FOX VALLEY MEETING TO PRESENT SOLUTION TO INCREASING DESIGN PRODUCTIVITY

Increasing design productivity is of major concern to corporations. The meeting of the Fox Valley Subsection on Wednesday - October 28, 1981 will highlight a computer solution to the problem. Mr. Tony Stratton of International Business Machines, (IBM), will discuss several design aids and applications. These include CAD/CAM, the basic computer aided design and manufacturing system; the Electronic Circuit Board System which provide PC board design with digital circuit simulation; and Numerical Geometry which supports three dimensional graphics, points of intersection and curve fitting. His discussion will cover hardware and software system support and industry trends.

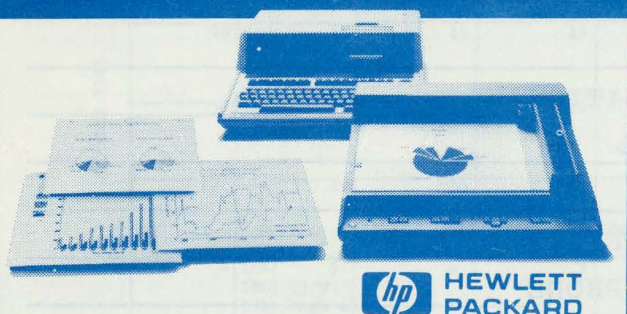

Mr. Stratton has a BS in Physics from the Illinois Institute of Technology where he also did some work using computer graphic application in bubble chamber three dimensional nuclear particles interaction studies. He joined IBM as Industrial Specialist-Scientific and Engineering where he consults with the engineering organizations solving problems in computer graphics and computer aided design. See Calendar of Events for meeting location and time.

SPHE AND CATS

The Society of Packaging and Handling Engineers, (SPHE), will hold a seminar on Monday - October 19, 1981, "Profit Improvement Through Packaging" co-sponsored with Harper College. For further information, contact Continuing Education Admissions Office at 397-3000, extension 410, 412 or 301.
