohms to 1,000 ohms

WASHERS ...

— .75" diameter. Resistance values: 5 ohms to 3000 ohms

RODS ...

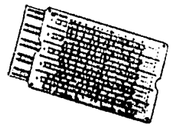
— 0.053" to 0.173" diameter varying lengths. Resistance values: 500 ohms to 500,000 ohms

PROBE Assemblies ...

— Built to your specific requirements,* enclosed and mounted in individual housings or "packages" and ready to install

E-I Matched pairs

— Thermistor beads matched to voltage current characteristics and mounted on special hermetically sealed stems, designed for use in thermal conductivity gas analysis instruments.



**FROM FENWAL ELECTRONICS** ... MORE HELP ON THERMISTOR PROBLEMS

• Complete thermistor engineering service backed by 20 years field experience

• Thermistor Experimental Kit — to help you expedite operations at the bread board stage. Just $19.95 at electronics jobbers

• New Thermistor "Computer" — 5" X 8" "computer" reduces lengthy computations to single "slide rule" setting. Yours for the asking

• New Thermistor Catalog EMC-3

• New Probe and Housing Brochure — Gives selection of probe designs

For complete information, or the name of the Fenwal Representative in your area, write:

ACTUAL SIZE

**SUB-MINIATURE WIRE WOUND RESISTORS**

75 PHYSICAL SIZES

Precision's Type TX resistors are unsurpassed in uniformity of performance.

New winding techniques mass-produce resistors free from dangerous "cross-overs" and insulation breakdowns. Maximum reliability is assured . . . and . . . at mass-production prices.

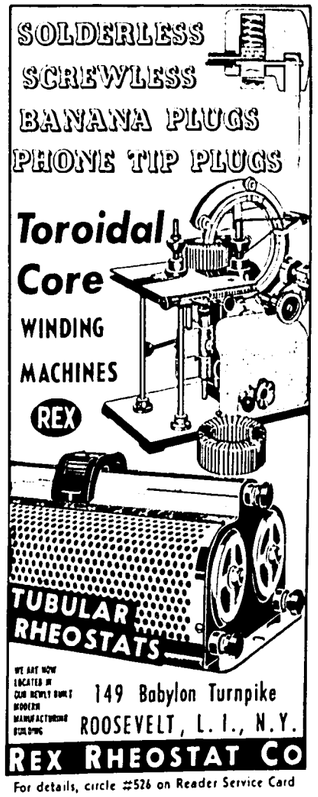
According to your need, PRECISION'S Type TX Resistors may be had in the size and resistance value you want for your circuit. Terminals may be either axial or radial. Tolerances are standard from ±1% to ±1/20%. Where extreme accuracies are required, tolerances to ±1/100% may be obtained . . . inductively or non-inductively wound.

Military requirements are to PRECISION'S specifications.

**PHYSICAL SIZE:** Available in 75 sizes, ranging from diameters from 3/32" through 3/8" and lengths from 3/16" to 1-1/2".

**RESISTANCE RANGES:** From .01 ohm through 5.0 megohm — in any resistance value required or decimal part thereof.

**ACCURACY:** ±5% to ±1/20%. Tolerances ±1/50% to ±1/100% (absolute) available on specification.



**TEMPERATURE COEFF. OF RESISTANCE:** Standard ±0.001%°C. throughout. Special temperature coefficient + 5000 ppm° to ±1 ppm°C.

For complete information about PRECISION'S Sub-Miniature Type TX Resistors, write to:

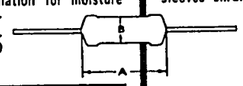
# DESIGN TO-DAY FOR RELIABLE PERFORMANCE THROUGH THE YEARS TO COME

Today's circuits must operate reliably and precisely over long periods of time and under a great variety of exacting conditions. The resistors you choose must match the high performance you project for the entire system.

**SAGE PRECISION WIREWOUND POWER RESISTORS give you:**

Close Tolerance .... to .05% Insulation ..... 1,000 V-rms Minimum
T.C. ..... ± 20 ppm/°C. Stability ..... .5% Maximum Lifetime Drift

Beyond these characteristics, however, SAGE skills and in-process testing methods developed through more than a decade of specialization assure you of maximum protection against catastrophic failure and give Sage Resistors the *Priceless Plus of Reliability* ... SAGE offers a variety of power ratings, from 1 Watt to 50, in three basic types, as detailed below, with resistances to 200,000 ohms. We shall be happy to send detailed specifications.



## Check your requirements against these SAGE "Silicohm" Resistors

### In 13 sizes from 1 to 10 Watt Ratings

### TYPE "S," SILICONE COATED POWER RESISTORS

Compact, light weight, single layer "Silicohm" type "S" units are made to MIL-R-26C Characteristic G. Exclusive high temperature insulation for moisture environment . . . minimum dielectric strength of 1000 V-rms . . . precision .05% . . . T.C. of 20 ppm/°C.

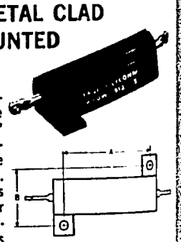
| MODEL | ratings, WATTS | dimensions, A* | B* | resistances Max. Ohms |
|---|---|---|---|---|
| SA1W | 1 | .500 | .125 | 12,000 |
| SB1W | 1 | .687 | .125 | 20,000 |
| SA2W | 2 | .500 | .187 | 15,000 |
| SB2W | 2 | .812 | .187 | 25,000 |
| S2W | 2 | .625 | .250 | 20,000 |
| S3W | 3 | .750 | .250 | 30,000 |
| SS5W | 5 | .875 | .312 | 50,000 |
| SR5W | 5 | 1.000 | .312 | 60,000 |
| SL5W | 5 | 1.125 | .312 | 70,000 |
| SS7W | 7 | 1.250 | .312 | 80,000 |
| SR7W | 8 | 1.375 | .375 | 125,000 |
| SS10W | 10 | 1.812 | .375 | 175,000 |
| S10W | 10 | 1.937 | .375 | 200,000 |

*nominal inches

### In 3, 5, 7, 8 and 10 WATT ratings

### TYPE "CS" CLIPPER METAL SHEATHED RESISTORS

The new standard in clip mounting, assembly protected units, Type "CS" Resistors feature metal sleeves shrunk by a Sage developed process to conform exactly to fully insulated type "S" resistors. Smallest in size and coolest in operation of comparable units. **Wattage Ratings double when CS is clip mounted on full heat sink.** Tolerance from .05 to 5% available.



| MODEL | ratings, WATTS | dimensions, A* | B* | resistances Max. Ohms |
|---|---|---|---|---|
| CS3W | 3 | .750 | .250 | 30,000 |
| CSR5W | 5 | 1.000 | .312 | 60,000 |
| CSS7W | 7 | 1.250 | .312 | 80,000 |
| CSR7W | 8 | 1.375 | .375 | 125,000 |
| CS10W | 10 | 1.937 | .375 | 200,000 |

*nominal inches

*Write now for free samples and complete specifications.*

### In M10W, M25W, and M50W Sizes

### TYPE "M" METAL CLAD CHASSIS MOUNTED RESISTORS

Aluminum housed resistors for direct plate mounting, Type "M" units feature considerably less heat rise than similar units. Lower Hot Spot means long service life, near perfect stability (Average resistance shift is only 0.4% after 1000 cycled hours at recommended loads), and exceptional reliability under extreme conditions. MIL-R18546 Characteristic G models in 15 and 30 Watt Ratings. Dielectric strengths to 2500 V-rms.

| MODEL | ratings, WATTS | resistances MAX. OHMS |
|---|---|---|
| M10W | 10 | 25,000 |
| M25W | 20 | 50,000 |
| M50W | 40 | 175,000 |

| Nominal Mounting Dimensions, inches | | |
|---|---|---|
| MODEL | A | B |
| M10W | .562 | .625 |
| M25W | .719 | .781 |
| M50W | 1.562 | .844 |

VECO T.M. *Reliable*

## THERMISTORS and VARISTORS

VECO'S continued research and development in the field of solid state electronics guarantees that its thermistors and varistors will continue to exhibit the same stable characteristics from order to order and batch to batch . . . . year after year after year!

Manufactured to MIL-Q-5923 and other applicable MIL standards.

VECO glass enclosed thermistors are not adversely affected by radiation.

**VECO also manufactures electronic controls, gas analysis cells, combustion analyzers, electronic and thermal instruments, medical and biological instrumentation and temperature sensing devices.**

NOTE: 1: 1% and 2% tolerance available only below 20 meg.
2: 1%, 2% and 5% tolerance available only below 100 meg.
3: 1% and 2% tolerance available only below 100 meg

**HI-MEG RESISTORS**

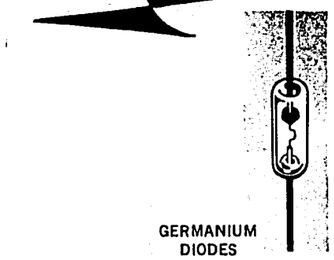
**GLASS SEAL:** HI-MEGS are vacuum sealed in a glass envelope which is treated with a special silicone varnish which keeps the resistor relatively free from the effects of moisture.

**RESISTANCE:** HI-MEG resistors are available in values from $10^8$ to $10^{13}$ ohms.

**TOLERANCE:** HI-MEG resistors can be supplied in the following tolerances: 1% below $10^{12}$ ohms, 2% and 5% below $10^{13}$ ohms, and 10% over the entire range.

**MAXIMUM WORKING VOLTAGE:** 1000 volts.

**MAXIMUM OPERATING AMBIENT TEMPERATURE:** 100°C.



**POWER RATING:** The power rating for any HI-MEG resistor is equal to one divided by the resistance in megohms.

SPACESAVER POWER TRANSISTORS

SWITCHING TRANSISTORS

SILICON RECTIFIERS

*Reliability in volume . . .*

CLEVITE TRANSISTOR

WALTHAM, MASS. TWinbrook 4-9330

**SUBMINIATURE GLASS DIODES**

**Germanium Gold Bonded in these types:**

**• COMPUTER • HIGH RESISTANCE**

**• HIGH CONDUCTANCE • GENERAL PURPOSE**

**• MILITARY TYPES:**

| | | |
|---|---|---|
| 1N128 | 1N270 | 1N277 |
| 1N198 | 1N276 | 1N281 |

Basic features include high forward conductance . . . recovery times in millimicroseconds . . . high inverse resistance . . . ruggedized mechanical construction . . . exceptional uniformity of characteristics.

**Silicon Junction in the following types:**

**• FAST SWITCHING (0.15 to 1.0$\mu$ Sec)**

**• GENERAL PURPOSE • MILITARY TYPES:**

| | | |
|---|---|---|
| 1N457 | 1N459 | 1N662 |
| 1N458 | 1N643 | 1N663 |
| | 1N658 | |

Designed to meet the most stringent commercial and military requirements, these diodes combine fast switching with high forward conductance, while protecting against thermal runaway at high voltages and temperatures up to 150°C.

**POWER TRANSISTORS**

**Germanium in the following types:**

**• SWITCHING 5 – 8 – 15 – 25 amperes**

*plus 3 ampere Spacesaver design*

**• AMPLIFIER 2 – 4 watts**

*plus 2 watt Spacesaver design*

**• MILITARY TYPES:**

2N297A 2N1011 2N1120

Excellent for applications involving power converters, audio amplifiers, voltage regulated power supplies and high current switching circuits.

Features include low thermal resistance, low base input voltage, low saturation voltage and superior current gain.

The 8 ampere switching series can replace the more costly ring emitter types in 3 to 8 ampere service. The 25 ampere series offers exceptionally low saturation voltage and is available with either pin type or solder lug terminals.

The Spacesaver design not only offers smaller size and lower mass but better frequency response and faster switching characteristics.

**PNP GERMANIUM SWITCHING TRANSISTORS**

These Clevite switching transistors are made to highest quality standards for maximum reliability in low level high speed service, available in the following types:

2N395 2N396 2N397 2N404

**DIFFUSED SILICON JUNCTION RECTIFIERS**

Designed for maximum reliability under the most severe military and commercial applications, Clevite rectifiers offer these advantages: High dissipation — 600 mw — High voltage — up to 600 volts — High temperature — up to 150 ma at 150°C.

# HUGHES TRANSISTORS

Hughes offers you a wide range of high-quality, dependable transistors, readily available from sales outlets all over the country. Included in the Hughes selection is the broadest line of p-n-p silicon transistors available anywhere. They are all precision-made, durable semiconductors, designed to meet your most stringent reliability requirements.

The wide Hughes line gives you the choice of features you demand most. There are transistors for low-level and high-level amplification. There are transistors for high-voltage switching, as well as for medium and fast switching. You can order either the standard TO-5 package or the rugged coaxial package with its superior heat-dissipating properties. You have a wide choice of power ratings from 250mW to 1W.

All Hughes transistors are covered by the Hughes warranty of quality and reliability. And, you can get right-now delivery from Hughes sales offices and authorized distributors all over the country. Give them a call today. Or, if you prefer, write Hughes Semiconductor Division, Marketing Department, Newport Beach, California.

# The IRE DIRECTORY is four directories in one

### *Alphabetical Complete Equipment*

**Information at high speed!** "Data the way an engineer thinks" is the key to IRE DIRECTORY classifications. All products are divided into three fundamental groups. The grouping plan makes this the fastest working directory you ever used! No components are mixed with test equipment—you turn right to a section where each item belongs.

**Yet good engineering detail** is maintained. 104 basic classes of products under these three sectional product directories keep listings from becoming cumbersome, but clearly define products. Overlapping listings are skillfully eliminated. Simplicity makes this book easy to work with—insures faster finding of facts when forgotten. Thus the faults of terminology listings are avoided.

**Completeness is insured!** Most firms make many products in a single classification. Wasteful, eye-confusing relisting of the same firms over and over is quite sensibly solved by using a system of codes under the 104 basic headings which actually provide 932 separate classifications. The result is a more complete picture of what each firm's full line, but you travel through fewer listings. The "Copp Principle" of directory indexing makes these lists wide, well marked highways to information—fast.

### *Components Materials and Services*

**Machol Edge Index** is just one more modern service to help the user find information fast.

**Ads positioned with reason!** In a DIRECTORY where ads play an important part in supplying information the user wants and needs, it makes good sense to cross-reference every advertiser in each listing so that the user can quickly find more detail. Ads are also placed facing company alphabetical listings, or in the product section in which they properly belong. No effort is spared to "organize" ad information.

**THE DIRECTORY**

**Advertising Dept., 72 W. 45th St., New York 36, N.Y.**
**Murray Hill 2-6606**

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 135-240.

ENGINEERS
PHYSICISTS
MATHEMATICIANS

You are probably aware that indiscriminate wholesaling of a product invariably cheapens it. So it is with your talents—when you blanket the whole industry with your resume.

Our organization specializes in recruiting and representing talent in the electrical and electronics fields. One resume placed with us will insure your having intelligent and dignified representation with complete coverage for all positions in your particular sphere of interest.

We number among our clients most of the prominent names in the industry whose products run the gamut from Air Borne Equipment to Waveguides: such as Electron Tubes, Semi-Conductors, Thermo Electronics, Nucleonics etc. Whether you are in Pure Research, Design, Applications, Sales, Production or any other phase of Engineering, we can assist you in selecting a position that matches your talents. Present positions range from $7,000.00 to $30,000.00.

Send your resume to Mr. Daniel Cudney in strictest confidence, together with your locale preference and your salary requirements.

# Shockley TRANSISTOR

UNIT OF CLEVITE TRANSISTOR

The Shockley 4-layer diode is a diffused silicon PNPN device that operates as a semiconductor switch. Before switching voltage is applied, the device is an "open" or high resistance state. After switching, the device is in an "on" or low resistance state.

**TYPE D — 4-LAYER DIODES FOR 2 AMP. PULSE CURRENTS**

| STANDARD | | | MIL-LINE (for military requirements) | | |
|---|---|---|---|---|---|
| TYPE | $V_s$ (volts) | $I_h$ (milliamperes) | TYPE | $V_s$ (volts) | $I_h$ (milliamperes) |
| 4D20-3 | 20 ± 4 | 1-6 | 4D20M-3 | 20 ± 4 | 1-6 |

**Silicon Junction Diodes**

**All vacuum alloyed and soldered**

In addition to offering such standard features as:

- **hermetically sealed**
- **subminiature package**
- **rugged construction**
- **high temperature operation**
- **efficient rectification**

United is using exclusively high vacuum for all operations where metallic parts are joined, to prevent the remotest possibility of contamination.

# Special Sockets and Connectors

by jettron®

...FROM DESIGN TO PRODUCTION

Jettron is fully-equipped to design and manufacture your precision electronic components including connectors, sockets and cable assemblies. Call or write Jettron for quotations on "specials" for all commercial and military applications.

**CD-7140** — Printboard Application Socket for R.C.A. Micromodule. Measures only .400 maximum square by .094 high. Insulation resistance greater than 50,000 megohms. Employs silver plated beryllium copper contacts and DIALL FS-5 insulating material.

**CAT. 8550**—Ultra High Frequency Socket for the G.E. GL-6299 Triode is sold in kit form containing all the necessary parts for mounting by the customer on a chassis barrier. It provides excellent isolation of the input from the output.

**CAT. 8715**—Ultra-High Temperature Socket for G.E. 7296 Triode can be soldered to printboard or mounted above or below a chassis. High Alumina insulating material; contacts gold plated Inconel-X. For continuous operation at 1000° F (538° C).

## ROTARY SWITCHES

J-B-T

MS-14 Molded

SS-14 Laminated

For dependable performance in quality test equipment, instruments, inspection setups, and avionics, J-B-T makes 4 space-saving types — *14 positions:* 2 3/32" dia. MS-14 molded series, and 2" dia. SS-14 laminated series; *20-positions:* 2 5/8" dia. MS-20 molded series, and 2 23/32" dia. SS-20 laminated. 1 to 6 decks (more on special order), shorting or non-shorting. Conservatively rated 1 amp., 125 volts AC, inductive load; maximum momentary, (not make and break) 5 amp. Maximum voltage between contacts, 1500 volts R.M.S.; between decks and ground, 2000 volts R.M.S. Average contact resistance is 0.007 ohms or less.

## LEVER ACTION SWITCHES

J-B-T Lever Switches use the same high quality parts as the J-B-T Rotary Switches above. 2-6 positions, 2 circuits per deck, 2-10 decks.

Purchase of standard items through authorized electronic distributors is strongly recommended.

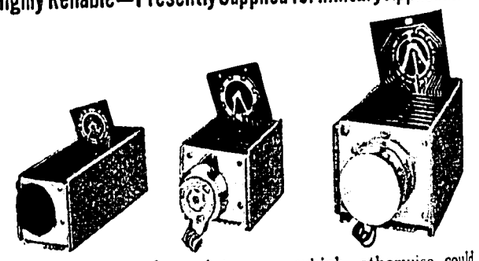
## NEW HIGHLY RELIABLE THUMBWHEEL SWITCHES

Available in permanent or removable wafers in 8, 10 or 12 positions up to 16 switches per modular assembly. Occupies only ½" panel space per module. Variations available to special order.



Instant, easy numerical readout—only selected numbers are visible thru openings in the bezel plate. Thumbwheel is black molded nylon with ¼" engraved figures. Other colors available.

Construction is printed circuit wafers with silver, rhodium or gold laminate, precious metal alloy contacts and corrosion protected aluminum frame. Switch can be positioned horizontally or vertically.

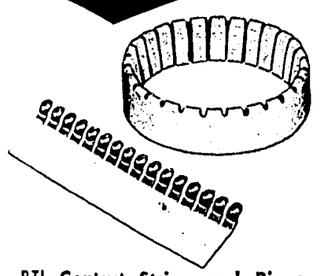
***Write for detailed specs today.***

## UNIQUE DESIGN ROTARY SWITCH— 5-SECOND WAFER REPLACEMENT

**No Unsoldering or Disassembling ... No Wire Removing ... Simply Lift out Any Wafer & Replace Instantly ... Highly Reliable—Presently Supplied for Military Applications**

Reduces to seconds maintenance which otherwise could take a full day or more, saving valuable time. New design obsoletes old switches.

Switches are available in sizes approx. 2" x 2", 3" x 3" and 4" x 4" with lengths to accommodate up to 36 wafers. Virtually unlimited choice of switch circuit configurations. All connections are to a single bank of receptacles and are conveniently accessible from one side of the aluminum housing. Contacts are silver, gold or rhodium plated on a copper base. Wafers can be made to include printed circuitry and components in addition to their normal switching function.



Switches may be manually, motor or solenoid operated for use in any rotary selector switch application. Manufactured under Tabet U. S. Patent No. 2,841,660. Other U. S. and foreign patents pending. Write for details today.

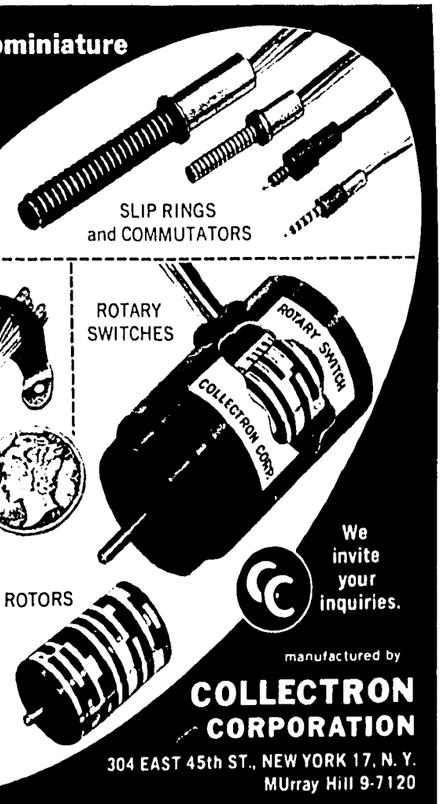
## GROUNDING AND CONTACT STRIPS



**BTI Contact Strips and Rings** are mostly used for grounding and shielding in high frequency equipment. Large variety of finger width, shape, and contours available from stock. Can be used for making contact rings. Special cut-outs, slots, and holes available to specification. Fixture heat treated.

# NEW CATALOG SUMMARY

presenting . . . Jennings Vacuum Components, inherently qualified by their unique use of a vacuum dielectric, to help you solve many difficult design problems of high voltage in limited spaces.

A few minutes inspection of the wide range of vacuum components in this new product bulletin will reveal many design possibilities that ordinary electronic components cannot achieve. The bulletin contains valuable data and specifications on the latest types of Jennings Fixed and Variable Capacitors, Power Switches, Coaxial Relays, Triggered Spark Gaps, Transfer Relays and High Voltage Measuring Equipment.

The following examples illustrate some of the unusual capabilities of Jennings vacuum components:

**R6G Vacuum Switch with Model E Switch mount**

Recommended max. load voltages for max. operating recovery voltage @ 50 amps-rms . . . . . 27 kv
Thermal current (for 30° C rise) . . . . . 250 amps rms
Max. interrupting current (10 times) . . . . . 1500 amps rms @ 9 kv
Withstand voltage (60 cycle 1 min. dry) . . . . . 36 kv rms

**RE6B Vacuum Transfer Relay**

Overall length . . . . . 3¼ in.
Rated operating voltage (cyc) . . . . . 25 kv
DC interrupting rating . . . . . 20 kw (not to exceed 5 amp or 10 kv)
Continuous current . . . . . 25 amps rms

**Type USLS Vacuum Variable Capacitor**

Capacity range . . . . . 5-465 mmfd
Overall length . . . . . 5⅜"
Peak voltage (max. capacity) . . . . 5 kv
Peak voltage (min. capacity) . . . . 10 kv
Continuous current . . . . . 40 amps rms

Send for your Jennings' catalog today. There will be no sales follow-up unless you outline a specific application.

## TOGGLE SWITCHES AN, JAN, or MIL

J-B-T now manufactures more than 140 models of exceptional quality toggle switches, all designed to new Government specifications such as: Jan-S-23, MIL-S-21195 (Ships), Ordnance Standards DDAX, Mil-S-6745, and Mil-S-3950A (the latest and most comprehensive specification—ultimately expected to supplant most of the other specifications).

The heavy-duty models feature solid coin-silver contacts, unique to J-B-T, which add overload protection and keep contact resistance under .005 ohms. Now-rated ratings are 20 amp. at 125 VAC, 10 amp. at 250 VAC.

Included are: ST40, 42, 50, 52 Series, solder and screw terminals; MS35058, 35059 Series, lever seal for sand, dust, and 15 ft. water submersion tests, solderable screw terminals; MS25068 Series, new 4-pole with lever seal and solderable screw terminals; and AN3021, 3022 Series, aircraft types, with lever seal and screw terminals.

Medium duty types feature double-grip, self-cleaning contacts with current carrying parts heavily silver plated. Nominal rating 6 amp. at 125 VAC, 3 amp. at 250 VAC. Models include ST12, 13, 16, 17, 22, 23, 26, 27 Series with solder lugs, and MS25098, 25100 Series with lever seal for sand, dust, and 15 ft. water submersion tests and solder lugs.

For further technical information please request Bulletin TS-6B.

Purchase of standard items through authorized electronic distributors is strongly recommended.

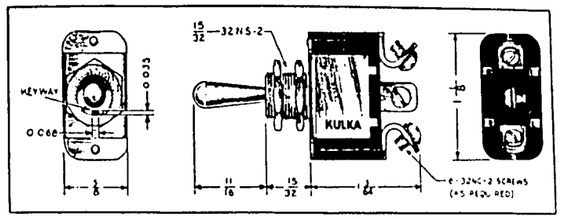
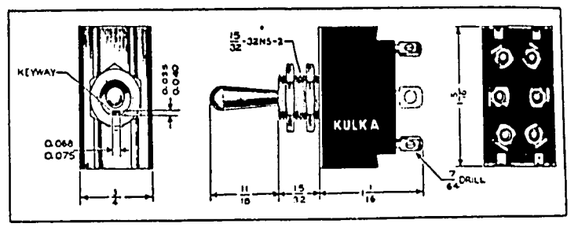
# KULKA



## ELECTRONIC SWITCHES

Made to Joint Army-Navy specifications—JAN-S-23, MIL-S-21195, MIL-S-6745 and MIL-S-3950A, for electronic, aircraft and communication uses. Designed for quick, easy, one-hole mounting. Ruggedly built for long, trouble-free service. Operating cycles are above minimum required by specifications.



All metal parts treated against corrosion. Switches come with mounting nuts and sleeve lock-washer. All switches made to MIL-S-3950A and MIL-S-6745 are supplied with toggle seal. Units are tested regularly by quality control in production procedure, insuring top performance.

# THIS is the actual size of the world's simplest acceleration switch.

It represents a totally new concept in acceleration sensing devices. Weight: about one ounce. Only one moving part: a precision ground ball held by an alnico magnet. The ball is released to close or open an electric circuit when the force of acceleration exceeds the magnet's pull.

It's as simple as that. Yet this versatile I-S design makes possible switches that respond axially, radially, or omnidirectionally, from 0.01 g to 500 gs. With adjustable g settings, if you desire. Automatic reset is optional. Closure time is variable. Accurate within 0.1%. Meets all applicable Mil specs.

But more than an ingenious design, the I-S switch represents an important attitude . . . an attitude that produces only equipment of sound and simple design and reliable performance, of uses limited only by your needs.

We at Metex feel we have the approach to your dry circuit contact problems... the Metact... a resilient, gold plated mesh contact. Its self-wiping and anti-bounce characteristics, combined with multiple contact areas, insure a greater degree of contact. These Metex engineered units, now available down to 1/32" in diameter, have possible applications on relay, switch, chopper and computer design contact problems. ■ We would appreciate the opportunity to discuss their broad range of contact applications with you. Metex also manufactures a complete line of electronic weather stripping, RF and combination gaskets, and heat dissipating tube shields. There's no obligation, why not give us a call. Metal Textile Corporation, Electronics Division, Roselle, New Jersey. Phone Chestnut 5-3000. TWX Roselle, N. J. 760.

LIECO WAVEGUIDE SWITCHES

A COMPLETE LINE OF CUSTOM-MADE "STOCK" UNITS

- Position indicator light switches integral to the waveguide switch.
- Automatic interlock switches available.
- Operates with or without a holding current.
- Any desired voltage.
- Engineered to suit your package problem at prices competitive with "shelf" units.
- Switching available in either plane, SPDT, DPDT, or Single Pole Multithrow.
- Fully meets MIL-T-5422.
- Covers entire waveguide band.
- Handles full waveguide power.
- Maximum VSWR 1.1:1.
- Extremely high isolation.
- Rapid switch return.
- Extremely low insertion loss.
- Continuous duty operation.
- Pressurized.
- All sizes from RG96 thru WR 2100 Waveguide.

*Special Power Supplies also available—designed to your needs.*

Submit your problems for our solution.

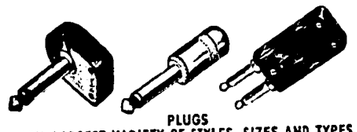
# SWITCHCRAFT INC.

## "SETS the STANDARD" in electronic components

**FOR RADIO—TELEVISION—HI-FI—STEREO—TAPE RECORDERS MUSICAL INSTRUMENTS—ELECTRONIC CONTROLS AND COMPUTERS**

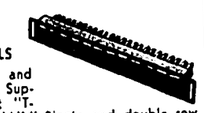


**JACKS**

**FOR MILITARY AND INDUSTRIAL EQUIPMENT—MOST COMPLETE LINE**

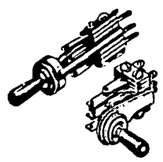
Available in all common and many special circuits.
"LITTEL-JAX"—require minimum panel space.
"TINI-JAX"—Similar to "Littel-Jax"—subminiature in design.
"SF-JAX"—short frame design—innumerable circuits.
"LF-JAX"—long frame design—all circuits.
"EXTENSION JAX"—for cable extensions.
"SHIELDED JAX"—shield assembled into and made a part of Jack.
"LAMP JAX"—Switchboard panel type. Ideal for mounting on Jack Panel.

**TELEPHONE & MILITARY JACKS**



"T-JAX"—a conventional telephone switchboard design—all standard circuits and military specifications.
"M-JAX"—a heavy duty design used in heavy industrial equipment.

**PLUGS**



**THE LARGEST VARIETY OF STYLES, SIZES AND TYPES**

"LITTEL-PLUG"—small—fits standard Jacks—(also MIL type).
"TINI-PLUGS"—sub-miniature 2 conductor Phone Plug for use with "Tini-Jax".
"LUG-PLUG"—small—low cost.
"STANDARD"—conventional size, heavy terminals—rugged design. 2 and 3 conductor types.
"FLAT-PLUG"—removable cover permits use with screw or solder lug terminals. 2 or 3 conductor types.
"TWIN-PLUG"—two electrically independent 2-conductor plugs on 5/8" C.C. MILITARY TYPE

**JACK PANELS**

Black phenolic and aluminum types. Support Switchcraft "T-JAX" and "MT-JAX." Single and double row panels. Accommodate up to 52 Jacks.

**"LEV-R SWITCHES"**

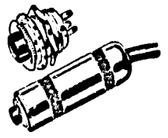
Unusually compact. Many circuits. Locking and non-locking. Series 3000 and 13000—single hole mounting. Series 12000 requires only about 1/4 of depth behind panel of conventional "Key" switches.

**"FF-SWITCH"**

Flat frame support spring "pile-up" in various circuits and contact combinations. "Easy" action of colored push buttons.

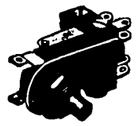
**"HOOK SWITCH"**

Switch actuated by hanging accessory on hook. 2 different methods of mounting. Standard circuits. Soft easy action. Require minimum of depth behind panel.



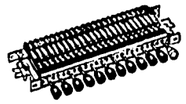
**"TELEVER SWITCHES"**

Rugged telephone type. Locking and non-locking types. Series 6000 mounts by screws or to escutcheon plate. Series 16000 features single hole mounting.



**"LITTEL & TINY-SWITCHES"**

"Littel-Switch" — rugged yet small, a Push Button switch available in simple circuits; contacts to suit. Various colors of Buttons.
"Tiny-Switch" — similar to "Littel-Switch", except sub-miniature design.



**BUTTON AND CORD SWITCHES**

"Button-Switches"— unusually small push button switch, completely enclosed.
"Cord-Switches" — cord mounted or pendant switch. Ideal for "hold" in hand operation.

**"RS-SWITCH"**

Rotary switch, rugged frame supports spring "pile-ups"; minimum panel depth. 2 or 3 position; locking or non-locking action.

**"MULTI-SWITCH"**

Features choice of switching functions. 1 to 37 stations possible. Single frame or ganged assemblies. Illuminated or non-illuminated buttons.

**MOLDED CABLE ASSEMBLIES**

(Audio Jumpers) Plugs molded directly to various cable combinations. Shielded and unshielded. Various lengths.

**COMPLETE LINE OF AUDIO ACCESSORIES—ADAPTERS, COUPLERS, CONNECTORS WITH PHONE OR PHONO CONNECTIONS, AUDIO MIXERS, SPEAKER CONTROLS. WRITE FOR CATALOGS S-590, A-403 AND C-501.**

When writing for catalog, list products in which you are interested. Inquiries on custom-made components handled promptly.

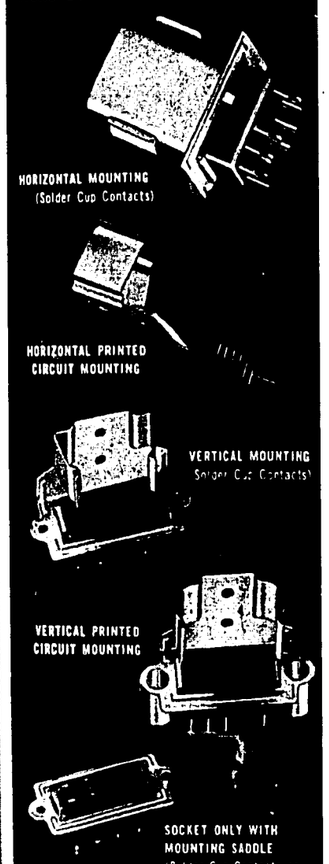
CARLE PLACE, LONG ISLAND, NEW YORK • PIONEER 2-4100



For details, circle #541 on Reader Service Card

# AUGAT

COMPLETE LINE OF SOCKET ASSEMBLIES FOR MICRO-MINIATURE RELAYS

*Combining Holding Clip And Built-In Socket For Unmatched Reliability Under Severe Conditions Of Shock And Vibration.*

Patent Pending

These assemblies will accomodate Micro-Miniature relays as manufactured by G. E., Elgin, Sigma, Allied, Potter & Brumfield, Clare, Iron Fireman, Babcock and many others.

*For additional information write for catalog RS-160*

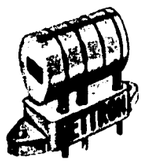
# Special Sockets and Connectors

by jettron®

...FROM DESIGN TO PRODUCTION



Jettron is fully-equipped to design and manufacture your precision electronic components including connectors, sockets and cable assemblies. Call or write Jettron for quotations on "specials" for all commercial and military applications.

CD-7140 — Printboard Application Socket for R.C.A. Micromodule. Measures only .400 maximum square by .094 high. Insulation resistance greater than 50,000 megohms. Employs silver plated beryllium copper contacts and DIALL FS-5 insulating material.

CAT. 8550—Ultra High Frequency Socket for the G.E. GL-6299 Triode is sold in kit form containing all the necessary parts for mounting by the customer on a chassis barrier. It provides excellent isolation of the input from the output.

CAT. 8715—Ultra-High Temperature Socket for G.E. 7296 Triode can be soldered to printboard or mounted above or below a chassis. High Alumina insulating material; contacts gold plated Inconel-X. For continuous operation at 1000° F (538° C).

## ROTARY SWITCHES

JBT

MS-14 Molded

SS-14 Laminated

For dependable performance in quality test equipment, instruments, inspection setups, and avionics, J-B-T makes 4 space-saving types — 14 positions: 2 7/32" dia. MS-14 molded series, and 2" dia. SS-14 laminated series; 20-positions: 2 5/8" dia. MS-20 molded series, and 2 23/32" dia. SS-20 laminated. 1 to 6 decks (more on special order), shorting or non-shorting. Conservatively rated 1 amp., 125 volts AC, inductive load; maximum momentary, (not make and break) 5 amp. Maximum voltage between contacts, 1500 volts R.M.S.; between decks and ground, 2000 volts R.M.S. Average contact resistance is 0.007 ohms or less.

## LEVER ACTION SWITCHES

J-B-T Lever Switches use the same high quality parts as the J-B-T Rotary Switches above. 2-6 positions, 2 circuits per deck, 2-10 decks.

Purchase of standard items through authorized electronic distributors is strongly recommended.

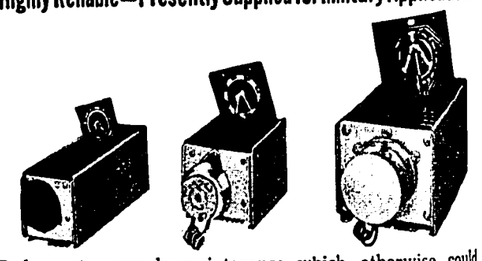
*Digital (Series TSD) & Binary (Series TSB)*

## NEW HIGHLY RELIABLE THUMBWHEEL SWITCHES

Available in permanent or removable wafers in 8, 10 or 12 positions up to 16 switches per modular assembly. Occupies only ½" panel space per module. Variations available to special order.



Instant, easy numerical readout—only selected numbers are visible thru openings in the bezel plate. Thumbwheel is black molded nylon with ¼" engraved figures. Other colors available.

Construction is printed circuit wafers with silver, rhodium or gold laminate, precious metal alloy contacts and corrosion protected aluminum frame. Switch can be positioned horizontally or vertically.

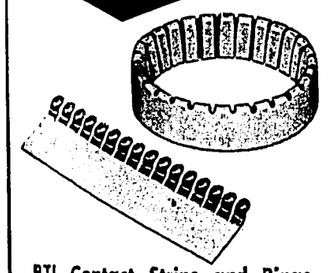
***Write for detailed specs today.***

## UNIQUE DESIGN ROTARY SWITCH— 5-SECOND WAFER REPLACEMENT

**No Unsoldering or Disassembling... No Wire Removing... Simply Lift out Any Wafer & Replace Instantly... Highly Reliable—Presently Supplied for Military Applications**

Reduces to seconds maintenance which otherwise could take a full day or more, saving valuable time. New design obsoletes old switches.

Switches are available in sizes approx. 2" x 2", 3" x 3" and 4" x 4" with lengths to accommodate up to 36 wafers. Virtually unlimited choice of switch circuit configurations. All connections are to a single bank of receptacles and are conveniently accessible from one side of the aluminum housing. Contacts are silver, gold or rhodium plated on a copper base. Wafers can be made to include printed circuitry and components in addition to their normal switching function.



Switches may be manually, motor or solenoid operated for use in any rotary selector switch application. Manufactured under Tabet U. S. Patent No. 2,841,660. Other U. S. and foreign patents pending. Write for details today.

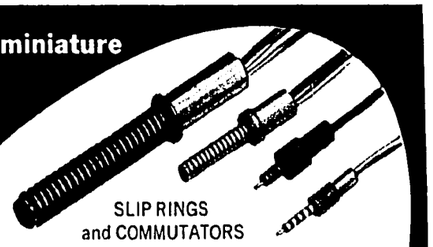
## GROUNDING AND CONTACT STRIPS



**BTI Contact Strips and Rings** are mostly used for grounding and shielding in high frequency equipment. Large variety of finger width, shape, and contours available from stock. Can be used for making contact rings. Special cut-outs, slots, and holes available to specification. Fixture heat treated.

# NEW CATALOG SUMMARY

presenting . . . Jennings Vacuum Components, inherently qualified by their unique use of a vacuum dielectric, to help you solve many difficult design problems of high voltage in limited spaces.

A few minutes inspection of the wide range of vacuum components in this new product bulletin will reveal many design possibilities that ordinary electronic components cannot achieve. The bulletin contains valuable data and specifications on the latest types of Jennings Fixed and Variable Capacitors, Power Switches, Coaxial Relays, Triggered Spark Gaps, Transfer Relays and High Voltage Measuring Equipment.

The following examples illustrate some of the unusual capabilities of Jennings vacuum components:

**R6G Vacuum Switch with Model E Switch mount**

Recommended max. load voltages for max. operating recovery voltage @ 50 amps-rms . . . . . 27 kv
Thermal current (for 30° C rise) . . . . . 250 amps rms
Max. interrupting current (10 times) . . . . . 1500 amps rms @ 9 kv
Withstand voltage (60 cycle 1 min. dry) . . . . . 36 kv rms

**RE6B Vacuum Transfer Relay**

Overall length . . . . . 3¼ in.
Rated operating voltage (cyc) . . . . . 25 kv
DC interrupting rating . . . . . 20 kw (not to exceed 5 amp or 10 kv)
Continuous current . . . . . 25 amps rms

**Type USLS Vacuum Variable Capacitor**

Capacity range . . . . . 5-465 mmfd
Overall length . . . . . 5⅝"
Peak voltage (max. capacity) . . . . 5 kv
Peak voltage (min. capacity) . . . . 10 kv
Continuous current . . . . . 40 amps rms

Send for your Jennings' catalog today. There will be no sales follow-up unless you outline a specific application.

## TOGGLE SWITCHES AN, JAN, or MIL

J-B-T now manufactures more than 140 models of exceptional quality toggle switches, all designed to meet Government specifications such as: Jan-S-23, Mil-S-21195 (Ships), Ordnance Standards DDAX, Mil-S-6745, and Mil-S-3950A (the latest and most comprehensive specification—ultimately expected to supplant most of the other specifications).

The heavy-duty models feature solid coin-silver contacts, unique to J-B-T, which add overload protection and keep contact resistance under .005 ohms. Nominal ratings are 20 amp. at 125 VAC, 10 amp. at 250 VAC.

Included are: ST40, 42, 50, 52 Series, solder and screw terminals; MS35058, 35059 Series, lever seal for sand, dust, and 15 ft. water submersion tests, solderable screw terminals; MS25068 Series, new 4-pole with lever seal and solderable screw terminals; and AN3021, 3027 Series, aircraft types, with lever seal and screw terminals.

Medium duty types feature double-grip, self-cleaning contacts with current carrying parts heavily silver plated. Nominal rating 6 amp. at 125 VAC, 3 amp. at 250 VAC. Models include ST12, 13, 16, 17, 22, 23, 26, 27 Series with solder lugs; and MS25098, 25100 Series with lever seal for sand, dust, and 15 ft. water submersion tests and solder lugs.

For further technical information please request Bulletin TS-6B.

Purchase of standard items through authorized electronic distributors is strongly recommended.

STANDARD SWITCHES

SUBMINIATURE TYPE 16
22 Million actuations by test
¼" thick—25/32" wide
Rated 10 amps. 250 V.A.C.

TYPE 10
10 Million actuations by test
15 or 20 amp. 125, 250, or 460 V.A.C.

TYPE 11
20 Million actuations by test
10 amp. 250 V.A.C or 30 V.D.C.

TYPE 30
10 Million actuations by test
15 amp. 125, 250, 460 V.A.C
½ amp. 115 V.D.C.

ENGINEERED SPECIALS

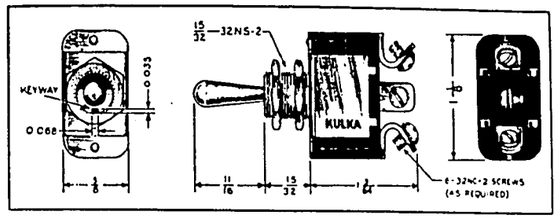
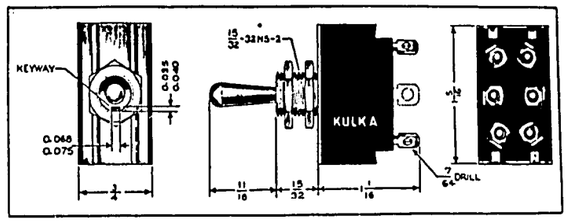
# KULKA



## ELECTRONIC SWITCHES

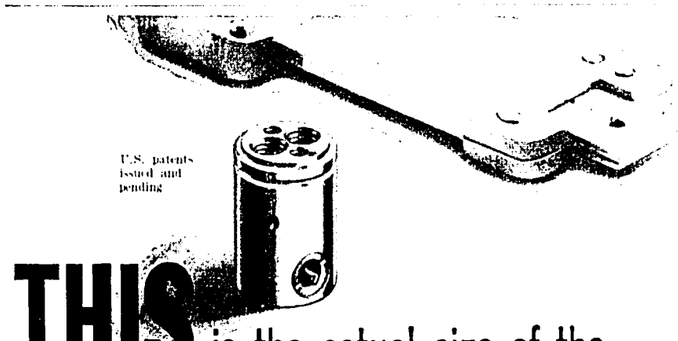
Made to Joint Army-Navy specifications—JAN-S-23, MIL-S-21195, MIL-S-6745 and MIL-S-3950A, for electronic, aircraft and communication uses. Designed for quick, easy, one-hole mounting. Ruggedly built for long, trouble-free service. Operating cycles are above minimum required by specifications.



All metal parts treated against corrosion. Switches come with mounting nuts and sleeve lock-washer. All switches made to MIL-S-3950A and MIL-S-6745 are supplied with toggle seal. Units are tested regularly by quality control in production procedure, insuring top performance.

**Write for Free Catalog**

Single-Pole Switches: Series ST 40, with screw terminals, shown at right. Widest choice of types in concise tabular form presented in Kulka literature available on request.



Double-Pole Switches: Series ST 52 with solder lugs shown at right. Wide choice of types in concise tabular form presented in Kulka literature available on request.

# THIS is the actual size of the world's simplest acceleration switch.

It represents a totally new concept in acceleration sensing devices. Weight: about one ounce. Only one moving part: a precision ground ball held by an alnico magnet. The ball is released to close or open an electric circuit when the force of acceleration exceeds the magnet's pull.

It's as simple as that. Yet this versatile I-S design makes possible switches that respond axially, radially, or omnidirectionally, from 0.01 g to 500 gs. With adjustable g settings, if you desire. Automatic reset is optional. Closure time is variable. Accurate within 0.1%. Meets all applicable Mil specs.

But more than an ingenious design, the I-S switch represents an important attitude . . . an attitude that produces only equipment of sound and simple design and reliable performance, of uses limited only by your needs.

We at Metex feel we have the approach to your dry circuit contact problems... the Metact... a resilient, gold plated mesh contact. Its self-wiping and anti-bounce characteristics, combined with multiple contact areas, insure a greater degree of contact. These Metex engineered units, now available down to 1/32" in diameter, have possible applications on relay, switch, chopper and computer design contact problems. ■ We would appreciate the opportunity to discuss their broad range of contact applications with you. Metex also manufactures a complete line of electronic weather stripping, RF and combination gaskets, and heat dissipating tube shields. There's no obligation; why not give us a call. LIECO

# WAVEGUIDE SWITCHES

**A COMPLETE LINE OF CUSTOM-MADE "STOCK" UNITS**

- Position indicator light switches integral to the waveguide switch.
- Automatic interlock switches available.
- Operates with or without a holding current.
- Any desired voltage.
- Engineered to suit your package problem at prices competitive with "shelf" units.
- Switching available in either plane, SPDT, DPDT, or Single Pole Multithrow.
- Fully meets MIL-T-5422.
- Covers entire waveguide band.
- Handles full waveguide power.
- Maximum VSWR 1.1:1.
- Extremely high isolation.
- Rapid switch return.
- Extremely low insertion loss.
- Continuous duty operation.
- Pressurized.
- All sizes from RG96 thru WR-2100 Waveguide.

*Special Power Supplies also available—designed to your needs.*
Submit your problems for our solution.

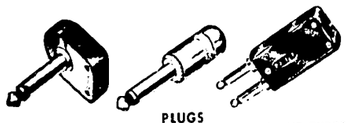
# SWITCHCRAFT INC.

## "SETS the STANDARD" in electronic components

FOR RADIO—TELEVISION—HI-FI—STEREO—TAPE RECORDERS
MUSICAL INSTRUMENTS—ELECTRONIC CONTROLS AND COMPUTERS

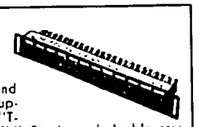


**JACKS**

**FOR MILITARY AND INDUSTRIAL EQUIPMENT—MOST COMPLETE LINE**

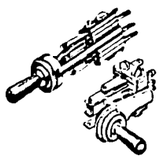
Available in all common and many special circuits.
"LITTEL-JAX"—require minimum panel space.
"TINI-JAX"—Similar to "Littel-Jax"—subminiature in design.
"SF-JAX"—short frame design—innumerable circuits.
"LF-JAX"—long frame design—all circuits.
"EXTENSION JAX"—for cable extensions.
"SHIELDED JAX"—shield assembled into and made a part of Jack.
"LAMP JAX"—Switchboard panel type. Ideal for mounting on Jack Panel.

**TELEPHONE & MILITARY JACKS**



"T-JAX"—a conventional telephone switchboard design all standard circuits and military specifications.
"M-JAX"—a heavy duty design used in heavy industrial equipment.

**PLUGS**



**THE LARGEST VARIETY OF STYLES, SIZES AND TYPES**

"LITTEL-PLUG"—small—fits standard Jacks—(also MIL type).
"TINI-PLUGS"—sub-miniature 2 conductor Phone Plug for use with "Tini-Jax".
"LUG-PLUG"—small—low cost.
"STANDARD"—conventional size, heavy terminals—rugged design. 2 and 3 conductor types.
"FLAT-PLUG"—removable cover permits use with screw or solder lug terminals. 2 or 3 conductor types.
"TWIN-PLUG"—two electrically independent 2-conductor plugs on 5/8" C.C. MILITARY TYPE

**JACK PANELS**

Black phenolic and aluminum types. Support Switchcraft "T-JAX" and "MT-JAX." Single and double row panels. Accommodate up to 52 Jacks.

**"LEV-R SWITCHES"**

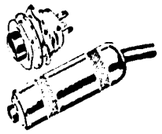
Unusually compact. Many circuits. Locking and non-locking. Series 3000 and 13000 single hole mounting. Series 12000 requires only about 1/4 of depth behind panel of conventional "Key" switches.

**"FF-SWITCH"**

Flat frame support spring "pile-up" in various circuits and contact combinations. "Easy" action of colored push buttons.

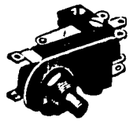
**"HOOK SWITCH"**

Switch actuated by hanging accessory on hook. 2 different methods of mounting. Standard circuits. Soft easy action. Require minimum of depth behind panel.



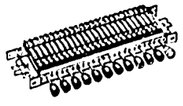
**"TELEVER SWITCHES"**

Rugged telephone type. Locking and non-locking types. Series 6000 mounts by screws or to escutcheon plate. Series 16000 features single hole mounting.



**"LITTEL & TINY-SWITCHES"**

"Littel-Switch"—rugged, yet small, a Push Button switch available in multiple circuits, contacts to suit. Various colors of Buttons.
"Tiny-Switch"—similar to "Littel-Switch" except subminiature design.



**BUTTON AND CORD SWITCHES**

"Button-Switches"—unusually small push button switch, completely enclosed.
"Cord-Switches"—cord mounted or pendant switch. Ideal for "hold" in hand operation.

**"RS-SWITCH"**

Rotary switch, rugged frame supports spring "pile-ups"; minimum panel depth, 2 or 3 position; locking or non-locking action.

**"MULTI-SWITCH"**

Features choice of switching functions. 1 to 37 stations possible. Single frame or ganged assemblies. Illuminated or non-illuminated buttons.

**MOLDED CABLE ASSEMBLIES**

(Audio Jumpers) Plugs molded directly to various cable combinations. Shielded and unshielded. Various lengths.

**COMPLETE LINE OF AUDIO ACCESSORIES—ADAPTERS, COUPLERS, CONNECTORS WITH PHONE OR PHONO CONNECTIONS, AUDIO MIXERS, SPEAKER CONTROLS. WRITE FOR CATALOGS S-590, A-403 AND C-501.**

When writing for catalog, list products in which you are interested. Inquiries on custom-made components handled promptly.

# POLLAK

**RELAYS, SOLENOIDS & SWITCHES**

Whether your application demands a special or standard design, our engineering experience and production facilities are geared to meet your demands.

*Write for Technical Bulletin FM*

Printed Circuit Short Frame Telephone Type D-C Relay, RL-1500 Series — exceptionally small size and long life.
Size: 25/32"x1 9/32"x 1 3/4"

High Voltage Switching Relay, RL-904 Series. Bu-ships rated Discharge Switch.
Size: 4 13/16"x6 15/16" x4 11/32"

A-C Power Relay, RL-1200 Series, for Long Life, Industrial Control Applications up to 30 amperes.
Size: 2 7/16"x2 7/16"x 2 3/16"

D-C Miniature Solenoid, SO-2100 Series, High magnetic efficiency for improved power-to-size ratio.
Size: 1 7/16"x1 7/32"x 3/4"

High Voltage Switching Relay, RL-906 Series, for Radar, Sonar and Missiles applications.
Size: 3 5/16"x4 15/16" x1 3/8"

Since 1909

**TELEX**

*miniaturized pushbutton switches*

For lower cost with increased reliability, TELEX General Purpose and Binary-Encoding switches completely avoid the multiplicity of parts necessary in a conventional switch array to perform the functions of stacking switch contacts, latching and releasing buttons.

**GENERAL PURPOSE SWITCH**—10 button array, up to 8 form type A or B contacts for each button. Overall dimensions: 6¾" x ¾" x 1½" depth.

**BINARY-ENCODING SWITCH**—10 button array, binary coded output of the decimal digits. Overall dimensions: 8¾" x ⅜" x ¾" depth.

**Other important features are:**

POSITIVE interlock against actuation of more than one button in any desired array of buttons • HIGH contact pressure • THOROUGH wiping action between contact elements • RUGGED design to withstand shock vibration • ENCLOSURE of all moving parts (except buttons) protect against dirt • EXTREMELY high reliability and long life • SMALL—approximately one inch of depth required behind panel for mounting • LIGHTWEIGHT • INDICATORS optional • VARIATIONS can be designed to your specifications.

*Detailed specifications are available on request. Write:*

**No other terminal block — sectional or one-piece gives you all the advantages of**

**BUCHANAN**
**MD sectional pres-SURE-blocks**

**NO WASTE CIRCUITS**—Reduce material costs, save space. Supplied assembled in 20 snap-fit section lengths. Pull off or add groups for any length block.

**SMALLER INVENTORY**—Only 2 different parts (contact and end sections). No running out of needed items.

**MORE CIRCUITS IN AVAILABLE SPACE**—Increase contact capacity, decrease jumpering. Group common wires (equivalent to 1 #22 thru 1 #8) in tubular contacts. Contacts on 7/16" centers. 10 circuits 4 7/16", plus 2 1/32" for each complete block.

**NO TERMINALS OR LUGS**—Eliminate lugging costs. Tubular contacts provide secure, efficient connections.

**NO HIDDEN CIRCUIT MARKINGS**—Unobscured top marking area minimizes errors. Integral or separable strips.

**QUICKER TO INSTALL AND CHANGE**—Hand assembled, no fixtures or hardware. Mount only every 12 sections. Add circuits without removing mounting screws.

**LOW INSTALLED COST**—Competitive with conventional blocks of similar rating.

Separate Sections or Factory-Assembled Blocks
Flat Base or Channel Mounting • Tubular or Strap-Screw Contacts
Fanning Strips • Conservative 750-volt A.I.E.E. rating

Tubular contacts fully approved by U.L. Blocks fully approved for 600 V by C.S.A.

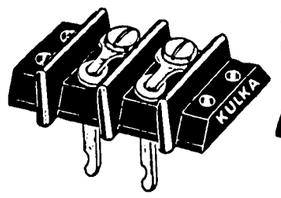
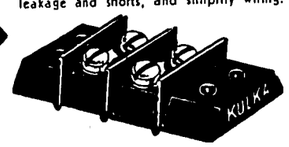
# KULKA TERMINAL BLOCKS



## MOLDED BARRIER CONSTRUCTION

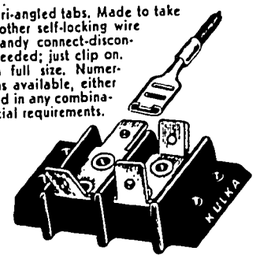


Kulka terminal blocks, used extensively in electrical and electronic assemblies, eliminate splicing, increase insulation, stop leakages and shorts, and generally simplify wiring work.

Molded of high tensile strength bakelite for general commercial use, they are available in other materials made in full compliance with latest military specifications, MIL-M-14E, covering CFG, MFE, MME, MDG, MAI-60, GDI-30, PM14, and other types of special plastics.

Kulka terminal blocks are made in many styles and sizes for varied applications. With 1 to 26 terminals, depending on size. Supplied with or without marker strips which may be printed or plain, or blocks can be engraved.

### WIDEST SELECTION OF TYPES AND SIZES



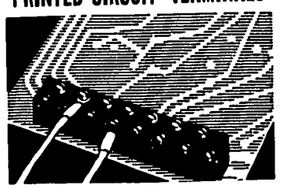
Used extensively in electronic and electrical assemblies, Kulka Terminal Blocks eliminate splicing, increase insulation, stop leakage and shorts, and simplify wiring. In widest range of types, sizes, insulating materials, terminals, etc. Here shown are two types of popular 600 Series. There's a Kulka Terminal Block for every need!

### "KLIPTITE" BLOCKS

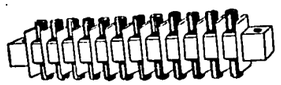
Available with vari-angled tabs. Made to take AMP, Burndy or other self-locking wire lugs. Fast and handy connect-disconnect; no screws needed; just clip on. 800 Series shown full size. Numerous tab variations available, either flat or angled, and in any combination to meet special requirements.

SERIES 800

Shown full size



### MINIATURE BLOCKS



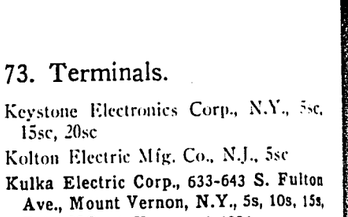
409 Series is ideal for miniaturization. Shown full size. Only 4¾" long for 21 terminals. 5/16" wide with barriers. Also available with one-sided and two-sided soldering lug. Also with threaded holes taking 4-40 screws for mounting through chassis, if desired.

### PRINTED-CIRCUIT TERMINALS

Simplify those external connections to printed-circuit boards, no matter how jammed up. Kulka 520 Series miniature terminal blocks mount on board. Terminal pins below slip into standard mounting holes for dip-soldering. Screw terminals. Readily connected or disconnected. 2 to 24 terminals. Entire assembly can be encapsulated.

### NAVY BOARDS

Heavy-duty terminal blocks in the widest range of types, materials, sizes. Here shown one-quarter size is a Navy Terminal Board made to drawing 9000, Series S6505 B, 73214, Rev. H. Supplied in MAI-60 glass-filled Alkyd as per MIL-M-14 with latest revision. Threaded studs of manganese-bronze, molded in plastic. Slotted brass nuts. Typical of the "specials" developed and produced by Kulka.



*Write for latest KULKA Terminal Block Catalog!*

## TAURUS
### Terminals of Teflon*

We are specialists in manufacturing STANDOFF and FEEDTHRU TERMINALS insulated with TEFLON*. Simplest terminal to install by forcing into undersize chassis hole.

Taurus Terminals are accepted and approved by major users. Taurus is a completely integrated, experienced and quality minded manufacturer of terminals.

Taurus also produces Punched Card Sensors.

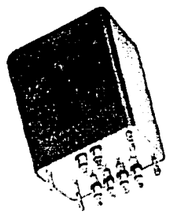
**TOROIDAL TRANSFORMERS**

All Forbes and Wagner Transformers are produced to meet specific circuit specifications. We can design to solve your problem or build to your own design. Our experience covers miniature, encapsulated, potted, molded, plug-in types. Let us show you what this experience can do for you.

**TOROID WINDING**



We are equipped with the most modern, precision type Toroidal Coil Winding Machines covering a wide range of core and wire sizes. Illustration shows miniature Toroidal Cores (partially potted) for use in magnetic amplifiers.

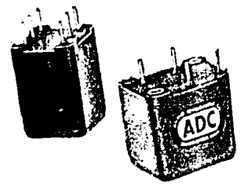
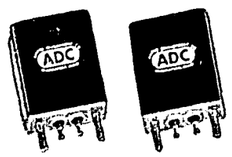
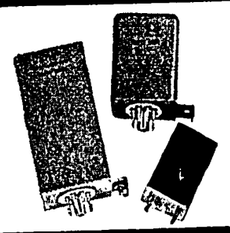
# ADC TRANSFORMERS · FILTERS · REACTORS JACKS & PLUGS · JACK PANELS



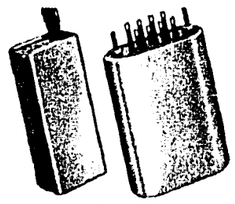
Military Standard POWER Transformers Types MS-90016 through MS-90036.



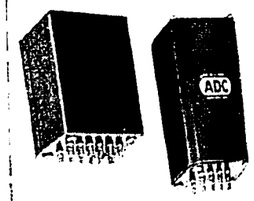
Military Standard AUDIO Transformers Types MS-90000 through MS-90008.



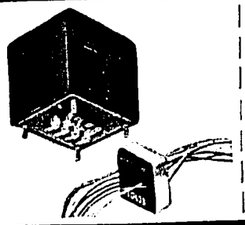
Sub-Miniature, hermetically sealed, low frequency inductors and transformers.



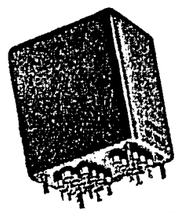
Transformers and filters for TRANSISTOR and PRINTED CIRCUIT applications to meet MIL-T-27A Grade 5, Class R or S.



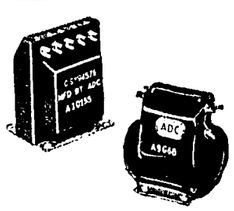
Toroids Hermetically sealed or open units for all frequency ranges.



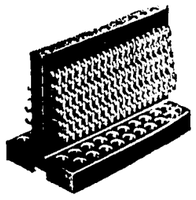
Filters Sub-Audio to 1.5 mcs.



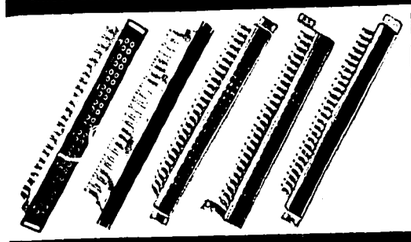
Telephone Coils Mechanically and electrically interchangeable with Western Electric.



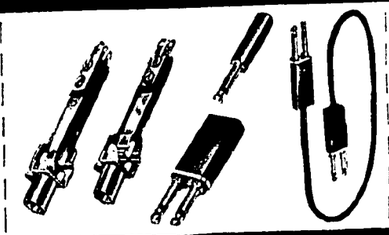
Broadcast Quality Transformers Standard of the Industry.



Magnetic Amplifiers and Saturable Transformers—For servo motor control; DC-DC Power Supplies, and switching silicon controlled rectifiers.



Balanced Modulators Designs over a wide range up to 500 kcs.



Encapsulated Transformers—Using custom epoxy compounds for military and commercial applications.

Terminal Blocks Molded to your specifications. Six popular sizes in stock.

Jack Panels Several size panels in stock.

Plugs, Patch Cords and Jacks Standard in the communication industry. Long frame telephone type jacks; wide variety; two and three conductor.

HERMETICALLY SEALED, MIL-T-27A PULSE TRANSFORMERS

- Maximum power efficiency and optimum pulse performance.
- For use in blocking oscillator, interstage coupling and low level output circuits.
- Ruggedized construction — Grade 4.
- Series or parallel connection of windings for optimum turns ratio.

FREED TRANSFORMER CO., INC.
1713 Weirfield St., Brooklyn (Ridgewood) 27, N.Y.

IF TRANSFORMERS ARE YOUR PROBLEM write to
EPCO
Transformers designed to your specifications to do the job that has to be done.
To meet the most exacting commercial and military specifications in all classes and sizes

TRANSFORMERS
ELECTRIC
ELECTRONIC
HIGH VOLTAGE
INSTRUMENT
LABORATORY
LOW VOLTAGE
OIL FILLED
LIQUID FILLED
PULSE
RADIO AND T.V.
SPECIAL
WELDING
X-RAY

Our engineers will work with you on specifications and samples. Long and short runs. Delivery guaranteed.
Write for complete data file
EPCO PRODUCTS, INC. WALLKILL NEW YORK

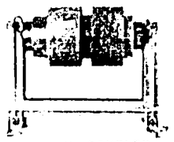
ELECTRAN Transformers

Transformers, Saturable Reactors, Chokes, Special Windings and Electronic Devices. Milliwatts to 50 KVA, single or polyphase in all frequencies.

*Complete* design and engineering service. All modern techniques, encapsulation, casting, military and commercial construction.

And, we've got one asset you'll find especially helpful: WE *TRY* HARDER!



ELECTRAN MFG. CO.
1901 CLYBOURN AVENUE • CHICAGO 14, ILLINOIS

For details, circle #574 on Reader Service Card

TRANSFORMERS
CUSTOM DESIGNED
SPECIAL PROBLEMS SOLVED
BUILT TO COMMERCIAL REQUIREMENTS OR MIL-T-27A & OTHER MIL SPECS
- Imaginative & highly skilled engineers & technicians
- Finished Product Dependability
- Quality control at all stages of production
- Modern production facilities including our own machine & sheet metal shop
- Research & Development
- On time delivery
- 24 years of experience

Electronic Transformer Co., Inc.
70 Washington St.
Brooklyn 1, N.Y.
MAin 5-6123
ETC
For details, circle #577 on Reader Service Card

DEL High Voltage and Special Purpose Transformers
- Power
- Reactors
- Low capacity filament
- Hermetically Sealed (Mil-T-27A)
- Oil, epoxy and air insulated
- Special purpose for lab. & industrial use

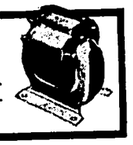
LOW CAPACITANCE TRANSFORMER 5 SKVA 15KV 25mmf

100 KV DOUBLER TRANSFORMER DEL VDU-50

Standard transformers and power supplies available from stock. Others built to your specific requirements from stock components.

*For additional information write to Dept. RE2*

DEL ELECTRONICS CORPORATION
521 HOMESTEAD AVENUE • MOUNT VERNON, N. Y. • OWENS 9-2000
For details, circle #578 on Reader Service Card



Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 135-240

# CUSTOM DESIGNED TRANSFORMERS *for* RELIABILITY

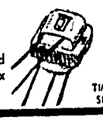
**HERMETIC**
Ceramic compression terminals. Stud type mounting. Schematic. Baked enamel finish, MIL-T-27A.

**ENCAPSULATED HIPERSIL**
Bracket mounting. Epoxy impregnation and coating. Resists environmental extremes.

**SUB-MINIATURE MIL CASE**
Hermetic. Ceramic compression terminals. ¾" x ¾" x 1⅛" H. Wt. 1⅛ oz. MIL-T-27A Grade 4, class R.

**MINIATURE MOLDED**
Epoxy cast. Resists environmental extremes. For plug-in printed circuits. .040 pins ⅛" x 1³⁄₃₂" x ⅞" H. Wt. 1¾ oz.

**ENCAPSULATED POWER**
Bracket mounting. Used in portable equipment where terminals must be brought out from Transformer.



**HIGH TEMPERATURE OPEN FRAME**
For Airborne Applications, Teflon, Mylar, and Silicone insulations used. Flat bracket mounting.

**HERMETIC**
High compression glass bead terminals. Rectangular flange mounting. Full schematic information.

**ULTRA-MINIATURE (UM-F)**
Resin impregnated. 4" color coded leads for dip soldering. Size ⅜" x ⅜" x ⅜". Wt. .08 oz.

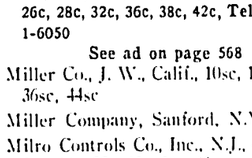
See ad on page 286

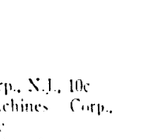


**PULSE TRANSFORMERS**

Pulse widths available from 50 millimicroseces to 25 microsecs in a variety of configurations.

Sub-Miniaturization at its very best. Encapsulated, potted, molded, and plug-in types. Let us quote on your specifications.

**FLYBACK, RF-IF, SATURABLE AND TOROIDAL TRANSFORMERS**



Up to five F & W sub-miniature pulse transformers are packaged in this single assembly measuring 1.80" X 1" X .312".

**LEVINTHAL ELECTRONIC PRODUCTS**
Subsidiary of Radiation Incorporated

*One of the largest of its type ever built, the Levinthal Model T318.1 Pulse Transformer is a 300KV, 25μsec design for incorporation into a special tube-development system*

Levinthal has a well-staffed and well-equipped transformer facility for the production of custom-designed large pulse transformers, as well as various specialty, isolation, and rectifier types. Your request for a proposal and quotation will be given immediate attention.

PCA

STAMP OF AUTHORITY IN PULSE TRANSFORMERS AND DELAY LINES!

PCA is the facility where Pulse Transformers and Delay Lines — in the hundreds of thousands — have been manufactured to meet or exceed the industry's most rigid mil specs for quality, reliability, performance. Similarly, we can satisfy you. If an "off-the-shelf" item will fill your needs — we'll recommend it. If a custom-designed component is more in order — we'll get the best engineering brains in the country working on it in double quick time. Either way — call PCA.

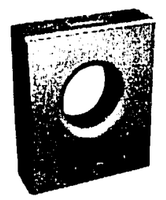
VERY HIGH VOLTAGE...



...HIGH RELIABILITY

PULSE PRODUCTS

BELOW ARE SEVERAL OF A LINE OF VERY HIGH VOLTAGE, HIGH RELIABILITY PULSE PRODUCTS MANUFACTURED BY PEARSON ELECTRONICS, INC. COMPLETE ENGINEERING SPECIFICATIONS ARE AVAILABLE UPON REQUEST.

Pulse transformer—Model PTA-177—250 KV, 6 μsec., 62 megawatts pulse, 350 kw average power. Compartmented tank complete with filament transformer, voltage divider, pulse current transformer, oil to water heat exchanger, oil circulating pump and filter, tube socket, all bushings, internal by-passing and connections, ready to accept klystron and external connections.

Pulse Current Transformer—Model PCT-325—Precision monitoring of pulse currents—both amplitude and waveform. Monitor pulse currents at very high voltages—300 kv pulse for oil immersion. 30 kv in air (dc, ac or pulse). Fast rise-time (20 mμsec.)—0.1% per μsec. droop, giving excellent waveform monitoring.

Filament Transformer—Model FT-300—Low capacitance, high voltage insulated. Voltage to ground—300 kv pulse in oil, 30 kv in air.

High Voltage Capacitance Type Pulse Voltage Dividers—Models VD-200, VD-300—Pulse voltage, 200 kv for VD-200, 300 kv for VD-300, oil immersed. Droop—0.01% per μsec. for 1 megohm cable termination.

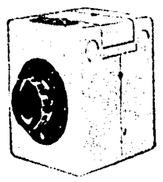
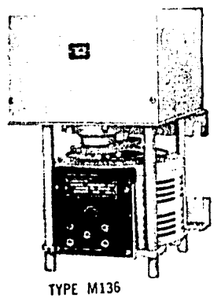
# POWERSTAT®

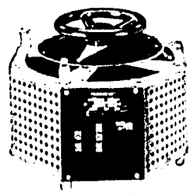
## *the most extensive line of* Variable Transformers



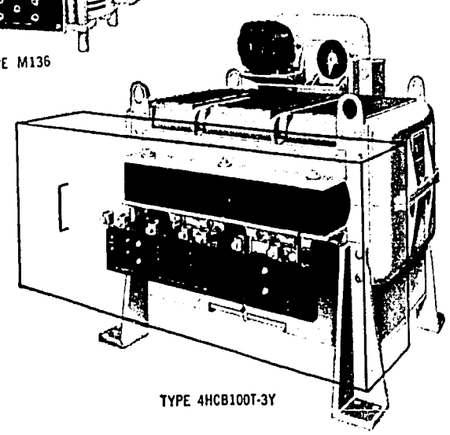
**POWERSTAT variable transformers deliver a continuously-adjustable output voltage from a-c power lines. They feature excellent regulation, zero waveform distortion, high efficiency and rugged construction. POWERSTAT is the quality variable transformer . . . designed, engineered and manufactured to user requirements for long, dependable service.**



TYPE 10B



TYPE 20



TYPE 116

TYPE 126

TYPE EN117

TYPE M136

TYPE 1156C

TYPE 4HCB100T-3Y

### 10B SERIES

Provide highest ratings and performance characteristics in their price and size range. New brush design for longer life, more efficient operation, easier replacement. Constant current load rating to 1.75 amps.; constant impedance load rating to 2.5 amps. For 120 and 240 volt duty.

### 20 SERIES

Of open construction for back-of-panel mounting. Ideal components for apparatus requiring a variable transformer with constant current load rating to 3.0 amps.; constant impedance load rating to 5.0 amps. For 120 and 240 volt duty.

### 116-216 AND 117-217 SERIES

Open, enclosed and/or fused cord-plug types; manually-operated and motor-driven types are available. On 120 or 240 volt lines, constant current load rating 7.5 amps. for 116 Series; 10 amps. for 117 Series. On 240 and 480 volt lines, constant current load rating 3 amps. for 216 Series; 4 amps. for 217 Series. Higher on constant impedance loads.

### EN116-EN216 AND EN117-EN217 SERIES

Housed in functionally formed and joined dust-tight enclosures. On 120 or 240 volt lines, constant current load rating 6.5 amps. for EN116 Series, 8.5 amps. for EN117 Series. On 240 or 480 volt lines, constant current load rating 2.6 amps. for EN216 Series, 3.5 amps. for EN217 Series. Higher on constant impedance loads.

### 126-226 SERIES

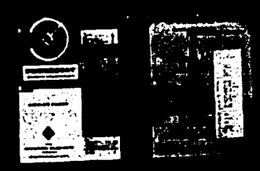
Small, compact, functional design in open, enclosed, fused, cord-plug, enclosed terminal models. On 120 or 240 volt lines, constant current load rating 12.5 amps. for 126 Series. On 240 or 480 volt lines, constant current load rating 6 amps. for 226 Series. Higher on constant impedance loads. Manually-operated and motor-driven types available.

### 136-236 SERIES

Manually-operated and motor-driven types available. On 120 or 240 volt lines, constant current load rating 20 amps. for 136 Series. On 240 or 480 volt lines, constant current load rating 9 amps. for 236 Series. Higher on constant impedance loads. Motor-driven standard speeds 5, 15, 30 or 60 seconds.

### 1156C-1256C SERIES

Heavy duty POWERSTATS. As many as 24 units can be ganged and mechanically and electrically interlocked for ratings up to 217 KVA. On 120 or 240 volt lines, current ratings up to 270 amps. for 1156C Series. On 240 or 480 volt lines, current ratings up to 224 amps. for 1256C Series. Manually-pperated or motor-driven.



### H-C SERIES

Introduce an entirely new concept in variable transformer design. Have helical coils with motor-driven contact brushes rotating along outside edge of coil. Feature high KVA, cool and efficient operation. For 240 or 480 volt, 60 cycle, 3-phase duty with ratings up to 187 KVA.

*plus:* LINE CORRECTORS • EXPLOSION-PROOF • LIMITED RANGE • ISOLATED WINDING • OIL-COOLED • HIGH FREQUENCY . . *and other types*

**AMGLO**

**Grid Controlled Flashtubes**

- Used extensively for automotive timing, wheel balancing and other stroboscopic applications.
- Capable of flashing at rates up to several thousand per minute when operated at 400—600 volts.
- Can be used with electrolytic or oil capacitors, 1 to 2 Mfd at high flash rates, 2 to 4 Mfd at rates to 1800 per min.
- Non-polarized, may be accidentally or purposely (to increase life) reversed without harm.
- Special tubes of all kinds promptly made.

# AMPERITE PREFERRED

by design engineers—because they're

MOST COMPACT • SIMPLEST • MOST ECONOMICAL

HERMETICALLY SEALED

## Thermostatic DELAY RELAYS

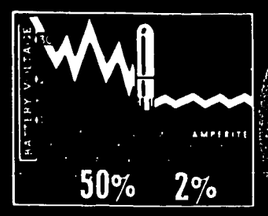
**2 to 180 Seconds**

Actuated by a heater, they operate on A.C., D.C., or Pulsating Current.

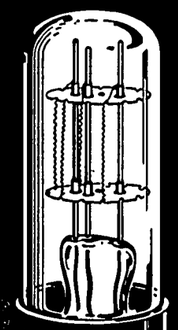
Hermetically sealed. Not affected by altitude, moisture, or climate changes.

SPST only—normally open or closed.

Compensated for ambient temperature changes from —55 to +70 C. Heaters consume approximately 2 W and may be operated continuously. The units are rugged, explosion-proof, long-lived, and—inexpensive!



TYPES: Standard Radio Octal, and 9-Pin Miniature. List Price, $4.00. Standard Delays.



Also — Amperite Differential Relays: Used for automatic overload, under-voltage or under-current protection.

*PROBLEM? Send for Bulletin No. TR-81*

## BALLAST REGULATORS

Amperite Regulators are designed to keep the current in a circuit automatically regulated at a definite value (for example, 0.5 amp.). For currents of 60 ma. to 5 amps. Operate on A.C., D.C., or Pulsating Current.

Hermetically sealed, they are not affected by changes in altitude, ambient temperature (—55 to +90 C.), or humidity. Rugged, light, compact, most inexpensive. List Price, $3.00.

*Write for 4-page Technical Bulletin No. AB-51*

# INVENTED AND IMPROVED BY WESTINGHOUSE...SETS THE INDUSTRY STANDARD!

# WESTINGHOUSE IGNITRON TUBES

CHOICE OF LEADING MANUFACTURERS OF QUALITY RESISTANCE WELDING EQUIPMENT

Westinghouse developed the Ignitron tube and has maintained constant leadership with product improvements that set today's standard for the industry:

- Thermostatic control for overload protection and water savings.
- Kovar seals permit the use of steel envelopes.
- Improved ignitors assure accurate ignition.

For your replacements, insist on original equipment performance and reliability—always specify Westinghouse Ignitron tubes.

YOU CAN BE SURE...IF IT'S

**SOLVE YOUR REGULATED HIGH VOLTAGE PROBLEMS NOW WITH RELIABLE ANTON CORONA DISCHARGE V-R TUBES**

**ANTON CORONA DISCHARGE V-R TUBES**

have been found to be extremely reliable over the wide range of military shock, temperature, current and voltage requirements. Fixed and adjustable tubes are available to stabilize voltages from 300 V—30 KV at currents below several milliamperes with voltage tolerances within ± 1%. MIL approved types available. Well suited for use as voltage reference tubes, stabilizing all high voltage-low current power supplies and for control of high voltage, accelerating potentials of cathode ray devices (radar scopes, TV, etc.). Send for valuable FREE application and design notes.

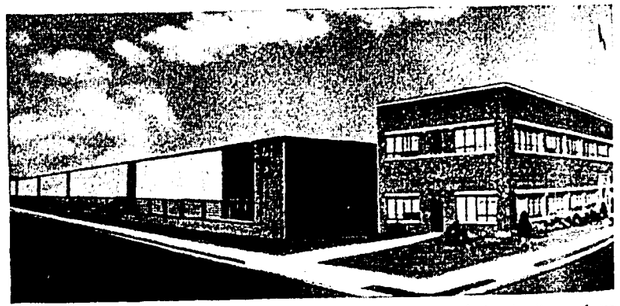
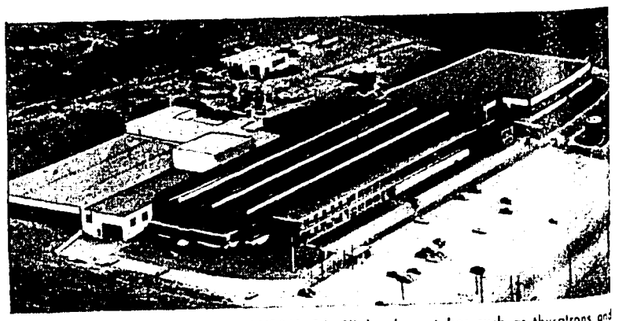
GE Power TUBES

First Choice



# FOR MILITARY AND COMMERCIAL APPLICATIONS

Products of the General Electric Power Tube Department include:



- Ignitrons
- Klystrons
- Magnetrons
- Thyratrons
- Voltage-Tunable Magnetrons
- Metal-Ceramic Tetrodes
- Camera Pick-up Tubes
- Traveling-Wave Tubes
- Parallel-Plane Microwave Tubes
- High-Power Duplexers
- High-Power Waveguide Filters
- Special Purpose Tubes

G-E MICROWAVE LABORATORY AT PALO ALTO, CALIF. Extensive developmental programs covering microwave tubes and techniques are carried out in these modern facilities.

G-E POWER TUBE PLANT AT SCHENECTADY, N. Y. Here, tube design leading to factory production is accomplished; here, also, are produced the larger, more complex products.

G-E POWER TUBE PLANT AT SCRANTON, PA. High-volume tubes such as thyratrons and parallel-plane tubes are precision-manufactured here in this 213,000-square-foot plant.

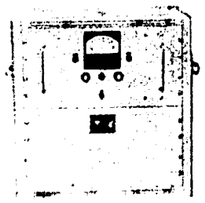
**BUILDING THE FUTURE IS A BIG JOB!**

The radio-electronic engineers who form the membership of the Institute of Radio Engineers must remain years ahead of actual production, in order to pave the way for the products of tomorrow, through research and development today.

The special issues of "Proceedings of the IRE" help these men transform the theory of today into the production lines of tomorrow. Pictured above are the October 1951 Color Television Issue; November 1952 Transistor Issue; and January 1953 UHF Issue (all now out of print).

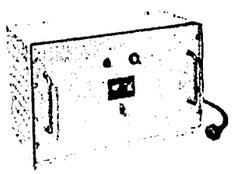


Special issues on special subjects are more than usually helpful, but every issue of "Proceedings of the IRE" is filled with facts and figures!

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 135-240.

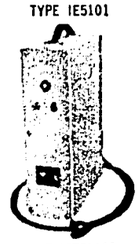
# STABILINE®

## *Automatic* VOLTAGE REGULATORS

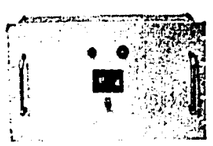


*with rated outputs from* **0.25** *to* **100 KVA**

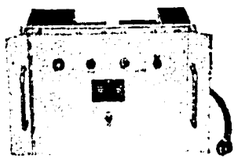
TYPE EMT4115



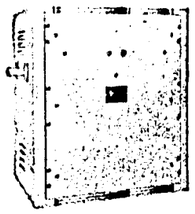
TYPE EMT4104UT



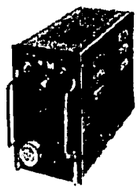
TYPE IE5101



TYPE IE5102R



TYPE IET5102



TYPE IET5101R

TYPE TM7101R

TYPE TM7105

TYPES IEH5101 and TMH7101

TYPE IEH5101R

**STABILINE** automatic voltage regulators deliver a constant output voltage regardless of variations in input voltage or changes in load current. Each is a precision built unit subject to the most rigid manufacturing specifications, inspected at every stage of manufacture, checked and rechecked to assure published performance characteristics. Several series are available to meet the particular requirements of any application.

### EMT SERIES
*Electro Mechanical Transistorized*

Consist of POWERSTAT variable transformer, detector circuit, auxiliary transformer. Highly efficient, correct faster than most automatic voltage regulators. Maintain constant voltage to loads up to 100 KVA without waveform distortion. Control circuit is completely transistorized.

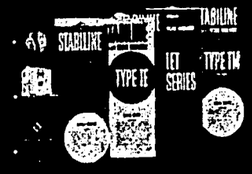
### IE SERIES
*Instantaneous Electronic*

Completely electronic with no moving parts. Hold output voltage to within ±0.1 percent for wide line variations and within ±0.15 percent for any load current change or load power factor change from .5 lagging to unity. Waveform distortion never exceeds 3%.

### IET SERIES
*Instantaneous Electronic Transistorized*

Feature a transistorized circuit. Output voltage remains within a 0.5 volt bandwidth for any and all variations in line voltage, load current and load power factor (0.25 volt bandwidth for input voltage changes only; 0.25 volt bandwidth for load current and power factor changes from lagging 0.5 to unity).

### TM SERIES
*Tubeless Magnetic*



Have no tubes, transistors or moving parts. For unattended locations or where maintenance is impossible over long time periods. Response time for ordinary line and/or load changes is within ½ second; accuracy is within a 1.0 volt bandwidth.

### STABILINES
*for High Frequency Applications*

Meet the light weight and small size requirements for 400 cycle use.

**Ever try a measurement like this?**

*2 things happen . . .*

(1) power line current flows in scope and circuit—only 60 cycles show: (2) triode is loaded by shunt capacitance to ground . . . and gain changes.

**Solution:**
Use a Moeller Power Isolator to power scope or circuit.

**Now** Moeller Power Isolator supplies ideal isolation for line operated devices. Common grounding is not necessary. Use with oscilloscopes, voltmeters, amplifiers, signal generators, power supplies, recorders, or any line operated test equipment.

The Model 30 Power Isolator can supply up to 300 VA of isolated power at 115 VAC 60 cycle. Output impedance to ground < 2 ppf and > 50,000 megohms in parallel.

*Write for descriptive literature*

Quality industrial instrumentation since 1867

**NORTH HILLS'**

**CURRENT GOVERNOR**
Model CS-11
for ***Constant Current***

- Precision Current Source
- Gyro Torquer Supply
- Transistor and Diode Tester

▸ High Accuracy ▸ Excellent Stability ▸ Programmable

For testing and measurement of gyros, transistors, diodes, clutches, solenoids, meters, other current sensitive devices.

- Current Range is 1μa to 100 ma with 5 decades — digital in-line readout —
- Regulation and stability 0.002% —
- Accuracy 0.02%

In use by leading companies for gyro torquer supply, transistor avalanche test, diode PIV test, clutch testing, calibration.

*Literature describing this and other constant current sources from 0.1μa to 30 amp. may be obtained from*

# From the AMCI Catalogue

## AUTOMATIC IMPEDANCE PLOTTERS

- *Continuous impedance display with frequency*
- *Available in portable and rack-mounted units*

| Type | Frequency Range (mc) | Line Size |
|---|---|---|
| 12 | 2.5-250 | Type N |
| 11-Q | 30-400 | Type N |
| 11-PS | 180-1100 | Type N |

## SLOTTED LINES

- *Residual swr under 1.010*
- *Rated error in detected signal under 1.005*
- *Available with a wide variety of tapered reducers*

TYPE 1026-4

| Type | Frequency Range (mc) | Impedance (ohms) |
|---|---|---|
| 1026-13 | 50-3000 | 50 or 75 |
| 1026-8 | 75-3000 | 50 or 75 |
| 1026-6 | 100-3000 | 50 or 75 |
| 1026-4 | 150-3000 | 50 or 75 |
| 1026-2 | 300-3000 | 50 or 75 |

## COAXIAL SWITCHES

TYPE 1038

- *High power ratings; swr under 1.06*
- *Pressurized*
- *Motor-driven and manually operated models*

| Type | Frequency Range (mc) | Line Size |
|---|---|---|
| 1038 | 0-450 | 6⅛" |
| 1136 | 0-500 | 3⅛" |
| Very high peak power models for radar applications | | |
| 1038-HV | 0-450 | 6⅛" |
| 1136-HV | 0-500 | 3⅛" |

## INSTRUMENT LOADS

TYPE 1108B

- *High stability; very low swr*
- *Nearly all transmission line sizes*

| Type | Frequency Range (mc) | Line Size | Max SWR |
|---|---|---|---|
| 1108B | 0-1100 | Type N | 1.02 |
| 2120 | 0-1000 | ⅞" | 1.03 |
| 1112 | 0-1000 | 1⅝" | 1.03 |
| 1110 | 0-650 | 3⅛" | 1.03 |

## HYBRIDS

- *Very broad band*
- *Very low residual unbalance*

TYPE 1104

| Type | Frequency Range (mc) | Max. SWR | Residual Unbalance (db) |
|---|---|---|---|
| 1027-K | 60-120 | 1.4 | −50 |
| 1027-L | 120-240 | 1.4 | −50 |
| 1027-M | 240-480 | 1.5 | −50 |
| 1027-N | 480-960 | 1.6 | −50 |
| 1098 | 960-1600 | 1.6 | −40 |
| 1102 | 1600-2400 | 1.5 | −40 |
| 1104 | 2400-3600 | 1.5 | −34 |
| 1100-K | 60-120 | 1.4 | −55 |
| 1100-L | 120-240 | 1.4 | −55 |
| 1100-M | 240-480 | 1.5 | −55 |
| 1100-N | 480-960 | 1.6 | −55 |
| 1099-N | 800-960 | 1.2 | −50 |

## COAXIAL DIRECTIONAL COUPLERS

λ/4 side arm type, in rigid transmission line ⅞ in. to 6⅛ in. diameter — copper or aluminum—standard and pressurized types available.

- **Coupling 20db to 60db:** The value of coupling can be maintained within plus or minus 1db over a 2 to 1 frequency range.
- **Directivity 35db or better:** A directivity of over 40db can be held over a 30% frequency range.
- **Frequency range 200 to 2000mc.**

Send for complete details.

## FERROTEC
### Ferrite Microwave Components

- *ISOLATORS*

WAVEGUIDE: From L Band to Ka Band, low power and high power, including test equipment isolators covering full waveguide band and microwave relay isolators. Special designs of ruggedized units are available for military applications.

COAXIAL: Compact coaxial isolators cover very broad bandwidth with moderate ratios of isolation to insertion loss. Other coaxial ferrite devices such as TWT amplitude regulators, variable attenuators, modulators, and phase shifters can be supplied.

- *CIRCULATORS*

FARADAY ROTATORS: These circulators cover the complete microwave relay bands. Narrow band units, which are miniaturized for Doppler navigation systems, are available in all frequency ranges.

DIFFERENTIAL PHASE TYPES: These units cover L Band to Ka Band and 10% bandwidth. Features are broad bandwidth, high isolation, and maximum waveguide power capabilities.

SHUNT TEE: Features narrow band, minimum size, and high isolation.

- *WAVEGUIDE SWITCH*

Ferrite devices offer a variety of switching functions. Features include fast switching time up to one microsecond and high power with constant input VSWR while switching. They can also be used to time-share antennas with one receiver and one transmitter. Switches can be reciprocal or non-reciprocal.

VARIABLE ATTENUATORS AND MODULATORS: Numerous ferrite configurations are used for electronically controlled modulators and attenuators.

- *SPECIAL DESIGNS*

An experienced engineering staff can be consulted on your problems. A complete ferrite materials laboratory can formulate ferrites for particular application.

**Ask about our latest developments in strip line ferrite components, coaxial ferrite devices, and broadband high-power tee circulators. Write for complete catalog.**

## SPECIFIC WAYS

**in which "Proceedings of the I R E" serves the advertiser differently and more effectively than other publications.**

### 1. Pre-Specification Selling

Because "Proceedings of the I R E" publishes basic research and engineering application articles, it is closely studied by those design engineers who must "keep ahead of the market." Often, the research published leads the industry production by from two to six years! The alert engineer, who needs this amount of time for his own design applications and for tooling up and changing the production in his own factory, studies the "Proceedings of the I R E" carefully. Its articles keep him abreast with the changes that will inevitably come and make it possible for him to be ready for them. This is the time for you to sell the unknown engineer designing the never-dreamed-of-product "before it happens!" It is an insurance that you will be ahead of the market instead of behind it.

### 2. Personal Connection to the Individual

The Institute of Radio Engineers is an engineering society for individual engineers who must qualify on their own education, experience and engineering work. Thus, the magazine follows the reader as his private possession, wherever he goes. Wherever new engineering progress is developing, the work is done by individual engineers—and it is these men that must be sold! Only the engineer knows enough to specify and buy in a highly technical industry. Selling is a matter of reaching the minds of men because *a company cannot sign a purchase order.* Wherever radio engineering activity is the greatest, companies employ I R E members. An engineer moves into a new job in advance of production and with him goes "Proceedings of the I R E," with all the advertising you so urgently need to place where engineering activity is the greatest.

### 3. Economy

It is a specific purpose of the Institute of Radio Engineers that its advertising rates should benefit and help the industry grow, by being economical. Part of the economy of a tax-free organization is thus passed on to advertisers in the form of low-cost advertising to a high-quality audience. The page rate per thousand engineers of "Proceedings of the I R E" is the lowest in the radio-electronic industry by deliberate intent. Thus, the Institute finds an extra way that it can help the firms that hire its engineers to gain new business at lower costs.

For details, circle #608 on Reader Service Card

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 135-240.

# the three sides to sell in RADIO AND ELECTRONICS

**The fellows who write the big orders in this business know their market. And they know that hitting that market with year-in, year-out consistency is a three-way proposition. The reason is simple. The radio and electronics engineers of America believe in and wholeheartedly support these three *Institute of Radio Engineers'* services.**

## *Proceedings of the IRE*

Here's the engineer's monthly fact sheet — with more pages, more editorial features, and more readers than any publication in its field. Over 68,000 radio-electronics engineers read *Proceedings* because they want to know what's going on and they've discovered *Proceedings* is the place to find out. It's on top of the latest developments in this fast-moving, fast-expanding field.

## *IRE directory*

More than 1,000 pages long, with circulation well above the 60,000 mark, this unique annual covers the radio-electronics industry from stem to stern. In the Directory you'll find a pinpointed classification of 3,800 manufacturers and 1,500 distributors of radio and electronic equipment along with the products they handle. To help you clinch the sale the *IRE Directory* lists the business phone numbers of 3,200 firms. No wonder they call the *IRE Directory* the "Bluebook" of the radio-electronics industry.

## *Radio Engineering Show*

The radio-electronics "spectacular" held annually at New York's mammoth Coliseum. Here's your personal introduction to 70,000 radio-electronics engineers — the men who use the products you sell and manufacture. They're eager to see your new equipment, to listen to your new ideas. This year, don't pass up this golden opportunity to meet them on their home grounds.

For all the details:

***The Institute of Radio Engineers***

# 1961 IRE DIRECTORY
# Directory III
# Materials & Services

### Fabricators, Machinery & Tools

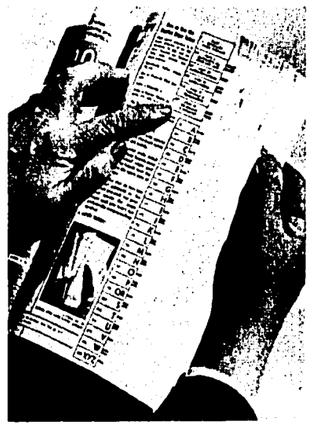
### 21 major groups
### 194 products

The products and services of the radio-electronics industry have been organized into three basic directories:

I. Complete Equipment
II. Components
III. Materials & Services

Within these three basic directories, 104 major product and service groups are numbered consecutively throughout. Under each of these 104 classes a further breakdown is given, showing in detail by a system of code numbers after each firm listed what specific products within the class are manufactured by that firm.

For a terminology cross-index listing the 932 subproducts in alphabetical order, consult the pink section preceding page 1.



### The first few times you use this EDGE INDEX

follow the "How to use" instructions slowly—one step at a time. After that you will be able to open easily and almost instantly to the section that you seek.

Machol edge indexes covering the alphabetical section and each of the three major directory groups will be found on pages 135, 241, 359, and 597.

### HOW TO USE

1. Bend the Directory almost double with the back cover page on the inside.
2. Hold in your right hand with your four fingers near to the bound edge and your right thumb near the middle of the open side of this page.
3. From the heavy or light line symbol adjacent to the subject you seek, run your eyes across the page edges until you reach the horizontally corresponding symbol.
4. OPEN THERE!

LICENSE NO. 25G
MACHOL EDGE INDEX PATENT #2680630

For complete list of products and services, arranged alphabetically for fast reference, see the pink section preceding page 1.

Anets CABINETS
built to your exact specifications—
pre-production or production requirements

*Fabricated in cold rolled, stainless steel, aluminum and Vinyl clad materials. Finished with spray paint, baked-on enamel, or special wrinkle effects.*

Precision and quality go hand in hand in the fabrication of electronic console cabinets by Anets. The latest techniques and facilities are employed to meet the most critical commercial or military specifications. Thirty years of experience assure you of the ultimate in custom fabrications for your prototype units or quantity production.

PUT YOUR PANEL PROBLEMS IN OUR HANDS

*Beautiful multi-color ANODIZED ALUMINUM PANELS from NORTH SHORE can save you days...dollars...and radically change your thinking about panels and housings.*

Now you can obtain up to 10 different colors on a single panel. Any metal thickness.....any size panel.....completely fabricated to your drawing..... ELIMINATES ALL ENGRAVING!

Typical Applications: spectacular computer panels, functionally color coded ...integral dials, nameplates and scales permanently etched and anodized in colors on panels and housings...housings for meters, instruments, electric and electronic equipment.

For many years North Shore has furnished anodized and etched multi-color nameplates to the electric and electronic industries. Our new plant...with the most modern anodizing facilities...enables us to extend our skills and experience to multi-color panels, sheets, parts and structural units.

☞ 30 standard colors available, dull or shiny. Special colors to order.

☞ We are a licensee for the Kaiser Kalcolor Process.*

*Write, wire or phone today to...*

*Licensed trademark of Kaiser Aluminum and Chemical Corp.

# HITEMP

*Specialists in High Temperature Mil-Spec Wires and Cables*

**MIL-C-17C** **MIL-W-7139B** **MIL-W-16878C**

**MIL-W-5086B** **MIL-W-27300** **MIL-W-19583**

**U.L. Approval for 1/32"-1/64"-10 mil insulation thickness NAS 703**

**CERAMIC FILM INSULATED MAGNET WIRE—"CERAMATEMP"** A flexible magnet wire for operation at 1000 F. Available in sizes 17 to 44 AWG.

**TEFLON MAGNET WIRE—"TEMPRITE"** Sizes 14 to 50 AWG, single, heavy, triple or quadruple thicknesses, conforming to MIL-W-19583 (NAVY). Heavy triple and quadruple coatings. Available in 8 solid colors to conform with MIL Std-104.

**SPECIAL TEFLON MAGNET WIRE—"TEMPRITE X"** Same characteristics and sizes as regular Temprite, but specially processed for severe abrasion applications.

**MODIFIED RESIN ENAMEL MAGNET WIRE—"THERMESTER-L"** Sizes 14 to 42 AWG inclusive. Used for temperatures from —54° C to +155 C. Available in single or heavy thicknesses. Conforms to MIL-W-19583 (NAVY) except for temperature rating.

**MINIATURE EXTRUDED TEFLON HOOK-UP WIRE—"MX AND MXR"** Available in sizes 22 to 32 AWG with standard or reinforced conductor. This special 300 volt thin wall insulated wire is a boon to miniaturization.

**TEFLON HOOK-UP WIRE—"TEMPRENE"** Fused Teflon tape insulation on wire sizes 8 to 32 AWG. Two or three color striped combinations, plus 10 solid colors. Conforms to MIL-W-16878C (E and EE).

**TEFLON EXTRUDED HOOK-UP WIRE—"TEMPREX"** Sizes 10 to 32 AWG, in both striped and solid colors. Conforms to MIL-W-16878C (E and EE).

**SUB-MINIATURE TEFLON LEAD WIRE—"DQT"** Solid copper conductors with Teflon film insulation rated at 300 volts. Available in sizes 20 to 32 AWG, and in 8 solid colors.

**TEFLON INSULATED LEAD WIRE—"TEMPCLAD"** Teflon insulated lead wire with an outer covering of Teflon impregnated glass fiber braid. Sizes 10 to 28 AWG in 8 solid colors.

**TEFLON 100-FEP EXTRUDED HOOK-UP WIRES AND JACKETED CABLES** To all applicable military specifications. Sizes 4 to 32 AWG.

**FLEXIBLE TEFLON TUBING—"TEMPRENE NON-RIGID"** Sizes 10 to 26, solid colors and special striped combinations. Also large diameters ⅛" to 1" in 12" lengths.

**TEFLON EXTRUDED TUBING—"TEMPREX TUBING"** Sizes 2 to 30 AWG. Fourteen solid colors.

**100% SHIELDED WIRES** Seamless tube of solid metal (copper, nickel, stainless steel) formed over single or multiple insulated wires to afford 100% shielding for RF or radiation applications.

**SHIELDED AND JACKETED MINIATURE CABLES** Consist of Temprene or Temprex Conductors, shielded and jacketed for high temperature operation. Jackets available in fiberglass braids, Teflon, silicone saturated, fused Teflon tape, Teflon 100-FEP, or vinyl insulation.

**RIBBON CABLE ASSEMBLIES—"TEMPBRAID"** 100% Teflon, flexible, flat ribbon multi-conductor cables. Available from 2 to 50 conductors in sizes 12 to 32 AWG. Maximum width 3 inches.

**MINIATURE LOW NOISE COAXIAL CABLES** Available in 50, 75 and 95 ohm impedances and attenuations of 28, 20 and 15 db/100 ft. at 400 mc., respectively.

**MINIATURE LOW CAPACITANCE COAXIAL CABLES** Available at 8.5 or 10.5 mmfd/ft. capacitance ratings.

**MINIATURE COAXIAL CABLES** Consist of 50, 75 and 95 ohm cables, shielded and jacketed for applications up to +200° C. Cables approved for conformance to MIL-C-17C.

**HEATER CABLES** Teflon insulated for 600 volt operation. Sizes 12 to 26 AWG.

**HIGH TEMPERATURE AIRCRAFT WIRE** For 600 volt service at 400° F. Conforms to MIL-W-7139B (AER). Available in sizes 6 to 24 AWG, in 6 solid colors.

**BONDABLE TEFLON INSULATED WIRE—"HISBOND A"** Surface treated to assure adhesion by varnishes or encapsulants. Applicable on Temprite magnet wire, Temprene Teflon tape wire and Temprex Teflon extruded wire.

**POLYMER COAT, ADBOND**—Solutions available for on-the-spot bondable treatment to assure adhesion by varnishes or encapsulants.

**REINFORCED CONDUCTORS, ALLOY CONDUCTORS**—For high strength, extra flexibility, high temperature applications.

**HIWRAP TAPE**—Fused and unfused Teflon tape with high tensile strength and other superb physical properties.

**WRAP-IT**—Teflon tape for use as pipe dope and thread sealant.

**CUSTOM MULTI-CONDUCTOR HEAVY CABLE**—Up to 4" diameter for ground support and other applications.

**HITEMP WIRES, INC., 1200 SHAMES DRIVE, WESTBURY, NEW YORK, EDGEWOOD 3-4600**

# FINE WIRE

**for semiconductors**

**and electronic applications**

FINE wire (.001-.250), clad wire, rod, sheets and special shapes now available in any of the following metals:

- Pure Gold
- Gold Alloys
- Platinum and Alloys
- Palladium and Alloys
- Silver and Alloys
- Copper and Alloys
- Non-Ferrous Metal

Of critical importance are these outstanding features of Consolidated Reactive Metals' services:

1–Quality Control to assure Reliability

2–Production to Close Tolerances

3–Vacuum Annealing

Consolidated's engineering department is ready to assist in the development of suitable alloys to meet specific requirements. The processing division can provide sample and production runs most economically . . . with delivery as promised, usually within two weeks.

Teflon jackets are available in solid colors and spiral striped combinations.
Special jacketing materials are available as required.

# INSO *fused film Teflon® insulated* WIRE and CABLE

## Made by Teflon specialists for applications demanding highest quality and top reliability

- As much as 100% space advantage and 35% weight saving.
- Economical long continuous lengths to meet your needs.
- Stays put in any position, any form.
- High dielectric strength per mil of insulation.
- Perfectly concentric Teflon insulation.
- Can be furnished surface treated for encapsulation with no discoloring, no reduction in dielectric strength.

**Other products and services**

TYPE "E" and "EE" (MIL-W-16878) wire and cable.

SPECIAL CABLES engineered to your specific environmental and space requirements utilizing INSO miniature or standard wire constructions.

LOW CAPACITY SHIELDED WIRES & CABLES — Reduction in shielded cable capacity (mmf/ft.) by as much as 25% by the use of INSO fused film Teflon insulation.

FLEX-WEAVE — A flexible flat ribbon multi-conductor, multi-colored cable of INSO Teflon insulated conductors arranged side by side and woven together by threads of Teflon yarn, Nylon or fiber glass.

**"FUSE-FLEX" FLEXIBLE THIN WALL TUBING**
Insulation: 6 Mil (0.006") Wall Fused-Film Teflon
Dielectric Strength: 5000 Volts RMS Minimum
Temperature Rating: –90° C. to +250° C.

| INSO PART NO. | AWG SIZE | INSIDE DIA. (±0.001") | WEIGHT LBS./C FT. |
|---|---|---|---|
| 6 FT-26 | 26 | 0.018" | 0.053 |
| 6 FT-24 | 24 | 0.022" | 0.060 |
| 6 FT-22 | 22 | 0.027" | 0.070 |
| 6 FT-20 | 20 | 0.034" | 0.082 |
| 6 FT-18 | 18 | 0.042" | 0.098 |
| 6 FT-17 | 17 | 0.047" | 1.073 |

Also available in many other sizes from No. 30 AWG through No. 10 AWG and with other wall thicknesses to solve your particular problems.

**MINIATURE SHIELDED AND TEFLON JACKETED CABLES**
Insulation: 6 Mil (0.006") Wall Fused-Film Teflon
600 Volts RMS Service; Dielectric Strength 2.2 KV
AC Spark Test 3.0 KV

| INSO PART NO. | NO. CONDUCTORS | AWG AND STRANDING | DIAM. OVER JACKET (NOMINAL) | WEIGHT IN LBS. PER M FT. |
|---|---|---|---|---|
| 1C-6E-26-STJ | 1 | 26 (19 x 38) | 0.063" | 5.6 |
| 2C-6E-26-STJ | 2 | 26 (19 x 38) | 0.094" | 8.6 |
| 1C-6E-24-STJ | 1 | 24 (19 x 36) | 0.069" | 7.2 |
| 2C-6E-24-STJ | 2 | 24 (19 x 36) | 0.104" | 11.3 |
| 1C-6E-22-STJ | 1 | 22 (19 x 34) | 0.077" | 8.1 |
| 2C-6E-22-STJ | 2 | 22 (19 x 34) | 0.114" | 13.6 |
| 1C-6E-20-STJ | 1 | 20 (19 x 32) | 0.085" | 10.9 |
| 2C-6E-20-STJ | 2 | 20 (19 x 32) | 0.124" | 18.5 |

Also available in many other AWG sizes and conductor arrangements in both 600 Volt and 1000 Volt Service ratings.

**FINE WIRE TO .0005" FOR SEMI-CONDUCTOR APPLICATIONS**

**. . . from our new plant!**

**NESOR ALLOY**, a leading producer of whisker wire for transistors and diodes, now offers a complete line of wire, drawn to .0005". High purity metals in Ruthenium Platinum, Iridium Platinum, Gallium Gold and Antimony Gold. 99.99% and 99.999% high purity Aluminum available for silicon rectifiers. Leads, both tinned and bare, are cut to specified lengths.

**Other metals and alloys available:** Aluminum and alloys, bare and tinned copper, silver-plated copper, beryllium copper, brass and alloys, phosphor bronze, lead and solder alloys, monel-nickel, resistance wire, stainless steel, both high and low carbon steel, coppercoated steel.

Nesor's new plant is now in full production, ready to meet your needs faster, more efficiently.

For complete technical data, prices or samples, write to Dept. A.

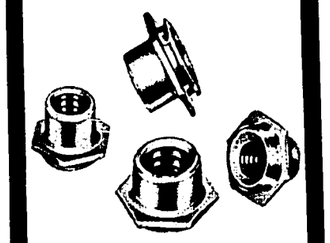
## MIL-SPEC KNOBS

In stock! For immediate delivery! And produced by National!... a complete line of standard plastic control knobs made in conformance with MS-91528. There are four basic types: round, pointer, spinner (each with or without skirts) and dial skirted round . . . available in three different shaft sizes. Finishes are gloss, matte, or to your color specifications . . . in all Mil-Spec sizes.

Knobs: Made of plastic, type III, class H2, per Specification L-P-349. Set Screws: Cadmium plated, class 3, type II, per Specification QQ-P-416. Inserts: Brass, composition 4, hard, per Specification QQ-B-613.

## COILS-FILTERS-CHOKES

National Radio Company is engaged in the manufacture of precision coil and filter assemblies. Why not let our engineering staff quote on your specific requirements? In addition to coils and filters made to customer specifications, National Radio Company can supply a wide variety of stock coils for the electronic industry. Typical of these coils are the following families:



**R-45** series, a new family of ferrite bead chokes for use as filament chokes, parasitic suppressors, and series elements of low-pass filters for frequencies from 5 to 200 mc. Insulated with an impregnated fiberglass sleeving, these chokes will handle 2 amperes of filament current with voltage drop of less than 0.02 volts, temperatures to the Curie point of 125°C.

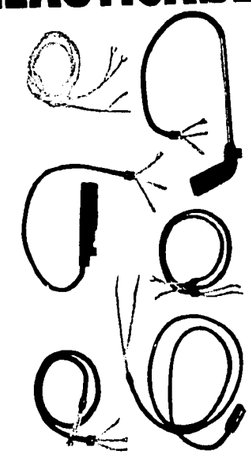
**R-40** series ferrite-core chokes...extremely high Q for small size. They are primarily for use in networks and filters at frequencies from 50 kc to 1500 kc, and as resonant elements in IF and RF circuits. Fungus-proof varnish impregnation per MIL-V-137A.

**R-25** series MIL-inductance chokes for high frequency circuits, as filament chokes and peaking coils, inductance per MIL-C15305A, coil forms per MIL-P-14, and impregnation per MIL-V-173A.

**R-33, R-50 and R-60** series RF coils are wound on molded phenolic forms per MIL-P-14 and coated with a tough, fungus-resistant varnish. R-50-10 choke is wound on a powdered-iron coil form instead of phenolic.

## CAPTIVE NUTS SELF-LOCKING TYPE

Self-locking, wear-resistant, machined, stainless steel threaded inserts for use in aluminum or brass. Easily applied, their reliable grip in the parent metal as well as their self-locking ability make them ideal for the variety of purposes they are designed to serve. The complete line includes one basic type in four sizes. Each of the four sizes may be obtained for insertion into any of five metal thicknesses.



Material—Stainless steel Class 303 per FED QQ-S-763b

Finish—Passivated per MIL-P-12011

Other captive nuts and studs manufactured by National Radio Company include the line of exclusive "Flush Mount" types. Available in five sizes for use in metal thickness from 1/16" up. They provide permanent tapped holes and a flush fit on both sides of sheet.

The engineering staff will be glad to discuss your applications and possible variations to best meet your requirements.

## ELASTICABLE

**Elasticable** is an elastic type wire, made in single and multiple conductors. It will stretch to more than three times its relaxed length.

This unique elastic characteristic in a straight (not coiled or spring loaded) extra flexible wire gives the designer a new material to further his design concepts and assist him in solving heretofore impossible design problems.

Five types, three commercial and two military are available as stock items. A sample specification of one type is:

Type 2—Core. . . . . natural rubber
Insulation. . Nylon (braided)
Conductor. . bronze tinsel
Diameter. . . 1/8" approx.
Resistance. . 1.0 ohm per ft. approx.
Elongation
single conductor. . . . . 300%
multiple conductor. . . . 275%
Operating temperature
range. . . . . −25°C to +85°C

National Radio is providing many companies with complete assemblies incorporating special terminations, molded parts and custom mechanical configurations. The Elasticable Application Engineering group is available to discuss electric and mechanical characteristics, applications and terminations. Why not let them quote on your finished Elasticable cable assembly?

**OTHER NATIONAL COMPONENTS**

In addition to knobs, chokes, drives and captive hardware, National Radio Company also manufactures a complete line of dials, coil forms, condensers, tanks, grid and plate caps, IF transformers, tube and crystal sockets, ceramic insulators, bushings, spreaders, couplings, terminal assemblies, other electronic and electro-mechanical components. For specific design or development applications problems, write or call.

*Flexible and Extra Flexible*
**CABLES to "MIL. SPEC."**
*with Certificate of Compliance and Source Inspection*

- Stock of the following Mil. Spec cables: MIL-W-C3432B, W-16878, W-76A, C-3884 and many others . . . all available with Certificate of Analysis and Certificate of Compliance.
- Also available . . . Special cables, telephone constructions, hook-up wire, shielded constructions—all in stock. Or, we will fabricate to your "Specs."
- Facilities to cut, strip, lug, notch, slot or perform other operations on various types of wire and cable. Write today for more information.

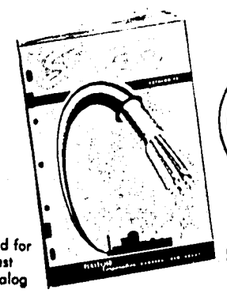
4320 PARK AVENUE
NEW YORK 57, N.Y.
WE 3-6400

For details, circle #632 on Reader Service Card

**WIRE for the heart of YOUR COMPONENT**



Wire drawn to your specifications (down to .00025") in base and precious metals and alloys . . . supplied bare, enameled, ceramic insulated for use at 1000° F., or electroplated . . . to close tolerances.

Our research and development staff is available to solve YOUR wire problems.

**Synkote®**

**SYMBOL OF THE FINEST and NEWEST DEPENDABLE WIRE and CABLE**

TV twin-leads, coaxial cable, hook-up wire, rotor antenna cable, custom-engineered multi-conductor cable. For prices, samples and technical data, contact your nearest Plastoid representative. (See list in manufacturers' section).

**CAA-SIGNAL & CONTROL CABLE**
(Thermoplastic Insulation and Jacket)

**COAXIAL CABLES**
Spec JAN-C-17A & MIL-C-17B
Including Low-Temperature, Non-Contaminating Jackets
Double Shielded & Jacketed Coaxial Cable

**SPECIAL PURPOSE CABLES**
Meteorlogical Survey Cable
Underwater Sound Equipment Cable
Geophysical Cable
Fire Control Wire & Cable
Electronic Computer Wire & Cable
Inside Telephone Cable
Special Design High Frequency Cable
Thermostat Cable 2-7 conductors (Twisted and Thermoplastic Jacketed)

Microphone Cables
Sound & Intercommunication Wire & Cable
Rotor Antenna Cable

**TEFLON INSULATED WIRE & CABLE**
MIL-W-16878A TYPES "E" & "EE"
Multi-conductor Cables
Teflon Coaxial Cables
MIL-W-7139A

**RADIO AND ELECTRONIC HOOK-UP WIRE**
MIL-W-76A (superseding JAN-C-76)
MIL-W-16878B (types B, C & D, with & without nylon jackets)
Underwriters Laboratory — 80°; 90°; 105°
(PVC insulation, nominal walls of .008; .015; .031; .047 & with braided outercovering or extruded nylon jacket)

**AIRCRAFT WIRE & CABLE**
MIL-W-5086A MIL-W-5274A
MIL-C-7078A MIL-W-7072A
MIL-W-8777A

**NAVY SHIPBOARD CABLE**
MIL-C-915A & MIL-C-2194B

**REA TELEPHONE CABLE**
(Spec PE-14)

**MULTI PAIR RURAL DISTRIBUTION WIRE**

**TRAFFIC CONTROL CABLES**
(Specs IMSA 19 & 20)

**POWER CONTROL CABLES**
(Specs IPCEA & IMSA)
(Thermoplastic Insulation and Jacket)

**AIRPORT LIGHTING CABLE**

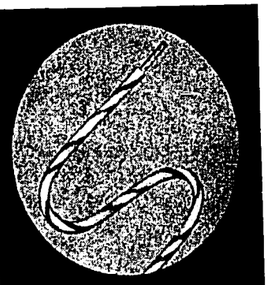
ALLOY 63



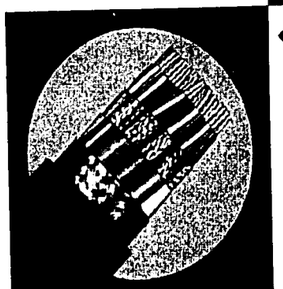
# Surco

• INSULATED WIRE
• CABLES
• TUBING

ALL SIZES FROM 0000 THROUGH 32 AWG
EXTREME RANGE OF OPERATING TEMPERATURES
• TO MILITARY SPECIFICATIONS • TO YOUR SPECIFICATIONS

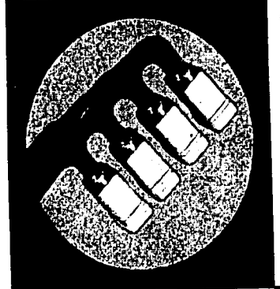
**▲ ADVANCED CONDUCTOR MATERIAL**

Minimum Values: Conductivity, 80%; Tensile Strength, 55,000; Elongation, 8%; Yield Strength, 50,000; Exceptional Flex Life. AWG 16 thru 38, stranded or solid, bare wire, tin-plated, silver-plated, nickel-plated, silver-nickel plated.



**◀ TEFLON* HOOK-UP WIRE**

For Continuous Operation from −90°C to +260°C
NEW MIL-W-27300 (USAF)
Types E & EE to MIL-W-16878C
NAS 703
UL APPROVED

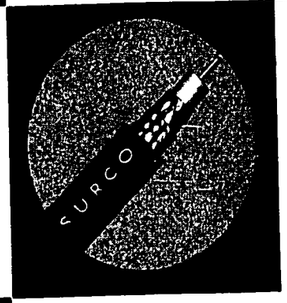


**◀ HOOK-UP WIRE**

Kel-F** to MIL-W-12349
• Silicone • Vinyl
• Polyethylene
• Irradiated Polyethylene
MIL-W-16878C, MIL-W-76A

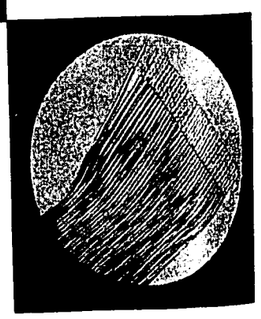
**◀ MULTI-CONDUCTOR CABLES**

Teflon*, Kel-F**, Vinyl, Nylon, Polyethylene, Silicone Rubber, Neoprene, Irradiated Polyethylene. Made to your requirements as to size, type and number of conductors, insulation, shielding, braiding, jacketing.
Also to MIL-W-13777B



**◀ MOLDED CABLE ASSEMBLIES**

• Vinyl • Neoprene
• Polyurethane



Single or multi-circuit, optional molded jacket supports and built-in strain relief members. To applicable Mil Specs or your own requirements.
• Harness Constructions

**COAXIAL CABLES ▶**

RG/Series to MIL-C-17C
Special Designs for Specific Applications
MINIATURE COAXIAL CABLES to MIL-C-8721

• AIRCRAFT WIRE to MIL-W-5086A, MIL-C-7078A, MIL-W-7072A, MIL-W-5274A
• HIGH TEMPERATURE AIRCRAFT WIRE to MIL-W-8777A, MIL-W-7139A
• MINIATURE WIRE AND CABLE
• UL and CSA APPLIANCE WIRE
• MEDICAL TUBING
• BONDABLE TEFLON*
• TEFLON* TAPE
• "SPIRALON" COLOR CODING

**◀ TUBING**

Teflon*, Vinyl, Polyethylene, Nylon, Irradiated Polyethylene
Clear or solid colors. In-stock service on standard compounds in regular sizes, .0159" to 2" I.D. Special formulations per your specifications.
• HEAT SHRINKABLE INSULATING TUBING

Multi-Conductor
**▲ FUSED RIBBON CABLE**

• Teflon* • Vinyl
• Polyethylene
• Irradiated Polyethylene
Bulk cable or precision cut and stripped. Break-outs and terminations as required. Single or multi-deck lengths in a wide range of sizes. Color coding available.

TELCON CABLES

ARE IN USE THROUGHOUT THE WORLD

SEMI-FLEXIBLE ALUMINUM SHEATHED HELICAL MEMBRANE COAXIAL CABLE

Low attenuation and VSWR

High efficiency and power handling capacity

Specifically designed for all RF uses

50 ohm and 75 ohm characteristic impedances

Inner copper conductor separated from an aluminum outer sheath by a helical polyethylene membrane

½ inch to 3½ inch diameter

Bare aluminum sheath or vinyl protective sheath over the aluminum

Complete Range of matched fittings

Warehouse facilities on the East and West coast for immediate delivery

Competent engineering service

For complete information write to department E611

**Precision Technical Ceramics and Composites**

CFI Corporation provides integrated skills and facilities specifically adapted to the design, prototype development and production of high-temperature ceramics, components, ceramic-metal vacuum composites, glass-metal seals and specialized body compositions.

Typical ceramic products include modular forms, spacer and abrasion-resistant elements, metallized parts, multi-terminal composites, compact high-temperature power lead through elements and envelope assemblies.

Body compositions comprise high Alumina, Steatite, Forsterite, and customized materials, such as Series 1000 LOSSY ceramic for microwave attenuation.

For complete details on CFI custom-designed ceramics and ceramic-metal composites to fit your specifications, call CFI today. We're ready to work with you right now!

GE CERAMICS & FERRITES
General Electric ceramic and ferrite materials are specifically designed for special applications. Four distinctive compositions of *Barium Titanate* are complemented by three bodies of a new piezoelectric ceramic, *Lead Metaniobate*, for applications requiring high Curie temperature and broad bandwidths. *Delay Line Ferrite* for phase modulators and separate *Microwave Ferrites* for C, S and X bands provide tailored electrical properties.

THE AMCO MODULAR INSTRUMENT ENCLOSURE SYSTEM

TWO COMPLETELY NEW LINES ADDED IN STEEL AND ALUMINUM TO GIVE 3 COMPLETE MODULAR FRAME LINES IN ONE OVER-ALL SYSTEM

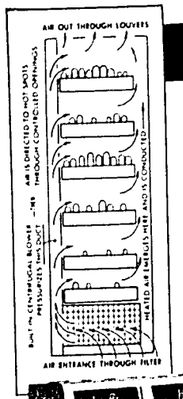
**A. Custom Line.** Removable multi-panel, cowlings (19" width increments). Custom appearance for series mounting—space-saving and ideal for complex consoles. Double channel 16 gauge steel. Meets EIA standards.

**B. Semi-Custom Line.** Multi-width cowlings for single-unit appearance with frames in series. 19" wide panels, any thickness, can be recessed to any depth. Extra rugged, 14 gauge steel, box-type channel construction. Conforms to EIA mounting.

**C. Aluminum Line.** Box extrusions, cast corners for fast, easy assembly of cabinets any size from 7' to 20' in height, width or depth. Lock by hand, built-in locking device. All sizes standard.

**D. Accessories.** A full line of Amco integrated accessories (blowers, slides, mounts, lighting, etc.)

**Cost savings.** Orders can be grouped for best discount. Free Amco pre-assembly. **3 week delivery on standard parts!** Send for free literature.



**AMCO ENGINEERING CO.**
**7333 W. Ainslie Street, Chicago 31,**

# ONE SOURCE...CABINETS, CONSOLES and EASILY INSTALLED RELATED EQUIPMENT

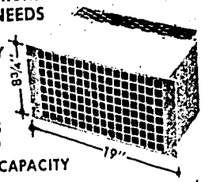
VENTILATED or NON-VENTILATED
MIL Spec or Customer Spec

## RELAY RACK CABINETS and MATCHING CONSOLES

• Complete package modular construction • Mount standard 19", 24" or 30" wide panels • Panel space in multiples of 1¾" • All-welded frames of 12-ga. or heavy duty ¾" steel, or .125" aluminum alloy—tapped 10-32 or 12-24 • Steel or aluminum skin and doors • Hinged, lift-out or bolt-on doors—with or without louvers, glass panels or cut-outs • continuously adjustable rear mounting rails of 12-ga. steel • mounting built in for 'Chassis-Trak' slides.

Heavy duty MC type cabinets—surpass 30 G shock and vibration requirements of MIL-T-4807 (steel construction)—reinforcement for higher shock loading available.

CONSOLES—24", 30", 36" in depth. Modular shapes to fit 'U' or 'L' floor plans. Panel angled 15°, 30°, 45° or 60°.



CABINETS— 18" to 36" deep in 2" increments.

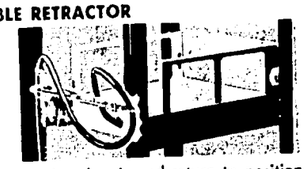
*Cool exactly where needed* with fully controlled built-in cross-ventilation system—proven in 6 years operation in Government labs. Adjustable airflow pattern to your exact needs is effected by snap-in closures—no "chimney" effect (schematic above, left).

Any commercial or MIL Spec finish. Dolly optional.

## PANEL MOUNTING BLOWERS

COOL your INSTRUMENTS to your EXACT NEEDS

MIL SPEC QUALITY
COMPACT SIZE
YOUR CHOICE OF 8 DIFFERENT STANDARD MODELS (others 'TO ORDER')
LARGE COOLING CAPACITY



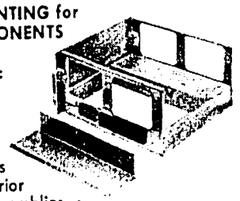
• 600—1200 CFM output • Mount as standard 8¾" EIA panel, 15" front-to-back • Meet MIL-I-16910A radio interference requirements • Air discharge areas to suit innumerable applications • Cleanable filter.

### REFRIGERATED BLOWERS

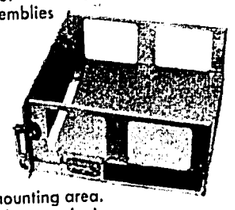
• Automatically maintain pre-set cabinet temperature • Mount as standard 19" rack panels • Control dust and humidity • Interference-free • MIL Spec.

These panel mounting refrigeration units, 14" and 21" high, 22¼" deep, discharge cooled air to distribution plenum, re-circulate it to reduce humidity while cooling.

### CABLE RETRACTOR



• You service chassis and return to position without snagging components below • Double action maintains correct tension and cable suspension—permits ample cable to fully extend and tilt chassis • Adaptable to all types of chassis or drawer slides, varying chassis lengths • Mounts on rear support rail on standard 1¾" spacing.



## UNIVERSAL CHASSIS

RIGID MOUNTING for your COMPONENTS

TWO TYPES:

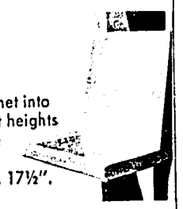
MODULAR
2 or more sub chassis
Permits superior cooling of assemblies

SINGLE PANEL FLAT CHASSIS
Unrestricted front panel mounting area. Readily drilled or punched

• Maximum-height side frames have Heli-arc welded corners—give rigid equipment-protection in any position • Steel or aluminum—⅛" or 3/16" front panels, .062" side frames • All parts drilled for assembly • Panel drilled for handles, chassis drilled for slide mounting ('Chassis-Trak') if desired • Customer may specify all dimensions, materials, finish • Top, bottom covers available.

### HANDLES

Features offered individually or in combination: completely recessed stainless steel single or double latch types, blank handles, push-button panel locks, trigger for tilt lock, positive screw-down clamp type for extreme shock or vibration.



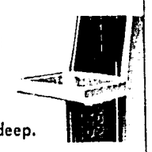
PHONE or WRITE for COMPLETE DATA

**ONE SOURCE...** for VENTILATED RELAY RACK CABINETS, CONTROL CONSOLES, BLOWERS, CHASSIS, CHASSIS-TRAK®, RELATED COMPONENTS

## CONVENIENT, MODULAR ACCESSORY EQUIPMENT

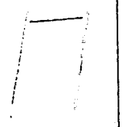
• Mount at any desired height on standard-tapped mounting rails • Standard construction spot-welded CRS (or aluminum for 4 top units) • Standard finish gray hammertone baked enamel—MIL or other available • Writing surfaces steel, Formica or aluminum • Easily installed.

SLOPE FRONT CONSOLE FRONT



Converts rack cabinet into console. Slope front heights and writing surface depths: 12¼", 14", 17½".

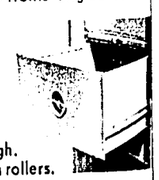
TURRET FRONT



Slope front height: 8¾" to 15¾" in 1¾" increments. Slopes 15° or 30°.

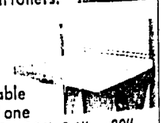
RIGID, FLAT CONSOLE WRITING SURFACE

Requires only 3½" of valuable panel space. 15¾" or 18¾" deep.



DESK TOP CONSOLE

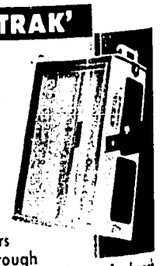
Mount on desk, cabinet, counter. Panel space 12¼" or 17½" high. Base 12¼" or 15¾" deep.



Standard width of above units is 21⅞"—available in 2, 3 or more section widths. Slope fronts angled 15° from vertical.

RACK MOUNTING DRAWERS

Standard 19" panel—multiples of 1¾" high. 10"—24" deep. Nylon rollers.



RETRACTABLE WRITING SURFACE

Uses only 1¾" valuable panel space—install one or more in cabinet. For 19", 24" or 30" racks. 16"—36" deep.

## 'CHASSIS-TRAK'

The IDEAL SLIDE for READY ACCESS to ENTIRE CHASSIS

• Ultra thin—mount 17" chassis in 17¾" opening • Extra strong • 'Basic' model tilts 120° above horizontal • 'Detent' model offers 7 locked positions through 210° • Finger touch releases chassis for bench work • 10"—24" long • Double extension • Finish approved for Military installations

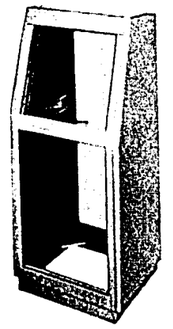
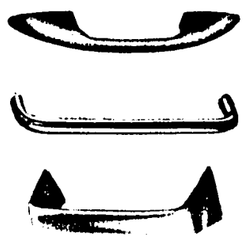
# The Perfect Complement

## TO MODERN ELECTRONIC EQUIPMENT



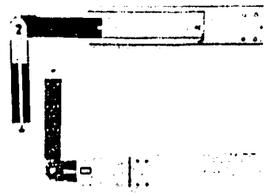
SERIES SIXTY CABINET RACKS



The most practical cabinet rack for either a single piece of equipment or a large instrumentation system.

Welded frame together with many exclusive features combine to make these cabinet racks exceptionally sturdy and highly versatile. They are available in 14 sizes and two color combinations.

The inclined panel cabinet racks have the same basic construction as the upright series. Nothing is sacrificed to provide strength and convenience while cost is kept to a minimum. Available in three sizes and two color combinations. Each model can be combined to create a rigid, homogeneous battery.



THESE ENCLOSURES ARE SHIPPED COMPLETELY ASSEMBLED AND READY FOR USE, ELIMINATING ALL CHANCES FOR ERROR IN ORDERING MULTIPLE COMPONENTS AND SAVING THE TIME AND COST OF COMPLETING THE ASSEMBLY.

## HANDLES

Bud handles are fabricated from steel, brass or cast aluminum. Their durable, attractive finish will provide long wear. They have unlimited applications in the electrical, electronic and many other fields. Bud handles are designed for rugged applications and are far superior to handles of similar appearance. They are available in a number of styles and sizes. Just a few typical examples are illustrated.

## CHASSIS SLIDES

The quality of a slide assembly is determined by the efficiency of operation under difficult conditions. The Bud line of quality ball bearing slides is designed to provide the highest possible serviceability under any conditions. Two types—16 styles and sizes provide the most flexible method of moving all kinds of equipment from enclosures. The "SI" line is designed primarily for military and industrial applications and the "SC" line for commercial use.

**For complete information concerning any of these products see your nearest Bud Distributor or write Dept. IR for Bulletin S-6060**

# chassis-trak® slides
## for rack-mounted electronic equipment

Chassis-Trak slides, formed from cold rolled steel, give complete accessibility and faster servicing . . . and the ultra-thin design means you can cut engineering costs by mounting 17" chassis in 19" standard racks. Wide bearing area design increases rigidity and reduces the possibility of binding due to misalignment.

Roller or solid bearing slides are available from stock. The "Detent" model locks in 7 tilt positions. The "Basic" model tilts with no lock assembly. These models are available in either standard weight or heavy-duty styles. Prefabricated gusset mounting assembly can be furnished with standard weight models.

In addition to the standard slides in stock, Chassis-Trak engineers will custom-build slides for special installations. All slides meet specifications for government or military projects and RETMA standards.

*Select the right slide for your application*

**MICROWAVE SERVICES, INC.**
**CONSULTING ENGINEERS—V. J. NEXON & STAFF**
- **For 9 years, MSI has been serving the Industry including U.S. and International Governments.**
- **MSI has served Oil and Gas Companies, Power, Telephone and Telegraph Utilities, Broadcast and Industrial users, Federal, State and Local Governments, Transportation companies and Foreign Countries.**
- **MSI makes feasibility studies, does physical terrain surveys, provides interference coordination, engineers system and supervises construction of Telecommunication networks—wire, carrier, radio, microwave, scatter, and television.**
- **MSI has also successfully done Independent Market Research and advised on advanced product development for the largest manufacturers of electronic communications equipment.**
- **MSI provides expert consultation in the preparation of proposals for extensive telecommunications networks in related military projects.**
- **We will gladly furnish our client list and the MSI successful performance history. Our experience is worldwide.**

**PRECIOUS METALS PLATING**

***let's start at the beginning . . .***

**You've got a problem that might be solved by the right electrodeposited finish!**

**Perhaps it's a "noise" or life problem on a slip-ring. Maybe it's achieving maximum Q in your cavity, or something as obvious as obtaining a deposit on ALUMINUM capable of withstanding your soldering requirements.**

**Whether it's one of those run-of-the-mill problems, or one seemingly insoluable, give COHAN EPNER a call! We've licked many that were thought beyond the state of the plating art.**

**A complete Q.C. lab, engineering men that talk your language, a half-century of know-how and imagination . . . and we also like easy jobs.**

**COHAN EPNER CO., INC.** 142 W. 14th St., New York 11, N.Y. CHelsea 3-3411

**Reading the small print!**

That's important in metal fabrications because small errors can cause big trouble. The special care taken by Falstrom in analyzing your blueprints will give you a better job at a more economical cost.

**MACHINE ENGRAVING WITH PIN-POINT ACCURACY ON ALL METALS & PLASTICS**

More than 35 years of custom precision engraving and fabricating by the most skilled craftsmen. Tolerances are maintained in the most minute work, including government and military specifications. The latest equipment and methods makes it possible to convey the maximum in wide-range service and dependability. No job too large or small. Send your blueprint or sketch for an estimate or call WOrth 2-4230. We will quote price and delivery date by phone or return mail. Satisfaction guaranteed.

**AMERICAN MOLDED**
**NYLON—Bobbins & Coil Forms**

PRINTED CIRCUIT TRANSFORMER BOBBIN

ONE PIECE COIL FORM

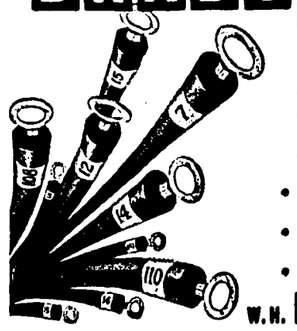
INSULATED LEAD SLOT

**NEW IDEAS REDUCE COSTS!**

*NEW* innovation in bobbins, complete with lugs, for printed circuit transformers. Eliminates cost and assembly of terminal board! The lugs are embedded in nylon for permanent locations especially designed to prevent wire breakage.

*NEW* one piece coil form, complete with lugs, for printed circuit I. F. and oscillator coils. Integral construction, the tube and base cannot come apart—constant core torque . . . designed to prevent wire breakage.

*NEW* insulated lead slot automatically insulates lead and eliminates washers and taping. This revolutionary bobbin speeds up automatic winding.



**NO TOOL COST ON STOCK BOBBINS**
**SPECIAL BOBBINS TO YOUR SPECIFICATIONS**

FREE samples and catalogs. Representatives in major cities. Write to this office for names and addresses.

**BRADY** *Self-Sticking*
**PERMA-CODE WIRE MARKERS**

Positive "around-the-wire" identification for the electronic industry. Brady markers tell which wire goes where—quickly . . . increase production, cut costs . . . conform to NEMA-ASA, and MIL specifications. 3 stock sizes: 1½", ¾" and ½". 9 job tested materials.

- **MINIATURE MARKERS** permanently identify wires under 3/32" dia.
- **BLUE-STREAK® RELEASE COATING** assures fast distortion-free application.
- **WRITE FOR *FREE* WORKING SAMPLES!**

SNAPSLIDE FASTENERS

PROVIDE VIBRATION-PROOF HOLDING AND QUICK, FOOL-PROOF RELEASE!

APPROVED UNDER ARMY-NAVY STANDARDS

Here's a simple, easy means of securely fastening assemblies to withstand shock or vibration, *and yet allow quick removal for inspection or repair.* Instant snap action engages or releases fastener . . . no tools are required! After installation, fasteners never need adjustment . . . even with repeated use.

Three sizes available for different load requirements. Large and medium sizes are made of corrosion-resistant *stainless steel.* Small size is made of nickel-plated brass. Stock parts fit various thicknesses of flanges and mounting plates . . . special parts can also be supplied.

# GUDELACE
## is engineered for problem-free lacing

It's no accident that Gudelace is the best lacing tape you can buy. Excellence is *engineered* into Gudelace. A sturdy nylon mesh is meticulously combined with the optimum amount of special microcrystalline wax. Careful selection of raw materials and superior methods of combining them give Gudelace outstanding strength, toughness, and stability. Gudelace is the original *flat* lacing tape which distributes stress evenly over a wide area. It is engineered to stay flat; it will not stretch out of shape when pulled. Gudelace's nonskid surface prevents slipping, eliminating the too-tight pull that causes strangulation and cold flow. Durability and dependability make Gudelace your most economic buy—with no cut insulation, fingers, or feelings.

Write for Data Book with specifications on Gudelace and Gudebrod's complete line of braided lacing tapes and dial cords—Temp-Lace, Stur-D-Lace, and Gude-Glass.

Specialists in Precision Molding of Intricate

# COIL FORMS

HYDRO
ENGINEERED PLASTICS

and other ELECTRONIC COMPONENTS comprising delicate MOLDED-IN METAL INSERTS

LOW COST FAST PRECISION MOLDING of NYLON* KEL-F* FIBERGLAS* and other plastic materials

The use of "universal" molds of exclusive HYDRO design assures low-cost tooling and quick delivery of all types of coil forms. Precision tooling insures a flash-free product held to close tolerances. This service is particularly attractive for short runs where high mold costs can raise unit prices of component parts substantially. Similar savings are possible on many other electronic components. *May we quote on your requirements?*

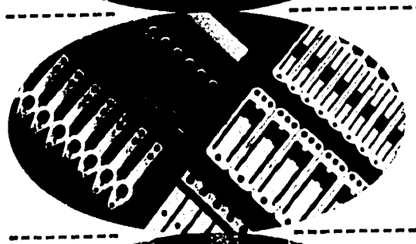
# I-S BERYLLIUM COPPER SPRINGS

Specially developed equipment and production processes, combined with the broad experience of I-S engineers, assure higher efficiency and better performance in your springs. Only 100% laboratory certified raw material is used in the production of micro-processed precision springs.

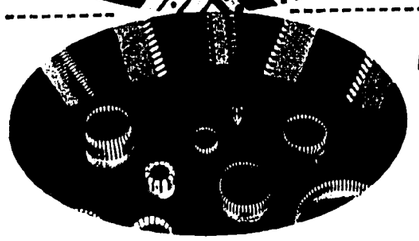
## BERYLLIUM COPPER MACHINED PARTS

Modern plant with complete facilities available for turning, grinding, milling, drilling, hardening and electroplating. Sample or medium production quantities are produced economically to exacting specifications. Our equipment is suitable for simple and intricate designs from .030" to 1.00" diameters.



## COMPRESSION COIL SPRINGS

Exclusive patented coiling machines and special heat-treating equipment assure close tolerances and uniformity on diameter and load test at specified deflection. These, and other quality factors, assure longer service life, higher endurance strength, better electrical conductivity and lower drift.



## SHORT RUN SERVICE

—for prototypes and pilot runs. The I-S short run department can save you time and money in the planning stage, or whenever production quantities are limited. A wide variety of diversified shop equipment is used to produce small orders at minimum cost.

## STRIP SPRINGS

Overall costs of many types of flat springs, used in high production quantities, are often reduced by use of I-S Strip Springs. Individual springs, separated by a score line, are fabricated from certified beryllium copper in lengths up to 12 or 16 inches long. Strip Springs, heat-treated to precise shape in multiple fixtures, are held to such close tolerances that hand adjustment in assembly is not necessary.

## HIGH FREQUENCY SPECIALTIES

I-S carries a complete line of standard items for use with lighthouse and similar tubes. A wide variety of finger contact strips for use in grounding and bonding applications are carried in stock. Standard items modified to meet specific applications are available on special order.

## Complete engineering and design service

*Call or write for I-S catalog including data on:*

- COMPRESSION SPRINGS
- FLAT SPRINGS
- STRIP SPRINGS
- CONTACT RINGS
- CONTACT STRIPS
- MACHINED PARTS

Our Engineering Department is available at all times to assist manufacturers in solving their problems in the application of micro processed beryllium copper springs. Their extensive knowledge and wide facilities often enable them to make specific recommendations that will result in a better part manufactured at a lower cost.

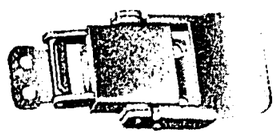
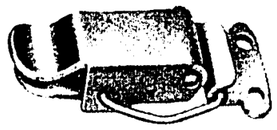
# COMPRESSION CATCHES
# ADJUSTABLE CATCHES
# HANDLES (all to Armed Forces qualifications)

## FOR INSTRUMENT CASES • TRANSIT CASES • CONTAINERS

No. VHC 340-2
(actual size)

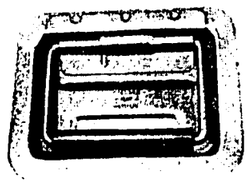


**A WIDE RANGE of STYLES and SIZES from junior..... to GIANT**



No. VHC 250-65
(actual size)

COMPRESSION SPRING CATCHES, No. 340 series, are miniature in size. Preloaded to 12 lbs. Standard 18 lb. holding tension. Cold rolled steel, plated or finished to specifications, or stainless steel. Styles with lever straight, as illustrated, or with up-sweep or down-sweep.



ADJUSTABLE CATCHES for varied applications (also recessed), No. 250 series, provide secure holding, easy engagement, rapid release. Steel or aluminum base. Designed to function up to 1,000 lbs. (manual operation). Stress strength to 3,000 lbs. (steel base). Styles for surface mounting or recessed in a plate. Hole for wire seal and slot for ¾" "Navy" seal.

**COMPRESSION SPRING DRAW PULL CATCH No. SC-B-83314-42** with springs concealed. Provides 70 lbs. holding tension on standard specification.

**HEAVY-DUTY PULL-DOWN CATCH No. HC201** with holes for fastening or for welding applications. Available in plated finishes; also of brass, stainless steel, or aluminum materials.

**RECESSED HANDLE No. H560** available in steel or aluminum.

**SURFACE HANDLE No. H945** to meet Armed Forces Specification MIL-T-945.

**A VARIED LINE OF CATCHES AND HANDLES to meet commercial requirements. Descriptive literature on request. Inquiries invited on design and application problems.**

# PRECISION

*The Only* **COMPLETE COIL FORM SERVICE** *Available...*

- SQUARE TUBES
- ROUND TUBES
- RESINITE COIL FORMS
- BOBBINS
- MANDRIL SERVICE
- FABRICATING SERVICE

**SQUARE AND RECTANGULAR TUBES**
Produced in any length, shape or size from 1/16" to 8", wall thickness from .010 to .125. Fabricated from dielectric kraft, fish paper, acetate, other patented materials or combinations. Bowed sidewall or Di-Formed construction.

**ROUND TUBES**
Produced in any decimal size up to 8" I. D. Fabricated from kraft, fish paper, cellulose acetate, mylar, polystyrene, quinterra, fibre glass and other dielectric materials.

**RESINITE COIL FORMS**
These coil forms have the highest resistivity of any resinated product. Furnished plain, embossed, internally threaded or triangular shape . . . also flyback transformer forms.

**BOBBINS**
Supplied round, square or rectangular. Cores fabricated from any of the above materials. Metal, asbestos, plastic or fibre flanges. Constructed to fit smaller spaces and permit multiple winding.

**MANDRIL SERVICE**
Accurately ground steel and aluminum coil mandrils at cost economy comparable to commonly used undependable wood or undersized steel mandrils.

**FABRICATING SERVICE**
We have modern high speed equipment to provide you with any special shape or form . . . rolled, spun, flared, punched or formed to your particular requirement.

***Ask about Precision's complete coil form service. Request informative bulletin.***

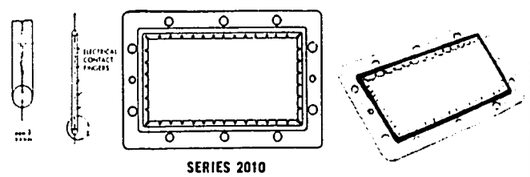
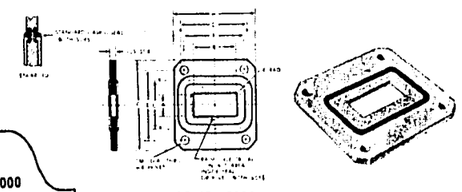
# Parker SEAL COMPANY

Culver City, California and Cleveland, Ohio



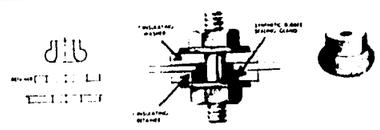
A DIVISION OF PARKER-HANNIFIN CORPORATION

## WAVE GUIDE SEALS

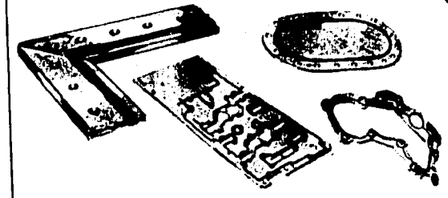


Parker Seal Company's metal retained seals are based upon controlled confinement of a seal "gland" that has a "memory", either induced or inherent. All tolerance factors of the seal are taken care of in the design and manufacture, thus obtaining significant benefits and considerable savings. This unique application of the proven theory that rubber resists deformation result in a far superior seal. These seals have all been laboratory and field tested. They are in use in many hundreds of applications throughout industry, military as well as commercial. Electro-O-Seals are especially designed to provide the ultimate in sealing effectiveness, plus complete electrical continuity for prevention of R/F leakage in wave guide or micro-wave applications—equipment, guides, "clean rooms", data machines, etc.

SERIES 5600



SERIES 2010



SERIES 5620

## TERMINAL SEALS SERIES 5000

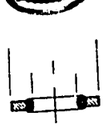
Specially designed to seal the style of terminal illustrated, these seals provide sealing effectiveness with good anti-arcing conditions. The gland only is furnished and they are available as standards in sizes 4, 6, and 10, for both general purposes and extreme temperature usage.

## FLANGE & ORIFICE SEALS

Gask-O-Seals® and Strip-O-Seal are the finest seals for the purpose available. They provide positive sealing while affording many other advantages. They afford the design engineer with a design tool that allows considerable freedom from worries about leakage under difficult conditions. They can be made to meet almost any configuration requirement to seal almost any fluid, from high vacuum to 20,000 PSI, covering a temperature range from —80° to 350°F. (500° intermittent)

## BOLT AND STUD SEALS

SERIES 800



Series 800 Lock-O-Seals® provide unequalled sealing effectiveness for purposes intended. They are available in the small sizes 2 thru 6 and meet the same usage specifications as series 600.

## BOLT AND STUD SEALS

SERIES 600

Series 600 Stal-O-Seals® provide the finest mechanical sealing for bolts, studs, rivets and some other fasteners and fittings. The seal is mechanically bonded, one-piece construction with proven sealing effectiveness. They are very economical and easy to assemble. Available in sizes —8 thru 2" for nearly all types of fluids and uses from —80° to +375°F. (500° intermittent)

## O-RINGS

Parker O-rings have been proven superior in actual use. They are available in all standard sizes and in specials and in compounds to meet nearly every requirement as to fluids, recommended pressures and temperatures, meeting all military as well as industrial specifications.

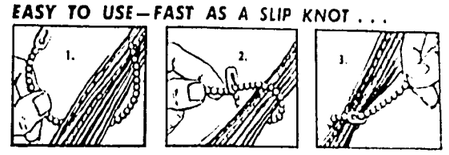
"NOW AT LOW COST"



PLASTIC

E-Z

WIRE TIES

Made from Polyethylene and Nylon. Re-useable feature, easy locking. Polyethylene sizes: 4" and 10". Nylon sizes: 10".

EASY TO USE—FAST AS A SLIP KNOT . . .

SELF-LOCKING
No knotting or twisting, locks tight automatically

ADJUSTABLE
add or remove wires without damaging ties or harness

REUSABLE
can be used over and over when making mockups and prototypes

COLOR CODED
available in red, yellow and blue polyethylene, and white nylon

FREE SAMPLE UPON WRITTEN REQUEST

RICHCO PLASTIC CO.

3722 W. NORTH AVENUE CHICAGO 47, ILLINOIS

## NOWHERE IN THE WORLD WILL YOU FIND SUCH A VARIETY OF FASTENERS UNDER ONE ROOF

EYELETS, RIVETS, GROMMETS, WASHERS, HOLE PLUGS
SNAP FASTENERS, FERRULES, TERMINALS, STAMPINGS

and many similar fasteners are made in enormous variety and quantity. Made from most any metal and in all finishes. We also make a complete line of machines for attaching eyelets, rivets, etc.

Send for our general catalog which illustrates over 1000 metal articles.

## STAFFORD

**FOR QUALITY MARKING**

- Sharp, precision work
- Accurate to your most critical tolerances
- Uniform throughout any size run
- Meeting all government and mil-specs
- Delivery on time

**SCHEMATICS • PANELS DIALS and SCALES NAME PLATES**

Any size, shape or style. Engraved, lithographed, etched or silk-screened in any metal or plastic. Hairline accuracy assured. Approved under MIL-P-7788 for edge-lit panels and dials.

**CABLE MARKERS**

Any shape or size. Embossed, stamped, etched or engraved in aluminum, brass or stainless steel. Furnished blank, lettered or numbered. Enameled any color.

**STAFCALS**

New concept in nameplates . . . in multi-colored anodized aluminum foil. Any size, shape, color or finish. Any type adhesive backing.

## Flexible Shafts

**FOR MANY FIELDS**

CIRCLE ESS

Circle Ess Flexible shafts are compact, lightweight, strong, durable. They transfer power efficiently and economically regardless of obstructions in the path of installation, while insuring the most accurate alignment. For complete flexible shaft specifications send for our Flexible Shaft Bulletin 539.

**Circle Ess Adapters** are lightweight, compact, durable and offer a number of varied uses. The Dual Drive Adapter pictured here measures only 2-27/32" x 1-61/64" and weighs only 4 oz. For complete adapter specifications send for Flexible Shaft Adapters Catalog.

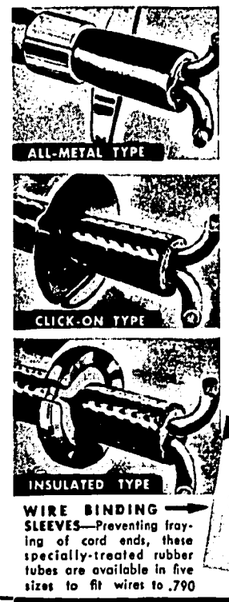
## 4 WAYS TO END ALL CORD AND CABLE SERVICE FAILURES *Economically*

**PROTECT YOUR PRODUCT**

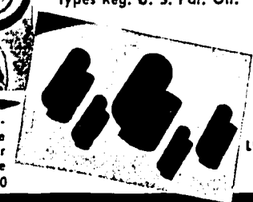


*at point of strain*

Protect product salability too—by insuring long life for cords, cables and conductors. Genuine "GRIPMASTER" Strain Reliefs provide these vital features—

- ★ Anchor cords to housing
- ★ Eliminate taping or threading
- ★ Prevent unraveling
- ★ Prevent cord pull damage
- ★ All sizes and styles
- ★ Easy to apply
- ★ Inexpensive

Gripmaster Strain Reliefs are "tremendous trifles" that make good products better!



*Ask for Samples.*

**GRIPMASTER STRAIN RELIEFS**

**Interruptions due to cable and cord connection failures are eliminated because they anchor the cord to the product at the point of strain. GRIPMASTER Strain Reliefs can withstand pulls up to 100 lbs., and are acceptable to Underwriters Laboratories. All types Reg. U. S. Pat. Off.**

**WIRE BINDING SLEEVES**—Preventing fraying of cord ends, these specially-treated rubber tubes are available in five sizes to fit wires to .790

Lepel induction heating equipment represents the most advanced thought in the field of electronics... the most practical and efficient source of heat developed for numerous industrial applications. You are invited to send samples of work with specifications. Our engineers will process and return the completed job with full data and recommendations without cost or obligations.

**FLOATING ZONE UNIT FOR METAL REFINING AND CRYSTAL GROWING**

A new floating zone fixture for the production of ultra-high purity metals and semi-conductor materials. Purification or crystal growing is achieved by traversing a narrow molten zone along the length of the process bar while it is being supported vertically in vacumm or inert gas. Designed primarily for production purposes, Model HCP also provides great flexibility for laboratory studies.

Model HCP

*Features*

- A smooth, positive mechanical drive system with continuously variable up, down and rotational speeds, all independently controlled.
- An arrangement to rapidly center the process bar within a straight walled quartz tube supported between gas-tight, water-cooled end plates. Placement of the quartz tube is rather simple and adapters can be used to accomodate larger diameter tubes for larger process bars.
- Continuous water cooling for the outside of the quartz tube during operation.
- Assembly and dis-assembly of this system including removal of the completed process bar is simple and rapid.

***Made for the most exacting applications of all...***

# The family of the world's most nearly perfect electronic and electrical insulation materials

WHATEVER YOUR HIGH-TEMPERATURE NEEDS—to 1550°F.—one of the MYCALEX family of quality insulating materials is sure to meet your most critical requirements. Each of these dependable insulating materials offers a *unique combination* of special advantages for electronic and electrical design: the *plus* factors of the inorganics *and* the design latitudes of the organics.

**MYCALEX®** glass-bonded mica—formulations of high-quality natural mica and electrical grade glasses, with high-dielectric strength, total dimensional stability, high-arc resistance, high-temperature resistance. Depending on their formulation, they can be machined or molded to exacting tolerances, inserts can be permanently molded in or cemented in—the thermal expansion of MYCALEX being close to that of stainless steel.

**SUPRAMICA®** ceramoplastics—advanced formulations of synthetic mica and high-temperature glasses, created for insulation applications at maximum temperature endurances up to 1550°F. They have a thermal expansion coefficient close to that of stainless steel. They are available in moldable or machinable types . . . both offering *total* dimensional stability.

ENGINEERING AND DESIGN ASSISTANCE PROGRAM—Our diversified experience includes commercial and military projects . . . applied research and product development. No matter what *your* electronic or electrical insulating problem, we can assist you in the evaluation and design of materials or components. Your inquiries will be answered promptly and in confidence.

**MYCALEX 400 glass-bonded mica**
Machinable insulation that withstands a maximum temperature endurance of 700°F. (unstressed) and a heat distortion temperature* of 850°F.

**MYCALEX 410 glass-bonded mica**
Precision-molded insulation that withstands a maximum temperature endurance of 650°F. (unstressed) and a heat distortion temperature* of 690°F.

**MYCALEX 410X glass-bonded mica**
Lightweight precision-molded insulation that withstands a maximum temperature endurance of 575°F. (unstressed) and a heat distortion temperature* of 690°F.

**MYCALEX 385 glass-bonded mica**
Machinable insulation that withstands a maximum temperature endurance of 700°F. (unstressed) and a heat distortion temperature* of 850°F.

**SUPRAMICA 620 ceramoplastic**
Machinable insulation that withstands a maximum temperature endurance of 1550°F. (unstressed) and a heat distortion temperature* of 1360°F.

**SUPRAMICA 500 ceramoplastic**
Machinable insulation that withstands a maximum temperature endurance of 700°F. (unstressed) and a heat distortion temperature* of 900°F.

**SUPRAMICA 560 ceramoplastic**
Precision-molded insulation that withstands a maximum temperature endurance of 932°F. (unstressed) and a heat distortion temperature* of 870°F.

**SUPRAMICA 555 ceramoplastic**
Precision-molded insulation that withstands a maximum temperature endurance of 650°F. (unstressed) and a heat distortion temperature* of 700°F.

**ASTM Test Method D648 (modified for glass-bonded mica) at stress of 264 psi.*

New MYCALEX ENGINEERING COMPARA CHART ... a valuable comparison of the physical properties of most well-known insulating materials. Send for *your* personal copy!

*General Offices and Plant:* 126 Clifton Blvd., Clifton, N. J.
*Executive Offices:* 30 Rockefeller Plaza, New York 20, N. Y.

**World's largest manufacturer of glass-bonded mica, ceramoplastic and synthetic mica products**

SYNTHAMICA SYNTHETIC MICA · SINCE 1919 MYCALEX THE INSULATORS · SUPRAMICA CERAMOPLASTIC

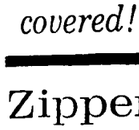
## Zippertubing®

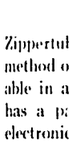
*Instant Covering for All Applications!*

Zippertubing, an economical on-the-job method of jacketing, is a flat tape, available in a wide range of materials, that has a patented extruded plastic track electronically welded to both edges. The tape or jacket is wrapped around the object to be covered so that the tracks engage, then "zip" shut. If permanent closure is required, a special sealant is provided that fuses the tracks together.

**GENERAL PURPOSE**
Standard without overlap. Generally conforms to MIL-I-631C.



**MILITARY TYPE**
with overlap Type 74 meets requirements of MIL-I-7444B. Type 63 meets MIL-I-631C. QPL certificates of conformance or test reports furnished on request.



**SHIELDED ZIPPERTUBING®**
copper. These conductive metals are laminated to vinyl-impregnated Nylon or glass cloth. When zipped around wires, it provides immediate 100% coverage for grounding RF and UHF interference.

**THERMAZIP**
Protects cables or pipes from high temperature exposures. Type ALAS utilizes aluminized asbestos cloth. Type ALSR utilizes silicon rubber-impregnated glass cloth.

**ZT PROTECHTORS®**
NEW! Protective plastic covers with plastic zipper closure for splices and break-outs. Installation time is measured in minutes – not hours! Full range of sizes and colors.

**SPECIAL CONSULTATION**
At your request, our Field Engineer will call or you can mail your design concept to us for evaluation and quotation. All requests confidential.

SIERRA
*Research Corporation*

New approaches toward data transmission, ship motion instrumentation, closed loop control and radar serve to place Sierra Research Corporation foremost in the electronic field. Serving the military and private industry, experienced personnel work with the most modern equipment assuring solutions to your specific problems on a system or sub-system basis.

HumiSeal

PROTECTIVE

INSULATING

COATINGS

for electronic applications

HumiSeal protects electronic components and assemblies from, temperature extremes, humidity, fungus attack, dust, saline atmospheres and other environmental stresses.

A HumiSeal "Selector Chart" is available to facilitate the choice of coating best suited for the requirements. Columbia Technical's staff of chemists and engineers will gladly assist in recommending a standard or custom-formulated coating for any electronic application.

Write for data.

The New Model HTT Portable Wire Marking Tool

For imprinting on coated wire and tubing

This small portable wire marking tool is sold complete, electrically heated, marking tapes type and wire guides. To operate, simply set type in holder, push or pull coated wire through guide, press and mark the wire where you want.

This tool is guaranteed by ACKERMAN GOULD, manufacturers of marking equipment for 35 years.

For Production Requirements we offer three models . . . MM-2—MM-4—MM-6 . . . as well as specials to meet your marking needs.

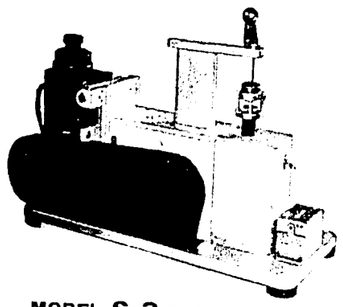
DO YOU NEED AUTOMATION for FINISHED WIRE LEADS with Terminals Attached?

NEW ARTOS TA-20-S
Performs 4 Operations Automatically!

1. Measures and cuts solid or stranded wire 2" to 250" in length.
2. Strips one or both ends of wire from 1/8" to 1".
3. Attaches any prefabricated terminal in strip form to one end of wire. (Model CS-9-AT attaches terminals to BOTH ENDS OF WIRE simultaneously.)
4. Marks finished wire leads with code numbers and letters (optional attachment).

UP TO 3,000
finished pieces per hour. Can be operated by unskilled labor. Easily set up and adjusted to different lengths of wire and stripping. ENGINEERING consultation without obligation. Machines for all types of wire lead finishing.



AGENTS THROUGHOUT THE WORLD

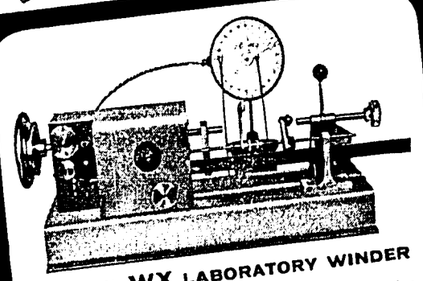
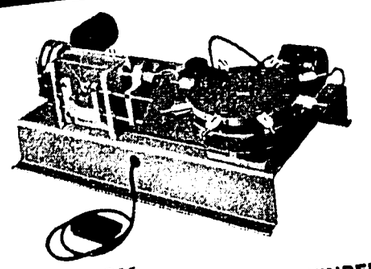
# The most advanced coil winding equipment in the world today!



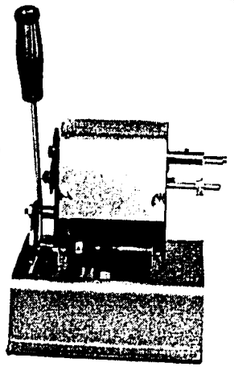
**MODEL S-3 STATOR WINDER**

Smallest of our family of machines for both internal and external winding in lamination stacks.



**MODEL T TOROID WINDER**

One of several types of toroid winders for inductances, auto transformers, rheostats, etc.



**MODEL WX LABORATORY WINDER**

The world's most versatile winding machine for all types of radio frequency coils as well as bobbins, transformers, resistors, etc. Features continuous gain or feed adjustment and our exclusive adjustable cam.

**MODEL CK AUTOMATIC TURRENT WINDER**

One of our several models to wind many coil types on a completely automatic or semi-automatic basis.

**MODEL MP HAND WINDER**

Coils with up to 60 turns produced in a single stroke of the lever.

# ultrasonics Cleans parts in seconds

CIRCOSONIC* Multi-Purpose cleaning units pay for themselves in quick order by radically cutting costs and saving labor. They are ideal for removing excess solder flux, fingerprints, lint, waxes, polishing compounds from such parts as gears, bearings, instruments and hundreds of other applications.

CIRCOSONIC units are available in a wide range of sizes to serve your every cleaning need. CIRCO engineers will be pleased to offer technical assistance and recommend the specific units to fit your needs.

'Hotip'

Choice of 3 power supply units with multi-position switches

## THERMAL WIRE STRIPPING AND RESISTANCE SOLDERING EQUIPMENT

Save time, cut costs and improve quality with Hotip thermal wire stripping and resistance soldering equipment.

HOTIP THERMAL STRIPPERS are designed for use on plastic wire including Teflon®. Tool operates on a simple, straight pull action Equipment includes 5-position power supply and foot switch.

HOTIP RESISTANCE SOLDERING eliminates cold joints. Choice of tweezer and probe units for all types of delicate work. Equipment includes 5-position power supply and foot switch.

TEFLON® is Dupont's registered trademark for its fluorocarbon resins, including TFE (tetrafluoroethylene) resins.

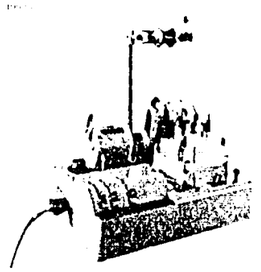
WITH THE MOST COMPLETE LINE OF AUTOMATIC COIL WINDING EQUIPMENT EVER OFFERED TO THE ELECTRICAL/ELECTRONICS INDUSTRIES

**MICAFIL**

TWO EXAMPLES FROM THE MICAFIL LINE



Type OFA series of coil winders

- ▲ Stepless adjustable traverse feed – no cams – no change gears – just DIAL your wire size even while machine is running.
- ▲ Wire feed ranges in 5 groups from #56 up to #9 AWG
- ▲ Winding speeds up to 18,000 rpm.
- ▲ Accurate micrometer adjustment of layer width – no cams.
- ▲ Constant-distance wire guide, adjusts automatically to increasing coil diameter.
- ▲ The MICAFIL Building Block System – buy what you need – nothing more – add other functional attachments later on.
- ▲ Single and multiple winding
- ▲ Automatic paper interleaving attachments.
- ▲ World-renowned Swiss workmanship.
- ▲ Installed and serviced by factory-trained engineers.

Type [illegible] Toroidal winder, Model [illegible] automatic winding of precision toroidal coils

- ▲ Stepless adjustable [illegible]

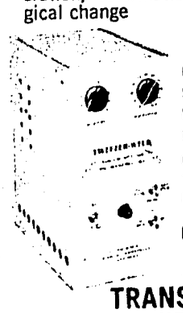
**NOW** produce up to 6,000 welds per hour . . . automatically . . . with one operator.



**TWEEZER WELD**

Precision Resistance Welding Equipment

**BENCH MOUNTED STORED ENERGY WELDER**

- New TW5 low friction welding head
- Stored energy panel of 80 Watt second capacity
- Discharge time of 0.0008 to 0.0012 second
- Permits welding of difficult materials, i.e.: copper, silver, tungsten, etc.
- Reliable welds without discoloration, deformation, metallurgical change

COMPACT SYNCHRONOUS WELDING TIMER
6" wide
10½" high
8½" deep
model T-3

**TRANS-SYNC WELD-TIMER**

- 1 KVA capacity utilizing semiconductors.
- Also ideally suited with high speed automatic machinery.
- Operates at a rate up to 1200 welds per minute . . . welds partially oxidized materials with ease.
- Welding time: ½ cycle (8 milliseconds) to 10 cycles (160 milliseconds).

**FEDERAL TOOL ENGINEERING CO.**
1400 Pompton Ave.

*ANOTHER IMPORTANT BREAKTHRU!*

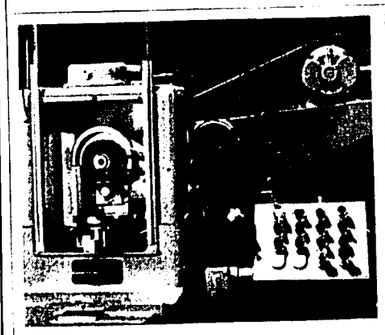
**DUROTHERM**
**Non-freezing Long-Life SOLDERING TIPS**

In ALL Shapes and Sizes

Fit ALL Makes

HI-PERFORMANCE Tips for use in HI-PERFORMANCE, HI-TEMPERATURE Irons. Tips positively cannot stick or freeze in any iron—easily removed after months of service. No need to remove tips daily. Minimum loss of heat delivery. Tip shank immunized from solder, except on working surface at end of tip—prevents creeping of solder into element tip hole and spilling of solder on components.

INDUSTRY'S No 1 HEXACON SOLDERING IRON



**SEND FOR CATALOG**—showing the most complete line of industrial Soldering Irons and Long-Life Clad Tips.

**HEXACON ELECTRIC COMPANY**

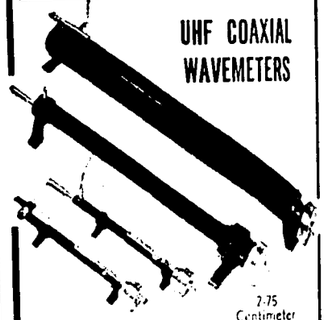
# MICO



Heavy-Duty 2 & 3 Dimensional Engraver

FOR:
Engraving Nameplates
Fine Routing Work
Profiling Small Objects
Making Small Dies and Molds

**FEATURING:**
- Six Reduction Ratios—From 1.5:1 to 4:1.
- 1/10 H.P. Ball Bearing Motor permits continuous operation for die or mold work in steel.
- Absolute accuracy for three-dimensional reproduction.
- Uses standard taper-shank cutters or ⅛" diameter straight shank cutters and end mills.
- Copy and work right-side-up: always in direct view of operator.
- Many attachments available to increase versatility of machine.

# The LUXO MAGNIFIER

IDEAL FOR VISUAL ACCURACY ON SERVICE, TEST AND INSPECTION BENCHES.

Luxo's excellent magnification with cool shadow-free fluorescent light increases production and reduces the number of rejects.

Optically correct magnification also improves visual accuracy while working on miniature circuits and assemblies, reading of parts numbers, in terminal identification and inspection.

Built into every Illuminated Magnifier are the world-famous Luxo features—modern functional design, quality construction, flexibility, portability and serviceability.

Luxo Lamps are also available in Incandescent, Fluorescent and Combination models.

All UL approved.

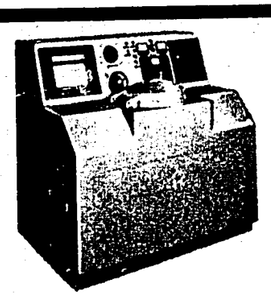
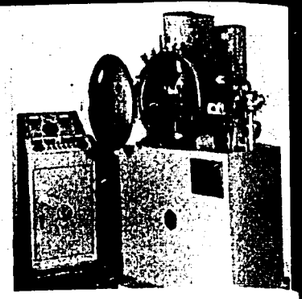
# HIGH and ULTRA-HIGH VACUUM EQUIPMENT



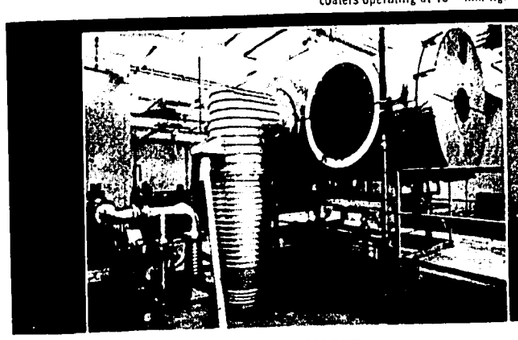
**CRYSTAL GROWING**

Low-cost resistance heated standard furnace for growing single crystals of silicon, germanium, and intermetallic compounds under inert gas or vacuum. Minimum maintenance. Top reliability.



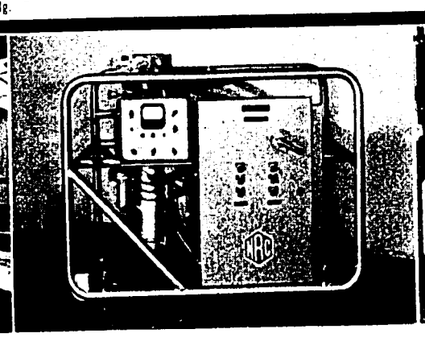
**VACUUM COATING**

Model 3144 is complete facility for single or multiple source deposition of films with thicknesses controllable from a few molecules to a few mils. Standard bell jar and tank coaters range from table-top to 84" I.D., operate to $10^{-5}$ mm Hg. Special units also available, including electron beam and ultra-high vacuum coaters operating at $10^{-9}$ mm Hg.



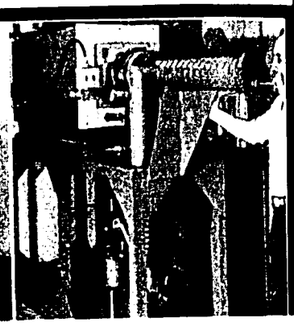
**TANTALUM SINTERING FURNACE**

Model 2915 is a high capacity, packaged, internal element furnace, featuring long-lived, 3 phase, 6"ID x 10" element — high speed heating and evacuation to 4400°F and $10^{-5}$ mm Hg. — graphic panel — automatic protective devices. Larger and smaller units also available.



**ELECTRON BEAM WELDING**

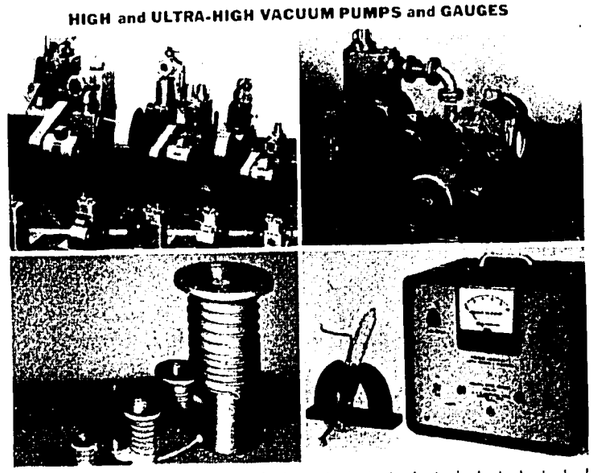
Provides contamination-free, precision welding with minimum heat-affected zone and depth-width ratios to 4/1. Ideal for heat sensitive assemblies, evacuated units, and reactive and refractory metals.



**SPACE CHAMBERS**

Standard and special systems to simulate the pressures and temperatures found at altitudes to above 400 miles. Available in sizes from 12" to 84" I.D., pressures to $10^{-10}$ mm Hg.

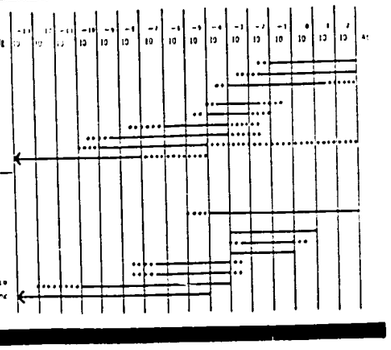
**PORTABLE PUMPING SYSTEMS**



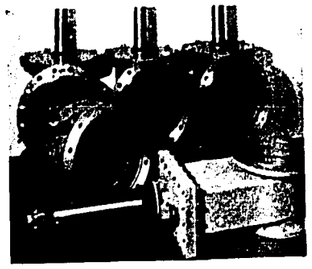
Highly flexible vacuum sources for production and research. Fast and efficient, can operate as low as $10^{-6}$ mm Hg. range. Available with 2, 4, 6 and 10" diffusion pumps. Self-contained, just plug in power and cooling water.

**HEAT TREATING AND OTHER VACUUM FURNACES**

Two-zone, 5" diameter muffle vacuum heat treating furnace. Others available from 2" to 54". Temperatures to 2200°F. Pressure to $10^{-5}$ mm Hg. Complete line of Vacuum Furnaces — induction, arc, and resistance — with capacities from 2 to 10,000 lbs. Also new Electron Beam Furnaces for ultimate in purity.



**HIGH and ULTRA-HIGH VACUUM PUMPS and GAUGES**



| Pumps | Capacity CFM | "Clean" Vacuum | Remarks |
|---|---|---|---|

NEO-22

For details, circle #729 on Reader Service Card

**VACUUM VALVES**

Air release, ball, throttling, high conductance, angle, wye, globe, and slide valves. Manual and air operation. Bronze, mild and stainless steel, aluminum. Bellows and O-ring sealed. For all sizes of systems, from ⅛" to 36". ALSO seals, flexible connectors, cold traps, and accessories.

**ONE-STOP SOURCE FOR RELIABLE HIGH VACUUM EQUIPMENT**

NRC Equipment offers both high vacuum technology and a complete line of reliable high vacuum equipment. Together, they provide valuable "one-stop" source for all your high vacuum needs.
Send for complete specifications on any of the products shown above or application assistance on how to use them profitably.

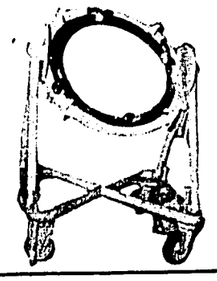
## PRODUCTION FIXTURES



**Attention Methods Engineers**

Production Tool and Fixture assemblies save you time and money in your wiring and assembly departments. "Tiny-Fix," your third hand, positions miniature chassis, terminal boards and connectors in proper alignment which results in quicker and more efficient work.

The S-12-W above differs from our standard friction and index models in that it offers worm drive that gives positive positioning even under heavy stress. The PF-20-C floor model precision fixture is designed to level and rigidly support the bulky but delicate chassis assemblies required by recent developments in the missile and related industries. 36 inch height at pivotal centers permits the rotation of assemblies as wide as 50 inches through 360 degrees in two planes.

**Adapters similar to those shown in the assembly fixtures above are designed by our engineering staff to meet your specific requirements.**

*Write us for our catalog and current list of firms now using our equipment in the electronic industry.*

## FRONT LOADING MULTIPLE HEADER BOBBIN WINDER
### Adjustable Length

Up to 4 heads easily handled by operator without shifting position. Each head winds random wound Bobbin Coils, Solenoids, Repeater Coils or Resistors up to 2½" long and up to 4" OD. Each head individually motorized and easily portable.

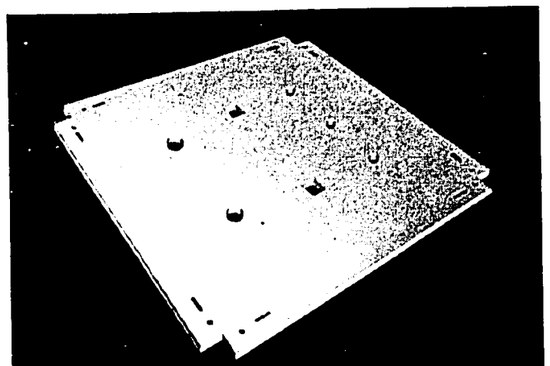
Note extreme compactness

Exclusive time-saving convenient front loading—spindle faces operator. Winding traverse infinitely adjustable—no cam changing.

Up to 7000 RPM winding speed. Exclusive features: 1) Slow-start eliminates wire breakage. 2) Extra economy positive stopping magnetic brake. 3) Instant automatic brake release.

Other time-saving features: 1) Instant re-setting automatic counter. 2) Faster gear changing - gear box handily located on top of head. 3) One motion by operator re-sets counter and starts machine—starting switch located directly opposite counter re-set lever. 4) No oiling necessary--all parts automatically lubricated. 5) Tension conveniently mounted below spindle.

Increase production, lower costs, lessen down time with Model 314-AM.



**GEO. STEVENS MANUFACTURING CO., INC.**

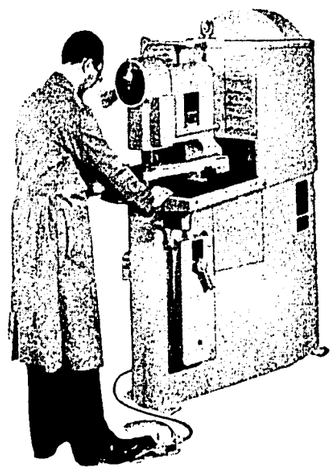
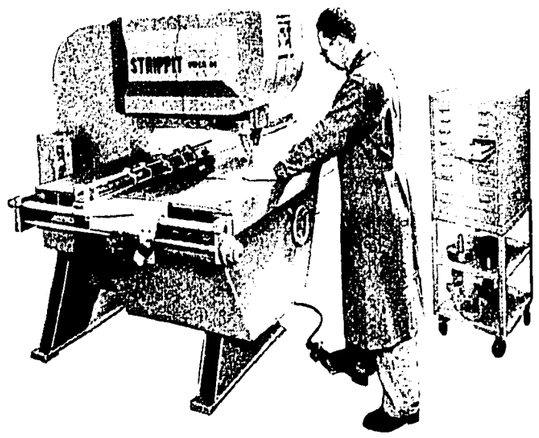
Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items, "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 135-240.

**PRODUCTION TIME: 2.8 minutes.** Electronic chassis, with 23 holes and 4 notches. Takes 6.5 minutes to set up standard gauging. Punching requires only 2.8 minutes each.



**PRODUCTION TIME: 1.97 minutes.** Printed circuit board, with 29 holes. Production time per piece is 1.97 minutes using exclusive STRIPPIT Duplicator and template method.

# STRIPPIT Fabricators cold-punch printed circuits and electronic chassis *FAST*



There is no more profitable way to punch, notch and nibble where limited volume will not support high tooling costs. STRIPPIT Fabricators feature an exclusive combination of quick-set, multiple-stop gauging and permanently aligned, self-stripping punch assemblies and die buttons that can be changed from one size to another in less than 20 seconds.

STRIPPIT Fabricators eliminate costly "in-between" tool designing and die making—let you go from drawing to finished part in a matter of minutes. Applications are almost limitless. STRIPPIT Fabricators will punch any sheet material up to ¼" thick and notch and nibble any sheet material up to ⅛" thick.

Write for catalogs describing the two models of STRIPPIT Fabricators. For a free demonstration at your plant, ask us to schedule a visit of the STRIPPIT Mobile Unit. It doesn't cost anything to get the complete STRIPPIT story.

STRIPPIT Model 15A contains the new STRIPPIT Electro-Hydra matic Head. Simplified design completely eliminates the need for pressurized air.

STRIPPIT Super "30" has integral Duplicator unit for medium production runs. Greater throat depth permits punching 30" from sides of work.

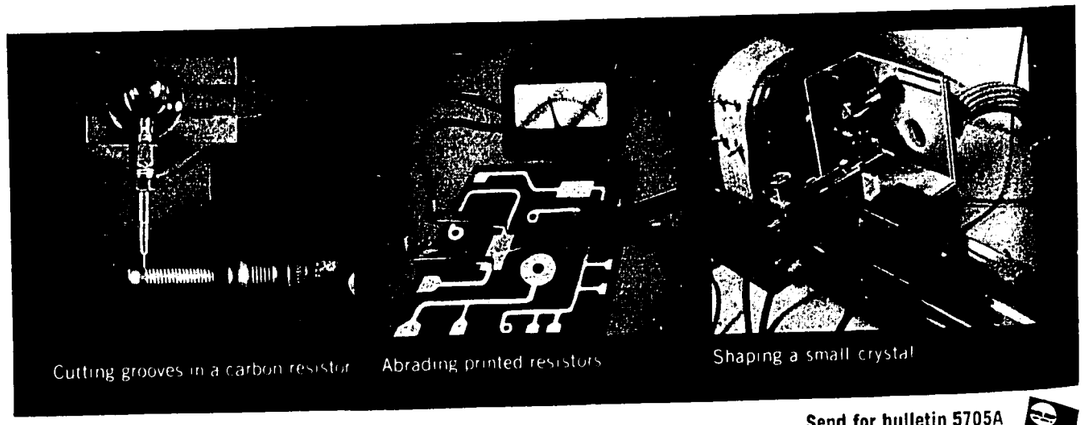
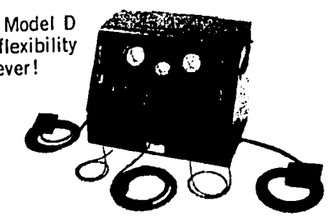
# THE S. S. White INDUSTRIAL AIRBRASIVE® UNIT

## ...cool, shockless, precise way to cut...abrade...debur...clean hard, brittle materials



DIODES • CAPACITORS
STRIPPING POTENTIOMETERS
COATED RESISTORS
SHAPING GERMANIUM AND OTHER CRYSTALS
TRANSISTORS • GLASS
MICA • TUNGSTEN
DEBURRING STAINLESS STEEL
REMOVING METAL COATINGS, OXIDES
THERMOCOUPLES
ABRASION TESTING
PRINTED CIRCUITS
CALIBRATION
ETCHING • DRILLING FROSTING
...AND MANY OTHERS!

The Industrial Airbrasive is doing jobs that were previously thought impossible! By gas-propelling a precise stream of fine particles it gives a *fast, cool, shockless* cutting or abrading action. It is equally useful as a laboratory instrument or a mass-production tool. Every day new applications in the electronics field are being found.



**Send us samples of your most difficult cutting problems and let us test them for you at no cost!**

1074

Cutting grooves in a carbon resistor. Abrading printed resistors. Shaping a small crystal.

New Dual Model D ...greater flexibility than ever!

**Send for bulletin 5705A ...complete information or—call collect!**

# Weller® MAGNASTAT®

## CONTROLLED TEMPERATURE SOLDERING IRONS

. . . with advanced features for greater efficiency, longer life.

- **VARIOUS TIP TYPES AVAILABLE.** Made of copper for fast heat transfer and premium iron plating for long life—with built-in Magnastat sensing device.
- **NEW TIP RETAINING NUT MINIMIZES FREEZING.** Seals tip receptacle from flux fumes.
- **NEW RUBBER SHOCK ABSORBER.** Also prevents iron from sliding off bench.
- **NEW, RUGGED, NON-ARCING SNAP SWITCH.** Guarantees continuous, reliable service.
- **PLASTIC HANDLE.** Extra strong—cooler handling.
- **ADVANCED CORD CONNECTION.** Locks cord securely in place, yet permits easy replacement.
- **2 or 3-WIRE CORDS NOW AVAILABLE** for all models. Cords are flexible and light in weight.

Remember, too, Weller Magnastat Soldering Irons automatically maintain the correct soldering temperature—never overheat. They weigh only half as much as uncontrolled irons and give greater heat efficiency with lower wattage. This means more reliable soldering, less down time.

Model TC-552 provides

**2 SOLDERING TEMPERATURES**

. . . low heat for heat-sensitive soldering . . . higher heat for regular work. Accomplished by interchanging high and low heat tips. 55 watts. **$9.00** list

**2 other Magnastat Soldering Irons are available**

**MODEL TC-602.** 60 watts, for light to medium electrical soldering. **$10.00** list

**MODEL TC-1202.** 120 watts, for medium to heavy electrical soldering. **$11.50** list

*Prices shown are for Magnastat Iron including tip and two wire cord.*

Send for NEW Magnastat Soldering Iron literature.

**Make your Ferrites with**

HIGH PURITY
**MAPICO®**
FERRIC OXIDES
**for TOP performance**

These reactive synthetic MAPICOS, some especially developed for ferrite manufacture, are over 99% pure $Fe_2O_3$. Choice of suitable characteristics is made easy—many variations in particle-size and shape are available. Careful control contributes to uniformity of packing and shrinkage. Our iron oxide production experience and our ferrite research can help you accomplish best results. Manufactured in modern plants by modern methods. Experienced Columbian technicians are ready to cooperate in any problem involving the use of iron oxides for ferrite manufacture. For full data write today. Samples for testing provided on request.

# All that 'Quality' and 'Service' imply are yours with:

OROTHERM HT
Heat resistant 24Kt Acid Bright Gold, extremely low porosity, hard and ductile

OROSENE 999
24Kt Acid Bright Gold, tight grain, superior throwing and leveling power

HG BRIGHT GOLD
23+Kt Low Stress, Hard and Bright operates at room temperature, without free cyanide

INDUSTRIAL 24Kt GOLD
Ultra Pure Aqueous Potassium Gold Cyanide for soft stressless pure gold electroplates

RHODIUM SULPHATE T. P.
For High Purity, Low Stress fine grain Rhodium electroplating

RHENIUM-T
Available for experimental plating

INDIUM GOLD
For semi-conductor plating

ANTIMONY GOLD
For semi-conductor plating

GALLIUM GOLD
For semi-conductor plating

PROTECTOX
Provides anti-tarnish protection for gold, silver, and copper

TECH TIN
Immersion Tinning at room temperature

TECHOSOL 25
Anionic detergent for free rinsing and cleaning

ELECTROPLATING EQUIPMENT
Custom engineered for all types of precious metal plating

POTASSIUM GOLD CYANIDE
Quality controlled and custom packaged to suit your requirements

PLATINUM N
A Superior Platinum concentrate for better plating

PALLADIUM R. T.
A highly efficient soluble Palladium for plating at room temperature

SPECIAL PRECIOUS METAL ALLOYS
Our research department welcomes inquiries on unusual combinations of precious metals

Information on these products, or on any problem involving the electrodeposition of precious metals, are available without obligation. Write, phone, wire or TWX.

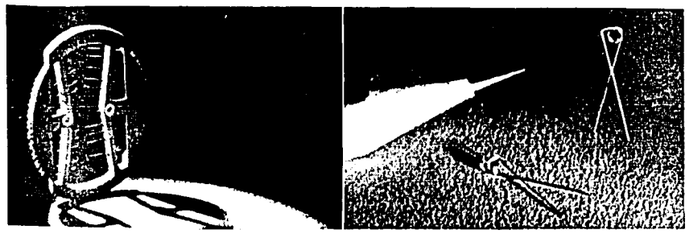
# greater RELIABILITY through complete CONTROL



THAT'S WHY NEY MANUFACTURES
- precious metal alloys
- precious metal parts
- molded assemblies
- all under one roof

A manufacturer of precious metal products for over 148 years, The J. M. Ney Company offers unusually broad precious metal research experience and facilities. Ney is unique in that it controls production of Ney precious metal parts and assemblies *from the alloying of the metals themselves right through to the manufacture of finished part or assembly*. This control is reflected in the *extreme reliability* of Ney's standard molded brush assemblies and in the many assemblies made to customers' specifications.

Ney's design engineering service works closely with customers' design and production engineers in the development of parts and assemblies for specific uses, and their help is frequently sought in the design phase of product development. Ney's modern new plant is ideally equipped to serve manufacturing needs for the simplest part or the most intricate assemblies.

Ney products, either standard or made to customers' specifications (for low level contact applications), include molded contact assemblies particularly for use with rhodium or gold surface printed commutators, relay contacts, contacts for switching devices and switching assemblies, slip ring assemblies, small screw machine and headed contacts and precious metal resistance wire.

- Molded assemblies
- Fine wire (resistance)
- Precious metal wire and plate
- Fabricated parts and assemblies using precious metal with base metal blades
- Welded assemblies
- Small screw machine and headed contacts
- Research and Engineering facilities
- Refining of precious metals

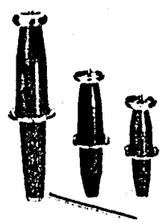
# EPOXY-RESIN SPECIALTIES

**BUSHING-ENCAPSULATED FILAMENT TRANSFORMERS**



Filament transformer, rectifier-socket mount, and corona cap, all integrated into a neat single unit, combine rugged characteristics with low power losses. Three sizes cover most commonly used tubes. Isolation range for operation in air, oil, or vacuum runs from 40 to 200 kv peak. Filament transformers have accessible, adjustable taps.

**HIGH-VOLTAGE CABLE TERMINATIONS**

Tank-mounting units in standard types available for cable-to-air or cable-to-oil operation. All have exclusive internal stress control for uniform field distribution over surface. Standard units range from 75 kv to 150 kv. Types for special order go to 300 kv. RG-type cables are easily connected and disconnected.

**FEED-THROUGH BUSHINGS**

Corona-free high-voltage feed-through bushings for air and oil environment have 50, 75, 100, and 150 kv rms ratings. These are integrally cast with internal stress control for uniform field gradients.

**ENCAPSULATING SERVICES**

COMPONENTS maintains a special department for the custom epoxy encapsulation of electron tubes, delicate coils, and similar items. These are precisely cross-sectioned. Resulting imbedments can be used either for making detailed measurements and structural analyses for engineering and production evaluation or for educational or display purposes.

**STANDOFF INSULATORS**

Rugged standoffs for mounting high-voltage transformers and other equipment are produced by Components on special order to meet individual requirements.

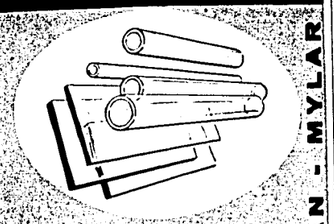
*Here's the unique new versatile material challenging the entire industry*

EMC
EPOXY MOLDING COMPOUNDS

Created by A-M Research Expressly for Advance Design and Product Development

Opening vast new fields! Thoroughly tested and evaluated, EMC incorporates electrical, chemical, physical properties in single component system. Wide range of fillers, reinforcements, colors. Send for details (cite your applications).

*Low pressure transfer, compression molding. A new area of molding as low as 50-100 PSI.*
- one component system
- self-extinguishing
- outstanding balance of physical, electrical, chemical properties
- self-releasing



*Our Research Today . . . For Your Progress Tomorrow*

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each product classification. "s" indicates stock items; "c" indicates custom-built items. Complete addresses will be found in the Alphabetical Directory, pages 135-240.

# McGraw-Hill books for your professional library

**1. SERVOMECHANISM PRACTICE**

Gives information on circuitry; electrical and mechanical components; and other problems encountered in servo design, manufacture, testing, and adjustment. By W. Ahrendt, Univ. of Md.; and C. Savant, Jr., Univ. of S. Calif. 2nd Ed., 566 pp., 515 illus., $12.50

**2. ULTRASONICS**

Just Out—2nd Ed. Covers design, repair and construction of ultrasonic equipment with advances in cleaning, soldering, plating, and other operations. By B. Carlin, formerly Product Research Supv. Sperry Products. 2nd Ed., 320 pp., 263 illus., $11.50

**3. FIXED AND VARIABLE CAPACITORS**

Gives details of design and construction, application in modern electronic equipment, experimental types of capacitors, and more. By G. W. A. Dummer, Royal Radar Establishment; and H. Nordenberg, Bureau of Ships. 281 pp., 164 illus., $10.00

**4. MECHANICAL RADIATION**

Gives a thorough introduction to wave motion and propagation principally by means of mechanical radiation, but stressing also the aspects common to all kinds of wave propagation. By R. Lindsay, Boston Univ. 440 pp., 80 illus., $10.00

**5. NAB ENGINEERING HANDBOOK**

Brings you information on facts, methods, and practice applicable to all areas of television and radio engineering. A. P. Walker, Editor, Mgr. of Eng., National Assn. of Broadcasters. 5th Ed. 1728 pp., 1306 illus. & tables, $27.50

**6. FEEDBACK CONTROL SYSTEM ANALYSIS AND SYNTHESIS**

Presents various phases of analysis that can be utilized in the study of feedback control systems based on root-locus and steady-state frequency response analysis. By J. D'Azzo & C. Houpis, Air Force Inst. of Tech. 580 pp., 484 illus., $13.50

**7. RADARGRAMMETRY**

Clearly explains the principles of system design for a specified error distribution to help you obtain reliable measurements by means of radar for precision applications. By D. Levine, 330 pp., 200 illus., $12.00

**8. INTRODUCTORY ELECTRIC CIRCUITS**

Discusses a-c circuits as a problem in differential equations; treats steady-state circuits by means of phasors and complex algebra; presents Fourier series; and more By J. Walsh, Columbia Univ.; and K. Miller, N.Y.U. 360 pp., 32 illus., $8.50

**9. DIGITAL COMPUTER AND CONTROL ENGINEERING**

Just Out. Covers all phases of digital computer engineering from basic electronic design of digital circuits to advanced automatic programming techniques. By R. Ledley, The George Washington Univ. 835 pp., 398 illus., 62 tables, $14.50

**10. ANALOG COMPUTATION**

Gives you a sound knowledge of how the analog computer works—how it is used—and the mathematical models that can be solved by means of analog computation. By A. Jackson, The Thompson-Ramo-Wooldridge Products Co. 652 pp., 379 illus., $13.50

**11. INFRARED RADIATION**

Just Out. Explains what infrared radiation is and what it does. Analyzes a typical infrared system and discusses its components and how it operates. By H. Hackforth, Northronics, Div. of Northrop Aircraft. 280 pp., 172 illus., $10.00

**12. ELECTRICAL ENGINEERING SCIENCE**

Applies basic concepts of electricity and magnetism in developing the fundamentals of energy conversion and circuit theory. By P. Clement & W. Johnson, Princeton Univ. 525 pp., 357 illus., $9.50

**13. INTERNATIONAL MISSILE AND SPACECRAFT GUIDE**

Just Out. Places at your command vital technical and general details on hundreds of rockets, missiles, and spacecraft of the world By F. Ordway III, Nat. Aero. & Space Admin.; & R. Wakeford, Melpar, Inc. 411 pp., 861 photos & diagrams. $25.00

**14. SELF-SATURATING MAGNETIC AMPLIFIERS**

Just Out. A practical guide covering basic theory, operating principles, design techniques and applications of magnetic amplifiers employing self-saturation. By G. Lynn, T. Pula, J. Ringelman, and F. Timmel, Westinghouse Elec. Corp. 232 pp., 152 illus., $8.00

**15. WAVE PROPAGATION IN A RANDOM MEDIUM**

Examines wave propagation using the ray approximation; deals with diffraction theory; and shows how incident wave fluctuations affect the diffraction image formed by a focusing system. By L. A. Chernov. Trans. from Russian by R. A. Silverman, N.Y.U. 168 pp., 13 illus., $7.50

**16. FUNDAMENTALS OF SIGNAL THEORY**

Just Out. Explains important mathematical techniques useful in understanding excitation and response of linear systems. By J. Stewart, Univ. of Ariz. 368 pp., 129 illus., $9.00

**17. ANALYSIS AND DESIGN OF FEEDBACK CONTROL SYSTEMS**

Just Out—2nd Ed. Shows how to apply principles and techniques of analysis to solve design problems. By G. Thaler, U.S. Naval Postgraduate School; & R. Brown, General Motors Corp. 2nd Ed., 640 pp., 472 diagrams, charts, tables, $14.50

**18. INFORMATION AND DECISION PROCESSES**

Just Out. Contains 12 articles on important advances in modern information and decision theory. Edited by R. E. Machol, Purdue Univ. 200 pp., illus., $5.95

**19. MAGNETISM AND MAGNETIC MATERIALS**

Reports in detail the proceedings of the Fifth Conference on magnetism and magnetic materials. Includes results of current research. Sponsored by the Am. Inst. of Elec. Engineers. 419 pp., 340 illus., $10.00

**20. PROFESSIONAL ENGINEER'S EXAMINATION QUESTIONS AND ANSWERS**

Just Out—2nd Ed. Gives 600 questions and complete answers to help engineers pass license examinations. By W. La Londe, Jr., Newark Coll. of Eng. 2nd Ed., 615 pp., 273 illus., $7.50

**From servo-mechanisms to electronic computers, "RADIO" is a way of THINKING!**

Far-reaching progress in the radio-electronic field is no "happy accident." Television, electronic computers and the "radiation" power of the atom, rapidly being harnessed to industry, were not discovered . . . they were engineered.

From "fission" to "computation," these engineering achievements are accomplished through an enormous process of information exchange—the methodical and brilliant teaming together of engineering *thinking* to solve a problem. In radio this work has been done deliberately by a growing engineering society, through its meetings and published proceedings, which unleash the creative minds of men.

In 1959, "Proceedings of the IRE" published nearly 2000 text pages, exclusive of product news and departmental features. This is the word-count equivalent of eight 500-page textbooks on radio-electronics for engineers. It exceeds the contents of the next two contemporary publications put together. This "high" in genuine reader service was logically matched by advertising worth over a million dollars, by firms investing in the engineers' reading interest and benefiting by it.

**Engineers are educated to specify and buy!**

# silicon as you specify it

**RELIABLE**

- quality control
- service and delivery
- continuity of quality in all forms—bulk, billets, rods, doping alloys, single crystals, slices, dice or special forms and seeds.

Allegheny is your best single source for semiconductor silicon in every form because it produces its own bulk silicon . . . and follows all the way through to ready-to-use single crystal slices or dice.

This undivided responsibility for the *whole* job, plus ultra-modern, strictly controlled production, and 100% testing, are your assurance that your physical and electrical specifications will be met more consistently and dependably than ever before. You can likewise count on the exact duplication of any order from Allegheny any time in the future.

Whatever your requirements, Allegheny, as *specialists*, can help you cut the uncertainties and wastes you may have had with silicon in the past. You'll get prompt deliveries and, when you need it, competent technical help. For silicon as you like *(and specify)* it, phone, Twx, wire or write.

**PURITY/PRECISION**
for the Semi-Conductor Industry

Shipped in Argon-sealed, instantly recappable vials -to insure purity.

*Partial List of Components*

- SPHERES
- WASHERS
- CLAD METALS
- EXTRUSIONS
- DISCS
- WIRE FORMS
- BASE TABS
- FOILS

Complete facilities for high purity unusual alloys and shapes on short notice.

*For further information call or write . . .*

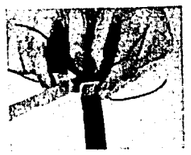
# MINIATURIZATION PLUS LOWER COST

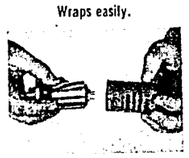
***Thin Versatile Co-Netic and Netic Magnetic Shielding Foils***

**Permit positioning foil-wrapped components A & B closely, minimizing interaction due to magnetic fields . . . making possible compact and less costly systems.**



How thin Co-Netic and Netic foils lower your magnetic shielding costs:
1) Weight reduction. Less shielding material is used because foils (a) are only .004" thick and (b) cut and contour easily.
2) Odd shaped and hard-to-get-at components are readily shielded, saving valuable time, minimizing tooling costs.

These foils are non-shock sensitive, non-retentive, require no periodic annealing. When grounded, they effectively shield electrostatic and magnetic fields over a wide range of intensities. Both foils available from stock in any desired length in various widths.

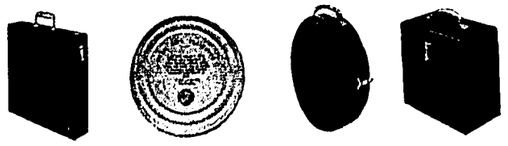


Co-Netic and Netic foils are successfully solving many types of electronic circuitry magnetic shielding problems for commercial, military and laboratory applications. These foils can be your short cut in solving magnetic problems.

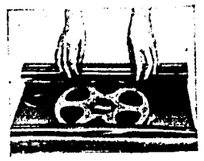
Cuts readily to any shape with ordinary scissors.

Wraps easily.

Inserts readily to convert existing non-shielding enclosures.



Shielding cables reduces magnetic radiation or pickup.



Wrapping tubes prevents outside magnetic interference.

# PROTECT VITAL MAGNETIC TAPES

**When accidentally exposed to unpredictable magnetic fields, presto!—your valuable data is combined with confusing signals or even erased.**

For complete, distortion-free protection of valuable magnetic tapes during transportation or storage. Single or multiple reel Rigid Netic Enclosures available in many convenient sizes and shapes.

Thin pliable foil wraps easily around magnetic tape, maintaining original recorded fidelity.

Rigid Netic (.014" and up in thickness) Shielded Rooms and Enclosures for safe, distortion-free storage of large quantities of recorded magnetic tapes.

Composite photo demonstrating that magnetic shielding qualities of Rigid Netic Alloy Material are not significantly affected by vibration, shock (including dropping or bumping) etc. Netic is non-retentive, requires no periodic annealing.

**Write for further details today.**

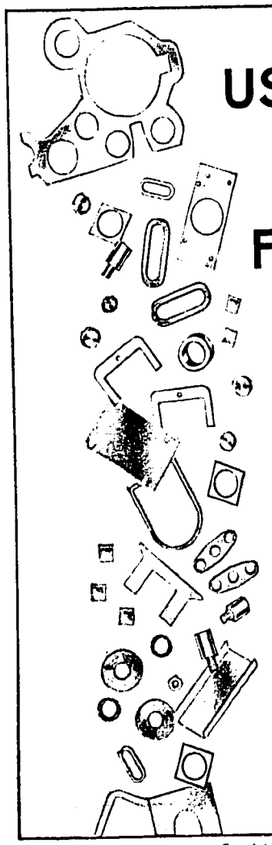
# NEW non-corrosive HYDRAZINE FLUX* ends residue problems on soldered joints, saves production time

**HYDRAZINE FLUX leaves no rosin residue.** New flux in water and water-alcohol solutions vaporizes completely at soldering temperature. Leaves no residue which would support growth of fungus. Will not corrode. Conforms to strict military requirements.

**HYDRAZINE FLUX permits prefluxing.** This means you can hold prefluxed parts before soldering—an efficiency measure that can increase manhour output substantially.



**Ideal for soft-soldering** a wide range of copper and copper-based alloys in electronic applications.

**Test Hydrazine Flux** in your own plant. Write for a sample of Hydrazine Flux and technical literature . . . for name of your nearest distributor.

*U.S. Patent No. 2,612,459

**"Now offered in Core Solder form as well as in solution form."**
***Available only from Fairmount and its sales agents.***

**TUBE COMPONENTS**

- Tungsten Lead Wires, Hard Glass
  Also molybdenum, Kovar, nickel, with nickel clad copper or copper strand
- Transmitter Tube Bases
  Designed to your specifications
- Heater Elements
  Hand wound molybdenum & tungsten coils

**Stampings and spinnings for all inside parts of transmitter tubes.**

**ELECTRONIC MFG. CO.**
670-72 South 17TH ST.
NEWARK, N.J.
ESSEX 4-7600

Now...
**TOP HATS**
for
everyone!

Protect electron tubes, relays, capacitors, other plug-in components for equipment reliability.

**These superior retainers now come in a variety of sizes and styles to fit nearly every plug-in component.**

**Positive** – Top Hat® retainers hold components securely in any position . . . can't shake loose even when upside down.

**Corrosion Resistant** – Both hats and posts are of stainless steel for maximum reliability. Materials and finishes comply with all Military Specifications.

**Resilient** – Special spring action gives positive retention yet preserves desired flexibility and prevents strain on component.

**Easy on, easy off** – Simple finger pressure fastens or releases clamp –no tools to slip or waste time–no tiny parts to lose.

Top Hats clamp any components. If you have special requirements, write Dept. E for quotations.

# WHERE SHARING PAYS OFF

**SOME YEARS AGO** we pointed out in "Proceedings of the IRE" that an amazing and unique characteristic of scientific men is their sense of responsibility to the past and to the future, expressed in their sharing with one another the new findings and discoveries of their science. The fact that engineers share information is a major contribution to the amazing growth of industrial progress and to our high standard of living.

***Design Engineers*** seem to have an impelling need to publish. It is important and fortunate that they have had magazines *in which to publish*. Of course, their articles make these magazines possible, just as the publishing organization's faith and courage gives them the vehicle for communication. A magazine is a three-way team of author, medium, and reader—mutually dependent.

***Such a contribution*** of one to the other is the vital service of the periodical. The thundering pace of radio-electronics and its expression in communications; glorious hi-fi music; the brilliant, full-color picture; and that same radio principle bringing in a new era in industrial controls which makes automation practical; the amazing time-and-effort-saving electronic computer; and new fabulous developments already being discovered in research which will be made practical by the radio engineer—all these *could not have been possible* without the publication as a means of collating and organizing information, and distributing it to those who needed it and *knew how to work with it*.

***These are generalities!*** But "Proceedings of the IRE" *is specific*. The Superheterodyne circuit, FM, TV, radar, the computer, color TV, the transistor, scatter propagation, solid state electronics (stereatronics) all were presented and developed *article by article* in the history-making issues of "Proceedings of the IRE." The impact on industry of this broad exchange of information among engineers has been enormous, creating new markets and even new ways of life.

***FM is an excellent*** illustration of this "sharing." Consider particularly the "lead out time" needed in FM. In December 1935, an article by Armstrong (an IRE Member) in "Proceedings of the IRE" proved conclusively to the engineering world that frequency modulation was an improvement *and practical*. (Today, FM is the audio side of every TV receiver.) This was the fourteenth article on frequency modulation *that had appeared in "Proceedings of the IRE,"* eight of them by Armstrong. It is now known that some of these articles which defined the weakness that had to be corrected, as well as some that amplified the discovery by further independent research, all helped make the final perfection possible.

***At that time,*** in all the world, only four other articles on the subject had appeared. These were condensations of the "discussion" in "Proceedings of the IRE." Yet the final "Proceedings" article was published six years before the first FM broadcasting station went on the air. Engineers needed every bit of this "lead-out time" to do their work. The early publication in "Proceedings of the IRE" gave them just that; and thousands of engineers, who had followed this series, knew in December, 1935 that a great change had come and that they must design and tool up for it. Armstrong shared, "Proceedings" published, and an industry profited!

***This is the traditional service*** of the "old-line" magazine. The author "shared"—the magazine "published"—the reader "studied" and industry progressed mightily through the three-way contribution. Truly, the reader contributes attention! This kind of publishing wins such attention, more than any other kind! It does the ground-work and sales-conviction building that comes years ahead of the final product news.

***Advertising shares!*** The informative "ad" follows exactly the same pattern with exactly the same results. Again and again, display copy in "Proceedings of the IRE" has announced new developments or highlighted the engineering usage of a staple item. Year-after-year, we have seen tiny businesses start sharing their helpful information with readers in "Proceedings of the IRE" and as a result reap orders, prosper and grow. Today in aggregate, they are the giant industry identified as "Electronics."

***It is said*** that the fundamental result of a magazine is to define a market. Since 1913, "Proceedings of the IRE" has defined an unfolding technical radio and electronics market by articles that stimulated the use of new products, and by presenting the manufacturers' stories of these new components, instruments and systems to engineers eager for as many new devices as would serve them well.

# Distributional Functions
## 105. Distribution

5. Export & Import
10. Jobbers & wholesalers
15. Manufacturers representatives
20. Sales and service
25. Surplus dealers

**The final section of the IRE DIRECTORY is the complement to manufacturing, which is distribution. It has proved to be a real service to IRE member engineers and executives to put into this book a list of annually checked jobbers, wholesalers, manufacturers representatives, and distributors. Many of these firms are identified further by the initials ERA, as members of the Electronic Representatives Association, NEDA as members of the National Electronic Distributors Association. Permission from these organizations to use their membership lists in order to make this section of the IRE DIRECTORY as complete as possible is gratefully acknowledged. For convenience in locating distributional firms the listings are arranged geographically under individual state names, the listings within each state being grouped by city names in alphabetical order, so that all firms located in any one city may be grouped together for quicker reference. Listings for foreign firms follow the listings for the United States.**

Teague Electronics, South Highway 61, Blytheville, Ark., 10 (NEDA)

**El Dorado**

Kay Sales Co., 314 Melrose, El Dorado, Ark., 20, Branch: Kansas City, Mo.

**Little Rock**

Crockett Sales Co., The, Plaza Towers, 6115 West Markham, Little Rock, Ark., 15, MO 6-0773, Branch: Dallas, Tex.

White Electronics, Inc., David, 1222 Main St., P.O. Box 408, Little Rock, Ark., 10 (NEDA)

**Paragould**

Martin Wholesale Radio Supply, Inc., 1207 W. Kingshighway, P.O. Box 16, Paragould, Ark., 10 (NEDA)

**Texarkana**

Lavender Radio & TV Supply Co., Inc., 520 E. 4th St., P.O. Box 1168, Texarkana, Ark., 10 (NEDA)

## CALIFORNIA

**Alhambra**

Moye Co., Robert G., 116 S. Stoneman Ave., Alhambra, Calif., 15, CU 3-1669

**Avon Gear & Engineering Co.:** Precision Gears. **Bridgeport Insulated Wire Co.:** Magnet & Litz Wire. **Chicago Gasket Co.** Teflon—Rod, Tube, Sheet, Tape, Machined Parts. **Davenport Mfg. Co.:** Power Supplies, High Voltage Test Equip., etc. **Federal Screw Products:** Electronic Hardware. **Freed Transformer Co.:** Transformers, Chokes, Filters, Test Instruments. **National Tel-Tronics, Inc.:** Terminals. **F. A. Scherma Mfg. Co.:** Relays and Components.

**Arcadia**

Wood Co., Ash, M., P.O. Box 1158, Arcadia, Calif., 15, CU 3-1201

**E-Z Hook Test Prods.:** Probes, insulated test clips. **Electrodyne:** Instrument switches, silver contacts, stepping switches. **Gen-Pro:** Terminal boards. **Great Eastern Mfg.:** Semiconductors & Rectifiers. **Illumitronic Engrg.:** Plastics. **Kilo Engrg.:** Turns counting dials, anodized aluminum knobs. **Littelfuse:** Fuses. **New England Instrument:** Precision wirewound potentiometers. **Nugent Electronics:** Miniature co-axial connectors. **Syatronic Instruments:** Deflection yokes. **Tansitor Electronics:** Tantalum capacitors.

**Bakersfield**

Valley Radio Supply, 1134 33rd St., Bakersfield, Calif., 10 (NEDA)

**Berkeley**

Electronics Suppliers, 2428 Shattuck Ave., Berkeley 4, Calif., 10 (NEDA)

Pacific Radio Supply, Inc., 2801 Shattuck Ave., Berkeley 5, Calif., 10 (NEDA)

**Beverly Hills**

Harmon Co., Walter S., 121 N. Robertson Blvd., Beverly Hills, Calif., 15, OLeander 5-6340 (ERA)

Moxon Electronics Corp., 489 S. Robertson Blvd., Beverly Hills, Calif., 15, BRadshaw 2-9311

**Alfred Electronics:** Microwave. **Clairex:** Photo cells. **Computer Measurements:** Counters. **Datran Electronics:** Strain gages. **DeMornay-Bonardi:** Microwave components. **Epsco:** Digital systems. **Harrison Labs.:** Power supplies. **Instruments for Ind.:** Amplifiers. **Marconi Instruments:** RF instruments. **Rutherford Electronics:** Pulse generators. **Scopes:** Oscilloscopes. **Vidar:** Voltage-freq. converter.

**Burbank**

Saxon & Associates, C. W., 1211 W. Magnolia, Burbank, Calif., 15, VIctoria 9-1494

**Ceramaseal:** Ceramic to metal seals. **Davale Tool:** Flexible couplings. **Galaxy Eng.:** Electronic Hardware. **Markal:** Heat & corrosion resistant coatings. **Precision Metal Prods.:** Electronic hardware.

Stern & Co. Inc., I. R., 4109 Burbank Blvd., Burbank, Calif., 15, VIctoria 9-1195

**Electro-Voice:** Speakers, microphones, PA speakers, horns. **Ferrodynamics:** Magnetic recording tape. **Harman-Kardon:** Hi fi tuners & amplifiers. **Koss:** Stereo headphones & accessories. **Rek-O-Kut:** Turntables, tone arms. **Royal Sound:** Baffles. **Viking:** Tape decks, record/playback amplifiers.

Weightman & Associates, 4029 Burbank Blvd., Burbank, Calif., 15, VIctoria 9-2435

**Allies' Products:** Carbon resistors. **Chicago Dynamic Industries:** Selector Switches, Thumb-Wheel Switches. **ESC Corp.:** Delay lines, transformers, filters. **Federal Stamping:** Metal forming and stamping. **Instrument Development Labs.:** Rotary Switches, Accelerometers. **Scientific Platers:** Chrome plating. **Sloan Co.:** Indicator lights, incandescent read-outs. **Stevens-Arnold, Inc.:** Choppers, Switches, Relays. **Technical Devices:** Wire stripping machines, component lead formers, circuit board fixture holders. **S. S. White (Industrial Div.):** Airbrasive units.

**Burlingame**

Long & Associates, 1210 Canterbury Dr., Burlingame, Calif., 15, 20, Branch: Redwood City, Calif.

Newnan Co., H. L., 1299 Bayshore Highway, Burlingame, Calif., 15, DIamond 2-7494

**Advance Relays:** Relays. **Carter Motor:** Converters, motors. **Continental-Wirt:** Precision resistors. **GC Electronics:** Components. **Vickers:** Selenium & silicon rectifiers. **Winston:** Test equip.

**Culver City**

Landis Associates, 8588 W. Washington Blvd., Culver City, Calif., 15, UP 0-8697

**Advanced Electronics:** Telemetry xmtrs., filters. **Calibration Standards:** Differential voltmeters, wheatstone br. **Del:** H.V. transformers. **Gyrex:** Frequency stds., tuning forks. **Industrial Test Equip.:** Phasemeter, power osc. **Magnetic Research, Armour Stablvolt Div.:** Transistor testers, power supplies. **Parabam:** Digital clock, function generators. **Waveforms:** Oscillators, V.T.V.M.'s.

Sodaro Co., 9400 Culver Blvd., Culver City, Calif., 15, UPton 0-6001

**Asquith:** Multi-turn counting dials, potentiometers. **Curtiss-Wright:** Distortion eliminating volt regulators, recorders, electrometers, wheatstone bridge, insulation tester, DC amplifiers, indicating controllers, multimeter, R-C meter. **E.M.I.:** Klystrons, magnetrons, CRT's, vidicons, orthicons, photomultipliers, storage tubes, oscilloscopes. **Ford Instrument:** Cams, differentials, rate generators, resolvers, servo motors, synchros (Telesyns), Oldham couplings. **Industrial Control:** Servo amplifier, multiplier, strain gage indicator, servo testers, DC millivoltmeter, null detector, analog modulator & demodulator, automatic capacitance bridge, memory storage unit. **Solid State Systems:** Transistorized plug-in modules, pulse generators, flip-flop units, trigger amplifiers, voltage amplifiers. **Tel-Instrument:** Frequency converter, 400 cycle power supplies, video sweep generator. **TT Electronics:** Filters, DC regulated transistorized power supplies. **Trad Electronics.**

Westates Electronics Corp., 11334 Playa St., Culver City, Calif., 10 (NEDA)

**Encino**

Spraggins Co., S. L., 16042 Ventura Blvd., Encino, Calif., 15, STate 8-6661

**Dinion Coil:** Transformers. **Forbes & Wagner:** Deflection components, power supplies, amplifiers, & special transformers. **Lear Elec. Mfg.:** Wire & cable. **Midland Mfg.:** Quartz crystals & crystal filters. **Stackpole Carbon:** Composition carbon resistors, volume controls, slide switches, contacts, ferrites.

**Eureka**

Dealers Electronic Supply Co., 800 Broadway St., Eureka, Calif., 10 (NEDA)

**Fresno**

De Jarnatt Wholesale Co., Inc., B. J., 223 Fulton St., Fresno 21, Calif., 10 (NEDA)

**Garden Grove**

Freeman Co., Maury, 11422 Tobie St. Garden Grove, Calif., 15, LEhigh 9-5574

**Crosby:** Madison-Fielding tuners, amplifiers, & speakers. **Dyna-Empire:** Fidelitone arms, turntables & cartridges. **Neshaminy:** High fidelity speakers. **Qualitone:** Phono needles & accessories. **Stephens Trusonic:** High fidelity speakers & cabinets. **Triton Tape:** Recording tape & accessories.

**Gardena**

Aerotron Supply Co., 13611 S. Normandie, Gardena, Calif., 10, 15, FAculty 1-5911

**Glendale**

Gates Co., Howard A., 1819 Harmon Pl., Glendale 8, Calif., 15, 20, CH 9-5360

**Formica Metal Products Co.:** Chassis, Enclosures, Cabinets. **Fortiphone Ltd.:** Subminiature transformers.

Weatherford Co., R. V., 6921 San Fernando Rd., Glendale 1, Calif., 10, (NEDA)

Western Electronic Supply Corp., 1214 S. Brand Blvd., Glendale 4, Calif., 10, (NEDA)

**Hollywood**

Ellis Sales Co., G. B., 6715 Hollywood Blvd., Hollywood, Calif., 15, HOllywood 2-6763, Branch: Mountain View, Calif.

Hollywood Radio Supply, Inc., 5606 Hollywood Blvd., Hollywood 28, Calif., 10 (NEDA)

Instruments For Measurements, 3455 Cahuenga Blvd., Hollywood 28, Calif., 15, HOllywood 9-7294

**Acton Labs.:** Phase measuring equip. **Alford:** Coaxial microwave equip. **Avco:** Hypervelocity instrumentation. **Digital Equip.:** Digital module bldg. blocks. **Dorsett:** Telemetry. **Jerrold:** Sweep generators. **Lumatron:** Millimicrosecond instrumentation. **Murphy & Miller:** Environmental test equip. **Perkin Engrg.:** DC power supplies, AC regulators. **Radio Frequency Labs.:** AC & DC calibration standards. **Systron:** Digital counting & timing instrumentation. **Technical Prods.:** Spectral density analyzers. **Waveline:** Microwave test equip.

# Distributional Functions

Key Electronics, Inc., 8533 Sunset Blvd., Hollywood 46, Calif., 15, OLeander 5-9140

**Anaheim Electronics:** Relay testers, adaptors. **Atohm:** Trim pots. **Bill Jack:** Motors. **Int'l Electronic Ind.:** Tantalum capacitors. **Monitor Prods.:** Crystals, ovens, oscillators. **Ohio Semiconductors:** Halltron devices. **Pacific Resistor:** Resistors, wirewound & power. **Southern Elect.:** Film capacitors. **Twin-Lock:** Terminal blocks. **Vanguard:** Coils, chokes, delay lines.

Miller Co., Gerald B., 1550 N. Highland Ave., Hollywood 28, Calif., 15, HOllywood 2-1195 (ERA)

Rye Sound Corp., 1113 N. El Centro, Hollywood, Calif., 5, 16, HO 3-0464, Branch: Mamaroneck, N.Y.

Shepard-Winters Co., 3193 Cahuenga Blvd. West, Hollywood 28, Calif., 10, 15, 20, HOllywood 6-2171

**Amperex:** Semicond. & Tubes. **Astron:** Capacitors, RF noise filters. **Automatic Metal Prods.:** Co-axial connectors, relays & filters. **Calif. Magnetic:** Transformers, filters: power supplies. **Cima Resistor & Tech-Ohm:** Power resistors. **Digital Dev.:** Drums. **Elcor:** Alternators, inverters. **Electrix:** Terminals, Crimping machines. **Ferroxcube:** Ferrite cores, planes & stacks. **GB Components:** Wire wound resistors, net works, reference bridges & amplifiers. **Harman Kardon:** Digital modules. **Premier Instrument:** Waveguide switches & components. **Shockley Transistor:** Silicon switching diodes. **Skottie:** Ceramic capacitors. **Trak:** Increductors, cavities, search & lock receivers, multicouplers, panoramic receivers.

Snyder Co., Lee Grant, 1418 N. Highland, Hollywood 28, Calif., 15, HO 9-6278 (ERA)

**Inglewood**

C & H Supply Co., 415 E. Beach Ave., Inglewood 3, Calif., 10, ORegon 8-4181

**EverReady Label, Jonergin & Co., Malby & Sons:** Nameplates, Circuitry plates.

Cook Electronics, 210 E. Hardy, Inglewood 1, Calif., 10 (NEDA)

Newark Electronics Corp., 4747 W. Century Blvd., P.O. Box 4217, Inglewood, Calif., 10, OREgon 8-0441, Branch: Chicago, Ill. (NEDA)

**Lawndale**

Stevens Co., Inc., Thomas L., 15222 S. Grevillea Ave., Lawndale, Calif., 15, SPring 2-1466

**Corson Electric:** Pulse forming networks & high voltage capacitors. **Dale Prods.:** Resistors & trimmer potentiometers. **Etchomatic:** Chemicals & equip. for printed circuits. **Metal Textile:** Knitted materials for RF shielding. **New England Laminates:** Copper clad materials. **Torwico:** 400 cycle transformers, toroids, inductors, & magnetic amplifiers.

**Long Beach**

Hall of California, R. C. & L. F., 4686 Long Beach Blvd., Long Beach 5, Calif., 10 (NEDA)

**Kierulff Electronics, Inc., 415 Long Beach Blvd., Long Beach, Calif., 5, 10, 15, 20, HEmlock 5-9552, Branch: Los Angeles, Calif.**

Massachusetts

**Fitchburg**

Young & Young of Fitchburg, Inc., 372 Water St., Fitchburg, Mass., 10, DIamond 3-3078, Branch: Springfield, Mass.

**Hamilton**

Gyson Associates, 75 Bay Rd., Hamilton, Mass., 15, WAlker 2-5776

**Amerac:** Microwave components. **Astron Electro-Dynamics:** [illegible] **Burmac Electronics:** Pulse [illegible] **R. F. Simmons:** [illegible]

**Holyoke**

Rodgers Associates, 717 Main St., Holyoke, Mass., 15, REpublic 3-8428 (ERA)

**Lawrence**

Young & Young of Lawrence, Inc., 148 Broadway, Lawrence, Mass., 10, MUrdock 7-7171, Branch: Springfield, Mass.

**Lexington**

Boeing Co., Inc., John E., P.O. Box 235, Lexington 73, Mass., 15, VOlunteer 2-2500

**ACDC:** Regulated power modules, chokes. **Ballastran:** Transformers. **Bradley:** Diodes, rectifiers. **Consolidated Electronics:** Connectors. **EFCON:** Plastic & tantalum capacitors. **Harowe:** Servo motors, motor generators, synchros. **Hi-G:** Relays. **Mepco:** Precision resistors. **New England Instrument:** Conductive plastic & wire wound potentiometers. **Torwico:** Toroidal coils, transformers. **Vitramon:** Porcelain capacitors.

Palioca, Inc., Wayne B., 1787 Massachusetts Ave., Lexington, Mass., 15, VOlunteer 2-7224

**ADC Inc.:** Filters, transformers, power supplies, jacks, transistor transformers. **Automatic Metal Prod.:** Connectors, coaxial relays & switches. **Diodes:** Miniature silicon rectifiers. **John E. Fast:** Capacitors. **Huyck Systems:** Miniature servo computer components. **Kinetic Inst.:** Precision gear heads, speed reducers & gear motors. **Monitor Prods.:** Quartz crystals, oscillators, ovens. **Portchester Instrument:** Wave guide. **Premier Instrument:** Waveguide components. **Victoreen Instrument:** Voltage regulators, electrometer & cold cathode trigger tubes, resistors. **Willrite:** Resistors.

Purinton, Inc., Richard, 11 Muzzey St., Lexington 73, Mass., 15, VOlunteer 2-8300

**Amphenol-Borg, Barker & Williamson, Bliley Electric, Borg Equipment Div., CTS, North Electric, Oak Manufacturing.**

The DAN GREENE Organization INC.

P. O. Box 124, Cambridge 38, Massachusetts • Tel: UNiversity 4-2220

*Representing in the Six New England States:*

**Triad Transformer Corporation**
Catalog and custom-engineered Transformers and Reactors, MIL and commercial specs. Geophysical Transformers. Transistor Transformers. Toroidal Inductors. Wave Filters. Pulse Transformers.

**Zero Manufacturing Company**
Military Transit Cases. Catalog and custom Precision Deep-Drawn Instrument Cases, containers, and cans of *aluminum* or *magnesium*.

**Midland Manufacturing Company, Inc.**
Manufacturers of Quartz Crystals for Electronic Frequency Control, Crystal Filters.

**Stepper Motors Corporation**
Stepping Motors, Automatic Pulse Timers, Synchro-Positioners.

**Birtcher Corporation (Industrial Division)**
Tube and Component Retention and Cooling Devices, Transistor or Diode Heat Radiators

**Chicago Dynamic Industries, Inc.**
Binary and Digital Thumb Wheel Switches, Rotary Selector Switches with Removable Wafers. Precision Instrument Counters.

**Atohm Electronics Inc.**
Precision Subminiature Wire Wound Potentiometers.

"Distribution" listings are arranged alphabetically by states and by cities within each state. For names and addresses of manufacturing firms, see Alphabetical Directory, pages 135-240.

**ELECTRONIC COMPONENTS**

PANEL METERS, CRYSTALS, TRANSFORMERS, CRYSTAL OVENS, TRANSISTORS, POWER SUPPLIES, GEARHEADS, CONNECTORS, RESISTORS, SERVOS AND SYNCROS, ACCELEROMETERS, TRANSDUCERS

**ELECTRONIC EQUIPMENT**

MODULAR CABINETS, PLUG-IN CIRCUITS, TAPE INDEXING EQUIPMENT, BLOWERS, PHASE METERS, TEST EQUIPMENT, TAPE RECORDERS, TIMING EQUIPMENT, PROGRAMMERS, TIMERS

**ELECTRONIC SALES SPECIALISTS**

For the past 21 years, the Kenneth E. Hughes Company, Inc. has specialized in the sale of electronic equipment and components for some of the best known manufacturers in the industry. This knowledge and experience in electronics is vested in a staff of 8 highly-trained, competent sales engineers in the company's two offices strategically located to effectively cover New York City, New Jersey and Eastern Pennsylvania.

If you manufacture or use electronic equipment and components, you can depend on this specialized electronic sales experience.

## NEW YORK

**Albany**

Carse Electric Corp., 1044 Broadway, P.O. Box 4127, Albany 4, N.Y., 15, HObart 2-5364

**Fenwal:** Thermistors. **Greibach:** Microammeters, millivoltmeters, AC thermocouple meters, volt-ammeters, megohmmeters, differential meters. **W. L. Maxson:** Accelerometers, acceleration switches. **Parko:** Time delay relays. **Photoswitch Div.:** Photoelectric & Liquid level controls. **Potter & Brumfield:** Relays. **Voltron:** Expanded scale meters. **Wood Electric:** Circuit breakers, miniature.

Fort Orange Radio Dist. Co., 904 Broadway, Albany 7, N.Y., 10 (NEDA)

Reagan Co., Inc., J. A., 45 N. Lake Ave., Albany 3, N.Y., 15, HEmlock 6-9649

**Alfred:** Traveling Wave Tube Amplifiers, Power Supplies, Microwave Oscillators. **Burroughs Electronic Tube Div.:** Counters, Nixie & Beam Switching Tubes, Pulse Control Equip. **Daystrom-Pacific:** Potentiometers & Trimmers. **DeMornay-Bonardi:** Microwave Instruments. **Eldema:** Indicator Lights. **Franklin:** Digital Voltmeters, Multimeters, Amplifiers. **Greibach:** DC & AC Portable & Panel Meters. **Gulton:** Glennite Accelerometers, Transducers. **Lavoie:** Spectrum Analyzers, Pulse Generators, Scopes, Frequency Meters, Crystal Ovens, Automatic Test Equip. **LEL, Inc.:** IF, RF Amplifiers, Parametric Amplifiers. **Trio Labs.:** Panel Mounting VTVM's. **Trygon:** Transistorized Power Supplies.

Taylor Co., Inc., E. E., 465 Central Ave., Albany 6, N.Y., 10 (NEDA)

**Amsterdam**

Adirondack Radio Supply, 185-191 W. Main St., Amsterdam, N.Y., 10 (NEDA)

LeRoy & McGuire, Inc., R.D. 4, Amsterdam, N.Y., 15, VIctor 2-5979, Branch: Phelps, N.Y.

**Baldwin**

Taylor Corp., B. B., 2270 Grand Ave., Baldwin, N.Y., 15, BAldwin 3-8000

**Duncan:** Precision potentiometers. **Filtors:** Miniature relays. **Hyperion:** Power supplies. **IERC:** Tube shields & transistor heat dissipators. **North Atlantic Industries:** Phase angle vacuum tube voltmeters. **Servo Dynamics:** Servo motors & motor generators. **Shallcross:** Precision resistors, switches, laboratory test equip. **Solid State Products:** PNPN Controlled switches, trigistors, rectifiers. **Theta:** Phase generators, dial assemblies, synchro test sets, angular dividers, synchro & resolver bridges. **Trio Labs:** VTVM's.

**Bayside**

Scientific Systems Sales Corp., P.O. Box 3, Bayside 61, N.Y., 10, 15, BA 5-0929

**Anton:** Nuclear detectors & insts. **Blackstone:** Ultrasonic cleaners. **Controls for Radiation:** Solid state radiation detectors. **Land-Air:** Portable tritium survey meters, alpha counters, photospectrometers. **Radiation Inst. Development Lab.:** Multi-channel analyzers, scalers, pulse count integrators, nuclear detectors.

Tylinski Co., Frank, 73-63 Bell Blvd., Bayside 64, N.Y., 15, HOllis 4-8927

**Artisan:** Solenoids & relays. **Fibre Fabricators:** Stamped Electrical Insulating specialties. **Grayhill:** Switches, hardware. **Hill:** Quartz crystals, oscillators, filters. **J. B. Electronic Transformer:** Power, miniature, toroidal reactors. **W. L. Kidde:** Thermistors, solid state relays, contactors, converters, power supplies. **National Resistance:** Wire Wound resistors. **Ohio Semiconductors:** Hall effect devices. **TT Electronics:** R.C. filter networks. **Texas Capacitors:** Mylar & teflon. **Underwriters Safety Devices:** Terminal blocks.

**Binghamton**

Holliday-Hathaway Co., Inc., 94 Henry St., Binghamton, N.Y., 15, RAymond 3-5177, Branch: Rutherford, N.J.

Reagan Co., Inc., J. A., 52 B Crestmont Rd., Binghamton, N.Y., 15, RAymond 3-9661, Branch: Albany, N.Y.

Stack Electronics, 25 State St., Binghamton, N.Y., 10 (NEDA)

**Brightwaters**

Aironic Accessory Co., Inc., 161 Orinoco Dr., Brightwaters, N.Y., 15, MOhawk 6-6510

**R. C. Allen:** Turn & Bank Indicators, Miniature Rate Gyros. **California Technical Ind.:** Automatic programmed test equip. **Con-Elco:** Trimming Potentiometers. **Electronic Specialty:** Timing devices, sensing, static inverters & power supplies, airborne receivers & RF components. **Eicor:** Dynamotors, 400 cycle motors, DC motors & inverters. **Missile Systems:** Multi-conductor cables, cable assemblies. **U.S. Relay:** Relays, Time Delay, Control Boxes.

**Brooklyn**

AMA Electronic Corp., 1625 Bedford Ave., Brooklyn 25, N.Y., 10 (NEDA)

Bay Electronic Distributors, 3480 Nostrand Ave., Brooklyn 29, N.Y., 10 (NEDA)

Benray Electronics Corp., 485 Coney Island Ave., Brooklyn 18, N.Y. 10 (NEDA)

Brown Co., Inc., Irv., 1500 Carroll St., Brooklyn 13, N.Y., 15, HYacinth 3-1379

**Atlas Sound:** Outdoor & paging speakers, microphone stands & accessories. **Cletron:** Loudspeakers. **Wm. A. Holmin Corp.:** Portable megaphone. **International Rectifier:** Selenium & silicon rectifiers, silicon & zener diodes, selenium & silicon photo cells. **Workman TV Prods.:** Fused & globar resistors, contact cleaner & lubricant.

Buchman Wholesale Electronic Suppliers, Sam, 860 Atlantic Ave., Brooklyn 38, N.Y., 10 (NEDA)

Fisher Sales Co., 800 Greenwood Ave., Brooklyn 18, N.Y., 15 (ERA)

# Neededness!*

**More engineers *NEED Proceedings of the IRE* than need any other radio-electronic engineering magazine. 63,696 (ABC June 30, 1960) plus 15,550 students, to be exact. This is not promised—but delivered circulation.**

* Engineers *NEED* the unabridged, factual, working information of which *Proceedings of the IRE* supplies over 1,900 pages a year. This is more than a WANT but a vital need, satisfied since 1913 by

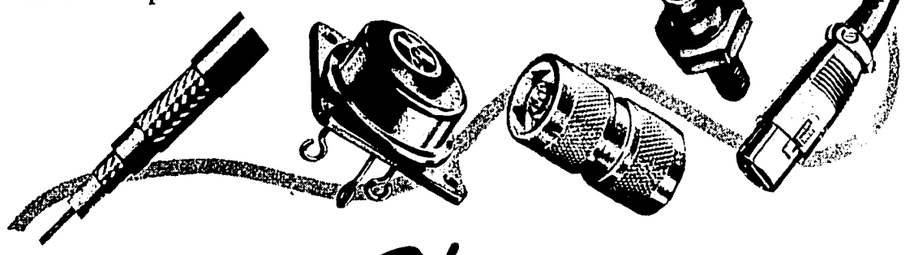
# One Important Call...

It is now possible to solve many of your electronic supply problems via one telephone call. Under one roof, we stock a large supply of the most wanted items in the field today. **PROGRESS** offers you factory price plus the benefit of immediate delivery! We represent many of the country's outstanding manufacturers of electronic parts.



Call or write for technical data, prices and literature.

## EXPANDED WAREHOUSE FACILITIES SPEED SERVICE

Our large warehouse facilities make available for fast delivery UG & MS connectors, sub-miniature connectors, coaxial cable, silicon power rectifiers, zener voltage regulators, sub-miniature paper capacitors, tantalum capacitors, silicon diodes and silicon power transistors. In addition we frequently can supply fast service on a "most difficult to find" item.

*Try us — one call can now get you all!*

Use our TWX number New York 1-1377
or call our Enterprise number.

Electronic Equipment & Engineering Co., 805 S. Staples St., Corpus Christi, Texas, 10, 15, TUlip 3-9271 (NEDA)

**Belden:** Wire. **Channel Master:** Antennas. **Chicago Standard:** Transformers. **Collins Radio:** Transmitters & Receivers. **P. R. Mallory:** Condensers. **Sprague Prods.:** Condensers. **Stromberg-Carlson:** Sound systems. **Sylvania:** Tubes. **Union Carbide Consumer Prods.:** Batteries. **Webster-Chicago:** Phonographs.

Leader Electronic Supply, Inc., 1701 Morgan Ave., Corpus Christi, Texas, 10 (NEDA)

Wicks Radio Equipment Co., 513-15 S. Staples St., Corpus Christi, Texas, 10 TUlip 4-8285 (NEDA)

**Amphenol:** Sockets & Connectors. **Astatic:** Cartridges & microphones. **Barker & Williamson:** Amateur. **Belden:** Wire & cable. **Bogen-Presto:** Amplifiers & inter-coms. **Centralab:** Controls, switches, ceramic capacitors. **Cornell-Dubilier:** Capacitors. **Eby:** Sockets. **Electro-Voice:** Microphones, cartridges, speakers. **Finco & Tenna:** TV antennas. **Garrard:** Changers. **General Cement:** Chemicals. **General Electric:** Receiving tubes, picture tubes, semi-cond. prods., cartridges. **Gonset:** Converters, receivers, transmitters. **Hallicrafters & Hammarlund:** Amateur receivers. **E. F. Johnson:** Amateur transmitters. **Merit & Triad:** Transformers. **J. W. Miller:** Coils. **Hickok, Precision Apparatus, Simpson:** Test equip. **Quam-Nichols & University:** Loudspeakers. **Shure:** Microphones. **Turner:** Microphones. **Union Carbide:** Batteries. **Viking:** Tape decks.

**Dallas**

Airep Engineering Co., P.O. Box 9555, Dallas 14, Texas, 15, TAylor 4-3800

**Alabama Automation:** Control system programmers, curve followers, arbitrary function generators. **Electronic Reseach Assoc.:** DC power supplies, transistorized high current supplies, static inverters, frequency changers, transistor test equipment. **Freq. Stds:** Microwave wavemeters. **Gray Instrument:** Laboratory standards—Resistance, wheatstone & mueller bridges, millivolt potentiometers, laboratory & portable instruments, standards calibration. **Holt Instrument Labs.:** AC Instrumentation, low distortion power amplifiers, audio oscillators, AC regulators. **Huggins:** Traveling wave tubes, backward wave oscillators. **Jerrold:** RF alignment instrumentation, wide band sweep generators, crystal controlled markers, variable attenuators. **Menlo Park:** Microwave instrumentation, swept oscillators, wide range amplifiers, power supplies, broadband power leveling systems, solenoids. **Smith-Florence:** Microvoltmeters, lab & nuclear power supplies, anticoincidence preamps, digital voltmeters, transistorized cable fault finders. **Technitrol:** Pulse Instrumentation. **Wayne Kerr:** Impedance measurement, universal & comparison bridge, inductance meter, waveform analyzer, micrometer, Vibration meter. **Weinschel:** Lab. standards.

All-State Electronics, Inc., 2411 Ross Ave., Dallas 1, Texas, 10 (NEDA)

Allied Components Inc., 2517 Converse St., Dallas 7, Texas, 15, RIverside 2-2830

**Acoustica:** Ultrasonic cleaners. **Advanced Vacuum Prods.:** Terminals & headers. **Collins Electronic:** AC-DC choppers. **Daystrom:** Servomotors, alternators. **Elcor:** Inverters, dynamotors, alternators. **Filtors:** Sub. min. & herm. sealed relays. **General Ceramics:** Ferrites, memory cores. **Indiana Steel:** Magnets. **Magnetic Metals:** Transformer laminations, tapewound cores. **Maxson:** Snap action switches. **Modine Mfg.:** Semiconductor coolers. **Perkin-Elmer:** Vernistat. **Plasteck:** Edgelighted panels & knobs. **Viking:** Miniature connectors, relay sockets.

Anderson Co., George E., 1901 Griffin Ave., Dallas 2, Texas, 15, RI 1-5931 (ERA)

Antle-Smith-Delzell Sales, 2721 Brookfield Ave., Dallas 35, Texas, 15, FLeetwood 7-7279

**Burton-Rogers:** Hoyt panel meters. **Clear Beam Antenna:** TV antennas. **Gramer-Halldorson:** Transformers & coils. **Hamilton-Hall:** Resistors. **National Radio, New England Inst., North American Philips, Philmore, Precise Development, Sightmaster, Universal Transistor Prods., Webster.**

Associated Electronics, Inc., 6115 Denton Dr., Dallas 35, Texas, 15, FLeetwood 2-3389 (ERA)

Aymond Co., Edward F., 4312 Maple Ave., Dallas 19, Texas, 15, LAkeside 6-5233

**Cannon:** Connectors. **Dale:** Resistors. **Globe Industries:** Motors. **Good-All:** Capacitors. **Industro:** Transistors. **North Electric:** Relays. **Sonotone:** Batteries. **Tensolite:** Teflon wire. **Victory Engr.:** Thermistors.

Barnes Co., Arnold, 3603 Lemmon Ave., Dallas 19, Texas, 15, LAkeside 6-8735

**Burroughs Electronic Tube Div.:** NIXIE & Magnetron Beam Switching Tubes, Pulse Control Equip., Decade Counters. **Chassis-Trak:** Chassis Slides, Heavy Duty Handles. **Digitran:** Switches with In-Line Readout, Electromechanical Counters. **Kepco:** Power Supplies, Transistorized & Vacuum Tube Types. **Kin Tel:** Voltmeters, DC Amplifiers, Calibrators, Power Supplies, Closed-Circuit TV. **Massa:** Multi-Channel Recorders, Plug-in DC & Carrier Amplifiers, Pen Motors. **Millivac:** VTVM's, Direct Reading Resistance Meters, Bridges. **Nacimco:** Transducers, AC to DC Converters, Tachometers. **Scopes:** Oscilloscopes. **Sensitive Research Instrument:** Measuring Instruments. **Statham Development:** Temperature Chambers. Transducer Test. **Systron:** Frequency Counters, Time Interval Meters, RDB Counters, Digital Tachometers, Analog-to-Digital Converters, Digital Data Processing. **Technibilt:** Instrument Carriers & Dollies. **Waugh:** Flow Meters, Pulse to DC Converters. **Western Devices:** Instrument Cabinets, Blowers.

Berthold Sales Co., 4411 Maple Ave., Dallas 19, Texas, 15, LAkeside 6-8329

**American Television & Radio:** Vibrators, battery eliminators & chargers. **Arco:** Elmenco capacitors. **Fanon:** Inter-com systems, amplifiers. **Fedtro:** Transistor radio earphones, soldering irons, dry batteries, balance controls. **GC Electrocraft:** plugs, jacks, test leads, switches. **GC Electronics:** Radio & TV knobs, resistors. **General Cement:** Chemicals, tools, hardware. **GC Telco:** TV Hardware, antennas, citizens radio accessories. **Osborne:** Portable 2-way citizens radio. **Perma-Power:** Automatic voltage regulators, remote controls, power supplies for transistor checking. **Quincy Prods.:** Bulk and Boxed speakers. **Setchell-Carlson:** TV monitors.

Branum Sales, Inc., 2334 Havenhurst, Dallas 34, Texas, 15, CHapel 7-7128

**Chicago Dynamics:** Switches. **Erie:** Resistors, capacitors, diodes, pulse transformers, ceramicons, trimmers. **Model Engineering:** Resistors. **Scherma:** Relays. **Standard Kollsman:** Television tuners. **Switchcraft:** Jacks, plugs, switches & cable assemblies. **Triad:** Transformers. **Tung-Sol:** Tubes, diodes, cathodes, transistors, lamps.

Campion Sales Co., 9002 Chancellor Row, Dallas 7, Texas, 15, FLeetwood 7-4095

**Air Marine:** Sub-fractional A/C motors. **Cornell-Dubilier:** Fixed capacitors. **Dialight:** Panel lights. **Jonathan:** Chassis slides. **Kings:** RF connectors. **Monitor Prod:** Freq-xtals. **Molectronics:** Test equip. **John F. Rider:** Publications. **Shure:** Microphones. **Sigma:** Sensitive & polar relays. **Vernitron:** Servos, syncros, resolvers. **Wells:** Precision pots & trimmers.

Central Electronics, 4117 Maple Ave., Dallas 19, Texas, 10 (NEDA)

Corry Co., Hal F., 6315 Hillcrest Ave., Dallas 5, Texas, 15, LAkeside 8-9172

**American Rectifier:** DC power supplies, voltage regulators, motor speed controls. **Knopp:** Phase sequence indicators, voltage testers, current transformers. **Meter Devices:** Meter test switches. **Mohawk:** AN wires. **Molecu-Wire:** Wire. **Radio Frequency:** Induction heaters. **Texas Capacitor:** Mylar & teflon capacitors. **U.S. Relay-Electronics:** Relays. **Westohm:** Precision resistors.

Crabtree's Wholesale Electronics, 2608 Ross Ave., Dallas 1, Texas, 10 (NEDA)

# Bridges for measuring RESISTANCE • CAPACITANCE — INDUCTANCE • IMPEDANCE • DISSIPATION FACTOR VACUUM-TUBE and TRANSISTOR COEFFICIENTS

| Instrument | Measurement Frequency | Range of Measurements | Accuracy | Recommended Generator | Recommended Null Detector | Features and Typical Uses |
|---|---|---|---|---|---|---|
| 1652-A Resistance Limit Bridge $520 | dc | R: 1 to 1,111,111Ω Meter reads deviations up to ±20% from standard valve | ±0.5% as limit bridge ±0.25% by null method | self contained | | Production testing and inspection or laboratory work. Three high-sensitivity models having ±2%, ±5%, or ±10% full-scale ranges available on special order. Write for complete information. |
| 544-B Megohm Bridge with a-c power supply, $395 battery operated, $270 | dc | R: 0.1 to 1,000,000 MΩ | ±3% to 1000 MΩ ±4% to 100,000 MΩ | self contained | | Measures high resistance — insulation, volume resistivity, etc. |
| 740-B Capacitance Test Bridge $300 | 60 c | C: 5 μμf to 1100 μf D: 0 to 50% | ±1% ±1.5% of full scale | self contained | | Production-test tool — measures ungrounded capacitors. |
| 1611-B Capacitance Test Bridge $625 | 60 c<br>120 c | C: 0 to 11,000 μf<br>D: 0 to 50%<br>C: 1 μf to 11,000 μf<br>D: 0 to 120% | ±1%<br>±2%<br>±1%<br>±2% | 60c generator built in. 1214-D for 120c | self contained | Testing insulators, bushings, cables, grounded capacitors, and electrolytic capacitors. |
| 1650-A Impedance Bridge $450 | dc<br>20 c to 5 kc<br>20 c to 20 kc<br>(D & Q ranges are function of frequency) | R: 1 mΩ to 10 MΩ<br>R: 1 mΩ to 10 MΩ<br>L: 1 μh to 1000h<br>C: 1 μμf to 1000 μf<br>Q: 0.02 to 1000 at 1 kc<br>D: 0.001 to 50 at 1 kc | ±1%<br>±1%<br>±1%<br>±1%<br>±5%<br>±5% | 1-kc generator built in. 1210-C for 20 c to 20 kc | self contained<br>(earphones may be used) | A universal bridge for general-purpose laboratory or production use. Provision for applying dc to inductors, capacitors, or diodes during measurements. |
| 1603-A Z-Y Bridge $450 | 20 c to 20 kc | R: 0 to ±1000 Ω<br>G: 0 to ±1000 μmho<br>X: 0 to ±1000 Ω<br>B: 0 to ±1000 μmho | ±1%<br>±1%<br>±1%<br>±1% | 1210-C | 1212-A | Directly measures quadrature components of any impedance from 0 to ∞. |
| 1632-A Inductance Bridge $950 | 100c, 1 kc usable to 10 kc with slight decrease in accuracy | L: 111 μh to 1111h<br>G: 111 μmhos to 1111 mhos | ±0.1% Inductors having nearly equal values can be compared to a precision of 1 part in $10^5$ | 1304-B or 1210-C with 1206-B Amplifier | 1231-B with 1231-P5 Filter | For the precise measurement and standardization of inductors. |
| 1605-A Impedance Comparator $800 | 100 c, 1 kc<br>10 kc, 100 kc | Z: 2 Ω to 20 MΩ<br>ΔZ: ±0.01% to ±10%<br>Δθ: ±0.0001 to ±0.1 radian | ±0.01% | self contained | self contained | Panel meters simultaneously indicate % differences in magnitude and phase angle between unknown and external standard — precision and speed in one instrument. |
| 1605-AS2 Impedance Comparator $925 | 100 c, 1 kc<br>10 kc, 100 kc | Z: 20Ω to 20 MΩ<br>ΔZ: ±0.003% to ±3%<br>Δθ: ±0.00003 to ±0.03 radian | ±0.003% | self contained | self contained | For precise measurements — has 3-to-1 increase in sensitivity over the 1605-A. |
| 1613-A Capacitance Bridge $2175 | 400 c | C: 5 μμf to 11,000 μμf<br>D: 0 to 0.11 | ±0.1%<br>(±0.8% at 5 μμf)<br>±2% | self contained | self contained | Designed primarily as a calibrator for capacitive type aircraft fuel-gage testers. |
| 716-C Capacitance Bridge $655 (rack model, $625) | 1 kc<br>0.1, 10, 100 kc<br>0.1, 1, 10, 100 kc<br>0.1, 1, 10, 100 kc | C: 100 μμf to 1.15 μf<br>C: 100 μμf to 1150 μμf<br>C: 0.1 μμf to 1050 μμf<br>D: 0.00002 to 0.56 | ±0.1% ±(1 μμf x C multiplier setting)<br>±0.2% (substitution)<br>±2% | 1302-A | either 1231-B or 1212-A with appropriate filters | For capacitance standardization, precision measurements, dielectric tests and studies. |
| 716-CS1 Capacitance Bridge $600 (rack model, $575) | 0.5 to 3 Mc | C: 0.1 to 1150 μμf<br>D: 0.00002 to 0.56 | ±0.2%<br>±0.2% | 1214-M for 1 Mc 1211-B for other frequencies | 1212-A | High-frequency model of 716 C. |
| 916-AL Radio-Frequency Bridge $670 | 50 kc to 5 Mc | X: ±11,000 Ω at 100 kc<br>R: 0 to 1000 Ω (X-range varies inversely as frequency) | ±2%<br>±1% | 1211-B or 1330-A | communications receiver | Measures impedances of antennas, transmission lines; measures low impedances simply directly at radio frequencies. |
| 1606-A Radio-Frequency Bridge $660 | 400 kc to 60 Mc | X: ±5,000 Ω at 1 Mc<br>R: 0 to 1000 Ω | ±2%<br>±1% | 1211-B, 1215-B, or 1330-A | communications receiver | Improved model — same use as 916-AL but for higher frequencies. |
| 1601-A V-H-F Bridge $575 | 10 to 165 Mc | X: ±200 Ω at 100 Mc<br>R: 0 to 200 Ω | ±5%<br>±2% | 1208-B, 1215-B, or 1330-A | receiver, DNT-1, DNT-2 | For measurements of either lumped or coaxial circuits. |
| 1661-A Vacuum-Tube Bridge $1100 (also measures transistor low-frequency parameters) $1100 | 270 c, 400 c, 1 kc | μ: 0.001 to 10,000<br>rp: 50 Ω to 20 MΩ<br>gm: 0.02 to 50,000 μmho<br>also measures hi, hr, hf, and ho of transistors | ±2%<br>±2%<br>±2%<br>at mid ranges | 1214-E | 1212-A with 1951-E Filter | Adaptors furnished with instrument for measuring characteristics of receiving and transistors. |
