Manufacturing transformers requires special equipment which is unique in that it cannot be used for other purposes. In the layout of the plant of Transformers, Inc., three objectives have been closely aimed for: a laboratory capable, not only of measuring all the parameters of transformers, but making measurements on all types of electronic equipment in which transformers are to be used. The second objective was a Prototype plant or Sample Department complete and independent of the Production Department. The third objective was manufacturing space laid out in such a manner that complete control can be maintained on the quality of the transformer while it is in the various stages of manufacture.

For details, circle #109 on Reader Service Card.

FOR ALL BRANCHES OF THE MILITARY

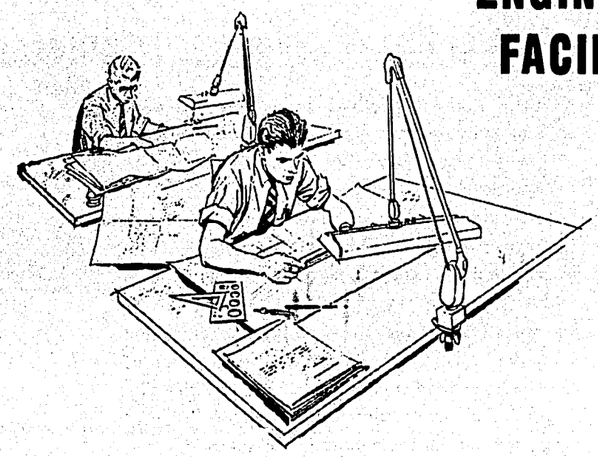
Transformers, Inc. have been specialists in designing transformers for special military applications. These transformers must meet the rigid MS and MIL-T-27A requirements. We have been suppliers to government contractors on transformers that meet these exacting requirements.

FOR ALL INDUSTRIAL APPLICATIONS

Computer transformers and magnetic amplifiers made by Transformers, Inc. have found wide application in industrial controls and automation equipment. Transformers, Inc. has been a leading supplier for the highly specialized transformers required in computers. Transformers, Inc. is equipped to manufacture all types of magnetic memory equipment.

TRANSFORMERS Inc.

DESIGN ENGINEERING FACILITIES



Transformers, Inc. is equipped with the most complete laboratory of any transformer company in the United States. It is possible to make measurements on all parameters at all frequencies from .01 cycles per second to 10 megacycles. In addition Transformers, Inc. has complete environmental test chambers which permit testing of transformers at simulated altitudes up to 100,000 ft. and at temperatures from 100 degrees below zero to 200 degrees above zero Fahrenheit. There is vibration equipment which permits the vibration testing from 5 cycles up to 3,000 cycles per second. Standard transformers are designed on the basis of the experience gathered from nomographs and our standard design specifications. We are constantly confronted with design of radically different transformers. Such transformers can only be acceptable in the field if they are subjected to complete tests for electrical specifications and under all environmental conditions. The final design is only acceptable when it is thoroughly tested.

and special test equipment

.....to meet today's critical requirements demands highly specialized skills and equipment

The accuracy required in voltage reference transformers and computer excitation transformers demands exacting specifications, supervision and material control. In order that high precision transformers be acceptable they must have predictable performance for all temperature and load conditions. A specialized method has been developed at Transformers, Inc. to make this possible. The measurement of voltage ratio is not sufficient, data must also be obtained which will indicate in which manner the variables of a particular transformer are affected by temperature and changes in the load.

For details, circle #111 on Reader Service Card.

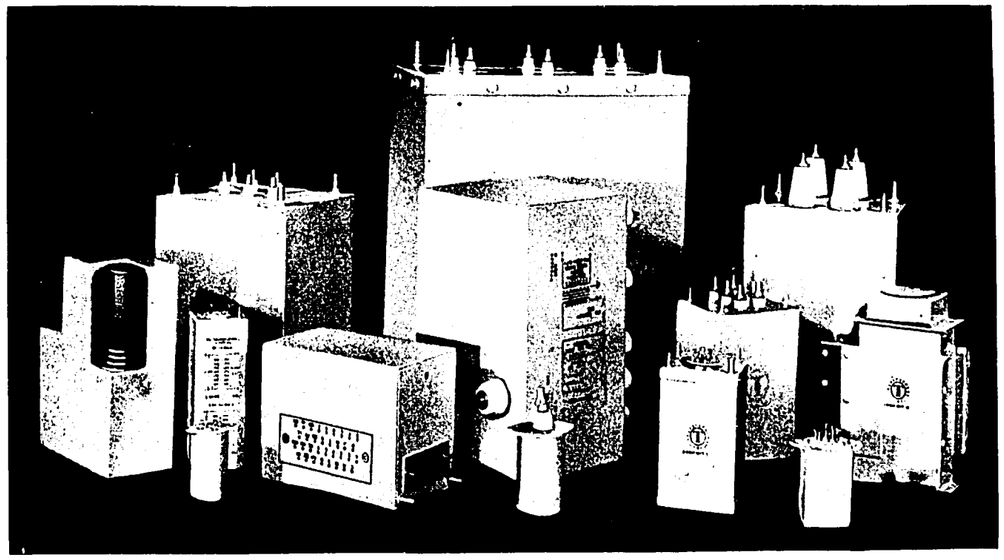
MINIATURIZATION

Airborne equipment may require the same accuracy as ground equipment with the additional requirement of miniaturization. Miniaturization can only be achieved by the use of higher operating temperatures with a resulting loss of efficiency. Thus highly accurate transformers can be designed and manufactured which operate at very high temperatures and are extremely small. Methods of encapsulating transformers in order to reduce weight have been developed at Transformers, Inc.

CORE MATERIALS

Transformers, Inc. maintains an adequate stock of various types and sizes of laminations of different core materials such as deltamax, orthonik, permalloy, mumetal, 4750, grain oriented silicon steel, etc. Each one of these specialized metals has special advantages which makes them suitable for use in specialized transformers.

TRANSFORMERS Inc.



IMPORTANT FEATURES OF TRANSFORMERS, INC. PRODUCTS

GREATER ACCURACY

Transformers, Inc. has developed special equipment to permit the measurements of ratio to a greater accuracy than heretofore possible. In our laboratory we can measure voltage ratio with an accuracy of 5 parts per million with a sensitivity of one part per million. In addition we have developed special equipment for the measurement of phase angles as low as .001 milliradian.

RELIABILITY

The manufacturing processes adhered to by Transformers, Inc. insure greater reliability. First by the specialized impregnating methods (vacuum and pressure). Second, by the standards adopted to insure maximum rigidity of assembly. Third, by the careful inspection of raw material.

MECHANICAL ACCURACY

In order to insure the accuracies we require for the mechanical dimensions for transformers, Transformers, Inc. has incorporated a complete metal working department. Through these facilities we are assured of mechanical perfections to within 5 thousandths of an inch for can dimensions and to within 1 thousandth of an inch for studs and other transformer components.

MINIMUM SIZE

It is of increasing importance for Airborne equipment to obtain optimum performance for minimum weight and size. The use of specialized core material and specially coated wires such as silicone coated wire and teflon insulated wire have permitted the design of transformers by Transformers, Inc. to minimum sizes. In addition we have developed special molded bobbins of high temperature material to obtain transformers without paper margins (which represent a loss of space) with resultant decrease in size and weight.

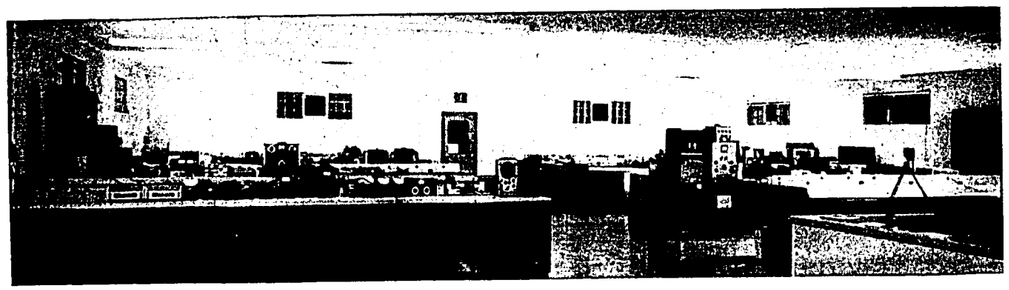
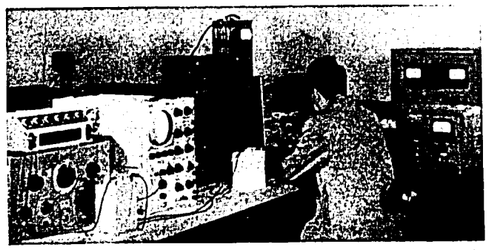
TRANSFORMERS Inc

TESTING TECHNIQUES AT TRANSFORMERS, INC.



General laboratory covers approximately 5 000 sq. ft., has the necessary equipment to make measurements from .01 cycles to 50 megacycles. Sections of the Lab on succeeding pages show specific test set-ups. There is sufficient equipment available so that all the set-ups can be operated simultaneously without interference.

Testing pulse transformers. This set-up can simulate the operating conditions of pulse transformers up to one million volts.

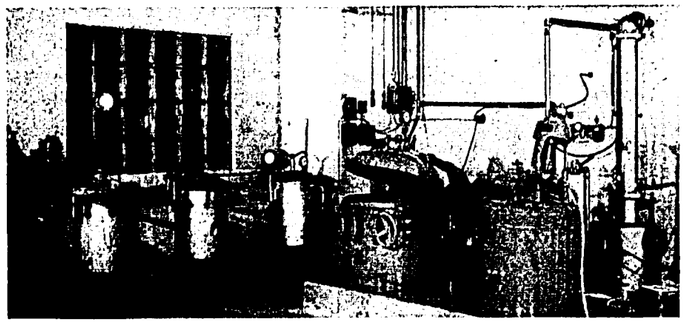


Equipment used in the design of pulse transformers to eliminate the "cut and try" method generally employed.

"Transformers, Inc. is equipped to measure any parameter at any frequency between .01 cycles to 50 megacycles."

"The following measurements can readily be made in the laboratory:

- **Measurement of core loss down to 2.5 microwatts at any frequency between 20 cycles and 20 KC**
- **Measurement of inductance from .1 microhenry to 1000 henries at any frequency to 50 KC**
- **Measurement of resistance from .00001 ohms to 10,000,000 megohms**
- **Measurement of impedance or admittance**
- **Measurement of filter characteristics**
- **Measurement of vacuum tube and transistor characteristics**
- **Measurement of intermodulation distortion**
- **Measurement of frequency from .01 cycles to 100 MC with an accuracy of 1 part per million**
- **Measurement of voltage ratio with an accuracy of 5 parts per million**
- **Measurement of phase shift down to .001 milliradians at 0° or 180°**
- **Wave analysis**



VACUUM IMPREGNATION

Production vacuum impregnated in these tanks and then subjected to gas pressure of 100 lbs. per square inch while they are still submerged in the varnish. This insures complete penetration of the varnish. The multiple of tanks permits simultaneous vacuum impregnation with different varnishes.

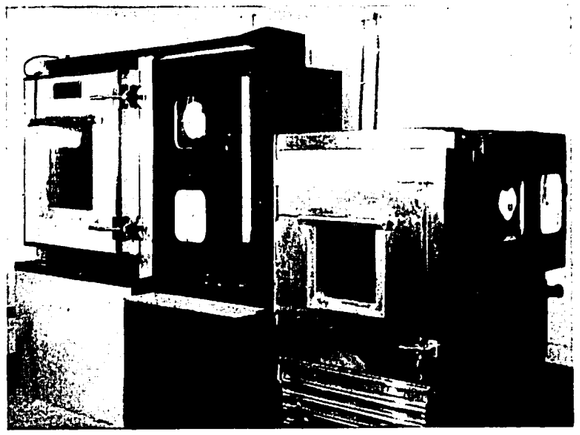
TRANSFORMERS Inc.

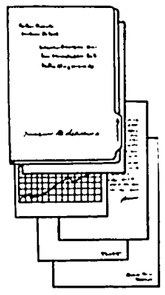
ENVIRONMENTAL TESTING



One chamber performs MIL-T-27 humidity cycling and Monmouth cold shock. Another chamber is a combination altitude and extreme cold chamber. Altitude up to 100,000 feet can be simulated. Temperatures as low as 100 degrees below zero Fahrenheit can be readily obtained. Another installation not yet completed will perform vibration testing up to 3,000 cycles at any simulated altitude up to 125,000 feet and at any temperature from 125 degrees below zero to 190 degrees above zero.

PRETESTED PROTOTYPES

The floor plan on the right shows the completeness of our Prototype Department. All operations necessary to the manufacture of a transformer can be performed independent of the Production Department. The personnel in the Prototype Department is specially trained to follow the design of new prototype transformers accurately. This highly specialized department is at your service to produce prototypes and samples at short notice.



COMPREHENSIVE PROTOTYPE REPORTS

Test data and design data are accurately maintained in files of all transformers manufactured by Transformers, Inc. This data makes possible repeat orders without delay or additional cost.

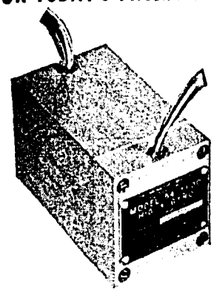
Precision Products

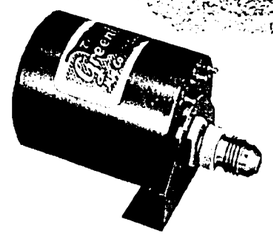
BY Greenleaf

FOR TODAY'S PROJECTS—TOMORROW'S PLANS



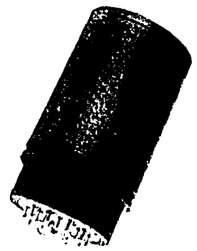
HIG-3 MODEL 2 INTEGRATING GYROSCOPE

This smallest integrating Gyro is dimensionally $1\frac{1}{2}$"x$1\frac{1}{2}$"x$2\frac{3}{4}$" including heater block and is being used in fire control and navigation systems. Has viscous damping, single degree of freedom and a maximum drift rate of .2 milliradians second.



PRESSURE SENSING DEVICES

Used for the measurement of absolute, differential and gage pressures. Accuracies within ± 2% or better throughout entire operating range.



HIG-4 MODEL 2 GYRO

Greater accuracy, including low drift rate, is a feature of this HIG-4 Gyro, now being used for missile guidance and fire control systems. The design and development phases of this Gyro have long been completed and it is now a production item.

FREE, RATE, DIRECTIONAL AND VERTICAL GYROS

For telemetering, missile guidance, inertial guidance and navigation. Whatever your gyroscope requirements, Greenleaf has the accurate, economical answer.

ACCELEROMETERS

The Greenleaf line includes linear, angular and three-axis accelerometers. Accuracy is within ± 2% or better throughout the entire operating range. Military environmental conditions were considered in the design of these units in order to comply with the reliability concept.

All these, and other Greenleaf products, may readily be modified in many respects to meet your individual requirements.

Complete specifications and technical Bulletins will be sent immediately upon request. Write, wire or 'phone today.

SYNCHROS are our business

In addition to the wide variety of standard units shown, we also produce an equally large number of special units on special order in production quantities for which we are already tooled.

For more complete information on our synchros including Typical System Measurements, write for booklet SC-3 or phone MAdison 6-2101 (Suburban Philadelphia).

NAVY BuOrd SYNCHROS

Contact Clifton Precision for standard Navy BuOrd units. If your specification requires conformance to BuOrd drawings and your system can take advantage of exceptional accuracy, CPPC can hold extra close error spread and accuracy tolerances. See CG-15-MS-1 in the tables.

PRECISION RESOLVERS

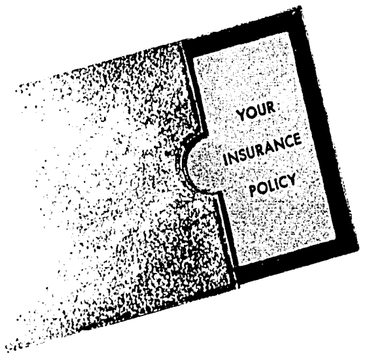
Precision Computing Resolvers with functional accuracies of the order of .1% and transformation ratios 1:1 are currently being constructed in the size 15 class for special applications. Contact CPPC for applications involving the use of Precision Resolvers in all sizes.

CLIFTON PRECISION PRODUCTS COMPANY, INC.

CLIFTON HEIGHTS, PENNA.

Constantin GLASS-TO-METAL SEALS

YOUR "INSURANCE POLICY" FOR



RELIABLE OPERATION

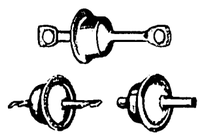
Wherever glass-to-metal sealing is needed to insure long life and continuously high performance, Constantin seals give your components a big bonus "premium" in endurance and protection.

Constantin's experienced research and production engineers have designed and manufactured thousands of different glass-to-metal seals for specific applications. Its complete research, design and manufacturing facilities . . . machine shops for die construction, stamping, wire cutting and forming . . . and separate glass shops . . . provide prompt action on any work order.

For any glass-to-metal electronics application where a positive, efficient, vacuum-tight seal is a critical need, Constantin can meet your technical specifications with a custom designed unit. Improve the quality of your components . . . "insure" their high performance by making Constantin seals a major part of your production "policy." Write today for complete details.

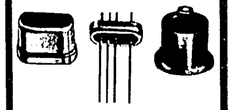
ALL-IN-ONE ASSEMBLIES

Constantin can design an original seal to meet the special needs of your equipment. All-In-One Assemblies come with different types of internal and external mountings, doing away with expensive subassemblies and costly production line operations such as hole stamping, brazing, soldering, mounting of seals, etc



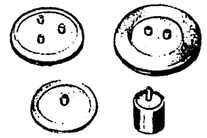
SINGLE TERMINALS

Extensive line of Single Terminals includes high compression and kovar types. Available Standard Pin types include pierced flats, hollow tubes, turret heads, tubulations with self-lugs, straight ends and cane or goose neck hooks.



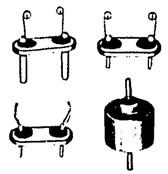
TRANSISTOR AND DIODE MOUNTS

For any soldering or welding application, Constantin has a complete line of Transistor and Diode Mounts which provide complete protection from moisture, dust, heat conditions and shock.



END SEALS

These quality units are designed and produced for electronic components which must stand up under extended operation . . . such as rectifiers, capacitors, resistors, delay lines, etc. Many different types and sizes are continually being developed to meet varying technical requirements.



CRYSTAL BASES AND COVERS

Constantin's Crystal Bases and Covers are world-known and have been widely used for many years by components manufacturers. They meet all military specifications and can be manufactured in varying designs with standard and special crystal mounts.

CONNECTORS

Constantin Connectors are made with special steel alloys which are combined with glass using high compression techniques. Any desired finish can be supplied to meet all present anti-corrosion requirements. Constantin is especially known for the construction of standard and unique flanges and pin types.

ALL-METAL HIGH COMPRESSION HEADERS

Special fusing techniques are used in the manufacture of Constantin's All-Metal Headers. Standard types find use in countless applications . in relays, transformers, thermostats and many others If your technical specifications encompass a special unit, Constantin will design a seal for your equipment

MULTIPLE HEADERS

Constantin's plug and standard type Multiple Headers are manufactured with precision by advanced engineering techniques. Their rugged construction enables them to withstand thermal shock and assure continuously reliable operation. Available in many standard configurations and special designs

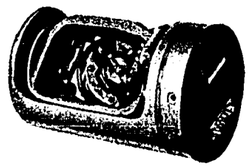
PRECISION GYROS FOR ALL APPLICATIONS

Eclipse-Pioneer . . . the nation's foremost supplier of panel indicator gyros . . . offers a complete line of gyros to meet all applications. This group includes all the basic vertical, rate, free, and directional gyro types used as reference components in complete navigation, radar, compass, autopilot, and guidance systems.



Type Number 14110-1-A

VERTICAL GYRO TRANSMITTERS

FEATURES: includes quick erecting mechanism which makes the remote unit ready for operation within 3 minutes. • Two ball erection system • Non-tumbling stops • Inclined axis (1 degree) to minimize turn error.

Power requirement	115 volts, single phase, 400 cps	Autosyn excitation	26 volts, 400 cps
Starting	19 watts, 0.9 P.F.	Erection rate (normal)	3°/minute
Running	13 watts, 0.85 P.F.	Weight	2¾ lbs.
Gyro speed	22,000 rpm	Size	3⅛" diameter x 5 1⅞₁₆" long
Gyro moment	600 gram cm²		

Diameter — 6⅛" Weight — 6¼ lbs. Height — 6¾"

Designed for use as a remote vertical reference where vertical stabilization is required. The instrument is essentially an electrically driven, vertical-seeking gyro with separate Autosyn transmitter pick-offs on the pitch and bank axes. Provisions are incorporated to reduce bank error encountered in turns.

- **Operating temperature range:** —55°C to +70°C.
- **Operational limits:** 360° in roll and pitch with controlled tumbling of the pitch axis at near 90°.
- **Accuracy:** The erection system maintains the gyro in a vertical position to within ¼° of vertical position with respect to the earth.
- **Caging:** From any position at full rotor speed in less than 45 seconds.

Type Number 14104-1-B

This Vertical Gyro Transmitter provides roll and pitch displacement signals which will operate remote indicating devices or which can be used wherever attitude information could be applied. It consists of an electrically driven, torquer erected, vertical-seeking gyro enclosed in a hermetically sealed case with separate Autosyn transmitter pick-offs on the roll and pitch axes.

Provisions have been made so that the pitch and roll erection systems can be cut out by external switches.

An outstanding feature of this instrument is the use of the newly developed Eclipse-Pioneer Electrolytic Switch which provides precise erection and has long serviceability. Besides being rugged, of simple design, and easily serviceable, the transmitter also features a quick erection to true vertical instead of vertical in relation to the instrument case; a sensitive measuring vertical detection system with an accuracy of better than ¼°; and an improved gimbal construction resulting in greater operational stability. This gyro is completely self-contained and requires no erection amplifier.

Type Number 14126-1-A

Size: 4¼" diameter, 8²¹/₃₂" in length
Weight: Approx. 6 lbs. without shockmount
Power requirements: Gyro Motor and Erection System — 115 volts, 400 cycles, 3 phase
Autosyn — 26 volts, 400 cycles, 1 phase

VERTICAL GYRO—Non pendulous

Momentum: 4,000,000 gm cm²/sec

Freedom: 360° in roll. Controlled tumbling near ± 82° in pitch with stops set to provide minimum loop error at 10°/sec rate of loop

RADAR ANTENNA DEVICES

GROUND ANTENNA PEDESTAL
TYPE NUMBER 40101-1-A

SPECIFICATIONS

Weight	700 lbs.
Data accuracy	0.5 Mil.
Slewing rates (in azimuth and elevation)	12 rpm.
Operating temperature range	—54°C to +66°C
Elevation and Azimuth	Two-speed 60 cps synchro data systems are used, having ratios of 1:1 and 16:1
Servo drives	¾ HP motors (DC) for use with an Amplidyne servo system
Wind loading	50 mph (full operating performance) 100 mph (no structural damage)

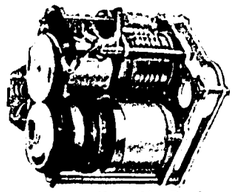
SPECIFICATIONS

Standard frequency range	9345 tto 9405 mc/s. This permits beacon operation at 9310 mc/s
Optional frequency range	9215 to 9275 mc/s
Operation	Up to 60KW peak with a 0.001 duty cycle
Beam width	4° maximum in E and H planes
Side lobes	At least 18 db below main lobe peak
Polarization	Horizontal
Weight	24 lbs. (approximate)
Operating temperature range*	—40°C to +55°C
Storage temperature range*	—65°C to +55°C
Humidity	10% to 95%

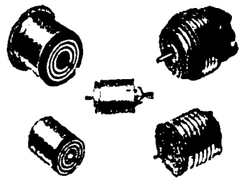
*These temperature ranges can be extended for specific applications.

AIRBORNE WEATHER RADAR ANTENNA
TYPE NUMBER 40023-□-A

COMPONENT PACKAGING



Servo Follow-Up Package



External Slip Ring Autosyn

In addition to supplying catalog component items such as — synchros, motors, gyros, etc. — Eclipse-Pioneer is in an excellent position to offer a premium in the way of customer service and accommodation on component packaging.

We may have already solved a problem similar to yours, thus enabling our system specialists to adapt from our extensive line, existing production packages to meet your systems requirements.

Should your problem turn out to be entirely new, we can — and will — design, develop, and produce a component or complete system to solve your specific problem.

No package is too small or too large for Eclipse-Pioneer, and may be as simple as an Autosyn mounting clamp or be more complex such as a complete servo follow-up subassembly from a production computer.

INDUSTRIAL

HIGH POWER MAGNETIC SERVO AMPLIFIERS FOR AUTOMATION

MB-1000-60 (1000 watt)

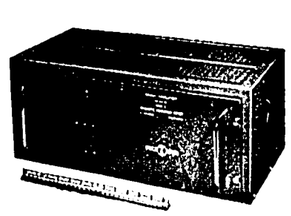
Provides 1000 watt continuous output to reference phase and 1000 watt phase-reversible output to control phase. Designed for ¾ h.p., 2 phase, 60 cycle servo motor. Ultra-fast response of less than 30 ms approaches theoretical limit. Incorporates a Scott connected transformer for change of 3-phase power into 2-phase output. Eliminates slow acting, bulky type rotating equipment or hydraulics. Completely static circuitry insures maintenance-free unattended operation.

Amplifiers can also be supplied for polarity reversing D.C. output for D.C. servo motors.

MB 1000-60

MB-200-60 (200 watt)

Provides both reference-phase and control-phase power for a 1/6 or 1/8 h.p. industrial servo motor. Features and operation are similar to those given for the MB-1000-60 above.



MB 200-60

MH-532-15

STABLVOLT® DC POWER SUPPLIES

with Dual Magnetic Regulation

A complete line of precision power supplies for laboratory, industrial and original equipment applications. Dual Magnetic principle provides for independent regulation of line and load changes. Exclusive flux oscillator achieves superior static and dynamic line transient regulation. No tubes, no moving parts. Short circuit-proof, maintenance-free. Ideal for unattended locations.

MR-15-1

FOR YOUR SPECIAL DEVELOPMENT NEEDS .

MRC offers a complete service in creative engineering, design, development and production. Whatever your field of application – automation, computer, communication, electronic, instrumentation, aviation or guided missile – you'll find that MRC men have the highly specialized magnetronic experience and skill to do a fast, successful job. If you have a special problem involving magnetronic components, write or call MRC. Prompt response, no obligation.

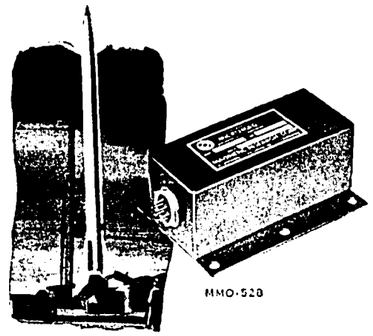
AN OUTSTANDING LINE OF ALL-MAGNETIC COMPONENTS, SYSTEMS AND MAGNETICALLY REGULATED POWER SUPPLIES



MMO-528

NEW MICROMAG® MMO-528 LOW-LEVEL MAGNETIC DC AMPLIFIER

Powered from 28 volt aircraft or missile systems—draws 20 milliamperes

For amplification of signals from thermocouples, strain gages, and similar low level transducers used in telemetering systems. DC voltage gain of 500 achieves 5 VDC output from a 10 millivolt DC input signal. Input electrically isolated from output. Designed for use in missile and aircraft telemetering systems, the amplifier has virtually no zero drift, and is temperature compensated to provide excellent gain stability. Operates directly from the aircraft 28 VDC supply. Draws 20 milliamps. No tubes are used, no warm-up time necessary. Potted and hermetically sealed to insure reliable operation. Designed to meet MIL-E-5272-A specs.

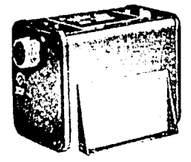
Write for complete technical data

AIRCRAFT AND MISSILE

TUBELESS PRECISION MISSILE AND AIRCRAFT INSTRUMENT POWER SOURCE MRP-5-1S

5 VDC transient-free output

Dual magnetic regulating system isolates line voltage transients from the output, regulates DC to 0.1% accuracy. Does not distort line voltage wave form. Trimpot having 5 millivolt resolution provides 0.5 volt output adjustment. Mounts easily in any position. Rugged, compact, short circuit-proof. Output current 0-1 amp. Hermetically sealed; all components cast in thermosetting plastic. Meets MIL-E-5272-A specs.

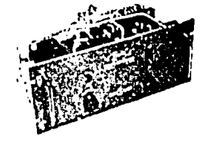


MRP-5-1S

400 CYCLE A.C. LINE VOLTAGE REGULATOR MXP 3000

For laboratory and ground support equipment

Designed for laboratory and ground support equipment requiring constant regulation of 400 CPS voltage. Input 100-130 VAC, 380-420 CPS. Output adjustable from 110-120, regulated to ± ½ volt at 400 CPS, under any combined conditions of line voltage change from 100-130 VAC, and load changes from 0-25 amperes. Distortion 5% maximum. Static magnetic circuitry used throughout. Can be connected for three phase circuitry. Other ratings available for ground and airborne applications.



MXP 3000

INSTRUMENT MAGNETIC SERVO AMPLIFIER SERIES

For aircraft and missile servo systems

Precisely engineered Magnestat Magnetic Servo Amplifiers are available from stock, from the smallest model rated at 3 watts, and having a frequency response of 0-30 CPS, to the high-power 40-watt model, frequency response 0-10 CPS. These units have sinusoidal phase reversing output, with transistor or tube control . . . a.c. or d.c. input. Temperature range of −55°C to +100 C. Currently being applied in many major aircraft and missile servo systems.

MA 6 400

COMPLETE MAGNETIC SERVO SYSTEMS

for military and industrial applications

Accurate, reliable systems for remote indication, measurement, recording and control in airborne and ground equipment. Developed to meet your specialized needs. Use of MRC magnetic components throughout makes your system really rugged. Fast response, strong output signal, compact packaging.

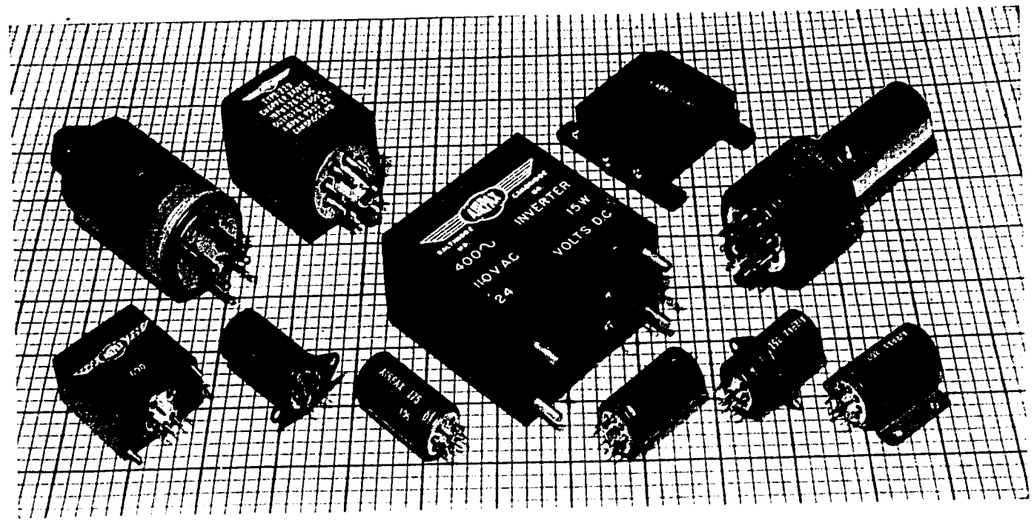
DE MORNAY BONARDI

780 South Arroyo Parkway, Pasadena, California, U.S.A.

For details, circle #130 on Reader Service Card.



These accurately made components represent products available to you that meet rigid industrial or military requirements.

Choppers—A variety of Airpax choppers enables you to select the appropriate type for each application. They are manufactured on precision machines to assure you of uniformly high quality. These choppers are used in instruments and automatic control. Contacts are rated for 0 to 2 milliamperes at up to 100 volts. Drive is 6.3 RMS volts.

Typical Signal Choppers

Frequency (CPS)	7-Pin Base Type	Octal Base Type	Miniature Solder Lug Type
	Standard Environment		
60	175, 176	170, 586	178, 179, 800*
400	300, 400	520, 580	302 thru 304, 600*
	High Temperature		
400	150, 310, 320	100	311 thru 314
	High Vibration		
400	350		351 thru 354

*Double-pole double-throw, split reed

400-CPS Chopper Drivers—Chopper drivers enable you to use 400-CPS choppers even if 400-CPS drive power is not otherwise available. There are two types: Series 202 is for use in 60-CPS powered equipment with conventional heater and plate voltages. Series 220 is for use in battery powered equipment.

Vibrators—Airpax pioneered high-frequency power vibrators because of reduced size and weight of associated transformers and chokes.

Type 500 vibrator is a 400-CPS interrupter unit for use with moderate continuous or heavy intermittent loads. It is hermetically sealed, operates in any position. This vibrator and variations are used in airborne transceivers, guidance equipments, and portable sets.

Type 505 is a center-pivoted vibrator rated for 28 DC volts input and output at 250 CPS. It is designed to withstand vibrations of 10 G from 10 to 1,000 CPS; time efficiency is 46%.

Inverters—Using 400-CPS vibrators, Airpax custom designs and manufactures compact low-power inverters. By way of example, Type 512 is hermetically sealed, weighs 14 ounces, occupies 7.5 cubic inches, withstands accelerations of more than 50 G, and has an efficiency of 75%. Its output is essentially a square wave, 15 watts at 110 RMS volts, 400 CPS. Input is 6, 12 or 24 DC volts.

Pulse Transformers—For preferred blocking oscillator circuits, use Airpax Pulsite transformers. These compact, hermetically sealed units are available as a kit covering many requirements of pulse circuits.

Characteristics of Pulsite Transformers

Pulse Width (usec)	Loc (mh)	LI (uh)	Cd (uuf)	Type
0.1	0.08	6	7	PT-1081
0.2	0.13	14	7	PT-1082
0.3	0.30	25	8	PT-1083
0.5	0.80	30	8	PT-1084
1.0	2.4	35	9	PT-1085
2.0	7.8	125	10	PT-1086
5.0	28	400	10	PT-1087
10.0	153	1,000	12	PT-1088

Custom Transformers—Airpax designs and manufactures custom transformers. The largest Fosterite facility in the country is at Airpax; units 3 x 3 x 4 feet can be baked and vacuum impregnated, or large batches of small units can be processed quickly. In addition to vacuum impregnated and molded units for airborne equipment, Airpax manufactures hermetically sealed MIL-T-27A units. Airpax has supplied transformers in quantity for operation in ambients to 175 C.

Sheet Metal Facilities—A complete machine and sheet metal shop complements the transformer production. The shop has sufficient capacity to fabricate custom metal parts, such as chassis and cases.

Thorough testing and inspection assure you that these Airpax components meet critical requirements for control and guidance.

Magnetic Amplifiers—Ferrac magnetic amplifiers are highly stable and linear DC amplifiers. You can use them in analog computer portions of guidance and control equipment. Several types are available to meet usual applications. Each amplifier has two input windings; output is electrically isolated from input and power supply. At stand-by, amplifier draws about 1.5 watts; with full signal, 2.5 watts at 115 RMS volts, 400 CPS.

Instrument Magnetic Amplifiers

Application	Plug-In Type	Bolt-Down Type
General Purpose	M-943	M-5174
Integrator	M-1039	M-5175
Thermocouple	M-1040	M-5176
High Gain	M-1057	M-5177

Synchronous Demodulators—So that 400-CPS synchros can be used with DC control circuits, Airpax developed highly accurate ring rectifiers.

Type D-5170 has a highly accurate null for use in zero-seeking equipments. A null accuracy (exclusive of the synchro) of 9 minutes can be obtained with it.

Type D-5171 has a wider linear range for proportional control equipments. It presents about 20,000 ohms to the control transformer.

Servo Amplifiers—Airpax magnetic power amplifiers control current to both phases of 400-CPS instrument servo motors. As a result, they draw little stand-by power. This characteristic results in up to 60% saving in stand-by power, compared with some other servo amplifiers. Standard units deliver 3.5, 6, or 10 watts per phase.

Typical Ratings, Type M-5178

Input—Two identical control windings of about 125 DC ohms each
Sensitivity—7.5 DC milliamperes into either control winding produces 6 watts output to each phase
Power—115 to 150 RMS volts at 400 CPS, approximately 21 watts at maximum output, only 3 watts during stand-by
Connections—Octal plug-in base, hermetically sealed
Dimensions (Max.)—1⅝" square base, 3" seated height
Weight—Approximately 14 ounces

Frequency Detectors—Magmeter frequency detectors convert AC signals to DC outputs. The output is linearly proportional to input frequency. These detectors are relatively insensitive to changes in signal amplitude and wave shape. They are used in telemetering, tachometers, and for pulse-rate measurement. Standard Magmeter detectors require about 1 watt of signal input. They can be driven directly from 120-volt power lines, from vacuum tubes or transistors. Plug-in units fit octal sockets; bolt-down units have solder lugs.

Magmeter Frequency Detector

Frequency (CPS)	Line or Tube Drive Plug-In	Line or Tube Drive Bolt-Down	Transistor Drive Plug-In
0-50	F-945	F-5121	F-5156
0-100	F-979	F-5122	F-5157
0-200	(F-979)	F-5123	F-5158
375-425	F-992	F-5133	
0-500	F-5146	F-5124	F-5159
0-1000	F-980	F-5125	F-5160
0-2000	F-981	F-5126	F-5161
0-5000	F-947	F-5127	F-5162

Circuit Breakers—Electronic circuits can be protected by Airpax miniature magnetic time delay circuit breakers. Trip level is unaffected by temperature. Units are rated up to 50 DC volts or up to 120 RMS volts; the latter either for 60 or for 400 CPS. Trip sensitivities are as low as 50 milliamperes; current ratings are available up to 10 amperes. There are two standard time delays: Rapid response A for protecting conventional electronic equipments, and slow response B for equipments that draw substantial starting surges.

Miniature Circuit Breakers

Rating	Series Type	Shunt Type	Relay Type
50 DC volts	401-	402-	403-
120 RMS volts at 60 CPS	410-	411-	412-
120 RMS volts at 400 CPS	420-	421-	422-

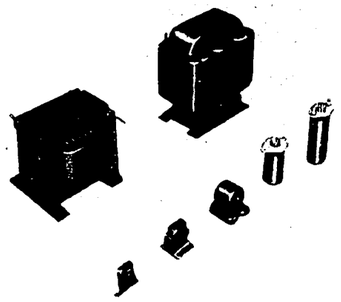
TRANSFORMERS FOR MILITARY & INDUSTRIAL APPLICATIONS

APPROVED FACILITIES FOR CERTIFYING COMPLIANCE TO MIL-T-27A

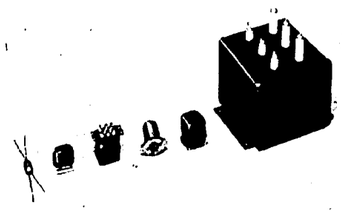
Manufacturers of Transformers since 1930

SPECIALLY TREATED TRANSFORMERS

For those innumerable transformer applications in electronic equipment where size, weight and resistance to various atmospheric and temperature conditions are the determining factors, ITC can encapsulate or mold to meet practically any specified condition. This can be accomplished without any deviation in transformer performance due to special ITC techniques and materials. Special ITC test equipment can simulate temperature, humidity and atmospheric conditions thereby permitting transformer testing under identical operating conditions. ITC specially treated transformers have been "use-proven" in the field under rigid MIL-T-27A specifications.



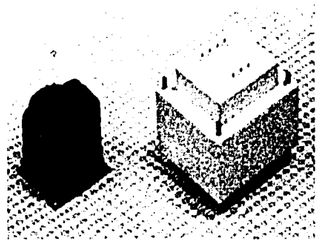
PULSE TRANSFORMERS



ITC's design file includes pulse transformers varying in size from the subminiature molded types used for blocking oscillator and low power matching purposes to high power pulse output transformers feeding magnetron loads. ITC engineers have produced a great variety of pulse transformers designed for a wide range of specialized electronic equipment and as a result are considered outstanding specialists in this field. This, coupled with their many other design specialties, points out the versatility of design and manufacturing facilities available at ITC.

HIGH TEMPERATURE TRANSFORMERS

Constant technological developments in the electronic industry, primarily in the area of military defense, are rapidly increasing the applications for reliable, high temperature transformers. ITC has accumulated much data and experience in the design, fabrication and testing of these transformers to meet rigid Military Specifications.



Transformers have been constructed using practically every high temperature material that has been available in the last decade to insure transformer reliability and performance in the field. ITC's work on high temperature transformers has met with complete acceptance by both government and industry . . . you can put their "know-how" to work with confidence on high temperature transformer applications.

COMPUTER TRANSFORMERS

ITC engineers have, for several years, devoted considerable time to developing precision transformers for computer applications. These transformers have found complete acceptance among the outstanding computer manufacturers. Illustrated are some examples of computer precision transformers typical of the engineering skill and resourcefulness gained as a result of constantly working to rigid technical requirements demanded in computer components.

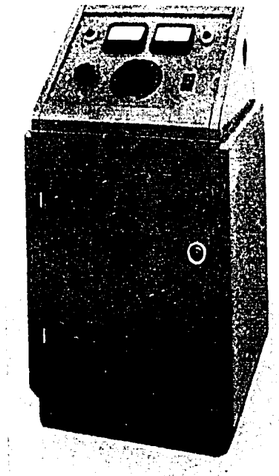
PRODUCTION TECHNIQUES FOR GUARANTEED PERFORMANCE

Industrial Insulation Breakdown Testers

DIELECTRIC TEST SET NO. 50



General: Designed to furnish the potentials required for dielectric tests conducted under MIL-C-13294A. Console type unit completely self-contained. Rating: Output is 5 kw at 1000 or 5000 V RMS.

Input: Operates from 220 V RMS, 60 cycle, single phase line.

Output: 1000 V RMS at 5.0 amps or 5000 V RMS at 1.0 amps, selection to be made by manual change-over switch mounted on the control panel.

Voltage Control: Output voltage is continuously adjustable from zero to max. by panel mounted control driving a variable auto-transformer within the console.

Overload Protection: Instantaneous trip type circuit breaker is mounted on panel to interrupt circuit in case of breakdown. Also serves as on-off switch for unit. Two pole type, rated to trip at 25 amps.

Indicators: Control panel has 2 pilot lights to indicate "line voltage on" and "high voltage on."

Metering: Voltage and current are simultaneously metered. An iron vane type ammeter having ranges of 0-1.0 amp. and 0-5.0 amperes is included in the output circuit. An iron vane type volt meter with 0-1000 V and 0-5000 V range is mounted on control panel.

Input Cables: 50-ft. line-cord furnished having 3 conductors; 2 for line circuit, 1 to ground set. Two 50 ft. 8 KV cables furnished. Insulated fittings at remote ends of cables.

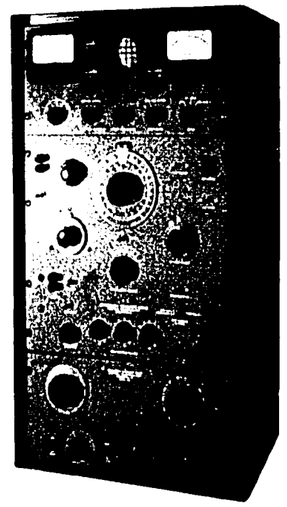
INSULATION BREAKDOWN TEST SETS

MODEL IT-25-A: Accurate indicator of grounds, shorts or opens. High voltage output and short circuit current: 500 V 1 amp. 1500 V 360 ma, 1000 V 500 ma-1750 V 310 ma, 1250 V 420 ma-2000 V 370 ma. Input: 115 V, 60 cycles. Rating: 500 Va.

MODEL IT-630: Has two operating ranges. 0-3000 V RMS and 0.6000 V RMS, continuously variable, with circuit breaker. It is a convenient, compact and accurate means of testing insulation breakdown. Input: 115 V, 6 cycles. Rating: 1 KVA.

INCREMENTAL INDUCTANCE BRIDGE

MODEL 226 Three bridge circuits in one instrument. Owen-Hay-Maxwell. Range—1 Millihenry—2000 henrys. Test voltage—.01-300 volts—R.M.S. D.C. saturation—0-1000 M.A. Q—.06-300. Frequency—60 cycles internal, 20-5000 cycles external. Accuracy—1%. With the HAY arrangement, any inductance between 1 Millihenry and 2000 henrys can be measured provided the Q is larger than 5. With the OWEN arrangement, the same inductance range can be covered, but the Q must be comparatively low and can have a value as low as .06 at 60 cycles. The MAXWELL arrangement is suitable for the measurement of low Q coils (below 5 at 60 cycles) without superimposed D.C. and for the measurement of leakage inductance. Both the OWEN and the HAY circuits can be used with or without superimposed D.C. Automatically disconnects the D.C. supply from the bridge when it is put into the MAXWELL position.



COMPLETE FACILITIES

Coil Winding • Complete Machining • Can Fabrication • Plating • Tinning • Potting • Humidity Cycling Testing • Constant Temperature Testing • Vibration Testing.

We are completely equipped with facilities for in-plant testing to meet MIL-T-27 specifications. All raw materials are given numerous inspection tests to insure uniform high standing quality and ability to withstand the stresses of actual service. We are constantly working to improve design and production, and our engineering staff is always ready to assist you in your Transformer problems.

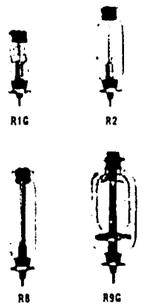
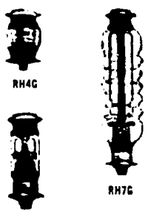
TYPE R VACUUM SWITCHES



R1G, R2, R8, R9G

TYPE RH VACUUM SWITCHES



RH4G, RH7G, RH1G

RELAYS USING VACUUM SWITCHES

Type R and RH Vacuum Switches are available from Jennings mounted as relays for indoor use. They may be mounted with contacts normally open or normally closed or two switches may be mounted in a single pole double throw arrangement. Either ac or dc solenoids may be used. Insulation between the switch and its actuating solenoid is provided by a 2 to 8 inch puller rod providing 40 to 100 kv insulation. CE grade phenolic laminate is recommended for dc or 60 cycle use; Grade G7 silicone glass laminate is recommended for radio frequency applications.

For details, circle #135 on Reader Service Card.

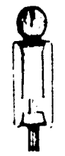
DC ACTUATING COILS
Standard actuating coils are rated for operation at 26.5 vdc and draw 2 to 10 watts of power. Coils rated for operation at 110 vdc are also available for most types

HIGH VOLTAGE VACUUM RELAYS

MODEL JP 325 HIGH VOLTAGE PROBE
VOLTAGE RATINGS: 40, 50, or 60 KV peak
VOLTAGE DIVISION RATIO: 325 to 1 to termination of 3 ft of RG 58 A U cable
INPUT IMPEDANCE:
Resistance: above 10⁸ ohms
Capacitance: 4 mmfd
FREQUENCY RESPONSE: High frequency limited by that of measuring instrument (Internal resonances are above 200 mc.) Low frequency response is 100 cps if operating into 10 megohm shunt resistance. 1000 cps if operating into 1 megohm shunt resistance



TYPE JCO 5 MMFD SERIES CAPACITOR attaches to HV end of the VDF 2.8 divider in the J1003 meter and the JP 325 probe doubling the division ratio and the voltage rating in each case. Decreases total loading capacity of meter or probe from 4 mmfd to 2 mmfd.
Sold without corona sphere unless ordered
VOLTAGE RATING: 60 KV peak

MODEL J-1003 HIGH VOLTAGE VACUUM TUBE VOLTMETER for use in pulse, rf, and 60 cycle circuits at voltages up to 100 KV.
VOLTAGE RANGES (peak volts full scale):
Single Ended: 2.5, 5, 10, 25, 50 KV
Double Ended: 2.5, 5, 10, 25, 50, 100 KV
(By using Type JCO Series capacitor, these ranges can be more than doubled.)
OSCILLOSCOPE CONNECTION: 300 to 1 division ratio
FREQUENCY RESPONSE: 10 cycles to 20 megacycles at full rated voltage and up to 50 megacycles for lower voltages with low harmonic content
INPUT IMPEDANCE: 10¹¹ ohms and 4 mmfd
CALIBRATION ACCURACY: ± 3% of full scale
POWER SUPPLY: 117 volt, 50 60 cy
DIMENSIONS: 16¼" x 11" x 9"

Designed and tested to specification #MIL-T 26985

Supplied in two principal case sizes:

1. For RDB channels 1 through 6, case size is ¾ x 1½ x 2¼ inches high; weight: 4 ounces.
2. For channels 7 and up, case size is ¾ inches square and 1⅜ inches high; weight: 1¼ ounces.

These cases are generally equipped with a 4-pin plug to match the small Winchester socket.

ATTENUATION CHARACTERISTICS

Impedance: 100 K ohms in and out.
Insertion loss: less than 6 db.
At ± 7.5% band width is less than 3 db.
At ± 25% band width is greater than 15 db.
At 1.75 f attenuation is 40 db or more.
At .57 f attenuation is 40 db or more.

ADJUSTOROIDS®

The Adjustoroid, a low cost adjustable toroid, exclusively developed by Burnell & Company, Inc., contains an actual complete toroid which relays all the excellent characteristics of the non-adjustable types. Adjustment is obtained by a completely stepless function with magnetic biasing.

The nominal inductance value for an Adjustoroid is the **maximum** value, and the inductance range is the nominal value minus approximately 10%.

Hermetically sealed to meet Government MIL specifications. Many types of networks in tuned circuits are being produced which employ the Adjustoroid in completely hermetically sealed packages.

Intermediate inductance values as well as special taps and extra windings available on special order with minimum delay.

For additional technical data on Adjustoroids, refer to equivalent toroid in catalog.

NEW SUBMINIATURE VARIABLE INDUCTORS

AF-87 AF-88

(30-500 cycles) maximum Q at 400 cycles

(50-1000 cycles) maximum Q at 800 cycles

Burnell subminiature variable inductors are especially designed for low frequency applications or where proportionately high inductance values are required. Except for low frequency, high inductance values, subminiature inductors are similar to Adjustoroids and measure 1¼" in height and 45/64" in width and depth. Variable inductors are available in all inductance values up to 80 Hys.

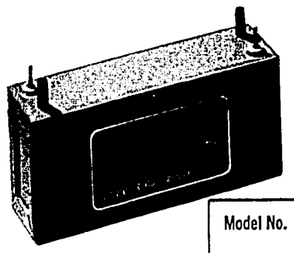
HYCON EASTERN, INC.

CRYSTAL FILTERS

.. in the 10 Kc to 30 Mc range

Hycon Crystal Filters make possible *single conversions* in AM and FM receivers while retaining the important advantages of double and triple conversions. High selectivity at the first i.f. with greater stability and reliability are among these advantages.

The following table shows a partial list of *standard* Hycon Filters. New *standard* models are frequently being added. If a standard Hycon Filter should not meet your requirements, our engineering service can be made available to help solve your selectivity problems.



Model 13MA

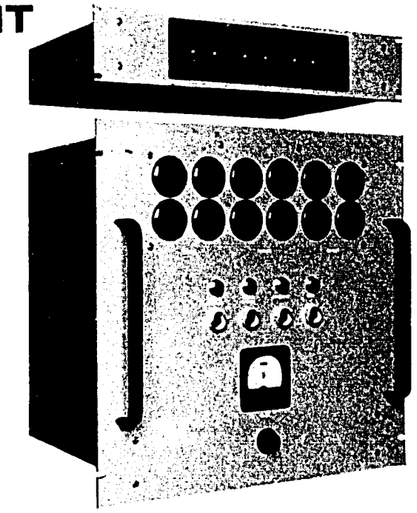
Rapid Access For Instrumentation Data Reduction Systems

- Timing system operates over any combination of tape speeds.
- High speed search in either direction.
- Timing Information occupies only a part of the available bandwidth.
- Mounts in any RETMA standard 19" relay track.

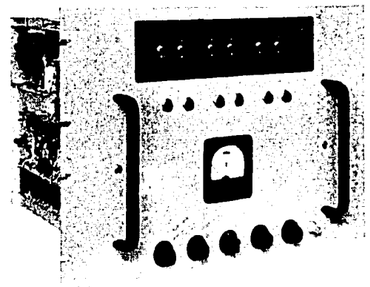
MAGNETIC TAPE SEARCH UNIT

... for tape search



DIGITAL TIMING GENERATOR

... for tape indexing



DIGITAL TIMING GENERATOR, MODEL 201 generates numerically coded timing signals which are recorded on the magnetic tape throughout the data recording periods, providing a precise digital index in terms of elapsed time.

MODEL 206A *is a militarized airborne version of Model 201.*

MAGNETIC TAPE SEARCH UNIT, MODEL 202, operates during data reduction periods. This instrument automatically locates and selects for controlled playback the tape data included between a "sequence start time" and a "sequence end time" specified by panel dial settings. The time index is visually displayed as illuminated digits.

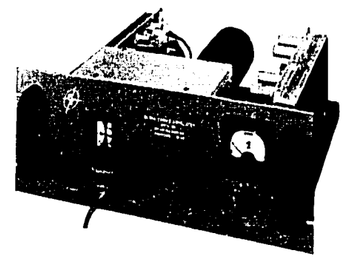
ULTRA STABLE OSCILLATOR

... One Megacycle Signal Source ... Stability: 1 part in 10^9 per day

Hycon Eastern's new Ultra Stable Oscillator is useful wherever precise time measurements or frequency control are required, as in reinsertion of carrier in suppressed carrier systems, telemetry, astronomical measurements, navigation systems, geophysics or other critical applications. MULTIPLIERS and DIVIDERS are available for other frequency values with corresponding stability.



- **FREQUENCY STABILITY:** Drift Rate less than 1 part in 10^9 per day after one month's operation.
- **CRYSTAL OVEN:** Stabilized to better than 0.01°C. by temperature-sensitive resistance bridge. Oven contains no moving parts.
- **DISSIPATION IN OSCILLATOR CRYSTAL:** Stabilized at a power level less than one microwatt.

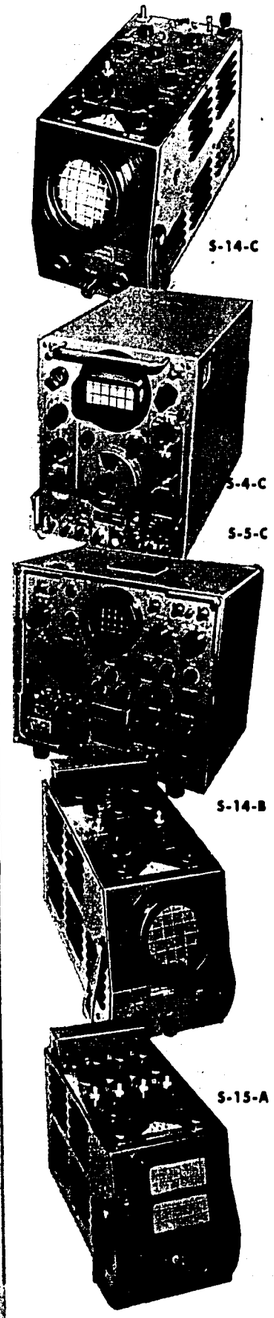
Waterman PRODUCTS



S-14-C COMPUTER POCKETSCOPE is a portable oscilloscope, especially designed for computers and business machine service. Lightweight and small size together with simplicity of operation makes this instrument IDEAL for field servicing. In addition . . . signal amplifier with 0.35 μs pulse rise from dc, with signals of 1 mv observable . . . calibrated fixed sweeps and continuously adjustable linear time base from 20 μs to 2 seconds . . . 5x stable time base expansion with complete parading for accurate pulse position . . . sync limiting . . . special intensification circuits permits observation of pulses shorter than 10 μs at repetition rates slower than 1 pps . . . accessory attenuating and amplifying probes . . . make this instrument a MUST for computer type service.

S-4-C SAR PULSESCOPES are improved JANized equivalents to the Gov't Model AN/USM-25. These portable instruments (only 31.5 lbs. each) are for precision pulse time measurements in radar, TV and all electronics equipment. Portray all attributes of the pulse . . . internal crystal controlled markers of 10 and 50 μs available for self-calibration . . . in R operation a small segment of the A sweep is expandable for detailed observation with a direct-reading calibrated dial accurate to 0.1%. Video amplifier band-pass up to 11 mc . . . optional video delay 0.55 μs . . . pulse rise time better than 0.05 μs . . . R pedestal (sweep) 2.4 to 24 μs . . . video sensitivity of 0.1 v rms/in. Easily convertible from μs to yards. Operates from 50 to 400 cycles at 115 volts.

S-5-C LAB PULSESCOPES are JANized equivalents to the Gov't Model AN/USM-24C. These portable, AC, wide band-pass laboratory oscilloscopes are ideal for pulse as well as general purpose measurements. Internal delay of 0.55 us permits observation of pulse leading edge. Includes precision amplitude calibration, 10X sweep expansion, internal trace intensity time markers, internal trigger generators and many other features. Video amplifier .06 v RMS/inch . . . pulse rise time of 0.07 us or response to 11 mc . . . 5 to 50,000 us/in. triggered or repetitive sweep . . . internally generated markers from 0.2 to 500 us . . . trigger generator from 50 to 5000 pps. for internal and external triggering. Operates from 50 to 400 cycles at 115 volts AC.

S-11-A INDUSTRIAL POCKETSCOPE is a small, compact, and lightweight instrument for observing electrical circuit phenomena. The flexibility of the POCKETSCOPE permits its use for ac measurements as well as for dc. The vertical and horizontal amplifiers are capable of reproducing within—2 db from dc to 200 kc with a sensitivity of 0.1 v rms/in. . . . repetitive time base from 3 cycles to 50 kc continuously variable throughout its range . . . variations of input impedance, line voltage or controls do not "bounce" the signal—the scope stabilizes immediately.

S-14-A HI-GAIN POCKETSCOPE provides the optimum in oscilloscope flexibility for analysis of low-level electrical impulses. Vertical and horizontal channels: 10 mv rms/inch with response within —2 db from dc to 200 kc and pulse rise of 1.8 μs . . . non-frequency discriminating attenuators and gain controls with internal calibration of trace amplitude . . . repetitive or trigger time base with linearization from ½ cycle to 50 kc with ± sync or trigger.

S-14-B WIDE BAND POCKETSCOPE is ideal for investigations of transient signals, dc signals, aperiodic pulses or recurrent waveforms. Vertical channel: 50 mv rms/in. within—2 db from dc to 700 kc . . . pulse rise time of 0.35 μs. Horizontal channel: 0.15 v rms/in. within—2 db from dc to 200 kc . . . pulse rise of 1.8 μs. Attenuators and gain controls are non-frequency discriminating . . . trace amplitude calibration . . . repetitive or triggered time base from ½ cycle to 50 kc . . . ± sync or trigger . . . trace expansion, filter graph screen and many other features.

S-15-A POCKETSCOPE is a portable, twin tube, high sensitivity oscilloscope with two independent vertical as well as horizontal channels. It is indispensible for investigation of electronic circuits in industry, school and laboratory. Vertical channels 10 mv rms/in. with response within—2 db from dc to 200 kc and pulse rise time of 1.8 μs . . . horizontal channels 1 v rms/in. within—2 db from dc to 150 kc . . . non-frequency discriminating controls . . . internal signal amplitude calibration . . . linear time base from ½ cycle to 50 kc, triggered or repetitive, for both horizontal channels.

S-12-B RAKSCOPE admirably fills the need for a small oscilloscope of wide versatility. With all the features of the S-11-A POCKETSCOPE, the RAKSCOPE is JANized (Gov't Model No. OS-11), and has many additional advantages; the sweep, from 5 cycles to 50 kc, is either repetitive or triggered . . . vertical and horizontal amplifiers are 50 mv rms/inch with band-pass from 0 to 200 kc . . . special phasing circuitry for frequency comparison.

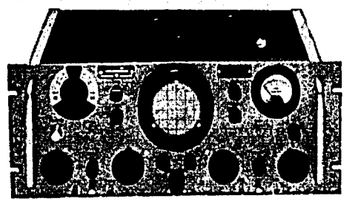
SYSTEMS CONCEPT



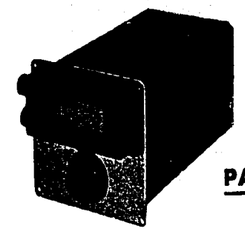
RAKSCOPE S-12-C

The Waterman SYSTEMS RAKSCOPE, S-12-C series is a rack mounted oscilloscope with SYSTEMS CONCEPT. Systems concept is a basic means for rapid monitoring of desired signals with minimum operative effort and without the use of auxiliary switching or jack panels. S-12-C series provide the following:

1. BASIC UNIT—The basic S-12-C SYSTEMS RAKSCOPE is a complete combination systems monitoring and trouble-shooting oscilloscope with outstanding physical and electrical characteristics. The RAKSCOPE occupies but 7 inches of a standard 19" rack and extends only 10 inches behind the front panel. Identical vertical and horizontal amplifiers are DC type having rise times better than 0.35 usec, and 50 or 71 millivolts rms per inch of deflection respectively. Signal calibration method uses a direct reading accurate meter. Time base sweeps are from ½ cps to 50KC in trigger or repetitive operation. Sync from internal or external sources provide stable operation by means of new sync lockout circuits. Special plug-in elliptical sweep circuit for easy phase and frequency checks greatly increase its systems utility. Construction is ruggedized throughout. Tube type options include standard commercial, ruggedized commercial or ruggedized military. Operable from 50 to 400 cycles.

2. CUSTOM MODIFICATION—Desired flexibility is obtained with the optional signal input selector. For the first time it is possible to select up to eleven different signal sources with the necessary built-in attenuation (supplied by us or by you) for each source. Thus the entire switching panel can be omitted from an overall system resulting in circuit and space economics. Standard elliptical sweep is 60 cycles, but plug-in units for other frequencies can be supplied. Accessories such as attenuating, direct, and amplifying probes are available.

Improve your existing or contemplated systems by including the S-12-C SYSTEMS RAKSCOPE as an integral part. Your local Waterman representative is ready to assist you in determining specific requirements.



PANELSCOPE®

The Waterman PANELSCOPE is a custom-built cathode ray tube oscilloscope, with simplified operation, and yet available at a low price. The PANELSCOPE concept provides for the following:

(1) MINIATURIZATION—Panel space required is only 5¼" x 5-3/16"—depth is 10" and the weight is less than 7 lbs. The PANELSCOPE can be installed in practically any equipment—mobile or stationary—air, sea, or land—military or commercial.

(2) SIMPLICITY OF OPERATION—Twist of a single rotary switch provides a synchronized pattern of desired incoming signal (up to 11 circuits) against proper linear time base. This is ideal for monitoring and trouble shooting, as it removes the need of fiddling with knobs as is done now on general purpose oscilloscopes. The static controls, such as beam, focus, positioning, and graticule brightness are located in tube escutcheon.

(3) CUSTOM DESIGN—A wide variety of—signal amplifiers with response from dc to megacycles and sensitivities from 5 millivolts—synchronized or triggered linear time base generators from ½ cycle (and lower if need be) to 2 microseconds—can be specified by you to fit your needs for particular equipment.

(4) PARTIAL KIT FORM—the PANELSCOPE comes fully wired and tested with chosen signal amplifier, linear time base generator and attendant sync. amplifier. The desired signal attenuators, frequency and amplitude determining components, and method of synchronization can be installed either by us or by you.

(5) POWER REQUIREMENT—Less than 10 watts of line power for built-in high voltage supply—The required B+ and heater current as selected by your requirements. For those cases where B+ and heater power is not available, auxiliary power pack can be supplied.

There is a place in your equipment for Waterman PANELSCOPE, a custom built oscilloscope at production prices, although your needs may be but one or two. Ask for specification sheets either from our representatives or direct from the factory.

RAYONIC CATHODE RAY TUBES BY WATERMAN

TUBE	PHYSICAL DATA		STATIC VOLTAGE		DEFLECTION*		LIGHT OUTPUT**
	FACE	LENGTH	A3	A2	VERT	HOR	
3JP1	3"	10"	3000	1500	111	150	40
3MP1	3"	8"		750	99	104	4
3RP1	3"	9.12"		1000	61	86	5
3SP1	1.5x3"	9.12"		1000	61	86	5
3XP1	1.5x3"	8.875"		2000	33	80	22

*Deflection in volts per inch.
**Light output of a line in millifoot lamberts per millimeter at line width not to exceed .65mm.

The basic properties of the cathode ray tube that concern the designer or the user are: deflection sensitivity, unit line brightness, line width, static voltage requirements and physical size. A comparison between cathode ray tubes manufactured by Waterman Products Company is shown in the table adjoining. These tubes are available in P1, P2, P7 and P11 phosphors. 3JP1, 3JP2, 3JP7, 3RP1, 3SP1 and 3XP1 are available as JAN tubes.

For details, circle #142 on Reader Service Card.

having your ups and downs?

DALOHM has the answer!

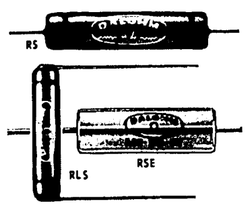
You can depend on

DALOHM® WIRE WOUND RESISTORS

Carefully designed, precision made to meet all space problems and for all applications where equipment must meet the most severe environmental, shock, vibration, and humidity conditions. Smallest in size; completely coated with special silicone material; welded from terminal to terminal; impervious to moisture, salt ions, vapor gases.

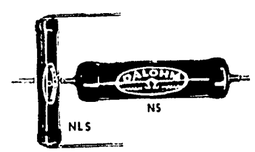
TYPES RS, RLS, RSE

Five wattage ranges—2, 3, 5, 7 and 10, six sizes; resistance range from .05 ohm to 175K ohms depending on type; tolerance range .05% to 3%. Type RS with axial leads; Type RLS with radial leads; Type RSE housed in metal tubing for tremendous shock and vibration resistance.



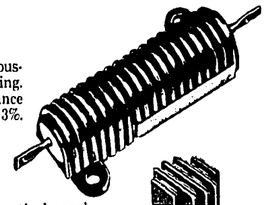
TYPES NS, NLS

Newly conceived NON-INDUCTIVE resistors. Five wattage ranges – 2, 3, 5, 7, and 10, six sizes; resistance range from 2 to 37K ohms; tolerance from .05% to 3%. Type NS with axial leads; Type NLS with radial leads.



TYPE RH

Die-cast, black anodized radiator finned housing. Lugs provided for horizontal mounting. Three wattage ranges—25, 50, 250; resistance range 0.1 to 100K ohms. Tolerance .05% to 3%.



TYPE PH

New ruggedized Powerhouse resistor for vertical panel mounting. Black anodized finned aluminum housing. Two wattages 25 and 100; resistance range from 0.1 to 60K ohms; tolerance .05% to 3%.

TYPES WWL, WWA, WWP, WWR

Encapsulated for hermetic sealing; non-inductive pi wound; powered at .1 watt to 2 watts; resistance range 0.1 ohm to 5 megohms; sizes from sub-miniature ⅛ by ⅜ inch to ½ by 2 inches.

if your ups and downs involve

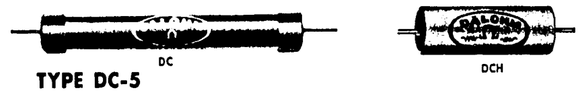
DEPOSITED CARBON RESISTORS . . .

DALOHM has the answer!

Assure accurate, dependable performance. Precision resistance values, low voltage coefficient, low capacitive and inductive characteristics in high frequency applications, extremely high stability and economy.

TYPES DC, DCH

Resistance range from 10 ohms to 50 megohms; tolerance 1% or higher as specified. Type DCH hermetically sealed in non-hygroscopic ceramic envelope. Five wattages—⅛, ¼, ½, 1 and 2; eight sizes.



TYPE DC-5

For high voltage and/or high resistance applications; powered at 5 watts; high voltage up to 20,000 VDC; resistance range 1 megohm to 200 megohms; tolerance 1%.

DALOHM POTENTIOMETERS

TYPE A10-W TRIMMER

High temperature–humidity proof–ruggedized–wire wound–designed to provide highest performance under ever-increasing MIL SPEC requirements. Powered at .8 watt; resistance range 10 ohms to 100K ohms; tolerance 5% standard.

TYPE DP-12

Hermetically sealed, moisture proof for critical electronic circuitry, Military Type RA-30 built to surpass JAN-R-19.

DALOHM COLLET-FITTING EQUIPMENT KNOBS

Precision made Dalohm knobs, incorporating an exclusive collet-fitting design, permit positive locking on the shaft without any of the damaging effects found in other knob securing methods.

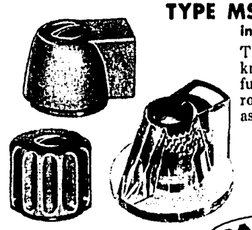
TYPE K INDUSTRIAL KNOBS

For hard use at high/low temperatures; precision cast of thermo setting plastic; five sizes—⅝", 1-1/16", 1¾", 2¼", 3". Collets interchangeable for shafts ⅛" to ⅜". Standard pointers, escutcheons and indicators available.

TYPE MS MILITARY STYLE KNOBS

in accordance with MIL-K-25049

The ultimate in airborne and other military knob applications. Made of tough, durable, fungus-proof thermoplastic; metal parts corrosion resistant. Complete selection of skirts as required by MIL Specs.



YOU CAN DEPEND ON DALOHM®

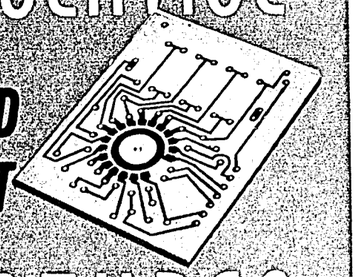
NOW QUICK SERVICE ON PRINTED CIRCUIT PROTOTYPES



Now Photocircuits Corporation offers you the services of its newly formed

PROTO DIVISION

for faster delivery of Printed Circuit Prototypes

- No need to wait weeks for a few engineering samples! We'll deliver FULLY FABRICATED parts within days from receipt of your art work or negatives and specifications.
- This separate division is completely streamlined in its methods and systems to guarantee you the fastest possible service.
- To accomplish this result a special set of "ground rules" has been formulated. Your local factory Sales-Engineer will give you all the details.
- He can figure costs *on the spot!* You will not be delayed by having to write the factory for formal quotation.

The PROTO DIVISION combines speed with the three vital attributes that have made Photocircuits the leader in the industry . . . EXPERIENCE, EQUIPMENT and CONTROL!

NOW you'll meet that deadline and still benefit from all the cost and quality advantages of printed wiring.

HELPFUL HINTS
for using the IRE DIRECTORY

A few minutes' study of the basic layout of the IRE DIRECTORY will help you to find the information for which you are looking more quickly and more accurately. At first glance, the IRE DIRECTORY may seem to be confusing, but by using the various portions of the book as listed below, you will find your way around easily, and will discover that it is actually a very simple arrangement, and a much more logical one than a purely alphabetical terminology listing.

PINK SECTION at the front of the products and firms section contains a three-page terminology index listing every product, major and minor, for which a list of manufacturers is given. Page numbers refer you to the page on which the listings for that product begin. Following this alphabetical index is a copy of the questionnaire which is sent to the firms who have furnished us with product information. A quick look through this questionnaire will help greatly in understanding the product arrangement. At the top of the first page of the pink section is a small index referring you to the opening page of the complete-data spread section, the alphabetical directory, and each of the four product directories.

THE COMPLETE DATA SPREAD SECTION (pages 1-150) contains product advertisements of great usefulness to the reader. Most of these advertisements are two pages or more, and all of them contain complete information on the products manufactured by the advertising firms—specifications, prices, illustrations, and suggested applications.

ALPHABETICAL DIRECTORY OF MANUFACTURERS (pages 151-253) contains a list of 3,265 firms representing the majority of buying and selling power in the radio-electronic industry. Each firm listing contains the complete mailing address and telephone number for the firm. Following the state name in the firm address, a list of code numbers is given. These numbers refer to the 100 major products listed in the book (for quick reference to the meaning of the codes, use the questionnaire form on pages v-viii of the pink section).

THE FOUR DIRECTORIES OF PRODUCTS ARE:

1. Communications Equipment
2. Components
3. Controls and Instruments
3. Materials and Services

This breakdown into four directories saves you from traveling through many products in which you are not interested at the moment, and helps you to turn immediately to the listings for the type of product you want, following a straight line to your destination. Use the Machol edge index at the top of the first page of the pink section to locate immediately the first page of the appropriate directory, then use the Machol edge index at the beginning of each directory to find the specific product you want. You don't even have to know the page number—the index will find it for you automatically!

100 MAJOR PRODUCTS are listed within these four Directories. Each product listing contains a number of sub-headings so that you may know specifically what each firm makes. To interpret the code numbers shown after each firm's listing, consult the first page of that product class, where the sub-headings are defined. You will note that advertisements are positioned throughout the book in the most appropriate listing section, so that the advertisement for a relay manufacturer will appear in the relay section, to help you with further information on his product. Every advertiser's listing shows you the page number on which his advertisement may be found, and you will derive more value from this book if you consult these advertisements for facts you cannot find in the listings.

COMPLETE ADDRESS LISTINGS are given only for advertisers in this section. If you wish to locate the address and telephone number for any other firm, it will be necessary to use the alphabetical directory.

THE DISTRIBUTION SECTION is class 100, the last class in the book. This section contains a list of 1,425 manufacturers representatives, distributors and jobbers, grouped geographically. See page 605 for a more complete explanation of the use of this section.

ADVERTISER'S INDEX appears on pages 146-150 and on pages 635 and 636.

How to Use the Machol Edge Index

High speed reference is a major objective of the IRE Directory. To this end we have adopted the Machol Edge Index system, and these indexes:

Advertisers Index, pages 635-636.

Key to Products, Pink Section.

Index to Spreads, 1.

1	COMPLETE DATA SPREADS
151	ALPHABETICAL COMPANY LIST
255	DIRECTORY I COMMUNICATIONS
287	DIRECTORY II COMPONENTS
459	DIRECTORY III CONTROLS & INSTRUMENTS
521	DIRECTORY IV MATERIALS & SERVICES

Detailed Machol edge indexes will be found on the first page of the alphabetical Directory and each of the four major product Directories, pages 151, 255, 287, 459 and 521. The Machol system will help you find both alphabetical and product sections swiftly.

152	A
161	B
168	C
177	D
179	E
187	F
191	G
197	H
199	I
203	J
205	K
207	L
210	M
217	N
221	O
223	P
229	QR
235	S

249	U
251	VW
253	XYZ

HOW TO USE

1. Bend the Directory almost double with the front cover page on the inside.
2. Hold in your right hand with your four fingers near to the bound edge and your right thumb near the middle of the open side of this page.
3. From the heavy or light line symbol adjacent to the subject you seek, run your eyes across the page edges until you reach the horizontally corresponding symbol.
4. OPEN THERE!

LICENSE NO. 25
MACHOL EDGE INDEX PATENT #2680630

1958 Edition prepared by The Advertising Department of the Institute of Radio Engineers, 72 W. 45th St., New York 36, N.Y.
William C. Copp, Mgr.; Lillian Petranek, Asst.; Carl Maier, Production; Frank G. MacAloon, Research.

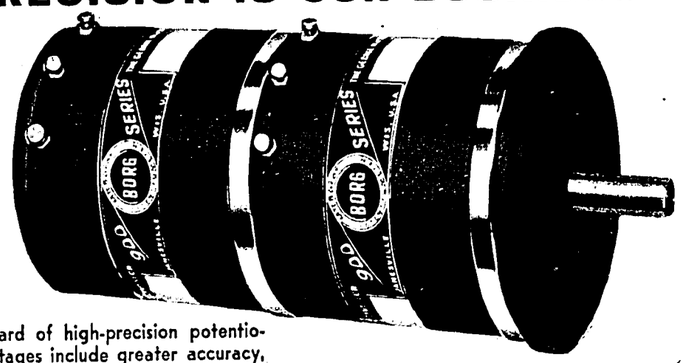
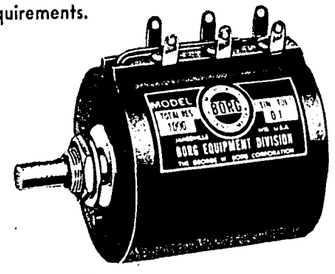
PRECISION IS OUR BUSINESS



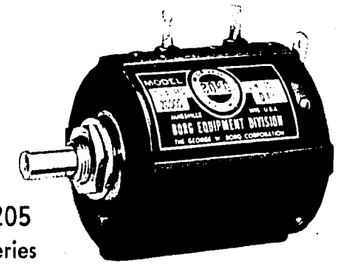
900 series

The new standard of high-precision potentiometers. Advantages include greater accuracy, finer resolution, lower torque, longer life and better performance under adverse environmental conditions. 48 standard models meet most special design requirements.



1100 series

Precision potentiometers that offer your products a price advantage in today's competitive markets. Engineered for easy installation with readily accessible terminals. Accurate, dependable, long lived.



205 series

Long a favorite for both military and commercial purposes. Has proved itself exceptionally rugged and dependable in years of use on many mobile and stationary applications.

BORG MICROPOTS

precision potentiometers with

UNLIMITED DESIGN APPLICATIONS...
MORE PROFITABLE PRODUCTION POSSIBILITIES

Your job is made easier when you use Borg Micropots. They're versatile . . . they're flexible. Standard models can be readily adapted to meet the special requirements of a wide variety of applications. What is more they have many exclusive advantages: — — absolute linearity, permanent accuracy, long life, and dependability. You can rely on them to meet your most rigid commercial and/or military specifications. They're readily available too. Production has been stepped up to assure prompt delivery of any model in any quantity. We invite consultation with your Borg "Tech-Rep". His helpful advice can often save you time and money. Write us today for his name and address. It will pay you to know him.

How to choose magnetic tape recorders for data

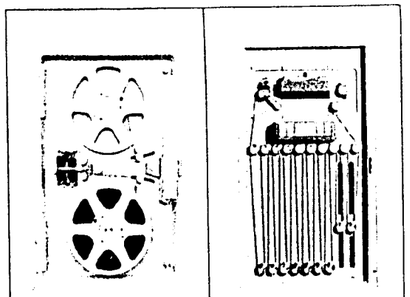
Types, performance and sources of further information

A magnetic tape recorder for your particular use is chosen from hundreds of possibilities, and yet from Ampex it can almost always be a standard production-line model. There are three reasons:

(1) Ampex offers the broadest available selection of basic types.

(2) Ampex modular design permits innumerable combinations of standard components to fit individual needs.

(3) By designing for the most critical user requirements, Ampex achieves performance standards ample for almost all practical uses.



Reel-to-reel *Continuous loop*

TYPES OF TAPE TRANSPORTS

Reel-to-reel recorders are the most familiar. They record over relatively long time intervals, hence are almost always used for acquiring permanent data.

Continuous-loop recorders recycle on a definite time interval, either to provide a cyclic repetition of a length of data or to act as a time-delay device. The Ampex FL-100 is of this type.

Digital recorders, a special variation of reel-to-reel, are characterized by extremely rapid start-stop characteristics for close pulse packing. The Ampex FR-200 is typical.

"Transportable" recorders with varying degrees of portability are available from Ampex. Even Ampex's "fixed" recorders, FR-100 and FR-1100 may be mounted in a truck or trailer. But recorders like the Ampex 800 are built for true mobility, hence are light, compact and resistant to shock and vibration. Ampex also has miniaturized designs.

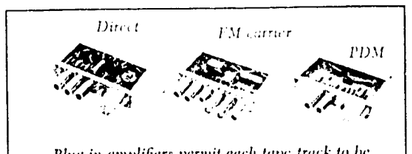
TYPES OF RECORDING

Most Ampex models use interchangeable plug-in amplifiers that enable each track to be used with any of three recording techniques:

Direct recording has frequency response of 100 to 100,000 cycles/sec. at 60 in/sec. tape speed. This high response is its greatest advantage and is utilized either directly or for multiplexed data.

FM-carrier recording has high instantaneous amplitude accuracy with frequency response of 0 (DC) to 20,000 cycles at 60 in/sec. It is used for transients, low frequencies and wherever accurate reproduction of amplitude is important.

PDM recording (pulse-duration modulation) can time-multiplex as many as 85 channels of data onto each tape track (data from 0 (DC) to a few cycles per second). PDM provides high accuracy and easy convertibility to digital form.



Plug-in amplifiers permit each tape track to be used with one of three recording techniques.

OTHER CONSIDERATIONS

Tape widths of quarter, half and one-inch width with 2, 3, 4, 7 and 14 parallel tracks are Ampex standards.

Commonly furnished tape speeds are 60, 30, 15, 7½, 3¾ and 1⅞ in/sec. Others are available. Recorders have up to eight speeds.

Time-base accuracy within 2 parts in 100,000 can be provided with standard Ampex accessory equipment.

Compatibility (for tape interchange) between Ampex recorders of same or different models is an important Ampex advantage.

Full performance specifications are available in literature on individual series.

A general application brochure and literature on individual models are available upon request. Ampex's Field Sales Engineers will be pleased to answer your inquiry with specific information on any requirement. Write Dept K-57

-FOR EVERY TYPE OF APPLICATION

TOPHET A® (80 Nickel 20 Chromium)
Non-magnetic, high tensile strength, temperature coefficient of resistance approximately 85 PPM, used for resistors and potentiometers, high temperature applications. 650 ohms/CMF.

TOPHET C® (60 Nickel 15 Chromium Balance Iron)
Faintly magnetic, high tensile strength, temperature coefficient of resistance approximately 130 PPM, used for power resistors, high temperature applications. 675 ohms/CMF.

EVANOHM® (75 Nickel 20 Chromium 2.5 Aluminum 2.5 Copper)
Non-magnetic, highest tensile strength, temperature coefficient of resistance 20 PPM maximum, used for precision resistors and potentiometers below 200°C. The original 800 ohm alloy.

BALCO® (70 Nickel 30 Iron)
An alloy with a high temperature coefficient of electrical resistance 4500 PPM (20° to 100°C.) 120 ohms/CMF.

CUPRON® (Copper Nickel)
A non-magnetic alloy with a low temperature coefficient of electrical resistance. Recommended for instruments and radio resistors. 294 ohms/CMF.

RODAR® (Nickel Cobalt Iron)
An alloy for sealing to hard glass for electronic and hermetic sealing applications.

NILSTAIN® (Stainless Steel — 300 Series)
Popular types of stainless steel in wire, ribbon or strip.

Filament Alloys

TENSITE, SYLVALOY, COBANIC, and MODIFIED HILO
For directly heated cathodes; alloys have excellent emissive and physical properties.

CATHODE ALLOYS
For indirectly heated cathodes. HIGH NICKEL ALLOYS, custom vacuum or air melted for active, passive and normal emissivity.

Grid Wire

MANGRID® (Grade D Nickel)
Most widely used lateral grid wire, also supplied silver plated.

PERMAGRID (Permanickel)
For use in higher temperature applications than regular Mangrid, higher physical properties and hot strength.

PERMOCARB and MAGNOCARB (Precarbonized grid wire)
Operates cooler because of black body effect, eliminates spray coating, more evenly coated, replaces Moly in certain applications.

CARBONIZED NICKEL Radiocarb, Policarb,® Duocarb®
Ideal for anode plate use, gives long die life, excellent thermal emission (black body) free from hydrocarbon and sulphur.

CUPROCHROME (1 Chrome 99 Copper)
Extensively used for grid side rod, high conductivity with relatively high strength.

Custom and Special Purpose Alloys

In addition to the alloys listed, the Wilbur B. Driver Company maintains complete melting, hot rolling and cold working equipment for the production of custom alloys for specialized requirements.

Insulations Available — Enamel, formvar, liquid nylon, cotton, silk, nylon and fibre glass coverings.

May we discuss your specific applications? Please write or call —

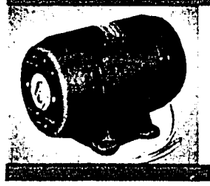
WANT THE ANSWER TO YOUR

POWER PROBLEM?

Your reply to this ad, today, may bring you face to face with the practical solution to your communications power problem. CARTER Rotary Power Supplies are used by ALL major builders of dependable mobile radio, electronic and radar equipment. CARTER products listed here are typical of our "standard" models. Our engineering department will help in selecting or developing a Carter Rotary Power Supply to meet your needs.

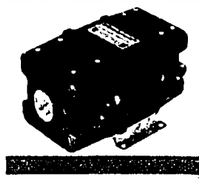
750 WATT DC-AC CONVERTERS

Answers the demand for big capacity converters. Delivers full 115v. AC at full load, with an output surge of over 1000 watts to overcome heavy starting loads. Input voltage available for 24, 28, 32, 48, 64, 115 and 230v DC.



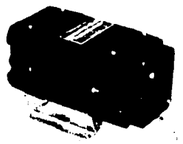
NEW 750 WATT DYNAMOTORS

Specially developed for industrial use, marine, mine, pipe-line communications, telephone, emergency standby service. Six models provide DC inputs from 24 to 250 volts, with DC output at 6.3 or 12.8.



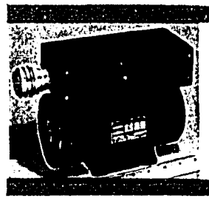
SUPER DUOVOLT GENEMOTORS

Widely used in 2-way mobile radio service. Operates either on 6v. or 12v. auto storage battery power. This is the standard power supply used in most taxi cab, police and vehicular communications equipment.



NEW FAN COOLED GENEMOTORS

Forced ventilation insures longer life and trouble free operation when installed in confined areas at high temperatures. Specified for military applications. Available in outputs up to 800 volts.



INDUCTOR ALTERNATORS

Supplies 400 to 800 cycle AC from a DC source. Used in aircraft, geophysical, laboratory and industrial service and wherever high frequency current is required. Input voltage for 12, 24, 28, 32, 48, 64, and 115v. DC.

Carter Trade Mark

Address your inquiry to Ray Simon, Chief Engineer, Carter Motor Co., 2735 W. George St., Chicago 18 or mail coupon.

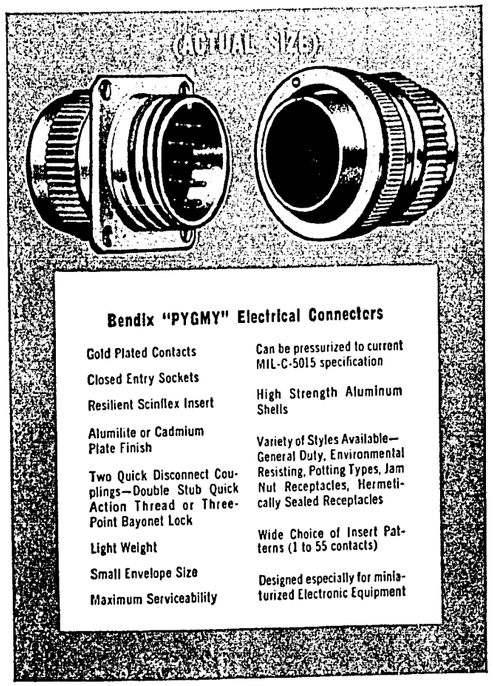
BIG NEWS ABOUT A LITTLE PRODUCT



New "PYGMY" Connectors for Miniaturized Electronic Equipment Installations

Although the newly developed "Pygmy" line of miniature electrical connectors is approximately one third smaller in size and weight than the standard Bendix* AN connector, they provide the same outstanding qualities of serviceability, ruggedness, reliability and resistance to vibration, moisture and corrosion for which all Bendix connectors have become world famous.

If you have an application for miniaturized electronic equipment requiring lighter and smaller connectors than standard AN types, you'll find Bendix "Pygmy" connectors the best possible solution. Write for complete detailed information. SCINTILLA DIVISION OF BENDIX AVIATION CORP., SIDNEY, N. Y.

ASTRON -- PIONEERS OF CAPACITOR HISTORY

quality capacitors and RF noise filters to meet all specifications

Astron offers you a complete, wide line of versatile capacitors and RF-Noise Suppression Filters for your most exacting requirements. Reliability of each Astron capacitor is insured by:

1. High quality raw materials
2. Advanced production techniques
3. Strict quality control and inspections
4. Skilled craftsmanship
5. Custom engineering facilities

The types and ratings illustrated are but a few of the many available. Write today for complete technical and engineering data on Astron products.

R F NOISE SUPPRESSION FILTERS

ASTRON'S FOUR STEP FILTER SERVICE PLAN HAS SOLVED THOUSANDS OF INDUSTRY'S AND GOVERNMENT RF FILTER PROBLEMS. THIS "PACKAGED" SERVICE INCLUDES:

1. DEFINITION OF REQUIREMENTS
2. ENGINEERING ANALYSIS
3. PROTOTYPE TESTING
4. EFFICIENT SOLUTION OF PROBLEM

ASTRON WILL CUSTOM-ENGINEER AND MASS PRODUCE A FILTER SPECIFICALLY FOR YOUR EQUIPMENT

BURROUGHS CORPORATION

BEAM SWITCHING TUBES

BURROUGHS Beam Switching Tubes are 10-position high vacuum electronic distributors with high input impedance and ten individual constant current outputs.

Type 6700

Operation: 75-300 v
Switching Rate: Above 2 Mc

Type 6701

Operation: 12-25 v
Switching Rate: Above 1 Mc

Type MO-10R

Operation: 75-300 v
Switching Rate: Above 10 Mc

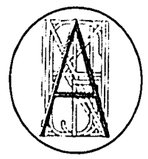
NIXIE NUMERICAL INDICATORS

Burroughs all electronic indicators are gas-filled, cold cathode tubes, having a common anode with as many as 10 combinations of numerical or alphabet symbols. They are intended for use as a direct, in-line, readout device.

The 6844 is a ten digit numerical indicator tube with digits 0 through 9.
Rating:
170 v Dc
1.0 to 2.2 MA

"MINIATURE"

BD200 is a miniature numerical indicator same as 6844 except 4 x smaller volume, 40% less diameter.
Rating:
170 v Dc
0.5 to 0.9 MA

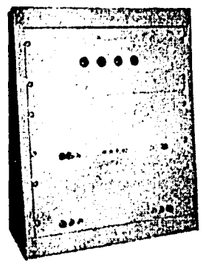


ALPHABET same as 6844 except cathodes are shaped in the form of letters instead of digits. Combinations can be made as desired.

PIXIE POSITION INDICATOR

The HB-105 is a gas filled, cold cathode, 10 position readout device, having a common anode. It features 10 glow positions, 36° apart, visible through 10 numerical perforations (0 to 9) in the common anode, in the manner of an internal bezel.

TRANSFER STORAGE COUNTER



Burroughs' TS-204 with Magnetron Beam Switching Tubes counts, stores, and samples at predetermined intervals. It has the ability to sample high-speed information without stopping the count or losing the original data.

The design of this versatile unit allows visual storage display on the Burroughs' in-line numerical indicator tube, "Nixie", and direct operation of most standard print-out devices. Applications include:

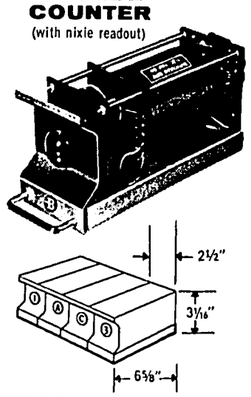
Data Handling Systems
Telemetering Monitoring Systems
Automatic Processing Control
Events Per Unit Time
Instrumentation

DECADE COUNTER

(with nixie readout)

This Decade Counter combines the reliability of the Beam Switching Tube with the human-engineered "Nixie" to set a new standard in performance and appearance. These plug-in units have been designed for a minimum panel height with provisions for manual and electronic zero setting. Three models are available:

Type	Counting Rates
DC-101	10 kc
DC-102	100 kc
DC-103	1 mc



ACCESSORIES

SOCKETS
HSK100-R1 (for 6700 & 6701)
HSK112 (for 6844)
HSK109 (printed circuit for 6844)
HSK105 (for MO10R)
HSK111 (for HB105)

TEST CHASSIS
TC100 (for 6700)
TC101 (for 6701)
TC10R (for MO10R)

TUBE CLAMPS
HCL100 (for 6700-6701 MO10R)
HCL102 (for 6700-6701 MO10R)

PULSE TRANSFORMERS
PT100 Blocking oscillator
PT102 Directly coupled (Pulse standardizer)

PIN STRAIGHTENERS
LS-100 26 pin (6700,6701)
LS-101 20 pin (MO10R)
LS-102 13 pin (Nixie)
LS-103 13 pin (Pixie)
Wiring Plugs available

Write today for complete technical engineering data on any of the above items.

For details, circle #158 on Reader Service Card.

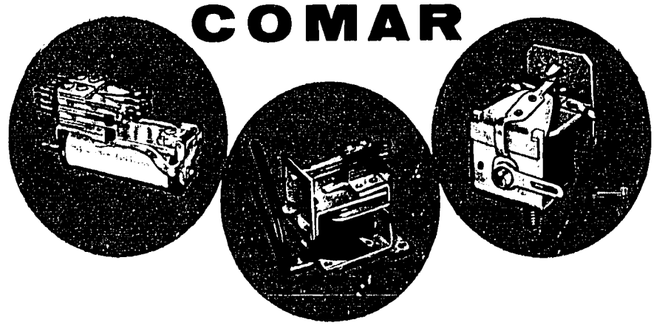
NEXT TIME YOU NEED

RELAYS

GET A "QUOTE" FROM

COMAR



Each year, more and more manufacturers are specifying "Comar" as their relay source. They've found that Comar has the facilities and know-how to produce good dependable relays at low cost. Next time you need relays, get a "quote" from Comar.

You'll be glad you did.

Comar ELECTRIC COMPANY

3349 ADDISON ST., CHICAGO 18, ILLINOIS

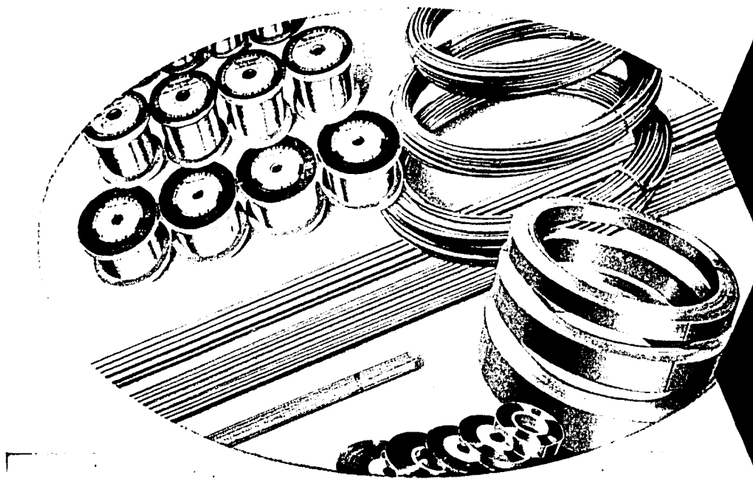
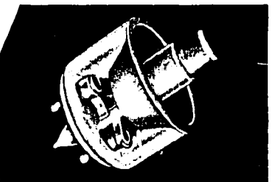
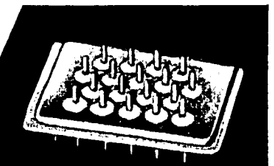
These DRIVER-HARRIS alloys do most to improve the quality of



Your Resistors



Your Electron Tubes



Your Glass-to-metal Seals

DRIVER-HARRIS RESISTANCE WIRE ALLOYS

NICHROME* V (Nickel-Chrome) Essential for resistor elements in the higher temperature applications such as electric furnaces, electric ranges, radiant heaters, etc.

KARMA* (Nickel-Chrome-Aluminum-Iron) Permits the manufacture of miniaturized wire wound precision resistors of best temperature coefficient of resistance at low cost per ohm; also resistance standards.

NICHROME* (Nickel-Chrome-Iron) The internationally accepted material for heating devices operating up to 1700°; also industrial applications for rheostats and resistance units.

CHROMAX* (Nickel-Chrome-Iron) A lower cost alloy for electrical heating under conditions less critical than those satisfied by Nichrome.

ADVANCE* (Copper-Nickel Series including MIDOHM*, 95 ALLOY, LOHM*, 30 ALLOY) Possess a number of properties which make them useful for winding heavy duty industrial rheostats, precision resistors, thermocouples, and thermocouple leads. Specific resistance range of this series is from 294 to 30 ohms/cmf.

MANGANIN (Manganese Copper) Most stable resistance wire known at ambient temperature. Indispensable for resistors used in many types of precision direct current apparatus such as Wheatstone Bridges, National Bureau of Standards type resistance standards, etc.

HYTEMCO* (Nickel-Iron) Combines high temperature coefficient of resistance with high specific resistance; ideal for winding compensating or ballast resistors.

DRIVER-HARRIS GLASS SEALING ALLOYS

THERLO* (Nickel-Cobalt-Iron). For sealing glasses such as Corning 7052 and 7040.

142 ALLOY (Nickel-Iron). For sealing glasses such as Corning 776, also 8160.

152 ALLOY Contains 50% nickel. It provides a slightly higher coefficient of expansion than 142 Alloy and seals successfully with 0120 glass.

146 ALLOY Contains 46% nickel. It offers special expansion properties, permits seals with ceramic coated resistors.

DRIVER-HARRIS ELECTRON TUBE ALLOYS

The Driver-Harris Company, since the inception of radio, has been making alloys for this field, supplying the industry with alloys for support wires, plates, grids, cathodes, and lead-throughs.

All Alloys are available in:

WIRE
(Sizes as fine as .0005")
ROD
RIBBON
STRIP
(Foil as thin as .00045")

Insulations:

ENAMEL
COTTON
SILK
NYLON
GLASS
FORMVAR

Singly or in combination

Every Driver-Harris alloy is made to the most precise metallurgical checks and controls known to the industry. And each of these highly specialized alloys is custom-made . . . produced exactly to the specifications of our customers.

Send us *your* specifications. If your needs are in any way unusual, and cannot be met by one of our current 132 alloys, our engineers will be happy to start tomorrow to devise a new one, custom-made for you. Just tell us exactly what you wish to accomplish.

*T.M. Reg. U.S. Pat. Off.

Driver-Harris Company*

HARRISON, NEW JERSEY

BRANCHES: Chicago, Detroit, Cleveland, Louisville

Distributor: ANGUS-CAMPBELL, INC., Los Angeles, San Francisco • In Canada: The B. GREENING WIRE COMPANY, Ltd., Hamilton, Ontario

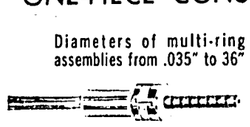
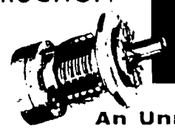
PRECISION MACHINED
ONE-PIECE CONSTRUCTION

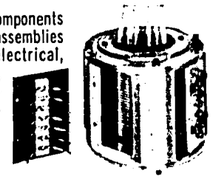
SLIP RING & COMMUTATOR ASSEMBLIES

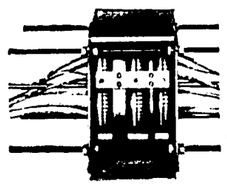
Diameters of multi-ring assemblies from .035" to 36"





Individual components or complete assemblies to precise electrical, mechanical, and environmental specifications.





Uniformly hard rings, low noise, minimum friction and dimensional stability.

An Unmatched Record of Performance

Today, Electro Tec Slip Ring and Commutator Assemblies are the choice of leading aircraft, instrument, and component manufacturers throughout the world. Our units are selected for Gyro and Servo applications, for Telemetering and Radar devices, for Guidance systems, and Automation equipment... where sustained and reliable performance is a requisite.

Facilities Available to Serve You

Plants in South Hackensack, N. J., Blacksburg, Va., and Ormond Beach, Fla., are currently producing a wide variety of Slip Ring, Commutator, and Brush Block Assemblies, Precision Selector Switches, and Miniature Relays. Complete Engineering Facilities and Branch Sales Offices in Los Angeles, Minneapolis, Chicago, and Waltham, Mass. are geared to service your requirements.
Write for fully illustrated literature.

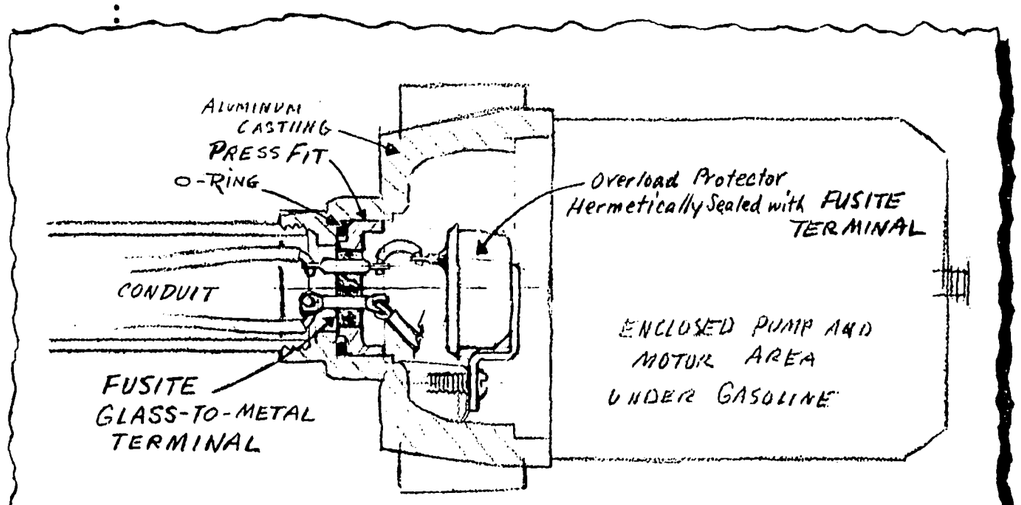
An Engineer "Doodled" and Solved an Explosive Problem with

FUSITE TERMINALS

The problem was literally explosive. It was a pump and motor to operate safely submerged in gasoline. The electrical connections had to be made through a vapor-proof seal. Two simple and inexpensive Fusite glass-to-metal terminals did the job like this "doodle" shows.



This can't be called a "typical" Fusite case history. In our long list of successful new applications, we have helped engineer, there are none we could call "typical".

So just keep Fusite Terminals in your "noodle" the next time you "doodle" and pass your problems on to us.

We make hundreds of stock terminals of both multiple bead and solid glass types. We're prepared to design and make special terminals to your needs.

Write today for catalog — Dep't. B-i

INSULATE ELECTRICALLY · GLASS TO METAL · FUSITE TERMINALS · PROFIT PRODUCT PERFORMANCE · SEAL HERMETICALLY

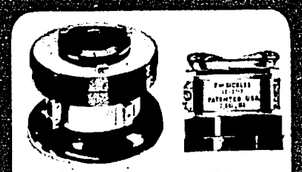
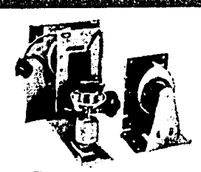
Quality ELECTRONIC COMPONENTS
for industrial and military application

GENERAL INSTRUMENT CORPORATION

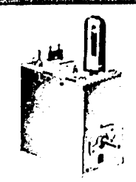


Color and Monochrome Yokes

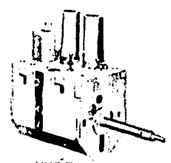


Flyback Transformers

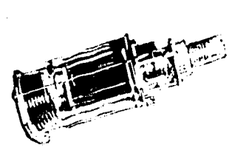
Toroids & Magnetic Amplifier Assemblies



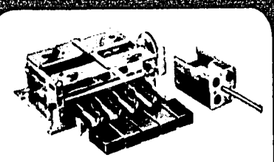
UHF Tuners



VHF Tuners

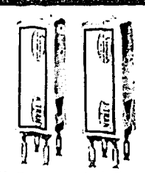


Electro-mechanical Assemblies

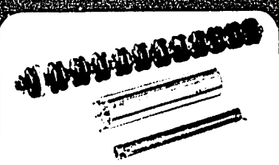


Auto Radio Tuners

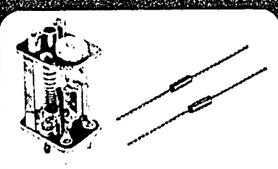
Military Type Variable Capacitors



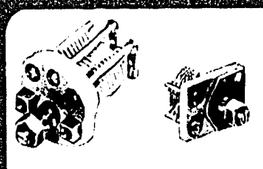
K. Trans and J. Trans



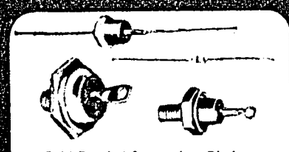
Delay Lines



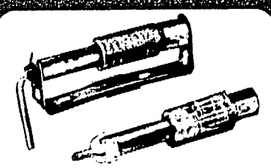
R.F. and I.F. Specialized Coils



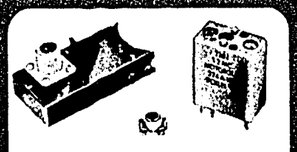
Air Trimmers



Gold Bonded Germanium Diodes & Silicon Rectifiers



Width and Linearity Coils



Specialty Items

Specialists in large volume production electro-mechanical assemblies from the smallest subminiature components to large sub-assemblies for radar and communications equipment — world's largest manufacturer of inductance coils.

Our engineers can help design quality electro-mechanical assemblies such as complete R.F. tuning, sub-miniature and sealed R.F. choke coils; and special variations of all products shown.

Write today to General Instrument Corporation, 829 Newark Avenue, Elizabeth, N. J., for Bulletin No. 20. Please mention your specific requirements.

• Ceramics illustrated approximately actual size.

ALSiMAG®
PRECISION CERAMICS

produced to precision tolerances

New equipment and techniques are constantly added to improve precision. Few people—few engineers—are aware of the close tolerances which are now possible. There are 3 main reasons for this progress:

COMPOSITIONS. Widest range in the industry. Some AlSiMag materials are hard as sapphire — more wear resistant than tool steel — and are non-magnetic and chemically inert. New Alumina "super ceramics" perform unbelievable feats of strength, thermal and mechanical shock resistance plus excellent electrical characteristics at ultra high frequencies and temperatures. Improved characteristics promote ruggedization, permit miniaturization.

CONTROLS. In preparation of raw materials, designing and building dies, calculating shrinkages . . . at every manufacturing step — forming, firing, inspecting. Over 55 years of experience — where precision in ceramics was pioneered!

FINISHING. Equipment plus skill. Every machine for precision finalizing. Thoroughly trained personnel who consider difficult specifications a personal challenge.

Tell us about your component problems. AlSiMag Precision Ceramics may do a better job for you. Send us a blueprint or sketch with an outline of the operating procedure for complete details.

Do you know.....

that ceramics can be supplied, in quantity: To tolerances generally associated with precision metal work.

A. Pistons and cylinders with maximum clearance of as little as .0015".

B. With faces parallel within .0005".

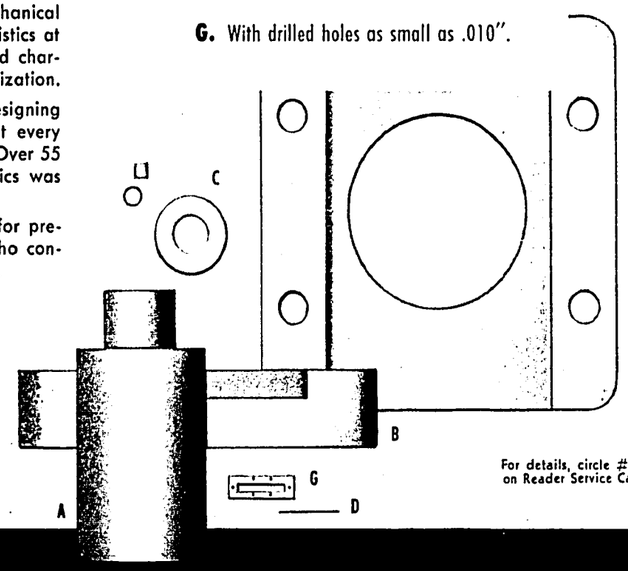
C. In flatnesses within light bands.

D. In thicknesses from .007" up.

E. In tubular form as small as .015" OD, .008" ID.

F. Threaded screws as small as 2-56 thread.

G. With drilled holes as small as .010".



For details, circle #165 on Reader Service Card.

A Subsidiary of Minnesota Mining and Manufacturing Company

AMERICAN LAVA CORPORATION

CHATTANOOGA 5, TENN.
55TH YEAR OF CERAMIC LEADERSHIP

For service, contact Minnesota Mining & Manufacturing Co. Offices in these cities (see your local telephone directory): Atlanta, Ga. • Boston: Newton Center, Mass • Buffalo, N. BOURNS

TRIMPOT®

and related sub-miniature potentiometers -thousands of variations available from stock

SELECT from the many combinations shown below. Any choice is available in a wide selection of standard resistance values . . . for military or commercial applications.

these **TERMINALS:**

in these **TYPES:**

(select one or any combination)

HIGH OR MEDIUM TEMPERATURE | HUMIDITY PROOF | HIGH RESISTANCE | DUAL OUTPUT | VARIABLE RESISTOR

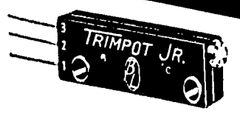
with these **RESISTANCE ELEMENTS:**

WIREWOUND | CARBON

ALL UNITS FEATURE sub-miniature size . . . space-saving configuration . . . self-locking shaft with 25-turn screwdriver adjustment . . . excellent acceleration, vibration and shock characteristics . . . mounting individually or in stacked assemblies, with standard 2-56 screws.

Over 50,000 units in stock. Send for complete catalog on the TRIMPOT and related potentiometers.

PLUS THE NEW TRIMPOT JR.



Micro-miniature size 3/8"x3/16"x1"
2.0-watt power rating. Humidity proof.
175°C. max. operating temperature.

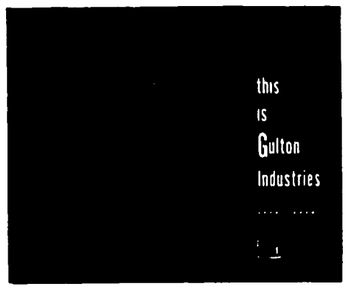
ELECTRONICS TO ULTRASONICS— COMPONENTS TO SYSTEMS

Specify GULTON

Highly specialized, integrated divisions and subsidiaries comprise the research and manufacturing facilities of Gulton Industries. Each specializes in producing its own line of precision equipment and quality materials for industry. Yet all have one common denominator — every project is a "Gulton Project" . . . and every product a "Gulton Product" . . . controlled from research to production by a philosophy of sound design, precision manufacture and demanding inspection — your assurance that all Glennite ® products by Gulton provide complete reliability of operation and customer satisfaction. Through its continuous program of intensive, imaginative research, Gulton Research and Development constantly yields new products and improvements of existing products.

Original equipment manufacturers and processors who are striving to improve their products and their profit picture are invited to present their problems to the Gulton engineering staffs for solution.



IF YOU WOULD LIKE MORE SPECIFIC INFORMATION ABOUT GULTON INDUSTRIES' ABILITIES WRITE FOR ILLUSTRATED BROCHURE "THIS IS GULTON INDUSTRIES"

ELECTRONIC SPECIALTY CO.

The Electronic Specialty Company's recognized dominant position in the field of miniaturized Components has been of incalculable value to the systems division in developing the concept and coordinating and matching the components to the complete system. The Electronic Specialty Company Systems Division is accustomed to taking your problems on a "Need to Know" basis and adding the ingredients of experience, know-how, maximum state of the art components development from within, and their accumulated in-depth knowledge to furnish an advanced systems concept.

the reading of which will enrich you

Our eminent detective has discovered that Hudson is furnishing wire to manufacturers of radio, television and electronic equipment, to aircraft and missile manufacturers and to the one thousand and one requirements of the electrical equipment manufacturing industry. And he has also discovered that these thousands of customers are well pleased with Hudson Wire *because:*

Customers' orders are filled to *exact* specifications.

Newest production methods provide *low costs.*

***Quality* control is maintained.**

Delivery schedules *are* fulfilled.

Special packaging helps to reduce *your* production costs.

Aid on problems is furnished in Hudson's research & development departments.

BARE WIRES — aluminum, copper, brass, bronze, phosphor-bronze, nickel-silvers, zinc, lead, tin, cadmium, oxygen-free copper, silver, fuse, stainless steel and brush wires.

SPECIALTY WIRES — silver plated & electro-tinned copper & copper alloys, single end, stranded & bunched. Flat-wire ribbons.

INSULATED WIRES — Thermoplastic and Teflon (Dupont).

MAGNET WIRE — copper, aluminum and copper-clad steel. Coverings of plain & heavy enamel, Formvar, Silicone, EZsol (liquid nylon) & New EZsol (polyurethane).

TEXTILE COVERED WIRES — nylon, orlon, celanese, silk, cotton, rayon & Fiberglass.

Litz Wire — Voice coil wire — Bifilar & Trifilar Formvar.

HUDSON WIRE COMPANY

Ossining, New York
Bare, Specialty & Thermoplastic Wire Plant

Winsted, Conn. & Cassopolis, Mich.

Numbers after address show the product and service classes in which firm appears. These classifications follow the Alphabetical Directory. For complete instructions on use of this Directory, see pink sheets preceding buying section.

HITEMP WIRES (−90°C. to +250°C.)

TEFLON® MAGNET WIRE — "TEMPRITE" Sizes 14 to 50 AWG, single, heavy, triple, or quadruple thicknesses.

SPECIAL TEFLON MAGNET WIRE — "TEMPRITE X" Same characteristics and sizes as regular Temprite, but specially processed for severe application.

FLEXIBLE TEFLON TUBING — "TEMPRENE NON-RIGID" Sizes 10 to 26, solid colors and special striped combinations.

TEFLON EXTRUDED TUBING — "TEMPREX TUBING" Sizes 4 to 24. Fourteen solid colors.

TEFLON HOOK-UP WIRE — "TEMPRENE" Sizes 14 to 30 AWG. Two and three color striped combinations, plus 10 solid colors. Conforms to MIL-W-16878B (E and EE).

TEFLON EXTRUDED HOOK-UP WIRE—"TEMPREX" Sizes 10 to 32 AWG, in both striped and solid colors. Conforms to MIL-W-16878B (E and EE).

TEFLON INSULATED LEAD WIRE — "TEMPCLAD" Teflon insulated lead wire with an outer covering of Teflon impregnated glass fiber braid. Sizes 8 to 30 AWG.

TEFLON FIBER LACING TAPE "NEBROC® TF" All Teflon lacing tape, exhibits excellent thermal and mechanical properties. An ideal tape for Class H assemblies.

TEFLON GLASS FIBRE SLEEVING — "TEMPTUBE" Available in sizes up to 1¼" I.D. Colors on request.

SILICONE MAGNET WIRE—"THERMALON" Sizes 14 to 42 AWG Incl. Used for temperatures from −54°C. to +150°C. Made in single or heavy thicknesses.

SHIELDED AND JACKETED MINIATURE CABLES Consist of Temprene or Temprex conductors, shielded and jacketed for high temperature operation.

MINIATURE COAXIAL CABLES Consist of 50, 75 and 95 ohm cables, shielded and jacketed for applications up to +250°C.

RIBBON CABLE ASSEMBLIES — "TEMPBRAID" 100% Teflon, flexible, flat ribbon multi-conductor cables.

SHIELDED RIBBON CABLES — "METALBRAID" Flexible, shielded, flat, multi-conductor cables, i.e. tinned or silver plated copper.

TEFLON MARKING FLUID Teflon printing ink available in ten standard colors. Can be used for printing codes, etc., on Teflon.

SURFACE TREATED TEFLON WIRES Adherance of varnishes and compounds on Teflon and magnet hook-up wires now practical.

REINFORCED STANDARD CONDUCTORS — "HIGH STRENGTH" Mechanically improved Teflon insulated hook up wires meet all requirements of MIL-W-16878. Sizes 24-32 AWG.

***DuPont's Trade Name for POLYTETRAFLUOROETHYLENE**

All Teflon products are rated for continuous operation from −90°C to +250°C., have excellent dielectric strength, and are impervious to all commercial solvents. All colors conform to MIL. Std. 104.

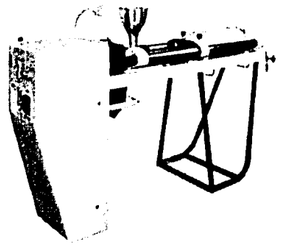
The Best Way

to manufacture small plastic parts



For convenience, flexibility, economy—the best way to manufacture small electronic parts is to *do it yourself* on the new Hull-Standard

MODEL 99-A

FULLY AUTOMATIC TRANSFER MOLDING PRESS for thermosetting plastics

Makes possible closer tolerances and greater strength in thin sections—facilitating miniaturization. Minimizes flash and finishing costs—particularly on parts with through holes.

Write today for free copy of technical paper, "A New Concept in Small Parts Molding."

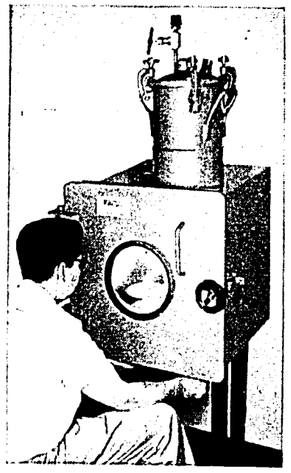
Hull-Standard makes transfer and compression molding presses, automatic and semi-automatic, 15 to 300 tons. Literature available on request.

HULL-STANDARD CORPORATION

Hatboro, Pennsylvania • Phone: OSborne 5-5000

Export Division: 1505 Race St., Phila. 2, Pa., U.S.A.

FOR VACUUM POTTING



To help you secure maximum advantage of the superior physical and electrical properties of the new resins for potting or encapsulating—Hull offers its new 5A Series Vacuum Potting Equipment.

The various components are mixed and degassed under vacuum in the mixing tank. No pipe lines are required for transferring the resin to the mold or pot.

The use of inexpensive, disposable mixing containers further increases efficiency. The cleaning problem is eliminated.

Pinpoint accuracy in filling the pots or molds is achieved by the use of a multi-station planetary turntable operated from outside the chamber through high vacuum seals.

From start to finish all operations are carried out under vacuum, giving a dense, homogeneous, non-porous casting, completely free of voids.

Hull Series 5A Potting Units are supplied heated or unheated, specifically engineered to your process requirements.

Write for full details.

HULL *Corporation*

Phone: OSborne 5-5000 HATBORO, PENNA.

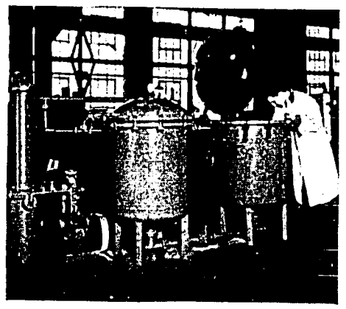
Export Division: 1505 Race St., Phila. 2, Pa., U.S.A.

Are you getting *all* the advantages of VACUUM IMPREGNATING?

You get full benefits only with the right equipment *and* the proper procedures.

From Hull Corporation you get both—including a complete package of technical assistance from idea to actual production in your own plant.

Write Hull Corporation *first* —on any vacuum impregnating problem.



Hull also offers complete service and equipment on Vacuum Drying, Vacuum Metallizing and other industrial vacuum applications. Write for brochure.

ILLINOIS CAPACITORS

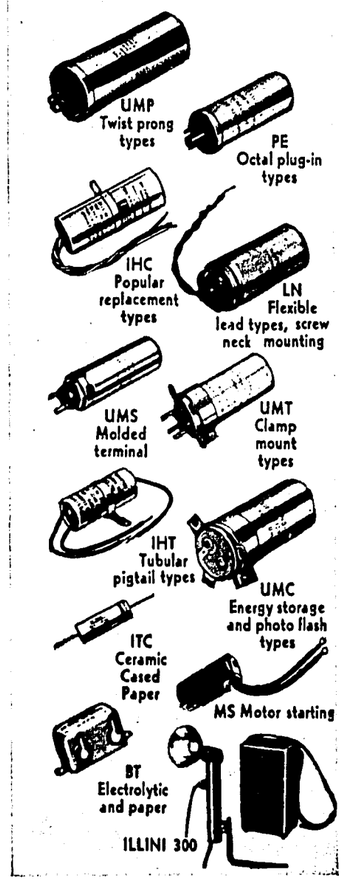
KNOWN THE WORLD OVER FOR

Time Tested Quality

For over 20 years ILLINOIS CONDENSER COMPANY has been foremost in the development of ever greater dependability and longer life in all types of capacitors. Listed below are only a few of the more popular — and most recently developed ILLINOIS types.

NEW! TYPE SMT SUB-MINIATURE ELECTROLYTICS

Newly developed sub-miniature electrolytics with hermetic seals. Especially designed for printed circuits, portable equipment, transistor equipment and any application where size and weight must be kept at an absolute minimum. Capacity ranges from .5 to 100 MFD and from 3 to 50 WVDC.



TYPE UMP Standardized twist-prong type. Patented molded terminal construction for efficient, stable operation under extreme temperature ranges. Capacity ranges from 10 to 3,000 MFD and from 6 to 525 WVDC.

TYPE PE Hermetically sealed plug-in octal base type. Especially useful in fixed or mobile communications equipment. Operating temperature range −40°C to +85°C. Available in wide ranges of capacities and voltages.

TYPE IHC Popular multiple section types with flexible leads, insulating sleeves and mounting straps. Equally adaptable for original equipment or replacement purposes. Available in capacities from 10 to 250 MFD at 25 to 500 WVDC.

TYPE LN Extruded aluminum can type with screw neck mounting and flexible leads. Capacity ranges from 8 to 80 MFD and from 450 to 600 WVDC.

TYPE UMS Hermetically sealed inverted can type with screw neck mounting and molded-in terminals. Wide ranges of capacities and voltage ratings. Meets all government specs.

TYPE UMT Inverted can type with clamp mounting. Hermetically sealed, shock resistant with new molded terminal construction. Ideal for use in highest quality equipment. Meets all government specs. Wide capacity and voltage ranges.

TYPE IHT Popular tubular aluminum can, pigtail type electrolytic. Internal riveted construction. In capacity ranges of 1 to 2000 MFD and from 6 to 600 WVDC. Also available with solder lug terminals. Supplied with insulating sleeves.

TYPE UMC Low leakage-high capacity electrolytic for power filter packs, voltage stabilization, energy storage and photo flash. Capacity ranges up to 10,000 MFD to 50 V. and 1000 MFD at 450 V.

TYPES IMT and SMT Newly developed "miniature" and sub-miniature electrolytics with hermetic seals. Especially designed for printed circuits, portable equipment, transistor equipment and any application where size and weight must be kept at an absolute minimum. Capacity ranges from .5 to 100 MFD and from 3 to 50 WVDC. Ceramic case and aluminum case types.

TYPE MS Motor starting capacitors available in bakelite and aluminum cases. Long wire leads with terminals. Capacities to 5,000 MFD at 115, 220 and 320 VAC.

TYPE BT Hermetically sealed bathtub type especially designed to withstand vibration and shock. Available in electrolytic and paper capacitor types for government and commercial use.

ILLINI 300 ELECTRONIC FLASH KIT A new high intensity, low voltage electronic photoflash kit featuring latest advances in tube, capacitor and reflector design. 100 watt second output. Uses standard type batteries. Easily assembled, rugged, reliable and economical to operate. AC Power Pack also available.

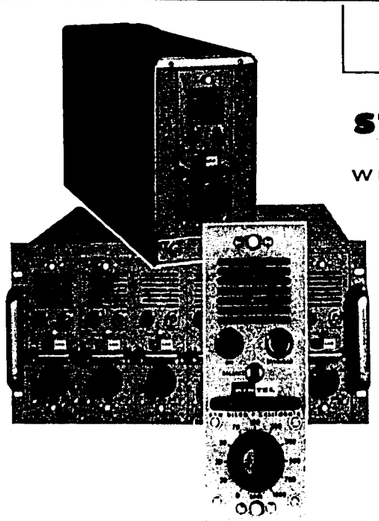
KINTEL



STABILITY *locked in!*

WITH CHOPPER AMPLIFIERS

- ± 2 Microvolt Drift
- Extremely Low Noise
- High Input Impedance
- Low Output Impedance
- ± 35 Volt, ± 40ma Output
- 10 Accurate Gain Ranges
- 6 Unit Rack-Mounting
- Integral Power Supply

AMPLIFY MICROVOLTS WITH STABILITY

KIN TEL Model 111A amplifiers provide the lowest drift of any commercially available wideband DC amplifiers. They utilize KIN TEL's proven chopper amplifier circuitry to provide unsurpassed dynamic performance — unaffected by load or gain changes.

OPERATIONAL AMPLIFIER

The Model 111AO is an operational version of the Model 111A amplifier. In this unit, the "0" gain position is an open loop position, and the user may employ his own external networks to provide up to 100% resistive or capacitive feedback around the amplifier. By choosing the proper attenuator, input, and feedback components the user may obtain whatever amplifier characteristics are desired, such as limiting the gain or bandwidth, performing integrations, and generating complex linear transfer functions.

FLOATING INPUT AMPLIFIER

The Model 111AF is a floating input version of the Model 111A which permits its use with transducers, particularly thermocouples, which are grounded at the pickup location. The Model 111AF differs from the Model 111A only in that it eliminates the problem of ground loops resulting from grounding at both the amplifier and the pickup location.

APPLICATIONS

These amplifiers make dynamic, high-accuracy, low-level DC instrumentation systems practical. In comparison to AC systems, DC strain gage systems offer greater accuracy, wider bandwidth, operational simplicity, reduced maintenance, and eliminate capacitive balance problems. In one installation alone, KIN TEL DC amplifiers have logged over a million hours of accurate, trouble-free operation. The Model 111 series is ideally suited to telemetering, data reduction and all types of instrumentation facilities utilizing transducer measuring systems. They are excellent as scope preamplifiers, recorder and galvanometer driver amplifiers, or general purpose laboratory amplifiers.

SPECIFICATIONS

Gain (Phase Inverting)	0, 20, 30, 50, 70, 100, 200, 300, 500, 700, 1000
Gain Accuracy	±1%, DC to 2 KC; ±3%, DC to 10 KC; ±30%, DC to 40 KC
Input Impedance	100,000 ohms
Output Impedance	Less than 1 ohm in series with 25uh
Equivalent Input Drift	±2uv when used with regulated line voltage, ±10% change in AC input causes less than ±5uv change. 10 minute warm-up period required.
Equivalent Input Noise	0 to 3 cps, less than 5uv peak to peak. 0 to 750 cps, less than 5uv RMS. 0 to 50 kc, less than 12uv RMS.
Chopper Intermodulation	Less than 0.1%
Maximum Output Cable Capacity	0.02uf (external)
Linearity	Better than 0.1% to 2KC
DC Output Capability	0 to 35v where RL > 1000 ohms 0 to 40 ma where RL is 10 to 400 ohms
Frequency Response	0.3 db (±3%) DC to 10KC, less than 3 db down at 40KC
Rise Time	Less than 10 u sec.
Phase Shift	Less than 5° to 2KC
Overload Recovery Time	Less than 3 seconds
Dimensions:	
Amplifier Unit	2⅞" wide, 7⅝" high, 14⅝" deep
Unit in Cabinet	5 7/16" wide, 10" high, 18¼" deep
Rack Adapter Module for 6 Units	19" wide, 8¾" high, 18¼" deep (Width of cabinet behind 19" front panel is 17⅜")
Net Weight (Amplifier)	11 pounds
Price:	
111A Amplifier	$550.00*
111AO Amplifier	$560.00*
111AF Amplifier	$575.00*
111CF Cabinet for single 111A, AO, or AF Amplifier, with fan and connector	$105.00
111RF Rack Adaptor Module for six 111A, AO, or AF Amplifiers, with fans and connectors	$200.00

* Amplifier must be used with cabinet or rack adapter module.

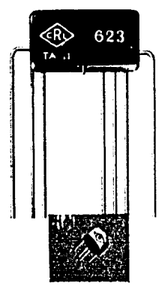
Centralab...

your NUMBER ONE source for standard and special electronic components

...the name you can depend on for quality products that give you trouble-free performance

TRANSISTOR-AMPLIFIERS (Transpecs*)



Single-stage transistor-amplifier

Complete high-gain, low-power audio-amplifiers for pocket-size radios and recorders, hearing aids, microphones, test equipment, computers, and other equipment.

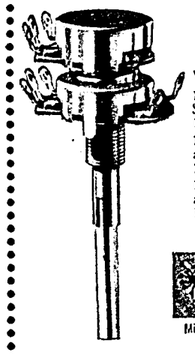
Centralab's new, revolutionary 4-stage TA-11 transistor-amplifier is the smallest unit of its kind. It includes 4 special transistors, 5 capacitors, 12 resistors, plus wiring.

Up to 75 db. gain at 1 kc. Input impedance 1000 ohms nominal. Operates from 1.3 v mercury cell or flashlight battery. Frequency characteristics, 250 to 20,000 c.p.s. ± 5 db., adjustable to special requirements. Capacity up to 1 mf.

Also choice of TA-6 and TA-7 single-stage Transpecs* to meet other sub-miniature design requirements.

*Trademark.

Write for Bulletin 42-235.



VARIABLE RESISTORS

1/2-w. standard — For radio, TV. Single, twin, or dual-concentric. 15/16" diam. 250 ohms to 10 megs.

1/10-w. sub-miniature — For hearing aids, communications, computers. 5/8" diam. 500 ohms to 10 megs.

1/4-w. sub-miniature—For instruments and military. 43/64" diam. 10,000 ohms to 1 meg. — linear taper.

Write for Group A bulletins.

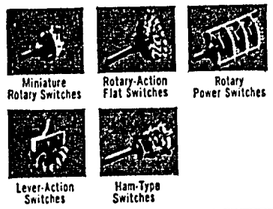
ELECTRONIC SWITCHES

Rotary — 15/16" to 1-5/8" diam. Phenolic or Steatite insulation. Single or multiple sections.

Medium-duty power — For transmitter, industrial control, laboratory testing, military, commercial. 2-13/16" diam. 7-1/2 amp. rating at 110 v. 25,000 cycles minimum.

Specialized — Lever, slide, tone, tuner sections, others.

Write for Group B bulletins.



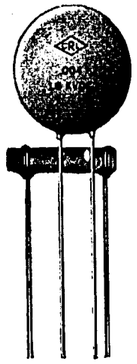
CERAMIC CAPACITORS

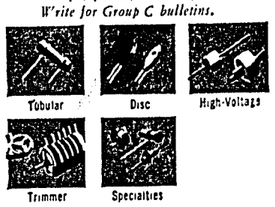
TC-BC — Discs, tubulars. 150 v to 6,000 v.d.c.w. 1 mmf. — 0.1 mf. TC available + 100 to — 5250. High voltage — high accuracy — High-voltage types, up to 30,000 v.d.c.w. High-accuracy types, ± 1% tolerance, 500 v.d.c.w., up to 2,500 mmf.

Trimmer — Tubular or flat. Meet JAN-C-81 specifications. 1 mmf. to 400 mmf., 500 v.d.c.w.

Specialties — Feed-thru, stand-off, button-shape, potted, other capacitors.

Write for Group C bulletins.

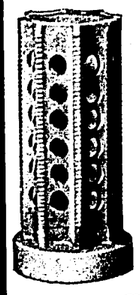


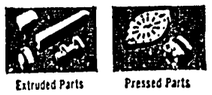


ENGINEERED CERAMICS

Grade L-5A Steatite . . . High Alumina, 85% and 95% bodies . . . Grade L-2A Cordierite . . . Grade L-2 Electrical Porcelain . . . Grade L-4A Zircon Porcelain. High dielectric and compressive strength, high heat resistance. Impervious to common acids. Can be metallized to close tolerances. Used increasingly to replace metals, plastics, low-grade porcelains.

Write for Group E bulletins.





PACKAGED ELECTRONIC CIRCUITS

Complete radio-TV circuits, amplifiers, oscillators, detector networks, resistor networks—including capacitors, resistors, wiring, and inductance manufactured to your specific performance limits. 1/2-w. resistors meet applicable MIL-R-11 specifications. 50 ohms to 50 megs. Capacitors up to .01 mmf.

Write for Group D bulletins.

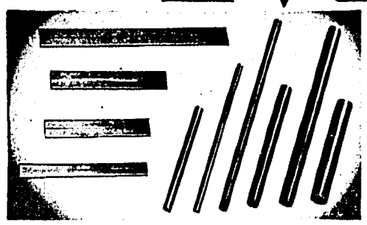
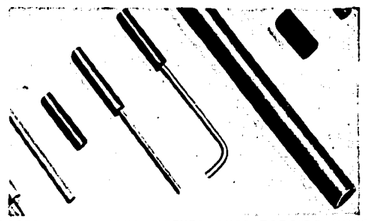
Precision Moldite Cores

ENGINEERED and DESIGNED with your Equipment in Mind



ANTENNA RODS



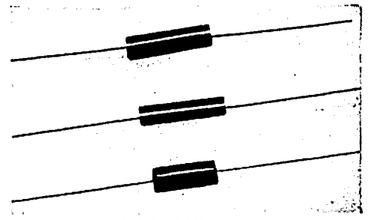
CORES, LOOP STICKS, SLEEVES, CUPS, TOROIDS, RODS

Moldite FERRITES

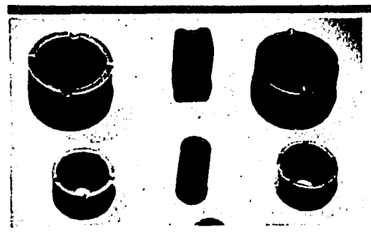
offer these advantages:

- lower losses (eddy current)
- higher efficiency
- lower operating temperatures
- lighter weight
- smaller sizes for more compact construction
- higher permeability
- less corona effect
- lower cost

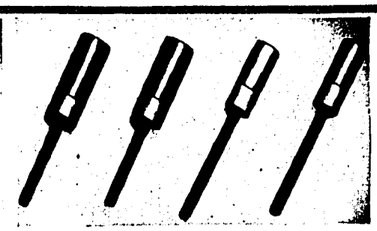
THREADED CORES



FERRITE COIL FORMS



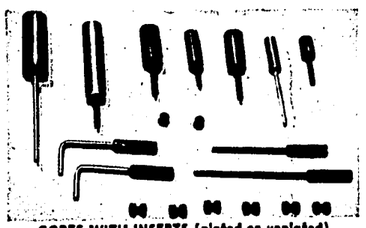
IRON SLEEVE & CUP CORES



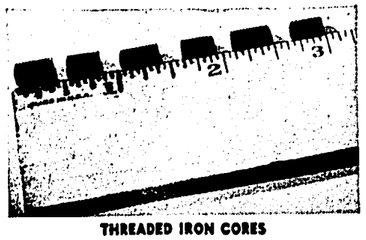
INSULATED IRON CORES

Moldite IRON CORES

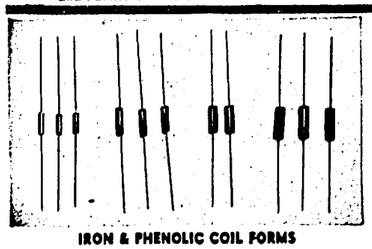
Moldite Iron Cores are made in an infinite variety of powders, shapes, and sizes and include all types of standard cores as well as numerous specially designed cores for new developments, commercial and military applications.



CORES WITH INSERTS (plated or unplated) and PLAIN CORES (Solid or with I.D.)



THREADED IRON CORES



IRON & PHENOLIC COIL FORMS (also in ferrite)

Moldite COIL FORMS

Moldite Coil Forms provide simpler coil assemblies—smaller coils, point-to-point wiring, minimum of solder connections and are inexpensive.

WAverly 6-2123

CLEVELITE*

The "quality" name for PHENOLIC TUBING!

Clevelite ensures better product performance when high dielectric strength, low moisture absorption, physical strength, low loss and good machinability are essential.

Made in SEVEN, TIME-TESTED Grades . . .

A GRADE FOR EVERY NEED!

GRADE	APPLICATION
Grade E	Improved post-cure fabrication and stapling
Grade EX	Special punching grade
Grade EE	Improved general purpose
Grade EEX	Superior electrical and moisture absorption properties
Grade EEE	Critical electrical and high voltage application
Grade XAX	Special grade for government phenolic specifications
Grade SLF	Special for very thin wall tubing having less than .010 wall

Available in diameters, wall thicknesses and lengths as required.

Send for our latest CLEVELITE brochure.

Why pay more? For quality products . . . call CLEVELAND!

* Reg. U. S. Pat. Off.

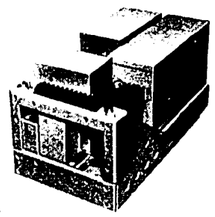
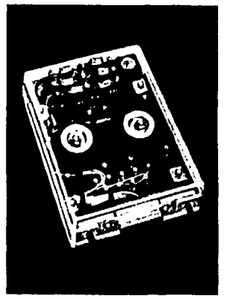
POWER SERVO AMPLIFIERS
Servos available for practically all standard 60 and 400 cps motors, from 1 watt up to 2000 watts. Completely self-contained. Can be supplied with means for stabilizing servo system performance for various parameters such as load inertias, gear ratios, etc.



PRECISION AIRBORNE POWER SUPPLIES
Originally developed by MA Inc. for the reference circuit of intercontinental guided missiles. Unique design employs magnetic amplifiers in combination with high reliability vacuum tubes, silicon diodes and a special constant temperature oven.



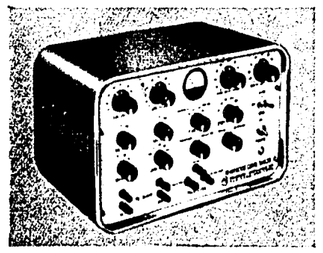
HYDRAULIC VALVE AMPLIFIER
Miniaturized, high performance magnetic amplifier for critical applications. High gain, fast response achieved in single stage by operating at a supply frequency of 5000 cps or 3600 cps. Designed for controlling hydraulic servo valves and other low power output devices.

MA

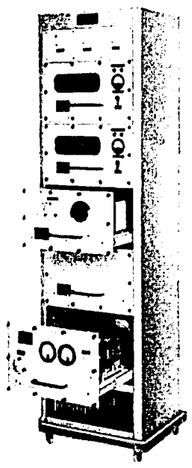
Application-tested MA Inc. Standard Products and Custom-engineered Equipment

including magnetic servo amplifiers, variable speed drives, miniature amplifiers, analog computers for special applications, photo-electric controls, regulated power supplies and automatic control equipment. Call or write for bulletins or recommendations on your control or systems engineering problems.

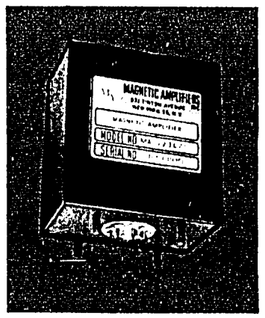
MINIATURE SERVO AMPLIFIER (TRANSI-MAG®)
Compact design for missile and aircraft servo applications. Features high gain, fast response, drift-free characteristics. Completely self contained, requires no power supply, demodulation or pre-amplifier. Complete high performance servo loop obtained without additional amplification.



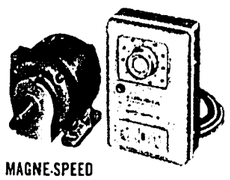
EMA SPECIAL ANALOG COMPUTER
For missile acquisition systems. Computes elevation and azimuth, amplifies data and positions theodolite via servo system to track missile continuously; computes rate of change of position and interpolates future position of missile to position theodolite. Includes rotating and magnetic amplifier regulated power supply.



TRANSISTOR AND POWER-TRANSISTOR CURVE TRACER
Displays collector and transfer curves on cathode ray oscilloscope. Handles all types of transistors and power transistors. Curve tracer permits rapid determination of parameters. For selecting, matching and detecting anomalies and rejects.



STATIC FREQUENCY MULTIPLIERS
For the conversion of A.C. power at the commonly available frequencies to high frequency multipliers. Frequency conversion is accomplished by magnetic circuits without the use of vacuum tubes. Single or multi-stage units for operation from single phase or polyphase supply lines can be designed to fit specific applications..



MAGNE-SPEED VARIABLE SPEED DRIVES
Designed to provide high efficiency operation at low cost. Combine smooth stepless speed control with 50:1 speed range. Non-electronic, they require no warm-up or costly maintenance. Excellent regulation without tachometer; quick response to load changes.

STANDARD SIZES	
JUNIOR	1/8 to 1/100 Hp.
SIZE I	1/4, 1/3 and 1/2 Hp.
SIZE II	3/4, 1 and 1 1/2 Hp.

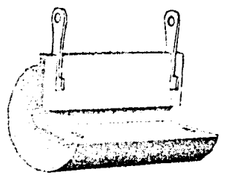
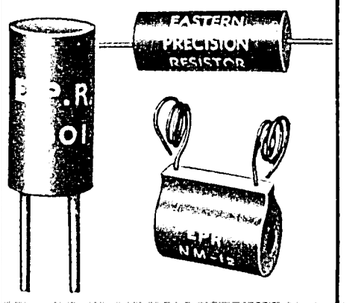
Our principal product—RELIABILITY

Eastern Precision Resistor Corp. is the only resistor manufacturer which compounds and produces its own plastics, extrudes its own rods and machine its own bobbins. The rigid quality control exercised over these operations as well as over resistor production, insures the reliability, stability and tolerance of all EPR products.



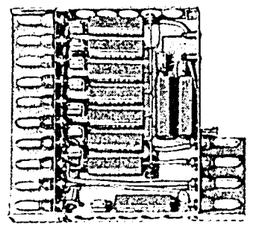
N-CAPS

Designed to surpass the requirements of MIL-R-93A and MIL-R-9444 specifications, EPR "N-Caps" encapsulated lug resistors feature optimum reliability over a wide range of adverse environmental conditions. Available in all standard military sizes, plus hundreds of commercial, subminiature and special sizes and shapes.



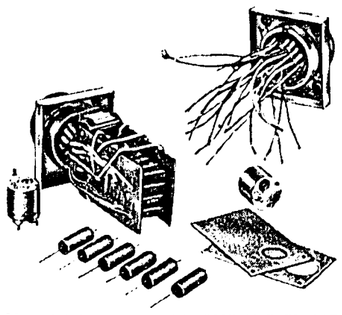
ENCAPSULATED SUBMINIATURE PRECISION WIRE-WOUND RESISTORS

Series NM (radial lead) and Series NS (axial lead) resistors are wound on plastic bobbins and encapsulated to meet the requirements of MIL-R-93A specifications, characteristic "A". Available in both military and industrial subminiature sizes and ratings.



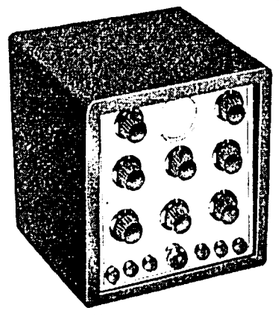
AC RESISTANCE NETWORKS

Excellent matched characteristics over wide temperature and frequency ranges, combined with very low distributed capacitance are the outstanding features of the Type SS5 Matched Precision Resistors shown above. The distributed capacitance of these wire wound units is held to values as low as 0.5mmfd to 1mmfd on a 1-megohm resistor. Individual resistors are accurate within ±0.05%, and are available in resistance values from 25 ohms to 2 megohms in ¼w to 1w ratings. A typical 1-megohm unit is 1" x ⅜" diam.



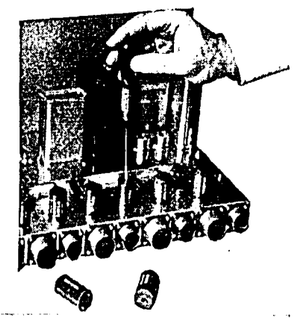
COMPLETE PACKAGING

All Series of EPR resistors can be supplied in modular AC and/or DC matched networks; encapsulated, varnished or wax-impregnated to meet your requirements for termination and mounting.



MINI-SCOPES

These compact, miniaturized oscilloscopes are ideal for general servicing applications at low RF. Automatically-focussed, flat-face 1-inch CRT provides full-scope usable trace with minimum pattern distortion. Frequency Response: DC-150 KC, ±3 db, usable to 200 KC; Sensitivity: 0.5 volts/in. horizontal, 0.5v—1mv/in. vertical; Sweep Frequency: 0.5 cps.-50KC.



COMP-U-TRIM (MODEL 113)

The first, truly-adjustable precision wire-wound resistor. Combines all the desirable features of a bobbin-wound encapsulated resistor and a trimming potentiometer. Values from 100 ohms to 1.0 megohms are available with matched tolerances of better than ±0.005%. Particularly suited to computer circuitry, voltage dividers and networks, and other applications where extreme resistance matches must be obtained.

Write TODAY for your "Handbook of Precision Wire Wound Resistors", FREE.

Numbers after address show the product and service classes in which firm appears. These classified listings follow the Alphabetical Directory. For complete instructions on use of this Directory, see pink sheets preceding catalog section.

FIRST IN SERVICE

CNI
ELECTRONICS PACKAGE
NOW IN FULL PRODUCTION

The AN/ASQ-17 CNI package, developed and built by Packard Bell Electronics, marks the first successful integration of communications, navigation and identification in one compact unit. It has been accepted for service use by the U.S. Navy in the Douglas A4D "Skyhawk" and the Chance-Vought F8U "Crusader." It has been in quantity production for several months. Hundreds are now in operation.

ENGINEERING BEYOND THE EXPECTED

Mutual interference between IFF and UHF is normally inevitable, even when the units are encased separately and spaced several feet apart. In the AN/ASQ-17 these two units are packaged together, *a fraction of an inch* apart. Yet in official trials *mutual interference was not noticeable or measurable.* This achievement "beyond the expected" resulted from coordinated efforts of Douglas, Chance-Vought and Packard Bell Electronics engineers.

E-I

COMPRESSION TERMINATIONS

Hermetically Sealed miniature, sub-miniature or standard E-I terminals are specified for performance *plus* in military and commercial service. These dependable compression seals perform successfully under the most gruelling conditions . . . offer maximum immunity to shock, vibration and wide variations of temperature and pressures. Check your sealed terminal requirements with E-I—recommendations will be made on your specific applications without obligation.

Important News!... **FROM TRANSISTOR CENTER, U.S.A.**

PHILCO *Transistors*

MINIATURE LOW LEVEL AUDIO TRANSISTORS (25 mw)

2N207	general purpose micro-miniature low level transistor, typical beta of 100, 15 db maximum noise figure
2N207A	10 db maximum noise figure version of 2N207
2N207B	5 db maximum noise figure version of 2N207
T0031	50 volt version of 2N207
	Special versions of the 2N207 to selected beta ranges are available.

HIGH FREQUENCY, HIGH GAIN (MICRO ALLOY) TRANSISTOR

T1166	combines high frequency response with high gain for general purpose high frequency applications and switching circuits, typical f_{max} 60 mc

HIGH FREQUENCY SILICON TRANSISTORS (150 mw)

T1025	general purpose, 10 mc silicon transistor
T1159	high speed silicon switch for speeds up to 5 mc characterized by extremely low switch resistance

HIGH FREQUENCY SURFACE BARRIER TRANSISTORS

SB100	general purpose, minimum f_{max} = 30 mc, beta over 10.5
2N344/ SB101	general purpose, good beta control (11-33)
2N345/ SB102	general purpose, higher beta (25-110)
2N346/ SB103	general purpose, higher minimum f_{max} (60 mc)
2N128	general purpose, with military specifications, beta 19-66, minimum f_{max} 45 mc
2N129	general purpose, with military specifications, beta over 11.5
2N240	switching transistor, $f_{\alpha b} > 30$ mc
2N299	for tuned amplifiers, military specifications, 20 db minimum power gain at 10 mc, minimum f_{max} 90 mc
2N300	for video amplifiers, 50 mc minimum current gain bandwidth product, f_{max} over 85 mc
T1050	high frequency transistor for 50 mc oscillator mixers and 10-15 mc bandpass amplifiers, 22 db typical power gain at 10 mc
	Other types with special parameter controls are available.

MEDIUM POWER ALLOY JUNCTION AUDIO TRANSISTORS (100 mw)

2N223	39-120 beta driver transistor
T1000	45-85 beta version of 2N223
T1001	70-120 beta version of 2N223
2N224	high gain output transistor, 2N225 is a matched pair
2N226	medium gain version of 2N224, 2N227 is a matched pair
	Versions of the 2N224 with various beta ranges and higher betas are available singly or in matched pairs.

AUDIO POWER TRANSISTORS

T1040	40 volt, 7 watt power transistor, thermal drop 3°C/w maximum
T1041	40 volt, 10 watt power transistor, thermal drop 2.5°C/w maximum
T1167	60 volt, 12.5 watt power transistor
T1168	80 volt, 12.5 watt power transistor

Proven performance of Philco Hermetically Sealed Transistors has made them the basis for design in commercial and military applications where reliability is the major consideration. Philco transistors range from the world's smallest germanium transistors now in production to silicon transistors with excellent performance at temperatures from −60°C to +150°C.

Philco produces a wide range of transistors designed for special applications in accordance with customer requirements. The Philco Micro-Alloy Transistor is in production. Specifications and design quantities are available. New and exciting transistor types, such as the Philco Micro-Alloy Graded Base Transistor, are now in development. In keeping with our policy, specifications will be made available as soon as these units reach pilot production and are available in design quantities.

Make Philco your prime source for complete transistor application information... write to Lansdale Tube Company, Dept. 1-2, Lansdale, Penna.

Regional offices—Merchandise Mart Plaza, Chicago 54, Ill.—10589 Santa Monica Blvd., Los Angeles 25, Calif.

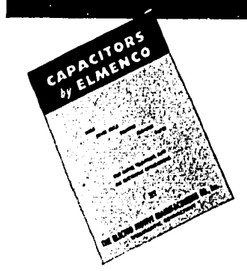
El-Menco Dur-Mica CAPACITORS

Rugged Endurance up to 18 years!

A series of the toughest trials prove El-Menco Dur-Mica DM15, DM20 and DM30 capacitors outlast all others under accelerated conditions of 1½ times rated voltage at ambient temperature of 125° centigrade. Can be used at higher operating temperatures with slight voltage derating. Longer life and greater stability made possible by specially treated phenolic casing.



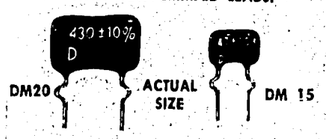
Write for FREE samples and catalog on your firm's letterhead.

El-Menco Dur-Mica DM15, DM20, DM30, DM40 and DM42 Capacitors Provide:

1. LONGER LIFE
2. POTENT POWER
3. SMALLER SIZE
4. EXCELLENT STABILITY — SILVERED MICA
5. PEAK PERFORMANCE

Take Your Own Word For It by making your own test of El-Menco Capacitors. Write for Free Samples and Catalog.

WITH NEW CRIMPED LEADS.



Improved parallel leads for greater rigidity and faster assembly. These parallel leads simplify use on miniature printed circuit boards in television, guided missiles, hearing aids, electronic brains, air conditioning and other government and civilian applications.

BASIC "150" assemblies housed in either vertical mobile cabinets or separate portable cases are available in 1-, 2-, 4-, 6- and 8-channel models. Each is equipped with driver amplifiers of current feedback design and regulated power supplies for *each* channel, and a recorder featuring *nine* extremely accurate paper speeds on 2- to 8-channel models, five on single channel units. Appropriate plug-in preamplifiers quickly and efficiently equip a basic assembly for recording virtually any 0-100 cps phenomena.

new 6- and 8-channel analog readout systems

In addition, complete Sanborn systems from 2- to 8-channels are available for recording analog computer outputs. These are equipped with dual-channel DC amplifiers, for single-ended or push-pull signals — input impedance 5 megohms each input lead to ground — drift less than 0.5 mm/hr. — frequency response down 2 db at 60 cycles for all amplitudes to 4 cm peak to peak. Newest of the computer readout recorders are the 6- and 8-channel console systems (8-channel illustrated — "A" at left). The Model 183 Programmer in a Model 184 case ("B" at left) is optional for use with the 6- and 8-channel consoles. The Programmer automatically turns on chart drive, feeds calibrated signals to all channels, reads computer DC levels, determines the length of record, and shuts off the paper drive.

SANBORN

oscillographic recording equipment

3 **UNIT INSTRUMENTS**

All Sanborn Preamplifiers and Recorders, as well as various other units, are available separately for specialized applications or use as "original equipment" in other apparatus. Instruments include the Model 150-300/700 Wide Band Driver Amplifier and Power Supply, for use with low power galvanometer elements, a 'scope and/or panel meter. When equipped with suitable "150" preamplifier, this amplifier provides a portable indicator for strain, force, pressure, temperature, AC watts, audio level, etc. Other units include the Model 150-1900 Master Oscillator Power Amplifier: Model 150-3100 Triplexer; Model 601 and 602 galvanometers; Model 150-2900 Dual-Channel DC Amplifier.

2 **PREAMPLIFIERS**

A choice of *twelve* "150 Series" plug-in preamplifiers is now available, to equip systems for any of numerous recording problems. Improved control of input signals results from attenuator ratios of 1, 2, 5, etc., and calibrated zero suppression on AC-DC, Carrier, and Low Level DC Coupling, Frequency Meter, and Chopper Stabilized DC models. Other "150" preamplifiers include: Servo Monitor, Log-Audio, AC Wattmeter, RMS Volt/Ammeter, 400 cycle Frequency Deviation, and Triplexer.

Added to these three aspects of Sanborn Oscillographic Recording Equipment are the basic advantages of inkless recording in true rectangular coordinates, to provide accurate, easily interpreted records; high torque galvanometer (10 ma develops 200,000 dyne cm.); one percent linearity resulting from current feedback driver amplifiers and high torque galvanometers (maximum error is ¼ mm in middle 4 cm of chart, ½ mm across entire chart); controls for timing, manual and remote coding.

Take advantage of the scope and flexibility of Sanborn equipment to answer your recording requirements. Sanborn engineers will be glad to provide further information and application assistance whenever you wish. Contact your local representative or write to the main office below.

Write or phone for a copy of the Hudson catalog on standard precision-drawn cases and covers

A complete solution to your closure problem is as near as your telephone! Chances are, Hudson can supply an economical standard stock item, from factory stocks, that will meet your requirements exactly. Where specifications call for unusual designs, Hudson can produce precision-drawn custom closures to meet your assembly line schedules.

Hudson standard and special closures are available with complete cover assemblies if desired. Quotations on sub-assemblies, including certified spot welding and silver soldering will be supplied promptly on receipt of your drawings and data.

A **Coaxial Cables** — "Surco" coaxial cables include a wide variety of types, such as low capacity, extra flexibility, small diameter, microphone 2 conductor, and high temperature "Teflon." Conform to Military Spec. MIL-C-17B. Many special designs. If you have a coaxial cable problem consult us.

B **Miniature Coaxial Cables** — Extruded low-loss Teflon dielectric O.D. under 1/16 inch for 50 ohm cable and under 1 8 inch for 95 ohm cable. Low capacitance, stable electrical characteristics.

C **Miniature Wire and Cable** — "Surco" miniature wire and cables are made in conductor sizes down to No. 32 AWG in stranded and No. 30 AWG in solid. Close control in manufacturing permits small finished diameters on both single and multi-conductor cable. Available in standard colors with and without nylon jackets or shielding in the various vinyl or polyethylene compounds.

D **"Surflene" Insulated Hook-up Wire and Tubing** — "Surflene" (Kel-F) for use at temperatures not exceeding 135°C is available in 15 solid colors and wall thicknesses down to 0.008".

E **Multi-Conductor Cables** — "Surprenant" Multi-conductor cables are available with conductor sizes from No. 32 AWG and larger with vinyl, "Surflene", or Teflon insulation, with or without nylon jacket or shielding and can be made to specification for special design and applications. Close tolerances permit unusually small overall diameters, and "Spiralon" color coding permits easy identification even when hundreds of conductors are involved.

F **New Improved Aircraft Wire** — Surprenant new lightweight, smaller diameter MD wire (Vinyl, glass braid, nylon) and the standard Surprenant sandwich construction (Vinyl, glass braid, nylon) give excellent overload safety, high and low temperature performance, good electrical properties and have a nylon jacket giving greater resistance to abrasion, fungus, moisture, and hydraulic and other oils (nylon braided jacket on size 10 AWG and larger for greater flexibility) and are made to conform to MIL-W-5086. "Surprenant" also offers nylon jacketed polyvinyl-chloride construction made to conform to MIL-W-5086, MIL-C-7078A and MIL-W-7072A (ASG). High temperature wire made to MIL-W-8777A and MIL-W-7139A.

G **"Spiralon"** — "Surco-Spiralon" color coding is available on all vinyl, nylon, Teflon, and Kel-F insulated wires, with or without nylon jackets. One, two or three color stripes are available in the Nema colors providing almost unlimited color identifications. Solid color insulation is also available in the 10 standard Nema colors.

H **"Surco" A-10 for (105°C) Hook-up Wire** — A-10 is an unusually high grade vinyl insulating compound developed in our own laboratories for a better hook-up wire. It has excellent resistance to deformation, soldering, high temperature, low temperature and aging; high electrical properties; Underwriters' Lab. approved for continuous operation to 105°C without fibrous covering. A-10 insulated wire made to conform to MIL-W-16878B, Types B, C, and D, with or without nylon jackets or synthetic braids.

I **"Surco" Tubing** — "Surco" vinyl, nylon, polyethylene, silicone rubber, Kel-F and Teflon tubing available in a wide variety of sizes, temperature tanges, electrical and physical characteristics.

J **MIL-W-5274A Radar & Electronic Hook-up Wire** — Made to conform to Air Forces Spec., this wire offers excellent low temperature performance. Nylon jacketed, it has high abrasion resistance and superior surface resistivity even under adverse humidity conditions, making it very adaptable for high impedance circuits.

K **Silicone Rubber Wire and Cable** — Thin wall silicone wire for 600 and 1000 volt service up to 400°F continuously and higher with short life ratings. Remains flexible at —100°F. Braided and jacketed constructions available for increased mechanical and abrasive characteristics.

L **UL and CSA Appliance Wire** — Approved for 80°C, 90°C and 105°C in a range of sizes, wall thicknesses and voltage ratings as required, and solid or stranded conductors with or without nylon or braided jackets. Color coded as required.

Extruded THIN WALL Teflon INSULATED (210°C) HOOK-UP WIRE

Continuously operable over the range from —90°C to 210°C without appreciable deterioration, extruded "Teflon" (polytetrafluoroethylene) is now available in walls as thin as 0.010" (type WTE) and 0.015" (type RTE). Teflon combines non-flammability, chemical and solvent resistance, high volume and surface resistivity with extremely low electrical losses. This wire is available in all flexible strandings from AWG 8 and conforms to performance requirements of MIL-W-16878B. Colors and Spiralon markings conform to MIL-STD-104. Also, available in limited range of sizes in natural or colored tubing.

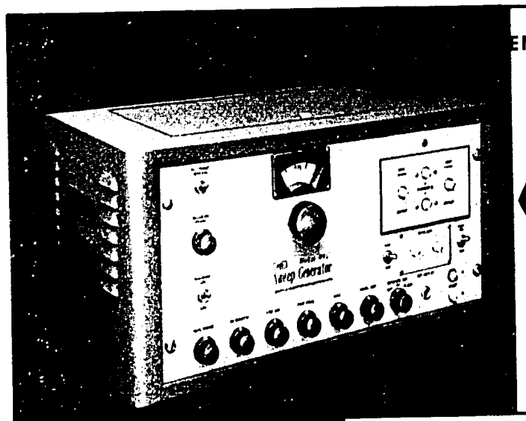
Numbers after address show the product and service classes in which firm appears. These classified listings follow the Alphabetical Directory. For complete instructions on use of this Directory, see pink sheets preceding catalog section.

Precision Test Equipment

FOR ACCURATE QUANTITATIVE MEASUREMENTS...
USING SWEEP FREQUENCY GENERATOR TECHNIQUES...



ENCY GENERATOR • MODEL 900

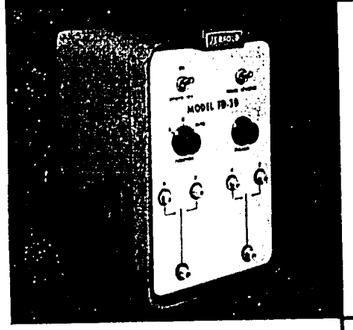
Recommended wherever unusual versatility, high stability and constancy of output are essential. SWEEP WIDTHS—AS WIDE AS 300 MC . . . FROM 200 KC to 1,000 MC.

VHF SWEEP RANGE

Center frequency continuously variable from 0.2 MC to 250 MC. Sweep width continuously variable from a minimum of 0.1 MC, at any center frequency setting, to a maximum of 250 MC at a center frequency setting of 125 MC. Maximum output voltage variation is ± 0.5 db with a minimum output of 0.3 volts RMS into a 50 ohm load.

UHF SWEEP RANGE

Center frequency continuously variable from 275 MC to 900 MC. Sweep width continuously variable from a minimum of 0.1 MC, at any center frequency setting, to a maximum of 100 MC at a center frequency of 275 MC, and to a maximum of 300 MC at a center frequency of 850 MC. Maximum output voltage variation is ± 3 db with a minimum output of 0.3 volts RMS into a 50 ohm load.



WIDE BAND SWEEP GENERAT
MODELS 95 and

Rugged, portable instruments designed for test and alignment of RF circuitry from 22 MC to 220 MC . . .

MODEL 95

Frequency range from 22 MC to 95 MC with an RF output of 1.5 volts RMS, and within ±½ db across a 73 MC band.

MODEL 220

Frequency range from 54 MC to 220 MC with an RF output of 0.7 volts RMS, and within ±½ db across a 166 MC band.

A HIGH SPEED COAXIAL SWITCH • MODEL FD-30

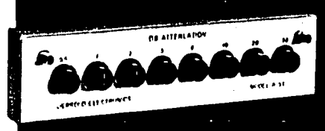
For the simultaneous display of two channels or voltages on an oscilloscope . . .

Frequency range of coaxial circuit is from DC to 250 MC with a VSWR of less than 1.1 at 50 or 75 ohms impedance. Switch contacts "Mercury-Wetted" with an adjustable switch rate of 30, 15 or 10 cps.

VARIABLE RF ATTENUATOR •

For Precise Attenuation in Laboratory Use . . .

Attenuation range from 0 to 62.5 db, in 0.5 db steps. VSWR is less than 1.08 up to 250 MC, and less than 1.5 at 1,000 MC at 50 ohms impedance. Accuracy is ±2% up to 50 db and ±5% above 50 db, at 250 MC.



For details, circle #193 on Reader Service Card.

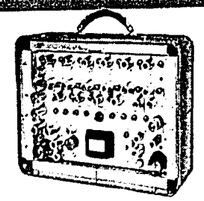
617-BR AUTOMATIC BALANCE CONTROL FOR ALL COLORPLEXERS

(Regardless of Manufacture)

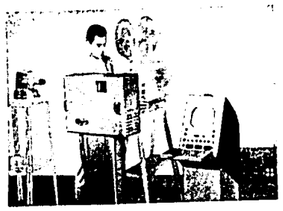
An ingenious circuit locks the entire encoding equipment in balance within 20 seconds after being turned on. Thereafter balance is held under even the most difficult operating conditions.



1003-A VIDEO TRANSMISSION TEST SIGNAL GENERATOR

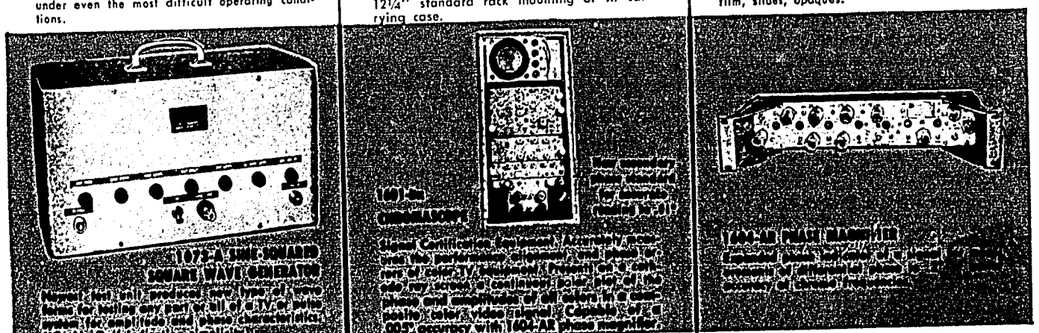
Portable

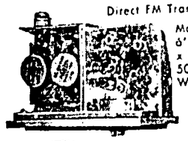
Completely self-contained, portable. Produces multi-frequency burst, stairstep, modulated stairstep, white window, composite synch. Regulated power supply. 12¼" standard rack mounting or in carrying case.

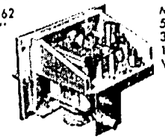


700-A 3V COLOR FILM CHAIN

Finest in quality, lowest in price. 3V provides greatest latitude in selection of color films. Designed specifically for broadcast application, requires little space. Multiplexes 35 or 16mm film, slides, opaques.







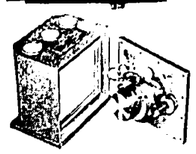
TELEMETERING TRANSMITTERS • High Power in Small Packages

Direct FM Transmitters Crystal controlled 215-235 megacycles. 125kc deviation.

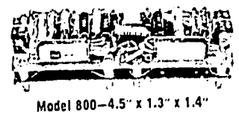
Model 1462
6" x 4¾" x 3¾"
50 to 80 Watts

Model 1463
5 19/32" x 3 13/16" x 4"
15 to 30 Watts

Model 1472
4" x 1.5" x 2.7"
2 Watts

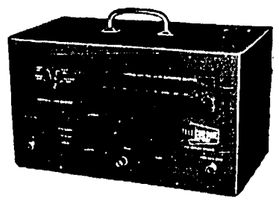


Model 1460
5" x 4¾" x 3 15/16"
RF Amplifier
15 to 30 Watts



Model 800—4.5" x 1.3" x 1.4"

SUB-CARRIER OSCILLATOR. Deviation stability ±1% of band width. Deviation linearity less than 1% of band width under all conditions measured from a straight line drawn between end points.



636-B CHROMALYZER

Portable Precision Color Bar Generator for checking color broadcast studio and transmission facilities, receivers and monitors. Can be tied into a system. Provides complete composite color signals at 100 or 75% chroma.

for electronic and avionic devices

STEMCO® THERMOSTATS

give you more of what you want most

FEATURES such as snap or positive-action . . . various terminal arrangements or mounting provisions . . . different temperature ranges—there's a *standard* type Stemco thermostat for your *special* needs. That means you cut down on lead time, research and development costs, tooling and production inventory. Specify Stemco and you get *better thermostats, faster and for less* than you can make them or buy them elsewhere.

SIZE and weight are particularly important in avionic and electronic applications. And here Stemco thermostats score, too. Their compactness and lightness give a better product without sacrificing performance.

ECONOMY of mass production of many standard Stemco types with literally hundreds of terminal arrangements and mounting provisions means your product costs less to make.

AVAILABILITY of most types is good. Design is flexible for your special applications, tooling is in existence for short-term delivery. If heat control is your problem, Stemco thermostats can provide the answer.

AA-4092

**Refer to Guide 400 EO for U.L. and C.S.A. approved ratings.*

STEVENS *manufacturing company, inc.*
Lexington and Mansfield, Ohio

TYPE A*
Semi-enclosed
Insulated electrically independent bimetal disc gives fast response and quick snap action control. Operation from 15° to 400° F or higher on special order. Various mountings and terminals. Average rating 6½ amps at 115 volts AC, 4 amps at 230 volts AC and 28 volts DC. See Bulletin 3000.

TYPE A*
Hermetically sealed
Electrically identical to semi-enclosed Type A. Temperatures from 15° to 300° F. Various enclosures and mountings, including brackets available for appliance or electronic apparatus applications. Bulletin 3100.

TYPE C
Hermetically sealed
Electrically identical to semi-enclosed Type C but sealed in metal can. Also supplied as double thermostat, alarm type. Latest terminals and mountings. Request Bulletin 5000.

TYPE C
Semi-enclosed
Small positive acting electrically independent bimetal snap disc for operation from 15° to 300° F. Rated at approximately 3 amps depending on application. Terminals and mountings to customer specifications. See Bulletin 5.

TYPE M*
Semi-enclosed
Electrically independent bimetal disc type for appliance and electronic applications from 15° to 300° F. Rating 8 amps at 125 volts AC, 4 amps at 230 volts AC and 28 volts DC. Various quick connect type terminals. Bulletin 6.

TYPE M*
Hermetically sealed
Electrically same as semi-enclosed Type M. Can be furnished with pigtail leads, terminal screws or mounting brackets. Write for Bulletin 7.

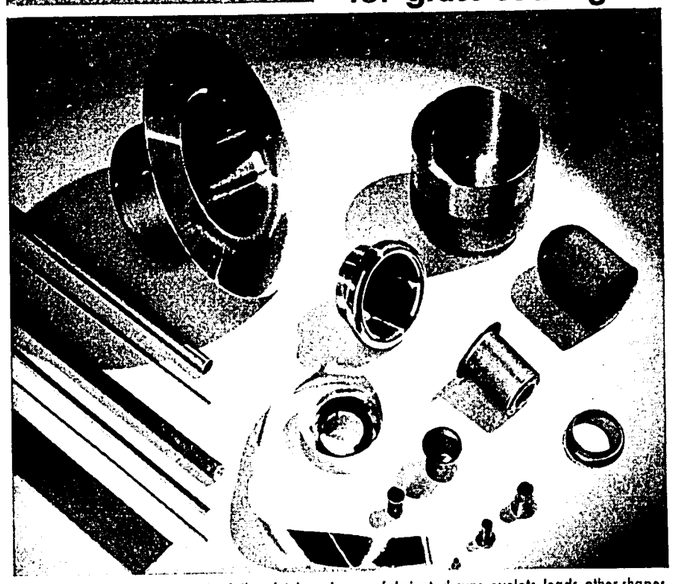
Stupakoff

KOVAR ALLOY
for glass sealing



Kovar is available as sheet, strip, foil, rod, tube, wire—or fabricated cups, eyelets, leads, other shapes.

STRONG . . . DURABLE . . .
Easy to use
Available

The ideal alloy for glass sealing, Kovar matches the expansivity of certain hard glasses over the entire working temperature range. It resists mercury attack, has ample mechanical strength and seals readily with simple oxidation procedure.

Kovar produces a permanent vacuum-tight seal, and is readily machined or fabricated to permit the use of small and intricate shapes. It is of controlled composition and processing to permit duplication of results. Usable in any thickness; no need to feather edge on tubular or intricate shapes, and is relatively inexpensive, eliminating restraints on sizes and capacity. Can be welded, soldered, and brazed to other metals.

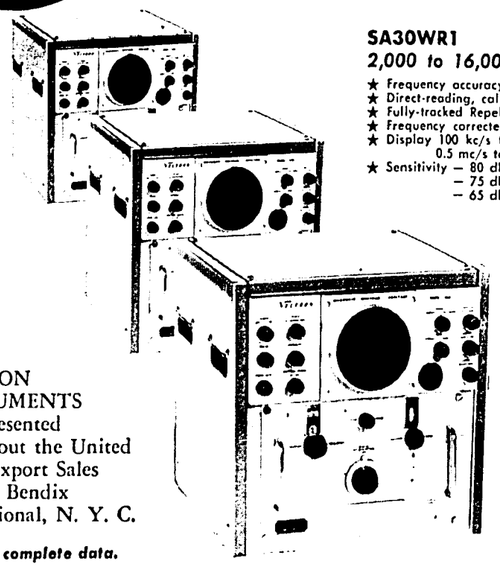
3 NEW VECTRON MICROWAVE SPECTRUM ANALYZERS

To determine power and frequency distribution of pulsed and CW microwave signals.



SA30WR1
2,000 to 16,000 mc/s

★ Frequency accuracy 0.5% or better
★ Direct-reading, calibrated Tuning Dial
★ Fully-tracked Repeller Voltage Control
★ Frequency corrected 50-db Input Attenuator
★ Display 100 kc/s to 10 mc/s per inch at 2,000 mc/s
0.5 mc/s to 40 mc/s per inch at 16,000 mc/s
★ Sensitivity — 80 dbm at 2,000-4,000 kc/s
— 75 dbm at 4,000-8,000 kc/s
— 65 dbm at 8,000-16,000 kc/s

SA30X5
8,500 mc/s to 9,660 mc/s

★ Frequency accuracy 0.05% or better
★ Direct Signal-Frequency-Reading Wavemeter
★ Fully-tracked Repeller Voltage Control
★ Precision 80 db RF Input Attenuator
★ Displays 100 kc/s to 10 mc/s per inch
★ Sensitivity — 80 dbm for usable signal

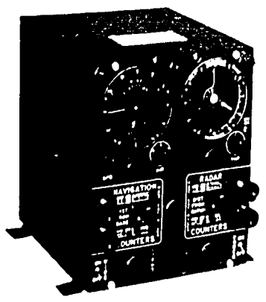
VECTRON INSTRUMENTS are represented throughout the United States. Export Sales through Bendix International, N. Y. C.

Write for complete data.

SA30 with interchangeable RF heads
800 mc/s to 75 kmc/s

NEW — Dual unit for standard rack mounting or portable 80-pound bench top package
NEW — Simplified Control Panel with necessary operating controls conveniently available
NEW — Frequency Difference Control for direct incremental measurements of 100 kc/s to 5 mc/s
NEW — Direct Frequency Calibration without confusion with new Image Check feature
NEW — Separate Brightness and Intensity Controls for displayed signal and baseline
NEW — All aluminum construction for lighter weight and easier transport

CONTRACT MANUFACTURING



GROUND POSITION INDICATOR COMPUTER

Custom designed and manufactured by Vectron to solve navigational vector problems. Input information includes air m.p.h., compass heading, deviation, wind direction and velocity. Output is read directly as N-S and E-W components. Additional electro-mechanical circuits permit establishment of secondary flight pattern over target.

Vectron's precision manufacturing facilities are available to meet your needs for dependable contract, sub-contract or custom manufacture, with or without design engineering. Send us your next quotation request or ask for a copy of our contract manufacturing facilities brochure.

PRODUCT DEVELOPMENT

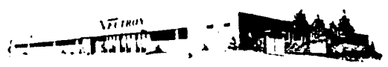
Vectron's team of mechanical, electro-mechanical, and electronic engineers will work from your prints or basic research, to develop and prototype your product.

DESIGN FOR PRODUCTION

Vectron's engineering and production specialists can make necessary design improvements and modifications to assure efficient production, consistent with sound engineering and quality control.

PRODUCTION

Vectron's complete facilities, skilled personnel, precision machine tools, careful production planning and thorough quality control with proper testing equipment assure the highest standards of fabrication and assembly.



VECTRON, inc. 1607 TRAPELO ROAD
Electronic and Electro-Mechanical Equipment WALTHAM 54, MASS.

MINIATURIZED SPHERE RESOLVER

requires less than 5 in/oz input for 1 to 2 in/oz from the sine and cosine output shafts. It is 1½" square with a body block only 2⅛" long.

Write for complete data.

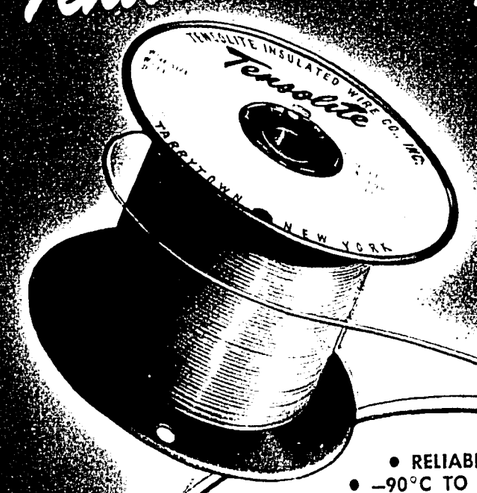
Tensolite ENGINEERED WIRE & CABLE PRODUCTS



THE *Quality* STANDARD IN THE WORLD OF WIRE

- RELIABILITY
- –90°C TO +250°C
- SUPERIOR CHEMICAL RESISTANCE
- EASE OF STRIPPING & SOLDERING
- UNLIMITED COLOR CODING

★ **TEFLON® INSULATED HOOK-UP WIRE**
To Mil-W-16878B, Types E and EE. Solid Colors and Stripes. Parallel wrapped, Spiral wrapped and Extruded Insulation. AWG sizes 8 thru 32.

★ **"TEFLON" COATED MAGNET WIRE**
Round Magnet Wire to Mil-W-19583, Type III. AWG sizes 20 thru 44 in all coating thicknesses.

★ **"TEFLON" AIRFRAME WIRE TO MIL-W-7139A**
TEFLON-Fiberglas construction for superior resistance to abrasion and short-term emergency fire conditions. AWG sizes 6 thru 22. Natural, white, colors and tracers available.

HIGH TEMPERATURE LEAD WIRE
TEFLON or Silicone impregnated fiberglas braid over TEFLON insulated wire for Missile application and High Temperature Motor and Transformer leads. AWG sizes 6 thru 36.

SUPER-FLEXIBLE THINWALL HOOK-UP WIRE
Extra thin wall of TEFLON insulation over super-flexible stranding in AWG sizes 20 thru 36.

SHIELDED "TEFLON" COATED WIRE
All TENSOLON, TEFLON insulated wire is available with closely woven, braided shield to military and customer specifications.

9MMF/Ft "TEFLON" AIR DIELECTRIC COAX CABLE
Extra-flexible 9MMF/Ft Capacitance coax available with variety of outer jackets. LOW-NOISE type coax also being supplied.

"TEFLON" COAXIAL CABLE TO MIL-C-17B
50, 75, 95, ohm miniature coaxial cables in compliance with MIL-C-17B, or with variety of outer jackets to fit specific applications.

"TEFLON" INSULATED RIBBON CABLE
Up to 20 conductors, laid parallel in flat ribbon. Available with metallic or textile braids and variety of lacquers and impregnants. AWG sizes 10 thru 36.

SINGLE AND MULTI CONDUCTOR "TEFLON" CABLE
From 1 to 50 TEFLON Insulated conductors, may be cabled, shielded, and jacketed with TEFLON, thermoplastics, or lacquered braids. Units and custom assemblies available.

SURFACE TREATED "TEFLON" INSULATED WIRE
To provide a surface for ready adhesion of potting compounds and printing foils. Ideal for high-temperature encapsulation. AWG sizes 10 thru 32.

★ MOST GAUGE SIZES AVAILABLE FOR OFF-THE-SHELF DELIVERY

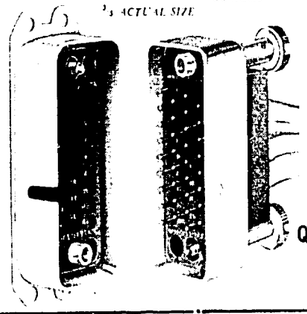
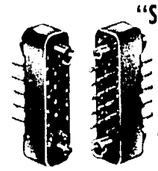
SERIES "XMRE" 9, 14, 18, 20, 21, 26, 34, 42, 50, 75 Contacts



MINIATURE and SUB-MINIATURE
ELECTRICAL CONNECTORS
The Accepted Standard for
QUALITY • COMPACTNESS • RUGGEDNESS
LIGHT WEIGHT • DEPENDABILITY

Precision-manufactured Connectors . . . to the highest quality control standards in the industry . . . have established Winchester Electronics, Inc. components as the finest in the electrical connector art. These and many others . . . or completely new designs . . . are quickly available to you . . . for long and dependable trouble-free service.

SUB-MINIATURE **SERIES "SMRE"**



7, 14, 20, 26, 29, 34 Contacts

Classifications with a System!

THE IRE Directory Product Classifications have both a pattern and a purpose. They differ widely from most product indexes, deliberately. They aim to organize the hundreds of products and services of a complex technical industry according to the way engineers think. To this end, the product grouping follows the pattern of the IRE Professional Groups, broadly. The result is a division of all products and services into four fundamental indexes into which 100 basic classifications have been organized.

For detailed identification, these 100 products and services, grouped in the 4 indexes, are further defined into 769 named products. We have tried to avoid oversimplification, and a tremendous amount of information is given by our product number system. But, the basic indexing adds speed. Purely alphabetical directories are as slow and cumbersome as a telephone book. IRE engineers have liked our system better!

You will note that we here differ from most directory compilers, for we do not mix meters with motors simply for alphabetical reasons. Products used in "Communications" whether components or complete apparatus form the first fundamental group. Yet, the same manufacturer and product may also appear in the "Component Parts" section. This system gives subject grouping for speed and convenience. A directory should aid a man who has forgotten some detail, or product name. Ours helps by grouping products as one would *think*.

For safety, an alphabetical "terminology" index is given, preceding the product system in the pink pages introducing the company index. You will note also that after each firm, its products are listed by number code in the alphabetical list, and that sub-classifications shown by number code in the product indexes give much detail. Just a little study of the system will help you get great good from this book.

The IRE DIRECTORY is four directories in one

Numbers after address show the product and service classes in which firm appears. These classified listings follow the Alphabetical Directory. For complete instructions on use of this Directory, see pink sheets preceding catalog section.

IRE remembers the man

He sent written words and pictures by radio and created new markets!

JOHN V. L. HOGAN, recipient of the *IRE Medal of Honor, 1956* ...for his contributions to the electronic field as a founder and builder of The Institute of Radio Engineers, for the long sequence of his inventions, and for his continuing activity in the development of devices and systems useful in the communications art.

IRE honors *John V. L. Hogan* for his leadership in electronics. His pioneering in the field of FACSIMILE, the electronic miracle of transmitting and receiving written words and pictures through the air, has helped build a new world market for many products and services. Mr. Hogan also established, and for many years operated, the nationally famous New York City radio station, WQXR. Radio engineers, such as Mr. Hogan, in reaching new frontiers of achievement, originate the demand... then, demand the supply. It is these men who are the creative forces in a dynamic, growing industry that IRE always remembers.

The Institute of Radio Engineers is a professional Society of 50,000 radio-electronic engineers devoted to the advancement of their field of specialization. Their official publication, *Proceedings of the IRE*, is concerned solely with these men and their accomplishments. And *Proceedings of the IRE* is the only engineering journal in the radio-electronic industry exclusively edited *by* and *for* radio-electronic engineers.

Earth satellites, FM, TV, radar, computers, color TV, transistors, scatter propagation, solid state electronics ... all that is history making in radio-electronics is first presented, then followed step-by-step in its development, on the pages of *Proceedings of the IRE* in authoritative articles by the men behind these advances.

IRE remembers the man! Is it any wonder that the men remember IRE? Best way to get *products remembered*, if they are sold in the radio-electronics field, is through advertising in the pages of *Proceedings of the IRE* for *...if you want to sell the radio industry, you've got to tell the radio engineer!*

THE INSTITUTE OF RADIO ENGINEERS.

1958 IRE DIRECTORY

DIRECTORY I COMMUNICATIONS

20 major groups
90 products

The products and services of the radio-electronics industry have been organized into four basic directories:

I. Communications
II. Components
III. Controls & Instruments
IV. Materials & Services

Within these four basic directories, 100 major product and service groups are numbered consecutively throughout. Under each of these 100 classes a further breakdown is given, showing in detail by a system of code numbers after each firm listed what specific products within the class are manufactured by that firm.

For a terminology cross-index listing the 769 sub-products in alphabetical order, consult the eight-page pink section preceding page 1.

The first few times you use this EDGE INDEX

follow the "How to use" instructions slowly—one step at a time. After that you will be able to open easily and almost instantly to the section that you seek.

Machol edge indexes covering the alphabetical section and each of the four major directory groups will be found on pages 1, 151, 255, 287, 459, and 521.

HOW TO USE

1. Bend the Directory almost double with the front cover page on the inside.
2. Hold in your right hand with your four fingers near to the bound edge and your right thumb near the middle of the open side of this page.
3. From the heavy or light line symbol adjacent to the subject you seek, run your eyes across the page edges until you reach the horizontally corresponding symbol.
4. OPEN THERE!

LICENSE NO. 25
MACHOL EDGE INDEX PATENT #2680630

For complete list of products and services, arranged alphabetically for fast reference, see the eight-page pink section preceding page 1.

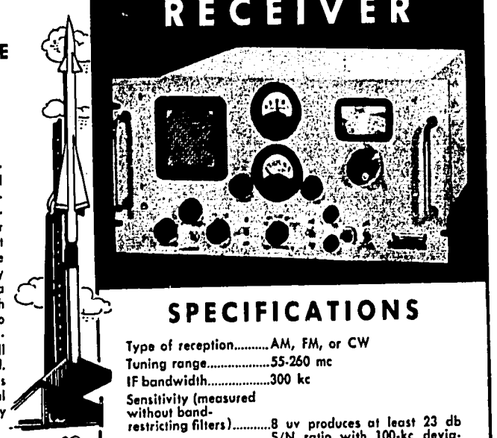
UNEQUALED PERFORMANCE IN

- **TELEMETERING**
- **GUIDED-MISSILE MONITORING**
- **RADIOSONDE RECEPTION**

This Special Purpose Receiver is an improved version of the NEMS-CLARKE 167-J1 and 167-J2. This new Receiver incorporates the best qualities of both of the former types plus many new features including a BFO. A video bandwidth control is provided to greatly improve signal-to-noise ratio when full bandwidth is not needed. It is especially useful as a high quality general purpose laboratory receiver.

TYPE 1501 SPECIAL PURPOSE RECEIVER



SPECIFICATIONS

Type of reception	AM, FM, or CW
Tuning range	55-260 mc
IF bandwidth	300 kc
Sensitivity (measured without band-restricting filters)	8 uv produces at least 23 db S/N ratio with 100-kc deviation, 400-cycle modulation.
Noise figure	11 db, maximum
IF rejection	Not less than 70 db
Image rejection	Not less than 40 db below 130 mc; 30 db minimum at any frequency.
FM output	0.15 volt per kc deviation (Approx.)
AM output	12 volts for 10 uv input modulated 30% at 1000 c.p.s. (Approx.)
Squelch	Operates on monitor circuit

NEMS-CLARKE
INCORPORATED
919 JESUP-BLAIR DRIVE
SILVER SPRING, MARYLAND

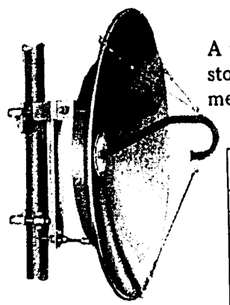
ANDREW *Leadership for 20 Years...*

ANTENNAS
ANTENNA SYSTEMS
TRANSMISSION LINES

The ANDREW product line covers the related fields of antennas for communication and broadcasting, and transmission lines to connect these antennas to transmitters, receivers or other electronic equipment.

PARABOLIC ANTENNAS



Type PT4-59 4-foot antenna with waveguide horn for 5925-6425 mc.

A wide selection of standard models in a complete range of sizes and frequencies is stocked for immediate delivery. Special antennas are designed and manufactured to meet individual requirements. Here is a representative selection of stock antennas.

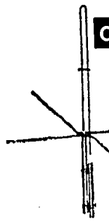
TYPE NUMBERS OF STOCK PARABOLIC ANTENNAS

Frequency Range (MC)	ANDREW Type Number 4 ft. dia.	6 ft. dia.	8 ft. dia.	10 ft. dia.
890- 920	1004A-1	1006A-1		1010A-1
920- 960	1004A-2	1006A-2		1010A-2
1700-1850	2004A-1	2006A-1	2008A-1	2010A-1
1850-1990	2004A-2	2006A-2	2008A-3	2010A-3
1990-2110	2004A-3	2006A-3	2008A-3	2010A-3
2450-2700		P6-24		P10-24
3750-4200			PS8-37	
5925-6425	P4-59	P6-59	P8-59	P10-59
6575-7125	P4-65	P6-65	P8-65	P10-65
7125-7425	P4-71	P6-71	P8-71	P10-71

Tower or roof mounts are included as part of the antenna. Most standard mounts include elevation and azimuth adjustments of at least ± 5°. Special heating equipment is available and recommended for antennas operating above 5000 mc in ice areas.

For antennas requiring tower mounts, specify prefix PT for all sizes: example, PT4-59. Roof mounts for 4' and 6' sizes use prefix PM; example, PM6-71. 8' and 10' mounts are designed for either tower or roof mounting.

COMMUNICATIONS ANTENNAS



FOLDED UNIPOLES—(25 mc to 174 mc), omnidirectional. The ideal fixed station transmitting and receiving antenna. Inexpensive, lightweight and easy to install. Some lower frequency models incorporate new design changes which increase windload ratings and eliminate field cutting of vertical elements to frequency.

HIGH GAIN—for 148-174 mc, 400-470 mc. ANDREW High Gain omnidirectional antennas will increase your coverage and multiply benefits by the number of mobile units in the system. Type numbers,* frequency and gain are shown below.

Omnidirectional Pattern

Type 3000	148-174 mc	6.3 db
Type 3006	148-174 mc	9.0 db
Type 4000	450-470 mc	7.6 db
Type 4002	450-470 mc	5.0 db
Type 4010	400-420 mc	7.5 db

Offset Omnidirectional Pattern

Type 201	450-470 mc	10.8 db in max. dir.
Type 3004	148-174 mc	8.1 db in max. dir.

CORNER REFLECTORS. Unidirectional antennas for 25-174 mc and 400-960 mc. Preferred for their high gain and stable operation under severe weather conditions. Also may be utilized for low power TV transmitting in directional and omnidirectional arrays.

TRANSMISSION LINES

HELIAX, flexible air dielectric cable combines the efficiency of the finest copper cables with handling ease of solid dielectric types. Available in two sizes, ⅞", Type HO and 1⅝", Type H1, with complete series of pressurized end fittings. Type HO may now be used up to 5000 mc.

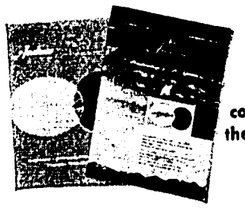
RIGID AND SEMI-FLEXIBLE. Complete range of sizes for UHF and VHF systems. Semi-flexible soft copper cable in ⅜" and ⅞" sizes, rigid copper line ⅞" to 9" sizes. Adaptors and fittings available from stock. New 50 ohm, 6⅛" line now available for high power applications.

WAVEGUIDE. High efficiency copper clad steel waveguide in sizes ranging from 7½" to 15" for pressurized UHF systems. Includes accessories for complete line installation.

COAXIAL SWITCH. Automatic, 50 ohm, 3⅛", UHF and VHF. This new, automatic switch now allows high power communication systems, as well as VHF and UHF television stations, the convenience of four-second switching of 3⅛" coaxial transmission line at powers up to 10 kw at 1000 mc. Both automatic and manual models include automatic high voltage disabling switch and remote position indicating lights.

ANTENNA SYSTEMS AND PLANNING

ANDREW Corporation offers engineering assistance in the planning of your antenna-transmission line system at no cost to you. Contact the nearest ANDREW office for this consulting service.



** All are covered by Patent No. 2,757,371.*

Be sure your library contains Andrew catalog 21 and the new product supplement, 21S.

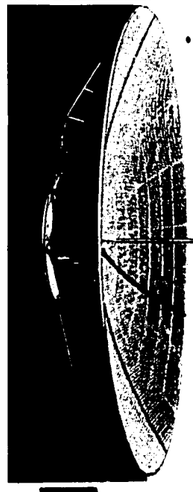
AINSLIE ANTENNAS



.....for the 100-500 mc BAND

MODEL CF12IM — 12 ft. diameter with dipole exciter. Gain 23 db at 500 mc. Minimum side lobes 20 db (or better). Cross Polarization 20 db (or better).

Low VSWR at any frequency in the band. Accomplished through adjustable balun and reflector assembly.

STOCK REFLECTORS—4 in. to 10 ft. diameter solid spun. 4 ft. to 18 ft. diameter mesh. Larger sizes or special shapes on request. Antennas up to 10,000 mc.

Weatherized & corrosion resistant. Rugged, lightweight.

PROMPT DELIVERY
Any type antenna or reflector precision-built to your specifications.

Write for complete performance data sheets.

MODEL CF141M with 14' diameter reflector available

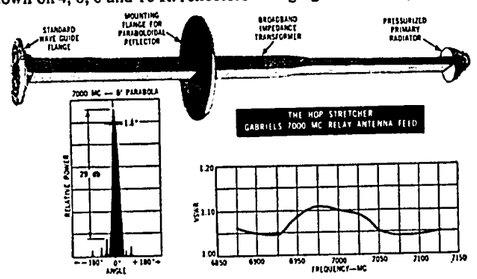
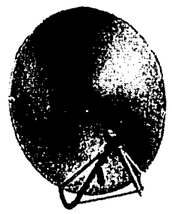
THE GABRIEL COMPANY

New Products

The HOP-STRETCHER feeds offer higher gain, lower sidelobe levels and more desirable beam-widths for center-fed parabolic antennas. This feed was developed for S, X, K_u and K_a bands.

Technical features of X-band antenna • Sidelobes at least 24 db down on 4, 6, 8 and 10 ft. reflectors • High gain efficiency, 65-70%

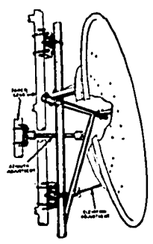




The new hi gain 3 kmc Cylindrical Coaxial Feed provides similar E and H-plane patterns, minimum side and backlobes, and negligible squint. Rear-mounted, with easy polarization adjustment to any angle.

7000 mc Offset Antenna. Ideal for installations where passive reflectors are utilized — VSWR less than 1.10:1 over 5900-8500 mc — Sidelobes at least 24 db down — gain is 41 db at 7000 mc. Elliptically shaped reinforced fiberglas reflector.

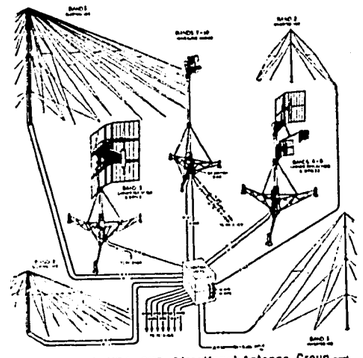
The new X-band parabolic antenna with standard feed. Features variable polarizing adjustment, 0 to 90°. Manually locked in position.



The new universal 3-point suspension mounting bracket for 2, 4, 6, 8 and 10 ft. parabolic reflectors.

Features • Independent azimuth adjustment. • Independent elevation adjustment. • Adaptable for mounting in all locations.

INTEGRATED ANTENNA PROGRAMS — 75 mc — 33,000 mc — **RESEARCH DEVELOPMENT PRODUCTION**

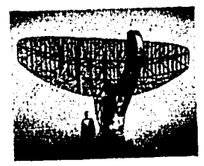


Broadband, HF-to-SHF, Directional Antenna Group — Remotely controlled.

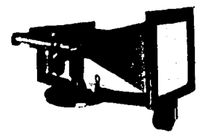
Low-drag Airborne Flush-mount Antenna. Beacon — Countermeasures — Homing — Navigation

Missile Antennas — Telemetering, Destruct, Guidance ICBM, Surface-to-Air, Air-to-Air, and Surface-to-Surface.

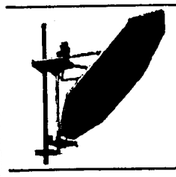
Radar Antennas
- Shipborne Search
- Harbor Control
- Airborne Height Finding
- Land Base Search



Designed, developed, and constructed to military specifications with improved strength-to-weight ratio and component reliability.



Aleutian Line—Dew Line Low loss, heavy duty duplex feed horns for Tropospheric Scatter Radio Communication Systems.



Motorized Passive Reflector For maximum point-to-point transmission in microwave relay links. Fast, accurate, easy adjustment from remote location. Manually adjusted reflectors also available.

The Gabriel Electronics Division is one of the world leaders in microwave relay link antennas, and the more complex antennas. They are dedicated to improve and extend the state-of-the-art in antennas and antenna components.

Call or write to GABRIEL ELECTRONICS DIVISION for counsel on your antenna needs.

Gabriel

GABRIEL'S STANDARD MICROWAVE PARABOLIC ANTENNAS

...Contributing millions of trouble-free operational hours for industry and the military.

- 7000 mc — Broadband (5925-7425 mc) high gain > 40 db low sidelobes — low VSWR < 1.13:1 over band.
- 4000 mc — Narrow-beam broadband (3700-4200 mc) — low VSWR < 1.2:1 — gain > 37 db.
- 2000 mc — Available in offset and center-fed feeds. Narrow-beam broadband (1750-2110 mc) — high gain > 28 db low VSWR < 1.3:1 over band
- 940 mc — All weather radome covered feed — gain > 22 db low VSWR < 1.25:1.

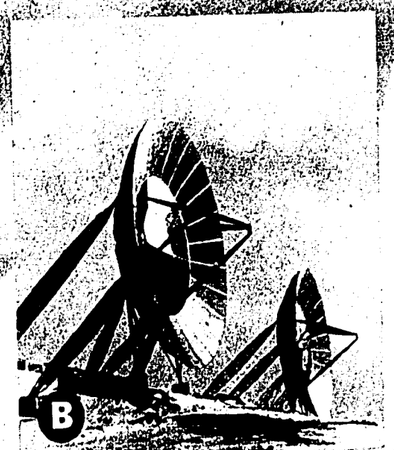
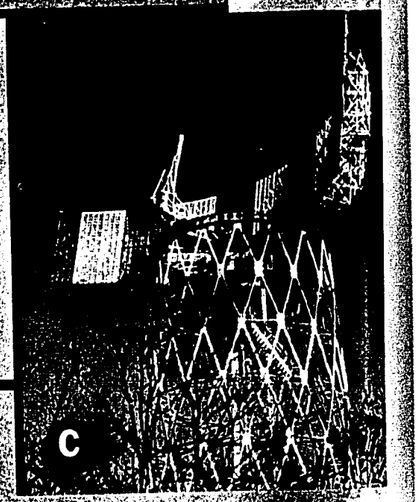
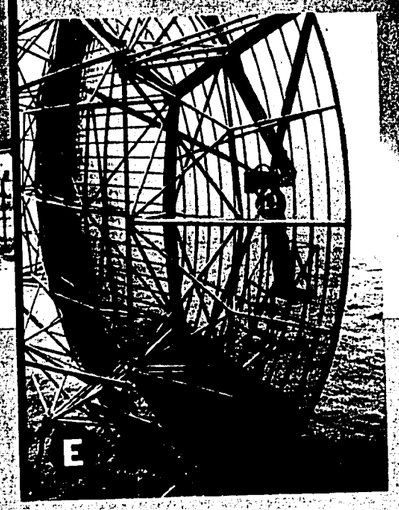
ANTENNA PROBLEMS?

Ask Kennedy!







A *60' Radio Telescope Harvard University*

B *60' Trans-horizon Antennas Northern Europe*

C *120' Radar Antenna Maine*

D *28' Trans-horizon Antennas Cape Cod*

E *28' Trans-horizon Antenna Texas Tower*

The solution to antenna problems begins when someone says: "Let's ask Kennedy!"

A few of the many reasons why are shown on this page. These Kennedy antennas are setting new standards for all-weather reliability and versatility wherever they serve throughout the free world.

Kennedy antennas come in many shapes, many sizes (the world's largest scatter antenna is being built here). But whatever the type, and whatever the conditions under which it must serve, Kennedy can offer a design that fully measures up to specifications. And there are additional advantages in Kennedy's advanced construction techniques—like the extra ease in shipping and handling made possible by sectionalized aluminum construction, for example.

Kennedy engineers are available to supervise installations anywhere in the world. It's a part of the complete, integrated service that is still another reason why more and more people in communications are "asking Kennedy" about antenna problems.

From servo-mechanisms to electronic computers, "RADIO" is a way of THINKING!

Far-reaching progress in the radio-electronic field is no "happy accident." Television, electronic computers and the "radiation" power of the atom, which soon will be harnessed to industry were not discovered . . . they were engineered.

From "fission" to "computation," these engineering achievements are accomplished through an enormous process of information exchange—the methodical and brilliant teaming together of engineering *thinking* to solve a problem. In radio this work has been done deliberately by a growing engineering society, through its meetings and published proceedings, which unleash the creative minds of men.

In 1956, "Proceedings of the I·R·E" published nearly 2000 text pages, exclusive of product news and departmental features. This is the word-count equivalent of eight 500-page textbooks on radio-electronics for engineers. It exceeds the contents of the next two contemporary publications put together. This "high" in genuine reader service was logically matched by advertising worth over a half-million dollars, by firms investing in the engineers' reading interest and benefiting by it.

Engineers are educated to specify and buy!

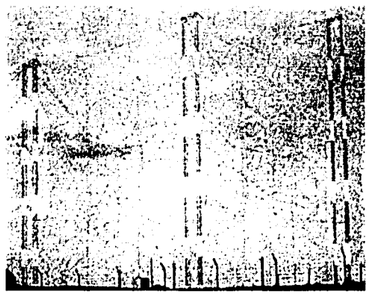
TRYLON®

ANTENNA SYSTEMS

- **Design Engineering**
- **Fabrication**
- **Installation**

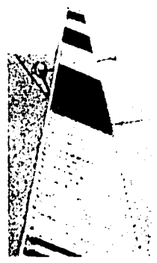
Modern communications often require more than just an assembly of conventional antennas, towers, and feed lines. That's why leading broadcasters find Trylon's sound engineering approach to every phase of antenna system design pays big dividends in terms of greater reliability . . . lower maintenance costs . . . longer life.

Trylon specialists welcome the opportunity to quote on your next job—design, fabrication, and installation of the complete antenna system, or of any component.



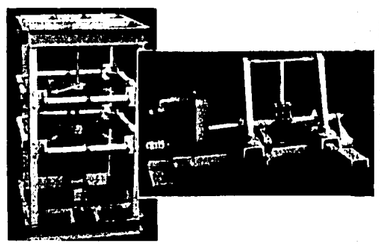
First Successful *Broadband* Curtain Antenna

Designed, built and installed by Trylon, these two broadsides give 5% to 10% more reliable long-distance communications than comparable rhombics. Each covers a bandwidth ±15% of center frequency with a VSWR of only 1.5.



Galvanized Steel Ladder Towers

As specialists in antenna supports for over 20 years, Trylon offers a broad, thoroughly-proved line of towers for TV, FM, AM, microwave, and commercial communications antennas.



Selector, Shorting & Slewing Switches

Illustrated above are typical Trylon motor-driven switches designed for flexible remote control selection of transmission lines, antennas, radiation patterns, etc., in antenna parks. Switches handle r-f up to 30KV wire-to-wire with minimum line disturbance.

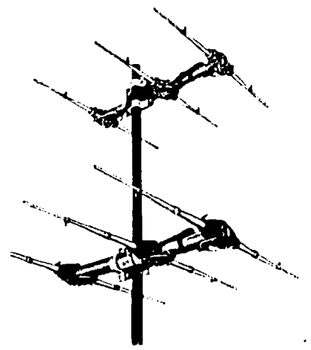
TELREX LABORATORIES

Antenna Specialists
Consultants, Designers & Manufacturers



Standard Telrex structures upon which we design antennas to your specific requirements.

- Broad-band or single-frequency arrays for communication, fixed or rotary, point-to-point, FM, TV-relaying, scatter-propagation, etc.
- Antenna accessories: Broad-band baluns, monopoles, antenna rotators and indicators, etc.
- Consultants and suppliers to communication firms, universities, propagation laboratories, and the Armed Forces.
- Prompt delivery on standard Telrex designs or units built to your specifications.

new!

The Model WWVC STANDARD FREQUENCY COMPARATOR is a new instrument incorporating a highly sensitive crystal controlled radio receiver for utilizing the transmissions of the National Bureau of Standards radio stations WWV and WWVH and is now available for precise audio and radio frequency standards work as well as accurate time interval measurements.

The model WWVC STANDARD FREQUENCY COMPARATOR is available in cabinet or for rack mounting using a 5¼" panel.

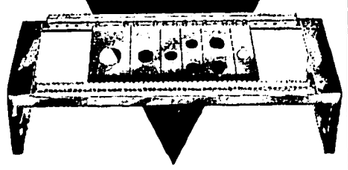
***NEW*—Model SR-7 WWV RECEIVER**

This receiver is the dual conversion type. Dimensions: 3-15/16" x 11" x 8½" deep. Available in upright or vertical models, or as rack mounted model. Noise limiter, antenna trimmer and provision for an oscilloscope or head phone are incorporated.

***NEW*—Model AK-8 ANTENNA KIT**

This special antenna is designed to provide optimum response to signals from WWV and WWVH on 2.5, 5, 10, 15 and 20 mc. Includes modification kit for receiver with all wire, 50' of coaxial cable and suitable fittings to provide outstanding performance. Antenna is completely assembled; needs only one support for satisfactory operation.

CHANGEABLE CHASSIS



SPEED-CHASSIS

The Speed-Chassis is a flexible breadboard assembly with interchangeable socket arrangements which can be mounted on a relay rack if desired. Shield cover and panel are available to make successful breadboard assemblies both permanent and neat.

The NEW Half-Size SPEED-CHASSIS accommodates small breadboards where additional length of the full-size model is not needed. Stacking and place arrangements of either unit or units in combination are extremely varied. Both Chassis models are preassembled: controls may be mounted on either end.

BUDELMAN brc

designers — manufacturers

RADIO AND WIRE LINE COMMUNICATIONS EQUIPMENT

- **TELEPHONE SUBSCRIBER CARRIER**
- **RADIO PAGING**
- **MULTI-CHANNEL MICROWAVE SYSTEMS**
- **CUSTOM EQUIPMENT ENGINEERING**

Communications equipment bearing the **BUDELMAN** name is designed and built to meet practical commercial and public service needs. Its sound mechanical construction and advanced circuit developments account for its outstanding dependability, long life and unusually low initial and operating costs.

BUDELMAN equipment meets or exceeds applicable FCC requirements, and is available for prompt delivery from stock. Phone, write or wire for catalogs, or send us your specifications for a firm quotation on equipment built to your special needs.

alfax is revolutionizing graphic recording!

"ELECTRICITY IS THE INK"

ALFAX PAPER AND ALDEN ADJUSTERLESS RECORDING TECHNIQUES MAKE POSSIBLE—

• ***New Accuracies and Resolution in Direct Graphic Recording!***

Record full range of your electronic signal outputs—monitor processes and operations directly and instantaneously on Alfax Paper —no pens or ink—up to 17 step permanent tone shades.

Magazine Fact Finder— 2 Channels Plus Timing

Here is a compact Magazine Recorder which will permanently record two separate operations and automatically print a recurring time signal on the Alfax Tape. Simple to install—they will operate unattended — remotely or on the spot.

Multi-Channel Fact Finder— 30 Channels Plus Timing

Record thirty channels of on-off data by merely supplying current to writing stylI—no pens or inks—simple motion switches are easily installed to make or break writing current to Alfax Paper. Ideal for monitoring production operations and processes, this compact, rugged recorder is portable for lab, factory and field use.

Alden "Flying Spot" Component Recorders

Get hi-resolution tone shade recordings on Alfax Paper of detecting instruments using scanning or sweep methods to collect data. Synchronize Alden "Flying Spot" with sweep or rep rate of your equipment—use direct signal outputs to mark Alfax with tone shades proportional to signal variations. Ideal for sonar, radar, facsimile, ultrasonic and magnetic flaw detection etc.

Alden Curve Plotters

The Basic Helix Recorder with special electronics can provide continuous, automatic curve plotting of phenomena converted to voltage. Any number of channels can be recorded simultaneously along with standard or reference signals so that the information is instantly and permanently self-calibrated.

• ***Fastest, Most Accurate Means of Communication!***

New high and low speed Alden facsimile recording systems using Alfax Paper are the most accurate means of communication today —are simple to install and operate virtually unattended.

High Speed Selective Dispatch Facsimile System

Specially designed to permit selection of pertinent data from any copy — letters, dispatches, reports, etc. — for instant transmission to wherever needed—yet complete reproductions can also be sent. 72 square inches of copy, 1800 words of newspaper type, or 900 words of typewriter text can be transmitted and received per minute.

Continuous Reproduction Facsimile System

Extremely high quality reproduction of large copy: such as newspapers, weather maps, blueprints, finished advertising layout, drawings, photographs, etc., can be transmitted easily with this equipment. Copy is scanned flat and reproduction automatically on remote continuous recorder.

Alden Giant Bulletin System

Fastest, accurate means of disseminating information to large groups of people. Automatically provides changing "up to the minute" bulletins 4 feet wide and up to 10 feet high and as much as 12 square feet of copy per minute, enlarged 10 times from remote flat-copy scanner as sent either by wire or a microwave system.

From radar antennas to "readout" equipment...

AMF has experience you can use

• Giant search antennas made by AMF form a vital part of the nation's air surveillance network • And converting the incoming radar signals into instantly understandable information are brain-like AMF Electronic Data Display Systems. The ultimate in "readout" equipment, these compact console units accept either analog or digital information, instantly convert, coordinate, and display the data on the face of a cathode-ray tube. Incoming signals can be interleaved with synthetic symbols for immediate reference, and any segment of the display can be offset and enlarged whenever desired. • See for yourself why, for radar control of air, ground, and harbors, or for general-purpose computer reading, AMF has the experience and equipment you can use.

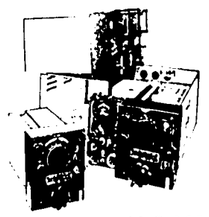
FOR MORE QUALITY-PER-DOLLAR, BUY RECONDITIONED TEST EQUIPMENT

We will quote on new and used top-quality commercial brands and select military surplus items in our choice stock to your needs.



AN/APR-4 LABORATORY RECEIVERS

Complete with all five Tuning Units, covering the range 38 to 4,000 Mc.; wideband discone and other antennas, wavetraps, mobile accessories, 100 page technical manual, etc. Versatile, accurate, compact—the aristocrat of lab receivers in this range. Write for data sheet and quotations.

SIGNAL GENERATORS IN STOCK INCLUDE:
TS-437 SG-47/USM-16, 10-440Mc., (see "BJ-75A", P. 125, 1956 IRE DIRECTORY)
TS-403/U AN/URM-61 1,800-4,000Mc. (Hewlett-Packard 616A)
TS-497A/URR 2-400 Mc. (Measurements Model 80)
TS-600 (XA)/U 400-1,000 Mc. (Allen D. Cardwell)
TS-601 (XA)/U 975-2,000 Mc. (Allen D. Cardwell)
TS-602 (XA)/U 4,200-10,300 Mc. (Polytechnic Res. & Dev.)
Model 16C 50 Kc.-28 Mc. (Ferris)—and many, many more.

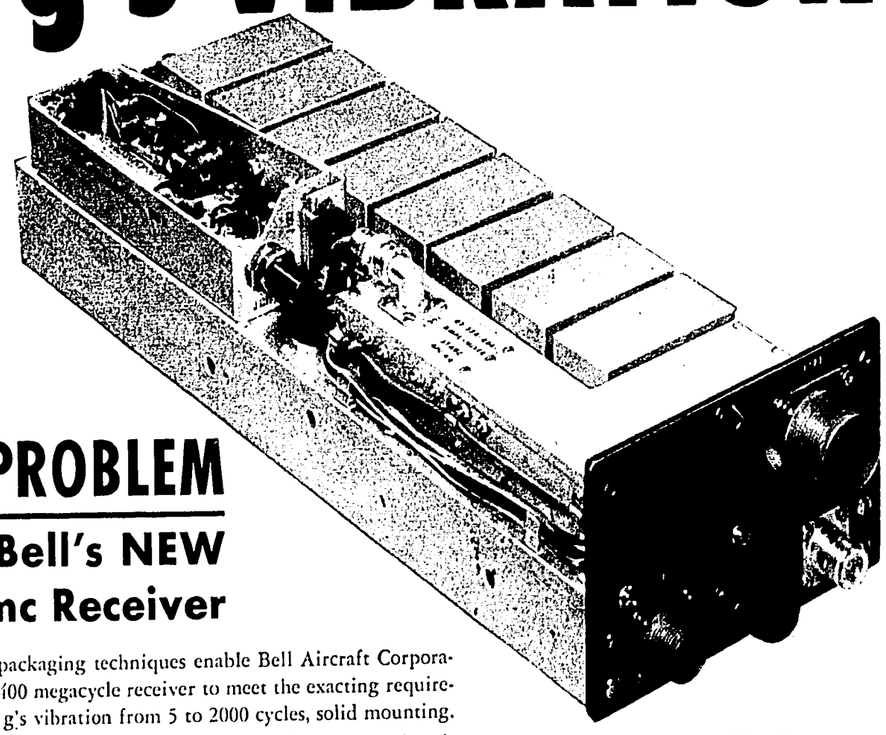
Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each major classification. Complete addresses will be found in the Alphabetical Directory.

15 g's VIBRATION



NO PROBLEM
with Bell's NEW 400 mc Receiver

Modular packaging techniques enable Bell Aircraft Corporation's new 400 megacycle receiver to meet the exacting requirement of 15 g's vibration from 5 to 2000 cycles, solid mounting.

Now thoroughly proven and in production, this receiver is available immediately for any application where demodulated control signals are needed for the activation of command systems requiring a high signal-to-noise ratio, high sensitivity and stability, and a wide audio bandwidth with low harmonic and phase distortion. It is equally at home in guided missiles — as a range safety instrument — or as a ground monitor receiver.

The new 400 mc receiver is only one of many examples of the ability of Bell Aircraft's new *Avionics Division* to design, develop and produce avionic systems, units and components for any needs, however complex. If you have design or production problems in this field, write, wire or phone: Sales Manager, Avionics Division, BELL AIRCRAFT CORP., Post Office Box One, Buffalo 5, New York.

ELECTRICAL SPECIFICATIONS

TYPE: FM 300 KC Deviation
TUNING RANGE: 406 to 420 megacycles
Plug-in assemblies to extend range to 500 mcs available
OSCILLATOR: Crystal controlled
SENSITIVITY: 5 microvolts or better for 10 db quieting
INPUT IMPEDANCE: 50 ohms
BANDWIDTH: 1.15 mcs ± .1 at 3 db
IMAGE AND SPURIOUS RESPONSE: Better than 60 db
OUTPUT: ± 0.5 db 40 cps to 40 kc 3 db at 100 kc
3.5 volts RMS 500 ohms closed circuit
SQUELCH: Adjustable squelch relay from 10 to 100 microvolts input
POWER INPUT: Less than 50 watts. Power supplies available for 115V - 400 cps or 28VDC

MECHANICAL SPECIFICATIONS

DIMENSION: 3.6 x 5.5 x 15.25 inches.
VOLUME: 300 cubic inches
WEIGHT: 10 pounds
MOUNTING: Solid — 9 mounting screws
OPERATING ENVIRONMENTS: 15 g's
5 to 2000 cycles -55° to +72°C

THIS NEW BOOK telling of many new and unusual developments in the field of Avionics is yours for the asking. Send request on your letterhead to: Sales Manager, Avionics Division, BELL AIRCRAFT CORP., Post Office Box One, Buffalo 5, N. Y.

BELL Aircraft CORP.
Avionics Division
BUFFALO, N. Y.

For details, circle ±220 on Reader Service Card.

RADIO RESEARCH INSTRUMENT CO.
550 FIFTH AVE. NEW YORK JUDSON 6-4691

F-28/APN-19 FILTER CAVITY
Jan. spec: 2700-2900mc, 1.5db max. loss at ctr freq over band. Details: single tuned filter for freq channelling in radar beacon. Silver plated coax resonator. Invar center tuning conductor ¾ wavelength. Tuneable 9-11.2cm. Loaded Q 450-650 for insertion loss at band ctr 1db, 700-1000 for loss 2 to 3 db. Band center stable to 1mc/sec for 100 deg. C amb. temp change. A double tuned cct with a flat response over wider band pass and less critical tuning had by cplg. two filters in series. New. $37.50 each.

3KW 400 CYCLE SOURCE
Complete generator set. 115v 60cy AC 3HP speed regulated, motor. Generator output 115 volts, 400 cycle, single phase 17.4 amp. continuous duty (easily converted to 3 phase by transformer). Output electronically regulated. Built to rigid U. S. Navy spec. A perfect source 115 volt 400 cycle. $385.00 each.

CRYSTAL MOUNTS
X band. Broad banded. BNC (teflon) output. UG39 Flange Input. VSWR better than 1.0 Mfg. Airtron. New. $24.50 (illus.)
3 cm freq. meter. Coax type 8700-9500 mc ± 5 mc. Micrometer adjust. Mfg. Western Electric. New. $39.50 each.

TAPER. RG51 to RG52 (1¼ x ⅝" to 1 x ½") Smooth Electroform. Standard Flanges. New. $16.50.

FLEXIBLE WAVEGUIDE. 1x.5 X band 9" Technicraft. New $10.00. 1x.5 X band 24" CG779/U Titeflex. New $21.50. 1¼ x ⅝" X band 12" Western Elec. New $19.50.

BENDIX GYRO SERVO UNIT. Combined horizon gyro, Autosyn & tilt correction motor. Maintains tilt stabilization of radar antenna, etc. Pioneer 12800-1-B (APS-15). New $75.00.

⅞" RIGID COAX. 50 ohm, standard fittings, 10cm stub supported. 12 ft. lengths. Silver plated. New $34.50 each. 12 ft. length.

RT39/APG-5 10CM RADAR. Complete S band RF package. Lighthouse 2C40 xmtr, 2C43 rcvr, TR. 829B pulser, miniature 6AK5 IF strip. Press. 12" dia., 24" lg. Brand new with all tubes $275.00.

VOICE MULTIPLEX EQUIPMENT FOR BROADBAND RADIO SYSTEMS

FOUR TO NINETY-SIX CHANNELS

A series of voice-multiplex systems providing from four to ninety-six voice channels over a radio system are now available. These systems have been designed specifically for radio use, and are not simply converted wire-line carrier-telephone systems. They have all the advantages which design for a specific application produces: High performance, small size, light weight, low cost, circuit simplicity, low power requirements, small number of tubes, low operating cost, low maintenance cost and high reliability.

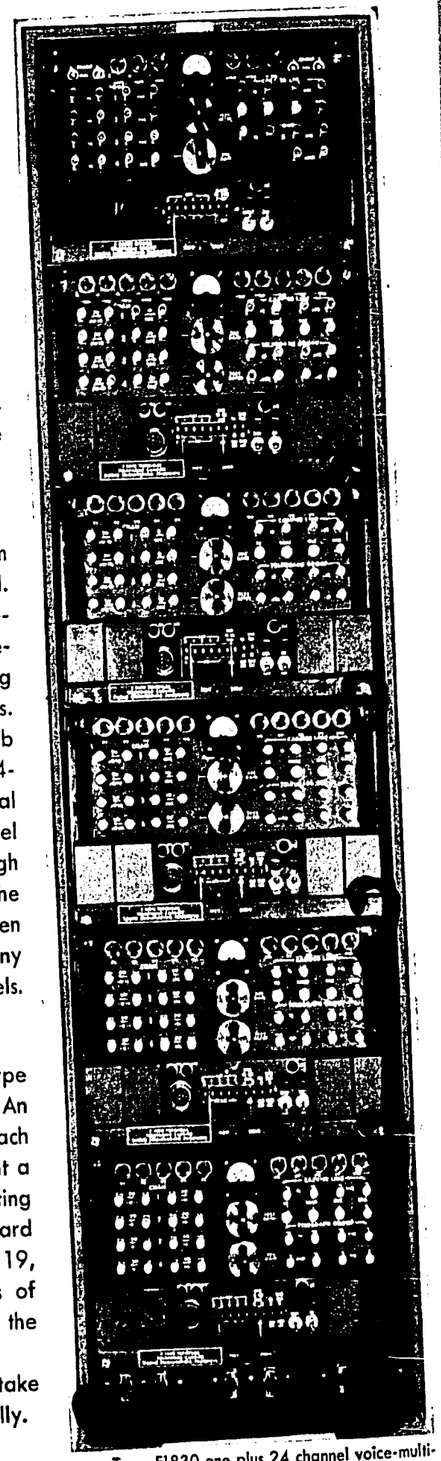
CHANNELS ARE 3500 CYCLES WIDE

These systems provide a voice channel flat within 1 db from 300 to 3500 cycles, for each 4 kc of bandwidth occupied. Each channel is obtained as the lower sideband in a single-sideband suppressed-carrier amplitude-modulation arrangement, and is equipped with hybrid, signalling, and dialling circuits for all the standard 2-wire and 4-wire loop options. These systems are ordinarily arranged for a net loss of 3 db between 2-wire v-f loops or a net gain of 5 db between 4-wire v-f loops. Volume limiters and compandors are optional on all channels. On the v-f side the receive level of each channel is +1 dbm and the transmit level −4 dbm. On the high frequency side the transmitting level is +12 dbm and the receiving level −30 dbm min. per channel. Crosstalk between channels is more than 50 db below these levels, and any harmonic in one channel is more than 45 db below these levels.

TELEGRAPH GROUP

A telegraph channel is provided on which up to 8 teletype circuits can be multiplexed without double modulation. An order-wire channel and telephone set is provided for each group of up to 24 channels. Channels can be added five at a time. Full flexibility is provided for dropping and inserting channel groups at repeater and terminal points. Standard assemblies provide up to a maximum of 1 plus 4, 9, 14, 19, 24, 49 or 99 channels. In all systems moderate lengths of 4-wire cable or open-wire line may be inserted between the multiplex equipment and the radio terminals.

Telephone, wire or write us for further in formation. We can take care of your multiplex requirements quickly and successfully.



Type F1830 one plus 24 channel voice-multiplex terminal complete with hybrid, ringing and dialling circuits, and test facilities. Dimensions are 58" high, 16" wide and 8" deep. Power input 250 watts. Weight 326 lbs.

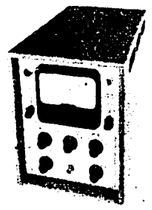
STANDING WAVE AMPLIFIER



RANGE: 60 db • INPUT ATTENUATOR: 50 db. in steps of 5 or 10 db. • SENSITIVITY: 1 microvolt across 200 ohms for full scale deflection • AMPLIFIER FREQUENCIES: Wide-band, 400 cycles tunable ±5%, 1000 cycles tunable ±5% • AMPLIFIER: Q 25 ±5 • METER SCALES: VSWR 1-4, VSWR 3-10, DB 0-10 • SIZE: 14¼" d, 8½" w, 10½" h • PRICE: $195.00.

MICROWAVE POWER METER

POWER RANGES: Full scale readings of .1, .3, 1, 3, 10 Mw. Continuous readings from −20 to +10 dbm. • BOLOMETER RESISTANCE: 200 ohms • BOLOMETER COEFFICIENT: plus or minus • BOLOMETER BIAS CURRENT: 8.6 ma. max. • ACCURACY: ±5% of full scale reading • SIZE: 14¼" d, 8½" w, and 10½" h • PRICE: $195.00.

TELEMETERING TRANSMITTERS

10 Kw, Pulsed Transmitter • Frequency 400-1200 Mc • Tuning Range 5%.

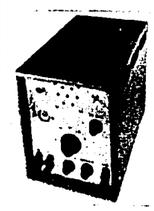
TWO CHANNEL • FREQUENCY: 215-235 Mcs. • POWER OUTPUT: 50 Watts Peak • SIZE: 5½" dia. 4¼" long

MICROWAVE • FREQUENCY: 2150-2350 Mc. • POWER OUTPUT: 15 Watts CW • MODULATION: Amplitude or Frequency (± 125 Kc. deviation) • SIZE: 2" by 4" by 7"

SPECIAL MICROWAVE COMPONENTS

RACK & PANEL CONNECTORS: Designed to permit plug in chassis with positive mating action to connector in the rack • IMPEDANCE: 50 ohms • INSULATION: Teflon • ADAPTERS: to TNC or BNC MAGNETRON TO WAVEGUIDE TRANSDUCERS-WAVEGUIDE SIZE: RG 69/U • FLANGE: UG 417/U • TRANSITION: Probe, stub supported. STRIP TRANSMISSION LINES-POWER DIVISION: Equal or Tapered • IMPEDANCE: 50 ohms • FREQUENCY: Fixed.

WWV RECEIVER



FREQUENCIES: 2.5, 5.0, 10.0, 15.0, 20.0, 25.0 Mc • SENSITIVITY: better than 1.0 microvolt for standard output • SELECTIVITY: 10 Kc. • INPUT: dual • OUTPUT: 600 ohms and self contained speaker • TUNING EYE: zero beat indicator • SIZE: 14¼" d, 8½" w, and 10½" h • PRICE: 195.00

Complete Telemetric Data Systems

Torque Meter for measurement of torque, horsepower, thrust, weight.

Spin-Sonde for free flight characteristics of scale-model projectiles and missiles, and as a non-contacting tachometer.

Multi-Channel Unit for transmission from missiles and high-speed rotating machinery. Radio-link operation eliminates all contact measurement.

Temperature Transducers • Skin Temperature Pickups • Voltage Control Sub-Carrier Oscillators • Decade Amplifiers. All Instruments Completely Transistorized and Miniaturized.

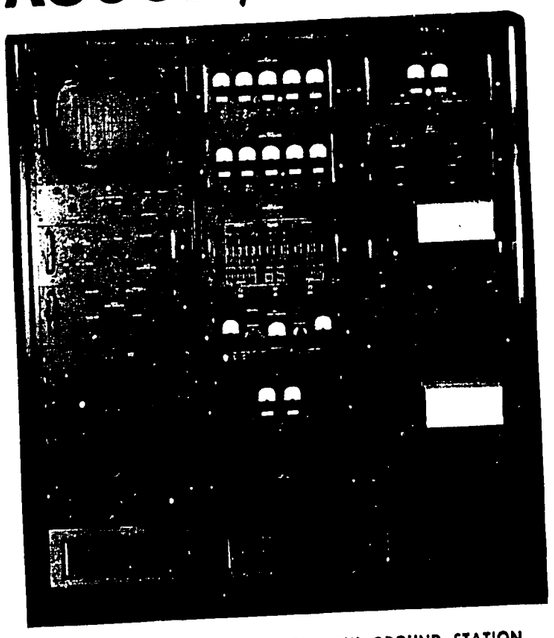
ASCOP *Pulse Width* DATA SYSTEMS



MULTICHANNEL DATA TRANSMISSION OR RECORDING USING RF CARRIER FM SUBCARRIER OR SINGLE MAGNETIC TAPE TRACK

ASCOP pulse width coding and time division multiplexing techniques result in systems featuring large numbers of data channels, highest accuracy, reliability, flexibility and ease of operation. That is why ASCOP Telemetering Systems have been first choice for the nation's most vital projects involving automatic handling of data from aircraft, missiles, test stands, nuclear reactors, etc. With an ASCOP PW System as many as 88 data channels may be sampled, transmitted and/or recorded and reduced in real time. Up to 1232 data channels are available by means of multiple tape recording, or up to 1760 data channels by means of sub-commutation. System accuracy is better than 1%.

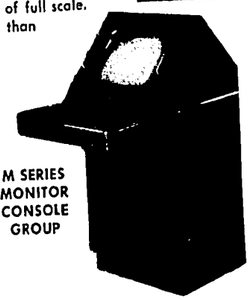
TYPICAL SYSTEM PERFORMANCE
(Utilizing Zero and Full Scale Reference)

NUMBER OF DATA CHANNELS	26	41	86
SAMPLES/CHANNEL/SECOND	30	20	10
FREQUENCY RESPONSE, CPS	5	3.3	1.5

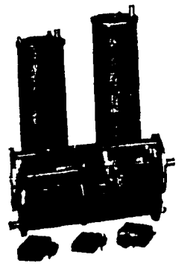
LINEARITY....Better than ±0.5% of full scale.
STABILITY....Long term drift less than ±1% of full scale.

M SERIES PW GROUND STATION

Complements ASCOP's PW Multicoders and Telemetering Sets. A "packaged" system for operational testing of airborne or land vehicles . . . and for static testing.
Continuous automatic compensation of system zero and scale factor eliminates need for calibration and manual adjustment.
Operates directly from PW signals of 30x30, 45x20 or 90x10 configurations — or indirectly at non-standard rates of 30, 45 or 90 channels by means of proper tape control. Provides for visual monitoring of all data channels and produces reduced graphic output records of selected channels in real time. Features missing data point correction for continuous synchronization. Easy access to slide-mounted chassis is also provided.

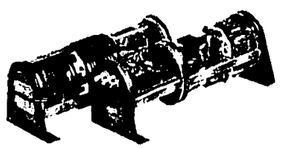


M SERIES MONITOR CONSOLE GROUP



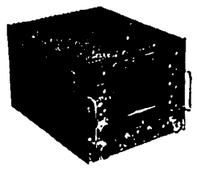
F SERIES MISSILE TELEMETERING SETS

For short life applications, where the ultimate in compactness, ruggedness, and performance are required. Standard packages as shown are available for 30 x 30 and 45 x 20 operation. Special configurations, using standard functional components, may be ordered. Some components are sold separately.



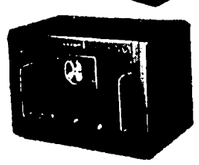
D SERIES LOW LEVEL MULTICODERS

Low level sensitivity opens a whole new field of mobile instrumentation. Combine supersensitivity, high accuracy and a wide selection of data channels (up to 88). Ultra high altitude pressurization and rugged design make them ideal for recovery and repeat use. Available for 15 or 30 mv range. High speed models operate at 900 PPS . . . low speed models at 112.5 PPS. Operate from low level or standard transducers. Accept double ended balanced inputs.



C SERIES MONITOR EQUIPMENT

A means for rapid inspection and visual monitoring of airborne or test stand data. Permits engineer to check or read data both before and during test runs on entire telemetering train from commutator through the tape recording system, saving a great deal of data reduction time. Samples data at repetition rates of 1¼ to 30 samples per second. Provides reliable performance under extremes of vibration, acceleration, deceleration, etc.



G SERIES LOW LEVEL MULTICODERS

A commercial series for use in wind tunnels, chemical processes, nuclear reactors, etc., where automatic data handling is mandatory. Provide 88 channels of low level information with sampling speeds of 10 or 1¼ samples per second. Output is in pulse width form . . . can be recorded on magnetic tape, transmitted over a line or used to modulate a transmitter. Input sensitivity 15 mv. Available for rack mounting or in a bench cabinet.

A SERIES ACCESSORY EQUIPMENT

RF Preamplifier units for greatly increased receiving range, and RF Multicoupler for operation of up to 4 receivers from a single Preamplifier or antenna. Broad band operation 215 to 235 megacycles.

IRE remembers the man

He launched a balloon that opened a new electronic market!

WILBUR S. HINMAN, Jr., recipient of the *IRE Harry Diamond Memorial Award, 1956*...for his contributions to the electronic art in the fields of meteorology and proximity fuzes.

IRE salutes *Wilbur S. Hinman, Jr.*, with an award given to a man in government service who has made outstanding contributions in the field of radio and electronics. As director of the Diamond Ordinance Fuze Laboratory in Washington, D. C., Mr. Hinman contributed much to perfecting the proximity fuze. His work with radio sondes from weather balloons in the upper atmosphere created new markets for electronic equipment to help us forecast weather with greater accuracy. Mr. Hinman is a radio engineer who seeks and finds knowledge that benefits all as he grows in his field. IRE always remembers the man who builds markets for products and creates jobs for people.

The Institute of Radio Engineers is a professional Society of 50,000 radio-electronic engineers devoted to the advancement of their field of specialization. Their official publication, *Proceedings of the IRE*, is concerned solely with these men and their accomplishments. And *Proceedings of the IRE* is the only engineering journal in the radio-electronic industry exclusively edited *by* and *for* radio-electronic engineers.

Earth satellites, FM, TV, radar, computers, color TV, transistors, scatter propagation, solid state electronics ... all that is history making in radio-electronics is first presented, then followed step-by-step in its development, on the pages of *Proceedings of the IRE* in authoritative articles by the men behind these advances.

IRE remembers the man! Is it any wonder that the men remember IRE? Best way to get *products remembered*, if they are sold in the radio-electronics field, is through advertising in the pages of *Proceedings of the IRE* for *...if you want to sell the radio industry, you've got to tell the radio engineer!*

1958 IRE DIRECTORY
DIRECTORY II
COMPONENTS

46 major groups
373 products

The products and services of the radio-electronics industry have been organized into four basic directories:

I. Communications
II. Components
III. Controls & Instruments
IV. Materials & Services

Within these four basic directories, 100 major product and service groups are numbered consecutively throughout. Under each of these 100 classes a further breakdown is given, showing in detail by a system of code numbers after each firm listed what specific products within the class are manufactured by that firm.

For a terminology cross-index listing the 769 subproducts in alphabetical order, consult the eight-page pink section preceding page 1.

The first few times you use this EDGE INDEX

follow the "How to use" instructions slowly—one step at a time. After that you will be able to open easily and almost instantly to the section that you seek.

Machol edge indexes covering the alphabetical section and each of the four major directory groups will be found on pages 1, 151, 255, 287, 459 and 521.

HOW TO USE

1. Bend the Directory almost double with the front cover page on the inside.
2. Hold in your right hand with your four fingers near to the bound edge and your right thumb near the middle of the open side of this page.
3. From the heavy or light line symbol adjacent to the subject you seek, run your eyes across the page edges until you reach the horizontally corresponding symbol.
4. OPEN THERE!

LICENSE NO. 25
MACHOL EDGE INDEX PATENT #2680630

For complete list of products and services, arranged alphabetically for fast reference, see the eight-page pink section preceding page 1.

1. *Average DC output at 110% of nominal AC supply voltage.*
2. *Resistance for 40° C. ± 2° C. rise above 35° C. ambient at 110% of nominal AC supply voltage.*
3. *Taken at 120 volts AC supply for Types 4052 to 4062 and at 240 volts AC supply for Types 3902 and 3912.*
4. *Total control required to change the output voltage from 5 to 95 per cent of maximum.*
5. *All dimensions are in inches.*

RELIABILITY BEGINS WITH CONTROL

CONTROL, a division of Magnetics, Inc., manufactures a complete line of 240-volt and 120-volt standard high permeability magnetic devices which give designers greater flexibility in selection of equipment for their particular application.

HOW TO ORDER: To order standard reactor assemblies, the following information must be specified:

1. Reactor type number.
2. Voltage (number of turns on each control winding).
3. Current (wire size of each control winding).

To determine number of turns and wire size of each control winding:

1. Choose the size of reactor which will meet requirements.
2. From the table, select the ampere-turns of control needed to control the reactor from full-on to full-off. If additional forcing is required, please write CONTROL for reactor curves.
3. Divide the ampere-turns needed by the maximum control current needed to control the reactor. This is the number of turns needed to control the reactor.
4. Multiply maximum control current by 1,000 to determine circular-mil area of bare copper wire needed.
5. Select a wire size whose circular-mil area is equal to or greater than the calculated value.

NOTE: A maximum of eight control windings can be supplied, provided the total circular-mil area of the wire of the control windings does not exceed maximum mil area available as shown in the table.

For full details, write for Catalog R-10

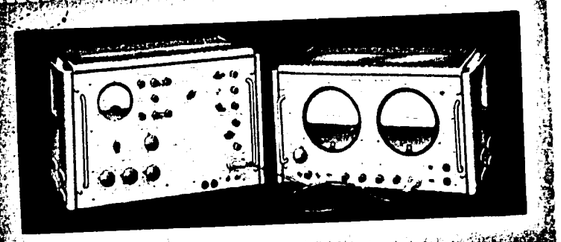
SOLARTRON [illegible] SYNTHESIZER



THE ONLY SERVO TEST EQUIPMENT which discriminates against noise and harmonics; covers 0.5 c/s to 1. kc/s in one instrument; can be used on DC and Carrier Servos, and on mechanical, electro-mechanical and hydraulic systems for fuel flow and vibration analysis.

TOP MANAGEMENT AGREES that the SOLARTRON TRANSFER FUNCTION ANALYZER is a wise investment because it will pay for itself in man hour savings, faster completion of jobs; enable management to handle more projects bringing greater income without additional expense.

ENGINEERS AGREE that the SOLARTRON TRANSFER FUNCTION ANALYZER not only saves man hours but gives data heretofore unattainable by any other method or equipment. An entirely new concept in transfer function analysis.

Make your own test and evaluation. Contact us for demonstration and loan of SOLARTRON TRANSFER FUNCTION ANALYZER without obligation.

Now being used in America by Hughes, Bendix, Northrup, Convair, Boeing and others. • Standardized by British Admiralty Research Laboratories, British Atomic Energy Research Establishment, Royal Navy, General Electric Co. and others.

OTHER SOLARTRON PRODUCTS:

JX 541 A	Carrier Converter
JX 641 A	Carrier Converter
JX 612 A	Subsonic Power Amplifier
JX 603 A	Mechanical Reference Generator
VP 250 A	Resolved Components Indicator
JM 555 A	SynchroTest
AD 557 A	Solarscope

McKAY ELECTRIC COMPANY

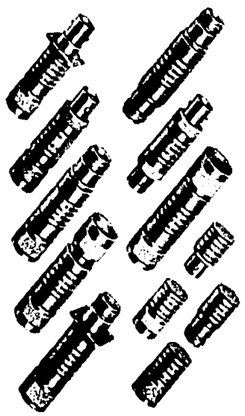
19790 STAHELIN AVENUE • DETROIT 19, MICHIGAN

For details, circle #230 on Reader Service Card

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each major classification. Complete addresses will be found in the Alphabetical Directory.

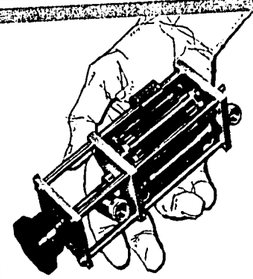
PRECISION ATTENUATION to 3000 mc!

SINGLE *"in-the-line"* ATTENUATOR PADS *and* 50 ohm COAXIAL TERMINATIONS



PROTECTED UNDER STODDART PATENTS

This new group of pads and terminations features the popular Types C and N connectors, and permits any conceivable combination of the two styles.



PROTECTED UNDER STODDART PATENTS

six-position

TURRET ATTENUATOR

- **Frequency Range:** dc to 3000 mc.
- **Characteristic Impedance:** 50 ohms.
- **Available Attenuation:** Any value from 1 db to 60 db.
- **Accuracy:** ±0.5 db.
- **Power Rating:** One watt sine wave power dissipation.

STODDART

The IRE DIRECTORY is four directories in one

Information at high speed! "Data the way an engineer thinks" is the key to IRE DIRECTORY classifications. All products are divided into four fundamental groups. The grouping plan makes this the fastest working directory you ever used! No components are mixed with test equipment—you turn right to a section where each item belongs.

Yet good engineering detail is maintained. 100 basic classes of products under these four sectional product directories keep listings from becoming cumbersome, but clearly define products. Overlapping listings are skillfully eliminated. Simplicity makes this book easy to work with—insures faster finding of facts when forgotten. Thus the faults of terminology listings are avoided.

Completeness is insured! Most firms make many products in a single classification. Wasteful, eye-confusing relisting of the same firms over and over is quite sensibly solved by using a system of codes under the 100 basic headings which actually provide 769 separate classifications. A more complete picture of what each firm's full line is results, but you travel through fewer listings. The "Copp Principle" of Directory indexing makes these lists wide, well marked highways to information —fast.

Machol Edge Index is just one more modern service to help the user find information fast.

Ads positioned with reason! In a DIRECTORY where ads play an important part in supplying information the user wants and needs, it makes good sense to cross-reference every advertiser in each listing so that the user can quickly find more detail. Ads are also placed facing company alphabetical listings, or in the product section in which they properly belong. No effort is spared to "organize" ad information.

Manufacturer of Coaxial Attenuators Since 1947
Many Standard Models Covering DC - 10 KMC Available
Using Our Own Metal Film and Cracked Carbon Film Resistors. Connectors: "N", "BNC", "C" & "7/8"

10 WATT PRECISION POWER PADS D.C. TO 1 KMC

50 Ohm Impedance — Type "N" Connectors
Model 10: Bilateral — 1, 2 & 3db Pads
Model 11: Unilateral (Female Input)
Model 12: Unilateral (Male Input) — 4, 5, 6, 7, 8, 9 & 10 db Pads
Maximum Power Sensitivity of Insertion Loss: .1db/10 Watts
Maximum Input V.S.W.R.: 1.15 for Model 10, 1.10 for Models 11 & 12
Maximum Deviation of Insertion Loss from Nominal: ±.1db Due to Frequency Sensitivity & D.C. Inaccuracy
Calibrated At: D.C., 100MC, 350MC, & 1KMC
Stability: Better Than .05db for 8 Hr. Operation at 10 Watts Input

DEFINITIONS
Insertion Loss—Measured between 50 ohm source and 50 ohms load.
Input V.S.W.R.—Measured when terminated in 50 ohms load.
Power—Input to pad when terminated in 50 ohms load.
Power Sensitivity—Change of insertion loss between 50 milliwatts and 10 watts input.

years-ahead engineering...

Air Marine Motors equipment features stainless steel thru-bolts... die-cast aluminum housings... riveted stators... positive bearing alignment... uniform air gap... ball bearings... shock and vibration resistance... humidity and fungus resistance... omni-position mountings... temperature lubrication.

AIR MARINE MOTORS equipment will meet virtually *all* your sub-fractional power requirements and AN specifications.

Write for specific information and brochure about any of these units, or for the complete catalog... and use the Air Marine advisory services without obligation.

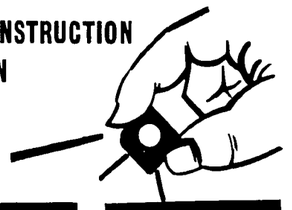
MR. ENGINEER!

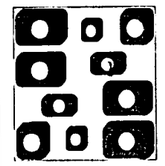
BURGESS

EXCLUSIVE WAFER CELL CONSTRUCTION GIVES GREATEST SELECTION IN DRY BATTERIES

Whatever You Need in . . .

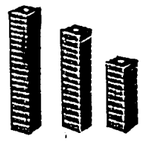


CAPACITY



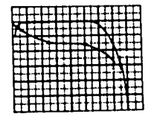
A correct cell size for any capacity.

VOLTAGE



Wafer Cell construction produces from 1½ volts on up.

SERVICE



Burgess will make batteries to fit any application.

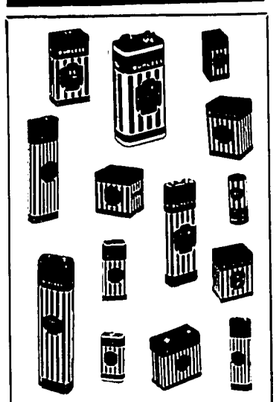
BURGESS

HAS THE WIDEST CHOICE OF DRY BATTERIES EVER MANUFACTURED . . .

The revolutionary Wafer Cell offers a 30% increase in battery life at *no increase in size*. This exclusive Burgess construction consists of a sandwich of manganese dioxide mix between two flat electrodes of zinc and carbon with spots of hot silver-wax applied to each exposed pole of the cell, allowing perfect electrical contacts throughout and almost complete absence of vibration. Cells are wrapped in Mylar film and packed in such modern materials as aluminum for compactness, long shelf life, exceptional service life, outstanding dependability.

Burgess design specialists will work out the exact battery to fit your needs. Send your requirements to Dept. E57.

SIZES AND SHAPES



Wafer Cell construction can meet any space, size and weight requirements.

RESERVE BATTERIES

Can be stored dry for years. Activated only when immersed in water. No handling of dangerous electrolyte, no spilling or leaking. Wider range of efficient operating temperatures than any other type of battery.

BURGESS BATTERY COMPANY

Cool That Cabinet—Save Sensitive Components

GENERAL FEATURES

- Pressurizes Cabinet With Filtered Air
- Rubber Isolated Motors For Quieter Operation
- Widely Accepted for Use In Military Equipment
- Maximum Air Delivery For Efficient Filter Action

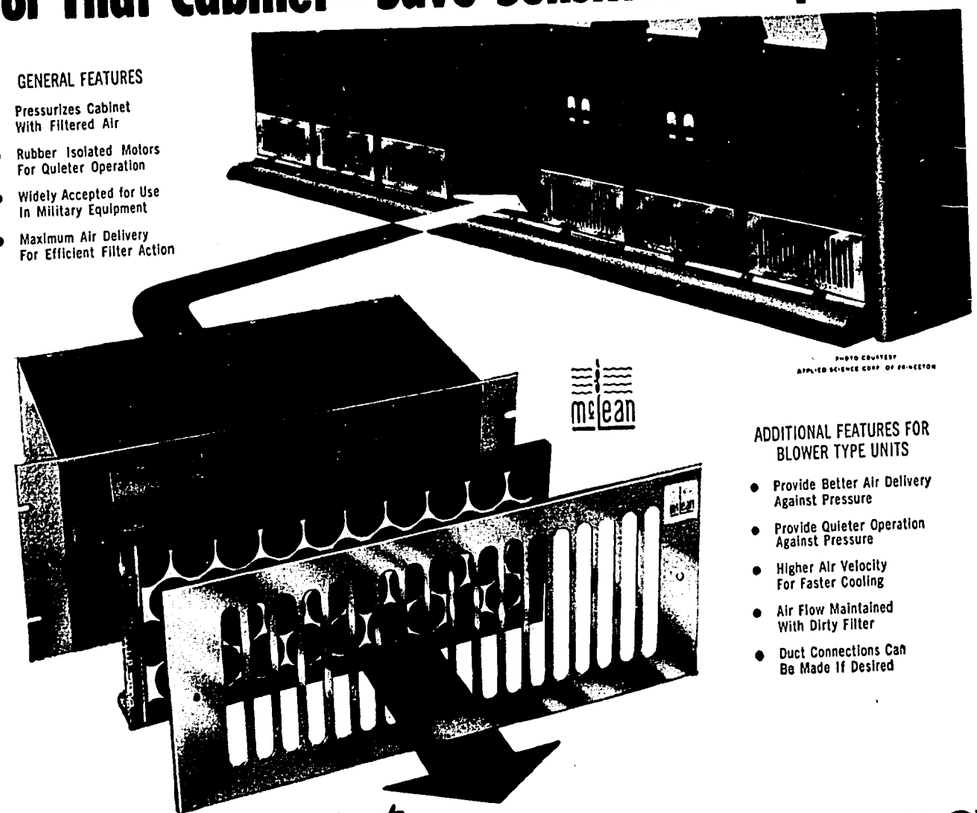

PHOTO COURTESY APPLIED SCIENCE CORP. OF PRINCETON

ADDITIONAL FEATURES FOR BLOWER TYPE UNITS

- Provide Better Air Delivery Against Pressure
- Provide Quieter Operation Against Pressure
- Higher Air Velocity For Faster Cooling
- Air Flow Maintained With Dirty Filter
- Duct Connections Can Be Made If Desired

use McLEAN Cabinet Cooling FANS and BLOWERS*

*Pat. Applied For

RACK MOUNTED FOR EASY ASSEMBLY • FIT STANDARD 19" RACKS

THREE STANDARD MODULAR PANEL HEIGHTS COVER WIDE RANGE OF AIR DELIVERIES

Excessive or fluctuating temperatures in electronic racks make thousands of tubes die young . . . make crystals, transistors and sensitive electronic equipment perform erratically. System failure at critical times is disastrous . . . replacement costs are high. That is why leading manufacturers install McLean Fans and Blowers in Computers, Control Systems, Data Processing Systems, etc. These small packaged units pressurize the cabinet with cool filtered air, keeping dust out. They are complete in one unit and ready for use. Standard RETMA notching allows mounting on rack . . . no cutting or fitting is necessary. All units contain an easily replaceable filter. Smart stainless steel grilles add beauty and eliminate the necessity of matching cabinet finishes.

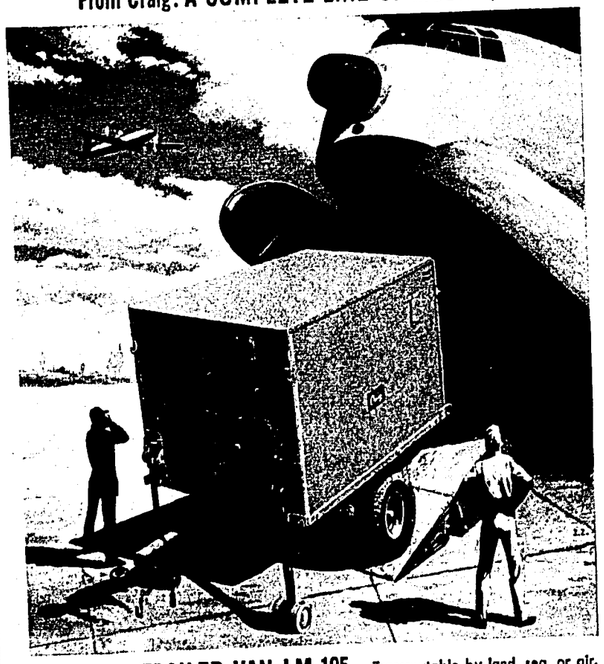
The *word* for mobile, air-transportable systems is CRAIG!

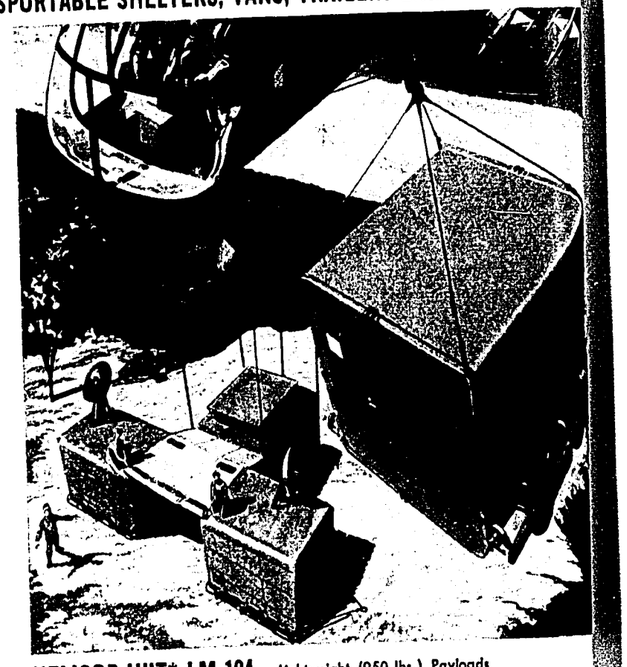
In this increasingly mobile age of electronics, nearly everything that must move swiftly and arrive safely can do it better in Craig-designed and built shelters and carriers. Complete electronic systems — with equipment installed and ready to operate — travel in rugged, roomy vans like the LM-105 you see on this page. Other systems fly direct — for a helicopter can transport an entire system when that system is housed in a lightweight Craig Helicop-Hut LM-104.

New developments like these . . . plus matchless experience in the field . . . and Craig's complete, design-through-installation service . . . are excellent reasons why you can turn to Craig with complete confidence when you have a problem in mobile, air-transportable systems.

From Craig: A COMPLETE LINE OF MOBILE, AIR-TRANSPORTABLE SHELTERS, VANS, TRAILERS LIKE THESE . . .



TRAILER VAN LM-105 — Transportable by land, sea, or air. 7,000 lb. payload. Detachable chassis. 2" thick honeycomb insulation for walls, floor, ceiling. Inside dimensions: 140" x 90" x 79". Easily detachable from dolly for aircraft, ship, or rail loading.



HELICOP-HUT* LM-104 — Lightweight (950 lbs.) Payloads up to 6300 lbs. Aluminum skins with foamed-in-place plastic core. Inside dimensions 76" x 76" x 96". Insulated. Highly adaptable. Quickly attachable dolly for towing overland.

Designed for world-wide use — RUGGED, DEPENDABLE, CRAIG-BUILT PRODUCTS LIKE THESE . . .

CONSOLES — For air traffic control and other installations. Provision for remote control equipment, loudspeakers, etc.

REUSABLE CONTAINERS — For transporting and storing airplane parts, optical systems and electronic equipment. Aluminum construction. Built to pass all applicable government specifications.

MISSILE CARRIERS — Lightweight, aluminum construction. Fully tested for shock, vibration, impact and submersion. Craig's missile programs include carriers for Falcon, Petrel, Sidewinder, Terrier, and Sparrow.

RELAY RACKS — Rugged, high strength, aluminum construction general purpose electronic racks. Accommodate standard RETMA panels. Drawers and accessories available.

SPARE PARTS CABINETS — For indoor and outdoor storage. Many sizes and configurations. Removable drawers, doors and covers. Aluminum or steel.

ANTENNA TOWERS — Full information on towers for supporting all types of antennas on request.

COMPLETE INSTALLATION SERVICE — *Craig service includes layout, installation, and check-out of electronic equipment in shelters of all types. Complete systems are ready to operate when they leave the factory.*

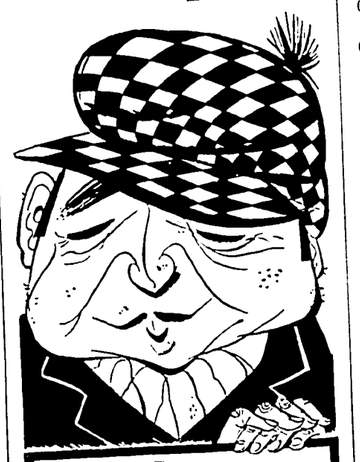
What's New in Caps*



*PI-CAPS®
HIGH VOLTAGE... LOW TOLERANCES

Ideal for AUDIO COUPLING, ARC SUPPRESSION, POWER SUPPLIES, AUDIO BYPASS, ENERGY STORAGE, TV CIRCUITS, COMPUTERS, GEIGER COUNTERS, etc. PAS tolerances can be as low as 1%.

PAS type PI-CAPS are very desirable for high voltage use because of high capacity per volume at high voltage.

CAM type is standard Type 70 cans. Small size for high voltage applications. Combines high volts per mil rating and a high dielectric constant.

Call on us for all your film capacitor requirements. POLYETHYLENE, ACETATE, POLYSTYRENE, and MYLAR® capacitors.

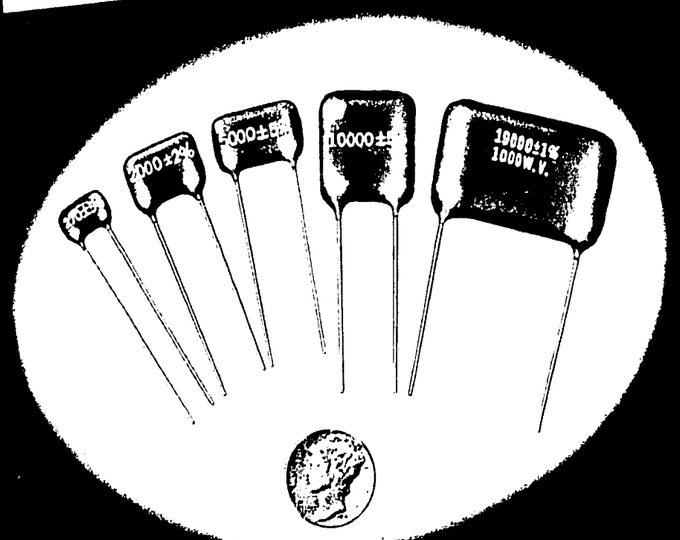
ELMENCO DUR-MICA CAPACITORS



FOR USE IN CIRCUITS REQUIRING HIGHEST RELIABILITY UNDER SEVEREST ENVIRONMENTAL CONDITIONS

•

Now Available:

DM-15
DM-19
DM-20
DM-30
DM-42

CAPACITY VALUES from 1 mmf. to 70,000 mmf.

The Dur-Mica Capacitor is a silvered mica capacitor coated with a specially developed material which provides maximum protection at environmental extremes of moisture and temperature. This combination provides a reliability and life expectancy which far surpasses anything heretofore obtained.

OPERATING TEMPERATURE RANGE
—55°C. to +125°C.

•

MINIMUM INSULATION RESISTANCE
25000 megohms at 25°C.
1000 megohms at 125°C.

•

TEMPERATURE COEFFICIENT
less than 50 parts per million per degree centigrade.

•

STABILITY (CAPACITY DRIFT)
±0.05% +0.1 mmf. max.

COMPONENT RELIABILITY

Life tests presently being performed at 125° C. and 150% rated voltage have passed 10,000 hours without a single failure. This is roughly equivalent to more than 20 years of operation under normal operating conditions.

ARCO Dur-Mica Kits

PACKED IN INDIVIDUAL TRANSPARENT PLASTIC SNAP BOXES PROPERLY IDENTIFIED FOR EASE OF HANDLING.

ARCO DM-15 KIT #10

This handy DM-15 kit consists of five each of 51 capacity values from 1 mmf. to 820 mmf. Tolerance ±5%.

SPECIAL KIT LIST PRICE $95.00

ARCO DUR-MICA KIT #11

This Dur-Mica kit contains five each of 72 capacity values from 2 mmf. to 10,000 mmf. all 500VDCW and ±5% tolerance.

SPECIAL KIT LIST PRICE $250.00

BUILDING THE FUTURE IS A BIG JOB!

The radio-electronic engineers who form the membership of the Institute of Radio Engineers must remain years ahead of actual production, in order to pave the way for the products of tomorrow, through research and development today.

The special issues of "Proceedings of the IRE" help these men transform the theory of today into the production lines of tomorrow. Pictured above are the October 1951 Color Television Issue; November 1952 Transistor Issue; and January 1953 UHF Issue (all now out of print). In 1956, IRE published issues on the Earth Satellite (June); Ferrites (October); and Single Side-Band (December).

Special issues on special subjects are more than usually helpful, but every issue of "Proceeding of the IRE" is filled with facts and figures!

±1%

±1% tolerance capacitors are available from Efcon in production lots. Miniature capacitors of even greater precision will be made to your order, with either polystyrene or Mylar* film dielectric.

Efcon precision miniature capacitors have the lowest dissipation factors of any film capacitors. Both polystyrene and Mylar* film capacitors come in rigid, wax-impregnated cardboard tubes and in hermetically sealed metal cases. The hermetically sealed types feature glass-to-metal, solder-sealed terminals, and meet all applicable MIL specs.

All Efcon capacitors have extended foil construction with leads soldered directly to the foil, to minimize inductance and contact-resistance.

For analog and digital computers, communications filters, pulse-timing circuits and other equipment that demands temperature stability, precision and long-term reliability —specify Efcon capacitors!

WHAT IS AVAILABLE FROM YRAMID

CAPACITORS
A complete line of capacitors . . . electrolytics, paper and metallized paper in standard and miniaturized styles. Featuring many new types for printed circuit applications. All made to standards which exceed even rigid military specifications

SELENIUM RECTIFIERS
A complete line of Radio & TV types . . . the first truly new design in over two decades.

CAPACITOR TEST EQUIPMENT
Model CRA-2 Capacitor Resistor Analyzer featuring quick check-in-circuit testing, moderately priced.

PAPER CAPACITORS
Type 85 LPT
Type CT
"IMP" Molded
Type PG "Glasseal"
CP04, TOCP11

ELECTROLYTICS
Type TD, TIL
Type CDB
Type MC
Type TM
Type DO

OIL PAPER
Type PDM, CP53
Type PTIM, CP25
Type PLMF, CP70
Type PEM, CP67, CP69
Type PKM, CP61 to CP65
Type PJ, CP70

PRINTED CIRCUIT
Type BTS Autocaps
Microlytics
Type ATM Autolytics
Type ATD Autolytics

METALLIZED PAPER
Type MT
Type MPD
Type MPG
Type MPT

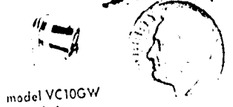
Trimmer Capacitors for Miniaturization and Subminiaturization



model VC10GW
actual size

WHERE DESIGNS CALL FOR MAXIMUM RANGE IN MINIMUM PHYSICAL SIZE

VC9G Trimmer series (lug & lead type for printed circuits)

Model	Capacitance Range (MMF) Min.	Max.
VC9G	0.8	8.5
VC10G	0.8	4.5
VC31G	0.8	12
VC32G	0.8	18
VC42G	1	21
VC43G	0.8	30

VC20G Trimmer series (panel type)

Model	Capacitance Range (MMF) Min.	Max.
VC20G	0.8	8.5
VC21G	0.8	4.5
VC22G	0.7	12
VC23G	0.8	18
VC24G	1	30

VC9GW Trimmer series (4 wire type for printed wiring boards)

Model	Capacitance Range (MMF) Min.	Max.
VC9GW	0.8	8.5
VC10GW	0.8	4.5
VC31GW	0.8	12
VC32GW	0.8	18
VC42GW	1	21
VC43GW	0.8	30

These new miniature types incorporate the exclusive new JFD telescoping tuning assembly. Both the telescoping piston and self-contained adjustment shaft function as a low inductance coaxial assembly within the dielectric cylinder. This innovation makes possible a highly compact variable trimmer piston capacitor of minimum size for the given capacitance range—up to 50% reduction in overall length compared to previous similar types.

VC16G Split stator series (panel type)

Model	Capacitance Range (MMF) Plate to Plate Min.	Max.
VC16G	0.8	2.5
VC17G	1.1	4.5
VC18G	1.8	7.5
VC80	0.4	1.0
VC81	0.6	1.6
VC82	0.85	2.8
VC83	3.0	6.0

The new JFD Split Stator trimmer series was expressly engineered for critical push pull radio frequency circuits and similar sensitive networks. The extreme stability and low temperature coefficient of the quartz dielectric types recommend these trimmers for applications requiring extreme low-loss operation with maximum tuning resolution. Where maximum range for physical size is needed, you have your choice of the JFD glass dielectric split stator type.

JFD keeps pace with new trimmer capacitors ready to meet new challenges. The result is today's JFD line of 42 Precision trimmers (the industry's largest) to meet your most critical network design and production needs.

Write for Bulletins 201A, 202A, 203A and 204A, for comprehensive electrical data on above JFD trimmers.

Bri-Flex

CHASSIS and POWER SUPPLIES

. . . Save You TIME and MONEY

- Combines ready-to-assemble chassis with high quality regulated power supplies — Saves time — Construction starts where it should with the circuits proper.
- Instantly demountable construction for circuit salvage or substitution.
- Two sizes of assembly — 9" and 13½" depth, utilizing three interchangeable chassis plates 4½", 9", and 6¾" deep.
- Standard RETMA overall size for convenient rack mounting. Panel size 8¾" x 19".
- Perforated metal shields available for top and bottom.
- Regulated Power Supplies — constructed on 4½" chassis plate — have extremely low ripple and excellent regulation and transient recovery characteristics.

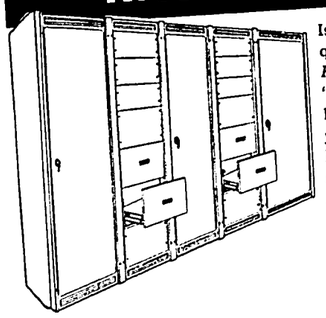
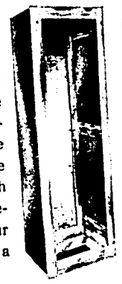
SOLVE THE CABINET HOUSING PROBLEM
WITH **PAR-METAL UNIVERSAL CABINET RACK ASSEMBLIES**





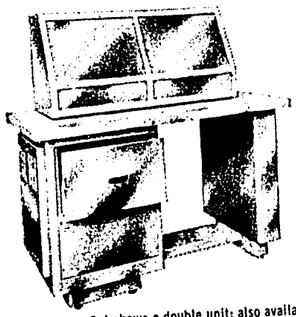
Is it possible to embody "custom-quality" in a standardized unit? *Par-Metal* answers definitely *"yes"*... Indeed, you'll be delighted how easily you can fill your needs with a distinctive Housing from our line of standardized units. And *you'll save money too* — not to mention the time and fuss connected with blueprints when ordering "special" equipment. So give us your problem in metal and enjoy a quick, economical solution.

Only PAR-METAL Universal Cabinet Racks have these adjustable features:

- Solid Sides or Open Sides. Open sides have detachable side panel arrangement. Front Doors are optional equipment.
- Single units, or any arrangement of "multi-racks."
- Vertical Side Supports for adjustable mounting brackets, shelves, and sliding devices.
- Heights: 48⅛", 67⅜", 76⅛", 83⅛".
- Depths: 18", 24". Panel Widths: 19", 24", 30".
- Finishes: Black ripple, grey ripple, primer coat only, grey hammertone enamel, aluminum grey lacquer.

Vertical Side Supports can be used with all our Universal Cabinet Racks. To provide adjustment for mounting brackets, shelves, and sliding devices, holes are drilled and tapped vertically. When installed in *19"* wide racks the clearance between uprights is *17¾"*; in *24"* wide racks clearance is *23¾"*.

A complete line of *standard accessories* such as Roller Trucks, Sliding Shelves, Phono Drawers, Rack Mounting Chasses, Panels, in complete harmony with the proper rack are also available.



UTILITY DESK ASSEMBLIES

These units are admirably suited for control stations, testing apparatus, sound distribution systems, atomic energy installations, etc. They *often eliminate* the need for costly custom-built equipment, as you need only purchase the specific parts you need. The pedestal is *substantially constructed for heavy-duty usage*. Desk Panel Cabinets, Table Tops, Doors, Panels, Pedestals, End Pedestal and Foot Brace, and other parts may be bought as needed.

Cut shows a double unit; also available in single or triple units.

Doors are easily removable, allowing complete access to the *INSIDE FROM ALL SIDES*. Each side is drilled and tapped on "universal" centers so that standard rack panels or doors can be mounted on all sides. Although considerably less in cost than similar "custom-built" units, they are delivered in less time, and avoid the necessity of blueprints, etc.

Mail this coupon for information on how PAR-METAL Racks and Utility Assemblies will save you money!

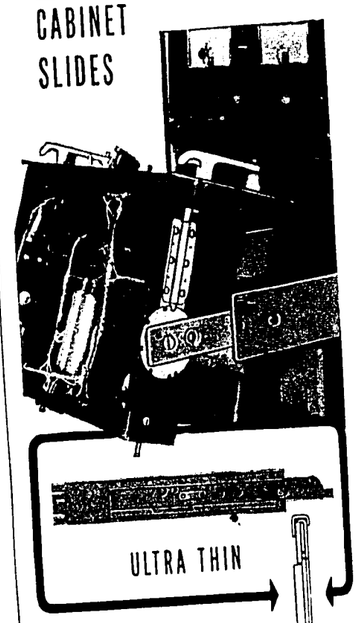
Chassis-Trak
ROLLER BEARING
CABINET
SLIDES



New Chassis-Trak roller bearing slides make your electronic equipment more accessible . . . faster and easier to service. Chassis Trak's ultra thin design, wider bearing rollers support up to 175 lbs. with chassis extended. Rollers assure permanent, smooth slide operation.

PLUS:

- Ultra thin slide design (.350") for maximum use of cabinet interior
- Permanent, dust-repellent, dry lubricant finish
- High corrosion resistance
- Easy installation
- 8 stock lengths, standard width
- Push button emergency chassis removal

New-

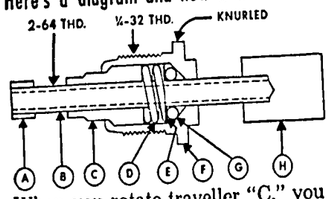
Shock proof Vibration proof

adjustable inductors with direct traverse tuning

Here's a variable inductor you can depend on to stay as you adjust it in spite of rough air and landing shock, battering seas and rocky terrain . . . anywhere mobile equipment goes.

The rugged stability of Forbes and Wagner Variable Inductors comes from *direct traverse* design that *stays* tuned no matter how rough the going gets. With it, you avoid the unpredictable behavior of tension springs. You get critical, *lasting* fine tuning that locking nuts can't give you. And you get freedom from adhesive seals that prevent subsequent adjustment.

Here's a diagram and how it works . . .



When you rotate traveller "C," you impart a linear motion to the core "H." The direction the core moves depends on which way you turn "C." Four silver-plated brass balls, "G," act as rolling contacts, give smooth action to the square threaded 2-64 shaft, "B." Spring "D" and washers, "E" give continuous spring loading to both the traveller and the rider contact balls. The bushing for this motion fits a "D" hole .237" across flat. We furnish a ¼"-32 silver-plated mounting nut.

Range

You can get the Forbes and Wagner Direct Traverse Adjustable Inductor in values from 5 uh to over 10MH. Values, of course, are to your specifications.

Core material

Cores are made of Ferrite or Powdered Iron.

How to get test sample kit

Learn how much more stability you can build into mobile circuits with Forbes and Wagner Direct Traverse Inductors. Let us send you a kit of various size forms and cores for some typical frequencies. You'll receive complete coils from 2 to 1,000 Microhenries to examine and test on your own. Simply write us on your business letterhead. Or, wire or phone us. We'll get your samples to you *fast*.

For uniform high stability . . .

use Forbes and Wagner Direct Traverse Inductors with Corning Direct Traverse Trimmer Capacitors

Our direct traverse unit design is the same as you get in well-known Corning Glass Works' D. T. Trimmers. Corning's units are rugged and stable under severe mechanical and thermal conditions. Available with brass or Invar cores. Ranges from 0.5-3.0 mmfd to 1.0-12.0 mmfd. You need only one tool to tune both inductors and trimmers.

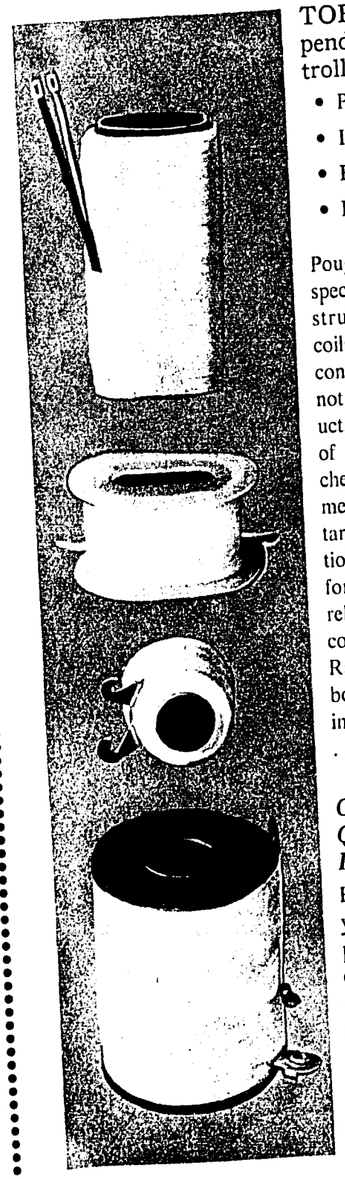
POUGHKEEPSIE

COILS



TOROIDAL . . . Dependable - Quality Controlled - Low Cost

- POTTING
- IMPREGNATING
- ENCAPSULATION
- HERMETICALLY SEALED

Poughkeepsie Coil Co. specializes in accurately-constructed quality-controlled coils. Our coils are quality-controlled in every step . . . not only in the finished product, but with rigid inspection of materials and continuous checks in processing. They meet the most exacting military and commercial specifications. We manufacture coils for electrical, solenoid and relay applications . . . in computers, clocks, timers. Random-wound interweave, bobbin and toroid coils . . . impregnated, molded or potted . . . in any size.

COMPARE OUR QUALITY AND PRICES . . .

Here's our offer! Send us coils you are now using. Let us duplicate them. Then try our coils. Test them. We will compete with anyone on a quality and performance per dollar value.

Factory representatives throughout the country

Choice.....

Not Chance has made Torwico a leading supplier of magnetic components for the military and for industry.

Our technical staff is a select group of seasoned engineers with long and successful experience in research and design of the type of magnetic components we manufacture. Equally mature and skilled are our key production supervisors and employees. These capabilities combined with the latest and best in necessary equipment and plant facilities assure our customers of the highest product quality obtainable.

While busily engaged in contributing its share to the nations latest and most advanced defense weapons, Torwico continues to serve its ever growing list of satisfied customers who use its products in the many and varied industrial electronic applications.

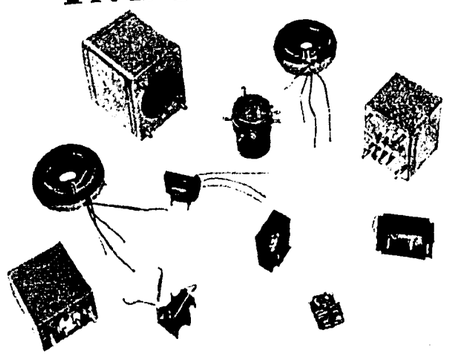
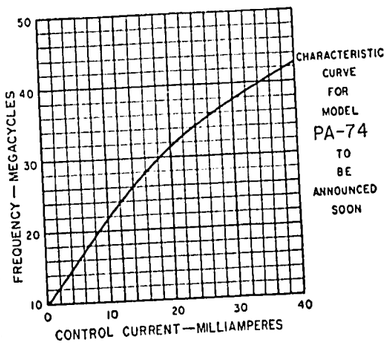
VARI-L

Electrically-Variable INDUCTORS



Let our five years of design and manufacturing experience in this *exclusive* field work for you.

We maintain a line of stock units, the characteristics of which are fully described in our Catalogue #E 9/55 (available upon request) and which are usually on the shelf for same-day-as-order shipment.



From these types our customers can often determine the efficacy of the VARI-L inductor in their proposed circuits and then describe a tailor-made version to suit their exact needs.

The custom-designed models we have recently produced include the following:

VHF types — used at frequencies as high as 400 M.C. Significant new work in this region was in progress as this advertisement went to press.

SUB-MINIATURE types.

FREQUENCY-MODULATOR types — with near-zero-drift temperature compensation for center-frequency stability.

MULTI-CONTROL winding types — for combined A.F.C. and F.M. from the same inductor.

OVENIZED types — both inductors and complete low-drift oscillators.

SYNTHESIZER types — for adaptability to wide ranges of frequencies through the use of shunt and series coils.

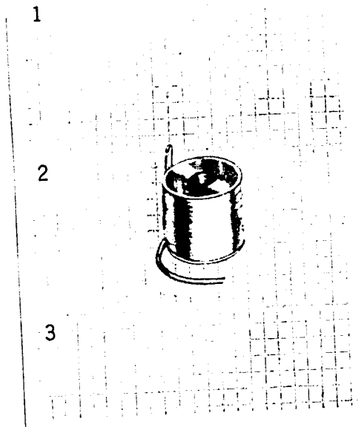
ECONOMY types — with all "frills" removed, for commercial applications.

Full details concerning these and other special VARI-L units will be gladly supplied. We urge you to put our knowledge of this art to work on your problem.

Vari-L Company, Inc.

432 Fairfield Ave. • Stamford, Conn. • Phone: Fireside 8-0091

For details, circle #260 on Reader Service Card.



miniature coils withstand 500°F. plus

TUR-BO JET PRODUCTS CO. is now in production on relay type coils that operate efficiently at −90° to +500° F. ambients. This unprecedented temperature range is made possible by 100% Teflon* construction. Coils are non-gassing.

Any size down to sub-miniature is feasible. We use Teflon wire as small as #50 AWG.

More ampere turns. Tur-Bo Jet's new coil design establishes a new maximum —previously unattainable—in space factor. This enables us to get more copper onto a winding without increasing your present dimensions. In most cases, we can give you more ampere turns than you are now getting.

Write for bulletin HT. Or send us your specifications.

Tur-Bo Jet also winds to class A, B, H and C requirements.

MAGNETIC COILS

FOR THE

ELECTRONICS INDUSTRY

To many people, a coil may seem like a simple run-of-the-mill item, but we here at the WINATIC CORPORATION realize what an important part it can play in precision electronic equipment. As a result, our electronic coils are rapidly earning a name for themselves among discerning customers who insist upon uniform high quality at reasonable costs.

• QUALITY • SERVICE • DEPENDABILITY •

Coils made to customer specifications!

We welcome the opportunity to discuss with you your coil problems.

PACKAGE YOUR CIRCUITRY FOR UNITIZATION

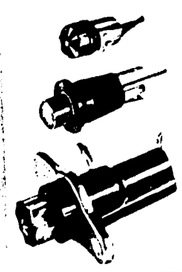
ALDEN TERMINAL CARD MOUNTING SYSTEM
Simplifies and speeds your planning and layout. Organizes your circuitry function-by-function in compact planes for easy mounting and accessibility for servicing. Complete component service provides you with Planning Sheets, pre-punched cards, terminals, card-mounting sockets, terminals and brackets.

ALDEN PLUG-IN PACKAGES
Give you compact plug-in units for packaging small functions of circuitry. Easy to assemble and provide ultimate in accessibility for checking or replacement servicing. Available in 7-pin min., 9-pin min., 11-pin and 20-pin Non-Interchangeable.

ALDEN BASIC CHASSIS
Provides plug-in accessibility for housing your terminal card circuitry and mounting components. Has quick lock-in and ejecting devices and provides for one point of check of all inputs and outputs. Available in widths of 2", 4", 8" and 17". Can be rack mounted using Alden Rack Adapter

ALDEN MOBILE UNI-RACK
Provides ultra-compact mobile housing for your Alden Basic Chassis. Takes up to 3 levels of Plug-in Chassis in combinations of 2", 4", 8" or 17". Ideal for instrumentation, test gear, etc. Has line cord and fused switch panel.

MONITOR EACH CIRCUITRY FUNCTION



ALDEN FRONT PANEL "TELL-TALES"
Monitor your on, off, continuous or cycling functions with tiny Alden Pan-i-Lites. Ultra-bright, wide visibility. Five colors, five voltages, Push-in or saddle mount.

Pan-i-Lite Switch is ultra-compact momentary contact indicator switch. When pressed, light glows when switch closes. Five bright colors, three voltages. Snap ring mount.

Spot blown fuses with compact Alden Fuselites. Fuse blows — neon glows. Fuse replaced from panel. Mount by eyelet or spot-weld. In 6, 12, 28, 110 and 220 volt.

ALDEN MINI-TEST JACKS & CORDS
Tiny Mini-Test Jacks provide space-saving, color-coded check points for critical voltages. Available in phenolic, nylon or genotron. Seven brilliant colors. Nut or eyelet mounted. Long life beryllium copper, silver plated contact.

Unbreakable Mini-Test Prods with molded-in pin and lead are ideal for instruments, test sets, metering circuits, and patch panels. Non-kinking lead wire. Standard colors Red or Black. Standard lead length 18" or to your specs.

Write today for detailed specifications and samples, giving us complete information on your application to:

Give your equipment this flexibility...

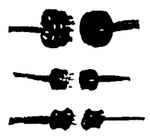
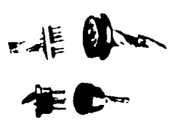
WRITE FOR FREE 250 PAGE HANDBOOK.
Be sure your engineers are working with the Alden Handbook. Presents complete line of basic components adapting your equipment to plug-in unit construction.

MAINTAIN HIGH FIELD RELIABILITY WITH ALDEN CABLES AND CONNECTORS



ALDEN UNIT MOLDED CONNECTORS
A whole series of new high reliability connectors Leads and contacts are integrally molded in a single shot of insulation carefully selected for its mechanical and electrical characteristics. A patented feature allows the use of highly resilient, long life punch press contacts. Available in a variety of standard types and layouts.

ALDEN UNIT MOLDED CABLE ASSEMBLIES
Advanced molding techniques are used to provide you with complete integral molded insulation cable assemblies. You can have a choice of several standard designs in a variety of layouts

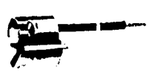


ASSEMBLED CONNECTORS AND CABLES
Here's a standard series of pre-wired assembled connectors from one to 11 contacts, phenolic insulated. Leads are 'top-connected" for positive strain relief to resilient long life punch press contacts. Just specify connector, lead lengths, and we assemble.

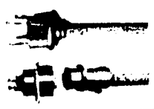
TUBE CAP CONNECTORS
Available in phenolic or integral molded assemblies in a variety of insulations with or without integral molded circuit components such as resistors, condensers, corona shields, etc. Leads are tailored to your specs so that complete assembly is ready to put into your equipment.

PLAN FOR YOUR ELECTRICAL CIRCUITRY

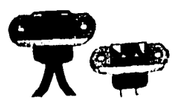
INSULATED FUSEHOLDERS
Compact "Safety" Type fuseholder, UL listed for 110V, 15 amps. Features — controlled contact pressure — fuse ejector spring — "U" shaped contacts.



DIAL LIGHT SOCKETS
Here's the simplest, yet most reliable of dial light sockets. One of a series of four standard bayonet types for one or two wire installations. "Center file" action allows lead to "bite" into bulb contact. Positive pressure locks bulb in — prevents rattling — will not fall out. Produced on automatic machines for low cost — fast delivery.



DETACHABLE LINE CORDS
For quality equipment — 2 and 3-wire UL listed cord sets. Unit molded male and female ends are neat, compact. Chassis connector eyelets in for fast assembly—eliminates need for UL knots, grommets.



AC CONVENIENCE OUTLETS
Compact MINI-SPACE OUTLETS for all types of electrical or electronic equipment whenever power take-off convenience is needed. Available with solder tabs or leads tailored to your specs.

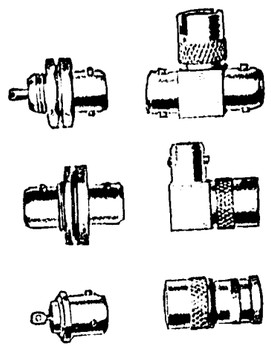
DAGE Coaxial Cable RF CONNECTORS

meet all your circuit design, mounting and environmental requirements

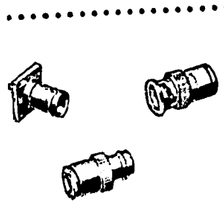
DM series

Designed for sub-miniature applications

• Only half the size of standard BNCs • Twelve polarity groups—two and three lug • Vibration proof bayonet locking (MIL-C-5015) • Teflon insulators permit use over wide temperature range with low electric loss • .002" silver plating and gold flash affords excellent corrosion resistance

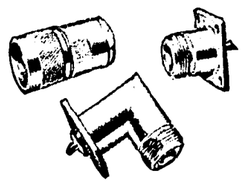


SHOWN ACTUAL SIZE



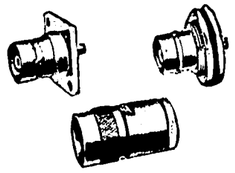
BNC series

BNC connectors are designed for use with miniature RF cables. Small, lightweight and weatherproof, all have the quick-disconnect bayonet locking feature. Teflon insulators assure low electric loss at high temperatures. Manufactured to MIL-C-3608 specs. Frequency limit: 10,000 mc.



N series

Low voltage, constant impedance connectors for use with medium sized cables. Provide excellent VSWR at frequencies up to 10,000 mc. Available in both weatherproof and non-weatherproof types. Screw type coupling ring locking. Maximum voltage: 500v. Meet MIL-C-71A specs.



C series

A newly developed line of weatherproof connectors for use with medium sized RF cables. Features several design improvements over other connectors, including improved clamping mechanism for excellent cable grip, and a silicone rubber gasket for moisture-proof sealing.

Write for your free copy of Catalog No. 301. It contains complete engineering data on all Dage RF Coaxial Cable Connectors.

Q. Coaxial Connectors?

A. COAXIAL CONNECTOR CO., Inc.

- When you need coaxial connectors, think of Coaxial Connector Co., inc.
- Our precision-engineered connectors are quality controlled to meet and surpass MIL specs and are top-rated throughout the industry.
- If you need design and engineering assistance to solve your special requirement problems, our expert engineering staff will put their skill to work for you.
- This is typical of the many special types of connectors that we design and manufacture for nuclear work and other applications.
- To see them all, send for our catalog.

HI-VOLTAGE UHF TYPE

C OAXIAL CONNECTOR

- The Hi-Volt 259 and 239 are designed expressly for high voltage application where RG cable is used in conjunction with power supplies. These connectors are rated for 5000 volts DC.
- The assembly of the cable to the connector employs the same techniques as the conventional UG, UHF type connectors.
- These connectors are not impedance matched, but may be used in the same circuitry where the S0239 and PL259 are employed.

C OAXIAL CONNECTOR CO., INC.

JACK PANELS and PATCH CORDS
Both standard broadcast types and custom built jack panels as used in a wide range of instrumentation and control applications together with a complete complement of patch cords are available. Size range of special panels run from two jacks up to jumbo sizes with about one thousand jacks.
JACKS AND PLUGS
A complete selection of types suitable for all applications. Built for numerous special uses such as high temperature service, in thermo-couple circuits, subject to heavy shock, etc.

HEADSETS
Thirty-five years of continuous production has produced fourteen basic types ranging from substantially all military types to specialized low cost units suitable for incorporating in toys as a sound generating device. All basic types produced in a wide assortment of variations.
You'll find TRIMM offers a wide selection of stock items, and an almost unlimited variety of manufactured to order products falling within the product classifications shown above. For further information contact our engineering department.

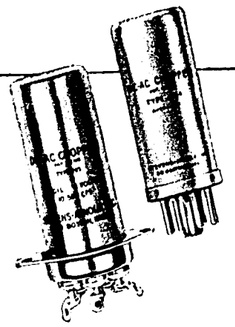
FREQUENCY DOUBLER TYPES ALSO

DC-AC CHOPPERS

For 60 Cycle Use

There are twenty-two different types, both single and double pole, built to rigid commercial specifications with the emphasis on long life, low noise level, and extreme reliability. Please write for Catalog 370.



DC-AC CHOPPERS

For 0–500 Cycle Use

All the usual military specifications are met with liberal factors of safety. Before any Chopper is shipped, it is tested twice over the range of −65°C +85°C to give double proof of stamina. Each production lot sample life tested. Please write for Catalog 280.

ULTRA HIGH SPEED RELAYS

Operating time 200 microseconds. Mount in any position. Will cover the range of −65°C +85°C and are factory sealed. Please write for Catalog 337.

RESONANT RELAYS

Permit remote control by radio or carrier current through frequency discrimination. Relays operate only when energized at rating and reject all other frequencies. Eleven types are offered in the range of 153–442 cycles. Please write for Catalog 335.

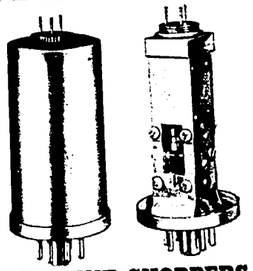
JAMES



INSTRUMENT CHOPPERS

Detects signals as low as one microvolt; center pivot design for operation over wide range of temperature, vibration, shock; shielded for minimum residual noise. Models operate from D.C. switching to 500 cps.

MINIATURE CHOPPERS

SPDT and DPDT models, 7 and 9 pin miniature configuration. Center pivot for operation over wide environmental range.

COAXIAL CHOPPERS

For low loss switching of high frequency signals up to 500 M.C. Used in airborne direction finding and test equipment.

POWER VIBRATORS

A complete line—commercial and military. Special designs for any power conversion problem. Consultation with JAMES engineers is solicited.

MILITARY VIBRATOR

Power Supplies

Widely used JAMES power supplies, with both vibrators and transistors, are custom designed and manufactured for use in communications equipment of every type—airborne, vehicular, sonar bouys, missiles, telemetering.

PRECISION FREQUENCY

Power Supplies

A wide selection of standard types and models for conversion from mobile D.C. sources. "1600" series for secondary output of 117 volts; 60 cps. ± 1 cps.

TRANSFORMERS

JAMES has a complete specialty transformer manufacturing facility for vibrator and chopper applications.

JAMES VIBRAPOWR COMPANY
4036 N. Rockwell St. • Chicago 18, Ill.

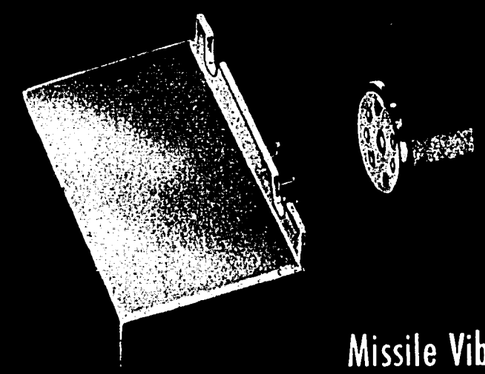
New from VRL



Missile Vibrator

400 cps 200-watt

- Hermetically sealed
- Temperature: 125 C plus
- Plugs into hermetically sealed miniature base
- Will stand missile shock, vibration and acceleration
- Over 90% conversion and inversion efficiency

This new VRL vibrator makes possible the design of rugged, high-efficiency power supplies occupying only 0.25 cu. in. per watt and limited in temperature only by limitations of rectifying and filtering components.

For long life applications, VRL has conversion and inversion circuitry providing substantially zero make and break energies at powers of up to one kilowatt, with vibrator life measured in thousands of hours.

OTHER PRODUCTS

VRL also makes ruggedized 400 cps sub-miniature vibrators and supplies for powers of up to 10 watts, now in use in beacons and other small airborne devices.

Part of the VRL contribution to the field of Vibrator and Transistor Power Supplies is the miniaturization of transformers and chokes to formerly unattainable levels.

Send us your requirements. Over 200 different Power Supply Designs are available to choose from, or we shall be glad to quote on a unit specifically designed to your needs.

Performance proven magnetic ferrites available for every electronic application

Computer and Automation Systems Designers!

Ferramic memories provide a new design concept in the area of computers and automation. Magnetic memories combine increased speed, accuracy and reliability with light weight, compact size. Write for bulletins on cores or complete memory planes.

General Ceramics ferrites for television, radio and instrumentation offer designers and engineers a wide range of economical standard components. All are application tested for highest efficiency electrically and mechanically. The fact that leading electronic manufacturers specify Ferramics is due to the program of continuing research and equipment modernization by which General Ceramics keeps pace with the industry's needs as to quality *and costs!* Bulletins are available; write to General Ceramics Corporation, Keasbey, New Jersey, Dept. ID.

What's his number?

"Why don't Directory Publishers wake up?" a friend asked me. "At least one-third of my time on every long distance call is spent in finding the phone number."

That was enough for IRE. Two years ago we started compiling phone numbers. In the 1955 IRE DIRECTORY more than 4000 firms listed theirs and the tempo of an industry is up paced!

55,000 copies of the IRE DIRECTORY serve as "The Telephone Book of the Radio Electronic Industry"—a service which pays off to every one of its 555 advertisers in increased usefulness and reference.

ELECTROMAGNETIC CORE PARTS AND SHIELDS...PRECISION MADE BY MAGNETIC METALS COMPANY

Hayes Avenue at 21st Street

cores + engineering + economy + volume = the leader

ENGINEERED ECONOMY* IRON CORES of course!

We are proud as the originators of ENGINEERED ECONOMY* IRON CORES that we have been able to reduce the prices of our products so tremendously in the past few years. This has been achieved through constantly increasing volume production, reduction of costs through improved manufacturing techniques and the use of automation. We now have better and more uniform quality than ever before.

Now, you can select from over 19 types of ENGINEERED ECONOMY* IRON CORES where previously we had to produce over a hundred. Fewer varieties enables us to stock more and sell at lower prices. We invite your inquiry.

*trademark

Also, custom iron cores to your specifications.

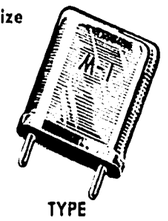
You Can Rely On mcCoy for UNIFORM, DEPENDABLE PERFORMANCE

in Standard Size



Hermetically sealed unit. Plated crystal. Frequency range 500 kc. to 125 mc. Meets government specifications MIL-C-3098A and CAA-R-916. Also ARINC No. 401. Proven in stationary, mobile and airborne applications. For wire leads specify M-4.

TYPE M-1

RUGGED CRYSTAL UNITS

and Subminiature

The McCoy "McMite." Hermetically sealed precision unit incorporates standard size stability, dependability and performance into a subminiature size. Meets all military specifications in its range from 5 mc. to 125 mc. For plug-in type specify M-21.

TYPE M-20

mcCoy ELECTRONICS COMPANY

MT. HOLLY SPRINGS, PENNA.

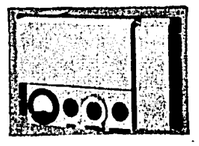
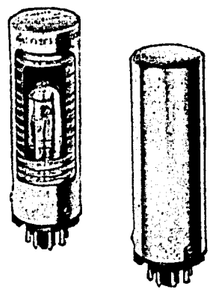
PACKAGED FREQUENCY MANAGEMENT

JK PRODUCTS

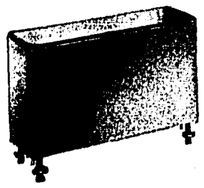


JK Sulzer Frequency Standard: For your most precise laboratory measurements, the JK SULZER 1 megacycle Frequency Standard provides stability of better than 1 part in 10^9 per day. Frequency is variable over a range of 0.9 cycles or more, and capable of being reset to 5 parts in 10^{10}.

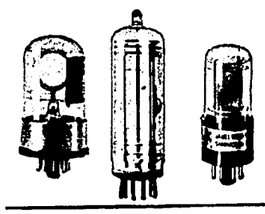


JK Thermystal: An advanced-design frequency control unit combining plug-in simplicity with extreme precision. ***Frequency stability:*** 30 to 900 kc, ±.0001%; 1000 kc to 150 mc, ±.00005%.

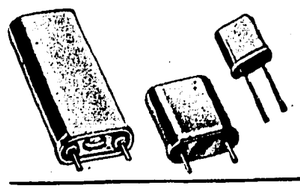
JK Transistor Oscillator: Complete, compact, precise plug-in signal source providing fixed temperature and humidity environment for transistor and circuitry elements. ***Frequency stability:*** (24-hr. period) 1 part in 10^6.



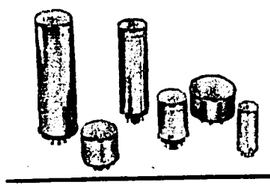
JK Crystal Filters: Compact, rugged, hermetically-sealed and stable, JK CRYSTAL FILTERS (band pass filters) have a ***Frequency Range:*** 1 mc to 17.5 mc., and are available for special filtering purposes to 150 mc. ***Band Width*** at 6 db: 0.01% to 4% of nominal on all frequencies, and up to 12% for certain frequencies.



JK Glasline Crystals: For ultra stable frequency control, JK GLASLINE CRYSTALS provide unprecedented stability and reliability. Compact, evacuated and hermetically-sealed against moisture, contamination, shock, and barometric pressure. Over a complete range of 800 cycles to 5 mc. and up.



JK Military Types: Hermetically-sealed, JK MILITARY TYPE CRYSTALS are metal-cased and in ***Frequency Ranges:*** 16 kc to 100 mc.



JK Ovens: Capable of maintaining set temperatures around components or circuitry with less than ±1° C. variation over the range of −55° to +100° C., JK OVENS are light, compact, inexpensive, uniform and reliable.

THE JAMES KNIGHTS COMPANY—SANDWICH, ILLINOIS

For details, circle #287 on Reader Service Card.

From 747 pages in 1949 to 2417 pages in 1956—that's how advertising in "Proceedings of the I R E" sprouted in seven short years. It's a whopping 324% increase.

Not to be outdone, the annual IRE DIRECTORY also shows a mushroom advertising growth of 312%—from 133 pages in 1949 to 414 pages this year.

So rapid is progress in the radio-electronic field, so far-reaching is each new engineering achievement, manufacturers must run to keep from standing still. It's the radio engineers—designing, planning, producing and buying—who are the backbone and brains of this vast industry. They are the "thinking engineers"—members of The Institute of Radio Engineers—the men you most want to sell.

Engineers are educated to specify and buy.

An Announcement Of Importance

TO COMMUNICATION ENGINEERS AND DESIGNERS

Scientific Radio has felt that, in order to move ahead with the design thinking and planning of the communications engineer, it was necessary to take a fresh look at our own technical and engineering staff.

As a result of this appraisal, Scientific has developed the largest and most fully qualified staff in the world in the field of frequency control and its attendant fields of application.

Besides maintaining the largest crystal research laboratory in the country—located at Estes Park, Colo.—and one of the major production units—at Omaha, Nebraska—Scientific is building a new facility for specialized production at Loveland, Colorado.

Scientific makes available for the communication industry:

- Standard military-types of crystals
- Standard civilian-types of crystals

and more important, QUALITY PRODUCTION in the field of:

- Extremely high precision crystals
- New designs in low frequency crystals
- Filter crystals

and

ESPECIALLY IMPORTANT CRYSTAL FILTERS

If you are interested in the highest quality and the greatest precision, carefully evaluate the potential and performance of your crystal supplier against the standard of Scientific Radio Products, Inc.

CRYSTALS OF THE HIGHEST QUALITY FOR EVERY PURPOSE

One of the Oldest Manufacturers of Crystals in the United States.

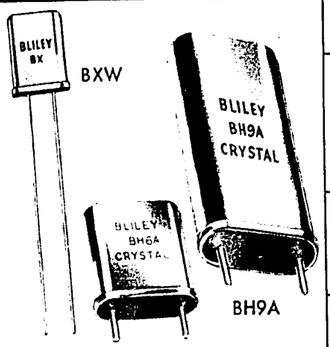
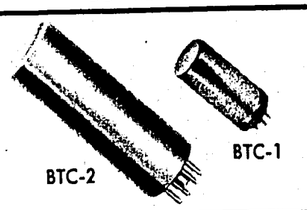
BLILEY CRYSTALS • BLILEY OVENS



BLILEY HOLDER	DESCRIPTION	MIL CRYSTAL UNIT
BH6A (MIL HOLDER HC-6/U)	Hermetically sealed unit. Also available with wire leads as "BH6W." Freq. Range: 200kc to 125mc. Dimensions: 25/32" long x 3/4" wide x 11/32" thick (excl. pins). Bulletin #493.	CR-18/U, CR-19/U, CR-23/U, CR-25/U, CR-26/U, CR-27/U, CR-28/U, CR-32/U, CR-33/U, CR-35/U, CR-36/U, CR-44/U, CR-45/U, CR-46/U, CR-47/U, CR-48/U, CR-51/U, CR-52/U, CR-53/U, CR-54/U, CR-62/U
BXW (MIL HOLDER HC-18/U)	Subminiature hermetically sealed unit, wire leads. Also available plug-in as "BXP." Freq. Range: 10mc to 125mc. Dimensions: 33/64" long x 27/64" wide x 11/64" thick (excl. wire leads). Bulletin #502.	CR-55/U, CR-56/U, CR-59/U, CR-60/U, CR-61/U
BH9A (MIL HOLDER HC-13/U)	Hermetically sealed unit. Freq. Range: 4kc to 200kc. Dimensions: 1-17/32" long x 3/4" wide x 11/32" thick (excl. pins). Bulletin #501.	CR-37/U, CR-38/U, CR-42/U, CR-50/U

	DESCRIPTION	DIMENSIONS
BG9 SERIES BG9D-S, 100kc Std. BG9A-S, 1000kc Std.	Sealed-in-glass crystal unit provides exceptional stability with minimum ageing. Used as reference source in secondary frequency standards. Bulletins #491 (1000kc) and #492 (100kc).	2-1/2" long x 1-9/32" dia. (excl. pins) Octal Base
BG6 SERIES	All glass, vacuum mounted crystal unit for tight tolerance performance with minimum change due to ageing. Advance process techniques assure high reliability. Freq. Range: 3mc to 125mc. Bulletin #496.	1-3/8" long x 3/4" dia. (excl. pins) Small Button Miniature Base
BG12 SERIES BG12G-S, 100kc Std.	For primary frequency standards. Precision sealed-in-glass crystal unit combines high stability performance with minimum ageing. Temp. coefficient: Less than 0.2ppm per degree C. between +65°C. and +75°C. Bulletin #498.	3-11/16" long x 1-23/32" dia. (excl. pins) Octal Base



BTC-1	Subminiature hermetically sealed package combines crystal control and temperature stabilization in a single plug-in unit. Freq. Range: 5mc to 125mc. Stability: ± .0003%. Bulletin #494.	1-5/8" long x 51/64" dia. (excl. pins) Std. Noval 9-Pin Base
BTC-2	Hermetically sealed package combines all-glass vacuum mounted crystal with precise temperature control. Freq. Range: 4kc to 125mc. Stability: ± .00004% in range 800kc to 125mc. Bulletin #497.	3-3/4" long x 1-1/4" dia. (excl. pins) Octal Base

BLILEY TYPE	DESCRIPTION
TCO-1 OVEN SERIES	Plug-in ovens for temperature control of single crystal unit in Bliley BH6A or MIL HC-6/U holder. Stability: ±3°C. at 75°C. or 85°C. Supplied for 6.3 volt, 12.6 volt or 26.5 volt operation. Dimensions: 1-9/16" long x 1-3/16" dia. (excl. pins). Octal Base. Bulletin #499.
TCO-2 OVEN SERIES	Plug-in ovens for temperature control of two crystal units in Bliley BH6A or MIL HC-6/U holders. Stability: ±3°C. at 75°C. or 85°C. Supplied for 6.3 volt, 12.6 volt, or 26.5 volt operation. Dimensions: 1-9/16" long x 1-3/16" dia. (excl. pins). Octal Base. Bulletin #499.
TCO-21 OVEN SERIES	Plug-in ovens for temperature control of two crystal units in Bliley BH6A or MIL HC-6/U holders. Stability: ±2°C. at 75°C. or 85°C. Supplied for 6.3 volt, 12.6 volt or 26.5 volt operation. Dimensions: 1-9/16" long x 1-3/16" dia. (excl. pins). Octal Base. Bulletin #499.
TCO-2L TCO-2P OVENS	Plug-in ovens for temperature control of two crystal units in Bliley BH9A or MIL HC-13/U holders. Stability: ±4°C. at 75°C. TCO-2L for 6.3 volt operation; TCO-2P for 12.6 volt operation. Dimensions: 2-3/16" long x 1-3/16" dia. (excl. pins). Octal Base. Bulletin #499.
TC91 TC92 TC93 OVEN SERIES	Precision temperature control ovens for Bliley crystal units: FM6, BH81A, MC7, BH8, MC75, MS46A, AR23W, BG9A series and BG9D series. Stability: ± 1°C. Supplied for 6.3 volt, 18 volt or 115 volt operation. Dimensions: 4-7/16" long x 3-3/4" dia. (excl. pins). Giant 7-pin base. Bulletin #500.
TC97 OVEN SERIES	High precision temperature control ovens for Bliley crystal units: BH8, MC75, MS46A, and BG12G-S. Stability: ±0.25°C. Supplied for 6.3 volt operation. Dimensions: 4-23/32" long x 4-1/2" dia. (excl. pins). Giant 7-pin base. Bulletin #500.

SOLID ULTRA-SONIC DELAY LINES

Production quantities and prototype development of both fixed and variable lines.

Complete range of length to customers' specifications for *radar* and computer applications.

Andersen Laboratories INCORPORATED ADams 3-4491

501 New Park Avenue
West Hartford 10, Conn.

For details, circle #291 on Reader Service Card.

SOLID ULTRASONIC DELAY LINES by BLILEY...
FROM 3 TO 4500 MICROSECONDS

Solid ultrasonic delay lines by Bliley are supplied for any specified delay interval from 3 to 4500 microseconds.

Without resorting to temperature control and temperature adjustment, the following table shows practical tolerances that can be maintained with Bliley delay lines.

2-10	microsecond	delay	±.05%	at 25°C
10-50	microsecond	delay	±.03%	at 25°C
50-100	microsecond	delay	±.05%	at 25°C
100-500	microsecond	delay	±.07%	at 25°C
500-4500	microsecond	delay	± .1%	at 25°C

Special bonding methods (transducers to fused quartz) and hermetically sealed cases assure permanent performance characteristics from - 60°C to +85°C.

BLILEY ELECTRIC CO., UNION STATION BLDG., **ERIE, PA.**

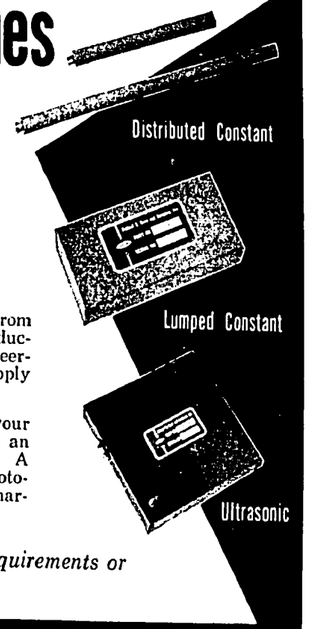
Brew Delay Lines meet exacting specifications



Whatever your delay line requirements, from prototype to large scale manufacture of production units, Brew offers you the design-engineering experience and complete facilities to supply your most exacting specifications.

Brew Delay Lines are custom made to your requirements and are available covering an extremely wide range of characteristics. A Laboratory Report accompanies every prototype showing your specifications and the characteristics of the prototype.

Send us specifications on your requirements or send for your copy of catalog 54.

CRYSTALS

OVENS

CRYSTAL FILTERS

PACKAGED OSCILLATORS

CRYSTALS Bulova crystals are available for any frequency from 4 KC through 100 mc. Featured are the ST "shock mounted" series from 16 KC through 500 KC. Crystals are available to meet all current military specifications.

OVENS A complete line of ovens from the multi-purpose AM-100 to the specific application BHC series. Temperature stabilization can be held as close as .1°C. Crystal ovens are available which will hold up to 20 units in the subminiature series.

CRYSTAL FILTERS Bulova filters can be supplied with center frequencies from 10 KC through 20 mc. Bandwidths of .01% to 8% of center frequency. Slope factors 60/6. Ratio of bandwidth at 60 db to bandwidth of 6 db as steep as 1.4/1 with single sideband filters having greater slope.

PACKAGED OSCILLATORS A complete range of frequencies from 8 KC through 70 mc is available as tube type or transistorized oscillators. The Bulova OS-1 (picture above) will maintain an accuracy of .0012% over −55°C. to +80°C. ambient. This tube type oscillator is available from 180 KC through 50 mc.

Bulova "custom engineering" services are available to fulfill your every frequency control requirement.

4 Environmental Testing
5 Attenuation Test Consoles (per MIL-STD-220)

FROM GUIDED MISSILES TO ATOMIC SUBMARINES...

FILTRON PROVIDES RF INTERFERENCE FILTERS, RF FIELD ENGINEERING SERVICE, RADAR PULSE PACKAGES, PULSE FORMING NETWORKS, SPECIALTY CAPACITORS, DELAY LINES and COILS.

From the best equipped laboratories in the world—staffed by FILTRON's experienced engineers, tomorrow's electric and electronic components and systems are made "Radio Interference Free," to meet all MIL Specifications.

FILTRON's Trigger-Pulse Packages are designed around a carefully matched and balanced (1) pulse network, (2) charging choke and (3) pulse transformer of the line-type modulator. They can be engineered to generate pulses having sufficient power and impedance to trigger any high power hydrogen thyratron. High Power Pulse Packages are schematically similar, but will generate an optimum required pulse shape for specific radar system transmitted-pulse parameters. ALL Filtron pulse packages are balanced, inspected and 100% tested before leaving the plant.

FILTRON's four plants have complete production facilities for capacitor manufacturing, coil winding, metal fabricating and stamping, tool and die departments and assembly divisions.

Send for our 20-page RADIO INTERFERENCE FILTER CATALOG.

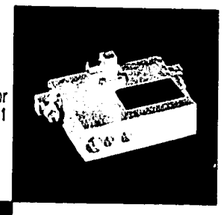
COAXIAL Filters



Diplexer for AN/ARC-27 and AN/ARC-21

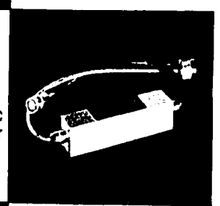
MICROPHASE has in production filters using *all* of the common coaxial filter techniques: tubular, lumped-constant, transmission-line, and split block — and some unique ones, too.

Tubular Low-Pass Filter

HIGH-PASS • LOW-PASS • BAND-PASS

VHF • UHF • MICROWAVE

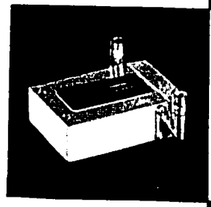
DIPLEXERS • MATCHING NETWORKS



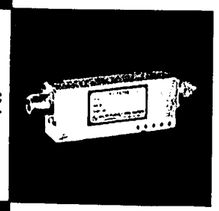
Miniature 1450-mc Low-Pass Filter

Special electrical characteristics recently developed include: very sharp cutoff, unusually broad passbands, attenuation up to 100 db, and high attenuation over broad frequency ranges.

Miniaturized filters, and filters to meet the tough environmental requirements of MIL-E-5400A, MIL-T-5422C, MIL-E-8189A, are available to suit your requirements.



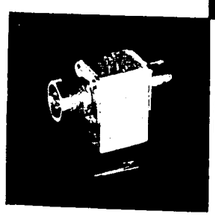
Miniature 400-mc Low-Pass Filter



Sharp-Rise 2700-3000-mc Band-Pass Filter

Complementary filter networks (diplexers) have been developed to match two equipments (such as the AN/ARC-27 and the AN/ARC-21) to one antenna, without interference or loss of power.

MICROPHASE products have contributed significantly to the improvement of ground, marine, aircraft, and missile systems for communication, navigation, detection and electronic countermeasures. Their performance reliability has been proved in a variety of field applications.



Sharp-Rise 5000-mc High-Pass Filter

Our engineering staff has experience and resourcefulness unique in the art of filter design and construction. Write or call us about your special filter problem, or for the name of our sales engineer nearest you.

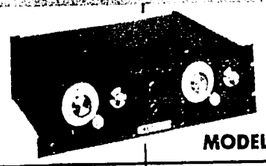
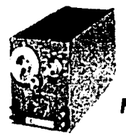
SKL PRECISION INSTRUMENTS FOR YOUR MEASUREMENT PROBLEMS

• QUALITY • ACCURACY • RELIABILITY

VARIABLE ELECTRONIC FILTERS: SERIES 300



MODEL 302



MODEL 300

		MODEL 302	MODEL 300
FUNCTION		High or Low Pass Band Pass or Reject	High or Low Pass
Cut-off Freq. Range		20 cps to 200 kc	20 cps to 200 kc
Attentuation Rate	Per Section	18 db/octave	18 db/octave
	Max.	36 db/octave	18 db/octave
PASS BAND		2 cps to 4 mc	2 cps to 4 mc
DIAL ACCURACY		± 3% to 20 kc ± 5% above 20 kc	± 3% to 20 kc ± 5% above 20 kc
INSERTION LOSS		0 ± 1 db	0 ± 1 db
NOISE LEVEL		60 microvolts	60 microvolts

. . . For elimination of unwanted signals in your data

. . . For studies in vibration, dynamics, telemetering, acoustic noise and speech

. . . Continuously variable pass band permits clean recordings of only the data you want

. . . As well as selection of discrete frequencies when recording or analyzing data

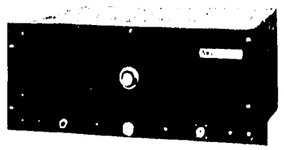
The Series 300 Variable Electronic Filters were developed to meet the problems of inflexibility and expense inherent in conventional multi-frequency filters. Where the fixed filter made for a specific application becomes useless for any other need, the SKL Variable Electronic Filter serves to fulfill broad and diversified laboratory requirements.

Continuous range of cutoff frequency and ability to produce band-pass and band-rejection characteristics with *independent* control of the upper and lower cutoff frequencies are invaluable.

WIDE-BAND CHAIN AMPLIFIERS: SERIES 200

for every application

NEW
MODEL 206



The 9 in 1 amplifier providing any combination of:

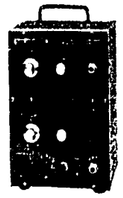
Gaussian, flat or sloping response curve

Linear, pulse or high level pulse output mode

MODEL	BANDWIDTH	GAIN	OUTPUT	IMPEDANCE	
				INPUT	OUTPUT
214B	200 cps—90 mc	30 db	125 v, pulse	180	5000
211	15 mc—110 mc	33 db	4 v, rms	50	50
202D	1 kc—210 mc	20 db	4 v, rms	200	200
212C-TV	54 mc—216 mc	20 db	3 v, peak	50 or 75	50 or 75
206	600 cps to 320 mc	18 db to 24 db	(1) 6 v, rms (2) 60 v, pulse (3) 125 v, pulse	180	200

FAST-RISE PULSE GENERATOR

***THE* Standard for Millimicrosecond Pulses**



Model 503 is ideal for testing the transient response of wide band amplifiers and semiconductors. Higher voltage pulses are available through use of an external power supply.

Rise time:	Less than 1 millimicrosecond
Amplitude:	0 to 150 volts
Repetition Rate:	50 to 120 cps
Pulse Width:	.06 x 10^{-10} Sec., Minimum Determined by Length of Width Cable. Max. Width not Restricted. .05 x 10^{-9} Sec., Factory Supplied
Polarity:	Either Positive or Negative
Load Impedance:	50 ohms

37. Fuses & Fuse Holders.

. . . You'll find the Type and Size Fuse you need

• • • IN THE COMPLETE LINE OF BUSS AND FUSETRON FUSES

The following is a representative selection of the complete BUSS line of fuses that includes standard, dual-element (slow blowing), renewable and one-time types — in sizes from 1/500 ampere up . . . plus a companion line of fuse clips, blocks and holders.

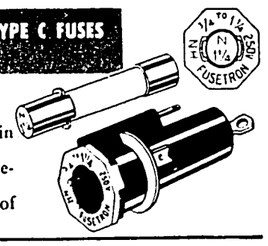
FUSETRON TYPE N and TYPE C FUSES and FUSEHOLDERS

Especially suitable for protection of TV

Ears on fuses match slots in holder.

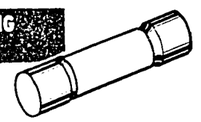
Marking on fuse and fuseholder in direct view.

Safeguard against use of wrong size and type of fuse.



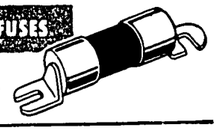
BUSS KLM HIGH INTERRUPTING CAPACITY FUSES

$13/32$ x 1½ inch. Capable of safely interrupting 68,000 amps.



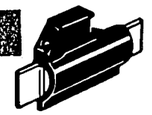
FUSETRON ACK CLAMP TYPE FUSES

20 to 300 amp., Dual-element type.



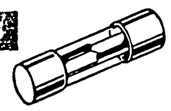
BUSS ACO AIRCRAFT FUSES

Mechanical Indicating — Limiter type 1 to 75 amp.



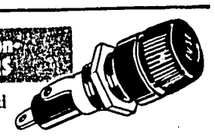
BUSS AGX FAST ACTING FUSES

¼ x 1 in. Glass tube 1/500 to 2 amp.



BUSS Series HJ and HK Non-Indicating FUSEHOLDERS

Panel mounted for ¼ x 1 inch and ¼ x 1¼ inch fuses.

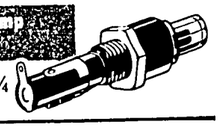


BUSS IBM SIGNAL ACTIVATING FUSES

¼ x 1¼ inch. Silverplated pin pops out when fuse is blown and activates signal or alarm.

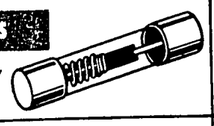
BUSS Series HJ and HK Lamp Indicating FUSEHOLDERS

Panel mounted for ¼ x 1 inch and ¼ x 1¼ in. fuses.



FUSETRON MDL FUSES

¼ x 1¼ inch. Dual-element — slow blowing type 1/100 to 30 amp.



BUSS No. 4051 ONE-PIECE CLIP and TERMINAL

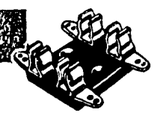
Solder type terminal for ¼ inch fuses.

BUSS ABC CERAMIC TUBE FUSES

¼ x 1¼ inch. High interrupting capacity fuses ¼ to 30 amp.

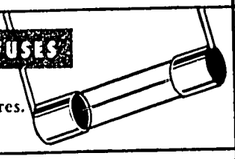
BUSS No. 4409 FUSE BLOCKS

Small Base, solder type Side Terminals.



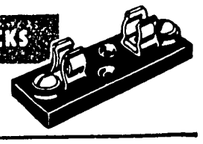
BUSS GJV PIG TAIL FUSES

⅛ to 6 amp. Solder into circuit wires.



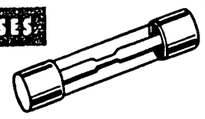
BUSS No. 4512 FUSE BLOCKS

Full Base, Screw type Terminals.



BUSS SFE STANDARD FUSES

Fuses of different amperages are different lengths — to make it impossible to insert too large a size.



FUSETRON FNM FIBRE TUBE FUSES

$13/32$ x 1½ inch. Dual-element — slow blowing type.

For more detailed information to help you select fuses and fuseholders to meet your electrical protection needs . . . Write for bulletin SFB.

Or tell us your problem and let our Fuse Engineers assist you in getting the protection you require.

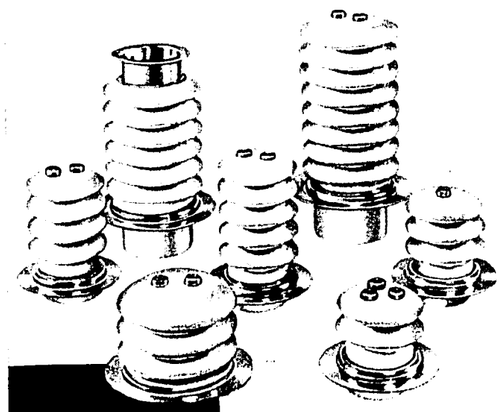
Designers—Engineers:

ADVAC TERMINALS

For Data on General Ceramics FERRAMIC® Magnetic Cores and FERRAMIC® Memory Storage Planes See Ads in the Magnetic Core and Computer Components Sections

–will solve your toughest hermetic seal problem with a wide margin of safety!



OUTSTANDING DESIGN ADVANTAGES INCLUDE –

- Immunity to Thermal Shock
- High Mechanical Strength
- Maximum Voltage 65,000 V.
- Adaptable for Brazing, Welding or Soft-soldering

Specify ADVAC for temperatures to 1400°F, pressures to 2000 P.S.I.

ADVAC Hermetic Seals are produced under an exclusive process that provides a superior seal capable of withstanding gruelling environmental conditions. Advac terminals feature a metallized high grade alumina construction that provides a super-strength seal. Performance-proven in critical commercial and military applications, ADVAC seals are available in standard types or custom designs for special requirements.

NEW BULLETIN — contains complete information on the ADVAC line. Address inquiries to Dept. ID.

There are

3 SPECIFIC WAYS

in which "Proceedings of the I R E" serves the advertiser differently and more effectively than other publications.

1. Pre-Specification Selling

Because "Proceedings of the I R E" publishes basic research and engineering application articles it is closely studied by those design engineers who must "keep ahead of the market." Often, the research published leads the industry production by from two to six years! The alert engineer, who needs this amount of time for his own design applications and for tooling up and changing the production in his own factory, studies the "Proceedings of the I R E" carefully. Its articles keep him abreast with the changes that will inevitably come and make it possible for him to be ready for them. This is the time for you to sell the unknown engineer designing the never-dreamed-of-product "before it happens!" It is an insurance that you will be ahead of the market instead of behind it.

2. Personal Connection to the Individual

The Institute of Radio Engineers is an engineering society for individual engineers who must qualify on their own education, experience and engineering work. Thus, the magazine follows the reader as his private possession, wherever he goes. Wherever new engineering progress is developing, the work is done by individual engineers—and it is these men that must be sold! Only the engineer knows enough to specify and buy in a highly technical industry. Selling is a matter of reaching the minds of men because a *company cannot sign a purchase order.* Wherever radio engineering activity is the greatest companies employ I R E members. An engineer moves into a new job in advance of production and with him goes "Proceedings of the I R E," with all the advertising you so urgently need to place where engineering activity is the greatest.

3. Economy

It is a specific purpose of the Institute of Radio Engineers that its advertising rate should benefit and help the industry grow by being economical. Part of the economy of a tax-free organization is thus passed on to advertisers in the form of low-cost advertising to a high-quality audience. The page rate per thousand engineers of "Proceedings of the I R E" is the lowest in the radio electronic industry by deliberate intent. Thus the Institute finds an extra way that it can help the firms that hire its engineers to gain new business at lower costs.

For exacting, high-temperature applications . . .

CERAMASEAL LEAK-TIGHT TERMINALS

Assuring you savings in installation and operation, these Ceramaseal high-temperature terminals are 100% leak-tested and guaranteed leak-tight when shipped. **High-alumina ceramic** and metal parts of Ceramaseal terminals are joined by an exclusive process to form a high-strength, long-life molecular seal. **Brazing, welding or soldering** techniques can be used for installation, without resulting damage to the seal, thus eliminating costly rework or replacement. **For brochure** and spec sheets, or complete information on special high-temperature terminals, write: Ceramaseal, Inc., Box 25, New Lebanon Center, New York.

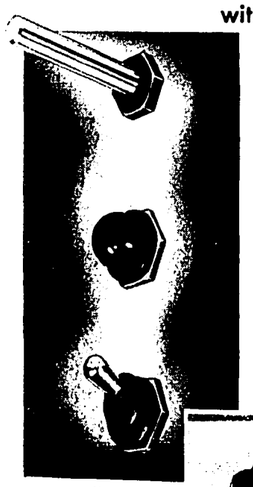
Dirt-Dust-Fumes-Moisture

with

APM

HIGH PRESSURE SWITCH and SHAFT SEALS, SELF-SEALING SCREWS



HEXSEALS*

APM HEXSEALS for Switches and Shafts consist of a grooved nut to which is molded a rubber boot. High pressure sealing is maintained by a gasket rib — an integral part of the boot — which seats firmly against any panel surface regardless of finish.

APM SEELSKREWS — Pre-assembled, vibration resistant fasteners, designed for panels and motor housings. A rubber O-ring is pressed into a groove underneath the head of the screw. They will seal in excess of 500 psi, internal and external pressure.

HEXSEALS and SEELSKREWS Meet Military Specs:

MIL-B-005423A (ASG)
MIL-B-19257 (Ships)
SCL-6303 (Sig. Corps)

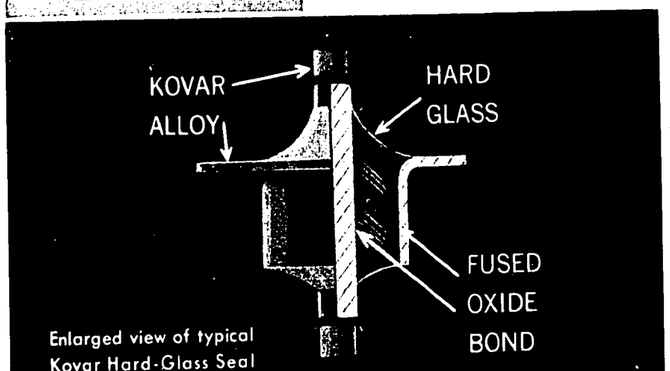
Stupakoff

Kovar **HARD GLASS** Seals



Enlarged view of typical Kovar Hard-Glass Seal

Here are 5 practical reasons why

KOVAR AND HARD GLASS

make the Best hermetic seals

BEST *for thermal endurance*

– because the thermal expansion of Kovar matches exactly that of hard glass over the entire working range.

BEST *for insulating value*

– because of the high dielectric strength of hard borosilicate glass. No silicone treatment is required.

BEST *for hermetic tightness*

– because the fused oxide bond is a chemical bond, forming a true hermetic seal, free from strains at all working temperatures.

BEST *for miniaturization*

– because insulating efficiency and high mechanical strength of hard glass permit the use of seals of minimum size and weight.

BEST *for your product*

– because Stupakoff's broad experience, engineering skill and modern manufacturing methods provide hermetic seals that are right for your product. You get all the advantages that can be secured *only with Kovar and Hard Glass.*

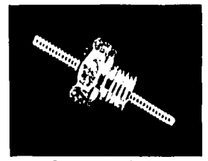
HERMETIC SEALS

Standard compression headers, plugs and individual seals now available

Compression individual with lug



Pressure terminal

Compression multiple header

New fusing equipment plus new plating plant plus top-notch technical engineering supervisors have been important factors in Bennett's progress toward greater service to hermetic seal users.

Our vacuum-tight compression seals give greater latitude in design applications. They can be used wherever leakage requirements are critical. They will also withstand thermal shocks of dry ice to boiling water, check out in excess of 10,000 megohms, and pressure check in excess of 10,000 psi.

We also design pressure and solder seals to meet your requirements.

made by the cost-saving

BEAD CHAIN

Multi-Swage Process

For Small Metal Parts

TRADE MARK

The advanced method for producing small metal parts — hollow or solid — headed, grooved, shouldered, etc., — dimensions about ¼" or less diameter and up to 1½" length. This high speed process usually requires runs of 100,000 pieces, other than stock items, to justify job set-up costs.

Contact Pins have a tightly swaged seam with hole through entire length for easy threading of lead wires. Ideal for plastic, ceramic, metal and other bases or panels.

Male & Female Friction Contacts are available to close tolerances, maintain "holding power" with ease of engagement and release.

Terminals in many special and standard types, including turret-type — for flared, rolled, split, spun and other assemblies.

SWITCHCRAFT INC.

COMPONENT PARTS

In Switchcraft products you get the benefit of creative engineering, latest designs, expert workmanship, and thorough inspection — your assurance of the most dependable and efficient components made today.

JACKS

FOR MILITARY AND INDUSTRIAL EQUIPMENT—MOST COMPLETE LINE

"LITTEL-JAX"—require minimum panel space available in all common and many special circuits.

"SF-JAX" short frame design—innumerable circuits.

"LF-JAX"—long frame design—all circuits.

"TINI-JAX"—sub-miniature.

PHONE PLUGS

THE LARGEST VARIETY OF STYLES, SIZES AND TYPES

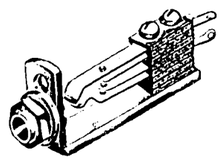
"LITTEL-PLUG"—small—fits standard Jacks.

"LUG PLUG"—small—low cost.

"STANDARD"—conventional size heavy terminals—rugged design.

"TINI-PLUGS"—sub-miniature 2 conductor Phone Plug for use with "Tini-Jax".

"FLAT-PLUG"—removable cover permits use with screw or solder lug terminals. 2 or 3 conductor types.



TELEPHONE & MILITARY JACKS

"T-JAX"—a conventional telephone switchboard design all standard circuits and military specifications.

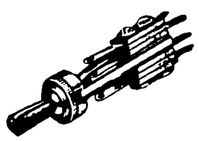
"M-JAX"—(illustrated) a heavy duty design used in heavy industrial equipment.

"SHIELDED JAX"

A unique modification of the "Littel-Jax". The shield is assembled into and made a part of the jack.

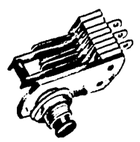
"EXTENSION JAX"

For cable extensions. Features "Switchcraft" clamp type terminal. 2 and 3-conductor circuits.



"LEV-R-SWITCH"

A lever action switch requires only single hole for mounting. Available in numerable circuits; various contact materials.



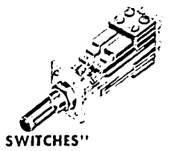
"FF-SWITCH"

Flat frame support spring "pile-up" in various circuits and contact combinations. "Easy" action of colored push buttons.

"TELEVER SWITCHES"

Series 6000

Rugged telephone type; 3" depth behind panel. Welded cross bar, Palladium contacts rated at 3 amps., 300 watts maximum, non-inductive A. C. load. Locking and non-locking types.



Series 16000

Same design as series 6000, features single hole mounting; Unique feature, "non-locking" type can easily be converted to "locking" by removing "stop plate".

"LITTEL-SWITCH"

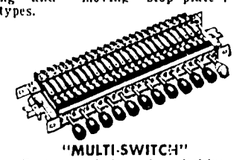
Rugged yet small, a Push Button switch available in simple circuits; contacts to suit. Various colors of Buttons.

"TINI-SWITCH"

Similar to "Littel-Switch" except sub-miniature design.

"RS-SWITCH"

Rotary switch, rugged frame supports spring "pile-ups"; minimum panel depth. 2 or 3 position; locking or non-locking action.



"MULTI-SWITCH"

Features choice of switching functions, 1 to 37 stations possible. Single frame or ganged assemblies. Illuminated or non-illuminated buttons.

Write for Bulletin 560.

"JACK PANELS"

Black phenolic strip, reinforced with steel, supports Switchcraft "T-JAX" and "MT-JAX".

"MINI-MIX"

Miniature 2-input Audio Mixer connects directly to equipment — no external cables.

"ADAPTERS"

For connecting equipment having different type connectors.

Illustrated are representative parts of the regular line. Send for catalog No. S-57A.

Inquiries on custom-made components will receive prompt attention.

Switchcraft components are carried by all leading Radio Parts Jobbers.

"MIC CONNECTORS"

"AUDIO JUMPER CABLES"

"JACK COVERS"

"PHONO CONNECTORS"

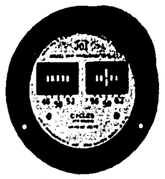
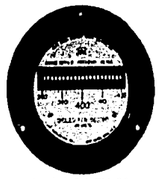
REED FREQUENCY METERS • ELAPSED TIME METERS
TOGGLE, LEVER and ROTARY SWITCHES of Instrument and Test Equipment Quality
for THE ELECTRONIC INDUSTRY

J-B-T



Model 30-F
Dual Range, Double Window



Model 36-FX-21
21-Reed Meter in 3½" Case

Model 34-FHXX
9-Reed in 3½" Sealed Case

Model 41-FX-42
300—500 cycles and
380—420 cycles, 4" case.

Model 15-FHAC
2-Reed in 1½" Sealed Case

Model 33-FP-9M
Portable, Metal Case
TS-328 A/U (400 cy. type) Shown

VIBRATING REED FREQUENCY METERS

Meters illustrated are typical panel mounting or portable—for use where constant or known frequency is important to efficient operation of equipment.

- *Permanently Accurate* within ±0.3% or better at reference temperature, depending on the model. This accuracy is not affected by poor wave form, external magnetic disturbances, or voltage fluctuations.
- *Size and Type for Every Service.* Made in a wide variety of portable and panel case styles, reed groupings and frequency ranges from 12 to 650 cycles and above; 100-130 volts furnished unless otherwise specified.
- *Rugged Construction* of simplified, patented design, with no moving parts to wear out or get out of calibration. Ideal for field and mobile applications.
- *Suitable for Electronic Circuits* because of relatively low power consumption and J-B-T reeds with high Q and sharp, immediate response.

3½" and 2½" SEALED Types

3½ inch FHXX Meters sealed, glass-to-metal construction with solder terminals, meet or exceed the sealing and electrical requirements of JAN-I-6 and MIL-M-6A including the 3000 volt breakdown, and use the front mounting dimensions specified. Max. barrel diameter, $2^{11}/_{16}$"; $2^{7}/_{8}$" overall depth behind flange. While not regularly stocked, these meters are in volume production. New 2½" meters Model 21-FXXX available on special order.

1½" SEALED Types

Model 15-FHAC (illustrated above). 60 and 400 cycles, 2 reeds, 8-10 volts, for cathode follower circuit. Widely used on audio oscillators to standardize output. Meets intent JAN-I-6, MIL-M-6A and amendments on sealed meters. Barrel, 1½" diameter; detachable flange, 2.094" diameter; solder terminals.

Model 15-FH Series (not illustrated) — Same case, sealed, 5 reeds, 58-62 cycles, 100-130 volts, or 390-410 cycles, 100-130 volts. Variations such as 6 reeds or 25 cycles available on special order.

ASK FOR CATALOG 657

ELAPSED TIME METERS

For Maintenance, Tube Life Data, and Operating Time Records—on Motor Generators, Transmitters, Receivers, Rectifiers, Test Set-ups, etc.

Model 31-EX (illustrated) also known as running-time or total time meter, registers in 1/10 hours to 9,999.9 hours, then automatically resets. Normally stocked for 60 cycles, 110-130 volts. 3½" standard meter mounting. Variations such as 50 cycles; 230 volts; 0-99,999 hours; 3" rectangular case; and readings in minutes available on special order.

SEALED ELAPSED TIME METERS

Model 31-EHXX—Fully sealed meter, reading 0-9,999.9 hours, same as Model 31-EX above. Glass-to-metal construction, solder terminals, and 3½" detachable flange, all match XX metal frequency meter case. 1000 volt breakdown.

Model 33-EHXX — Operates on 400 cycles, 110-125 volts, to read 0-9,999.9 hours in 1/10 hour steps. It is presently made only in 3½" flange sealed metal case, 2¾" diameter, 4" deep behind panel. 1000 volt breakdown.

Model 21-EHXX—New. 2½" flange, sealed, full size counter.

FREQUENCY — TIME METERS

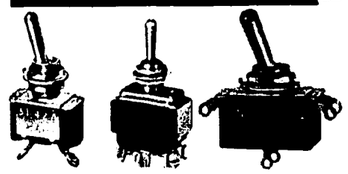
Combination Reed-Type Frequency — Elapsed Time Meters—One Meter Does the Work of Two.

Model 31-FE (illustrated) pioneered by J-B-T, saves panel space and cost, and encourages periodic maintenance; 3¼" flange, metal case, $4^{19}/_{32}$" overall depth, standard. 3½" case known as 31-FEX-1 supplied on custom orders. 5 reeds, 60 cycle range, standard; 7, 9, 11 reeds or 50 cycle range on special order.

DISTRIBUTOR SERVICE

Standard J-B-T items are available through authorized electronics parts distributors.

TOGGLE SWITCHES, AN, JAN, or MIL



J-B-T now manufactures over 100 models of toggle switches, designed for exceptional reliability, as in JAN-S-23 and Ordnance Standards DDAX. Variations with bushing seal are made at additional cost for MIL-S-6745 specialized AN Air Force requirements. Other types are being planned for pending MIL-S-3950. Improved enclosed designs are supplied on all models—there are no unused holes.

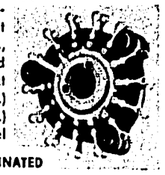
ST40, 42, 52 series—Solid coin silver contacts and rocker arms, unique to J-B-T, add overload protection and keep contact resistance under .005 ohms. Nominal ratings 20 amp at 125 VAC, 10 amp, 250 VAC. See Bulletin TS-4B.

ST12, 13, 16, 17, 22, 23, 26, 27 series—Nominally rated 6 amp at 125 VAC, 3 amp, 250 VAC; threaded bushings $^{27}/_{64}$" or ¼" long. Current carrying parts heavily silver plated. See Bulletin TS-5B.

ROTARY SWITCHES

MOLDED

Shorting and Non-Shorting...14 or 20 Positions ...1 to 6 Decks (more on special order)...All moving contacts enclosed — eliminates dirt and corrosion...sturdy construction with 3-post deck suspension, double-grip collector arms, and rectangular drive shaft through decks for precision indexing... test results available covering certain procedures of MIL-E-5272 A...interchangeable, electrically and mechanically with J-B-T Series SS-14 and 20 position Laminated Switches. Carrying capacity (not make-and-break): 1 amp.; maximum momentary, normal 5 amp.; maximum voltage between contacts and ground, 1000 volts R.M.S.; between decks and ground, 2000 volts R.M.S. Average contact resistance 0.007 ohms or less. Also available in 6-pole per deck double throw construction. Non-shorting (break before make) and shorting (make before break). Bonded construction is available on special order as MS-14R and MS-20R Types. Provides permanent moisture-proof bond between decks, and strong mechanical support for contacts.



LAMINATED

For dependable performance in quality test equipment, instruments, inspection setups and avionics — two compact types. 14 pos. (2" dia.) or 20 pos. ($2^{23}/_{32}$" dia.) one to six decks. Model SS-14-2 shown.

LEVER ACTION SWITCHES

Model MS-20-1L5A-1 (illustrated) provides 5 live positions, 2 circuits per deck in molded body. Mounting to Print SK-64. Single deck types use same top quality parts as laminated SS-14 switches. For ganged lever series, SSG types, in 3, 4, or 5 positions, 2-10 decks. See Print SK-74.

ASK FOR CATALOG 657

J-B-T INSTRUMENTS, INC. J-B-T NEW HAVEN 8, CONN.

RUGGEDIZED METERS

1½" Square

Meets MIL-M-10304 (SIG.C.) Accurate within ±3% of full scale deflection. Basic d-c ranges 0-100 d-c ua, 0-1 d-c ma, and 0-10 d-c mv. RF and VU meters and other ranges also available.

SUB-MINIATURE ROTARY SWITCH

Wafer size 1" x ⅞". Twelve positions per deck ... one to three decks. One, two, three or four poles per deck. Shorting or non-shorting contacts. Positive indexing with 30° spacing.

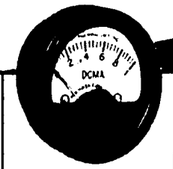
SPECIALISTS
in Sub-Miniature Panel Meters

FIRST in U.S. to manufacture 1" diameter meter.
FIRST to produce 1" and 1½" illuminated meters.
FIRST to produce 1½" self-contained DB and VU meters.
FIRST to produce Miniature Side Indicators.

1" ROUND

MODEL 100

1" barrel diameter. Full 90° scale arc, scale length .770". VU, DB and Illuminated meters also available with external accessory attached.



MODEL 150

1½" ROUND and SQUARE

1½" barrel diameter. Full 90° scale arc, scale length 1.322". Model 153 meets MIL-M-3823 requirements. Also available: self-contained VU and DB meters — illuminated meters with lamp housing attached.

MODEL 153

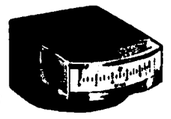
SIDE INDICATORS*

MODEL 1135
Single Horizontal Mounting

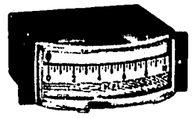
- GREATER READABILITY
- REDUCES PANEL AREA ⅓ OVER CONVENTIONAL METER INSTALLATIONS OF SAME SCALE LENGTH
- HORIZONTAL OR VERTICAL MOUNTING

THREE SIZES AVAILABLE:

MODEL 1120—Scale length 1.3".
MODEL 1135—Scale length 2.1". Front external zero adjuster.
MODEL 1145—Scale length 2.75". Front external zero adjuster.



MODEL 1120



MODEL 1145
Single Horizontal Mounting

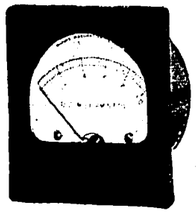
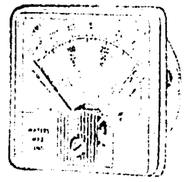
Model 250



Model 350S



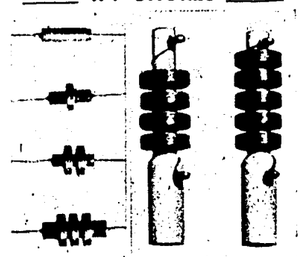
Model PS250

Model	Size	Description
250	2 1/2"	Round Bakelite case
260	2 1/2"	Round metal case*
PS250	2 1/2"	Rectangular, clear plastic case
350	3 1/2"	Round Bakelite case
360	3 1/2"	Round metal case*
PS350	3 1/2"	Rectangular, clear plastic case
250-S	2 1/2"	Rectangular black Bakelite case
350-S	3 1/2"	Rectangular black Bakelite case
450-S	4 1/2"	Rectangular black Bakelite case
450-SP	4 1/2"	Rectangular black Bakelite case; has provision for front illumination

Ranges	D-c Types	A-c Rectifier Types
Microamperes	0-25 to 0-9000	0-100 to 0-900
Milliamperes	0-1 to 0-1000	0-1 to 0-500
Amperes	0-1 to 0-20[1]	—
Millivolts	0-10 to 0-1000	—
Volts	0-1 to 0-500[2 3]	0-1 to 0-500[3]

[1] Over 20 amperes, a 50-millivolt movement is used with an external shunt.
[2] 1000 ohms per volt.
[3] External resistor required over 500 volts.
*Hermetically sealed MIL-M-6A JAN-1-6

R-F CHOKES



Waters R-F Chokes provide high Q in small size. Standard constructions include:

- Solenoids on phenolic & powdered-iron forms.
- Pie-wound coils on ferrite cores & powdered-iron or phenolic forms.
- Pie wound coils on ceramic forms.

Write for free data sheet #C-657 giving inductance, resistance, current rating, Q vs frequency, distributed capacitance, and core sizes. Ask for quotation on special units.

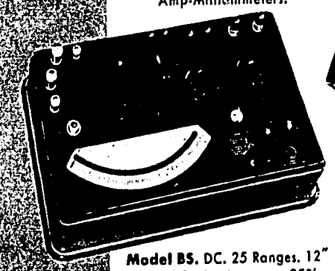
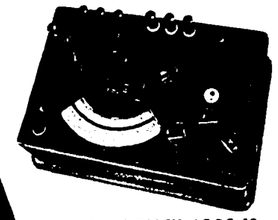
Electrical Indicating Instruments by SENSITIVE RESEARCH

Laboratory Standard and Reference Standard Portable and Panel Instruments that have earned Sensitive Research the reputation of *"Those Standards People."* All instruments have individually calibrated, hand drawn mirrored scales. Available with the now world famous SRIC *Diamond Pivot* and *Shock Mounted Jewel.* Write for Catalog 70.

The Diamond Pivot

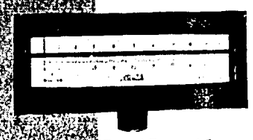
Self-Checking Volt-Amp-Milliammeters.



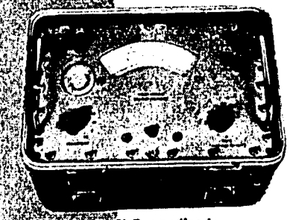


Model THACH. AC-DC. 19 Ranges. Accuracy .2% to 4 KC.

Model BS. DC. 25 Ranges. 12" Vernier Scale. Accuracy .05%.

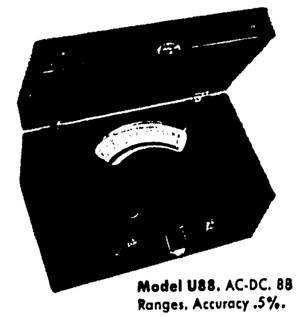


Edgewise Panel Type. AC or DC. 7" Scale. Accuracy .25%.



Waterproof! Ruggedized Polystyrene. Accuracy .5%.

Single and Polyphase Wattmeters. Accuracies to .1%.



Model U88. AC-DC. 88 Ranges. Accuracy .5%.

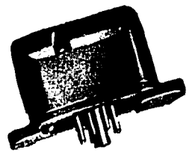
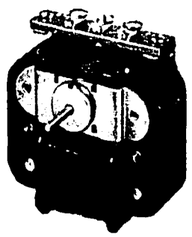
THE MARK OF QUALITY
BARBER COLMAN

quick solutions to various electronic problems



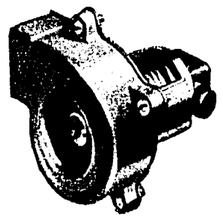
Ultra-Sensitive Relays

Operating on input powers of 40 to 1,000 microwatts, the Barber-Colman Micropositioner polarized relay is ideal for use as a differential relay in electronic plate circuits, a null detector in resistance bridge circuits, an amplifier in photoelectric circuits. Replaces several stages, simplifies various phases of electronic gear.



Reversible Small Motors

Shaded pole a-c type, up to 1/20 hp . . . adaptable to a variety of control circuits. Low-inertia rotors permitting rapid reversing and follow-up make these motors ideal for electronic circuits.



Small Motors with Blowers

In both a-c and d-c types with cooling fans or blowers for quick, dependable dissipation of heat from tubes, circuit components, and other equipment mounted in confined enclosures.

BENDIX RED BANK—UNEXCELLED PERFORMANCE

AROUND THE AROUND THE

There's no questioning the quality of special-purpose electron tubes or electrical power equipment when it's made by Bendix Red Bank. The proof is in acceptance—almost universal acceptance. Twenty-four hours a day, in countries around the world, equipment like that shown above is proving that skillful design and expert engineering (plus an almost unmatched quality control system) can build an international reputation for dependable performance. If you can use quality like this, call on us for recommendations. Write today for brochure detailing our engineering, production, and service facilities. RED BANK DIVISION, BENDIX AVIATION CORPORATION, EATONTOWN, NEW JERSEY.

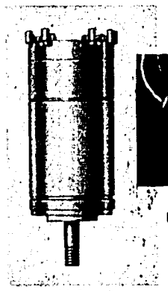
INDUCTION MOTORS OF CALIFORNIA
SYNCHROS



Size 10 DC Synchro

Size 11 Synchro

Military Type Size 11 Synchros are now available

- Fast Delivery
- To BuOrd. Standardization Spec. MIL-S-16892
- Specialty Rotating Instruments
- Made in the following types:
  11CT4a, 11CX4a, 26V11CDX4a,
  26V11CX4a, 26V11TX4a, 26V11CT4a.

DC Synchro movements are available with an angular position error of less than ± 1°(without pull-off magnets).

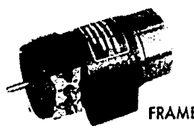
For detailed information write

INDUCTION MOTORS OF CALIFORNIA
DIVISION OF INDUCTION MOTORS CORP.
6058 Walker Avenue • Maywood, California

For details, circle #326 on Reader Service Card.

QUALITY • QUALITY • QUALITY

Instrument Motors' policy of precision fabrication for each customer's specific requirements is attainable because of our engineering staff's long experience with rotating components. At the same time we constantly stress quality, lowest possible costs and fastest deliveries, which are essential in today's competitive industrial market.



FRAME 16

FRAME 22

With never ending research, our engineers have produced instruments that are leaders in the field.

- PRECISION MADE A.C. & D.C. MOTORS, TACHOMETER GENERATORS
- HYSTERESIS MOTORS
- SERVO MOTOR GENERATORS
- FRAME SIZES FROM ⅛" to 6"
- MILITARY SPECIFICATIONS ADHERED TO CAREFULLY

HUNDREDS OF DESIGNS . . . THOUSANDS OF VARIATIONS!

Send for our illustrated catalog

INSTRUMENT MOTORS
460 NORTH AVE., NEW ROCHELLE, N. Y.

For details, circle #327 on Reader Service Card.

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each major classification. Complete addresses will be found in the Alphabetical Directory.

Motor - Gear - Trains

3:1 to 150,000:1 Ratio Range • Up to 18 Foot Pounds Torque

- Motors available: DC, 60 or 400 cycle, PM, split series, series, shunt, single phase and 2-phase. All are reversible.
- Available with either governor or brake.
- 1000 hour life minimum.
- Designed to meet MIL-E-5272A.
- Precision gearing throughout.
- Can be furnished up to 125°C.
- Designed for continuous duty or intermittent duty applications.

Speed tolerance on governed motors is ±2% over voltage and an ambient temperature range. Closer speed tolerance units can be designed to fit the particular application.

Many other variations available. There is an Oster motor-gear-train to fit your exact specification. Consult Oster specialists today, sending your detailed requirements.

Other products include servos, synchros, AC drive motors, DC motors, servo mechanism assemblies, synchro indicators, servo torque units, reference and tachometer generators, actuators, motor driven blower and fan assemblies and fast response resolvers.

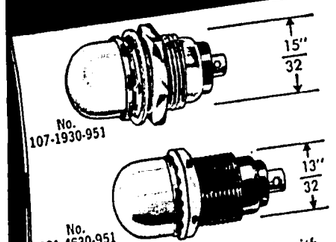
PRECISION ENGINEERED Sub-Miniature Pilot Lights

...facilitate the solution of miniaturization problems.



Example: Here are 2 Dialco units with but a tiny difference in o.d. of bushing: A refinement that helps to save space and weight where every fraction counts.

DIALCO®

On your next miniaturization project, consult DIALCO for the Pilot Lights. You will quickly find the proper unit for use with either tiny *Incandescent bulbs (T-1¾);* or with *sub-miniature Neon bulbs (NE-2D).*

TWO-TERMINAL units are fully insulated. SINGLE-TERMINAL units are for use on grounded circuits. Also DIMMING or NON-DIMMING sub-miniatures for every requirement. Meet all applicable Military Specifications.

Samples for design purposes on request at once — no charge.

MODEL 3 ILLUSTRATED

ELECTRONICALLY REGULATED
D. C. CONSTANT VOLTAGE
POWER SUPPLIES

The output voltage is continuously variable from 200 to 325 volts D.C. for load currents of 0 to 100 M.A. with an input voltage of 105 to 125 volts 60 cycle. Regulation is better than 1%. An isolated A.C. voltage of 6.3 volts at 3 amperes is available at the output terminal connections.

MODEL 3 CAB. MTG., VOLTMETER	$69.50
MODEL 1 RELAY RACK MTG.	$52.50
MODEL 2 SUB-CHASSIS MTG.	$49.50

ASSOCIATED SPECIALTIES CO.

AC POWER SOURCE

the INVERTRON®

The Silent, Dependable INVERTRON Features:

POWER OUTPUT RATINGS from milliwatts to kilowatts

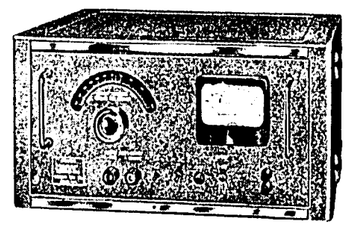
OUTPUT FREQUENCIES — fixed or variable — from subsonic to supersonic

ACCURACY to .001% for fixed frequencies — to .1% for variable frequencies

SINE WAVE distortion never greater than 2%, with .5% or less available

REGULATION from no load to full load... standard 1% — with .5% or better available

Negligible Interaction between output frequency, voltage and load.



MODEL 161-D-1
POWER OUTPUT: 160 VA single phase, FREQUENCY: 350 to 450 cps variable, FREQUENCY ACCURACY: 0.5% (0.2% and 0.1% available), INPUT: 115v 60 cps single phase, OVERALL SIZE: 22" wide x 10" high x 15" deep.

REGATRON SUPER-REGULATED TRANSISTOR POWER PACKS

Simplify D-C Power Requirements

MODEL 212A . . . 0 to 100 V dc, 100 ma. Regulation 0.1% or 0.02 volt over entire range of load and input voltage. Weight 14 lbs. 3½" H x 19" W x 9¼" D. Price $129.00 unmetered. Other models up to 3 amps.

In the laboratory, on the production line, as part of original equipment . . . wherever regulated d-c power is required . . . tough, versatile REGATRONS give customized performance.

With a minimum of adjustment, REGATRONS will deliver the precise power your equipment requires. Here are the features that make it possible:

Full current capability at all voltage settings up to 100 volts ● Voltages up to 275 V at reduced currents (Curves available on request) ● Positive ground, negative ground or ungrounded output ● All control knobs readily accessible from front of instrument ● Output connections either front or rear (optional) ● Provisions for remote voltage adjustment ● Vernier as well as main voltage control ● Easily read panel designations ● No tricky controls ● Standard 19-inch rack or table mounting ● Low cost ●

AND . . . REGATRONS ARE REMOTELY PROGRAMMABLE . . . the only remotely programmable power packs available.

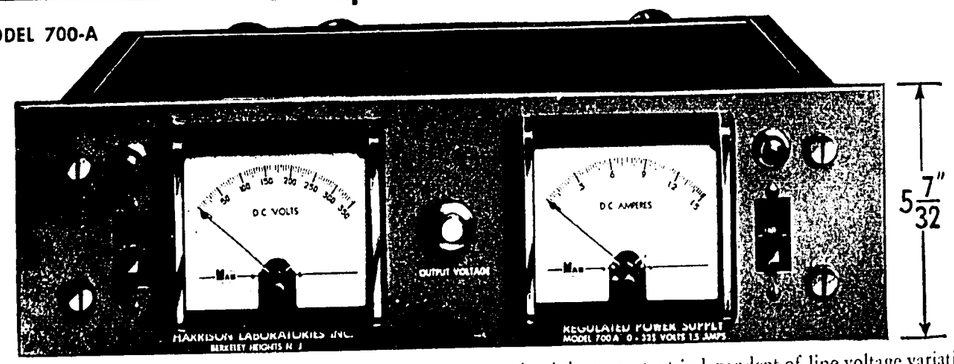
HAB Power Supplies

700 SERIES VARIABLE VOLTAGE—HIGH CURRENT 3-325 Volts @ 0 to 1.5 Amps.

MODEL 700-A



5 7/32"

- **Less than .01 volts variation from N.L. to 1.5 amps.**
- **Less than 500 microvolts ripple**
- **Continuously variable**
- **Compact**

A new design philosophy enables the 700 series of D. C. power supplies to provide excellent regulation. They are compact and continuously variable, with a wide continuous range of output voltage control. Another basic advantage of this power supply is that the voltage across the series tubes is kept constant independent of line voltage variations, load changes, or manual variation of the output voltage. In this way, the series tubes always have the proper operating voltage, and the regulator never loses regulation even with a full 1.0 ampere step change in load. Although this power supply is relay-rack mounted, the front panel is hinged and can be dropped down without removing the supply from the relay rack.

Designed for continuous operation, this power supply will provide the *real dependability* you need.

Price:.....$695.00

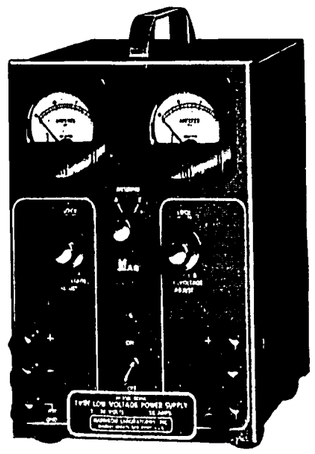
800 SERIES LOW VOLTAGE—HIGH CURRENT Model 800-A Twin 2-30 Volts @ 1.0 Amps. Model 800-B 2-30 Volts @ 2.5 Amps.

The 800 series consists of a line of highly regulated low voltage D. C. power supplies that are completely transistorized. Model 800-A is a portable bench-type supply that incorporates two completely independent, continuously variable 2 to 30 volt, 0 to 1.0 ampere power supplies. When required, these supplies can be connected in series to obtain a single 4 to 60 volt supply at 1.0 ampere. Model 800-B is also a portable bench-type supply, continuously variable from 2 to 30 volts, with a 2.5 ampere capacity.

Both models in the 800 series feature automatic short-circuit and overload protection. When the output terminals have been inadvertently short-circuited, a protection circuit opens the regulator loop and prevents the output current from flowing. At approximately four second intervals, the supply endeavors to re-establish the output voltage, and it will succeed when the overload or short circuit condition has been removed.

The response to a sudden no load to full load change does not break the regulator loop. A no load to 1.0 ampere current change produces less than 50 millivolts change in output voltage, and this output voltage variation persists for less than 400 microseconds.

- **Short circuit and overload protection with automatic reset**
- **Less than 500 microvolts ripple**
- **Less than .01 volts variation from no load to full load**
- **Uses transistor circuitry throughout**



MODEL 800-A

MODEL 800-B

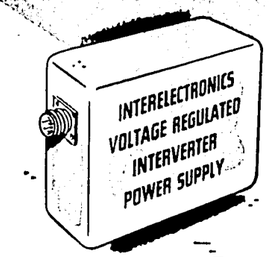
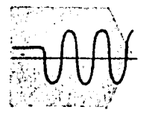
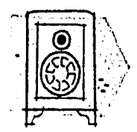
NEW!

DC to DC and DC to AC solid-state power converters voltage regulated, frequency controlled, for missiles, telemetering, gyros, servos

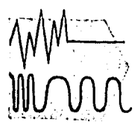




Interelectronics Interverter solid-state thyratron-like elements and magnetic components convert DC to any number of voltage regulated or controlled frequency AC or filtered DC outputs from 1 to 1800 watts. Light weight, compact, 90% or better conversion efficiency.

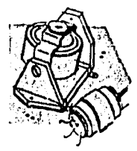


Ultra-reliable in operation, no moving parts, unharmed by shorting output or reversing input polarity. Complies with MIL specs for shock, acceleration, vibration, temperature, RF noise.



Now in use in major missiles, powering telemetering transmitters, radar beacons, electronic equipment. Single and polyphase AC output units now power airborne and marine missile gyros, synchros, servos, magnetic amplifiers.

Interelectronics — first and most experienced in the DC input solid-state power supply field, produces its own solid-state gating elements, all magnetic components, has the most complete facilities and know-how—has designed and delivered more working KVA than any other firm!



For complete engineering data write Interelectronics today, or call LUdlow 4-6200 in N. Y.

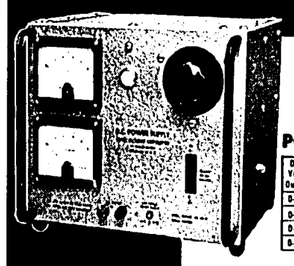
HIGH QUALITY • HIGH POWER

TRANSISTOR POWER SUPPLIES

MRC D.C. POWER SUPPLIES . . . EFFICIENT, ECONOMICAL POWER SOURCES FOR ALL TRANSISTOR CIRCUITRY! ★ Superior to conventional high voltage Power Supplies which are often erratic at Transistor voltages. ★ One continuously variable MRC unit will replace several high priced power sources. ★ Ends annoying battery hook-up. FEATURES: Conservative Ratings; No Moving Parts; Isolated Output; Magnetic Circuit Breakers; Easy-to-read Meters; Compact, Rigid and Lightweight Units.



POWERUNIT SERIES:

D.C. Volts Output	Amps	% Ripple at Max. Outp.	Model Number	Rect. Type	Net Price

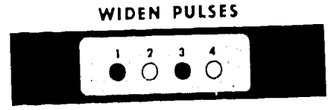
DO YOU WANT TO...

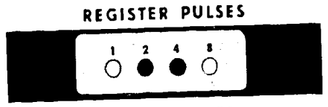
GENERATE PULSES

DELAY PULSES

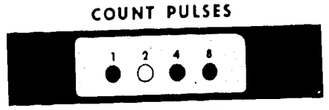
WIDEN PULSES



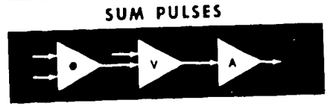
REGISTER PULSES



COUNT PULSES



SUM PULSES



DO BINARY LOGIC

DRIVE TRANSISTOR CIRCUITS

The logic functions are built into miniaturized 2¼" x 10" slide-in units. Most units contain 10 functions or stages — others at least three. They are all designed to work together, and are easily interconnected by simple patch cords at the rear of the units. Operating rates are up to 200 K.C.

A single regulated power supply can handle up to 15 units, and fits into the small portable rack. Only two voltages (- 10V, - 20V) are required for the system operation.

FROM MILLIWATTS TO KILOWATTS

HIGH VOLTAGE POWER SUPPLIES AND EQUIPMENT

We have sold quantities of these power supplies to laboratories, industrial concerns, the government and universities. Only the best available selected material goes into these units, so that you will have many years of dependable service. Only a few of our standard models are shown below. Quotations on special supplies cheerfully given.

PRECISE MEASUREMENTS COMPANY

HIGH VOLTAGE POWER SUPPLIES

One of the most popular power supplies on the market. Completely redesigned for greater ruggedness and convenience of operation. Widely used for powering electronic equipment and for routine breakdown and insulation testing. Output voltage is well filtered D.C. which is adjustable with convenient front panel control. Input is 115 Volt, 60 cycle A.C. Equipment is available without meter, with one meter (4½"), with two meters or with larger 6" precision 1% mirror scale movement. Regulated models offer closely stabilized output voltage regardless of line or load changes.

Model		Maximum Voltage	Price	Price Regulated Model
6001	With Kilovolt Meter	1,000	$ 75.00	
		2,500	80.00	
6000		2,500	80.00	$120.00
6000-A	With Kilovolt Meter	5,000	75.00	
6005		5,000	95.00	135.00
6005-A	With Kilovolt Meter	10,000	85.00	
6010		10,000	105.00	145.00
6010-A	With Kilovolt Meter	15,000	95.00	
6015		15,000	115.00	155.00
6015-A	With Kilovolt Meter	25,000	115.00	
6025		25,000	155.00	205.00
6025-A	With Kilovolt Meter			

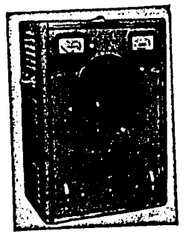
MIRROR SCALE HIGHER ACCURACY METERS: Recommended where more exact settings or measurements are needed. Meter size has been increased to 6 inches for easier reading. Price $35.00 additional on any meter equipped model.
TWO METER MODEL .....ADD $35.00

AC INSULATION AND BREAKDOWN TESTERS

Used in testing insulation where AC voltages are desired. Dual instruments are also available which provide choice of AC or DC output with simple toggle switch selection. Units include kilovolimeter, current meter and automatic overload cutout circuits.

Model	Voltage	VA	AC	Price AC and DC
3000	0 to 3,000	75	$150.00	$ 250.00
3010	0 to 3,000	300	250.00	400.00
3050	0 to 3,000	1,500	500.00	650.00
3100	0 to 6,000	3,000	700.00	1,100.00

INDUSTRIAL POWER SUPPLIES



Regulated Types Available

These industrial type power supplies are built for service and efficiency. All employ husky components that have been selected for their power handling capacity. Controls are arranged so that operation is greatly simplified and a number of safety features are built in for maximum protection of personnel and equipment. Polarity reversing models (as illustrated) can be had at additional cost.

Model	Voltage	Current	Price
F-500	0-500	3 AMP	$800.00
F-1001	0-1000	2 AMP	975.00
F-2002	0-2000	1 AMP	985.00
F-5005-AI-H	0-5000	100 MA	550.00
F-5005-AI-5H	0-5000	500 MA	650.00
F-5005-AI-K	0-5000	1 AMP	1100.00
F-6010-AI	0-10,000	100 MA	830.00
F-6020-A05	0-20,000	50 MA	975.00
F-6050-T	0-50,000	½ MA	600.00
F-6100-T	0-100,000	½ MA	1100.00

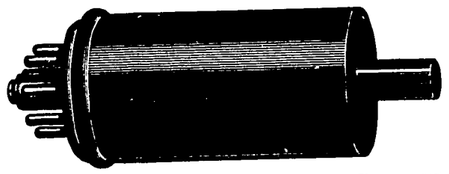
100 KV. KILOVOLTMETER

- Read High Voltages Directly with Extra-High Input Impedance.
- Single Instrument Reads Both A.C. and D.C. Voltages!
- Superb Craftsmanship—Portable Oak Case.

Model	Range Kilovolts	Price D.C. Model	Price A.C./D.C. Model
4000	0-25/50	$67.50	$100.00
4000-A	0-100	80.00	125.00
4000-B	0-50/100	85.00	130.00
4000-C	0-10/50/100	95.00	160.00

Other Ranges to Order .....
1% MIRROR SCALE INSTRUMENT .....ADD $50.00

HIGH VOLTAGE CONVERTERS



Solves your High Voltage problem in the simplest possible way. Simply connect input to 1½ or 3 V. battery (or low voltage A.C.) and obtain your high voltage output. Output voltage adjustable from zero to 6,000 Volts AC (or DC when rectified). Typical output is 1 Ma. at 130 Volts D.C., 200 Microamperes at 500 Volts and 100 Microamperes at 1,000 Volts with 3 Volts input. Model 7 MVT as illustrated, plugs in like a radio tube. The Model 10 MVT is not encased.

Model	Primary	Secondary	Price
7 MVT	1 to 4 Volts	0 to 6,000 Volts AC Max.	$12.50
10 MVT	1 to 4 Volts	0 to 6,000 Volts AC Max.	$10.00

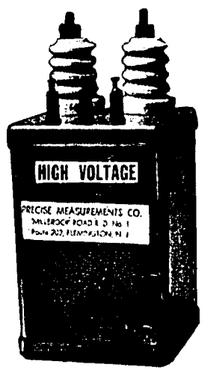
TRANSFORMERS, HIGH VOLTAGE

For those who build their own power supplies. These units are small and compact and rated for constant service. Primary designed for 115 Volts 60 Cycle. Only standard models are listed, other voltages and currents available on order.

Model	Max. Voltage	Model	Max. Voltage
1 KVT	1 KV	10 KVT	10 KV
2 KVT	2 KV	15 KVT	15 KV
3 KVT	3 KV	25 KVT	25 KV
5 KVT	5 KV		

PACKAGED POWER SUPPLIES

These conveniently packaged power units will be found ideal for applications requiring minimum size and weight. Features isolated high voltage terminals permitting either the positive or negative side to be grounded. Rectifier tubes are operated from separate filament transformers so that DC output voltage can be varied from zero to full rated value. Selenium rectifier types have extra cells to assure operation under high line voltage or light loading. All standard units have well filtered DC output. Power packs with AC output available on order.



Model	Output Voltage	Current	Model	Output Voltage	Current
05-KV-5MA	500 Volts DC	5 Ma.	20-KV-1MA	20 KV DC	1 Ma.
1-KV-5MA	1 KV DC	5 Ma.	20-KV-5MA	20 KV DC	5 Ma.

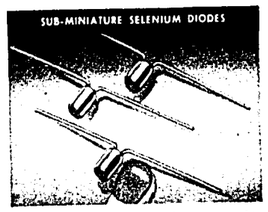
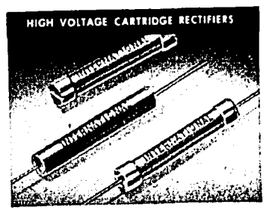
International Rectifiers

For all DC needs from microwatts to megawatts!

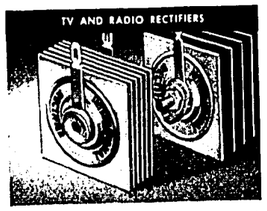
SELENIUM



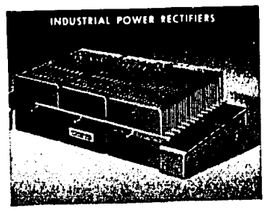
Developed for use in limited space at ambient temperatures ranging from −50°C to +100°C. Encapsulated to resist adverse environmental conditions. Output voltages from 20 to 160 volts; output currents of 100 microamperes to 11 MA. **Bulletin SD-1B**



Designed for long life and reliability in Half-Wave, Voltage Doubler, Bridge, Center-Tap Circuits, and 3-Phase Circuit Types. Phenolic Cartridge and Hermetically Sealed types available. Operating temperature range: −65°C to +100°C. Specify **Bulletin H-2**

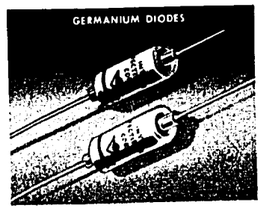


The widest range in the industry! Designed for Radio, Television, TV booster, UHF converter and experimental applications. Input ratings from 25 to 150 volts AC and up. DC output current 50 to 1,200 MA. Write for application information. **Bulletin ER-178-A**

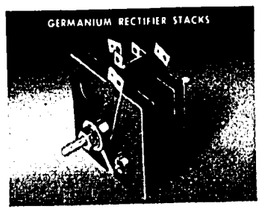


For all DC power needs from microwatts to kilowatts. Features: long life; compact, light weight and low initial cost. Ratings: to 250 KW, 50 ma to 2,300 amperes and up. 6 volts to 30,000 volts and up. Efficiency to 87%. Power factor to 95%. **Bulletin C-349**

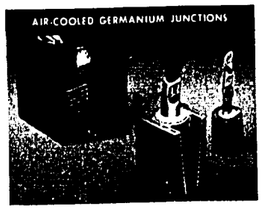
GERMANIUM



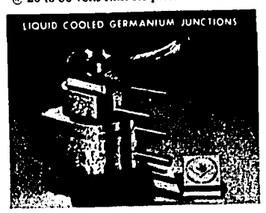
This series of general purpose, high quality point contact diodes provide excellent rectification efficiency for very high frequency applications. Special "RED DOT" series available for ambient temperatures from −55° C to +100° C. **Bulletin SR-140.**



Extremely low reverse leakage values make this series ideal for magnetic amplifier applications. These units utilize 10 amp junctions—20 to 60 AC input volts rms—are available in a wide range of circuit types and DC current ratings. **Bulletin SR-148.**

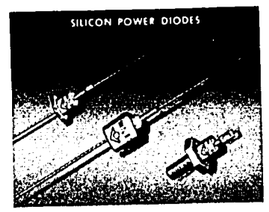


Engineered for heavy power applications, these highly efficient forced air cooled units feature moisture and corrosion resistant housings. A complete series in each of 3 current ratings: 150, 330 and 500 Amperes @ 26 to 66 volts rms. Request **Bulletin GPR-2.**

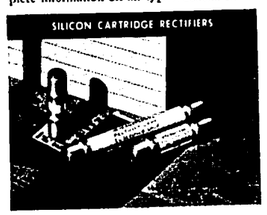


Liquid cooled for maximum power in minimum space. Junction rating: 670 amps at 26 to 66 volts rms. Housed in high-conductivity copper cast around special steel coils. Water, oil or other accepted coolants may be used. For complete data. **Bulletin GPR-2.**

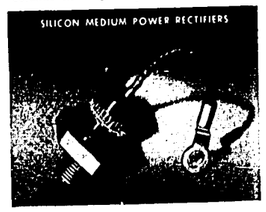
SILICON



Hundreds of types in three basic styles, for operating temperatures from −55°C to +150°C. Up to 800ma DC output current per junction over a voltage range of 50 to 1,000 PIV. Hermetically sealed. For complete information on all types. **Bulletin SR-A.**



The answer to tough miniaturization problems! Ratings for high temperature applications: from 1000 volts PIV at 100ma half-wave DC output to 16,000 volts PIV at 45ma. Hermetically sealed, metallized ceramic housing. Request **Bulletin SR-139B**



Specifically engineered for industrial applications—the most conservatively rated silicon rectifiers in the industry! Rugged all-welded construction and hermetic sealing mean greater reliability—longer life. Types available in 3 series. Request **Bulletin SR-143B.**

These units consist of hermetically sealed junction diodes mounted on copper cooling fins, stacked to include the interconnections required for specific circuits. Junction ratings: 1.25 amps. DC output; 70 to 550 AC input volts rms. Request **Bulletin SR-137A.**

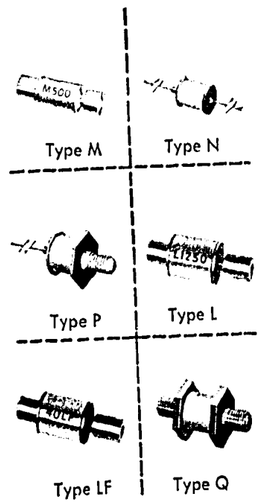
Sarkes Tarzian

SILICON and SELENIUM Rectifiers

SILICON

Sarkes Tarzian area type silicon rectifiers are made by a special process that provides optimum forward to reverse ratios and long useful life. Current ratings for half wave application range from 500 milliamperes dc to 15 amperes dc and voltage ratings per unit range from 50 to 400 volts peak inverse. Small size coupled with high efficiency and allowable high ambient temperatures make silicon rectifiers the practical component for most applications that require dc power. Our staff of competent power conversion engineers is ready to consider your application for prompt recommendations. Write, wire or phone.



Type M silicon rectifiers are rated at 500 milliamperes dc with peak inverse voltage ratings of 100 to 400 volts. Connection is made by means of end ferrules that fit standard fuse clips. Low cost holders are available.

Type N—Four basic terminal arrangements are available in the N series of silicon rectifiers. (1) Axial leads, (2) Axial stud and lead, (3) Axial stud and lug, (4) Axial studs. The convection cooled current rating is 500 milliamperes and the conduction cooled rating is 1 ampere provided an adequate heat sink is used. Voltage ratings range from 50 to 400 volts peak inverse.

Type P—The P series of silicon rectifiers includes the same end terminal designs as the N series. The dc current ratings, however, are 1.5 amperes with convection cooling and 5 amperes when a heat sink is used. Voltage ratings range from 50 to 400 volts peak inverse.

Type L silicon rectifiers are rated at 1.5 amps in half wave circuits with peak inverse voltage ratings of 100 to 400 volts. Mounting is by means of ferrules that fit standard fuse clips. Low cost holders are available.

Write for complete information

Type LF—Use of a special heat sink arrangement and hardware allows a current rating of 5 amperes dc from the Type L rectifier. Precautions must be taken, however, to provide adequate cooling area to limit case temperature. Voltage ratings range from 100 to 400 volts peak inverse.

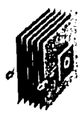
Type Q—The Q series of rectifiers is provided with axial studs only, however, it is possible to attach special end terminals. The current rating is 7.5 amperes in convection cooled applications and 15 amperes when a heat sink is used. Peak inverse voltage ratings range from 50 to 300 volts.

A Rectifier for Every Application

SELENIUM

A wide selection of Selenium Rectifier designs is offered to the design engineer by the Sarkes Tarzian line. It is possible to provide ratings of a few milliamperes to thousands of amperes and from a few volts to thousands of volts by using series, parallel and series-parallel arrangements. Whatever your power conversion problem write for specific recommendations for your application.

Standard and High Temperature—Sarkes Tarzian standard and high temperature selenium rectifiers offer the design engineer a variety of combinations. The standard line includes fourteen basic cell sizes and the high temperature line includes nine cell sizes. Maximum permissible cell temperature on high temperature types is 150°C.



Radio-Television Types—Radio and Television type selenium rectifiers are mass produced under tight quality control standards. The resultant good availability, good quality and low price have made these types popular in a variety of electronic equipments.

Embedments—Embedments provide a small unit at relatively low cost when extreme environmental or shock conditions are anticipated. Six basic cell sizes are available to assemble various combinations.

High Voltage—Series stacking of cells in glass or phenolic enclosures increases voltage ratings and half wave units are available with ratings as high as 7500 volts peak inverse with current ratings as high as 25 milliamperes. Axial leads or ferrules are available for connection.

Remember—whatever your problem on power conversion, let Sarkes Tarzian applications engineers provide you with the practical answer.

Send for your copies of the Selenium and Silicon rectifier handbooks.

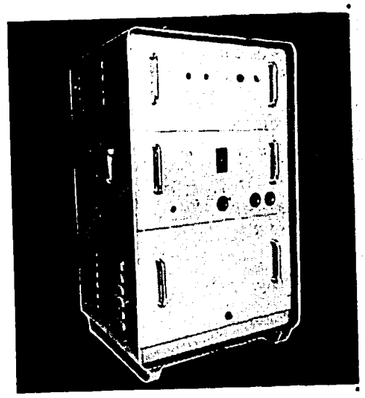
INSTRUMENTS & COMPONENTS

precision engineered by CURTISS-WRIGHT

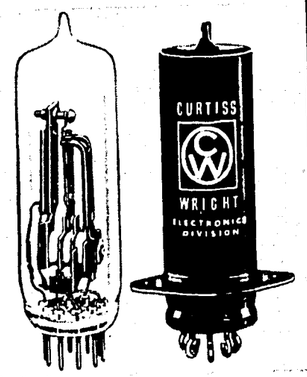


The Curtiss-Wright DISTORTION ELIMINATING VOLTAGE REGULATOR

- Furnishes 1.4 KVA of distortion-free, ± 1% regulated power without phase shift
- 330 microseconds recovery time —fastest regulation available
- Reduces line distortion to less than 0.3%
- Simultaneously provides 4 KVA of ± 1% electromechanically regulated power
- Model EE 100A $1,689.00 F.O.B., Carlstadt, N. J.

Applications:

Provides simpler, more accurate calibration of meters . . . better design of transformers, synchros, motors, magnetic amplifiers . . . easier testing with fewer rejects . . . more accurate measurement of magnetic properties . . . better computer performance . . . elimination of fast line transient effects.



The Curtiss-Wright "SNAPPER" THERMAL TIME DELAY RELAYS

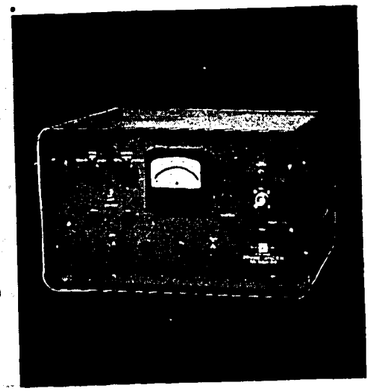
- Eliminate chatter with snap action
- Single-pole, double throw contacts
- Wide temperature range (—65°C +100°C)
- Metal envelope (7 or 9 pin) miniature or (8 pin) octal
- Glass envelope in 9 pin miniature
- Preset time delays in metal from 3 seconds to 3 minutes, glass from 5 to 60 seconds

Applications:

For military or commercial applications, "Snapper" Relays are providing positive, reliable action in circuits requiring time delays.

Other Components:

Curtiss-Wright also manufactures "Snapper" Thermostats, "Memory" Relays and Magnetic Amplifiers.



The Curtiss-Wright DYNAMIC CAPACITOR ELECTROMETER

- A micro-microammeter and millivoltmeter in one instrument
- Measures currents from 10^{-16} to 10^{-5} amperes
- 10, 100 and 1,000 mv ranges
- Exclusive diaphragm-type dynamic capacitor
- Extremely high input impedance —10^{15} ohms
- Better than 2% accuracy, high stability
- Price $1,075.00 F.O.B., Carlstadt, N. J.

Applications:

Measurement of semi-conductor parameters, low-level voltages, static charges, floating grid potentials, grid currents and insulation resistance. Used in mass spectrometry and pH measurements; nuclear reactor control and radiation monitoring systems; beta and gamma gauge control systems.

Nuclear Instrumentation and Controls

The Electronics Division is now working on contracts for nuclear control systems. You are cordially invited to discuss your nuclear instrumentation and control problems with us.

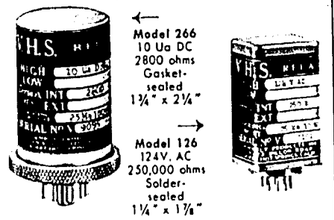
VHS METER-RELAY

(Very High Sensitivity)



← Model 266
10 Ua DC
2800 ohms
Gasket-sealed
1¾" x 2¼"

→ Model 126
124V. AC
250,000 ohms
Solder-sealed
1¼" x 1⅞"

The VHS is a D'Arsonval moving coil relay, internally shock-mounted. Its operation is similar to that of indicating meter-relays.

Connections: 9-pin octal style.

Weight: 4 ounces.

Sensitivity: From 0.2 Ua to 10 Amp., 0.1 Mv to 500 volts. AC relays are rectifier type.

Accuracy: Trip point to 1% (depends on sensitivity). Differential and repeatability 1%.

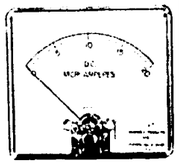
Shock and Vibration: Operates at 10 G or more, 5 to 55 cycles. Non-operating, withstands 10 G or more, 5 to 2,000 cycles; shocks of 10 G or more.

Contacts: SPST or SPDT, 5-25 Ma DC. Other ratings to ½ Amp. AC. A locking coil gives high pressure and chatter-free contact.

Price: $20 to $80. Ask for Bulletin 104-A.

API PANEL METERS

Model 261
0-1Ma DC $12.65



Model 451
0-20 Ua DC $30.25

D'Arsonval movements, Alnico magnets, tubing or knife-edge pointers. AC meters are rectifier type. DC accuracy, 2%; AC 3%. Better accuracies available. Zero right, zero center meters or up to two-thirds of range suppressed. AC and DC meters in multiple ranges. Special dials in colors, black face, your name, etc. Mirror scales.

STYLES: PYROMETERS & API PANEL METERS

Ruggedized-Sealed

2½, 3½, 4½-inch round metal case, sealed zero adjust, shock-mounted movement.

Black Bakelite

2½", round or square, 3½" round or square, 4½" rectangular. (Other colors and illumination in 4½" size.)

Clear Plastic

2½", 3¾" and 4½" rectangular.

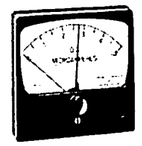
Send For Catalog:

40-PAGE CATALOG 4-C DESCRIBES COMPLETE PRODUCT LINE—includes circuitry, response time, prices, discounts, etc.

METER-RELAYS

Indicating meters with built-in locking contacts for control or alarm. Trip point adjustable.

Model 255-C
High limit,
Ruggedized-Sealed
0-100 Ua DC
$46.00



Model 461-C Bakelite
High Limit
0-5 Ua DC
$107.50

Styles:

RUGGEDIZED-SEALED metal cases are 2½, 3½, and 4½" round, shock-mounted movement, gasket-sealed.

BLACK BAKELITE . . . glass front, 4½" rectangular case. Other colors on special order. CLEAR PLASTIC 2½, 3¾, & 4½" rectangular.

Ranges:

0-5 Microamps to 0-50 Amps. 0-5 Millivolts to 0-500 volts, AC or DC. (Minimum AC voltage range 0-250 Mv.) Thermocouple temperature ranges cover from −400 to +3000°F.

Model 451-C
Double Contact -100 to +400 F.—$64.00

MIL Specs:

Ruggedized - sealed meter-relays will meet these specs: Shock: 1 and 3-foot drops, 400 lb. hammer, 3 planes. Vibration: MIL-M-10304A.

Salt Spray: QQ-M-151A. Temp.: −30°/+70°C. Sealing: MIL-M-6A.

Accuracy:

Point of contact: ¼% to 1%.

Indicating: ±2% of full scale at any point of dial. Can be 1%.

Contacts:

Rating: Standard is 5-25 milliamperes at 75-125 volts DC. Optional ratings to 250 Ma, 6 to 250 volts, DC.

Arrangement: High Limit (makes on increase of signal), Low Limit (makes on decrease of signal), Double (both high and low contacts)

Life: 10 to 20 million operations.

LIAD MULTI-CONTACT METER-RELAY

The LIAD consists of a D'Arsonval meter movement with one or several contacts carried on the moving pointer, a printed circuit scale (95 angular degrees), and a device for gripping the pointer and its contacts to the scale contact bars.

The unique combination of contact closures resulting from this gripping tells the level of the signal —and can be transmitted or used for telemetering; automatic production testing or grading; maximum value reading; simple quantitative read-out, etc.

Standard LIAD with 10 segment scale band, one milliampere sensitivity, 12 volt read-out coil. Price $100.00

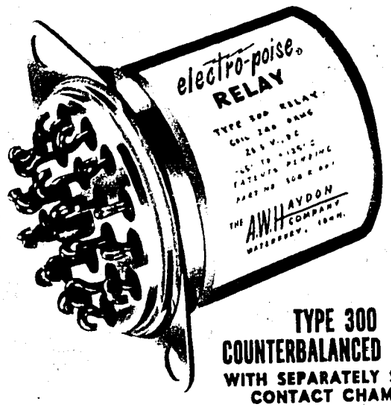
FIRST *Really New* RELAY

TO MEET TODAY'S RIGID REQUIREMENTS
PERFECTED BY THE

A. W. HAYDON CO.

This miniature, hermetically-sealed, general purpose relay has been designed with increased magnetic force to provide higher contact pressures and greater travel than are usually found in this type. Special care has been taken to assure reliable operation in low level circuits.

Rated Load: 2 amperes, 28 Volts DC, resistive. Ambient Temperature Range: 65°C to + 125°C. Vibration: 15g to 2,000 cps — no contact chatter. Shock: 50g, 11 milliseconds — no contact chatter. Write for Bulletin AWH RY 1001.



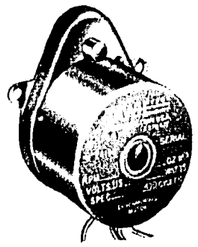
TYPE 300 COUNTERBALANCED RELAY
WITH SEPARATELY SEALED CONTACT CHAMBER

Uniquely designed with contacts isolated from coil. Contacts can never become contaminated with vapors or gas from organic insulating materials.

TIMING AND CONTROL DEVICES BY THE A. W. HAYDON COMPANY ARE RECOGNIZED AS THE MOST DEPENDABLE PERFORMERS IN THE FIELD.

400 CYCLE MOTORS

Reversible — Light weight (8 ounces). 115 volts ± 10%; 55 milliamps. Torque: 0.025 oz-in at 3000 rpm. Meet Military Requirements. Write for Bulletin AWH MO 803.

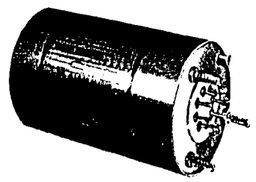


MINIATURE HERMETICALLY SEALED TIMERS

Supplied in 2½" diameter housing. Optional mounting and electrical termination.

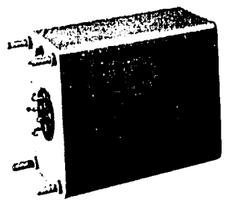
TIME DELAY RELAYS
Single or multiple switching. Delay periods from 2 seconds to 3 hours. Write for Bulletin AWH TD 400.

REPEAT CYCLE TIMERS
Single or multiple switching. Wide Range of Time Cycles. Write for Bulletin AWH RC 200.

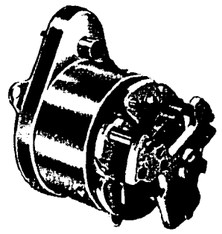


PROPORTIONAL DELAYED RESET TIME DELAY RELAY

Provides a controlled reset rate. Designed to meet special applications. Hermetically sealed or enclosed in dust cover. Meets military requirements. Write for Bulletin AWH TD 402.

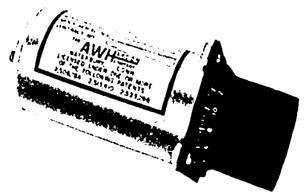


GOVERNED DC MOTORS



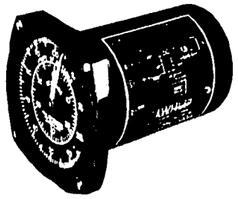
The A. W. Haydon Company now offers 3 series of Chronometrically Governed DC Motors. Each designed to do the same job in a different application.
5700 Series — non-military applications where extreme temperature, vibration and shock are not experienced.
5600 Series — Aircraft and military applications where extreme temperature and moderate vibration and shock are encountered.
5800 Series — Aircraft and missile applications where extreme temperature, vibration, and shock are encountered. Write for Bulletin AWH MO 800, -801, -802, -804.

SPECIAL TIME DELAY RELAY



Supplied in 2.2" diameter housing. Precision unit: ± 1% accuracy. Meets military requirements. Adjustable over wide range. Write for Bulletin AWH TD 500.

STOP CLOCKS



20-30 Volts DC. Precision Movement — Electrical Reset Temperature Range -65°F to 185°F. Option on mounting and electrical termination. Write for Bulletin AWH ET 700.

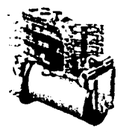
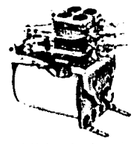
PHILLIPS

RELAYS and HERMETIC SEALS



Type 8—Compact, highly sensitive, multi-contact telephone-type relay. Ideally suited for electronic control circuits, communications and data handling systems. 2 5/32" long x 1 3/32" wide.

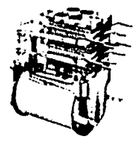


Type 9—Miniaturized version of our famous telephone type relay. Versatility in coil and contact arrangement, extreme reliability and precision adjustment. 1¼" long x 21/32" wide.

Type 33B—General purpose power relay for switching power loads on welding timers, process controls and applications requiring precise operation for long periods. Compact, lightweight. 2 3/16" high x 2" long x 1 17/16" wide. (3 pole).

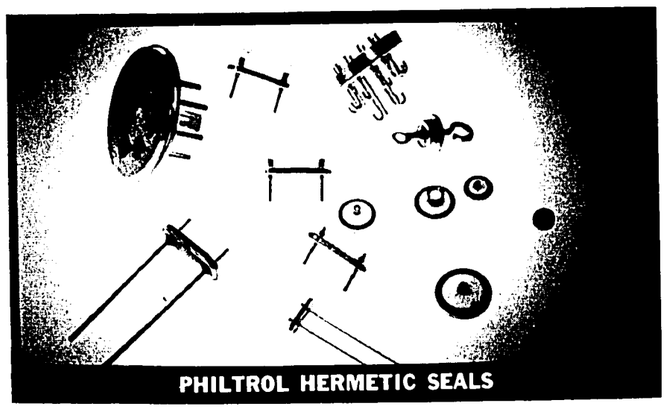
Type 27—Compact, efficient power relay designed for maximum reliability and long life. Commonly used in aircraft industry. 2 1/16" high x 2" long x 1 23/32" wide. (3 pole).

Type 57—Medium-power aircraft type relay. Compact and rugged enough to meet severe environmental conditions imposed by military applications. Built to meet or exceed MIL-R5757C, 25018, 6106B (MS-25024). 1 3/16" high x 1 7/16" long x 1¼" wide.



Type 4C General purpose multi-contact switching relay. Fast operating speeds, sensitivity, long life. Offers variations in coils and contact arrangements within minimum space. 1 11/16" long x 1 1/32" wide.

Complete technical bulletins are available on these and the many other standard relays. In addition, Phillips custom-engineers relays to meet any operating and environmental condition. Write us today.



Standard or custom-engineered glass-to-metal seals — any type, any size, any quantity.

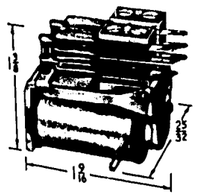
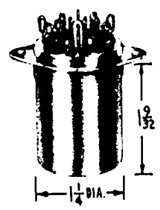
P&B RELAYS

are used in every industry. Design engineers like their quality and P&B's ability to build to exact specifications. Here is a "sampler" of basic types



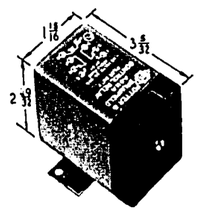
communications

MH Series telephone type relays are small, versatile and available in contact arrangements up to 18 springs (9 per stack) DC and a variety of contact materials. Silver contacts (⅛") are rated 5 amp. 115 V. 60 cycles resistive load. High temperature models operate from −65°C to +125°C.



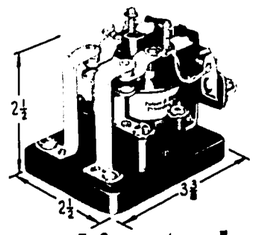
missiles and jets

BD "Star Series" relays are used in applications demanding maximum reliability. These 26.5 V. DC relays were designed to surpass shock test II per MIL-R-5757C. 50 G and vibration Grade III per MIL-R-25018; 5-2000 cps at 15 G. This 6 pole, double throw relay is operative in ambients of −65°C to +125°C.



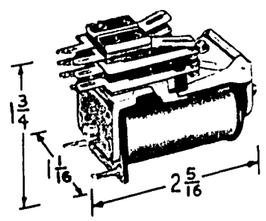
air frame

AC Series relays are designed for airframe controls and other applications calling for good mechanical shock resistance. Relays are enclosed in dust proof cover; phenolic base meets U/L spacing and creepage distances. Double pole double throw contact arrangement in AC and DC models.



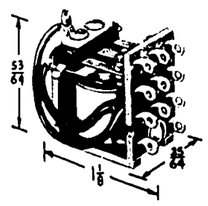
machine tools

PR Series relays are rugged, fast acting . . . designed for high current or high voltage switching. Floating movable contact carrier assures ample wipe and contact pressure. AC or DC models available with contact arrangements up to double pole double throw. Supplied open or with dust cover.



instrumentation

LS Series relays—Medium coil, telephone type—have special hinge construction resulting in a mechanical life in excess of 100 million operations. Contact arrangements go to 20 springs (10 per stack). Power required: 100 mw per movable arm. DC only to 200 V. Open or hermetically sealed models.



business machines

KM Series relays meet the demand for miniaturization and multiplicity of action within a single relay. Contact arrangements available from single pole single throw to three pole double throw. May be ordered in coil voltages up to 48 V. DC in open or sealed models. Weight, open, 7/8 oz. Sealed, 1-1/4 oz.

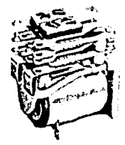
PRICE ELECTRIC CORP., FREDERICK, MD. — HUSKY RELAYS & CONTROLS

Sub-miniature Relay — DPDT Style 506

Meets requirements of MIL-R-25018 (USAF) for a general purpose relay for aircraft and missile use. Standard coil for 26.5 VDC operation. Special design, for low-level circuit use, permits isolation of all organic materials from contact chamber.



Series 5400

Improved design withstands in excess of 10 G vibration through 500 cycles. Contacts rated at 3 amps. at 24 VDC or 115 VAC, non-inductive. Available with higher contact ratings.

Series 5700

One of a complete line of multi-leaf relays from midget to long-frame types. (Open styles available.)

Series 8200

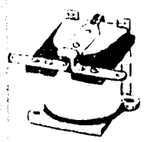
200-amp, high shock relay for aircraft and missile use. Temperature range from—65 C. to + 125 C. For operation from DC only.

Style 6351

Designed for use in 52-ohm transmission line. Supplied with 3 UHF fittings. Available without auxiliary contacts as style 6350.

Series 2100

Designed for military and commercial needs. Two frame sizes providing up to 6 PDT. Contacts rated at 15 amps. at 24 VDC non-inductive. DC relays are available for voltages up to 120. AC relays up to 250 V 50 60 cycle.



Series 1000

Small, light, efficient relays for many uses. SPDT contacts rated at 1 amp. at 50 VDC. Maximum voltage 24 VDC. Available hermetically sealed.

The complete Husky line contains relays designed to meet most needs. If you have a design problem, send us your specifications for engineering review.
Write for literature and specifications.

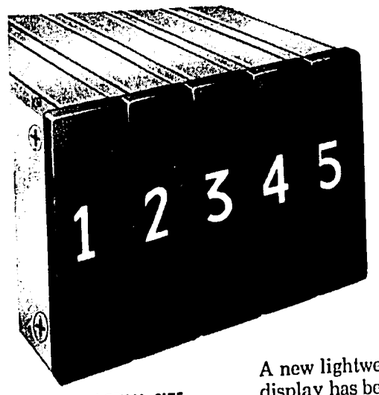
NEWS for design engineers



ACTUAL SIZE

UNION
DIGITAL
INDICATOR

A new lightweight Digital Indicator for data display has been developed by Union Switch & Signal that has many uses in aviation and other industries. It is designed for either local or remote use, on a direct wire basis, and responds to binary code. The indicator reads out directly and has a non-dissipating storage facility. Data can be printed out if necessary. Write for Bulletin 1011.

UNION
MINIATURE RELAYS
AC or DC

A wide variety of UNION AC or DC Miniature Relays, with all standard mountings, is stocked for immediate shipment. Contacts can be gold alloy, palladium or the new HI-LO material which permits the use of one relay for both high-level loads of two amperes and low-level, dry-circuitry loads, eliminating the need for two separate relays.

Coil resistance runs up to 13,500 ohms, vibration resistance up to 2000 cycles at 30 G's, and shock in excess of 50 G's. Write for Bulletin 1012.

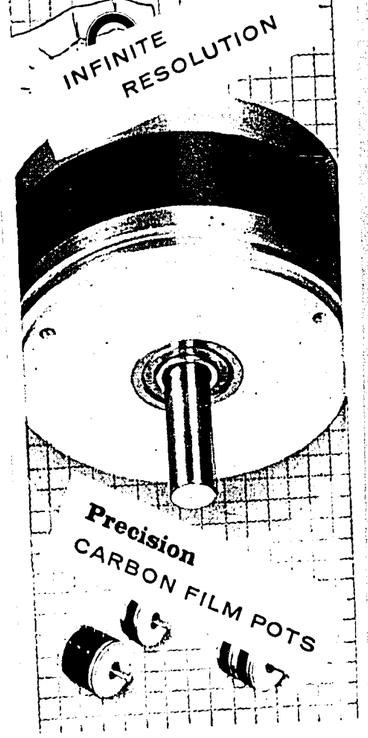
CRITICAL POT SPECS* are met at CIC



Equipment designers who demand more than "shelf item" specifications, rely on CIC for dependable delivery of ultra-precise potentiometers.

The result of CIC research, carbon film potentiometers are setting new standards of accuracy, life at higher speeds and performance reliability.

CIC has assisted many firms in a wide variety of industrial instrumentation, military fire control and flight guidance equipment.

Why not discuss your specific requirements with us?

*New carbon film techniques assure virtually infinite resolution; linearity to .01%, sine-cosine to .025%; compact ganging; precision ball bearing servo construction.

"For Precision Performance...specify CIC"

Potentiometers — Trimmers — Relays

Ace *delivers reliability* in sub-miniaturization

Maximum performance — advanced designs, special materials, and unique winding and manufacturing techniques are combined to give you "heavyweight" performance in the "featherweight" class.

Sustained reliability — rigid quality controls and testing assure highest standards of performance-reliability over extended periods. Ace designs have been proved in use by leading manufacturers.

Prompt delivery — modern mass production techniques and extensive facilities guarantee delivery to meet your requirements. Prototype orders are expedited in a special order department.

*ACEPOT** Sub-miniature precision wire-wound potentiometers . . .

actual size

This outstanding unit provides extremely high resolution and linearity yet is only ½" in size.

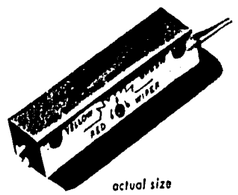
Size	½" x ½"
Weight	0.25 ounce
Resistance Range	10 Ω to 250K ±2% std.
Linearity	±.3%
Temperature	—55° C. to 125° C. **
Winding Angle	325° std. ≷ available
Resolution	Extremely high
Torque	.035 oz./in. @ 20° C. ***
Power	2 W for 60° C. rise
Mounting	Threaded bushing, servo, flush, flanged. Ganged up to 6 cups.

The above are standard. Modifications are available.
Fully sealed against dust, moisture, humidity. Anti-fungus treated. Meets applicable JAN-MIL specs including shock and vibration.

** X-500 rated for higher temperature range —55° C. to 150° C.
*** Jewel Bearing Acepot torque of .001 ounce/inch

*ACEOHM** Sub-miniature, high temperature, humidity-proof trimmers . . .

Specially designed for dependable operation in circuits subject to extreme environmental conditions.

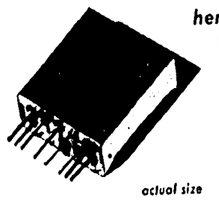


actual size

Size	1 5/16" x 3/16" x 3/16"
Weight	0.2 ounce
Resistance Range	10 Ω to 50K
Usable Potentiometer Range	95-100%
Power Rating	1 W @ 50° C. (flush mount design) derated to O W @ 150° C.
Temperature	—55° C. to 150° C.
Resolution	High; to 0.15%
Dielectric Strength	1 minute @ 1M V. DC per JAN-R-19
Load Life	1M hours in accordance with JAN-R-19

35 turn adjustment for precision settings. Excellent shock, vibration, acceleration characteristics. (Meets or exceeds MIL-E-5272A.)

*ACERELAY** Sub-miniature, hermetically sealed relays . . .



actual size

Bifurcated contact design assures *positive* reliability both in power and dry circuit work.

Size	¾" x 7/8" x 3/8"
Weight	0.75 ounce
Contacts	bifurcated *
Contact rating	3 amp @ 28 V DC 1 amp @ 115V AC
Coil resistance	to 10,000 Ω
Vibration	5-2000 CPS @ 20G
Shock	50G
Life	500,000 operations minimum
Header types	plug in, wire leads, solder hook
Mounting	socket, top studs, side studs, bracket
Temperature	to 125° C.

Entire relay hermetically sealed — coil assembly hermetically isolated from contact assembly.

* Double pole double throw, break before make, make before break.

*ACETRIM** Sub-miniature precision wire-wound trimmers . . .

actual size

A wide range of resistances is available in this low-cost, space and weight-saving trimmer.

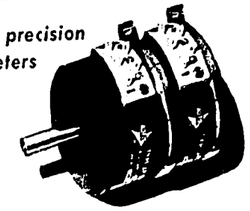
Size	½" x ½"
Weight	0.25 ounce
Resistance Range	10 Ω to 150K ±5% std.
Linearity	±3%
Temperature	—55° C. to 125° C. (to 150° C. on special order)
Winding Angle	325° std. ≷ available
Torque	.035 oz./in. @ 20° C.
Power	2 W for 60° C. rise
Mounting	Threaded bushing, printed circuit, flush, flanged, ganged

with tabs for printed circuits

The above are standard. Modifications are available.

Fully sealed against dust, moisture, humidity. Anti-fungus treated. Meets applicable JAN-MIL specs including shock and vibration.

*ACEPOT** Nonlinear precision wire-wound potentiometers



Ace designs, plus precision mechanical construction, give highest possible linearity and close conformity. Available in all AIA sizes to meet your unique nonlinear requirements.

	Sine-cosine	Double Sided Square-law
Size	3"	3"
Resistance	20K ±5% driving	25K ±5% driving
Conformity	½% pk-pk	±0.25%
Function angle	360°	± 180°
Power	4 watts	3 watts
Mounting	Servo	Servo

Other nonlinear configurations to meet your specific requirements available in prototype and production quantities.

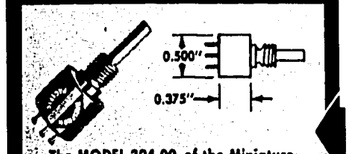
PRECISION POTENTIOMETERS

SUB-MINIATURE, MINIATURE AND STANDARD

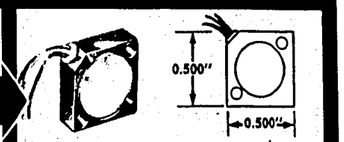
Potentiometers of all basic types are designed for maximum reliability and broad application. Production series are just part of the story though. Special, custom designs are available to meet "unusual" specifications.



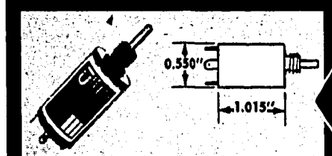
The MODEL 304-00, of the Miniature Single Turns group.

MINIATURE SINGLE TURNS—Only 0.375 inch body length by 0.500 inch diameter, 10 to 50K ohms, wire wound; linearity from 3 to 0.3%; 2 watts at 50°C, 0 watts at 125°C.

TRIMMING POTENTIOMETERS—Worm gear adjustment design produces maximum stability under extreme environmental conditions; 10 ohms to 150 K ohms, wire wound; up to 1.5 watts at 50°C, 0 watts at 150°C; as small as 0.050 cubic inch. Manufactured with leads or printed circuit terminals.



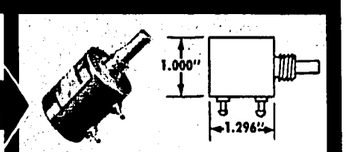
MODEL 300-00, one of the many Trimming Potentiometers



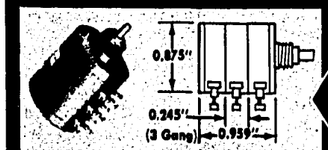
Typical Miniature Multiturn—the MODEL 341-60

MINIATURE MULTITURNS—The smallest precision, ballbearing, 10-turn pots offer maximum reliability with unique zero backlash construction and double wipers; 20 G's to 2000 cyc; to 250K ohms; 2.5 watts at 40°C, 0 watts at 140°C; panel or servo mount.

GENERAL PURPOSE MULTITURNS—To 500K ohms, wirewound, to 4 watts at 40°C, 0 at 100°C; as small as 1.0 inch diameter, sleeve or ball bearing, excellent resolution, designed to fit ALL applications.



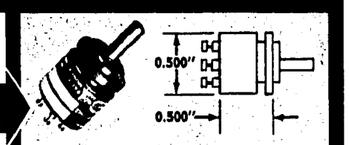
MODEL 400, typical of the General Purpose Multiturns



Representative of the Ganged Single Turns—the MODEL 319-60

GANGED SINGLE TURNS—Unique screwdriver phasing, no clamp rings or movable cups; minimum depth "per cup"; from 0.875 to 3.0 inch diameter; to 500K ohms, wire wound with exceptional linearity and resolution.

HIGH TEMPERATURE DESIGNS—Special designs are available, offering all of the features listed for separate groups above PLUS stability at elevated temperatures. Emphasis on 200°C to 500°C range.



Typical of High Temperature Designs—MODEL 314

Openings exist for qualified engineers.

ELECTRA
DEPOSITED CARBON RESISTORS

If increased reliability is your ultimate goal, begin with Electra deposited carbon resistors. Get precision, stability, small physical size, plus a full range of resistance values. Get the benefit, too, of an unsurpassed degree of manufacturing skill . . . skill resulting from years of pioneer work and production leadership in this field of electronics. Check the wide selection of available sizes, then write today for full details.

All Electra resistors made to meet or exceed Mil-R-10509B. Lead length C Standard and Molded resistor is 1½". For Hermetically Sealed resistor it is 1⅜".

NEW ELECTRA SEALED SWITCH

Write for details on new Snap Action W-Blade Sealed Switch. Completely new water-proof, dust-proof switch at a cost comparable to open type switches. Write today for specifications and prices.

Electra

ELECTRA Ceramic Disc Capacitors

EKC 102

Temperature Compensating • A. C. Line Filters
General Purpose • Extended T. C. • General By-Pass

AVAILABLE IN NINE PHYSICAL SIZES—from ¼" to 15/16" diameter . . . Electra now offers you a complete line of Ceramic Disc Capacitors. These capacitors offer you the utmost in high stability, low power factor, High Q, low drift, high insulation and low inductance. You get, too, precision, product uniformity, small physical size, plus a wide range of capacitance values and low cost. For full details write today for our new Catalog Bulletin No. 101. In addition to the types listed above, high voltage disc capacitors and other special types also are available on request.

CRCA Series "200" Resistors

- Precision Wire Wound.
- 1% to .005% Accurate.
- .003% Stable.
- ±5 ppm/°C Temperature Coefficient.
- Epoxy Encapsulation.
- Meet MIL-R93A & MIL-R9444.
- Hundreds of standard types.
- 48 hrs. Special Delivery Service.
- Also: High Accuracy Resistance Networks, Decades, Voltage Dividers & Wheatstone Bridges.

CRCA TYPE					Dimensions

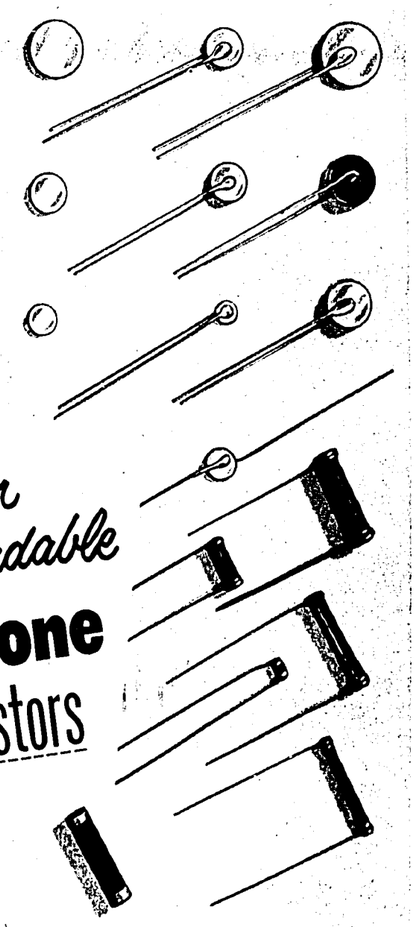
Where your project calls for TEMPERATURE MEASUREMENT and CONTROL

Design with dependable

Keystone Thermistors



Reliability, rapid response, stable operation in temperatures as high as 500°F continuous—these Keystone thermistor advantages are yours to employ over a wide range of project applications. With resistance to current flow varying inversely to their temperature, Keystone thermistors interrelate thermal and electrical behaviour, and translate one into the other. They are available in many compositions, sizes and shapes to meet your requirements (from tiny .050 diameter beads to 5 watt discs).

If you have a temperature compensation or other application suggesting the use of thermistors, we invite you to have your problem reviewed by Keystone engineers. Write us, without obligation of any kind.

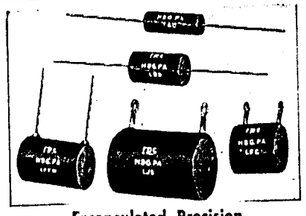
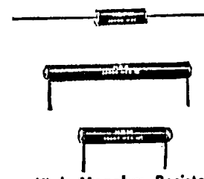
High Frequency Resistors

Used where requirements call for very low inductance and skin effect in circuits involving pulses and steep wave fronts. Depending on size and resistance value, these resistors are usable at frequencies to over 400 mc. Resistance values range from 20 ohms to 100 megohms with tolerance of 20% to 5%. 2 types available.
TYPE F resistors (shown) in 8 sizes from 9/16" long x 0.10" diameter to 6½" long x 9/16" diameter, with lugs or wire leads. Power ratings ¼ to 10 watts.
TYPE G resistors (not shown), in 6 sizes up to 18½" long. Power ratings 10 to 100 watts.



Encapsulated Precision Wire Wound Resistors

RPC Type L Encapsulated Resistors will withstand temperature and humidity cycling, salt water immersion and extremes of altitude, humidity, corrosion and shock without electrical or mechanical deterioration. Type L resistors are available in many sizes and styles ranging from sub-miniature to standard with lug terminals, axial or radial wire leads. Available for operation at 105° C. or 125° C. ambient temperatures. These resistors will meet all applicable requirements of MIL-R-93A, Amdt. 3. Type L can be furnished with all resistance alloys and resistance tolerances from 1% to .02%.



High Megohm Resistors

Type H Resistors are used in electrometer circuits, radiation equipment and as high resistance standards. Resistance available to 100 million megohms, (10^{14} ohms). For utmost stability under adverse conditions Type HSD and HSK Hermetically Sealed are recommended. Eight sizes from ⅞ inch to 3 inches long are available. Voltage rating to 15,000 volts. Low temperature and voltage coefficients. Standard resistance tolerance 10%. Tolerance of 5% and 3% available. Also matched pairs 2% tolerance.

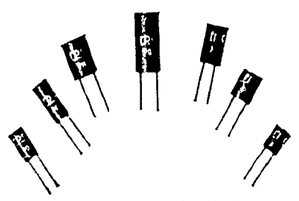
rpc

HIGH QUALITY RESISTORS FOR ELECTRONICS

RPC is a widely recognized supplier of high quality resistors to industry, Government Agencies and the Armed Forces. Advanced production methods, modern equipment and scientific skill enables RPC to manufacture resistors of *highest quality* in *large quantities* at *reasonable cost*. Modern manufacturing plant is completely air conditioned and equipped with electronic dust precipitators to insure highest production accuracy. RPC resistors are specified for use in instruments, electronic computers, radiation equipment, aircraft equipment and scientific instruments.

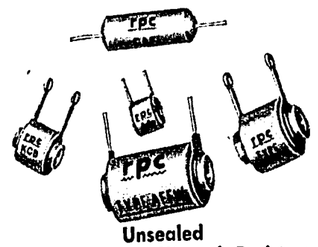
Test equipment and standards for checking and calibrating are equalled by only a few of this country's outstanding laboratories. Our ability to produce resistors of highest quality coupled with prompt delivery have established RPC as a leading manufacturer of resistors. Small or large orders are promptly filled.

Representatives in principal cities. For full information send for latest catalog.



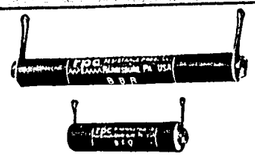
Printed Circuit Precision Resistors

To meet the requirements for printed circuitry, RPC has developed Type P Encapsulated Wire Wound Precision Resistors Miniature, single ended units designed for easy rapid mounting on printed circuit panels with no support other than the wire leads. Many newly developed techniques are employed in the manufacture of Type P Resistors. These units can be operated in ambient temperatures up to 125°C. and will withstand all applicable tests of MIL-R-93A, Amdt. 3. Available in 6 sizes, rated from 1/10 watt to .4 watt. ¼" diameter by ⅜" long to ¾" diameter by ¾" long. Resistance values to 3 megohms. Tolerances from 1% to 0.05%.



Unsealed Precision Wire Wound Resistors

Unsealed precision resistors are wound on steatite forms and are used for all general requirements. They can be furnished with all resistance alloys in tolerances from 1% to .02%. These resistors will meet the requirements of MIL-R-93A, Amdt. 2, characteristic B. Special winding techniques, impregnation and thermal aging result in resistors of exceptional stability. They are available in a wide variety of sizes, styles and terminal types. Matched resistors, networks and special assemblies can be supplied.



High Voltage Resistors

Type B Resistors are stable compact units for use up to 40 KV. These resistors are used for VT voltmeter multipliers, high resistance voltage dividers, bleeders, high resistance standards and in radiation equipment. They can be furnished in resistance to 100,000 megohms. Available as tapped resistors and matched pairs. Sizes range from a 1 watt resistor 1 inch long x ⅜ inch diameter rated at 3500 volts, to a 10 watt resistor 6½ inches long x ⅞ inch diameter rated at 40 KV. Low temperature and voltage coefficients. Standard resistance tolerance 15%. Tolerances of 10%, 5% and 3% available. Tolerance of 2% available in matched pairs.

IRE remembers the man

He caught a radio signal from over the horizon and launched an industry!

KENNETH BULLINGTON, recipient of the *IRE Morris Liebman Memorial Prize, 1956* . . . for a recent important contribution to the radio art.

IRE recognizes *Kenneth Bullington's* contributions to the knowledge of tropospheric transmission beyond the horizon and his work of applying these principles to practical communications systems. Now, pictures and sounds can travel more than 200 miles through the air without the use of relay stations. This has made practical the radio-electronic connection of Labrador and other distant military outposts. Radio telephone service now spans the 180 miles separating Florida and Cuba. Tropospheric transmission is a comparatively new electronic art which, with the work of Mr. Bullington and other dedicated professional men, has been developed into a vast market for many products . . . these men IRE always remembers.

The Institute of Radio Engineers is a professional Society of 50,000 radio-electronic engineers devoted to the advancement of their field of specialization. Their official publication, *Proceedings of the IRE*, is concerned solely with these men and their accomplishments. And *Proceedings of the IRE* is the only engineering journal in the radio-electronic industry exclusively edited *by* and *for* radio-electronic engineers.

Earth satellites, FM, TV, radar, computers, color TV, transistors, scatter propagation, solid state electronics . . . all that is history making in radio-electronics is first presented, then followed step-by-step in its development, on the pages of *Proceedings of the IRE* in authoritative articles by the men behind these advances.

IRE remembers the man! Is it any wonder that the men remember IRE? Best way to get *products remembered*, if they are sold in the radio-electronics field, is through advertising in the pages of *Proceedings of the IRE* for *...if you want to sell the radio industry, you've got to tell the radio engineer!*

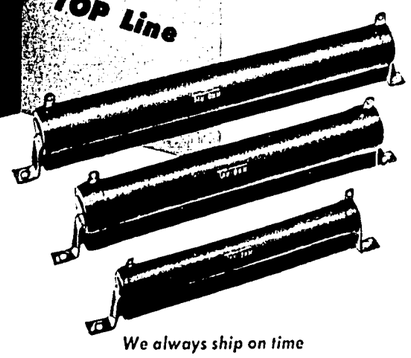
TRU TOP RODUCTS

America's TOP Line



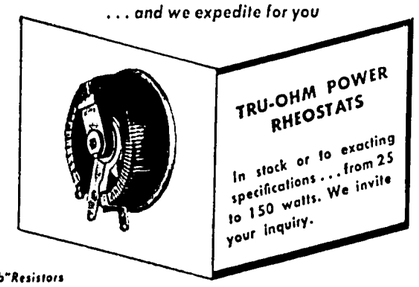
FIXED VITREOUS ENAMELED RESISTORS

As the world's largest producers of wire-wound resistors, we offer the finest quality . . . the fastest service from stock or to specifications . . . and the assurance that you are receiving the best value in vitreous enameled resistors.

FIXED VITREOUS ENAMELED RESISTORS are available from 3 watts to 200 watts . . . with a large variety of special mountings.

The next time you need resistors, send us your requirements and find out why we are growing so rapidly . . . are truly the TOP line in the world! Our latest catalog is available upon request.

We always ship on time . . . and we expedite for you



TRU-OHM PRODUCTS Division of Model Engineering & Mfg., Inc.
General Sales Office: 2800 N. Milwaukee Avenue, Chicago 18, Ill.
Factory: Huntington, Indiana

MANUFACTURERS: Power Rheostats, Fixed Resistors, Adjustable Resistors, "Econohm" Resistors, "Tru-rib" Resistors

For details, circle #378 on Reader Service Card.

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each major classification. Complete addresses will be found in the Alphabetical Directory.

GENERAL ELECTRIC HAS A WIDE SELECTION OF SEMICONDUCTORS...CHECK BELOW FOR YOUR APPLICATION!

HIGH & LOW FREQUENCY GERMANIUM PNP TRANSISTORS

- ☐ High gain, medium power audio
- ☐ For USAF requirements
- ☐ Commercial equivalent to USAF requirements
- ☐ Computer switching
- ☐ Symmetrical switching
- ☐ Industrial & military linear amplifiers
- ☐ RF amplifiers
- ☐ Oscillator circuits
- ☐ Inexpensive audio amplifier types for the hobbyist

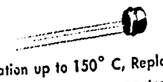
HIGH FREQUENCY GERMANIUM NPN TRANSISTORS

- ☐ RF and IF amplifier types for broadcast receivers
- ☐ Converters
- ☐ Industrial & military linear amplifiers
- ☐ Computer switching
- ☐ Inexpensive high frequency types for hobbyists

SILICON NPN HIGH FREQUENCY TRANSISTORS

- ☐ Computer switching, 150° C operating temperature, 200 °C storage temperature
- ☐ High frequency amplifiers, 150° C operating temperature, 200° C storage temperature

SILICON UNIJUNCTION TRANSISTOR



- ☐ Operation up to 150° C, Replaces 2 junction transistors in computer circuits

NPN TETRODE TRANSISTOR

- ☐ Up to 150 megacycle operation

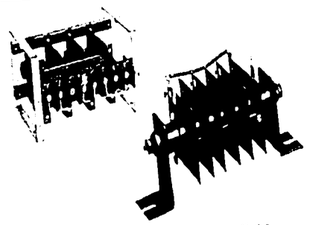
SILICON LEAD & STUD MOUNTED RECTIFIERS

- ☐ 1N536 series silicon rectifiers, 750 ma @ 50° C, 250 ma @ 150° C, PIV ratings 50, 100, 200, 300, 400 and 500 volts
- ☐ 1N1115 series silicon, stud mounted rectifiers, 1.5 amps @ 85° C, 600 ma @ 150° C, PIV ratings 100, 200, 300 and 400 volts

GERMANIUM RECTIFIERS

- ☐ 1N91 series germanium rectifiers rated from 75 to 150 ma, maximum operating temperature 55° C, PIV ratings 100, 200 and 300 volts
- ☐ 1N315, USAF 1N315 & 1N368 germanium rectifiers characterized by an operating temperature up to 85° and low leakage current

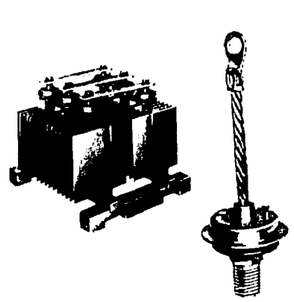
GERMANIUM STACK RECTIFIERS



Germanium stack rectifiers are available in stacks up to 12 fins. PIV ratings are 100, 200 and 300 volts. Extremely low power dissipation and forward voltage drop provide excellent efficiency and regulation.

- ☐ 4JA211 series, up to 1½ amps per fin
- ☐ 4JA3011 series, up to 10 amps per fin

SILICON HIGH CURRENT RECTIFIERS



- ☐ 4JA60 series silicon stud mounted rectifiers provide an operating current up to 85 amperes. Low forward voltage drop
- ☐ 4JA6011 series silicon stack rectifiers give an output up to 76.5 kilowatts, without forced air cooling, from less than ⅓ cubic foot

Recent developments in germanium and silicon semiconductors are opening new applications every day. The Semiconductor Products Department of General Electric is continually expanding its line to meet new applications with ratings designed for your needs.

For more specific information on G-E semiconductor products which fill the applications you checked above, write the General Electric Company, Semiconductor Products, Section S3767, Electronics Park, Syracuse, New York.

Progress Is Our Most Important Product

VECO COMPONENTS *Simplify* CIRCUITRY

Have You considered

all the possibilities of designing for compactness, simplicity, and increased sensitivity?

VECO THERMISTORS,

as components, are supplying the solutions to many design and circuitry problems. *Investigate today!*

VECO THERMISTOR DATA BOOK V-42. AVAILABLE

Some Present Uses: Time delay • Gas analysis • Volume limiting • Surge protection • Vacuum manometry • Flow measurement • Temperature control • Temperature measurement • Radar power measurement • Temperature compensation • Oscillator stabilization • new applications being developed.

The VECO THERMISTOR-VARISTOR EXPERIMENTORS' KITS are offered by Victory at an amazingly low cost; Model 168 over a $15.00 value—only $5.00 postpaid; Model 168A over a $27.50 value—only $10.00 postpaid.

TRANSISTORS

The Industro Transistor Corporation is prepared to meet your transistor requirements. Our transistors for computer application are manufactured to meet the critical limits of your specifications; other types of a less critical nature are also available.

Our new plant, using the latest equipment, assures a constant supply of transistors manufactured under the strictest quality controls. Sample quantities will be supplied for testing in your circuitry.

Full technical information is available, and we will be pleased to quote on any production schedule. Upon request, we will have our local representative call at your office for further discussion.

Industro Transistor Corporation

Sales Office: 649 Broadway, New York 12, N.Y.
Plant Address: 87-31 Britton Avenue, Elmhurst 73, N.Y.
Telephone: ORegon 7-8400 Teletype: NY 1-1807

GERMANIUM ALLOYED JUNCTION TRANSISTORS

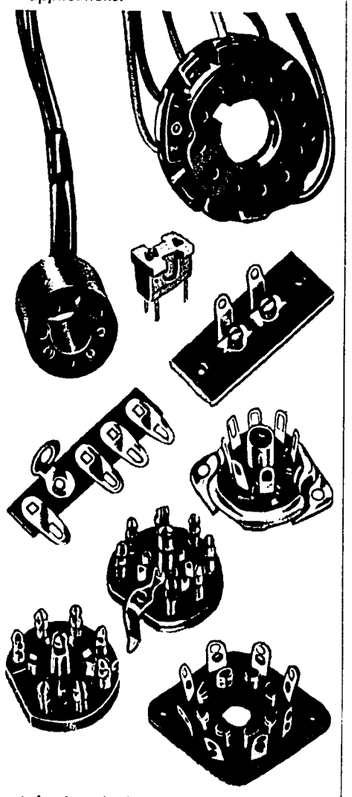
for Computer
Audio
Hearing Aids
R.F. and I.F. applications

General Transistor, the fastest growing name in transistors, offers you a complete line of high quality semiconductors. For superior electrical performance, reliability and service, buy and specify General Transistor.

GENERAL TRANSISTOR CORPORATION

"industrial" electronic components

Precision engineered electronic components and connecting devices for all your needs.
Our extensive design and production facilities are available for developing your special requirements and applications.



- Laminated tube sockets
- Molded tube sockets
- Printed circuit sockets
- Transistor and sub-miniature sockets
- CRT sockets
- Terminal strips
- Anode connectors
- Battery connectors
- Antenna connectors
- Metal and bakelite stampings

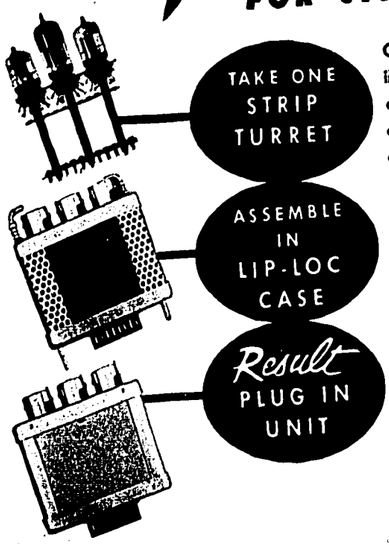
Unitize—Miniaturize

WITH *Vector* STRUCTURES FOR CIRCUITRY



Choice of Deck, or Wall type strips in many sizes offer miniaturization, accessibility, ease of assembly and adaptation to semi-automatic machinery.

A sectionalized case with a choice of plugs quarter turn locks, ventilated or solid wall; with two piece center section or snap-open side ports.

For circuit unitization, faster final assembly, stock reduction and ease of maintenance.

VECTOR ELECTRONIC COMPANY, 3352 San Fernando Road, Los Angeles 65, Calif. • Tel. CLinton 7-8237

BRAININ ELECTRICAL CONTACTS

Contacts in BRALOY*
(Silver-Cadmium Oxide)

Resistance to sticking under high current and high inductive circuit conditions. Effective arc quenching properties. Can be supplied in the form of contact rivets, welding type contacts, etc. Whether you are seeking advice on new applications, redesign, or wish your own designs executed, send us your requirements, and they will receive our most careful attention.

Extra KNOW-HOW
for your specific design problems

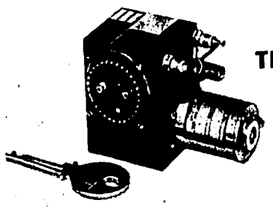
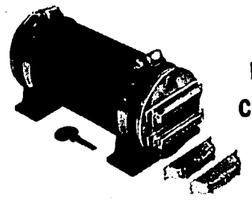
Time Division Multiplexers by ASCOP

TELEMETERING SENSOR SAMPLER



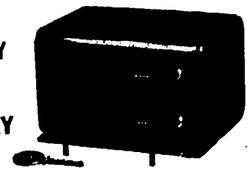
Type A: Sub-miniature 2 pole, 30 contacts per pole switch provides 60 channels in make-before-break operation. A filtered 27.5 volt DC motor rotates the switch at 2.5 RPS providing a sampling rate of 150 samples per second. Solid block construction permits satisfactory operation under random noise vibration of from 36 to 2000 cycles at 18 G's RMS, 160 G's impact for 2 milliseconds and a steady state acceleration of 100 G's.

LOW LEVEL COMMUTATOR



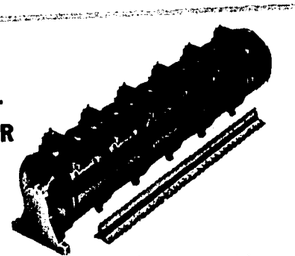
Type AS: The ASCOP Type AS multi-channel rotary sampling switch is designed specifically for airborne telemetering applications where precision high-speed sampling with the utmost reliability is necessary for accurate data. 3 poles 27 channels @ 2.5, 5 or 10 rps. 27.5 VDC governed drive. Proven reliability in 25,000 hours of life testing.

HERMETICALLY SEALED RADAR DISPLAY



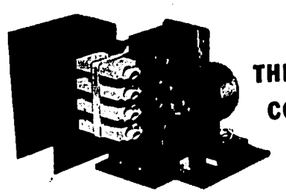
Type AN: This multichannel sampling switch is designed for use in a target designation system for fighter aircraft. The metal on metal hermetically sealed switch housing provides a dust-proof, moisture-proof, explosion proof enclosure to allow the switch to run properly at high attitudes over extreme temperature ranges.

INDUSTRIAL MULTIPLEXER



Type AU: This multipole sampling switch has been designed for the flexibility of application, ease of servicing and long life required for automation and control applications in industry. Speeds from 1 to 1800 RPM, 30 to 250 channels per pole, 1 to 20 poles. Years of service free operation.

THERMOCOUPLE COMMUTATOR



Type Y: Samples 40 independent low level sensors with a noise level below 20 microvolts. By reducing noise and leakage to a minimum, temperature variations smaller than 1°F can be detected when sampling copper-constantan thermocouples.

HIGH LEVEL SAMPLING SWITCHES • LOW LEVEL SAMPLING SWITCHES • DISPLAY COMPONENTS • CONTROL EQUIPMENT • COMPARATORS • SENSING SYSTEM ELEMENTS
FUNCTION GENERATORS • TELEMETERING MULTIPLEXERS AND CALIBRATORS • DRIFT COMPENSATORS • THERMOCOUPLE SAMPLERS • MECHANICAL OSCILLATORS

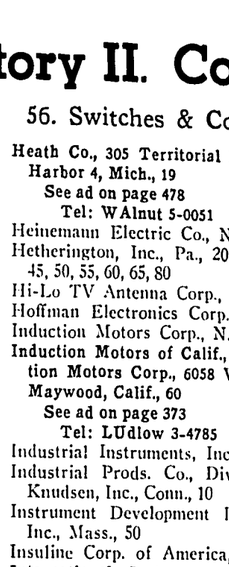
KULKA ELECTRICAL WIRING DEVICES
Designed For Performance and Economy



TERMINAL BLOCKS (Left): Large line of molded, barrier type, in varied sizes, materials, and terminals. New "KLIPTITE" style (left bottom) with angled tabs made for AMP, self-locking wire terminals.

TOGGLE SWITCHES (Below): Aircraft type, Single and Double Pole. Bakelite housing. Screw terminals or soldering lugs. One-hole mounting. DC, or AC up to 1600 cycles.

POWER OUTLETS (Below, right): Smallest made for standard plug. Mounts from top or bottom of bracket. Soldering terminals or wire leads.

DEVICES

1,000 MILES UP

IN OUTER SPACE

Precision Multichannel switches qualified for instrumentation of high altitude and space vehicles.

IN THE AIR

Precision Multichannel switches qualified for leading missile programs in aircraft and other airborne vehicles.

APPROVED

ON THE LAND

Precision Multichannel switches qualified for use in many commercial, military and scientific ground installations.

IN THE EARTH

Precision Multichannel switches qualified for under ground instrumentation such as for deep oil well instrumentation and measurements.

APPROVED

ON THE SEA

Precision Multichannel switches qualified for military and commercial ship borne use for operational and investigational applications.

UNDER THE SEA

Precision Multichannel switches qualified for the instrumentation of under water vehicles such as submarines, torpedoes and unmanned communication centers.

Licon®
SWITCHES & CONTROLS

- long life
- high dependability
- exacting performance

STANDARD SWITCHES

SUBMINIATURE

TYPE 16
22 Million actuations by test
1/4" thick—25/32" wide
Rated 10 amps. 250 V.A.C.

TYPE 10
10 Million actuations by test
15 or 20 amp. 125, 250, or 460 V.A.C.

TYPE 11
20 Million actuations by test
10 amp. 250 V.A.C. or 30 V.D.C.

TYPE 30
10 Million actuations by test
15 amp. 125, 250, 460 V.A.C.
½ amp. 115 V.D.C.

ENGINEERED SPECIALS

Need special switches for specific jobs? LICON can meet your requirements including hermetic sealing and control assemblies.

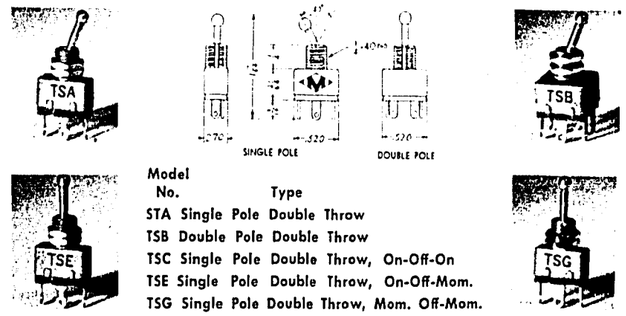
SUBMINIATURE TOGGLE SWITCHES

FEATURING BALL TYPE TOGGLE AND GOLD FLASHED TERMINALS FOR LOW LEVEL (DRY CIRCUIT) APPLICATIONS RATED TO 1,000 VOLTS RMS USING IRRIDITED BODY CASTING



Model No.	Type
STA	Single Pole Double Throw
TSB	Double Pole Double Throw
TSC	Single Pole Double Throw, On-Off-On
TSE	Single Pole Double Throw, On-Off-Mom.
TSG	Single Pole Double Throw, Mom. Off-Mom.

OTHER CHARACTERISTICS

CONTACT RATINGS: Up to 5 Amp. (Res.) at 115 volts AC or 24 volts DC.
INSULATION RESISTANCE: Greater than 500 Megohms.
VIBRATION: 10-G 10-500 cps.
SHOCK: Specification MIL-S-901 (Type C).
ENDURANCE: 10,000 Make and Break Cycles.
TUMBLING: In accordance with Signal Corps Requirements.
CORROSION RESISTANCE: 50 hour Salt Spray per Federal Spec. QQ-M-151.
HUMIDITY: 10 Cycles per Specification JAN-S-23.
SEAL: Low Temperature Rubber Boot for Panel Sealing is available.

Miniature Switch Corporation
AN AFFILIATE OF LIECO, INC.

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each major classification. Complete addresses will be found in the Alphabetical Directory.

GRAYHILL Switches • Test Clips • Molded Parts

Grayhill Miniature Tap Switches

SERIES 5000

For Commercial Applications

SERIES 12

For Military Applications

Available 1 to 6 decks—2 to 10 contacts per deck.

Shorting (make before break) or Non-shorting (break before make). Switch rotates 360° with 10 positions—stops provided with 9 or less positions.

Bushings, ¼" long—⅜"—32 thread
Diameter of switch 1-1/32"

Rated to break—1 amp., 115 V., AC., non-inductive.

To carry—5 amps., 115 V., AC.

SERIES 24

Positive Detent Action and better feel for precision requirements. Available 1 to 6 decks—2 to 10 contacts per deck.

Shorting (make before break) or Non-shorting (break before make). 360° rotation with 10 positions—stops provided for less than 10 positions.

Bushings, ¼" long—⅜"—32 thread
Diameter of switch 1-1/32"

Rated to break—1 amp., 115 V., AC., non-inductive.

To carry—5 amps., 115 V., AC.

Spring Return Rotary Switch

Similar to Series 24 except with spring return to center position. Provides momentary contact on either side of center position only. Available in 1 to 3 decks, either shorting or non-shorting type.

Grayhill Push Botton Switches

SERIES 2000—Snap Action

For Manual Operation

Audible click when actuated
Momentary contact, single pole, single throw type.
O.D.—⅞" dia. x 1-59/64" high
Bushings, 7/16" long—15/32"—32 thread.
Rated—10 amps., 115 V., AC., non-inductive.
1 amp., 115 V., DC.
Rated Life—Approx. 50,000 operations
No. 2201—Normally open
No. 2202—Normally closed

SERIES 4000—Momentary Contact

Momentary contact, single pole, single throw type.
O.D.—51/64" dia. x 1-17/32" high
Bushings, ⅜" long—15/32"—32 thread.
Rated—½ amp., 115 V., AC.—non-inductive.
Rated Life—Approx. 800,000 operations.
No. 4001—Normally open
No. 4002—Normally closed

SERIES 23

Miniature Momentary Contact

Momentary contact, single pole, single throw.
O.D. ½" dia. x 1-3/64" high
Bushings, ¼" long—5/16"—32 thread
Rated—¼ amp., 115 V., AC., non-inductive.
Rated Life—Approx. 500,000 operations.
No. 23-1—Normally open.

SERIES 30

Midget Silent Action

Sub-Miniature, non-snap, momentary contact, single pole, single throw type.
O.D. ¾" dia., 63/64" high.
Mounting Bushing ¼" x 32 thread.
Rated .10 amp., 115 V., AC., non-inductive.
Rated Life—Approx. 300,000 operations.
No. 30-1—Normally open.

Grayhill Test Clips

SERIES 16

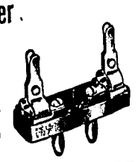
Completely insulated.
Even hinge pin is insulated.
Low contact resistance (approx. .0015 ohm)—.038" silver overlay on contact surfaces
Terminals—silver plated
Finger grips—molded phenolic

No. 2-0 Threaded Stud
No. 2-1 Banana Plug
No. 2-4 Threaded Stud with Insulating Washers
No. 2-6 Pin Plug

SERIES 2

The basic spring clip is available in several styles of mounting as illustrated. Mounted on panel of test equipment, they permit fast lead connections without manual opening and closing of jaws or clamps. Also useful in bread board work and laying out of harnesses.

Grayhill Plug-In Adapter

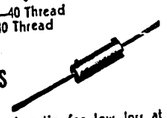


Designed for testing resistors, capacitors, and similar pig-tail type components on standard test equipment. Banana Plug spacing—¾" centers. No. 2-2 Plug-In Adapters.

Grayhill Stand-Off Insulators

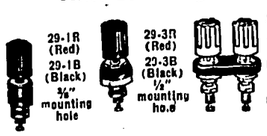
Mica-filled phenolic bodies for low loss at high frequencies, high dielectric strength, low moisture absorption and fungus resistance. Silver plated brass solder terminals. Front of panel length—15/16"
Diameter 5/16"
No. 18-1—Female, No. 4—40 Thread
No. 18-2—Male, No. 4—40 Thread

Grayhill Coil Forms



Molded of mica-filled phenolic for low loss at high frequencies, low moisture absorption, high dielectric strength and resistance to fungus growth. Tinned Copper wire leads. Patented anchor posts.
Dimensions—Length—.500" to 1.000"
Dia.—.125" to .250"
Lead wire diameter—.025" to .040"

Series 29 Binding Posts



- Metal parts—Nickel Plated
- Molded parts—Phenolic to MIL-P-14
- Washers—Non-turn "D"
- Cross-hole—Flush
- Integral solder lug
- Color—Red or Black as specified

Grayhill Diode Holder

Provides a tight snap fit within gold-plated, phosphor bronze, spring tension clips. Molded phenolic base has non-turn projection.

Clips—.635" center to center
Overall dims.—lgth.—15/16", width—⅜" height—⅜"

No. 17-1—Molded Diode Holder

Grayhill Printed Circuit Test Jacks

SERIES 31

For use on printed circuits as a test point to feed AF, RF, and Pulse signals, check and feed DC voltages, monitor signals during test, alignment, etc. For use with standard .081"-.0825" phone tip plugs. Rivets to board like an eyelet.
Dims.—¼" high, rivet dia.—.114"
No. 31-1—For 1/16" board
No. 31-2—3/32" board
No. 31-3—For ⅛" board

Plastic Sleeves

for Series 31 Test Jacks

Snap-on, plastic insulators lock in place over Grayhill Test Jacks.
Dimensions Dia.—.245" Height—.290"
No. 31B—Plastic Sleeves, available in 8 colors for coding.

Grayhill

505 Hillgrove Avenue, La Grange, Illinois
Phone: Fleetwood 4-1040

Grayhill Mating Insulating Washers

To insulate jacks with ⅜" dia. bushings from mounting panel. Back of panel washer has indexing hole fitting non-turn tab of the jack. Shoulder dimensioned for 1/16" min. panel thickness.
No. 21878-1 Indexing Washer, Natural Mica-filled Phenolic
No. 21878-2 Indexing Washer, Black Electrical Grade

Grayhill Molded Insulating Washers

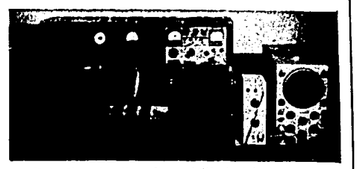
Available in sizes for No. 6 to ⅜" screw in natural mica-filled phenolic or black electrical grade insulating material.

NEY

offers all three

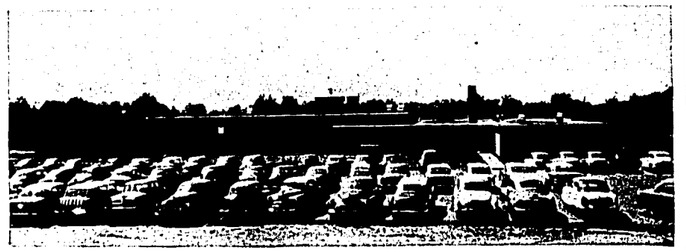
RESEARCH AND DEVELOPMENT

As a manufacturer of precious metal products for more than 144 years, THE J. M. NEY COMPANY has accumulated a vast store of information on the properties and uses of precious metals and their alloys in many fields. Ney's Research Department has facilities for subjecting experimental and standard alloys to a full range of chemical, physical, electrical, mechanical and metallographic tests as well as tests simulating actual and accelerated conditions. Ney Research Department services and facilities are freely available to Design and Production Engineers.



Potentiometer linearity and life test instrument using standard oscilloscope.

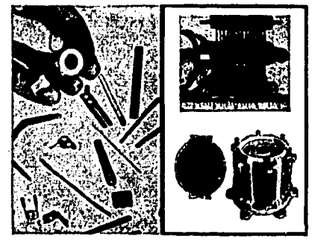
COMPLETE MANUFACTURING FACILITIES



Ney has just built this modern new plant to give you even better products and better service. Ney manufacturing facilities include wire drawing equipment, two and four high rolling mills, punch presses up to 50 tons, automatic screw machines up to 1⅞" capacity, cold-heading, wire-forming, welding and soldering equipment and a complete tool room. Efficient organization of these facilities means economical handling of large or small quantity production of the simplest part or the most intricate assemblies.

PRODUCTS TO YOUR SPECIFICATIONS

Ney has a long list of important accomplishments in the development of sliding contacts, slip rings and assemblies, commutator segments and assemblies, brush and brush holder assemblies, and precious metal resistance wire. Ney engineers are available for consultation on all problems involving the use of precious metals to improve your products.



Write for your copy of Ney Data Book, "NEY PRECIOUS METALS" *(Bulletin R-12) or call our Engineering Department outlining your needs.*

NEY'S small parts play a BIG part in precision instruments

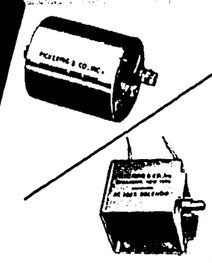
PICKERING

solenoids



for DC circuits

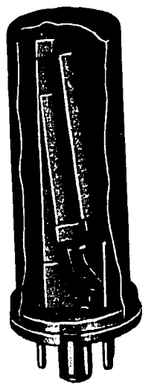
pickering engineering service is available for special applications where pickering standard solenoids do not apply.

PICKERING & CO., INC.

manufacturers of world-famous electro-magnetic phonograph cartridges and audio equipment.

OCEANSIDE, L. I., NEW YORK

For details, circle #393 on Reader Service Card.

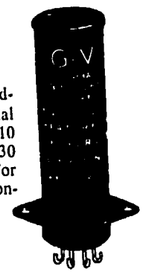


▶ Thermal Time Delay Relays

Stainless steel mechanism welded into a single integral structure for unequalled resistance to vibration and shock. Heater built inside expanding member for maximum efficiency and protection. Rolling contact action for positive operation.

NEW INDUSTRIAL RELAYS
Low cost timing relay for Industrial Controls, Heating Equipment, Communications, Air Conditioning, Electronics. Available from stock in standard heater voltages and time delays.

HERMETICALLY SEALED TYPE—Adjustable time delay • Miniature and octal sizes—metal shells • Time Delays—1/10 sec. to 5 min. • Heater voltages up to 230 • Fully temperature compensated • For industrial and military applications • Contact ratings up to 6 amp.



TYPICAL USES Delaying plate voltage application • Producing hold-over interval after interruption of power • Delaying automatic shut-down until a fault has continued for a specified period.

Notably Efficient • Widely Used

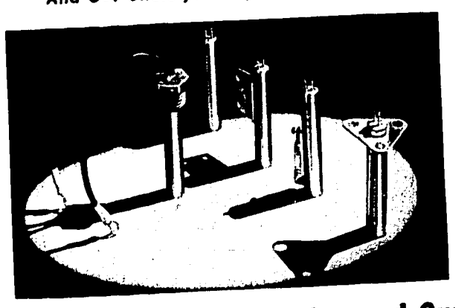
G-V® Precision Thermal Devices

A quality line skillfully designed and thoroughly field-tested.

G-V Thermal Relays Have Proved Performance Advantages—

- So reliable that the country's principal producers of electronic equipment have adopted them as production components!
- So reliable that they have been used on hundreds of government contracts!
- So reliable that they have been in successful field use for over three years!

And G-V offers you helpful engineering cooperation and the most complete technical data service.



▶ Electrical Thermostats

Features: Hermetically sealed • Adjustable or fixed temperature • Rapid in response—metal shell is the sensing element • Wide variety of sizes and mounting forms • Exposure to –70° C. does not change setting • High shock and vibration resistance • Current rating—1 amp. to 10 amp. • Stable setting and precise control.

Voltage Sensing and Current Sensing Relays—Thermal Type ▲

Features: Responds to changes in current or voltage • Currents .015 to 5 amp • Voltages 2 to 230 volts • Time constants—1 sec. to 200 sec. • Adjustable operating point • Minimum differential • Independent of ambient temperature • Independent of frequency • Hermetically sealed in metal shell • Miniature size • Small, light, and noiseless.

Typical Uses: Over- or under-voltage alarm or cut-off • Overload protection • Voltage or current regulation.

Write for bulletin and help with your particular problems.

TRANSFORMER

GET IN TOUCH WITH

Acme ACME Electric

If you buy transformers on a "quality foremost" basis, then you should be interested in the advantages of having Acme Electric produce the transformers you need.

If you need engineering help with a design, we have a staff of qualified engineers to assist you. If you need quantity production quickly, we have every modern facility and carry large stocks of basic supplies to ship your production requirements as your needs demand. And, with our modern production equipment, experienced assemblers, we quote prices that are usually competitive.

MINIATURES

When you need transformers or other electronic assemblies for special purposes, Caledonia offers:

1. Engineers, experienced in communications circuitry and transformer design, who know how to *design* for special problems of weight, size, temperature, high voltage, etc.
2. A streamlined plant, equipped to *produce* your specialty in the quantity you want.
3. Strict standards of quality control, with complete facilities to *test* the product in our plant, including facilities for qualification tests in accordance with MIL-T-27A.

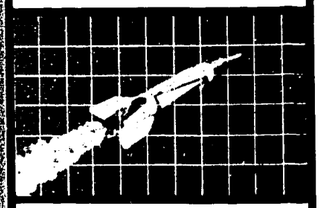
PRECISION TRANSFORMERS FOR ELECTRONICS



Complete engineering and production facilities in the heart of the Bay area electronics industry.

SPECIALIZING IN:

- EPSEAL encapsulated units for airborne use. High temperature, minimum size, extra reliability.
- EPOXY RESIN-POTTED units.
- ELECTROSEAL 'sealed construction units for high power use... from 1 to 100 KVA.

Moloney engineers are pioneers in the use of grain-oriented, high permeability, silicon steel for transformer cores. This engineering background and experience enables the Moloney Electric Company to produce highest quality transformers that offer the maximum in reliability, endurance and efficiency with a minimum of size and weight.

is with a
Mid-West
intercommunication
unit

The circuitry of this transistorized unit simplifies circuit checking on aircraft, computer, missile or similar complicated electrical installations by permitting normal conversation through headsets in areas of high noise level, at a distance, or on opposite sides of walls or partitions. At the same time the unit provides an oscillator circuit for transmitting a simultaneous audible checking signal.

Available for use with magnetic or carbon microphones, the unit fits in shirt pocket or attaches to belt. Signal circuit optional, unit may be used for noise problem alone. Write for details.

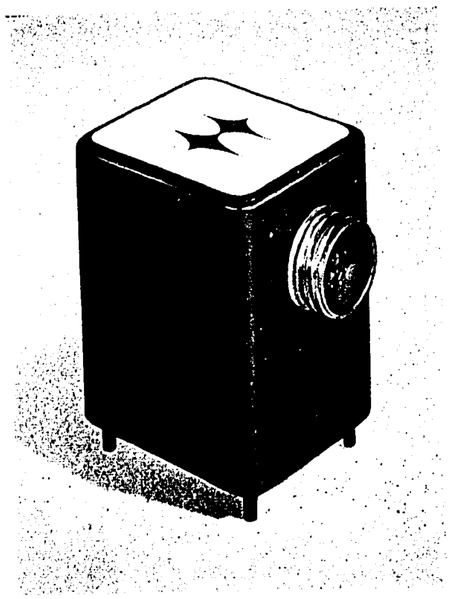
transistorized

DC to DC Transformers



The Ramo-Wooldridge Corporation is in volume production on fully transistorized dc to dc transformers which cover a wide range of power requirements and which exhibit significant advantages over former electro-mechanical power conversion methods.

Suitable for use in high-performance aircraft, missile systems and other applications in severe environmental conditions, the units are potted in epoxy resin and sealed. They are designed to operate in a temperature range of −55°C to 70°C and to withstand extremes of shock and vibration.

Ramo-Wooldridge dc to dc transformers provide power conversion at high efficiency—from 80% to 90%—with low noise generation. Units in production are designed for inputs ranging from 6 to 50 volts and regulated or unregulated outputs of up to several hundred watts.

DC to dc transformers for special applications to meet more rigid performance or environmental specifications, or to operate in higher power ranges, are available through the Ramo-Wooldridge Special Design Service.

For additional information, please forward a description of your requirements to: Director, Electronic Instrumentation Division, The Ramo-Wooldridge Corporation, Box 8405, Denver 10, Colorado

The Ramo-Wooldridge Corporation

5730 ARBOR VITAE STREET · LOS ANGELES 45, CALIFORNIA

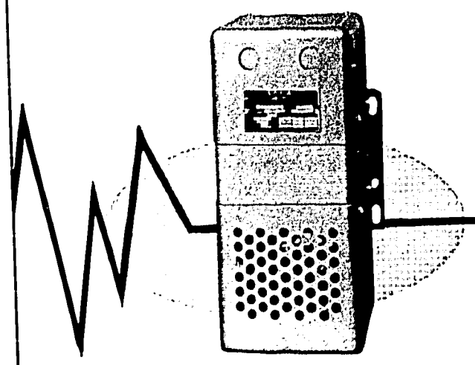
SOLA AC and DC VOLTAGE REGULATION...

Automatic, instantaneous, maintenance-free



Sola Constant Voltage Transformers and Regulated DC Power Supplies provide dependable regulated output voltage which is unaffected by changes in input voltage. Sola transformers are static-magnetic regulators with completely automatic, continuous regulation. Response time is usually 1.5 cycles or less. There are no moving or renewable parts to require maintenance. Sola Regulated DC Power Supplies are built around these transformers, in combination with germanium rectifiers and high capacitance filter sections.

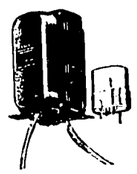
Sola Constant Voltage Transformers

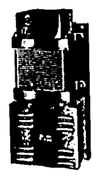
HARMONIC-NEUTRALIZED TRANSFORMER *designed for use with equipment requiring a stabilized source of undistorted voltage. Available in capacities from 60va to 2000va. These units provide ±1% regulated output with less than 3% harmonic distortion.*

ADJUSTABLE, HARMONIC-NEUTRALIZED TRANSFORMER *for selecting any voltage from 0-130, stabilized within ±1%, with total harmonic distortion less than 3%. One outlet variable from 0-130v and one outlet fixed at 115v. Portable for use in shop and laboratory.*

PLATE AND FILAMENT TRANSFORMER *delivers filament and plate voltages regulated within ±3% or less, with line voltage variations from 100-130v. Filament windings of 5v and 6.3v. Units are available from stock in three different ratings to cover most power supply requirements.*

FILAMENT TRANSFORMER *provides a compact source of 6.3v supply regulated within ±1% to extend filament life and improve tube efficiency. Available in ratings from 2.4a to 25a for operation of extensive banks of electron tubes. (Write for Circular 11-CVF-269 for further information.)*





CUSTOM-DESIGNED *units can be manufactured in quantity orders, from 1 va to 25,000va to suit your individual specifications. Custom designs can include special voltage ratios, special frequencies, compensation for frequency variation, multiple output voltage, three-phase service and military specifications.*

Write for Circular 11-CV-170E for further information on Sola Constant Voltage Transformers

For details, circle #411 on Reader Service Card.

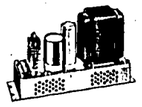
Sola Constant Voltage DC Power Supplies

For intermittent... variable... pulse... or high current loads

Sola DC supplies combine Sola CV Transformers, germanium power rectifiers and high-capacitance filters. They are compact, low-weight units for handling loads in the "ampere" range; and for intermittent and pulse loads. They offer many important advantages in DC power supply:

- Ripple voltage of approximately 1% (rms) or less.
- Output regulation of ±1% or less with ±10% line voltage variations.
- Minimum output voltage change with wide, rapid load changes.
- Ability to withstand high, short-time overloads without damage to components.
- Exceedingly low output impedance.

FIXED DESIGNS *available in six stock models with ratings ranging from 24v @ 6a to 250v @ 1 a. Compact size, low weight, and moderate price in proportion to power output and performance.*



VARIABLE DESIGNS *offer adjustable, regulated source of DC test voltages for design development. Accessory handles provide portability and self-stacking. Six models ranging from 5v @ 7a to 400v @ 0.6a.*

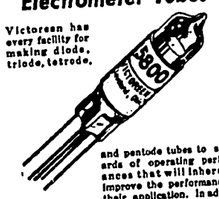
DIMENSIONS

Subminiature Electrometer Tubes

Victoreen has every facility for making diode, triode, tetrode,



and pentode tubes to standards of operating performances that will inherently improve the performance of their application. In addition to exceptional quality, Victoreen offers engineering skill to assist in solving your problems and production facilities to meet your requirements.

The Victoreen Instrument Company

Components Division

5806 Hough Avenue • Cleveland 3, Ohio

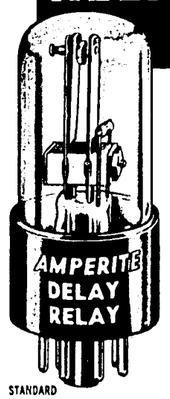
A-A-5601

For details, circle #415 on Reader Service Card.

True Hermetic Sealing assures Maximum Stability

in AMPERITE *RELAYS and REGULATORS*

Simplest • Most Compact • Most Economical



STANDARD

MINIATURE

Thermostatic DELAY RELAYS

2 to 180 Seconds

- Actuated by a heater, they operate on A.C., D.C., or Pulsating Current.
- *Hermetically sealed.* Not affected by altitude, moisture, or other climate changes.
- *SPST only* — normally open or normally closed.

Amperite Thermostatic Delay Relays are compensated for ambient temperature changes from −55° to +70° C. Heaters consume approximately 2 W. and may be operated continuously. The units are *most compact, rugged, explosion-proof, long-lived,* and — *inexpensive!*

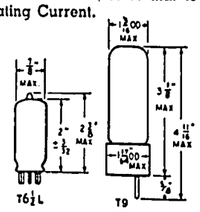
TYPES: Standard Radio Octal, and 9-Pin Miniature

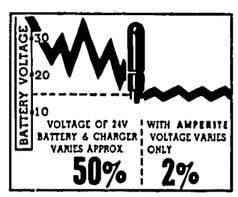
PROBLEM? Send for Bulletin No. TR-81

Also — **Amperite Differential Relays:** Used for *automatic overload, under-voltage or under-current protection.*

BALLAST REGULATORS

Amperite Regulators are designed to keep the current in a circuit *automatically regulated* at a definite value (for example, 0.5 amp.) ... For currents of 60 ma. to 5 amps. Operate on A.C., D.C., Pulsating Current.





T9 BULB

Hermetically sealed, they are not affected by changes in altitude, ambient temperature (−55° to +90° C.), or humidity ... Rugged, light, compact, most inexpensive.

Write for 4-page Technical Bulletin No. AB-51

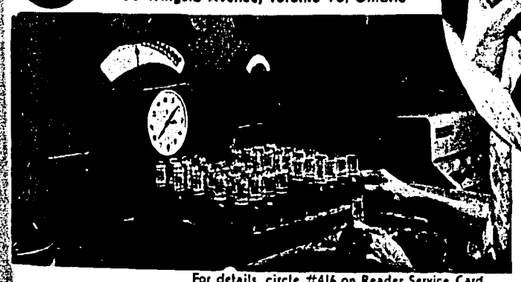
AMPERITE CO., Inc.

561 Broadway, New York 12, N. Y.

Telephone: CAnal 6-1446

In Canada: Atlas Radio Corp Ltd

50 Wingold Avenue, Toronto 10, Ontario



Individual inspection and double-checking assures top quality of Amperite products.

G-E MICROWAVE LABORATORY AT PALO ALTO, CAL. (above). Where new, improved microwave tubes of all types, military and commercial, are developed.

* * *

G-E POWER-TUBE PLANT AT SCHENECTADY, N. Y. (upper right). Here 500 skilled workers, supervised by 35 factory engineers, build large, high-power tubes.

* * *

G-E POWER-TUBE FACTORY AT SCRANTON, PA. (right). High-volume tubes such as thyratrons are precision-manufactured in this 213,000-square-foot plant.

GENERAL ELECTRIC: YOUR FIRST CHOICE FOR POWER TUBES—MILITARY AND COMMERCIAL!

Pioneering research, precision manufacture, advanced testing give leadership to these G-E military types:

PULSE MAGNETRONS • VOLTAGE-TUNABLE MAGNETRONS • KLYSTRONS • PARALLEL-PLANE TUBES • TRAVELING-WAVE TUBES • SPECIAL-PURPOSE TUBES •

Forty years' design and application experience help make General Electric industrial and commercial tubes an investment in proved quality:

IGNITRONS • THYRATRONS • CAMERA PICK-UP TUBES • METAL-CERAMIC TETRODES • U-H-F KLYSTRONS •

Contact your nearest General Electric power-tube specialist, as listed below, for expert aid in solving your tube problems! *Power Tube Department, General Electric Company, Schenectady 5, New York.*

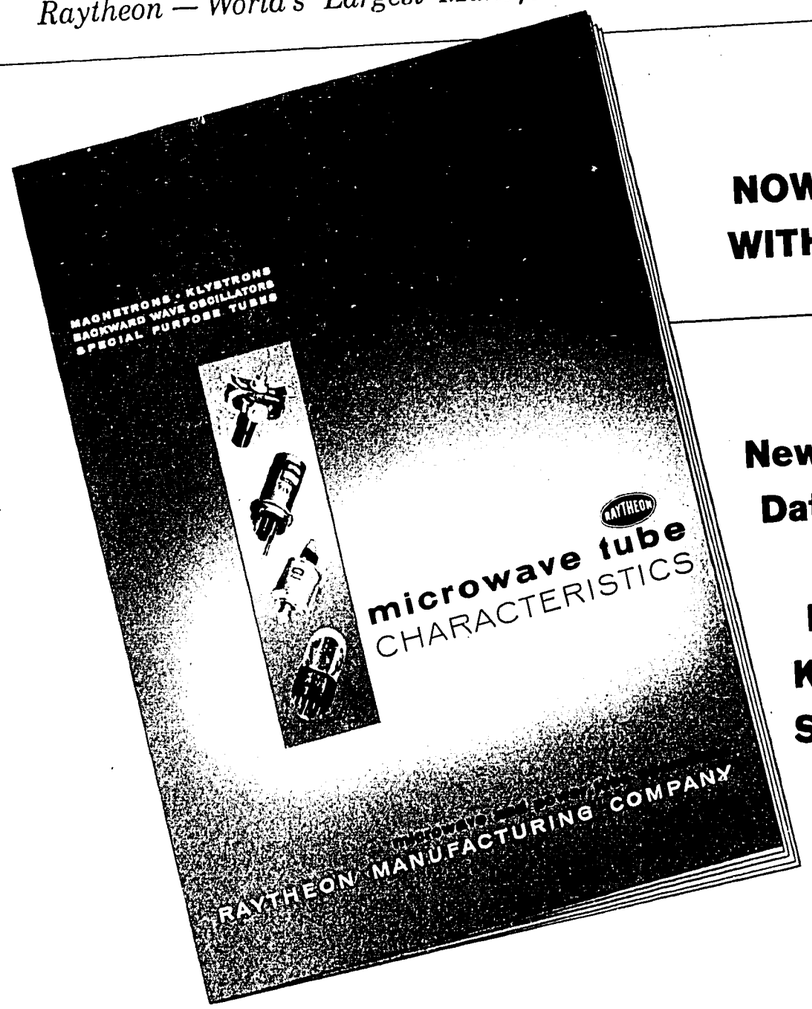
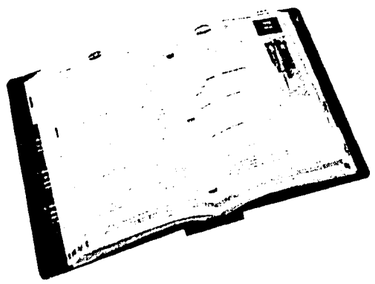
Raytheon — World's Largest Manufacturer of Magnetrons and Klystrons



NOW AVAILABLE— WITHOUT CHARGE

New Consolidated Data Booklet for Raytheon Magnetrons, Klystrons and Special Tubes



Comprehensive presentation of maximum ratings, typical operating values, frequency ranges, and power levels for most of the principal unclassified types manufactured. An essential reference-guide for microwave engineers and purchasing departments.

Raytheon is the world's largest producer of CW and pulse magnetrons, available in either fixed or tunable designs.

Raytheon klystrons, which can be tuned mechanically or thermally, fit the widest range of requirements from 550 to 60,000 Mc. The special tubes include backward wave oscillators, square law tubes, storage tubes and others.

Use coupon below to reserve your copy of the new Raytheon Consolidated Data Booklet. There is no cost or obligation, of course.

TECHNICAL DATA SERVICE
The most complete data service available for magnetrons, klystrons, special tubes and semiconductor products. Available on a continuing basis at a modest charge. Use coupon to get full details.

Regional Sales Offices: 9501 W. Grand Avenue, Franklin Park, Illinois • 5236 Santa Monica Blvd., Los Angeles 29, California.

Raytheon makes: Magnetrons and Klystrons, Backward Wave Oscillators, Traveling Wave Tubes, Storage Tubes, Power Tubes, Miniature and Sub-Miniature Tubes, Semiconductor Products, Ceramics and Ceramic Assemblies.

For details, circle #420 on Reader Service Card.

Microwave performance

on the button

by Budd • Stanley

Every demand of microwave production—absolute conformity to specifications, on-time delivery, minimum cost-per-unit—is met by Budd-Stanley, right on the button. Budd-Stanley's experienced, talented engineers and technicians, exceptional production facilities, and masterful fabricating and casting techniques combine precision with prompt delivery. Next time you need microwave production, call on the solid reputation of Budd-Stanley.

Complete Mixer-Duplexer and RF Front End Assemblies • Rotary and Oscillating Joints Antenna Feeds • Hybrid Junctions • Feed Horns • Directional Couplers • Waveguides Tees • Filters • AFC Circuits • Tube Mounts Metallized Glass Attenuators.

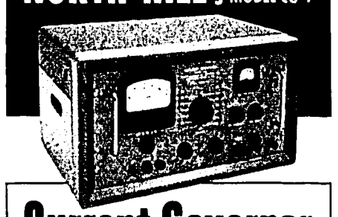
NORTH HILL'S MODEL CG-1



Current Governor

A TWO TERMINAL CURRENT STABILIZER-MODULATOR, AND PROGRAMMABLE ELECTRONIC LOAD

APPLICATIONS

- Constant current generation or load
- Component testing—Transistors, diodes, fuses, batteries, relays, solenoids, meters, focus and deflection coils, potentiometers, magnetic cores, drums and tape.

SPECIFICATIONS

- Stabilized Current—1 to 600ma in 1ma steps, set by front panel controls at 0 ± 3000 V.D.C.
- Current Modulator—Internal 60cps. sine wave, external sine or complex waveforms including d.c.

Model CG-11 Transistorized 5 ampere unit
Model CG-12 Transistorized 30 ampere unit
For further data, write for Bulletin E-1D, or contact North Hills Electric today.

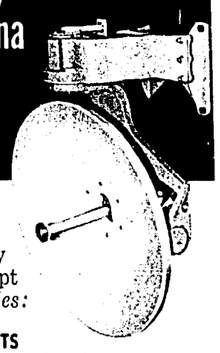
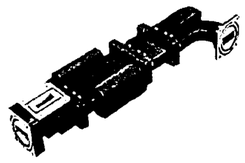
Complete line of Microwave Components

From Magnetron Through Antenna Designed and Produced by Airtron INC.

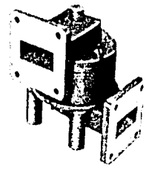


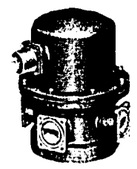
Whether it is "Standard" plumbing or designing an entirely new waveguide system, Airtron's *complete* facilities can substantially reduce the time and expense between concept and reality. *Here are just a few examples:*



FERRITE COMPONENTS Duplexers, waveguide switches, high and low power load isolators, variable absorption attenuators and other devices are the result of a continuous ferrite development program. All ferrite materials used are specially compounded and fired in Airtron's Ferrite Research Development Laboratory. Complete facilities permit design and production to meet any specific need.

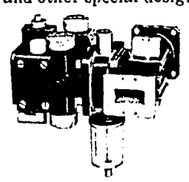
ROTARY JOINTS. Waveguide rotary joints of the coaxial or high power circular waveguide type in many frequency ranges designed for maximum VSWR performance. Produced in volume to your specifications or designed to meet your requirements.





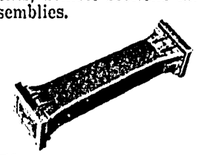
WAVEGUIDE SWITCHES. For frequent, rapid switching to or from noise sources, signal generators, dummy loads, etc. Reversing switches for dual channel systems in GCA or microwave relay radars. Low VSWR, excellent crosstalk characteristics, and high peak power performance. Switching tees, ferrite switches and other special designs.

PRECISION CAST BALANCED MIXERS. Low noise figures over a broad bandwidth are achieved by compact balanced mixer design and use of latest type crystals. Equipped with coaxial or waveguide crystal mounts for frequencies up to 40,000 mc. Standard and special types available. Mixer-Preamp packages designed to meet your requirements.



ANTENNAS AND ASSOCIATED COMPONENTS. Horn antennas and feeds for fire control, countermeasure, guided missile, navigational or weather radars. Designed to your specifications and produced in the Airtron precision casting foundry. Complete with rotary joints, flexible sections and associated waveguide assemblies.

FLEXIBLE WAVEGUIDE ASSEMBLIES. Flexible double ridge waveguide for airborne commercial weather radar. Beryllium copper flexible in convolute or type S construction. Waveguide sizes from Ka-Band to 9.750" x 4.875" I.D. in standard lengths or preformed to your installation.



OTHER AIRTRON PRODUCTS

Twists, Magnetron Transitions • Double Ridge Waveguide Components • RF and Pressure Contact Flanges and Gaskets • Quick Disconnects • Directional Couplers • Short-Slot Hybrids • Antenna Components • Test Horns • Dummy Loads • Flexible Coaxial Transmission Lines • Waveguide Bending and Twisting To Your Specification •

NO MICROWAVE SPECIFICATION IS TOO CRITICAL FOR *J-V-M**

***CUSTOM BUILDERS AND DESIGNERS OF:**

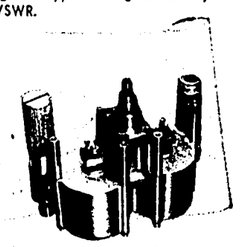
CAVITIES
MIXERS • DETECTOR MOUNTS
DUPLEXERS • MULTIPLIERS
ROTARY JOINTS • BENDS
TWISTS • OTHER COMPLEX COMPONENTS & ASSEMBLIES

Application-engineered microwave parts and complex assemblies are our specialized field. We'll manufacture components to your prints ...or we will design and integrate them into your application.

You can depend on J-V-M for close coordination, guaranteed electrical performance and "know how" that is attested by innumerable assemblies ranging from dc. to 40,000 mc. now in industrial and military use.

FOR EXAMPLE:

1. Variable vane directional coupler . . . sliding vane type . . . high directivity—low VSWR.



2. Pre-selector-mixer...S band...50 ohm input impedance . . . high Q double-tuned ganged cavities...detector output . . . frequency stable from −55° to +85°C.

CUSTOM-ENGINEERED MICROWAVE PARTS

Get full information on J-V-M standard or custom-engineered microwave parts and components, also complex mechanical assemblies. Request catalog today.

Waveguides?

The F. C. Kent Company

has long been recognized as the outstanding source for formed waveguides in the country. If you have requirements for bent and formed waveguide sections — waveguides with as many as seven or eight different bends in one continuous section of tubing—in different planes and with sharp radii; if your assemblies call for waveguide tubing to be twisted, offset, tapered, expanded or call for a transition from rectangular to round; then we wish to bring to your attention our exceptional ability as specialists in bending and forming waveguide tubing in all sizes.

WAVEGUIDES

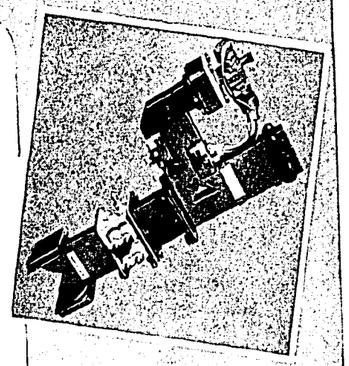
FOR

RADAR, MISSILE GUIDANCE & MICRO-WAVE LINK SYSTEMS

Complete facilities for ENGINEERING MICROWAVE TEST & PRODUCTION of

- Precision Cast Waveguides
- Aluminum Dip Brazed & Heliarc Welded Assemblies
- Broadband Waveguide Components
- Mixers • Duplexers
- Rotating Joints
- Microstrip Components
- Short Slot Hybrids
- Bends
- Waveguide Switches



Waveguide components from your drawings and specifications — or developed to meet your needs.

1958 IRE DIRECTORY

DIRECTORY III CONTROLS & INSTRUMENTS

16 major groups
141 products

The products and services of the radio-electronics industry have been organized into four basic directories:

I. Communications
II. Components
III. Control & Instruments
IV. Materials & Services

Within these four basic directories, 100 major product and service groups are numbered consecutively throughout. Under each of these 100 classes a further breakdown is given, showing in detail by a system of code numbers after each firm listed what specific products within the class are manufactured by that firm.

For a terminology cross-index listing the 769 sub-products in alphabetical order, consult the eight-page pink section preceding page 1.

The first few times you use this EDGE INDEX

follow the "How to use" instructions slowly—one step at a time. After that you will be able to open easily and almost instantly to the section that you seek.

Machol edge indexes covering the alphabetical section and each of the four major directory groups will be found on pages 1, 151, 255, 287, 459, and 521.

HOW TO USE

1. Bend the Directory almost double with the front cover page on the inside.
2. Hold in your right hand with your four fingers near to the bound edge and your right thumb near the middle of the open side of this page.
3. From the heavy or light line symbol adjacent to the subject you seek, run your eyes across the page edges until you reach the horizontally corresponding symbol.
4. OPEN THERE!

LICENSE NO. 25
MACHOL EDGE INDEX PATENT #2680630

For complete list of products and services, arranged alphabetically for fast reference, see the eight-page pink section preceding page.

BALLANTINE VOLTMETERS

Famous for SENSITIVITY • ACCURACY • STABILITY

AUDIO to 150 kc — MODEL 300

Voltage Range..... 1mv—100v
Frequency Range..... 10cps—150kc
Accuracy..... 2% ENTIRE RANGE
Input Impedance..... ½ meg shunted by 30μμf

SUB-AUDIO to 150 kc — MODEL 302C

Battery Operated

Voltage Range..... 100 μv—1000v
Frequency Range..... 2cps—150kc
Accuracy..... 3% 5cps—100kc
5% elsewhere
Input Impedance..... 2 meg shunted by 25 μμf*
*Shunt capacitance, 10μμf on all ranges except two most sensitive ranges

PEAK-to-PEAK — MODEL 305

Voltage Range..... 1mv—1000v pk-to-pk
Frequency Range..... 10cps—100kc (sine wave)
Pulse width..... 3μsec—250μsec
Min Rep Rate..... 20 pulses per sec
Accuracy..... 5% for pulses
Input Impedance..... 2 meg shunted by 15 μμf*
*Shunt capacitance, 8 μμf on all ranges except two most sensitive ranges

AUDIO to 2 mc — MODEL 310A

Voltage Range..... 100 μv—100 v
Down to 40 μv at reduced accuracy
Frequency Range..... 10 cps—2 mc
As null detector 5 cps.—4 mc
Accuracy..... 3% 10 cps—1 mc
5% elsewhere
Input Impedance..... 2 meg shunted by 15 μμf*
*Shunt capacitance, 8 μμf on all ranges except two most sensitive ranges

AUDIO to 6 mc — MODEL 314

Voltage Range..... 1mv—1000v
(100μv—1mv without probe)
Frequency Range..... 15cps—6mc
Accuracy..... 3% 15cps—3mc
5% elsewhere
Input Impedance..... 11 meg shunted by 7.5 μμf
(1 meg shunted by 25 μμf without probe)

INFRASONIC to 30 kc — MODEL 316

Voltage Range..... 20 mv—200 v pk-to-pk
Frequency Range..... 0.05 cps—30 kc
(Down to .01 cps with corrections)
Accuracy..... 3% ENTIRE RANGE
Input Impedance..... 10 meg shunted by 19 μμf
or 40 μμf depending on setting

TRUE RMS INDICATION — MODEL 320

Voltage Range..... 100 μv—320 v
Frequency Range..... 5 cps—500 kc
Accuracy..... 3% 15 cps—150 kc
5% elsewhere
Stability of Internal Calibrator..... 0.5%
Input Impedance...
10 megs shunted by 25 μμf below 10 mv
10 megs shunted by 8 μμf above 10 mv

DC & AC PRECISION CALIBRATOR — MODEL 420

Voltage Range..... 0-10 v RMS; Pk-to-Pk; or DC
Frequency (Std. Model)..... 1 kc
(other values on special order)
Accuracy (long term)...Better than 0.5% above 1 mv
Distortion and Hum..... Less than 0.5%
Setting Resolution...Approaches 0.01% above 10 mv
Output Impedance (AC)..... 2-20 ohms depending on range setting

SENSITIVE INVERTER — MODEL 700

For Measuring DC Voltages when combined with any AC Voltmeter

Voltage Range..... 1μv—100v DC
Ratios DC Input to RMS Output..... 1:100 & 10:1
Accuracy..... 1% 100μv—100v
Input Resistance..... >10 meg for 1:100
50 meg for 10:1

DECADE AMPLIFIER — MODEL 220B

For Increasing the Sensitivity of any AC Voltmeter by 10 or 100 times

Voltage Range..... 10μv—50mv
Frequency Range..... 10cps—150kc
Accuracy..... 2% ENTIRE RANGE
Input Impedance..... 5 meg shunted by 15μμf

DIRECT READING CAPACITANCE METER — MODEL 520

Capacitance Range..... 0.01 μμf to 12 μf
in 9 decade ranges covering over a billion to 1
Accuracy..... 2% above 0.1 μμf
5% below 0.1 μμf
Capacitor Power Factor..... 0.15
Test Frequency..... 1 kc

Each Ballantine Voltmeter has only one voltage scale, with decade range switching, which provides the same accuracy of reading at all points on the logarithmic voltage scale. A linear decibel scale is also provided for use by acoustical engineers. Each Voltmeter also may be used as a high gain wide band amplifier.

ACCESSORIES are available for all voltmeters to extend voltage measurements down to 20 μv and up to 10 kv, and to measure currents from 0.1 μamp to 10 amp, and to provide DC from the Model 300 Voltmeter to drive external recorders or remotely located meters.

here's how can help you...in

- vibration and sound analyses
- noise analyses
- geophysical investigations
- servo analyses
- frequency response analyses
- harmonic and cross modulation investigations
- monitoring communications channels
- analyzing characteristics of AM, FM and pulsed signals
- checking telemetering or carrier current systems for distortions, hum, noise, microphonics, interference, channel spillover
- monitoring magnetic tape re-recordings
- and many special applications

Accurate . . . rapid, exceedingly flexible and discriminating, Panoramic Instruments are PROVED PERFORMERS in plants, laboratories and military applications. Simple to operate . . . easy to interpret . . . they have helped to speed research and development projects . . . solve production testing problems.

Whatever your problem, there is a Panoramic Instrument to answer your needs. Write, wire, phone for Panoramic's NEW Catalog Digest, other descriptive data and a copy of our regular bulletin featuring application data. A Panoramic Applications Engineer is always available to discuss specific problems. Special instruments to order.

PANORAMIC
RADIO PRODUCTS, INC.

the pioneer is the leader

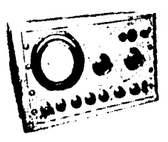
PANORAMIC INSTRUMENTS

Panoramic Waveform & Spectrum Analyzers

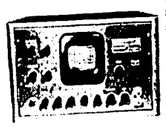
These automatic heterodyne scanning receivers present a visual display of both the frequency and amplitude of the waveform content of an electrical voltage or any parameter which is converted into an electrical voltage. Their easily read panoramic display provides a rapid, reliable method of detecting defects, checking variations, making adjustments, testing production, improving product design and solving many other measurement problems. A broad range of instruments satisfies a great variety of applications, which are even further extended by combining carefully designed accessory equipments with basic analyzers to form instrumentation systems which offer unique advantages.

Model LF-2, Subsonic (0.5 cps-2250), features 0.1 cps to 20 cps resolution, 40 db dynamic range, six scanning widths, permanent ink-on-paper recordings, high stability.

Model LP-1a, Sonic (40 cps-20 kc), features both linear and log amplitude scales, 60 db dynamic range, directly read, broad logarithmic frequency scale and a three-step scanning range selector and tuning control which permits selection and magnification of linear segments 200, 1000 or 5000 cps wide centered anywhere between 0 and 20 kc for sharp detailed analysis of components closely spaced in frequency. Optional companion recorder allows permanent ink-on-paper recordings over extended periods.



Model SB7aZ, Ultrasonic (1 kc-300 kc), features both linear and log amplitude scales, exceptionally stable displays, continuously variable sweepwidth, center frequency and resolution controls which facilitate overall observation of a band 200 kc wide or highly detailed analysis of selected narrow bands.

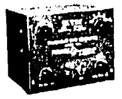


Panalyzors and Panadaptors (RF, VHF and UHF) feature continuously variable sweepwidths, resolution and scan rates; long or short persistence displays, linear or log amplitude scales. Offer the advantages of wide scan display yet permit examination of closely adjacent signals. Special features vary with model and type selected. 5 models in 23 different types fulfill almost every need from low-cost general purpose instruments to those for highly special applications.

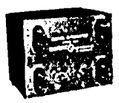
Model SPA-1, Microwave (50 mc-4000 mc), features two tuning heads (RF-2 from 50 mc to 250 mc; RF-3 from 220 mc to 4000 mc in five ranges) with a single tuning control dial having an accuracy of ±1%, continuously variable resolution, sweep rate and differential markers,—100 dbm sensitivity.

Panoramic Accessory Instruments

Models G-2 and G-3, Sweep Generators, convert the LP-1a and SB-7aZ, respectively, into single line response curve tracers, discriminate against noise and hum, show response to fundamental frequency only, and assure accurate frequency response measurements.



Model TW-1, Triangular Wave Generator, operates with either sonic or ultrasonic analyzers and sweep generators to produce a continuously variable (0.05 to 60 per sec.) linear bi-directional time base enabling the establishment of the proper scan rate to insure presentation of a true response.



Model SW-1, Signal Alternator, permits observation of two independent inputs either for comparison or calibration purposes. With high persistence indicators, alternate displays can be viewed simultaneously thus allowing a very high degree of readability on small differences in frequency and/or amplitude.

Panoramic Special Instruments

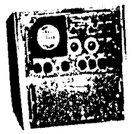
Model TFA-1, Time-Frequency Analyzer, in combination with one of the analyzers (subsonic through microwave) or telemetering indicator, provides a complete history of the time occurrence of transient waveform components, in addition to frequency and amplitude information.

Model PDA-1, Spectral Power Density Analyzer, used in combination with one of the analyzers (subsonic through microwave) measures the spectral power density of random information by translating transient voltage amplitudes of a complete data sample into an integrated continuous plot of total power vs. frequency.

Model SF-1, Synchronous Frequency Analyzer, has many application possibilities and is excellent for dynamic balance analysis. Automatically tracks a frequency component derived from a rotating or oscillating source and provides simultaneously a visual plot of component frequency vs. component amplitude.

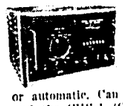
Panoramic Telemetering Test Instruments

These instruments are specifically designed to provide a simple, reliable, almost instantaneous, method of checking FM/FM Telemetering Systems.

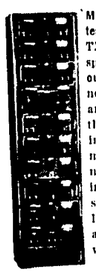


Model TM1-1a, Telemetering Indicator, provides a visual display of the frequency and amplitude of composite signal components. Scans spectrum logarithmically from 350 cps to 85 kc, or linearly, any 100 cps to 20 kc segment centered anywhere between 400 cps and 70 kc. Permits measurement of spurious frequencies down 40 db. Features 20 db linear and 40 db log amplitude scales; 2 mv full scale sensitivity; automatic optimum resolution.

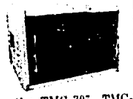
Model TMC-1, Telemetering Subcarrier Deviation and Three Point Calibrator, is a dual purpose instrument, which: (1) Sequentially furnishes upper limit, center and lower limit frequencies channel by channel for all RDB channels as outputs for discriminator calibration. Limits are ±5% for all channels and ±15% for upper five, others optional, with an accuracy of 0.02%. Channel switching can be either manual or automatic. (2) Establishes maximum deviation limits and center frequency of subcarrier oscillators. An internal signal switcher permits alternate display, on the screen of the TMI-1a, of subcarrier vs. calibrating marker from the built-in channel selector of the TMC-1 which automatically establishes proper center frequency and sweepwidth of the selected channel for comparison with deviation or spread of subcarrier.



Model TMC-307, Seven Point Telemetering Frequency Calibrator, sequentially furnishes seven equally spaced frequencies for all RDB channels singly, as outputs for discriminator calibration. Limits and accuracy are the same as the TMC-1. Switching can be either manual or automatic. Can also be used in combination with the TMI-1a and the CHS-1 (Channel Selector), for multipoint calibration of subcarrier oscillators, 0.02% accuracy.



Model TMC-211, Simultaneous Eleven Point Telemetering Frequency Calibrator, differs markedly from the TMC-1 and TMC-307 in that it provides 11 equally spaced frequencies for **all RDB channels simultaneously** as outputs for discriminator calibration. All channels can be sampled in as little as 2½ secs. Is with an accuracy of **0.002%**, stability of .0005%. Limits are the same as the TMC-1 and TMC-307. Channel switching may be manual, semi-automatic or complete automatic. On automatic, switching is controlled synchronously and cycling time is adjustable. Can also be used in combination with the TMI-1a and the CHS-1 for simultaneous multipoint calibration of subcarrier oscillators. The instrument can be remotely controlled from a central station with subcarrier channels oriented to various locations.



Model CHS-1, Telemetering Channel Selector automatically establishes the correct center frequency, sweepwidth and resolution for any RDB channel selected for display on the screen of the TMI-1a. An internal signal switcher permits alternate display of subcarriers vs. external calibrating markers, available from the TMC-307, TMC-211 or other source, for visual comparison of linearity or spread of subcarrier.

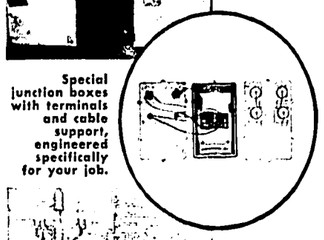
America's critical northern defense projects, the DEW line and White Alice, are reaching completion. Hughey & Phillips helped Western Electric and the Blaw Knox Companies solve severe requirements by engineering and fabricating complete ready-to-install kits.
These kits include

- SLEET MELTER POWER & CONTROL CIRCUITS
- SPECIAL LIGHTING AND CONTROL CIRCUITS
- TOWER OBSTRUCTION LIGHTING
- LAMP FAILURE ALARM SYSTEMS
- EMERGENCY TELEPHONE CIRCUITS

This practical experience and knowledge is available to you in solving problems in these or similar systems employing photo-electric control units, beacon flashers, obstruction lamp failure indicator and controls. Complete systems will be engineered, fabricated and packaged in a kit for your *specific job.*

System being packaged for shipment



Special junction boxes with terminals and cable support, engineered specifically for your job.

Complete installation information and diagrams are included in each ready-to-install kit.

Write today for information regarding your specific problems.

Otto Wolff *Precision* **STANDARD Resistors**

OTTO WOLFF precision standard resistors offer the following features:

- Accuracy of ±0.01% on all models over entire current range
- 1, 10, 25-watts for air or oil immersion
- Special units to 3000 amp.
- Wide variety of ranges
- Excellent stability and temperature characteristics
- Moderate cost

IN STOCK

The OTTO WOLFF precision standard resistors are world famous. They are used by all of the leading laboratories in both the U. S. and Europe. No other resistors combine accuracy, range of values, versatility and construction to the degree found in OTTO WOLFF standard resistors. Also available are Wolff bridges and potentiometers.

*Made by OTTO WOLFF Prazisionswiderstande, Berlin.

0.01 ohm, 1-watt standard resistor.

Representatives for OTTO WOLFF: C. P. GOERZ—VIENNA • GANN—STUTTGART • EMA—ZURICH • CORADI—ZURICH

For complete details of OTTO WOLFF resistors, request Catalog RD-7

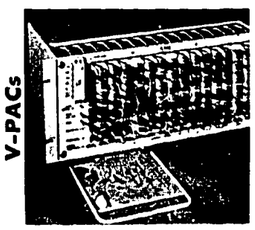
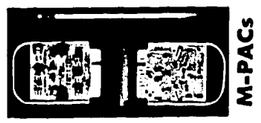
special-purpose digital systems

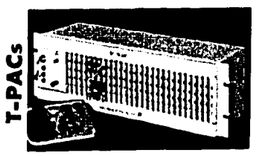
readily designed and constructed from fully engineered, tested 3C digital components —

- Series V 3C-PACs, universal 1-mc logical circuits with fully compatible digital storage, power, and cooling equipment.
- Series M 3C-PACs, a new fully transistorized family of flip-flops, gating packages, and associated digital circuits.
- Series T 3C-PACs, new transistorized 1-mc dynamic logical circuits. Compact, low power, self-contained power.

COMPLETE SERVICES for problem analysis and digital system design, construction, programming, and operation.







Send for descriptive literature.

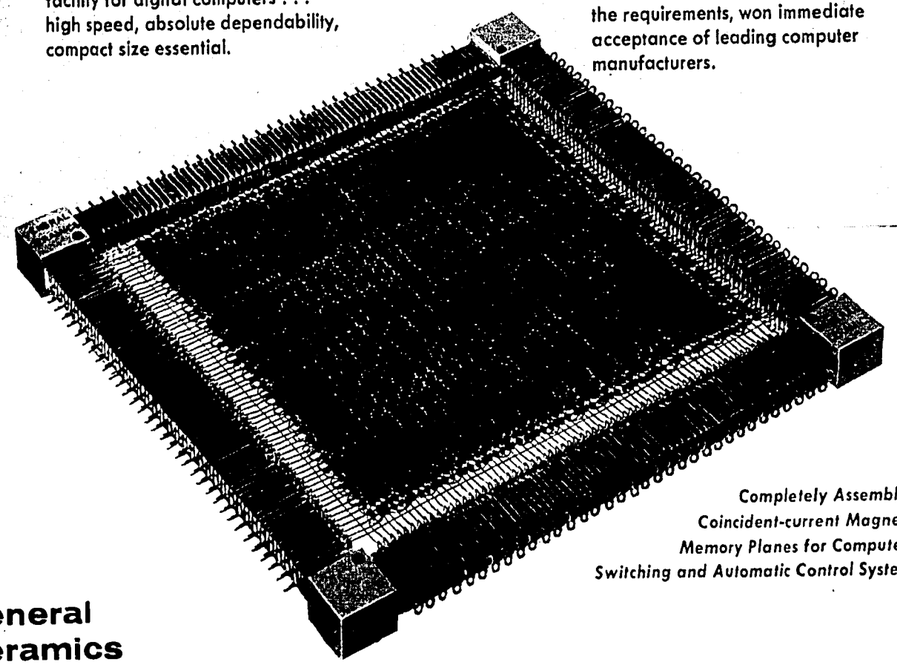
PROBLEM:
Provide a reliable memory storage facility for digital computers . . . high speed, absolute dependability, compact size essential.

SOLUTION:
Magnetic Core Memory Planes by General Ceramics . . . far exceeded the requirements, won immediate acceptance of leading computer manufacturers.



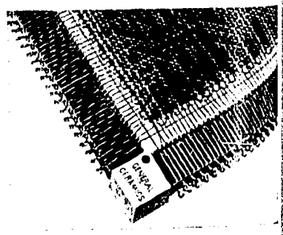
Completely Assembled Coincident-current Magnetic Memory Planes for Computers, Switching and Automatic Control Systems

General Ceramics

FERRAMIC® MAGNETIC MEMORY PLANES

Utilizing Ferramic Magnetic Memories resulted in important increases in reliability, speed and accuracy in actual operation. In addition, designers found space requirements sharply reduced. Lower power consumption, lighter weight, elimination of heat dissipating devices and *greatly reduced* maintenance were other significant improvements.

General Ceramics Magnetic Memories offer a solution to similar problems in automatic control systems for conveyors, elevators, telephony, production machines, processing equipment and signalling. For further details, write General Ceramics Corporation, Keasbey, New Jersey. Please address inquiries to Dept. ID.



Completely assembled standard type memory frames available from stock. Memory Frames of special design can be produced to your specifications.

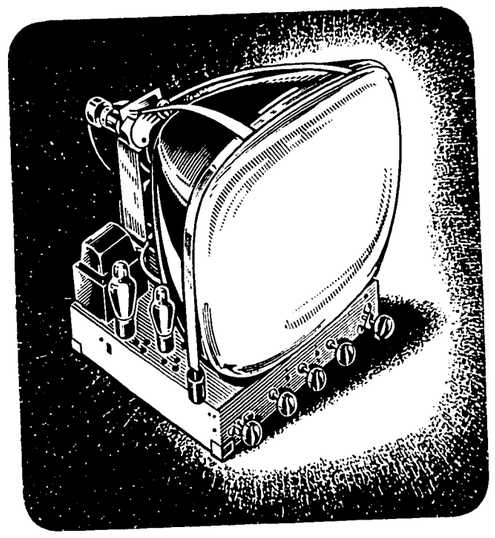
PURITY BY THE TON
-for production use

High Purity

Baker ELECTRONIC CHEMICALS

For your electronic tubes and screens—



BAKER CHEMICALS FOR THE ELECTRONIC INDUSTRY are manufactured to rigid standards of chemical purity. They are ideally suited for the production of phosphors, emission coatings, activating agents, etc. used in military and civilian radar, radio and television equipment.

For many years, J. T. Baker Chemical Co. has supplied tonnage chemicals of controlled purity and uniformity for industries where precision is the key word.

Today, the increasing demands of high fidelity and color TV equipment present for ever-new challenges of closer tolerances. Baker works closely with chemists and electronic engineers to aid in meeting these challenges. You may be sure that Baker is well-equipped to supply your industry with the high purity tonnage chemicals you need—when you need them.

Look over the list of Baker electronic chemicals on this page—write for prices and samples of those which interest you in your production. Further, if your development and research requires these or other chemicals to precise standards, Baker is your logical source of dependable supply.

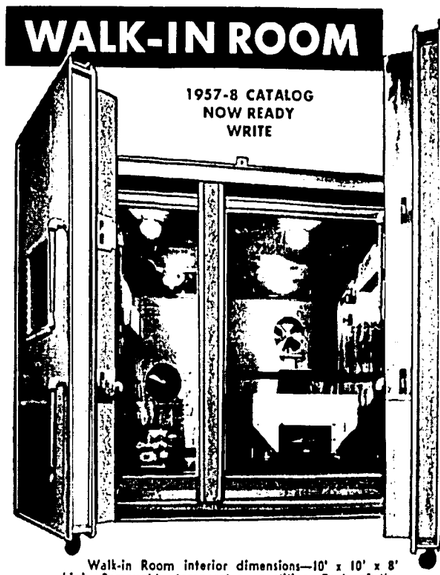
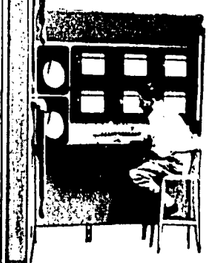
WALK-IN ROOM



Designed and built for
GREER
HYDRAULICS, Inc.
NEW YORK



Walk-in Room interior dimensions—10' x 10' x 8' high. Removable temperature partition. Each of the two sections can be operated at different temperatures. Temperature range —100°F to +400°F.—Altitude—can be built to 100,000 feet or higher.—Separate air lock for entrance of personnel without upsetting altitude run.—Rain in either or both compartments at rate of 4" per hour.—Humidity—20% to 100%. Chamber constructed sectionally for ease of installation.

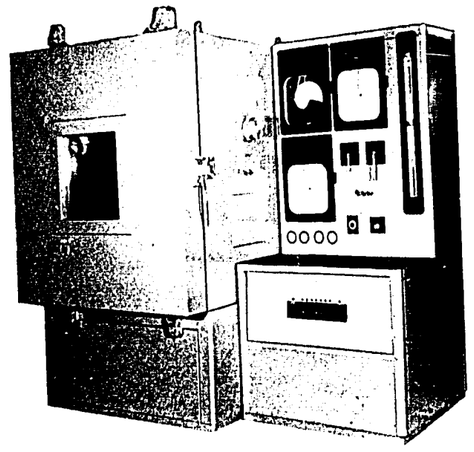
CONRAD Inc.

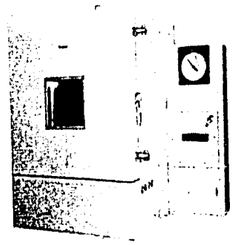
ENVIRONMENTAL TEST CHAMBERS

Designed Especially For Your Qualification and Control Laboratory, to Save Engineering Time and Accelerate Test Programs

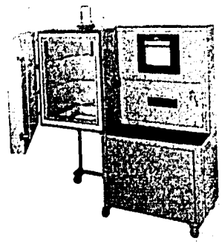
Components of guided missiles, supersonic aircraft, and other products can be tested under reproducible conditions which permit accurate comparative evaluation data. Precision control of temperature, humidity, vibration. Standard and special design chambers in sizes from 2 cubic feet to walk-in rooms, with temperature ranges in excess of +500° F. and −150° F. Highest standards of engineering and manufacturing in the industry.



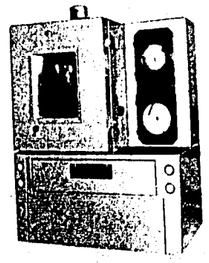
3 x 3 x 4 Altitude Temperature — Humidity Chamber, +300°F. to −100°F., 20-98% humidity, 100,000-ft. altitude.



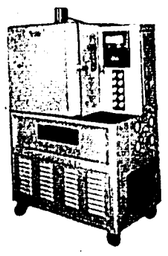
4 x 4 x 4 High-Low Temperature Chamber, +300° F. to −100° F., completely self-contained.



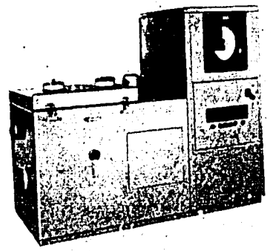
Combination Temperature-Vibration Chamber, +500° F. to −100° F., 8, 27, and 64 cu. ft. sizes.



Program Controlled Temperature — Humidity Chamber, +250°F. to −100° F. temperature, 20-95% humidity.



Portable 4 cu. ft. Test Chamber, range +250° F. to −100° F.



High-Low Temperature Chamber, CB Series, +250° F. to −100° F.

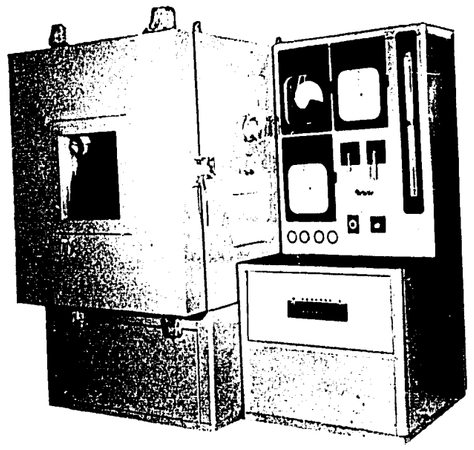
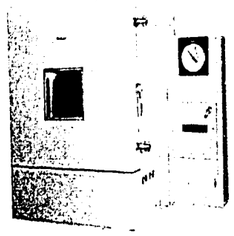
ENVIRONMENTAL TEST CHAMBERS

Designed Especially For Your Qualification and Control Laboratory, to Save Engineering Time and Accelerate Test Programs

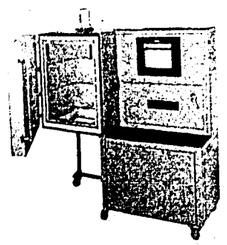
Components of guided missiles, supersonic aircraft, and other products can be tested under reproducible conditions which permit accurate comparative evaluation data. Precision control of temperature, humidity, vibration. Standard and special design chambers in sizes from 2 cubic feet to walk-in rooms, with temperature ranges in excess of +500° F. and –150° F. Highest standards of engineering and manufacturing in the industry.



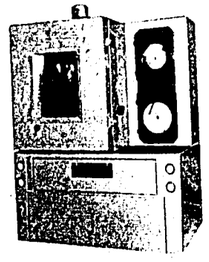
3 x 3 x 4 Altitude Temperature — Humidity Chamber, +300°F. to –100°F., 20-98% humidity, 100,000-ft. altitude.



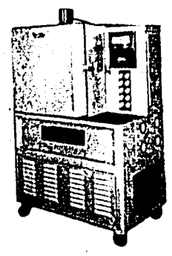
4 x 4 x 4 High-Low Temperature Chamber, +300° F. to –100° F., completely self-contained.



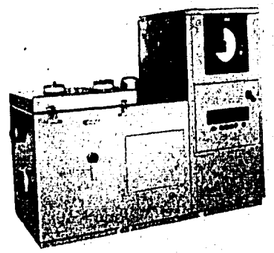
Combination Temperature-Vibration Chamber, +500° F. to –100° F., 8, 27, and 64 cu. ft. sizes.



Program Controlled Temperature — Humidity Chamber, +250°F. to –100° F. temperature, 20-95% humidity.



Portable 4 cu. ft. Test Chamber, range +250° F. to –100° F.



High-Low Temperature Chamber, CB Series, +250° F. to –100° F.

TRANSISTOR TESTERS

. . . by Baird-Atomic

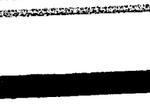
FOR THE UTMOST IN RELIABILITY . . .

TRANSISTOR BETA, h_{fe}, I_{CO} TESTER Model KT-1

This portable transistor tester measures Beta, h_{fe} and I_{CO}. Light weight, it is completely self-contained with its own 1Kc oscillator and battery power supply. Utilizes printed circuit construction . . . has provisions for collector waveform observation and meter overload protection.

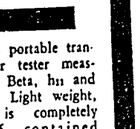
MEDIUM POWER TRANSISTOR TESTER Model KP-1

Model KP-1 measures all *h* parameters . . . has provisions for measuring transistor reverse characteristics and external measurement of I_{CO}. It is designed for wide range of test conditions — range of I_C and I_E variable from 1.0 to 300ma — range of V_C from 0 to 100 volts — frequency range from 100 cps to 200 kc.



TRANSISTOR TEST SET Model GP-4

Model GP-4 tester is designed for measuring — *h* parameters and equivalent T coefficients . . . NPN and PNP junction and surface barrier transistors . . . grounded base or emitter circuits . . . alpha and beta cut-off . . . I_{CO} and C_C. Test frequency is from 100 cps to 1 mc.



TRANSISTOR TEMPERATURE TESTER Model LK-1

Model LK-1 is a compact battery-powered instrument for measuring the temperature of power transistors. Because of its temperature range . . . 35° to 85° C . . . it is particularly adaptable to temperature measurement of germanium transistors. Tester accuracy is ±1° C.; battery life is approximately 250 hours. It is available with a number of sensing elements.

Complete technical data available on B-A Transistor Test Equipment.

TRANSISTOR CHARACTERISTIC PLOTTER model 331

Generates the r_{22}, r_{12}, and h_{12} families of characteristic curves of low-power transistors and semiconductor diodes for display on an auxiliary oscilloscope.

This Plotter combines the precision and versatility of laboratory equipment with the ease and speed of operation and the ruggedness needed for production testing and sorting of transistors and semi-conductor diodes. It has proved invaluable for transistor matching, production testing, quality control, transistor circuit design and applications, semi-conductor research and development, and educational use for laboratory work in semi-conductors.

The Model 331 Plotter has been adopted as standard by manufacturers of transistors and transistorized equipment, by semi-conductor research laboratories, research and development firms, and by university laboratories. This fully electronic instrument, featuring automatic sequential high-speed curve tracing, accommodates all types of low-power transistors and semi-conductor diodes—point contact and junction, germanium and silicon.

NEW: Model 341 Transistor Characteristic Plotter—a curve tracer capable of generating static curves for power transistors at collector currents to 5 amperes, collector voltages to 80 volts, and base currents to 50 milliamperes. Available August 1957.

Write for additional information on these Plotters and other DUNN transistor test equipment.

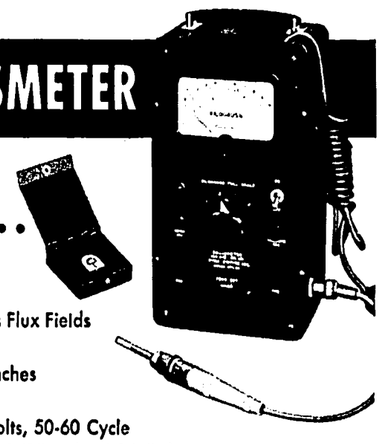
D-79 GAUSSMETER



Means More In MAGNETICS . .

HERE'S WHY:

- Reads 10 to 30,000 Gauss Flux Fields
- Probe is only .025" thick
- Active area .01 square inches
- Net Weight 10-1/2 lbs.
- Power Supply 105-125 Volts, 50-60 Cycle
- Overall size 13" high, 10-1/2" wide, 6-3/4" deep

Precision built to give accurate flux density measurement and determine "flow" direction. The unit also locates and measures "stray fields," plots variations in strength, and is ideal for checking production lots against a standard. Simple to operate, the D-79 gives no ballistic reading . . . doesn't jerk or pull. Comes in protective carrying case.

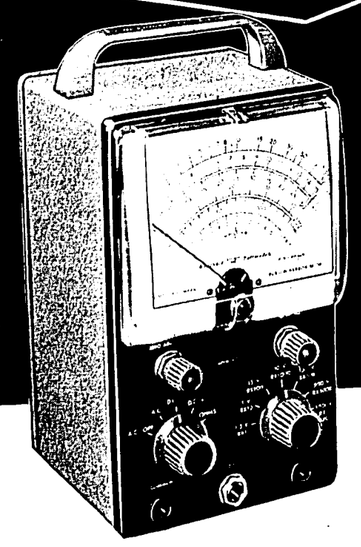
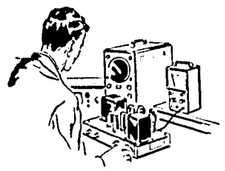
look what $24.50 buys in test equipment!



HEATHKITS GIVE YOU TWICE AS MUCH equipment for every dollar invested

The famous model V-7A Vacuum-Tube-Voltmeter is a perfect example of the high-quality instruments available from Heath at ⅓ the price you would expect to pay! Complete, only $24.50



Get the most out of your test equipment budget by utilizing HEATHKIT instruments in your laboratory or on your production line. Get high quality equipment, without paying the usual premium price, by dealing directly with the manufacturer, and by letting engineers or technicians assemble Heathkits between rush periods. Comprehensive instructions insure minimum construction time. You'll get more equipment for the same investment, and be able to fill your needs by choosing from the more than 100 different electronic kits by Heath. These are the most popular "do-it-yourself" kits in the world, so why not investigate their possibilities in your particular area of activity! Write for the free Heathkit catalog now!

Contains detailed descriptions of Heathkit models available, including VTVM's, scopes, generators, testers, bridges, power supplies, etc.

Also describes Heathkit ham gear and hi-fi equipment in kit form. 100 interesting and profitable "do-it-yourself" projects!

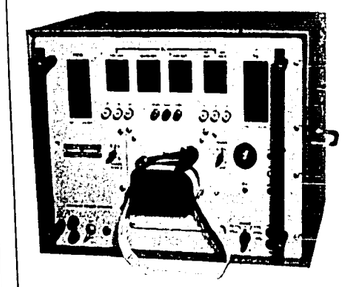
ROBOTESTER

The easiest way to automation



ro'bo-tes'ter, An electronic device which will perform a series of circuit checks on an assembled chassis, automatically indicating failures due to shorts, opens, or out of tolerance parts, etc. Uses punched tape to set up tests.

ROBOTESTER offers a technique of automatic testing for the small run as well as the high-production system. The unique punched-tape programming permits fast set-up, fast change-over, fast correction. No bulky jigs or test units... the entire test program for a complete system can be stored in your pocket! ROBOTESTER has reduced test time for its users to 20% of manual testing, and without weeks of jig-building. Write for complete information and circuit description.

SPECIFICATIONS

Measurement: DC resistance

Range: 1 ohm to 10 megohms

Tolerance: 5, 10, or 20%

Sequence: Any. Tests in random order, above or at ground

No. of measurements: Between any 2 of 240 points

Programming: By punched paper tape

Tape preparation: By user; punch supplied

Speed: 100 tests per min., max. average 60-90

Tape life: Over 25,000 cycles

Maintenance: Plug-in subassemblies

Specialized automatic test equipment and calibration equipment is also available from Lavoie Laboratories. Write us.

Lavoie Laboratories, Inc.
Matawan-Freehola Road
Morganville 6, N. J.

The leader in Electronically-Driven Systems for RANDOM, COMPLEX and SINE WAVE VIBRATION TESTING

LING Model PP90/140 Power Generator provides 90,000 watts for random noise testing to 44,400 force lbs. peak and sine wave testing to 21,500 force lbs. Vector.

COMPLETE SYSTEMS...Ling engineers and manufactures a complete line of electronically-driven vibration systems (see specifications chart below). These systems include high power vibration generators (such as shown above), systems control console, mechanical shaker, and all necessary accessory equipment integrated to handle your specific vibration testing requirements.

LING CUSTOMERS include:

Aerojet-General Corp.
AVCO Manufacturing Corp.
Boeing Airplane Co.
BJ Electronics
Borg-Warner Corp.
Cannon Electric Co.
Convair
Douglas Aircraft Co.
General Electric Co.
Glenn L. Martin Co.
Hallamore Electronics Co.
Hoffman Laboratories
Hughes Aircraft Co.
Jet Propulsion Laboratory (Cal. Tech.)
Lear, Inc.
M.I.T. Instrumentation Lab.
No. American Aviation, Inc.
Northrop Aircraft Co.
Ramo-Wooldridge Corp.
Radioplane Company
Rototest Laboratories
Swedish Air Force
Sperry Gyroscope Co.
Temco Aircraft Co.
Texas Instruments, Inc.

ENGINEERING ASSISTANCE...Ling's experienced engineering group is available to aid in the selection and specification of equipment or systems to answer your vibration testing program.

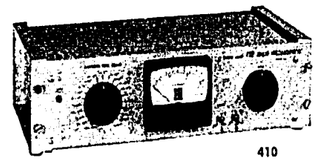
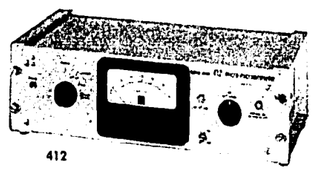
Keithley Instruments

MICRO-MICROAMMETERS *with electrometer tube inputs are stable, fast, and economical.* **All five models have 216-volt source for polarizing ion chambers; relay rack mounting or as bench models; 5 milliamperes output to drive 50 mv, 1 ma or 5 ma recorders. Rise times on the order of 10 milliseconds frequently can be obtained in many standard applications.**



410



412

MODEL 410, 20 Ranges from 3×10^{-13} to 10^{-3} ampere full scale (two per decade). Input grid current $< 5 \times 10^{-14}$ ampere, input drop < 5 mv. Drift < 2% of full scale in 24 hours, except 3×10^{-13} range, 4%. Accuracy 2% of full scale on 10^{-3} to 10^{-8} ranges, 4% on other ranges. Rise time to 67% of final value is 4 seconds on 3×10^{-13} range, 1 second on 10^{-11} range, with 5000 mmf across input. Full Scale Output, five volts; noise < 2% of full scale. $490.00.

MODEL 412, Single range from 10^{-13} to 10^{-7} ampere. Drift < 5% of a decade in 24 hours. Accuracy 0.2 decade. Rise time to 90% of final value is 6 seconds for currents between 10^{-13} to 10^{-12} ampere and < 2 seconds for currents between 10^{-12} and 10^{-7} ampere—with 5000 mmf across input. Full Scale Output, six volts; noise < 30 mv rms. $465.00

MODEL 411, 17 Ranges from 10^{-11} to 10^{-3} ampere full scale (two per decade). No Switching Transients. Input grid current $< 5 \times 10^{-14}$ ampere, input drop < 5 mv. Drift < 2% of full scale per week on all ranges. Accuracy, 2% of full scale on 10^{-3} to 10^{-7} ranges, 4% on other ranges. Rise time to 67% of final value is 4 seconds on 10^{-11} range, 1 second on 10^{-10} range, with 5000 mmf across input. Full Scale Output, ten volts; noise < 2% of full scale. $535.00

MODEL 410-C Identical to 410 except that meter-relay with adjustable contact replaces standard panel meter. 5-ampere internal relay operates from meter contacts. $625.00

MODEL 411-C Identical to 411 except for meter-relay. $670.00.

MODEL 220, Line operated, transistorized, useful as preamplifier. Ranges, Eight: 0.03, 0.1, 0.3, 1, 3, 10, 30 and 100 volts full scale. Drift < 3 mv per hour with moderate ambient temperature variations. Output, Two separate single-ended outputs: ± 5 volts and ± 1 milliampere for full scale meter deflection on any range. Frequency response is dc to 60 cps on 30 mv range, rising to 300 cps on 100 volt range. $400.00

MODEL 200B, Battery operated, portable. Ranges, Eight: 8, 20, 80, 200, 800 mv and 2, 8, 20 volts full scale. Drift < 1 mv per hour. Not sensitive to temperature variation. Battery Life 400 hours or better. $335.00

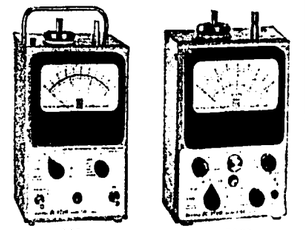
MODEL 210, Line operated. Ranges, Five: 0.8, 2, 8, 20, 80 volts full scale. Drift < 1% of full scale. Output 10 volts for full scale meter deflection on any range; impedance 8600 ohms. $325.00

MODELS 200, 200A, Battery operated. Ranges, 2 and 20 volts, and 2 and 8 volts, full scale. $175.00

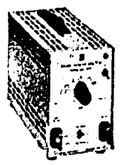
ACCESSORIES permit above DC VTVM's to measure higher voltages, low currents and high resistances. Voltage Dividers have ratios of 100:1 and 1000:1—permit measurements to 20 kv. Decade Shunts permit measurements from 10^{-3} to 5×10^{-14} ampere. Regulated Voltage Supply permits measurements from 10^4 to 10^{16} ohms.

DC VTVM ELECTROMETERS

have electrometer tube input with 10^{14} ohms input impedance, 2% accuracy.



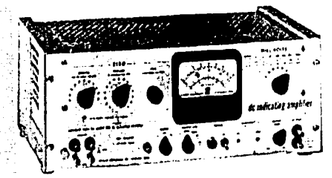
220 2008



AC DECADE ISOLATION AMPLIFIER Model 102B also useful as general purpose broad-band preamplifier. Decade Gains, 0.1, 1, 10, 100, and 1000. Mid-band gain accuracy 2%. Input Impedance is > 400 meg, 3 mmf. Output Impedance is < 50 ohms, 20 mfd. Frequency Response (two position band width switch provided):

2 cps to 1.7 mc ±3 db; 20 microvolts input noise level.
2 cps to 150 kc ±3 db; 10 microvolts input noise level.

Harmonic Distortion < 0.1% at midband. Output, 5 volts rms max into 5000 ohm load. $290.00. Rack panel or bench mounting. Probes, 102B-P1, 30-inch double-shielded, 5 mmf, 2 cps to 150 kc. 102B-P2, 30-inch single shielded, 20 mmf input capacitance, 2 cps to 1.7 mc.



DC INDICATING AMPLIFIER. Model 303 provides high sensitivity and extreme versatility. Ranges, Seven: 2, 8, 20, 80, 200, 800, and 2000 mv full scale. Input Impedance > 10^{12} ohms, 10 mmf. Accuracy, 2% of full scale. Drift < 2 mv per hour, referred to input. Noise Equivalent at input is < 20 microvolts rms above 10 cps. Frequency Response is dc to 100 kc on higher ranges, dropping to dc to 20 kc on the 2 mv range. Output, 25 ma, 80 volts. $850.00

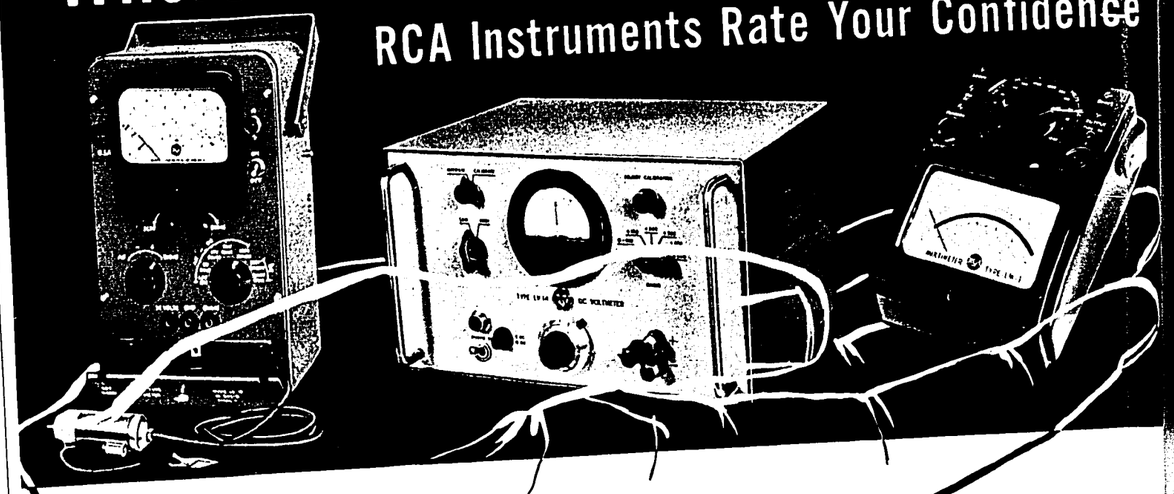
Where Metering Accuracy is Vital—

RCA Instruments Rate Your Confidence



The RCA Seal on these quality instruments is your assurance of highest dependability. They are backed by the RCA reputation for engineering excellence. All are immediately available—ready to serve you eminently well.

VACUUM TUBE VOLTMETER
Type LV-10 $250*

With excellent stability and versatility, this new RCA Vacuum Tube Voltmeter is ideal for use wherever highly precise measurements are essential. Combines in one instrument an AC voltmeter covering a range from audio to UHF frequencies, a DC voltmeter with 100 megohms input resistance, and an ohmmeter capable of measuring resistance from zero to 1000 megohms.

SPECIFICATIONS

DC VOLTS: 7 ranges: 1, 3, 10, 30, 100, 300, 1000. Accuracy: ±3% full scale deflection. Input resistance: 100 megohms ±2% on all ranges.

AC VOLTS: 6 ranges: 1, 3, 10, 30, 100, 300. Sine Wave Accuracy: ±3% full scale deflection. Input impedance: Less than 2 μμf in parallel with 15 megohms.

Frequency Response: ±1.0 db, 18 cps to 700 MC. Relative Measurements: possible to 1000 MC.

RESISTANCE: 0 to 1000 megohms in 7 ranges. Accuracy ±5% between divisions 10 and 100 on scale. DB Range: —10 to +52 dbm in 6 ranges. Zero dbm = 1 mw in 600 ohms.

*Price in U.S.A., f.o.b. Camden, N. J. Subject to change without notice.

DC NULL VOLTMETER
Type LV-14 $345*

Five important features characterize this Null Voltmeter, as follows: (1) Flexible input: positive, negative or neither side grounded. (2) Calibrated voltage output for external recorder amplifier, sensitive laboratory galvanometer. (3) Simplicity of operation. (4) Infinite impedance at null. (5) Long-life mercury battery. Rack Model LV-14R available at $360.00.*

SPECIFICATIONS

VOLTAGE RANGES: 0-10, 0-100, 100-200, 200-300, 300-400, 400-500, 500-600 volts DC. Positive, negative, or neither side grounded.

ABSOLUTE ACCURACY: 0.1% ± 10 millivolts between 0 and 10 volts. ± 100 millivolts between 10 and 600 volts.

RESOLUTION: At least 5 millivolts between 0 and 10 volts. 50 millivolts between 10 and 600 volts.

INPUT IMPEDANCE: Infinite at null. Greater than 2.5 megohms per volt at ¼ division off null.

POWER REQUIRED: 100-135 volts, 50-60 cycles, 24 watts.

MULTIMETER
Type LM-1 $70*

Widely used in all phases of industry for measurements of AC and DC voltages and DC current, this new Multimeter provides highest accuracy with modern overload protection. High sensitivity: 20,000 ohms per volt, AC and DC. One selector switch.

SPECIFICATIONS

SENSITIVITY: 20,000 ohms per volt for both AC and DC.

AC VOLTS: Seven ranges: 3, 10, 30, 100, 300, 1000, 5000V. Accuracy: ±2.5% FSD, 20 to 2000 cps; ±4% for the 5000V range.

RESISTANCE MEASUREMENT: From 0 to 20 megohms in 3 ranges.

DC VOLTS: Seven ranges: 3, 10, 30, 100, 300, 1000, 5000V. Accuracy: ±1.5% FSD, ±3% for the 5000V range.

DC CURRENT RANGES: 50 μa, 1 ma, 10 ma, 100 ma, 1 A, 10 A. 1.5% FSD accuracy.

For complete information on the above or other instruments in the RCA line, write RCA, Dept. X-94, Building 15-1, Camden, N.J.

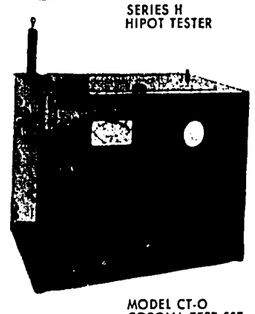
PESCHEL HIGH VOLTAGE TEST EQUIPMENT

SERIES H HIPOT TESTER



MODEL CT-O CORONA TEST SET

Complete Series of Hipot Testers; HV Test Sets, AC, DC and AC/DC; non-destructive Sensitive Hipot testers; Corona Test Sets; Continuous Insulation Testers; Insulation Tester and Fault Indicator; Motorized Output Control Panel; Audiotone Continuity/Leakage Tester; Electronic Rheostats; High Potential Test Sticks; DC High Potential Test and Cable Fault Sets; Universal Power Supplies.

MEETS TESTING STANDARDS FOR MIL, JAN, ASTM and IPCEA. Write today for Catalog No. 19.

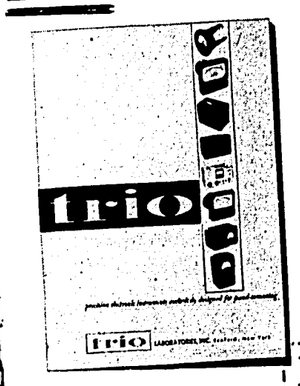
free engineering guide tells you how to design-in panel-mounting miniature electronic instruments



HOW TO build-in such miniature instruments as:
DC VTVMs and AC VTVMs
Ruggedized Versions
Phase-sensitive AC devices
Low-Level DC Millivoltmeters
Standard and Special designs
... with high sensitivity, broad frequency response, high input Z

... when ordinary instruments are too big or inadequate

TRIO laboratories inc., SEAFORD, N. Y. P-9

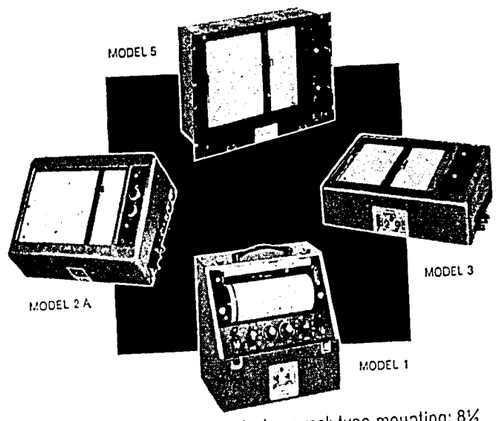
THE MOSELEY

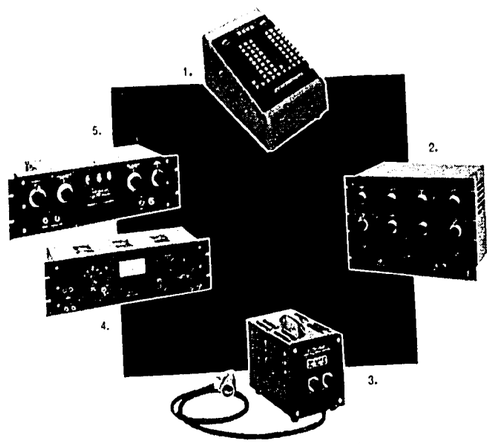
AUTOGRAF
trade mark

X-Y RECORDER



Five Models: Portable, desk, or rack type mounting; 8½ x 11 or 11 x 16½ size paper with vacuum holddown; Input filters; Ranges: 5 mv to 500 volts, continuous; Zero offset; Up to 2 meg-ohms input resistance; Better than ±0.25% accuracy and resolution; Curve Follower available.

ACCESSORIES



1. Model 40A Keyboard; Self-contained.
2. Model 30A Card or Model 50 Tape Translator.
3. Model F-1 Curve Follower Adaptor.
4. Model 60 Logarithmic Converter-Amplifier.
5. Model 51 Step Input; Scale factors: 1 to 200 steps/inch.

Complete information will be furnished on request.

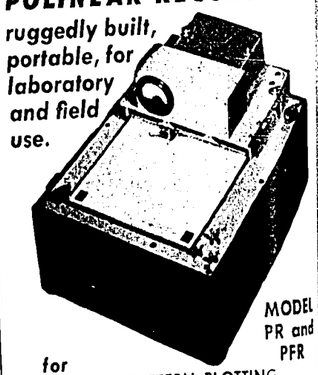
Polar Recorder *and*
POLINEAR RECORDER
ruggedly built, portable, for laboratory and field use.



MODEL PR and PFR

for
BEAM PATTERN PLOTTING
of antennas, microphones, loudspeakers, ultrasonic devices;
FREQUENCY RESPONSE RECORDS
of microphones, loud speakers, filters, amplifiers, and television circuits.

Both recorders can be furnished with circuits for ac or ac-dc signal recording. Chart size 8½" x 11". Convenient linkage to oscillators, analyzers, rotational devices, test-turntables.

The POLAR RECORDER PR has selsyn-driven rotary movement; the POLINEAR RECORDER PFR has polar and linear synchronous-driven turntable. Descriptive literature available.

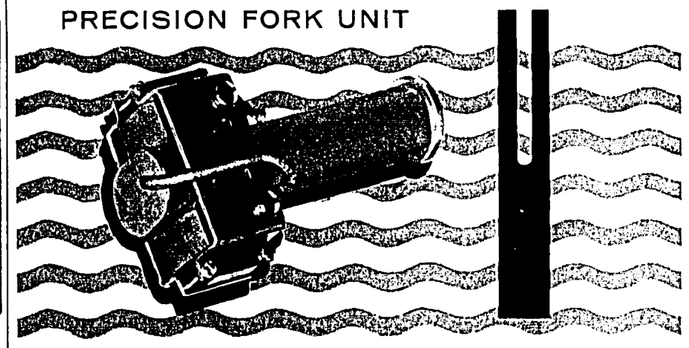
PRECISION FORK UNIT



NEW FORK UNIT DESIGNED FOR HIGH ENVIRONMENTAL VIBRATION USES. SENSIBILITY TO EXTERNAL FORCES IS REDUCED AT LEAST ONE ORDER OF MAGNITUDE THROUGH VIBRATION RANGE OF 2 TO 2000 CPS WITHOUT SHOCK MOUNTS. INHERENT STABILITY IS AT LEAST 1 PART IN 1 MILLION ±5°C OR 1 PART IN 10 MILLION WITH OVEN. FORK FREQUENCIES 1000 TO 5000 CPS.

LONG TERM DRIFT LESS THAN $5/10^6$ PER YEAR.

TIMES FACSIMILE CORPORATION
540 West 58th St., New York 19, N.Y.—1523 L St., N.W., Washington 5, D.C.
For details, circle #459 on Reader Service Card.

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each major classification. Complete addresses will be found in the Alphabetical Directory.

FREQUENCY STANDARDS

PRECISION FORK UNIT
TYPE 50

Size 1" dia. x 3¾" H. Wght., 4 oz.*
Frequencies: 240 to 1000 cycles
Accuracies:—
Type 50 (±.02% at —65° to 85°C)
Type R50 (±.002% at 15° to 35°C)
Double triode and 5 pigtail parts required
Input, Tube heater voltage and B voltage
Output, approx. 5V into 200,000 ohms
*3⅛" high
400 - 1000 cy.

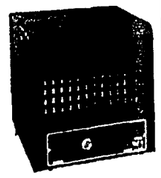
FREQUENCY STANDARD
TYPE 50L

Size 3¾" x 4½" x 5½" High
Weight, 2 lbs.
Frequencies: 50, 60, 75 or 100 cycles
Accuracies:—
Type 50L (±.02% at —65° to 85°C)
Type R50L (±.002% at 15° to 35°C)
Output, 3V into 200,000 ohms
Input, 150 to 300V, B (6V at .6 amps.)

PRECISION FORK UNIT
TYPE 2003

Size 1½" dia. x 4½" H. Wght. 8 oz.*
Frequencies: 200 to 4000 cycles
Accuracies:—
Type 2003 (±.02% at —65° to 85°C)
Type R2003 (±.002% at 15° to 35°C)
Type W2003 (±.005% at —65° to 85°C)
Double triode and 5 pigtail parts required
Input and output same as Type 50, above
*3½" high
400 to 500 cy. optional

FREQUENCY STANDARD
TYPE 2005

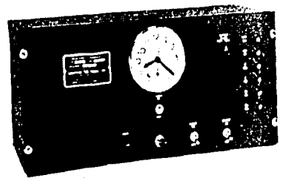


Size, 8" x 8" x 7¼" High
Weight, 14 lbs.
Frequencies: 50 to 400 cycles (Specify)
Accuracy: ±.001% from 20° to 30°C
Output, 10 Watts at 115 Volts
Input, 115V. (50 to 400 cycles)

FREQUENCY STANDARD
TYPE 2007T
TRANSISTORIZED

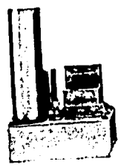
Size 1½" dia. x 4½" H. Wght. 7 ozs.*
Frequencies: 240 to 1000 cycles
Accuracies:—Same as 2003, above
Type 2007S—Silicon type
Input, 28V.
Output, Multitap, 75 to 100,000 ohms
*3½" in 2007S, 400 to 800 cycles.

FREQUENCY STANDARD
TYPE 2121A



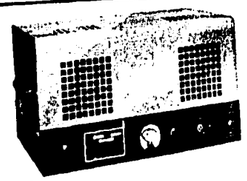
Size
8¾" x 19" panel
Weight, 25 lbs.
Output: 115V
60 cycles, 10 Watt
Accuracy:
±.001% from 20° to 30°C
Input, 115V (50 to 400 cycles)

FREQUENCY STANDARD
TYPE 2001-2



Size 3¾" x 4½" x 6" H., Wght. 26 oz.
Frequencies: 200 to 3000 cycles
Accuracy: ±.001% at 20° to 30°C
Output: 5V. at 250,000 ohms
Input: Heater voltage, 6.3 - 12 - 28
B voltage, 100 to 300 V., at 5 to 10 ma.

FREQUENCY STANDARD
TYPE 2111C



Size, with cover
10" x 17" x 9" H.
Panel model
10" x 19" x 8¾" H.
Weight, 25 lbs.
Frequencies: 50 to 1000 cycles
Accuracy: (±.002% at 15° to 35°C)
Output: 115V, 75W. Input: 115V, 50 to 75 cycles.

ACCESSORY UNITS
for TYPE 2001-2

L—For low frequencies multi-vibrator type, 40-200 cy.
D—For low frequencies counter type, 40-200 cy.
H—For high freqs, up to 20 KC.
M—Power Amplifier, 2W output.
P—Power supply.

This organization makes frequency standards within a range of 30 to 30,000 cycles. They are used extensively by aviation, industry, government departments, armed forces—where maximum accuracy and durability are required.

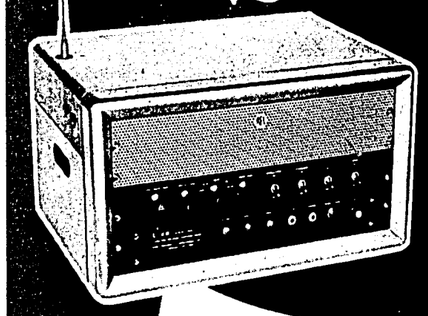
Measurement Standards



NEW
MODEL 1051
C-R-A-M
UNIT

Calibrator - Receiver - Amplifier - Mixer

The Model 1051 combines four functions. As a 10 kc to 500 mc frequency standard, it delivers sub-harmonics of a 10 mc oscillator to ±0.0005% accuracy. Discrete sine wave frequencies of 10, 50, 100, 200 kc and 1, 2, 10 mc available from rear terminals. Its 5 mc WWV receiver has a sensitivity of 5 microvolts. The amplifier and mixer sections provide a gain of several hundred times and a comparison of external signals up to 1000 mc or a comparison of external with internal signals. Price $760.

MODEL 531

MODEL 541A

MODEL 459

Crystal Impedance Meters

Four units now available to measure resonance and anti-resonance resistance of quartz crystals, including those covered by Spec. MIL-C-3098B. Capacitance, inductance and performance index (PI) of the crystal can be determined.

Model 531 (TS-683/TSM) covers range of 10-140 mcs, employing 13 calibrating resistors and an anti-resonance adapter for 10-150 ohm crystals. Price $590.

Model 541A (TS-710/TSM) for 10-1100 kc range crystals having resistances from 200 ohms to 0.5 megohms. Power dissipated in the crystal is measured. Built-in VTVM and ohmmeter provided. Price $860.

Model 459 (TS-330/TSM) covers 1-15 mc frequency range for crystals having resonance resistances from 0 to 9900 ohms. Price $695.

Model 1207 (AN/TSM-15) covers frequency range of 75-200 mcs for 10-125 ohm crystals. Crystal voltage at series resonance is measured and power calculated. Built-in ohmmeter.

All models were developed under Signal Corps technical requirements for the national crystal testing standardization program.

Performance of all models is rigidly guaranteed. Prices are net f.o.b. Boonton, N.J. and subject to change without notice.

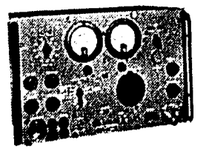
Radio technicians and pilots trust ARC test equipment to keep airborne instruments in tune for precision navigation and communication.

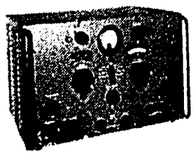


Type H-14A Signal Generator

Has two uses: (1) It provides a sure and simple means to check omnirange and localizer receivers in aircraft on the field, by sending out a continuous test identifying signal on hangar antenna. Tuned to this signal, individual pilots or whole squadrons can test their own equipment. The instrument permits voice transmission simultaneously with radio signal. (2) It is widely used for making quantitive measurements on the bench during receiver equipment maintenance.

Type H-16 Standard Course Checker

Measures the accuracy of the indicated omni course in ARC's H-14A or other omni signal generator to better than ½ degree. It has a built-in method of checking its own precision.



Type H-12 Signal Generator (900-2100 mc)

Equal to military TS-419/U, and provides a reliable source of CW or pulsed rf. Internal circuits provide control of width, rate and delay of internally-generated pulses. Complete specifications on request.

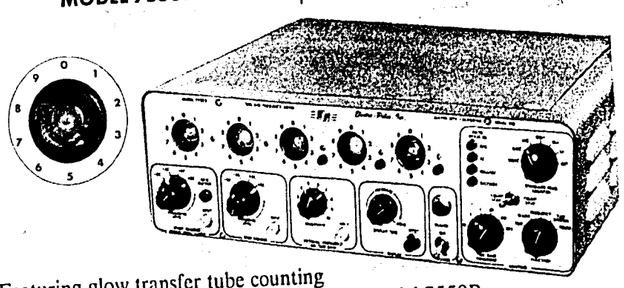
for ACCURATE MEASUREMENT of FREQUENCY, PERIOD, or TIME INTERVAL

Electro-Pulse presents the new

MODEL 7550B

- 5¼" x 17" Panel Size
- Crystal Accuracy
- Measures 0.1 CPS—100 KC
- Measures 10 μs—1.2 days



Featuring glow transfer tube counting techniques and printed wiring throughout, Model 7550B offers optimum reliability, economy, and accuracy for general purpose use in frequency and time measurement.

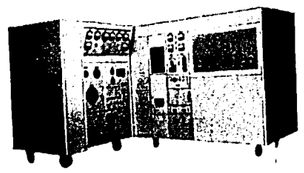
MANSON LABORATORIES...

State-of-the-Art Engineering Techniques
Precision Craftsmanship
Equipment of Superior Performance and Dependability

1 For specialized ELECTRONIC TESTING EQUIPMENT to meet your application need . . .

Soft- and Hard-Tube PULSE MODULATORS



Precision-engineered Modulators to operate magnetrons, klystrons, and other pulse-modulated tubes . . . also designed to test pulse transformers and pulse-forming networks. A variety of standard models cover a wide range of power levels — from kilowatts to tens of megawatts. All models readily adaptable to meet individual specifications.

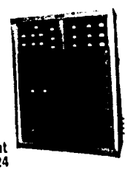
Typical operating features include: continuously-adjustable voltage control; discrete or variable pulse widths; internally- and externally-controllable repetition frequencies; auxiliary synchronized outputs; appropriate monitoring and metering circuits; interlocking and overload protection; simple, safe operation.

20-Megawatt Soft-Tube Modulator, Model 150 — 75-Kilowatt Hard-Tube Modulator, Model 210

High-Voltage POWER SUPPLIES

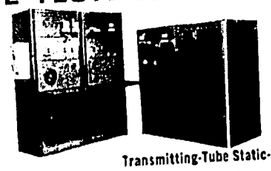
From bench-top models to large mobile units, encompassing every degree of regulation and stability — to 0.01% when required. Manson engineers are thoroughly experienced in all aspects of the design and manufacture of high-power H-V power supplies for 1) operating and testing carcinotrons and similar types of tubes; 2) powering and surge-testing high-power microwave systems; 3) operating and controlling tube-production equipment, such as rotary ovens; 4) conventional power-source applications in engineering laboratories and industrial plants.

AC and/or DC types, single- or multiple-output units. We will be glad to analyze and quote on your problem, or to send literature on request.



Highly Regulated, Multiple-Output H-V Power Supply, Model M-224

TUBE TESTERS and CHECKERS



Designed to perform MIL or special-purpose tests, for virtually every type of tube: high-power vacuum diodes, triodes and tetrodes; C-R tubes; phototubes; magnetrons, thyratrons and gas tubes.

The wide variety includes static-characteristics checkers, aging and conditioning sets, emission and life testers, test oscillators, cathode-interface resistance measuring sets, and special equipment for tube R&D work.

Transmitting-Tube Static-Characteristics Measuring Set, Model 166 — Cathode-Interface Resistance Test Set, Model 186

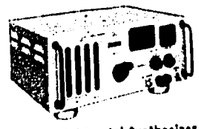
TRIGGER and PULSE GENERATORS

Standard and custom-built trigger or pulse sources, of the time-, width-, and frequency-modulated varieties and widely differing complexities. Single- or multiple-output models to test pulse-coded systems, to synchronize pulse-test equipments, and for all types of laboratory work. Portable units for bench or rack mounting.

Trigger Generator, Model 190

2 For ultra-precision COMMUNICATIONS INSTRUMENTATION

CRYSTAL FREQUENCY SYNTHESIZERS



Incremental Crystal Synthesizer, Series 182

Disciplined incremental and continuous-coverage oscillators, approaching the "black-box" equivalent of a crystal with thousands of selectable frequencies. Ideal for SSB Systems — as transmitter exciters or receiver VFO's, ultra-stable signal generators, frequency meters, FSK exciters, and many other similar applications where exactness, operating convenience and equipment dependability are mandatory.

SERIES 182. Three Models cover from 18 mc to 410 mc, with zero-error readability and resettability, frequency stability 1 part in 10^7, spurious signals down 80 db, and many operational conveniences. Complete details in special *illustrated Bulletin.*

MODEL A-200, continuously tunable from 2 to 32 mc with a frequency stability 1 part in 10^6; features similar to Series 182. *Models with higher stabilities and other frequency ranges are also available.*

Manson offers to Engineers and Technicians a rewarding present and attractive future in suburban Connecticut.

Write or Phone for full Technical Data and a price quotation.

1-MC HARMONIC REFERENCE OSCILLATOR

Ultra-stable frequency standard, and high-level milli-microsecond pulse source for harmonic measurements. Stability of parts in 10^9 per day; jitter-free pulse and sine-wave outputs; fundamental adjustable ±25 cps with full stability; direct readout, accurate ±0.01%; built-in balanced Mixer; and many other unusual and valuable features.

100-KC DIVIDER/OSCILLATOR

A companion to the 1-mc Harmonic Reference Oscillator also usable as an independent 100-kc Oscillator. Has jitter-free pulse and sine-wave outputs, integral Mixer and Beat-Frequency Amplifier.

For the WIRE and CABLE INDUSTRY

Manson builds special testing apparatus, including *High-Potential Test Sets* having voltages to 100KV and/or power capacities to 100KVA; *Velocity-of-Propagation Meters* for measuring coaxial cables to MIL-C-17B; *Flammability Testers* in two Models for cables up to 3" diameter.

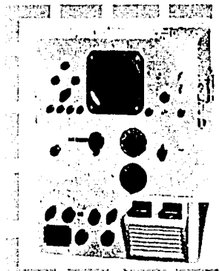
CO-AXIAL SWITCHES, MICROWAVE TEST EQUIPMENT and PRIMARY POWER STANDARDS



PULSE POWER CALIBRATOR

MODEL PCX-1 PULSE POWER CALIBRATOR is an extremely precise instrument for calibrating pulse power measuring devices in the 925- to 1225-mc frequency range and for measuring power between −10 and +63 dbm to within 0.5 db. It is the first in a series which includes similar calibrators designed for the 3000-mc, 5000-mc and 9000-mc bands.

This equipment employs a new method which permits far greater accuracy (other than calorimetric) than heretofore achieved. It establishes a measurement reference level at the time of each use. Ease of operation is assured by the notch-and-reference-line display, by the automatic centering of pulses on the display, and by the direct reading of power measurements.

The removable bisectional cover, frame construction, hinged and pivoted subchassis assure easy accessibility for servicing.

MANUAL CONTROL SWITCHES

Compact, lightweight — available in Radial; parallel connector configuration.

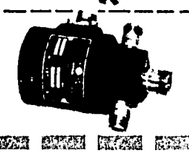
GENERAL CHARACTERISTICS

Frequency Range: 0 to 10,500 MC. VSWR: 1.2:1 max. at 3000 MC. Insertion Loss: 0.3 db max. Crosstalk: greater than 60 db at 3000 MC, greater than 40 db at 10,500 MC. Operation Life: 10,000 cycles, min. Construction: weatherproof. Connectors: N, BNC, C, HN, BN, LN. Positions: 2, 3, 4 and 6: single and double pole. Easily adaptable for specialized usage.

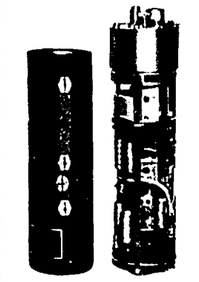
REMOTE CONTROL SWITCHES

28 V. DC., 110 V. DC. — Compact, lightweight — available in Radial, spring return; Radial, transfer; parallel connector configuration.

115 V. AC., 60 cycle. — Compact, lightweight — available in Radial, spring return; parallel connector configuration.



GENERAL CHARACTERISTICS — See Above

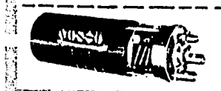


"S" BAND BEACON — Model RCX

Radar Beacon RCX is a miniature S-band transponder equipment for use in tracking missiles, drones and other types of aircraft. It has greater selectivity and sensitivity than the Model RBX (below) and can be used as a transmission medium for telemetering information from auxiliary systems. Many new and unique features make it a reliable and versatile equipment, keeping pace with the current progress in the guided missile field. The equipment includes Receiver-Transmitter RCX-1, Power Supply RCX-2, Junction Box RCX-3 and the necessary interconnecting cables and mounting brackets.

PERFORMANCE CHARACTERISTICS

Receiver Selectivity: a 3-cavity preselector; ±3.5 mc at −3 db; ±15 mc at −40 db (including X-band rejection filter. Receiver Sensitivity: −45 dbm. Receiver Codes: (a) Single pulse 0.25-usec duration or greater; (b) Double pulse 0.25-usec duration, 3-usec spacing; (c) Double pulse 0.75-usec duration, 10-usec spacing. Environmental Ratings: will withstand 200 G's acceleration and 400 G's shock.



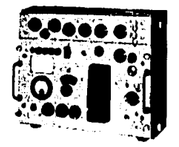
"S" BAND BEACON — Model RBX

A highly miniaturized receiver-transmitter for missile applications to facilitate radar tracking. Supplied with power supply, cable and antenna (not shown).

"X" BAND TEST EQUIPMENT

TEST SET BHS (AN/UPM-10A)

A portable microwave signal generator for testing and adjusting beacon equipment and radar systems operating in the range of 8500 to 9600 MC. Measures power and frequency of external signals. Supplies pulse-modulated, square-wave-modulated or unmodulated signals of known power and frequency. Also supplies frequency-modulated signals.



NEW! MODEL BDX FOR GREATER ACCURACY

Greater frequency accuracy (±1 mc from 8500 to 9600 mc). Greater power level accuracy (±1.5 dbm without correction curves). Repetition rates high enough to measure recovery time with assurance (up to 50,000 PPS). Operates with or without an auxiliary trigger. More rugged and dependable. The only complete signal tester for beacon work.

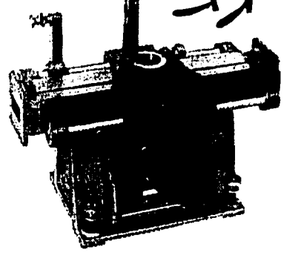
FREQUENCY METER MODEL 802B

Range of 2350 to 10,500 megacycles covers the most used frequencies. Veeder-root digital counter provides accurate, legible readings which are referred to calibration charts for frequency in megacycles to rated accuracy of 0.2% without calculation. Completely self-contained with built-in detector and indicating meter.



SLOTTED LINES
MODELS 219 THROUGH 224

Six portable models, incorporating carriage drive mechanism integral with wave guide assembly measures VSWRs and impedances from 2600 to 18,000 megacycles per second, covering wave guide sizes from 3 X 1½ inches to .702 X .391 inches. Can be used with all standard military and commercial RF probes and detectors.

COMPLETE LINE OF COAXIAL AND WAVEGUIDE INSTRUMENTS INCLUDES:

DIRECTIONAL COUPLERS
TERMINATIONS
FREQUENCY METERS
HORNS
TUNERS
ECHO BOXES
SLOTTED LINES
BENDS
ATTENUATORS
STANDARD REFLECTIONS
BOLOMETERS
THERMISTORS

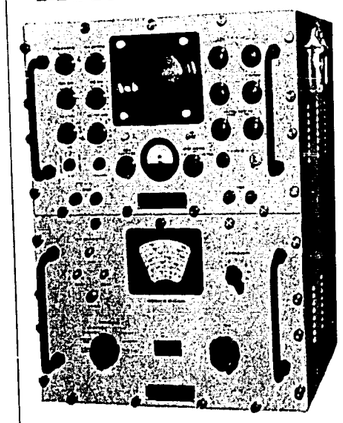
Lavoie **LA-18**

SPECTRUM ANALYZER



10.0 to 16,000 mc

- **no heads to change**
- **rugged construction**
- **stable triode oscillators**

The Lavoie spectrum analyzer, now in use in dozens of laboratories and depots brings laboratory precision to the field technician. MIL-T-945A ruggedness and dependability...simplicity of operation allows production-line application – with repeatable results, as well as attendant advantages of stability and fine resolution.

Special models to 42,000 mc
Information on request

LA-18A Specifications

Calib. Freq. range: 10.0 to 16,000 mc
Sensitivity: for 2:1 S/N ratio at 25 mc B.W.

(generally exceeded over most of band)	–75 dbm, 10-1000 mc
	–60 dbm, 1-4 kmc
	–50 dbm, 4-8 kmc
	–40 dbm, 8-16 kmc

Calib. accuracy: ±1% at L.O. freq.
Spectrum width: 0.5 to 25 mc, var.
Resolution: 10 kc at 3 db points
Detection: Linear or sq. law
Sweep: 0.5 to 30 cps
Attentuators: 0-60 db, internal
0-100 db, external

SIGNAL GENERATOR
SG-153 1800-4000 mc

1800-4000 MC ±1%, continuous. Multipurpose lab. and production precision signal source, pulse mod., internal and external mod. provisions, line Freq. FM, complete sync IN and OUT provisions. Output +4 to 130 dbm, continuously variable.

HV INSULATION TESTER
T-4

0 to 15 KVDC output, continuously variable, meter for voltage and leakage current; SAFE: NON-DESTRUCTIVE TESTS — 150 ua max. test current. No capacitive errors. Tests ignition harnesses, components, transformers etc.

SIGNAL GENERATOR
SG-161 900-2100 mc

900-2100 MC ±1% continuous. Multipurpose lab. and production precision signal source, pulse mod. internal and external mod. provisions. Complete sync IN and OUT facilities. Output +4 to 130 dbm, continuously variable.

Q-PROBE
3-40 mc Circuit Probe

Low-cost oscilloscope attachment for RF scope displays 3 to above 30 MC, continuously variable, high sensitivity; sync output locks scope sweep. Views RF signals; checks two-tone patterns. SSB carrier nulls, filters, RF squegging, parasitics, overall Xmitter mod. characteristics.

SWEEP GENERATOR
SG-132 15-400 mc

Precision Sweep and CW, 15 to 400 MC, .01% CW accuracy WIDE deviation, 40% OF ANY CENTER FREQUENCY. Integral dc scope, crystal markers. Output flatness 0.25 db; 400 cps internal AM to 50%; extreme sweep linearity, 4 to 130 dbm output, continuously variable.

SIGNAL GENERATOR
SG-109 400-1000 mc

400 to 1000 MC ±1% Multipurpose lab. and production precision signal source; continuous pulse and amplitude mod., internal and external mod. provisions; complete sync IN and OUT facilities. Output +4 to −130 dbm continuously variable.

CAVITY OSCILLATOR ASSY.
2-4 KMC

2 to 4 KMC ±1% continuous tuning Klystron coax. cavity assy; +6 to −130 dbm output, piston attenuator; complete level monitoring facilities. For inclusion in new equipment or test equipment. Modifications available to customers specifications.

MULTISPEED AIRCRAFT ACTUATOR T-113

Rotary actuator assembly including solenoid speedshift for high-torque applications. Typical of Transitron-developed special electromechanical devices incorporating motor and gear drives. Extensive engineering and production facilities for design and manufacture to customers specs, available.

OSCILLATOR CAVITY ASSY.
1-2 KMC

1 to 2 KMC ±1% continuously tuning Klystron coax. cavity assembly; +3 to −130 dbm output; piston attenuator, level monitoring meter and bolometer facilities. For additions to or inclusion in new or test equipment. May be modified to customer's specifications.

T/R SWITCHES
Models 2000 & 3000

TRANSMIT-RECEIVE Switches, 1 KW max. power, 3 to 30 MC, no tuning adjustments, no RF relays; Low VSWR; insertion loss less than 1 S-unit; no TVI; Model 2000 has integral receiver muting relay. Low cost, high efficiency. Widely used in communications and amateur equipment.

TRANSDUCER
TD 132

High precision reciprocating mechanism. Driver unit for precision sweep mechanisms, FM cavity oscillators, magnetron sweeping etc., 20 to 30 cycle input; up to ½ in. peak-peak deflection, 0.5 lb. loading approximately. COMPLETELY BALANCED dynamically — No vibration. No susceptibility to external shock and vibration.

VHF ACCESSORIES

Complete line of VHF terminations, detectors, attenuators, probes, impedance matching pads; operating range to 500 MC with low VSWR; BNC connectors. For use with all HF and VHF 50 and 75 ohm signal and sweep generators.

For details, circle #471 on Reader Service Card.

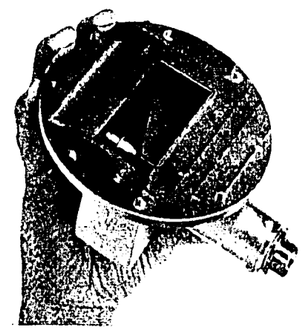
Now! ..... GNW-A SERIES

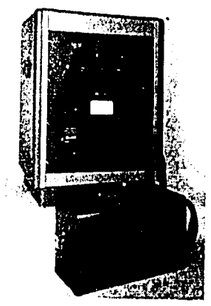
a miniature noise source

for in flight calibration and test of aircraft and missile microwave receivers

- Compact, miniaturized construction
- Rugged, can be made to mil specs.
- Excess noise ratio of up to 18db
- Low firing voltage

Available Today.—in production quantities, for use in radars, microwave relays, other equipment. Units can be provided to meet all specifications for shock, vibration, humidity and temperature cycling. Tubes fire and operate at conventional voltages.





ELECTRONIC MICROWAVE SWEEP GENERATOR to use with Recorders, Oscilloscopes and Reflectometers for rapid test of broadband microwave components and systems.

ROGER WHITE standard Gas Tube Noise Sources, permit precise noise figure measurements in coax or waveguide.

Other ROGER WHITE components . . .

ROGER WHITE Backward Wave Oscillator Tubes are now offered in ruggedized models for aircraft and guided missile use, covering frequencies from 4 to 26 kmc.

GAS TUBE ABSORBTION ATTENUATORS For electron AGC, modulation or switching of Microwave signals.

TRAVELING WAVE TUBES. Broadband high gain microwave amplifier tubes for frequencies between 700 & 12000 Megacycles.

ROGER WHITE
ELECTRON DEVICES
92 FOURTH AVENUE, HASKELL, NEW JERSEY

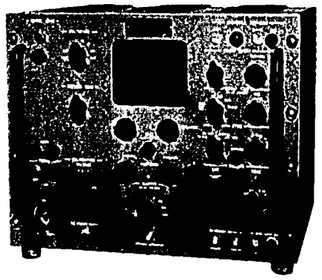
Lavoie

OSCILLOSCOPES

Where dependability counts . . . you'll find a Lavoie oscilloscope.



From Atlas to Redstone,

missile programs find the Lavoie LA-239C oscilloscope outperforms other scopes where it really counts . . . in the field. This ruggedness was a basic design goal, with the high performance circuitry that provides answers quickly and accurately. And now there's another instrument: The LA-259. This brand-new militarized scope offers all the desirable features of its predecessor, PLUS new features that users asked for: DC amplifier, higher accelerating potential, faster calibration and 5-inch tube. Write for complete information.

Condensed Specifications — LA-259

Response: DC to 15 mc, useful to 30 mc. Transient, .018 microsec. rise

Accelerating potential: 10 KV

Sweep range: 0.1 microsec/cm to 0.1 sec/cm

Sensitivity: 20 mv/cm

Internal trigger generator, markers, regulated supply.

Rack Mountable, portable.

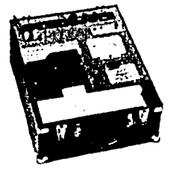
HICKOK **ELECTRONIC Test Instruments** HICKOK

9 TUBE TESTERS FILL ALL REQUIREMENTS



MODEL 123A

CARDMATIC TUBE TESTER
Automatic Tube Testing Machine

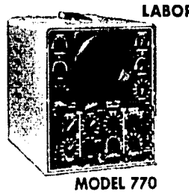
Model 123A: An automatic tube test to laboratory accuracy that instantly selects any tube to meet the exact requirements of your specific circuit application. Ideal for production line use by factory personnel, or for TV service companies.

MODEL 539B

PORTABLE TUBE TESTER
Most Accurate

Model 539B: Features simplicity of operation in providing a complete and accurate evaluation of electron tubes. Has Mutual Conductance circuits, 6 micromho ranges, 4 AC Signal voltages, metered line voltage, metered grid voltage and other important features.

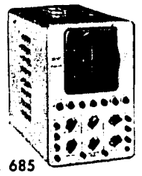
7 OSCILLOSCOPES MEET SPECIALIZED REQUIREMENTS



MODEL 770

LABORATORY CATHODE RAY OSCILLOSCOPE
Wide Range . . . Versatile

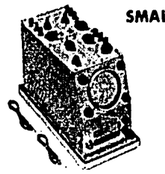
Model 770: Provides unusually wide range of DC to 5 MC. 10 M.V. RMS per inch sensitivity. Built-in calibrating voltages. New flat-faced tube. Illuminated calibrated screen. Mumetal shield. Shock mounted. This highly stable 'Scope is laboratory quality throughout.



MODEL 685

INDUSTRIALS' 5-INCH PORTABLE

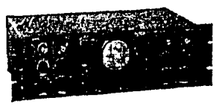
Model 685: DC amplifiers and DC to 750KC response. Sensitivity is 20 MV RMS per inch. Shock mounted amplifiers and good circuit design provide excellent stability for use in all phases of electronic work. The illuminated calibrated screen and ideal design features will please many an industrial who would expect to pay much more for this quality and completeness.



MODEL 385

SMALLER SIZE LABORATORY OSCILLOSCOPE
3-Inch Portable

Model 385: DC to 4 MC, within 3 db, 0.75 RMS volts per inch sensitivity. Sweep circuit oscillator; 3 cycles to 50 KC. Input impedance: vertical and horizontal amplifiers; 2.2 megohms—25 mmf. Features replaceable circuit sections. High quality throughout. Also available in portable, moisture-proof, weather-proof aluminum carrying case as preferred by field engineers.

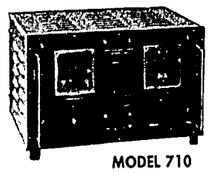


MODEL 387R

INDUSTRIAL LABORATORY OSCILLOSCOPE
3-Inch Rack Mount

Model 387R: Popular rack-mount style in an accurate 3-inch oscilloscope. Features identical vertical and horizontal amplifiers. DC to 500 KC response. 10 MV RMS sensitivity. Designed to permit versatile use in all phases of electronic work.

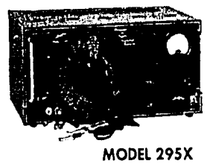
11 GENERATORS WITH SPECIALIZED FUNCTIONS



MODEL 710

SINE-SQUARE WAVE GENERATOR
For Laboratory & Industrial Use

Model 710: Provides an accurately calibrated source of sine wave and square wave functions over a wide frequency range. Sine wave total harmonic distortion below 1%. Hum level better than 90 db down. Square wave rise time less than .1 Microsecond. 20 cycles to 1 MC in five ranges on both sine and square waves.

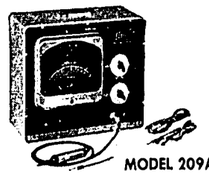


MODEL 295X

MICROVOLT SIGNAL GENERATOR
125 KC to 175 MC on Fundamentals

Model 295X: Ideal for mobile radio and other communication equipment design and maintenance. Output 0.1 microvolt to 100,000 microvolts. 125 KC to 175 MC continuous on fundamentals. 400 cycle modulation—approximately 30%. Attenuation down to 0.1 microvolt—no external attenuator pad required. Vernier Control permits hairline settings. Silverplated copper cage shielding. Test leads are furnished.

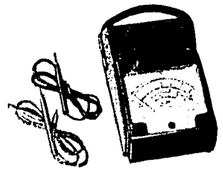
5 VTVM and VOM INSTRUMENTS



MODEL 209A

TRUE VACUUM TUBE
Laboratory Size and Accuracy

Model 209A: Contains large 9" meter with zero-center scale. Highly accurate for servicing industrial electronic equipment. DC Volts: 0-1200 in 6 ranges. AC Peak-to-Peak Voltage: 0-1200 V. in 6 ranges. Capacitance 0.1 to 10,000 MMF in 2 ranges, 0-1000 MF in 5 ranges. 50 MH to 100 henries. 0.1 ohm to 10,000 megohms in 7 ranges.



MODEL 455

NEW VOLT-OHM-MILLIAMMETER
You Can't Burn It Out!

Model 455: New design portable VOM. Includes all practical ranges. Features patented protection system which protects both the meter and associated circuits from damage due to accidental overload. Quality designed for utility and attractiveness. Neoprene carrying case available.

HIGHLY ACCURATE DC and AC PORTABLE INSTRUMENTS

MODEL 14

Ammeters, Milliammeters, Microammeters, Voltmeters, Millivoltmeters, Volt-Ammeters. Thermometers are contained in a phenolic case lined with heavy steel shell which shields from the effects of stray magnetic fields. Scale divisions are spaced equal distances apart. Accuracy within ½ of 1%. On special order, Model 14 can be supplied with a calibration chart to provide accuracy to 0.2%. Also available is a complete line of pocket portables.

METERS

The many special movements developed by HICKOK are: electrodynamometers, self-contained frequency meters, galvanometers, true logarithmic deflections, special curves for special purposes and ruggedized designs for highest shock tests. Full technical information on the complete line of HICKOK instruments and test equipment is available on request. Kindly list details of your requirements and ask for Catalogs No. 32 and 33.

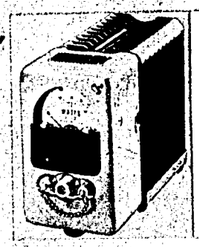
MODEL 611



Accurate

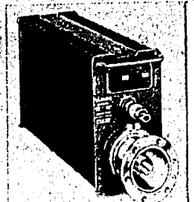
30-500 megacycles . . . ½ watt-5 KW . . . "load" type . . . portable . . . direct reading wattmeter . . . accuracy ±5% of full scale . . . non-radiating load for power measurement. For complete specification on all available models, write for Bulletins TW-600.

Model	Freq. Range	Max. Power	Power Range Scales	Input Connector
611	30-500 mc	60W	0-15; 0-60	Female N
612	30-500 mc	80W	0-20; 0-80	
67	30-500 mc	500W	0-25; 0-100; 0-500	Coplanar with adapter to UG-21/U; (optional) RG-17 & RG-19 cable assemblies; adapters to rigid lines
67C*	30-500 mc	2500W	0-100; 0-500; 0-2500	
824*	30-220 mc	5000W	0-5000	

*Water cooled (other available models described in specification sheets)

"Termaline" RF LOAD RESISTORS

MODEL 888



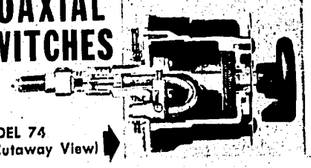
Reflection-Free

Designed to terminate 50 ohm coaxial line with minimum reflection . . . low VSWR . . . non-radiating . . . water cooled ratings 2500 W to 50 KW . . . air cooled ratings to 1500 W . . . ratings can be increased by forced air externally applied. For detailed specifications get Bulletins R-800.

Model	Max. Power	Freq. Range	Max.* VSWR	Connector
80	5W	0-1KMC	1.1	"N", "C", "BNC"
80A	20W	0-500MC	1.1	
81	50W	0-1KMC	1.1	N Female
81B	80W	0-1KMC	1.1	
82A	500W	0-1KMC	1.1	Coplanar with adapter to UG-21/U
883	1.2KW	0-1KMC	1.1	LC
888	1.5KW	0-1KMC	1.1	3⅛ Flanged

*Other VSWR requirements can usually be met by special selection.

COAXIAL SWITCHES



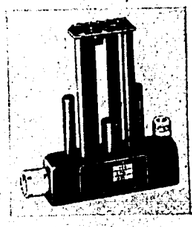
MODEL 74 (Cutaway View)

Dependable

Small compact design permits the "Coaxwitch" Selector to be incorporated into many electronic units where repeated channel switching is required. Finger-tip operation — pull knob, rotate and push in to make contact. Bulletin CS-6 contains full specifications.

Model	74	71B	72R	72-2
Positions	Six	Eight	Reversing Switch	Two
Coaxial Circuits	One	One	Two	Two
Connector	Type N female connectors are standard on all models to receive UG-21/U series plug. Use adapters with other cables and connectors.			

COAXIAL RF FILTERS



Rugged

High pass . . . low pass . . . band pass . . . band elimination . . . designs utilize both distributed and lumped constant . . . feature low insertion loss and high stop band attenuation . . . many designs available . . . "know-how" and physical facilities for quantity production . . . Get Bulletin CF-6.

	Low Pass	Low Pass	Low Pass	Low Pass	High Pass	Band Pass
Model*	5310	5311	522	819-1200	530	5131
Cut Off	90 mc	160 mc	400 mc	1200 mc	420 mc	45 mc & 105 mc
Stop Band	100-180 mc	180-320 mc	500-2000 mc	1900-4000 mc	100-390 mc	33.7-39.7 mc 120-1000 mc
Max. Power	100W	100W	150W	100W	50W	25W
VSWR in p.b.	1.5	1.5	1.35	2 to 1	2.5	1.6
Connectors	Female N		Male-Female N			Female BNC

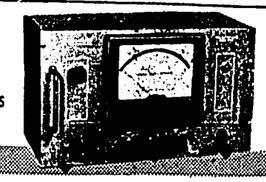
PHASE METERS, DELAY LINES COUNTERS by ADVANCE

PHASE MEASURING INSTRUMENTS

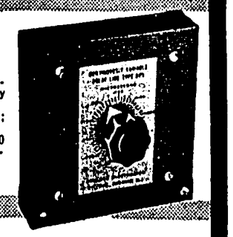
500 MC to .00001 CPS
Accuracy 0.1°



Type 405 Series: Type 405L, from 1 cps to 20 kc; Type 405, from 8 cps to 100 kc; Type 405H, from 8 cps to 500 kc.
Type 205 & 205A: From 100 kc to 15 mc.
Type 202: From 10 cps to 500 mc.

DELAY LINES—CONTINUOUSLY VARIABLE STEP VARIABLE AND FIXED

Continuously Variable Delay Lines: Resolution time less than ½ millimicrosecond. Type 50J Series—delay over 1 microsecond; Type 600 Series—delay over 100 microseconds; Type 800 Series—delay over 1000 microseconds.
Step Variable Delay Lines with equal input and output impedance available; total time delay over 25 microseconds, with bandwidth over 10 mc.
Fixed Delay Lines with time delay from fractional microsecond to over 1000 microseconds; impedance from 50 ohms up to several thousand ohms.
Special Delay Lines to meet JAN specifications.



COUNTERS

Decimal Counters with counting rate over one million counts per second. Time Interval Counters, Frequency Counters, Phase Angle Counters and Universal Counters; special counters for application in various industries.

FM-AM SIGNAL GENERATOR TYPE 202-E

RF VOLTAGE STANDARD TYPE 245-A

UNIVERTER TYPE 207-E

FILM GAUGE TYPE 255-A

Q METERS					
Type	Freq. Range	Q Range	Tuning Capacity Range	Q Accuracy	Price
260-A	50 kc to 50 mc	10 to 625	30-450 mmf	5% to 30 mc	$775.
190-A	20 mc to 260 mc	5 to 1200	7.5 to 100 mmf	7% to 100 mc	$760.

FM-AM SIGNAL GENERATORS						
Type	Freq. Range	Output Range	Modulation FM	Modulation AM	Application	Price
202-E	54-216 mc	0.1 to 200,000 μv	0-240 kc	0-50%	General	$1090.
202-F	175-250 mc	0.1 to 200,000 μv	0-240 kc	0-100%	Telemetering	$1075.

SWEEP SIGNAL GENERATOR						
Type	Freq. Range	Output Range	Modulation FM	Modulation AM	Markers	Price
240-A	4.5 to 120 mc	1.0 to 300,000 μv CW 1.0 to 100,000 μv	±1% to ±30% Center Freq.	30%	Crystal & Pip.	$1585.

OMNI-RANGE SIGNAL GENERATOR (Crystal Monitored)					
Type	Freq. Range	Output Range	Modulation	Application	Price
211-A	88-140 mc	0.1 to 200,000 μv	0-100% am	Omni-Range Rcvrs.	$1800.

GLIDE SLOPE SIGNAL GENERATOR					
Type	Freq. Range	Output Range	Modulation	Application	Price
232-A	329-335 mc	1.0 to 200,000 μv	0-100% am	Glide Slope Rcvrs.	$1700.

WIDE BAND IMPEDANCE MEASURING EQUIPMENT—RX Meter					
Type	Freq. Range	R Range	C Range	L Range	Price
250-A	0.5 to 250 mc	15 to 100,000 ohms	0-20 μμf	0.001 μh-100 mh	$1320.

RF VOLTAGE STANDARD					
Type	Freq. Range	Calibrated Out.	Output Impedance	Application	Price
245-A	0.1 to 1,000 mc	0.5,1.0,2.0 μv	50 ohms	Calibrates Signal Generators	$360.

UNIVERTERS						
Type	Freq. Range	Output Range	Modulation FM	Modulation AM	Accessory to	Price
207-E	0.1 to 55 mc	0.1 to 100,000 μv	0-240 kc	0-50%	202-Band202-C	$390.
207-F	0.1 to 55 mc	0.1 to 100,000 μv	0-240 kc	0-50%	202-D	$380.
203-B	0.1 to 25 mc	1.0 to 100,000 μv	1.5 to 30 mc	30%	240 A	$380.

FILM GAUGE			
Type	Measures	Thicknesses	Price
255-A	Non-magnetic Metals	0.000004" to 0.0002"	$450.

RX METER:
Wide Frequency Band RF Bridge

Q METERS:
Low, Medium, High and Very High Frequencies

UNIVERTERS:
Low, Medium and High Frequency Converters

SIGNAL GENERATORS:
Frequency and Amplitude Modulated for Aircraft Navigation, Mobile and TV Receivers, Precision broad band sweeps with markers

SIGNAL GENERATOR CALIBRATORS:
RF Voltage Standard in the low microvolt range over a wide frequency range

METAL FILM GAUGE:
Measures metal film and plating thicknesses

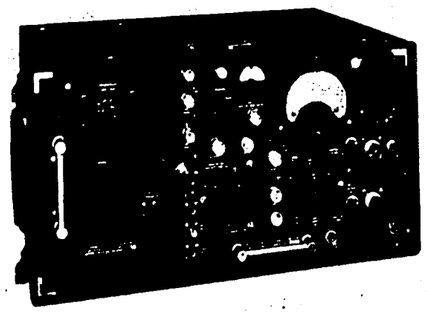
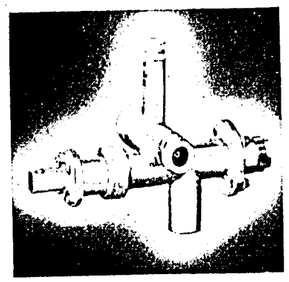
Empire's Reputation is built on Quality



NOISE AND FIELD INTENSITY METER, Model NF-105
(Commercial equivalent of AN/URM-7) 150 KC to 1000 MC

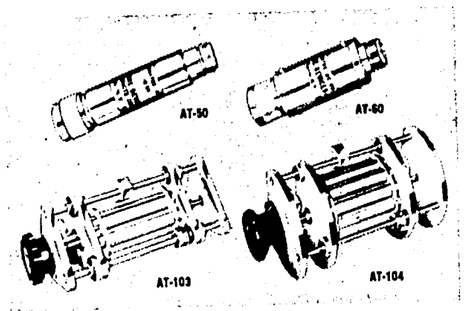
Four quick-change tuning heads • Single knob tuning for easy scanning Built-in impulse generator serves as calibrator • Carrier and peak reading VTVM • Aural slideback • Coaxial step attenuators • Regulated "A" and "B" supply.



COAXIAL CRYSTAL MIXER, Model CM-107

Broad Band, Fixed Tuned • 225 MC to 5600 MC in 8 models • Input and L.O. VSWR better than 2 to 1 • L.O. rejection at IF output better than 30 DB.

CRYSTAL DETECTOR, Model DT-123 also available.



UHF ATTENUATORS, Models AT-50, AT-60

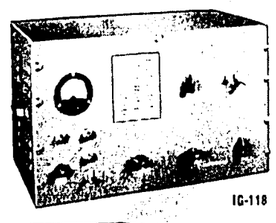
50 ohm resistive T-networks of concentric line construction.
FREQUENCY RANGE:
AT-50: DC to 4000 MC.
AT-60: DC to 3000 MC.
VSWR: Better than 1.2 at all frequencies.
ACCURACY: ±½ DB.
RATED POWER:
AT-50: 1W continuous, 1KW peak
AT-60: 2W continuous, 2KW peak

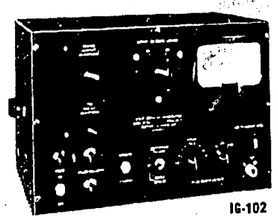
STEP ATTENUATORS, Models AT-103, AT-104

These units use AT-50 pads in 6 step and 12 step coaxial turret arrangements respectively.

COAXIAL TERMINATION, Model TE-80

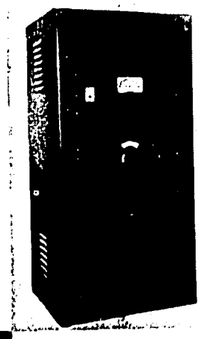
1 watt, DC to 4000 MC, also available





VARIABLE FREQUENCY POWER SUPPLY, Model VP-400

POWER OUTPUT: 500 watts
VOLTAGE REGULATION: 2%, no load to full load
HARMONIC DISTORTION: 5% maximum, total, (to 400W).



UHF IMPULSE GENERATORS, Models IG-102, IG-115, IG-118

Model	Flat Spectrum (±½ DB)	Peak Output Level	Repetition Rate
IG-102	10 KC to 1000 MC	70,000 μV/MC	2.5 to 2500 cycles
IG-115	10 KC to 1000 MC	100,000 μV/MC	60 cycles
IG-118	100 MC to 10,000 MC	9,000 μV/MC	2.5 to 2500 cycles

POWER DIVIDERS, Model PD-90

FREQUENCY RANGE: 800 to 10,000 MC in 5 models, also available.

For complete engineering data, please send for our new Catalog No. 356

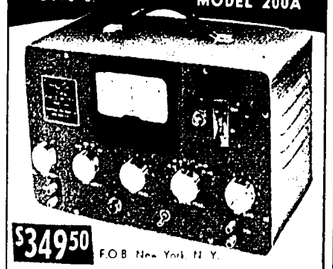
PHAZOR PHASE METER MODEL 200A
Pat. Pend.



$349.50 F.O.B. New York N.Y.

Measures phase shift in transformers, amplifiers, filters, and phase displacement networks.
- Measures from 0 to 360 degrees.
- Readings not affected by noise and harmonics.
- Phase shifts of the order of .01 degree can be measured employing special circuit techniques.
- Measures in-phase and quadrature components separately.

Manufacturers of PHASE METERS • NULL DETECTORS • IMPEDANCE COMPARATORS • POWER OSCILLATORS • VACUUM TUBE VOLTMETERS • FREQUENCY STANDARDS • AUTOMATIC HI-POT

FORTY-FIVE YEARS OF RADIO-ELECTRONIC HISTORY

are recorded in "Proceedings of the IRE." The photo above shows the issues from 1912 through 1947—ten years of rapid advances and earth-shaking accomplishments are not even included in this panorama of progress! Since publication of its first issue, "Proceedings of the IRE" has paced and pioneered in every field of radio from the first vacuum tube through today's giant computers and tiny transistors. The engineers who write, read and use this magazine have transformed the world in forty-five short years! Is it any wonder that so many advertisers believe these engineers must learn about their products in the fact-packed advertising pages of "Proceedings of the IRE"?

STODDART'S **5** self-contained Radio Interference Measuring Equipments, each designed for its specific frequency range, provide:
5 instruments, which can be used by—
5 engineers, to measure over—
5 different frequency ranges, at—
5 different locations, at—
1 time.

FEATURES:

- Each equipment performs Quasi-Peak, Peak, and Average (Field Intensity) measurement functions.
- Approved for use by all Departments of the U. S. Department of Defense.
- Commercial and military equipments are identical.
- Precision laboratory equipment with rugged all-weather design for field use.
- Immediate delivery from stock.

—Serving 33 countries in radio interference control—

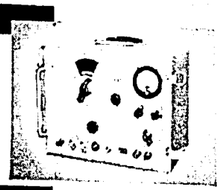
Tomorrow's Circuitry

SG-25 STANDARD SIGNAL GENERATOR

Equivalent to AN/URM-25D. For alignment of radio receivers, measurements of receiver sensitivity and selectivity, and in all radio frequency voltage measurement work.

- Frequency Range: 10 KC to 50 MC in 8 bands
- Calibrated Output: 0.1 to 100,000 microvolts into 50 ohms
- High Output: 2.0 volts, 500 ohms impedance

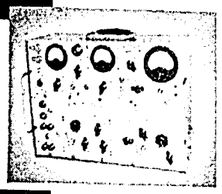
SG-26 STANDARD SIGNAL GENERATOR



Equivalent to AN/URM-26B. For alignment of radio receivers, measurements of receiver sensitivity and selectivity, and in all radio frequency voltage measurement work.

- Frequency Range: 4 to 405 MC in 6 bands
- Calibrated Output: 0.1 to 100,000 microvolts into 50 ohms
- Output Impedance: 50 ohms nominal

RT-500 RECEIVER-TRANSMITTER TESTER



Equivalent to AN/TRM-1. Laboratory-quality portable instrument, designed to measure performance on transmitting and receiving equipment.

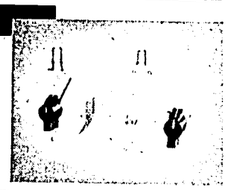
- Frequency Range: 190 KC to 400 MC
- Signal Generator Output: 2.5 to 100,000 microvolts into 50 ohms
- Transmitter Tester Power Range: 3 to 100 watts
- Volt/Milliwatt Meter: multi-range meter measures AC, DC volts and milliwatts

PO-400 PULSE OSCILLOSCOPE

Equivalent to AN/USM-38. Precision portable oscilloscope for analyzing amplitude and time characteristics of complex electrical waveforms.

- Transient Response: 0.06 microseconds (rise time)
- Square Wave Response: less than 5% drop at 50 cycles
- Deflection Sensitivity: 0.1V RMS per inch
- Sweep: 1 to 100,000 microseconds per inch, triggered or recurrent

AT-120 R. F. STEP ATTENUATOR



Designed for use in output systems of signal generators, precision microvolters, IF strips of microwave receivers, etc.

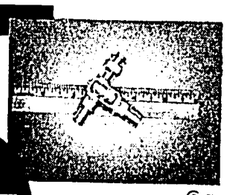
- Frequency Range: 0 to 1000 MC
- Attenuation Range: up to 120 db in ten steps
- Output Impedance: 50 ohms standard, 75 ohms optional
- VSWR: 1.1 up to 500 MC, 1.2 up to 1000 MC

CS-200 SERIES COAXIAL SWITCHES

For all types of coaxial switching.

- Positions: up to 12
- Nominal Impedance: 5 ohms
- VSWR: 1.2 up to 500 MC, 1.3 up to 1000 MC
- Cross-talk for 12 Position: greater than 75 db down at 1000 MC

CM-300 CRYSTAL DETECTOR MOUNT



For general purpose in RF monitoring 50 or 75 ohm coaxial systems. Can be used with Trad Attenuator AT-120.

- Frequency Range: 10 to 1000 MC
- Accuracy: ½ db
- Impedance: available in 50, 75, 100, 150 and 225 ohms
- Maximum Signal Output: 2.5 V RMS

Trad has a complete, diversified line of electronic products, some of which are listed here. All products are available for speedy delivery. Trad's national representative organization is now being expanded. Interested reps may write or call George Trad at Prospect 6-7445 for appointment.

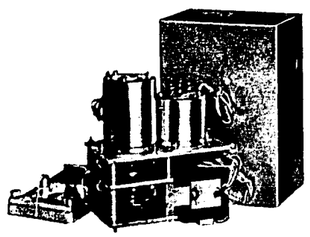
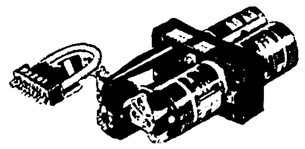
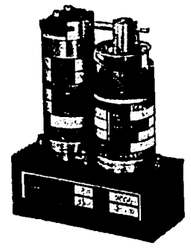
Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each major classification. Complete addresses will be found in the Alphabetical Directory.



An incremental synchro positioner before wiring to header and hermetic sealing. The synchro rotor is stepped in one or fifteen degree increments clockwise or counterclockwise depending upon which of four coils is momentarily energized by a d-c pulse. The synchro can be rotated any number of degrees or revolutions. Cylindrical member next to the synchro resets it to electrical zero if a pulse is applied to "reset" circuit.



Type 9 motor-driven induction generator driving two Type 11CT synchros through gear train having ratio of 1500:1. Slip clutch permits one control transformer to operate when second control transformer has shaft restrained by stops. Cams close two switches during specified degrees of synchro rotation.



SERVO ASSEMBLY—Type 9 motor-driven induction generator driving a Type 11 synchro through a gear train having a ratio of 12,000:1. Rear shaft of synchro carries contact arm which restricts shaft rotation against adjustable stops and closes switch during the specified arc.

control problems like yours

...with but one solution

Typical of all Transicoil solutions are the three illustrated here. They "do the job right" because each is designed for a single application... by a company whose major function is to provide complete servo assemblies precisely engineered and manufactured to solve individual servo control problems.

Of course, if you want servo *components*, you'll find Transicoil's control motors, motor-gear train combinations, motor-gear train-generator combinations, and servo amplifiers built to the highest order of precision and accuracy. But it is in the "package" engineering of unique assemblies that Transicoil's experience and creative imagination offer the greatest value. And in most cases, these assemblies cost no more than the individual components would purchased separately. *That's why it pays to check your servo control problems out with Transicoil first.* For further information, call your nearest Transicoil representative.

looking for miniaturization?

If you have a problem in miniaturization of a control system, chances are Transicoil can solve it for you. For just as Transicoil's introduction of plate-to-plate wiring eliminated the transformers once necessary in servo systems, the company is now marking new milestones in system miniaturization with its new Size 8 motors, motor-driven induction generators, and transistor amplifiers. This engineering ability can be put to work on your projects—with no obligation. You pay only for results—on a fixed fee basis for equipment delivered and performing properly. Transicoil is a manufacturer, not a research and development organization.

Precision Gearing

★ WORMS ★ RACKS
★ SPUR GEARS ★ SPIRAL GEARS
★ WORM GEARS ★ HELICAL GEARS

We specialize in the manufacturing of fine pitch gears of the types widely used in the electronics and instrumentation fields, cut to the close tolerances demanded by modern advanced engineering. We are equipped to produce these items either complete or on a "cutting only" basis, in pitches as fine as 200, from the minute sizes up to 8" dia. Meticulous testing procedures and equipment are used for precision quality control, and we will furnish Fellow's Red Liner Charts with finished gears on request, offering graphic proof of our accuracy.

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each major classification. Complete addresses will be found in the Alphabetical Directory.

MARCONI

F.M. TEST EQUIPMENT

For years Marconi's have been specialists in precision instrumentation for f.m. systems. If you've an f.m. measurement problem you'll probably find the test equipment you need in this selection from the Marconi range. If you don't find it, mail us your requirements.

F.M. RECEIVER TESTER Type TF 913/3.

A v.h.f. signal generator combined with an a.f. power meter. Carrier frequency range: 22 to 176 Mc. Output: 1 μV to 30 mV at 52 ohms. F.M. variable up to 25,50 or 100 kc. A.M. at fixed 30% depth. Electrical incremental tuning system. In-built crystal calibrator. Tubes: 6AK5, 6X5G.

CARRIER DEVIATION METER Type TF 791C.

Carrier frequency range: 4 to 540 Mc. Modulation frequency range: 50 cps to 35 kc. Four direct-reading deviation ranges of 5, 25, 75 and 125 kc full scale. In-built crystal-controlled deviation standard for high measurement accuracy. Tubes: 6AK5, 6C4, 6CD6G, 5718, 6AL5, OB2, 5Z4G.

CARRIER DEVIATION METER Type TF 934/2.

A rugged pan-climatic instrument. Carrier frequency range: 2.5 to 500 Mc. Modulation frequency range: 50 cps to 15 kc. In-built crystal-controlled deviation standard for high measurement accuracy. Tubes: 6AK5, 6C4, 6AL5, 6X5G, OB2.

F.M./A.M. SIGNAL GENERATOR Type TF 1066/1.

Carrier frequency range: 10 to 470 Mc—all on fundamentals. Stability better than 0.0025% per 10-minute period. Output: 0.2 μV to 200 mV at 50 ohms. Internal modulation at 1 and 5 kc. F.M. variable up to 100 kc deviation. A.M. variable to at least 40% depth. Incremental frequency controls: variable, 0 to ±100 kc; stepped, ±5, 10 and 15 kc. Tubes: 5Z4G, 6AK6, 6CD6G, 6AK5, 5861, 6C4, 6L6G, 12AX7, OB2, 85A2.

R.F. POWER METER Type TF 1152/1.

Measures true mean power from d.c. to 500 Mc. Power ranges: 10 and 25 watts full scale. Accuracy ±5% of full scale up to 250 Mc; ±10% up to 500 Mc. Input impedance: 50 ohms. Thermal element; no tubes or crystals.

SIGNAL GENERATOR Type TF 1064 and TRANSMITTER AND RECEIVER OUTPUT TEST SET Type TF 1065.

Self-contained portable instruments for field testing mobile transreceive sets. Signal Generator TF 1064 provides r.f. outputs—f.m. or a.m.—in the ranges 68 to 174 and 450 to 470 Mc, i.f. crystal outputs at five spot frequencies, and also an a.f. output. Test Set TF 1065 comprises an r.f. power meter and deviation indicator for use up to 500 Mc, a dual-impedance a.f. power meter, and a multi-range voltammeter. Tubes: TF 1064—3A5, 6J6, 12AU7, OD3; TF 1065—crystal diodes and transistors, no tubes.

Classifications with a System!

THE IRE Directory Product Classifications have both a pattern and a purpose. They differ widely from most product indexes, deliberately. They aim to organize the hundreds of products and services of a complex technical industry according to the way engineers think. To this end, the product grouping follows the pattern of the IRE Professional Groups, broadly. The result is a division of all products and services into four fundamental indexes into which 100 basic classifications have been organized.

For detailed identification, these 100 products and services, grouped in the 4 indexes, are further defined into 769 named products. We have tried to avoid oversimplification, and a tremendous amount of information is given by our product number system. But, the basic indexing adds speed. Purely alphabetical directories are as slow and cumbersome as a telephone book. IRE engineers have liked our system better!

You will note that we here differ from most directory compilers, for we do not mix meters with motors simply for alphabetical reasons. Products used in "Communications" whether components or complete apparatus form the first fundamental group. Yet, the same manufacturer and product may also appear in the "Component Parts" section. This system gives subject grouping for speed and convenience. A directory should aid a man who has forgotten some detail, or product name. Ours helps by grouping products as one would *think*.

For safety, an alphabetical "terminology" index is given, preceding the product system in the pink pages introducing the company index. You will note also that after each firm, its products are listed by number code in the alphabetical list, and that sub-classifications shown by number code in the product indexes give much detail. Just a little study of the system will help you get great good from this book.

The IRE DIRECTORY is four directories in one

1958 IRE DIRECTORY
DIRECTORY IV MATERIALS & SERVICES

18 major groups
165 products

The products and services of the radio-electronics industry have been organized into four basic directories:

I. Communications
II. Components
III. Controls & Instruments
IV. Materials & Services

Within these four basic directories, 100 major product and service groups are numbered consecutively throughout. Under each of these 100 classes a further breakdown is given, showing in detail by a system of code numbers after each firm listed what specific products within the class are manufactured by that firm.

For a terminology cross-index listing the 769 sub-products in alphabetical order, consult the eight-page pink section preceding page 1.

The first few times you use this EDGE INDEX

follow the "How to use" instructions slowly—one step at a time. After that you will be able to open easily and almost instantly to the section that you seek.

Machol edge indexes covering the alphabetical section and each of the four major directory groups will be found on pages 1, 151, 255, 287, 459, 521.

HOW TO USE

1. Bend the Directory almost double with the front cover page on the inside.
2. Hold in your right hand with your four fingers near to the bound edge and your right thumb near the middle of the open side of this page.
3. From the heavy or light line symbol adjacent to the subject you seek, run your eyes across the page edges until you reach the horizontally corresponding symbol.
4. OPEN THERE!

LICENSE NO. 25
MACHOL EDGE INDEX PATENT #2680630

For complete list of products and services, arranged alphabetically for fast reference, see the eight-page pink section preceding page 1.

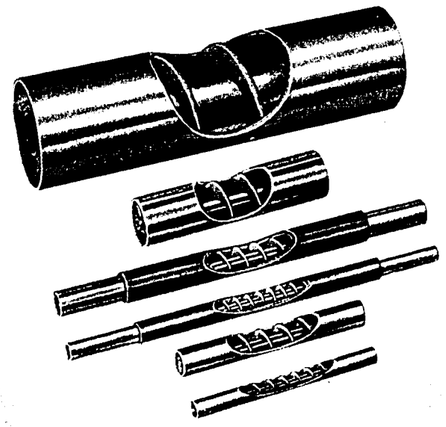
NEW **AMPLI-VISION-TELCON HELICAL MEMBRANE CABLES**

FOR EVERY HIGH FREQUENCY APPLICATION



Combining low attenuation with minimum VSWR, Ampli-Vision Telcon Helical Membrane Cables have perfect characteristics for RF use . . . uniform frequency response . . . low temperature coefficient for all electrical characteristics . . . low noise level . . . high signal handling capacity . . . utmost flexibility permitting ease of installation . . . perfectly matched fittings and terminations . . . ALL THIS AT LOW COMPETITIVE PRICES.

Ampli-Vision-Telcon HM series cables consist of an inner copper conductor separated from an aluminum outer sheath by a helical polyethylene membrane. This cable is furnished either with a bare aluminum sheath or a vinyl protective sheath extruded over the aluminum.

CHARACTERISTICS OF AMPLI-VISION-TELCON HM CABLES							
Cable Code	AV6	AV4	AV7	AV8	AV9	AV11	AV10
Characteristic Impedance (Ohms)	75	75	75	50	50	50	50
Nominal Diameter	½"	¾"	1½"	½"	¾"	1½"	3⅛"
Attenuation (db/100 ft.) 1 Mc/s 1000 Mc/s	0.073 2.7	0.048 1.8	0.024 1.05	0.083 2.9	0.054 2.0	0.026 1.15	0.0115 0.67
Power Rating (Kw) 1 Mc/s 1000 Mc/s	12 0.33	21 0.57	59 1.35	13 0.37	24 0.66	66 1.5	230 4.3
Max. R.F. Voltage Kv.	1.3	2.2	4.5	1.3	3.0	5.5	12
Weight Lbs./1000 ft.:	96	233	575	150	240	630	2360

A complete line of other types of coaxial cables is also available from Ampli-Vision. For complete information write to Dept. K.

LEWIS WIRE PRODUCTS

HIGH TEMPERATURE CABLE...

Suitable for operating temperatures up to 650° with nickel-clad copper conductor and laminated insulation having superior dielectric strength and moisture resistance. In AWG sizes 22 thru 4/0. In accordance with MIL-C-25038.

ELECTRONIC HOOKUP WIRE...

Teflon insulated silver coated copper conductor with insulation in standard colors in accordance with MIL-C-16878.

EXTRA FLEXIBLE CABLE...

High Temperature and Moisture Resistant Electrical Cable. Lewis "EXFLEX" Cable, single and multi-conductor, superior for circuits on hinged or pivoted parts. Resistant to abrasion and temperaures to 500°F.

HEATING CABLE...

with nickel-chrome conductor and laminated insulation for operation at 500°F. extensively used by central stations to maintain proper temperatures in pipe lines exposed to wide variations in ambient temperature.

GLASS & ASBESTOS INSULATED HEATING CABLE...

with stainless steel braided shield for special high temperature applications, used by atomic energy facilities.

CUSTOM CONSTRUCTED CONTROL CABLES AND THERMOCOUPLE-WIRE CABLES...

with segregated circuits individually shielded, and with over-all shielding or with special shielding and jacketing.

FIRE-RESISTANT AND HIGH TEMPERATURE RESISTANT CABLE...

for circuits required to operate in 2000°F. flame for fifteen minutes. Excellent for fire-detector circuits and for use in temperatures up to 600°F.

THERMOCOUPLE WIRE AND EXTENSION WIRE...

in iron-constantan, copper-constantan and chromel-alumel to MIL specifications or in custom constructions. Twisted and shielded, cabled, shielded and jacketed. Multi-pair cables, shield and jacketed for missile applications.

RESISTANCE ELEMENT AND UNITS...

Core-wound flexible heating element and units for low wattage appliances as heating-pads, sealers, curling-irons, toys, wire marking machines, etc. Insulations of asbestos or glass or in combinations of both.

By utilizing and combining the various qualities of fire, heat, abrasion and moisture resistance of asbestos, glass, silicones and Teflon*, we have developed many special wires and cables for avionic and electronic applications. We invite inquiries for cables and wire constructed to customers' specifications for special applications.

sequoia wires and cables
A WIDE RANGE OF HIGH QUALITY CONSTRUCTIONS

INSULATIONS

Polyvinyl Chloride compounds o o o for 60°, 80°, and 105° C applications
Polyethylene o o o for low loss, high frequency cables
Teflon o o o extruded type, high temperature constructions
Nylon Jackets o o o for chemical and abrasion resistance

HYRAD o o o
A new development by Sequoia with unusual properties for continuous high temperature applications

CONDUCTORS

Tinned copper, stranded or solid.

ELECTRONIC HOOK-UP WIRES

MIL-W-16878B
With Vinyl insulation
Type B for 600-v application
Type C for 1000-v application
Type D for 3000-v application

With extruded Teflon insulation
Type E for 600-v application
Type EE for 1000-v application

MIL-W-76A
With Vinyl insulation
Type LW for 300-v application
Type MW for 600-v application
Type HW for 600-v and 2400-v application

Also MIL-W-5086, MIL-W-7078, NAS-702

COLOR CODING

Up to 3 spiral stripes, using 10 standard NEMA colors

SHIELDED CONSTRUCTIONS

Tinned-copper braiding in accordance with military requirements and to fit specialized needs.

TELEPHONE CABLES

Aerial duct and inside constructions in accordance with standard R.E.A. and Western Electric specifications. Full color code and longitudinal shielding available.

SPECIALTY CABLES

Single- or multi-conductor cable constructions with any combination of wire type, shielding and jacketing tailored to meet specific customer requirements.

TEFLON*

Extruded Type — 600-v and 1000-v, types E and EE of MIL-W-16878B
Color coded constructions available
For high temperature (200° C) and low-loss applications
Extreme chemical resistance

HYRAD

Hyrad insulation is a new development by Sequoia Process Corporation.
A modified polyethylene (irradiated) to provide increased resistance to high temperatures and chemical attack. Retains the high-voltage, low-loss characteristics of conventional polyethylene.
Features absence from cold- and hot-flow; does not shrink during soldering; non-toxic; and is rated for continuous operation at 135° C, 20-hour cumulative service at 200° C. Color coded, solid or cellular types available in miniature and standard coaxial cables, special cables, and sleeving or tubing.

For Unequalled Quality and Performance of the highest standard

Specify REX

ELECTRONIC & COMMUNICATION PRODUCTS

WIRES & CABLES

MILITARY SPECIFICATION WIRES

JAN-C-76 — Types WL-SRIR, SRHV-SRRF
MIL-W-76A — Types LW-FX-MW-HF-HW
MIL-W-16878B — Types B-C-D-N
MIL-C-915 — Types SRI-MRI

Above constructions include P.V.C. Nylon or Polyethylene insulation, with or without Nylon Jacket. Also, shielded construction with P.V.C. or Nylon Jacket. Insulated in solid colors or stripes.

MISCELLANEOUS WIRES AND CABLES

Complete facilities for design and manufacture to customers specifications.

HIGH TEMPERATURE WIRES

Rex-KF® — MIL-W-12349. Insulated with Polytrifluoromonochloroethylene for 1000 volt service at operating temperatures from —65°C to +175°C. 17 solid colors and 10 striping colors in 1, 2, or 3 stripes.

Teflon Insulated Wires — MIL-W-16878 — Types E — EE

For 600 and 1000 volt service at operating temperatures from —65°C to +200°C. 10 solid colors and 10 striping colors in 1, 2 or 3 stripes.

COAXIAL CABLES

To MIL-C-17B and Commercial Specifications

MICROWALL WIRES AND CABLES

Type JR — 300 volt service
Type FJR — 1000 volt service
Both have exceptionally small OD and operate at temperatures from —50°C to +125°C. Has solid polyamide insulation — highly resistant to abrasion.

UNDERWRITER'S APPROVED WIRE

Types TF-TFF-AWM. 80° to 105°C.

TELEPHONE WIRES AND CABLES

All plastic types. Exchange area (aerial, duct and direct burial), One pair distribution wire ("C" Rural), Rural Distribution Wire (all R.E.A. listed), Urban Distribution Wire, Inside Wiring Cable.

UHF INSULATION

REXOLITE #1422

Rigid, thermosetting cast plastic offering exceptional electrical properties at ultra-high frequencies. Can be machined to extremely close tolerances. Available in rod or sheet form.

REXOLITE #2200

Offers virtually the same high electrical properties as Rexolite #1422 plus exceptionally high impact strength. Can be hot or cold punched for low cost fabrication. Available in sheet form only.

COPPER CLAD REXOLITE

An outstanding addition to the field of printed circuits. Combines the fine electrical properties of Rexolite #2200 with good chemical resistance and punchability. Available in sheets with copper on one or both sides.

ELECTRICAL TUBING

REXTRUDE #105

A polyvinyl plastic tubing with exceptional insulating characteristics at high operating temperatures. Underwriters Laboratories approved and rated for —30°C to +105°C.

REXTRUDE #1000

Vinyl plastic tubing to Military Specification MIL-I-631. Offers exceptional resistance to tear and abrasion. Has excellent elasticity permitting stretch over lugs and splices.

During the past seven years, the radio-electronic industry's spectacular growth has been paced by the increase of advertising pages in the annual IRE DIRECTORY.

In the 1949 edition, 158 advertisers took 133 pages. In the 1958 IRE DIRECTORY, the number of advertisers mushroomed to 555 and advertising pages numbered 414—an increase of 312% over the '49 edition.

The IRE DIRECTORY sells year 'round by serving over 50,000 IRE members who daily are developing and perfecting remarkable new devices. To sell ahead, put your product story before radio-electronic engineers who are planning ahead . . . in the 1959 IRE DIRECTORY.

Engineers are educated to specify and buy.

IRE DIRECTORY

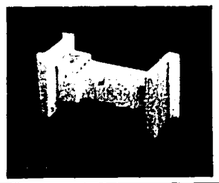
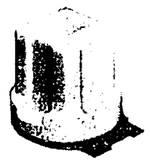
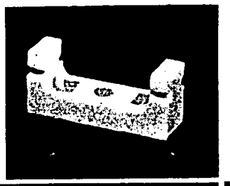
Goodness! Such growth!

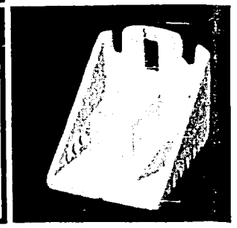
Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each major classification. Complete addresses will be found in the Alphabetical Directory.

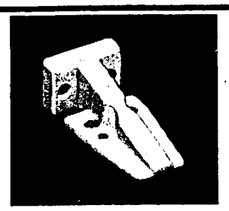


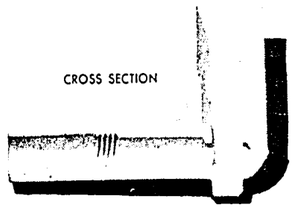




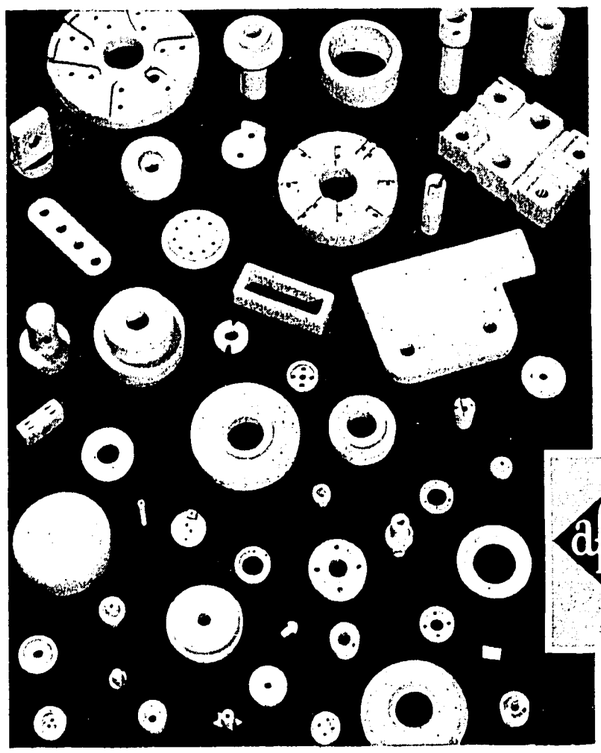
For exacting applications...
precision parts to your specifications
of HYPALOX... high purity aluminum oxide.







Hypalox alumina ceramics
up to 99% purity



hardness of sapphire...

high mechanical strength...
compressive, tensile and flexural strengths, resistance to impact, vibration, and thermal shock.

low electric losses...
at extreme temperatures and frequencies.

chemical inertness...

All are characteristic of the high purity of **HYPALOX.**

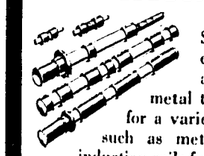
Stupakoff

Metallized

CERAMICS



Stupakoff specializes in the application of metal to ceramic parts for a variety of purposes, such as metallized ceramic induction coils for radio receivers and transmitters; metallized ceramic shafts for air-tuning condensers; metallized plates for fixed rigid assemblies; printed circuits; ceramic trimmer condensers; terminals and terminal boards; strain and lead-in insulators; and many other ceramic-to-metal products.

Stupakoff high-precision ceramic assemblies offer many opportunities to reduce costs, increase production and improve electrical and electronic equipment. Further details will gladly be sent upon request.

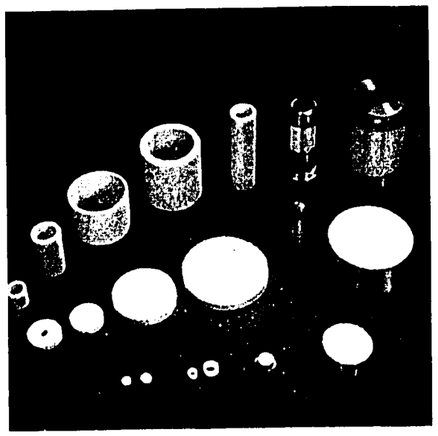
How Raytheon R-95 High-Alumina Ceramic can save you money—do a better job



For details, circle #507 on Reader Service Card.

Consider well the unusual properties present in Raytheon R-95 High-Alumina Ceramic. If your needs are for a less specialized material, you may find a satisfactory performer at lower cost.

However, when you require a material with remarkably *high resistance to high temperature, shock and vibration; high dielectric strength* and *high electrical resistance at all temperatures; extreme hardness; high mechanical strength* and *positive sealing capability*—then you will surely want to be familiar with the ratings of Raytheon's R-95. Proper application of this superior material assures continuing design and assembly economy, particularly where ceramic seals are a factor.

Ceramic parts manufactured from Raytheon R-95 High Alumina are available, either alone or as hermetic ceramic-to-metal assemblies, in accordance with your specifications. The assemblies can be soft or hard soldered into your production in your own plant.

Send sketches or drawings outlining dimensions and tolerances, together with operational conditions. We will be pleased to supply information and help on any of your ceramic needs.

Write for complete specification sheet and your copy of *Ceramics in Electronic Design*, comprehensive questions and answers on the growing role of ceramics in modern design. No cost or obligation, of course.

Consultants in Electronics

We specialize in electronic problems of manufacturers of mechanical and electro-mechanical equipment, and in industrial process control and instrumentation for manufacturers of a wide variety of commodities and equipment. Our experience qualifies us to work with or for you on:

Systems Analysis
Circuit Development & Optimization
Engineering Design & Development of:
Production Test Equipment
Industrial Process Controls
Custom Electronic Equipment
Feasibility Studies
Subminiaturization & Packaging
Etched Circuits
Short Production Runs
Technical Writing

We would be pleased to discuss your electronic problems with you.

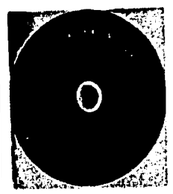
"Duplican" The new Photo Contact process for dials, panels, nameplates and special markings.



"DUPLICAN" is used to mark any curved, convex, concave, irregular or flat surfaces.

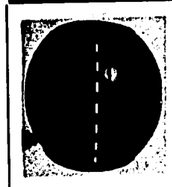
"DUPLICAN" is synonymous with precision and accuracy of duplication in marking.

"DUPLICAN" can be used to mark any material—plastic, glass, metal, brass, steel or aluminum.

"DUPLICAN" can be used with any finish whether enamel, synthetic, baking or air dry, lacquers, vinyl paints, fluorescent or phosphorescent materials and in accordance with all government specifications where required.

CRU ROLLER SCREENING

a new approach to marking of counter wheels, drums and spheres.



ROLLER SCREENING A product of CRU engineering development. For accurate and close tolerance marking of counter wheels, drums, spheres, dials and scales.

CRU ROLLER SCREENING brings the economy of "silk screening" to the marking of circular or spheroid shapes.

Luminous Application on Dials, Panels, Nameplates, etc. To all Government Specifications
Engineering and Research Facilities Available.

Electro-Sealing Service—

Provides the design, enclosure, base, brackets and terminals.

Assembles, wires and seals your component in an atmosphere of dry, inert gas.

Evacuates enclosure by high-vacuum system and thoroughly tests for leaks by means of mass spectrometer.

In addition to volume production, provides small quantities for engineering samples or for limited production schedules.

Invites you to send complete engineering information and samples of parts to be hermetically sealed.

Electro-Seal Corporation
946 North Avenue, Des Plaines, Illinois

ELECTRO-SEAL CORPORATION

For details, circle #528 on Reader Service Card.

Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each major classification. Complete addresses will be found in the Alphabetical Directory.

IT'S **GHS** FOR:

A NEW ADVANCE IN HERMETIC SEALS

GASEAL®

Pressurized Metal Hermetic Seals For:

- "Field" installation without special tools
- 1000°F. temperatures
- High pressures, high altitudes
- Any seal form, configuration

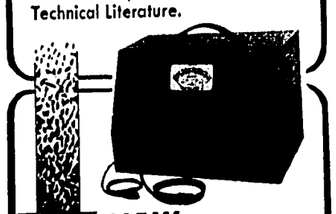
Write For Technical Bulletin

ADVANCED HERMETIC SEALING

of Your Components for uniform performance, complete protection against:

- Corrosion
- Oxidation
- Dust, fungus
- Humidity
- High altitudes
- Explosive atmospheres

GHS-developed techniques include inert gas filling, 100% mass spectrometer leak testing of *all* assemblies to surpass military, commercial specs for critical services. Developmental and production. Write For Technical Literature.



NEW MEGPOTS®

For Rapid Testing of your Components, Insulation—

- 10 million megohms, 100, 200 or 500v DC with automatic "charge" and safety controls.
- Non-destructive, 3000v AC high-potential test-set for materials and components with automatic shut-off, current limiting.
- Portable, for many, in-plant and field uses.

Write for "Megpot" Bulletin of available models.

ALSO: Get information on rotary seals, glass-metal seals, hermetically-sealed toggle switches.

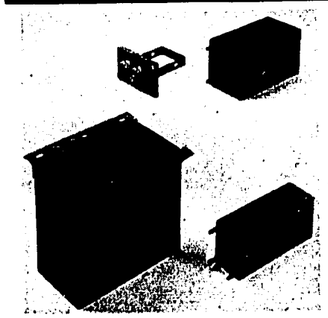
CUSTOM-BUILT • SHEET METAL CASES AND COVERS



Our services include the following:

Piercing and Steel Stamping of Terminal Holes
Bracket Fabrication and Assembly
Insert and Stud Assembly
Bottom Cover Assembly
Terminal Assembly
Special Cases
Special Sample Service
Terminal Board Fabrication and Assembly
Machining of Plastic Components

We offer you the SERVICE, QUALITY and the CLOSE TOLERANCE you require.

Order the exact case you need. We will custom-build your order to your precise instructions. It is not necessary to adapt your designs to fit the specifications of standard cases.

If you have a rush job, we are able to put on an emergency crew which will quickly produce your order. Deadlines are met. Deliveries are always made on time.

Your inquiry is invited—and it will receive prompt and courteous attention.

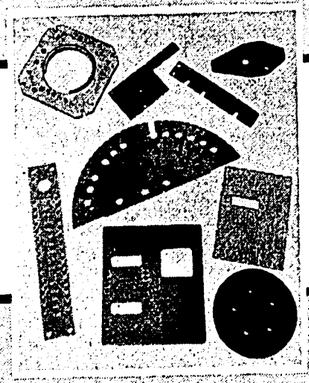
Custom FABRICATED PARTS

From Laminated Resinous Plastics in Sheets, Rods and Tubes — MACHINING and PUNCHING GRADES:

Glass Silicone
Nylon
Epoxy Glass
—
Fibre



Glass Melamine
Paper Base
Cloth Base
—
Fish Paper

Our fabricating is done in our well equipped Fabricating Department, with standard and special machines, and with the most modern, efficient methods. This department is staffed by men with the long experience and the "know-how" to produce fabricated parts that exactly meet your needs. We are equipped to help in the design and development of your specific requirements.

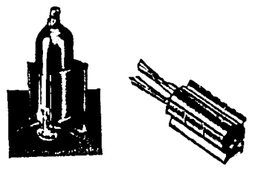
Code numbers shown after each firm refer to product or service sub-classes listed at the beginning of each major classification. Complete addresses will be found in the Alphabetical Directory.

ATLAS E-E CORPORATION

puts the accent on sub-miniaturization with this wider line of precision manufactured products . . .

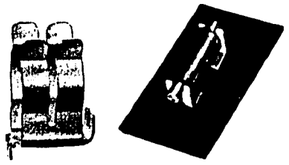
Vibration and Shock Clips

An even greater line of miniature and sub-miniature component holders and locking clips to provide positive holding under extreme conditions of shock and vibration. Send for bulletins 1 and 7.



Subminiature Tube Holders

Afford rigid mounting under heavy shock and vibration, rapid heat dissipation, flexible conformity to tube envelope. Bulletin 8. Vertical holders for printed circuitry and other limited-space mountings. Oval tube holders for oval shaped tubes and other oval cross-section components. Bulletin 8a.



Transistor and Diode Clips

For secure holding of transistors and diodes of all types and sizes under extreme conditions of heat, vibration and shock.

Diode Clips — Bulletin 9.
Transistor Clips & Heat Sinks—Bulletin 10.

Tab-mounted Clips

Designed for automatic assembly and Printed Board use. Tabs are spaced for 0.1" grids. Provide adequate holding of components against shock and vibration. Bulletin 33.

SO SAFE
they can't damage a cigarette ...let alone a wire or cable!
ARROW Staple Guns
Faster! Cheaper! Hold Better!
No short circuits possible! The driving blade automatically stops short, so staples can't damage wire covering.
T-75 For non-metallic sheathed cable up to ½" in diameter. Uses ⅜", ½", ⅝" tack-pointed staples. List: $15
T-25 For any wire up to ¼" in diameter (telephone, bell, thermostat, hi-fi, radiant heat, inter-com wires, etc.) Uses ⅜", ½", ⅝" round top staples. List: $15
T-25B for burglar alarm wiring, drives staples flush. List: $15

Looking for reliability?

Where there must be no slipups, there will be no slipups, if you depend on CTC.

These components are guaranteed unconditionally in quantities from one to millions.

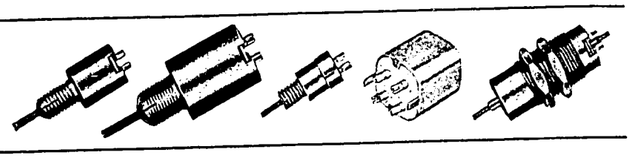
For samples, prices, write CAMBRIDGE THERMIONIC CORPORATION, 440 Concord Ave., Cambridge 38, Mass. West Coast stocks maintained by E. V. Roberts & Associates, 5068 West Washington Blvd., Los Angeles 16 and 988 Market St., San Francisco, California.

CTC

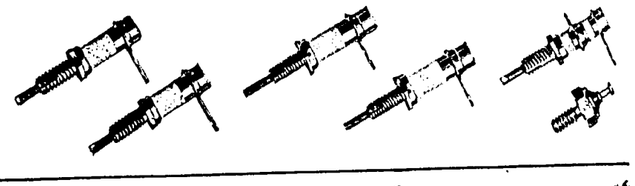
CAMBRIDGE THERMIONIC CORPORATION

makers of guaranteed electronic components custom or standard

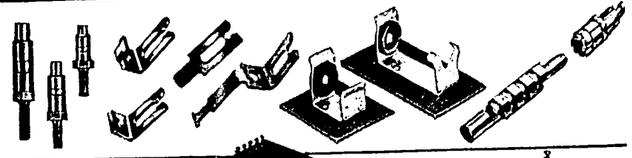
CTC QUALITY SHIELDED COIL FORMS
Miniaturized. Highly shock resistant. Mechanically enclosed, completely shielded for maximum reliability.



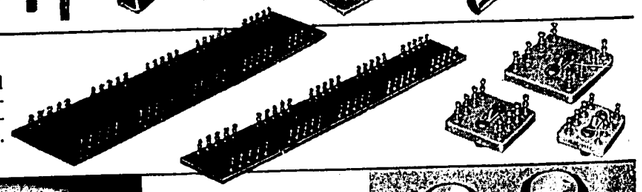
CTC QUALITY CAPACITORS
Miniaturized Variable Ceramic Capacitors that outperform much bigger capacitors. (*Extreme right*): Stand-Off Capacitors with ceramic dielectric. Rugged R-F by-pass capacitors for high quality equipment. Shock-, vibration-, humidity-resistant.



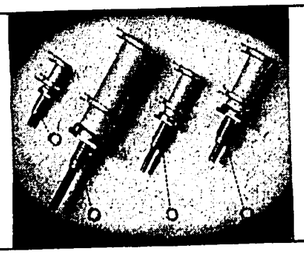
CTC QUALITY DIODE CLIPS
Seven different types, including spring-loaded units primarily for holding fragile diode pigtail leads from .005" to .085" in diameter. CTC also offers lines of quality battery clips and miniature plugs and jacks.



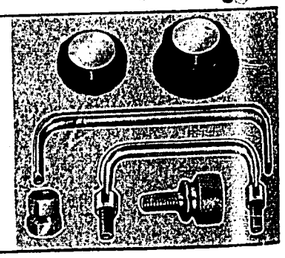
CTC QUALITY TERMINAL BOARDS
Custom-made, standard all-sets, standard ceramics. Variety of materials available — paper, cloth, nylon, glass laminates — phenolic, melamine, epoxy, silicone resins. Moisture — and fungus-proofed.



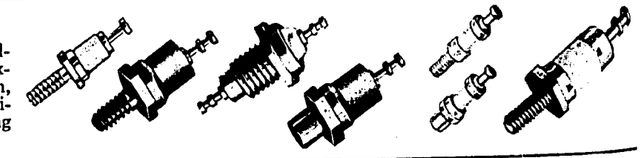
CTC QUALITY PERMA-TORQ COIL FORMS
Constant-tensioning devices for tuning cores of standard CTC ceramic coil forms. Keeps coils tuned as set despite shock, vibration.



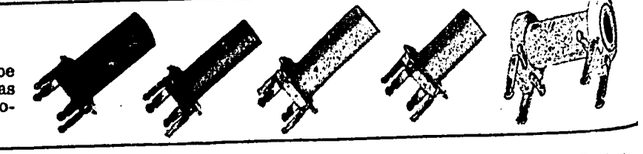
CTC QUALITY KNOBS AND PANEL HARDWARE
Selected materials, carefully processed and finished. Metal parts polished before plating. Hard-wearing surfaces, lasting lusters.



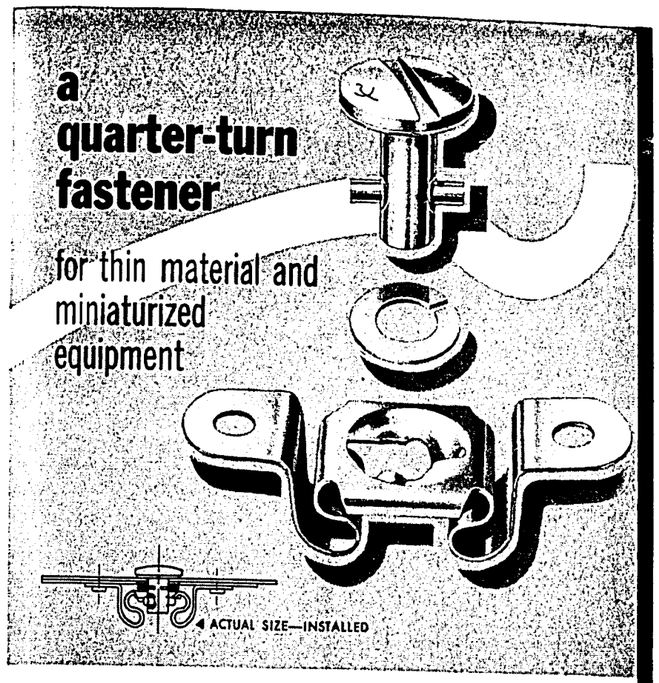
CTC QUALITY INSULATED TERMINALS
Wide variety of stand-off and feed-through models in Teflon and ceramic. Extremely resistant to shock, vibration, moisture and temperature. Solder terminals hold even after prolonged soldering operations.



CTC QUALITY PRINTED CIRCUIT COIL FORMS
Phenolic and ceramic types. Can be soldered after mounting. Available as forms alone or wound as specified. Two- to six-terminal models.



For details, circle #539 on Reader Service Card.



CAMLOC *low cost/light weight*

5F series

Camloc's new small, lightweight 5F Series features high strength-weight ratio plus the quick-operating advantages of a ¼-turn fastener... in a size and weight that offers new design possibilities to original equipment manufacturers! Particularly adaptable to thin materials and miniaturized equipment like airborne electronics, small electro-mechanical and computing devices and communications components. Ideal for attaching lightweight components in "packaged" equipment or for holding access panels on everything from washing machines to radar units.

Offered in many different head styles. Complete specifications will be sent to you on request.

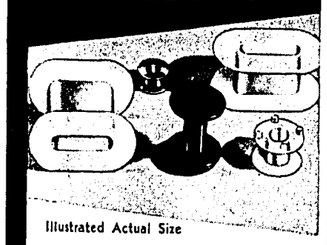
GRC small NYLON COIL BOBBINS



Illustrated Actual Size

MADE-TO-ORDER PRECISION AT MASS-PRODUCTION PRICES!

GRC Nylon Bobbins cost less, made to your exact specifications in one fast, cost-saving, automatic operation! Gries' unique special molding techniques assure close tolerances and uniform quality. LOW MOLD COSTS! Also available from stock.

Send specifications for prompt quotations on production runs of 25,000 to millions. Specification sheets on request.

MAXIMUM SIZE weight: .03 oz. length: 1¼"

NO MINIMUM SIZE!

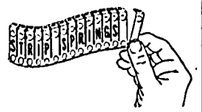
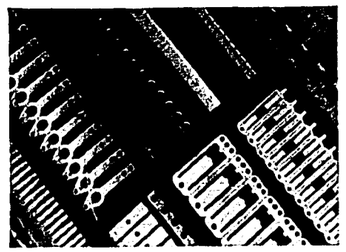
I-S SPRINGS of beryllium copper *can help you*

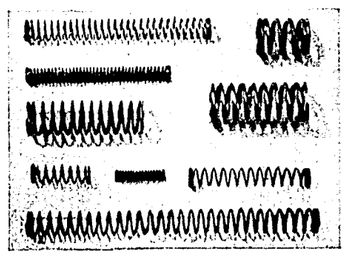
IMPROVE YOUR PRODUCT'S QUALITY, REDUCE YOUR COST, INCREASE YOUR PRODUCTION

Instrument Specialties Company specializes in the design and custom manufacture of age-hardened alloy springs. With our specially developed processes and machines, our engineers are able to realize the fullest performance potential from the superior spring materials around which I-S service to designers and manufacturers has been developed.



FOR HIGH PRODUCTION





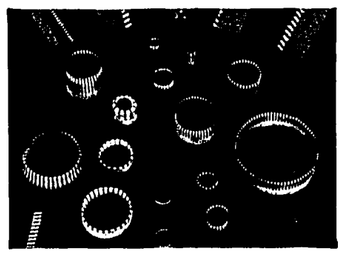
STRIP SPRINGS

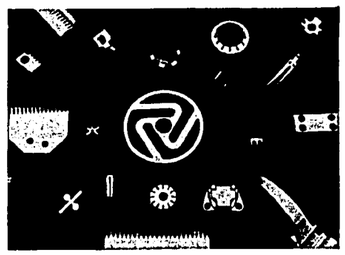
Fabricated from beryllium copper.
Easily handled, readily broken apart by hand or used in automatic or semi-automatic assembling devices and contact riveting machines.
Individual pieces may be broken off without trace of burr.
Eliminate sorting, untangling and handling of loose pieces.
Springs may be produced in strips to various shapes; formed angles may be held within plus or minus one degree.
Heat treated in multiple fixtures to insure uniformity, close tolerances and elimination of variations in spring-back.

COIL SPRINGS

Made from laboratory tested beryllium copper wire.
Special coiling and heat treating equipment insures 100% uniformity.
Guaranteed rigid tolerances held on diameter and load tests at specified deflection.
These factors combine to assure increased service life through higher endurance strength – make products perform more consistently by eliminating drift, set or fatigue. Furthermore, they eliminate expensive hand adjustment and reduce inspection costs of finished product.

FOR LOW ACTIVITY





HIGH FREQUENCY SPECIALTIES

We are equipped to supply standard mating parts for use with 2C-39, 2C-40, 2C-43 and 3C-37 tubes, or custom made parts in related fields.
Grounding strips and contact fingers can be supplied in standard or special contours.
"Flea" contacts for co-planer type subminiature tubes and transistors.

SHORT-RUN SERVICE

For those who need quick delivery of parts in pilot quantities or require a low-cost proving ground for spring designs. I-S methods eliminate expensive tooling. Laboratory controlled, precision produced–yet at lower cost than is possible with permanent, high-activity tools.
We are equipped to handle conventional beryllium copper stampings and screw machine products in short runs or in high production.

"MICRO ... PROCESSED" I-S BERYLLIUM COPPER SPRINGS

INSTRUMENT SPECIALTIES CO., INC.

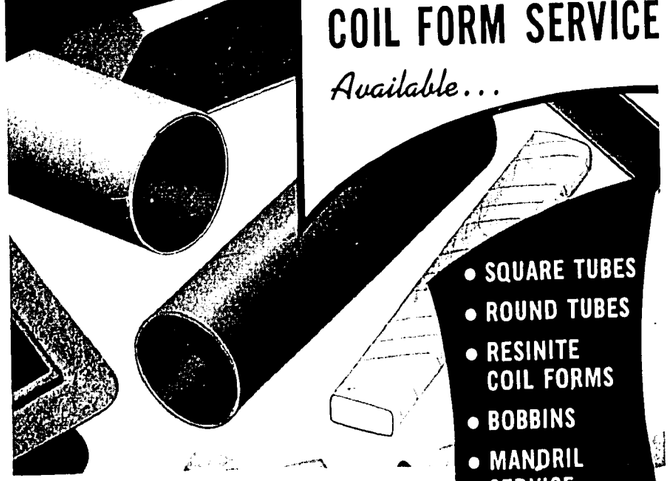
PRECISION

The Only **COMPLETE COIL FORM SERVICE** *Available...*



- SQUARE TUBES
- ROUND TUBES
- RESINITE COIL FORMS
- BOBBINS
- MANDRIL SERVICE
- FABRICATING SERVICE

SQUARE AND RECTANGULAR TUBES

Produced in any length, shape or size from 1/16" to 8", wall thickness from .010 to .125. Fabricated from dielectric kraft, fish paper, acetate, other patented materials or combinations. Bowed sidewall or Di-Formed construction.

ROUND TUBES

Produced in any decimal size up to 8" I.D. Fabricated from kraft, fish paper, cellulose acetate, mylar, polystyrene, quinterra, fibre glass and other dielectric materials.

RESINITE COIL FORMS

These coil forms have the highest resistivity of any resinated product. Furnished plain, embossed, internally threaded or triangular shape . . . also flyback transformer forms.

BOBBINS

Supplied round, square or rectangular. Cores fabricated from any of the above materials. Metal, asbestos, plastic or fibre flanges. Constructed to fit smaller spaces and permit multiple winding.

MANDRIL SERVICE

Accurately ground steel and aluminum coil mandrils at cost economy comparable to commonly used undependable wood or undersized steel mandrils.

FABRICATING SERVICE

We have modern high speed equipment to provide you with any special shape or form . . . rolled, spun, flared, punched or formed to your particular requirement.

Ask about Precision's complete coil form service. Request informative bulletin.

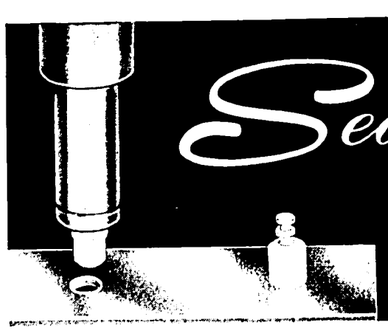
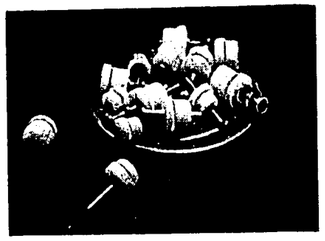
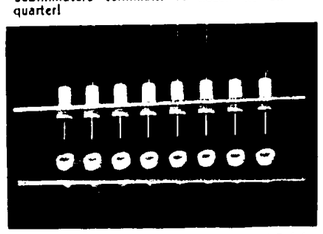
Sealectro "PRESS-FIT"* TEFLON† TERMINALS



Miniature "Press-Fit" terminals. Hundreds of different types and sizes.



Subminiature terminals. A dozen fit on a quarter!



"Press-Fit" terminals. (Below) Test-Point Breakaway connections with two-piece jacks and plugs used for patch-cord board.

• Let *Sealectro* solve your terminal problems with original, genuine, tried-tested-perfected Teflon "Press-Fit" terminals and proper installation. Take advantage of real engineering collaboration. Use our specialized and outstanding production facilities for variety, uniformity, and fastest deliveries.

MINIATURES

One-piece stand-offs and feed-thrus. Simplest, fastest, cheapest installation. No threads, nuts, washers required. Eliminate breakage, shattering, vibration, fungus, corrosion and other drawbacks. Choice of lugs and metal finishes. Hundreds of standard types.

SUBMINIATURES

Smallest insulated terminals available for miniaturization programs. Despite diminutive size, these terminals withstand severest-service conditions as found in guided missiles, radar, communications gear, electronic computers and industrial electronics. Wide choice of types and lugs.

CONNECTORS

Two-section (male and female) terminals for breakaway connections such as for multiple plugs and receptacles, plug-in crystal diodes and similar components, flybacks, plug-in coils and forms, etc. Jack and plug members "Press-Fit" into chassis holes, casings, strips, etc.

TEST-POINT JACKS

Rugged miniature test-point jacks featuring either (SKT-8 and SKT-9) stamped brass or (SKT-10) machined beryllium-copper contact members. Take standard instrument test probe or a companion plug. Ideal for test points on metal panels, permitting connections to circuitry or components for external testing. Used on metal panels for cost-reducing and unbreakable patch-cord boards.

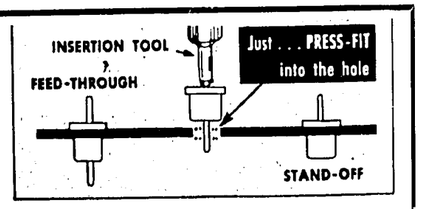
TAPER-PIN TERMINALS

Another Sealectro "First"—the logical partnership of "Press-Fit" installation ease with taper-pin solderless connections. Plus the self-insulating feature, which means mounting directly in metal, thus eliminating usual phenolic board with its troublesome and costly breakage. "Press-Fit" taper-pin terminals are available in stand-offs and feed-thrus. Also in high-voltage types with longest leakage path.

IN EIGHT COLORS!

Sealectro "Press-Fit" terminals are available in eight RETMA color-code colors—brown, blue, red, orange, yellow, green, gray and white, for color-coding as well as for added eye appeal in any assembly.

Install them FAST and TO LAST



Fastest, simplest, cheapest installation in three steps: (1) Punch or drill hole with standard machining; (2) Countersink entrance edge according to Sealectro's time-tested specs; (3) With insertion tool in chuck of drill-press or arbor press, center over hole and apply pressure. Press-Fit, that's it! And genuine "Press-Fit" terminals stay put—for good!

Samples and Data

Write on business stationery for sample terminals, as well as helpful engineering literature. Our local field engineer will gladly call if you wish.

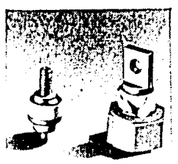
Stupakoff

METAL-BONDED

ALUMINA TERMINALS



Right Sample of a Stupakoff Alumina Terminal in test rig, torsion-tested to destruction. The failure occurred in the ceramic, not in the bond.

Left is similar terminal before testing.

Amazing bond-strength, and unequalled high-temperature ceramic-to-metal adherence are two outstanding characteristics of Stupakoff Alumina Terminals. Available in six standard stock sizes and many special designs, these terminals provide assurance of stronger, tighter, soft-soldered assemblies. The alumina body is a Stupakoff development, processed under rigidly controlled conditions.

The new Stupakoff metal-bond technique (patent applied for) should not be confused with the ordinary silver metallizing process. This is not a plating, but an intimate bonding of ceramic and metal. Its effectiveness is proved by the photograph at the left, showing the results of a typical torsion test. Ultimate failure of the terminal occurred in the ceramic and not in the bond.

Because the bond remains hermetically tight well beyond the temperature limits of soft solder, assembly processes are simplified and more dependable.

Write for full information and prices on Stupakoff Metal-Bonded High Alumina Terminals.

E-Z CODE WIRE MARKERS

Positive identification for ANY gauge wire or cable

Meets MIL-D-10369B for fungus resistance

An inexpensive, self-adhering, easily-applied wire marker, made of Vari-temp* cloth or aluminum foil. Provides easy reading of wires from any angle. Thousands of stock items, ranging from prices as low as ⅛¢ per wire lead. Stock lengths of ¾" and 1½". Ideal for use in original equipment assembly, in maintenance and installation work. Saves hours of labor, can be used anywhere. E-Z CODE markers are applied without touching and affecting adhesive quality.

*Vari-temp: temperature range from −300F. to +300F.

Available nationally; write for free working samples and name of your local distributor

. . . CAN HEAT
anything
FROM A NEEDLE . . . TO A TURBINE SHAFT
FASTER and BETTER

The Lepel line of induction heating equipment represents the most advanced thought in the field of electronics as well as the most practical and efficient source of heat yet developed for industrial heating.
If you are interested in induction heating you are invited to send samples of the work with specifications. Our engineers will process and return the completed job with full data and recommendations without any cost or obligations.

Here's Why- -

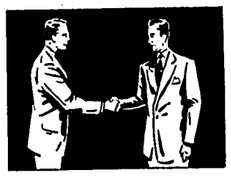
HOUGHTON LABORATORIES is your

BEST SOURCE for Epoxies . . .

Complete Product line . . .

- Liquid Potting Compounds
- Hot Melt Casting Systems
- Cast Rod, Sheet and Tube
- Printed Circuit Coatings
- Adhesives and Sealants
- Custom Casting

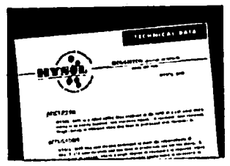
Thorough Technical Service . . .



Backed up by competent field service and assistance.

Rigid Quality Control from raw material through finished product.

Specialized Packaging to fit customer production requirements.



Precise technical data to speed application.

• For all your Epoxy needs call on HOUGHTON *first!*

ELECTRONIC PLASTICS CORP.

Encapsulating & Potting Compounds

for military and Industrial Electronics

● coatings ● casting, impregnating and laminating resins
● dielectrics ● embedments ● foams ● laminates

LOW EXOTHERM, SEMI-RIGID (—65°C to +85°C)
APPLICATIONS: Diodes, Transistors, Rectifiers, Transducers and Capacitors.
EP-FOME—Low density, foam-in-place, room temperature curing resin.
EP-330—No-shrink, flexible, room temperature curing casting resin.
EP-681—Flexible casting resins to meet MIL-16923B, Type "C".
EP-133-1—Large volume casting resin.
EP-422—Low shrink, fiber reinforced, room temperature curing resin.

LOW EXOTHERM, RIGID (—55°C to +85°C)
APPLICATIONS: Resistors, Capacitors, Toroidal Coils, Rectifiers and Electronic Assemblies.
EP-FOME—Medium density, foam-in-place, room temperature curing resin.
EP-320—No-shrink, rapid curing, room temperature setting resin.
EP-121LOX—Rapid curing, low exotherm casting resin.
EP-495—Room temperature curing, low exotherm epoxy.

RAPID CURING, RIGID (—55°C to +85°C and +150°C)
APPLICATIONS: Transformers, Coils, Assemblies and Packaging.
EP-110—Low viscosity, general purpose casting resin.
EP-210—Transparent casting resin.
EP-220—Fire retardant, high temperature casting resin (+150°C).
EP-1503—Two-component, resilient epoxy casting resin.

HIGH TEMPERATURE — CASTING AND POTTING — COMPOUNDS (—65°C to +260°C)
APPLICATIONS: Components, Assemblies and Machined Parts.
EP-477—Two-component, rigid epoxy, +260°C. operating temperature.
EP-1014—Two-component, rigid, fire retardant epoxy, +200°C.
EP-819-1—Resilient, rapid curing casting resin, +200°C.

COATINGS
APPLICATIONS: Printed Circuit Boards and Assemblies.
EP-450—Resilient, multi-epoxy, air drying, transparent coating.
EP-K-3—Air drying, resilient, cushioning coating.
EP-462—Rigid, oven curing, chemical inert coating.
EP-465—Heavy, resilient, excellent adhering qualities.

RESEARCH AND DEVELOPMENT

Our engineering department can develop your project from the blue-print to final package. Design and building of molds, formulating the exact resin requirement and testing of the finished piece can be accomplished in our machine shop, chemical and testing laboratory.

Decorate or Print DIRECTLY ON YOUR PRODUCT ....AND SAVE!
with APEX
Decorating & Marking Equipment

OVER 40 STANDARD MODELS TO CHOOSE FROM

In America's largest & Most Complete Selection

There's an Apex machine that can mark, label or decorate directly on your product no matter the size or shape. Anything that can be printed on paper can be printed by an Apex. No item is too large or small . . . no run too long or too short. Apex eliminates label inventory problems, gives you unmatched versatility and relief from production headaches. Get all the facts today.

- 1, 2 or more colors in perfect register
- automatic or hand feed machines
- rapid changeover
- inexpensive plates
- permanent inks in all colors.

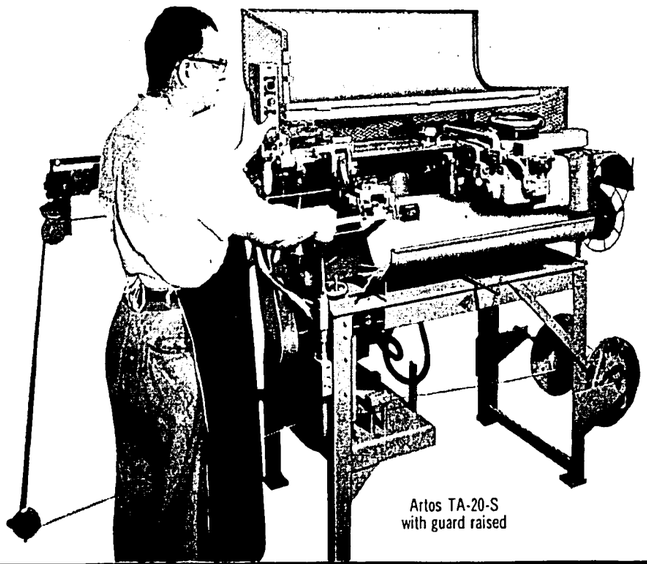
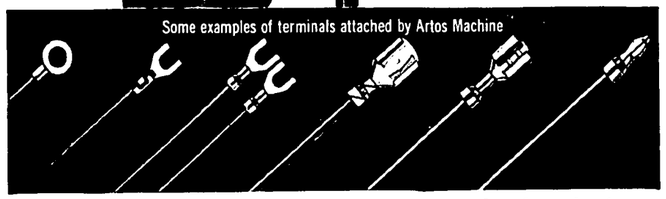
THE *NEW* ARTOS AUTOMATIC wire-stripping and TERMINAL-ATTACHING MACHINE



Artos TA-20-S
with guard raised



This new Artos TA-20-S brings still greater speed and production economy to large-quantity users of wire leads with terminals attached. It *automatically* performs the following services *all in one operation:*

1. Measures and cuts wire to predetermined lengths.
2. Strips one or both ends of wire.
3. Attaches practically any prefabricated terminal in strip form, to one end of wire.
4. Marks finished wire leads with code numbers and letters. (Optional attachment not standard part of machine.)

ALL OPERATIONS ARE AUTOMATIC. Machine can be operated by unskilled labor. It is easily set up and adjusted for different lengths of wire and stripping. Die units for different type terminals simply and quickly changed. Production speeds up to 3,000 finished pieces per hour.

ARTOS MACHINES ARE USED by electric appliance, automotive, aircraft, electronics and other industries that want automation in the production of wire leads in quantity. Agents throughout the world.

Engineering consultation and recommendations given without obligation.

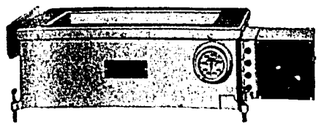
DEE PRINTED CIRCUIT SOLDER POTS WITH MECHANICAL TYPE DIAL THERMOMETERS



25 SIZES MEET ALL REQUIREMENTS

New proven design with all controls on end of pot. Mechanical type dial thermometers to indicate solder temperature. Hydraulic thermostats. Walls and bottom of the solder cavities are smooth and free of all obstructions.

All components except the elements may be serviced easily without taking the pot apart. High-low heat switch so that pot may be used for hand dipping or fast machine dipping without excessive cycling.

Acoustica's low cost Ultrasonic Cleaning Console (PP-1) entirely self-contained mobile machine cleans completely assembled relay assemblies in above photo. Features three gallon cleaning tank, recirculating filter system, reliable magnetostrictive transducer with 1600 watt peak power generator. Operates immediately from 115V, 50-60 cps, as delivered.

USE THIS COUPON TO RECEIVE FREE ULTRASONIC DATA

NEW ULTRASONIC SYSTEMS SPEED METAL WORKING— *Cleaning, Soldering, Drilling, Plating, Finishing*

Acoustica is now supplying large and small ultrasonic systems to speed all types of metal working processes, to improve quality and reduce operation costs. Acoustica systems consist of banks of high power transducers which may be submersed or externally mounted in existing equipment of virtually any shape and size. These transducers generate sound waves which cause an explosive "cold-boiling" effect throughout a liquid, such as a cleaning solution, solder, abrasive slurry, or molten metal. Low-cost ultrasonic generators are available, ranging in size from 50 watts to 150 kilowatts. All Acoustica systems are readily adaptable to fully automated processing.

APPLICATIONS

CLEANING Ultrasonic "cold boiling" in common solvent or detergent solutions literally tears away grease, scale, and dirt in a matter of seconds from precision gear assemblies, sheet and strip, machine castings and other difficult-to-clean products. Ultrasonic cleaning saves disassembly and assembly labor, chemicals and floor space.

SOLDERING Ultrasonically agitated solder permits fluxless joining of similar and dissimilar metals such as aluminum, copper and other non-ferrous metals. This method prevents oxidation of the metals during soldering and allows wetting action to take place.

PLATING Ultrasonic energy gives a more uniform, non-porous plating job at lower current densities thus saving time, labor, machinery, and chemicals.

DRILLING Ultrasonic motion, reciprocating rather than rotary, makes possible drilling of the most intricately shaped holes in hard as well as brittle materials, including glass, ceramics, tool steel, jewels, and carbides.

ACOUSTICA ASSOCIATES, INC. Glenwood Landing, Long Island, N. Y.

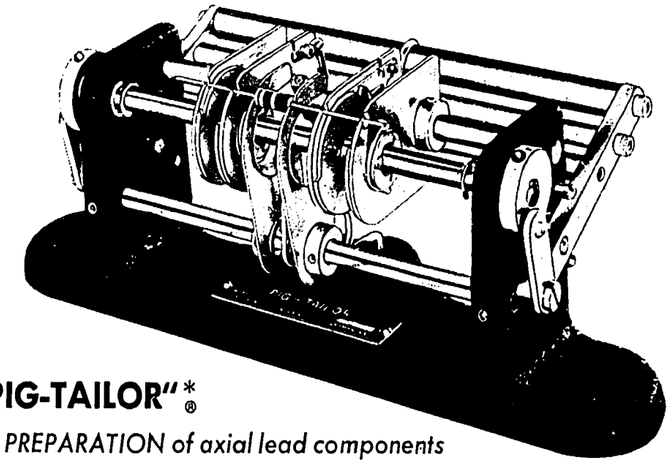
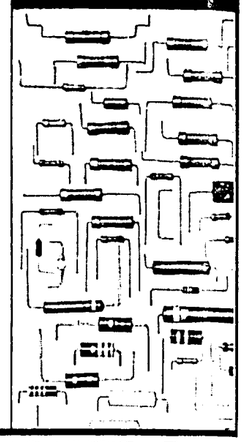
PROVEN-on the assembly line!



"PIG-TAILOR"* ®

For PREPARATION of axial lead components

PREPARED COMPONENTS IN SECONDS WITH THE "PIG-TAILOR"!



"PIG-TAILORING"

. . . . a revolutionary new mechanical process for higher production at lower costs. Fastest PREPARATION and ASSEMBLY of Resistors, Capacitors, Diodes and all other axial lead components for TERMINAL BOARDS, PRINTED CIRCUITS and MINIATURIZED ASSEMBLIES.

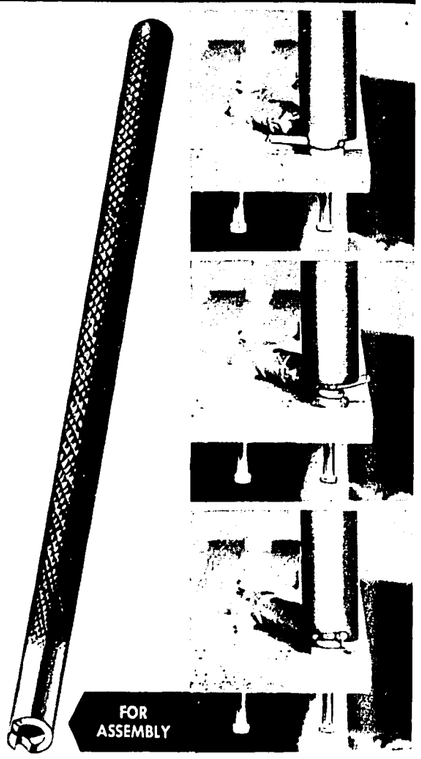
The "PIG-TAILOR" plus "SPIN-PIN"—accurately MEASURES, CUTS, BENDS, EJECTS & ASSEMBLES both leads simultaneously to individual lengths and shapes—3 minute set-up—No accessories—Foot operated—1 hour training time.

PIG-TAILORING provides:

1. Uniform component position.
2. Uniform marking exposure.
3. Miniaturization spacing control.
4. "S" leads for terminals.
5. "U" leads for printed circuits.
6. Individual cut and bend lengths.
7. Better time rate analysis.
8. Closer cost control.
9. Invaluable labor saving.
10. Immediate cost recovery.

PIG-TAILORING eliminates:

1. Diagonal cutters!
2. Long-nose pliers!
3. Operator judgment!
4. 90% operator training time!
5. Broken components!
6. Broken leads!
7. Short circuits from clippings!
8. 65% chassis handling!
9. Excessive lead tautness!
10. Haphazard assembly methods!



"SPIN-PIN"* ® Close-up views of "SPIN-PIN" illustrate fast assembly of tailored-lead wire to terminal.

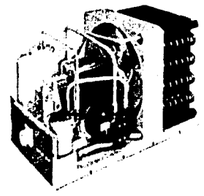
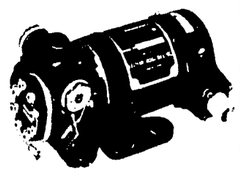
eliminate the "BUGS" with Eastern aviation products





PRESSURIZATION
Eastern pressurization units for airborne electronic equipment are available in many capacities to handle a broad range of requirements. Units consist of an air pump and motor assembly, pressure switch, check valve, tank valve, and terminal connectors. They meet government specifications and can be modified to your needs.

COOLING UNITS
Hold temperatures to safe operating limits in liquid cooled electronic tubes or similiar devices. By virtue of long experience and using standard component parts, Eastern can suit your specific needs at a minimum cost for equipment.

AIRCRAFT PUMPS
Precision-built to rigid government specifications, a broad selection among Eastern pumps offers flexibility to your choice. Modifications can be made, or custom-made units designed to suit your project. Trim in size, light in weight, Eastern Aircraft Pumps give reliable long-term service.

REFRIGERATION-TYPE
Enable specified components to be held to fairly constant temperatures by use of various types of refrigeration units. Because of the variation in methods possible, Eastern units fill every requirement where the use of a refrigeration cycle is called for.

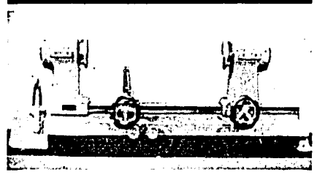
GLASS WORKING LATHES



MODEL HSA

$1695.00 f.o.b. Grass Valley, Calif.

GENERAL SPECIFICATIONS

Maximum length overall	63½"
Maximum width overall	18½"
Maximum length spindle nose to spindle nose	36½"
Height	20½"
Radial clearance above apron	9"
Spindle hole diameter	2⅝"
Approximate shipping weight	550 pounds
Net weight	Approx. 400 pounds

STANDARD EQUIPMENT

Variable speed pulley assembly
Two face plates
One collet draw-in bar
One twelve-fire single jet adjustable oxygen-gas or oxygen-hydrogen burner
Hand carburetion control
Foot pedal control of air or nitrogen supply and of oxygen-gas volume
Main air valve controlling air in either or both spindles
¼ h.p. Motor, 110 volt, single phase, single speed, 60 cycle, AC
Face plate wrench
Two motor belts
One motor pulley

DO YOU KNOW?

That a first class glassblowing job requires accurate alignment of rotational axes between the headstock and footstock?

That variable spindle speed gives another dimension to your technique?

That simple chucking attachments supply versatility for wide varieties of applications?

That special chucking for your industrial procedures, or laboratory practices are available?

That Litton jet-mix fires are universally used in glassblowing to prevent reducing conditions?

That Litton Lathes have been the standard of the vacuum tube industry for 22 years, and have been constantly improved?

That you can get these precision tools at reasonable cost, in eight sizes, with swing from 8" to 42", and working length from 20" to 75½"?

Let us send you complete specifications and prices on our line of equipment and tools for the Vacuum Tube industry and for general research and development laboratory use.

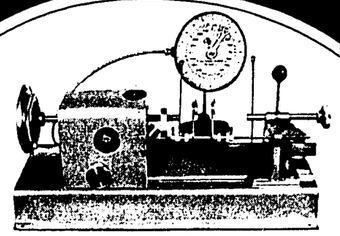
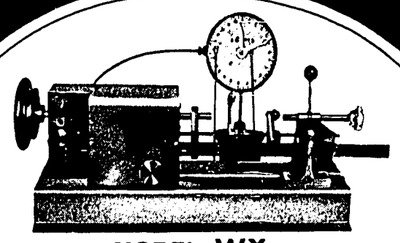
All-purpose, versatile... ideal for laboratory and experimental use

From a wide variety of fine coil winding equipment for every need: Model W, available with adjustable cam traverse, winds every coil pattern except toroids. WX has a continuously variable feed or gain control; allows rapid set-up without changing gears.



MODEL W

The Models W and WX are the only commercial machines capable of winding Lattice-Bobbin-Interleaved-Single Layer-Bank-Interwoven coils.



MODEL WX

The perfect machine to cut costs and still provide exact set-up gear ratios for standard production machines. The Model WX and W are equally suitable for high production.

We'll be pleased to send you complete information. Write or phone

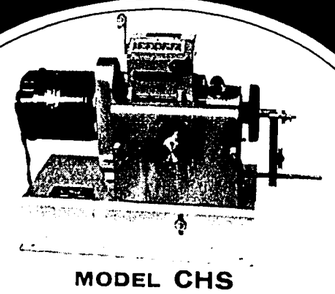
Outstanding production speed...superior trouble-free performance

From a complete line of high speed coil winders for every possible application: Model CHS bobin winder features continuous speed adjustments up to **13,000 RPM.** Customers report production of over **7000** space wound coils per day by Model MP.

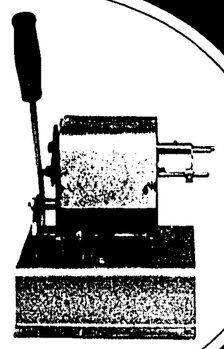


MODEL CHS

Compact, dependable. Meets any demand for high speed coupled with precision performance.

MODEL MP

For the most rapid production of hand wound or space wound coils of relatively few turns. Traverse easily adjusted; non-linear windings may be produced.



We'll be pleased to send you complete information. Write or phone:

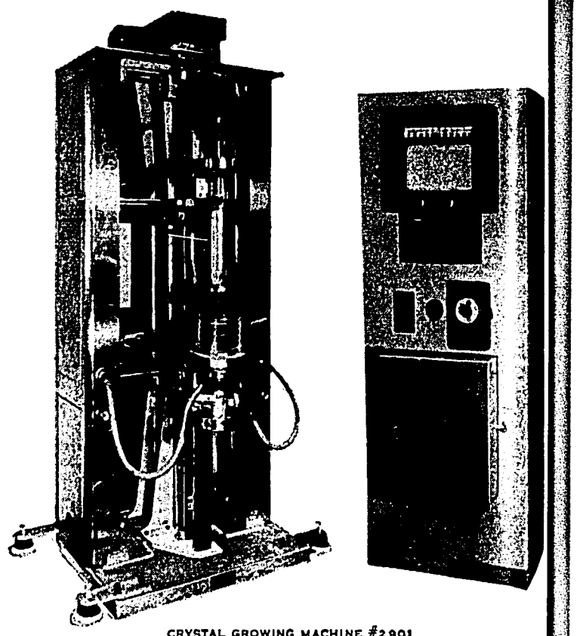
need semiconductor production equipment?



CRYSTAL GROWING MACHINE #2901
FOR GERMANIUM AND SILICON CRYSTALS

KAHLE'S
MACHINE DESIGN,
DEVELOPMENT AND FABRICATION
SERVICES
ARE THE NO-RISK ANSWER

When you work with Kahle, the end result is assured . . . because all Kahle Machines are tested under *your* actual production conditions before shipment. In addition each machine is the result of Kahle's continuous experience which dates back to the days of the old carbon lamp.

But Kahle is modern, too . . . having *already* manufactured machines for every semiconductor production process. Their outstanding production records achieved for leading companies are available for your inspection.

Economy is another mark of a Kahle machine . . . hundreds of standard models can help solve your problems . . . when required, a special design is quickly and effectively created.

Relieve your engineering staff . . . assign the design, development and fabrication of production machinery and equipment to Kahle.

For an individual analysis of your problem, write outlining details.

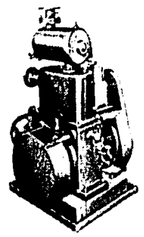
HIGH VACUUM COMPONENTS, EQUIPMENT, and SYSTEMS

Mechanical Vacuum Pumps



NRC Model 100M

Because of the Gas Ballast feature, these pumps maintain their original high efficiency even when pumping 100% water, or other condensable vapors. Therefore, expensive oil purifiers and frequent and costly oil changes are not needed. NRC pumps have paid for themselves in three years from oil savings alone.

Model	Capacity CFM	Ultimate Vacuum Gas Ballast Off mm. Hg (A)	Ultimate Vacuum Gas Ballast On mm. Hg (A)	Price (B)
SINGLE STAGE				
2-S	1.25	3×10^{-3}	Less than one half millimeter of mercury	$155
4-S	3.3	3×10^{-3}		225
6-S	6.75	3×10^{-3}		315
15-S	11.6	3×10^{-2}		475
30-S	29.5	3×10^{-3}		800
100-S	100	3×10^{-3}		1500
200-S	202	1×10^{-2}		2500
400-S	403	5×10^{-3}		4000
DOUBLE STAGE				
2D	1.25	5×10^{-5}	2.5×10^{-2}	$215
4D	3.3	5×10^{-5}	2.5×10^{-2}	280
6D	6.75	5×10^{-5}	2.5×10^{-2}	425
15D	14.75		2.5×10^{-2}	750
30M	29.5	3×10^{-3}	3×10^{-3}	1300

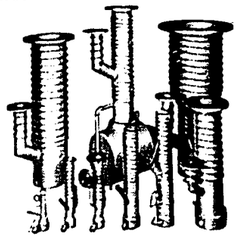
200M	202	3×10^{-3}	3×10^{-3}	3500
400M	403	3×10^{-3}	3×10^{-2}	5900

Note A: McLeod gauge reading

Note B: F.O.B. Newton, Mass. Price includes pump, base, v-belt drive, and motor

Diffusion and Booster Pumps



NRC Booster and Diffusion Pumps

While NRC high vacuum diffusion and booster pumps are unsurpassed for through-put, blank off, and forepressure tolerance, they are especially outstanding for reliability. They offer long, trouble-free life, and are easy to maintain. Narcoil pumping fluids are unusually stable, have excellent pumping characteristics, and are low-priced. Narcoil-10 is $10.50 per gallon and Narcoil-40 is $38.50 per gallon.

Model	Blank-Off, mm. Hg (C)	Max. Speed Liters/Sec.	Tolerable Forepressure mm. Hg	Pumping Fluid	Price (D)
DIFFUSION PUMPS					
G-2-M (A)	8×10^{-7}	30	0.50	Mercury	$225
H-2-P	2×10^{-7}	80	0.25	Narcoil 40	125
A-2-P (B)	2×10^{-6}	85	0.20	DC 703	165
H-4-P	5×10^{-7}	300	0.31	Narcoil 40	235
H-6-P	5×10^{-7}	730	0.20	Narcoil 40	410
H-10-P	5×10^{-7}	1900	0.19	Narcoil 40	820
H-16-P	5×10^{-7}	5500	0.30	Narcoil 40	1450
BOOSTER PUMPS					
B-1	1×10^{-4}	8	0.30	Narcoil 10	$ 70
B-2	1×10^{-4}	85	0.85	Narcoil 10	205
B-4	1×10^{-4}	260	1.30	Narcoil 10	360
B-6	1×10^{-4}	530	0.90	Narcoil 10	1090
B-12	1×10^{-4}	3500	0.90	Narcoil 10	2250

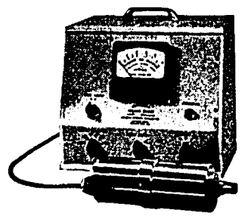
Note A: Glass pump

Note B: Air-cooled. Price includes blower

Note C: Untrapped ion gauge, except for G-2-M

Note D: Includes initial charge of pumping fluid

Vacuum Gages



NRC Model 520

NRC vacuum gauges are outstanding for their accuracy and ability to withstand hard usage. The NRC Model 520 shown above is an all-purpose gauge with uniquely wide range and accuracy. Its ruggedized new circuitry eliminates troublesome components, minimizes contamination effects and provides highly stable linear amplification.

Model	Type	Range mm. Hg	Price complete with head(s)
NRC HIGH VACUUM GAUGES			
501	Thermocouple Head	10^{-3} to 1.0	$11.00
507	Ionization Head	2×10^{-8} to 5×10^{-3}	24.00
510	Alphatron® Ionization	10^{-3} to 10.	545.00
515	Logarithmic Alphatron® Ionization	10^{-3} to 10.	275.00
516	Pirani	10^{-3} to 1.0	175.00
520	Alphatron® Ionization	10^{-4} to 10^{3}	575.00
701	Thermocouple	10^{-3} to 1.0	120.00
710	Thermocouple Ionization	2×10^{-8} to 1.0	481.00

NRC HIGH VACUUM SYSTEMS

Write us about your problem if you are seeking ways to improve your product quality and cut costs.

As one of the pioneers and leaders in the design and manufacture of many kinds of high vacuum systems, NRC Equipment also can supply standard and specially engineered equipment such as:

Vacuum Furnaces, Vacuum Coaters

Freeze Driers, Impregnators, Vacuum Driers

Vacuum Analytical Equipment (for measuring gas content of metals)

Specially engineered vacuum systems

Leak detection apparatus

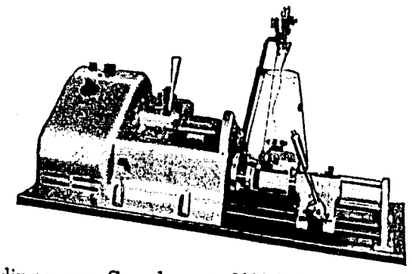
HIGH SPEED DIRECT DRIVE
Gearless BOBBIN WINDER
Adjustable Winding Length

Gears eliminated by new pitch selector; no gear changing between jobs required. Merely set selector lever at desired pitch and wind all types of random wound bobbin coils, solenoids, repeater and relay coils up to 2" OD using 27 to 46 gauge wire.



66-700 turns per inch winding range. Speeds up to 8000 RPM obtained by direct drive between motor and spindle. Fine wire breakage prevented by 3-second slow-start which is dialed in or out as needed. 3½" max. traverse for any single continuous winding. Winding traverse infinitely adjustable between ⅛" and 3½". Max. loading distance for multiple winding 8½". Output end of spindle ½", flatted shaft.

Time-saving fingertip re-settable wire guide permits instant re-setting to identical starting point after completing each winding cycle. Time-saving single shot lubrication permits instant, clean lubrication of all high speed bearings by simply lifting plunger. Tension, pre-determining automatic counter, magnetic brake and positive locking compression-type tailstock furnished.

Save time, increase production, lower costs with Model 312-AM.

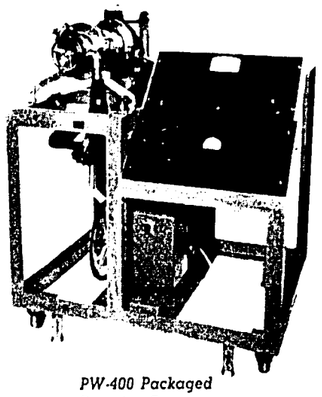
Kinney VACUUM EQUIPMENT for ELECTRONIC

- RESEARCH
- DEVELOPMENT
- PRODUCTION



PW-400 Packaged Pumping System

Shown at the left is the versatile Kinney PW-400 4" Packaged Pumping System. This system will reach pressures close to 10^{-7} mm of mercury with liquid nitrogen in the cold trap. The intake manifold can be oriented horizontally, vertically, or at any angle between the horizontal and vertical — quickly and conveniently. The Kinney PW-400 can be employed for pumping out various high vacuum systems: furnaces, electronic tubes, etc.

Shown at the right is the PW-400 with the larger Kinney KC-15 two-stage gas ballasted mechanical Pump plus 2 KVA packaged power supply, bell jar and base plate assembly. The Kinney PW-400 is thus converted to a very efficient laboratory Vacuum Evaporator. Other Kinney products of interest to electronic plants are: laboratory and industrial sizes of Transistor Drying Ovens, High Vacuum Gages, Valves, Oil Diffusion Pumps, Large Vacuum Metalizers, and High Vacuum Furnaces of all types.

Make your **Ferrites** with

HIGH PURITY MAPICO® RED FERRIC OXIDES for TOP performance

These reactive synthetic MAPICOS, some especially developed for ferrite manufacture, are over 99% pure Fe_2O_3. Choice of suitable characteristics is made easy—many variations in particle-size and shape are available. Careful control contributes to uniformity of packing and shrinkage. Our iron oxide production experience and our ferrite research can help you accomplish best results. Manufactured in modern plants by modern methods. Experienced Columbian technicians are ready to cooperate in any problem involving the use of iron oxides for ferrite manufacture. Use your letterhead for working sample.

the Indispensable Copper for Precision Electronics

OFHC®

- IMMUNITY TO HYDROGEN EMBRITTLEMENT
- LOW VOLATILITY UNDER HIGH VACUUM
- ADHERENT OXIDE SCALE FOR GLASS-TO-COPPER SEALS
- HIGH DUCTILITY WITHOUT LOSS OF STRENGTH

If your product's performance must rely on a copper offering one or all of these properties, specify OFHC. OFHC is 99.99+% pure, contains no oxides, no deoxidants.

OFHC is made only by AMCO. For technical data, write for Publication C-13.

Custom Fabrication Of All Material

SERVICE DESIGNED WITH YOU IN MIND

A warehouse completely stocked with sheets, rods and tubes for all your needs

TEFLON
All forms including tape, spaghetti, reinforced hose, cementable and copper-clad sheets.

NYLON
Rods, slabs, strip and tube. All formulations.

KEL-F
Sheets, rods, sleeving. Plasticized and unplasticized.

PHENOLIC
All grades, sheets, rods, tubes, including copper clad in stock.

PLEXIGLAS
Clear and Colors, Military and "R" grades.

POLYSTYRENE
Crystal clear sheets to 1" thick. All sizes rods and tubes.

POLYETHYLENE
Rolls (all gauges) Pipe, tubes, rigid and layflat, bags, sheets rods and billets to 36" diameter.

ACETATE
Rods, sheets, rolls.

VINYLITE
Rigid and flexible, sheeting, hi-dielectric tubing, layflat and heavy wall pipe.

FORMICA® laminated plastics

SHEETS

Formica offers larger sheets, and more sheet sizes. Standard length-width dimensions: 36 x 36, 36 x 42, 36 x 60, 36 x 72, 36 x 84 and 36 x 96 inches in most grades; and 24 x 42, 24 x 84 and 24 x 96 inches in XX and XXX grades only. Thickness from .010" to 6".

TUBES – RODS

A wide variety of standard and special grades, shapes and sizes of tubing and rod is available for every industrial use. Standard rolled tubing sizes from 3/32" to 14" I.D.; wall thickness from 1/32" to 2". Standard diameter rods from ⅛" to 2". Tube and rod lengths up to 36".

COPPER CLAD FOR PRINTED CIRCUITRY

Select your best grade from the complete Formica line: XP-47, XXXP-36, LE, FF-55, FF-89-1, FF-91-1, CE and YN-25. Many of these can be cold punched, thus eliminating the dimensional change and dissipation of electrical properties resulting from hot punching. For complete information, write for Copper Clad Technical Data, form 656.

FABRICATED PARTS produced accurately, quickly and in quantity . . . with the largest and most extensive facilities maintained by any plastics laminator.

MOLDED SHAPES give you all the advantages of Formica's outstanding properties, plus extra strength and durability. Now made from laminated or macerated stock or molding compounds.

POSTFORMING combines maximum formability with outstanding electrical and mechanical properties. Light in weight, vibration absorbing and dent-proof.

GLASS-SILICONE GRADES offer greater hot strength, lower moisture absorption, lower wet power factor, larger and thicker sheets.

ENGRAVING STOCK: Black and white core sheets. Surface sheets in six solid colors: black, white, gray, brown, cocoa, red; and six authentic wood patterns: walnut, Prima Vera, mahogany, autumn walnut, natural maple, natural oak.

RUBBER SURFACED FORMICA: Neoprene and Buna "S" in thicknesses from 1/64" to ⅛" can be laminated to one or both surfaces or between two sheets of any Formica grade.

"AN" AIRCRAFT PULLEYS delivered right from stock. Complete line including Formica's exclusive staggered rib construction and non-afterglow material.

BEARING SURFACE MATERIAL now offered in two grades: molded end grain grade C, and L-42 sheet stock. The Formica-to-metal principle, introduced some time ago, has now been widely accepted by machine tool manufacturers and others who find metal-to-metal bearings obsolete.

DIESTOCK: Versatile new S-52 is ideal for forming ductile non-ferrous metals, plastics, wood, rubber, vulcanized fibres. It's extremely smooth, strong, easy to machine and inexpensive.

MILITARY GRADES: Formica's complete line includes all those laminated plastic grades approved for use by the armed forces.

FORMICA-4 the complete laminated plastics service

1 Application engineering analyzes your application and recommends one of Formica's 60 standard grades . . . if it meets your requirements exactly.

2 Research produces a new grade with properties engineered to your exact specifications, thus saving time and lowering development cost.

3 Fabricating, molding and postforming bring Formica to you in any shape or size – quickly, accurately and in volume.

4 Customer stock service: Large stocks of standard sheets and rods ready for rapid delivery . . . to serve your fast moving production schedule.

Specialists in Precision Molding of Intricate

COIL FORMS

HYDRO
ENGINEERED PLASTICS

and other

ELECTRONIC COMPONENTS

comprising delicate

MOLDED-IN METAL INSERTS

LOW COST FAST PRECISION MOLDING of NYLON* KEL-F* FIBERGLAS* and other plastic materials

The use of "universal" molds of exclusive HYDRO design assures low-cost tooling and quick delivery of all types of coil forms. Precision tooling insures a flash-free product held to close tolerances. This service is particularly attractive for short runs where high mold costs can raise unit prices of component parts substantially. Similar savings are possible on many other electronic components. *May we quote on your requirements?*

HYDRO MOLDING COMPANY, INC.

Engineering and Manufacturing in Plastics

PLATTSBURGH, NEW YORK

IN BASIC MATERIALS

• SCREEN • COMPARE • SELECT

FROM THE INDUSTRY'S BROADEST LINE

Check your specifications—screen materials—compare properties—make a materials choice. Chances are there's a National material that will meet your exact need at the right cost. PHENOLITE® *Laminated Plastic, Copper-Clad* PHENOLITE, *Vulcanized Fibre, National Nylon* —are furnished in over 100 grades in a variety of forms, with varying degrees of insulation, dielectric strength, hardness, resilience, flexibility and fabricating ease. Don't settle for less than complete design freedom.

COPPER-CLAD PHENOLITE

Printed circuit success depends upon the stability and uniformity of its base laminate. You can choose a National Copper-Clad Laminate with confidence. Available in phenolic, melamine, silicone and epoxy resin; paper, nylon or glass cloth base. And now Phenoclad, a new low cost, cold-punch grade for volume applications.

FABRICATED PARTS

National's fabricating facilities, in 5 plants, are among the most complete and efficient in the industry. National craftsmen are fully skilled in plastics procedures. Compare your costs with the National "Package"—one cost delivers 100% usable parts.

PHENOLITE "STOCK" PLAN

Many PHENOLITE grades are available from stock for immediate delivery. Your nearby National sales office will furnish fast, accurate information on grades, properties, sizes and costs.

	GRADES	ELECTRICAL PROPERTIES: DIELECTRIC STRENGTH—PERPENDICULAR TO LAMINATIONS	DIELECTRIC STRENGTH—PARALLEL TO LAMINATIONS	DIELECTRIC LOSSES	ELECTRICAL STABILITY—HUMID CONDITIONS	INSULATION RESISTANCE	ARC RESISTANCE

WHAT DO YOU USE TO MEASURE LEADERSHIP?

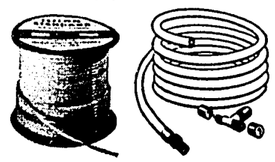
In this highly technical age "close tolerances" are required standards... and, product wizardry is being worked today by many nationally known companies through the use of . . .

SPARTA'S

PROVEN AND PATENTED PROCESS
(Pat. No. 2,781,552)
of Custom Molding in Thin Sections and Shapes, parts of

TEFLON*

whose properties are unmatched by those of any other single material . . .



. . . offering product improvement opportunities to designers of electrical equipment never before possible.

WHEN YOU THINK OF TEFLON THINK OF SPARTA

- **Trained staff of Fluorocarbon Engineers**
- **COMPLETE stock of all standard Teflon products**
- **Precision engineered parts for rigid quality control.**

WRITE for complete data, prices, properties and applications without cost or obligation.
DEPT. IRED

THE FIRST COST CAN BE THE LEAST . . . IF IT IS THE LAST COST!

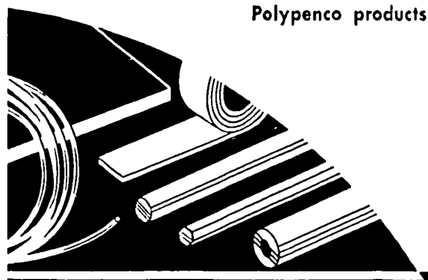
Select **POLYPENCO®** Industrial Plastics



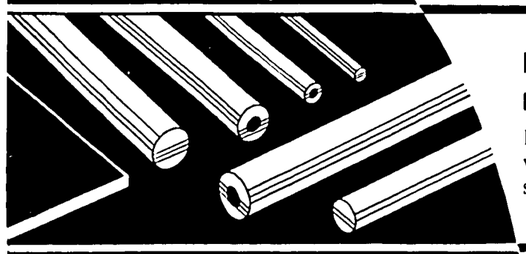
Polypenco products and engineering service are your answer to new developments, improved quality, lower costs.

Industrial plastics with distinctive quality and performance:

POLYPENCO NYLON STOCK SHAPES

Rod • Strip • Tubing • Tubular bar • Hexagonal bar • Plate

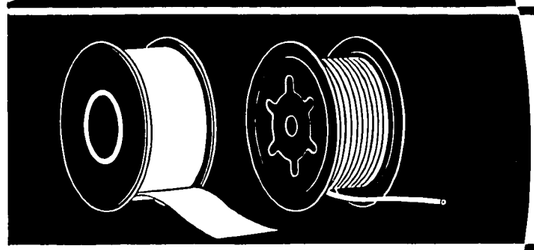
Highest quality nylon available from stock for fast, economical machining on standard metalworking equipment, insuring close production control. Wide ranges of sizes immediately available from nationwide warehouse stock.



POLYPENCO TEFLON* STOCK SHAPES

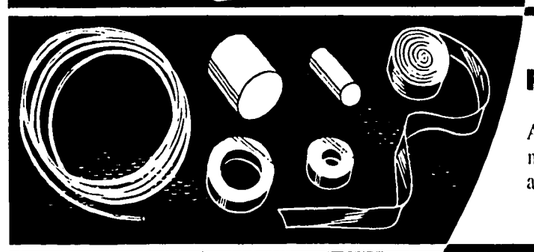
Rod • Tubing • Tubular bar • Sheet

Easily machinable stock shapes in wide variety of sizes with uniform, controlled density and maximum dimensional stability.



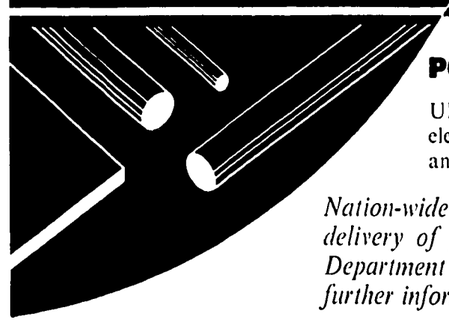
POLYPENCO TEFLON TAPE AND SPAGHETTI TUBING

Dielectric materials with superior performance properties. Tape is supplied from stock in thicknesses of .001" to 0.125" in widths up to 12". Spaghetti tubing is available in AWG wire sizes #30 to #0. Both available in 10 fade-proof colors.



FERROTRON® Ferromagnetic Materials

A superior powdered iron-filled plastic material for electromagnetic design. Available in rigid cores and flexible rod and tape.



POLYPENCO Q-200.5 (cross-linked polystyrene)

UHF insulating material with outstanding electrical properties for electronic, communication and allied applications. Available in rod and plate.

Nation-wide stocking and service points assure prompt delivery of your order. Let Polymer's Technical Service Department help on your design problems. Write today for further information.

METEX Data for Designers

- RF Shielding
- Wave Guide Gaskets
- Heat Dissipating Tube Shields

METEX Electronic Weatherstrip

Knitted, metallic wire structure combines maximum *conductivity* for efficient performance with inherent *resiliency* that assures continuous line contact between imperfect mating surfaces. Interlocked loops, of continuous wire strands, assures maximum *cohesion*. Available in continuous lengths in more than 500 shapes and sizes to meet all installation requirements.

Type	Size	METEX PART NUMBER Monel	Aluminum	Silver Plated Brass
□ Rectangular	1/8" x 1/8"	10-199	10-204	10-230
□ Rectangular	1/8" x 5/32"	10-194	10-182	10-338
○ Round	1/8" dia.	10-006	10-035	10-118
○ Round	3/16" dia.	10-020	10-029	10-253
○ Round	1/4" dia.	10-024	10-032	10-337
Single Fin	1/8" dia. 3/8" o/a	10-008	10-095	10-343
Single Fin	1/8" dia. 5/8" o/a	10-061	10-339	10-340
Single Fin	3/16" dia. 5/8" o/a	10-058	10-066	10-288
Single Fin	1/4" dia. 5/8" o/a	10-109	10-341	10-342

Standard strips shown above available from stock without minimum charge. Other types available on order.

METEX Choke Flange Gaskets

The controlled resiliency and compressibility of METEX *Knitted Wire* Gaskets for standard Waveguide Choke-Flanges insure complete metallic contact, flange to flange. Assures RF-tight joint when distortion makes choke inefficient. Supplements choke to prevent RF leakage at high power levels. Eliminates leakage at other than choke frequencies.

ASESA FLANGE NO.	METEX PART NO.	GASKET MATERIAL	REFERENCE WAVEGUIDE ASESA NO.	NOMINAL O.D.	MATERIAL

UG-585/U	MT 406-2	Aluminum	RG-75/U	3 x 1 1/2	Aluminum

Standard RF gaskets shown above available from stock without minimum charge. Other RF gaskets available on order.

METEX Heat Dissipating Tube Shields

METEX Resilient Cooling Sleeves for subminiature tubes combine high heat conducting ability with inherent vibration dampening and shock absorbing properties. Provides an efficient, practical and economical method of conducting heat away from the tube envelope, directly to a heat sink. Aluminum alloy wire assures maximum thermal conductivity with minimum weight. Thermal peaks and valleys are leveled out assuring consistency of thermal performance among tubes.

METEX Part No.	Tube Envelope	HEIGHT
MT-204E-1	T3-1; T3-6; T3-7	1"
MT-204E-2	T3-2; T3-5; T3-8	1 5/16"
MT-204E-3	T3-3	1 1/2"
MT-204E-5	T3-4	1 11/16"

Sizes shown available from stock. Other sizes available on special order.

METEX Engineers will be glad to work with you on any problems involving RF Shielding or Heat Dissipation in electronics or related equipment. No obligation, naturally!

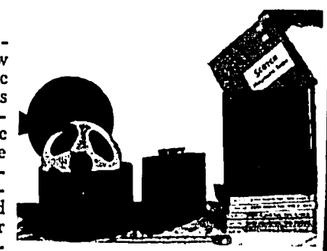
FERNETIC CO-NETIC TAPE CONTAINER

Protects Broadcasting, Military & Automation Tapes



Provides simultaneous high and low intensity magnetic shielding as well as high and low frequency magnetic shielding for valuable magnetic tape recordings from all extraneous fields produced by generators, power supplies, transformers, magnetic tables on surface grinders, magnetic chucks, de-gaussers, soldering guns, motors, power lines, welding machines, solenoids, and other stray fields around radio and TV stations, factories, laboratories, etc.

Valuable tape recordings safely stored to remain clear and distinct, avoiding crackling and other distortions. Shielding strength continues undiminished indefinitely without periodic renewal or other servicing because Fernetic Co-Netic does not retain residual magnetism. Shielding qualities cannot be lessened by shock, vibration or other disturbances during handling or usage. Sturdy containers available in many convenient round or rectangular shapes.

Protect master tapes which run automatic machinery, guided missile flight recordings, radio & TV commercial and program tapes, hi fi and historical tapes, delicate instruments during transport, etc. Write today for details.

P.S. Also available: Cathode Ray Tube Shields, Transformer and other high and low level shielding ...constructed to your specification from non-shock sensitive non-retentive Fernetic Co-Netic.

Designed for Application

Mu Metal Shields

The James Millen Mfg. Co. Inc. has for many years specialized in the production of magnetic metal cathode ray tube shields for the entire electronics industry, supplying magnetic metal shields to manufacturing companies, laboratories and research organizations. Stock shields are immediately available for all of the more popular sizes and types of cathode ray tubes as well as bezels for 2", 3" and 5" size tubes.

Many production problems, however, make desirable special shields designed in conjunction with the specialized requirement of the basic apparatus. Herewith, are illustrated a number of such custom built shields. Our custom design and fabrication department is at the service of our customers for the development and manufacture of magnetic metal shields of either nicoloi or mumetal for such specialized applications.

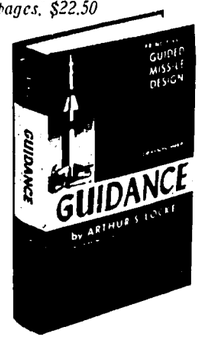
VAN NOSTRAND BOOKS

ESSENTIAL TOOLS FOR PROFESSIONAL ADVANCEMENT

INTERNATIONAL DICTIONARY OF PHYSICS AND ELECTRONICS

Over 12,000 definitions and articles covering both pure and applied science, all the principal terms in one volume most helpful to electronic engineers and physicists. Thumb indexed. *1021 pages. $22.50*

GUIDANCE



By ARTHUR S. LOCKE, *Vitro Laboratories.*

A volume in the Merrill Series *Principles of Guided Missile Design.* Considers every basic problem encountered in directing a controlled missile reliably to its target. Essential background for work with missile guidance systems. *716 pages $12.50*

TRANSISTOR TECHNOLOGY

Volume I. Edited by H. E. BRIDGERS, J. N. SHIVE and J. H. SCAFF

A new work in the *Bell Laboratories Series.* The principles of germanium transistor fabrication are detailed and examples to illustrate them given. *November. In preparation. About $15.00*

AN INTRODUCTION TO AUTOMATIC COMPUTERS

A Systems Approach for Business. By NED CHAPIN.

The functions, uses and limitations of automatic computers to help the executive decide on how they can best be used in his business. *October. In preparation. About $8.00*

DIGITAL COMPUTER COMPONENTS AND CIRCUITS

By R. K. RICHARDS, Consultant on Digital Computers.

Basic engineering approaches related to digital techniques, carefully organized for practical use. *October. In preparation. About $7.50*

GUIDED MISSILE DESIGNERS HANDBOOK

By C. W. BESSERER, Ramo-Wooldridge Corp.

A volume in the Merrill Series *Principles of Guided Missile Design. Winter. In preparation. About $12.50*

ACOUSTICAL ENGINEERING

By HARRY F. OLSON, RCA Laboratories.

Complete working methods covering the entire field of acoustical engineering from fundamentals to practical applications. *737 pages. $13.50*

FIRST OMNIBUS ON THE TRANSISTOR ART

TRANSISTOR ENGINEERING REFERENCE HANDBOOK

by H. E. Marrows

Covering transistor performance characteristics, operating specifications, manufacturing processes, applications, testing, sources, etc. Related components—electrical characteristics, physical dimensions, sources, etc.
The most complete handbook for use in engineering, scientific research and manufacturing of transistor devices. Authoritative—informative—up-to-the-minute.

The content of the handbook

Section 1: Chronology, transistor materials, structure and fabrication of all types of transistors; characteristics of all types of junction transistors; special bibliography on transistors.

Section 2: Numerical index of transistor types, data sheets showing physical specifications, electrical specifications, typical operating parameters, characteristic curves, performance curves of all types of transistors.

Section 3: Index of related components (capacitors, transformers, batteries, thermistors, miscellaneous items) designed for use with transistors . . . showing physical specifications, electrical specifications, manufacturers' type number and part number. List of transistor test sets.

Section 4: Commercial application of transistors with schematic diagrams.

Section 5: Directory of manufacturers making transistors and components designed for use with transistors.

Large 9" x 12" coated paper for easy readability. Each section individually indexed.

#193 Cloth Bound, 288 pp., **$9.95**

Read These New Rider Books
...Up-to-the-Minute—Authoritative—Informative

PICTORIAL MICROWAVE DICTIONARY
by Victor J. Young & Merideth W. Jones

A pictorial dictionary serving as a ready reference which defines and explains present day microwave terminology. Derivation, explanation, definition are combined for complete coverage of microwave activity.

#188, soft cover, 116 pp., $2.95

BASICS OF PHOTOTUBES & PHOTOCELLS by David Mark

Explains the principles and practices surrounding phototubes and photocells with the utmost in visual presentation **#184, soft cover, 136 pp., $2.90**

INTRODUCTION TO PRINTED CIRCUITS
by Robert L. Swiggett

Comprehensive text on Printed Circuits by an authority in the field covers thoroughly the various manufacturing processes used. Numerous practical applications discussed. Explains maintenance techniques peculiar to printed circuits. **#185, soft cover, 112 pp., $2.70**

FUNDAMENTALS OF TRANSISTORS by Leonard Krugman

Explains the BIG thing in electronics today . . . the transistor! Written by one of the pioneers in transistor development, this book deals with basic operation, characteristics, performance and application.

#160, soft cover, 144 pp., $2.70

Buy these books at your electronics parts jobber or bookstore, or mail this coupon today for prompt delivery.

HANDBOOK OF BASIC TV AM FM CIRCUITS

by Matthew Mandl $6.50

COMPREHENSIVE...
This book describes characteristics, functions, and applications and includes a detailed schematic for each of [illegible] standard circuits. Essential supplementary information is provided in the extensive Appendix. All data is indexed.

AND CONVENIENT...
Arranged alphabetically, each circuit is treated as a compact and separate unit. The writing is clear and concise, not cluttered with unnecessary mathematics and formulas.

FOR ANY PHASE OF ELECTRONICS...
This wealth of material on transmitting, receiving, and general purpose circuits is applicable to such diverse fields as industrial electronics, high fidelity, and public address systems.

STUDY FREE FOR 10 DAYS WITHOUT OBLIGATION—CLIP AND MAIL TODAY

The Macmillan Company, Dept. IRE-2
60 Fifth Ave., New York 11, N.Y.
Please send me ..... copies of HANDBOOK OF BASIC CIRCUITS at $6.50. I will either remit the full price or return the book in 10 days. (Save. Enclose payment now and we will pay delivery charge.)

WILEY BOOKS

1. TRANSISTOR CIRCUIT ENGINEERING

Edited by RICHARD F. SHEA, Eight co-authors, all of the General Electric Company

Provides you with the necessary tools to do actual circuit designs, and develop usable circuits in *all* potential fields of application. It shows you how to build successful audio amplifiers, radio frequency amplifiers, etc. using available transistors—and how to combine these elements into radio receivers, television sets, and high fidelity audio systems.

1957. 468 pages. 104 illus. $12.00.

2. RADIO TELEMETRY

By MYRON H. NICHOLS, Ramo-Wooldridge Corp., and LAWRENCE L. RAUCH, University of Michigan

All the material on radio telemetry previously available only in scattered and uncorrelated papers, plus valuable original contributions by the authors. They analyze existing telemetry practices and equipment and compare them in terms of minimum required signal strength, crosstalk, susceptibility to environmental errors and information efficiency.

1956. 461 pages. $12.00.

3. SYNTHESIS OF PASSIVE NETWORKS

By ERNST A. GUILLEMIN, Professor of Electrical Communication, M.I.T.

Offers a comprehensive approach to linear passive network synthesis, and covers both the approximation problem and the realization techniques—two essential parts of synthesis procedure. All fundamental theory and methods are included—with sufficient examples to make their presentation clear and meaningful.

1957. 741 pages. 466 illus. $15.00.

4. ANALYTICAL DESIGN OF LINEAR FEEDBACK CONTROLS

By GEORGE C. NEWTON, JR., LEONARD A. GOULD, and JAMES F. KAISER, all of the Massachusetts Institute of Technology

Shows how you can achieve analytical solutions of practical control problems, and demonstrates techniques through use of simplified models and constraints. Presents the results of the authors' extensive research, and consolidates the literature in the field of analytical design theory, so as to make it more readily available to engineers and scientists.

1957. 440 pages. 169 illus. $12.00.

5. AN INTRODUCTION TO JUNCTION TRANSISTOR THEORY

By R. D. MIDDLEBROOK, California Institute of Technology

A clear and logical presentation of the basic development of transistor electronics, from fundamental physical principles to practical circuit representations. Much of the information has never appeared in book form. Original material includes a new practical equivalent circuit which represents the small-signal behavior of a junction transistor over its useful frequency range as an amplifier.

1957. 296 pages. 144 illus. $8.50.

6. THE VACUUM DEPOSITION OF THIN FILMS

By L. HOLLAND, W. Edwards & Co., London

The first comprehensive work to deal with both physical properties of thin films and deposition procedures. Covers such topics as: design features of vacuum evaporation-apparatus, equipment for sputtering, vapor intensity distribution, and many others.

1956. 541 pages. Illus. $10.00.

7. FREQUENCY MODULATION ENGINEERING

Second Edition

By C. E. TIBBS, Radyne Radio Heaters. Revised by G. G. JOHNSTONE, British Broadcasting Co.

A concise survey of the entire field of FM engineering. Extremely practical in treatment, the book blends theory and engineering details into a unified whole. A solidly useful book for the solving of your FM problems.

1956. 435 pages. Illus. $8.50.

8. PHOTOCONDUCTIVITY CONFERENCE

Edited by R. G. BRECKENRIDGE, National Carbon Co., B. R. RUSSELL, The College of Wooster, and the late E. E. HAHN, of R.C.A. Laboratories. With 46 contributors.

Thoroughly covers the subject, stressing basic theory, phenomenological theory, interpretation of photoconductivity phenomena, and recent data on the properties of important photoconductivity materials.

1956. 650 pages. Illus. $13.50.

BUILDING THE FUTURE IS A BIG JOB!

The radio-electronic engineers who form the membership of the Institute of Radio Engineers must remain years ahead of actual production, in order to pave the way for the products of tomorrow, through research and development today.

The special issues of "Proceedings of the IRE" help these men transform the theory of today into the production lines of tomorrow. Pictured above are the October 1951 Color Television Issue; November 1952 Transistor Issue; and January 1953 UHF Issue (all now out of print). In 1956, IRE published issues on the Earth Satellite (June); Ferrites (October); and Single Side-Band (December).

Special issues on special subjects are more than usually helpful, but every issue of "Proceedings of the IRE" is filled with facts and figures!

DIRECTORY IV. MATERIALS AND SERVICES

Class 100. Distribution

5. Export & Import
10. Jobbers & wholesalers
15. Manufacturers representatives
20. Sales and service
25. Surplus dealers

The final section of the IRE DIRECTORY is the complement to manufacturing, which is distribution. It has proved to be a real service to IRE member engineers and executives to put into this book a list of annually checked jobbers, wholesalers, and distributors. Many of these firms are identified further by the initials REP, as member of "The Representatives," or NEDA, as member of the National Electronic Distributors Association. For convenience in locating distributional firms, the listings are arranged by states, and grouped into nine major sections of the United States, as follows:

	Page
New England	606
Middle Atlantic	606
South Atlantic	609
East North Central	619
East South Central	621
West North Central	626
West South Central	626
Mountain	628
Pacific	629
U.S. Territories & Foreign	630
	634

TO LOCATE THE LISTINGS FOR ANY PARTICULAR STATE:

Alabama	626	Louisiana	626	Ohio	625
Arizona	629	Maine	607	Oklahoma	628
Arkansas	628	Maryland	620	Oregon	634
California	630	Massachusetts	607	Pennsylvania	617
Colorado	630	Michigan	624	Rhode Island	609
Connecticut	606	Minnesota	627	South Carolina	620
Delaware	609	Mississippi	626	South Dakota	628
District of Columbia	609	Missouri	627	Tennessee	626
Florida	619	Montana	630	Texas	628
Georgia	620	Nebraska	628	Utah	630
Idaho	630	Nevada	630	Vermont	609
Illinois	621	New Hampshire	609	Virginia	621
Indiana	624	New Mexico	628	Washington	634

AIRPAX PRODUCTS CO.
Miniature choppers; 400 cycle miniature vibrator power supplies; custom transformers, to MIL specs; magnetometers, Ferrac computing mag amplifiers.

ALLIED INDUSTRIES INC.
R.F. connectors special types also MIL approved BNC and UG.

ATLAS E-E CORPORATION
Vibration and shock clips including component holders, subminiature tube holders and shields, diode clips, tucite cap nuts, nylon machine screws and terminal lugs.

ELECTRO-SNAP SWITCH AND MFG. CO.
Precision switches & controls, HI temp, snap action.

GOOD-ALL ELECTRIC MANUFACTURING CO.
Miniature mylar and paper capacitors, hermetically sealed and standard, to MIL specs.

ILLUMITRONIC ENGINEERING
Rigid air dux coils, diameters from ½" to 3", polystyrene rod and sheet, acrylic sheet.

JUDD WIRE MFG. CORP.
Plastic insulated wire cable. Custom built "specials" including teflon and miniature wires.

MICRODOT, INC.
Micro-miniature, co-ax connectors and cables. 50, 70 and 93 ohm.

PHILAMON LABS., INC.
Miniature, precision tuning forks from 300 to 3000 cycles, to MIL specs.

PYROFILM RESISTOR CO.
Ultra stable miniature precision glass sealed carbon film resistors.

SKYDYNE, INC.
MIL spec, sandwich construction, transit cases and fly-away test benches, fiberglas mouldings.

UNITED STATES DYNAMICS CORPORATION
High temperature silicon power rectifiers.

WATERS MANUFACTURING, INC.
Precision, miniature, wire-wound potentiometers, to MIL specs; torque watches, panel meters, R.F. chokes, electronic components.

SMITH & PURDY ASSOCIATES

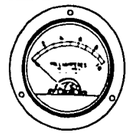
HEADQUARTERS for
ELECTRONIC EQUIPMENT
and COMPONENTS

Kenneth E. Hughes Company

Representing

Hickok Electrical Instrument Co.

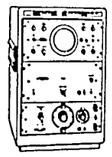


All types, sizes and ranges of panel mounted or portable indicating meters, commercial or ruggedized per MIL specifications. Also logarithmic scaled and 250 degree deflection meters.

Hickok Electrical Instrument Co.

Manufacturers of a complete line of Electronic Test Equipment including tube testers, signal generators, oscilloscopes and volt-ohm-milliammeters.

Acton Laboratories, Inc.

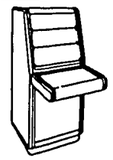


Precision Electronic Instrumentation for industrial or laboratory use. Phase standards and phase meters, eight channel direct wiring oscillograph, V.T.V.M.'s, amplifiers and potentiometer test equipment.

Engineered Electronics Co.

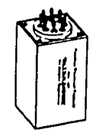
Manufacturers of EECO modular plug-in units for use as building blocks for automation, instrumentation, data handling, computing, timing and other equipment and systems.

Elgin Metalformers Corp.



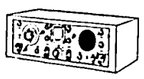
Manufacturers of the famous EMCOR Modular enclosure system—a new concept that is in effect an engineer's "erector-set" for electronic cabinets.

Peerless Electric Products
Div. of ALTEC Lansing Corp.



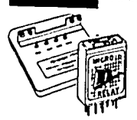
Transformers with the reputation of "finest" on the market achieved through advanced engineering and constant quality control.

Specific Products



WWV receivers. Various types from small portable to rack mounted unit with self contained scope, speaker, etc. for accurate frequency comparison.

Brubaker Electronics, Inc.

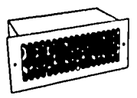


Quality manufacturers of delay lines, miniature and subminiature relays and pulse transformers—world's largest manufacturer of delay lines.

Foto-Video

Engineering capacity and complete facilities for system or special equipment design, development and production.

McLean Engineering Laboratories



Cooling fans for electronic cabinets—Rack mounted, self contained units and specially designed for standard 19" communication racks. Wide range of air deliveries and standard panel heights.

LM Ericsson

Longlife Electron Tubes

These miniature tubes are manufactured by LM Ericsson, of Sweden, to the most rigid specifications under the strictest quality controls. Most types are warranted to have an average operating life of at least 10,000 hours.

A comprehensive Technical Handbook is available upon request. For other technical information, contact State Labs., Inc., U.S. sales agency for LM Ericsson. We will be pleased to have our local representative call on you for further discussion.

State Labs Inc.

THE BIG EVENT OF THE RADIO-ELECTRONIC YEAR

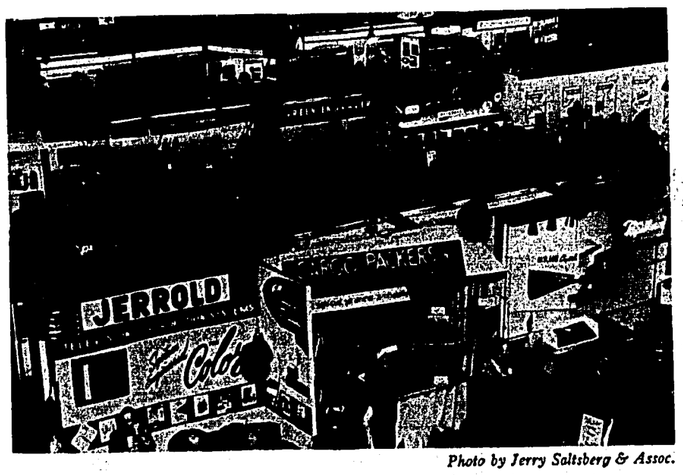

Photo by Jerry Saltsberg & Assoc.

The annual Radio Engineering Show draws an attendance of more than 55,000 radio-electronic engineers from this country and abroad. The photograph at left shows the floor of the Kingsbridge Armory, where the 1956 show was held. The 1958 Radio Engineering Show will be held at the New York Coliseum from March 24 through March 27.

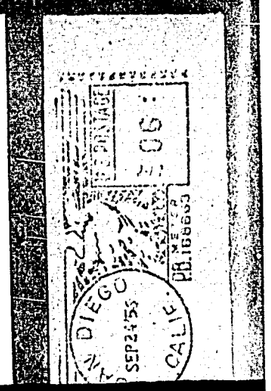
Avnet Electronic Supply Company
34-46 N. Moore Street
New York 13, New York

Attention: Mr. L. Avnet, President



thank you sir!

CONVAIR
A DIVISION OF GENERAL DYNAMICS CORPORATION

SAN DIEGO 12, CALIFORNIA
TELEPHONE: CYPRESS 6-6611

Avnet Electronic Supply Company
34-36 N. Moore Street
New York 13, New York

Attention: Mr. L. Avnet, President

Gentlemen:

In the past year, we here at Convair have devoted a great deal of attention to the performance of your company. We are very pleased to report that your performance has been excellent. The splendid cooperation and service extended to Convair in all your negotiations, by your Top Management Sales Personnel, is highly commendable.

Our normal production flow and scheduled delivery of airplanes is directly contingent upon our suppliers' promise to perform to his committed shipping schedules. You have not only maintained and fulfilled these promises, but have, on many occasions, accelerated your deliveries at our request. This letter is to express our sincere appreciation for your many extraordinary efforts and the fine business relationship we have enjoyed.

Very truly yours,

CONVAIR
A Division of General Dynamics Corporation
(San Diego)

W. E. Gleason

Catalog No. 400. Paper Dielectric Capacitors to Army-Navy specifications.

Catalog No. 420. Mica Capacitors. Industrial, Military, and Transmitter.

Catalog 200D-3
General: electrolytics, paper, mica, ceramic, filters, printed circuits.

Bulletin 328A
Tantalum: electrolytic, subminiature, metal-cased, low voltage tubular units.

Bulletin 173
A.C. Motor Capacitors, oil impregnated and filled rectangular cans.

Catalog 410
"Powercon Inverters" D/C to A/C, A/C to D/C.

Catalog 616
Ceramic capacitors. Disc, tubular and specials.

Bulletin 117
Miniaturized tubulars, metal-cased, paper dielectric.

Catalog PRT 225
Printed Circuitry

Catalog 400
JAN Paper Capacitors.

Catalog 166
R. F. Attenuation Filters.

Bulletin 527
Low Temperature Electrolytics, Metal-cased tubulars.

Bulletin 162
Automation: Phenolic cased plug-in tubulars.

Catalog VIB-3
Vibrators: Automotive, industrial, communications.

THESE ARE ENGINEER-SAVERS!

Any one of these CORNELL-DUBILIER catalogs or engineering bulletins will make it easier to find the right capacitor for practically every problem. A complete file of the C-D Bulletins are available—free of charge, of course. They'll save you precious hours every week. Check off—on convenient coupon below—the catalog, catalogs or engineering bulletins you wish to have us send you.

if it's a capacitor we make it

For details, circle #650 on Reader Service Card.

CONSISTENT HI-DEPENDABILITY
CORNELL-DUBILIER CAPACITORS

CORNELL-DUBILIER ELECTRIC CORPORATION
333 HAMILTON BOULEVARD, SOUTH PLAINFIELD, NEW JERSEY.

☐ Please put me on your mailing list for all engineering bulletins
☐ Please send me—free of charge—the C-D Bulletins circled below:

In Measuring . . . RESISTANCE • CAPACITANCE • INDUCTANCE
IMPEDANCE • DISSIPATION FACTOR • V-T AND TRANSISTOR COEFFICIENTS

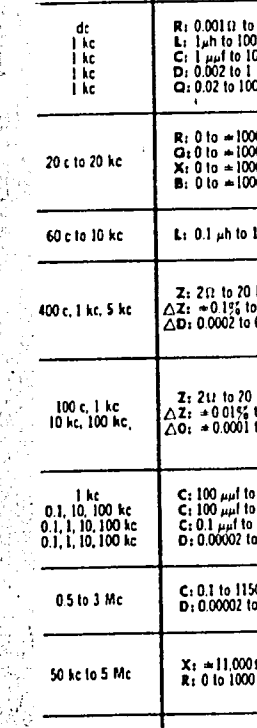
GR® Bridges
For Highest Accuracy

Every design is a result of decades of experience acquired in the manufacture of precision electronic test and measuring apparatus. The G-R trademark guarantees highest accuracy, rugged construction, and dependable operation year after year.

Measurement Frequency	Range of Measurements	Accuracy	Typical Uses	Instrument
dc	R: 1 to 1,111,111Ω	0.5% as limit bridge 0.25% by null method	Production testing and inspection or laboratory work.	1652-A Resistance Limit Bridge $495
dc	R: 0.1 to 1,000,000 MΩ	±3% to 1000 MΩ ±4% to 100,000 MΩ	Measures high resistance — insulation, volume resistivity, etc.	544-B Megohm Bridge a-c power supply, $365 battery operated, $250
60 c	C: 5 μμf to 1100 μf D: 0 to 50%	±1% ±1.5% of full scale	Production-test tool — measures ungrounded capacitors	740-B Capacitance Test Bridge $265
60 c	C: 0 to 11,000 μf D: 0 to 60%	±1% ±2%	Testing insulators, bushings, cables, grounded capacitors	1611-A Capacitance Test Bridge $550
dc 1 kc 1 kc 1 kc 1 kc	R: 0.001Ω to 1 MΩ L: 1μh to 100 h C: 1 μμf to 100 μf D: 0.002 to 1 Q: 0.02 to 1000	±1% ±2% ±1% ±20% ±20%	Completely self-contained, general-purpose laboratory and production bridge	650-A Impedance Bridge $270
20 c to 20 kc	R: 0 to ±1000Ω G: 0 to ±1000 μmho X: 0 to ±1000Ω B: 0 to ±1000 μmho	±1% ±1% ±1% ±1%	Directly measures quadrature components of any impedance, 0 to ∞	1603-A Z-Y Bridge $370
60 c to 10 kc	L: 0.1 μh to 1 h	±0.2%	Variety inductance measurements	667-A Inductance Bridge, $510
400 c, 1 kc, 5 kc	Z: 2Ω to 20 MΩ ΔZ: ±0.1% to ±20% ΔD: 0.0002 to 0.075	±0.1%	Rapid components testing, sorting to close tolerances — dials read % difference between unknown and external standard.	1604-B Comparison Bridge $450
100 c, 1 kc 10 kc, 100 kc,	Z: 2Ω to 20 MΩ ΔZ: ±0.01% to ±10% ΔO: ±0.0001 to ±0.1 radian	±0.01%	Panel meters simultaneously indicate % differences in magnitude and phase angle between unknown and external standard — precision and speed in one instrument	1605-A Impedance Comparator $790
1 kc 0.1, 10, 100 kc 0.1, 1, 10, 100 kc 0.1, 1, 10, 100 kc	C: 100 μμf to 1.15 μf C: 100 μμf to 1150 μμf C: 0.1 μμf to 1050 μμf D: 0.00002 to 0.56	±0.2% of full scale ±0.2% of full scale ±0.2% (substitution) ±2%	For capacitance standardization, precision measurements, dielectric tests and studies	716-CM Capacitance Bridge $600
0.5 to 3 Mc	C: 0.1 to 1150 μμf D: 0.00002 to 0.56	±0.2% ±0.2%	High-frequency model of 716-C	716-CMS1 Capacitance Bridge $580
50 kc to 5 Mc	X: ±11,000Ω at 100 kc R: 0 to 1000Ω	±2% (X-range varies inversely as frequency) ±1%	Measures impedances of antennas, transmission lines, low impedances simply and directly at R-F	916-AL Radio-Frequency Bridge $620
400 kc to 60 Mc	X: ±5,000Ω at 1 Mc R: 0 to 1000Ω	±2% (X-range varies inversely as frequency) ±1%	Improved model — same uses as 916-AL but for higher frequencies	1606-A Radio-Frequency Bridge $620
460 kc to 40 Mc	C: 0 to 1000 μμf G: 0 to 100 μmhos at 1 Mc B: ±6000 μmhos at 1 Mc	±0.2% (G & B ranges vary directly as frequency) ±2%	Measures high impedances, parallel components, chokes, resonant impedance, solution conductivity, etc.	821-A Twin-T Bridge $620
10 to 165 Mc	X: ±200Ω at 100 Mc R: 0 to 200Ω	±5% (X-range varies inversely as frequency) ±2%	For measurements on either lumped or coaxial circuits	1601-A V-H-F Bridge, $520
1 kc	μ: 0.001 to 10,000 rp: 50Ω to 20MΩ gm: 0.02 to 50,000 μmho	±2% ±2% ±2% } at mid ranges	Adaptors furnished with instrument for measuring characteristics of receiving tubes and transistors	561-D Vacuum Tube Bridge (also measures transistor low-frequency parameters) $850

Slotted Line and Admittance Meter for Measurements to 5000 MC

20 to 1500 Mc	B: ±0.2 to ±1000 mmho. G: 0.2 to 1000 mmho X: ±1 to ±5000Ω R: 1 to 5000Ω	±3% ±3% ±3% ±3%	For impedance and VSWR measurements on coaxial lines, antennas, networks and components — 1602-B U-H-F Admittance Meter, $295
300 to 5000 Mc	VSWR, impedance, power	±1½% or better	874-LBA Slotted Line, $220



1690-A Dielectric-Sample Holder . . . $435

for precise determinations of dielectric constant and dissipation factor of solid dielectric materials . . . 2"-dia. electrodes ground to optical flatness and driven by micrometer arrangement for highest accuracy. Attaches to terminals of a wide variety of G-R bridges and high-frequency measuring devices, including Types 544-B, 1611-A, 716-C, 821-A, 1602-B, 874-LBA, and 1610-A . . . for measurements and investigations at dc, 60c, rf, vhf and uhf.

1610-A Capacitance Measuring Assembly $2050

for two- or three-terminal measurements of capacitance and dissipation factor (D) . . . direct-reading accuracy is ±0.2% for capacitance and ±0.0005 for D; ±0.1% capacitance accuracy and ±0.00005 for D with correction chart supplied . . . consists of 716-C Capacitance Bridge, 716-P4 Guard Circuit, 1302-A Oscillator, 1231-B Amplifier & Null Detector and 1231-P5 Adjustable Filter, in standard relay rack with all interconnection provisions. 1610-A2 for two-terminal work only, without Guard Circuit, $1755. **For details, circle #651 on Reader Service Card.**

874-MD Sweep Drive . . . $295

attaches to Type 874-LBA Slotted Line for automatic sweeping . . . sweep speed and range continuously adjustable even while probe carriage is in motion . . . sawtooth voltage for CRO horizontal deflection permits rapid and accurate VSWR measurements directly on scope face.

874-LBA Slotted Line . . . $220
