How to Use Our Business and Product Sections

The Business and Product Sections of this Directory are included for the service of members so that this book will be complete as an index of an industry—listing Engineers, the Businesses they have founded, and the Products they have created for radio, television, communications, and electronics.

The following 4 Parts of the IRE DIRECTORY are:

Part		Page
	Pink Section—Guide to Products	i-viii
2	Company List of Radio-Electronic Manufacturers	3
3	Product Index of Engineering Equipment and Parts	97-359
4	Catalogs and Complete-Data-Spreads Section	361
	—Advertisers Index—Facing Cover III	

Part 2

2570 firms have supplied us voluntarily with information about the components, equipment and services which they render the radio-electronic industry. The manufacturers are listed alphabetically in this section beginning on page 3 and ending on page 96. 1225 non-manufacturers such as distributors and representatives are listed under heading 10, a special directory. This index therefore gives the names of manufacturers of specific products available for purchase, with their addresses and code numbers indicating 100 types of products which they offer.

The completeness of this list depended on information voluntarily supplied us. Our most vigorous efforts may not have made it complete, but the excellent cooperation received from most of the industry is directly responsible for the up-to-dateness of our product data. We will welcome additions and suggestions for the 1954 edition.

Part 3

The Product sections start on page 97 and continue through 360. In both the alphabetical and the product indexes advertisers who have made it financially possible to provide a really comprehensive Directory to IRE members, have been listed in bold face type with a cross index to the page on which their display advertisement appears—giving complete information on their products and services. Non-advertisers have been listed in the product indexes giving firm name and state only. For full address the reader must turn to the alphabetical index for these companies.

To find the advertisers of a given product, let us say "Amplifiers" look this product up in the Pink Section, just after Part 1—Members. You will see that it is classification Number 1. A full listing of Amplifier manufacturers starts on page 97. Turn to this classification in part 3.

As a service to engineers, both buyer and seller, we have included a list of 1225 firms and individuals who are distributors. Each name is further classified by number to indicate its place in the field—representative, distributor, exporter, etc. This is class #99, starting on page 343.

There are several other helpful indexes. Advertisers are given on insert facing Cover III (inside back cover); and an index to 1953 Radio Engineering Show Exhibitors is on pages 450-455.

To get a comprehensive picture of what a given firm manufactures for engineers in our field, you will find in the alphabetical index of companies that all their products are listed by code number after the firm's name and address. These products are classified into ten separate Product Directories, serving basic sections of our industry. We have tried vigorously to make this truly a useful "Radio Engineers Directory."

Part 4

Part 4 is one of the most informative and valuable sections of this Directory. Here manufacturers are supplying engineers with the maximum amount of detailed information possible through the use of multiple page spreads of their products (see page 455). This is followed by a complete catalog file supplied by 15 manufacturers. These catalogs are filed in alphabetical order. The purpose of this section is to give the engineer a complete and ever available catalog file right in his IRE Directory where he can always see it easily and quickly. We believe that the services of this section will be of the utmost help to you.

Please submit all changes, corrections, additions and classification questions to Industry Research Div., Institute of Radio Engineers, 1475 Broadway, New York 36, N.Y.

How to Use the Machol Edge Index

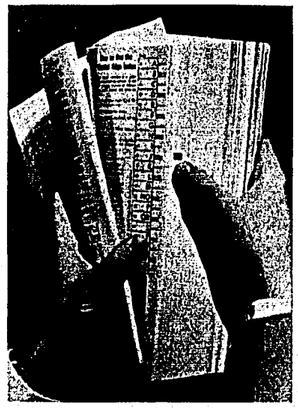
High speed reference is a major objective of the IRE Directory. To this end we have adopted the Machol Edge Index system, and these indexes:

Advertisers Index, facing inside back cover.

Key to Products, Pink Section

Index to Spreads & Catalogs, 456.

Guide to Machol Thumb Indexes facing 96 & 128.



The Machol system will help you find both alphabetical and product sections swiftly.

INSTRUCTIONS

1. **Place the four fingers of your RIGHT hand back of the last page of this book.**
2. **Place your RIGHT thumb just below the 1 or 2 line symbol adjacent to the section you want.**
3. **Raise your RIGHT hand slightly and push it to the left bending the pages almost double. *This will spread the edges and cause the edge marks to show more clearly.***
4. **Move your RIGHT thumb across the page edges, fanning the pages until you reach the corresponding symbol.**
5. **Open there—that will be the page you want.**

from AMPHENOL'S 5 PLANTS
. . . precision-made components for the Electronics Industry

With its recent expansion of production facilities, AMPHENOL is supplying Radio-Electronics manufacturers quality electronic components in ever increasing amounts. AN Connectors, RF Connectors, RG Cables—all of the AMPHENOL products which have been confidently used by the industry for so many years—are more in demand today than ever before. Matching this mounting demand is the expanding production of AMPHENOL—production to better serve you.

Not only with those products already cataloged is AMPHENOL able to serve you. The AMPHENOL engineering staff is ready to assist you in the design and development of new products for special applications. Whether it is the engineering of a totally new component or the modification of an existing one, they will sit down with you and help plan the part that you have in mind.

AN CONNECTORS AMPHENOL is the leading manufacturer of AN Connectors. For use in critical power, signal and control circuits, these connectors fully meet government specifications. (In fact, prior to the issuance of MIL-C-5015, AMPHENOL AN Connectors incorporated many features requested by the specifications.)

RF CONNECTORS AMPHENOL RF Connectors give never-failing continuity in the linking of coaxial cable. Available in several different types of construction, they have extremely low RF loss and a performance reputation for durability.

RG CABLES The expert engineering that went into the AMPHENOL RG Cables is reflected in their superior record of dependability and efficiency. Produced to rigid military specifications, strict end-to-end uniformity is just one feature of these remarkable cables. Utilization of polyethylene for most cable dielectrics and Teflon for high temperature applications insures peak performance.

AGASTAT

Compact . . . Dust-Proof

TIME DELAY RELAYS

solenoid actuated—pneumatically timed

Introduces time delays into a-c or d-c circuits. Easily adjusted to provide delays ranging from 0.1 second to five or more minutes.

The AGASTAT is small, light, and operates in any position. Dust-proof timing chamber assures long operating life with a minimum of maintenance.

NOTES

YOU AN

"possible" requirement

TECHNICAL CERAMICS?

These parts are enlarged approximately one and one half times.

Many people are kind enough to say we're the first to try for any "impossible" technical ceramic. It's probably true that we've made more different sizes, types and shapes than anybody.

Through cooperation, and a little give and take on both sides, we've been able to make a lot of "impossible" ceramics. If you have an "impossible" requirement, let us know. We might be able to work it out with you. Anyway, we'd be caught trying.

We don't make a thing but technical ceramics. We've been doing it for over fifty years. It might pay you to give us first crack at anything in technical ceramics.

P.S. A couple of new plants in production now! On most things we can give you pretty fast deliveries.

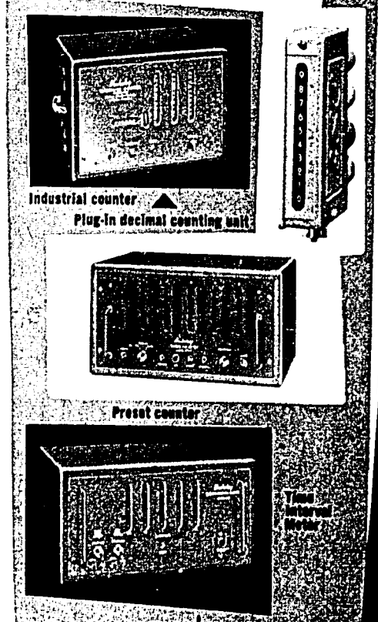
DO IT WITH EASE

Electronic Analog Simulating Equipment



Solves high-order equations in 1 to 2 hours—Solution time for equations up to the 20th order, *including set-up*, is only one to two hours!

Simple to operate and maintain—any engineer who can set up the equation can solve it with EASE; no "computer experts" required for maintenance.

Compact, low-cost—requires less than 8 sq. ft. of floor space. 20-channel unit costs less than $6,850 (f.o.b. factory) complete!

BARCO ULTRA-MINIATURE ELECTROLYTIC CAPACITORS

Low Cost, Reliable, Tiny Capacitors Used for Transistor and Similar Applications—Produced by One of the Largest European Factories.

Humidity and Temperature Tests, Plus Experience of Satisfied Purchasers, Confirm Advantages to Commercial Users Requiring High-Quality, Economical, Capacitors Promptly Available from our Warehouse Stocks.

FOUR SIZE GROUPS: I. 11/64" dia.; II. 16/64" dia.; III. IV. 23/64" dia.
All 11/16" Can-Lengths (excluding seal) Except IV. which is 1-9/32"—Leads 1-1/8" long.

EIGHT ASSORTED CAPACITY AND VOLTAGE TYPES, AS EXAMPLES:

P 6-2 (I) 2 mfd. 6V DC MV	P 25-2.5 (I) 2½ mfd. 25V DC WV
P 2-25 (II) 25 mfd. 2V DC MV	P 50-5 (II) 5 mfd. 50V DC WV
P 3-100 (III) 100 mfd. 3V DC WV	P 25-25 (III) 25 mfd. 25V DC WV
P 75-15 (IV) 15 mfd. 75V DC WV	P 25-50 (IV) 50 mfd. 25V DC WV

LEADERSHIP HAS ITS ROOTS IN RESPONSIBILITY... *Specify Bliley..* FOR 23 YEARS THE FOREMOST NAME IN CRYSTALS

MILITARY

Military types CR15, CR16, CR18, CR19, CR23, CR24, CR27, CR32, CR36, CR47 are representative of current production by Bliley. Complete range of types and cross reference index is given in Bulletin 43.

SHIP-TO-SHORE

Types MC7, SR5 and SR8 are suggested for shipboard dependability. Price and details given in Bulletin 44.

BROADCAST

Types BC46T, MO3B, TC92 are first choice for automatic temperature control in AM, FM and TV transmitters. Consult Bulletin 43 for basic details.

SPECIAL PURPOSE

Types SR10 and MC9 provide wide range frequency choice for TV service, diathermy and citizens band. Request Bulletin 44 for price and description.

COMMUNICATIONS

Type BH6A is the predominant choice for land mobile and airborne applications. Consult Bulletin 43 for basic information.

STANDARD

Types KV3, MC9, SMC100 and MS433 cover reference frequencies from 100 kc through 10.7 mc. Price and "stock tolerances" given in Bulletin 44.

AMATEUR

Types AX2 and AX3 together with Bliley packaged oscillator Model CCO-2A were designed to bring precision and price together in the Ham Bands. Price and details are given in Bulletin 44.

ULTRASONIC DELAY LINES

Custom built fused quartz delay lines provide high stability and precision time intervals for manipulation of pulsed or pulse modulated signals. Consult Bulletin 45 for technical information.

FREQUENCY STANDARDS

Model BCS-1A is a high stability instrument for precision reference at 100 kc. Ideal choice for research and development laboratories. Descriptive information given in Bulletin 43.

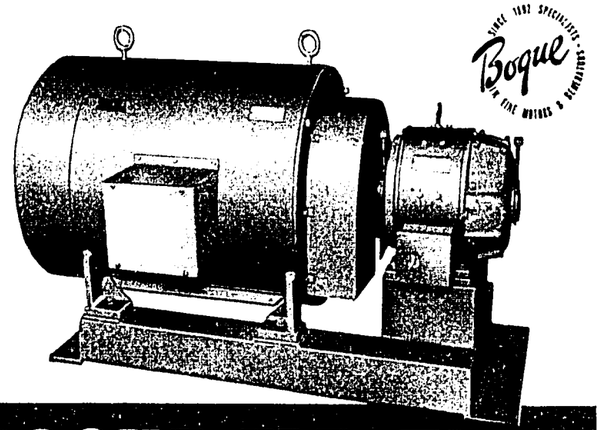
NOW for the first time in *Over 10 Years* BOGUE 400 CYCLE GENERATORS

AVAILABLE FROM STOCK!



Due to the extremely high production at our newly enlarged plant, we are able to offer for immediate shipment from stock "World Famous" Bogue Hi-Cycle Generators in the following sizes:

5, 10, 20 and 50 KVA
Single Phase & Three Phase Output
220/440 Volt Input

Deliver 400 cycles regardless of load and input variations

LOW HARMONICS CLOSE VOLTAGE REGULATION

Our engineering department will be glad to supply full specifications on stock units as well as on special units to meet all Hi-Cycle requirements.

Burnell meets exacting design requirements in Toroids and Filter applications

PARTIAL LISTING OF BURNELL TOROIDAL COILS

TC-1 The "work horse" of toroids, nominal in size and weight with a high Q over a wide frequency range available in any inductance up to 15 HYS.

TC-2 Most widely used in applications below 2500 cycles. Available in any inductance up to 150 HYS. Molybdenum core permeability 125.

TC-0 The "Wedding Ring", most popular of all sub-miniature Toroids for aircraft and guided missiles filters available in any value up to 4 HYS.

TC-4 At frequencies above 1000 cycles Q is only slightly less than TC-1. Available in any inductance up to 10 HYS. Core permeability 125.

TC-5 Same size as the TC-4 but wound on a core with a permeability of 60 with inductance range of .5 MHYS to 500 MHYS. Also available in temperature stabilized type.

TC-6 Similar to TC-0 and widely used between 20 KC and 100 KC with highest efficiency obtained at inductances below 50 MHYS.

TOROIDAL COMMUNICATIONS AND AVIATION FILTERS

BURNELL & COMPANY ANNOUNCES THE DEVELOPMENT OF A NEW SERIES OF FILTERS FOR COMMERCIAL SINGLE SIDE BAND RECEIVING EQUIPMENT. FOR MOST APPLICATIONS THESE FILTERS CAN REPLACE THE MORE EXPENSIVE AND HARD TO GET CRYSTAL FILTERS. THESE FILTERS RESULT FROM A NEW APPROACH WHICH EMPLOYS A 25 KC I.F. SYSTEM. BROCHURE AVAILABLE FOR DETAILED INFORMATION.

TONE CHANNEL FILTERS for multiplex telegraph receiving and transmitting systems are available in a variety of band widths and standard channel spacings, at all frequencies from 125 cycles to 3825 cycles.

TELEMETERING FILTERS are manufactured in conformance with the most widely accepted specifications for telemetering systems. We are currently producing telemetering filters for every channel from 400 cycles to 76,000 cycles in band widths of 15% to 10%. Available in special case sizes for industrial applications.

100 New Models DC to AC CONVERTERS and DYNAMOTORS

by Carter

World Leader of Rotary Power Supplies for Mobile Radio

New Custom DC to AC Converter
New Custom Dynamotors
New Television Converters
New Change-A-Volt Dynamotors
Custom Recorder Converters
Inductor Alternators
The Carter Magmotor
New Heavy Duty Genemotors

Rapid changes in radio—video—audio electronics call for completely new specifications in rotary power supplies. In keeping with these developments, Carter engineers this year developed a complete new line comprising over 100 new Custom Converters and Dynamotors . . . larger in capacity . . . functionally efficient . . . and harmonious in appearance with the modern recording, testing and transmitting equipment.

New Carter Custom DC to AC Converters provide 300, 400 and 500 watt capacity for operating professional type AC recorders, large amplifiers, and business machines from DC power. Custom dynamotors are specially engineered for DC to DC conversion in mobile and marine communications, geophysical instruments and laboratory equipment. New Carter Change-A-Volt Dynamotors adapt 6 volt mobile radio to 12 volt battery power found in many late model vehicles. Carter TV converters operate big screen sets from DC power, ranging from 6 to 220 volts. You will be amazed at the many new applications now served by Carter Rotary Power Supplies.

MAIL COUPON NOW for latest catalogs and bulletins to bring YOU up-to-date on specifications of these new models.

GUDEMAN

PRECISION BUILT

CAPACITORS

Featured here are but a small portion of the many types of capacitors currently manufactured by Gudeman. Many other styles and types are supplied for such applications as Filters, Photo-Flash, Power Factor Correction, Fluorescent Lamp and Motor Starting. In addition, we are manufacturing Germanium Crystal Diodes.

"X" — "XH" MINIATURE CAPACITORS

- Smaller than JAN — made in accordance with Electrical and Environmental requirements of JAN-C-25 or MIL-C-25A.
- Voltages from 100 to 1000 WVDC.
- Hermetically sealed case, glass-to-metal.
- Tab or extended foil construction.
- High insulation resistance.
- Operating temperatures:
  X Types −55°C to +85°C
  XH " −55°C to +125°C
- Various mounting styles.

"QT" — MOLDED CASE CAPACITORS

- Voltages from 200 to 1600 WVDC.
- Capacitance Range — .00005 to .15 mfd.
- Extended foil, non-inductive construction.
- Hi-temperature molded phenolic case — impervious to moisture.
- Leads firmly attached — cannot work loose.
- Mineral Oil Impregnated — operating temperature −40°C to +85°C — no derating.

METALLIZED PAPER CAPACITORS

- Voltages from 100 to 600 WVDC.
- Wide range of Capacitance Values.
- Operating Temp. −55°C to +85°C.
- Possess Self-Healing Characteristics.
- Compact — Light weight.
- Smaller in size than conventional paper-dielectrics.

ELECTROLYTIC CAPACITORS

- Voltages from 6 to 450 WVDC.
- Operating Temperatures up to 85°C.
- High Purity Anode Foil.
- Paper Tubulars and Aluminum Cased Units.
- Low Leakage — Long life.
- Available in all types of mountings.

"GC" GLASS CASE CAPACITORS

- Voltages from 600 to 10,000 WVDC.
- Operating temperatures −60°C to +125°C — No derating at 85°C.
- Hermetically sealed in thermal glass tubing.
- Metal ferrules soldered to special Cobalt Alloy Band fused to inside dimension of tube.
- Designed for high altitude operation.
- Available in stud (8-32 screw) or pigtail construction.

JAN TYPE CAPACITORS
In accordance with MIL-C-25A
Styles CP04 through CP70 inclusive

- Hermetically sealed.
- Conform to characteristic "K", "E" and "F" of MIL-C-25A.
- Designed to conform to the electrical environmental and physical requirements of MIL-C-25A.
- All types of mounting brackets available.

For information or literature about any standard or special type capacitor write to the Gudeman Company, Dept. 801.

PRECISION MADE
TO YOUR OWN SPECIFICATIONS

Precision molded products with exacting tolerances in precious and non-precious solid metals of all alloys. All types of Thermo-Plastic and Thermo-Setting materials.

Slip Ring Assemblies fabricated or one-piece precision molded to your specifications in Nylon, Kel-F, Mineral filled Mellamine, Phenolic, and other materials. Rings and leads spot welded or brazed together for positive electrical circuit.

Our Swiss methods and techniques are geared to meet exacting requirements. We invite your inquiries.

IDEAS *in the making*

Araldite Bonding and Casting Resins developed by Ciba Research are simplifying manufacturing methods, improving product efficiency, and opening new fields of product development. You will want to know more about them.

ARALDITE® EPOXY RESINS

BONDING AND LAMINATING TYPES

ARALDITE TYPE NO.	PHYSICAL FORM	STORAGE LIFE	METHOD OF CURE	BOND STRENGTH* ALUMINUM TO ALUMINUM (psi)	REPRESENTATIVE APPLICATIONS
AN-100	Natural or amber colored powder	Almost unlimited at room temperature	Heat cure	4000-4500	Bonding of metals. Laminating.
AN-101	High viscosity liquid	1 year	Room temperature	2000-2500	Bonding and sealing of metal to glass. Bonding of porcelain, plastics to plastics, non-absorbent leathers.
AN-102	Low viscosity liquid containing solvents	1 year	Room temperature	1400-1600	Bonding of metal to metal and metal to wood.
AN-103	Non-flowing paste (tan color)		Heat cure	1200-1400	Bonding of loose-fitting joints.
AN-104	Non-flowing paste (tan color)	1 year	Room temperature	1000-1500	Bonding of loose-fitting joints. Bonding of rubber to metal.
AN-107	Heavy paste (tan color)	3 months	Heat cure	3000-3200	Laminating. Metal to metal bonding.
AN-111	Low viscosity liquid containing solvents	9 months	Heat cure	2000-2500	Bonding of metal to metal or other heat-resisting materials. Impregnating by vacuum method. Laminating.
AN-115	Medium viscosity liquid containing solvents	3 months	Heat cure	2500-3000	Impregnating, laminating and bonding.

*ASTM D1002-49T

CASTING AND IMPREGNATING RESINS

ARALDITE TYPE NO.	PHYSICAL FORM	STORAGE LIFE	METHOD OF CURE	POT LIFE	DIELECTRIC PROPERTIES	SHRINKAGE	REPRESENTATIVE APPLICATIONS
CN-501	Amber solid	1 year	Heat cure	1-4 hrs.	Excellent	½-2%	Casting, potting, encapsulating. Impregnating glass cloth for dry lay-up.
CN-502	Thin liquid	1 year	Heat cure Self cure	3-6 hrs. 1-4 hrs.	Good	½-2%	Casting, potting, encapsulating.
CN-503	Liquid	1 year	Heat cure Self cure	3-6 hrs. 1-4 hrs.	Excellent	½-2%	Casting, impregnating glass cloth for wet lay-up.
CN-504	Very thin liquid	1 year	Heat cure Self cure	7 days 1-4 hrs.	Good	< 2%	Impregnating, casting, potting, encapsulating.
CN-505	Gray solid	1 year	Heat cure	1-2 hrs.	Excellent	< 1%	Potting and encapsulating high and low temperature service and thermal shock resistance.

Down to Earth ENGINEERING...

for the wild blue yonder

For the execution of design-through-production projects of complex lightweight electro-mechanical products for airborne and other specialized applications, Dalmo Victor maintains:

- . . . A staff of some 200 scientist-engineer specialists in microwaves, mechanics, servo systems, materials
- . . . Four plants with 350 machine tools, 189,000 square feet of space including 135,000 square feet of production and service area; 40,000 square feet of engineering, testing and model shop

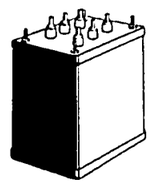
RELY on desco for Quality Engineering!

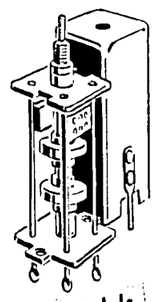
Desco Coils to MIL Specs

...waxed, varnished, baked, thermo-setting plastic coated, vacuum impregnated, potted, etc.



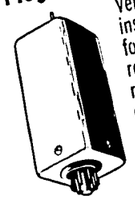
TOROIDS—FILTERS

TOROIDS: All sizes including "Wedding Rings"—Highest Q's—cased or uncased • Guaranteed .1 of 1% accuracies available with our secondary frequency standard measuring equipment. FILTERS: Hermetic sealed all types—Bandpass—Low pass—High pass—your design or ours.



TRANSFORMERS

Specializing in development and production of 60 cycle and 400 cycle MIL-T-27 transformers—hermetic sealed, plastic encapsulated or open types • Input and output transformers—reactors—power transformers—audio transformers.



UNIVERSALS

All types I. F., R. F., B. F. O. coils, etc. conforming to latest military design • All sizes Cup Core coils • Special coils—Permeability Tuned—Shielded—Unshielded • Oscillator coils—Video coils—Chokes.

Plug-in Housings—30 Models

Versatile aluminum plug-ins, with threaded bases for stud mounting coils, relays, filters, crystals, resistors, condensers, etc. • Special models with permeability tuned coil forms—various pin arrangements—etc.

NOTES

--a bright idea to help you sell!--

A Drake Signal Light is as small in cost as in size—yet it can often tip the scale as a sale-closer for *your* appliance.

At a glance, the Signal Light shows Mr. and Mrs. Prospect extra, positive buying reasons. Its on-or-off warning means *safety* and *power-saving*—helps lengthen appliance life by encouraging proper use. Or, by providing an area of light for working or indicator reading, it makes appliance use *easier.* It always adds the extra touch of attractiveness—usefulness—convenience which persuasively says, "Buy me!"

You'll find expertly designed, well made DRAKE Signal and Jewel Light Assemblies on leading makes of appliances, as well as on electronic devices and controls of all kinds. A wide variety of styles and types are available for easy incorporation into *your* products, to get that extra selling punch—and at so low a cost! Send right now for Catalog IR, telling us the type of appliance you have in mind. Our experience often suggests possibilities which you may have overlooked.

Let DRAKE quote on your needs!

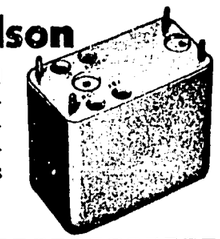
When SPECIFICATIONS call for STANDARD CASES & COVERS

—consult the new

HUDSON DATA FILE!



—including

- STANDARD DRAWN CASES & COVERS
- SPECIAL METAL STAMPINGS
- SPECIAL COVER & CAN ASSEMBLIES

—the complete guide to precision metal parts

The new Hudson Handbook contains full engineering data and specifications on hundreds of standard cases and covers. All are craftsmen-made to provide a quick, economical solution to component problems. Keep a copy of the Handbook on file in your engineering and purchasing departments. Request yours now!

—plan your production around Hudson

All drawn cases and covers in the new Hudson Data File are standard and orders are filled promptly from regular factory stocks. Quality metal stampings are precision made to your exact specifications. For complete information on standard components, consult the Hudson Data File—for specification metal stampings, call or write Hudson for prompt service! Address inquiries to Desk 12.

POTENTIOMETERS

PRECISION in miniature size

TYPE 1395

20 to 200,000 ohms — Electrical Rotation to 360°
Linearity .5% to .15% — Torque .003 oz. in. up - ½ Watt
Vibration Resistant to 25 G
Available in Ganged Assemblies

TYPE 1418

20 to 350,000 ohms — Electrical Rotation to 360°
Linearity .5% to 1% — Torque .020 oz. in. up - 1.5 Watt
Vibration Resistant to 25 G
Available in Ganged Assemblies

OTHER ELECTRO-MEC PRODUCTS

TYPE 9
Low Torque Ganged Potentiometer — .875" diameter

STRIPS
High resolution to 1600 turns per inch. Linear or functional, wound on flat, round, or odd shape forms

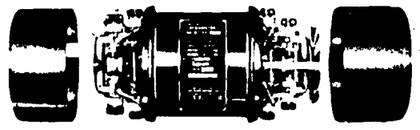
EEPCO

DC MOTOR OR GENERATOR
This small permanent magnet, ball-bearing unit—As a motor: 1/125 H.P. at 6000 RPM continuous duty. As a generator: output 4 watts at 6000 RPM—5 volts per 1000 RPM. Dimensions: 1-29/32" x 1-1/2" x 1-15/100".

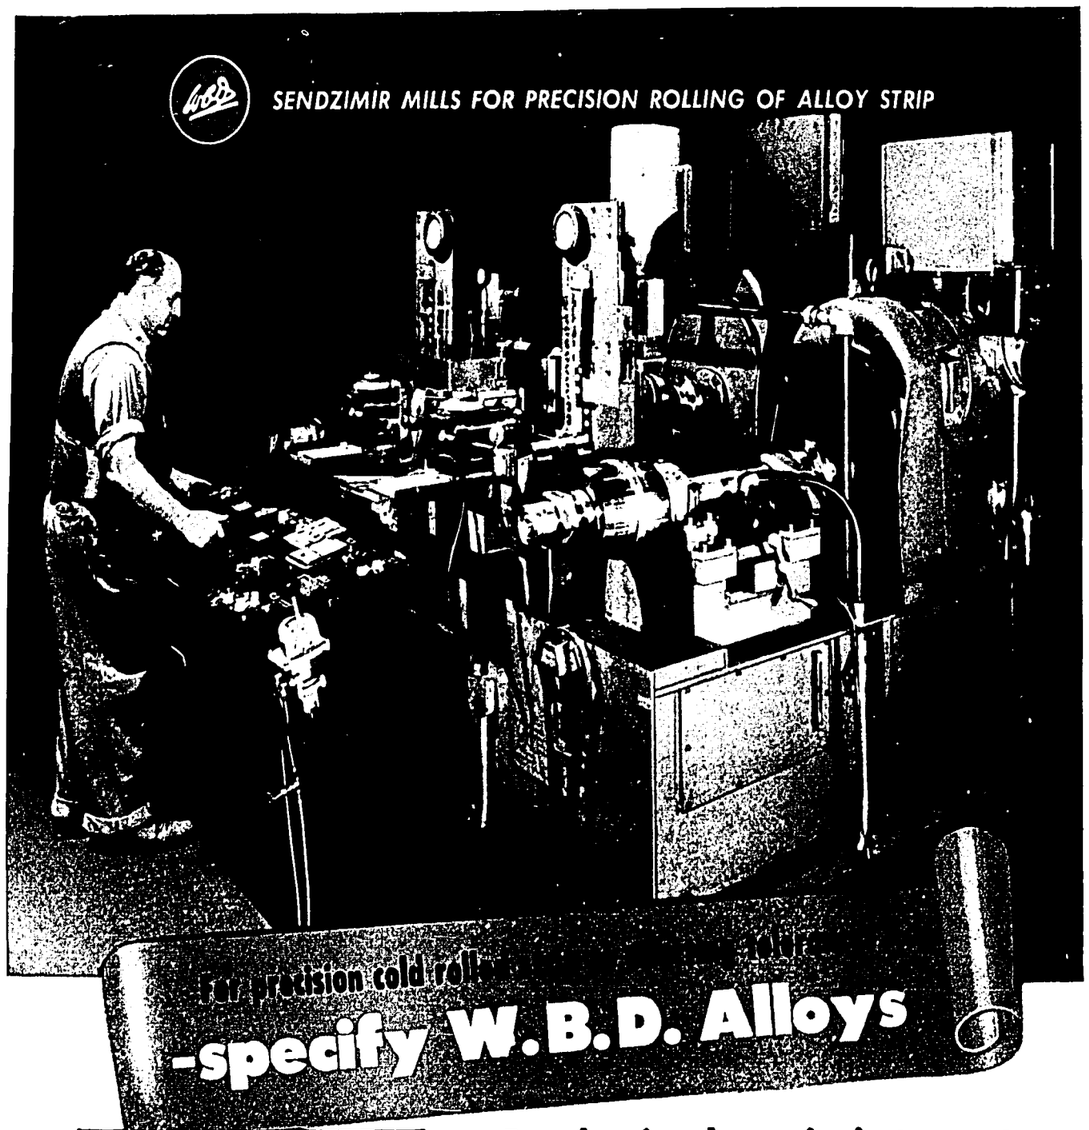


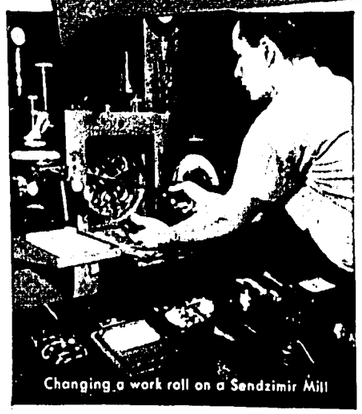
SHADED POLE MOTOR—for sound recorders, air circulators, many other applications. 4-pole, 2 or 4 coil construction. Will operate from 115 volts, 60 cycle a.c.

The RIGHT power supply for mobile equipment is an EEPCO specialty

Outstanding experience in producing rotary electrical equipment to meet rigid specifications is an integral part of every EEPCO product.

Whether your problem involves an industrial or highly developed military unit, EEPCO's complete research and engineering facilities are at your disposal. Contact EEPCO today for special design assistance that can provide you with the best solution.





DYNAMOTOR OPERATES FROM 12-24-32 VOLTS
Output of this remarkably compact unit is 500 volts at .100 amperes. Dynamically balanced armature has 4 windings.

Changing a work roll on a Sendzimir Mill

-For electric, electronic, instrument and other critical applications

These Sendzimir mills represent the latest development in cold rolling technique and assure uniformity across the strip width. The expert operators are accustomed to close size tolerances and excellent finishes. A completely new and modern plant incorporates the latest production facilities. For resistance alloys, Rodar, Nickel, Beraloy, and custom alloys to specification, contact an experienced WILBUR B. DRIVER Sales Engineer.

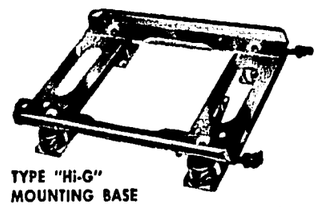
When VIBRATION AND SHOCK become a headache—

Turn to FINNFLEX for relief!

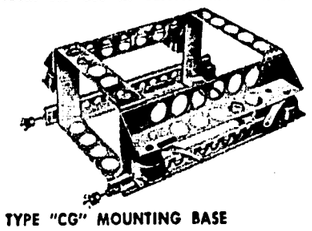
FINNFLEX offers MAXIMUM PROTECTION for VITAL EQUIPMENT by means of—



AIRBORNE MOUNTING BASES VIBRATION ISOLATORS SHOCK MOUNTS

Conform to JAN-C-172A, but are actually made to exceed MIL-E-5400 (Superseding AN-E-19) Drop Test requirements.

FINNFLEX Mounts isolate vibration and shock from Electronic, Communication, and Control Equipment. They offer unimpaired efficiency from —80° to +250°F., *"Selective Action"* friction dampening, *non-linear steel springs*, and other features. Many sizes, load ratings available.



FINNFLEX 3-POINT SERVICE for SPECIAL PROBLEMS: (1) ***Testing:*** We have complete laboratory facilities for Vibration, Shock and Drop Testing . . . (2) ***Designing:*** We design and recommend a Shock or Vibration Mount best suited to your special needs . . . (3) ***Manufacturing:*** We have substantial facilities for manufacturing the desired unit in *any quantity, economically, and on schedule.*

Send us your problem today, or write for Catalog MB-110.

TYPE "Hi-G" MOUNTING BASE

These units have exceptional ruggedness, plus *a special reinforced structure* to withstand shock far in excess of 30 "G" This characteristic makes these bases ideal for use in carrier-based aircraft.

TYPE "CG" MOUNTING BASE

Especially designed for equipment having eccentric CG permitting a wide variation in the loads applied to the individual mounting. The use of FINNFLEX Vibration and Shock Material assures you of superlative Industrial or Governmental Bases and Mounts.

Standing out from claims and confusion . . .

MIL-Line precision deposited carbon resistors give you new stability —without premium cost

Here are the deposited carbon resistors made to your order . . . to meet the increasingly severe conditions of service without costly hermetic sealing. A new tough and durable protective coating insures accurate, stable values an high insulation resistance. Originally developed for use in military apparatus, MIL-Line deposited carbon resistors are equally advantageous in commercial and industrial uses. Whatever your needs, you'll find MIL-Line means extra long life, and extra reliability. Insist on MIL-Line always for premium performance—without premium cost.

YOU NEED 'EM!

El-Menco MOLDED MICA CAPACITORS MICA TRIMM

ALL fixed mica El-Menco Capacitors are *factory-tested at double their working voltage.* Yet, you pay no premium for their superior performance. Meeting all significant specifications of JAN-C-5, they are being used in more and more military and civilian electronic applications.

'Type CM-15, our tiny silvered mica capacitors, includes capacities from 2 to 420 mmf. at 500vDCw — 2 to 500 mmf. at 300 vDCw. Our other types — silvered and regular — offer ranges up to 10,000 mmf. Why not test them? *The Electro Motive Manufacturing Co., Inc., Willimantic, Conn.*

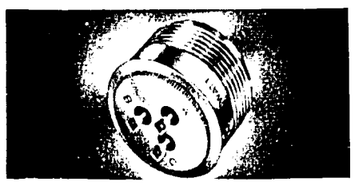
Here's Help with AN Connector Performance and Assembly Problems



Solid Shell AN. Snap-in retaining sleeve (exclusive with G.E.) cannot work loose, yet releases quickly with a screw driver and insert removes for inspection or soldering. Design permits use in tight places normally requiring split shell connectors. Meets MIL-C-5015.

Split-Shell 90° Angle AN. Top removable for wire inspection without unmating or disassembling from conduit or cable. Split-shell ease of wiring with advantages of solid shell construction. Meets MIL-C-5015.

Split-Shell Straight AN. Reduced number of metal parts and weight — plus — improved connector performance. Full length split permits rapid and complete disassembly. Meets MIL-C-5015.

Hermetically Sealed. Extremely rugged. Withstand the mechanical shock of 100G's, thermal shock from —300°F. (liquid air) to +500°F. (in oil), high potentials of over 1000V., operating pressures up to 7000 p.s.i. (depending on applications) and brazing temperatures as high as 1500°F.

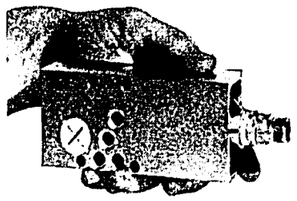
NOTES

Subminiature Precision

RATE-GYROS

less than 1 inch diameter

less than 2 inches long



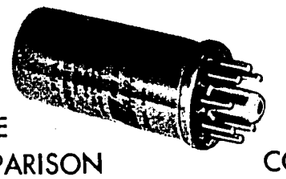
weight only 3 ounces

The smallest rate gyroscope in production. Performance and accuracy are not sacrificed with this reduction in size. The high degree of sensitivity is achieved through the unique design of the pick-off which is basically a differential transformer. The wheel is a hysteresis-type synchronous motor rotating at 24,000 RPM with an angular momentum of 32,600 C.G.S. units. Due to the small mass of its components the gyro is practically insensitive to shock and vibration. The flexibility of the design allows modifications to meet specific requirements.

GENERAL SPECIFICATIONS (Model 7)

Dimensions — 13/16" O.D., 1 11/16" long
Weight — 3 oz.
Range — 420°/second
Pick-off Excitation — 6.3 Volts, 400 Cycles
Motor Excitation — 6.3 Volts or 26 Volts, 400 Cycles
Resolution — Better than .05°/second
Sensitivity — 14 millivolts/degree/second
Resonant Frequency — 85 cps
Damping — 0.5 Critical
Altitude — 0-60,000 feet
Maximum Linear Acceleration — 60 G any axis
Maximum Shock Acceleration — 60 G any axis
Maximum Vibration (0 to 300 cps) — 5 G any axis

Self Clearing **HYDRAULIC SERVO VALVE**



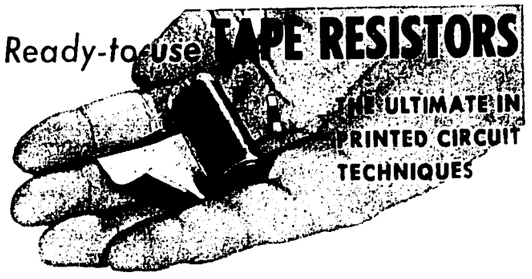
- *TWO STAGE*
- *FOUR WAY*

Absolutely sealed against magnetic particles, this two stage transfer valve exerts a clearing force of several hundred pounds in the first stage in removing any sludge, dirt or metal particles that tend to jam the valve. By amplifying low level electric energy into controlled hydraulic energy, the valve is suitable for any servo system where greater accuracy and high response are of prime importance. Modifications of the torque motor characteristics and valve flow are possible to meet a variety of applications.

GENERAL SPECIFICATIONS

Weight — Less than 1 3/4 lbs.
Size — 1 3/16" x 2 7/16" x 5 1/2"
Volume — Less than 18 cubic inches
Output — Up to 14 HP
Dirt Clearing Force — Up to 500 lbs.
Power Amplification — 5000 times
Input Power — Less than 2 Watts
Input Current — 15 MA
Flow — Up to 12 GPM
Pressure — Up to 3000 PSI
Leakage at Zero Signal — 60 cc/min.
External Leakage — None
Resolution — 0.03%
Response — Flat to 150 cps
Time Constant — 0.001 Sec.
Life — Over 4,000,000 Cycles

PACKAGED BRIDGE COMPARATOR



PHASE COMPARISON — AMPLITUDE COMPARISON

A well balanced hermetically sealed bridge for both phase and amplitude comparison. Utilizing two complete bridges with appropriate switching resistors, the phase comparator has a wide frequency range and high dynamic response. This permits its use as a modulator, demodulator, switch, rectifier or chopper. Having no moving parts, the Sanders Associates Phase Comparator is mechanically secure against shock, acceleration and vibration. It has standard octal mounting and is mechanically interchangeable with mechanical choppers and electronic tube comparators.

GENERAL SPECIFICATIONS

Frequency Response — 0-5000 CPS
Maximum Reference Voltage — 120 Volts RMS
Maximum Signal Voltage — 60 Volts RMS
Dynamic Range (Fixed Reference Amplitude) — 46 DB
Dynamic Range (Variable Reference Amplitude) — 60 DB
Conversion Efficiency — 85%
Maximum Ambient Temperature — +85 degree C
Mounting — Standard Octal Socket
Size — 1" Diameter x 3" Long
Weight — 2 Ounces

Ready-to-use **TAPE RESISTORS**

THE ULTIMATE IN PRINTED CIRCUIT TECHNIQUES

An advanced technique in printed circuitry now makes available tape resistors for commercial and military applications. The flexibility of the Sanders Associates Tape Resistor permits this resistive component to be engineered into the initial printed circuit design. The Tape Resistor is sold in uncut tape rolls or as cured precut resistors, in a wide range of performance characteristics which makes it suitable for a variety of printed circuit applications.

GENERAL SPECIFICATIONS (Precut Resistors)

Size — 1/2" Long, 1/8" Wide, 1/100" Thick
Resistance Range — 100 Ohms to 10 Megohms
Resistance Tolerance — Plus or Minus 10%
Power Rating — 1/4 Watt at +200 degree C
Operating Temperature Range — Minus 55 degree C to plus 200 degree C
Humidity — 95% at 40 degree C for 250 Hours
Temperature Coefficient — Within Requirements of JAN-R-11
Shelf Life — 18 Months Minimum
Load Life — 500 Hours Minimum 1/4 Watt at 200 degrees C
Voltage Coefficient — 0.035% per Volt

"The Minicube"

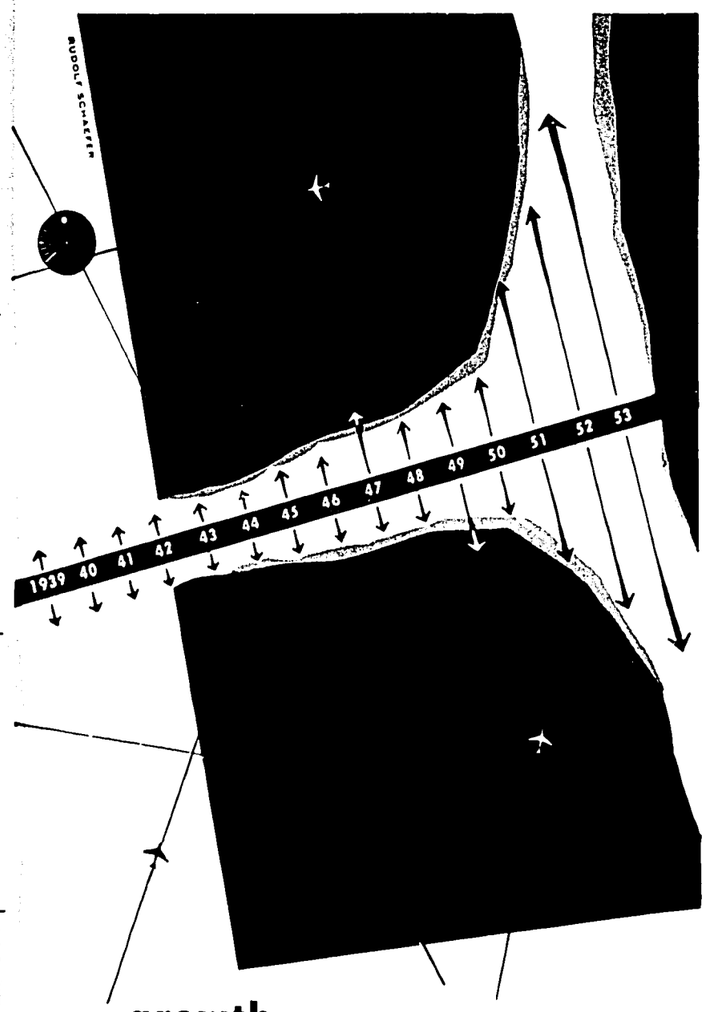
SUBMINIATURE BLOWER

1 INCH LONG
1 INCH WIDE
1 INCH HIGH
1 OUNCE

DELIVERS 3 CU. FT./MIN.

OPERATES BETWEEN —200°C AND +200°C.

A truly subminiature blower designed for cooling or circulation of air for all subminiature applications. The universal mounting, negligible space and weight allow the "Minicube" to be used in almost any type of equipment. The hysteresis-type motor rotating at 24,000 RPM is designed for operation at temperatures up to +200° C. Models are also available for normal temperature operation (−55° to +85° C).



GENERAL SPECIFICATIONS (Model 2)

Size — 1" x 1" x 1"
Weight — 1 ounce
Capacity — 3 cubic feet per minute
Power — 3 Watts, 400 Cycles, 6.3 Volts or 26 Volts
Temperature Range — Minus 200° C to Plus 200° C
Expected Life — Over 1000 Hours

reliability in electronics

growth

Due to our long experience, the demand for our engineering services in designing new precision devices and systems has increased tremendously. Our activities now embrace the four distinct yet allied fields of

- AIRCRAFT INSTRUMENTS AND CONTROLS
- OPTICAL PARTS AND DEVICES
- MINIATURE AC MOTORS
- RADIO COMMUNICATIONS AND NAVIGATION EQUIPMENT

Current production is largely destined for our defense forces; but our research facilities, our skills and talents, are available to scientists seeking solutions to instrumentation and control problems.

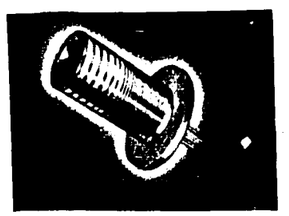
Now available the revolutionary process* for your SLIP RING ASSEMBLIES

featuring

• LOWER COST • CLOSER TOLERANCES • ONE-PIECE CONSTRUCTION • JEWEL-LIKE FINISH • UNIFORM RING HARDNESS • REDUCED WEIGHT



Now a Complete Service in all sizes of Slip Ring Assemblies

↑ An assembly with 14 concentric, hard silver rings electro deposited into machined plastic blank. Dovetail locks rings in place. Machined blank insures accuracy. Diameter approx. 11", thickness approx. 5/16".

➡ An assembly with 30 rings of various widths to accommodate various current requirements. Unit is approx. 4-5/16" long, designed for flange mounting.

➡ Cylinder type assembly approx. 3¾" long with 24 hard silver rings. 1⅝" O.D. with wall thickness less than ¼".

➡ Cylindrical assembly with 25 rings. Three wide rings accommodate large contact area brushes for high current capacity. Length 14", O.D. approx. 5⅞".

*PATENTS PENDING

ELECTRO TEC is now tooled up, with new expanded facilities for production of large Slip Ring Assemblies to exact customer specification Sizes range up to 24" in diameter, either cylindrical or disc type.

The exclusive ELECTRO TEC PROCESS*—the electro-deposition of hard silver rings into an accurately machined plastic blank—consistently yields a high degree of dimensional accuracy, excellent concentricity, and a jewel-like ring finish. This process also eliminates expensive tooling and mold charges, frequently lowers costs to 30% of other methods of manufacture. The silver rings are uniformly hard for long life—75-90 Brinell.

ELECTRO TEC one-piece construction precludes dimensional variation due to accumulated errors. The plastic base is fully cured before rings are plated into it, thus preventing separation of base material from the rings.

ELECTRO TEC LARGE SLIP RING Assemblies are widely used in Radar Equipment, Fire Control Systems, Test Tables and many other critical applications. Light weight combined with rugged durability recommends their use in airborne applications.

Every user knows the ELECTRO TEC reputation for quality and superiority in miniature and sub-miniature slip ring assemblies.

Our Engineering Department is available for consultation on any of your slip ring problems without obligation.

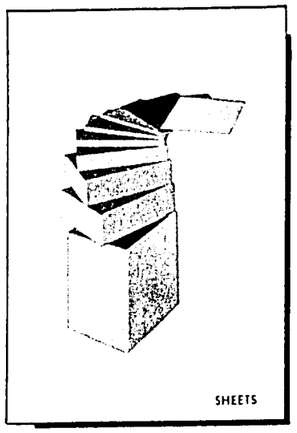
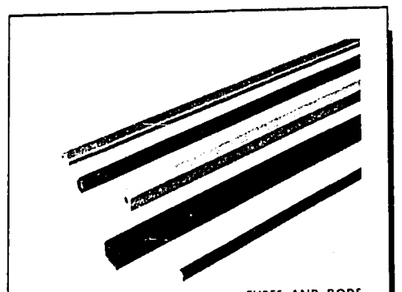
NEW!

FUNGUS-PROOF NYLON LACING CORD and FLAT BRAIDED TAPE



Meets Army, Navy and Civilian "specs"



This sensational new development has proved to be a boon to electronic equipment. The special synthetic resin coating on Heminway & Bartlett's Nylon Lacing Cord and Flat Braided Tape resists the growth of moid and micro-organisms — factors most often responsible for the deterioration of linen and cotton lacing cords and tapes. They have high abrasion resistance and low moisture absorption. The finish has the desirable malleability of wax and is non-toxic to humans.

We'll be glad to send you full information and samples. Why not write us today.

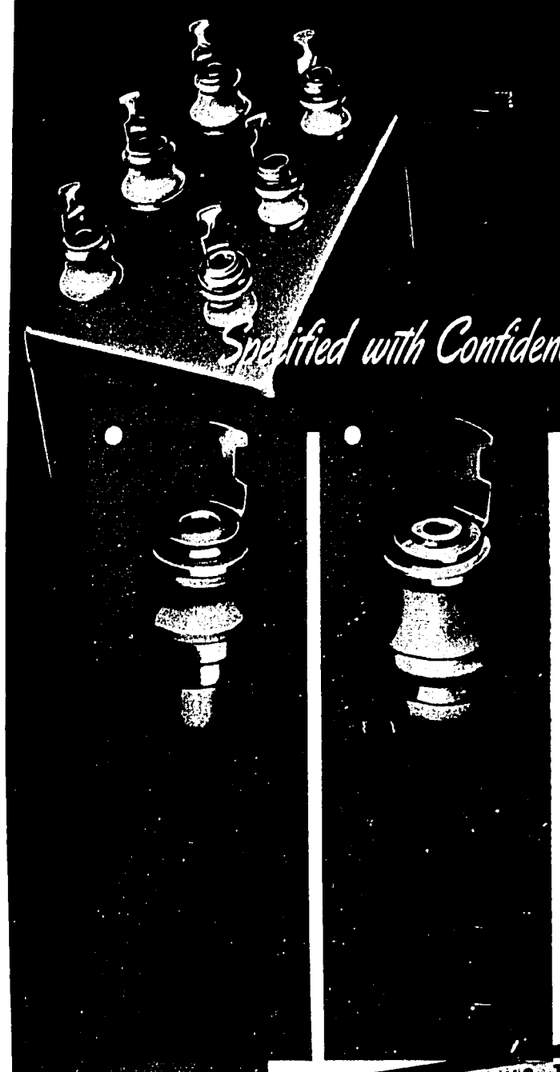
VSWR and RF WATTMETER

MM 700 SERIES

MM 570 SERIES



MicroMatch models are available as components for incorporating directly into transmitters or as complete independent test equipments for measuring RF power and VSWR from 500 KCS. to over 4,000 MCS., and power levels from 10 milliwatts to 120 kilowatts. These instruments are being used as test and monitoring equipment by Government Agencies, transmitter manufacturers, FM & TV Stations, Laboratories, Mobile Communication Agencies, etc.

Write for complete literature on: THE MICROMATCH • RF ABSORPTION TYPE WATTMETERS • DUMMY LOAD RESISTORS • STATION GUARDIAN FOR TRANSMITTER PROTECTION • DIRECTIONAL COUPLERS.

General Ceramics' *hermetically-sealed*

Specified with Confidence for-

EASE OF ASSEMBLY
SUPERIOR STRENGTH
NON-DETERIORATION
PERMANENT SEALING
RESISTANCE TO HEAT
EXTREME LOW-LOSS

Solder-seal Terminals by General Ceramics — engineered for severe service and extra dependability — effect a permanent, positive hermetic seal practically immune to mechanical and thermal shock. There are no plastic or rubber gaskets to age or deteriorate in these reliable terminals. Soft-soldering to closures is accomplished easily and quickly. General Ceramics Solder-Seal Terminals are available in a wide range of sizes and shapes to meet almost every requirement.

SKILLED HANDS

Yours for the Asking . . . These are special hands . . . skilled hands . . . hands trained to translate creative engineering and design into production reality. These hands produce compact, high precision gyros, synchros, and servo motors providing the sensory information, the computing brain and the muscle for the automatic controls of modern industry and aviation.

These helping hands are ready, willing and able to assist by the development and manufacture of the advanced precision components you require for today's problems and tomorrow's progress.

Let us Help. Inquiries for information on standard or special units, for a particular application are cordially invited. Technical Bulletins are available and will be sent upon request.

KEARFOTT COMPONENTS INCLUDE:
Gyros, Servo Motors, Synchros, Servo and Magnetic Amplifiers, Tachometer Generators, Hermetic Rotary Seals, Aircraft Navigational Systems, and other high accuracy mechanical, electrical and electronic components.

Ferramics offer many outstanding advantages. These widely adopted magnetic core materials have reduced assembly time by elimination, laminations in inductive components, cut costs and reduced space requirements by replacing tubes in digital computers, and revolutionized microwave transmission design by use of gyrator effect. Ferramics have improved designs in numerous other equipments, and have resulted in the development of basically new techniques in still others. Current research indicates still greater gains to come. The complete story on ferramics is available without obligation.

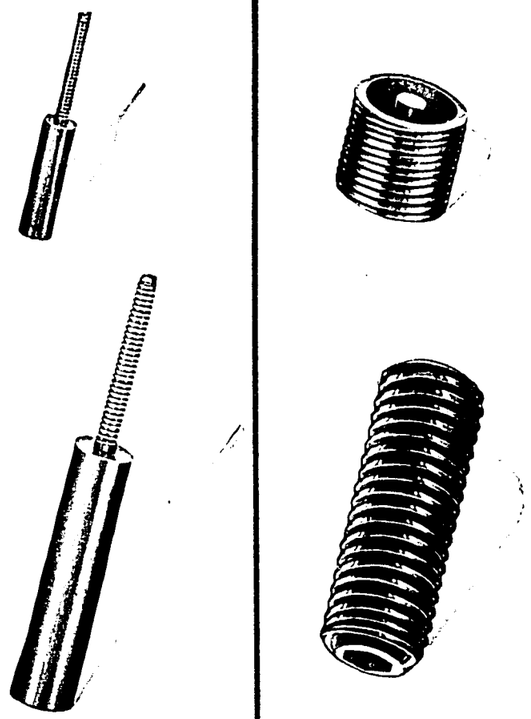
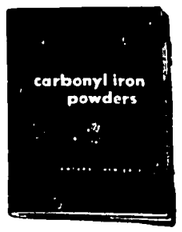
Speeding Electronic Progress through crystal

JK STABILIZED G-12 CRYSTAL



Did you know? Surgical cleanliness during manufacture is an important reason for the unequalled stability of JK Crystals. In an air-conditioned, dust-free room crystal blanks are repeatedly cleaned with chemicals, washed in distilled water and spun dry — plain tap water or even a fingerprint would impair stability. The final crystal, vacuum sealed in a glass holder, provides stability equal to a watch that would remain accurate to within three seconds over 10 years time. Creative research combined with today's most modern production facilities brings you today's finest — JK Crystals for the Critical.

THE JAMES KNIGHTS COMPANY, SANDWICH 1, ILLINOIS



G A & F Carbonyl Iron Powders are used to produce cores for transformer and inductor coils of every form—to increase Q values, to vary coil inductances, to reduce the size of coils, to confine stray fields and to increase transformer coupling factors.

These powders are microscopic, almost perfect spheres of extremely pure iron. They are produced in seven carefully controlled types, ranging in average particle-size from three to twenty microns in diameter.

Similarly, their properties vary, making them useful in many different applications. Engineers have commented on the fact that cores made from these powders lend themselves to smoothiness of adjustment and to ease of grinding. The extremely small size of the particles is of enormous value, since eddy currents develop only within each particle—proportional to the square of the particle diameter.

We urge you to ask your core maker, your coil winder, your industrial designer, how G A & F Carbonyl Iron Powders can increase the efficiency and performance of the equipment or product you make, while reducing both the cost and the weight.

Write for wholly new 32 page book—the most comprehensive treatment yet given to the characteristics and applications of G A & F Carbonyl Iron Powders. 80% of the story is told with photomicrographs, diagrams, performance charts and tables. For your copy—without obligation—kindly address Department 54.

NOTES

THE BEST ION TRAPS AT LOWER PRICES

By the World's Largest Ion Trap Builder

Lowest Priced Slip-on Type—Model T-312

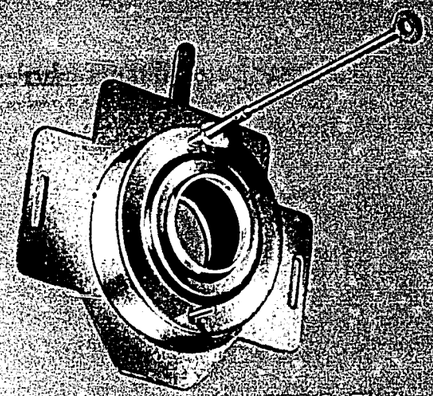
The new simplified steel construction lowers manufacturing costs by fully utilizing, for the first time, the Alnico Permanent Magnet's maximum efficiency. This makes Model T-312 the LOWEST PRICED ION TRAP ON THE MARKET. Installs in 2-3 seconds. Steel construction with steel tension spring. Weighs only 3/5 ounce.

Labor-Saving Snap-on Type Model E-437

Installs instantly. Just snap on; stays put. Saves you valuable production man hours with EXCLUSIVE snap-on feature. Reduces your parts cost because priced below competition. Clamp-type construction of hardened spring steel. Weighs only ½ ounce.

Both Models Fit Any TV Picture Tube.

Heppner has built over 16,000,000 Ion Traps to date and is the world's largest Ion Trap manufacturer.

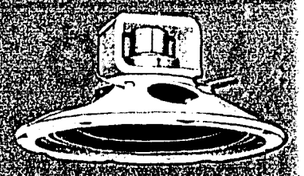


Model T-312

Model E-437

TO REDUCE YOUR SET COSTS:

The most economical way to FOCUS a TV tube



THE ORIGINAL FOCOMAG

CUTS RECEIVER COSTS BY ELIMINATING CENTERING AND FOCUSING RHEOSTATS. Also lowers cost of power transformer. Perfectly focuses 27", 21" and all smaller tubes having magnetic deflection.

Highly efficient ring magnet uses only 4 oz. Alnico P.M.

NO HARMFUL EXTERNAL FIELD. Ring magnet is completely enclosed by the external shunt (an original Heppner design). This prevents the leakage field from having any magnetic effect on other components. Uniform field produced by ring magnet.

FLEXIBLE NYLON ADJUSTING SHAFT ELIMINATES BREAKAGE. Picture-positioning lever. You specify mounting arrangement.

ALNICO P.M. SPEAKERS with exclusive "no-rub" Voice Coil

Absolute uniformity to your specifications because: The [illegible] PERFECTLY ROUND "NO-RUB" VOICE COIL (An EXCLUSIVE feature) is manufactured by keeping each coil on a separate hardened steel sleeve during winding and all other pre-assembly operations. Each voice coil is thus perfectly round when installed in the speaker. There are no egg-shaped coils to cause rubbing.

ALNICO P.M. SPEAKERS in 3", 3½", 4", 5", 4"x6", 8"x10", and 12" sizes are available. 68 oz., 1 oz., 1.47 oz. or other standard Alnico P.M. sizes. Output transformers and/or brackets to your specifications.

Guaranteed Input Electro-dynamic Speakers

Each field coil used in the Electro-Dynamic line is guaranteed to contain the given number of turns within standard tolerance. Quality is fully controlled because all field coils are wound by Heppner. There are no wire stretching or other quality-reducing shortcuts to cause deviation from the resistance and wire size specified.

Originated by Heppner.

CENTERING DEVICES

for use with Electrostatic TV Tubes of all sizes. Distortion-free beam is assured by uniformity of field. Will not de-focus beam.

Each unit is tested in both open and closed position before shipment.

FERRITE ROD ANTENNAS

Inductances held to ± ½ of [illegible]. With windings and mountings to your specifications or without mountings.

[illegible] TRANSFORMERS

Manufactured with exacting control at all stages. Made to your specifications.

To help keep your costs down, call in Heppner engineers to assist in designing and developing new Electro-Magnetic Components. Unusually fast delivery. Write for further information today.

FOR Quality HERMETIC SEALS

SELECT THE EXPERIENCED SOURCE

Hermetic's conspicuous versatility in product-achievement has been made possible by the creative ability of its engineering staff. As a result, when industry thinks of hermetic seals, the name HERMETIC SEAL PRODUCTS CO. comes instantly to mind. In the greatly expanded field of hermetic sealing, the reputation of this company stands first and foremost.

In addition to exclusive design features, Hermetic headers will withstand mass spectrometer leak tests, —55°F. conditions, swamp test, temperature cycling, high vacuum, high pressure, salt water immersion and spray, etc. They are the only headers you can hot tin dip at 525°F. for easy assembly soldering for a strain and fissure-free sealed part with resistance of over 10,000 megohms.

Hughes Diodes are FUSION SEALED IN GLASS for electrical stability

GLASS-TO-METAL fusion sealing for electrical stability is an exclusive feature of HUGHES GERMANIUM DIODES. The final seal in precision assembly operations is made at a temperature exceeding 700° C.

Proved in billions of vacuum tubes, the glass-to-metal seal has been incorporated to full advantage in diode manufacture for the first time by the Hughes-developed process of fusion sealing. The result is a unique germanium diode whose elements are encased in a rigid *one-piece* glass envelope, which assures permanent freedom from moisture penetration.

THE HUGHES GERMANIUM DIODE, developed by Hughes Research and Development Laboratories, employs no wax or solder, and has no mechanical joints or pressed-in parts to shift position.

To insure the satisfactory operation of HUGHES DIODES under adverse conditions of moisture, vibration, and severe shock, a 100 per cent testing procedure has been devised which *invites* instabilities to occur prior to shipment and assures rejection of every defective diode. *Each* HUGHES DIODE is humidity-cycled, temperature-cycled, and JAN shock-tested.

HUGHES GERMANIUM DIODES have proved consistently able to meet exacting requirements in airborne electronic equipment for navigation, fire control and guided missiles.

Volume orders for most types of HUGHES DIODES can be filled from stock. Diodes are also tested to special specifications, including high-temperature electrical requirements.

HUGHES GERMANIUM DIODE ELECTRICAL SPECIFICATIONS AT 25° C.

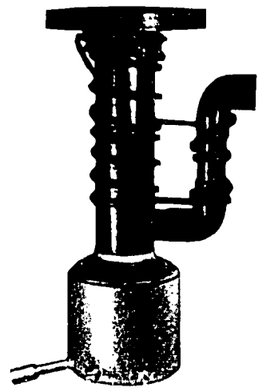
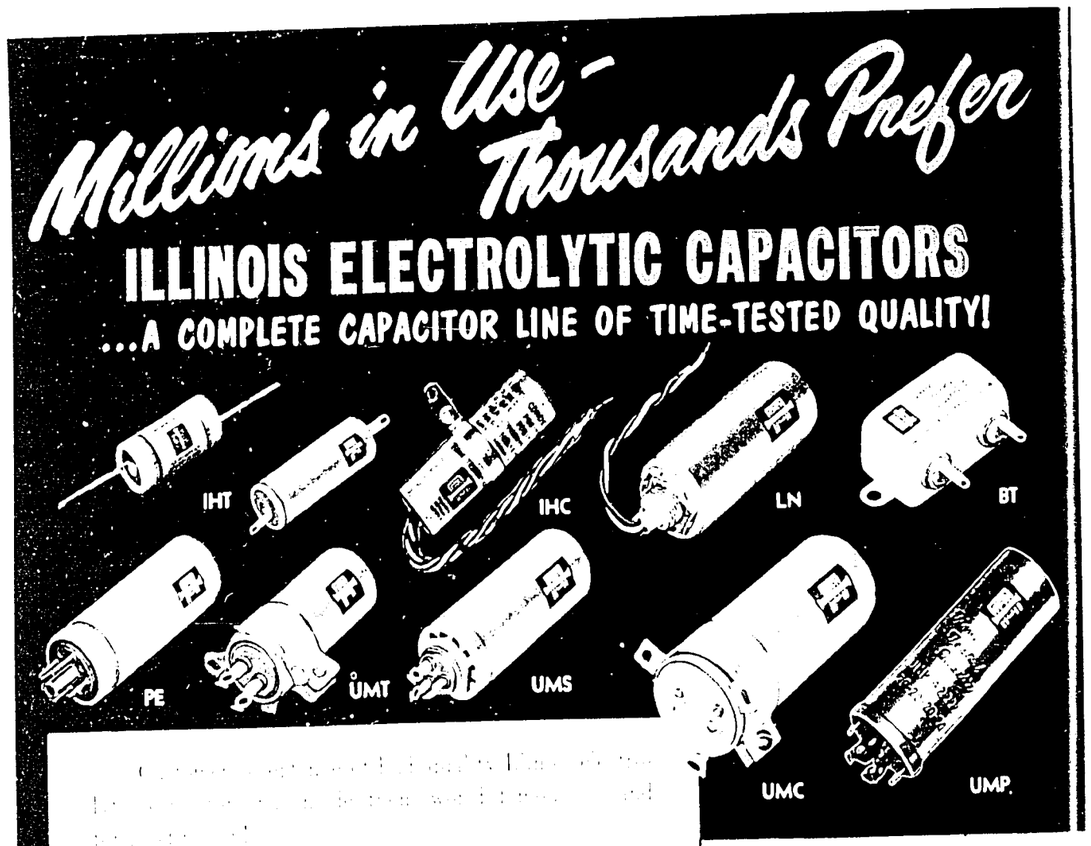
If you use high vacuum we have it!



T.V. TUBE ALUMINIZER. Laboratory or semi-production models—also large production machines available.

NEW!!



A BETTER 2" FRACTIONATING PUMP

Employs the falling film principle of fractionating in addition to our well-proved principles of streamlined jet design. Completely rust proof. Stainless steel casing. Well-suited for evacuation of cathode ray, television and transmitting tubes. →

We can supply all types of high vacuum equipment including oil diffusion pumps, high vacuum evaporators, vacuum furnaces, etc. and evaporated coatings such as low reflection coatings, mirrors, electrically conducting coatings, etc.

OPTICAL FILM ENGINEERING CO.

ILLINOIS CONDENSER COMPANY

IHT This popular pigtail type in aluminum can features internal riveted construction that assures immunity to shock and vibration. Available with or without outer cardboard insulating sleeve, with brass-tinned wire leads or solder lugs in capacity ranges from 1 to 2,000 MFD and from 3 to 700 W.V.D.C.

IHC Ideal for replacement or original equipment, this type has flexible wire leads, is sealed with high temperature compound, has electrolytic grade cardboard tubes and has radial or tangential clamps attached. Supplied in common negative, four section types or dual negatives with separate cathodes. Available in capacity ranges from 25 to 250 MFD and from 5 to 500 W.V.D.C.

LN Has screw neck type mounting, extruded aluminum cans and is available in 1" to 1⅛" diameters. Capacity ranges from 8 to 80 MFD and from 450 to 600 W.V.D.C.

BT (Bathtub) Developed for military, fixed and portable communication equipment. Has hermetically sealed, drawn metal case with corrosion resistant finish. Will stand shock and vibration. Fully meets government JAN specifications. Available in any capacity range required and from 25 to 600 W.V.D.C.

PE For use in all communication equipment, fixed and mobile. Plug-in octal base, hermetically sealed. Features new molded through pin design. Available in types to meet all government JAN specifications.

UMT Specifically designed for use in high quality equipment. Complete line meets all government JAN specifications. Hermetically sealed, shock resistant. Newly designed molded capacitor design and terminal construction.

UMS Inverted screw mounting, hermetically sealed. Entire line fully meets all government JAN specifications.

UMC Popular for use in telephone equipment, power factor correction voltage stabilization, high current energy sources, motor starting and other types of phase shifting networks. Available in capacity ranges up to 10,000 MFD and from 5 to 500 W.V.D.C.

UMP Ideal for communication, radio and TV. Standard twist prong mounting. Uses recently developed molded capacitor construction and will operate efficiently under wide temperature ranges. Remains stable under all operating conditions. Available in capacity ranges from 40 to 3,000 MFD and from 10 to 525 W.V.D.C.

HYDROFORMING
reduces costs, saves time on short runs and development components

New process sharply reduces tooling time and tool costs. Punch and nest ring are the only tool requirements as hydraulic oil functions as the die member. Send drawings for quotations and information.

COMPLETE FACILITIES and over a quarter century of metal forming to close tolerances assure precision components for the most critical applications. Kaupp experience includes forming and drawing of intricate shapes in stainless, inconel, aluminum, cold rolled steel, brass and other alloys. Gauges from .002 to ⅜ stock. KELLOGG PULLMAN INCORPORATED

KEL-F

®Reg. U.S. Pat. Off.

VOLUME-PRODUCTION PRICING NOW RADICALLY BROADENS SCOPE OF APPLICATIONS FOR THIS UNIQUE THERMOPLASTIC

Currently available in vastly increased volume from new mass-production facilities *at a fraction of its original cost*, Kel-F® should now prove the convenient and economically-sound specification as well as the technically superior one for most critical and semi-critical applications. An important economic factor which designers and engineers should evaluate carefully when making material comparisons is that only small amounts of Kel-F are required to meet the most severe service conditions . . . because of the polymer's unique properties.

LEADING MOLDERS NOW OFFER KEL-F PARTS AND BASIC MATERIALS

More than 50 leading molders in the country are prepared to deliver Kel-F tubing, rod, sheet, film and strip in a variety of sizes and types of material. Many of these are supplying not only these basic fabricating materials but are also producing finished parts by the standard methods such as compression, transfer, injection and extrusion molding.

TECHNICAL BULLETINS, SERVICES NOW AVAILABLE . . .

Detailed data in bulletin form on physical properties, molding techniques, dispersions and other Kel-F polymer products are available. The Chemical Manufacturing Division's Technical Service Department and Molding Research Laboratory have been augmented to offer additional help to design and materials engineers, as well as molders, in the use of this unique material.

BASIC KEL-F MATERIALS AVAILABLE
(Order direct from Kellogg)

Molding Powders	Unplasticized	#300 — for high temperature service #270 — for less severe temperatures
	Plasticized	#300 P 25 . . . with 25% Plasticizer (Other plasticized compositions to order)
Dispersions		NW-25 — Flows readily at fusion temperatures N-1 — High molecular weight
Oils, Waxes and Greases		Five grades — from Light Oil to Hard Wax — are available. Details on request.

Properties

CHEMICAL INERTNESS
No effect has been observed after prolonged exposure of Kel-F to concentrated sulfuric, hydrofluoric and hydrochloric acids; to strong caustics; to fuming nitric acid, aqua regia, hydrogen peroxide and other vigorous oxidizing materials. It is equally resistant to most organic solvents.

ELECTRICAL RESISTANCE
Kel-F has high resistance to electricity . . . is a poor conductor of heat . . . and its electrical properties are superior to most plastics. Dielectric constant is in the range of the best available materials.

ZERO MOISTURE ABSORPTION
In continuous tests, Kel-F exhibited zero water absorption. It is not wet by water . . . is unaffected by high humidity or tropical exposure.

WIDE TEMPERATURE RANGE
Kel-F performs satisfactorily over a temperature range of 710 fahrenheit degrees — from a low of --320° F (liquid nitrogen) to a high of 390° F.

MECHANICAL STRENGTH
Kel-F has high tensile strength on the order of 6000 psi at 77° F . . . excellent impact strength and abrasion resistance; compressive strength of 32,000 to 80,000 psi.

SUPERIOR MEMORY
Kel-F exhibits "cold-flow" characteristics superior to any other commercial fluoro-carbon. While it deforms slightly under pressure, it returns to original shape when pressure is released.

MOLDABILITY — MACHINABILITY
Kel-F is molded by all standard methods — compression, transfer, injection and extrusion. It is readily punched, drilled or otherwise machined to close tolerances.

WIDE VARIETY IN FORM
Kel-F is available in film, sheet, rod and tubes from recognized molders. As a dispersion for spray or dip application and in forms of oils, greases and waxes it is available direct from Kellogg.

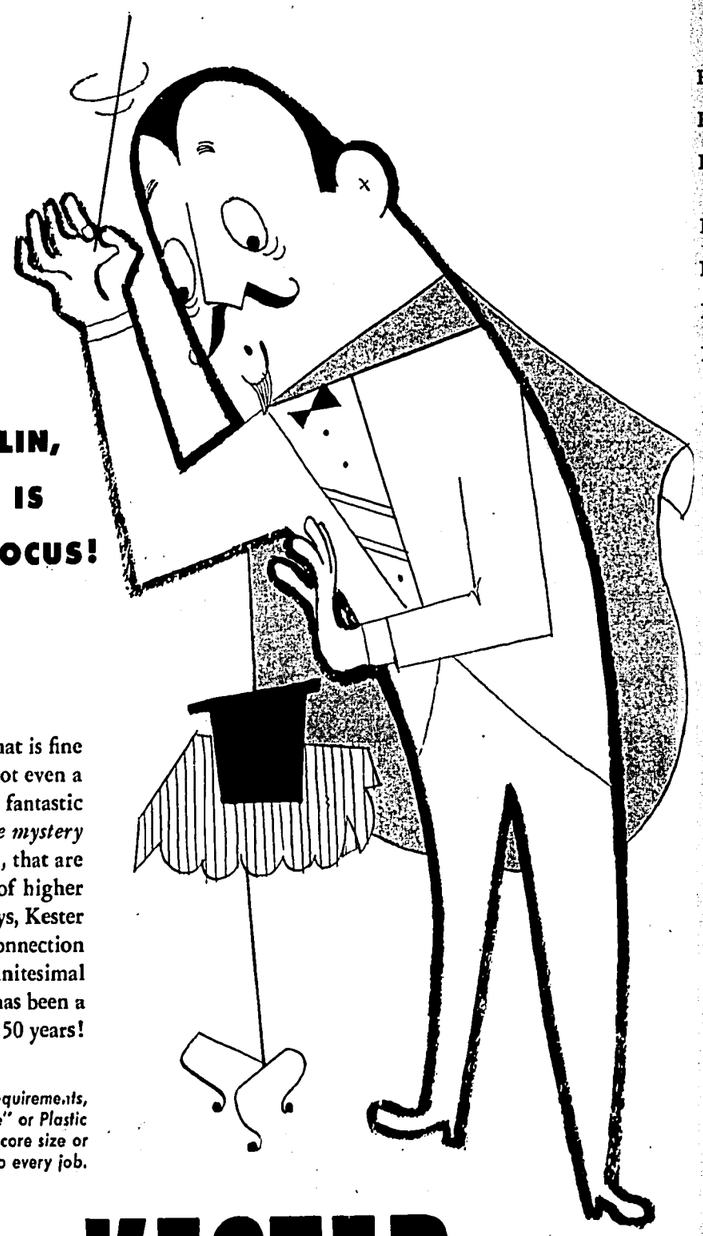
WELWYN



HIGH STABILITY
CARBON RESISTORS

Welwyn carbon deposit resistors are made to conform to tolerances dictated by the most exacting electronic requirements. Rigid quality controls maintain these precise standards to within the narrowest margins.

Values range from 10 ohms to 50 megohms, in ratings of 1/8, 1/2, 1, and 2 watts, and at tolerances of 1%, 2% and 5%. Welwyn Resistors have a high order of stability and retain their characteristics over widely changing conditions of load, temperature, voltage, and ageing processes. Inductive and capacitive reactances, and Johnson Effect are exceedingly low to extremely high frequencies.

REMEMBER, MERLIN, WAND WAVING IS STRICTLY HOCUS-POCUS!

Pulling a rabbit out of a hat is fine for entertainment, we agree. But not even a magician can make good on the fantastic claims attributed to cheaper solders, *the mystery alloys with a secret ingredient,* that are supposed to equal the performance of higher tin content solders. Today, as always, Kester believes, the quality of the soldered connection is what counts . . . *not* an infinitesimal saving. That's why Kester Solder has been a "star performer" for more than 50 years!

For your specific solder requirements, remember Kester "44" Resin, "Resin-Five" or Plastic Rosin-Core Solder . . . with exact core size or flux-content "tailored" to every job.

Specify KEPEACE for

DEMCO collector rings and ring assemblies give you these advantages . . .

ECONOMY . . . laminated construction provides contact metal where required . . . base metal for strength.

HIGH FINISH . . . on contact surface for long wear and noise-free operation.

PRECISION MADE . . . it is unnecessary to add further machine operations.

COMPLETE . . . rotor or pancake type multi-ring and ring-and-brush assemblies supplied.

PRECISION DRAWN . . . ID held as close as ±.001. Solid coin silver, brass or aluminum Rev. MIL-T-85.

LAMINATED SILVER . . . on ID for

- Low attenuation
- Corrosion resistance
- Highest mirror finish

Laminated silver ID and OD for round tuned lines.

Your inquiries are cordially invited and will receive our prompt and interested attention.

With nearly sixty years of experience in the production of both laminated and solid precious metals, MAKEPEACE is today an accepted "headquarters" for the many special precious metal products and assemblies called for in the electronic field.

Our staff of thoroughly experienced design and production engineers and metallurgists . . . as well as our research and testing laboratory . . . are all at your service.

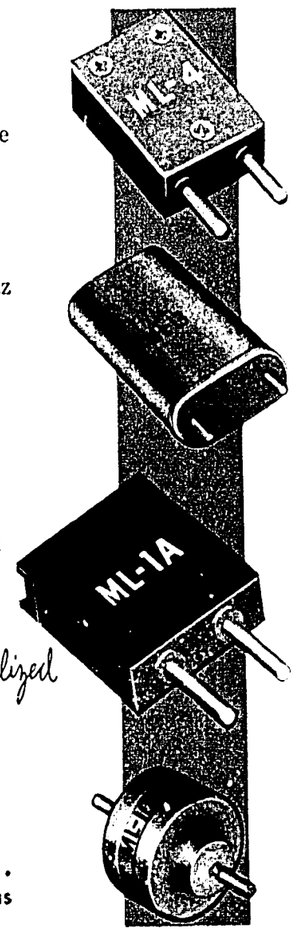
Type ML-6 **Range**
1.0 mc - 75.0 mc. supplied per mil Type CR-18, CR-19, CR-23, CR-27, CR-28, CR-32, CR-33, CR-35, CR-36, CR-48 when specified. Hermetically sealed metal holder with glass and metal base. Height of can is ¾-inch. Pins are .050" diameter, spaced .486".

Type ML-6A
Identical to Type ML-6 except provided with .093" diameter pins.

Type ML-14 **Range**
3.0 - 50.0 mc. Identical in performance to Type ML-6 except height of metal can is ½-inch.

Type ML-6W **Range**
3.0 - 15.0 mc. This unit is same as Type ML-6 except wire leads are provided, eliminating need for crystal socket.

CRITICAL QUALITY CONTROL



Pays Off in Performance of

Midland CRYSTALS

The quality of Midland Crystals—which is another way of saying the completely dependable job they will do for you—is assured by exacting tests and controls through every step of processing. The finest precision equipment and most advanced techniques known to the industry are used by Midland from selection of raw quartz to final sealing of the crystal.

That's a big reason why Midland has climbed to its present position as the world's largest producer of quartz crystals for use in 2-way communications and other electronic devices.

Midland's engineering staff is ready to help in any project involving the use of crystals.

Type ML-4 **Range**
1.0 - 10.0 mc. Supplied per mil Type CR-5, CR-6, CR-8, CR-10 when specified. Holder is phenolic, gasket sealed. Holder size is 1⅛ x 13/32 x ⅞ with .093" diameter pins ½" long spaced .486".

Type ML-13
Units of this type are currently undergoing tests on experimental basis. The unit is hermetically sealed. Pin dimensions are the same as our Type ML-6. Height of can is 1½-inch.

Type ML-1A **Range**
2.0 - 15.0 mc. Supplied per mil Type CR-1A when specified. Holder is phenolic, gasket sealed. Holder size is 1¼" x 1⅛" x 27/64" with .125" diameter pins ⅜" long, spaced at .500".

Type ML-10 **Range**
15.0 - 50.0 mc. Supplied per mil Type CR-24 when specified. Over-all length is 1.055". Pin contacts .062" diameter.

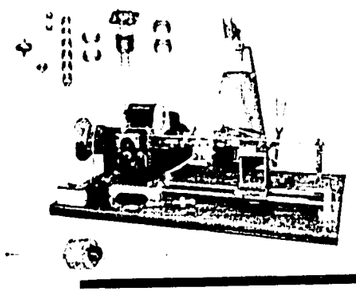
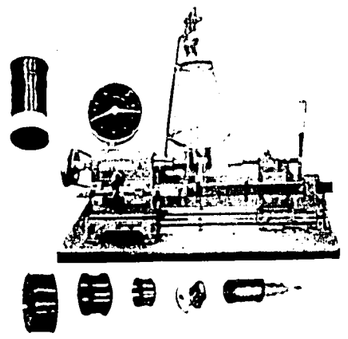
YOUR COIL CAN BE WOUND FASTER, CHEAPER, EASIER ON A GEO. STEVENS WINDER!



- **MORE OUTPUT...LOWER COSTS...** from EXCLUSIVE SPEED FEATURE. Variable speed motors permit speed changes without changing belts or pulleys. Coil design permitting, speeds as high as 7500 RPM are not uncommon.
- **MUCH FASTER CHANGING OF SET-UPS.**
- **MUCH LOWER ORIGINAL COST.**
- **LONG LIFE.** Most of the original Geo. Stevens Machines bought in 1936 are still operating daily at full capacity.
- **EASIEST TO OPERATE.** In one hour, any girl can learn to run a Geo. Stevens Machine.
- **MORE GEO. STEVENS** coil winding equipment is in use than all other makes combined.

SOON TO BE ANNOUNCED
NEW TORROIDAL WINDING MACHINE



MODEL 117-A
Automatic Heavy Wire Bobbin and Transformer Winder (Screw Feed)

—especially suited for winding *heavy* wire in tight, perfectly uniform layers for one or several Bobbin and Transformer coils for regular production. Laboratory or experimental use in *mi ttary and other types of equipment where space is limited.* Also winds single layer close or space wound coils.

MODEL 120-A
Universal Automatic Winder

—winds self supporting, lattice wound universal coils. More than 2 universal coils may be wound simultaneously. Also winds R F Chokes, single or Pi-wound.

MODEL 112
Bobbin Winder

—winds all types of random wound Bobbin Coils, Solenoids, Repeater Coils.

NEW GEO. STEVENS CATALOG--
describes machines that wind practically every kind of coil for laboratory or production line. Write for your copy today

How these "spheres" of RCA Engineering —work for YOU

RCA Development and Design Engineering—anticipates the need for new electron devices, and translates your requirements into practical designs.

RCA Quality Control Engineering—assures consistent quality, from the raw materials to the finished product.

RCA Production Engineering—develops production techniques and maintains product reliability.

RCA Commercial Engineering—edits and publishes the industry's most useful and comprehensive technical publications, for your convenience in using RCA Tube Department Products.

RCA Application Engineering—solves your special problems in tube and component applications.

RCA Field Engineering—provides "on-the-spot" technical consultation service—co-ordinates your requirements with other RCA Tube Department Engineering Services.

For expert help from your RCA Field Engineer, write RCA Commercial Engineering, Section 44R, Harrison, N. J. Or contact your nearest RCA Field Office:

NOTES

ROBINSON MET-L-FLEX all-metal mounts for vibration isolation and shock protection

FOR AIRBORNE ELECTRONIC EQUIPMENTS, INSTRUMENTS AND CONTROLS

SERIES 878 TWIN UNIT MOUNT ASSEMBLY

The assembly consists of two Series 7001 MET-L-FLEX Unit Mounts on a flanged tie-plate for attachment to your own tray or mounting base. S-1 and S-2 standard bases incorporate this assembly. Special widths and load ratings available. See Dwg. 878 B for details.

Robinson Model Number	Load Rating Lbs. Each End
878 1	½ to 1
878 2	¾ to 1¼
878 3	1½ to 3
878 4	2½ to 5½
878 5	5 to 10

SERIES 892 UNIT MOUNTING BASE

Designed and manufactured in conformance with JAN-C-172A and included specifications. "Proof Tested" Construction. Uses two Series 878 MET-L-FLEX Twin Unit Mounts and Bonding Jumpers. See Dwg. 892 B for details.

Robinson MET-L-FLEX Engineered Mounting Systems, Mounting Bases and Unit Mounts are compact, rugged and effective. They feature an exclusive all-metal resilient element, made of knitted stainless steel wire, fabricated and compressed. This cushion provides wide environmental tolerance with high built-in damping, resulting in "Sea level performance at any altitude". Its non-linear deflection characteristics permit optimum performance under load variations of as much as ±50% of mean ratings. Auxiliary MET-L-FLEX limiter pads afford additional protection against extreme overloads and impacts.

Further "Plus Features" exclusive with all MET-L-FLEX Mounts and Mounting bases are: negligible drift rate; wide temperature tolerance (−90°C to +175°C); and amazingly long service life without maintenance. They completely lack those faults and weaknesses inherent to mountings incorporating organic or plastic materials.

The "Plus Features" of Robinson Mountings, providing performance in excess of current specifications, pay off in maximum protection of the mounted equipment.

For complete performance and construction details, write for Technical Bulletins IRE-700 and IRE-750 and the telephone number of your local representative.

*MET-L-FLEX is the copyrighted designation for the all-metal resilient cushions developed and pioneered by Robinson.

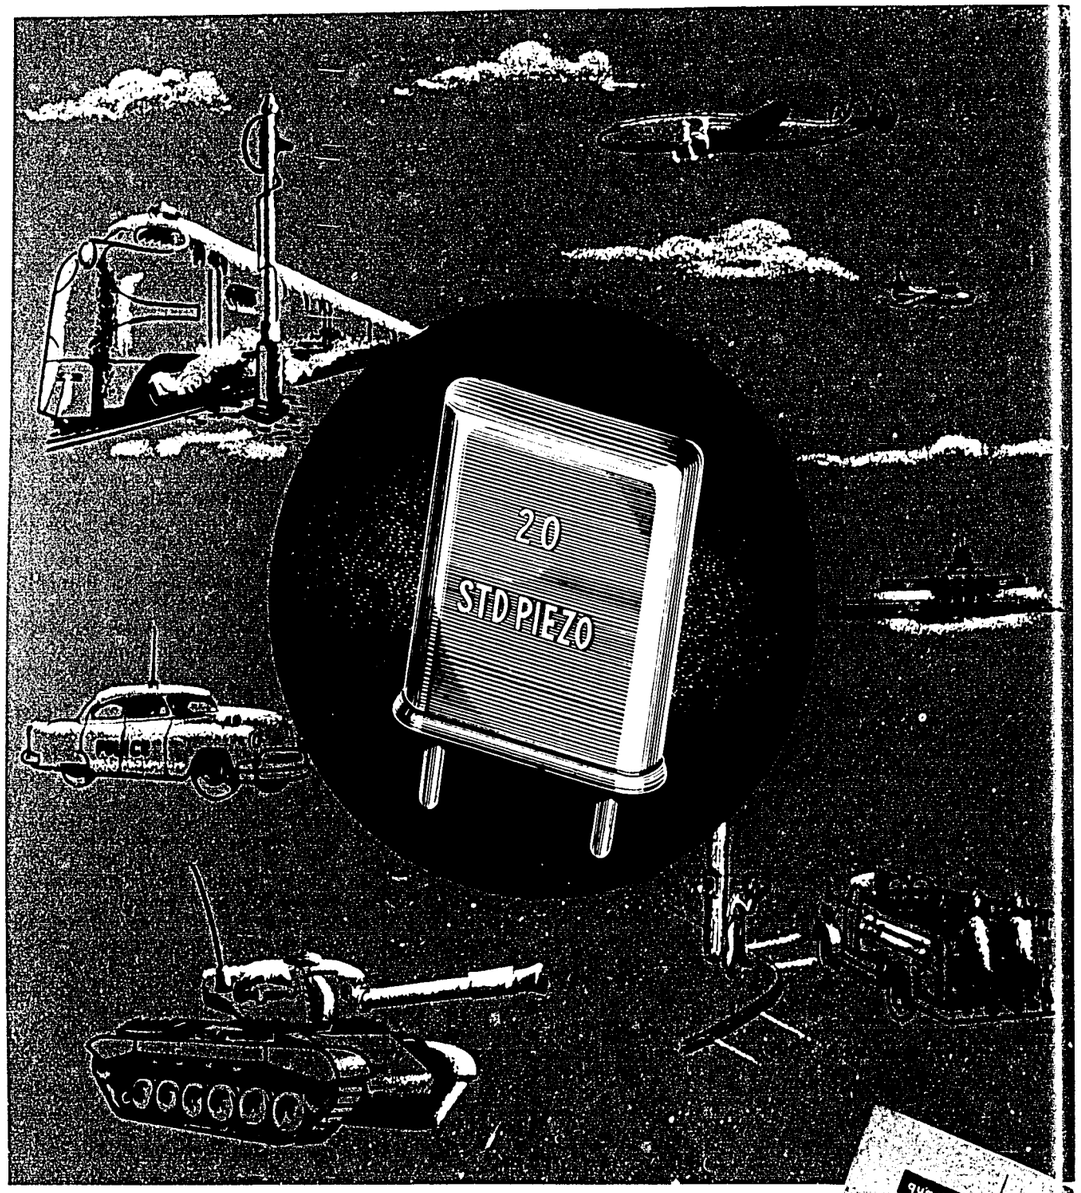
NEW USECO

ENGINEERING MANUAL

Send now for your copy of this new 36-page manual. It covers our complete line of Standardized Electronic Hardware.



It gives detailed prints and specifications covering types, sizes, materials, finishes and complete engineering data on our terminal lugs, terminal boards, insulated lugs, chassis bushings, stand-offs, spacers and other electronic items in both standard and miniature sizes. Contains everything required for the design engineer. Especially helpful to the new user.

USECO hardware has been tried and proved in the field, and, through mass production, has been made available at competitive prices. Prompt deliveries. Today's mail answered *today!* Terminal boards fabricated to manufacturer's specifications. For your copy of New Engineering Manual, write

WASSCO GLO-MELT RESISTANCE SOLDERING for complete details WRITE

PLIERS HANDPIECE for "sweat" soldering joints in copper tubing, piping and large electrical terminals. It is used with the basic GLO-MELT Power Unit where ground connections are inconvenient or where heat of two carbons is required. Sturdy, lightweight—made of aluminum and tough fibre. Ideal tool for plumbers, refrigeration and motor repair shops!

COMPLETE LINE OF SOLDERING ACCESSORIES ALSO AVAILABLE

Panel Accessory for production line soldering of small parts held across the gap of 2 carbon tips

Basic GLO-MELT Power Unit is rated at 450 Watts 24 separate heats Uses 115 V 60 cycle power source

*The Helostama Temmincki, or Kissing Gourami has definitely made some sort of connection. This type of connection can only be determined by experts in the field of Ichthyology.

However, when dealing with connectors or connections for Electronic application, only an expert in that field can design and produce the proper connection for your specific need.

USC's complete engineering, tooling and production facilities are geared to produce quality connectors, allied components and assemblies.

Over 25 years experience is at your service

Assemblies custom engineered and produced to your exacting requirements.

The first few times you use this

EDGE INDEX

follow the "How to use" instructions slowly—ONE STEP AT A TIME.

After that you will be able to open easily and almost instantly to the section or letter that you seek.

HOW TO USE

1. With the directory open on the desk, place the four fingers of your right hand on the back cover and your right thumb near the middle of the edge of this page.
2. Raise your right hand (about 2 inches) and move it to the left until the pages are bent almost double.
3. From the 1 or 2 line symbol adjacent to the section or product you seek, run your eye across the page edges until you reach the horizontally corresponding symbol.
4. OPEN THERE

IT IS EASIER IF YOU "FAN" OR "RIFFLE" THE LAST FEW PAGES WITH YOUR RIGHT THUMB. THE EDGE INDEX COVERING THE OTHER 7 DIRECTORIES WILL BE FOUND OPPOSITE PAGE 128.

Classifications with a System!

THE IRE Directory Product Classifications have both a pattern and a purpose. They differ widely from most product indexes, deliberately. They aim to organize the hundreds of products and services of a complex technical industry according to the way engineers think. To this end, the product grouping follows the pattern of the IRE Professional Groups, broadly. The result is a division of all products and services into ten fundamental indexes into which 100 basic classifications have been organized.

You will note that we here differ from most directory compilers, for we do not mix meters with motors simply for alphabetical reasons. Products used in "Audio" whether components or complete apparatus form the first fundamental group. Yet, the same manufacturer and product may also appear in the "Component Parts" section. This system gives subject grouping for speed and convenience. A directory should aid a man who has forgotten some detail, or product name. Ours helps by grouping products as one would *think*.

1. **Audio Frequency Equipment** (Products 1 to 11)
2. **Broadcasting Equipment** (Products 12 to 17)
3. **Communications Equipment** (Products 18 to 25)
4. **Component Parts** (Products 26 to 58)
5. **Applications of Electronics** (Products 59 to 66)
6. **Radar, Microwave, UHF** (Products 67 to 70)
7. **Services and Materials** (Groups 71 to 87)

   Here we separate the consultant, the fabricating firm, the machine for radio manufacturing, and basic materials from being lost in an alphabetical maze of component and test equipment names.
8. **Test & Measuring Equipment** (Products 88 to 96)
9. **Education & Publishing** (Groups 97 & 98)
10. **Distribution Functions** (Service 99)

For detailed identification, these 100 products and and services, grouped in the 10 indexes, are further defined into nearly 500 named products. We have tried to avoid oversimplification, and a tremendous amount of information is given by our product number system. But, the basic indexing adds speed. Purely alphabetical directories are as slow and cumbersome as a telephone book. IRE engineers have liked our system better!

For safety, an alphabetical "terminology" index is given, preceding the product system in the pink pages introducing the company index. You will note also that after each firm, its products are listed by number code in the alphabetical list, and that sub-classifications shown by number code in the product indexes give much detail. Just a little study of the system will help you get great good from this book.

The IRE DIRECTORY is 10 Indexes in one book.

The products and services of the Radio-Electronics industry have been organized into ten basic directories following closely the organization of the IRE Professional Groups. But 100 major product groups are numbered consecutively throughout.

Always consult the pink pages at the start of the Directory of firms, for a terminology cross-index, or to find products by name. The pink pages list more than 500 products by name, as well as under the product groups. Page numbers are given for speed.

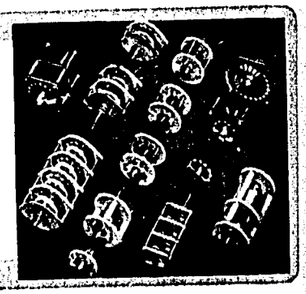
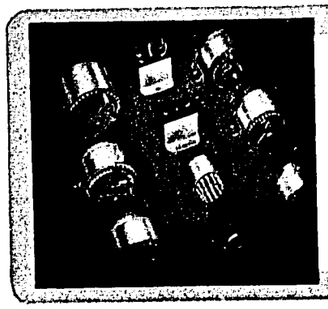
SHALLCROSS





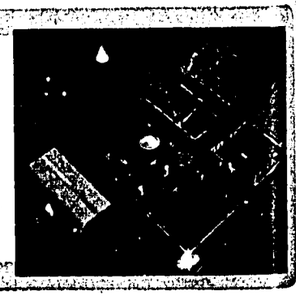
AKRA-OHM PRECISION RESISTORS

Not only are Shallcross Akra-Ohm precision wire wound resistors made to extremely close tolerances; equally important, they are physically protected to maintain their accuracy under difficult operating conditions. Types, shapes, sizes, and mounting styles for JAN, MIL, and other exacting needs. Guaranteed tolerances to 0.01% and stabilities as low as 0.003% where required. Matched pairs and sets available. Write for Shallcross Resistor Bulletin R-3C.

MULTI-POSITION SELECTOR SWITCHES

Shallcross regularly manufactures a wide variety of single or multi-deck selector switches having up to 180 positions and designed for dependable performance up to 250 volts 10 amperes, or 2500 volts 1 ampere A.C. Contact resistance ranges from as low as 0.0005 ohm to a maximum of 0.005 ohm depending upon the size and material of the contacts. Outline your requirements on Specification Sheet No. 6 for recommendation. Write for Data Bulletin L-13.

PRECISION AUDIO ATTENUATORS



Improved materials and production techniques and careful quality control for Shallcross Attenuators have resulted in a line that sets higher standards of attenuation performance for practically every audio and communications use. Included are single and dual potentiometers, variable impedance matching networks, V. U. meter multipliers, cueing attenuators, fixed pads, pre-emphasis and de-emphasis networks, attenuation boxes, ladder and balanced ladder controls, bridged T, straight T, bridged H, and straight H attenuators. Write for Attenuator Bulletin 4-A.

PRECISE MEASURING INSTRUMENTS

As long-time specialists in standard and special electrical measuring instruments, Shallcross welcomes your inquiry for any desired types. Standard instruments include:

Resistance Standards • Decade Potentiometers • Decade Resistance Boxes • Wheatstone Bridges Combined Kelvin-Wheatstone Bridges • Wheatstone-Megohm Bridges • Wheatstone-Limit Bridges • Percent-Limit Bridges • Capacitor Analyzers • Decibel Meters • Tone Generators Telephone Test Equipment • Low-Resistance Test Sets • High-Voltage Test and Measuring Equipment.

Write for Shallcross Bulletin DC

TUBULAR MULTIPLIER RESISTORS

Shallcross Types MFA and MFB are special resistance elements hermetically sealed in ceramic tubes with ferrule terminals. Designed to Jan-R-29 specifications, they are available with ratings from 1 to 6 watts and for potentials from 1 to 6 KV.

HIGH-RANGE KILOVOLTMETER MULTIPLIERS

Whether for direct high-voltage measurements or for use as standards, Shallcross KV meter multipliers combine close accuracy with safety and dependability. Various types are available for voltages up to 200,000 volts or higher if required. Write for Bulletin L-7.

HERMETICALLY-SEALED NETWORKS

Resistance, capacitance, bridge and inductance types available to meet critical electrical specifications and space requirements. Outline details of your requirements for recommendation by Shallcross Engineers.

CUSTOM-BUILT SPECIALTIES AND ENGINEERING SERVICE

Sealed networks, high voltage measuring equipment, special test sets, thermally controlled networks, precise decades and networks for computer devices, high resistance standards, and critical coil assemblies are designed by Shallcross Engineers and built to meet your requirements. Forward your specifications for further information.

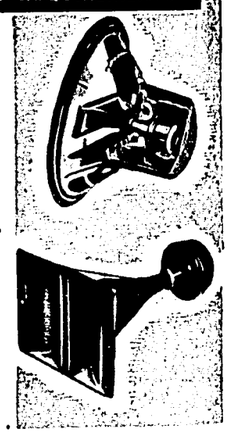
There's a University Loudspeaker

RUGGED! DEPENDABLE! VERSATILE!

FOR EVERY COMMERCIAL AND INDUSTRIAL APPLICATION

TRUMPETS Model 7102 exemplifies the rugged construction and progressive engineering behind every University product. Model 7102 is the *only* loudspeaker ever approved by Underwriters' Labs for Class II Groups E, F, & G hazardous area duty. Features include re-entrant trumpet (pioneered by University) for compactness and greater efficiency, heavy duty 25 watt driver unit with exclusive University "W" shaped Alnico V magnet, and *built-in* line matching transformer with impedances of 16, 45, 500, 1000, 1500, and 2000 ohms. See general catalog for trumpets of all sizes.

BREAKDOWN-PROOF DRIVER UNITS Model PA-30 embodies features developed by University and never successfully imitated. Ratings are conservative, and construction is to well known University standards which have made our drivers famous for their dependable performance. PA-30 is rated at 30 watts, with response 80-10,000 cps, and is the first to have a multi-tap built-in line matching transformer. Exclusive "rim centering" construction of mechanism and use of University "W" shaped Alnico V magnet insures high conversion efficiency, permanent voice coil alignment regardless of shock or vibrations. Weatherproof throughout.



PAGING AND INTER COM SPEAKERS These feature reflex air columns with hermetically sealed driver units. They are widely used for intercommunication and paging of all types. Efficiency is high and reproduction exceptional at any volume level. Directional, radial, or bi-directional types available. Weather-proof finishes permit use anywhere. Typical of University pace-setting design is the Cobra-12 illustrated, which provides optimum area coverage with minimum power input. Power rating is 12 watts, frequency response 250-10,000 cps, dispersion angle 60° x 120°. Swivel mounting bracket provides full flexibility.

SUBMERGENCE-PROOF SPEAKERS These types are designed for use where extreme ruggedness and immunity to spray, gases, live steam or dust are essential. Function even under water, drain automatically, operate continuously regardless of exposure. Models available for directional or radial projection, wall or bulkhead mounting, swivel mount and with or without built-in line matching transformer and attenuator. Design is ideal for railroad use, shipboard, industries, docks, rough mobile work, etc. Model MM-2, illustrated, is rated at 15 watts continuous IPM, frequency 300-6000 cps, impedance 16 ohms.

FOR ALL HIGH FIDELITY REPRODUCTION REQUIREMENTS

WIDE RANGE CONE SPEAKERS Model 6201 comprises a superb 12" cone speaker with a driver type tweeter mounted coaxially. The cone speaker features a 24 oz. "W" shaped Alnico magnet and edged treated cone for distortion-free low frequency response. Tweeter has wide angle horn. A built-in LC crossover network and external high frequency attenuator are included. Capacity is 25 watts, response 45-15,000 cps, impedance 8 ohms. Other cone speakers for high fidelity, as well as submergence-proof or blastproof service for commercial and military applications.

HI-FREQUENCY TWEETERS University offers a complete line of single and double tweeter units for both 2000 and 600 cycle crossover. Exclusive University "reciprocating flare" horn construction assures uniform wide angle dispersion. A complete line of accessories are included—crossover networks, adapter for mounting tweeter on a standard cone speaker, etc. These tweeters may be added to any standard amplifier and speaker to provide the finest in high fidelity reproduction—and at a very low cost.

KELLOGG

Magnetic Impulse Counter

Check these features

- ☐ The long life and dependability characteristic of relay equipment.
- ☐ Occupies space of only two telephone relays.
- ☐ Operates over a wide range of pulse ratio and frequency.
- ☐ Replaces a chain of well designed relays at small fraction of cost.

It's new — but already Industry is pouring in orders for Kellogg's unique *Magnetic Impulse Counter!* . . . Why? Because it is simple, it saves space and it has a wide application in many fields. Actuated by electrical impulses, the Kellogg Magnetic Impulse Counter performs the counting and marking function of a chain of from 10 to 20 relays — or of a two-magnet ten-point stepping switch. It does this in less space and with assured reliability! It has many uses — from industrial control, to any system where trains of impulses, such as generated by a telephone dial, are to be counted. Get the facts. Get them now! Find out how the Kellogg Magnetic Impulse Counter can save you money. A request on your letterhead will bring particulars.

KELLOGG

Midget Condenser Microphone

- Uniform Dependable Response
- Exceptional Calibration Stability
- Laboratory and Industry-Proved Performance

Here's the device you need for precision sound measurements and high quality recording! . . . It's the Kellogg Midget Condenser Microphone. Of rugged, long-lasting construction; humidity-proof and exceptionally reliable, it satisfies the exacting requirements of government laboratories, universities, audio development laboratories, sound studios and others manufacturing sound equipment. Write for complete information.

PICKERING PICK-UP CARTRIDGES

- For the utmost in record playing pleasure
- For the greatest length of satisfactory service
- For those who want and demand the highest quality record reproduction, with all of the original modulation, realism and brilliance
- For minimum record wear
- For minimum extraneous and annoying sounds

120 SERIES	for transcriptions and lacquer discs
MODEL R-150	for phonograph records
140 SERIES	for microgroove records

All Pickering Pick-up Cartridges are available with either a Diamond or Sapphire Stylus. . . . Diamond Styli are good for thousands of playings whereas Sapphire Styli require replacement after a few hundred [illegible].

Pickering also manufactures Pick-Up Arms, Preamplifiers, Equalizer-Amplifiers and Equalizers.

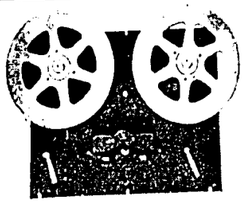
PRESTO SHOWCASE



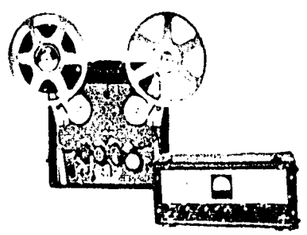
of the world's finest recording equipment

TAPE EQUIPMENT

NEWEST PRESTO TAPE RECORDER RC-11

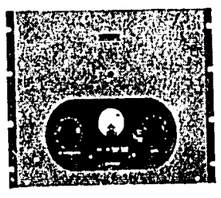
Radical new "unitized" construction with self-contained capstan drive unit. Reel size up to 10½ inches; three enclosed heads; push button operation; heavy ribbed aluminum panel. PRESTO'S most advanced tape recording mechanism.

LONG-PLAYING TAPE REPRODUCER PB-17



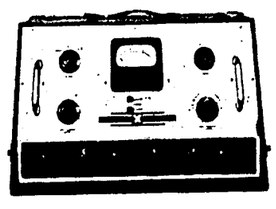
Designed especially for background music in industrial plants, entertainment locations, ships and trains. Eight hour tape cycle at 3¾"/sec.; dual track; 4800 ft. reel capacity; frequency resp. is 50 to 8,000 cps. (±2db)

TURNTABLE-DRIVEN TAPE REPRODUCER TL-10



Most amazing development to hit the recording field in years. Makes any standard 16" turntable quickly adaptable to tape. Turntable acts as motor; speeds of 7½"/sec. and 15"/sec. Plugs into standard studio speech input equipment; no preamplifier required.

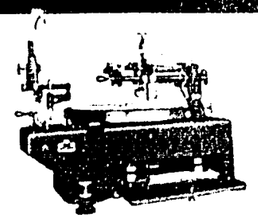
RECORDING AMPLIFIERS



PRESTO PORTABLE PT-920

This popular portable tape machine is shown here with the new RA-1 reel adapters which increase its reel size to 10½ inches. Three motor drive without friction clutch or friction brakes, 15,000 cps. frequency response and excellent dynamic range.

PRESTO 92-B



PRESTO'S famous 60 watt recording amplifier for rack mounting. Removable front panel makes maintenance easy. Selector switch and one meter indicate output level and tube plate currents. Push-button selector for recording characteristics. Response: 20 to 17,000 cps.

PRESTO PORTABLE 90-B

Qualities of high fidelity studio console b portable, with complete facilities for remo operation. Distortion of less than 1.5% maximum output. Equalizers for flat, NA 33⅓ rpm, phono, NAB playback and au matic. Three-microphone input with mix and master gain control.

DISC EQUIPMENT

PRESTO STUDIO CONSOLE 8 D-G

Designed to cut the finest instantaneous and master recordings. Has radial cantilevered overhead requiring no turntable contact. 1-D cutting head. Direct gear drive and twin motors. Eight different feed pitches in each direction, including 250 lpi. microgroove.

PRESTO TRANSCRIPTION TURNTABLE 10-B

Here is an improved model of the famous PRESTO 10-A which has been the preferred turntable in hundreds of broadcast stations. The 10-B is a rim-driven table of exceptional accuracy with 3-speed mechanism. Offered as chassis only or in console cabinet.

PRESTO PORTABLE RECORDER 6-

World favorite! Unusual reliability un all recording conditions. Low mechani noise level. Speed accuracy excellent at and 33⅓ rpm. Equipped with 1-D cutt head. Microgroove attachment availble extra cost.

ANTENNA MANUFACTURERS FOR THE ELECTRONIC INDUSTRY

MICROWAVE ANTENNAS

Workshop antennas are widely used in microwave communications. Railroads, pipelines, utilities, television relay, and overseas networks have found Workshop precise engineering and rugged construction to fully meet their requirements. Workshop was first with a complete microwave antenna line, and continuing development by the Gabriel Laboratories maintains that leadership.

940 mc—For the 940 mc band a center-fed parabolic antenna is available in diameters of four or six feet. Both models terminate with a weatherproof type "N" connector for use with RG-8/U cable.

2000 mc—A new Offset Feed Antenna has been designed to cover the entire 2000 mc band requiring only one feed. The offset design removes the horn feed from the radiated field of greatest intensity, resulting in less energy being reflected into the horn feed. Measurements of 1.2 maximum VSWR can be maintained over the 1700 to 1990 mc band with this six-foot antenna.

7000 mc—After years of development and research, the engineers of the Gabriel Laboratories have produced a sensational antenna feed with outstanding electrical characteristics. This new antenna feed design maintains a VSWR of less than 1.13 over a 300 mc band for each of nine models covering a range of 5900 to 7425 mc. Available in 4-, 6-, and 8-foot diameters.

Accessories—Heavy-duty Workshop mounting clamps, model CP-4/6, provide a tilting range up to 3 3/4° and attach to pipe diameters of 2 1/2" to 4". Specifically designed for the harshest weather conditions, the Workshop heater permits continuous antenna operation in sleet, hail, ice, or snow.

UHF TELEVISION TRANSMITTING ANTENNAS

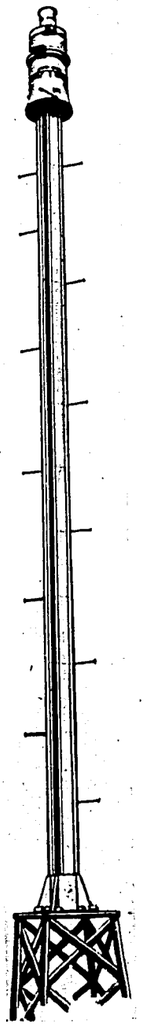
To meet the broadest requirements of isolated communities as well as large metropolitan areas, the Gabriel Laboratories has designed a high-gain UHF television antenna for Workshop which combines simplicity, ruggedness, and reliability.

With 25 and 14 power gain models in production, this new antenna is already rated as one of the best by electronic engineers. Its radiation pattern is the closest approach to a cosecant curve of any antenna now available. Efficient electrical design provides excellent impedance characteristics and makes possible null fill-in and adjustable beam tilt, if desired.

A standard input flange for 3 1/8" coaxial line makes the antenna readily adaptable to the use of waveguide. In addition, provisions for mounting a 300 mm beacon are incorporated in the antenna top.

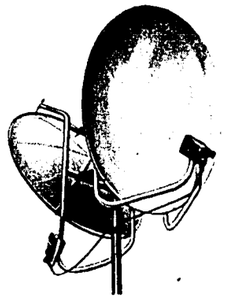
Simple mechanical design results in a relatively low-cost antenna which has no insulator except for gas seal, no de-icing problems, and no field repair problems. The plastic weatherizing windows which protect the radiating structure are dyed "international orange," according to the latest F.C.C. regulations, so that the antenna never requires painting. Galvanized, welded steel construction assures excellent rigidity, corrosion resistance, and long life.

COMMUNICATION ANTENNAS



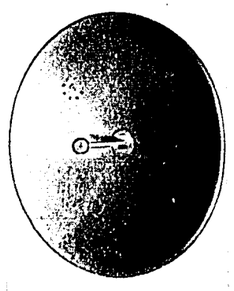
Directional—Workshop Directional Antennas are expressly designed for commercial point-to-point communications. Six-element arrays, consisting of two bays of reflector, dipole, and director provide unparalleled performance. A model for each frequency band assures constant impedance and a low VSWR for maximum efficiency. Models cover the 29 to 50 mc, 72 to 76 mc, and 140 to 174 mc bands.

Beacon—For omni-directional coverage Workshop High-Gain Beacon Antennas give you performance that is outstanding and dependable. These antennas are "series fed" to insure that the power is equally divided between the radiating dipoles for concentration of energy on the horizon. All radiating elements are completely weatherproofed. Models are available for the 144 to 162 mc and 450 to 470 mc bands.

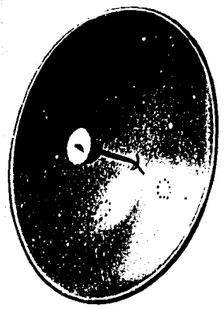


ENGINEERING AND CONTRACT SERVICE

Workshop handles scores of special government and commercial antenna problems every year from design through production. New acquisitions of $300,000 in machine tools provide one of the most complete antenna production facilities in the world, available for the design, manufacture and test, to your specifications, of complete antenna assemblies. These new facilities are supplemented by the Gabriel Laboratories in Needham, Mass., which has long enjoyed a reputation as one of the leading antenna laboratories.



If your product or service requires antennas or waveguide components—research, design, test or production—get in touch with Workshop. Write or phone Norwood 7-3300.



UHF transmitting antenna for television—featuring null fill-in, a Workshop exclusive.

Model 2K6T, six-foot offset feed antenna, covers entire 2000 mc band.

Model 7K4B2, four-foot parabolic antenna, for 7000 mc band.

Model 9406, six-foot diameter antenna, covers the 920-960 mc band.

The products and services of the Radio-Electronics industry have been organized into ten basic directories following closely the organization of the IRE Professional Groups. But 100 major product groups are numbered consecutively throughout.

Always consult the pink pages at the start of the Directory of firms, for a terminology cross-index, or to find products by name. The pink pages list more than 500 products by name, as well as under the product groups. Page numbers are given for speed.

ELECTRONICS unlimited?

Well — almost. After you have discussed your problem with us we think you will agree that the solution of problems by electronics is almost *unlimited*. Pickard and Burns offers a completely integrated service for consultation, research, development, instrumentation, and custom manufacturing, in the various phases of electronics and radio.

The staff includes experienced specialists in electronics, physics, mathematics, navigation, geophysics, statistics and technical economics.

Facilities include a well equipped electronic laboratory, model shop, antenna laboratory and range, as well as manufacturing facilities for custom built apparatus.

MEASUREMENT AND TEST EQUIPMENT

BOLOMETER AMPLIFIER, Model 100. A high-precision instrument to aid in measuring RF field strengths of antenna systems and RF networks.

BOLOMETER AMPLIFIER, Model 60. A highly accurate instrument not requiring the special features of Model 100.

LOG-LINEAR CONVERTER, Model 86. Will convert any 50 kc. signal to logarithmic form up to 100 db. for direct meter reading or to operate any conventional linear recorders.

CROSBY

Sets a new standard of performance in radio communications.

Single-Sideband and Exalted Carrier Receivers.

Multiplex Transmitting and Receiving Equipment.

Broadcast and Communications Apparatus.

CROSBY LABORATORIES, Inc., is an engineering, development, and production firm with a background of successful, progressive experience in the fields of radio communication and applied electronics.

The products of the Laboratories are now in use in Governmental and commercial radio services in many parts of the world.

Behind these products is an able staff of electronic engineers, and a modern laboratory with extensive facilities for research and development, equipped with production tools of the latest design.

Gray RESEARCH

Networks and independent stations everywhere recommend and approve Gray professional equipment for broadcast station use. Such broad acceptance is not unwarranted. The products here mentioned are designed and engineered by audio and video specialists . . . incorporate highest quality and serviceability . . . are rightfully leaders in the industry.

. . . for the finest equipment for AM-FM-TV station use

Gray TELOP I (TELevision Optical Projector)

Make PROFITS GROW for TV Stations. The Gray Telop projects low-cost, easily produced TV 'commercials'. Without keystoning, any two photos, titles, slides, etc., or small objects may be broadcast with superimposition, lap dissolve or fade-out. Four optical openings. Strip material may be used horizontally or vertically with Drives shown below.

Gray TELOP II

With the versatile Gray TELOP II you can produce an amazing variety of professional-quality commercials at low cost. TELOP II presents selling messages with opaque cards, photographs and transparencies. You can get the effect of superimposition, lap dissolve and fade-out. Only limitation is your imagination. One operator does it all!

Gray 3A TELOJECTOR

Compact, portable unit for automatic, remote control projection of standard 2 x 2 slides in uninterrupted sequence . . . with studio effects of fading, lapping and superimposition. Projection alternates between two lens systems, with slide turrets changeable in seconds.

Gray 55A FILM CAMERA TURRET

Enables a single camera to serve up to 8 projectors. Centered on a rugged 'square' pedestal, requires a minimum of space. Heavy duty ball bearings. Rotates 360°.

Gray 11A VERTICAL SCROLL DRIVE

Attaches to any optical openings of the Telop. Accommodates roll stock *vertically* to televise commentary or the commercial in the same way movie introductions are projected.

Gray 60A FOUR-WAY FILM MULTIPLEXER

A precision arrangement of mirrors for operation of pairs of projectors simultaneously into a single TV camera or individually into two separate cameras. *Enables a greater number of projectors to be used with fewer highly expensive TV cameras.*

Gray 13A LIGHT BOX

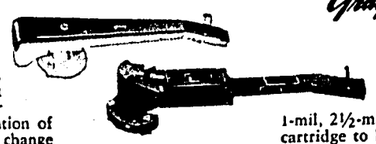
Provides back lighting of transparencies for Telop use.

Gray 12A HORIZONTAL TAPE DRIVE

Attaches to optical openings of the Telop. News ticker tape fed from 8-mm reels is projected on any part of the screen, top to bottom, horizontally. May be used with test pattern or other commercial.

Gray 15R REVERSE CLOCK

For use where reversal is required. Designed to permit superimposing of the commercial or other copy.



Gray EQUALIZERS

MODEL 602B EQUALIZER has been specially engineered to provide constant velocity frequency response for both conventional and LP records. Four steps — flat, transcriptions, good records, poor records. Gray Equalizers used as standard professional equipment by broadcast stations.
MODEL 603 — Has 5 control positions. For both GE and Pickering cartridges.

Gray 108B VISCOUS DAMPED TONE ARM

For all records — 33⅓, 45 and 78 r.p.m. Radically new suspension development on the viscous damping principle *for perfect tracking* of records and elimination of tone arm resonances. Instant cartridge change with automatic correct stylus pressure. Solves all transcription problems. IDEAL FOR LP RECORDS. For Pickering and GE cartridges.

Gray 106SP TRANSCRIPTION ARM

Designed to meet strictest requirements of modern highly compliant pickup cartridges. Three cartridge slides furnished enable GE 1-mil, 2½-mil or 3-mil cartridges or Pickering cartridge to be slipped into position in a jiffy. No tools or solder! Superb reproduction of 33⅓, 45 or 78 r.p.m. records. Low vertical inertia, precisely adjustable stylus pressure.

Please write Dept. RB for bulletins describing the above equipment.

From Station Break to Feature... the NEW "BALANCED" TV Tripod is doing a whale of a job every day!

WE THREW THE book away and engineered a brand new "BALANCED" Tripod for every photographic and video need. The result—a revelation in effortless operation, super-smooth tilt and 360° pan action.

PERFECT BALANCE prevents mishap if the lock lever is not applied. Quick release pan handle locks into desired position. Mechanism is enclosed, rustproof, needs no lubrication. Tension adjustment for Camera Man's preference. Built-in spirit level. Telescoping extension pan handle. We defy you to get anything but the smoothest, most efficient operation out of this tripod beauty.

Head illustrated contains adjustable camera tie-down screw for locating center of gravity. This feature is optional.

"BALANCED" TV TRIPOD mounted on 3-wheel portable collapsible dolly.

If you work with film... **for Studio, Newsreel, Commercials, Business, Industrial or Home Movies—it will pay you to get to know us. The country's foremost professionals depend upon our portable, versatile, adaptable equipment.**

NTSC

COLOR TV

TELECHROME'S NTSC "COLOSSUS"

Based upon solving many color TV problems we have evolved the NTSC Colossus — a unit specifically designed to enable the Industry to embark promptly on color programs by acquiring color equipment as required.

America's leading Radio—TV organizations are now using Telechrome equipment.

MAXSON
PRECISION PHASE METER

for precise measurement of phase difference at audio frequencies

THE MODEL P-1060 PHASE METER is invaluable wherever precise knowledge of phase relationships in the audio-frequency range must be obtained. It has found increasing acceptance in the design of reactive components or of equipment using them, and in such analytical applications as measurement of residual inductance in "non-inductive" resistors, measurement of stray capacitance across resistors, and investigation of phase relationships in navigational and data-transmission systems.

Employing the phase-comparison method, the instrument exhibits a high degree of accuracy and incremental discrimination. The calibration may be checked with auxiliary equipment available in most laboratories. Even-order harmonic distortion is cancelled and odd-order distortion up to 1% will not affect accuracy of reading.

SPECIFICATIONS

Equipment, when removed from cabinet, is suitable for mounting in standard 19" relay rack.

WRITE TODAY for descriptive bulletin No. IR-53.

Frequency range	30 to 20,000 cps
Phase range	0 to 360 degrees
Accuracy	0.1 degree
Incremental discrimination	0.01 degree
Signal level	0.5 to 10 volts rms
Input impedance	10 megohms shunted by 25 $\mu\mu f$
Display	Decade null system
Output jack	Can be provided for operating external recorder
Power requirements	200 watts at 105-125 volts, 60 cycles
Size	19½" wide, 16¼" deep, 25" high
Weight	110 pounds
Cabinet	Internally shielded walnut cabinet.

A.R.C. SIGNAL GENERATOR

Gives a Quick, Accurate Check of VHF Airborne Navigation Equipment

TYPE H-14
108-132 Megacycles

■ Favorite, dependable instrument for quick, accurate check of VHF airborne omnirange and localizer receivers in aircraft or on the bench. It checks up to 24 omni courses, omni course sensitivity, to-from and flag-alarm operation, left-center-right on 90/150 cycle localizers. Widely used for all quantitative bench tests. For ramp check, RF output 1 volt into 52 ohm line; for bench checks, 0-10,000 microvolts. AF output available for bench maintenance and trouble shooting.

Price $942.00 net, f.o.b. Boonton, N.J.

Ask for literature on new A.R.C. Type H-16 Standard Course Checker—a simple, precise instrument for checking the phase-accuracy of the modulation on VOR (omnirange) signal generators. For laboratory or field use.

ALFAX the NEW Universal Recording Paper
for HELIX, STYLUS, ROLLER or IMPRESSION PRINTING and RECORDING

Now for the first time there is available a universal paper for instrument and facsimile recording applicable to any type of printing or recording means known today.

ELECTRICITY IS THE INK

Marked by current as low as 1 volt, ALFAX now makes possible low-cost recorders of new simple design.
ALFAX is the only paper capable of high speed recording — normal writing speeds up to 300" per second.
ALFAX records faithfully under extreme humidity, and over all temperature ranges from stratospheric to sub-tropical.
ALFAX provides a THIRD DIMENSION thru 14-step tone response.
Find how this new universal paper can serve you to PRODUCE Memories — to RECORD Computer Totals, Radar Signals, Sonar Signals, Infra Red Signals, Telemetered Data — to DISPATCH Business Records and Information — to MONITOR Any Operation, Any Process — to PROVIDE Information for Analysis Studies.

Request Booklet "Recording with Alfax" — describe your problem.

ENGINEERING SERVICE TO RECORDER MANUFACTURERS

Alden Monitoring Recorders

Providing an extremely simple method of getting permanent records of number and time of almost any actions or occurrences — with simple rugged Recorders that can be used under almost any conditions — installed by anybody.
The basic simplicity of these recorders is made possible by the use of Alfax Electro-sensitive Paper in which electricity is the ink. This paper records under climatic extremes of humidity and temperature and making possible simple, rugged recorders without need of delicate mechanisms or complex moving parts.

ALDEN MAGAZINE RECORDER

Records 2 actions plus timing marks. Just plug into AC outlet and run wires to source of on-off actions.

ALDEN MULTI-CHANNEL RECORDER

To record up to 30 separate tests, actions and processes, all on 5" paper.

Facsimile Components Available

It's immensely simple — and inexpensive — to build your own recorders with our unitized facsimile recorder components.

You Name The Height Your Antenna Must Reach...

● Whether your needs call for a medium-sized 300 foot tower, a lofty 1200-plus foot giant, or any size in between, Truscon engineers have the answer . . . or can get it to you fast. Truscon has designed and built many hundreds of radio towers now serving in all kinds of climate and all types of topography. Truscon builds 'em for you tall or small . . . guyed or self-supporting . . . tapered or uniform in cross-section . . . for AM, FM, TV, and Microwave transmission. You just name the height your antenna must reach; then write, wire or 'phone your nearest Truscon district office or "tower headquarters" in Youngstown to get your tower program going as soon as defense requirements permit.

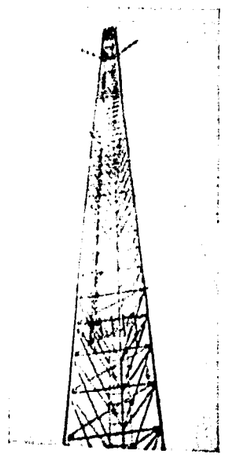
TRYLON® (T) TOWERS



...For Rigid Sway and Twist Limits

From standard broadcast to extended microwave installations, Trylon towers have extreme rigidity to withstand difficult loading conditions with a wide safety margin to spare. Each unit is "tailored" to fit the specific requirements of its application.

Type 3500H—heights to 320 feet
Note the *balanced diagonal bracing* which increases the compression strength and greatly increases resistance to twist.

Type 3600—heights to 520 feet
As shown here, a Trylon 3600 tower is supporting an FM antenna at 270 feet. All Trylon towers are hot-dip galvanized *after* fabrication.

Types 6000—heights to 800 feet
This heavy-duty tower is specifically designed for minimum deflection with VHF-UHF television antennae.

PLUS . . . over 20 years' experience in designing, manufacturing, and installing many types of towers, rotators, antennae shorting and changeover switches, and other antenna specialties.

Trylon Towers are made only by

Code number at end of each address refers to product or service sub-classifications listed at the head of the major classification.

THE EDGE INDEX FOR THE FIRST 3 DIRECTORIES (25 products) WILL BE FOUND OPPOSITE PAGE 96.

The first few times you use this

EDGE INDEX

follow the "how to use" instructions slowly—ONE STEP AT A TIME.

After that you will be able to open easily and almost instantly to the section or letter that you seek.

HOW TO USE

1. **With the directory open on the desk, place the four fingers of your RIGHT hand on the back cover and your right thumb near the middle of the edge of this page.**

2. **Raise your RIGHT hand (about 2 inches) and move it to the left until the pages are bent almost double.**

3. **From the 1 or 2 line symbol adjacent to the product you seek, run your eye across the page edges until you reach the horizontally corresponding symbol.**

4. **OPEN THERE**

IT IS EASIER IF YOU "FAN" OR "RIFFLE" THE LAST FEW PAGES WITH YOUR RIGHT THUMB.

Classifications with a System!

THE IRE Directory Product Classifications have both a pattern and a purpose. They differ widely from most product indexes, deliberately. They aim to organize the hundreds of products and services of a complex technical industry according to the way engineers think. To this end, the product grouping follows the pattern of the IRE Professional Groups, broadly. The result is a division of all products and services into ten fundamental indexes into which 100 basic classifications have been organized.

YOU will note that we here differ from most directory compilers, for we do not mix meters with motors simply for alphabetical reasons. Products used in "Audio" whether components or complete apparatus form the first fundamental group. Yet, the same manufacturer and product may also appear in the "Component Parts" section. This system gives subject grouping for speed and convenience. A directory should aid a man who has forgotten some detail, or product name. Ours helps by grouping products as one would *think*.

1. **Audio Frequency Equipment** (Products 1 to 11)
2. **Broadcasting Equipment** (Products 12 to 17)
3. **Communications Equipment** (Products 18 to 25)
4. **Component Parts** (Products 26 to 58)
5. **Applications of Electronics** (Products 59 to 66)
6. **Radar, Microwave, UHF** (Products 67 to 70)
7. **Services and Materials** (Groups 71 to 87)

   Here we separate the consultant, the fabricating firm, the machine for radio manufacturing, and basic materials from being lost in an alphabetical maze of component and test equipment names.
8. **Test & Measuring Equipment** (Products 88 to 96)
9. **Education & Publishing** (Groups 97 & 98)
10. **Distribution Functions** (Service 99)

For detailed identification, these 100 products and and services, grouped in the 10 indexes, are further defined into nearly 500 named products. We have tried to avoid oversimplification, and a tremendous amount of information is given by our product number system. But, the basic indexing adds speed. Purely alphabetical directories are as slow and cumbersome as a telephone book. IRE engineers have liked our system better!

For safety, an alphabetical "terminology" index is given, preceding the product system in the pink pages introducing the company index. You will note also that after each firm, its products are listed by number code in the alphabetical list, and that sub-classifications shown by number code in the product indexes give much detail. Just a little study of the system will help you get great good from this book.

The IRE DIRECTORY is 10 Indexes in one book.

The products and services of the Radio-Electronics Industry have been organized into ten basic directories following closely the organization of the IRE Professional Groups. But 100 major product groups are numbered consecutively throughout.

Always consult the pink pages at the start of the Directory of firms, for a terminology cross-index, or to find products by name. The pink pages list more than 500 products by name, as well as under the product groups. Page numbers are given for speed.

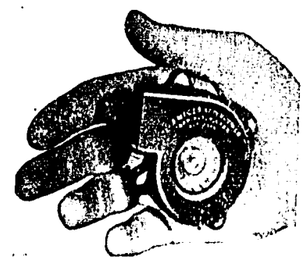
Independent Research Proves: 2 out of 3 Engineers Prefer BURGESS BATTERIES!



NO WONDER Burgess is the first source for industrial dry batteries! Burgess long-life dependability and uniform high-level performance are backed by more years of engineering "know-how" than any other batteries. The maintenance of highest quality always is the reason why 2 out of 3 engineers prefer Burgess... by independent survey. Check for your local source of supply or write now!

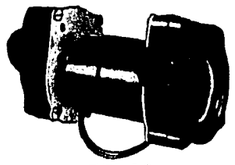
Planning Heat Dissipation?
L-R BLOWER.... moves AIR
5 to 170 cubic feet a minute

There is a light, compact highly efficient L-R Blower to give you maximum heat dispersion under all climatic or temperature conditions. Each of these blowers requires minimum space and produces maximum C.F.M. Specifications are listed below so that you may choose the size best suited to your needs.

SPECIFICATIONS



MODEL 1½, Wgt. (less motor) ..... 2½ oz. Hgt. 3"
Output: 3 to 22 C.F.M.
MODEL 2, Wgt. (less motor) ..... 5 oz. Hgt. 3¾"
Output: 10 to 30 C.F.M.
MODEL 2½, Wgt. (less motor) ..... 5½ oz. Hgt. 4¼"
Output: 10 to 65 C.F.M.
MODEL 3, Wgt. (less motor) ..... 12½ oz. Hgt. 6½"
Output: 40 to 170 C.F.M.

All models have light-weight, high-impact plastic housings, turbo-type wheels and are made for either clockwise or counter-clockwise rotation. Available with or without motor.

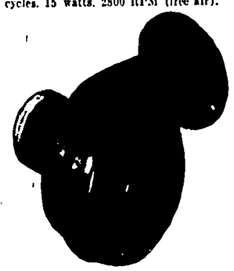
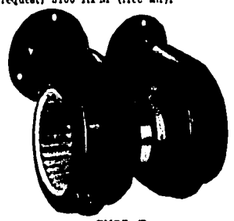
HEINZE BLOWERS



TYPE F-2

For cooling electronic tubes in transmitters, induction heaters and diathermy equipment. Quiet operation, low wattage, light weight. Will not cause radio interference. 115 volts, AC, 60 cycles, 15 watts. F-2D double (illustrated) 3000 RPM (free air) F-2S, single, 3100 RPM (free air).



TYPE F-2½S

Generally the same features as Type F-2. Bakelite housing. 115 volts, AC, 60 cycles. 15 watts. 2800 RPM (free air).

TYPE DS

Powered by type D shaded pole induction motor. Normally supplied with inlet screen and outlet flanges for mounting. Can also be had with inlet damper or inlet mounting flange, "L" type bracket or flat strap bracket. 115 volts, AC, 60 cycles, for CW and CCW operation. 35 watts (other voltages and frequencies on request) 3100 RPM (free air).

TYPE Z

ZSD and ZRD, sturdy low speed type "Z" shaded pole induction motor. 3½" balanced air rotors with slow speed minimize air noise. 115 volts, AC, 60 cycles 45 watts, (available for 230 volt or 50 cycle operation) 1650 RPM (free air). ZRS. The most compact 50 CFM blower unit available today. Resilient mounting base to reduce mechanical vibration to a minimum can be furnished with flat strap bracket instead of outlet flange normally supplied.

115 volts AC, 60 cycles, 40 watts. (can be mounted for 230 volt operation) 1650 RPM (free air)

capacitors *Optimum Solution*

unicon

Polystyrene Capacitors

Unicon Polystyrene Capacitors are characterized by extremely high insulation resistance and Q, and very low power factor and dielectric absorption.

Thus they are ideal elements for use in electronic analyzers and computers, in tuned circuits and wave filters, as standards of capacitance, and in radiation detection and power supply circuits.

Unicon Polystyrene Capacitors are available in many different types of housings as well as uncased for potted assemblies. Standard sizes available for prompt delivery are listed below.

unicon

Plastic Dielectric Capacitors

Unicon Type D capacitors employ a newly developed plastic resin film as a dielectric.

The power factor, dielectric absorption, and temperature co-efficient of these condensers are much better than those of oil paper capacitors. They compare favorably in size with metallized paper capacitors of equal ratings and give far superior performance. Operation to 125°C is permissable. When high insulation resistance, without simultaneous low "soakage" and/or low power factor, is required, Type D capacitors make an excellent low-price substitute for Polystyrene or Teflon capacitors.

Unicon always gives your capacitor problems the Optimum Solution.

Setting the Highest Standards in the Electronic Industry

ASTRON

CAPACITORS & FILTERS

Manufacturers in the radio, TV and electronic fields are making it a habit to specify ASTRON — for capacitors and filters built to a new high standard of performance and dependability. ASTRON pioneered the quality field, and today leads it, with a complete range of standard and special types, suited to a wide variety of applications. Whatever *your* needs, you'll find the answer at ASTRON.

SAFETY MARGIN*

Dry Electrolytic Capacitors

Extremely compact and stable capacitors, embodying the latest developments in electrolytic design. Built with a "Safety Margin" that protects against unusual weather or operating conditions. Choice of leading TV and electronic manufacturers. Variety of container styles and mountings to suit your needs.

METEOR*

Subminiature Paper Capacitors

Designed for operation to 125°C. without derating, through use of ASTRON's special high temperature impregnant, X-250*. Exceptional capacitance stability over the entire temperature range, high insulation resistance, low power factor, unusually low resonance loss and high test voltage. Meets all Armed Forces requirements. Wide variety of designs, or to your specifications.

BLUE-POINT*

Bonded Capacitors

Through an exclusive new design and manufacturing process (patent pending) developed by ASTRON engineers, the new Blue-Point capacitors provide heat and moisture protection to a degree never before possible in molded plastic capacitors. The blue point which identifies this capacitor bonds itself to the outer shell and leads, forming the tightest seal against moisture ever produced. Dry-assembled for consistent high quality and protection against contamination. Mineral-oil impregnated for continuous operation at 85°C. Heat resistant, non-inflammable outer shell and bond will not burn or melt under soldering iron. Positive anchored leads.

OIL FILLED Capacitors

Mineral-oil filled and impregnated, hermetically sealed. Designed for dependable performance under the most severe operating conditions. Meet the most rigid military specifications. Available in a wide variety of government specified case styles.

RF INTERFERENCE FILTERS

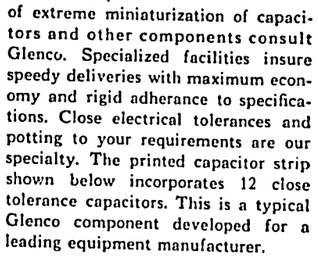
One of America's largest manufacturers of RF interference filters, ASTRON is currently supplying filters in production quantities to leading aircraft and electronic manufacturers. ASTRON pioneered and developed subminiature filters and is today the nation's leading supplier of filters where small size and light weight, as well as dependable performance, are required.

Our filter specialists are equipped to recommend and design special filters for every electrical and physical requirement.

METALITE®

Metallized Paper Capacitors

Ideal for military and commercial applications due to their extremely small size, light weight and unique self-healing properties. The ultimate in capacitor miniaturization and dependability, available in a wide variety of standard and special types.



HY-METS* ASTRON's newly developed high temperature METALITE metallized paper capacitors provide all the desirable features of METALITE capacitors plus operation over a wide temperature range to +125°C. with exceedingly dependable performance characteristics.

Stupakoff

Metallized

CERAMICS

Stupakoff specializes in the application of metal to ceramic parts for a variety of purposes, such as metallized ceramic induction coils for radio receivers and transmitters; metallized ceramic shafts for air-tuning condensers; metallized plates for fixed rigid assemblies; printed circuits; ceramic trimmer condensers; terminals and terminal boards; strain and lead-in insulators; and many other ceramic-to-metal products.

Stupakoff high-precision ceramic assemblies offer many opportunities to reduce costs, increase production and improve electrical and electronic equipment. Further details will gladly be sent upon request.

Planet Capacitors "*Engineered for Quality*"

1 year service guarantee

Custom engineered to your specifications or supplied from stock, Planet capacitors meet the highest standards of the industry. Every capacitor is tested mechanically and electrically throughout its manufacture.

This rigid system of quality control makes our unconditional one-year guarantee possible. But making Planet capacitors right from the start means reasonable prices too!

- Approximately ZERO TEMPERATURE COEFFICIENT FOR QUARTZ AND INVAR construction.
- Approximately ± 50 PPM per degree C. for Glass and INVAR construction.
- One-piece SPRING LOADED PISTON and screw prevent backlash.
- SILVER BAND fused to exterior of precision drawn quartz or glass tube serves as optimum stationary electrode.
- "Q" of 1,000 at 1 mc.
- DIELECTRIC STRENGTH equals 1,000 volts DC at sea level pressure and 500 volts at 3.4 inches of mercury.
- 10,000 megohms INSULATION RESISTANCE MINIMUM.
- OPERATING TEMPERATURES, −55 C. to + 125 C. with glass dielectric. −55 C. to +200 C. with quartz dielectric.
- Over 100 megohms MOISTURE RESISTANCE after 24 hours exposure to 95% humidity of room temperature.
- PISTON DIMENSIONAL ACCURACY is held to close tolerance maintaining minimum air gap between piston and cylinder wall.

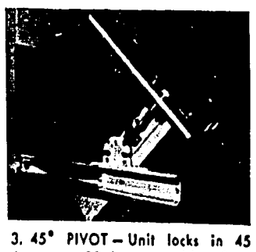
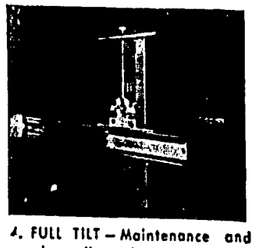
Why put up with this costly,

time-wasting step any longer?...





1. FULL EXTENSION — Continuous ball bearing action permits smooth, non-jar chassis removal. Locks in fully extended position, must be unlocked to return.

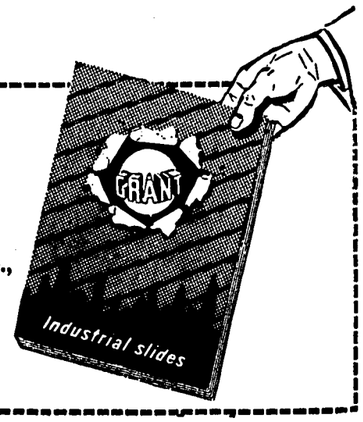
2. PIVOT RELEASE — Withdrawing release rods disengages them from quadrant mechanism, enables perfectly balanced unit to be tilted by simply raising.

3. 45° PIVOT — Unit locks in 45 degree or 90 degree position. Special pivoted positions can be obtained to fit individual requirements.

4. FULL TILT — Maintenance and repairs easily made. Access to component is gained in a few seconds. Special slides can provide plus or minus 90° tilt.

Design accessibility into your equipment

When repairs and maintenance of electronic equipment are needed, wasted time costs money! Alert manufacturers have totally eliminated the laborious step of "getting at" vital components by installing Grant Industrial Slides. Is your equipment mechanically up to its high electronic standards? If not, Grant offers you:



Stock Slides — A great variety of types, suitable for most needs, is *in stock* and available for immediate delivery.

Custom Slides — A complete research and engineering staff is ready to assist you at your plant, convert your blueprints into working plans and develop slides that suit your needs perfectly.

Hardly a day passes but what we receive interesting research problems on the application of toroids.

CAC engineers welcome the opportunity to consider your specific requirements in frequency selective networks—

For your convenience use our specification list (below) which covers most filter requirements:

FILTER SPECIFICATIONS

1. Pass Band
   a) Frequency limits: _____ to _____
   b) Max. insertion loss at min. point: _____ db
   c) Required flatness: ± _____ db
2. Attenuation Band
   a) Frequency limits & relative attenuation required:
      1) _____ to _____; _____ db
      2) _____ to _____; _____ db
      etc
3. Terminations *
   a) Input
      1) impedance in pass band: _____ ohms
      2) impedance beyond pass band: ☐ increase ☐ decrease ☐ not important
      3) ☐ balanced, ☐ unbalanced
   b) Output
      1) impedance in pass band: _____ ohms
      2) impedance beyond pass band: ☐ increase ☐ decrease ☐ not important
      3) ☐ balanced, ☐ unbalanced
4. Operating Conditions
   a) Power level _____ DBM
   b) Temperature range _____° to _____° F or C
   c) Vibration requirements _____.
5. Case Requirements
   a) Max. dimension: _____ in. x _____ in. x _____ in.
   b) Mounting by No. _____ - _____ (thread) x _____ in. ☐ studs ☐ tapped inserts.
   c) Location of terminals and mounting provisions: on _____ in. x _____ in. surface.
   d) Hermetic Seal: ☐ yes ☐ no.
   e) Finish Color; ☐ dark gray ☐ light gray ☐ black ☐ Special (Specify)
6. Other Requirements
   a) Military specifications applicable: ☐ MIL-T-27 ☐ _____ ☐ none
   b) Special Requirements: _____

*NOTE: If low frequency limit of pass band is d.c., input and output impedances are usually equal and must both be either balanced or unbalanced.

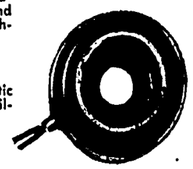
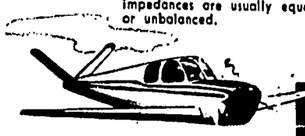
REMARKS

Qmax—Values taken at approx. .01 Iac. Q decreases with increasing current to about .50 Qmax at 1.0 Iac—higher inductance values have lower Qmax at lower frequency due to dielectric losses of winding distributed capacity. All values are for inductors wound with Heavy Formex wire.

T.C.—Temperature characteristics as follows:
1—approx. 100 ppm/°F
2— ± .1% 55 to 90°F
3— ± .1% 30 to 130°F
(most types with temp. characteristic 1 are available with characteristic 3 at no sacrifice in performance)



Iac—r.m.s. current which raises 0.1 Hy inductor to max. (2% above initial) inductance — (1% increase occurs at approx 0.35 Iac.



Custom miniaturization of filters is achieved through use of miniaturized components and advanced design techniques.

Uncased coils adjusted to your specifications.

Moistureproof Plastic Coated Toroids available in all types.

Via C.A.C. Beechcraft, we are only hours away from you—we solicit the invitation to discuss your problems across your own desk.

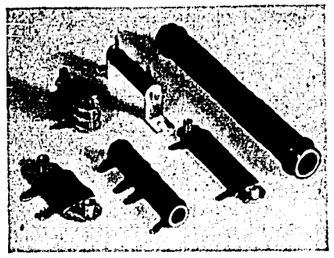
RESISTORS • FOCUS COILS DEFLECTION YOKES

Precision-built for critical electronics applications

Whatever your requirements for top quality wire-wound components, you can count on I-T-E. Power resistors, precision resistors, deflection yokes, focus coils—all I-T-E products are specially designed and precision-built to meet critical commercial and government specifications. Broad engineering background, extensive production facilities, and close control assure *quality* components in any *quantity* you require.

I-T-E POWER RESISTORS

Non-hygroscopic ceramic foundations are in accordance with JAN specifications.



Purest resistance wires are uniformly wound to prevent shorted turns and excessive hot spots. All connections silver-soldered.

Vitreous enamel coating (organic if required) provides a glazed moisture-repellent surface with fast heat-dissipation qualities.

Advanced production methods assure high stability, long life.

Standard Tolerance: ±10%. ±5% *and less* made to order.

Standard fixed resistors: 5-200 watts
Adjustable resistors: 10-200 watts
Oval resistors: 30-75 watts
Ferrule resistors: 12-200 watts
Special resistors: built to specifications

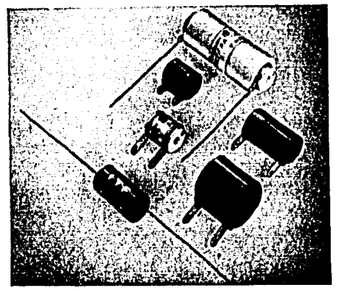
I-T-E PRECISION RESISTORS

High-quality wire alloys are used—free from internal stresses and strains.

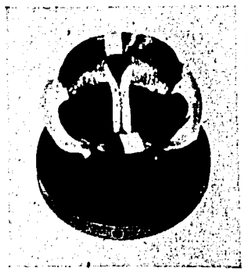
Semi-automatic precision winding method assures even tension—eliminates hot spots.

Hermetic or vacuum-impregnated sealing for protection against destructive effects of sales, moisture, and atmospheric conditions.

Accelerated aging process prior to calibration assures accuracy.

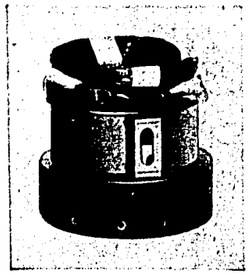


Critical quality control eliminates all resistors which do not come up to high I-T-E standards.



Standard Tolerance: ±1%. Specified tolerances down to ±0.05%.

Type A: lightweight, hermetically sealed—for precision operation up to 125° C. Surpass JAN R-93. *Characteristic A*, and MIL R-93 A specifications.



Type B: vacuum-impregnated, moisture-resistant. For JAN R-93, *Characteristic B*, specifications.

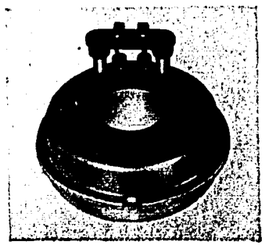
Ratings from 0.01 ohm-10 megohms, 0.125-5 watts.

90° DEFLECTION. FLARED WINDINGS.

70° DEFLECTION. FORM-WOUND.

I-T-E DEFLECTION YOKES

Up to 90° deflection without neck shadow. Design allows ½" pullback on neck of TV tube.



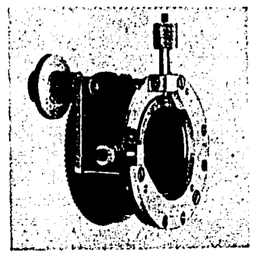
High sensitivity provides full deflection at low line voltages.

Full focusing for sharp horizontal and vertical focus. Excellent side and corner resolution.

Shrink-proof insulation between horizontal and vertical coils.

Minimum "pincushion" distortion—as result of special I-T-E coil design.

Thorough electrical and visual pretesting—for shorts, inductance, resistance, induced voltage, insulation breakdown, cross-talk.



I-T-E FOCUS COILS

High quality focus coils—small, compact, lightweight. Precision-built to commercial or government specifications. For use with tubes up to 90° deflection. Minimum spot distortion. Retain proper focus over wide range of line voltage variations.

Hermetically-sealed electromagnet type for government use. Meets MIL-T-27 specs. Precision-wound of fine, uniform copper wire. Sealed in nitrogen—for minimum temperature rise.

Permanent magnet type for government use. Meets MIL-T-27 specs. *Locked* controls assure uniform focus after severe shock and vibration.

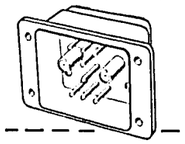
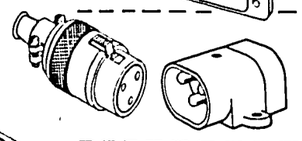
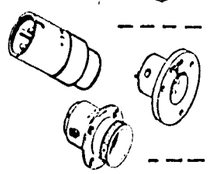
CANNON PLUGS *for better electronic equipment*



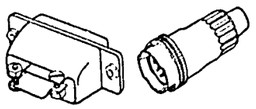
AN — AN Series... conforming to military specification MIL-C-5015. 15 diameters and 260 layout patterns for the aircraft, communications, instrument and electronics industries. 6 approved shapes, AN 3100 to AN 3108. AN-M Series also meets the specification.



AN-M — AN-M Series... 5 basic shell shapes, 12 shell size diameters and 105 layout variations in resiliant material insulation. For resistance to moisture, vibration and high gravitational forces.



K,RK — K, RK Series... 8 basic shell shapes, 8 diameters and 204 cataloged layout variations. Special Acme thread. For aircraft, communications, instrument and electronic applications.

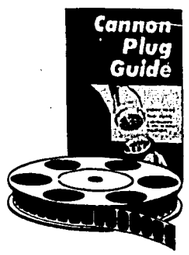


DP — DP, DPB, DPD, DPD2, DPR and DPM Series... Used for rack-and-panel instrument panel and subassembly applications. Rectangular in shape with 27 basic layout variations in DPB and DPD.

P,O — P and O Series... 22 shell shapes and 7 layout patterns ... used in audio and vidio amplification, tape recording and related applications.

X,XK,XL — X, XK and XL Series... 23 basic shell shapes and 8 layout arrangements for cord-end or wall mounting ..engineered for audio-circuitry but applicable to many low level circuits and wide electrical uses.

D,U — **Sub-Miniature Connectors**... The D and U Series for cord-end, rack-and-panel or wall mounted applications. The D Series has 3 basic shapes with up tc 50 contacts. Used for portable radio, audio circuitry and like applications. The hermetically sealed UH Series, cylindrical with 4 basic shell shapes, accommodates up to 12 contacts in 12 layout patterns. DH Types used for hermetically sealed miniature components.



GS — **Hermetically Sealed Connectors**... with steel shells and contacts withstand high pressures. Available in the GS, KH, DH and U Series. Insulation is a vitreous material, fused under high temperature to shell and steel contacts thus forming a permanent hermetic seal that allows no leakage.

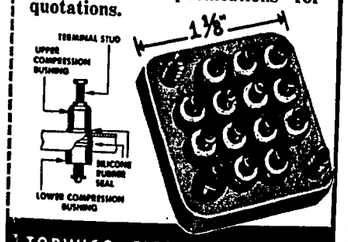
Toroids

Are you a producer of—
Guided Missiles
Microwave Systems
Magnetic Amplifiers
Carrier
—and other equipment requiring toroidal coils and components?

Then... call on Torwico
whose engineering and production facilities stand ready to supply you with—
High Q Toroidal Inductors
Toroidal Transformers
Discriminator & Oscillator Coils
Magnetic Amplifier Coils
Tuned Circuits
Filters
Low Level Audio Transformers

Toroidal Coils—
wound or designed to your Specs — Exact turns or Inductance Tolerance — Vacuum wax impregnated or coated with special encapsulating material

Cased Components—
Hermetically sealed, potted or filled with an inert gas to meet MIL-T-27 Requirements



Only Torwico

offers a Terminal Header with the exclusive Floating Terminal. This construction produces a rugged terminal which can withstand excessive vibration and shock — thermal shock from −65° F. to 400° F.

The silicone insulations are particularly effective in retarding DC plating.

With all of their definite advantages, Torwico Terminals are surprisingly low in cost and are made consistent with the quality standards needed to meet rigid military (MIL-T-27, Grade 1, Class A) and civilian specifications.

Please write for samples and send your detailed specifications for quotations.

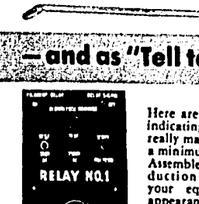
For Basic Plug-in Unit Building Blocks, it's ALDEN

Now you can design your equipment for greater accessibility, simple servicing, 30-second restoration of service by plug-in replacement units, with Alden Standard Components.

ALDEN TERMINAL CARD SYSTEM to make circuitry in compact vertical planes

PREPUNCHED TERMINAL MOUNTING CARDS give tremendous flexibility to lay out almost any circuitry, for Plug-in Packages or Alden Basic Chassis.

MINIATURE STAKING TERMINALS mount in any pattern on Cards. Ratchet slots hold elements for fast soldering without pliering or wrap-around.



JUMPER STRIP stakes right under Terminals, providing common circuit without soldering.

CARD-MOUNTING TUBE SOCKETS for miniature 7-pin and 9-pin, and octal tubes.

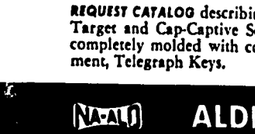
TYPICAL CIRCUITRY. At left, arranged for Alden "20" Plug-in Package. At right, for mounting in Alden Basic Chassis. See descriptions below.

These planes become plug-in units thru ALDEN PLUG-IN PACKAGE COMPONENTS

4 SIZES OF PLUG-IN PACKAGES

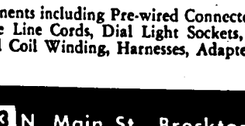
BASIC COMPONENTS FOR 4 SIZES OF PLUG-IN PACKAGES

To make vertical circuitry units into compact plug-ins here are components for 7-pin, 9-pin, 11-pin and 20-pin packages. Conceived with tremendous design flexibility allowing only a few parts to accommodate tremendous variety of circuitry, both shielded and open. Bases grooved to receive up to 3 Terminal Cards. Brilliant color coding for quality appearance and quick locating to mating sockets, non-interchangeable in the "11" and "20" Series.

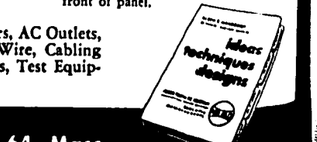


ALDEN '20" PACKAGES SHIELDED OR OPEN

SPACE-SAVING DESIGN OF PACKAGES AND SOCKETS PERMIT COMPACT ARRANGEMENT

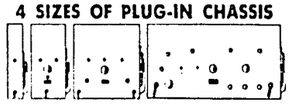


How to organize planes of circuitry as plug-in chassis, with ALDEN CHASSIS COMPONENTS

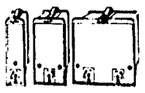


ALDEN BASIC CHASSIS
Simple U frame is open-sided. Terminal cards simply snap in. You have 100% accessibility for soldering final connections and making service checks. Hinged front panel is separable for mounting its components as separate easy sub-assembly. All production is by in-the-open sub units assembled with utmost ease.

COMPLETED CHASSIS
Here the chassis is completely assembled, fitted with slide-in Back Connectors and Serve-A-Unit Lock and inserted in rack mounting Case which has mating Back Connectors and receives the bullet nose of the Serve-A-Unit Lock which pilots, draws in, locks and ejects the Chassis. Portable Cases below receive Chassis in same manner.



ALDEN SERVE-A-UNIT LOCK
The Serve-A-Unit Lock used in the Alden Basic Chassis pilots the chassis to accurate mating of the Back Connectors, and with a twist of the wrist draws in and locks securely in any plane and with sufficient pressure to seal compression gaskets. A reverse twist ejects chassis. This Lock is designed to make ANY plug-in unit speedily accessible for checking, servicing or replacement. Installed as shown.



ALDEN BACK CONNECTORS
These slide-in Back Connectors carry all connections from Basic Chassis to the case and give one point of check for all in-out leads. Mounted in an orderly row on Chassis with mating row on Back Plate of Case, they permit direct, efficient wiring, with isolation of critical leads. They eliminate rats-nest congestion of conventional connectors because leads are instantly accessible, and can be color coded and numbered for easy identification. Contacts can be jumped for test.

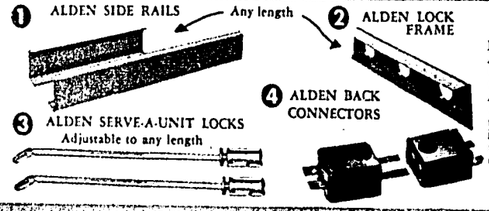
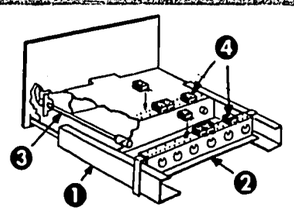
PORTABLE CASES

ALDEN RACK ADAPTER for mounting any chassis in standard rack.



ALDEN UNI-RACKS, single or double tier, house all sizes of Alden Chassis — stack as at right.



Build your own plug-in, slide-in chassis with this ALDEN SERVE-A-UNIT KIT:

IT'S AS SIMPLE AS THIS
Arrange Alden Side Rails (1) and Alden Lock Frame (2) to suit your chassis. Alden Serve-A-Unit Locks (3) mount in your chassis to engage pre-punched holes in Alden Lock Frame (2) to pilot, draw in, lock or eject.

Arrange Alden Back Connectors (4) in orderly row on Alden Lock Frame. Mount mating Alden Back Connectors on your Chassis.

— and as "Tell tales" to instantly spot trouble in any plug-in use ALDEN SENSING ELEMENTS

Here are tiny sensing and indicating elements that really make sense. Require a minimum of panel space. Assemble by simplest production methods. Give your equipment quality appearance, safety convenience in use and servicing.

MINI-TEST POINT JACK — 110BCS. Only 1" overall this Jack has famous Alden wrap-around contact efficient after thousands of insertions. For checking any critical voltage from front panel while in operation.

ALDEN PANI-LITE — 86L Only ⅞" overall, this lite makes it practical to put an indicator anywhere needed. Unbreakable 1-piece lens-light — replaceable from front. Brilliant illumination, assorted colors.

ALDEN FUSELITE — 440-FH Glowing light signals immediately blown fuse. To replace fuse, simply unscrew 1-piece lens-light and blown fuse comes out with it. Serviced entirely from front of panel.

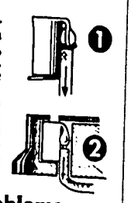
SIMPLIFY PRODUCTION WITH ALDEN PRE-WIRED CONNECTORS

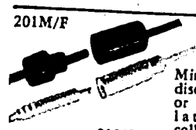
If you're designing any equipment that has to be connected, manufactured in volume, standardize on this complete service of connectors designed to Cut Your Assembly Problems, Simplify Your Purchasing, Eliminate Quality Problems.

ALDEN PRE-WIRED CONNECTORS ARE UNIQUE



Leads are attached to the top of the contact, assembled at high rates, with no danger of cold solder joints, and minimum use of material.

100% molded insulation surrounds each contact and lead, yet takes less space and eliminates danger of insulation pull-back.



This system actually provides *strain relief* for each contact without UL knots, fishpaper or bulky clamps. ❶ Solder tab and bond give great strength in vertical direction. ❷ Molded clip pockets restrict all movement of the lead to this vertical direction so that 22-gage wire will break before the Alden Solder Tap connection gives.

See how beautifully Alden solves your connector problems packing greater reliability into less space at lower cost!

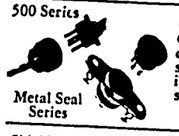
SINGLE LEAD DISCONNECTS
Miniature hi-voltage disconnects. Phenolic or polyethylene insulation. UL safety collar.

Speaker Connector Series

TWO TO SEVEN LEAD
Beautiful detachable terminal connectors that do away with terminal strips, save soldering and cabling.

HA Series



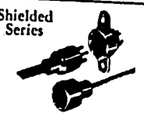
TWO AND THREE LEAD
Excellent miniature antenna lead-ins or signal connectors.

Non-interchangeable Series

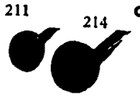
TWO TO ELEVEN LEAD
For cables having several connectors, prevent misconnects by specifying Alden Non-Interchangeable Connectors.

500 Series

Metal Seal Series



ONE TO FOUR LEAD
Compact inexpensive connector with UL safety collar for carrying AC power or signal.



212/5 212

MINI DUO-DECALS
Have only 3 parts: "Top Connected" contacts, leads, molding. Voltage breakdown exceeds that of tube base.

Shielded Series

ONE TO FIVE LEAD
Plugs, Connectors and Sockets that answer most needs for 1 to 5 shielded leads.

211 214

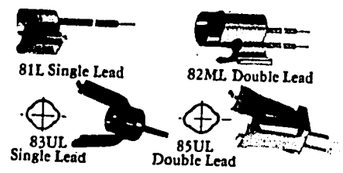
C-R TUBE CONNECTORS
Quality equipment for instruments, TV, radar. Magnal, duodecal, diheptal. 100% insulation each clip and lead.

TUBE CAPS for every purpose

Completely prewired—Phenolic, Injection

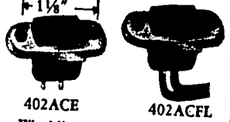
90 SERIES

Quality phenolics, completely insulated for radio receiver, transmitter or TV tubes.



ISL SERIES

Integrally molded with insulation, lead and grid in one piece to meet any environmental and electrical conditions.



DIAL LIGHT SOCKETS

Designed for low-cost high-volume production, with tailored leads ready to drop aboard your equipment. 4 basic designs you can standardize on for almost all needs.

QUALITY ELECTRICAL COMPONENTS specially designed for volume production, eliminating screwdriver and terminal posts, reducing assembly into your equipment to simple spot weld or rivet.

AC CONVENIENCE OUTLET

402ACE 402ACFL

World's smallest, most rugged. Complete series of tiny outlets with solder tabs or tailored leads. Assemble by simplest possible spot weld or rivet. Now you can include convenience outlets where never before possible.

SAFETY FUSEHOLDER

1—Internal split ferrule prevents fuse breakage. 2—Ejector spring holds fuse tight and noiseless, aids ejection. 3—U-Shaped contact withdraws blown fuse.

440-FH

DETACHABLE LINE CORD

202FIAC

Reduce all problems to just a tiny plug mounted in your equipment. Subtract bulky underwriters knot and cumbersome cord production problems. Add customer convenience and sales appeal to your equipment.

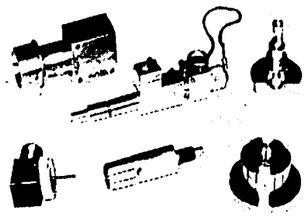
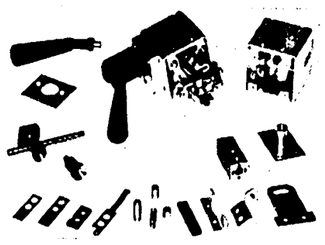
JOHN GOMBOS COMPANY



MANUFACTURES ELECTRONIC PARTS, COMPONENTS, ASSEMBLIES

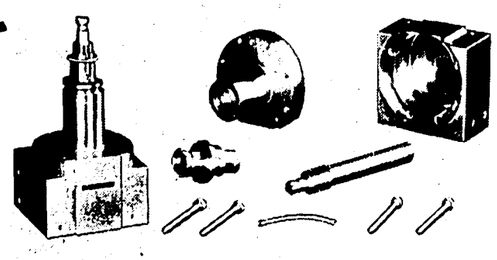
***to your design* — accurately . . . economically . . . on schedule**



● VARIABLE CONDENSER Closely tracking, rotor plates built to contour tolerances of five ten-thousandths of an inch. Stator plate assembly soldered to within one thousandth of an inch.

● CONNECTOR AND ADAPTER ASSEMBLIES, including crystal converters and waveguide connectors. Materials are beryllium copper and phosphor bronze. Examples of precision screw machine, milling and boring operations. Tolerances as close as two ten-thousandths of an inch.

● FOUR WAY TRACKING SWITCH. With its component parts, this assembly shows examples of stamping, milling and screw machine work. Accurate alignment of crossbar contact points and free function of plunger and handle subassemblies are "musts".



Make John Gombos Company an "annex" to your plant. Turn over to us the responsibility of manufacturing the parts your own facilities are not geared to produce . . . jobs that are crowding your schedules. Increase your plant capacity without additional overhead. Through efficient organization, experienced and highly skilled workmanship, close supervision and constant research . . . by utilizing the most advanced machinery and testing equipment, we are able to meet the strictest performance requirements. For more than a decade, we have been serving the leaders in the electronics industry who *demand* quality, accuracy and dependability.

Specialists in Microwave Components

Our varied experience in the manufacture of precision electronic parts, as well as machine parts, used in the communication and aircraft industries, includes fabrication of beryllium copper, molybdenum, tantalum, Palladium, Monel, plexiglass, polystyrene and many other materials. Some of the microwave components we have produced are: radar filters, crystal converters, cavity tuners, connectors and adapters, tees and directional couplers and precision waveguides. Other examples of precision work include magnetic tuners, crystal-heater ovens and cathode-ray tube parts.
