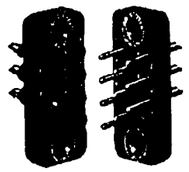
ELECTRICAL CIRCUIT CONNECTORS



SERIES "B"

2/3 ACTUAL SIZE

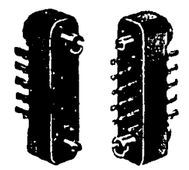
..can solve your toughest weight and space problems!

Our Engineering and Development Department can help you with your requirements for special connectors.

SERIES "A"

1/2 ACTUAL SIZE

DESCRIPTION	Types Available	
	Receptacle	Plug
LIGHTWEIGHT AIRCRAFT TYPE Polarized; Rack, Panel or Cable mounted—with Hood or Clamp and Cable strain relief. (Figures in above Code Nos. indicate number of contacts.)	A7S A10S A15S A18S	A7P A10P A15P A18P



SERIES "HMRE"

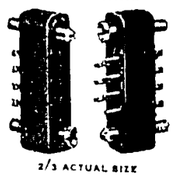
ACTUAL SIZE

DESCRIPTION	Plug
HERMETIC PLUG Each special contact fused in glass into special base plate provided for soldering into a rectangular hole in an hermetically sealed housing or bulkhead. Used with Standard "MRE" Receptacle. (Used with Standard MRE Receptacles)	HMRE7P-G HMRE9P-G HMRE14P-G HMRE18P-G HMRE20P-G HMRE21P-G HMRE26P-G HMRE34P-G HMRF41P-G HMRE50P-G

SERIES "SMRE"

ACTUAL SIZE

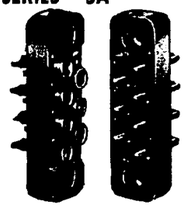
DESCRIPTION	Receptacle	Plug
SUB-MINIATURE For Aircraft, Instruments and Portable Equipment Light weight, Polarized, Self-aligning with special guide pins. Rack, Panel or Cable mounted with Hood and Cable strain relief. (Other sizes to meet your requirements)	SMRE7S-G SMRE14S-G SMRE20S-G SMRE26S-G SMRE29S-G SMRE34S-G	SMRE7P-G SMRE14P-G SMRE20P-G SMRE26P-G SMRE29P-G SMRE34P-G



SERIES "CR"

1/2 ACTUAL SIZE

DESCRIPTION	Receptacle (Panel)	Plug (Cable)
MINIATURE PRESSURE-TIGHT This connector is typical of several recent designs requiring a miniature connector (1" dia. x 1¾" lgth.) in an aluminum die-cast shell. It is sealed with neoprene gaskets around the inserts and around each contact for pressure-tight construction.	CR5-2S (Standard type, pin contacts in plug.) CR5-2P-R (Reversed type, pin contacts in receptacle) (5 contacts #20 AWG) (2 contacts #18 AWG)	CR5-2P CR5-2S-R



SERIES "MRE"

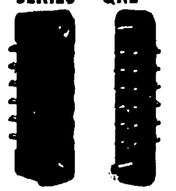
2/3 ACTUAL SIZE

DESCRIPTION	Receptacle	Plug
MINIATURE For Aircraft, Instruments and Portable Equipment Light weight, Polarized, Self-aligning with special guide pins. Rack, Panel or Cable mounted with Hood and Cable strain relief.	MRE7S-G MRE8S-G MRE9S-G MRE12-21S-G MRE14S-G MRE18S-G MRE20S-G MRE21S-G MRE26S-G MRE34S-G MRE41S-G MRE50S-G MRE75S-G	MRE7P-G MRE8P-G MRE9P-G MRE12-21P-G MRE14P-G MRE18P-G MRE20P-G MRE21P-G MRE26P-G MRE34P-G MRE41P-G MRE50P-G MRE75P-G

SERIES "SA"

2/3 ACTUAL SIZE

DESCRIPTION	Types Available	
	Receptacle	Plug
LIGHTWEIGHT AIRCRAFT SMALL Polarized; Rack, Panel or Cable mounted—with Hood or Clamp and Cable strain relief (Figures in above Code Nos. indicate number of contacts.)	SA7S SA10S SA15S SA18S	SA7P SA10P SA15P SA18P



SERIES "HM"

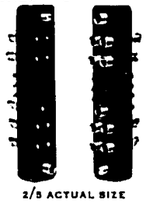
ACTUAL SIZE

DESCRIPTION	Plug
HERMETIC PLUG (Round Hole) Special contacts fused in glass into special base plate provided for soldering into a round hole in an hermetically sealed housing or bulkhead. Used with Standard "M" Receptacle. (Used with Standard M4S, M5S or M7S Receptacles)	HM4P HM5P HM7P

SERIES "QRE"

2/5 ACTUAL SIZE

DESCRIPTION	Receptacle	Plug
QUICK-DISCONNECTING SELF-ALIGNING Spring-loaded contacts for ease in separation. Self-aligning with special guide pins. Rack, Panel or Cable mounted with Hood and Cable strain relief.	QRE6S QRE12S QRE18S QRE24S QRE34S QRE208S AQRE12S MAQRE18S	QRE6P QRE12P QRE18P QRE24P QRE34P QRE208P AQRE12P MAQRE18P



SERIES "M"

4/5 ACTUAL SIZE

DESCRIPTION	Receptacle	Plug
MINIATURE For Aircraft, Instruments and Portable Equipment Light weight, Polarized, Locking Ring. Panel or Cable mounted with Hood and Cable strain relief. (Figures in above Code Nos. indicate number of contacts.)	SM1S SM2S M4S M5S PM6S M7S M9S M12S M48S	SM1P SM2P M4P M5P PM6P M7P M9P M12P M48P

SERIES "F"

2/5 ACTUAL SIZE

DESCRIPTION	Receptacle	Plug
SPECIAL CONNECTORS Unique design permits the use of two sizes of wire — #20 and #14 AWG—and assures uniform electrical and mating characteristics. Light-weight, polarized and panel mounted, these connectors are available with or without guides. (Figures in above Code Nos. indicate number of contacts. First figure for #20 AWG, second figure for #14 AWG.)	F5S-G F2S-8P-G F9S-9P-G	F5P-G F2P-8S-G F9P-9S-G

MANY FEATURES are covered by our Pat. No.'s 161900, 162795, 2411861, 2466370, 2513080, 2526325, 2532538. Other Pats. Pend.

MONOBLOC* CONSTRUCTION eliminates unnecessary creepage paths and reduces possibility of moisture and dust pockets and provides stronger molded parts.

MOLDED MELAMINE body parts insure greater mechanical strength and high dielectric and arc resistance.

PRECISION MACHINED CONTACTS are gold plated over silver for consistent electrical conductivity, prevention of corrosion and ease in soldering.

Connectors & components meet applicable government specifications.

Write or telephone our Engineering Department for information on the above or other connectors—or for consultation on difficult connector problems. Many other standard and special types available.

WINCHESTER PRODUCTS AND WINCHESTER DESIGNS ARE AVAILABLE ONLY FROM WINCHESTER ELECTRONICS, INCORPORATED.

NEW "PARAFORMED" PAPER TUBES

MAKE YOUR COIL WINDING
EASIER! FASTER! BETTER!

- No sharp outside edges to cut wire
- Has full rigidity and physical strength
- Permits winding coils to closer tolerances
- No need for wedges to tighten wire
- Allows faster stacking of wound coils

ANY SIZE—SQUARE OR RECTANGULAR

Entirely new technique in tube making developed and perfected by PARAMOUNT now for the first time solves many coil winding problems, *yet costs you no more!* Hi-Dielectric. Hi-Strength. Kraft, Fish Paper, Acetate, Red Rope or any combination wound on automatic machines. Produced from stock arbors or special sizes engineered for you.

Write on Company letterhead for Stock Arbor List of over 2000 sizes

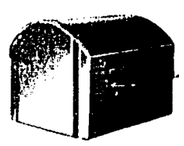
Power Supply Problems?

HERE ARE TWO SOLUTIONS
RANGING FROM A FEW WATTS TO SEVERAL HUNDRED



MODEL S-124

Input: 5 to 7 VDC
Output: 112 VDC @ 30 ma
Efficiency: 70%
Size: 1-3/8" x 1-11/16" x 1-3/4"
Weight: 4-1/2 oz.

Input: 28 VDC
Output: 275 VDC @ 400 ma
—250 VDC @ 100 ma
115 V 400 cps AC @ 60 VA
6.3 VAC @ 2.25 amps.
Efficiency: 75%
Size: 5-7/8" x 4" x 5-1/4"
Weight: 6-1/2 lbs.

MODEL S-122

DC-AC CHOPPERS

New 1953 Models for Military Use — 0-500 CPS

Tops in Performance — Tops in Dependability

Stevens-Arnold choppers are electro-mechanical precision vibrators that are used as modulators or demodulators. Designed specifically for airborne applications, and 1000 hours operation.

- Gold contacts used exclusively. Gold is the only material that assures superior chopper-performance in the critical 0-1½ volt DC range.
- Multiple testing guarantees uniformity. Before shipment, each unit must pass *two* complete operating tests at 3 different temperatures— −55°C., +25°C. and +85°C.
- Not only are all military specifications met, but liberal safety factors have been provided to meet emergency conditions of voltage and frequency. Example: —frequency tolerance 0-500 cps, coil voltage tolerance +30% −20%.

Also Available 60-CYCLE TYPES

A complete line of single and double-pole types.

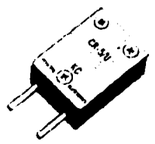
✓ *Accuracy*
✓ *Stability*
✓ *Ruggedness*

RIGID, uncompromising quality control techniques, scientifically developed inspection and test procedures at each stage of manufacture, insure the absolute dependability of every Keystone Crystal!

Keystone Piezo crystals, now in use throughout the world in military and commercial applications, are justifying the high processing standards we established years ago!



Whatever your need, in standard or special frequency control units, pressure mounted or plated, count on Keystone for the right answer! Our engineering and research personnel and facilities are available for developing your particular requirement. We invite your inquiries.

DO YOU NEED

Quartz Crystal Units—designed to meet your most rigid requirements. Wide ranges of frequencies. Meet MIL-C-3098A specs.

Quartz Crystal Semi-Finished Blanks—cut from best quality Brazilian quartz, to close angle tolerances. Any size, shape and cut, from AT to Z.

Quartz Lapping Machines—supplied in 3 models. PR1 and PR2, planetary action and PR3, eccentric action, for covering the range of low frequencies to ultra-high frequencies.

Lapping Carriers or Workholders—made of any material, to your size, having holes punched per your requirements.

Quartz Cutting Saws—a precision machine, designed to cut blanks to very close tolerances. Uniform in angle and thickness. May be used for multiple sawing holding up to 20 saw blades.

Electrodes—precision ground and polished. Stainless steel. Made in any size, thickness, and having a controlled air gap.

We are one of the oldest and largest manufacturers of quartz crystal blanks and processing machinery in the world, having supplied over 25% of the crystal blanks used during the past emergency. Your inquiry will be promptly answered.

DO YOU HAVE A
TV Interference Problem?

A filter of the right attenuation characteristics, fitted to the proper frequencies, can solve it for you. Many TV set manufacturers have found this to be true and are including our filters in their new designs as a precaution against undesired responses. They have found it more economical to call upon R. L. Drake Co.'s experience and production facilities than to develop and make the filters themselves.

A few of R. L. Drake's adjustable or pre-set . . . IF, VHF, UHF . . . High Pass, Broad Band Rejection Filters and Traps being used by leading TV set manufacturers. Response curves shown at right

If you need an effective yet inexpensive solution to your interference problem, why not contact our engineering department today? Your inquiries are invited. .....

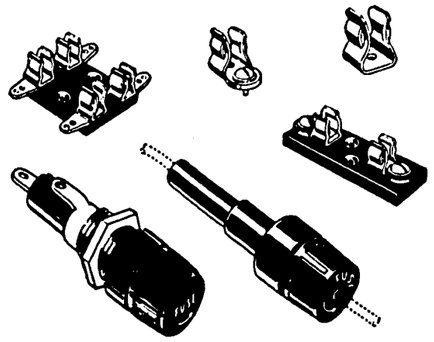
WHATEVER YOUR FUSE NEEDS
THIS ONE SOURCE SAVES TIME AND TROUBLE

BUSS FUSES
for TELEVISION...RADIO...RADAR INSTRUMENTS...CONTROLS...AVIONICS

From fractional amperage types to huge industrial fuses, BUSS has specialized in a complete fuse line for the past 39 years. Whatever your circuit protection problem, you can choose from this complete line not only with convenience but with confidence in the unequalled BUSS reputation for quality and dependability.

Evidence of BUSS dependability is the rigid electronic testing every fuse must undergo before leaving the factory. Ultra-sensitive electronic devices check it to exacting standards of construction, calibration and physical dimension.



When you install BUSS Fuses you can forget about fuse troubles yet you can be certain of positive protection.

Turn To BUSS Engineers With Your Fuse Problems.

They will be glad to assist you in selecting the fuse to do the job best... and if possible a fuse that will be available from local wholesaler's stocks.

USE THE HANDY COUPON—*It's just good business to rely on BUSS FUSES*

...Plus
A COMPLETE LINE OF FUSE CLIPS, BLOCKS AND HOLDERS

BUSSMANN Mfg. Co. (Division of McGraw Electric Co.)
University at Jefferson, St. Louis 7, Mo.

STANDARD PACKAGED PUSH-PULL MAGNETIC AMPLIFIERS by MA

MAGNETIC AMPLIFIERS—These high gain, high performance Magnetic Amplifiers are especially suitable to drive two phase induction servo motors requiring from 0.1 watt to 20 watts per phase on either 400 cps or 60 cps powerlines. The output power is either in phase or 180 out of phase with the powerline depending on the D.C. input signal polarity.

DATA SHEETS AVAILABLE

STANDARD TUBELESS SERVO AMPLIFIERS with built-in adjustable SERVO LOOP STABILIZATION. Packaged, completely self-contained, magnetic servo amplifiers for position servo systems where either A.C. or D.C. error signals are available. Designed for instrument type and power type servo systems to work with synchro control transformers or potentiometers and two phase induction servo motors.

New Automatic Universal TRANSISTOR CURVE TRACER

WRITE FOR COMPLETE INFORMATION

USES

Designing transistor circuits — comparing, matching and selecting — detecting anomalies — studying effects of temperature, age, normal usage, over-loading — detecting failures and cause.

FEATURES

Tests NPN, PNP, Junction, Point Contact Transistors—flexible to accommodate new types. Dynamically plots entire family of curves simultaneously on standard laboratory DC oscilloscope. Function switch selects: output or transfer curve in grounded base or grounded emitter connection. Calibrating axis generated internally as integral part of display are always in correct quadrant.

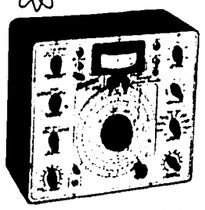
THE STANDARD OF QUALITY **HICKOK** INSTRUMENTS FOR OVER FORTY THREE YEARS

Model 539A

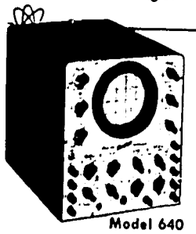
Laboratory
TUBE TESTER
Engineer's Portable



Designed with professional accuracy for engineers in the radio, television, aviation, communication and industrial fields. Tests all tubes normally encountered in electronic work. Provides increased accuracy for testing high gain type tubes. Permits choice of 3 AC signals. Adjustable DC bias, metered to within 1% giving highest accuracy of the tube performance test. 8 other models available.

Model 209A

Capacitance METER *and* TRUE VTVM

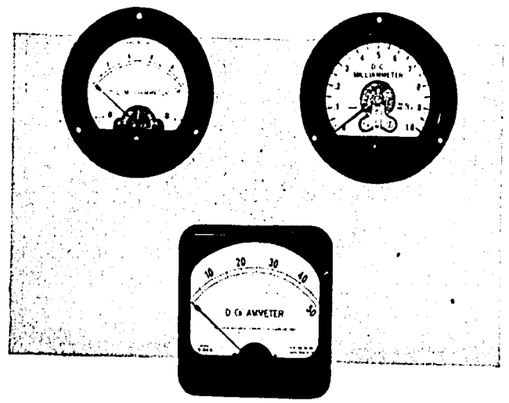


An accurate multi-purpose instrument for laboratory and industrial use. Measures wide ranges of inductance, capacitance, resistance, current and voltages, both AC and DC. Built with 9 inch Zero-Center scale. Matched high frequency probe is included to make this instrument a True VTVM. Peak-to-peak or RMS. Useful to 300 MC. DC probe is available to extend range to 30,000 volts.

Model 292X

Microvolt
SIGNAL GENERATOR
125 KC to 120 MC and 150 to 220 MC on fundamentals

An accurate microvolt signal generator that meets the needs of such high-frequency users as police, fire dept. and military as well as industrial laboratories. Calibrated output from 0.5 to 100,000 microvolts. Also available: 292XAL with continuous coverage. 125KC to 165MC on fundamentals.



Model 640

5" Oscilloscope

An outstandingly versatile 'scope designed for general purpose industrial laboratory and television applications. Both driven and recurrent sweep. Wide band amplifier: Frequency response DC, 0-4.5 MC, down 3 db. 17 M. V. per inch sensitivity. Calibrating voltages, triggered sweep, provision for Z-axis modulation, combination light shield, and camera base are provided. Stable, shielded and shock mounted. Three other models are available.
Write for technical details on the complete HICKOK Test Equipment line.

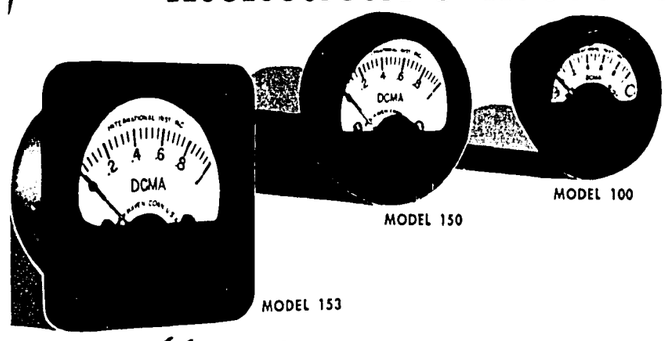
Electrical
INDICATING METERS

For over 43 years HICKOK has pioneered, developed, and improved electrical indicating instruments. Today, HICKOK manufacturers meters of all classes ranging from the most accurate laboratory types with an accuracy of 0.2% of full scale deflection on down to small pocket portable types with an accuracy of 1½%.

A complete line of switchboard types for use on electrical and power switchboards are available in 6" square, 6" round, horizontal edgewise, and up to the very large 14" with an accuracy of 1% or better. Provided in all AC and DC ranges including amperes, volts, watts, frequency, power factor, etc.

A very complete line of panel meters in both round and square types from 2½" to 9" are also available in the popular microammeter, ammeter, voltmeter, wattmeter, etc. This panel meter line is exceptionally complete and includes the very latest ruggedized types to meet military specifications

HICKOK has pioneered and perfected the smaller panel size 250° meters with a scale 2½ times as long as the conventional panel instrument. Also available, are hermetically sealed 250° meters as well as the standard molded types in many sizes and ranges.



HICKOK has also introduced the internal pivot design to provide a high standard of accuracy and dependability in an instrument with removeable pivots. Though adding considerable utility, this HICKOK sturdy assembly is even thinner than most external pivot designs. Among special movements developed by HICKOK are: electrodynamometer, galvanometers, true logarithmic deflections, special curves for special purposes and ruggedized designs for highest shock tests.

Full technical information on the complete line of HICKOK instruments and test equipment is available on request. Kindly list details of your requirements.

THE HICKOK ELECTRICAL INSTRUMENT COMPANY
10551 Dupont Avenue • Cleveland 8, Ohio

Are SIZE and WEIGHT Critical Factors in YOUR DESIGN . . . . ?

international instruments
INCORPORATED
are specialists in 1" and 1½"
miniature meters

You get • PROMPT DELIVERY
• WIDE SELECTION OF RANGES
• METERS DESIGNED TO SPECIAL REQUIREMENTS

If your instrument requirements demand the smallest possible size and weight *without* sacrificing accuracy and dependability, International Instruments can help you. International Instruments is a pioneer in the production of miniature instruments — the first to produce and sell 1" barrel diameter instruments, 1½" illuminated meters as well as 1½" self-contained AC Voltmeters, DB and VU Meters.

The meters shown above feature a miniaturized D'Arsonval type movement. Expert design, precision workmanship, and rigid quality control in every stage of manufacture make possible reduction in size while retaining high standards of performance.

Accuracy is held to ±3% of full scale deflection. Light, strong metal cases are easily mounted in any panel. Special scales, ranges and other characteristics can be provided to meet your particular requirements. Meters designed to meet applicable sections of Government Specifications are housed in watertight cases. They are used extensively in equipment used by the armed services.

If smaller size and lighter weight can help you to solve your instrument problems, write for engineering data sheets that cover our standard instruments. Or simply submit your specifications to our engineering department.

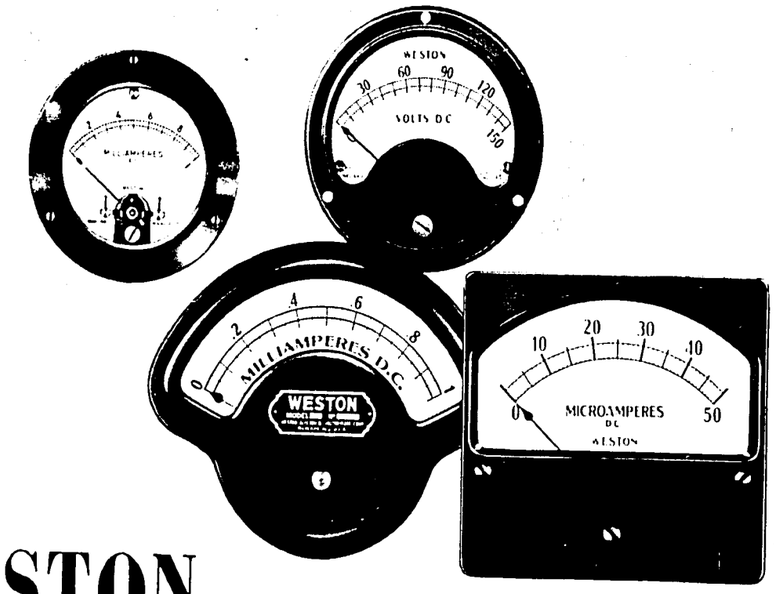
INDIANA PERMANENT MAGNETS

—for Uniform High Energy!

Look to INDIANA for *quality* permanent magnets—for skill in manufacture—for ingenious engineering aid in *both* design and application. INDIANA is the world's largest exclusive producer of permanent magnets. More than 35,000 different needs have been met successfully by INDIANA *"packaged energy."*



Alnico
Chromium Cobalt
Cunico
Cunife
Indalloy
Silmanal
Tungsten
Vectolite

★ ALL SIZES
ALL SHAPES
ALL MATERIALS

INDIANA is the only manufacturer furnishing *all* commercial grades of permanent magnet alloys. And you have a choice of cast, sintered, formed, or ductile metals. *Whatever* the requirement, INDIANA can serve you well. Send for Catalog No. 11-W.

Sole Makers of HYFLUX Alnico V—highest energy product of any magnet material.

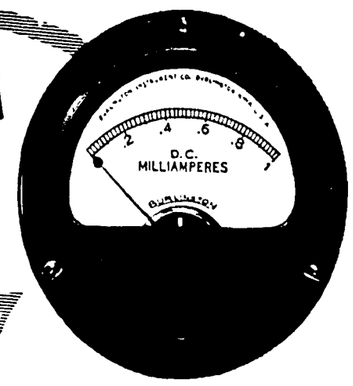
WESTON

PANEL INSTRUMENTS...

...outward evidence of the high quality built within fine electronic equipment



Available in all types, sizes and ranges for all electronic and electrical applications. Send for the Panel Instrument bulletin.

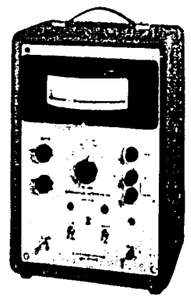
WESTON ELECTRICAL INSTRUMENT CORPORATION, 614 Frelinghuysen Avenue, Newark 5, N. J.

Burlington

HERMETICALLY AC-SEALED-DC INSTRUMENT

- Copper — cadmium — dichromate finished case.
- Black satin onodized aluminum bezel.
- Excellent shielding due to case material and construction.
- Double strength clear glass.
- Glass to metal seal under controlled humidity and temperature conditions.
- D'Arsonval permanent magnet type movement for DC applications.
- Magnetically damped, moving iron vane type movement for AC applications.

RUGGED CONSTRUCTION FOR SUPERIOR PERFORMANCE



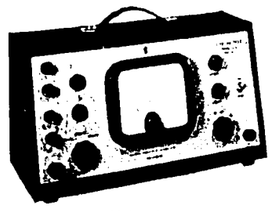
- Available in 1½" square, 2½" and 3½" round case types.
- Guaranteed for one year against defective workmanship and materials.

Burlington "Hermetically Sealed" Instruments are designed to conform to JAN and MIL specifications.

BURLINGTON INSTRUMENT COMPANY
DEPT. I-73, BURLINGTON, IOWA

Measure Resistance up to 20,000,000 Megohms

WITH MODEL 29A MEGOHMMETER



WITH 11 RANGES COVERING
FROM .3 TO 20 MILLION MEGOHMS
Direct Reading on 6½" Mirror Scale

Test Potentials: 85V DC and 500V DC, by plugging in on 115V 60 cycle lines. Also .5 to 1000V DC by using external supply. Test voltage unaffected by the value of resistance under test.

Direct Reading: Fast in operation with unusual stability even on highest ranges. Safe . . . current limited to 5 milliamperes.

For Full Details Write for Bulletin No. 1029

Measure Time as short as
1 MICROSECOND UP TO 10 SECONDS

Write for Bulletin No. 1030

Direct Reading on 5" Scale
WITH NEW

CHRONOTEST ELECTRONIC TIMER

A remarkable instrument with exceptional stability, allowing ample time for readings.

Small size . . . Compact . . . Light Weight. Extremely easy to operate. Cannot be damaged by overload or electrical misuse. Three models with 6 ranges each.

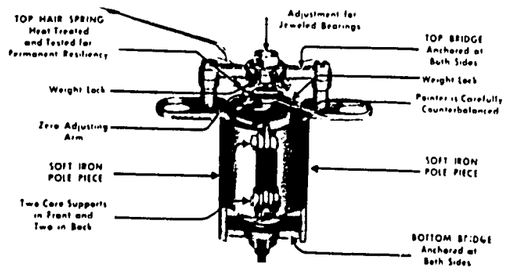
IT'S SAFER TO SPECIFY...

Simpson

INSTRUMENTS THAT STAY ACCURATE

for Accurate, Dependable Electrical Measurements

Your product design and production control can only be as good as the components and tools used in building and checking your equipment.



Only the finest standards are used in the manufacture of Simpson test equipment and panel instruments. You see, Simpson designs everything that goes into its panel instruments and test equipment. That's why you're safer when you specify Simpson.

When you specify Simpson Panel Meters, for example, your product has the finest panel meters obtainable, and at a sensible price. This minimizes the danger of rejects and failures in the field . . . helps make your product more stable from a performance standpoint, more efficient, and more accurate.

Simpson test equipment, too, is engineered to give you this same dependable accuracy. Created by electronic engineers who know your problems, these fine testers are designed to make your own checking needs simple and, above all, accurate.

Our engineers will be pleased to assist you with your panel instrument and testing problems. There is no obligation when you utilize this fine service.

SIMPSON "FULL BRIDGE TYPE MOVEMENT"

SIMPSON ELECTRIC COMPANY

IN CANADA: BACH-SIMPSON, LTD., LONDON, ONTARIO

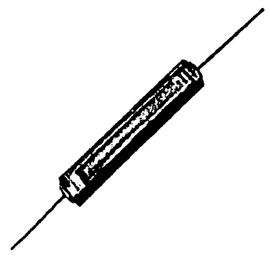
phaostron

RUGGEDIZED and HERMETICALLY SEALED

panel meters and null indicators

1½", 2½", 3½" and 4½" sizes.

Built to JAN-I-6 and MIL-R-10304 specifications, these meters incorporate aged Alnico magnets, R.F. shielding, shock mounted jewels, glass-to-metal *HERMETIC SEALS* and *RUGGEDIZED*, shock mounted construction.



Manufactured in an air-conditioned, temperature-controlled plant, these *Environment Free* instruments are available in A.C. and D.C. models.

phaostron

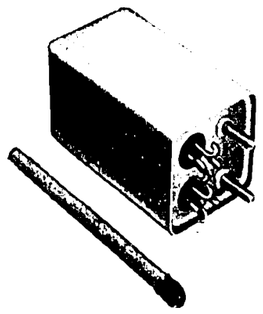
HERMETICALLY SEALED

"CARB-OHMS"

deposited carbon resistors

¼ to 2 watts *HERMETICALLY SEALED* in glass (the CA-H pictured here) and in a Specification Series (the CA-4R) which exceeds MIL-R-10509 spec. for fixed, accurate resistors.

For equipment subject to extremes of temperature, for high frequency applications and for closely matched units, these conservatively rated resistors provide the utmost in stability, precision and dependability.



100% inspection on each "CARB-OHM" assures conformance to specifications and ratings.

phaostron

HERMETICALLY SEALED

SENSITIVE MINIATURE RELAYS

perfectly counter-balanced armature

Contact arrangements up to and including D.P. D.T. 3 amp at 28 volts D.C., or 100 milliamperes at 150 volts D.C. resistive load.

This miniature *HERMETICALLY SEALED* relay is designed to operate thru wide ranges of environment including the shock requirements of MIL-E-5400. It will withstand 50 G's acceleration without malfunctioning and its use is recommended wherever extremes of shock, temperature and severe vibration are encountered.

Required coil power as low as 20 milliwatts.
Coil resistance up to 15,000 ohms.
Weight, max. 3.0 oz.

Red Bank Division

To provide its customers with an unequalled source for special-purpose electron tubes, inverters and AC generators, Bendix Aviation Corporation has placed its entire development, sales and manufacture of these products with its Red Bank Division at Eatontown, N. J. Here in a modern new plant of over 118,000 square feet have been concentrated the most highly skilled personnel and the latest available machinery to produce the highest quality electron tubes, inverters and AC generators possible. At the same time, a full-scale program is being carried on continuously at Red Bank to develop these products for even greater efficiency and versatility. In addition to its new products . . . taken over from the Eclipse-Pioneer Division, Teterboro, N. J. . . . the Bendix Red Bank Division will continue producing its established line of dynamotors and small DC motors. If you require precision items of these types, it will pay you to take advantage of the unique experience and facilities offered to you by Bendix Red Bank.

TYPE A15AF-X1
PERFORMANCE CHARACTERISTICS A15AF-X1

PRECISION MOTOR PERFORMANCE

Axial fan blower, 3 phase self-cooled motor is designed to start at a —55° C and feature maximum possible H P per unit weight and volume. The temperature will rise 45° C when fully loaded with 4" 4 blade, 29 degree pitch fan; Silicone wire and impregnation. At full load the input is 94 watts, the line current .54 amperes and the efficiency is 60%.

SPECIFICATIONS
Conform to NEMA Standards and other Gov't specifications.
Continuous duty

WEIGHT	22 oz.
C F M	22 Average
R P M	6250 Average
VOLTS	115
CYCLES	320-1000

can be supplied CW and CCW suitable for 50 to 60 CPS

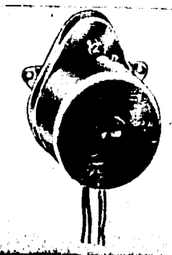
New **A. W. HAYDON COMPANY**

STOP CLOCK

High Speed Stop Clock Accrued Seconds Indicator With Fluorescent Dial and Hands . . . Also Available For Other Intervals.

This new, hermetically-sealed *Stop Clock* further enlarges the complete line of A. W. HAYDON COMPANY A.C. and D.C. Timers, time delay relays and timing motors. This accurate, panel-mounted timer totalizes hundredths of a second up to a minute. Hermetically-sealed, it weighs approximately 2 lbs. Comes with automatic reset.

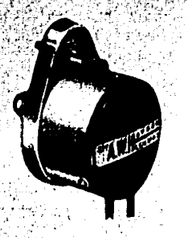


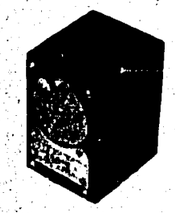
SPECIAL FEATURES:

- Precision timing measuring hundredths of seconds to one minute.
- Automatic reset.
- Hermetically sealed.
- For operation on 50, 60, or 400 cycles A.C. or 20-30V D.C. 400 cycle unit has D.C. clutch.

A. W. HAYDON CO. 400 CYCLE MOTOR has improved performance for aircraft use.

- Light in Weight — Small Compact Size.
- Now . . . you can run timing systems directly from 400 cycle power.
- Features fast start and stop, as well as high torque, and reversability.
- Get all the facts in the new A. W. Haydon Co. catalog, described below.



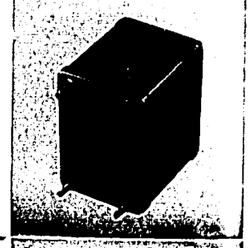


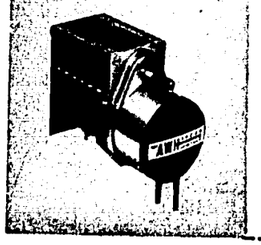
SERIES 5700 CHRONOMETRIC D.C. GOVERNED TIMING MOTOR

- Extreme accuracy — 1/10 of 1%.
- Wide range of voltage, temperature, load.
- Light weight . . . Compact.
- Reversible.

SERIES 5300 D.C. TIMING MOTOR

- Rugged, Accurate, Reliable.
- Compact . . . Reversible, variable speed.
- Special windings available for operation from vacuum tubes or as tachometer generator.



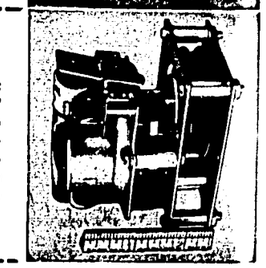


TIME DELAY RELAY WITH ADJUSTABLE DIAL A.C. SERIES 11400 OR D.C. SERIES 6400

- Wide selection of time range.
- Features ease of adjustment.
- Flexible, compact design.
- Positive operation.

HERMETICALLY SEALED TIMER SERIES 6400, 11400, 7900, 12900, 3600

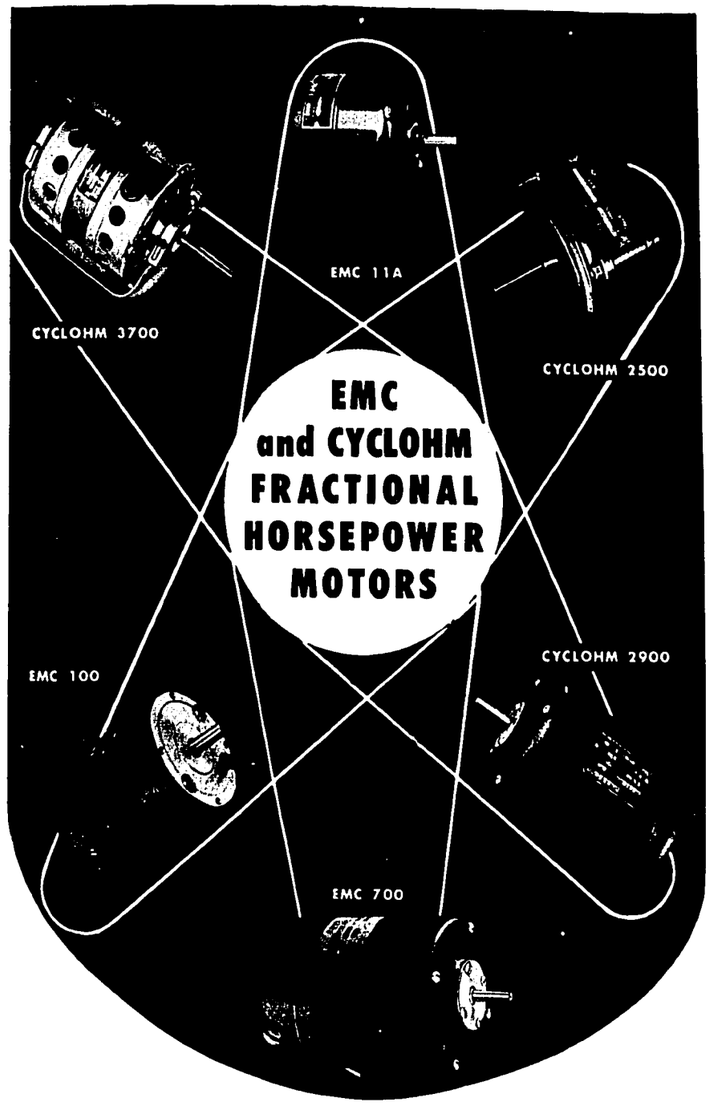
- Maximum protection against weather, humidity, explosive atmospheres, and high altitude.
- Light weight, corrosion-resistant enclosure.
- Flexible design.



REPEAT CYCLE TIMER A.C. SERIES 13600 OR D.C. SERIES 3600

- Durable . . . Long life.
- Wide range of time cycles.
- Multiple control circuits.
- Easily adaptable to meet specific requirements.

DELAYED-RESET TIME-DELAY RELAY



New time-delay relay uses basic "Series 6400" d-c. and "Series 11400" a-c. time delay relay. Makes possible delayed reset proportional to time delay, and a circuit reclosure time proportional to length of current interruption. Reset is controlled by escapement mechanism.

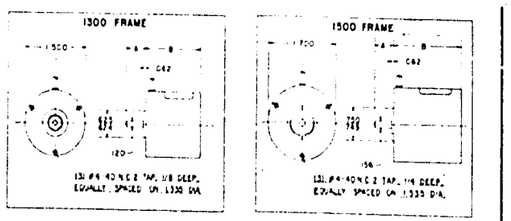
Compact LOW-INERTIA SERVO MOTORS

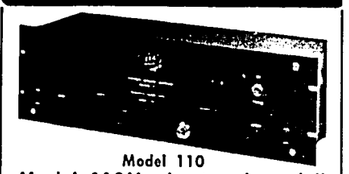


PRECISION BUILT
FOR POSITIVE ACTION
MINIMUM WEIGHT, 4 OUNCES

WE CUSTOM-BUILD MOTORS to meet Your Specs and All Government Specs

The servo motor shown on this page is representative of the many types we manufacture that combine low weight and compactness with rigidly exact performance.

It is available for two phases, 60 to 400 cycles, in 2-, 4-, 6- and 8-pole construction. It can be supplied with low-backlash precision gear head. It can be built to meet any military specifications with regard to humidity, high ambient temperature, vibration and altitude.



We specialize in the design and production of servo motors, actuators, gear motors and torque motors. IMC motors are widely used in aircraft control, guided missiles, gunfire control, rocket control, industrial control and many other servo and instrument applications that require motors of 1/1000 to 1/10 horsepower.

For applications that require any type of fractional or subfractional horsepower motor . . . check your specs with

NEW! Tubeless Regulated Dual DC Supply for Transistor Application

Model 110
Model 110M (metered model)

Features

- √ No Tubes-Long Life
- √ Negligible Warm-up Time
- √ Dual Output-Positive or Negative
- √ Continuously Variable Outputs
- √ Output #1—Triple Range at 60 ma 0-1.0, 10, 100 v.
- √ Output #2—0-100 v at 60 ma
- √ DC Impedance less than 100 ohms
- √ Line Regulated 95-125 v
- √ Ripple Less Than 0.01%
- √ Moderately Priced

Write for our Bulletins on this and other Transistor Products.

WHICH PILOT LIGHT DO YOU NEED?

DIALCO

THE BIG ONE

This Pilot Light Assembly was first made to accommodate the *S-11 lamp* and was intended for use in the cabs of great diesel locomotives.

ACTUAL SIZE

Cat. #613529-211

Dialco HAS THE COMPLETE LINE OF INDICATOR and PANEL LIGHTS

This BIG one

or

this LITTLE one

THE LITTLE ONE

The miniaturization program on defense products required the development of this *sub-miniature* light. It is used on communication equipment and aircraft. Midget flanged base bulbs to fit are rated 1.3, 6, 12, and 28 volts.

ACTUAL SIZE

Cat. #8-1930-621

Samples to suit your own special conditions and requirements will be sent promptly and *without cost*. Just outline your needs. Let our engineering department assist in selecting the *right lamp* and the *best pilot light* for YOU.

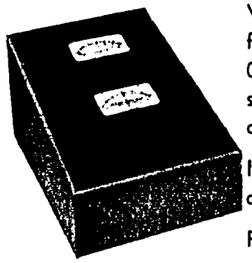
NEUTRONIC presents a new line of
REVERSIBLE HIGH VOLTAGE RF POWER SUPPLY UNITS

REVERSIBLE OUTPUT ENTIRELY CONTROLLED BY CONVENIENTLY LOCATED LEVER ON FRONT PANEL

Available in the following 4 models:

Model R-22C 3-30 KV 2 ma. @ 18 KV
Model R-22CR 5-30 KV 2 ma. @ 18 KV
Model R-22M 3-30 KV 3 ma. @ 20 KV
Model R-22MR 5-30 KV 3 ma. @ 20 KV

Model R22 SERIES Regulated or Unregulated



Standard Rack Panel Mounting size 19¼ × 21¾ × 15¼

OTHER NEUTRONIC POWER SUPPLY UNITS

21K	1-10 KV	10 ma. @ 5 KV	....	23CR	5-40 KV	1.3 ma. @ 25 KV	.5%
21KR	1-10 KV	10 ma. @ 5 KV	.5%	23M	5-45 KV	1.5 ma. @ 30 KV	....
21M	1-12 KV	6 ma. @ 10 KV	....	23MR	5-45 KV	1.5 ma. @ 30 KV	.5%
21MR	1-12 KV	6 ma. @ 10 KV	.5%	24C	5-50 KV	1 ma. @ 35 KV	....
22C	3-26 KV	2 ma. @ 18 KV	....	24CR	5-50 KV	1 ma. @ 35 KV	.5%

22M	5-26 KV	3 ma. @ 20 KV	....	24MR	5-55 KV	2 ma. @ 30 KV	.5%
22MR	5-26 KV	3 ma. @ 20 KV	.5%	33S	1-30 KV	4.5 ma. Entire Range	
23C	5-40 KV	1.3 ma. @ 25 KV	....	33HRR	1-30 KV REVERSIBLE	5 ma. Entire Range " "	0.1%

MOST NEUTRONIC MODELS CAN BE FURNISHED WITH REGULATION OF 0.1% IF DESIRED

THE NEW NEUTRONIC KILOVOLTMETER AND VARIATION PERCENTAGE INDICATOR

With this new meter you can now measure voltages from zero to 60 Kilovolts in three ranges (0-1200 volts; 0-30 KV; and 0-60 KV) and you can also observe on a second meter, the voltage variations directly in percentage down to .05%.

Invaluable in measuring variations or regulation percentage of any power supply.

For quickly determining the specifications for a proposed power supply . . . eliminates guesswork.

For observing exact parameter variations in any voltage due to circuit operation.

Write for further details and specifications.

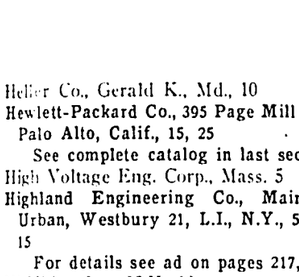
RACK MOUNTING MODELS

THIS IS THE SUPPLY IN WHICH THE OUTPUT VOLTAGE VARIES TO HOLD THE LOAD CURRENT CONSTANT.

DESIGNED FOR PRODUCTION TESTING, RESEARCH, INSTRUMENTATION, AND CALIBRATING USE.

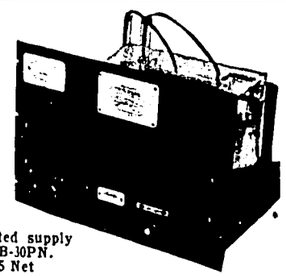


STANDARD MODELS ARE AVAILABLE TO COVER THE CURRENT RANGE OF 0.2 TO 100 M.A. IN ONE INSTRUMENT.

ELECTRONICALLY REGULATED
D.C. CONSTANT CURRENT POWER SUPPLIES
OUTPUT CURRENT IS HELD CONSTANT AS LOAD VARIES

OTHER MODELS AVAILABLE
WRITE DEPT. 101 FOR LITERATURE

ASSOCIATED SPECIALTIES CO.
1751 MAIN STREET
OREFIELD, PENNSYLVANIA



SPELLMAN HIGH VOLTAGE POWER SUPPLIES

MODEL LAB-40 CONTINUOUSLY VARIABLE REGULATED 25 TO 40 KV DC SUPPLY
Has a 4 to 6 KV focus tap for use with flying spot kinescope recording and television projection tubes, etc. Regulations of 0.5% at 1 milliampere. Available with either locking controls or standard knob. Dimensions: 19" wide x 12¼" high x 15" deep.

With Meter $620 Net
Less Meter $545 Net

MODEL LAB-30PN REVERSIBLE POLARITY FROM FRONT PANEL—CONTINUOUSLY VARIABLE 1 TO 30 KV DC SUPPLY
Regulated supply with regulations of 0.5% at 1 milliampere. Up to 2 milliamperes may be drawn from 30KV down. This 16 tube unit is of the RF type consisting of a separate oscillator and buffer feeding the power oscillator into a doubler rectifier. Regulations accomplished through feed-back into a DC amplifier plus output control of the buffer. Rack Model—19" wide x 12" high x 13" deep. Bench Model 21" wide x 14" high x 15" deep. With Meter $670 Net. Less Meter $595 Net.

Model LAB-30 is a positive polarity output regulated supply with same characteristics and dimensions as LAB-30PN.
With Meter $570 Net Less Meter $495 Net

MODEL RG-30M
Continuously Variable 15-30 KV Regulated DC Power Supply .....$295 Net
MODEL PN-30R
Reversible Polarity Continuously Variable 1-30 KV Unregulated Power Supply .....$205 Net
MODEL PN-60 Reversible Polarity 60 KV DC Power Supply .....$675 Net
MODEL 2040 40 Kilovolt DC Power Supply .....$136 Net
MODEL 4575 4½ KV Power Supply .....$32.50 Net

SPELLMAN TELEVISION CO., INC. 3029 WEBSTER AVENUE BRONX, N. Y.

Complete Data

Spreads and catalogs to provide you with detailed information on products and services of 57 firms will be found in the back of this Directory, beginning on page 361.

IF YOU WANT TO...

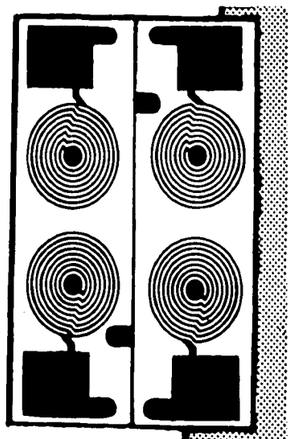
have coils, condensers, resistors and all wiring at a fraction of their present cost, eliminate assembly errors, reduce size of product—THEN CENTRONICS'

PRINTED CIRCUITS (Using our own improved photo-etch process)

are for you.

KEEP AHEAD OF COMPETITION

More than likely your competitors may be contemplating using printed circuitry. In that case they will have the advantages of lower costs, smaller space and greater precision.



WHERE PRINTED CIRCUITS ARE BEING USED

In all phases of the electronic field. For instance TV I.F.'s, TV Tuners, UHF TV cross over networks, and switches. You can also replace the entire wiring of radios, TV sets and many other devices.

HOW TO OBTAIN MORE INFORMATION

Send for our brochure or ask for our sales engineer in your area to visit you to discuss your needs.

If you wish, send us a sketch or blue print of your product today. In return you will receive from us a sketch of your unit showing its appearance as a printed circuit and complete price quotations.

UNIVERSAL ELECTRONICS OFFERS

2 Regulated POWER SUPPLIES for the price of 1

in the ½ Twin Model 520AT

● Universal's **NEW** Twin Model 520AT offers you two **completely independent** regulated power supplies in a single cabinet. May be used together or as separate units. Each unit furnishes 0 to 500 volts D.C. at 0 to 200 Ma. Price $425.

Model	Range	Regulation	Price
300A	0-500 V, DC 0-300 Ma	0.2 V	$395
200A	0-500 V, DC 0-200 Ma	0.2 V	$295
Twin Model 425AT	0-400 V, DC 0-250 Ma, Max Ea. Unit	0.5%	$350
520A	0-500 V, DC 0-200 Ma	0.5%	$230
425A	0-400 V, DC 0-250 Ma, Max	0.5%	$175

ELECTRALAB designs and manufactures

PRINTED CIRCUITS

for practically *any* electronic unit

Illustrated is an ELECTRALAB printed circuit for an automobile radio. Note the neatness of circuitry. You can easily see how assembly time was reduced to a minimum. This is a good example of printed circuits in use where a circuit must be *duplicated* many times with unerring accuracy.

Here are some of the unlimited applications for ELECTRALAB printed circuits

Hearing Aids
Timing Devices
Industrial Controls
Business Machines
Guided Missiles
Radar
Television
Motor Controllers

ELECTRALAB printed circuits MERELY SAVE YOU MONEY . . . by . . .

— Cutting assembly time and labor costs
— Eliminating certain operations
— Lowering reject waste
— Reducing inventory costs
— Saving testing and inspection time
— Simplifying trouble-shooting and servicing

Why don't *you* take advantage of ELECTRALAB's engineering facilities *before* you design or re-design your circuits.

ELECTRALAB INCORPORATED

Selenium Rectifiers

HI-VOLTAGE SELENIUM RECTIFIERS
Phenolic Cartridge Type

Type P Type F Type S

DIAMETER: From ⅛" to 1"
LENGTH: From ½" to 12"
CURRENT, half-wave: 1.5 ma to 60 ma
VOLTAGE, DC output: 20 volts to 10,000 volts
Send for Bulletin H-1

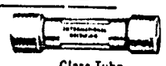
SELENIUM DIODES

DIAMETER: From ⅛" to 13/32"
LENGTH: From ¼" to ½"
RMS applied voltage: From 26 volts to 208 volts
DC output voltage: From 20 volts to 160 volts
DC output current: avg. from 200 microamperes to 11 milliamperes
Reverse Leakage at 10 volts RMS: 0.6 microamperes to 2.4 microamperes
Potted in thermosetting compound
Temperature Range: From —60° C to 100° C
Available in 1, 2, 3, 4, 5, 6, 7 and 8 cell Diodes.

WRITE FOR BULLETIN SD-1

GERMANIUM DIODES

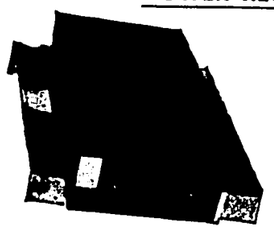
ALL TYPES AVAILABLE INCLUDING UHF TYPES
Write for Bulletin GD-1



HERMETICALLY SEALED RECTIFIERS

Octal Tube Base Type Metal Case

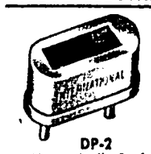
Metal Case Pigtail Leads Glass Seal



Glass Tube Ferrule Ends

DIAMETER: From 3/16" to 1-1/4"
LENGTH: From 9/16" to 10"
CURRENT, half-wave: 1.5 ma to 60 ma
VOLTAGE, DC output: 20 volts to 4,000 volts

WRITE FOR BULLETIN H-1



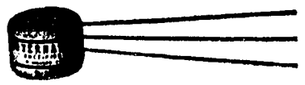
POWER RECTIFIERS

CELL SIZES: From 1" x 1" to 6¼" x 7¼"
CURRENT RATINGS, per cell: 0.125 amperes to 7 amperes
VOLTAGE RATINGS, inverse per cell: 22 volts rms to 40 volts rms
Efficiency to 87%
Power factor 95%
Suitable for oil immersion.
Ratings to 250 KW

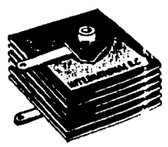
Send for Bulletin C-249

PHOTO-ELECTRIC CELLS — SELF-GENERATING TYPE

DP-2 Hermetically Sealed 25 microamperes*



Unmounted Cells Available Output up to 600 microamperes*

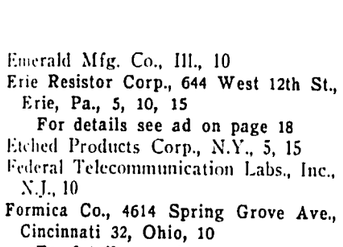


At 100 foot-candles illumination and 100 ohms external resistance.

Write for Bulletin PC-649

MINIATURE RECTIFIERS

Completely encapsulated Selenium Rectifiers. Available in half-wave, center tapped or bridge units in various voltages and current ratings.



Miniature Rectifiers RS Type From 65 to 1,000 ma.

Stupakoff
PRINTED CIRCUITS
★ Compact
★ Precision-made

By combining in one compact, sealed unit a specified number of printed resistors and capacitors of precision values, Stupakoff Printed Circuits save space and weight, speed assembly, reduce costs, minimize assembly errors. By using Stupakoff Printed Circuits instead of the individual components, soldered connections are reduced up to 80%, assemblies are lighter and more compact, your assembly time is reduced and better products are made.

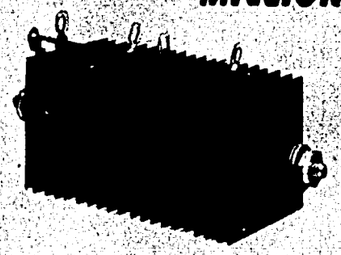
TO CUT COSTS — Or For Miniaturization
. . . Consider Printed Circuits

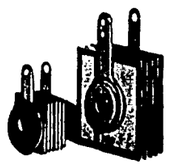
The low cost, high production aspects of printed circuitry is worthy of your investigation. We will be happy to provide you with samples and information relating to our printed circuit work upon your request.



Complete and cordial co-operation will be given in adapting our printed circuits to your design.

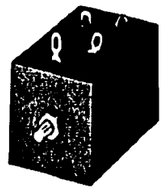
GLASS PRODUCTS CO. 6911 S. South Chicago Ave. FAirfax 4-1050 Chicago 37, Ill.

Seletron



SELENIUM RECTIFIERS

MILLIONS IN SERVICE THROUGHOUT THE WORLD!

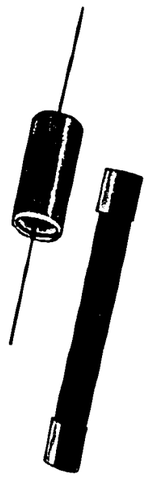


INDUSTRIAL TYPE RECTIFIERS

For a multiple of applications; power supplies, magnetic amplifiers, electroplating, battery charging, etc. Available in current rating from milliamperes to thousands of amperes, and from a few volts to thousands of volts.

HALF-WAVE RADIO TYPE RECTIFIERS

Economical rectifiers for many and varied applications. Especially applicable for radio and TV. Available in current ratings through 500 ma.



ENCAPSULATED RECTIFIER TYPES

For adequate protection for military and other stringent uses. Recommended for use where size and weight are important considerations; such as aircraft applications.

CARTRIDGE HIGH VOLTAGE ASSEMBLIES

With either pigtails or ferrules. These versatile cartridge assemblies rated at 5 mils are available in voltages ranging to thousands of volts.

HERMETICALLY SEALED UNITS

Built to special requirements to meet unusually stringent conditions. Designed to meet individual needs.

HIGH TEMPERATURE TYPES

These selenium rectifiers are capable of operating in an ambient temperature of 125° C., with no increase in the size of the cell as compared with a similar rectifier operating in a normal ambient.

See Radio Receptor Co.'s page showing our Germanium Diodes and Germanium Transistors on page 202 of this directory.

Our engineering department will be glad to aid you in the solution of your rectifier problems. Submit your requirements and let us make recommendations...without obligation, of course! See our catalog in Sweet's Product Design file...or write us requesting Bulletin 1

Specify

ADVANCE RELAYS

for precise circuitry

There are many reasons why Industry specifies ADVANCE RELAYS: They meet or surpass Military and Civilian requirements—many types have AN approval—many are hermetically sealed—*all* are lightweight—small—rugged—compact—and *all* are precision-built for efficient, trouble-free, long life performance.

If you have relay problems involving contact loads, coil resistances, close differential, timing features, input sources, critical environment or any particular requirements involving unusual or accurate circuit behavior, ADVANCE can supply the relay.

A complete line of relays for radar, radio, electronic and electrical equipment applications.

Write for new, descriptive Catalog containing detailed information about ADVANCE Relays and facilities.

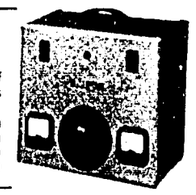
Selenium Rectifier Power Units



D.C. POWER SUPPLIES

MODEL SV-30-20

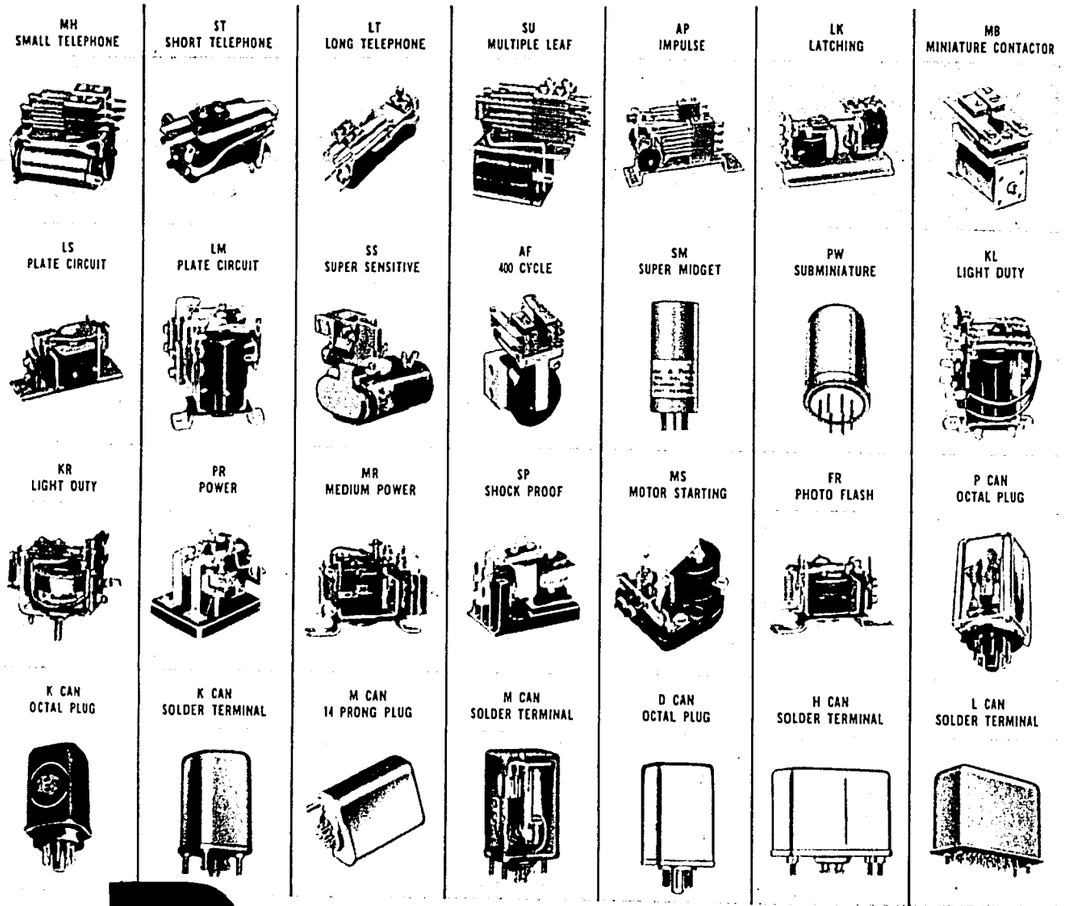
INPUT: 117V, 60 cycle, single phase.
OUTPUT: 0-30 volts at 0-20 amps. D.C.
CONTROLS: Powerstat, Heinemann magnetic circuit breaker, Klixon thermal circuit breaker, 4½" rectangular voltmeter and ammeter accurate to 2%, neon pilot light, 5 way binding posts for output.

SV-30-20 full wave rect. D.C. $260.00
SF-30-20 3% ripple 300.00
SA-30-20 0.4% ripple 345.00

D. C. LABPACK

INPUT: 117 volts, 60 cycle, single phase
OUTPUT: 0-28 volts at listed current, continuously variable
CONTROLS: Powerstat, circuit breaker, neon pilot lamp, on-off switch voltmeter and ammeter accurate to 3%, 5 way binding posts for output.

Model L 28-5, 5 Amperes full wave rectified D.C. $87.50
Model LF28-4, 4 Amperes D.C. 2% ripple 107.50
Model L 28-10, 10 Amperes full wave rectified D.C. 155.00
Model LF28-8, 8 Amperes D.C. 2% ripple 170.00



The illustrated standard units represent the power supplies we manufacture. Many applications are designed to the exact requirements of the user, giving maximum utility together with economy. Prompt quotation and delivery.

POWER CONVERSION FOR—

Production and laboratory testing of D.C. apparatus from A.C. power lines, allowing continuous variation of D.C. voltage and current to simulate changing battery or line voltage conditions.
Commercial operation of vibrator power packs, dynamotors, D.C. motors, relays and other devices which require D.C.

- Replacing storage or primary batteries.
- Battery charging.
- Life testing of battery operated equipment.
- High current selenium rectifier plate power supplies.

What is your Delay or Regulating Problem?

For the most effective solution use the

SIMPLEST, MOST COMPACT
MOST ECONOMICAL
HERMETICALLY SEALED

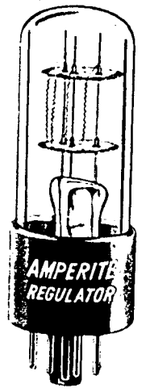
AMPERITE
THERMOSTATIC DELAY RELAYS

STANDARD

Provide delays ranging from 2 to 120 seconds.

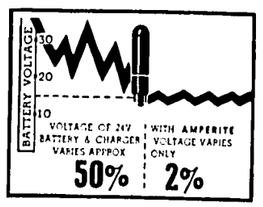
- Actuated by a heater, they operate on A.C., D.C., or Pulsating Current.
- *Hermetically sealed.* Not affected by altitude, moisture, or other climate changes.
- Circuits: *SPST only*—normally open or normally closed.

Amperite Thermostatic Delay Relays are compensated for ambient temperature changes from −55° to +70°C. Heaters consume approximately 2 W. and may be operated continuously. The units are *most compact, rugged, explosion-proof, long-lived, and—very inexpensive!*

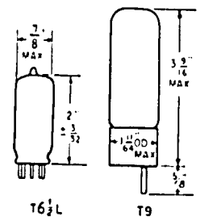


MINIATURE

TYPES: Standard Radio Octal, and 9-Pin Miniature.



PROBLEM? Send for Bulletin No. TR-81



BALLAST-REGULATORS

T9 BULB

- Amperite Regulators are designed to keep the current in a circuit ***automatically regulated*** at a definite value (for example, 0.5 amp).
- For currents of 60 ma. to 5 amps. *Operates on A.C., D.C., or Pulsating Current.*
- Hermetically sealed, light, compact, and most inexpensive.

Maximum Wattage Dissipation: T6½L—5W. T9—10W.

Amperite Regulators are the simplest, most effective method for obtaining *automatic regulation* of current or voltage. *Hermetically sealed,* they are not affected by changes in altitude, ambient temperature (−55° to +90°C), or humidity. Rugged; no moving parts; changed as easily as a radio tube.

YOU CAN ALWAYS RELY ON EDISON COMPONENTS

for Electronic and Communications Equipment Because of:

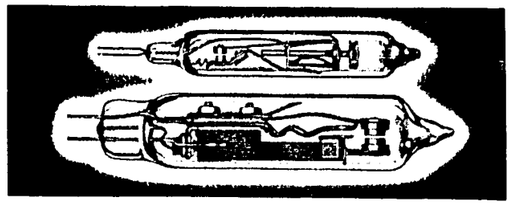
HERMETICAL SEALING in rigid glass.

TAMPER-PROOF stability that defies time and abuse.

ACCURACY. Patented feature permits calibration *after* sealing.

THERMAL TIME DELAY RELAYS

Cathode and filament protection • Gyro Erection • Prevent surges and false starts in sensitive auxiliary equipment • Miscellaneous circuit switching



SPECIFICATIONS

Standard Octal Base

Delays . . . 2 seconds to 5 minutes
Heater . . . 5 watts nominal, continuous operation
Voltages: 6.3, 26.5 and 117
Contacts . . . 6 amps maximum, 3 amps to 450 volts a.c. or d.c.
Vibration . . . 1/16" amplitude at 55 cps. 50g shock.
Ambient . . . −60 to +85°C **Seated Height** . . . 3¼ max.

Miniature 7-Pin Base

Delays . . . 5 seconds to 75 seconds
Heater . . . 2.5 watts nominal, continuous operation
Voltages: 6.3 and 27.5
Contacts . . . 2.5 amps max. 1 amp at 125 volts d.c.
Vibration . . . 1/16" amplitude at 55 cps. 50g shock.
Ambient . . . −60 to +85°C **Seated Height** . . . 2¼ max.

SEALED THERMOSTATS

Ambient protection for frequency standards • Precision heat control for electronic laboratory instruments • Overheat detection and fire alarm.

SPECIFICATIONS

Heavy duty—type D8
Max. temp. . . . 320°C
Max. watts . . . 1000
Max. amps. . . . 8.0 d.c.
Calibration tolerance . . . ±2.5°C
Length, 2¾"; **dia.**, 9/16" (approx.)

Precision control—type S1
Max. temp. . . . 190°C
Max. watts . . . 150
Max. amps 1.0
Control differential at ¼ amp = 0.1°F
Length, 2½"; **dia.**, ⅜" (approx.)

YOU CAN ALWAYS RELY ON EDISON

Information at high speed! "Data the way an engineer thinks" is the key to IRE DIRECTORY classifications. All products are divided into 10 fundamental groups, many of which parallel professional group organization. The grouping plan makes this the fastest working directory you ever used! No components are mixed with test equipment—you turn right to a section where each item belongs.

Yet good engineering detail is maintained. 99 basic classes of products under these ten sectional product directories keep listings from becoming cumbersome, but clearly define products.

Completeness is insured! Most firms make many products in a single classification. Wasteful, eye-confusing relisting of the same firms over and over is quite sensibly solved by using a system of codes under the 99 basic headings which actually provide 489 separate classifications. The result is a more complete picture of each firm's full line, but you travel through fewer listings.

Comar can supply the correct relay to suit your specific needs. Type N with dimensions of only 2⅛" x 1⅞" x 1⅝" for 4PDT, and Type D with 1¾" x 1½" x 1½" for 4PST, are ideal for a wide range of general industrial purposes. Contacts up to 10 amperes available. For military and general industrial applications, the Type TM which is only 1⅜" x 1½" x 3/32" for 4PDT, or Type TJ which is only 1⅜" x 1½" x 3/32" for 4PDT, or Type TW which is only 1 1/32" x 1 7/16" x ¾" for DPDT, have provided the solution to small space problems. Standard units carry up to 3 amperes on contacts. Types TM, TJ and TW available hermetically sealed or open. Relays can be modified to meet special requirements. Send specifications for our recommendations.

rpc QUALITY RESISTORS

- WIRE WOUND PRECISION
- HIGH VOLTAGE
- HIGH FREQUENCY
- HERMETICALLY SEALED
- HIGH MEGOHM

RPC Resistors are high quality units designed to meet stringent requirements of manufacturers and users of test instruments, meters, electronic computers and scientific equipment. They are made to meet government requirements and rigid industrial specifications. RPC is dedicated to strict adherence to a policy of use of the finest materials obtainable, together with stringent control of quality. All test equipment and standards used are of a type only to be equaled by few leading laboratories. Advanced production methods have enabled the manufacture of resistors in large quantities at reasonable cost. RPC resistors meet Government specifications and are acceptable for all types of equipment. Due to the above policies coupled with reliable delivery, RPC has in a few years become one of the largest suppliers of Precision Wire Wound and High Voltage Resistors.

SPECIALIZING IN THE MANUFACTURE OF QUALITY RESISTORS IN ANY AMOUNT

HIGH MEGOHM, HIGH VOLTAGE, HIGH FREQUENCY, WIRE WOUND PRECISION

A RELAY for every application...

From extremely sensitive to heavy duty relays . . . whatever the need . . . you'll find Signal Engineering Relays built to meet the severest operating conditions.

Backed by more than a quarter-century of specialized engineering experience, each relay embodies design features which insure accurate, efficient and dependable operations to meet exacting standards of performance. That is why . . . whenever performance counts . . . Signal Engineering Relays are used as components by many of the largest manufacturers of electronic equipment and devices, and for other control operations by leading industrial firms everywhere.

Many of our relays are designed to meet Navy and military applications without modification. Other standard relays available, or relay assemblies modified to fit various armed services' requirements.

Tell us your requirements and we will gladly submit our recommendations.

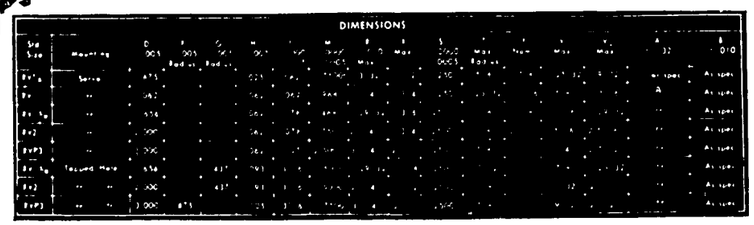
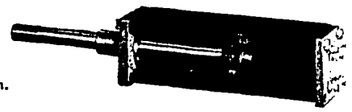
TIC PRECISION POTENTIOMETERS



Technology Instrument Corporation potentiometers are designed for application in computing devices, instrumentation, electronic control and servo mechanisms — wherever extreme electrical and mechanical precision is an essential requirement.

As a result of years of custom manufacturing a complete line of standard sizes is available ranging from 7 inches in diameter to the sub-miniature 7/8" in diameter, providing optimum accuracy in minimum size.

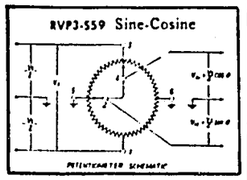
Custom design both mechanical and electrical is a featured TIC service. Precision non-linear pots may be designed to meet customer's requirements from either empirical data or implicit functions. Taps and special winding angles anywhere up to 360° continuous winding can be incorporated into both linear and non-linear precision potentiometers.



The type RVP3-S59 Sine-Cosine potentiometer, one of the many types standard with the Technology Instrument Corporation, performs two operations in a single potentiometer assembly . . . two wipers spaced 90 degrees apart yield both sine and cosine outputs.

1. Total resistance: 20,000 ohms plus or minus 5 per cent between terminals 1 and 3.
2. Accuracy: Plus or minus .5 per cent of the peak to peak amplitude.
3. Maximum voltage: Conservatively rated at 150 volts between terminal 1 and 3.
4. Life: Guaranteed for at least 500,000 complete cycles in either direction at 30 rpm.
5. Potentiometer base: 3" diameter, precision machined aluminum.
6. Resistance Element: Karma wire with temperature coefficient of .00002 parts per degree centigrade.

Type RVT TRANSLATORY POTENTIOMETER



Specifications:

Resistance Range—100 to 100,000Ω for 2½ to 6" strokes.
Resistance Tolerance—±5% (Standard).
Independent Linearity—±1% of Total Resistance (Std.)
Silver Overtravel—5/32 inches at either end.
Power Dissipation—Approx. one watt/inch of stroke length.
Ambient Temperature Range—−55° to +80°C.
Temperature Coefficient—.00002 part per degree C.
Life—1,000,000 complete cycles at 30 strokes/min. or less.
Stroke Lengths—½ to 15 inches.

TRANSLATORY POTENTIOMETER provides output proportional to a linear displacement rather than a rotary motion of a shaft.

RVP3-559 Sine-Cosine

CONTINENTAL NOBLELOY RESISTORS

For initial accuracy and long life stability specify "Nobleloy" resistors for your critical circuits. The Nobleloy resistor is a metal film type resistor exhibiting excellent operating characteristics. The rugged construction of the X & PX styles offer trouble free operation under most severe conditions. They are available in ½, 1, 2 & 5 watt ratings in a resistance range of 1 ohm to 30 megohm, in tolerances of ½%, 1% and 5%. The size illustrated is a ½ watt resistor 5/8" long × 9/32" diameter.

A miniature type Nobleloy resistor is available in the ½ watt size as per illustration. A low cost, space saving resistor, the NF½ offers excellent operating characteristics. Designed to meet the requirements of government specification MIL-R-10509 for a fixed accurate nonwire wound resistor. The NF½ is available in a resistance range of 1 ohm to 1 megohm in tolerances of 1% and 5%.

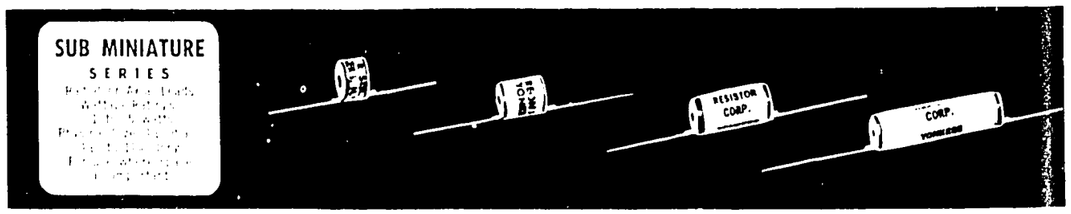
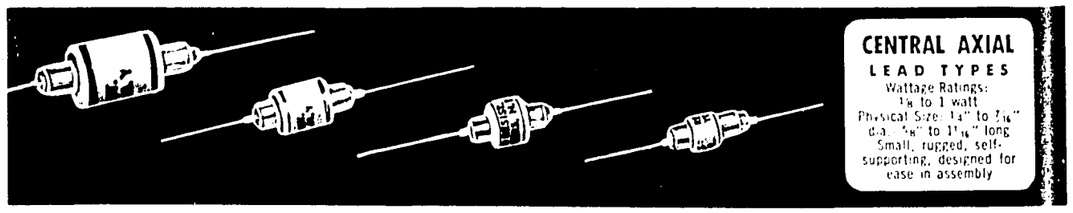
PROMPT DELIVERY...

of Precision Wire Wound Resistors

in sample or production quantities!



MIL-R-93A
SERIES
Lug Terminals
Wattage Ratings:
¼ to 1 watt
Tolerance: 1% to .02%
Resistance Range:
.1 ohm to 4 meg.
Exceed all MIL-R-93A specifications



COMMERCIAL
SERIES

MINIATURE
SERIES
Radial or Axial Leads
Wattage Ratings:
.15 to 1.5 watts
Resistance Range:
1 ohms to 1.6 meg.
Physical Size: .3" dia. - ¼" to 1¾" long

SUB MINIATURE
SERIES

CENTRAL AXIAL
LEAD TYPES
Wattage Ratings:
⅛ to 1 watt
Physical Size: ¼" to 7/16" dia. ⅜" to 1 1/16" long
Small, rugged, self-supporting, designed for ease in assembly

Sub-Sub Miniature Series The smallest precision wire wound resistors. For use in tight spaces. Only 3/32" long by 7/16" diameter.

Hi-Temp Series For applications requiring resistors capable of withstanding severe thermal shock and extreme temperatures. Operate from −65 to 200 C. Available in all types shown.

Hi-Watt Series Available in all series shown. Wound with special low temperature coefficient wire to provide power dissipation ratings up to 10 watts.

Encapsulated Series Hermetically sealed resistors completely immune to immersion and humidity. Designed to exceed all MIL-R-93A requirements.

Our Engineering Staff welcomes the opportunity to help you with YOUR problems! For further details write for Bulletin E-6!

Only the finest material, workmanship and product control techniques are used in production of Reon Precision Wire Wound Resistors.

Electra precision

deposited carbon resistors

8 sizes to meet circuit requirements of high stability, accuracy & low cost

Electra carbon coat resistors provide the precision, stability and accuracy to meet a variety of applications and requirements in advanced electronic circuits. Electra offers the benefits of low voltage coefficient, low capacitive and inductive characteristics in high frequency applications, in addition to small physical size and economy.

STABILITY — regardless of resistance tolerance, all Electra deposited carbon resistors are equally high in stability.

ACCURACY — ±1% is standard but resistance value tolerances of ±2%, ±5% and ±10% are available.

ECONOMY — When the advantages of stability, accuracy and small physical size are considered, Electra resistors are your most economical buy.

PART NUMBER	Wattage	Max. Oper. Rated Voltage	Resist. Range	DIMENSIONS Length A	Dia. B
DC ⅛	125	250	4 Ω 250 K Ω	9/32	5/64
DC ¼	25	300	5 Ω 1 Megs	17/32	3/32
DC ½	5	500	6 Ω 5 Megs	13/16	11/64
DC ½A	5	350	3 Ω 2.2 Megs	19/32	11/64
DC ½B	5	500	3 Ω 5 Megs	11/16	15/64
DC ½C	5	350	2 Ω 1.1 Megs	15/32	11/64
DC 1	1	500	3 Ω 10 Megs	15/16	9/32
DC 2	2	750	10 Ω 50 Megs	2 1/16	9/32

* Lead Length C — Lengths of leads for all resistors shown above are 1½ inches

Hermetically Sealed Resistors Are Available in 6 Sizes From ¼ Watt to 2 Watts.

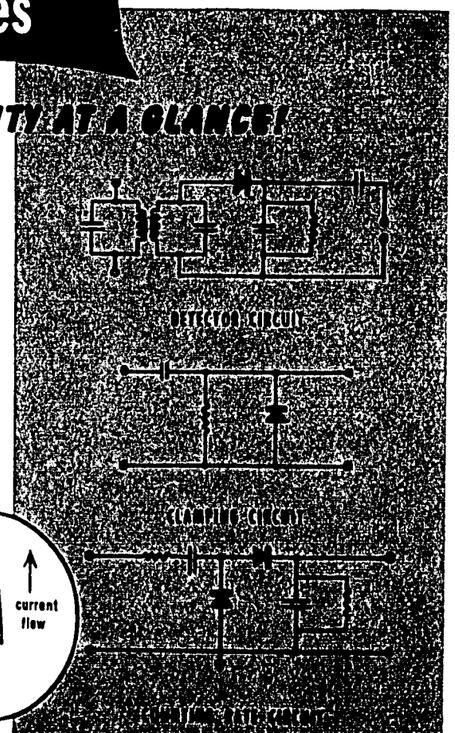
RR Germanium Diodes

FEATURING POLARITY AT A GLANCE!



The taper of the diode case allows polarity identification at a glance or at a touch thus speeding up assembly and reducing the possibility of error in connecting the diode into the circuit. Taper also prevents rolling, especially when the leads are cut off to permit mounting the diode in clips!

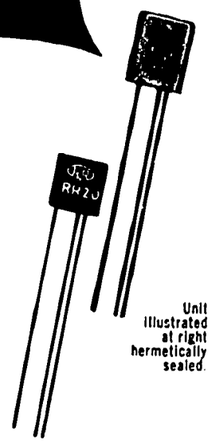
RR Germanium Transistors

POINT CONTACT TRANSISTORS

Available in a variety of stable controlled types suitable for both fast and medium speed switching circuits and high frequency amplifiers. Advanced mechanical design for economical production. Heat conducting metal case, standard baking, choice of solder or plug in.

PHOTO TRANSISTORS



[illegible] power transducer [illegible] function [illegible] DC amplifier

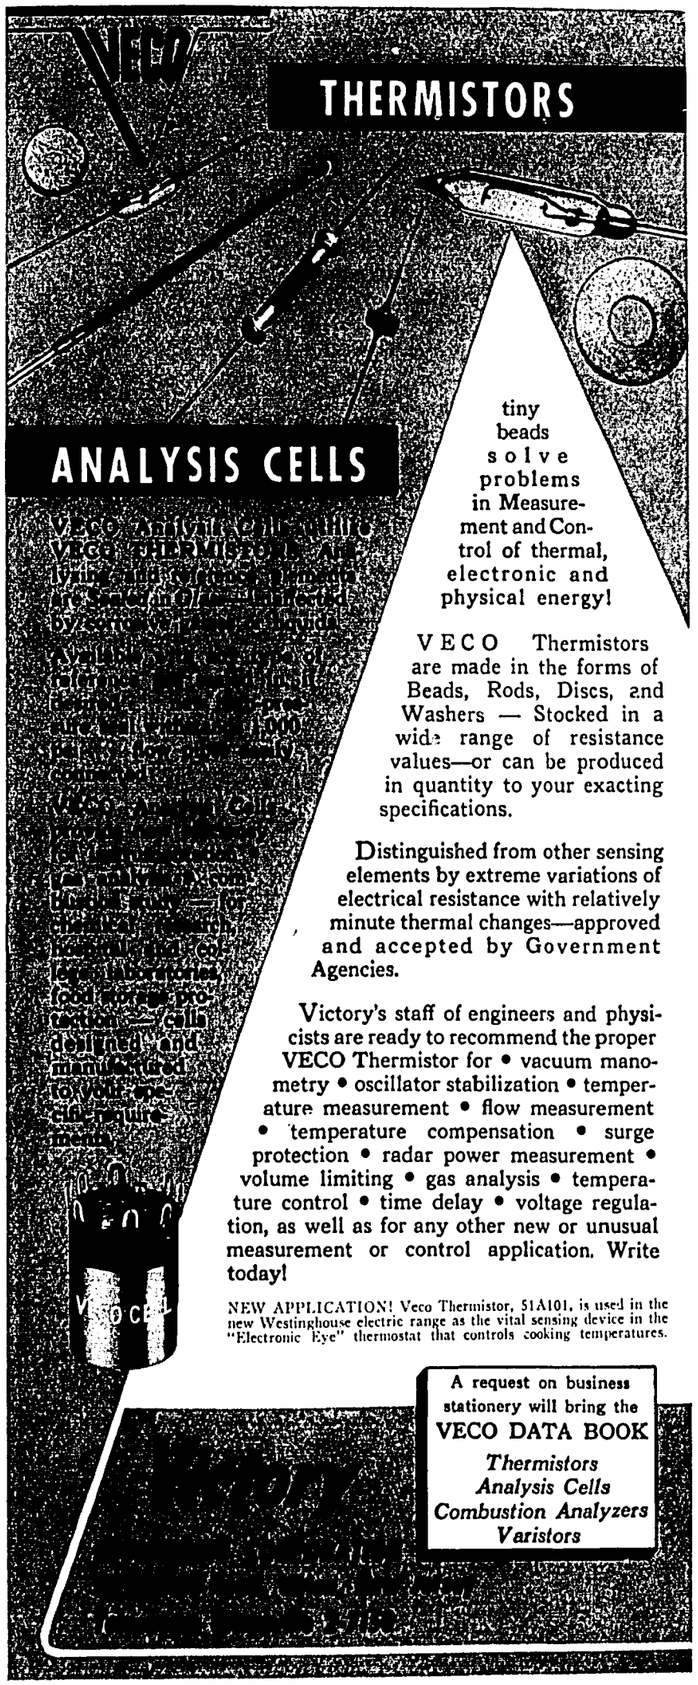
JUNCTION POWER TRANSISTORS

For audio power up to 2 watts

PNP JUNCTION TRANSISTORS

Tiny, stable high gain units, most economical of power, may be soldered in place or socketed in a recommended RTMA transistor socket. They are suitable for audio amplifiers, servo amplifiers and transformer-coupled carrier amplifiers. Available in plastic or hermetically sealed in metal and glass.

Unit illustrated at right hermetically sealed.



Our engineers will be glad to offer suggestions regarding your Germanium Diode and Transistor applications without obligation. Write to Dept. I

Stupakoff CERAMIC RESISTORS

Stupakoff Temperature Sensitive Resistors are used for the control of voltage, current, pressure, temperature, humidity, radio oscillation, resistance and resistance compensation. Stupakoff Insulcon units are used as an infra-red light source and as heating elements. Both are supplied in the form of rods, tubes, discs, bars, rings, etc., and complete with terminals.

Perfection born in an inferno

DIAMONDS AND "GROWN-JUNCTION" TRANSISTORS ARE CREATED AT WHITE-HOT TEMPERATURES IN ONE OPERATION. BOTH ARE... *PRODUCTS OF PERFECTION*

GERMANIUM PRODUCTS "GROWN JUNCTION" TRANSISTORS Are Transformed from Germanium Dust into a Superior Transistor, a Man-Made Diamond, at a Crucible Temperature over 900 C

ENDS TRANSISTOR UNCERTAINTIES. Engineers once plagued with transitorization uncertainties, about supply, engineering information, quality of transistors, etc., have learned that specifying Germanium Products Transistors, made by the "Grown Junction" method, eliminates these problems.

SUPERIOR CHARACTERISTICS. "Grown-Junction" transistors electronic characteristics are unmatched. They provide: The highest current multiplication factors to activate current operated devices. The highest collector resistance, and operating voltages for greatest battery efficiency—up to 50 volts. The highest frequency response usable in the R.F. spectrum.

ENGINEERING BACKING. A complete transitorization engineering service which can guide you to the solution of your circuitry and production problems.

ADEQUATE SUPPLIES. Ever increasing production facilities have kept output abreast of growing industry demand. Germanium Products Corp., the first in the industry to make junction transistors commercially available, is now supplying in production quantities many different NPN Grown-Junction Transistors.

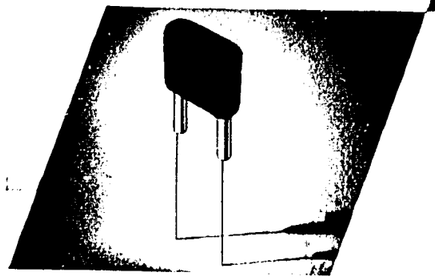
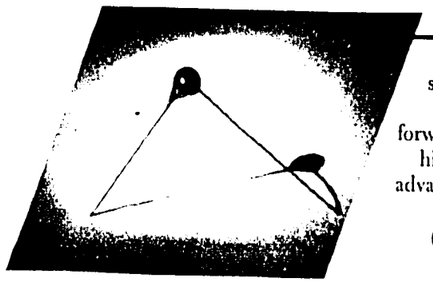
Stability-Long Life-Uniform Characteristics in TRANSISTORS and DIODES



Junction Transistors

Point Contact Transistors

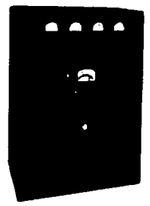


PN and NPN Photo Transistors

Hermetically Sealed Germanium Transistors

Unequalled in performance and dependability. Point contact type can be made with characteristics to meet your special requirements.

GOLD BONDED



Germanium Diodes

Transistor Products, Inc. Diodes, the smallest germanium diodes made, exhibit more uniform characteristics, higher forward currents, low recovery time, superior high frequency characteristics—offer many advantages for a great variety of applications.

Also available—Junction Diodes (encapsulated in black plastic case) and Hermetically Sealed Diodes that can be engineered to customer specifications.

Transistor Test Set

A precision laboratory instrument for testing the small signal behavior of all point contact and junction transistors. Purposely designed with great flexibility to insure continued usefulness with new types of transistors yet to be developed.

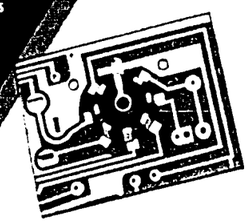
TUBE SOCKET "Firsts"



Among recent additions to the METHODE line are a number of innovations and improvements whose worth has been quickly recognized by electronic designers and producers.

The following are a few of the new accessories which have already found high production applications.

"Twist-on" Tube Shield Bases

"Twist-On" type of tube shield and base, which can be mounted separately or in combination with molded sockets, as illustrated. Projecting lugs on shields provide *direct ground* to chassis under screw pressure and a reliable shock and vibration proof mount.

Tube Socket for Printed Circuits

"Methode's position in the electronic wiring device field has been enhanced by its leadership in the volume production of prefabricated wiring panels. Complementary to its printed circuit development, these miniature octal and noval sockets provide reinforced mechanical spring contact with printed conductors easily supplemented by solder dip operations.

Laminated Miniature Tube Sockets

With softer alloy tube pins resulting from material conservation measures, the wiping action of METHODE laminated miniature socket contacts provides uniform withdrawal of tubes without breakage, stress or damage to pins . . . .

Industry may look to METHODE for further electro-mechanical developments to assist in meeting the problems of increased complexity of new radio, television and communications equipment. Consultation is invited on wiring device applications which involve large production requirements or will meet an industry-wide need

BRAININ ELECTRICAL CONTACTS

PRECISION SERVICE
from Order to Delivery!

Your production problems may be simplified when you consult an organization with a long record of successfully serving electrical manufacturers in all types of precision work. Whether you are seeking advice on new applications, redesign, or wish your own designs executed, send us your requirements, and they will receive our most careful attention.

Extra KNOW-HOW
for your specific design problems

NEY Precious Metals in Industry

YOUR DESIGN PROBLEM SIMPLIFIED WITH THE USE OF ONE OF OUR STANDARD CONTACTS

HEADED AND FORMED WIRE CONTACTS

This simplified chart shows the form and overall dimensions of a few of the many types of contacts made from Ney Precious Metal Alloys with electrical and physical properties that have proved exceptionally satisfactory for brush or wiping contact applications. Full technical and test data are available on request. Other Ney Precious Metal Alloys have solved many special industrial application problems. Consult us freely without obligation.

SPECIALISTS IN PRECIOUS METAL METALLURGY SINCE 1812

COAXIAL SWITCHES and MICROWAVE TEST EQUIPMENT

of advanced electronic design

General Communication Company, pioneers in the coaxial switch field, offers you a complete design, engineering and manufacturing service.

Not limited to the production of standard switches, General Communication Company is geared to help solve any coaxial switch problem you may have.

COAXIAL SWITCHES

Designed for compactness and light weight, with minimum V.S.W.R., insertion loss and crosstalk.

General Characteristics:
Frequency Range: 0 to 10,500 Mc.
V.S.W.R.: 1.2:1 maximum to 3000 Mc.
Insertion Loss: 0.3db maximum.
Crosstalk: Greater than 60 db at 3000 Mc.
Greater than 40 db at 10,500 Mc.
Operative Life: 10,000 cycles minimum.
Construction: Weatherproof.
Available with N, BNC, C, HN, BN or LN connectors.

REMOTE CONTROL, 28 VDC TYPES — Weight: 25 oz. (average). Size: 4½" x 3" Diameter (average).

Radial connector configuration — Single circuit, 2 to 6 positions. Switching Time: 0.2 second (average). Switching Rate: 40 cpm (continuous).

Spring Return: Radial connector configuration. Single circuit, 2 positions. Switching Time: 20 milliseconds. Duty Cycle: on 30%, off 70% (min. "off", 1 sec.).

Transfer Switch — Parallel connector configuration. Double circuit, 2 positions. Switching Time: 0.1 second (average). Switching Rate: 40 cpm (continuous).

REMOTE CONTROL, 115 VAC TYPES

Spring Return — Parallel connector configuration. Single circuit, 2 positions. Optional manual control. Switching Time: 27 milliseconds. Switching Rate: 45 cpm. Weight: 3½ lbs. Size: 5⅜" x 6¼" x 4" overall.

and our latest model:

Radial connector configuration — Single circuit, 2 to 6 positions. Switching Time: 0.3 second (average). Switching Rate: 20 cpm (continuous). Weight: 24 to 28 oz. depending upon connectors. Size: 4½" x 3" Diameter.

MANUAL CONTROL TYPES

Radial connector configuration — Single circuit, 2 to 6 positions. Weight: 8 to 16 oz. (depending upon connectors). Size: 3⅛" x 3" Diameter.

Parallel connector configuration — Single circuit, 2 to 6 positions. Weight: 21 to 25 oz. (depending upon connectors). Size: 4" x 3" Diameter.

X BAND TEST EQUIPMENT

Test sets BHX and CBX are portable microwave signal generators, designed for testing and adjusting beacon equipment and radar systems.

The frequency range of these test sets is 8500 mc to 9600 mc. They can measure external signals or supply a known output signal. Frequency is measured by a precision meter with calibrated dial. Power is measured by means of a calibrated RF attenuator and a thermister bridge type wattmeter.

Send for the new **CHICAGO** **TRANSFORMER AND FILTER REACTOR CATALOG**

easier to use, more complete than ever

You'll find more than 500 units listed in the new CHICAGO Catalog . . . transformers for every application . . . presented in one complete, easy-to-use specification guide, covering the following categories:

- **MIL-T-27 Hermetically-Sealed Transformers**
- **New Equipment Transformers**
- **Television Replacement Transformers**
- **General Replacement Transformers**
- **Control & Power Circuit Transformers**

You'll want this new CHICAGO Catalog for handy reference. It provides a wealth of terse factual information on CHICAGO Transformers for original or replacement use in the radio, electronic, electrical, aeronautical, geophysical, and automotive industries. Use this Catalog as your buying guide to the World's Toughest Transformers . . . depend on your CHICAGO distributor for prompt, efficient service.

STEVENS* hermetically sealed THERMOSTATS

Bright plated or dull black finish. Terminals to customer specification. Thermostats shown approximately ¾ size.

Stevens Hermetically Sealed Thermostats—specially engineered for precision control of devices or equipment subjected to dust, moisture or corrosive atmospheres—are tightly, permanently sealed in corrosion-resistant metal cans. Some models have neoprene covered terminals. Virtually any type mounting bracket available.

Stevens Hermetically Sealed Thermostats are available in two basic styles: Type M bimetal disc for high-current circuits; Type C bimetal strip for low-current circuits, or for use in conjunction with disc types. *Both models feature a bimetal thermal element that eliminates artificial cycling or life-shortening "jitters."*

If your problem involves fast, accurate control of temperature under rugged atmospheric conditions, specify Stevens Hermetically Sealed Thermostats—they add to the life and sales of your product.

***Stevens also makes a complete line of standard bimetal disc and strip thermostats. Write for data.** A-4650

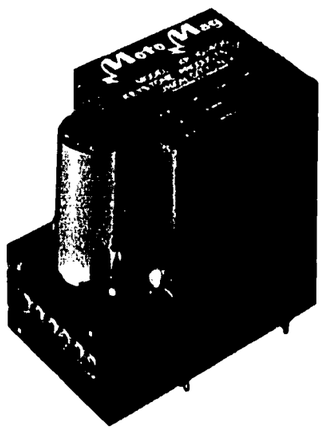
AIRCRAFT TRANSFORMERS



Keystone is a ***respected*** source for special purpose and custom-made aircraft transformers and magnetic amplifiers. As suppliers to several of the nation's leading prime contractors, we're accustomed to working to unusually difficult standards of accuracy . . . so far as weight, quality and electronic accuracy are concerned.

If you require miniature transformers you'll also find KEYSTONE an unexcelled resource. Engineering service available. Get acquainted with the KEYSTONE brand of service and dependability at once.

"MotoMag"

This is the FIRST of five pre-designed magnetic amplifiers that will save precious engineering time. If you're designing an aircraft unit — design it around this KP-10-400 Magnetic Amplifier. Then watch your costs tumble down!

MOTO-MAG KP-10-400 is useful in positioning servos, computers, servo motor controls, remote control devices and other units requiring variable phase power. Send for Mechanical and Electrical specifications. Since units are already built, single pieces are available for experiments and tests at modest cost.

Langevin...

TRANSFORMERS

▶ to military specifications

▶ for your special performance requirements

You are sure of prompt service from Langevin, because

1. We have on hand, at all times, hundreds of types and sizes of wire, core materials, cases, terminals, brackets — everything needed to build all kinds of special transformers.
2. Your samples and short runs are handled in our model shop, manned and equipped for high-speed service.
3. *Complete MIL-T-27 tests* for qualification approval can be made *in our own laboratory*. This often hastens your contract completion by many weeks.

Depend on Langevin for pulse transformers, charging reactors, saturable reactors, hi-cycle transformers, and units built to the most rigid specifications.

transformers

for printed circuits

Compare these features . . .

* Wide range of impedances to cover all applications
* Excellent Stability & High Gain
* Micrometer core adjustment
* Compression moulded plastic base for auto radio and other high temperature applications
* Individually tested and visually aligned and preset before shipping

Send us your inquiries for delivery and quotations. Request our free catalog and engineering handbook.

SERVING AMERICA'S LEADING RADIO & TV MANUFACTURERS

Why 36,797 Engineers have joined The Institute of Radio Engineers

BENEFITS

Get to know your fellow engineers—attend section and professional group meetings—keep up with engineering progress.

o o o

Get 12 great issues of Proceedings of the IRE. . . . A working textbook up-to-the-month on practical radio-electronic engineering.

o o o

Get the annual IRE DIRECTORY . . . an industry between covers . . . men, products, firms.

o o o

For membership information, write to:

Kepco Voltage Regulated Power Supplies are conservatively rated. The regulation specified for each unit is available under all line and load conditions within the range of the instrument.

Write for complete specifications.

DC POWER SUPPLY SPECIFICATIONS

REGULATION: As shown in table for both line fluctuations from 105-125 volts and load variation from minimum to maximum current.

*Regulation Bias Supplies: 10 millivolts for line 105-125 volts. ½% for load at 150 volts.

†All AC Voltages are unregulated.

All units are metered except Models 131, 315 and 3100.

All units are designed for relay rack mounting or bench use.

WORKMANSHIP

Workmanship is of a quality with the highest existing production standards and best instrument electronic practices consistent with the intended use of the item as a continuous duty voltage regulated power supply. Oil filled paper condensers and resistor-board construction are included in the design.

VOLTAGE REGULATING TRANSFORMERS

Patented SOLA Constant Voltage Transformers provide the following advantages: Automatic, instantaneous regulation within ±1% regardless of primary variations of 30%. No moving or expendable parts . . . no manual adjustments or maintenance . . . self-protecting against short circuit . . . available in a complete range of capacities and special types.

Write for Bulletin KK-CV-142. We welcome any inquiries regarding specific applications to your requirements.

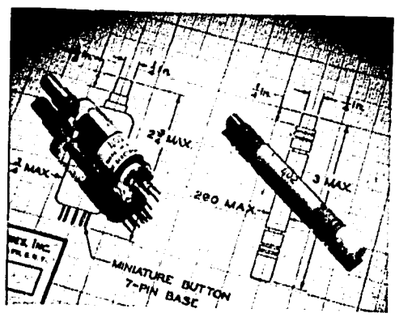
(Continued on page 226)



Information at high speed! "Data the way an engineer thinks" is the key to IRE DIRECTORY classifications. All products are divided into 10 fundamental groups, many of which parallel professional group organization. The grouping plan makes this the fastest working directory you ever used! No components are mixed with test equipment—you turn right to a section where each item belongs.

Yet good engineering detail is maintained. 99 basic classes of products under these ten sectional product directories keep listings from becoming cumbersome, but clearly define products.

Completeness is insured! Most firms make many products in a single classification. Wasteful, eye-confusing relisting of the same firms over and over is quite sensibly solved by using a system of codes under the 99 basic headings which actually provide 489 separate classifications. The result is a more complete picture of each firm's full line, but you travel through fewer listings.

Your "Regulated High Voltage"
Problems can be Economically
Solved . . . NOW!

ANTON

JAN APPROVED

AEL has produced and supplied over 100,000 JAN 5962/BS-101 Corona Discharge Voltage Regulator Tubes (equivalent to 401 shown here) to the U. S. Navy—Signal Corps and prime contractors like Admiral, Westinghouse, Kelly-Koett and Hoffman. Because of the experience gained by the mass manufacture of these tubes, AEL is able—now—to furnish Corona Discharge V-R Tubes, both fixed and variable, to suit a wide range of voltage and current applications.

Corona Discharge V-R Tubes
New Freedom for Circuit Designers

SALIENT FEATURES

- Stabilized Voltages from 300 to 4000 Volts
- Currents up to 2 milliamperes
- Low Dynamic Resistance
- No hot cathodes
- Unlimited Life
- Weight—less than an ounce
- Size—smaller than a pen

TYPICAL APPLICATIONS

- Cathode Ray Oscilloscopes
- Airborne Radar Power Supplies
- TV receivers and monitors
- Voltage Reference Tubes
- Radiac Equipment
- X-ray Equipment
- Electron Microscopes

Refer to this Buyers' Guide for our Geiger Counter Tubes and allied radioactivity detection equipment listings.

CATALOG — free upon request on your letter-head. Please send us the specifications of your individual requirements. Write care of Dept. IR.

10 Gears, gear-trains, etc.
15 Servo motors & generators

66 Telemetering Equipment.
05 Data Recorders
10 FM/FM Modulators
15 Data storage mechanisms

The products and services of the Radio-Electronics industry have been organized into ten basic directories following closely the organization of the IRE Professional Groups. But 100 major product groups are numbered consecutively throughout.

Always consult the pink pages at the start of the Directory of firms, for a terminology cross-index, or to find products by name. The pink pages list more than 500 products by name, as well as under the product groups. Page numbers are given for speed.

IT TAKES MANY MINDS TO MAKE AN "ELECTRONIC BRAIN"

RAYTHEON AUTOMATIC DIGITAL COMPUTER developed for the Office of Naval Research and used at the Naval Air Missile Test Center, Point Magu, California.

Just trying to grasp the concept of a high speed digital computer staggers the imagination. Designing and building one is a job for a corps of highly trained specialists.

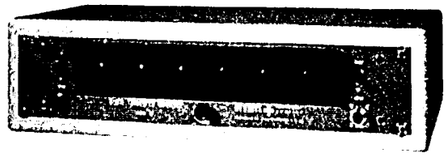
Few companies are equipped with the diversity of talent, the technical background or the production facilities necessary to venture into this extremely complex field. Raytheon is unique in having under its many roofs not only the kind of people but the products and production facilities required to bring analog and digital computers into practical being.

On its staff, Raytheon has many of the comparatively few scientists, mathematicians and engineering specialists capable of designing, building and applying electronic computers. Its many divisions contribute the special tubes, transistors, diodes, toroids, magnetic amplifiers, and other components used in great numbers in such equipment . . . and the broad experience in miniaturization, circuitry, packaging and other electronic techniques necessary to reduce a houseful of parts to practical proportions.

It goes without saying that "Excellence in Electronics" is a prime ingredient of all Raytheon products . . . radar, sonar, communications and other types of equipment of vital importance to the Armed Services.

RAYTHEON

Excellence in Electronics



RAYTHEON MANUFACTURING COMPANY

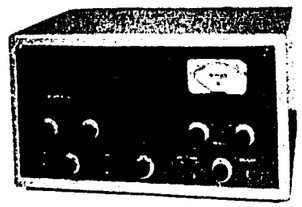
WALTHAM 54, MASSACHUSETTS

INSTRUMENTS

FOR COUNTING AND CONTROL

GLOW TRANSFER COUNTER

Model 162A may be used as a counter or as a fast push-button resettable register or as a slow scaler. This self-indicating counter has a maximum capacity of 1,000,000 counts and maximum speed of 5,000 CPS. Accepts positive or negative pulses, 4 to 60 volts. Resetting is by manual push-button or remote control. (See tube description below.)

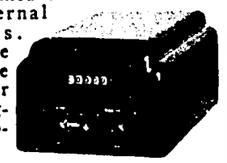


PRE-SET COUNTER (Glow Transfer)

Model 164 is used for batch or operational counting and recording at any pre-set count from 0 to 9,999. Maximum counting speed is 4,000 CPS; pre-set operation totalizer count —0 to 999,999, indicated by electro-mechanical register. Counting units and relay are plug-in type for easy removal or replacement. Register has plug-in type connection. Prototype shown at left.

SCALERS

The Ten-Ten Series combines a variety of optional features with basic elements to provide "custom" scalers without "custom" costs. After selection of the basic scaler model, according to major features, modifications are selected from the list of options to "customize" the scaler for your specific requirements. All Ten-Ten Scalers are available with choice of binary or decade scaling and with optional (5 or 1 microsecond) resolving time. Model 1050A shown.



GLOW TRANSFER COUNTING TUBES*

For use in totalizers, batch counters, and where capabilities of mechanical registers are exceeded, these tubes offer comparatively high speed, lack of moving parts, and silent operation. Self-indicating, with low current drain; tubes may be cascaded, reset by push-button. Decade or scale of 12 tubes with counting speeds to 2,000 CPS now available; higher speeds available soon.

* Ericsson Telephones, Ltd., (Etelco) tubes are distributed solely in the U.S. and Canada by Atomic.

ELECTRICAL RESET REGISTERS

Model 1238B used singly or in multiples (with selective resetting) serves as production control, time element registers, and many other purposes. The electrically actuated six-digit register may be reset by panel switch, remotely by push-button, or by wired connection to counting units. Another model, #1248B, has predetermined count for controlling external circuits. Models are available uncased for use in original equipment.

A request on your letterhead will bring the new Atomic catalog.

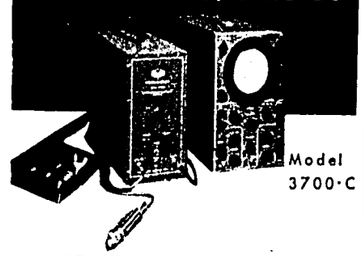
MEASURE to .0001" without contact



Model 3600-A

EPL DYNAMIC MICROMETER

Measures, records dynamic or static displacement, vibration or movement of any metal body. Measures axial vibration, eccentricity, radial whip, bearing clearance, radial expansion with acceleration and reciprocating movement. Calibration of sensing unit permits direct reading. *Request Bulletin DM 1250 for details.*

MEASURE and record PRESSURE in AIR, GASES, LIQUIDS

Model 3700-C

EPL PRESSUREGRAPH

Measures, records dynamic or transient pressure phenomena for engine studies, carburetor development, injector pressure studies, fuel research, hydraulic valve lifts, oil pump and compressor development, explosions, atomic power development. .5 to over 5,000 PSI. 200,000 separate measurements/sec. *Request Bulletin LPG 551.*

INDICATE RATE of MOTION at ALL SPEEDS without "loading"

Model 3010-A

EPL IMPULSE GENERATOR

Small low cost electromagnetic pick-up generates voltages proportional to object's rate of speed. Requires no external magnet, can be actuated by any magnetic material on a moving part. For precision ignition timing, acceleration and velocity studies, RPM, operations, angular or linear motion. Produces voltages at speeds in excess of 3"/sec. *Request Bulletin MP 592 for details.*

Heiland
DENVER

dependable instruments

- Recording oscillographs
- galvanometers
- amplifier systems
- bridge balances
- associate equipment

7009 Multi-Channel Recording Oscillograph

The only oscillograph using up to 12" recording media that can be conveniently mounted in a standard 19" relay rack.

- Operation, control and loading from one surface.
- Designed for rack or table mounting.
- Direct monitoring of galvanometer light spots while recording.
- Up to 36 channels.

Sensitive . . . Rugged Galvanometers

Outstanding features are high sensitivities and ruggedness of construction. Simple and rapid adjustment in vertical and horizontal planes.

- Solid case construction . . . completely dustproof.
- New, convenient connector terminals.
- Rotational limit stop.
- Low zero drift.

500B Portable Recording Oscillograph

Compact and lightweight providing maximum portability and versatility where it is desired to record up to 12 phenomena.

- Direct monitoring while recording.
- Right angle monitoring hood.
- Automatic aperture adjustment.

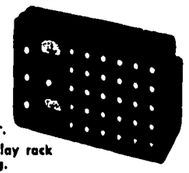
Galvanometer Assembly

The arrangement of galvanometers side by side in a common magnetic field makes possible the use of a maximum number of channels in an oscillograph of minimum dimensions. Permanent magnet assemblies are available for mounting two or six Heiland Galvanometers or multiples of six.

- Overall dimensions of six trace bank with galvanometers: 5⅞" (H) x 3" (D) x 17⅛" (W)

A-401 Portable Recording Oscillograph

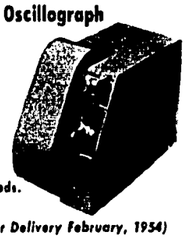
Optional 8 volt battery pack provides self contained power source affording complete portability and flexibility of application.



- Completely portable . . . optional 8 volt battery supply.
- Direct monitoring while recording.
- Compact: 7" x 12¼" x 9" Lightweight: 39 lbs.

"82-6" Bridge Balance and Strain Indicator

The "82-6" provides a simple, accurate means of calibrating static and dynamic output from resistive type transducers, or strain gages, before feeding these phenomena into a recording oscillograph. Static and slowly changing phenomena may be read directly on the sensitive output meter.



- One panel operation permits standard relay rack mounting or two-position table mounting.
- Individual channel control for coarse and fine voltage, balance, calibration and attenuation.

New, Miniature 35mm Recording Oscillograph

Designed and developed to meet an increasing demand for a small, lightweight oscillograph with accuracy of amplitudes and timing, uses 35 or 50mm paper of film.

- All operating controls on one surface.
- Compact: 10⅛" x 6" x 4¼" Weight: 15 lbs.
- Remote speed control . . . 8 recording speeds.
- Up to 12 galvanometers.

(For Delivery February, 1954)

Amplifier System

Carrier linear/integrating amplifier system. Flat response 1,000 cycle with carrier amplifier. Flat response beyond 2,000 cycles with linear/integrating amplifier. High output power. Small . . . compact . . . designed for rack or table mounting.

(For delivery October 1st)

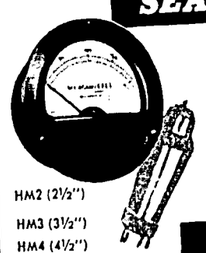
Marion

ELECTRICAL INDICATING INSTRUMENTS

RUGGEDIZED METERS



HS1 (1½")

HS2 (2½") HS3 (3½")

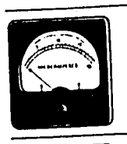
HS Series
HERMETICALLY SEALED

Exceptionally accurate and sensitive even under extreme conditions of shock, vibration, mechanical stress or strain, weather and climate. Outstanding performance in any application. 2½" and 3½" types have standard A.S.A. dimensions.

HERMETICALLY SEALED METERS

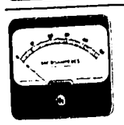
HM2 (2½")
HM3 (3½")
HM4 (4½")

HM Series

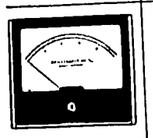


Marion true glass-to-metal hermetic sealing . . . long accurate life under adverse conditions of humidity, dust and hazardous atmospheres. Magnetically shielded.

MARION "REGULARS"

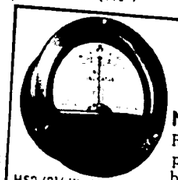


phenolic and metal cases — designed for commercial application where hermetic sealing or ruggedization is not required. All Alnico construction. Reliable high torque performance in moderate price range.



MODEL 52N Series 52
Accurate dependable service in smallest practical form. Model 52N (JAN MR24, MR25) 2½" round phenolic case. 52S, 2½" rectangular phenolic case. Model 52 RM, narrow flange brass case. Also available in brass case without flange, 52RMS.

MODEL 53SN Series 53
Standard 3" commercial rectangular type (Model 53SN). Also available in 3½" round phenolic case (Model 53RN) (JAN MR34, MR35).



MODEL 55
Large 4⅝" x 4⅛". Critical readability on 100° scale. Extremely accurate. Most popular case style in test equipment field.

MODEL 56
6½" x 5¼" phenolic case. Large open face with 100° scale in 5½" arc.

MODEL 57
8½" x 7" open face, extra long scale. More than a mere overgrown 3" meter. Enlarged pole shoes — higher torque movement — higher damping factor. Accurate within 1%.

RELATED PRODUCTS

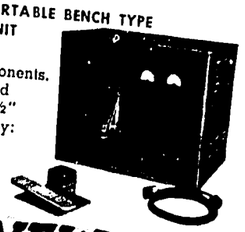
HS2 (2½") HS3 (3½")

NULL INDICATORS
Ruggedized, Hermetically Sealed. Used primarily as bridge and potentiometer balance indicators and where an instrument with very high sensitivity about the zero or balance point is desired. Sensitivity at this point is 1 ua per mm. or higher; the meter's shaded pole face and shielded core construction give sharply logarithmic attenuation as it departs from null point and provides ample overload protection.

HM2ET (2½")

HM3ET (3½")

ELAPSED TIME INDICATORS
Two sizes, 2½" and 3½", standard JAN dimensions for panel mounting. Operating range −55°C to +85°C. Hermetically sealed. Magnetically shielded. Registers in 1/10 hour steps to 9999.9 or hour steps to 99999. Durable, self-starting synchronous motor. Available for 110-125, 220-250 volts, 50 or 60 cycles A.C.



M-2

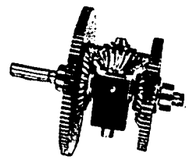
MULTI-RANGE METER TESTER
The only instrument of its type available today. Used for production inspection and calibration of electrical indicating instruments and to maintain high measuring standards in the laboratory. It is also used as a precise production limit bridge permitting acceptance tolerances to be set for any value from ±½% to ±20%. Overall accuracy for current measurements better than ¼ of 1%. Resistance range 0-5000 ohms. Power source 115V AC 60 cycles. Complete, no accessories required.

MARION MODEL PM: PORTABLE BENCH TYPE INDUCTION SOLDERING UNIT

Improves and speeds up production of small components. Low cost, low powered and portable. Size: 15¾" x 21½" x 15". 150 lbs. Power supply: 115 volts 60 cycles. Draws 775 watts full load, 100 watts standby.

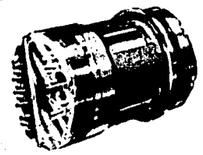
NEW CONFUSION-PROOF MARION MULTI-DIALER

A multi-scale instrument which exposes only one scale to view at a time. At the same time, it automatically switches the appropriate internal or external circuitry associated with that scale. Five self-contained ranges in volts, milliamperes, microamperes and amperes. Ideal for panel, bench or field.



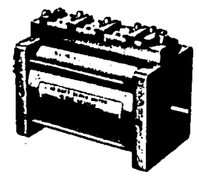
marion

ELECTRICAL INSTRUMENT COMPANY



407 Canal Street, Manchester, New Hampshire, U. S. A.

FORD INSTRUMENT COMPONENTS



Ford Instrument Company makes the finest precision instruments and mechanisms for industry and the armed forces.

FORD MECHANICAL DIFFERENTIALS with single spider gear—available in 3/16," 1/4" and 5/16" shaft diameters —high accuracy, low friction.

FORD TELESYN UNITS are available in wide selection of sizes—proved precision accuracy, corrosion and fungus resistance mean better synchros when you specify Telesyn.

FORD SERVO MOTORS (60 and 400 cycles) for extremely low inertia and high frequency response. 1/5; ½; 1½; 2½; 5; 10-watt models in both low and high voltage, including magnetic amplifier controlled types.

FORD ELECTRICAL RESOLVERS available in sizes 23 and 31—interchangeability, temperature compensation —60°F to +160°F, highest accuracy, adaptability, 400 cycle frequency.

Ford Instrument also makes magnetic amplifier systems, computers, converters, mechanical integrators and other instruments and equipment. Write for more details.

Servomechanisms, Inc., pioneers in the "packaged function" technique, offers the economy-minded designer and manufacturer of electronic and electromechanical control systems, outstanding savings in development and production costs through the use of plug-in electronic components. These standard plug-in components may be used immediately in the laboratory breadboard stage or in quantity production, thus relieving the user of design and production problems and reducing the electronic plug-in components to a purchased parts status.

This advanced design philosophy provides a new standard of ***reliability, interchangeability,*** and ***ease of maintenance.*** Servomechanisms, Inc., facilities are available for the development and production of special "packaged electronic functions" and complete systems.

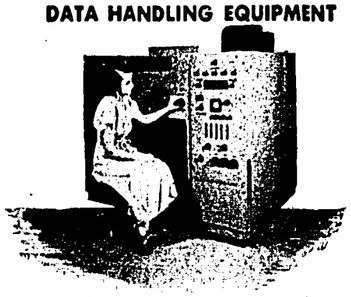
PRECISION ENGINEERING IN ELECTRONICS

Telemetering and Data Handling Equipment

Special Components



GROUND STATION EQUIPMENT

Installations for reception and all forms of handling and reduction of data from pulse width and FM/FM radio telemetering systems • Custom-engineered and custom-built to hold equipment to a minimum consistent with accuracy, operation ease, reliability • Functional mounting of components assures servicing ease – and flexibility for ready unit expansion with any of the following:

- *Specialized receiving equipment*
- *Magnetic tape field storage and playback*
- *Regenerative integrator for PM signals*
- *Channel selector for PW systems with automatic zero and channel sensitivity adjustments, and automatic missing pulse insertion.*
- *Oscillographic film reader, with line center finder*
- *Tabulated numerical output*
- *Punched card output*
- *Graphical output*

DATA HANDLING EQUIPMENT

Automatic or semi-automatic devices for marked reduction of time, expense, man-power usually required to place volumes of recorded data in final usable form • Input data – film records, varying DC voltages, magnetic tape recordings, etc.– processed point by point, at high rates, with automatic correction for zero drift, scale factor, and measuring system non-linearities • Outputs available as continuous plots on film or paper, with scale and time coordinates, as DC voltages, as pulse coded signals for remote transmission, or as electrical indications for existing tabulating and card punching devices • All systems custom-designed for accuracy and economy; custom-assembled from special purpose components devised in continuous engineering of data handling systems.

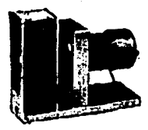
PULSE WIDTH RADIO TELEMETERING

PW/PM Small, rugged units particularly suited to vehicular use where many different variables must be continuously transmitted.

- 30 data channels
- 215-235 mc Carrier-crystal controlled
- Based on RDB telemetering standards
- 4 watt RF power output
- 30 cps sampling rate
- 1% system accuracy
- ½% linearity
- 0-5 volt DC inputs
- 60 g sustained acceleration
- −40° to +60°C
- Vibration –⅛ in. at 60 cps
- Single or two package form
- 3¼ in. diam.; 17 in. length; 7 lbs. weight
- Primary power 28 volts, 3.5 amps

Note: Also available without dynamotor. Transmitters available separately. Integral subcommutator if more channels are desired



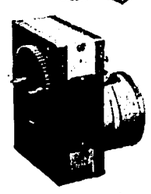
PW/FM For higher power output, with space no factor. Stable, highly reliable over long distances. Components readily accessible for replacement to extend unit life.

- Based on RDB telemetering standards
- 215-235 mc Carrier
- Max. drift – .04%
- 10 watt RF power output
- 30 data channels
- 30 cps sampling rate
- 1% system accuracy
- ½% linearity
- 0-5 volt DC inputs
- 60 g sustained acceleration
- Vibration: ⅛ in. at 60 cps
- 10 kc oscillator supply for AC pickups included
- 4¼ in. diam.; 30 in. combined length; 17 lbs. combined weight
- Primary power 28 volts at 5.7 amps.

Note: Model PAD-1 Power Amplifier-Dynamotor unit may be added to increase transmitter power to 40-50 watts. Transmitter of Transmitter-Dynamotor packages available separately.

HIGH-SPEED ROTARY SAMPLING SWITCHES

ASCOP designs and manufactures switches to your most difficult and exacting requirements. Here are a few typical examples



TYPE F Built to withstand vibration, shock, temperature and altitude extremes. Switching designed for airborne radio telemetering systems. DC motors for 27, 12, and 6 volts. Up to 4 poles, each with 30 contacts. Sampling speeds from 0.1 to 20 rps.

TYPE U Custom-designed for limited space applications. Complete with DC drive motor, yet only 1 in. in diameter. A single pole samples 32 fixed contacts at the rate of 100 rps.

TYPE L For high performance with space secondary. Single pole samples 120 fixed contacts at rates up to 30 rps. Connection to external drive through ¼ in. steel shaft running in sealed ball bearings. Special contact material for long service-free life.

TYPE V For precision in sampling speed plus long life. Synchronous drive motor permits selection of single pole sampling of 60 fixed contacts at many rates from 1 rps. to 1 rev. per day. Adaptable, through variety of mountings and terminals, for use as a component of industrial instrumentation systems.

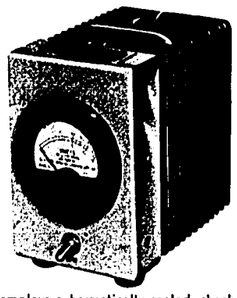
HIGH POWER Waveguide TERMINATIONS

"Eilex", a new ceramic lossy material, is now available in waveguide, high power terminations and attenuators from Electro Impulse Laboratory.

This new material is extremely durable, provides a strong adhesive bond to waveguide walls, withstands temperatures up to 2000° F, and handles the thermal shock efficiently.

Eilex is stable up to 2000° F (does not emit steam or water, characteristic of dummy loads using a Portland cement and graphite mixture for the lossy material).



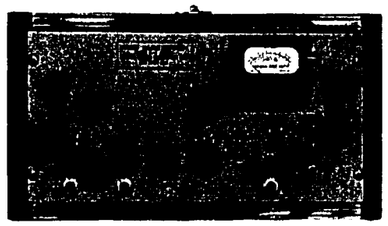
The waveguide loads use walls that are poor conductors, which means a more efficient removal of the heat generated in the load, and less tendency toward pulsepower breakdown (arcing) as may occur in designs which use filling material in the waveguide.

HPTS-1500 is an S Band, waveguide termination capable of 1500 watts dissipation in still-air, and has a V.S.W.R. of less than 1.1 over the range of 2700 to 3400 mc. **PRICE $185.00**

HPTXS-175 is an X Band, waveguide termination, capable of 200 watts dissipation in still air. V.S.W.R. will not exceed 1.1 over the range of 8500 to 10,000 mc. **PRICE $55.00**

Many other standard terminations and attenuators available, non-standard terminations made to specifications.

UHF POWER METER

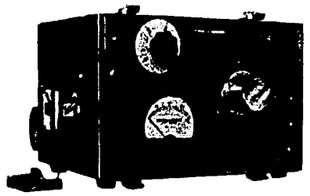


The UHF Power Meter, Model PM-10, is a completely self-contained, portable-field or laboratory test instrument which consists of a line termination capable of 90 watts dissipation, and a power measuring circuit which may be calibrated from 1 to 60 watts full scale.

This unit employs an oil filled, air cooled line termination which has a V.S.W.R. of less than 1.3 in the range of 0 to 1200 mc. V.S.W.R. over the power measuring range of 20 to 600 mc does not exceed 1.1. The power measuring circuit employs a resistive voltage divider, is free from spurious responses and has negligible error from response to harmonics over the range of 20 to 600 mc. The unit employs two scales, 0 to 15 and 0 to 60 watts, but may be calibrated for any full scale reading from 1 to 60 watts. R.F. connector is located at rear of instrument, facilitating direct connection to transmitter.

The power measuring circuit employs a standard silicon crystal, (diode) which requires no special selection. The unit may be readily recalibrated using accurately known 60 cps voltage when change of crystals or special operating conditions require. The power meter employs a hermetically sealed, shock mounted, 200 microampere meter. All components are fully shielded from the effects of strong R.F. fields.

The meter housing is detachable from the main housing assembly, and is connected by a self storing 25 ft. cable, for use when it is desired to use the line termination at a remote location. **PRICE $135.00.**



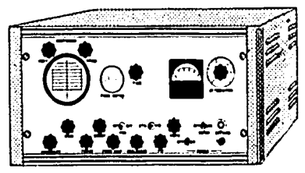
TUNED V.S.W.R. AMPLIFIER, MODEL A-12

The model A-12 Tuned V.S.W.R. Amplifier contains a sensitive, highly stable bridged amplifier of improved design, which may be tuned over the range from 500 to 10,000 cps, or used as a wide band amplifier. When used as a tuned amplifier for V.S.W.R. measurements, interference and random noise will not give false V.S.W.R. indications.

The scale is graduated to read V.S.W.R. from 1 to 4 on one range, and power standing wave ratio from 0 to 30 db, on three ranges. Input may be either from a bolometer or a crystal source, and output may be indicated on the self-contained meter, or on an external meter.

This instrument may also be used to measure R.F. attenuation in conjunction with a suitable bolometer.

PRICE $250.00.



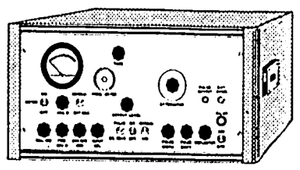
X BAND FREQUENCY POWER METER FPM-3

The Electro Impulse Laboratory Frequency Power Meter FPM-3 is a portable, completely self-contained instrument capable of frequency and power measurements over the range of 8500 to 9600 megacycles. It employs a direct reading type of frequency meter with an absolute accuracy of ± 4 mc and a relative accuracy of ± 1 mc on frequency differences of up to 60 mc.

Power measurements are accurate to ± .1 db on power levels of 0-1 milliwatt and ± 1 db on power levels of 1-1000 milliwatts. A crystal detector circuit is also incorporated to allow the wave shape of the signal to be observed on an external scope.

Provisions for coupling to RG 51/U or RG 52/U waveguide or to coaxial source are provided.

PRICE $275.00.



X BAND SPECTRUM ANALYZER

The model 6X Spectrum Analyzer uses a sensitive supertrodyne receiver circuit, electronically regulated power supply and a cathode ray tube for visual presentation of information.

Its frequency meter circuit is of the direct reading type with an absolute accuracy of ± 4 mc over the range of 8500 to 9600 mc. It employs a directly calibrated attenuator capable of 0-30 db attenuation. Either coaxial or waveguide input may be used.

This instrument may also be used as a signal generator, and has provisions for external modulation of the R.F. oscillator for this service.

PRICE $950.00.

X BAND TEST SET MODEL X-12

The Model X-12 Test Set is a portable X Band Signal Generator, with a self-contained wavemeter and power monitor. It will generate either pulsed or CW, RF power. Basically the unit consists of a 2K25 Klystron oscillator and associated "plumbing," a pulser for the oscillator which permits triggered or self-synchronous operation, a direct reading Thermistor bridge for power measurements, a metallized glass, RF attenuator calibrated in decibels below 1 milliwatt, a direct reading, reaction type wavemeter, and a regulated power supply.

The Thermistor and wavemeter are so designed that they may be used to measure the frequency and power of R.F. signals from an external source. On such measurements the attenuator is calibrated in db above 1 milliwatt, giving a power range of .1 to 1000 milliwatts, in the frequency band of 8500 to 9700 mc. V.S.W.R. will not exceed 1.35 at any attenuator setting within the frequency range.

PRICE $700.00.

A Directory of

6. Radar, Microwave, UHF Equipment

4 Major Groups

17 Products

Organized by functions for Engineers

The Ultra-Highs have brought into being a set of equipment, mostly used for military purposes. In this particular directory we list both equipment and components which belong specially to this area of the spectrum.

Of all our groups, this one promises to expand the most in the future. The reader is also referred to basic groups 2, 3, & 5.

The products and services of the Radio-Electronics industry have been organized into ten basic directories following closely the organization of the IRE Professional Groups. But 100 major product groups are numbered consecutively throughout.

67 Antennas.
- 05 Feed systems
- 10 Receiving
- 15 Reflectors
- 20 Rotating mechanisms
- 25 Transmitting

68 Receivers.
- 05 Microwave relay
- 10 Position indicators
- 15 Radar

69 Transmitters.
- 05 Microwave
- 10 Microwave relay
- 15 Radar

70 Waveguides & Accessories.
- 05 Couplings 10 Delay lines, etc.
- 15 Flexible waveguides
- 20 Rigid waveguides
- 25 Sampling lines, reflectors, etc.
- 30 Switches

Always consult the pink pages at the start of the Directory of firms, for a terminology cross-index, or to find products by name. The pink pages list more than 500 products by name, as well as under the product groups. Page numbers are given for speed.

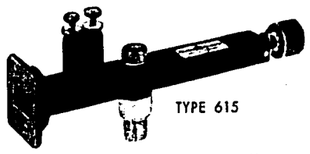
MICROWAVE INSTRUMENTS



For Precision Measurements
1,000 MCS To 26,500 MCS.

TYPE 612
CALIBRATED VARIABLE ATTENUATOR
8,200 to 12,400 Mcs.

TYPE 684
SLIDE SCREW TUNER
8,200 to 12,400 Mcs.

TYPE 615
TUNABLE CRYSTAL AND BOLOMETER MOUNT
8,500 to 9,600 Mcs.

A complete line of instruments for laboratory, field or production measurements at microwave frequencies. Complete catalog on request.

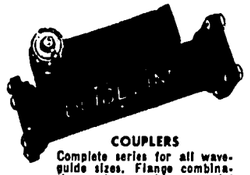
... Complete line of Microwave Components from magnetron to antenna ...

designed and produced by experts

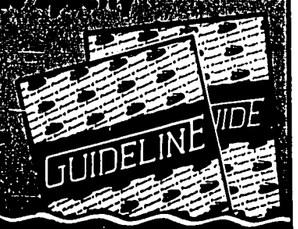
WAVEGUIDE SWITCH
A complete line; compact, rugged, suitable for military usage; VSWR less than 1.10; crosstalk greater than 50 Db; operation 24 v. DC, 110 v. AC; may be specially designed to meet switching problems.



MIXER DUPLEXER
Precision-built to closest tolerances; completely tested. Designed to meet your basic requirements, or produced from your blueprints.

DUMMY LOADS
Designed for military field operation; built to meet all standard military vibrations and shock requirements. Capable of operating at extremely high average powers.

FLEXAGUIDE
Pressure-tight; rugged enough to meet roughest requirements; VSWR less than 1.10; attenuation equal to brass rigid guide.



COUPLERS
Complete series for all waveguide sizes. Flange combination, and waveguide or coaxial outputs. Designed to meet your particular problems.

Waveguides?

The F. C. Kent Company has long been recognized as the outstanding source for formed waveguides in the country. If you have requirements for bent and formed waveguide sections — waveguides with as many as seven or eight different bends in one continuous section of tubing—in different planes and with sharp radii; if your assemblies call for waveguide tubing to be twisted, offset, tapered, expanded or call for a transition from rectangular to round; then we wish to bring to your attention our exceptional ability as specialists in bending and forming waveguide tubing in all sizes.

To the man who "specs" WIRE

THE COMPREHENSIVE ADVANCE LINE

will meet your most exacting specifications for performance and design. If you have a unique or special problem, we are prepared to engineer new designs and produce in practically any quantity.

All ADVANCE products are rigidly inspected and guaranteed, assuring you superior performance.

Immediate Delivery of

- JAN-C-76 Hook-Up Wire
- 80 degrees to 105 degrees Hook-Up Wire, U.L. Approved
- Coaxial Cable, RG Types
- Television Lead In Cable
- Rotary Antenna Lead Wire
- Flexible Cords
- Shielded Wire & Cable
- Thermostat Cables
- TW Building & Fixture Wire

Let ADVANCE Solve Your Wire Problem, Today

GOVT. SPEC. HOOKUP WIRE

- JAN-C-76 SRIR-SRHV PLASTIC Solid Colors or Spiral Markings
- WL-EXTRUDED NYLON JACKET Solid Colors or Spiral Markings
- AIRCRAFT WIRE-NYLON JACKET MIL-W-5086 (Supersedes AN-J-C-48a)
- 105° C. U.L. APPROVED Thermoplastic Hookup Wire
- JAN-C-76 WL-GLASS BRAID Solid or Tracer Colors
- MULTICONDUCTOR, SHIELDED CABLES To Meet Govt. Spec. #71-4945

COMPLETE WAREHOUSE STOCKS

- Vinyl Extruded and Radio Grade Tubing
- Multiconductor Rubber Covered Cables
- Tinned & Bare Wire
- Magnet Wire
- Formvar Wire
- Shielded Wires
- Insulated Hardware
- Plugs, Jacks, Sockets
- Test Leads, Switches
- Insulators, Steatite, Ceramic
- Terminal Strips

A Directory of 7. Services and Raw Materials

Services & Raw Materials Directory ▲

To the engineer with a manufacturing problem, this section provides a special listing of the services and products which are basic to production. Separate from actual components, these are the base sources of manufacture, ranging from the research functions of Consulting Engineers, to subcontracting assemblers, and from basic raw materials such as ceramics, metals and staples, like wire, to such specialties as the parts for vacuum tubes, and printed circuits. Here is a useful section, well illumined by informative advertising, which will serve you well, and often.

17 Product and Service groups give detail on 108 items the production engineer and designer may need.

The products and services of the Radio-Electronics industry have been organized into ten basic directories following closely the organization of the IRE Professional Groups. But 100 major product groups are numbered consecutively throughout.

Always consult the pink pages at the start of the Directory of firms, for a terminology cross-index, or to find products by name. The pink pages list more than 500 products by name, as well as under the product groups. Page numbers are given for speed.

71 Cable & Wire.

electronic wire and cables for standard and special applications

Whether your particular requirements are for standard or special application, choose *LENZ* for the *finest* in precision-manufactured electronic wire and cable.

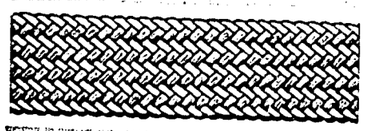
GOVERNMENT PURPOSE RADIO AND INSTRUMENT HOOK-UP WIRE,
plastic or braided type, conforming to Government Specification JAN-C-76, etc., for radio and instruments. Solid or flexible conductors, in a variety of sizes and colors.

SPECIAL HARNESSES,
cords and cables, conforming to Government and civilian requirements.

RADIO AND INSTRUMENT HOOK-UP WIRE,
Underwriters Approved, for 80° C., 90° C. and 105° C. temperature requirements. Plastic insulated, with or without braids.

SHIELDED JACKETED MICROPHONE CABLE
Conductors: Multiple—2 to 7 or more conductors of stranded tinned copper. Insulation: extruded color-coded plastic. Closely braided tinned copper shield. Tough, durable jacket overall.

RF CIRCUIT HOOK-UP AND LEAD WIRE
for VHF and UHF, AM, FM and TV high frequency circuits. LENZ Low-Loss RF wire, solid or stranded tinned copper conductors, braided, with color-coded insulation, waxed impregnation.



JACKETED MICROPHONE CABLE
Conductors: Extra-flexible tinned copper. Polythene insulation. Shield: #36 tinned copper, closely braided, with tough durable jacket overall. Capacity per foot: 29MMF.

SHIELDED MULTIPLE CONDUCTOR CABLES
Conductors: Multiple—2 to 7 or more of flexible tinned copper. Insulation: extruded color-coded plastic. Closely braided tinned copper shield. For: Auto radio, indoor PA systems and sound recording equipment.

TINNED COPPER SHIELDING AND BONDING BRAIDS
Construction: #34 tinned copper braid, flattened to various widths. Bonding Braids conforming to Federal Spec. QQ-B-575 or Air Force Spec. 94-40229.

SHIELDED COTTON BRAIDED CABLES
Conductors: Multiple—2 to 7 or more of flexible tinned copper. Insulation: extruded color-coded plastic. Cable concentrically formed. Closely braided tinned copper shield plus brown overall cotton braid.

PA AND INTERCOMMUNICATION CABLE
Conductors: #22 stranded tinned copper. Insulation: textile or plastic insulated conductors. Cable formed of Twisted Pairs, color-coded. Cotton braid or plastic jacket overall. Furnished in 2, 5, 7, 13 and 25 paired, or to specific requirements.

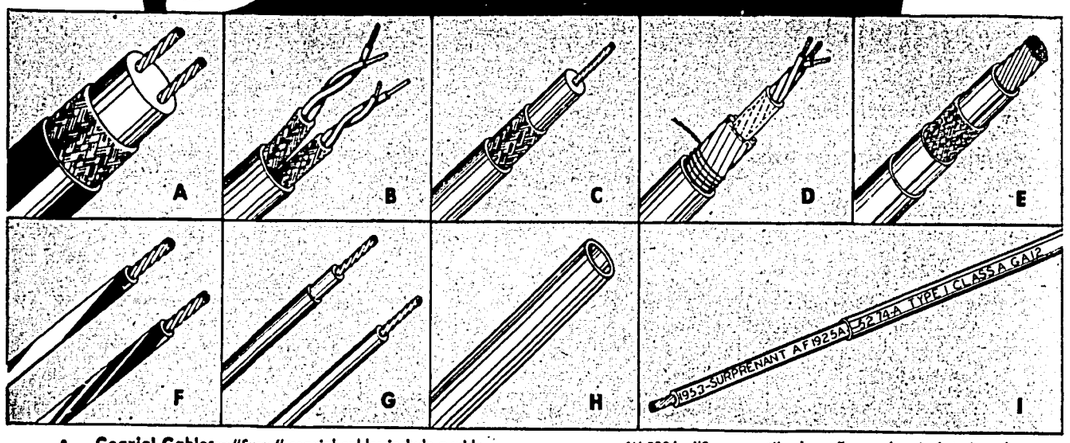
Now...First *Styroflex Coaxial Cable* with Polyethylene Sheath

Styroflex Coaxial Cable is now available with a thin covering of polyethylene over outer aluminum sheath for positive protection, where direct burial in the ground is indicated or where salt spray or corrosive conditions exist.



Available in all sizes and impedances for AM, FM, TV, Community Antenna and Microwave frequencies. The many applications include sampling lines, interwiring and main transmission lines. Full information on request.

MILLS: Bayway, N. J., Yonkers, N. Y., Fort Wayne, Ind., Los Angeles, Calif.

Code number at end of each address refers to product or service sub-classifications listed at the head of the major classification.

Surco WIRE · CABLES · TUBING

OPERATING TEMPERATURES FROM [illegible]

A **Coaxial Cables**—"Surco" coaxial cables include a wide variety of types, such as low capacity, extra flexibility, small diameter, microphone 2 conductor, and high temperature "Teflon". Conform to Military Spec. Jan-C-17A: Many special designs. If you have a coaxial cable problem consult us.

B **Miniature Wire & Cable**—"Surco" miniature wire and cables are made in conductor sizes down to No. 32 AWG in stranded and solid. Close control in manufacturing permits small finished diameters on both single and multi-conductor cable. Available in standard colors with and without nylon jacket or shielding in the various vinyl or polyethylene compounds.

C **"Surflene" Insulated Hook-up Wire**—"Surflene", extruded monochlorotrifluoro-ethylene, has excellent resistance to heat, abrasion, and most chemicals, including nitric acid. Having high dielectric strength and insulation resistance, it is especially useful in totally enclosed applications with continuous temperatures up to 135°C. "Surflene" is available in 15 solid colors and wall thicknesses down to 0.008". "Spiralon" colors presently under development.

D **Multi-Conductor Cables**—"Surprenant" multi-conductor cables are available with conductor sizes from No. 32 AWG and larger, with or without nylon jacket or shielding and can be made to specification for special design and applications. Close tolerances permit unusually small overall diameters and "Spiralon" color coding permits easy identification even when hundreds of conductors are involved.

E **New Improved Aircraft Wire**—Surprenant new lightweight, smaller diameter MD wire-(vinyl-glass braid-nylon) and the standard Surprenant sandwich construction (vinyl-glass braid-vinyl-nylon) give excellent overload safety, high and low temperature performance, good electrical properties and have a nylon jacket giving greater resistance to abrasion, fungus, moisture, hydraulic and other oils (nylon braided jacket on sizes 10 AWG and larger for greater flexibility) and are made to conform to MIL-W-5086. "Surprenant" also offers nylon jacketed–polyvinyl-chloride construction made to conform to Military Spec. AN-J-C-48A.

F **"Spiralon"**—"Surco-Spiralon" color coding is available on all vinyl, polyethylene, and nylon insulated wires, with or without nylon jackets. One, two, or three color stripes are available in the standard Nema colors providing almost unlimited color identifications.

Solid color insulation is also available in the 10 standard Nema colors.

G **"Surco" A-10 For (105°C) Hook-up Wire**—A-10 is an unusually high grade vinyl insulating compound developed in our own laboratories for a better hook-up wire. It has excellent resistance to deformation, soldering, high temperature, low temperature and aging; high electrical properties; Underwriters Lab. approved for continuous operation to 105°C without fibrous covering. A-10 insulated wire made to conform to MIL-W-16878.

JAN-C-76 Hook-up Wire—Made to conform to Military Spec. (WL-SRIR-SRHV-SRRF) in all sizes. WL available with nylon jacket or glass braid. The nylon jacket has greater abrasion resistance and high surface resistivity under adverse conditions. SRIR-SRHV-SRRF available with primary insulation only or with the addition of a glass braided covering. All standard colors including "Spiralon" spiral striping.

H **"Surco" Tubing**—"Surco" vinyl tubing is available in special formulations to provide low temperature (–65°C), high temperature (U.L. approved for 105°C), high dielectric strength, flexibility and colors. Standard compounds are carried in stock in regular sizes. Polyethylene and nylon tubing are also available and are carried in stock in natural color, limited sizes.

I **MIL-W-5274A Radar & Electronic Hook-up Wire**—Made to conform to Air Forces Spec., this wire offers excellent low temperature performance. Nylon jacketed, it has high abrasion resistance and superior surface resistivity even under adverse humidity conditions, making it very adaptable for high impedance circuits.

Extruded THIN-WALL Teflon INSULATED (210°C) HOOK-UP WIRE

Extruded Thin-Wall Teflon Insulated (210°C) Hook-Up Wire—Continuously operable over the range from –90°C to 210°C without appreciable deterioration, extruded "Teflon" (polytetrafluoroethylene) is now available in walls as thin as 0.010" (type WTE) and 0.015" (type RTE). Teflon combines non-flammability, chemical and solvent resistance, high volume and surface resistivity with extremely low electrical losses. This wire is available in all flexible strandings from AWG 30 to AWG 10 and conforms to performance requirements of Mil-W-16878. Colors conform to MIL-STD-104.

Tensolite

MINIATURE SUPER-FLEXIBLE

PLASTIC INSULATED WIRE and CABLE

TENSOLON HOOK-UP WIRE

Teflon insulated for continuous use up to 250°C, "Tensolon" is available in 14 solid colors and features a free-stripping, thin wall covering with high dielectric strength.

TENSOLEX JAN-C-76 HOOK-UP WIRE

Types WL, SRIR, and SRHV available in small wire sizes in all standard colors including spiral striping. Nylon jackets can also be supplied for greater resistance to abrasion.

SUB-MINIATURE WIRE AND CABLE

Thin wall vinyl insulation over flexible stranded conductors (AWG sizes down to #40) meets many requirements for small space factor. Available in all standard colors with or without wire braid shields.

SUPER-FLEXIBLE CABLES

Tensolite super-flexible cables, featuring the patented tensulation process, solve many problems calling for limpness and long flex life. Phonograph pick-up cables, hearing aid cordage, and telephone tinsels are regularly being supplied.

TENSOLITE WIRE KITS

For laboratory and prototype requirements, the following convenient desk size wire kits are now available from stock: Teflon Kit, SRIR Kit, Sub-miniature "1482" Kit, Flexible Cable Assortment.

SPECIAL CONSTRUCTIONS

Tensolite's engineering and development facilities are also available for collaboration in the solution of many special cable problems. Simple or complex, Tensolite will welcome an opportunity to estimate on your requirements.

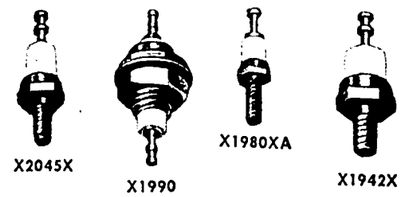
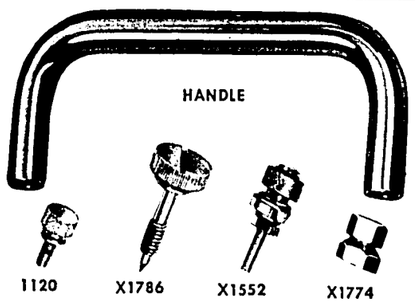
CTC

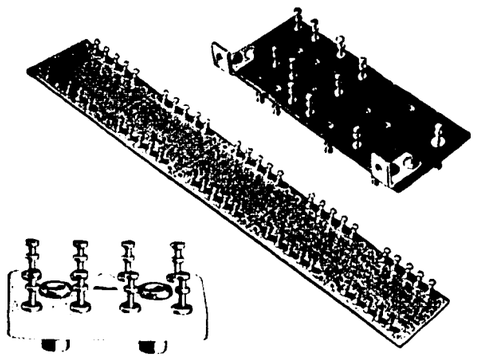
CUSTOM OR STANDARD ...The Guaranteed Components



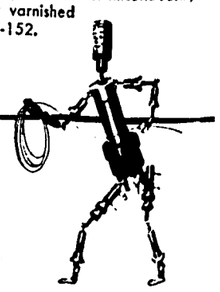
FIND YOUR ELECTRICAL and ELECTRONIC COMPONENTS HERE



Slug Tuned Coils and Coil Forms. Single layer or pie type windings to your specifications. Forms of quality paper base phenolic or grade L-5 silicone impregnated ceramic. Mounted bushings are cadmium plated brass; ring type terminals are silver plated brass. All units include slugs and mounting hardware. Type C (above) available with retaining collars of silicone fibreglas. Note: Regular, CTC Coil Form Kit is available. Also available, new Coil Kit, Type X2060, with windings on standard LS-6 Forms.



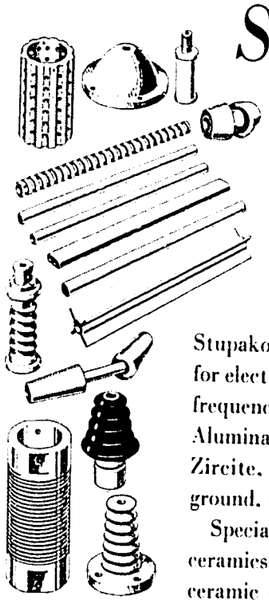
Silver-Plated Brass Standard Terminal Lugs. Twenty-eight different types, each available in varied shank lengths, coated with water dipped lacquer for protection during storage. Other finishes include hot-tin, electro-tin, electro-tin lead, cadmium or gold plate on special order. Pressure and hand swagers available for mounting all terminals. Note: Combination screw and solder terminals are available in 3 sizes.



Insulated Terminals. Grade L-5 ceramic, silicone impregnated for maximum performance over broad humidity range. Rivet or screw stud type. 5 lengths of dielectric. Also available: phenolic in rivet or screw-stud mountings; ceramic with internal screw thread.

Hardware. Includes panel screws, thumb screws, dial locks, shaft locks, handles and handle ferrules, tube clamps, terminal board brackets, standoff mounts and spacers.

Terminal Boards. Standard type in cotton fabric phenolic, nylon phenolic or Grade L-5 silicone impregnated ceramic. Custom boards of cloth, paper, glass laminates (phenolic, melamine or silicone resin) imprinted as required, lacquered or varnished to specifications MIL-V-173 and JAN-T-152.



All materials, processes, finishes meet applicable government specifications.

Custom Made CTC Components will be quickly made to your specifications in production quantity.

Write for Free Catalog #400 containing complete data on the entire CTC line. Includes engineering drawings on items pictured here as well as many other CTC components.

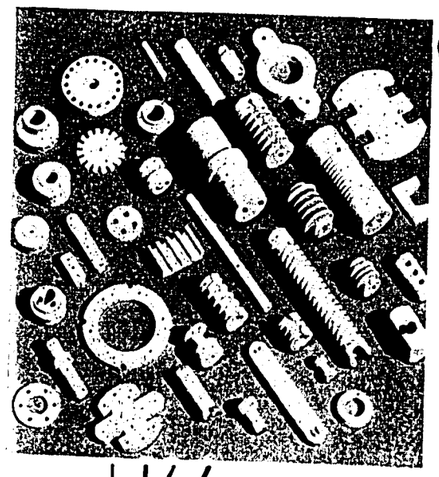
Stupakoff

Electrical and Electronic

CERAMICS

Stupakoff is a leading manufacturer of ceramic products for electrical and electronic applications for all voltages, frequencies and temperatures. Parts are made of Alumina, Cordierite, Forsterite, Magnesia, Porcelain, Zircite, Titanates, Stupalith and Steatite—plain, ground, metallized or assembled.



Specialized types include resistor ceramics, metallized ceramics, high thermal shock-resisting ceramics and ceramic dielectrics. Send for information, giving proposed application and approximate specifications.

STUPAKOFF CERAMIC & MANUFACTURING CO.

LATROBE, PENNSYLVANIA

steatite, ceramic & lava insulators

for electrical and electronic applications

Custom-molded, extruded or machined to close tolerances to meet your exact specifications. Prompt delivery at low cost on large or small orders. Over half a century of service is your guarantee of complete satisfaction.

Established 1890

Intricate parts and precision components *can be LECTROFORMED!**

If the radio frequency component you need cannot be made by conventional methods or is difficult and costly to manufacture, the possibilities are it can be ***LECTROFORMED.***

*Trademark

LECTROFORMING can produce parts of intricate design, accurate interior dimensions and with high interior surface finish up to 5 micro-inch. Various metals may be used (such as silver, gold, copper, nickel and/or iron) to meet specific requirements for conductivity, strength and corrosion resistance.

LECTROFORMING achieves dimensional stability impossible by any other method.

LECTROFORMING is the manufacturing of an article by the electrode position of metal on a form of predetermined size, shape and finish. We welcome the opportunity to discuss your problem, no matter how difficult it may seem.

BART LABORATORIES CO., INC.
227 Main Street, Belleville 9, New Jersey

New Towers in the Sky!

Research information readily exchanged between engineers and scientists has been the forerunner of every radio-electronic advance. This is the priceless service to all of "Proceedings of the I.R.E."

Code number at end of each address refers to product or service sub-classifications listed at the head of the major classification.

for the

ELECTRONIC, PHOTOGRAPHIC

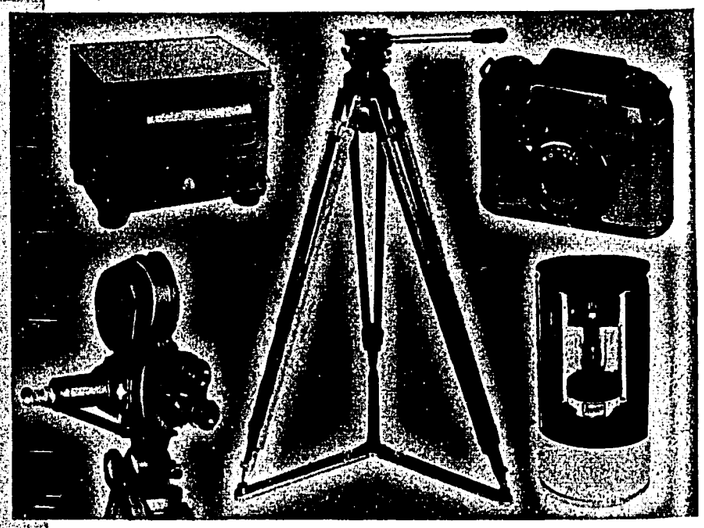
and

AVIATION INDUSTRIES

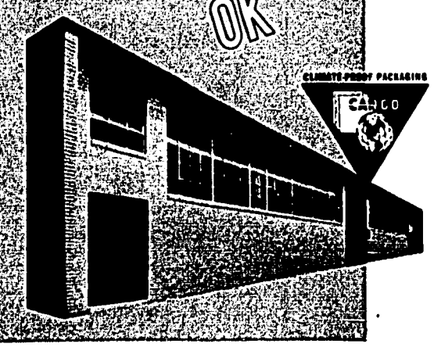
● SPECIAL ASSEMBLY EQUIPMENT

● EXPERTS IN MILITARY SPECIFICATIONS

●ECONOMICAL PRODUCTION LINE METHODS



● FULL COMPLIANCE IN EVERY DETAIL

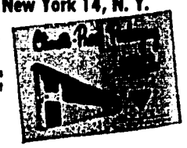


● COMPETENT CONSULTING SERVICE

—offering complete facilities from package designing to final world-wide distribution

Cargo Packers engineers are experts in meeting the needs of the military. Years of experience in protecting delicate photographic, electronic and aircraft equipment for world wide distribution assures complete protection under all conditions encountered in transit and storage anywhere. Cargo Packers packaging engineers possess the ability, method and equipment to safeguard the most delicate apparatus against shock, vibration, humidity and temperature extremes.

Individually engineered, climate-proof packaging for the Armed Forces and industrial ordnance.



CARGO PACKERS

INCORPORATED

General offices and Main Plant: 73 Rutledge St., Brooklyn 11, N. Y.
Serving the Manhattan Area: 315 West 13th St., New York 14, N. Y.

NEW MILITARY PACKAGING BROCHURE

Call or write for fully illustrated literature with complete data on the modern Cargo Packers plant newly designed and built for protective packaging exclusively.

precision stampings

Specialists

in

BERYLLIUM COPPER

Manufacturers of complex design parts (to customers' specification) for Electronic, Radar, Television, Radio, Aircraft and Communication units.

Producer of parts made from Beryllium Copper, Coin Silver, Phosphor Bronze, Brass, Aluminum and steel in thicknesses from .002 to .090 for experimental and production requirements.

COMPLEX METAL PARTS

- Grounding Strips
- Diaphragms
- Crystal Contacts
- Grid Contacts
- Cavity Contacts
- Gaskets
- Contact Springs
- Spring Selectors
- Screen Plates
- Contact Rings, etc.

ELECTRO-SEAL provides the utmost in HERMETIC SEALING SERVICE!

Electro-Sealing Service—

Provides the design, enclosure, base, brackets and terminals.

Assembles, wires and seals your component in an atmosphere of dry, inert gas.

Evacuates enclosure by high-vacuum system and thoroughly tests for leaks by means of mass spectrometer.

In addition to volume production, provides small quantities for engineering samples or for limited production schedules.

Invites you to send complete engineering information and samples of parts to be hermetically sealed.

Eyelets? Shells?

Multiple plunger press products?

Here, illustrated full size, are some examples of the parts we make—in a wide variety of metals and finishes. Some are of simple design . . . others are intricate, precision-made parts for industrial, electrical and scientific purposes.

We'll be glad to quote on your requirements, and have thousands of stock tools which may save tooling-up charges. Just send us a sample, drawing or description, together with quantity and other pertinent information.

...NO MATTER HOW YOU SAY IT
YOU SAVE MONEY... and TIME with
BUD Electronic Components and Sheet Metal Products

Leading manufacturers throughout the country find they get better products and faster delivery on Electronic Components and Sheet Metal Products from BUD. We supply the material . . . we have the "know-how" . . . our workmanship is unsurpassed and our prices are low.

Save money, save time by consulting BUD on your requirements. Don't invest in expensive equipment, don't tie up valuable space. Consult your BUD distributor or send us your blue prints for estimates . . . there's no obligation.

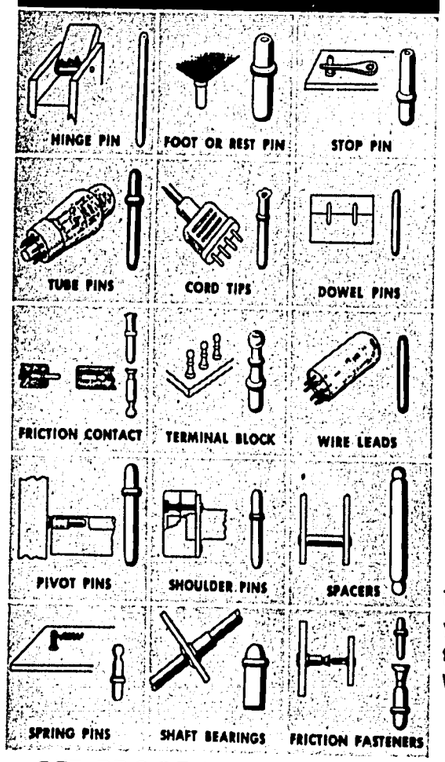
SMALL PARTS can play a BIG PART in...



Lower Production Costs!

Multi-Swage METHOD

Leading manufacturers in the electronics, machinery, appliance and toy fields have been saving substantially by using precision Multi-Swage parts instead of those previously made by turning, drilling, stamping or forming.

HERE ARE ONLY A FEW TYPICAL TINY PARTS MADE BY BEAD CHAIN'S Economical, Dependable **MULTI-SWAGE METHOD**

LET BEAD CHAIN MAKE YOUR

Tiny Parts to your Specifications at far less cost!

The advanced manufacturing method developed and used exclusively by Bead Chain swages practically any type of small tubular part from flat stock into precision forms with positive, tight seams . . . and does it *Automatically*. If you can use high-volume production . . . we can deliver it at a much faster rate . . . and at far less cost! Scrap is eliminated! Deliveries to you are dependably prompt!

We can supply you with parts that are beaded, grooved, shouldered and made with almost any metal. Diameters up to 1/4", lengths to 1 1/2"

This catalog can save you a lot of production time and money! Write for it *today!*

GET PROOF-POSITIVE COST COMPARISONS!

Send us a blueprint or sample and quantity requirements. We will quickly show you the big economies we can deliver.

BEAD CHAIN ®

Original and World's Largest Producer of Bead Chain

MANY MONEY SAVING APPLICATIONS OF MULTI-SWAGE PARTS IN THE

BAYSIDE, N. Y.

PRECISION coil bobbins and tubes are manufactured to your exact specifications. Rigid production standards and quality materials are combined to insure greater strength, lighter weight, maximum insulation, more winding space, high moisture resistance and heat dissipation . . . at low unit cost.

Precision Bobbins and Tubes are available in kraft, fish paper, acetate, phenol impregnated or combinations. Coil flanges made to specifications—plain or fitted with leads, slots or holes—plain or embossed.

Send specifications for free sample. Request Bobbin Bulletin and Arbor List of over 2000 sizes.

PRECISION PAPER TUBE CO.

2052 W. Charleston St. Chicago 45, Illinois
Plant No. 2: 79 Chapel St., Hartford, Conn.

For
Simple more logical grouping of working units to insure quiet, smooth trouble-free operation.
For
More economical construction and lower maintenance cost.
For
A more direct alignment in remote control or power transmission around corners.

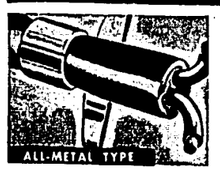
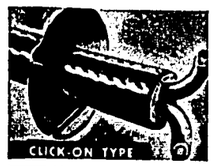
PROTECT YOUR PRODUCT

at point of strain



Protect product saleability too — by insuring long life for cords, cables and conductors. Genuine "GRIPMASTER" Strain Reliefs provide these vital features—



- ★ Anchor cords to housings
- ★ Eliminate taping or threading
- ★ Prevent unraveling
- ★ Prevent cord pull damage
- ★ All sizes and styles
- ★ Easy to apply
- ★ Inexpensive

Gripmaster Strain Reliefs are "tremendous trifles" that make good products better!

Ask for samples.

4 WAYS TO END ALL CORD AND CABLE SERVICE FAILURES *Economically*

GRIPMASTER STRAIN RELIEFS

Interruptions due to cable and cord connection failures are eliminated because they anchor the cord to the product at the point of strain. GRIPMASTER Strain Reliefs can withstand pulls up to 100 lbs., and are acceptable to Underwriters Laboratories. All types Reg. U. S. Pat. Off.

WIRE BINDING SLEEVES—Preventing fraying of cord ends, these specially-treated rubber tubes are available in five sizes to fit wires to .790

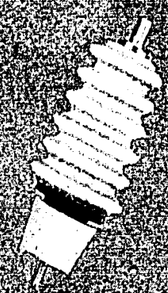
Assembly service for hermetic sealing of electronic units



Specify Heldor!

cans and covers to mil-t-27 and commercial specifications

compression-type hermetic seal bushings and terminals

HELDOR's vast background and facilities as the leading manufacturers of components for hermetic sealing are now being used by producers of selenium rectifiers, oil-filled condensers, transformers and similar electronic units for the complete final assembly and the actual hermetic sealing. Heldor Assembly Service to them offers many advantages:

1 SAVE MONEY

As manufacturers of components (or hermetic sealing—cans, covers and terminals—HELDOR is in the unique position of being able to save money on the complete assembly of hermetically sealed electronic units. Several manufacturers, now using this Heldor Assembly Service, have eliminated their own hermetic sealing operations because this HELDOR service saved them substantial sums of money.

2 NO PARTS INVENTORY

When HELDOR does the complete assembly and sealing of your products, you no longer need an inventory of components. HELDOR maintains its own inventory of MIL-T-27 and NON-STANDARD cans and covers as well as compression-type terminals.

3 SPEEDY DELIVERY

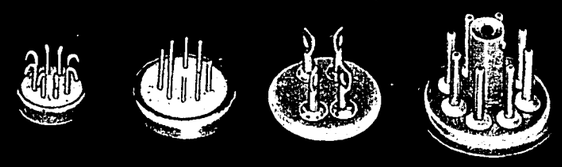
HELDOR'S production facilities enable us to deliver completely assembled units—already hermetically sealed—much faster (and less costly) than you can do it in your own plant. Many manufacturers in your field have already discovered this fact . . . to their obvious advantage. Why not you?

4 NO HEADACHES

As one of the nation's leading specialists in hermetic sealing and its allied fields, HELDOR'S background and technical "know-how" is second-to-none. You can forget about the problems of hermetically sealing components when you use HELDOR Assembly Service.

5 MADE TO YOUR SPECIFICATIONS

HELDOR'S precision production and assembly service is geared to meet the most rigid of hermetic sealing specifications.



CALL HELDOR ON YOUR NEXT HERMETIC SEALING PROBLEM . . . SEND US YOUR SPECIFICATIONS

BRING US YOUR HEADER PROBLEMS!

SIMPLE OR COMPLEX

— We make them all, ranging from 2- and 3-electrode crystal holder bases and standard octal headers, to 14- and 18-terminal headers for sealed Transformer and Relay applications — with a wide selection of styles and sizes in our series of basic designs.

SPECIAL DESIGNS

— We also manufacture Sealed Headers and Terminals to meet special requirements, and will be glad to quote upon receiving your specifications.

COMPLETE ASSEMBLIES

— We have facilities for handling the complete assembly of many units — including wiring, evacuating and pressure-filling enclosures.

NEW CATALOG

— Just off the press, a new Hermaseal catalog, with descriptions and specifications of some of our standard Sealed Headers and Terminals. Write for your copy today!

Hermaseal **THE HERMASEAL CO, Inc.** Elkhart 3, Indiana

Stupakoff

GLASS to METAL SEALS

Stupakoff Kovar-Glass Seals are made with hard glass, assuring the highest degree of protection against thermal shock and weathering.

Stupakoff Kovar-Glass Seals are *not* mechanical compression seals, but develop a permanent and impervious bond through chemical interaction of the oxide of Kovar fused with hard boro-silicate glass.

Kovar is the ideal metal for such seals because its expansion characteristics closely match those of hard glass.

Available in a wide variety of standard sizes and designs, and can be made in many special forms. We will gladly submit samples and quotations.

STOP RF LEAKAGE ON THE DRAWING BOARD

. . . WHEN YOU DESIGN METEX ELECTRONIC WEATHERSTRIPPING INTO YOUR EQUIPMENT YOU GET ITS POSITIVE SHIELDING EFFECTIVENESS — AT MAXIMUM OVERALL ECONOMY

Plan *now* to take full advantage of *Metex Electronic Weatherstripping's* unusual effectiveness in shielding all types of electronic equipment. Because it is made of *knitted* wire mesh, *Metex Electronic Weatherstripping* is both conductive and resilient. It assures positive metal-to-metal contact between all mating surfaces. And being resilient it accommodates itself positively to surface inequalities.

In reality, *Metex Electronic Weatherstripping* can do more for you than just shield RF leakage. It can cut the cost of machining mating surfaces to close tolerances. It can eliminate the need for extra fasteners and many other costly means of making joints RF tight.

Applications in which *Metex Electronic Weatherstripping* has already proved its effectiveness include pulse modulator shields, wave-guide choke-flange gaskets, local oscillators on TV sets, dielectric heaters, etc.

For detailed information on METEX ELECTRONIC PRODUCTS, write for FREE copy of "Metex Electronic Weatherstrips" or outline your SPECIFIC shielding problem — it will receive our immediate attention.

THE REMARKABLE PERFORMANCE of REXOLITE 1422

DISSIPATION FACTOR — *EXTREMELY LOW OVER FNTIRE R.F. & U.H.F. RANGE*
DIELECTRIC CONSTANT — *NO CHANGE WITH FREQUENCY*

This wonderful insulation performance coupled with a high heat distortion point (105°—113°C) and the resulting good machinability make Rexolite 1422 an amazing High Frequency insulation. It equals or excels all but a few of the fine qualities of the much more expensive fluorocarbons. Even in the "few" it is superb in its own right and very close to the fluorocarbons — as in the case of Dielectric Constant shown in the above chart.

Rexolite 1422 is a carefully controlled cross-linked polystyrene. Developed by two of the country's greatest laboratories and manufactured for 10 years, Rexolite 1422 is highly dependable in quality, uniformity and performance.

If you have RF or UHF insulating problems calling for sheets, rods, castings or imbedments, check Rexolite 1422. We welcome problems. Write to us for information, full size copies of the above charts and technical bulletins.

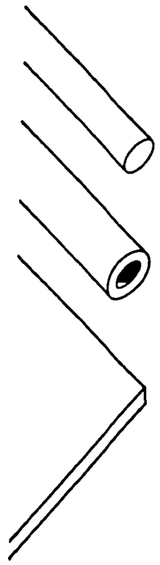
Manufacturers of UHF Insulating Materials, Microwall Wire** Kel-F* insulated wire, other Wire Specialties, Rextrude** 105 Electrical Tubing and Custom Plastic Extrusions.

West Acton, Massachusetts, U.S.A.



* T.M. of M. W. Kellogg Co.
** Reg. U.S. Pat. Off.

this TEFLON* gives you uniform parts...

electrically...dimensionally

Non porous **FLUOROFLEX®-T** *assures electrical stability. It's stress relieved for uniform machinability.*

It's in the processing—not in the appearance—that the real difference in Teflon shows up. Natural discolorations don't mean a thing to performance. But variable *properties* do.

That's why Fluoroflex-T products are extruded or molded under rigid control. Specially designed equipment compacts Teflon powder to the critical density—which not only prevents porosity, but also assures highest tensile strength. Resistoflex processing relieves internal stresses to provide better dimensional stability without any porosity. In short, Fluoroflex-T rods, tubes and sheets offer *uniformly* optimum properties.

All this means non absorbent insulators, for optimum UHF performance . . . and also uniform machining with fewer rejects. Why not specify Fluoroflex-T for *your* Teflon parts? For more information write for Bulletin FT-1.

*DuPont trade mark for its tetrafluoroethylene resin.
® Resistoflex trade mark for products from fluorocarbon resins.

RESISTOFLEX corporation

Code number at end of each address refers to product or service sub-classifications listed at the head of the major classification.

IN DESIGNING COILS for power transformers, the efficiency of the layer insulation you specify can make a tremendous difference in the cost of the finished transformer.

Frequently a coil size may be reduced enough to utilize a smaller frame. Dimensions can sometimes be changed to simplify production and greatly lessen the incidence of scrap resulting from slippage.

Hartford City Paper Company has been manufacturing layer insulation for almost sixty years. Rapid strides have been made in improving the complete line of Electrical Glassine and Coil Kraft papers to meet the ever growing needs of the electronics industry.

We produce and stock Coil Kraft from .0006 inches to .005 inches thick in 3 densities.

SAMPLES, data sheets and price lists are available upon request. Before placing your next order, write and get the Hartford City Paper Company facts on how to get more efficient results from your layer insulation paper.

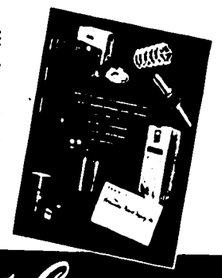
COMMUNICATION PRODUCTS'
LOW-LOSS LACQUER

Be safe with

Q-max
A-27
LOW-LOSS LACQUER

Q-MAX is widely accepted as the standard for R-F circuit components because it is chemically engineered for this sole purpose.



Q-MAX provides a clear, practically loss-free covering, penetrates deeply, seals out moisture, imparts rigidity and promotes electrical stability.

Q-MAX is easy to apply, dries quickly and adheres to practically all materials. It is useful over a wide temperature range and serves as a mild flux on tinned surfaces.

Q-MAX is an ideal impregnant for high "Q" coils. Coil "Q" remains nearly constant from wet application to dry finish.

Q-MAX is supplied in 1, 5, and 55 gallon containers.

WRITE FOR ILLUSTRATED LITERATURE

MODERN CIRCUIT AND COMPONENT
SHIELDING
WITH CONDUCTIVE COATINGS

SOME SPECIFIC USES:
Exterior coating on
Cathode-Ray Tubes
Field-Sensitive Vacuum Tubes
Interior coating for
Radio and TV Cabinets
Meter Cases, Control Cabinets
High-Voltage Equipment
Amplifier Cabinets
Hearing Aids, TV Boosters

SOME GENERAL USES:
Shielding, Grounding
High-Voltage Protection
Low-Resistance Contact Areas
Static-Discharge Coatings
Research Problems
Some Methods of Corona Elimination

RS12 SHIELDING MICROPAINT
For cathode-ray tubes, high-voltage equipment, etc. Square resistance in the range of 100 to 500 ohms per square. Offers extreme economy and ease of application by spraying, brushing, and dipping. For your experimental work we offer 4-oz. bottles at $0.73 and pint bottles at $1.65 postpaid in U.S. from our plant or available from your parts jobber. Production quantity prices are in the range of $2.00 to $3.00 per gallon. Ask for data and price sheet MR11.

SS12 SILVER SHIELDING MICROPAINT
Uses include hearing-aid shielding, instrument shielding, etc. Square resistance in the range of one ohm per square and up. Available in several grades. For your experimental work we offer 1-oz. bottles at $2.40 and 4-oz. bottles at $4.00 postpaid in U.S. Production quantity prices are as low as $0.44 per oz. Ask for data and price sheet MS44.

SCP12 INORGANIC SILVER MICROPAINT. Ideal for interior shielding of glass vacuum and glass CR tubes. Excellent adhesion. Resistance as low as 0.01 ohm per square. Bakes out at 400° F. and above during tube evacuation, but will withstand 1500° F. Data sheet MS45.

Micro-Circuits Co. makes conductive coatings for every purpose and offers a printed-circuit printing service. For research and development use our $21 Kit of conductive and resistance paints with instruction manual. Free Literature.

EVENLY *Wound*

SMALL TOROIDAL COILS AT HIGH SPEEDS WITH MINIMUM WIRE BREAKAGE

The MICAFIL Model RW-0 Toroidal Coil Winder automatically winds toroidal coils continuously around 360° and sector coils from 30° to 180°. To produce smooth, even layers of wire, the winder is adjusted easily to wind any wire size between 26 and 45 AWG and to obtain the proper pitch. Winding direction can be changed and feeds can be adjusted while machine is in operation.

CAPACITY

Coil Sizes
- Minimum finished I.D. . . . . ¼"
- Maximum finished O.D. . . . . 2"
- Minimum finished O.D. . . . . ½"

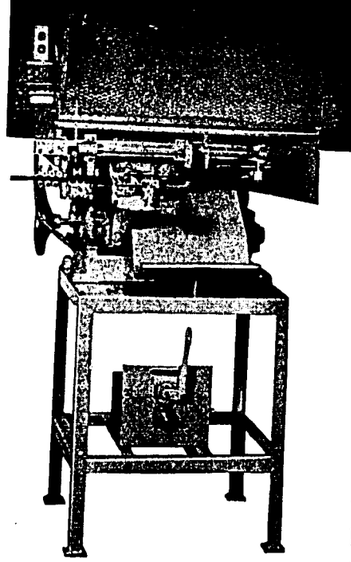
Wire Sizes . . . . . 26 to 45 AWG

Winding Speed—
according to wire size . . up to 800 rpm

Shuttle Capacity—
according to wire size . . . . 48 to 500 ft.

MICAFIL Toroidal Coil Winders are made in three larger sizes for winding coils up to 8" O.D. and with 11 AWG Wire.

SPIRALING DEVICE—Device winds spirals for shuttle loads—in advance . . . Newly developed to permit continuous operation of Coil Winder . . . Winds to predetermined lengths.



SHUTTLES—Made in four different ring diameters to accommodate range of spiraled wire sizes . . . Larger wire capacities . . . *More than one coil can be wound with single loading* . . . Changed within 2 minutes . . . Loaded in less than a minute.

ACCURATE MECHANICAL TURNS COUNTER—Preset for required number of turns . . . Automatically stops winder when turn count is reached.

Let Cosa Engineers study and recommend the winder for your needs. Or, write for Literature.

How to CUT AND STRIP INSULATED WIRE... as fast as 3000 lengths per hour

MODEL CS-6E CAPACITY

Finished Pieces Per Hour—15 in. lengths, 3000 per hour; 97 in. lengths, 500 per hour.

Maximum Stripping Length—1½ in. at each end.

Maximum Cutting Length—97 in.

Minimum Cutting Length—2 in. (⅞ in. special).

Wire Handled—Solid or stranded single conductor wires, parallel cord, heater cord, service cord, etc.

Maximum Wire Size—No. 10 stranded or No. 12 solid.

Other Artos Machines

The complete line of Artos automatic wire cutting and stripping machines will handle *cut lengths* from 1 in. to 60 ft., *stripped lengths* to 6½ in. at one end and 8½ in. at the other, *wire* from No. 12 to No. 000 gauge, and up to 3600 pieces per hour. Ask for recommendations on your own specific problems.

ARTOS Automatic MACHINES REDUCE TIME AND COST

For quantity production of finished wire leads . . . measured, cut to length, and stripped at one or both ends . . . investigate Artos Automatic Machines.

The Model CS-6 illustrated can complete up to 3,000 pieces per hour in 15-in. lengths, and other lengths in proportion. You save through combined operations . . . through quick, easy set-up . . . through unskilled help who can handle this machine. You obtain substantial time savings over the best manual or semi-automatic methods.

Highly accurate machine operation reduces work spoilage to an absolute minimum — errors due to the human element are eliminated. There is no cutting of strands or nicking of solid wire. Uniform lengths and uniform stripping are produced consistently.

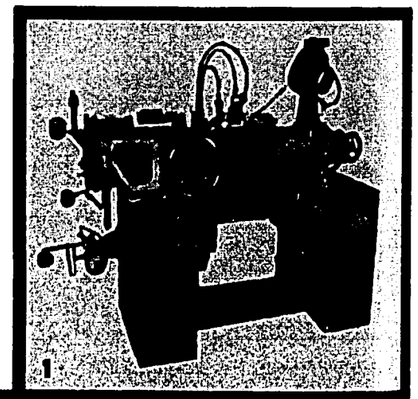
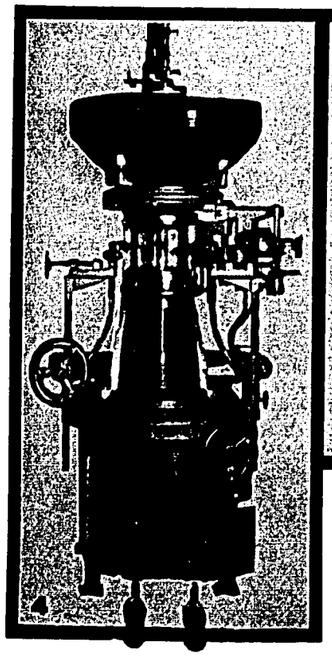
KAHLE MACHINES

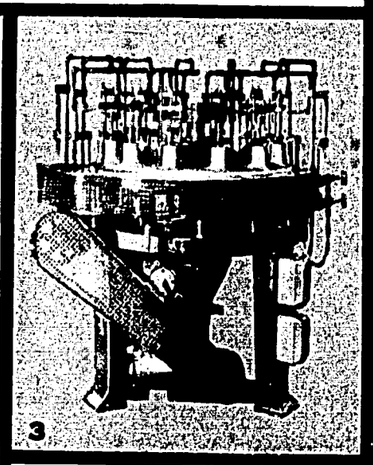
for Automatic Production of TRANSISTORS ELECTRONIC TUBES

from

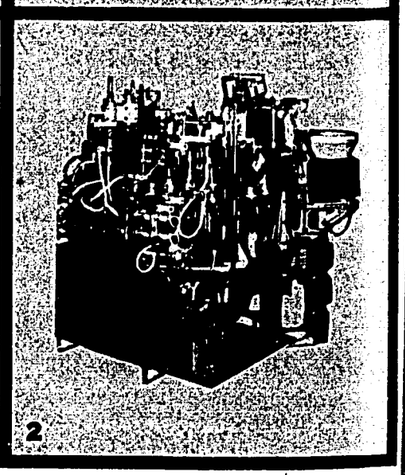


Sub-miniature to Cathode Ray

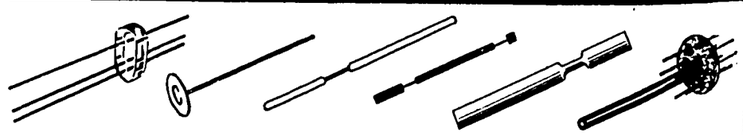




More than forty years of precision-engineering experience is built into the Kahle machines which are supplied to the electronics industry for general purpose or for special purpose. Hundreds of production problems have been presented to Kahle – in every case Kahle has designed and developed a machine to produce results as specified. Kahle specializes in equipment for manufacturing sub-miniature, miniature, standard, cathode ray, transmitting tubes and transistors . . . and other glass parts in limited quantity for laboratory needs or for maximum production runs.



Illustrated at right and below are a few representative machines:



(1) MODEL 2148, *Automatic Lead Wire Welding Machine,* **(2) MODEL 2179,** *Automatic Button Stem Machine;* **(3) MODEL 1384,** *Sub-miniature Button Stem Machine;* **(4) MODEL 2185,** *CR Tube Combination Neck Cutting and Neck Splicing Machine*

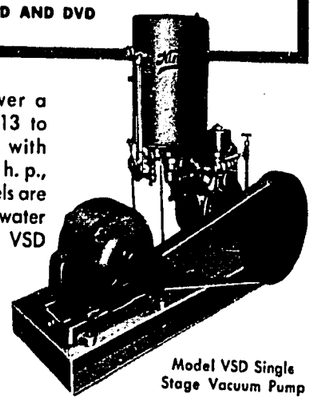
Kinney HIGH VACUUM PUMPS



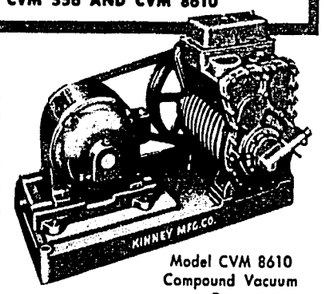
MECHANICAL, OIL SEALED

Almost without exception in the United States and in an increasing number of plants abroad, Kinney High Vacuum Pumps are standard equipment for exhausting lamps and tubes. They also provide low absolute pressures for sintering alloy metals, coating lenses, refining rare metals and producing blood plasma, penicillin and other drugs. They are used effectively wherever a high vacuum pump can be applied including cyclotron evacuation, atom smashing, and condenser vacuum service in power plants. Over 10,000 installations serve a wide variety of fields.

The plungers in Kinney Vacuum Pumps have no contact with cylinder surfaces due to the unique method of automatic lubrication, resulting in a no-clearance pump of extremely long life. Simple and efficient in design, these pumps have established an impressive record for dependability and low cost operation.

SINGLE STAGE VACUUM PUMP

MODELS VSD AND DVD

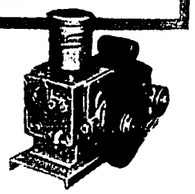


Model VSD Single Stage Vacuum Pump

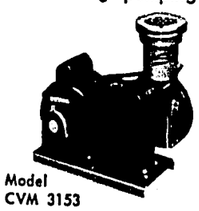
Nine pump sizes cover a capacity range from 13 to 1800 cu. ft. per min. with motors from ½ to 75 h. p., respectively. VSD Models are furnished either air or water cooled (except Model VSD 556 — air cooled only). All DVD Models furnished water cooled only. Single Stage Pumps on a blank test produce low absolute pressures of 10 microns (.01 mm Hg.) or better.

COMPOUND VACUUM PUMP

MODELS CVM 556 AND CVM 8610



Model CVM 8610 Compound Vacuum Pump



Four sizes of Compound Pumps are available in capacities of 2, 4.9, 15.2, and 46 cu. ft. per min., respectively. The working mechanism is similar to the Single Stage but the two cylinders are connected in series. The Compound Pump has an air cooled casing of unique design and special provision for oil sealing and lubricating the high vacuum working parts. These compound pumps test to low absolute pressures of 0.2 micron (.0002 mm Hg.) or better.

SMALL VACUUM PUMPS

MODELS CVM 3153 AND CVM 3534

Model CVM 3534

Model CVM 3153

These small Kinney Vacuum Pumps combine the advantages of small size and high pumping speed. Model CVM 3153 has a free air displacement of 2 cu. ft. per min. It weighs only 70 lbs., complete with its ¼ h.p. motor. Model CVM 3534 has a displacement of 4.9 cu. ft. per min. Its weight: 140 lbs. with ⅓ h.p. motor. Both pumps test to low absolute pressures of 0.2 micron (.0002 mm Hg.) or better.

KINNEY VACUUM VALVES — VACUUM OIL

Kinney Vacuum Tight Valves facilitate testing vacuum installations. Special metal bellows eliminate the leakage at the valve stem which occurs with ordinary valves having stuffing boxes. Three types of valves are available — steel, cast iron, and bronze. Write for Vacuum Tight Valves Bulletins.

The oil supplied with the Compound Pumps is carefully processed to insure low vapor pressure and suitable viscosity. It is available under the name "Kinney Super X Vacuum Dried Oil."

FOR FASTER PUMPING WITH SMALLER PUMPS

INTERNATIONAL HIGH VACUUM COMPOUND PUMPS

New Model 116
16 CFM Free Air Capacity

Six Ways a Better Pump:

1. SIMPLIFIED CONSTRUCTION
2. ROTARY VANE
3. AUTOMATIC LUBRICATION
4. HIGH EFFICIENCY
5. QUICK RECOVERY
6. RUGGEDLY BUILT

Speed production and reduce maintenance with these ready-to-operate, high efficiency vacuum pumps!

International rotary vane pumps are extremely compact and operate unusually quiet. Simplified construction and automatic lubrication assure trouble-free operation, long life and low-cost upkeep. Pump mechanisms are totally oil submerged, preventing atmosphere to vacuum leakage.

Ribbons—Strips and Formed Pieces of

Pure Tungsten—Thoriated Tungsten Molybdenum and Tantalum

TUNGSTEN RIBBON

SIZES:
Thickness down to .001" at widths .004" to .125"
Thickness down to .0008" at widths up to .060"
Thickness down to .0005" at widths up to .015"
Thickness down to .0002" at widths up to .006"
Tungsten ribbon made to above sizes is manufactured from round, ductile wire.

CHEMICAL PURITY:
99.9% pure

FINISH:
Roll finish—black or cleaned

CAMBER:
Approximately 1/16" in 2' lengths

EDGES:
Slightly rounded and smooth

TOLERANCES:

Thicknesses:	.0005" to .001	± .00005"
	.002"	.0001"
	.003"	.00015"
	.004"	.0002"
	.005" to .006"	.00025"
	.007" to .010"	.00035"
	.011" to .030"	.0005"
	.031" to .040"	.001"
Widths:	.006" to .010"	± .0005"
	.011" to .020"	.001"
	.021" to .030"	.0015"
	.031" to .060"	.002"
	.061" to .093"	.033"
	.100" to .125"	.005"

Supplied to mg. wgt.—if required.

STRIP

Widths up to 1½" with thickness down to .001" in random lengths 6" and up. This is rolled from heavy strip. Larger sizes also available.

THORIATED

Widths up to .125" down to .001" thick
Widths up to ½" down to .002" thick

MOLYBDENUM RIBBON

SIZES:
Widths from .006" up to .250"
Thicknesses from .060" down to .0006"
Molybdenum Ribbon made to above sizes is manufactured from round, ductile wire.

CHEMICAL PURITY:
99.9% pure

FINISH:
Roll polished finish, cleaned

CAMBER:
Approximately 1/16" in 2' lengths

EDGES:
Slightly rounded and smooth

TOLERANCES:

Thicknesses:	.0006" to .001"	± .00004"
	.0011" to .010"	.00025"
	.011" to .030"	.0003"
	.031" to .060"	.0005"
Widths:	.066" to .010"	± .0005'
	.011" to .020"	.001"
	.021" to .030"	.0015"
	.031" to .090"	.002"
	.091" to .125"	.003"
	.126" to .160"	.0035"
	.161" to .250"	.005"

Supplied to mg. wgt.—if required.

STRIP

Widths up to 2" with thicknesses down to .001" in random lengths 6" and up. This is rolled from heavy strip. Larger sizes also available.

TANTALUM

Strip and ribbon available from .008" to 1½" wide at thickness from .001" down to .0004".

INQUIRIES on formed pieces made of tungsten or molybdenum ribbon and strip, thoriated tungsten, or tantalum will receive prompt attention.

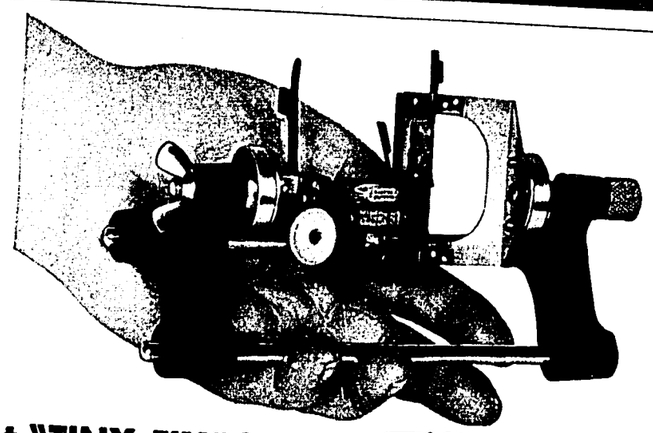
KOVAR glass sealing ALLOY

strong, durable

easy to use, available

The ideal alloy for glass sealing, Kovar matches the expansivity of certain hard glasses over the entire working temperature range. It resists mercury attack, has ample mechanical strength and seals readily with simple oxidation procedure.



Kovar produces a permanent vacuum-tight seal, and is readily machined or fabricated to permit the use of small and intricate shapes. It is of controlled composition and processing to permit duplication of results. Usable in any thickness; no need to feather edge on tubular or intricate shapes, and is relatively inexpensive, eliminating restraints on sizes and capacity. Can be welded, soldered, and brazed to other metals.

Kovar is available as sheet, strip, foil, rod, tube, wire—or fabricated cups, eyelets, leads and other shapes.

SPECIALISTS FOR THE TRADE

Sel-Rex

Precious Metals *for* Plating

Pioneers in the Development of Modern Precious Metal Plating Processes

Outstanding developments by Sel-Rex in precious metals for plating have resulted in better quality at less cost for both decorative and industrial platers. Superior engineering skill and long experience in the plating field make Sel-Rex your best choice for all precious metal plating needs.

Sel-Rex BRIGHT GOLD PROCESS produces pore-free "mirror bright" deposits regardless of thickness. Eliminates need for scratch brushing or buffing. Gives excellent metal distribution and deposit is twice the hardness of conventional gold. Ideally suited for specification thickness in barrel or still plating.

Sel-Rex BRIGHT RHODIUM SOLUTIONS provide a brilliant, durable deposit that will withstand severe abrasion. The chemically stable solution is ideal for specification plating of protective coatings that will not corrode or tarnish in any atmosphere.

Sel-Rex SILVER SOL-U-SALT (Potassium Silver Cyanide) in pure crystalline form is completely soluble in water. Eliminates old fashioned mixing, calculating or filtering. Eliminates hazard of airborne dust—no insoluble particles in the bath to cause rough deposits.

Consult our engineers on any precious metal problem.
No obligation. Detailed literature available on request.

RESINITE gs you the HEST RESISTIVITY of any SINATED PRODUCT

Resinite Coil Forms are laboratory tested and field proven. Their operating characteristics —volume resistivity . . . power factor . . . thermal properties . . . low moisture absorption . . . and resistance to voltage breakdown—represent a new achievement in basic components for electronic application.

Resinite Coil Forms are available with inside or outside threads, slotted, punched or embossed. Axial pressure in excess of 25 lbs. is accomplished through a special three row threaded design. Torque can be controlled to + or — 1 in. oz.

RESINITE 8104: for coil forms requiring very high dielectric properties under extreme humidity.

RESINITE "AC": for applications requiring very high dielectric strength. Electrolytic corrosion is impossible.

RESINITE 104: for stapling, severe forming, fabricating.

Send today for full details and technical information.

Electron Tube
GETTER
Specialists

KING LABORATORIES, INC. has been a leading supplier of GETTERS for *electron tube* production for many years. Throughout tube development we have produced better and more economical GETTERS to the most stringent specifications.

KING LABORATORIES has been a leader in Subminiature and Cathode Ray Tube GETTER development. As further subminiaturization and improvements in Cathode Ray Tube performance place even more exacting requirements on GETTERS, KING LABORATORIES fundamental research and production facilities can be the answer to your most critical needs.

For the solution to all your

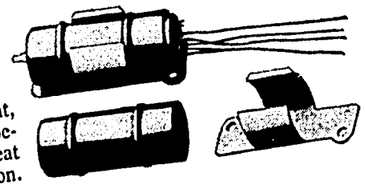
from design to production line...

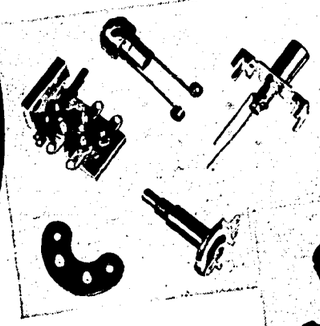


the STAVER company

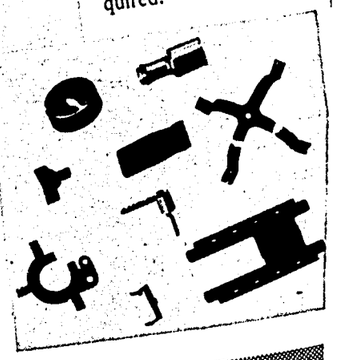
serves the electronics industry 2 ways

1 the STAVER line of electronic specialties

mini-shield* and clip
Types to fit *all* miniature tubes. Locks tube in socket, prevents vibration. Engineered to accommodate variations in diameter.



sub-mini-shield
Combination shield, clip and mount, for sub-miniature tubes. Close tube-to-shield contact for maximum heat dissipation. Firm clamping action. Easy to mount.



mini-spring*
A vibration-proof tube guard that keeps a steady axial downward pressure and provides sideway support in vertical or horizontal mounting position. Locks or releases tube at touch of a finger.

2 precision parts and components manufactured to customer specifications

assemblies
Special electronic assemblies—to your specifications — controls, relays, connectors, switches, terminal boards, etc Design assistance when required.

stampings
Simple or intricate . . . large or small quantities. Automatic equipment—close tolerances. Non-ferrous metals a specialty.

Write for complete information on our products and facilities.

BALLANTINE

World's Leading Electronic Voltmeters

SENSITIVE AC VOLTMETERS

AUDIO to 150 kc . MODEL 300

Voltage Range.....1mv—100v
Frequency Range.....10cps—150kc
Accuracy.....2% ENTIRE RANGE
Input Impedance.....½ meg shunted by 30μμf

SUB-AUDIO to 150 kc MODEL 302B

Voltage Range.....100μv—100v
Frequency Range.....2cps—150kc
Accuracy.....3% 5cps—100kc
5% elsewhere
Input Impedance.....2 meg shunted by 15 μμf*

AUDIO to 2 mc MODEL 310A

Voltage Range.....100μv—100v
As null detector 20μv min
Frequency Range.....10cps—2mc
As null detector 5cps—4mc
Accuracy.....3% 10cps—1mc
5% elsewhere
Input Impedance.....2 meg shunted by 15μμf*

AUDIO to 6 mc MODEL 314

Voltage Range.....1mv—1000v
(100μv—1mv without probe)
Frequency Range.....15cps—6mc
Accuracy.....3% 15cps—3mc
5% elsewhere
Input Impedance.....11 meg shunted by 6μμf
(1 meg shunted by 25μμf without probe)

PEAK-to-PEAK MODEL 305

Voltage Range.....1mv—1000v pk-to-pk
Frequency Range.....10cps—100kc (sine wave)
Pulse width.....3μsec—250μsec
Min Rep Rate.....20 pulses per sec
Accuracy.....5% for pulses
Input Impedance.....2 meg shunted by 15 μμf*

ACCESSORIES

SENSITIVE INVERTER MODEL 700

For Measuring DC Voltages when combined with any AC Voltmeter

Voltage Range.....1μv—100v DC
Ratios DC Input to RMS Output.....1:100 & 10:1
Accuracy.....1% 100μv—100v
Input Resistance.....>10 meg for 1:100
50 meg for 10:1

DECADE AMPLIFIER MODEL 220A

For Increasing the Sensitivity of any AC Voltmeter by 10 or 100 times

Voltage Range.....10μv—50mv
Frequency Range.....10cps—150kc
Accuracy.....2% ENTIRE RANGE
Input Impedance.....5 meg shunted by 15μμf

MULTIPLIERS MODEL SERIES 1300

For Extending the Voltage Ranges of Ballantine Voltmeters to 1000 and to 10,000 Volts

Voltmeter Model	For Extending Range to 1000v	10,000v
300	1300A	1300B
305	—	1305B
302B 310A	1310A	1310B
314	—	1314B

SHUNTS MODEL SERIES 600

For Measuring Current AC or DC when used with any AC or DC Voltmeter

Model	Resistance	Max Current
601	1 ~	1000ma
602	10 ~	300ma
603	100 ~	100ma
604	1000 ~	30ma

Current from 0.1μa to 1a can be measured using these shunts with Ballantine Voltmeters and Accessories.

SPECIAL PURPOSE MODELS

To Suit Your Requirements.

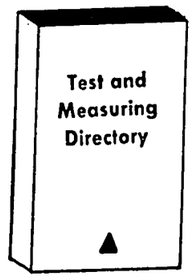
Write to us about your special measurement problems.

Famous for SENSITIVITY • ACCURACY • STABILITY

Each Ballantine Voltmeter

- Has only ONE voltage scale with decade range switching.
- Provides the same accuracy of reading at ALL points on the logarithmic voltage scale.
- Has a linear decibel scale.
- May be used as a high gain wide band amplifier.
- Responds to the average value of the input voltage wave, thus avoiding "turn-over" discrepancy.

WRITE FOR MORE DETAILED INFORMATION



BALLANTINE LABORATORIES, INC.
102 Fanny Road, Boonton, New Jersey

*Shunt capacitance is 8μμf on all ranges except two most sensitive ranges.

A Directory of

8. Test and Measuring Equipment

Laboratory Standards & Supplies

8 Major Groups

58 Products

Organized by functions for Engineers

Test Equipment has long deserved a directory of its own, and this IRE has now produced, in Section 8.

Two IRE Professional Groups are particularly served by this section: the groups on "Instrumentation" and on "Quality Control." It makes good sense to take Test and Measuring Equipment out entirely from the listings of components, materials and services, and set up such apparatus in its own condensed, easy-to-work-with folio.

Nine basic classes of equipment organize 58 different kinds of apparatus into related groups, and advertising, in this section and elsewhere, adds interest and information.

The products and services of the Radio-Electronics industry have been organized into ten basic directories following closely the organization of the IRE Professional Groups. But 100 major product groups are numbered consecutively throughout.

88 Audio Frequency Test Equipment.
89 General Laboratory Equipment & Supplies.
90 General Test Equipment.
91 Graphic Recorders.
92 Laboratory Standards of Frequency & Time.
93 Microwave & Radar Test Equipment.
94 Nuclear.
95 Oscilloscopes—Cathode-Ray.
96 Radio Frequency Test Equipment.

Always consult the pink pages at the start of the Directory of firms, for a terminology cross-index, or to find products by name. The pink pages list more than 500 products by name, as well as under the product groups. Page numbers are given for speed.

88. Audio Frequency Test Equipment.

5. Beat frequency oscillators
10. Distortion & noise analyzers
15. Intermodulation meters
20. Output power meters
25. RC oscillators
30. Spectrum analyzers
35. Square wave generators
40. Voltmeters-audio frequency

SKL PRECISION INSTRUMENTS
FOR YOUR MEASUREMENT PROBLEMS

• QUALITY • ACCURACY • EASE OF OPERATION

VARIABLE PRECISION FILTERS: SERIES 300

All SKL Series 300 precision variable electronic filters are designed to have responses identical to constant k-pi section filters. The filters have 18 db per octave per section attenuation in the rejection band. Max. attenuation 36 db per octave for Models 302 and 306.

MODEL	FUNCTION	CUT-OFF FREQUENCY RANGE	ACCURACY
300	Hi or low pass	20 cps to 200 kc	±3%, 20 cps to 20 kc ±5%, 20 kc to 200 kc
302	Hi or low pass Band pass & rejection	20 cps to 200 kc	"
305	Hi or low pass	2 cps to 20 kc	±3% over entire range
306	Hi or low pass Band pass & rejection	2 cps to 20 kc	"

WIDE-BAND CHAIN AMPLIFIERS: SERIES 200

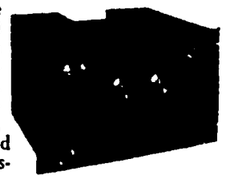
Broad bandwidth, short rise time, stable gain, and linear phase shift make SKL Chain Amplifiers ideal for amplifying either continuous wave signals or pulses. Each model comes complete with a regulated power supply.

MODEL	BANDWIDTH	GAIN	APPLICATIONS
202C	1 kc - 210 mc	20 db	Pre-amplifier
200B	1 kc - 210 mc	10 db	Phase Inverter
214B	200 cps - 100 mc	30 db	Pulse Amplifier for C.R.T.
212A TV	40 mc - 225 mc	21 db	TV Distribution Systems

504 SQUARE WAVE GENERATOR

A rise time of .03 microseconds and a wave form without tilt or overshoot characterize the performance of this moderately priced instrument. The Model 504 Square Wave Generator has a frequency range from 0.5 cps to 1 mc in eight steps. The output voltage is continuously variable from 0 to 11 volts peak to peak. The unit comes complete with its own regulated power supply.

503 PULSE GENERATOR



Provides a rectangular pulse shape with a rise time of less than 1 millimicrosecond. Pulse width is varied by changing length of external cable; minimum pulse width less than 1 millimicrosecond while maximum pulse width is unrestricted. Pulse repetition rate is variable from 50 to 150 pps. The pulse output voltage is continuously variable up to 150 volts; either positive or negative. Output impedance is 50 ohms. The Model 503 Fast Rise Pulse Generator is a convenient instrument for testing the response of any wide-band network.

600 CATHODE RAY INDICATOR

Designed to utilize the high writing speed capability of the type 5XP cathode ray tube in applications too advanced or special for standard oscilloscopes. In conjunction with the Model 610 Sweep Generator writing speeds up to 500 centimeters per microsecond may be observed. Conveniently mounted on the front panel are positioning, intensity, focus, and astigmatism controls.

610 SWEEP GENERATOR

Provides continuously adjustable sweep speeds of from 0.05 to 500 centimeters per microsecond for a C.R.T. or other applications requiring a linear, rapidly-rising voltage. Used with the SKL Model 600 Cathode Ray Indicator, ignition voltages, lightning, dielectric breakdown and other very fast pulses may be displayed in detail.

WIDE-BAND TELEVISION DISTRIBUTION SYSTEM: SKL manufacturers complete T.V. distribution systems for community, apartment house, and industrial use. Details upon request.

PHAZOR Pat. Pend. PHASE METER MODEL 200A

$349.50 F.O.B. New York, N. Y.

Measures phase shift in transformers, amplifiers, filters, and phase displacement networks.
- Measures from 0 to 360 degrees.
- Readings not affected by noise and harmonics.
- Phase shifts of the order of .01 degree can be measured employing special circuit techniques.
- Measures in-phase and quadrature components separately.

SPECIFICATIONS

Accuracy—Basic accuracy plus or minus 2 degrees. Plus or minus 1 degree due to meter error.
Noise and Harmonic Rejection—40 db. down
Sensitivity—6 millivolts full scale
Maximum Input Voltage—125 volts RMS
Peak Input Signal—400 volts
Frequency Range—20 to 20,000 cps.
Input Impedance
High Gain—2.0 megohm shunted by 25 mmfd.
Low Gain—2.5 megohm shunted by 10 mmfd.
Reference Input Impedance—4000 ohms
Power Supply—105 to 125 volts, 60 cps., 25 watts
Dimensions—Length 15 in., Hgt. 9 in., Depth 8 in.
Weight—25 pounds

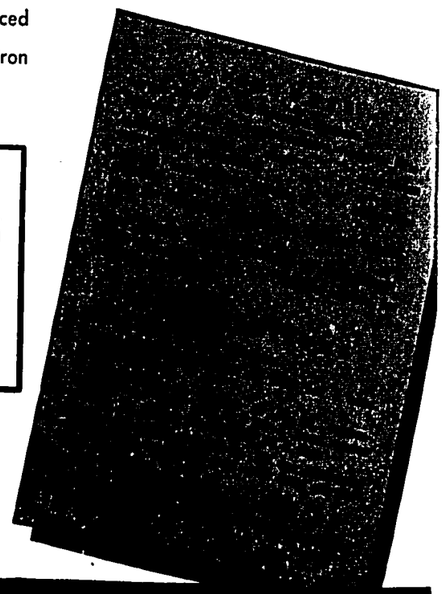
VECTRON'S MICROWAVE

Spectrum Analyzer

SPECIFIC BAND COVERAGE AT THE OPERATING FREQUENCIES YOU NEED

Interchangeable R. F. Heads save expense . . . save space Vectron's Spectrum Analyzer with interchangeable R. F. Heads eliminates the extra cost and bulk of equipment which covers large areas in bands you never use

No conversion or adaptation Every Vectron R. F. Head can be placed in immediate operation, without conversion or adaptation, in the Vectron SA10 or SA20 Spectrum Analyzer Chassis



For Microwave Radar and Communications Equipment The Vectron SA20 Spectrum Analyzer presents visually the frequency distribution spectrum of the power output of pulsed or CW microwave oscillators and can be used as a sensitive RF detector for checks and measurements in the design, production and maintenance of microwave radar and communications equipment and components

Vectron's New OSCILLATRON
The new self-contained; self-powered crystal controlled transistor oscillator.

Shut RADIO INTERFERENCE "IN" OR "OUT"

Nine out of 10 screen rooms used in meeting today's exacting specifications were made by ACE!

These sturdy shielded enclosures provide a GUARANTEED attenuation of 100 db from 0.15 to 1,000 megacycles and to closely approach this attenuation at 10,000 mc. They are ideally suited for keeping "background" radio interference influence from affecting sensitive R-F measurements or for shielding equipment that would otherwise cause serious radio broadcast or TV noise.

Features include low R-F impedance door design; complete facilities for power, water, gas, air conditioning or ventilation service entries; access doors; "cell type", single screen or solid shield and many others.

Installed in a few hours!

Ace rooms are supplied in pre-built sectional form for quick, easy erection. They can readily be enlarged or relocated.

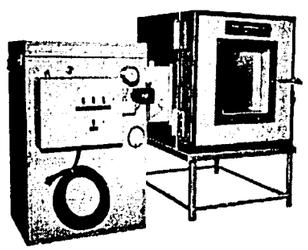
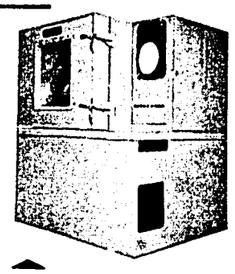
FOR ACCURACY TEST WITH Tenney

. . . For Tenney Test Chambers are precision-engineered for maximum efficiency and can be designed to simulate the complete range of temperature, atmospheric or pressure conditions found anywhere on earth—or above it to altitudes of 120,000 ft. plus! They attain sub-zero temperatures quickly, maintain them efficiently and provide full instrumentation for accurate evaluation of complete test data.



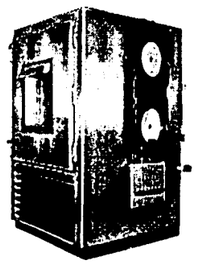
TENNEYZPHERE ALTITUDE CHAMBERS

Designed to withstand atmospheric pressure and to simulate global conditions of pressures, temperatures and humidities. Altitudes from sea level to approx. 80,000 ft. Temperature range from plus 200°F to minus 100°F. Also simulates desired (20% to 95%) relative humidity.



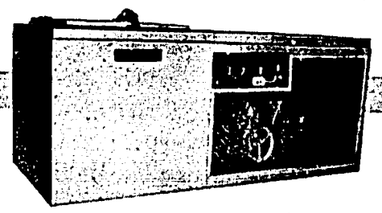
TENNEY SERVO UNIT

Portable air conditioning unit which may easily be attached to various types of laboratory enclosures —impact machines; tension machines; torsion testers; cold boxes and similar equipment. Through its use, articles undergoing testing, aging or weathering can be subjected to wide variations of humidity, heat and cold. Photo shows servo attached to companion chamber.



TENNEY TEMPERATURE AND HUMIDITY CHAMBERS

These chambers provide positive control of wet- and dry-bulb temperatures, humidity, and air circulation; and are designed for research and production testing of physical quality, fragility, tension, and all other pertinent factors, at constant conditions or on planned program cycles.



Model TR—Precision recorder controllers permit accurate simulation and check of temperatures to +200°F. Meets all Mil and JAN specifications for low- and high-temperature requirements by incorporation of temperatures down to —100°F. Humidities within 20%-95% range. Built in a variety of standard sizes.

Model TH—Specifically designed for a temperature range of +35°F to +180°F, and a humidity range of 20%-95%. Accurately simulates, controls, and checks all above-freezing temperatures. Can incorporate program control for meeting a wide variety of Mil specifications if desired. Manufactured in many standard sizes.

TENNEY SUB-ARCTIC INDUSTRIAL CABINETS

Designed for low-temperature testing of metals, radios, instruments, plastics, liquids, chemicals and pharmaceuticals. Temperature ranges of —40°F, —60°F, —95°F and —150°F are standard for each size.

PROVEN BY EXACTING LABORATORY TESTS

MINIMUM R F INTERFERENCE

EASY TO ASSEMBLE . . . and easy to take apart for storage or relocation.

LEAK PROOF DOORS Wedge shaped like refrigerator doors, to assure tight shield.

FLOOR CONSTRUCTION Standard load 140 lbs. per sq. ft. Up to 2000 lbs. available.

LINDGREN DOUBLE SHIELDED PORTABLE SCREEN ROOMS

Latest laboratory tests show up to 146 DB attenuation practically level over the entire frequency range, 15 KCS to 1000 MCS, and excellent results are had at frequencies up to 10,000 MCS . . . highest ever known!

Lindgren true double shielded portable screen rooms meet the exacting requirements set up by Industry, Armed Forces, and Laboratories. Here is a truly double shield—made in sections, easily assembled or taken down. No soldering required. Excellent metal to metal contact is made with low impedance contacting.

Don't take chances with improvised screen rooms. Get the best . . . guaranteed to meet government specifications. 10 standard sizes . . . or built to your requirements.

CML TEST EQUIPMENT PERFORMANCE

Model 1435 Variable Frequency Electronic Generator

Frequency Range: 50-6000 cps in 4 ranges

Frequency Control: Single dial, direct reading, linear scale in 4 ranges: 50-180; 170-600; 540-1800; 1700-6000 cycles.

Power Output: Nominal rating 2200 w continuous duty.

Output Voltage: The controlled output voltage is continuously adjustable from 40 volts to 140 volts. Normal performance is considered at the 120 volt RMS output where the change in output voltage from no load to full load of 2200 watts will not exceed 2%.

Waveform: The waveform varies slightly from no load to full load. At full load, the distortion is less than 7%.

Power Supply: Any 60 cycle single phase source between 208 and 260 volts capable of carrying a 5Kw. load with good regulation. A tapped auto transformer is provided to take care of this range of input voltages.

Model 1430 Electronic Generator

Similar to Model 1435 except power output is 1400 watts. Power input 3500 Watts.

Model 1100-1110 Electronically Regulated Power Supplies

Power Source: 110-115-125 volts, 50-60 cycles.

D.C. Power Output: 200 ma. from 225 volts to 300 volts. 180 ma. from 300 volts to 320 volts.

Total noise content in output is less than 5 millivolts. Regulation: less than 1 volt change from no load to full load. Unregulated heater supply 6.3 volts at 5 amperes.

Model 1130 Regulated Power Supply

Power Input: 105 to 125 volts, 60 cycles.

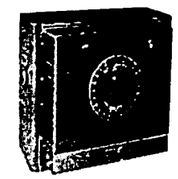
D.C. Output: 210 volts to 310 volts 0 to 400 ma.

Regulation less than 1% from no load to full load at 310 volts. Below 270 volts at any load, or below 300 ma. load at any voltage, regulation is better than 1 volt.

Total noise content in output does not exceed 10 millivolts at 310 volts-400 ma. at any load below 270 volts or at any voltage below a 300 ma. load noise output is less than 5 millivolts.

Model 1420 Variable Frequency Electronic Generator

Frequency Range: 50-6000 cycles in 4 ranges. 50-180; 170-600; 500-1800; 1700-6000 cps.



Power Output: 300 watts continuous duty.

Maximum distortion at full output into resistive load less than 5%.

Regulation no load to full load within 2%.

Nominal regulated voltage output 80-120-135-215-255 or 270 volts.

Power input 115 volts 60 cycles 1 Kw.

Model 1010 Rotobridge

Automatic Inspector For Production Line Testing.

Checks equipment for opens or shorts in wiring. Checks tolerance of resistors at 5%, 10% or 20% as required.

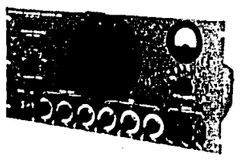
Resistance Test Range: 200 ohms to 2 megohms at 5%. Tests smaller and larger values at 10%.

Tests one circuit per second, up to 119 circuits in one cycle PROVIDES NUMERICAL indication of every defective circuit.

Model 1210B Stroboscope

Stroboscope lamp mounted in small probe.

Range 480 to 60,000 rpm in 4 ranges individually calibrated on fundamentals 80-1000 cycles.



Vibrating reed for calibration.

Accuracy of reading better than 1%.

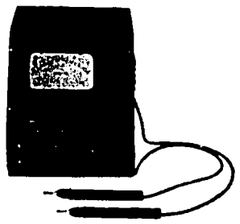
Overall maximum departure from calibration less than 3%.

Power Supply requirements: 105-125 volts, 50-60 cycles.

Model 1440 Three Phase Oscillator

Model 1440: Three Phase Oscillator Frequency Range 17 to 17,000 cycles. One, two or three-phase output.

Phase relationship of all phases adjustable through 360 degrees rotation.



Model 1135 Regulated Power Supply

Power Input: 105-125 volts, 50-60 cycles.

Output #1: 0-200 ma from 0-170 volts; 160-300 volts in two ranges. Noise less than a millivolt.

Output #2: Regulated "C" bias 0-100 volts.

Output #3: Unregulated 6.3 volts 5 amp. ac.

MODEL 1515 MEGOHM METER

Range: 0.4 to 100,000 megohms in 5 over-lapping ranges.

Accuracy: Better than 5% on all ranges at all points on the scale.

Guarding: The instrument is efficiently guarded on all ranges so that atmospheric conditions do not affect its accuracy.

SHIELDING ROOMS

PROVEN . . . the best shielding available over the major portion of the Spectrum in use today . . .

Attenuation characteristics approaching the ultimate, jig-precision sectional construction, and superior set-up flexibility have won top rating for MULTI-CELL® Shielding rooms with military, industrial and scientific organizations. Their better performance, under the most difficult of field conditions, has been thoroughly proved and fully recorded for the information of engineers with shielding problems. Consultation available anywhere — without obligation.

JAN-I 225. 16E4 (Ships), MIL-I-16910,* MIL-S-4957

Specifications fully met, in addition to all others for electrical and electronic equipment performance in research, development and production. Attenuation Min. 100db from .15 to 10,000 MC. Room sizes and types as required.

**Standard, approved Military specifications for shielding rooms.*

Greatly increased manufacturing facilities and personnel now enables us to give PROMPT SERVICE and FAST DELIVERY anywhere.

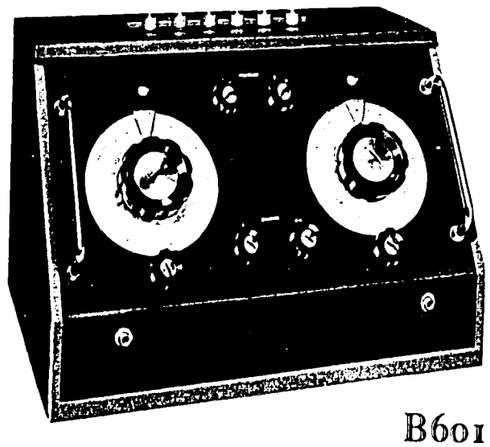
Code number at end of each address refers to product or service sub-classifications listed at the head of the major classification.

True
BRIDGE MEASUREMENT
up to 250 mc/s

B901

FOR UNBALANCED MEASUREMENT IN THE RANGE 50-250 Mc/s.



Provided with a co-axial outlet to which various types of plug and socket can be fitted by means of adaptors. As with other bridges in this series, the difficulties associated with large standard elements in the bridge circuit are avoided by the use of transformer coupling between the unknown and standard.

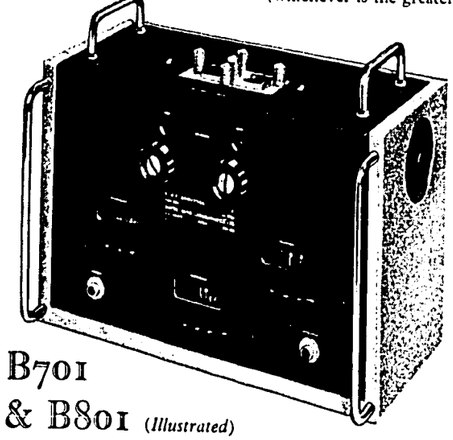
Specification

Susceptance:	Equivalent to ± 75 pfd.
Conductance:	0 - 100 millimhos.
Accuracy:	Susceptance: ± 2% or ± .5 pfd.
	Conductance: ± 2% or ± 0.2 millimho (whichever is the greater)

ARANGE of bridges for use with external source and detector in the measurement of antennas, cables, feeders, and a variety of components and materials. Built to conform with the exacting standards of the British Broadcasting Corporation and the General Post Office, these bridges use the transformer ratio arm technique. They have therefore the unique advantage of the extreme stability at all frequencies resulting from low impedance to ground and between terminals at balance. Calibration is independent of frequency and is in terms of conductance and positive or negative capacitance. Both balanced and unbalanced impedances can be measured up to 100 Mc/s.

★ *These bridges are distributed in the U.S.A. by Marconi Instruments Ltd., 23-5 Beaver Street, New York, 4, N.Y. HAnover 2-0197-8 and in Canada by the Canadian Marconi Company, 2442 Trinton Avenue, Montreal 16. Atlantic 9441.*

B601



FOR MEDIUM FREQUENCIES

Developed by Wayne Kerr in collaboration with the B.B.C. Research Department, this bridge is a highly accurate and versatile hand-calibrated laboratory instrument. In addition to the measurement of resistance capacitance and inductance, it will measure complex impedances, balanced or unbalanced, and the impedance between any pair of terminals in a three-terminal network.

Specification

Capacitance range:	0.01 pf to 20,000 pf.
Resistance range:	10 ohms to 10 megohms.
Inductance range:	0.5 uH to 0.05 H.
Operating frequency:	15 Kc/s to 5 Mc/s.
Accuracy:	1% over major part of range.

A RANGE OF V.H.F. STANDARDS OF CAPACITANCE, INDUCTANCE AND RESISTANCE HAS BEEN DEVELOPED FOR THESE BRIDGES IN COLLABORATION WITH THE TECHNICAL RESEARCH ESTABLISHMENT AND THE MINISTRY OF SUPPLY. THESE ARE AVAILABLE TO SPECIAL ORDER.

B701
& B801 *(Illustrated)*

FOR BALANCED OR UNBALANCED MEASUREMENTS IN THE RANGE 1-100 Mc/s.

SPECIFICATION

Susceptance:
B.701 — Equivalent to ± 80 pfd.
B.801 — Equivalent to ± 230 pfd.
Accuracy — ± 2% or ± .5 pfd.
Conductance:
B.701 — 0 - 100 millimhos.
Accuracy — ± 2% or ± 0.02 millimho.
B.801 — 0 - 100 millimhos.
Accuracy — ± 2% or ± .1 millimho.

Covered by B.B.C. Patent No. 566970 and Wayne Kerr Patents No. 642617 (U.K.) and 2589535 (U.S.A.). (Other patents pending).

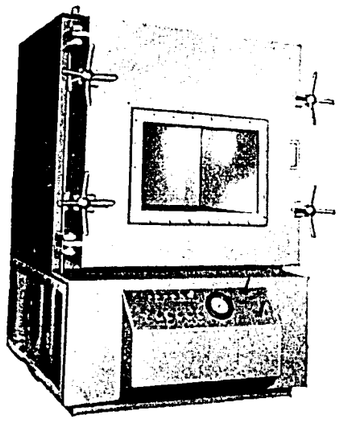
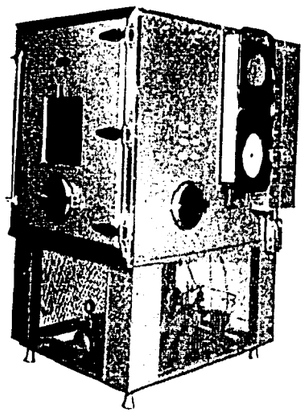
Wayne Kerr



NEW MALDEN · SURREY · ENGLAND

M & M TEST CABINETS
COLD TEMPERATURE . . . HUMIDITY . . . ALTITUDE SIMULATION

A Complete Line . . . SIZES for Every Requirement

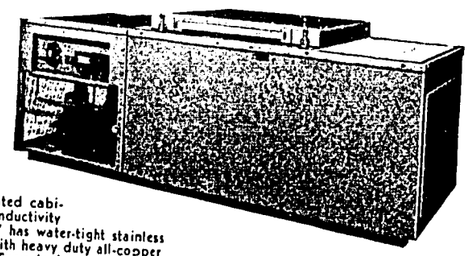


ALTITUDE SIMULATION CHAMBER

- Altitude Range to 120,000 feet
- Temperature Range from 300° F. to —140° F.
- Micrometer Temperature Adjustments hold ±2° F.
- Compact Design . . . Requires less Floor Space
- Humidity Cycle available

Providing extreme flexibility in temperature and vacuum ranges, M & M Altitude Simulation Chambers give you precise control and easier, simpler operation that will reduce test costs considerably. Custom-quality built in every detail, M & M Chambers are designed to meet Government altitude simulation test standards. Available with many optional features to speed testing, such as Program Heating, Cooling, and Humidity Cycles, Automatic Recorder for controlling and integrating temperature, humidity and altitude.

HUMIDITY TEST CABINET
for Laboratory or Production Testing



- Built-in refrigeration and condensing systems provide FAST TEMPERATURE and HUMIDITY changes. (Supplies Relative Humidities between 20% and 90%—Temperatures +35° F. to +185° F.)
- Close Control of humidity and temperature ratios
- 27 cu. ft. working space
- Hermetically sealed refrigeration unit—Extra capacity condenser system
- 6 electrical leads in work space for fast, easy connections
- Forced air circulation—glass viewing panel

Built-in humidification, heating and refrigeration systems provide fast, accurate humidity testing . . . quick temperature rise or pull-down and minimum condensation on material being tested. Individual and/or interlocked control of temperature, humidity and cooling provide flexibility to meet any need.

Optional equipment includes time control system for pre-setting dry and wet bulb temperatures for automatic variation of relative humidity. Cabinets are laboratory tested and shipped ready for operation.

LOW TEMPERATURE CHESTS FOR HEAVY DUTY USE

- Ranges to —140° F.
- Hermetically Sealed Refrigeration Units
- Micrometer Adjustment Maintains Temperature to ±2° F.
- Automatic overload protection
- 9 Standard Models
- Heating Cycle Available

Model LTP—10-150 has heavily insulated cabinet packed with extra thick, low-conductivity insulation. Test space 33" x 26" x 20" has water-tight stainless steel liner refrigerated on four sides with heavy duty all-copper coil welded for trouble-free service. Snap locks positively seal double-gasket on counterbalanced lid. Vibration eliminators on all tubing. Recessed controls are placed for convenience and accessibility. Designed for long, trouble-free service—manufactured to insure dependable low cost operation.

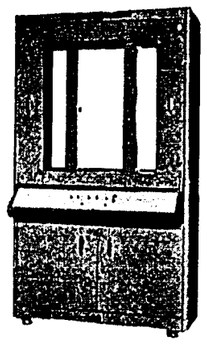
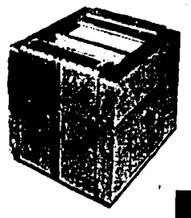
WRITE EAI

FOR



PRECISION ANALOG COMPUTER

Precision Analog Computer



Designed to meet the demand for a highly accurate, dependable, and versatile general-purpose analog computer for solving problems in dynamics for industrial, research, educational, and military groups. Features a new high-gain, low-drift, contact-stabilized d-c amplifier with outstanding frequency response and power output characteristics; centralized operation from a control console which houses the problem board and its bay, attenuators, initial condition potentiometers, limiters, and other operating controls; precision network components contained in a controlled environment to insure reliable and accurate performance; a grounded 1800 position problem board which confines all terminal leakages to ground.

FOR

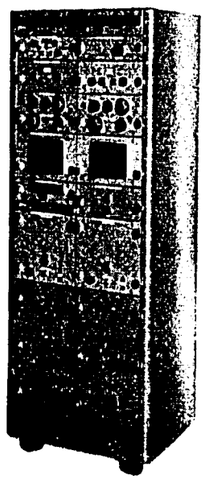
VARIPLOTTER MODEL 205J

Variplotter - MODELS 205G and H

VARIPLOTTER MODELS 205G AND H

A self-balancing potentiometer type recorder designed to record one variable d-c voltage as a function of a second variable d-c voltage. Model 205G is a single pen board that will present a single X vs. Y plot. Model 205H has an additional arm and pen allowing it to record two independent sets of X vs. Y data simultaneously. Static error is .05 per cent of full scale at 70 degrees Fahrenheit. Dynamic error averages .05 per cent of full scale plus the static error. Standard sensitivity is 50 millivolts per inch or 1.5 volts for full scale deflection of 30 inches. Maximum writing speed is 8-½ inches per second. Continuously variable uncalibrated scale factor and parallax controls are provided for each axis.

Variplotter - MODEL 205J



Essentially the same characteristics as the Models 205G and H described above except that the plotting surface is vertical. The plotted result, in the form of an inked line, is presented on a 30 inch square of paper which is held firmly to the plotting surface by a unique vacuum system. Static error is .05 per cent of full scale at 70 degrees Fahrenheit and dynamic error average .05 per cent of full-scale plus the static error. Maximum writing speed is 8-½ inches per second. Standard sensitivity is 50 milli-volts per inch or 1.5 volts for full-scale deflection of 30 inches. Where floor space is limited, the MODEL 205J Variplotter is recommended for your recording needs such as analog computer output, guided missile data, engine performance, etc.

Digi-Verter Group - TYPE 17-31A

FUNCTIONAL POTENTIOMETERS

The Digi-Verter can be used to convert digital information, such as that obtained from card reading machines or tabular lists, into analog form suitable for presentation as a point plot on a Variplotter plotting board. It is designed to accept two four-decimal digit numbers and their signs from an IBM machine such as Type 513, 517, 519, 523, etc. Complete operating controls include power switch, feed switch, input switch, storage clear, and scale factor and parallax controls for both X and Y. Scale factor will provide plot expansion up to 10 times and parallax controls allow the zero-zero origin to be located anywhere on the plotting surface. The complete digital plotting system consists of the Digi-Verter, Data Input Keyboard, Model 205G Variplotter plotting board

DIGI-VERTER GROUP TYPE 17-31A

Functional Potentiometers

There are two models of sine-cosine potentiometers available—Type 462 which is a single unit and Type 315 which provides two sets of sine-cosine functions. Accuracy, is within .15% of the theoretical voltage for all points throughout 360° of shaft rotation. Angular resolution is .005% of 360° and electrical resolution, expressed as a percentage of the total voltage applied across one 90 degree quadrant is with .05%.

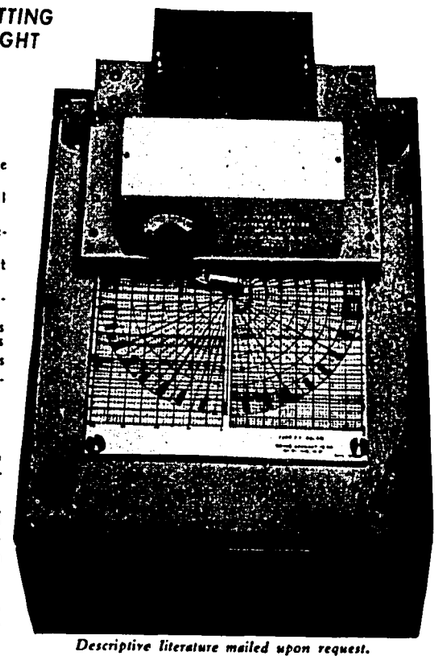
MODEL PFR **POLINEAR RECORDER**

FOR AUTOMATICALLY PLOTTING both ANGULAR and STRAIGHT LINE functions on either POLAR or RECTILINEAR coordinates in any COMBINATION . . .



- Records both AC and DC voltage levels
- Designed for STANDARD 8½ × 11 chart sheet
- POLAR and LINEAR turntable movement
- TURNTABLE instantly set to any chart position
- Auxiliary Electrical linkage for synchronizing to turntable motion:
  Oscillators Rotational Devices
  Test Turntables Analyzers
- Interchangeable range potentiometers
- Dependable and service free operation

Typical applications:

Beam Pattern Plotting of antennas, microphones, loudspeakers, lighting fixtures, ultrasonic devices;

Frequency Response Records of microphones, loudspeakers, amplifiers, Filters, Radio and television circuits;

Rectilinear Curves on vacuum tubes, potentiometers, amplifiers, counting and computing devices.

Descriptive literature mailed upon request.

It's VERSATILITY that sells SANBORN in the field of Industrial Recording

As indicated by references at the right, you may have a choice of five different instruments (A) for quick and convenient standard rack mounting in the system at A_1, PLUS a choice of up to four of any of the three different type amplifiers (B) or any combination of these amplifiers

with the

SANBORN
FOUR-CHANNEL
OSCILLOGRAPH RECORDING SYSTEM
(MODEL 67)

A

DC PREAMPLIFIER

AC PREAMPLIFIER

DC CONVERTER—for low level DC recording such as thermocouple output.

TRIPLEXER—when coupled to a DC amplifier permits the recording of three events in one channel.

THRESHOLD MONITOR provides means for the control of voltage levels or rate of change.

B

DC (General Purpose) AMPLIFIER

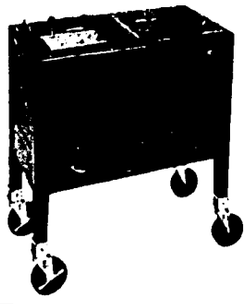
STRAIN GAGE (Carrier) AMPLIFIER

SERVO MONITOR AMPLIFIER—a phase discriminating AC amplifier used in servo design and testing.

As shown in the diagram, removing or interchanging any of the amplifiers or other instruments is simply a matter of sliding the unit in or out of the mounting rack where contact is made automatically by plug-in connectors. Screws at the four corners of the panel hold the instrument in place.

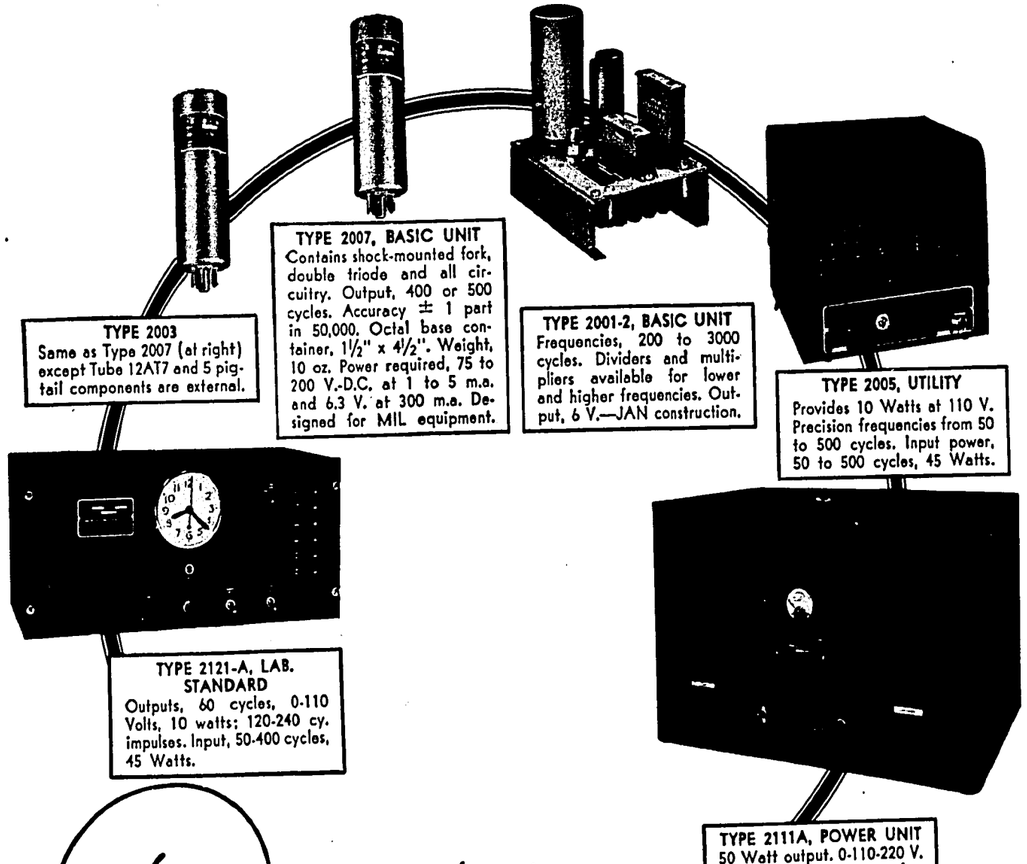
Other features of this system which add to Sanborn VERSATILITY are the choice of eight paper speeds—50, 25, 10, 5, 2.5, 1.0, 0.5 and 0.25 mm/sec, and the use of either 4-, 2-, or 1-channel recording paper.

And, of course there are these popular Sanborn advantages: a high torque movement (200,000 dyne cms per cm deflection), direct *inkless* recording in *true rectangular coordinates*, and provision for code and time markings.



Sanborn Recording Systems may be used to record any one or more of a wide variety of phenomena whose characteristics range from static to 100 cycles per second. If your recording problem is not one which can be solved by standard Sanborn equipment, our engineers will be glad to suggest ways in which modifications of it may suit your requirements.

A complete catalog of Sanborn Industrial Recording Equipment will be sent gladly on your request.



SANBORN COMPANY
CAMBRIDGE 39, MASS.

SANBORN 1-, AND 2-CHANNEL RECORDING SYSTEMS

One channel Model 128/141 above and two-channel Model 60 at right both incorporate Sanborn recording advantages which include interchangeability of amplifiers and (with Model 60) preamplifiers.

Precision FREQUENCIES

GUARANTEED ACCURACY
1 PART IN 100,000 (.001%)
except where otherwise noted

The basis of these frequency standards is an electronically actuated high-precision fork, temperature-compensated and hermetically sealed against barometric changes. The partial list of uses at the right not only suggests the broad range of applications but also proven dependability where there can be no compromise with accuracy. Please request details by Type No. Our engineers are available for advice or cooperation on related problems.

MICROWAVE TEST EQUIPMENT
and Component Parts

Our design and production experience is available for your special requirements, in waveguide or coaxial line, in the frequency range 1000-40,000 mcs.

Illustrated are typical pages from our complete catalog—copies of which are available upon request.

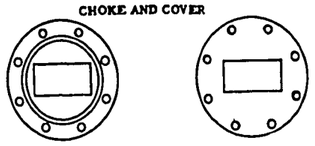
ADAPTER, COAXIAL TO WAVEGUIDE

MODEL 101

Model No.	Waveguide Type	Waveguide Size	Frequency kmc.	Max. vswr	Flange Type	Dimen.-Inches A	B	C
101L	RG-69/U	6.66x3.41	1.12-1.70	1.50	UG-417	4.50	2	4.25
101S	RG-48/U	3 x 1.5	2.6-3.95	1.35	UG-53	3.50	2.62	3.25
101C	RG-49/U	2 x 1	3.95-5.85	1.35	UG-149	2.75	2	1.87
101A	RG-50/U	1.5x.75	5.85-8.2	1.50	UG-344	2.37	1.87	2
101B	RG-51/U	1.25x.62	7.05-10.0	1.35	UG-51	2	1.62	1.50
101X	RG-52/U	1 x .50	8.20-12.4	1.35	UG-39	2	1.62	1.75

APPLICATION: Couples waveguide and coaxial lines together.

MATERIAL: Brass; beryllium copper and polystyrene.



PLATING: Silver-.0002 to .0004 inches thick; rhodium flash.

FINISH: External surfaces - gray enamel paint.

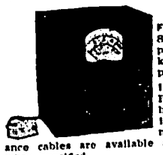
DOUGLAS MICROWAVE Co., Inc.

338 EAST 95th STREET NEW YORK 28, N. Y. • TRafalgar 6-6095

TYPE 302 CONTINUOUSLY VARIABLE DELAY LINE



Time Delay: Continuously variable from zero to 0.6 microsecond.
Impedance: 080 ohms nominal.
Rise time: Less than 10% of time delay at any point.
Construction: Distributed parameter.
Overall size: 4" x 12" x 12". **Price: $88**

TYPE 506 MINIATURE CONTINUOUSLY VARIABLE DELAY LINE

Time Delay: Continuously variable from zero to 0.25 microsecond.
Impedance: 190 ohms nominal.
Rise time: Less than 10% of the time delay at any point.
Construction: Distributed parameter.
Overall size: 1" x 4" x 4". **Price: $59**

Type 202 VECTORLYZER

Frequency Range: 8 cps to 3 mc through panel binding posts, 20 kc to 300 mc through probe.

Input Impedances: Probe—2.5 uuf shunted by 100,000 ohms, coaxial arrangements for matching low impedance cables are available and will be furnished when specified. Binding Posts—16 uuf shunted by one megohm.

Voltage Range: Binding Posts—0.06, 0.6, 6, 60, and 600 volts full scale. Probe—0.6, 6, and 60 volts full scale.

Phase Angle Range: 0-180, and 180-360 degrees, ranges with better angular sensitivity can be obtained through panel adjustment.

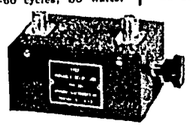
Accuracy: ± 2% through panel binding posts, ± 1 db through probe for phase angle measurements.

Power Supply: 115 volts rms ± 15%, 50-60 cycles, 80 watts.
Price: $445

Type 404A PHASE METER

Frequency: External indicator —100 kc to + 0 cps. Panel Meter—100 kc to 0.001 cps.

Range: 36°, 90°, 180°, and 360° full scale phase lead or lag.



Input voltage: 0.8 to 300 volts from + 0 cps to 10 kc, then the lower limit increases slowly up to 1 volt at 100 kc; better sensitivity can be obtained through panel adjustment.

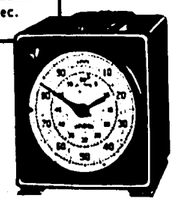
Accuracy: ± 1% or one degree from + 0 cps to 10 kc, then increases slowly up to 4% or four degrees at 100 kc with external indicator; an additional error of + 1.5% at any operating frequency with panel meter.

Waveform: Any symmetrical or unsymmetrical periodic waveform does not affect the accuracy of the instrument.

Input impedance: One megohm shunted with 10 uuf on the "Cathode Follower" input, and 24,000 ohms shunted with 25 uuf on others. **Price: $586**

TYPE 601 STEP VARIABLE DELAY LINE

Time Delay: Variable in step of 0.2 microsecond up to 2.2 microseconds.
Impedance: 190 ohms nominal.
Cutoff frequency: 0.2 mc nominal.
Construction: Lumped parameter.
Overall size: 3" x 3" x 5".
Price: $124



ADVANCE ELECTRONICS CO.

P. O. Box 394, Passaic, N. J.

STANDARD TIMERS

AN ECONOMICAL INVESTMENT IN LONG-LIFE PERFORMANCE AND EXTREME ACCURACY. RUGGED, FOR HEAVY-DUTY SERVICE; FLEXIBLE IN APPLICATION.

Model	Scale Divisions	Totalizes	Accuracy
S-100	1/5 sec.	6000 sec.	±.1 sec.
S-60	1/5 sec.	60 min.	±.1 sec.
SM-60	1/100 min.	60 min.	±.002 min.
S-10	1/10 sec.	1000 sec.	±.02 sec.
S-6	1/1000 min.	10 min.	±.0002 min.
S-1	1/100 sec.	60 sec.	±.01 sec.
MST	1/1000 sec.	.360 sec.	±.001 sec.
MST-500	1/1000 sec.	30 sec.	±.002 sec.

The clutch coil can be connected directly in the plate circuit of electronic tubes. For this use the coil has a resistance of 2000 ohms and requires 50 to 60 milliamperes. When ordering for this purpose, always specify 120V DC clutch coil.

Browning

TEST EQUIPMENT

●

Oscillosynchroscope ON-5 A/X

Low-priced instrument satisfies requirements for basic laboratory equipment to be used in pulse work. Sweep writing rate continuously variable over a wide range; broad frequency coverage; high sensitivity; self-calibrating on the X and the Y axis. Prices: ON-5A $485.00
ON-5X (with video delay) ..$535.00

Klystron Power Supply TVN-11

Well-regulated, low-ripple-content, power supply provides all necessary voltages for operation, modulated or unmodulated, of small Klystrons and other low-power reflex tubes. Internal modulator for square-wave or saw-tooth modulation. Internal metering for critical currents and voltages. Price $325.00

Standing Wave Ratio Amplifier TAA-16B

May be operated broadband or selective between 500 and 5000 cycles. Protective circuits prevent burnouts of bolometers and crystals. Output may be fed to meter or d-c recorder. Price $365.00

FM Modulation Monitor MD-33

Checks modulation for compliance with F. C. C. regulations. Complete coverage 25-174mc in two bands; no crystals or plug-in coils. Meter shows swings up to 20 kc. Flasher shows excessive voice peak modulation. Price $335.00

—AND OTHER PRECISION ELECTRONIC DEVICES.

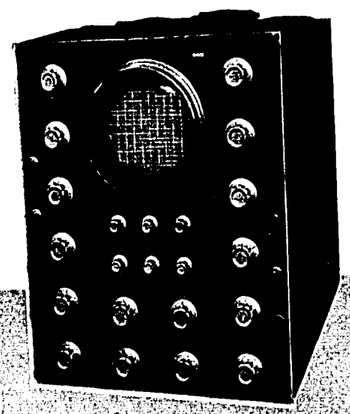
●

Browning

TUNERS

For the HI-FI listener . . .

Model RV-31 . . .



. . . FM tuner with selectable AFC, cathode-follower output, audio inputs for PHONO, TV, and RECORDER, self-contained power supply. Net price $99.50

Model RJ-42

. . . FM/AM tuner engineered for use with the modern, full-control amplifier. Only two controls—one for tuning and one to select OFF/AM/FM with AFC/FM. Built-in power supply. Net price $166.50

The right bandwidth for your work

DC to 5 MC
5 cycles to 10 MC

These 2 Browning 'scopes give you these valuable features

Model OA-16 . . . an extremely versatile instrument having d.c. amplification with extended high-frequency response and sweeps ranging from seconds to microseconds.

FEATURES

- Bandwidth—from d.c. to 5 megacycles
- Deflection sensitivity—50 peak-to-peak millivolts per inch
- Internal provision for balancing out d.c. components
- Trace position remarkably independent of line voltage
- Sweep speeds 0.4 μsec. per cm. to 1 sec. per cm.
- All sweeps below fastest range expandable 5 times for detailed examinations
- Sweep may be recurrent, or triggered by positive or negative external pulses or by vertical amplifier signals.

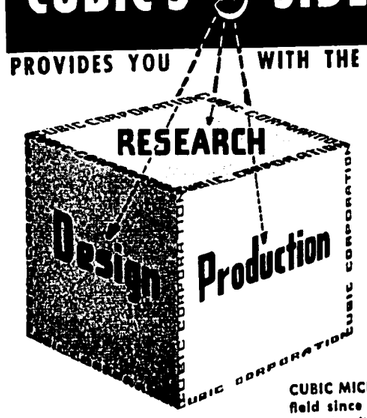
Model OL-23 . . . combines the functions of an oscilloscope and a synchroscope for observing repetitive phenomena or single transients. Broadband amplification, fast sweeps, and high beam-accelerating potential make this 'scope particularly desirable in observing and measuring steep wavefronts and fast pulses.

FEATURES

- Bandwidth—from 5 cycles to 10 megacycles
- 4000-volt accelerating potential
- Sweeps expandable up to the maximum writing rate of the sweep circuits
- Fast sweeps—to 0.1 μsec. per cm.
- Step-controlled attenuation continuously adjustable between steps
- Calibration accurate to 5%
- Sweep delay ranges of 100, 1000, and 10,000 μsec.

Each instrument is contained in a blower-cooled steel case 13¼" wide, 15¾" high, and 22" deep. Case and panel are finished in green, with knobs and markings in frosted aluminum. Prices, complete with tubes:

Model OA-16 .....$745.00
Model OL-23 .....$890.00



Prices are net F. O. B. Winchester, Massachusetts

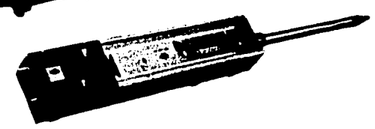
CUBIC'S 3 SIDED COVERAGE

PROVIDES YOU WITH THE WORLD'S FINEST

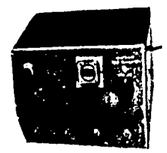
- **ELECTRONIC INSTRUMENTS**
- **TEST EQUIPMENT**
- **MICROWAVE & RADAR COMPONENTS**

CUBIC MICROWAVE ENGINEERS—specialists in the field since the inception of Radar in World War II—start with electronic problems and ideas, and convert them into the most accurate precision-built electronic instruments and equipment! We welcome inquiries—not only in connection with our rapidly developing list of products—as represented below—but on ideas, problems, or design of microwave assemblies of your own specification you may want developed and produced.



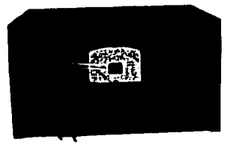
MICROWAVE CALORIMETRIC WATTMETER

portable . . . for lab and field use . . to measure absolute microwave power.



Frequency Range: 2600 MC to 26500 MC
Max. VSWR: 1.1
Max. Peak Power: 600 KW

COAXIAL CALORIMETRIC WATTMETER



Frequency Range: 200 MC to 3000 MC—Max. VSWR: 1.5 over range—Max. Peak Power: 1⅝" Coaxial rating

MICROWAVE (X-BAND) PULSE MEASURING WATTMETER

for measuring peak power of microwave pulses from signal generators or radar systems.

ELECTRONIC DIRECT-READING PHASE METER

Frequency Range: 20 to 50,000 cycles 0-360 degrees

Shown at left are a few of our standard microwave components available as catalog items. Special purpose wave guide assemblies designed to customer's specs can also be produced.

SUPERIOR PERFORMANCE

On 3 Cycles to 20 Megacycles

The **LA-239 C** Oscilloscope

DATA

1. Wider Bandwidth: Complex waves from 5 Cycles to 15 Megacycles. Sine waves from 3 Cycles to 20 Megacycles.

2. Extended Sweep Frequencies: Linear from 10 Cycles to 20 Megacycles internally synchronized. Triggered sweep, from single random impulses to irregular pulse-intervals up to as high as 6 Megacycles.

3. Square Wave Response: Rise time 0.042 Microseconds; only 5% droop on flat-topped pulses as long as 30,000 Microseconds duration.

4. Greater Stability: Electronically regulated power supplies throughout to maintain accuracy and constant operation under varying line conditions or line surges. You can display surges on the line from which Model LA-239C is being powered without distortion of the trace!

5. Higher Signal Sensitivity: Maximum sensitivity without Probe: 10.4 millivolts. With Probe: 100 millivolts. (Maximum signals, 125 V. Peak and 450 V. Peak respectively.)

6. Timing Markers: Interval Markers of 0.2; 1; 5; 20; 100; 500; or 2,000 Microseconds may be superimposed on the trace for the accurate measurement of the time base.

7. Voltage Calibration: Signal amplitude is compared against a 1,000 cycle square wave (generated internally) the amplitude of which is controlled by a step-and-slide attenuator calibrated in peak volts. (A jack is provided to deliver 40V Peak for use in calibrating other instruments.)

8. Sweep Delay: Any portion of the sweep longer than a 10 Microsecond section may be expanded by 10:1 for detailed study of that portion of the signal.

9. Power Source: 110 to 130 V AC; from 50 to 1,000 cycles. 295 Watts. (Fused at 4 Amperes.)

10. Dimensions: In Bench Cabinet: 19½ in. Wide; 15¼ in. High; 16¾ in. Deep. In Rack Mounting (With cabinet removed to fit standard relay rack): 19½ in. Wide; 14 in. High.

THE LAVOIE MODEL LA-239C has been designed to surpass the high performance of the TS-239A/UP, which has been the standard test oscilloscope for the Armed Services since its introduction. Model LA-239C is the result of a long period of research and development which has included the study of new tubes, new circuits, and new techniques. Rugged design has been combined with functional simplicity to produce an instrument as attractive as it is efficient.

To create a circuit that will produce a certain complex wave form, or study transients and pulse phenomena, no better precision instrument is available today.

Lavoie Laboratories take pride in offering this precision oscilloscope as the combination of engineering perfection and manufacturing skill.

Model 109

"Complete Radar Test Facility"

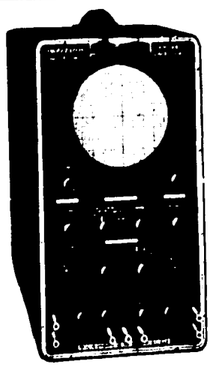
Multi-Purpose X Band Test Equipment

Spectrum Analyzer	Displays supplied spectra from 8.5 to 10. KMC on a 3" CRT
Signal Generator	Delivers CW, square wave, FM, or pulse (1, 5 or 10 μs) modulated RF, 8.5 to 10 KMC up to 25 MW
Power Monitor	Measures average power of CW or pulsed RF, external or internal, from 8.5 – 10.5 KMC
Frequency Meter	Measures applied RF from 8.5 – 10.5 KMC to .1% accuracy.

All major units plug in, 17" x 10½" x 13". 45 lbs.

Century Electronics

A DIVISION OF CENTURY METALCRAFT CORPORATION — 14806 OXNARD STREET • VAN NUYS, CALIFORNIA



Code number at end of each address refers to product or service sub-classifications listed at the head of the major classification.

ENGINEERS IN INDUSTRY AND LABORATORY...

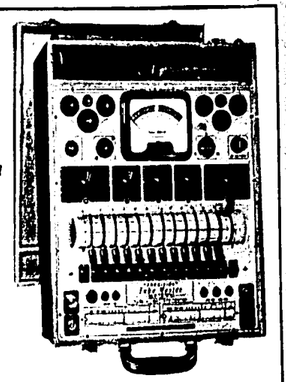
depend on **PRECISION**

ELECTRONIC TEST INSTRUMENTS... *because*

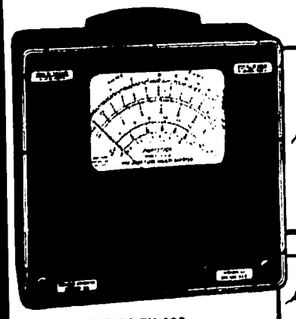
- ... **they recognize** that there is no compromise, no guesswork, behind the design and workmanship of a "PRECISION"-built instrument;
- ... **they have seen** the "insides" of the equipment, which reveals the high quality components and the infinite care given to "Precision Individualized Production";
- ... **they have learned,** over the past twenty years — in the laboratory, on the production line, in the maintenance department, that they can always look to PRECISION Test Equipment, as the standard of performance, accuracy and value!

SERIES ES-500A
High Sensitivity, Wide-Range 5" OSCILLOSCOPE
20 MV per inch "V" Sensitivity

- ★ Push-Pull V. and H. Amplifiers. 10 cycles to 1 MC response.
- ★ Frequency Compensated Vertical Input Step Attenuator.
- ★ Built-in 1 volt P-P Calibrator.
- ★ "V" phase reversing switch.
- ★ "Z" Axis Modulation Input.
- ★ All 4 Hor. and Vert. Plate Connections Directly Accessible.



Net Price.....$173.70



SERIES SP-5 . . . TEST PROBE SET
Specially engineered for use with ES-500A.
Net Price $23.50

SERIES 10-12
Electronamic TUBE MASTER
The All-Inclusive, Positive Vacuum-Tube PERFORMANCE Test, *that is not limited to Mutual Conductance alone!*

Incorporates the time-proven "Precision" ELECTRONAMIC Tube performance Test Circuit . . . plus an advanced, multiple-element, master-lever selector system. Affords the highest practical order of test results and anti-obsolescence insurance.

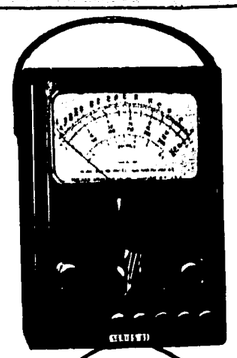
Net Price.....$107.50

SERIES EV-10A
True Zero-Center VTVM and Multi-Range Test Set
with Direct Peak Reading High Frequency Scales.

58 Ranges to:
6000 V., 2000 Megs.,
12 Amps +77 DB

Net Price.....$99.75

SERIES RF-10A
Vacuum Tube H. F. Probe
Provides direct hi-freq. peak voltage measurements with the EV-10A.
Net Price.....$14.40



SERIES TV-4
Super High Voltage SAFETY TEST PROBE
Voltage Ranges to 60,000 Volts D. C. when used with Series EV-10A
Net Price.....$14.75

SERIES 85
High Sensitivity
AC-DC CIRCUIT TESTER
(20,000 ohms per volt, D.C.)

34 Self-Contained Ranges to:
6000 V., 60 Megs., 12 Amps., +70 DB

A Compact, versatile, Test Set, Application-Engineered for modern electronic circuits AM-FM-TV
Size.....5½" x 7⅛" x 3"

Net Price.....$39.95

LC-1—LEATHER INSTRUMENT CASE
Custom-designed for Series 85. Includes a tool and test lead compartment. Genuine, top-grain cowhide.
Net Price.....$9.50

THE LO-C OSCILLOPROBE

MODEL HF-3

WHAT IT IS

The LO-C OSCILLOPROBE is a unique low capacity probe and wide-band amplifier combination having 1/5 the input capacity of the conventional accessory probe.

WHAT IT DOES

The LO-C OSCILLOPROBE transfers a signal from a circuit under observation to any oscilloscope without amplitude loss or waveform distortion.

- C Input < 2 μμf
- Z Input = 5 Meg. Ω
- 10 cps. to 10 Mcps
- .035 μs rise time
- Z Out = 60 Ω
- .25 Mv. Noise Level
- 3 Stage amplifier

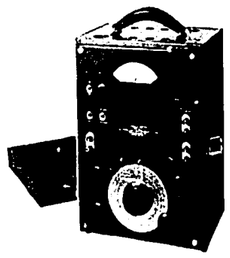
TIC INSTRUMENTS

Complex Plane Analyser

Type 250A



Plot the Poles and zeros of your system on the complex frequency plane and gather the following design information:

The Complex Plane Analyser solves magnitude and phase angle responses for any sinusoidal frequency. Exponential and complex driving functions determined. Complete transient response for impulse, step and other inputs. Root locus plotting simplifies solution of closed-loop systems. Multiplies and divides complex vectors giving magnitude and angle of the product vector. A compact, system design instrument.

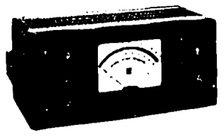
Impedance Measurement Audio Frequency

Z-Angle Meter Type 310 A

30 to 20,000 c.p.s.

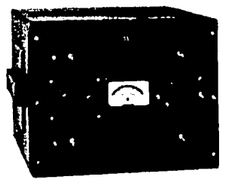
Measures impedance directly in polar coordinates as an *impedance* magnitude in ohms and *phase angle*, in degrees $Z\angle\pm\theta$. 310-A measures, with equal ease, pure resistance, inductance, capacitance or complex impedances comprised of most any RLC combinations. Range: Impedance (Z), 0.5 to 100,000 ohms; Phase Angle ($\pm\theta$) + 90° (X_L) through 0° (R) to −90° (X_C). Accuracy: Within ± 1% for impedance and ±2° for phase angle. Price: $470.00.

Phase Measurement



Phase Meter Type 320 AB

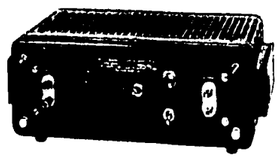
Frequency Range 20 cycles to 100 kc.



All electronic instrument that directly measures phase angle between two periodic voltages from zero to 360°. Readings made directly without balancing on four scale ranges, 0 to 36°, 0 to 90°, 0 to 180°, and 0 to 360°. Voltage Range: 1 to 170 volts peak; Terminals for recorder; Relay Rack mounted or cabinet; Absolute accuracy: 1% of full scale plus 3°; Incremental accuracy better than 1%.

Price: With cabinet $565.00.

Precision Phase Meter Type 322A



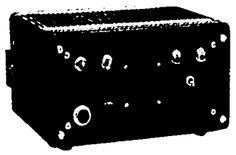
is an ultra-high precision phase measuring instrument which utilizes the same principles of phase measurement as the Type 320AB Phase Meter.

More elaborate circuit design techniques permit phase angles to be read with an accuracy of ± 1° from 0 to 360° without ambiguity over the frequency range from 20 cycles to 20 kilocycles. Useful frequency range extends up to 1 megacycle. Precision of phase angle reading obtained is within ± 0.1° so that changes in the relative phase angle between two voltages can be read with an accuracy of ± 0.1°. Instrument measures phase angle difference between positive going zero axis crossings independent of wave form. Input impedance is approximately 4.7 megohms shunted by 13 μμf. Recorder terminals are provided.

Primary Phase Standard — Type 7000 A

Provides two voltages of the same frequency whose relative phase angle is precisely known and continuously variable from 0 to 360°. Frequency: Available for operation at any one fixed frequency from 60 cycles to 20 kcs. Accuracy: ± .05 degrees; with special operating techniques ± .01 degrees.

Wide Band Amplifier Type 500-A



Designed for use as a general purpose laboratory amplifier and also with the phase meter at voltage levels below one volt. Features high gain, negligible phase shift and wide band width.

Outstanding specifications: *Amplification*—10; 100; 1000 selected by rotary switch . . . *Accuracy* —±2% nominal . . . *Frequency response*—±0.5db from 5 cycles to 2mc on gain of 10; ±0.5db on 5 cycles to 1.5 mc on gain of 100; ±0.8db from 5 cycles to 1mc on gain of 1000 . . . *Phase shift* —0±2° from 20 cycles through 100kc . . . *Gain stability*—constant with line voltages (105-125v). *Input impedance*—160 megohms shunted by 7 μμf. *Output impedance*—approximately 200 Ω (from cathode follower).

Price: With cabinet $205.00; with relay rack $200.00.

Ponogometer Type 394 A

A precision potentiometer noise tester designed for laboratory and production quality control in the manufacture of single or multi-turn precision potentiometers. Monitoring the transient contact noise resistance appearing between the wiper and resistance element, both audible and visual indications are given when threshold level is exceeded.

Range: Equivalent Noise Resistance threshold level adjustable from 10 to 5000 ohms. Lower levels can be set up by means of accessory amplifiers.

Wiper Exciting Current: Constant 1 milliampere. For other values accessory current sources can be set up. Price $350.00.

R-F Oscillator — Type 410 A — 100 kc to 10 mc.

(Special models 46.5 kc to 4.65 mc available.)

Power oscillator for use as bridge driver and general laboratory measurements. Features: High stability, high output (approximate 30 volts), 50-60Ω output impedance, expanded frequency scale, direct reading output voltmeter, compact design. Price: $385.00.

New! COMPARISON TESTER for TRANSISTOR APPLICATIONS

TEST JUNCTION TRANSISTORS, POINT CONTACT TRANSISTORS, DIODES, AND OTHER SEMI-CONDUCTOR DEVICES ON A 'GO NO-GO' BASIS

Ideal for Factory Production and Laboratory Development

TRANSISTOR TESTER
MODEL TT-11

Price Complete* $189.50
F.O.B. Caldwell, N.J.

FEATURES

✓ Both Static and Dynamic Comparison Tests Performed
✓ Independent of Voltage and Temperature Variation
✓ Never obsoleted by new Transistor Types
✓ Simple to Operate ✓ Moderately Priced

Order your Transistor Tester today or write for Bulletin ID

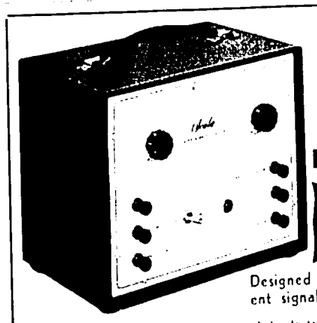
Designed for Application

Mu Metal Shields

The James Millen Mfg. Co. Inc. has for many years specialized in the production of magnetic metal cathode ray tube shields for the entire electronics industry, supplying magnetic metal shields to manufacturing companies, laboratories and research organizations. Stock shields are immediately available for all of the more popular sizes and types of cathode ray tubes as well as bezels for 2″, 3″ and 5″ size tubes.



Many production problems, however, make desirable special shields designed in conjunction with the specialized requirement of the basic apparatus. Herewith, are illustrated a number of such custom built shields. Our custom design and fabrication department is at the service of our customers for the development and manufacture of magnetic metal shields of either nicoloi or mumetal for such specialized applications.

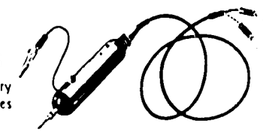
Save alignment time with the

Scala SUPER MARKER INJECTOR SMI-53...$67.50

SAVE UP TO 75% IN TIME



Designed to speed and simplify alignment, using your present signal generator, marker generator, and oscilloscope.

SAVES TIME—Marker size determined by instrument setting only. Not affected by characteristics or defects of circuits being aligned. Only one setup for each section (video I.F., sound I.F., detector or tuner) regardless of number of stages.

MORE ACCURATE—Marker will always be the same size whether on top of I.F. curve, on slope, bottom, in middle of ratio detector, or in sound trap. Marker cannot overload receiver or circuit being tested. Marker completely bypasses unit being tested. $67.50

Scala OSCILLOGRAPH PROBES

A New Tool to Make TV Servicing and Laboratory Measuring Easier, Faster, More Accurate. All probes complete with coaxial lead and instruction book.

SIGNAL TRACING PROBE BZ-1, a wide band probe which can also be used with V.T.V.M. Contains demodulator of low capacitance, high impedance design. Non resonant to 225 M.C., useful to 1000 M.C. $9.75

LOW CAPACITY PROBE BZ-2 cuts the effective input capacitance of scope and test lead by a factor of 10. Gives an attenuation of 10 to 1. Screwdriver adjustment compensates for different oscilloscope impedances. $9.75

100:1 VOLTAGE DIVIDER PROBE BZ-3 is useful for analyzing high voltage circuits at frequencies above 15,000 cycles. Low input A.C.-to-D.C. capacitor (less than 2 mmf.) without unsafely the wave shape or endangering the oscilloscope. Useful to 10,000 peak-to-peak volts. Screwdriver adjustment compensates for different scope input capacitance. $9.75.

VOLTAGE DOUBLER PROBE BZ-4 provides virtually double the deflection on a scope screen provided by conventional half-wave probes. Offers a high degree of 60-cycle hum reduction. Contains dual demodulator of low capacitance, high impedance design, selected for balance and sensitivity, useful to 150 M.C. $10.75

SCALA BZ-123. Consists of SCALA BZ-1, BZ-2 and BZ-3 probes complete with one coaxial cable, instructions and removable Klipon tip which can be fastened to any Scala probe to make a firm connection to test point. $27.45

SCALA BZC. Spare calibrated cable. $1.00

Available at all leading jobbers

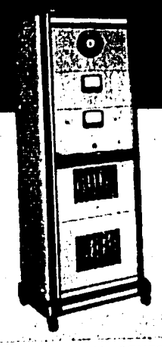
PRECISION LABORATORY ★TEST EQUIPMENT★

New RF STEP ATTENUATOR*

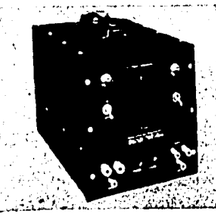
Small, rugged ladder attenuator achieves attenuation accuracy and low vswr from dc to uhf. Suitable for all signal and sweep generators in this frequency range.

Care in design assures maximum flexibility in mounting, drive, and types of input and output connections.



Easily adaptable for inclusion in different types of test equipment and in laboratory and production test applications.

*Patent pending

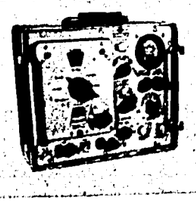


SPECIFICATIONS

- **MAXIMUM STEPS**
  Ten (eleven contact positions)
- **ATTENUATION RANGE**
  Up to 120 db total
  Attenuation per step optional
- **OUTPUT IMPEDANCE**
  50 or 75 ohms nominal
- **INPUT IMPEDANCE**
  100 or 150 ohms nominal
  50 or 75 ohms optional
- **INPUT AND OUTPUT VSWR**
  1.1 to 1000 mc at 50 ohms
- **ACCURACY**
  .3 db per 20 db step from its dc value up to 1000 mc

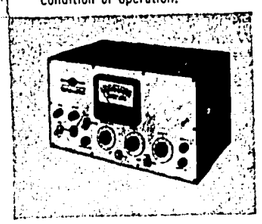
VARIABLE FREQUENCY POWER SUPPLY VS-500

VS-500 has been primarily designed for the purpose of testing Electronic Equipment . . . . uses ac power sources of frequencies ranging from 50 to 3000 cycles. However, it finds many other laboratory applications such as testing transformers over a wide frequency range, at high power levels, operating synchronous motors at variable speeds. Many attractive special features are incorporated.



MODEL PP-180 REGULATED DC POWER SUPPLY

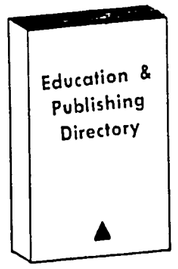
A dependable source of power over a voltage range of 180 to 360 volts D.C. at 100 MA and 6.3 volts A.C. at 5 amps. from input of 105 to 125 volts 50 to 60 cps. Regulation approximately 1% over the D.C. voltage range 0 to 75 MA. Total noise and hum less than .005 volts for any rated condition of operation.



STANDARD SIGNAL GENERATOR SG-25

An R.F. Signal Generator operating over the frequency range 10kc to 50 megacycles. Output voltages adjustable from 0.1 microvolts to 0.1 volts across 50 ohms with an accuracy of ±1 db. Built in crystal calibrator provided for accurate frequency setting. Internal modulation 400 and 1000 cps. Operates on 115 volts, 50 to 1000 cycles. Complete with accessories.

STANDING WAVE INDICATOR SW-12



Accurately indicates standing wave ratios 1:1 to 4:1. Operates on 115 volts 50 to 800 cycles. Designed for use with a square law crystal detector or bolometer probe which samples R.F. voltage from a slotted line. Of shock resistant, non-microphonic construction. Complete with carrying case and detachable cover.

A Directory of

9. Education & Publishing

The products and services of the Radio-Electronics industry have been organized into ten basic directories following closely the organization of the IRE Professional Groups. But 100 major product groups are numbered consecutively throughout.

Companies, associations, schools and publishers are contributing both training and printed education to the advancement of radio-electronics. A condensed list of those active in this field is included under the two headings,

Education
Publishing

in this special section. Note particularly the sub-classification codes at the end of each firm address.

97 Education.
- 05 Technical instruction—home study
- 10 Technical instruction—resident

98 Publishing.
- 05 Book publishers
- 10 Magazines

Always consult the pink pages at the start of the Directory of firms, for a terminology cross-index, or to find products by name. The pink pages list more than 500 products by name, as well as under the product groups. Page numbers are given for speed.

Announcing . . .

New McGraw-Hill Books that BRING NEW AUTHORITY AND ADD USEFULNESS TO YOUR LIBRARY

1. INDEX–Volume 28

The most authoritative and comprehensive work dealing with pulse and microwave theory and applications—the Massachusetts Institute of Technology RADIATION LABORATORY SERIES—is now made complete with the addition of this extensive and carefully prepared Index. The thousands of entries refer you to facts, research findings, and conclusions—a mine of raw material waiting to be used by today's engineers and technicians. The Index has been compiled with the needs of the practicing engineer in mind. It is more than a compilation of the 27 separate indexes in the individual volumes: it's a comprehensive guide designed to give you the information you need quickly and completely. **Compiled by Keith Henney, Editorial Director, *ELECTRONICS, NUCLEONICS*. 160 pages, over 10,000 entries, $4.50**

M.I.T. RADIATION LABORATORY SERIES

The 28 volumes in this Series were written and edited principally by members of the Radiation Laboratory maintained at M. I. T. The usefulness of the set extends over all fields—communication, television, industrial instrumentation, biological and physical sciences, etc. Write us for full information.

COMPLETE SERIES AVAILABLE AT SPECIAL PRICE

2. Television Broadcasting

A practical manual for radio engineers, operations personnel, and others interested in the technical aspects of television broadcasting. Covers in detail the equipment, facilities, and techniques involved in the running of a television studio—topics such as lighting, staging, television recording, and color television equipment. **By Howard Chinn, Columbia Broadcasting System. 700 pages, 180 illustrations, $10.00**

3. Servomechanism Analysis

A basic book presenting the essentials of the mathematical theory of servomechanisms for engineers. Giving the sound grounding in analysis that must precede successful design, the authors detail each mathematical method for analyzing servo systems. **By George J. Thaler, U. S. Naval Postgraduate School, and Robert G. Brown, A. C. Sparkplug Div., G. M. Corp. 414 pages, 253 illustrations, $7.50**

4. Electromagnetics

An unusually thorough book that gives a well-rounded coverage of the basic principles of electromagnetic-field theory. It puts about equal emphasis on the branches that find application in such areas as electronics, power, radiation, and propagation. **By John D. Kraus, Prof. of Elec. Engr., Ohio State Univ. 593 pages, 382 illustrations, $9.00**

ANOTHER NEW McGRAW-HILL SERIES

ELECTRONICS AND WAVES

By arrangement with Pergamon Press, Ltd., of London, McGraw-Hill will publish in the United States a series of concise books on a variety of important topics in the fields of applied modern physics and communications. The authors are in the forefront of current research and development in England and Europe, and the Series is under the editorial direction of Dr. D. W. Fry, of the British Atomic Energy Research Establishment at Harwell, England. The following books are the first two in this new Series.

5. Signal, Noise and Resolution in Nuclear Counter Amplifiers

This book gives a clear and concise discussion of the signal to noise ratio of nuclear counters and assorted amplifiers, providing good insight into the noise and related problems, and the basic material for dealing effectively with such problems. **By A. B. Gillespie, Atomic Energy Research Establishment, Harwell, England. Illustrated, $4.50**

6. Scintillation Counters

Provides a complete review of these extremely important and versatile instruments of modern nuclear research. Includes the first account of the author's complete theory of organic crystals, plastic and liquid phosphors, and the properties of inorganic phosphors. **By J. B. Birks, Prof. of Physics, Rhodes Univ., So. Africa. $4.50**

Mathematical Engineering Analysis

By R. Oldenburger. Shows how physical engineering situations can be put into equations for interpreting experimental results, etc. $8.00

Photometry

By J. W. T. Walsh. A new, revised edition of a work on theory and techniques long considered tops on its subject. $12.75

Transmission Lines and Filter Networks

By J. J. Karakash. A rigorous, up-to-date treatment of theory with full material on transmission lines in high frequency circuits. $3.75

Chambers's Technical Dictionary

Defines 50,000 terms used in all branches of engineering and the sciences. Your secretary and new assistant will welcome this! $6.50

Flux Linkages and Electromagnetic Induction

By L. V. Bewley. An addition to basic electrical knowledge, showing how to solve the "paradoxes" in induced voltage problems. $3.50

D-C Machines for Control Systems

By A. Tustin. Explains in practical engineering terms the principles and comparative characteristics of modern control mechanisms. $10.00

A-C Machinery

By L. V. Bewley. A modern, clarified treatment of the analysis of a-c equipment, with engineering data on the various types. $3.50

Training Aids

Hearing Aids

By M. Mandl. Explains modern hearing aids in terms helpful to the user, and gives detailed servicing instructions. $3.50

Radio and TV Mathematics

By B. Fitcher. Step-by-step solutions to 400 common problems. Takes the mental hazards out of math for the serviceman. $6.75

TV for Radiomen

By E. M. Noll. Thorough and unusually *understandable* explanations of principles and installation procedures for servicemen. $7.75

Mandl's TV Servicing

By M. Mandl. Widely acclaimed as "the best" service guide. Very practical, complete. $5.50

Television and FM Antenna Guide

By E. M. Noll & M. Mandl. Antenna theory, detailed installation instruction, and comparative data on 16 types of antennas. $5.75

For copies to examine on 10-day approval write to Dept. T

The Macmillan Company
60 FIFTH AVENUE, NEW YORK 11, N.Y.

WILEY Books

Complete . . . up-to-date . . . the FIRST book on . . .

PRINCIPLES OF TRANSISTOR CIRCUITS

By 9 members of the engineering staff, General Electric Electronics Laboratory
Edited by RICHARD F. SHEA

Here it is—the very first book to integrate all that is now known about these mighty midgets. A group of recognized authorities provides the basic theory, plus helpful elaboration of various techniques in the field. Practicing engineers will value the detailed, up-to-date information on bias stabilization, audio-amplifier design, high frequency amplifier design, computer, and similar use. More theoretical-minded people will appreciate the thorough coverage of matrix methods, feedback analyses, and equivalent circuits.

October Approx. 554 pages Illus. **Prob. $11.50**

Now . . . thoroughly revised, greatly enlarged . . .

FIELDS AND WAVES IN MODERN RADIO 2ND EDITON

By SIMON RAMO, Hughes Aircraft Company
and JOHN R. WHINNERY, University of California

All the electromagnetic theory you need for a practical understanding of fields and waves in present day radio . . . presented in a simple yet thorough manner unequalled by any other book.

Whether you are highly experienced in this field, or a relative newcomer, you will find Ramo and Whinnery a "must." It provides a thorough grounding in principles as well as valuable help in solving countless practical problems.

1953 576 pages Illus. **Prob. $9.00**

Links fundamental theory and over-all system practice . . .

ULTRA HIGH FREQUENCY PROPAGATION

By H. R. REED, University of Maryland, and
C. M. RUSSELL, U. S. Naval Air Test Center, Patuxent River, Md.

New information to complete the radio system . . . takes over where the basic circuits stop. Among the ten big features which make this book highly important to you . . . Practical working methods for calculating radiation coverage patterns in the proximity of a spherical earth; meteorological theory; complex antennas as well as dipoles; possibilities of the sector antenna; given the circuits and the apparatus, this book closes the spatial circuit (the third dimension) for the first time; discusses effects of propagation on pulse transmission coding requirements; shows the effects of propagation on AM and FM transmission; safety factors to allow for "radio holes"; thorough calculation of TV coverage—important to workers in fringe areas.

September Approx. 590 pages Illus. **Prob. $8.50**

Just published . . .

CIRCUIT THEORY OF ELECTRON DEVICES

By E. MILTON BOONE, The Ohio State University

The author believes the easiest way to understand most electron devices is by studying their over-all circuit behavior. For that reason, he emphasizes the circuit theory, rather than the physics, of electron devices.

Outstanding features include: utilization of the concepts of four-terminal networks, generalized so as to apply to any electron device over any frequency range in which the device operates within the linear region of its characteristic . . . a complete chapter on the linear circuit theory of transistors . . . careful integration of tube and transistor circuit theory . . . thorough analysis of circuit behavior of electron devices.

1953 483 pages Illus. **$8.50**

VACUUM TUBE OSCILLATORS

By WILLIAM A. EDSON, Stanford University

1952 476 pages Illus. **$7.50**

FUNDAMENTALS OF ENGINEERING ELECTRONICS

2nd Edition
By WILLIAM G. DOW, University of Michigan

1952 627 pages Illus. **$8.50**

STORAGE TUBES and Their Basic Principles

By M. KNOLL and B. KAZAN, RCA Laboratories

1952 143 pages Illus. **$3.50**

ESSENTIALS OF MICROWAVES

By ROBERT B. MUCHMORE, Hughes Aircraft Co.

1952 236 pages Illus. **$4.50**

Institute of Radio Engineers

PUBLICATIONS

Proceedings of the I.R.E.

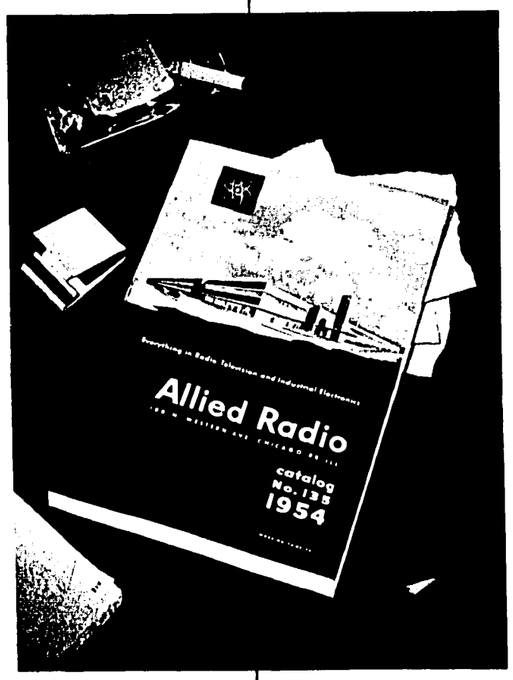
A monthly collection of the latest data and theory in the electronic engineering field. Subscription to this invaluable engineering magazine is included as a part of I.R.E. membership dues.

Professional Group Transactions and Newsletters

Many I.R.E. Professional Groups publish periodical information on the latest developments in their respective fields. For further information on these groups and the fields they cover, see pages 448-449.

IRE Directory

Annually, the Institute publishes this directory, containing the names of all I.R.E. members, and the latest available information on the firms and products in the field.



To receive these publications, and other benefits of I.R.E. membership, write today for information to:

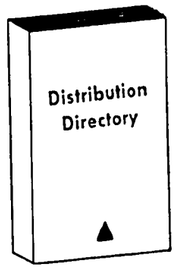
ALLIED'S

268-PAGE BUYING GUIDE

the world's largest stocks of Electronic Supplies for Industry

Simplify and speed your purchasing of electronic supplies and equipment. Send your orders to us at ALLIED—the reliable one-supply-source for *all* your electronic needs. You get immediate shipment from complete, quality lines that are *always in stock*. Depend on us for everything in electronic supplies for industrial and communications application, for research, development, maintenance and production. Send today for your FREE copy of the ALLIED Catalog—the *complete, up-to-date* guide to the world's largest stocks of Electronic Supplies for Industrial use.



One complete, dependable source for everything in Electronics

ALLIED is now occupying its new, modern home—150,000 square feet of space, with latest facilities to serve you better...

ALLIED RADIO 100 N. WESTERN AVE., CHICAGO 80, ILLINOIS

A Directory of

10. Distributional Functions for the Industry

The products and services of the Radio-Electronics industry have been organized into ten basic directories following closely to the organization of the IRE Professional Groups. But 100 major product groups are numbered consecutively throughout.

The final section of our "10 in 1" directory is the complement to manufacturing, which is distribution. It has proved to be a real service to IRE member engineers and executives to put into this book a list of annually checked jobbers, wholesalers and distributors. Many of these firms are identified further by the initials REP, as member of "The Representatives," or NEDA, as member of the National Electronic Dealers Association. The number after the address codes each firm as shown at start of listing, top left.

99 Distribution.
- 05 Export & Import
- 10 Jobbers & Wholesalers
- 15 Manufacturers Representatives
- 20 Sales & Service
- 25 Surplus dealers

Always consult the pink pages at the start of the Directory of firms, for a terminology cross-index, or to find products by name. The pink pages list more than 500 products by name, as well as under the product groups. Page numbers are given for speed.

99. Distribution.

5. Export & Import
10. Jobbers & Wholesalers
15. Manufacturers Representatives
20. Sales & Service
25. Surplus dealers

Code number at end of each address refers to product or service sub-classifications listed at the head of the major classification.

3 IMPORTANT FACTS to know about BUD

As a user of radio and electronic components and sheet metal products you should know these facts about BUD.

1. DIVERSITY OF PRODUCTS

Bud makes over 1400 different electronic components and sheet metal products. This enables you as an engineer, experimenter or purchasing agent to meet your needs economically and efficiently—for a single part or a production run specially designed and fabricated.

2. ECONOMY ON SPECIALS

A slight change in one of our stock items, part of which are illustrated here, may give you exactly what you want in the way of a "special" without special tool and die costs. Delivery, too, can be accelerated.

3. WHERE TO BUY BUD

There is a nationwide network of over 750 Bud Distributors to serve your needs. Each one is an expert and can give you practical advice on all your requirements for electronic components and sheet metal products.

BUD — THE MARK OF PERFECTION

QUALIFIED ENGINEERING ASSISTANCE For You!

The application and assistance in procurement of the high grade electronic components listed below is our business. Our qualified staff offers you 28 years experience, know-how and results. It will pay you to contact us today!

REPRESENTING THESE OUTSTANDING LINES IN NEW ENGLAND

BUD — Chassis, Cabinets, Coils, Air Condensers
CLAROSTAT — Precision and Standard Potentiometers, Wire Resistors
COAXIAL — R.F. Connectors, Wave Guides
CONN. TEL. — U.H.F. Oscillators
FREED — Transformers, Laboratory Test Instruments
GARDE — High Voltage Insulated Terminals
GENERAL LAMINATED — Sockets, Terminal strips, Fabricated Laminates
TURNER — Microphones
WILKOR — Precision Carbofilm Resistors

30,000 Radio-Electronic Engineers will receive and use the 1953 IRE DIRECTORY

The 1953 IRE DIRECTORY is— Better and Better and Better!

More Engineers Listed than ever before! IRE membership continues to gain and gain! More engineers (now 30,000) are listed, and therefore have a direct, personal interest in this DIRECTORY.

Up-to-dateness is almost a mania with IRE DIRECTORY compilers! Membership lists are corrected up to May 30th. Industry lists, compiled and classified by high speed IBM sorting methods are accurate to June 15th. No firm's report is older than 18 months.

Information at high speed! "Data the way an engineer thinks" is the key to IRE DIRECTORY classifications. All products are divided into 10 fundamental groups, many of which parallel professional group organization. The grouping plan makes this the fastest working directory you ever used! No components are mixed with test equipment—you turn right to a section where each item belongs.

Yet good engineering detail is maintained. 99 basic classes of products under these ten sectional product directories keep listings from becoming cumbersome, but clearly define products. Overlapping listings are skillfully eliminated. Simplicity makes this book easy to work with—insures faster finding of facts when forgotten. Thus the faults of terminology listings are avoided.

Completeness is insured! Most firms make many products in a single classification. Wasteful, eye-confusing relisting of the same firms over and over is quite sensibly solved by using a system of codes under the 99 basic headings which actually provide 489 separate classifications. A more complete picture of what each firm's full line is results, but you travel through fewer listings. The "Copp Principle" of Directory indexing makes these lists wide, well marked highways to information —fast.

3000 Firms listed. The alphabetical directory gives a clear definition of these firms by showing any or all of the ten fundamental groups in which these firms belong after every name.

Machol Edge Index is just one more modern service to help the user find information fast.

Ads positioned with reason! In a DIRECTORY where ads play an important part in supplying information the user wants and needs, it makes good sense to cross-reference every advertiser in each listing so that the user can quickly find more detail. Ads are also placed facing company alphabetical listings, or in the product section in which they properly belong. No effort is spared to "organize" ad information.

More advertisers—more information! Never before have so many advertisers served IRE readers with so much information! The advertisers' list this year is truly a "social register" of this great industry.

And 1954 will be even better! IRE membership is constantly growing —providing a larger audience of selected engineers at a lower rate per reader. Catalog insert rates compete with postage. Earned discounts apply to advertisers in Proceedings. Write today for rates, closing dates, and other mechanical information.

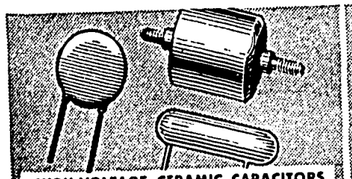
THE INSTITUTE OF RADIO ENGINEERS

BRyant 9-7550 • ADVERTISING DEPT., 1475 BROADWAY, NEW YORK 36, N. Y.

Part Four—1953 Complete-Data-Spreads

The full spirit of the IRE DIRECTORY is to give the reader-engineer "facts" in complete detail, and specific enough to be of useful service. Our advertisers have recognized this, and many have made their copy presentation full of useful specifications and illustrations.

Actually, a Directory Publisher cannot hope to describe products adequately in standardized listings. Only the Advertiser, using display space, and with his own intimate knowledge of his service or product, can do that job right.



The Part Four Advertisers, listed below, have done their utmost to provide the reader with engineering data in full detail, through spreads and catalogs filed in this book for easy access and permanent reference. This can prove to be the most useful part of the 1953 IRE DIRECTORY to you.

Index to Complete-Data-Spreads

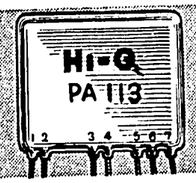
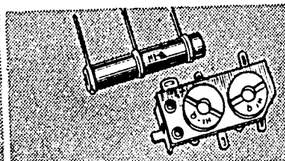
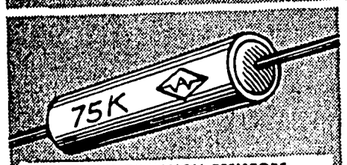
Complete catalogs describing in detail the products of 15 firms, are filed in the last part of the IRE DIRECTORY. See:

INDEX TO CATALOGS ON PAGE 456.

HIGH-VOLTAGE CERAMIC CAPACITORS . . . Result of extensive research by Hi-Q engineers to produce high-voltage units with same dependable adherence to specifications, ratings and tolerances which characterize all Hi-Q components. Special dielectric material and new designs for high working voltages in relation to size. Available in slugs, disks, plates, tubulars.







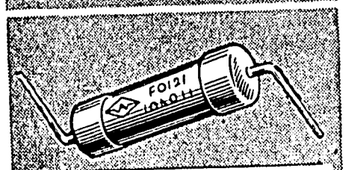


PLATE ASSEMBLIES SAVE SPACE AND LABOR . . . Most versatile of electronic components. Virtually endless combinations of capacitors and resistors in single units. Limited only by "K" of material, and physical size. Contribute to dependable miniaturization. Simplify assembly. Reduce number of soldered leads.

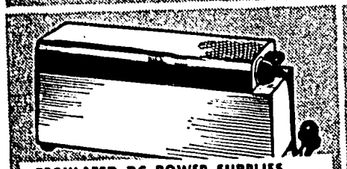
SPECIAL Hi-Q COMPONENTS . . . Developed to meet special needs. These special components meet all requirements as established by RTMA for class 2 ceramic dielectric capacitors. Can meet class 1 requirements if necessary. Trimmers, stand-off capacitors, feed-thru capacitors, eyelet feed-thrus, resistor-capacitor combinations, low-inductance ribbon and lug leads, etc.

CARBOFILM PRECISION RESISTORS . . . Further improved by newly-developed Wilkor coating material W-65 and the ceramic hermetically-sealed cases. New material specifically developed to meet military specifications MIL-R-10509A. Units can be mounted close to other components with minimum capacitance effect. Also in uncased types.

BOROFILM PRECISION RESISTORS . . . Featuring extremely low temperature coefficient of resistance. Available in resistance values up to 20,000 ohms, with temperature coefficient of 100 PPM or less. Furnished as standard coated units, and also in metal or ceramic hermetically-sealed cases. Ideal for any application requiring high-precision resistors.



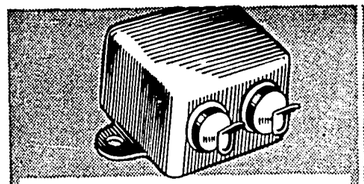
FUNCTION FITTED

FUNCTION-FITTED *Components*

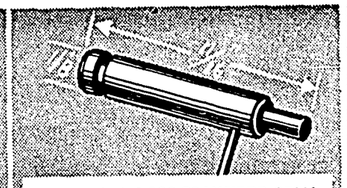
A Touch of Tomorrow in the Components of Today! Embarking upon its 31st year of pioneering and producing the finest in electronic components, Aerovox presents this capsule information on some of its latest capacitor and component developments.

Indeed, to initiate, coordinate and check on all Aerovox products, the company maintains an outstanding research and engineering development at New Bedford. Over and above the usual standard types of capacitors, resistors and certain electronic equipment, Aerovox is constantly anticipating radio-electronic trends with advanced designs, materials and production facilities.

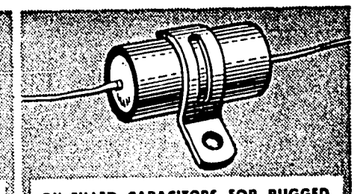
For capacitors and resistors and electronic specialties truly *function-fitted* to your circuitry, other components and operating requirements—*consult Aerovox specialists!*



REGULATED DC POWER SUPPLIES . . . Incorporating use of magnetic amplifier techniques — eliminating all vacuum tubes. Provides extremely dependable, trouble-free precision equipment for industrial and laboratory uses. Minimum of 20,000 hours' continuous service. Available in variety of voltages and frequencies. Output: 300 v. D.C. with plus/minus 1% regulation from 0 to 200 MA. Less than 1% ripple.



MAGNETIC AMPLIFIERS . . . Acme's extensive "know-how", gained through the development of magnetic amplifiers, can provide you with the precise component to fit your exact need. Power gain as high as 10 million. Carrier operating frequencies from 60 cps to 100 kcs. Power output up to 20 watts. Input sensitivity of 0.10 microwatt. In the "instrument grade" class.



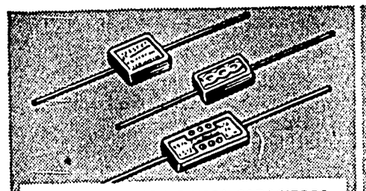
RADIO RANGE FILTERS . . . Depending on frequency required, Acme can supply standard or miniaturized filters with either toroidal or laminated inductors. Where required, these filters can be manufactured to hold very close phase shift tolerances and close output ratings over wide temperature ratings. Acme can build the "toughest" ones!

HIGH-TEMPERATURE METALLIZED PAPER CAPACITORS . . . A major Aerovox development. Ideal for miniaturization. Units enjoy wide usage and are giving excellent service. Full-voltage operation up to 100° C; to 125° C with voltage derating. Unique thermo-setting *solid* dielectric — maximum shock- and vibration-proof — no oil leakage.

ELECTROLYTICS FOR TRANSITOR APPLICATIONS . . . A sub-sub-miniature electrolytic, Type HA, designed especially for new transitors. Marked size reduction — considerably smaller than any previously available commercial unit. Typical example: 6 v. 1 mfd. unit shown measures only ⅛" dia. X 11/16" long.

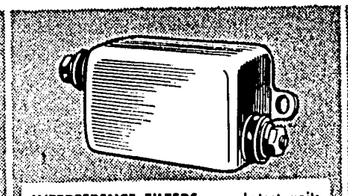
OIL-FILLED CAPACITORS FOR RUGGED SERVICE . . . Choice of impregnants that are *function-fitted* to operating conditions. Many different case styles—metal-case tubulars and bathtubs, round-can and rectangular-can transmitter units, large steel-case units, widest choice of mountings and terminals, etc.

We solicit your PROBLEMS and NEEDS



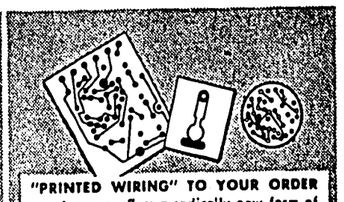
To expedite the handling of inquiries and orders, you are respectfully referred to the following divisions:

All types of capacitors for all purposes —paper, electrolytic, oil-filled, molded tubulars, mica, silver-mica, metallized-paper, motor-starting, filters, etc. Also "printed wiring." AEROVOX CORPORATION, New Bedford, Mass.



Specializing in ceramic capacitors of all types, trimmers, resistor-capacitor combinations, plate assemblies, radio chokes, etc. Hi-Q DIVISION, Aerovox Corporation, Olean, N.Y.

Precision resistors — Carbofilm units including hermetically-sealed types; Borofilm units for extremely low temperature coefficient of resistance; Corohm wire-wound units, etc. WILKOR DIVISION, Aerovox Corporation, 2882 Detroit Ave., Cleveland 14, Ohio.



Electronic equipment specialties — wide variety of wave filters, radio range and band-pass filters, delay lines, regulated DC power supplies, toroidal inductors, magnetic amplifiers, etc. ACME ELECTRONICS, INC., 300 N. Lake Ave., Pasadena 4, Calif.

HIGH-TEMPERATURE MICA CAPACITORS . . . Suitable for operation at temperatures as high as 125° C. Increasingly used in military and special commercial applications. Available in all molded bakelite-case styles: Also close temperature coefficient units in which "F" characteristic of JAN is almost halved. Silver-micas also.

INTERFERENCE FILTERS . . . Latest units provide maximum attenuation from 150 KC well up into UHF range. Extra rugged, extra compact, extra efficient, by any comparison with previously-available filters. In several standard types for wide variety of uses. For extraordinary requirements, special filters can be developed and built.

"PRINTED WIRING" TO YOUR ORDER . . . Aerovox offers a radically new form of printed wiring. Employs silver as the conductor. Many distinct advantages. Essentially, this printed wiring offers fidelity of reproduction of original wiring design, with excellent adhesion of conducting material to base material. No corrosive chlorides or other harmful materials used in production.

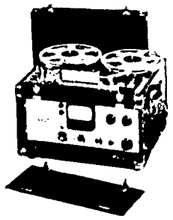
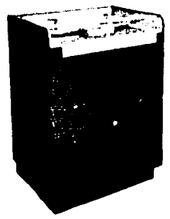
AMPEX
MAGNETIC RECORDERS

the finest tape recorders



AMPEX AUDIO RECORDERS



Series 300 console

Series 350 table top console on base

Series 400 single case portable

Model 450 console on base

For uses where utmost reliability, "perfect" fidelity and accuracy of timing are of prime importance, Ampex Tape Recorders are universally preferred. America's four major broadcasting networks, the country's leading phonograph record manufacturers and various important musical organizations are among those whose usage has established Ampex as the world's standard of excellence in sound recording.

SERIES 300

These, the finest of the Ampex line, are the machines used where speaking or musical performances justify the best recordings it is possible to make. Because of their supreme reliability, the 300 Series machines are used by major radio networks to originate, delay and rebroadcast important radio shows. Record manufacturers use the Series 300 for master recordings because of their high signal-to-noise ratio and low flutter and wow.

SERIES 350

Newest of Ampex's general purpose audio recorders, the 350 has a 30° slant on the top-plate. This puts reels, editing knobs and all controls within easier reach of the operator. Tape editing is faster and less tedious. A three motor tape transport (also used on the higher priced Model 300) provides excellent tape control and utmost reliability of operation. The Series 350 is unusually accessible for servicing.

SERIES 400

The Series 400 was the first tape recorder to bring the Ampex standard of performance within reach of smaller radio stations, schools, conservatories, high fidelity enthusiasts and semi-professional users. The 400 Series portables are the lightest of the Ampex models and consequently the best suited for professional quality recordings on location.

MODEL 450

For background music, automatic broadcasting and TV test patterns, the Model 450 Continuous Tape Reproducer provides up to 8 hours of continuous unrepeated program. The Model 450 uses 14-inch NARTB reels with double track pre-recorded tapes. Starting, stopping, reversing and program repeating are controlled automatically with no attention from a standby operator.

TAPE DUPLICATOR

Designed to make duplicate tapes at minimum labor cost, the Ampex Tape Duplicator makes from 1 to 10* duplicates simultaneously and employs a time-saving speedup. Double track tapes are made in one pass. Fidelity is high (see specifications). Duplicates of any standard tape speed can be made from masters of any standard speed.

**User has the option of buying from 1 to 10 slaves to operate from one master unit.*

***SPECIFICATIONS**

	Series 300	Series 350	Series 400	Model 450	Tape Duplicator
Frequency response (Tape speeds shown are not all available in all models)	15 in/sec.—30 to 15,000 cps. within ± 2 db 7½ in/sec.—40 to 15,000 cps within ± 4 db 40 to 10,000 cps. within ± 2 db 3¾ in/sec.—50 to 7,500 cps. within ± 4 db				
Signal-to-noise ratio (by NARTB Standards)	Over 60 db	Over 55 db	Over 55 db	Over 50 db	Over 45 db
Flutter and wow	Well under 0.1% rms. at 15 in/sec.	Well under 0.2% rms. at 15 in/sec.	Well under 0.2% rms. at 15 in/sec.	Well under 0.4% rms. at 3¾ in/sec.	Ampex Data Bull. 3-3-1
Available mounting	Console, rack and portable				Unmounted

*Full specifications are given in bulletins on each individual series or model.

for every field of use

AMPEX DATA RECORDERS

Ampex magnetic tape machines retain test data in "live" electrical form. Hence a playback of the data is like a rerun of the original test. The tremendous "memory capacity" of magnetic tape retains more complete and detailed information than any other data recording method. The data can be scanned, speeded up, slowed down, automatically reduced or converted to any other electrical, visual or physical form. To cover the widest range of data situations, Ampex data recorders are offered with various frequency ranges, numbers of tracks and modes of recording.

F-M CARRIER TYPE RECORDER—MODEL 306

Explosions, shock waves, geophysical data and other highly transient phenomena can be recorded on the Model 306 with excellent "instantaneous" accuracy. Because the machine uses an fm carrier to modulate the signal, the accuracy of the recording is unaffected by minor tape imperfections.

Also, the Model 306 is able to record the vast majority of all mechanical occurrence, since it covers the extremely useful frequency range from 5000 cycles/sec. down to zero (D.C.).

OPTIONS: *One to 14 tracks*
Rack, console or combination mounting
Record and playback, record only or playback only

WIDE RANGE DIRECT RECORDER—MODEL 307

With a frequency response from 100 to 100,000 cycles per second, the Model 307 is particularly suited to steady state data occurring over a wide range of frequencies. The 307 has had extensive application in fm-fm telemetering, sharing this field with the Model 500 described below.

OPTIONS: *Same as Model 306*

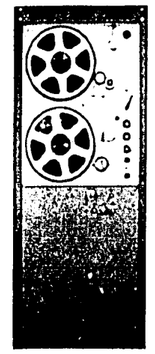
PULSE WIDTH RECORDER—MODEL 303

This model can record any type of phenomena that lends itself to pulse width coding. Pulses can range from 60 to 1000 microseconds and will be accurate in duration to closer than 2 microseconds. Since each track on the machine may record commutated data consisting of many channels, it is possible to record hundreds of parallel data channels on one tape on a Model 303 machine.

OPTIONS: *Same as Model 306*

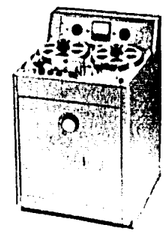
COMBINATION RECORDERS—MODELS 309, 311, etc.

Special Ampex Data Recorders can incorporate combinations of the heads and electronic circuitry of the 303, 306 and 307. Thus the parallel tracks on the same combination recorder might have the widely differing characteristics of each of those models. For example, on its parallel channels such a recorder might have an overall frequency response of 0 to 100,000 cycles/sec.



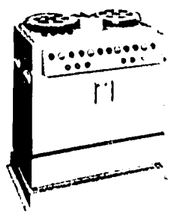
OPTIONS: *Same as Model 306 (but 2 or more tracks)*

"LOW FLUTTER" WIDE RANGE RECORDER—MODEL 500



The Model 500 is a four-track, two-speed magnetic tape recorder designed to achieve extreme stability of tape motion while recording information in the frequency range between 100 and 100,000 cycles. Thus it is able to record fm-fm telemetering data without introducing any objectionable data error from small variations in tape speed. It has the lowest known flutter and wow characteristics of any tape recorder—less than 0.1% peak-to-peak by RDB standards.

Console mounting only
Four tracks only



For specifications and other information, write Dept. X-1274.

Series 300 data recorder in rack mounting.

Series 300 data recorder in console mounting. Rack mounting of portions of the electronic components may be necessary on multi-track console mounted recorders.

Federal ELECTRONIC TUBES

Dependable Electronic Tubes for...

TRANSMITTING • RECTIFYING • INDUSTRIAL
SPECIAL PURPOSE • TELEVISION

F-5680
Used in broadcasting and industrial applications up to 50 Mc.

F-134
Used in high power broadcasting and industrial service up to 22 Mc.

TV TUBE

F-892-R
Used in 5 and 10 KW AM transmitters.

HANDBOOK OF TUBE OPERATION

72 Page booklet giving complete technical data on how to obtain longer service life from your power vacuum tubes. Write Dept. K-2104 for your copy.

FEDERAL TV PICTURE TUBES Federal has the precise tube for your popular-size TV tube replacements . . . rectangular or round with a new high in light output . . . thrilling performance . . . long service life.

OVERLOAD RADIATION SWITCH

FOR THE PROTECTION OF RADIATION COOLED POWER TUBES

This new device will increase the life of your tubes. Used in conjunction with any tube, providing the radiant energy at the switch is not less than 1 watt per square inch. When an overload occurs, the device will give an alarm, cut off plate voltage or reduce the plate voltage until difficulty is corrected — When the overload is no longer present, the device will reset automatically. Adjustment is extremely simple — Ask for bulletin.

Basic Technical Data Covering The Complete Line of FEDERAL POWER TRIODES

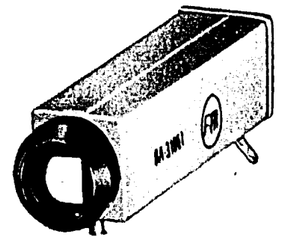
Federal ELECTRONIC COMPONENTS & EQUIPMENT

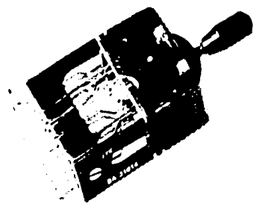
FEDERAL'S AUTOMATIC CIRCUIT CHECKER

For the Simultaneous Check of Continuity • Transpositions • Shorts



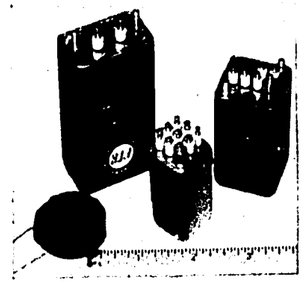
Federal's Automatic Circuit Checker provides extremely simple and reliable means for checking wiring and cabling of circuit equipment such as; signal installations, telephone switchboards, communication receivers and transmitters, electronic navigational aides, radio and television chassis and cable forms and harnesses. This high speed tester accurately locates wiring discrepancies, reduces test time to a minimum — thereby cutting production costs. Each conductor is simultaneously checked against all other conductors and ground for: continuity, short circuits, grounds and transpositions. The flexibility of the design permits ready adaptation to varied types of equipment. Federal's Automatic Circuit Checker when used with an electronic bridge checks the resistance of all components wired in the various circuits.

AUTOMATIC CIRCUIT CHECKER



FEDERAL'S MAGNETIC SIGNAL

Federal's modern Magnetic Drop Signal is outstanding for fast indication and dependable performance . . . under rugged conditions . . . in light or darkness. Compact and efficient, this unit supplants mechanical operation common to old type drop signal. Meets military requirements. Its features include: high-sensitivity; sealed against dust, dirt and moisture; vibration-proof construction; is non-positional; luminous-faced indicator; signal mechanically restored. A self contained sensitive indicator. Designed to operate on 8 ma of d.c. or a.c. power. On closure of circuit the target is closed to rotate 90 degrees around its axis presenting a luminescent white surface in place of the normal black surface to indicate a changed condition. As the target rotates, a contact is closed which can be used to actuate other means of signalling such as audio devices.



MAGNETIC SIGNAL

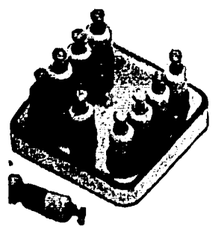
FEDERAL'S MINIATURE ANTI-CAPACITY SWITCHING KEY

For airborne and other equipment—whenever compactness and light weight are prime factors. A miniature, light-weight design with 8 "Break-Make" contacts. Two groups of 12 contact springs each are actuated by a molded phenolic drive roller with a simple motion of the lever. Both sides are non-locking. Contact springs are molded into units of 4 springs each, formed and pre-tensioned which will reduce adjusting of springs after assembly to a minimum. The complete spring pileup consists of 6 interlocking molded blocks, mounted into frame with a screw. Meets military requirements.

MINIATURE TRANSFORMERS

Miniature Hermetically Sealed input, output and inter-stage Audio Transformers, featuring Federal's new hermetically sealed terminal. Hermetically sealed power transformers and chokes. Meets government specifications.

TELEPHONE TYPE RELAYS



Telephone type relays available with a wide variety of contact combinations and ratings. Single and double coil combinations are available with coil resistances ranging from a few ohms to several thousand ohms.

FEDERAL'S NEW TERMINAL HEADER

For Hermetic Sealing and Miniaturization

Provides greater-than-ever ruggedness, efficiency and service life for transformers, capacitors, condensers, relays and many other sealed components. Meets all requirements of MIL-T-27, Grade 1, Class A. "Floating Electrode" construction. Withstands unusually severe vibration and shock without affecting the hermetic seal. Also retards DC plating. Temp. range: —65 degrees to Plus 500 degrees F. Standard headers supplied with a ceramic of contrasting color in the first terminal location — simplifying terminal number identification on the finished component.

Federal — RADIO-TV SELENIUM RECTIFIERS

The revolutionary circuit elements that have led the way to important design advances in TELEVISION & RADIO RECEIVERS & ELECTRONIC EQUIPMENT

Wherever DC power is required there is a Federal Radio-TV Selenium Rectifier to do the job...and do it with an efficiency and reliability that is backed by the outstanding reputation of Federal—America's oldest and largest manufacturer of Selenium Rectifiers.

*These rectifiers have two sections—characteristics given apply to one section only; if both sections are used in series, voltage input is 320 volts.

†The characteristics given for this rectifier are based on its use in a half-wave rectifier circuit with a 3-cell battery load.

‡The characteristics given for this rectifier are based on its use in a full-wave rectifier circuit with a 3-cell battery load.

●'A' after code number indicates locking lug.

FEDERAL'S RADIO-TV SELENIUM RECTIFIER HANDBOOK

84 pages of valuable designs, characteristics and application. Available for 50 cents (coin only).

SELENIUM RECTIFIER EQUIPMENTS

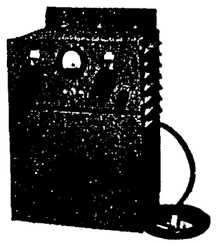
QUALITY-BUILT MAGNETIC AMPLIFIERS

Powered by Quality Controlled

Federal

SELENIUM RECTIFIERS

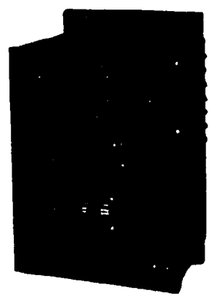
Presently used in a wide range of successful applications for industry and the Armed Forces, such as:



- Voltage Control
- Current Control
- Speed Control
- Position Control
- Temperature Control
- Photoelectric Control
- Counting
- Automatic Regulation

Federal Selenium Rectifiers, in partnership with the right magnetic components, provide Magnetic Amplifiers outstanding for:

Stability • Accuracy • Long Life
High Gain • Fast Response
Low-cost Operation



Submit your magnetic amplifier requirements to Federal—write to Dept. M-3104

POWER SUPPLIES: Designed to furnish a dependable and constant source of D-C power. Whether for industrial or laboratory use, these equipments are available in sizes to serve your requirements. For industrial requirements they are used to power magnetic equipment such as chucks, brakes, clutches, screens, separators, drums and pulleys, and also provide power for lifting magnets, relays, circuit-breakers and D-C motors.

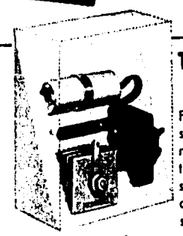
SELENIUM RECTIFIERS *for Industrial Service* From AC to DC . . . Millowatts to Kilowatts



Low-cost power conversion . . . efficient, dependable . . . from a-c to d-c. Introducing new, broad range adaptability in diverse fields, conditions and applications. They obtain direct current from any alternating current source. They are small, light, easy to install. They meet all needs of an unattended service.

FOR COMPLETE DATA Write for Federal's Data Booklet on Selenium Rectifiers. An informative guide to characteristics and applications of the industry's most comprehensive line of high quality rectifiers. Address Dept. F-6104.

The FEDERAL System of ENCAPSULATION

Federal's new method of encapsulating selenium rectifiers and allied components presents an entirely new approach to civilian and military equipment design — particularly where environmental or other unusual conditions necessitate special applications. It is now possible to assemble transformers, capacitors, resistors and other components — interconnected — into single blocks of equipment. Such assembly facilitates the replacement of individual as well as entire groups of components without the necessity of time-consuming repairs. Assures excellent thermal shock characteristics and resistance to vibration and cracking of the sealed unit over wide temperature ranges. Embedments withstand low temperatures to −65°C, as well as high temperatures to plus 125°C. Send for Bulletin F 534 for complete details.

FEDERAL CONTACT PROTECTOR

The Federal Contact Protector permits a rise but not high enough to cause arcing; then the voltage decays to correct line voltage. Its features include:

1. Suppresses contact arcing
2. Extends Contact Life by more than 100 times
3. Reduces circuit failure due to contact erosion (locking, surging, etc.)
4. Minimizes RF Interference
5. Has negligible effect on speed of operation of circuit
6. Needs no attention
7. Is easily installed
8. Requires little space
9. Is low in cost
10. Available as hermetically sealed unit to meet all JAN specifications.

Federal Telephone and Radio Corporation

100 KINGSLAND ROAD, CLIFTON, NEW JERSEY

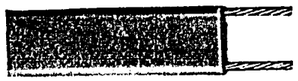
In Canada: Federal Electric Manufacturing Company, Ltd., Montreal, P. Q.
Export Distributors: International Standard Electric Corp., 67 Broad St., N. Y.

FEDERAL VARIETY OF CABLE TYPES

Federal's cable division produces a variety of H-F cable types. Some of these cables are produced by Federal *exclusively*. All are made to the most exacting standards of quality and control. The materials used are the finest research has developed, assuring top electrical characteristics. Initial dimensional precision helps to maintain stability over a wide temperature range.

SOLID DIELECTRIC COAXIAL CABLES

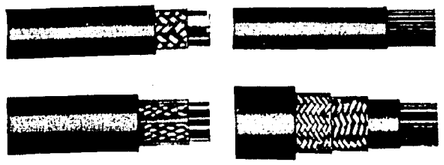
consist of a solid or stranded inner conductor, dielectric material, one or two copper wire braids, a synthetic resin protective jacket and, in some cases, a protective armor or metal braid. Dual coaxial cables are similar in design to the solid dielectric types, except that two accurately-spaced inner conductors are used.



LOW-CAPACITANCE COAXIAL AIR-SPACED CABLES

have a construction similar to that of the solid dielectric types, except that air is made a portion of the dielectric. One method of accomplishing this effect and still maintaining a high dielectric strength is through a construction involving an inner conductor in a thin-walled dielectric tube. This is achieved by means of a dielectric thread wound in a long spiral.

SPIRAL DELAY, HIGH IMPEDANCE LINES



are constructed with an inner conductor spiraled around a center dielectric core and covered with dielectric, braid and jacket. In one typical design each foot has an electric length equivalent to approximately 15 feet of coaxial cable of similar diameter.

TELEVISION ANTENNA LEAD-IN WIRE

consists of two accurately-spaced conductors over which is extruded the dielectric material. These lead-in wires have no braid, jacket or armor, except in special cases. The advances in television have meant ever-new approaches to the design of TV lead-in to the point where it has taken many varied forms, the latest being the tubular shaped "pipeline" lead-in.

SPECIAL CABLE PROBLEMS

Federal Telephone and Radio Corp. maintains a stock of most of the required types. When requirements are so special that they cannot be met by Federal's cable types, Federal research and engineering facilities are readily available to develop any new cable constructions. Charges are based on quantity. Specal Orders—like all Federal production—are executed under the high standards maintained by Federal "Quality Control." Every length of cable is carefully checked to see that it meets *all* tests indicated for the type ordered. Toughness, heat resistance, moisture resistance, dielectric strength, cold-bend—these are just a few of the many tests that must be passed before approval for shipment is given. Federal's consulting service is yours for the asking.

Federal also manufactures many types of plastic-insulated wires and multi-conductor cables for television, intercom and numerous special purposes.

COMMUNITY TV COAXIAL CABLE

FEDERAL'S "BIG 5"—The answer to any Community TV Lead-in problem . . . Engineered for long life, low line loss and DEPENDABLE all-weather signal transmission . . . over the longest link. Federal's K-14, RG-11/U and RG-59/U are the H-F coaxials you can specify with utmost confidence . . . for community TV Distributing Systems in any area . . . for any amplifier system used.

Wherever the annoying, profit-eating problems of signal leakage and revenue loss exist, the answer is Federal's new K-125 and K-126 *non-radiating* alternates for RG-11/U and RG-59/U—used in conjunction with Federal's K-14—the primary lead-in famous for lowest line loss, long cable runs and fewer amplifiers required. Both K-125 and K-126 are *double-shielded* and *double-jacketed*.

All of the "BIG 5" are made to Federal's high standards of quality—and that means *dependable, all-weather transmission performance!*

Principal characteristics of Federal's "BIG 5" of Community TV

An Original Development by Federal

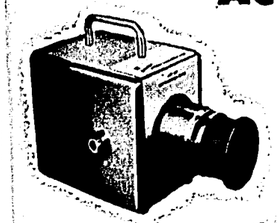
RG TYPE CABLES

WITH THE NEW LOW-TEMPERATURE NON-CONTAMINATING THERMOPLASTIC JACKET

Two types of jackets are used by Federal for its standard coaxial cables. The first is Poly Vinyl Chloride, a rugged material capable of standing the tests of time and temperature. This jacket material is contaminating; that is, the migration of the plasticizer through the braid into the dielectric results in some loss of dielectric strength and increase of attenuation after long use.

The second is a non-contaminating vinyl which has all the properties of Poly Vinyl Chloride but will not contaminate the dielectric at temperatures above —25 degrees C.

Federal engineers discovered that under certain severe operating conditions (below —25 degrees C) the second type of vinyl jacket would not withstand the low temperature. To eliminate contamination and solve the cable industry's problem of meeting cold bend requirements of the military services, Federal developed a new low-temperature, non-contaminating thermoplastic jacket—meeting all requirements of the "Exceptions to Specifications JAN-C-17A" (dated March 21, 1949, and amendment thereto dated January 9, 1950).



JAN-C-17A requires conditioning of the cable at —40 degrees C for 20 hours. It is wrapped around a mandrel 10 times the diameter of the cable. The cable is heat-aged for two weeks at +80 degrees C. It is then conditioned again at —35 degrees C for 20 hours, and another cold bend test applied. At no time during the bend tests can fractures or cracks appear on either the jacket or the dielectric.

The new RG types are outstanding for their longer service life under the most adverse conditions. Their non-contaminating feature means there is no reduction in dielectric strength due to molecular migration. They are a primary example of Federal leadership in the development and production of top-quality H-F coaxial cables.

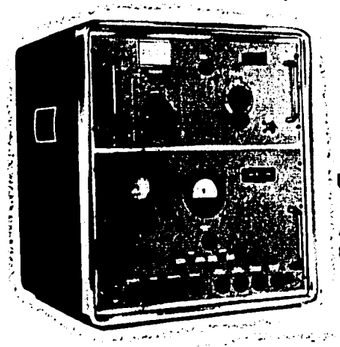
THE SYMBOL OF QUALITY, ACCURACY, DEPENDABILITY

The equipments illustrated are typical examples of the complete line of PRD quality test components. Rigorously engineered and meticulously manufactured to the highest attainable standards, these units are now standard equipment in many of the leading research and development laboratories throughout the world. In addition to the widely diversified standard equipments offered, PRD maintains a highly qualified staff for special products development. This staff is at your service at all times for consultation.

Type 587
UHF FREQUENCY METER
470-900 mc/s

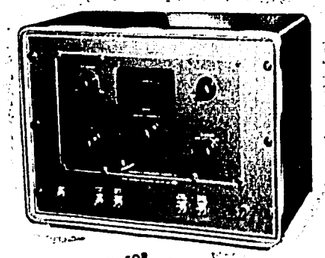
Type 801-A
UNIVERSAL KLYSTRON POWER SUPPLY
300-1500 V at 65 ma;
1.5–3.6 KV at 25 ma

FREQUENCY MEASURING DEVICES



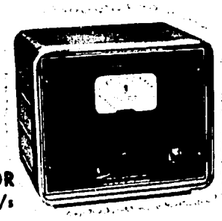
Frequency Meters	Frequency Range (kmc/sec)	Type No.	Transmission Line Size (Nominal O.D.—inches)	R—Reaction T—Transmission
General Purpose	0.47–0.95	587	⅞	T
	2.40–3.40	583	⅞	R
	4.00–10.0	562-A	⅞	Detector included
	3.95–5.85	574	2 x 1	R
	5.85–8.20	575	1½ x ¾	R
	7.05–10.0	576	1¼ x ⅝	R
	8.2–10.0	585-A	1 x ½	R
	8.2–10.0	585-B	1 x ½	T
	8.2–10.0	586-A	1¼ x ⅝	R

In addition to the General Purpose Frequency Meters listed above, PRD manufactures a complete line of Precision Frequency Meters covering the entire frequency range from 0.55 to 39.0 kmc/s. Transmission line sizes include ⅞" coaxial line and all standard wave guide sizes from 0.280" x 0.140" I.D. to 2" x 1" O.D. All types are available in Reaction and Transmission styles.



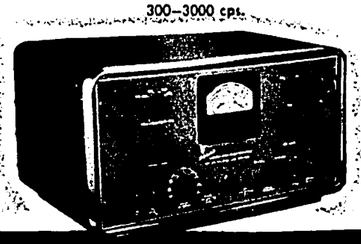
The Type 500 Frequency Standard Multiplier is available to generate standard frequency signals in the UHF and microwave regions when used with the Type 612-A Tunable Crystal Mount.

SIGNAL SOURCES AND RECEIVERS



ITEM	DESCRIPTION
TUBE MOUNTS	
Type 701	For type 2K28 klystrons, 2.400—3.445 kmc/sec
Type 702	For type 2K25 klystrons, 8.50—9.60 kmc/sec, 1¼x⅝ waveguide
Type 703	For type 2K25 klystrons, 8.50—9.60 kmc/sec, 1x½ waveguide
OSCILLATORS	
Type 705	Covering the frequency range from 7.0 to 11.0 kmc/sec
Type 706	Covering the frequency range from 3.6 to 7.3 km/sec
POWER SUPPLIES Type 801-A	Providing all required electrode voltages to operate a wide variety of klystrons, plus internal modulators
SPECTRUM ANALYZERS	
Type 853	Covering the frequency range from 2.40 to 3.40 kmc/sec
Type 854	Covering the frequency range from 8.50 to 9.60 kmc/sec
Type 855	Combining both of the above ranges in one instrument
GENERATORS	
Type 902	Covering the frequency range from 3.65 to 7.30 kmc/sec
Type 903	Covering the frequency range from 7.00 to 10.5 kmc/sec
Type 907	Covering the frequency range from 40 to 900 mc/sec
NOISE GENERATORS	
Type 904	For the direct measurement of noise factors in the range of 10 to 1000 mc/sec

Type 854
UNIVERSAL SPECTRUM ANALYZER
8.5–9.6 kmc/s



Type 907
BROADBAND SWEEP FREQUENCY GENERATOR
40-900 mc/s

Type 904
VHF-UHF NOISE GENERATOR
.01–1.0 kmc/s

Type 275
VOLTAGE STANDING WAVE RATIO AMPLIFIER
300–3000 cps.

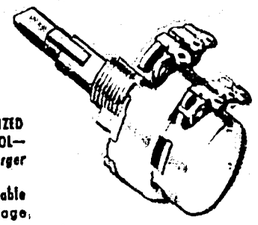
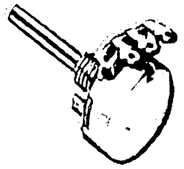
AND NOW IN PRODUCTION!

PRD Magnetic Amplifiers

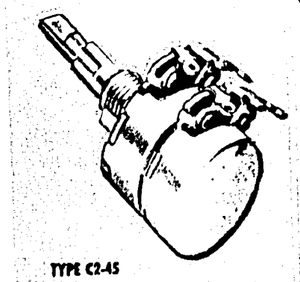


Our Magnetic Amplifier Division is now in production to meet your needs with custom designs or "packaged" units. The T806 is a low level amplifier which will amplify a signal from a thermocouple, strain gauge, thermistor bridge, photo tube, etc., to operate an insensitive meter or relay.

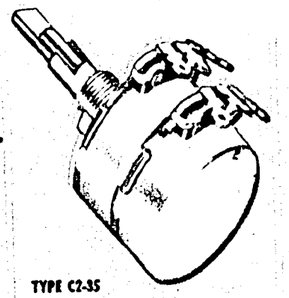
COMPLETE CIVILIAN LINE



Exceptionally **good delivery cycle on civilian orders due to tremendous mass production facilities.**

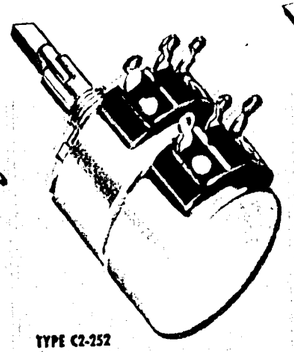


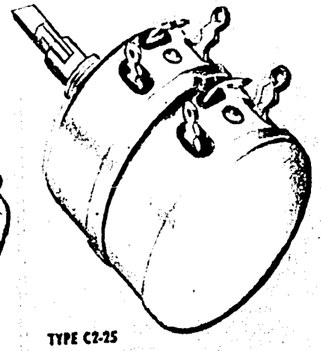
TYPE C45-70



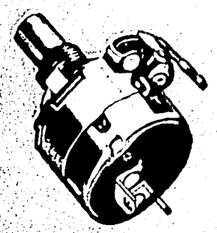
NEW HIGH QUALITY MINIATURIZED "DIME-SIZE" CIVILIAN CONTROL— ***Performance Fully Equals Larger Types.***

TYPE 70, 3/4" diameter variable composition resistor. Wattage rating: .3 watt for resistances through 10,000 ohms, .2 watt with 350 volts maximum across end terminals for resistances over 10,000 ohms. Also available in concentric shaft tandem construction C45-70 as shown above.

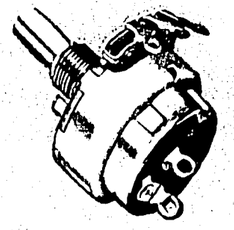




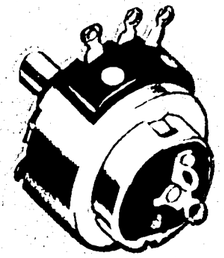
TYPE C2-45



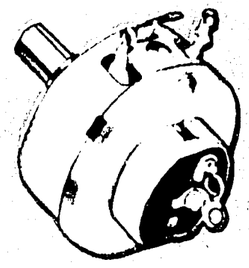
TYPE C2-35



TYPE C2-252



TYPE C2-25



TYPE GC-45, 15/16" diameter variable composition resister. Wattage rating: 1/2 watt for resistances through 10,000 ohms, 1/3 watt for resistances over 10,000 ohms through 100,000 ohms, 1/4 watt with 500 volts maximum across end terminals for resistances over 100,000 ohms. Available with or without illustrated attached switch and in concentric shaft tandem construction C2-45 as shown above.

TYPE GC-35, 1 1/8" diameter variable composition resister. Wattage rating: 3/4 watt for resistances through 10,000 ohms, 2/3 watt for resistances over 10,000 ohms through 25,000 ohms, 1/2 watt with 500 volts maximum across end terminals for resistances over 25,000 ohms. Available with or without illustrated attached switch and in concentric shaft tandem construction C2-35 as shown above.

TYPE GC-252, 2 watt, 1 17/64" diameter variable wirewound resister. Available with or without illustrated attached switch and in concentric shaft tandem construction C2-252 as shown above.

TYPE GC-25, 4 watt, 1 17/32" diameter variable wirewound resister. Available with or without illustrated attached switch and in concentric shaft tandem construction C2-25 as shown above.

Typical concentric shaft tandem with panel and rear sections operating separately from concentric shafts (TYPE C45-70 ILLUSTRATED). Similar construction available for all military resistors.

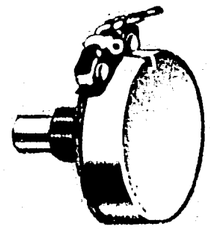
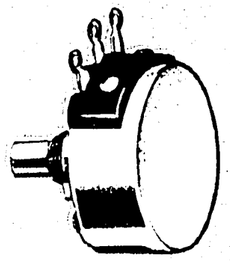
Describes Electrical and Mechanical characteristics, Special Features and Constructions of a complete line of variable resistors for military and civilian use. Includes dimensional drawings of each resistor. *Write today for your copy.*

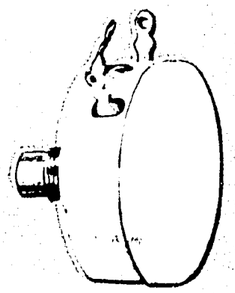


COMPLETE MILITARY LINE

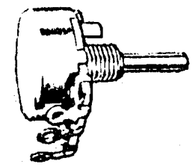
Immediate delivery **from stock on 189 types including JAN-R-94 and JAN-R-19 types of variable resistors.**



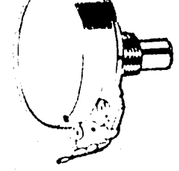
TYPE 45, (JAN-R-94, Type RV2) *1/4 watt, 15/16" diameter variable composition resistor.* Also available with other special military features not covered by JAN-R-94 including concentric shaft tandem construction. Attached switch can be supplied.



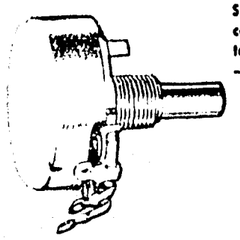
TYPE 35, (JAN-R-94, Type RV3) *1/2 watt, 1 1/8" diameter variable composition resistor.* Also available with other special military features not covered by JAN-R-94 including concentric shaft tandem construction. Attached switch can be supplied.



TYPE 252, (JAN-R-19, Type RA20) *2 watt, 1 17/64" diameter variable wirewound resistor.* Also available with other special military features not covered by JAN-R-19 including concentric shaft tandem construction. Attached switch can be supplied.



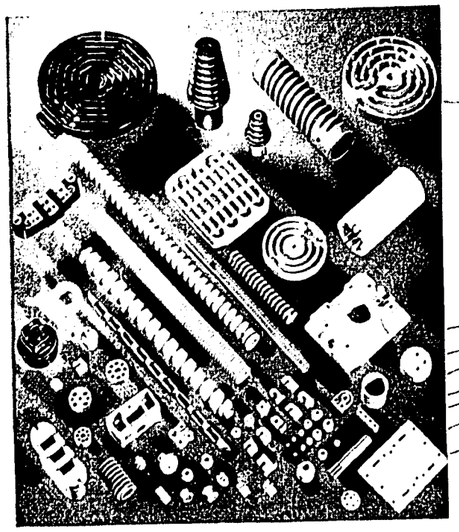
TYPE 25, (JAN-R-19, Type RA30) (May also be used as Type RA25) *4 watt, 1 17/32" diameter variable wirewound resistor.* Also available with other special military features not covered by JAN-R-19 including concentric shaft tandem construction. Attached switch can be supplied.



TYPE 65, (Miniaturized) *1/2 watt 70°C, 3/4" diameter miniaturized variable composition resistor.*

TYPE 90 *1 watt 70°C, 15/16" diameter variable composition resistor.* Attached switch can be supplied. Also available in concentric shaft tandem construction.

Specially designed for military communications equipment subject to extreme temperature and humidity ranges. –55°C to +150°C...aridity to saturation.



TYPE 95, (JAN-R-94, Type RV4) *2 watt 70°C, 1 1/8" diameter variable composition resistor.* Also available with other special military features not covered by JAN-R-94 including concentric shaft tandem construction. Attached switch can be supplied.

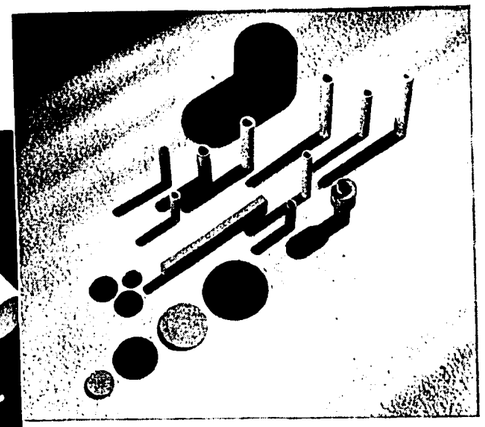
Stupakoff PRODUCTS

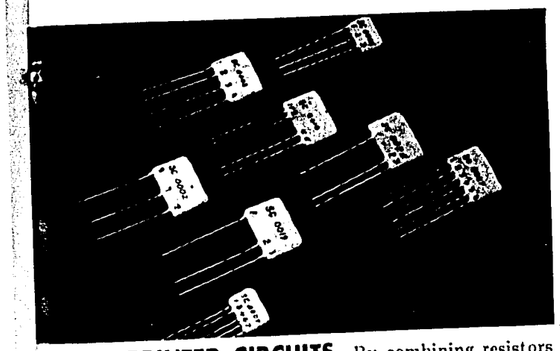
CERAMIC PRODUCTS—Stupakoff is a leading supplier of pressed, extruded, machined, ground and assembled ceramic products for electrical and electronic applications, for all voltages, frequencies and temperatures. Specialized resistor ceramics, metallized ceramics, high thermal shock resisting ceramics and ceramic dielectrics are described below. Send for information, giving proposed application and approximate requirements.



RESISTOR CERAMICS—Stupakoff Temperature-Sensitive Resistors are used for temperature indicating or measuring equipment such as Radiosonde, for infra-red light source and for heating elements. Supplied complete with terminals, in the form of rods, tubes, discs, bars, rings, etc.

STUPALITH—Where thermal shock conditions prevail, parts made of STUPALITH will withstand extremely severe service. Stupakoff makes parts ranging from a fraction of an ounce to several pounds in weight, in simple or intricate shapes, by pressing, extrusion, casting or ramming.

Two principal compositions are ordinarily employed: "zero" expansivity compositions, and non-porous compositions having near-zero expansivities. For parts requiring a high degree of dimensional accuracy, our production process includes machining or grinding to precision tolerances. Safely used at temperatures up to 2400°F.

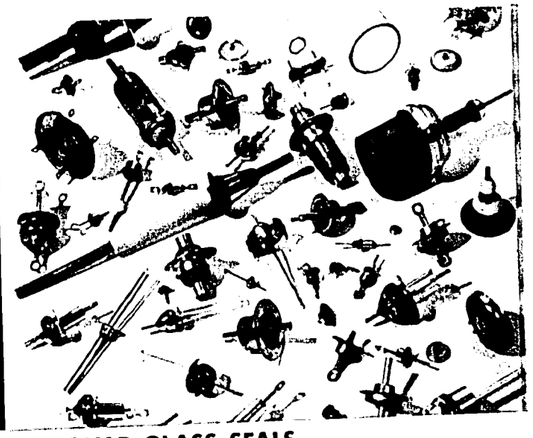


CERAMIC DIELECTRICS—Stupakoff makes general purpose Ceramic Dielectrics for by-pass, lead through blocking, standoffs and trimmer applications. Temperature compensating Ceramic Dielectrics have coefficients from P-100 to N-2700, and high K materials up to K-6000. Made in the form of tubes, discs and special shapes, plain or silvered.

LATROBE,

for Electrical and Electronic Applications

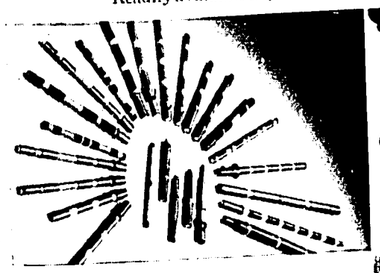
CERAMIC ASSEMBLIES



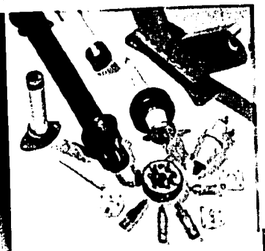
PRINTED CIRCUITS—By combining resistors and capacitors of precision values, in circuits designed in accordance with the requirements of individual applications, Stupakoff printed circuits save space and weight, speed assembly, reduce costs, minimize assembly errors. Soldered connections are reduced by 25% to 80%, assemblies are lighter and more compact, production time is reduced and better products are made. Sturdy, compact, accurate.

METALLIZED CERAMICS

The rotor shafts shown below consist of metal bands attached securely to ceramic rods and are typical of Stupakoff precision manufacture. On a mass production basis, concentricity of components, for example, is held to less than ±0.001 in.



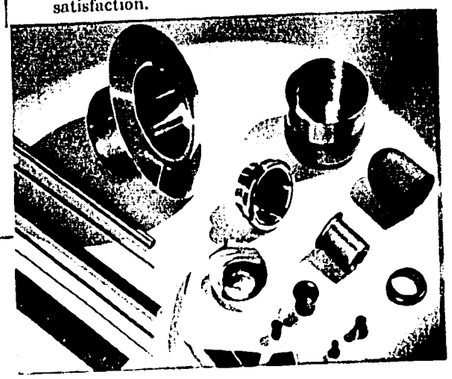
Readily available in production quantities.

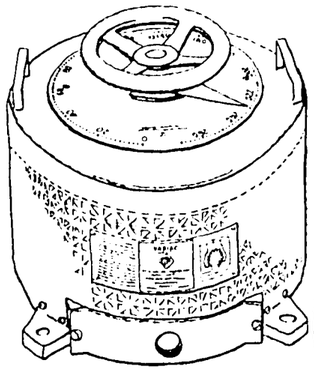


KOVAR-GLASS SEALS

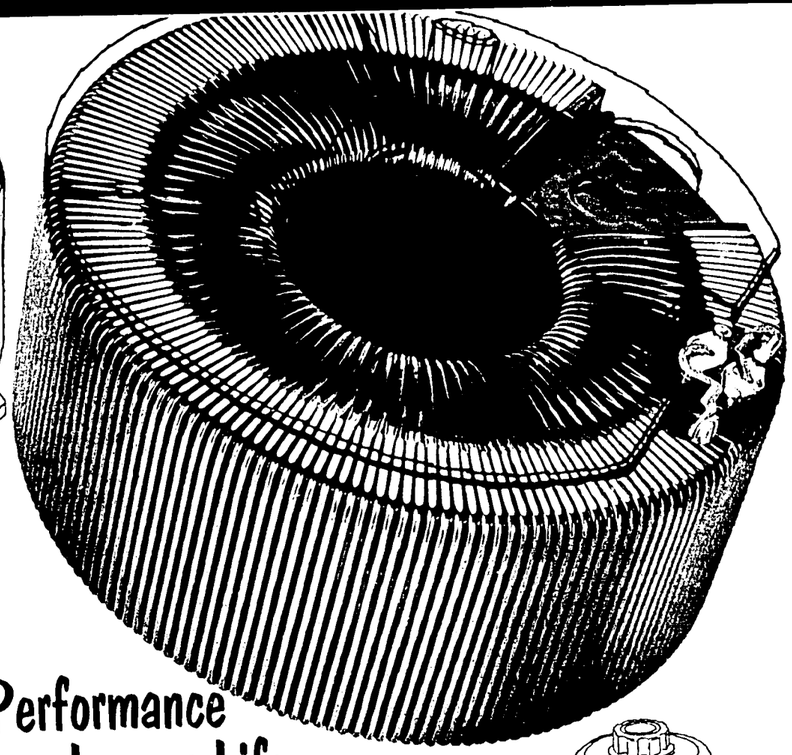
Perfectly closed and durable air-tight assemblies are made with Stupakoff Kovar-Glass Seals. The use of hard glass for these seals provides the highest degree of protection against thermal shock and weathering. Kovar is the ideal metal for such seals because its expansion characteristics closely match those of the hard glass to which it is readily bonded. The resulting seals are uniform in quality and easily assembled.

Stupakoff Seals are available in a wide variety of standard sizes and designs, and can be made in many special forms, as indicated by the illustration above. Extensive experience has given Stupakoff the engineering and manufacturing knowledge and skill to produce Kovar-Glass Seals that are made accurately, uniform and dependable. We will gladly submit samples and quotations.





STRAINS, STAND-OFFS



The metallized strains, spreaders and standoffs shown above and to the right are precision-made, and meet the most exacting requirements.

KOVAR METAL—The ideal alloy for glass sealing, Kovar matches the expansivity of hard glass over the entire working temperature range. It resists mercury attack, has ample mechanical strength and seals readily with simple oxidation procedure. It is available as sheet, strip, foil, rod, tube, wire—or fabricated into cups, eyelets, leads and other shapes. The prominent users of KOVAR and the length of time they have employed this metal are convincing proof of satisfaction.

PENNSYLVANIA

. . . for Improved Performance and Even Longer Life

Variac®

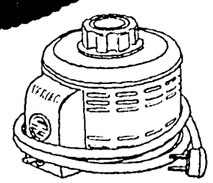
with NEW Duratrak *Construction*

Featuring

Good Regulation — *output voltage is substantially independent of load*

Very High Efficiency — *variable autotransformer rather than resistive control makes for very low losses*

Smooth Linear Control — *the calibrated dial enables accurate setting to any output voltage within the VARIAC's range*



Long Life — *the new DURATRAK construction insures a life as long as that of fixed-ratio power transformers operated at rated loads*

Unaffected by Surges — *VARIACS with DURATRAK will withstand initial surges as high as ten times rated current*

Small Size — *the VARIAC is smaller than any other control of equal power rating*

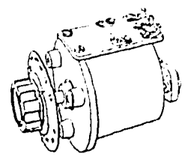
Rugged Mechanical Design — *dependable, long-life construction — no delicate parts — easy conversion from panel to table mounting*

Minimum Maintenance — *an occasional wiping of the brush track with an alcohol-moistened rag (not supplied) is all that is required — under normal conditions the new DURATRAK will not deteriorate*

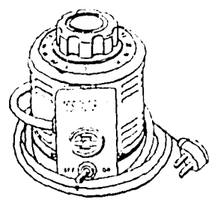
The VARIAC® is the original continuously-adjustable autotransformer first made available by General Radio Company over 20 years ago.

Hundreds of thousands of VARIACS have been sold for industrial and laboratory use throughout the world.

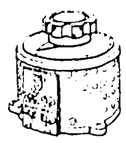
NOW a new, improved, brush-track coating is announced to make the VARIAC even more reliable. The new DURATRAK coating — an alloy of silver applied by a carefully controlled process — eliminates all oxidization problems which may become critical under severe conditions of operation.



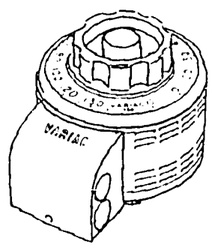
The DURATRAK coating limits failure to the same factors which affect standard fixed-ratio transformers . . . breakdown of insulation due to prolonged overheating, resulting from operation at currents in excess of rated over extended periods.



The new DURATRAK brush track coating is but another step in a continual process of development, designed to make the VARIAC the best voltage control you can obtain.



The VARIAC line is listed on the adjacent page. These autotransformers may be used in many circuits to control any device operating from a-c lines. VARIACS can be used singly or ganged for either higher power or for polyphase connections.



Listing of Variac® UNITS and ASSEMBLIES

All "V" model VARIACS have the new DURATRAK — an improved brush track which sets a new high standard in reliability. VARIACS now have higher ratings per unit volume — will operate at overloads for longer periods — will withstand initial surges ten times their rated current — are practically maintenance free.

Bomac MICROWAVE

GAS SWITCHING TUBES

Bomac has available an extensive line of TR, ATR, Pre TR and attenuator tubes covering all the frequency bands and power levels in use. Many types are in high level production; specialized types can be supplied on short notice. Inquiries are invited on types not listed, or for special frequency bands. If clearance is needed, you will be advised of the appropriate government agency to contact.

	FREQ.	DESCRIPTION	TYPE

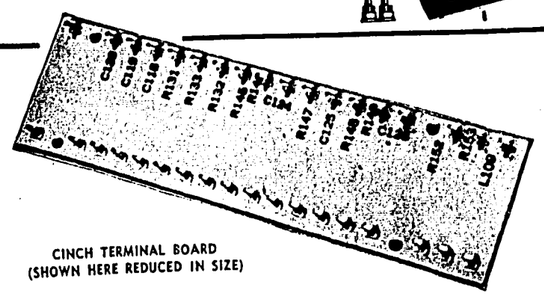
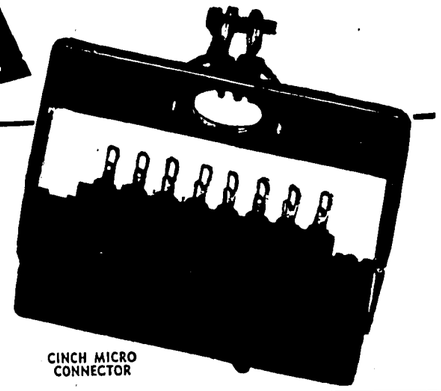
JONES FANNING STRIPS



CINCH

The vast engineering behind every Cinch component concerns itself primarily with the problems of perfection, precision and performance in all phases of communications and industrial electronic equipment. Cinch small individual assemblies have always fully performed the service for which they were designed and in many cases have anticipated engineering needs of the future. So that today, judged by service, and by numbers in use as well as by testimonies of users, CINCH PARTS ARE STANDARD. They meet the demands for higher quality materials and closer tolerance in all communications and industrial control equipment.



SEND FOR COMPLETE CATALOG

Cat. No. 51 contains complete data on all of the Cinch electronic components. Requests on company letterheads will be promptly answered.

PULSESCOPE®

The Oscilloscope that portrays the Pulse by Waterman

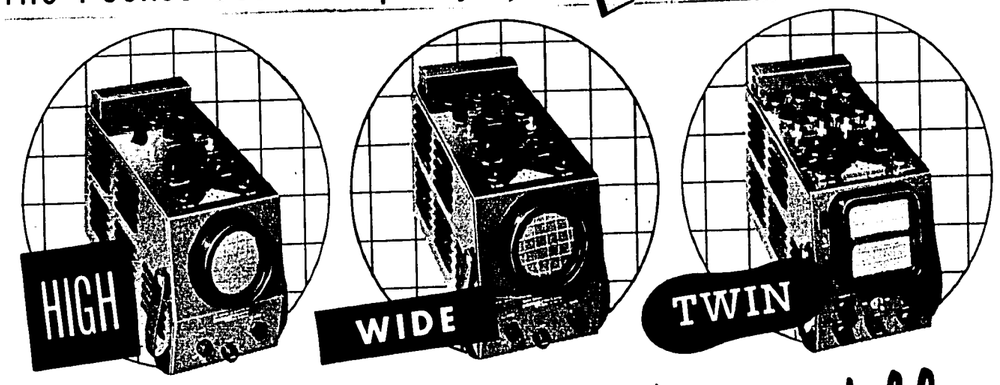
Classic Examples of Precision Engineering...

Investigations of complex waves take great strides forward when either a Waterman SAR or LAB PULSESCOPE is employed. Their compactness, portability and precision have established a new high in pulse measurement instruments for all electronic work. Each PULSESCOPE has internally generated markers which are synchronized with the sweep with the basic difference that the sweep in the LAB PULSESCOPE initiates the markers while in the SAR PULSESCOPE it is the crystal controlled markers which initiate the sweep. Power supply requirements of 50 to 1000 c.p.s. at 115 Volts permits operation almost anywhere.

The SAR PULSESCOPE, model S-4-A, is characterized by a pulse rise time of 0.035 microseconds thru a video amplifier with a sensitivity of 0.5 Volts p to p/inch. A vertical delay of 0.55 microseconds is optional. A and S sweeps covering a continuous range from 1.2 to 12,000 microseconds are augmented by R sweeps, which in turn are variable from 2.4 to 24 microseconds. A directly calibrated dial permits R sweep delay readings from 3 to 10,000 microseconds.

The LAB PULSESCOPE, model S-5-A, has equivalent rise time of 0.035 microseconds, a fixed 0.55 microseconds vertical delay and 0.1 Volts p to p/inch sensitivity, so arranged as to assure portrayal of leading edges on displayed signals. A precision calibrated voltage is provided as well as an optional sweep expansion of 10 to 1. A built-in trigger generator voltage is available for synchronizing any associated test equipment.

WATERMAN RAYONIC CATHODE RAY TUBE DEVELOPMENTS



Since the introduction of the Waterman RAYONIC 3MP1 for miniaturized oscilloscopes, scientists in our laboratories have diligently searched for more perfect answers to present day cathode ray tube problems. Such research led to the introduction of the revolutionary new 3SP and 3XP type cathode ray tubes. These tubes were designed with multi-trace oscilloscopy in mind. Every avenue of practical design was explored to produce tubes with bright, sharp traces and high deflection sensitivity at medium anode potentials.

TUBE	PHYSICAL DATA			TYPICAL VOLTAGES				DEFLECTION FACTOR V/IN.		MAX. VOLTS	
	Face	Length	Base	Anode # 3	Anode # 2	Anode # 1	Grid # 1	D1 to D2	D3 to D4	Anode # 3	Anode # 2

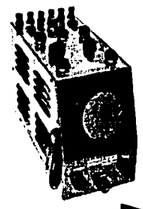
POCKETSCOPE®

The Pocket Oscilloscope by Waterman



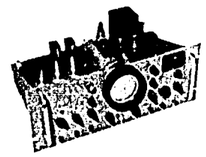
...light...compact...accurate...portable

The HIGH, WIDE and TWIN POCKETSCOPES have become the "triple threat" of the oscilloscope industry. Their small size, light weight and incredible performance, has skyrocketed this team of truly portable instruments into unparalleled prominence. Each oscilloscope features DC coupled amplifiers in both its vertical and horizontal channels. The HIGH GAIN, S-14-A POCKETSCOPE, has a vertical sensitivity of 10 millivolts rms/inch, and a frequency response within −2 db from DC to 200 KC, while the WIDE BAND S-14-B POCKETSCOPE is characterized by frequency response within −2 db from DC to 700 KC and a sensitivity of 50 millivolts rms/inch.

The TWIN POCKETSCOPE is essentially two HIGH GAIN POCKETSCOPES with individual cathode ray tubes, amplifiers, controls, but a common sweep generator. All these are endowed with many identical characteristics. Their sweep generators can be operated as triggered or repetitive over a frequency range from 0.5 cycles to 50 KC, with synchronization polarity optional. Return traces are blanked and provisions are made for modulating the intensity in each cathode ray tube.

Laboratory quality has not been sacrificed in order to accomplish portability and ruggedness. Investigate the many advantages of Waterman POCKETSCOPES.

POCKETSCOPE



S-11-A

The INDUSTRIAL POCKETSCOPE, model S-11-A, has become America's most popular DC coupled oscilloscope because of its small size, light weight, and unique flexibility. This compact instrument has identical vertical and horizontal amplifiers which permit the observation of low frequency repetitive phenomena, while simultaneously eliminating undesirable trace bounce. Each amplifier sensitivity is 0.1 Volt rms/inch. The frequency responses are likewise identical, within −2 db from DC to 200 KC.

Discover for yourself the amazing utility of this tiny work-horse of industrial electronics.

RAKSCOPE®

S-12-B

The S-12-B RAKSCOPE is a rack mounted, JANized version of the famous Waterman S-11-A POCKETSCOPE, with the addition of a triggered sweep and a special calibrating circuit for rapid frequency comparisons. The entire oscilloscope is built to occupy but seven inches when mounted in a standard relay rack.

Because provisions are made for applying input signals from the rear, as well as the front, the S-12-B is the ideal combination, systems monitor and trouble-shooting oscilloscope. Investigate the multiple applications of this instrument as an integral part of your own rack mounted apparatus.

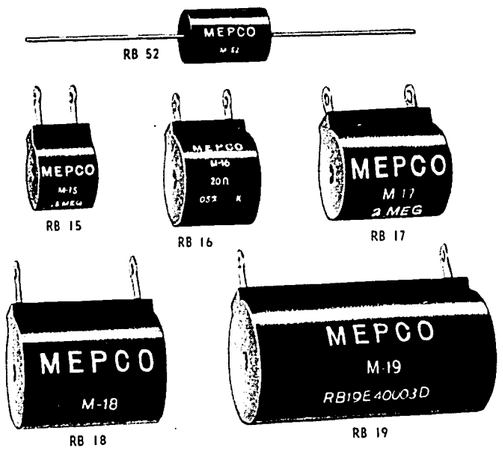
MEPCO PRECISION

MIL-R-93A NEW SEALED TYPES



Over 2 years of laboratory development and testing were required to achieve a sealed resistor design up to Mepco's standard of quality. No sacrifice of our standard time-proven features have been made in order to perfect this sealed resistor.

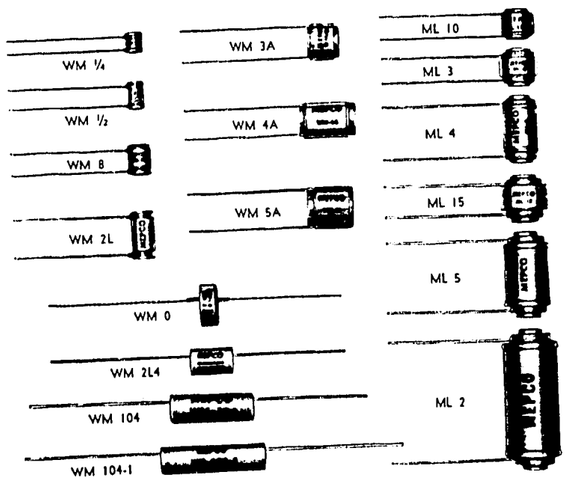
Completely hermetically sealed, these resistors provide perfect protection against immersion and high humidity.

All requirements of MIL-R-93A and JAN-R-93 are exceeded.

The operating temperature is —65°C to +125°C. Temperature coefficients of ±.003%/°C to ±.017%/°C depending upon your requirements. (Refer to MIL-R-93A).

Other sizes available on special order.

WIRE TERMINAL TYPES

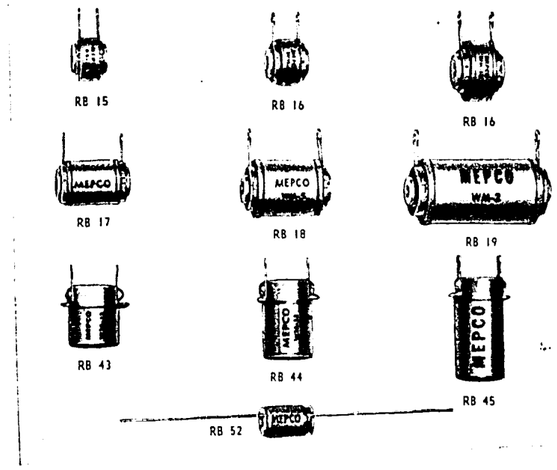


Designed for direct connection into circuit without use of additional leads.

These resistors are of the same basic construction and materials as standard JAN and MIL types therefore providing equal dependability and long life.

Low Temperature Coefficient alloys provide ±.003%/°C from —65°C to +125°C unless otherwise specified by your requirements.

Resistance tolerances range from ±1% down to ±.02%. Sets of matched resistors can be supplied ±.005% or lower.



Special types not shown can be manufactured to your exact specifications.

MEPCO, INC.

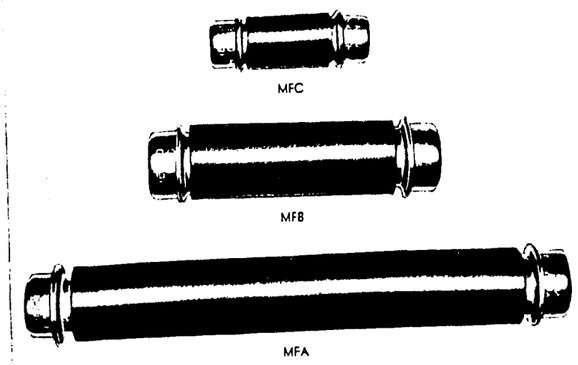
RESISTORS MEPCO

MIL-R-93A JAN-R-93 STANDARD TYPES

Our standard time proven JAN, MIL and Commercial lug terminal resistor.

Manufactured and 100% tested in accordance with the applicable specifications, these resistors are used by every major electronic equipment manufacturer in the country.

Reversed and balanced PI-windings for low inductance, with use of only the finest resistance alloys.



Impregnated with approval fungus, moisture and salt waterproofing compounds.

JAN approved non-hydroscopic steatite bobbin, specially treated prior to winding in order to provide additional protection for fine enameled wire.

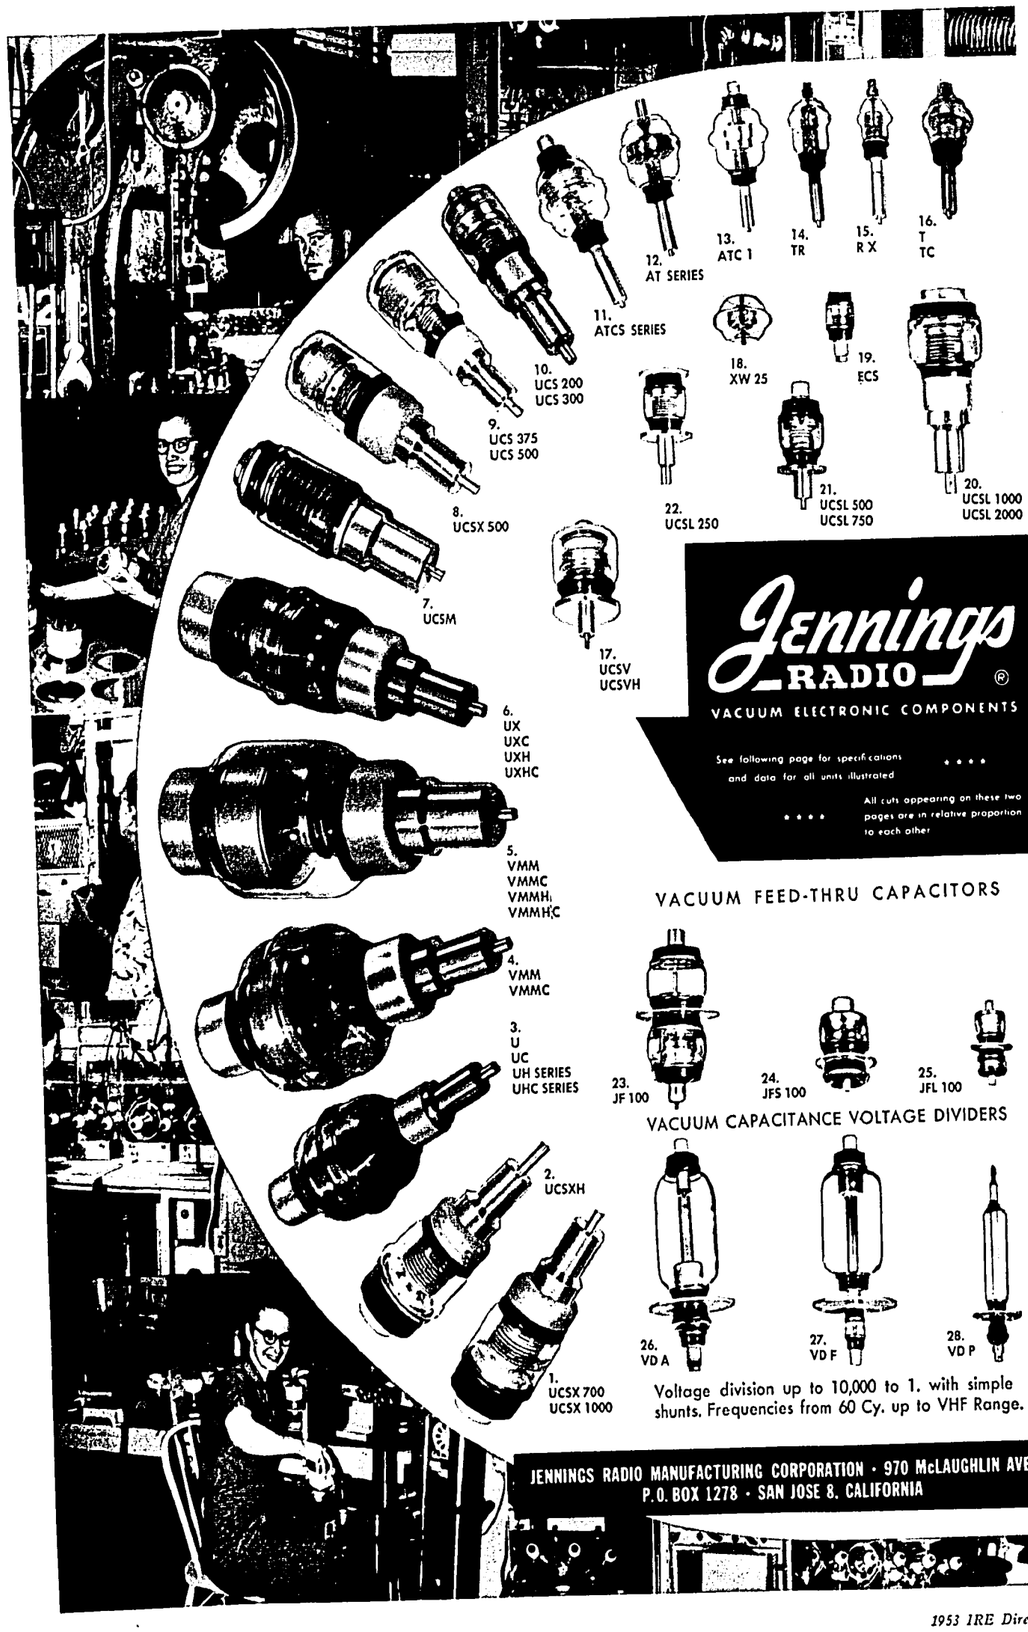
Protective fungi resistant acetate label.

Rigid hot solder coated brass terminals for easier soldering.

JAN-R-29 METER MULTIPLIERS

Surpass all requirements of JAN-R-29

HERMETICALLY SEALED:
Insures dependable operation under most severe moisture conditions.



STEATITE PROTECTIVE CASING:
Glazed surface prevents high voltage leakage.

WINDINGS:
"Certified" low temperature coefficient resistance alloys properly "aged" to provide long term stability.

REPLACEABLE INTERNAL SECTIONS:
Eliminate complete loss of unit if damaged.

FERRULE TERMINALS:
Heavy nickel plated brass. Corrosive resistant. Fit standard fuse clips.

Constantin's latest achievement —

Glass to metal vacuum sealed transistor mounts that provide complete protection from moisture, dust, varying heat conditions and shock. Germanium can be sealed in vacuum or inert gas. A special soldering moat is a feature for easy assembly. Leads are spaced to fit standard sub-miniature sockets and can be supplied 1½" long for soldering directly to circuits.

AN CONNECTORS
Precision construction throughout. Glass to metal vacuum seal assures protection against varying atmospheric conditions. Available in most JAN specifications.

MULTIPLE HEADERS
Plug and standard types. Built to withstand thermal shock and provide stabilized atmospheres. Available in various configurations.

SINGLE TERMINALS AND END SEALS
Terminals available in all combinations of hooks, eyes, lubes, and pierced flats. Test rated from 1,000 to 15,000 volts R.M.S. and 5 to 25 amps. Single end seals available in various sizes for items requiring stabilized atmospheres.

HIGH COMPRESSION SEALS AVAILABLE

CRYSTAL HOLDERS
The highly rigid metal bridge unit is designed to withstand severe strain without deformation. The one piece sealing medium minimizes stresses on the pins which could produce internal strain.

CUSTOM ENGINEERED COMPONENTS
Constantin is capable of manufacturing any glass to metal sealed requirement. Free engineering assistance given upon request.

Hot tin plating at 530°F. facilitates easy soldering, thereby eliminating rejections during assembly. Special plating supplied on request. Glass to Kovar seals, made under Westinghouse patents, are ideal for use in extreme temperatures. Blueprints can be furnished upon request.

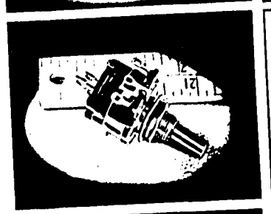
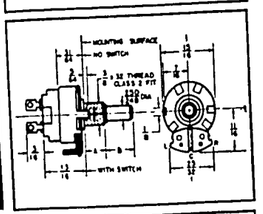
COMPOSITION-ELEMENT CONTROLS (Series 48)

5/8 DIA. FOR MINIATURIZATION

Linear, 500 ohms to 5 megohms.
Taper, 2,500 ohms to 2.5 megohms; 10% resistance at 50% C.W. rotation.
Rated at 0.2 watt for linear units.
300° rotation.
Shaft locking device may be incorporated upon request.
Single and multiple units available.

Engineering Bulletin No. 121



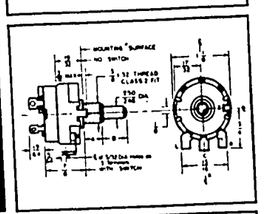


COMPOSITION-ELEMENT CONTROLS (Series 47)

15/16 DIA.

Linear, 500 ohms to 5 megohms.
Tapered, 1,000 ohms to 5 megohms.
Rated at 0.25 watt for linear units.
Standard taps at 30% or 70% of effective rotation.
300° rotation without switch; 330° with switch.

Engineering Bulletin No. 117

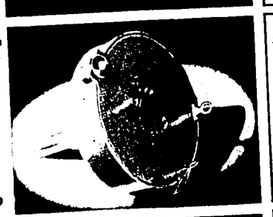


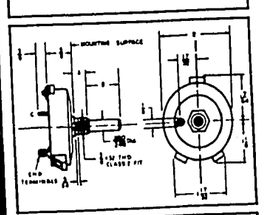
COMPOSITION-ELEMENT CONTROLS (Series 37)

1-1/8 DIA.

Linear, 500 ohms to 10 megohms.
Tapered, 1,000 ohms to 10 megohms.
Rated at 0.5 watt for linear units.
Standard taps at 37½%, 50% and 62½% of effective rotation.
300° rotation without switch; 330° with switch.

Engineering Bulletin No. 112



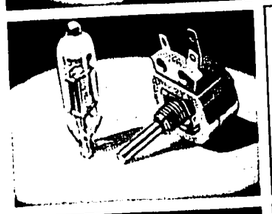


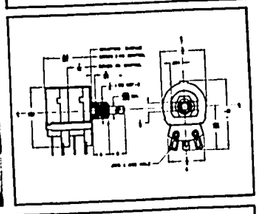
COMPOSITION-ELEMENT CONTROLS (Series 51)

2" DIA., HI-VOLTAGE, HI-RESISTANCE

Resistance range, 5,000 ohms to 50 megohms for linear units.
Rated at 1 watt.
Insulation, 10,000 volts D.C. to ground, 4,000 volts maximum across end terminals.

Engineering Bulletin No. 119



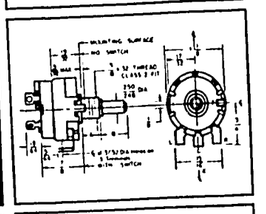


WIRE-WOUND CONTROLS (Series 49)

¾ DIA. FOR MINIATURIZATION

Linear, 10 to 10,000 ohms.
Rated at 1 watt.
Mechanical and Electrical rotation 300°.
360° Mechanical rotation available. Max. 355° Electrical.
Shaft locking device may be incorporated.
In single or multiple units.

Engineering Bulletin No. 104

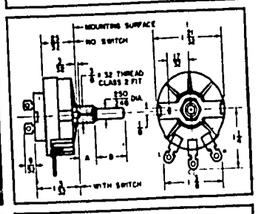


WIRE-WOUND CONTROLS (Series 43)

1-1/8 DIA.

Linear, 1 to 10,000 ohms.
Tapered, submit your requirements.
Rated at 2 watts, for linear units.
Mechanical rotation 300°. Electrical 280° without switch; 260° with switch.

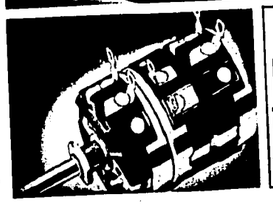
Engineering Bulletin No. 116

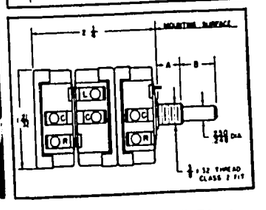


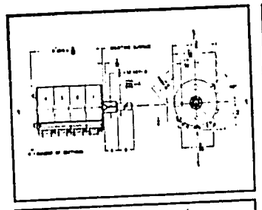
WIRE-WOUND CONTROLS (Series 58)

Linear, 1 to 50,000 ohms.
Tapered, 5 to 25,000 ohms.
Non-inductive 1 to 12,000 ohms, linear only.
Linear, 3 watts.
Mechanical rotation 300°. Electrical 280° without switch; 240° with switch.

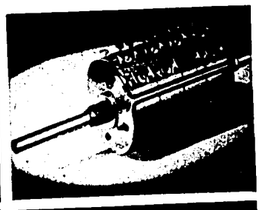
Engineering Bulletin No. 118





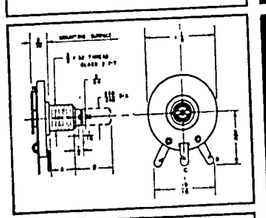


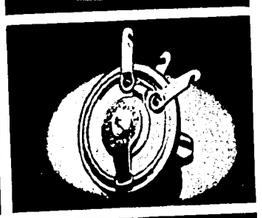
CONSTANT-IMPEDANCE PADS (Series CIT-58)



Attenuation zero to 30 db in first 90% of C.W. rotation, approx. linear. Infinite attenuation reached in last 10%. Impedance range from 2 to 10,000 ohms, standard values. Refer to bulletin. 2.5 watts continuous DC rating. Series CIB rated at 10 watts. "L" pads, Bridged "T" pads, Bridged "H" pads, available.

Engineering Bulletin No. 102, and Bulletin No. 111

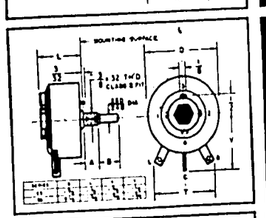




HIGH-PRECISION CONTROLS (Series 42a)

Up to 18 sections in one unit assembly. Single shaft. No back lash. Linear: 10 to 100,000 ohms standard. Max. resistance: 350 ohms per degree of rotation. Tapered, submit your requirements. Linearity up to ±0.5%. Power rating for linear units, 3 watts per section. Standard rotation: Mech, 290°; Elec. 280°.

Engineering Bulletin No. 142

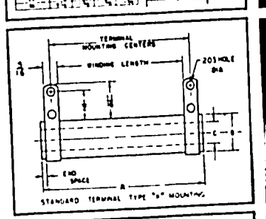


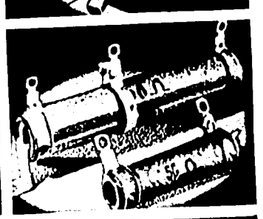
WIRE-WOUND CONTROLS (Series MH)

"HUMDINGER" **

Ultra-compact potentiometer or rheostat.
2 to 1,000 ohms, only linear resistance feasible. Rating, 1 watt.
Intermediate taps are special.
Metal dust-proof cover available.

Engineering Bulletin No. 103

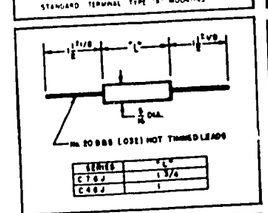


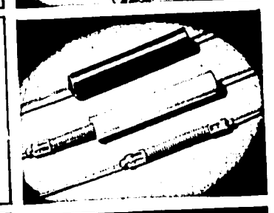


POWER RHEOSTATS (Series 25 & 50)

Full power rating even at ⅓ of rotation.
25-watt, ½ to 2,500 ohms; 50-watt, ½ to 5,000 ohms. Linear and tapered.
Tandem units available.
25G and 50G approved under MIL-R-6749 specifications.

Engineering Bulletin No. 115



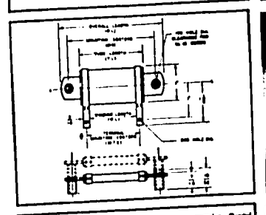


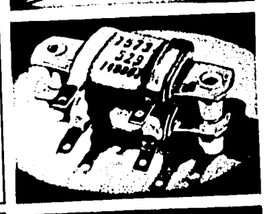
"GREENOHM" * POWER RESISTORS

Fixed, 4 to 200 watts; adjustables, 10 to 200 watts.
- 5% for values of 50 ohms and higher.
- 10% for values below 50 ohms.
- 1% special.

Intermediate taps, upon order. Widest choice of mountings and terminals. Non-inductive units made to specifications.

Engineering Bulletin No. 113

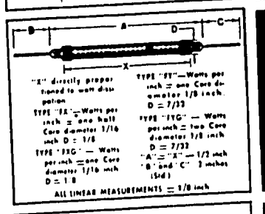




"GREENOHM JR." ** POWER RESISTORS (Series GJ)

C7GJ, 7-watt, 0.5 to 5,000 ohms.
C4GJ, 4-watt, 0.5 to 1,000 ohms.
Standard resistance tolerance ± 10%.
Breakdown voltage between surface and resistance element, 2500 volts A.C.
Ceramic tube casing. Inorganic materials throughout. Pigtail terminals, standard.

Engineering Bulletin No. 110

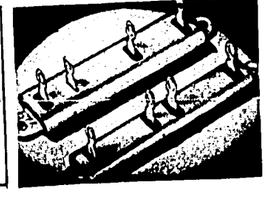


POWER RESISTORS (Series ZT)

STACK-MOUNTING

30, 40, 55, 65 and 75 watt ratings.
0.5 to 65,000 ohms maximum.
Mounting collars provide adequate free-air circulation for maximum heat radiation.

Engineering Bulletin No. 113



"GLASOHM" * FLEXIBLE RESISTORS (Series FXG and FYG)

Used as resistors and also as miniature heating elements.
Ratings per winding inch: FXG, 1-watt; FYG, 2-watt.
Clinch-grip ferrule ends with bare pigtail terminals. Other terminals, special.

Engineering Bulletin No. 105

METAL-CLAD MOLDED RESISTORS (Series MMB)

From 5 ohms to 15,000 ohms per winding inch.
Ratings: 5 watts per winding inch, mounted on metal. 2½ watts in free air.
Intermediate taps. Horizontal and vertical mountings.

History Making Issues

The secret ingredient in the amazing progress of radio-electronics is the speedy exchange of ideas through engineering publications. Radio scientists have made history by this idea-sharing method of advancement, through publishing.

Color Television • Transistors • UHF • Computers

Examples of this kind of publishing are the now historic issues of "Proceedings of the I.R.E." on "Color Television," October 1951; and "Transistors," November 1952; and "Ultra High Frequencies," January 1953. Each of these issues provided the practical and the research engineer with an "ahead-of-its-times" text book on those electronic developments which set the pattern for radio manufacturing for the next decade. Only a reliable engineering society journal could do this kind of publishing job.

Radio has developed in three stages: First came audible communication, the wireless "dot and dash," now perfected to the beauty of high-fidelity sound. Next came sight in images on the cathode-ray tube, with the glories of color already in development. Sound, sight, and now "thinking" achieved through radio controls and the electronic computer. In October 1953, "Proceedings of the I.R.E." devotes another of its history making issues to the Electronic Computer.

A publishing supremacy, all its own, has been won by "Proceedings of the I.R.E." It holds a place never surpassed either in volume or vital value of its editorial content. The result has logically been a high quality reader — the thinking engineer, whose approval you must win. To sell the radio industry, tell the radio engineer!

"Proceedings of the I·R·E"

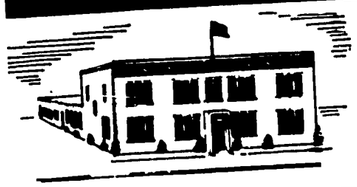
Johnson & Hoffman Mfg. Company Expands Facilities to Meet Increasing Demands for Cathode Ray Tube Parts & Electronic Stampings

This gun features Johnson & Hoffman parts and sub-assemblies which have been especially developed for this and other related designs.



All leading Cathode Ray Gun and Tube manufacturers are specifying Johnson & Hoffman parts and sub-assemblies for their product requirement comprising Electro-Magnetic, Electro-Static, Internal Focusing Designs, both in Glass Post and Ceramic Constructions.

Our new modern fully staffed plant together with the latest in production equipment enables us as a completely independent supplier to quickly provide you with the highest quality parts either from our extensive line of standard designs or special parts engineered and designed to your requirements. With our completely equipped tool and die department in conjunction with high speed automatic production facilities together with a greatly expanded assembly section, we are prepared to undertake your most critical part and component problem from design to completed product.

Johnson & Hoffman Anodes, Grids and Lens Assemblies are produced on precision deep drawing machines from high quality strip material. They are entirely free of contaminent lodging seams and crevices. The absence of seams plus the exclusive high degree of smoothness and surface lustre obtained by our special processing procedures make them particularly desirable for tubes operating under high voltage conditions.

Depend on Johnson & Hoffman for your complete source of precision crafted parts and components.

Your inquiries will receive prompt and courteous consideration. Our service begins with your needs and ends with your complete satisfaction.

Douglas delivers in 8 Weeks!*

Douglas Laboratories is a high-speed source for custom-built electronic equipment of almost every type:

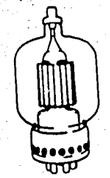
POWER SUPPLIES: Regulated: up to 25KW. Unregulated: up to 250KW.

TUBE TESTING AND PROCESSING EQUIPMENT: Peak Emission sets up to 2,000 amperes, 25KV. Hydrogen Thyratron pulsers for all existing types. Characteristic Test Sets for all JAN tube types. Aging and life-test racks. Rectifier test sets. Interelectrode Capacitance bridges.

RADAR EQUIPMENT: Modulators. Magnetron signal sources. Pulsed-Cavity sources.

LABORATORY INSTRUMENTS: Extended-range synchroscopes. Sweep calibrators. Special Amplifiers. Pulse Transformer test sets. Pulse generators.

*AVERAGE DELIVERY CYCLE, from purchase order to final installation, 8 weeks.



Prices are competitive, workmanship is excellent.
Write, Wire, Phone — quotes in 48 hours if required.

EIMAC TUBES!

Years of efficient, dependable performance have given Eimac tubes a product-reputation difficult to surpass. That is why the criteria of good design of any electronic equipment are products trademarked "Eimac."

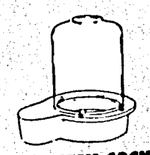
IONIZATION GAUGE



100 IG

An electronic vacuum pressure gauge. Filament voltage 3.5 to 7.5 volts.

VACUUM SWITCH

VS-2

Single pole double throw switch within a high vacuum adaptable for high voltage switching. Contact spacing .015". Switch will handle R-F potentials as high as 20 Kv. In DC switching will handle approximately 1.5 Amps. at 5 Kv.

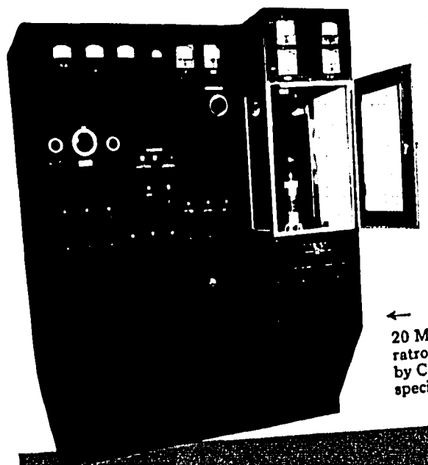
Nominal Filament Power	12.6 watts	95 watts	190 watts	230 watts
Hydrogen Reservoir	No	Yes	Yes	Yes

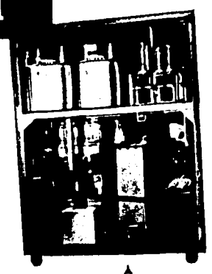
*More detailed information on electrical and mechanical data will be supplied on request.

TYPE VC-1257
Hydrogen filled, zero bias thyratron with hydrogen generator for generation of pulse power up to 40 megawatts.

TYPE 5948/1754
Hydrogen filled, zero bias thyratron with hydrogen reservoir for generation of peak pulse power up to 12.5 megawatts.



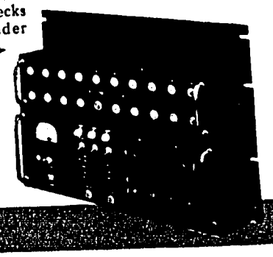
TYPE 5949/1907
Hydrogen filled, zero bias thyratron with hydrogen reservoir for generation of peak pulse power up to 6.25 megawatts.



TYPE VC-1258
Zero bias miniature hydrogen thyratron for the generation of peak pulse power up to 10 KW.

• A NEW CONCEPT OF HYDROGEN THYRATRON DESIGN! The tubes illustrated represent a departure from conventional hydrogen thyratron designs and are a result of several years of concentrated development work. They are primarily employed in the generation of peak voltages with durations in the order of microseconds.

Custom-built Electronic Equipment



CHATHAM specializes in the development, design, and construction of custom-built electronic equipment to exactly meet customers' requirements. Our capable staff of engineers will furnish prompt estimates or, if desired, will call to discuss your problem personally. Call or write today.

5 Megawatt radar modulator built by CHATHAM to rigid government standards.

ELECTRONICS
AND EQUIPMENT

Electronic Tubes

Ruggedized Type Tubes

❖ The following tubes fully conform to JAN specifications and can be supplied promptly, usually direct from stock:

5R4WGY 2D21W
6AL5W OC3W
6H6WGT OD3W
25Z6WGT 2050W

TYPE 719-A HIGH VACUUM CLIPPER DIODE

This tube is used primarily for clipper diode service in hard tube modulator circuits. Filament 7 volts, 7 amps... Inverse peak anode voltage 25 kv, Max., peak anode current 10 amps, Max., anode dissipation 75 watts.

TYPE 1Z2 RECTIFIER

A small bulb high voltage vacuum rectifier. Low cathode heating power and low dielectric losses make tube suitable for radio frequency supply circuits. Filament 1.5 volts, .290 amps... Inverse peak anode voltage 20,000, average plate current 2 ma.... peak plate current 10 ma.

TYPE 1B46 REGULATOR

A cold cathode glow discharge tube designed for voltage stability. DC operating voltage 82 volts, operating current range 1 ma minimum, 2 ma maximum. Regulation 3 volts.

TYPE 395-A COLD CATHODE GAS TRIODE

Requires no filament supply and is used in many grid controlled rectifier and relay applications. Maximum D.C. anode current— 10 ma. Maximum D.C. anode voltage—150 volts

TYPE 4B32 RECTIFIER

A rugged half-wave Xenon filled rectifier. Operates in any position throughout an ambient temperature range of −75°C to +90°C. Filament 5 volts, 7.5 amp... Inverse peak anode voltage 10,000 average anode current 1.25 amps.

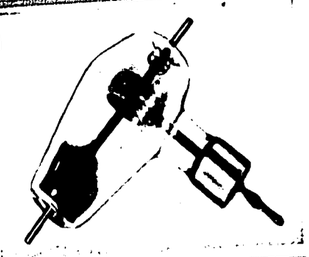
TYPE 394-A THYRATRON

A Mercury vapor and Argon filled thyratron for grid controlled rectifier service. Operates over wide ambient temperature range. Heater 2.5 volts, 3.2 amps... Inverse peak anode voltage 1250, average anode current 640 ma.

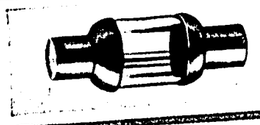
TYPE 3B28 RECTIFIER

This rugged half-wave Xenon filled rectifier will operate in any position and throughout an ambient temperature range of −75°C to +90°C. Filament 2.5 volts, 5.0 amps... Inverse peak plate voltage 10,000, average anode current .25 amp.

Chatham Vacuum Switches



TYPE 1S22 (illustrated) is a mechanically actuated, single-pole, double-throw, glass vacuum switch. This and other types can be supplied.

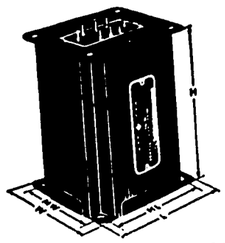


SPECIFICATIONS

HOLD OFF VOLTAGE: Internal—10,000 volts rms; External* (at 27,000 feet altitude)—10,000 volts rms; External* (at 40,000 feet altitude)—7,500 volts rms.

INTERRUPTING RATING, RESISTIVE LOAD: 1,000 operations life at 10,000 v, ac, rms—10 amp, ac, rms; 1,000,000 operations life at 10,000 v, ac, rms — 2 amp, ac, rms; 500,000,000 operations life at 10,000 v, ac, rms—0.1 amp, ac, rms.

NET WEIGHT (approx.)..... 2 ozs.
MAXIMUM LENGTH (overall)..... 3⅜ Ins.
MAXIMUM WIDTH (overall)..... 4½ Ins.
MAXIMUM THICK. (overall)..... 1½ Ins.
*at 50% humidity



HIGH VOLTAGE VACUUM FUSES

Can be supplied by Chatham to exact customers' specifications if ordered in adequate quantity. Call or write for full particulars and quotes.

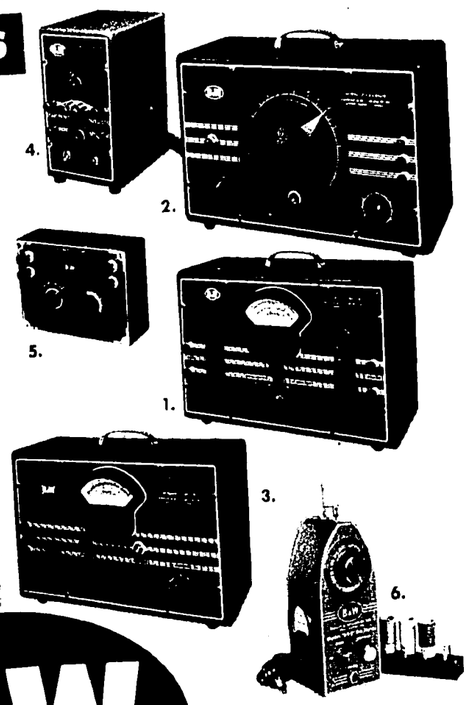
B & W TEST INSTRUMENTS

1. DISTORTION METER, *Model 400.* A highly sensitive instrument having a wide range of applications in the audio measurements field. Noise and distortion measurements with a minimum input of .3 volts. Measures harmonics to 45,000 cycles. A variable filter provides single frequency suppression between 30 and 15,000 cycles.



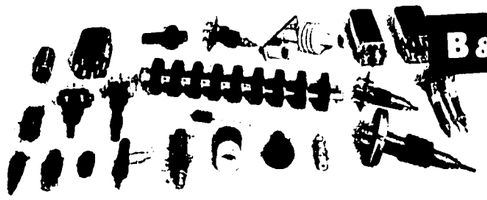
2. AUDIO OSCILLATOR, *Model 200.* This low-distortion field or laboratory instrument provides stable, accurately-calibrated audio frequencies from 30 to 30,000 cycles. 10 volts output—response better than ± 1 d. b. from 30 to 15,000 cycles with 500 ohm load.

3. FREQUENCY METER, *Model 300.* An indispensable instrument for accurate and direct measurement of unknown audio frequencies from 0 to 30,000 cycles in 6 ranges. Operates with a minimum of .25 volts input and any wave form with peak ratios of less than 8 to 1.

4. LINEAR DETECTOR, *Model 404.* Combines R-F detection and audio bridging circuits to complement any distortion meter lacking these features. When combined with the B & W Model 400, noise and distortion measurements can be made from AM carriers or in balanced and unbalanced audio circuits. Freq. range 400 KC to 30 MC.

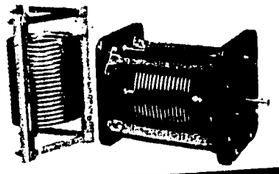
5. SINE WAVE CLIPPER, *Model 250.* When driven by the Model 200 Audio Oscillator or equivalent it replaces a square wave generator in most tests. Provides a clipped sine wave for accurate analysis of audio circuit characteristics.

6. DIP METER, *Model 600.* A highly sensitive, accurately calibrated grid-dip oscillator, auxiliary signal generator or absorption wave meter. Frequency coverage 1.75 to 260 MC in 5 overlapping bands.



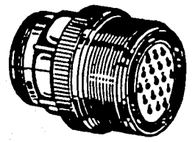
B&W

FILTERS—DISCRIMINATORS B & W high-pass, low-pass, and band-suppression filters and discriminators for R-F or audio filtering meet a broad range of special design and performance requirements. For extremes of temperature and humidity these units are available to meet Mil-T-27 specifications.



TOROIDS. B & W offers full facilities for the design and manufacture of Toroidal coils in ranges up to 200 KC, with inductance and Q values to specific requirements. Available in hermetically sealed cases, potted or unmounted.

B&W SPECIAL COMPONENTS



INDUSTRIAL COILS. Single-layer solenoid coils • Universal-wound coils of single, multiple pie, and progressive construction • R-F, I-F, and Oscillator coils • Traps, R-F and Delay line chokes—are but a few of many types B & W is equipped to design and build to meet specific needs.

EDGEWOUND COILS. B & W rotary and fixed heavy-duty edgewound copper inductors are available in stock or custom-built models for high-power transmitters, R-F heating equipment, antenna phasing networks and other radio and electronic apparatus. Various inductance and current ratings are available in both types. Fixed or rotating links can be supplied on special models.

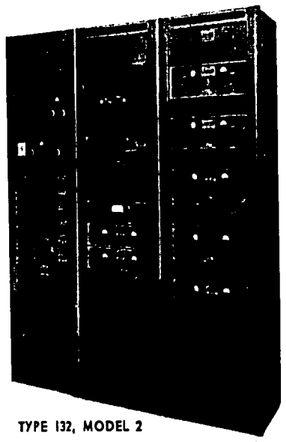
The Industry's Complete Line of High Quality Communications Equipment

MULTI-CHANNEL FREQUENCY SHIFT TELEGRAPH SYSTEMS

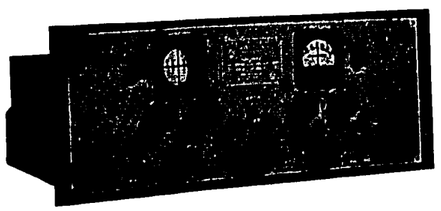
Today's constantly growing demand for greater, faster, more dependable communications has made the need for improved Multiplex equipment more acute than ever before. In response to this need, Northern Radio Company now makes available several new Frequency Shift Multi-Channel Telegraph Systems. Reflecting the heritage of Northern Radio's constant research and precision manufacture over the years, these multi-channel systems display novel concepts of design together with outstanding performance, fidelity and operating economy.



These Multi-Channel Telegraph Systems are audio carrier systems capable of multiplexing such circuits as telephone lines, VHF, UHF, or radio frequency links—or practically any type circuit from which a two-wire audio circuit can be derived. Designed to meet any speed requirements, these systems are fully electronic, without relays or moving parts to wear. They can be used for high-speed printer, Morse or time division Multiplex circuits, as well as such applications as Telemetering, Control Circuits and Servo-Mechanisms. Instantaneous and complete sending end channel control permits any binary code groups, either "Clear Text" or "Cryptographic," to be channelized without need for additional phasing or synchronizing equipment, while paralleling of channels will allow for transmission of other type codes, such as 3 element cable code. The completely independent operation of each channel, including its own power supply, localizes faults to one channel only, leaving other channels unaffected. Individual channel separation filters are used at both transmitting and receiving ends. This arrangement allows for sending telegraph or control signals over a circuit carrying, simultaneously, other forms of intelligence; or for two-way communications on the same line.

The audio frequency shift principle of transmission provides for high fidelity of signal reproduction over a wide range of signal levels as well as under severe noise or interference conditions. Circuit requirements of any speed, shift and center frequency can readily be met. The systems illustrated is for use on printer circuits up to 100 WPM channel capacity. The system arrangement is very flexible, permitting grouping of the basic units into various arrangements of Multiplex Systems. These systems can be made to accommodate a large variety of channel numbers and speeds to meet any individual requirements. The flexibility is further improved by the fact that the racks, power control units, and terminal connection panels are the same for both transmitting and receiving terminals.

RADIO MULTIPLEX SYSTEM



Multi-Channel Equipment for Standard Communications Frequencies.
Adapts existing transmitting and receiving facilities for radio multiplex.

The system illustrated is a four-channel unit, used for transmitting and receiving radio teleprinter, telegraph or other similar low speed keying intelligence, where a limited assigned carrier band-width may be utilized. The two bays at the right are the complete receiving units; left, the transmitter terminal and exciter facilities. The system may be adjusted for band widths of 3 to 12 kc and is intended to take advantage of periods of time where propagation conditions give signals which are better than the minimum required for one channel of normal frequency shift operation. Simple operation of key switches will insert as many channels as the conditions permit. These switches automatically maintain the pre-set bandwidth regardless of the number of channels in use. The system also provides front panel switching to standard 850 cycle frequency shift operation. However, experience indicates that when propagation conditions permit frequency shift operation, they will usually allow at least two channels of multiplex.

TYPE 132, MODEL 2

FREQUENCY SHIFT COVERTER

TYPE 107, MODEL 2

A dual channel unit, used with frequency shift receiving systems to convert the mark and space tones from the output of single or diversity receivers, into DC pulses capable of operating a tele-printer, tape recorder or other device so operated. Also used as a demodulator when receiving make and break CW or ICW signals.

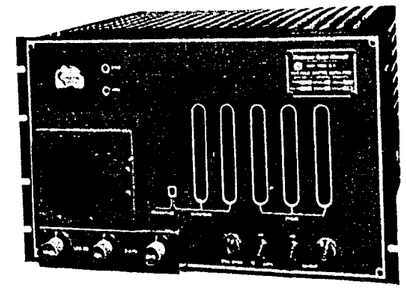
2" oscilloscope tuning pattern indicates proper receiver adjustment of both mark and space frequencies, either during initial setup or under actual keying conditions. This pattern and a specially designed discriminator, coupled with a high degree of limiting, make it the outstanding performer in its field.

INPUT FS LIMITS 100 to 1000 cps. frequency shift. Mark frequency set at 2975 cps.

CW-ICW INPUT 400 to 7500 cps.

KEYING SPEED Up to 600 w.p.m.

OUTPUT: 1. Neutral DC pulses. 60 ma in 1800 ohm external load. One side grounded.



2. Polar DC pulses ± 30 ma in 1800 ohms load. Center grounded.

3. May be operated into any impedance from 100 to 100,000 ohms.

NORTHERN RADIO COMMUNICATIONS EQUIPMENT

NEW OSCILLATOR

• *One Cycle per Megacycle Stability*
• *Continuously Variable to ANY Frequency from 2 to 4 Megacycles*

TYPE 173, MODEL 1

The Northern Radio Company Variable Master Oscillator provides a continuously variable source of radio frequency energy with a stability of approximately 1 cycle per megacycle in the range of 2 to 4 megacycles. It has sufficient output to replace existing oscillators wherever a more stable and variable unit is required. It may be used as the basic control oscillator for diversity receivers, high frequency transmitters and other communications devices, or as a laboratory standard for test and measurement functions.

Its ease of operation and direct reading of frequency make it an outstandingly useful device where precise frequency control must be maintained by completely unskilled personnel. No curves, interpolations or calculations of any kind are required in its use. Frequency is set approximately to the desired value by rotating the oscillator dial. The last three digits of the frequency *automatically* pulls in to the value pre-set on the switches and holds with an accuracy that exceeds that of most temperature-controlled crystal oscillators.

The unit also provides a crystal controlled Beat Frequency oscillator for use in single or diversity receiving systems to provide stabilized BFO injection to the receivers.

An output is also provided from the high stability time base oscillator to make available its 100 KC frequency for use as a secondary standard. The stability of this output is one part in five million over any 12 hour period.

HIGH FREQUENCY OSCILLATOR

Output Frequency: 2—4 MC continuously variable.

Stability for any combination of temperature range from 0 to 50° C., and line voltage of 115 or 230 ± 10%: Approximately 1 cycle per megacycle.

Output Level: ½ watt into 75 ohm load. Level control on rear of chassis.

Readability: ± 2.5 cycles per second. Direct digital readout on mechanical and electronic counters.

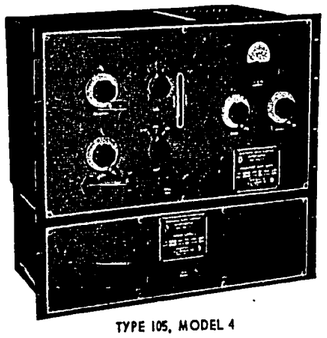
Resettability: Absolute.

BEAT FREQUENCY OSCILLATOR

Output Frequency: 400—800 KC crystal controlled.
Output Level: 3.5 volts into 1000 ohm load. Level control on rear of chassis.
Crystal Holders: Premier Type PL218 or equal.

TIME BASE CRYSTAL OSCILLATOR

Output Frequency: 100 KC.

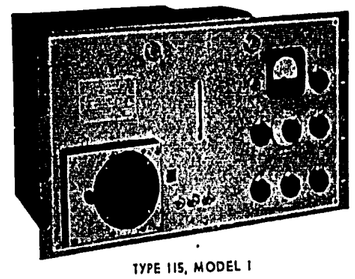


Stability for 0 to 50° C and ± 10% Line Voltage change: 0.2 parts per million for any 12 hour period. 1.0 part per million for thirty days.

Output Level: Approximately 2 volts.

Output Impedance: Approximately 100,000 ohms.

FREQUENCY SHIFT KEYER



incorporates the following outstanding features:

TYPE 105, MODEL 4

Frequency shift dial adjusts "mark" and "space" frequencies equally above and below the carrier position, which remains fixed. • Simplified frequency setting permits only the upper side band tuning indication to be visible on the meter over substantially all of tuning range. • Direct reading frequency calibration of shift from 0 to 1000 cycles. • Direct reading frequency calibration of mixer and output tuning dials from 2.5 to 6.7 mc. • Direct reading of calibration of output frequency vernier ± 600 cycles. • Pulse shaping circuit to permit operation within assigned bandwidth with no adjacent channel radiation. • Highly stable temperature controlled oven with temperature control of ±0.1° C. at 60° with heaters on 4 sides of inner oven. • Component ratings according to JAN Specs provide greater assurance of trouble-free operation.

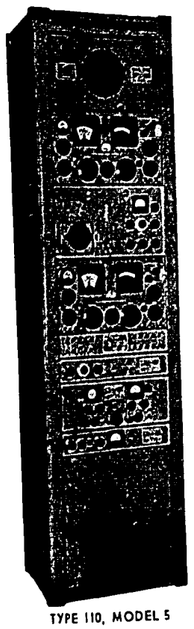
VARIABLE MASTER OSCILLATOR

TYPE 115, MODEL 1

Principally used in diversity reception to supply local common oscillator injection voltage to receivers. Crystal oscillator for BFO. The Variable High Frequency section gives stability equivalent to that of non-temperature controlled crystal oscillators. It is also equipped with three crystal controlled frequencies for operation of receivers on a fixed frequency basis. The variable high frequency oscillator is provided with local crystal oscillator for spot checking of twenty points within its range.

TECHNICAL DATA

Variable HFO output frequency	2-32 mcs continuous
Fixed Frequency crystals	2-4 mcs for output frequencies of 2-32 mcs
Output impedance	72 ohms coaxial cable
Output level	2 watts 2-4 mcs, 0.5 watts 4-32 mcs
Variable HFO Stability	20 cps per mc for ambient change ±25° C.
	5 cps per mc for ± 10% Line Voltage
	20 cps per mc for resettability
	20 cps per mc for readability



This unit can also be used as a transmitter exciter or for laboratory measuring purposes.

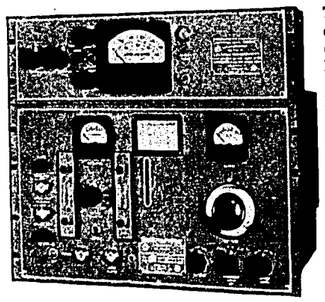
NORTHERN RADIO COMMUNICATIONS EQUIPMENT

RADIO MULTIPLEX SYSTEMS ★ MULTI-CHANNEL TONE SYSTEMS ★ DIVERSITY RECEIVERS ★ STANDARD FREQUENCY SHIFT KEYERS ★ LOW FREQUENCY SHIFT KEYERS ★ FREQUENCY SHIFT CONVERTERS ★ TONE FILTERS ★ TONE KEYERS ★ DEMODULATORS ★ LINE AMPLIFIERS ★ MASTER OSCILLATORS ★ MONITORS



TYPE 110, MODEL 5

DUAL DIVERSITY RECEIVER

Used for dual spaced diversity reception in high speed radio tele-printer, telegraph or telephone service, using any common modulation, such as FS, CW, ICW, phone, etc. Complete receiver is housed in a rack type, fully enclosed cabinet. Provided with specially modified receivers, monitor speaker, IF monitor, master oscillator, and the necessary patching arrangements. Can be supplied with any combination of terminal equipment for reception of radio tele-printer, undulator tape and program service, or for remote use where the intelligence is transmitted via landline or UHF link.

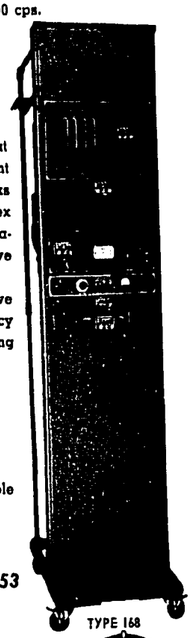
Receiver is shown with terminal equipment as recommended for general communications usage. The units are (top to bottom) Monitor speaker, Receiver #1, Variable Master Oscillator, Receiver #2, Patching Panel, IF Monitor, Converter, Tone Keyer, Blank panels. For special features of this receiver see individual units described on the preceding pages.

FREQUENCY and SHIFT MONITOR SYSTEM

METER: TYPE 127, MODEL 2
MONITOR: TYPE 106, MODEL 4

This system consists of a Type 106 Frequency and Shift Monitor and a Type 127 Frequency Meter. It is designed as a secondary standard to monitor the frequency and amount of shift of transmitter carrier outputs. It is particularly intended to measure the frequency shift of a mark and space (FS) signal either when setting up for traffic or under normal keying conditions.

The Monitor's stability is better than 2 cycles per megacycle *over an ambient temperature range of* 0-50° C — using crystals having a temperature coefficient of only 3 parts/million/degree C. Range is 2.5-30 mc with 10 crystal-controlled frequencies (separate panel trimmers for each); use of external oscillator also provided for. Frequency Shift range is 10-10,000 cps. Less than 100 millivolts RF input needed for 2 volts audio output.



The Frequency Meter is specially designed with selectable normal and fast-acting damping factors, permitting frequency measurements of signals while keying. Its accuracy is 2% of full scale for the ranges 0-200, 500, 2000, 5000, 20,000 cps.

TEST BAY FOR TONE TELEGRAPH SYSTEMS

The Northern Radio Company Test Bay for Tone Telegraph Systems provides a complete terminal of apparatus for testing, alignment and maintenance of Multi-channel Frequency Shift Telegraph Systems.

When used with such equipment, it performs the following main Functions: (1) rapid and simple precision measurements of Mark, Space and Center Frequencies at both sending and receiving terminals; (2) precision Frequency adjustment of F/S Tone Keyers to specified channel Frequencies; (3) accurate tuning of F/S Converter Units; (4) rapid evaluation of signal distortion; (5) measurements of tone and telephone line levels at both receiving and transmitting ends; (6) measurement of telephone line attenuation; (7) over-all system checks and alignment; (8) performance tests of Tone Multiplex Systems and associated equipment; (9) quick localization of systems faults; and (10), monitoring of all wave forms such as keying, keyed tone, etc.

The Test Bay consists of Electronic Square Wave Keyer (Dotter), Cathode Ray Oscilloscope, Frequency Counter, Volume Level Indicator and Rack including blank panels, patch cords and test probes.

TYPE 168

TONE CHANNELING SYSTEMS

Complete package systems of Multi-Channel Tone Equipment (both AM and Frequency Shift) are available line or radio link systems.

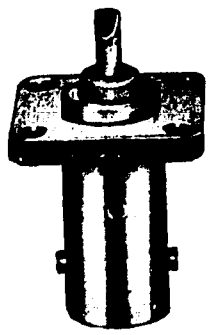
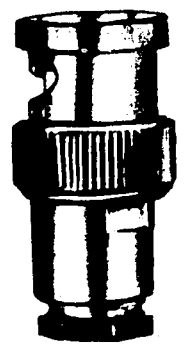
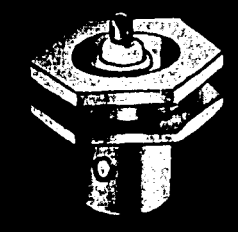
BNC CONNECTORS BY KINGS





The B N C Connectors shown are small, lightweight Connectors designed for use with small cables such as RG-58/u, RG-59/u and RG-71/u. Widely used for video and aircraft test equipment, they are recommended for frequencies as high as 3000 M.C., where impedance matching is important. The B N C series is used successfully in the region of microwave frequencies.



Whether your connector requirements call for the B N C series, N series, the new C series or special adaptations of standard connectors, you can rely on Kings. Our staff of highly specialized engineers invite your inquiries.

CONNECTORS by KINGS

C Series Connectors are a greatly improved mechanical and electrical type of co-axial connector. They are constant impedance and are designed for use with 50 ohm, middle size RF cables.

The C Series like every co-axial connector made by Kings is the result of constant research and development. Engineering ingenuity and precision manufacture have put "Connectors by Kings" in the front-line of communications equipment for industry and the armed services.

If you have a connector problem consult Kings. You'll be glad you called on Kings first.

Sub-miniaturization!

Very soon, a tumbler-full of complex radio-electronic equipment will fly an airplane! Circuits have been flattened to the size of a post-card, and radio-tubes to match-heads. "Radio" becomes a part of every industry!

WHAT BECOMES SMALLER

Radio engineers call this program "sub-miniaturization", a self-contradictory word because as radio components are engineered down to thimble and pinhead size, electronic applications in industry become wider and greater. Already, military needs have stimulated radio-engineers to produce a signal system in the nose of a bomb, no larger than a man's hat which will direct and control tons of steel and dynamite. The wrist-watch radio is a practical reality.

WHAT GROWS LARGER

The industry radio has created is skyrocketing to new heights. Symbolic of the whole trend is the bristling array of antennae on the tops of homes and apartments and the jump in TV picture tube sizes from 6 to 21 inches. More than 1,000 technical meetings a year are held by IRE's 31,000 members in seventy-eight active sections in every part of the English Speaking world. The volume of published information required to feed this engineering progress is enormous.

For forty years, without need of change of name or direction, The Institute of Radio Engineers has published its "Proceedings of the I·R·E" — a monthly magazine by radio-electronic engineers, for radio engineers. It is an unabridged, accurate, working textbook-up-to-the-minute. 481 advertisers use its pages to keep their products before design men — to sell in the pre-specification stage of this dynamic industry.

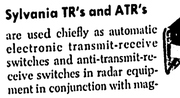
MEETING YOUR ELECTRONIC REQUIREMENTS

. . . FOR SEMI-CONDUCTORS, MICROWAVE COMPONENTS, AND SPECIAL-PURPOSE TUBES



Sylvania Germanium Diodes
are long-life, lightweight, heaterless components for a wide variety of circuit applications such as computers and other electronic devices.

Sylvania Silicon Diodes
are used chiefly as first detectors in radar and other microwave super-heterodyne receivers.

Sylvania Magnetrons
operate in the microwave band in radar gear for military ships, planes and infantry and for commercial weather analysis and travel by sea and air.

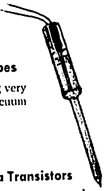
Sylvania TR's and ATR's
are used chiefly as automatic electronic transmit-receive switches and anti-transmit-receive switches in radar equipment in conjunction with magnetrons.

Sylvania Rocket Tubes
are planar-electrode disc-seal triodes for use as oscillators and amplifiers with useable power at frequencies up to 3300 mc.

Sylvania Klystrons
are intended for use as c.w. oscillators or for pulsed operation at microwave frequencies.

Sylvania Pencil Tubes
are used as c.w. oscillators, amplifiers and in frequency multiplier operations at UHF.

Sylvania Hydrogen Thyratrons
are used for pulsing service at high repetition frequencies, high peak currents and high voltages and are designed for the fast action of radar equipment.



Sylvania Flash Tubes
are for use in flash photography, beacons, obstruction markers and signaling devices.

Sylvania Strobotrons and Trigger Tubes
provide a means for freezing the motion of rotating and reciprocating machinery and for high current control-pulse purposes.

Sylvania Glow Modulator Tubes
are used for facsimile reproduction of photographs and printed matter.

Sylvania Pirani Tubes
are used for measuring very low gas pressures in vacuum systems.

Sylvania Transistors
include both junction and point-contact types. Compact, hermetically sealed and shockproof, they are made with in-line base connectors for use in either plug-in or soldered circuits.

Complete information on all Electronic Division products is available at the following Electronic Division Sales Offices:

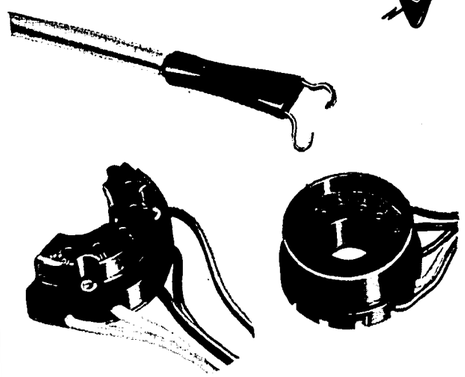
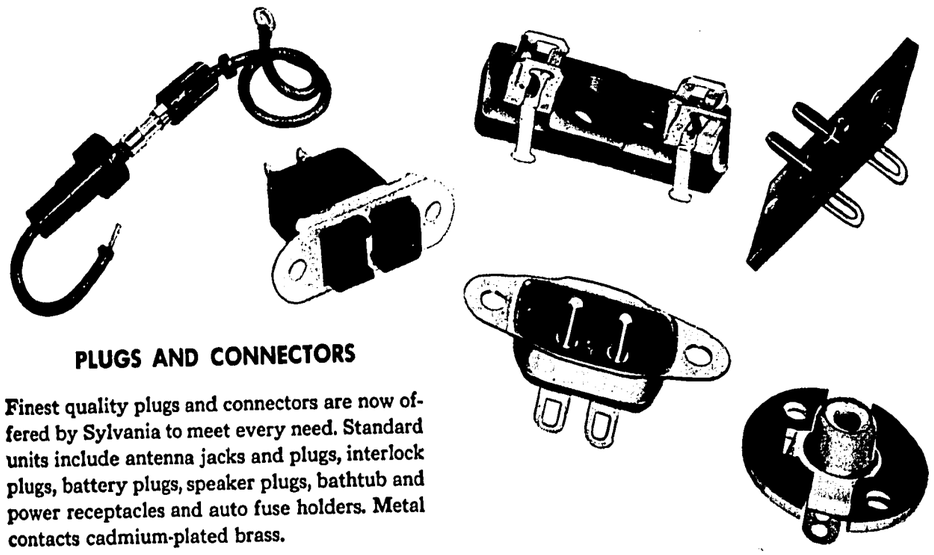
SYLVANIA



LIGHTING • RADIO • ELECTRONICS • TELEVISION

SYLVANIA ELECTRONIC COMPONENTS

Precision parts engineered for highest quality and finest performance . . . custom-designed to your specifications.

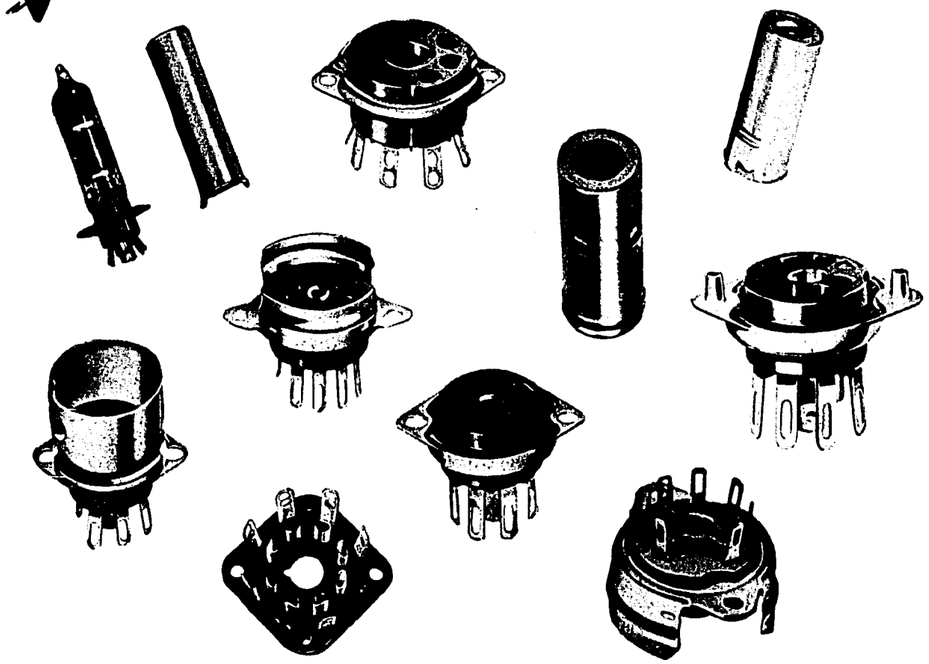


Today Sylvania offers you the ideal solution to any parts problem. Now, due to greatly increased production facilities and improved techniques, Sylvania is in a position to provide highest quality precision components to meet any volume requirements.

On these pages are illustrated a few representative types of the many hundreds of Sylvania electronic components now being produced. So, whether you need a few thousand parts or a million a month, put it up to Sylvania. Address your inquiries to Sylvania Electric Products Inc., Dept. 3A-48, 1740 Broadway, N. Y., N. Y.

CATHODE RAY TUBE SOCKETS

Are available in types to meet any equipment design specifications. Full-round and half-round duo-decal sockets furnished complete with color-coded lead wires. New spring-type anode connector furnished to meet the requirements of any manufacturer.



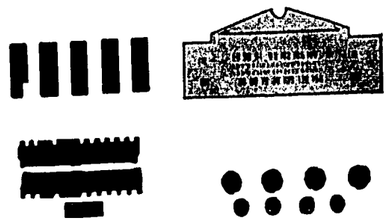
PLUGS AND CONNECTORS

Finest quality plugs and connectors are now offered by Sylvania to meet every need. Standard units include antenna jacks and plugs, interlock plugs, battery plugs, speaker plugs, bathtub and power receptacles and auto fuse holders. Metal contacts cadmium-plated brass.

SYLVANIA

LIGHTING • RADIO • ELECTRONICS • TELEVISION

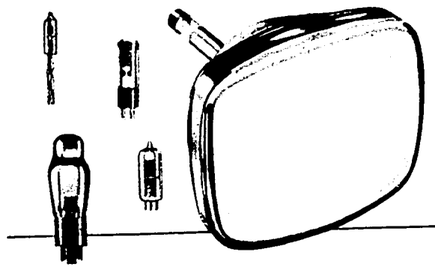
SYLVANIA ELECTRONIC COMPONENTS



RADIO TUBE SOCKETS AND SHIELDS

Sylvania's complete line of tube sockets includes both molded and laminated types made to rigid specifications. Molded sockets are available for button type sub-miniature, 7 and 9 pin miniature and octal tubes, vibrators and GRC octals, UHF sockets and integral eyelet sockets. Sockets are supplied with either top or bottom mounting, a wide variety of saddles with or without ground lugs, and with or without center shield. Contacts are of brass, phosphor bronze or beryllium copper, cadmium or silver plated. Various socket insulators include general purpose phenolic, low-loss phenolic, or NEMA grade laminated phenolic. All made to Sylvania's highest quality standards.

MOLDED PLASTICS



Sylvania is equipped to offer manufacturers the widest possible variety of injection or compression molded plastic parts of highest precision and durability. These include Push Buttons, Escutcheon Dials, Terminal Blocks, Knobs and many others. Tell us your problems and we'll be glad to suggest an economical solution.

TO ASSURE TOP PERFORMANCE OF YOUR ELECTRONIC EQUIPMENT

1. INSTALL HIGH-QUALITY SYLVANIA TUBES

Quality tested and engineered to highest standards, Sylvania Tubes have earned a world-wide reputation for finest performance. Today, 7 of the 10 leading television set makers use Sylvania Picture Tubes and Sylvania Receiving Tubes.

2. CHECK WITH SYLVANIA TEST EQUIPMENT

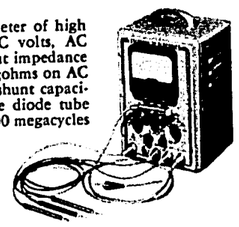
In test equipment, too, Sylvania quality-built instruments and improved circuit engineering assure you of the last word in accuracy and dependability.

TELEVISION OSCILLOSCOPE

Type 400—An exceptionally high-gain wide-band oscilloscope designed for television. Accurately displays any TV pulse or wave-shape on a large, eye-saving 7" screen. Sensitivity: 0:01 v./in. Vert. response useful to 4.0 mc. Recommended for servicemen; laboratories; advanced schools and industry.

VOLTAGE CALIBRATOR

Type 300—Accurately measures peak to peak voltage of any wave-form displayed on scope. Uses voltage regulated clipper circuit to give extreme accuracy in spite of line voltage fluctuation. Switch feeds either calibrating voltage or signal voltage to scope. Essential instrument for better service shops and laboratories.



SWEEP GENERATOR

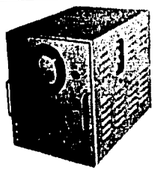
Type 500—No mechanical sweep. Uses reactance tube sweep in two ranges; 0-15 mc. for TV, 0.600 kc. for FM. Fundamentals from 2 to 230 mc. Special circuits to assure extreme linearity. Output 300 to 100,000 microvolts. Companion to 501 Marker.

POLYMETER

Type 2212 – A Vacuum Tube Voltmeter of high sensitivity for measuring ohms, DC volts, AC volts, RF volts and DC current. Input impedance is 17 megohms on DC volts, 2.7 megohms on AC and 2.3 megohms (with only 3 μμf shunt capacitance) on RF. Special subminiature diode tube in RF probe gives flat response to 300 megacycles on scales from 3 volts to 300 volts in five ranges. Zero center scales for FM. Illuminated meter. Accessory probes (type 225) for 30,000 volts DC.

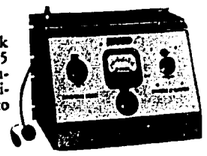
HIGH VOLTAGE PROBES

These fine quality Sylvania DC Probes permit the measuring of high voltages by increasing the DC range of polymeters. Type 223 is 10,000 volt probe. Type 225 extends Polymeter range to 30KV.



MARKER GENERATOR, TYPE 501

Provides 2 separate signals for marking an oscilloscope trace of response curves. Accurate adjustment of traps, frequency spotting, measuring band width, and correct adjustment of the popular 4.5 mc. intercarrier sound circuits. VFO covers 15 to 240 mc. range.

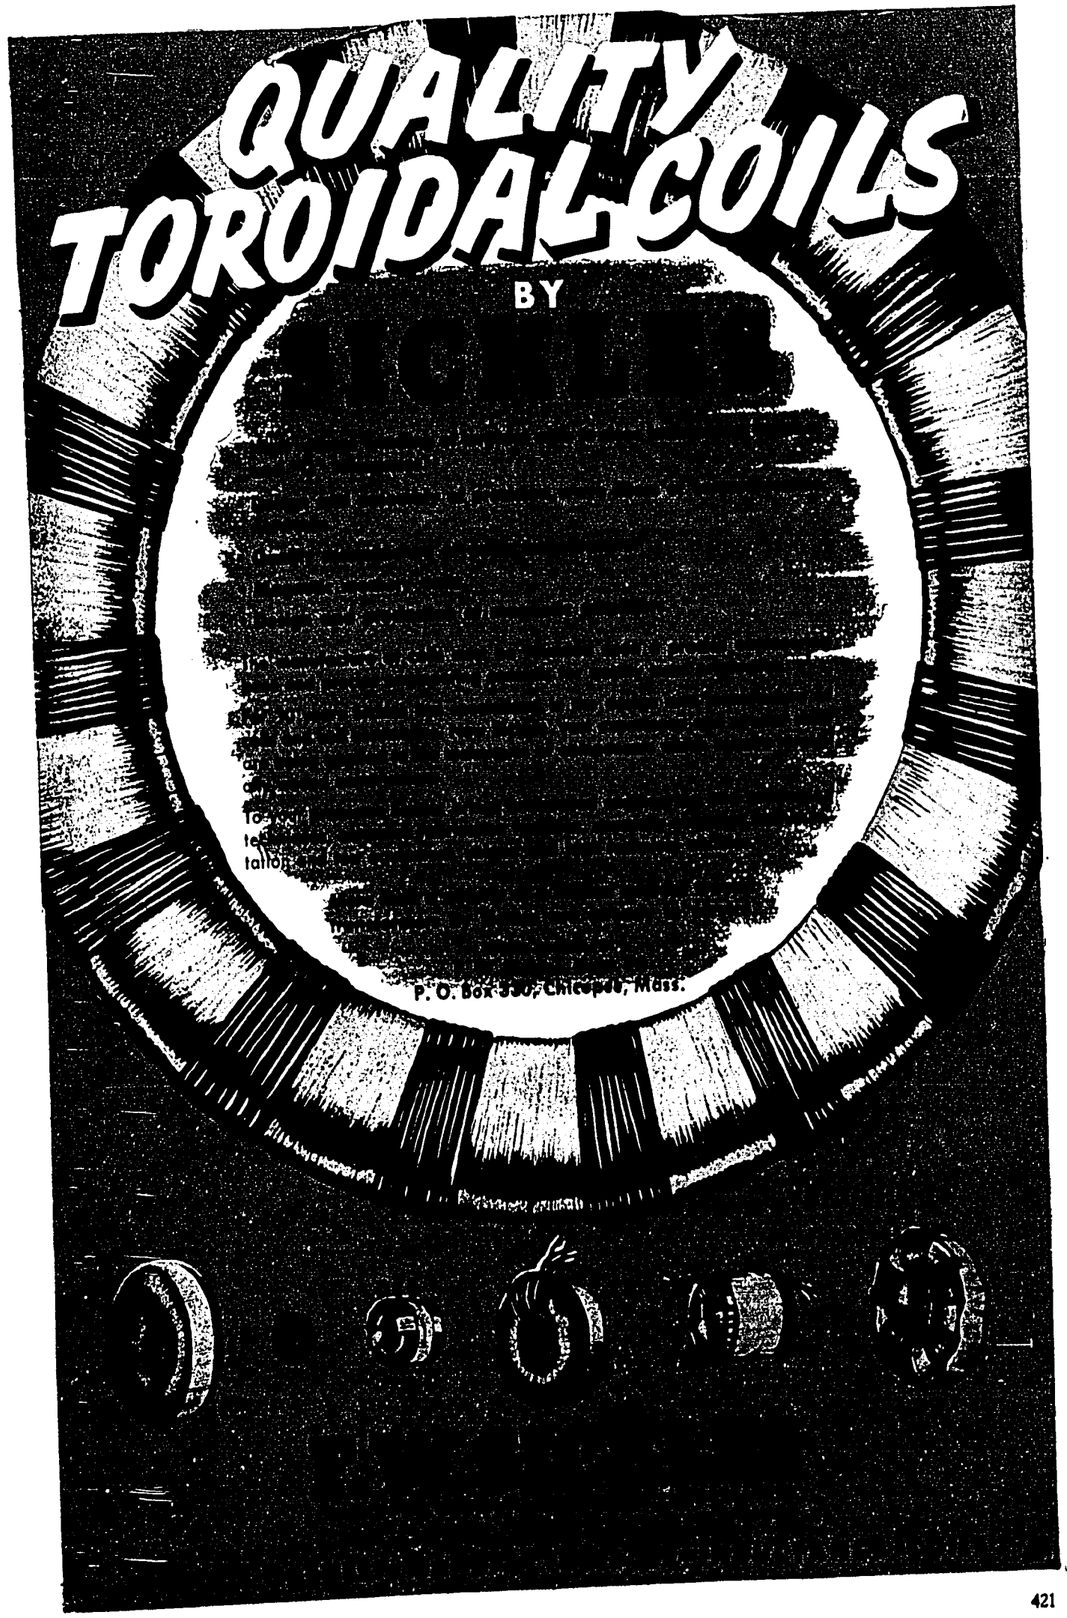


SYNCHROSCOPES

Type 402 and 402A—These are special-purpose, fast-sweep 5-inch cathode ray oscilloscopes. Especially designed to examine the detailed structure of extremely fast transient wave forms. Useful in high voltage pulse study, loran, and similar applications.

CAPACITANCE BRIDGE

Type 125A—Utilizing a 3-terminal network balancing circuit, this Sylvania Type 125 Capacitance Bridge provides for the accurate measuring of interelectrode capacitances of vacuum tubes. Range .01 μμf to 100 μμf.



For further information concerning Sylvania Tubes or Test Equipment address:

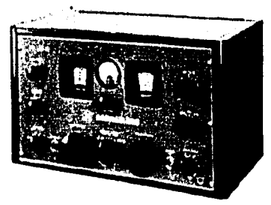
HAMMARLUND

DATA TRANSMISSION-SELECTIVE CALLING AND SUPERVISORY CONTROL EQUIPMENT

POINT TO POINT SIGNALING

The Hammarlund Standard Duplex Signaling Unit consists of a tone generator and receiver designed to operate over wire lines, telephone or power line carrier, and radio or microwave communications circuits for signaling, dialing, slow speed telemetering, supervisory controls or other information. Transmitters and receivers are available for 36 frequency channels between 2000 and 6475 cps. This equipment is being used by military and governmental agencies, pipeline and power companies, railroads and other groups requiring remote on-off switching, continuous indication of operating conditions, and automatic detection of wire line or power source failures along their systems.



PROTECTION THROUGH SUPERVISORY CONTROL

The Hammarlund "Multi-Gate" Remote Supervisory and Control System is engineered to provide highly efficient, fully reliable operational controls of important remote equipment such as used by refineries, pipelines, utilities, railroads, civil defense and other commercial, as well as military, groups. Because of a unique design by which a single tone activates a receiver, which in turn will then accept a second tone to operate a relay, this equipment can be used where disturbances on connecting wire or radio circuits make ordinary tone-operated remote controls impractical. Up to 21 individual on-off functions can be handled over a single circuit employing only 7 audio signaling tones.

SELECTIVE CALLING OR SIGNALING

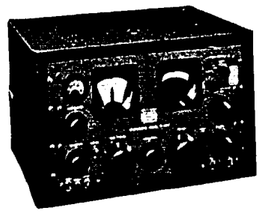
Hammarlund Selective Calling equipment, added to 2-way radio systems used to control large fleets of vehicles, or distant fixed stations, adds privacy, speed, safety, quietness and convenience to day-in-day-out operations. By the push of a button the dispatcher within 0.8 of a second selects the station which he wants to contact. Only the selected operator or group of operators can receive the call. If the operator of the car or station being called doesn't answer, an indicator lamp remains lighted to show he was called. This simple equipment can be added to any present installation, or incorporated in any type of installation now projected.

COMMUNICATION RECEIVERS

The New "HQ-140-X"

The "HQ-140-X" is a new superheterodyne type receiver that provides amateurs and other short wave listeners with all the advantages of modern professional design and circuitry. In addition, it incorporates those outstanding features that have made Hammarlund "HQ's" famous for quality and performance. This receiver retains the high degree of sensitivity and selectivity of the "HQ-129-X," and in addition features notably improved frequency stability and image ratio. It covers a continuous range of frequencies from 540 kc to 31 mc, or from 555 meters to 9.7 meters, in six bands.

Band spread tuning is supplied on the four higher frequency bands, with actual calibration in the 80, 40, 20, 15, and 10 meter amateur bands. Many types of noise and other interference have been substantially reduced by the outstanding noise limiter and the special Hammarlund patented crystal filter.



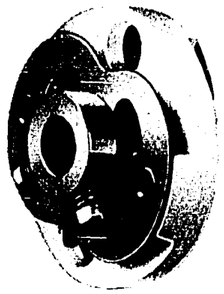
FEATURES

TUNING RANGES: .54—1.32 mc, 1.32—3.2 mc, 3.2—5.7 mc, 5.7—10 mc, 10—18 mc, and 18—31 mc.

CALIBRATED BAND SPREAD: 3.5—4 mc, 7—7.3 mc, 14—14.4 mc, 20.9—21.6 mc, and 28—30 mc.

TUBE LINE-UP: 6C4 Oscillator, 6BA6 RF Amplifier, 6BE6 Mixer, 6BA6 1st IF Amplifier, 6BA6 2nd IF Amplifier, 6BA6 3rd IF Amplifier, 6AL5 combination detector, AVC and noise limiter, 12AU7 1st AF Amplifier and BFO, 6V6GT/G Audio Power Output, OC3/VR105 Voltage Regulator and 5U4G Full Wave Rectifier.

The "SP-600-JX"

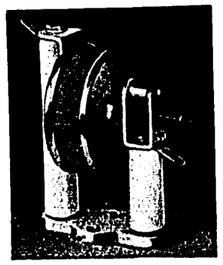


The "SP-600-JX" communications receiver, now also available to hams, is a masterpiece of receiver design and already is world-known for its outstanding construction and performance. This professional receiver, with its six bands covering the frequency spectrum from 540 kc to 54 mc, is being used in large quantities by the military and governmental agencies, as well as by commercial services, for both single and diversity reception.

This magnificent receiver is a 20 tube dual conversion superheterodyne. The power supply is an integral part of the receiver chassis. Operation on any of six crystal controlled fixed frequency channels within the range of the receiver is immediately available. This designates it as the perfect receiver for point-to-point and network operations. Pre-arranged day and night fixed frequencies. With crystal control you can select your desired channels immediately.

Stability is .001 to .01 percent depending on frequency to which receiver is tuned, image rejection is 80 db to 120 db down, and spurious responses are at least 100 db down. Sensitivity is 1 microvolt CW and 2 microvolts AM while selectivity for the three calibrated crystal and three non-crystal ranges is from 200 cycles to 13 kc. Radiation is negligible with no cross-talk in multi-receiver installations.

"FC" and "FNC" COUPLINGS

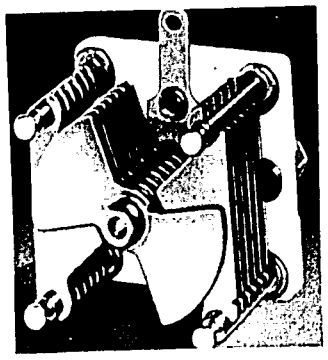


FEATURES—The "FC-46-S" is an insulated flexible coupling designed to provide for mechanical ganging of shafts even though angularly misaligned. The smallest dimensions have been incorporated consistent with the rugged construction necessary for general service. A high degree of electrical isolation is achieved through the use of silicone treated steatite insulation. Flash-over voltage is approximately 5000 V. R.M.S. Brass hubs and spring temper phosphor bronze flexible arms are nickel plated. An exclusive and important feature of this coupling is its characteristic of uniform side-thrust through 360° of rotation. This eliminates tendency to vibrate at high speeds, minimizes bearing wear and assures accurate tracking.

The "FNC-46-S" is a non-insulated coupling for use where electrical continuity between shafts is required. The flexible arms are held securely to a nickel plated brass ring instead of an insulator.

STANDARD STOCK TYPES	
CODE FC-46-S	Insulated flexible coupling
CODE FNC-46-S	Non-insulated flexible coupling

"NZ-10" CAPACITORS

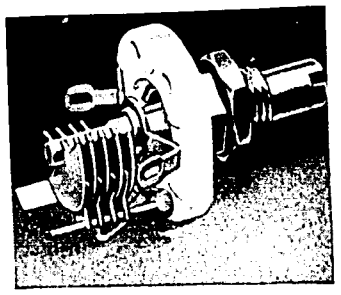


FEATURES — The "NZ-10" is a compact transmitter neutralizing capacitor designed for easy and accurate adjustment. The rotor is attached to a fine-thread lead screw which may be adjusted with smooth and precise action by a screwdriver and locked securely by a readily accessible clamping screw. A stop prevents shorting of plates at maximum capacity. Long leakage paths to ground from both rotor and stator are provided. Glazed steatite insulators and smoothly rounded aluminum plates minimize flashover.

SPECIFICATIONS—Capacity is adjustable from 2.3 to 10 mmf. Peak voltage rating is 3000 V. at maximum capacity (minimum gap) position.

HAMMARLUND

"BFC" CAPACITORS



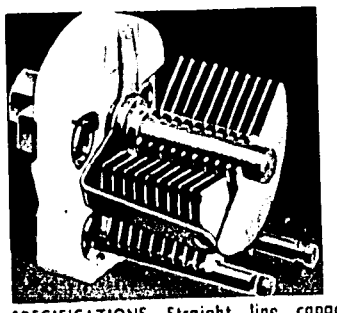
FEATURES—The "BFC" "butterfly" type capacitor has very low minimum capacity, low inductance and isolated rotor for use in VHF applications as a series capacitor with no rotor contact. Mechanical and electrical symmetry and stator terminal locations minimize circuit inductance.

CONSTRUCTION—Brass rotors and stators are soldered and nickel-plated. The contact wiper is heavily silver-plated beryllium-copper. Tapped studs on the silicone treated steatite front panel permit mounting the capacitor without grounding the rotor. The sleeve type bearing is nickel-plated brass.

SPECIFICATIONS—Straight line capacity. 90° rotation from minimum to maximum capacity position. Air gap is 0.030" nominal. Tested at 1200 V. R.M.S., 60 cycles between rotor and each stator. *High Speed Ball-Bearing Models Also Are Available.*

CODE	CAPACITY SECTION		SERIES CAPACITY		PLATES	
	Max.	Min.	Max.	Min.	Rotor	Ea. Stator
BFC-12	14.5	3.4	7.6	2.2	4	3
BFC-25	27.3	4.8	14.1	2.9	7	6
BFC-38	40.1	6.2	20.6	3.6	10	9

"MAC" CAPACITORS



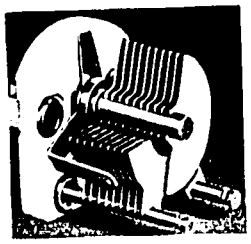
FEATURES—The "MAC" provides the low minimum capacity essential for use as a trimmer in the VHF range. It was engineered to achieve the smallest dimensions practical to meet the requirements of a miniaturized component.

CONSTRUCTION—Its silicone treated steatite base is only $\frac{3}{4}$" x $\frac{5}{8}$". Rotor and stator are soldered assemblies and are of brass, silver-plated. Rotor and stator terminals are positioned to permit short leads. The threaded bearing is provided with flat sides to permit single hole mounting.

SPECIFICATIONS—Straight line capacity. Screwdriver adjustment. Air gap is 0.017" nominal. Tested at 750 V. R.M.S., 60 cycles.

CODE	CAPACITY		PLATES	CODE	CAPACITY		PLATES
	Max.	Min.			Max.	Min.	
MAC-5	5.0	1.4	5	MAC-15	14.2	2.2	15
MAC-10	8.7	1.7	9	MAC-20	19.6	2.7	21

"APC" CAPACITORS



SPECIFICATIONS—Straight line capacity characteristic. Hexagonal collar on slotted shaft permits rotor adjustments. Air Gap is 0.015" nominal. Tested at 600 V. R.M.S., 60 cycles.

FEATURES—The "APC" trimmer capacitor originated by Hammarlund over twenty years ago is still widely recognized as the standard capacitor of its type. Its use is indicated in all classes of equipment where a compact, high quality air dielectric trimmer is required. It was designed to resist effects of temperature, moisture and vibration. Silicone treated steatite insulation is used to insure high leakage resistance.

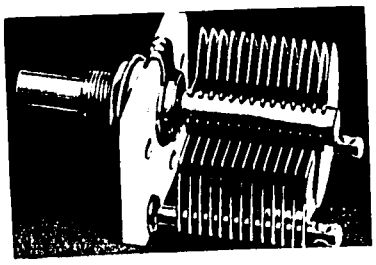
CONSTRUCTION—Brass rotor and stator are soldered to brass supports. Nickel-plated phosphor bronze wiper assures positive rotor contact. All metal parts are nickel-plated. Terminals are hot-tin dipped. Tapped brass mounting studs fastened to silicone treated steatite base permit mounting capacitor without grounding the rotor.

CODE	CAPACITY		PLATES
	Max.	Min.	
APC-25	25.	3.0	7
APC-50	50.	3.9	14
APC-75	75.	4.6	20
APC-100	100.	5.5	27
APC-140	140.	6.7	37

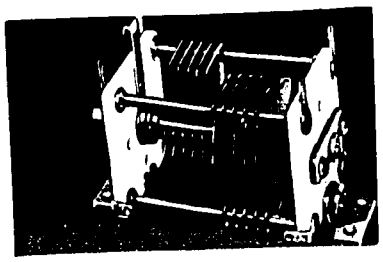
"MAPC" CAPACITORS

FEATURES—The "MAPC" capacitor is representative of Hammarlund's efforts to meet the demand for smaller dependable components. It is a scaled-down version of the popular "APC" with everything reduced except the quality and performance characteristics. For example, an "MAPC" is about half the size and weight of an "APC." Lower minimum capacities and low inductance make the "MAPC" suitable for VHF use.

CONSTRUCTION—The standard "APC" construction is used in this capacitor. Rotors and stators are fabricated by soldering brass plates to supporting members and nickel-plating the assemblies. Nickel-plated phosphor bronze wiper assures positive rotor contact. Tapped brass mounting studs fastened to silicone treated steatite base permit mounting capacitor without grounding rotor.



CODE	CAPACITY		PLATES
	Max.	Min.	
MAPC-15	15.	2.3	6
MAPC-25	25.	2.6	10
MAPC-35	35.	2.9	14
MAPC-50	50.	3.2	19
MAPC-75	75.	3.9	29
MAPC-100	100.	4.5	38

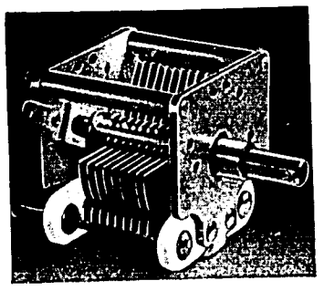


SPECIFICATIONS—Straight line capacity. Screwdriver or socket wrench adjustment. Air gap is 0.0135" nominal. Tested at 600 V. R.M.S., 60 cycles.

"HFA" and "HFBD" CAPACITORS

SINGLE SECTION CAPACITOR—The "HFA" is a single section tuning capacitor similar to "HF" except that larger plates permit wider air-gaps for the same capacitance values. Resultant higher break-down ratings extend the use of the capacitor into the high frequency low-power transmitter field. A threaded sleeve bearing permits single hole mounting and the bracket supplied may be used for base mounting. A lug type terminal soldered to the bearing provides an efficient rotor connection.

DOUBLE SECTION CAPACITOR—The "HFBD" is a dual, balanced rotor transmitting capacitor employing front and rear panels plus a ball-thrust rear bearing, but otherwise incorporating constructional features identical to the smaller "HFA." An insulated shaft extension safeguards operating personnel from the high voltages which may be applied to the rotor. The small size, rugged construction, balanced rotor and range of capacitance values and breakdown voltages make this capacitor ideally suited to many applications.



SPECIFICATIONS—Straight line capacity. Air gaps and test voltages are as indicated in table. However, "HFBD" breakdown voltages are doubled and capacitance values approximately halved when stator sections are connected in series.

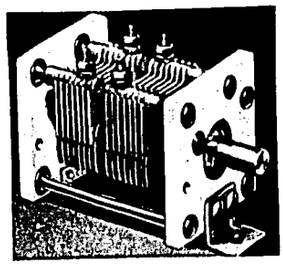
"E" 1750 V. R.M.S. "HFBD"—"C" 1500 V. R.M.S.
"E*" 3000 V. R.M.S., plates have rounded edges.
†Has front and rear supporting panels.

"RMC" CAPACITORS

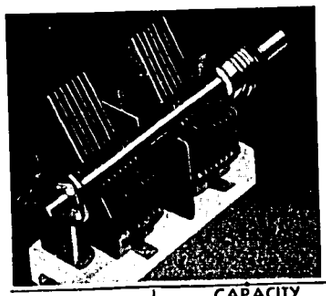
FEATURES—The "RMC" was designed specifically for applications requiring an "MC" type tuning capacitor with very rigid construction. Its sturdy frame consists of heavy gauge aluminum end panels held together by three aluminum tie rods. It has a brass sleeve front bearing and a single ball thrust rear bearing for smooth tuning and a high degree of resetability. The rotor contact is a forked silver-plated beryllium-copper spring wiping against a wide disc on the rotor.

CODE	CAPACITY		PLATES
	Max.	Min.	
RMC-50-S	50.	7.3	7
RMC-100-S	105.	9.5	14
RMC-140-S	143.5	11.0	19
RMC-325-S	327.	17.5	43



SPECIFICATIONS—Straight line capacity. Air gap is 0.0245" nominal.

"VU" CAPACITORS



FEATURES—A uniquely designed UHF tuning capacitor using completely original concepts. With it, conventional "lumped constant" circuits, rather than tuned cavity techniques, can be efficiently used up to 500 mc. Capacitor sections are in series to eliminate rotor wiper and the design utilizes Pyrex balls to form precision bearings and to completely isolate the rotor. Thus, noise generated by rubbing metal-to-metal contacts and variable resistance paths in the bearings have been totally eliminated. Circuit connections are made to threaded studs on each stator. This permits vacuum tube and inductor to be mounted adjacent to and on opposite sides of the capacitor to minimize circuit inductance.

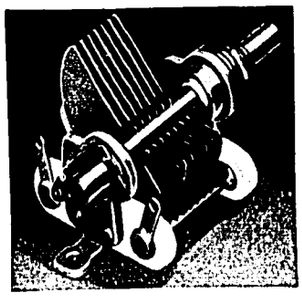
	Eff.	Min.	
VU-20	22.5	3.35	11
VU-30	31.5	3.5	15
VU-45	45.0	3.8	21

SPECIFICATIONS—The capacity characteristic approaches a straight line frequency curve. Air gap is .0168" nominal. Tested at 700 V. R.M.S., 60 cycles, between rotor and each stator.

"MC" and "MCD" CAPACITORS



FEATURES—The "MC" is a versatile single section tuning capacitor designed to give a choice of mountings, connections and capacity characteristics. "MC-S" capacitors have a straight line capacity characteristic. "MC-M" units have offset plates resulting in a "Midline" characteristic which more equally spaces frequencies. "MC-X" units are wide-spaced for high voltages. The "MCD" is a split-stator panel-mounted capacitor.

SPECIFICATIONS—Straight line or "midline" capacity characteristic. Single-spaced types have 0.0245" nominal air gap and are tested at 1000 V. R.M.S., 60 cycles. Wide-spaced ("X") types have 0.0715" nominal air gap and are tested at 1750 V. R.M.S., 60 cycles.

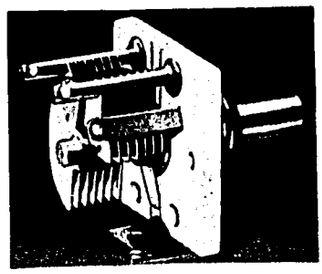
M—Midline plates X—Wide-Spaced S—Straightline plates

"HF" and "HFD" CAPACITORS

SINGLE SECTION CAPACITOR—The "HF" is a single section tuning capacitor employing "APC" rotor and stator design. Extra long sleeve bearing and positive contact nickel-plated phosphor-bronze wiper make this unit ideally suited to high frequency applications. Silicone treated steatite insulation. Single hole or base mounting.



DOUBLE SECTION CAPACITOR — The "HFD" dual capacitor, like the "HF" singles, incorporate advanced features providing for maximum efficiency at high frequency. Aluminum front and rear end panels are mounted on a heavy silicone treated steatite base. Wide front and rear bearings with individual silver-plated beryllium-copper wipers for each section assure long life and maximum contact efficiency. Single hole panel mount or base mounting.

SPECIFICATIONS—Straight line capacity. Single spaced types (HF and HFD) have 0.015" air gap and are tested at 600 V. R.M.S., 60 cycles. Wide spaced types (HF-X and HFD-X) have 0.045" air gap and are tested at 1400 V. R.M.S., 60 cycles.

PRECISION RADIO EQUIPMENT

BROADCAST TRANSMITTERS

AM

800J	250-100 watts
20V	1000-500 watts
21F	5000-1000 watts
21M	10,000-5000 watts

SPEECH EQUIPMENT AND ACCESSORIES

Collins complete line for AM and FM broadcasting is listed in the new *Collins Speech Equipment Catalog*. It pictures and describes a wide variety of high quality speech input consoles, remote equipment, rack mounted audio units, test and control apparatus, transducers, power supplies, meter and jack panels, terminal boards, cabinets — everything needed in building a new station or modernizing an old one. *Collins Speech Equipment Catalog* should be kept in the files of all broadcast engineers as a standard reference work. Your nearest Collins office will be glad to supply a copy to your station upon request.

AMATEUR EQUIPMENT

75A-3 Receiver incorporates the new Collins Mechanical Filter — a new concept in receiver performance. Either 3 kc or 800 cycle bandwidth selected by a front-panel switch. AM signals can be tuned to accept the carrier and either one of the sidebands at will while the other sideband is rejected. Ideal for reception of single sideband signals. It is an extremely stable double conversion superheterodyne receiver, covering the 160, 80, 40, 20, 15, 11 and 10 meter bands. Permeability tuned; crystal controlled hf oscillator; dial calibrated directly in frequency; extremely sensitive with great tuning accuracy and high signal to noise ratio; 50 db image rejection on all bands; automatic noise limiter; amplified, delayed AVC with quick recovery; miniature tubes.

Price including 3 kc mechanical filter, less speaker . . $540.00
10" speaker in matching cabinet 20.00

KW-1 Transmitter, one kilowatt input AM phone and CW; covers 160, 80, 40, 20, 15, 11 and 10 meter bands; designed to avoid TVI with additional attenuation in the antenna network and filtered control leads; completely shielded r-f assembly; usual excellent Collins audio with speech clipper and high level low pass filter for bandwidth limitation; single control exciter tuning; single bandswitch for entire transmitter; tuning dial similar to 75A-3; output 50 ohms (2.5 to 1 standing wave ratio); PA tubes conservatively operated at one kilowatt. Price $3,850.00

32V-3 Transmitter, 150 watts input CW, 120 watts phone; Collins 70E-8A VFO controlled, bandswitching, gang tuned; designed for maximum reduction of TVI by means of added tuned circuits in the exciter and an added L section in the unbalanced pi output network plus double shielding and filtering of essential leads. Price . . $775.00

35C-2 Low Pass Filter inserted in well shielded transmission line from 32V-1, 2, or 3, provides approximately 75 db attenuation of harmonic emissions at the television frequencies. Price $40.00

INDUSTRIAL COMPONENTS

Autotune, a Collins patented automatic rotary positioning device used for accurate remote control of communication receivers and transmitters by means of adjustable positions. It can also be used for the control of many types of industrial equipment.

Autopositioner, a mechanism which will set a shaft accurately to any one of several fixed positions by remote control. It is fast and quiet and is built for long service.

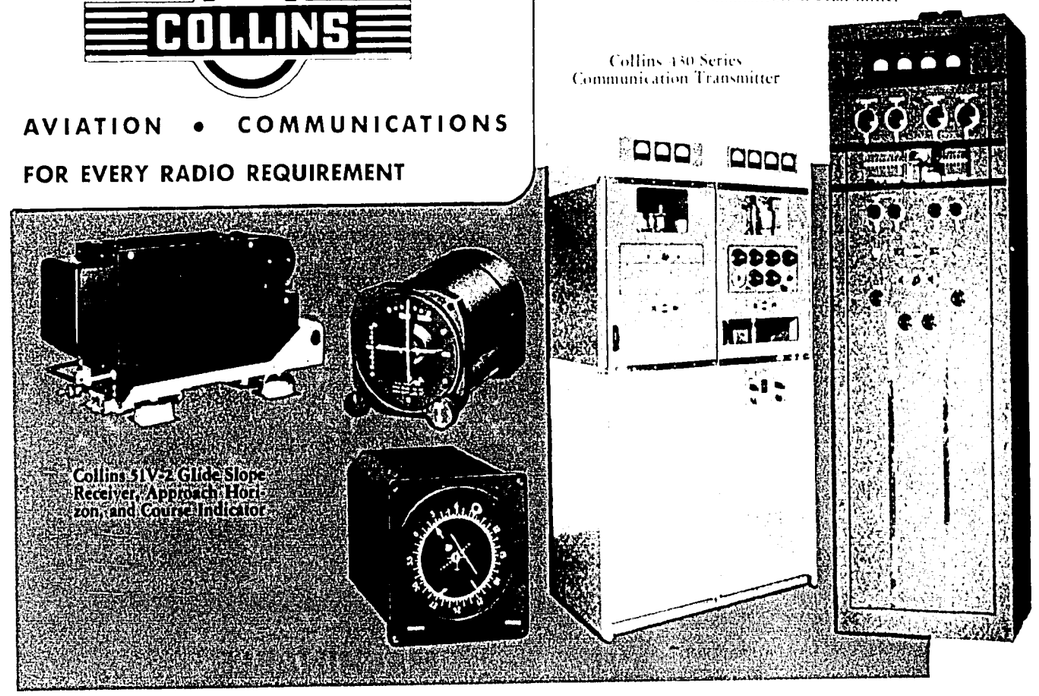
Instrument Type Motors, high efficiency hysteresis type motors are available in both 1" and 2" frame sizes for special applications to airborne and ground communication transmitters and receivers.

Mechanical Filter gives a close approach to the ideal rectangular selectivity curve by using resonant mechanical elements, rather than tuned electrical circuits. Many operating frequencies and band widths are available. When used in a receiver's IF strip, the carrier and one sideband of an AM signal can be accepted while the other sideband is rejected. 3 kc bandwidth filter is ideal for AM or SSB.

AVIATION EQUIPMENT

618S 144-Channel HF Transceiver, 100 watt power output on 144 crystal controlled channels. Automatically tuned elements insure maximum flexibility and high power output.

51R-3 VHF Receiver, for navigational use of the omnidirectional range.



17L-3 180-Channel VHF Airborne Transmitter, frequency range 118.0 to 135.9 megacycles. All 180 channels easily selected on a simple, positive remote control system. Power output conservatively rated at 8 watts.

51V-2 Glide Slope Receiver, designed for reception of 90-150 cps tone modulated glide slope signals on any of the twenty channels in the UHF range.

COLLINS

AVIATION • COMMUNICATIONS

FOR EVERY RADIO REQUIREMENT

17M 360-Channel VHF Airborne Transmitter, full 360 channels in the range of 118.0-135.9 mc. 50 watt power output with phone emission. Meets ARINC Spec. #520.

51X 360-Channel VHF Airborne Communications Receiver companion to 17M Transmitter. Complete new design to meet ARINC Spec. #520 for 50 kc bandwidth. Has the sensitivity, selectivity and spurious response rejection characteristics required for flight and airport traffic control.

51Z Marker Beacon Receiver is completely dependable, highly selective and free from spurious response. Operates lights with minimum "twilight" indication.

37J-3 VHF Airborne Navigation Antenna, for use with the 51R-3 navigation receiver. Drag, 2.65 pounds at 250 m.p.h.

37R-1 VHF Airborne Communication Antenna, for use with Collins VHF two-way communications system.

37P Airborne Glide Slope Antenna mounts on nose of aircraft, and provides greatly improved pickup and receiver performance.

Integrated Flight System simplifies ILS approaches by presenting precisely computed steering information in conjunction with simplified pictorial type instruments. Instrumentation also simplifies enroute navigation.

Navigation System, the Collins NC-101, provides the pilot continuous position information by automatically computed triangulation, using two VOR systems.

478C IFS Test Equipment, bench tester for ILS Computer, automatic pilots and other flight director equipments.

479T-2 Signal Generator, a precise ramp-test equipment for airborne VOR localizer and glide slope receivers.

479S-3 Audio Signal Generator is used in precision bench testing of omni-range, localizer and glide slope receivers. Output signals for VOR, localizer, and glide slope audio circuit investigations are provided.

GROUND STATION EQUIPMENT

231D-20 Autotune Transmitter, frequency range 2-26 mc. 2.5 to 3 kilowatts phone, 3 kilowatts CW.

430 Series Transmitters, 1 or 2 kilowatts, conservatively rated, phone, CW or ISK. Simultaneous transmission on two or more frequencies if desired. Transmission on any of ten instantly selectable, pre-set channels over entire range from 2-30 mc. Unitized chassis construction combines production economies with custom requirements.

16F-14 Autotune Transmitter, frequency range 2-20 mc. 500 watts phone, 500 watts CW.

30K-4 Transmitter, 2 channels, pretuned to any frequency between 2 and 30 mc. 500 watts CW, 250 watts phone.

32RA-9 Transmitter, 1 channels, pretuned to any frequency between 1.5 and 15 mc. 75 watts CW, 50 watts phone.

51J-3 Receiver provides continuous coverage from 500 kc to 30 mc, with very high stability and tuning accuracy.

51M-6 VHF Rack Mounting Receiver, single channel, pretuned to any frequency between 118 and 136 mc.

51N-2 Receiver, single channel, for A1, A2, and A3 reception, pretuned to any frequency between 2 and 24 mc. Mechanical filter kits available.

242F VHF Transmitter, rack mounted, providing single frequency operation between 118.0 and 136.0 mcs. 50 watts power into 52 ohms.

In requesting complete technical information on any Collins product please specify equipment you want.

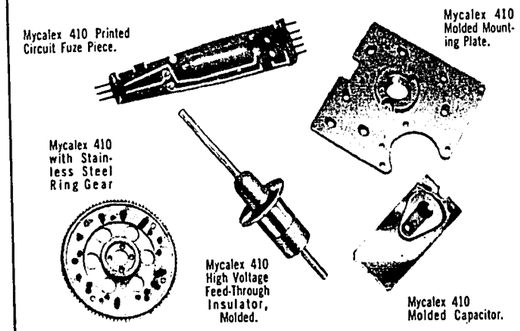
MYCALEX THE WORLD'S MOST NEARLY PERFECT INSULATION

glass-bonded mica

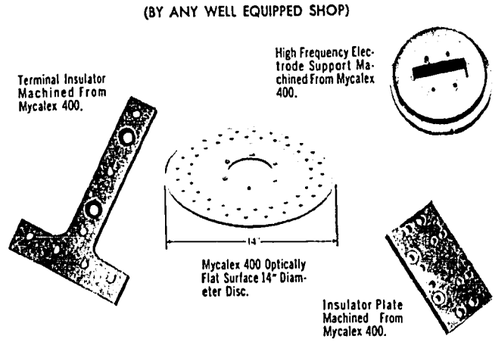
MYCALEX glass-bonded mica is the only CERAMOPLASTIC



Mycalex glass-bonded mica has ceramic rigidity, much of ceramic temperature endurance, plus more dimensional precision and stability than any ceramic. Mycalex glass-bonded mica can be molded and machined like a plastic, but with greater precision, greater dimensional stability, complex insert inclusions, and higher temperature endurance than any plastic. Having the best features of both ceramics and plastics plus some special ones of its own, Mycalex glass-bonded mica is the only Ceramoplastic.

PROPERTIES

- Electrically stable. Does not lose its properties.
- Low electrical loss factor.
- High dielectric strength.
- High arc resistance. Cannot carbonize.
- Can be molded to closer dimensional tolerances than any ceramic or plastic.
- Can be machined, ground or lapped to as close tolerances as any metal.
- Persistent dimensional stability. Free from warpage, cold flow or age distortion.
- Inserts can be molded into molded grades, cemented into machined holes in machined grades.
- Metal parts can be cemented onto all grades. One Mycalex glass-bonded mica part can be cemented to another.
- Has nearly the same coefficient of thermal expansion as the most commonly used insert alloys. Holds inserts tight over wide temperature ranges.
- Unaffected by humidity.
- Impervious to water, oil, organic solvents.
- High temperature endurance.
- High thermal shock endurance.
- Dimensional stability persists despite cycles of high and low temperature.
- Radiation Resistant.



MOLDABLE

(BY MYCALEX CORPORATION OF AMERICA ONLY)

MACHINABLE

(BY ANY WELL EQUIPPED SHOP)

THERE ARE DIFFERENT GRADES FOR DIFFERENT PURPOSES

Operating temperature limit 650° F., natural mica, moldable with or without inserts, low machinability.	Operating temperature limit 900° F., synthetic mica, moldable with or without inserts, low machinability.	Moldable but not readily machinable general capacitor dielectric with dielectric constant indicated by KM number such as 10, 20, 30 or 40.	Operating temperature limit 700° F., natural mica, readily machinable, not moldable, inserts must be cemented in.	Operating temperature limit 1000° F., synthetic mica, readily machinable, not moldable, inserts must be cemented in.	Machinable general capacitor dielectric with dielectric constant indicated by K number such as 10, 15 or 20.

WHAT MYCALEX glass-bonded mica CAN CONTRIBUTE TO ELECTRICAL DESIGN

Electrical components of given capacities can be made smaller, more compact, and lighter in weight when the high thermal endurance, structural strength, dimensional precision, dimensional stability, and almost ideal insulating ability of Mycalex glass-bonded mica are employed. Tight inserts eliminate corona and produce tight seals. Printed circuit elements can be tied into inserts.

SWITCHES, COMMUTATOR PLATES BY MYCALEX ELECTRONICS CORPORATION

Under exclusive License of Mycalex Corporation of America

Top view of a Mycalex 410 commutator. Made to the specifications of Raymond Rosen Engineering Products, Inc., for Air Materiel Command and other government projects. Only Mycalex glass-bonded mica could provide the mechanical, dimensional and electrical properties that such precision products require.

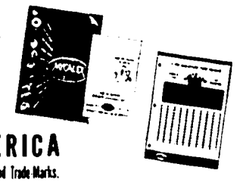
Rear view of the same commutator. It is precision injection-molded, has 180 or 108 contacts and three coin silver slip rings. These tight inserts will take repeated soldering and violent temperature change with no loosening. Mycalex Electronics Corporation is ready to produce similar complex combinations of metal and insulation to your designs.
Just write us.

OUR ENGINEERS ARE READY TO ADVISE YOU

If you will send us sketches, blue prints or models of any products in which Mycalex glass-bonded mica might be used as electrical insulation, our engineers will be glad to make suggestions in regard to the most economical and effective ways to employ our products in your designs.

MYCALEX CORPORATION IS THE WORLD'S LARGEST MANUFACTURER OF glass-bonded mica PRODUCTS

Mycalex Corporation of America is a direct development of the very inception of glass-bonded mica as an engineering material.



We undoubtedly have machined, on contract, more designs of pieces and more thousands of pieces of glass-bonded mica than any other manufacturer. This is in spite of the fact that we are persisting in and accelerating our effort to teach others how to machine this machinable material.

We certainly have molded more designs and more thousands of glass-bonded mica parts than any other manufacturer. This we know to be true because only a few manufacturers mold this material at all and the rest of the industry combined does not match our steadily employed molding facilities.

Our reason for making these statements about the position of Mycalex Corporation of America in the glass-bonded mica industry is to emphasize the quality of the free engineering suggestion service which we offer to all who might use Mycalex glass-bonded mica in their products.

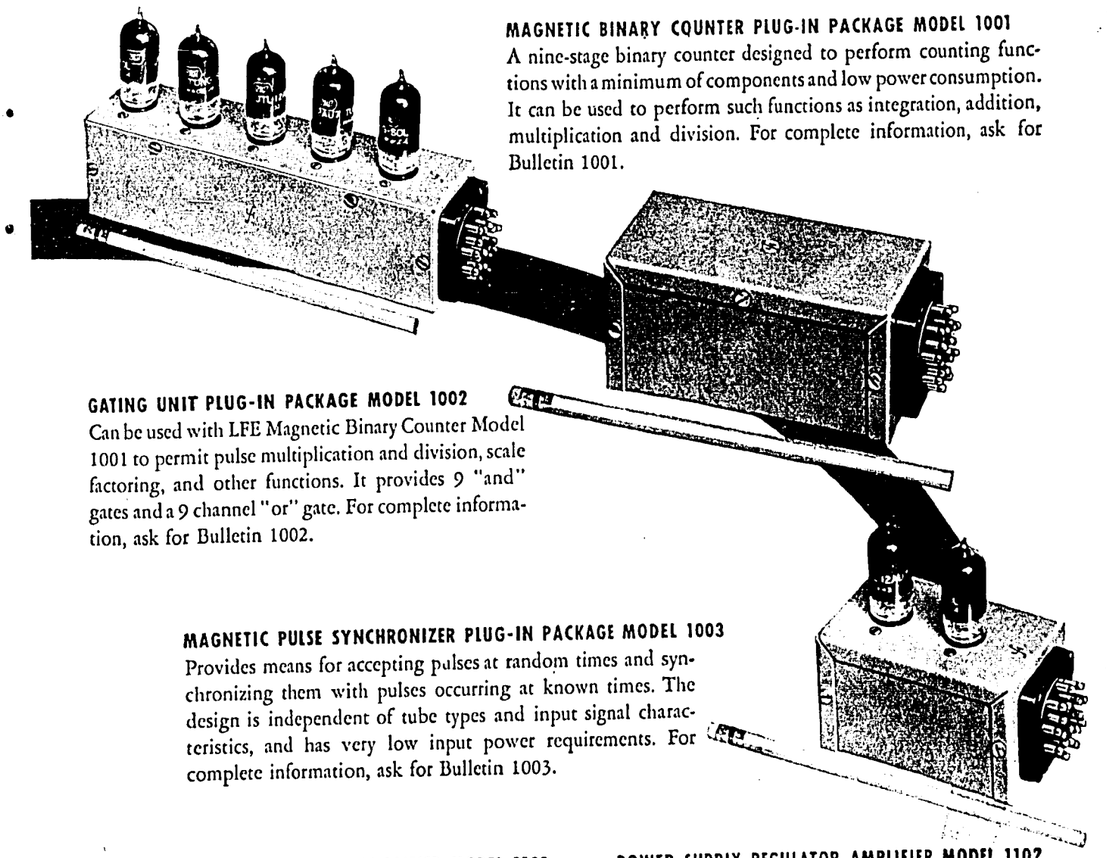
LABORATORY for ELECTRONICS, INC.

OSCILLOSCOPE MODEL 401
A versatile, general purpose, high gain, wide band oscilloscope. Suitable for precise, quantitative studies of pulse waveforms, transients and other high or low speed electrical phenomena. 15 Mv. per cm. *AC* & *DC*. Unipolar linear vertical deflection 2½". Excellent transient response. Precision sweep delay 5-5000 μsec. Trigger generator 500-5000 c.p.s. For complete information, ask for Bulletin 401.

OSCILLOSCOPE MODEL 402
A moderately priced precision oscilloscope for the analysis of complex electrical phenomena. Includes most of the excellent characteristics of the Model 401. For complete information, ask for Bulletin 402.



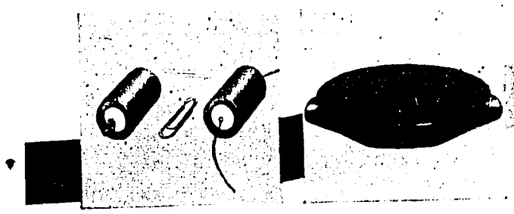
DOLLY MODEL 400
Model 400 Scope Wagon. Rugged, versatile, extremely useful. For complete information, send for Bulletin 400.

ULTRA-STABLE MICROWAVE OSCILLATOR MODEL 802
A highly stabilized source of frequency in the X Band. Long time drift is held to within one part in 10^5. Suitable for use as a laboratory standard. Features a direct reading frequency dial, sine wave modulation input and self-contained power supply. For complete information, ask for Bulletin 802.

ULTRA-STABLE MICROWAVE OSCILLATOR MODEL 803
An S Band oscillator stabilized for maximum frequency drift of one part in 10^5. Features a frequency calibrated dial, means for modulation and a self-contained power supply. For complete information, ask for Bulletin 803.

MAGNETOMETER MODEL 101
Utilizes principles of nuclear resonance for the simple, accurate measurement of homogeneous magnetic fields. Useful in paramagnetic and ferromagnetic field measurements. For complete information, ask for Bulletin 101.

RESEARCH, ENGINEERING AND PRODUCTION OF PRECISION ELECTRONIC EQUIPMENT



MAGNETIC BINARY COUNTER PLUG-IN PACKAGE MODEL 1001
A nine-stage binary counter designed to perform counting functions with a minimum of components and low power consumption. It can be used to perform such functions as integration, addition, multiplication and division. For complete information, ask for Bulletin 1001.

GATING UNIT PLUG-IN PACKAGE MODEL 1002
Can be used with LFE Magnetic Binary Counter Model 1001 to permit pulse multiplication and division, scale factoring, and other functions. It provides 9 "and" gates and a 9 channel "or" gate. For complete information, ask for Bulletin 1002.

MAGNETIC PULSE SYNCHRONIZER PLUG-IN PACKAGE MODEL 1003
Provides means for accepting pulses at random times and synchronizing them with pulses occurring at known times. The design is independent of tube types and input signal characteristics, and has very low input power requirements. For complete information, ask for Bulletin 1003.

STABILIZED D.C. OPERATIONAL AMPLIFIER MODEL 1101
This compact plug-in unit has been designed to provide high gain and low drift to meet the stringent need of real time computation. It has low phase shift and wide bandwidth resulting in excellent performance at high solution speeds. The Model 1101 may be used with any standard commercial chopper having a make-before-break contact. For complete information, ask for Bulletin 1101.

POWER SUPPLY REGULATOR AMPLIFIER MODEL 1102
A plug-in packaged control amplifier for series regulated D.C. power supplies. It is designed to control any type of series tube or tubes as dictated by output current requirements. Provides excellent voltage stability, 60 db. ripple rejection, and low output impedance. For complete information, ask for Bulletin 1102.

SOLID DELAY LINES
Utilize fused quartz as the ultrasonic delay medium. Offer the following advantages in obtaining precise delay intervals for pulses or pulsed modulated signals: Wide ranges of delay, low attenuation, low spurious response, wide bandwidth, smooth pass band, wide temperature range, minimum size and weight and rugged construction. Typical applications include video integration, computers, time markers, moving target indication. For complete information, ask for Bulletin SDL.

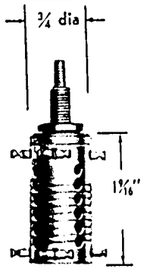
COIL FORMS

XR-50

These mica-filled bakelite coil forms may be wound as desired to provide a permeability tuned coil. The form winding length is 11/16" and the form winding diameter is ½ inch. The iron slug is ⅜" dia. by ½" long.

XR-51 same but with brass slug.



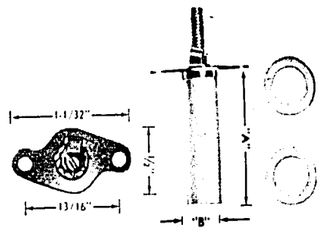
High-grade ceramic coil forms conforming to JAN specifications. May be wound as desired to provide a permeability-tuned coil. Extra lugs provided

XR-60 Grooved for #26 wire with iron slug

XR-61 Grooved for #26 wire with brass slug

XR-62 Not grooved, winding length 1¼" with iron slug

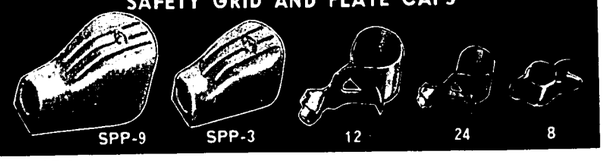
XR-63 Not grooved, winding length 1¼" with brass slug



XR-70 Grooved for #19 wire with iron slug

XR-71 Grooved for #19 wire with brass slug

XR-72 Not grooved, winding length 1" with iron slug



XR-73 Not grooved, winding length 1" with brass slug

Small ceramic coil forms designed primarily for high frequency applications and conforming to government specifications. Coil form is Grade L4 ceramic (JAN 1-10); base is silver-plated brass; core is brass or iron. Supplied with two nylon rings to separate coils if more than one is wound on same form. Small holes in rings can be used to secure leads.

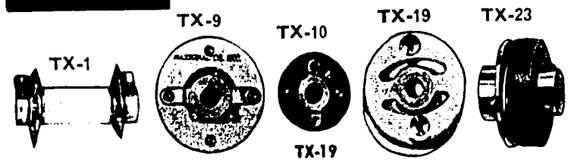
SAFETY GRID AND PLATE CAPS

SPP-9
Ceramic insulation. Fits 9/16" diameter.



SPP-3
Ceramic insulation. Fits ⅜" diameter. National Safety Grid and Plate Caps have a ceramic body which offers protection against accidental contact with high voltage caps on tubes.

GRID AND PLATE GRIPS

Type 12, for 9/16" Caps
Type 24, for ⅜" Caps
Type 8, for ¼" Caps
National Grid and Plate Grips provide a secure and positive contact with the tube cap and yet are released easily by a slight pressure on the ear.

Write Dept. 800 for complete catalog or detail drawings of parts advertised

COUPLINGS

TX-1, Leakage path 1".

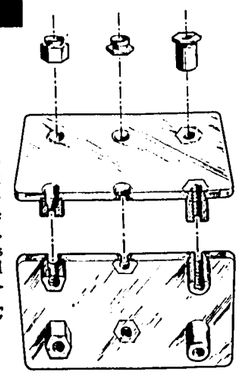
TX-9

This small insulated flexible coupling provides high electrical efficiency when used to isolate circuits. Insulation is steatite. 1⅝" diam. Fits ¼" shaft.

TX-10

A very compact insulated coupling free from backlash. Insulation is canvas bakelite. 1-1/16" diam. Fits ¼" shaft.

TX-19



A steatite insulated flexible coupling for ¼" shafts. Conservatively rated at 5000 volts peak. Diameter 1⅝", length 1". Length and flashover voltage can be increased by turning collars outboard.

TX-23

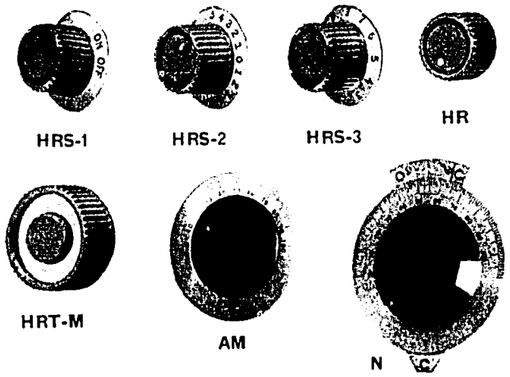
A deluxe insulated flexible coupling designed for coupling ¼" shafts. Will handle a maximum radial misalignment of 1/16" also 2 degrees maximum angular misalignment.

CAPTIVE NUTS

National Captive Nuts of stainless steel may be pressed into aluminum and certain types of brass sheet metal to provide integral flush-mounted tapped holes in a wide variety of sizes. Four basic types have been designed for metal thicknesses of 1/16", 3/32", ⅛", 3/16" and ¼".

DIALS, MECHANISMS AND KNOBS

HRS (gray or black)
The HRS series knobs are a popular easy to grip knob. They are molded of high quality plastic and have 1⅝" dia. chrome plated bevel skirts fit ¼" shafts available in the following scales:



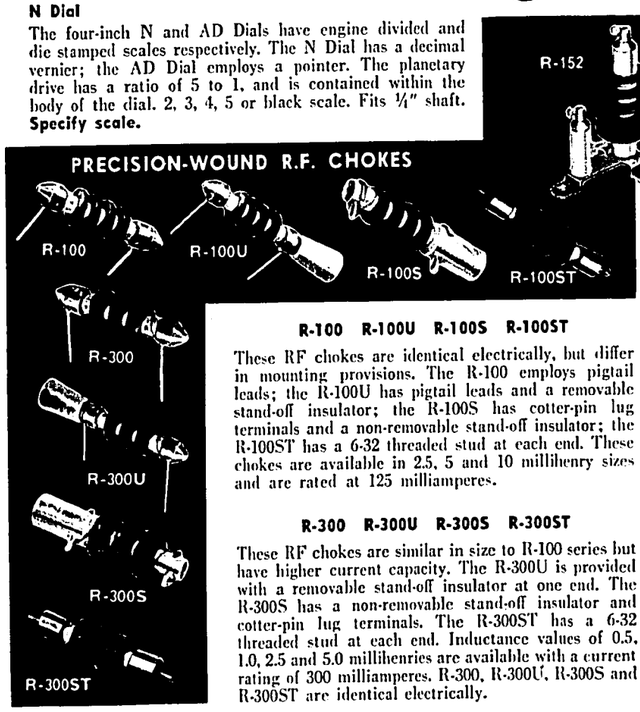
HRS-1	ON-OFF	through 30°
HRS-2	5-0-5	through 180°
HRS-3	0-10	through 300°
HRS-4	Single etched line	
HRS-5	0-10	through 180°

HR (gray or black)
An HRS type knob without the chrome plated skirt but with a white dot for spotting relative control settings.

HRT-M
This smaller version of the HRT — now available in choice of gray or black — is 1-7/16" in diameter.

AM Dial
The original "Velvet Vernier" mechanism in a metal skirted dial 3" in dia. ratio 5 to 1. It is available with 2, 3, 4, 5 or 6 scale and fits ¼" shaft. Mechanisms also available separately.

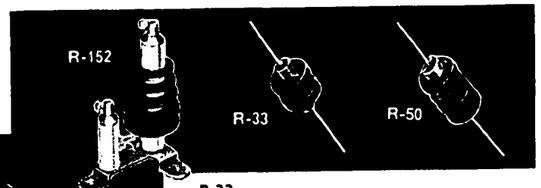
N Dial
The four-inch N and AD Dials have engine divided and die stamped scales respectively. The N Dial has a decimal vernier; the AD Dial employs a pointer. The planetary drive has a ratio of 5 to 1, and is contained within the body of the dial. 2, 3, 4, 5 or black scale. Fits ¼" shaft. **Specify scale.**



HRM KNOB

This straight knurl brass, satin chrome finished knob with arrowhead fits ¼" shaft. See catalogue for description.

PRECISION-WOUND R.F. CHOKES

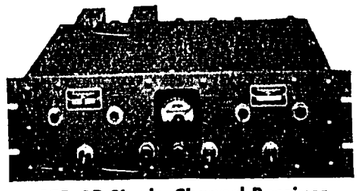


R-100 R-100U R-100S R-100ST

These RF chokes are identical electrically, but differ in mounting provisions. The R-100 employs pigtail leads; the R-100U has pigtail leads and a removable stand-off insulator; the R-100S has cotter-pin lug terminals and a non-removable stand-off insulator; the R-100ST has a 6-32 threaded stud at each end. These chokes are available in 2.5, 5 and 10 millihenry sizes and are rated at 125 milliamperes.

R-300 R-300U R-300S R-300ST

These RF chokes are similar in size to R-100 series but have higher current capacity. The R-300U is provided with a removable stand-off insulator at one end. The R-300S has a non-removable stand-off insulator and cotter-pin lug terminals. The R-300ST has a 6-32 threaded stud at each end. Inductance values of 0.5, 1.0, 2.5 and 5.0 millihenries are available with a current rating of 300 milliamperes. R-300, R-300U, R-300S and R-300ST are identical electrically.



R-33
The R-33 series chokes are 2-section RF chokes available in 10, 50, 100 and 750 microhenry sizes. Also available in this series is a single layer solenoid choke of 1 microhenry inductance. All are rated at 100 milliamperes. The chokes are wound on a ⅜" long form and range in diameter up to 5/16" maximum.

R-50
R-50-1
The R-50 series chokes are 3 and 4-section RF chokes and available in 0.5, 1, 2.5, and 10 millihenry sizes. They are rated at 100 milliamperes. The chokes are wound on a 1" long form and have a maximum diameter of 15/32". The 10 millihenry R-50-1 choke is wound on an iron core.

R-152
For use in the range between 2 and 4 Mc. Ideal for high power transmitter stages operated in the 80 meter amateur band. Inductance 4 m.h., DC resistance 10 ohms, DC current 600 ma. Coils honeycomb wound on steatite core.

Commercial Electronic Equipment

The National Company has designed and built many types of electronic equipment to rigid specifications for military, scientific and commercial purposes. The U. S. Navy, and other government agencies, as well as the nation's largest airports are among the many users of National equipment. Send inquiries to the Commercial Division.

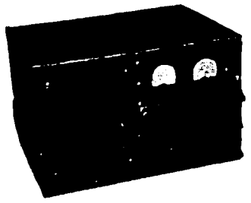
RADIO FREQUENCY SYSTEMS AND INSTRUMENTATION

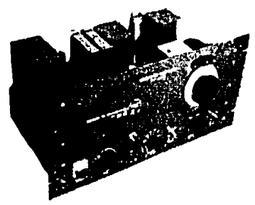


DFG-2
AND
DFM-3

RADIO DIRECTION FINDERS FOR EVERY APPLICATION

LF, HF and VHF models can be supplied for every application. When requesting information, describe intended use.

STANDARD MODELS



MODEL	FREQ. RANGE	ANTENNA	INDICATION
DFG-1	0.54-20 Mc	Crossed Adcock with goniometer	Aural-Null
DFG-2	0.54-30 Mc	4-element spaced aerial	Automatic Visual Indication
DFM-1	0.54-30 Mc	Rotatable Loop	Aural-Null
DFM-2	0.54-20 Mc	Crossed Loops with goniometer	Aural-Null
DFM-3	0.54-30 Mc	Crossed Loops with goniometer	Automatic Visual Indication

MODEL 2400 CRYSTAL CONTROLLED SIGNAL GENERATOR

Positive crystal control from 150 Kc to 150 Mc; precision zero-leakage measurement of output level from 1 to 100,000 microvolts; and metered modulation free from FM distortion. These features of the Model 2400 Signal Generator make it possible to preset channels "on-the-head," to know receiver sensitivity without guessing, and to standardize squelch threshold control settings. Ideal for testing and aligning airline radio equipment, radar IF strips and TV tuners. Write for additional information.

MODEL 1232B SECONDARY FREQUENCY STANDARD—Rack Mounted

Here is a versatile precision instrument every laboratory needs for frequency comparison, measurement and synthesis, useful from 1 KC TO ABOVE 1000 MC. Oven-controlled crystal oscillator in special circuit provides accuracy better than 1 part per million. Self-contained crystal-controlled interpolation feature permits fast, direct measurement of frequency. Harmonics delivered are strong and uniform in amplitude. Standard harmonic intervals are 1, 2, 5, 10, 50 and 100 Kc. Output level for 100 Kc harmonics: 100 millivolts from 100 Kc to 5 Mc; 50 millivolts to 75 Mc; 25 millivolts or more to 85 Mc.

SERVOTHERM INFRARED RADIATION INSTRUMENTATION

1312
BOLOMETER
1321
PREAMPLIFIER

SERVOTHERM THERMISTOR BOLOMETERS

are small, rugged, fast sensitive infrared radiation detectors, suitable for spectrophotometric, industrial, and military applications. Furnished with SERVOFRAX window, sensitivity extends from 1 to 13 microns wavelength (other windows also available). Typical time constant, 5 milliseconds maximum. Write for data sheets TDS-1312 and TB-1312.

1322 PREAMPLIFIER

SERVOTHERM LOW-FREQUENCY PREAMPLIFIERS

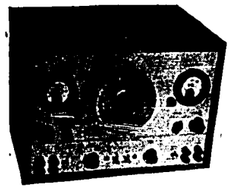
are low-noise, low-microphonic, stabilized miniature preamplifiers for audio frequencies and down to ½ c.p.s. at microvolt and millivolt input levels. Suitable for use in radiation measurement, geophysical, electromedical, etc. Model 1321 also serves as bolometer mount. Model 1322 is a potted plug-in style.

1350 AMPLIFIER
1330 POWER
SUPPLY

RECORDING AMPLIFIER Model 1350 includes a.c. amplifier, decade attenuator, and detector. Will drive 5 ma. recorder to record envelope of 15 to 1500 cycle carrier (as used in spectrophotometry). Designed for use following 1321-2 preamplifiers, or wherever a 5-5000 c.p.s. amplifier or amplifier/detector is required.

SERVOTHERM POWER UNIT is a superior regulated power supply having extremely low noise at frequencies down to 3 c.p.s., especially designed to power a Servotherm Bolometer and Preamplifier. Will also power one Recording Amplifier. Operates from 115 volts 60 cycles.

1360 PYROMETER



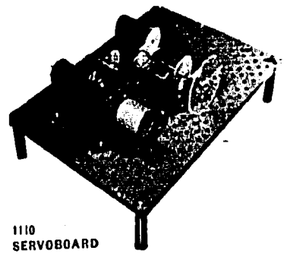
SERVOTHERM RADIATION PYROMETER is used for remotely measuring or controlling thermal radiation of objects to over 1000° C. (four ranges). Time constant under .025 seconds, field of view 1° × 1°. Optical head may be located any distance from object, and fits standard tripod. Pyrometer Model 1360 includes optical head with Servotherm bolometer and preamplifier, Recording Amplifier, Power Unit, and connecting cable.

SERVOFRAX LENSES

SERVOFRAX GLASS transmits infrared and far infrared radiation from 0.6 to 13 microns wavelength. Chemically and physically stable, it is superior to other available materials. Index of refraction is 2.4 and transmission 72% in the 2-8 micron region. Raw glass and finished lenses are available. Write your requirements.

SERVO ANALYSIS AND SYNTHESIS EQUIPMENT

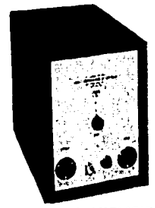
1100 SERVOSCOPE



SERVOSCOPE is a signal generator with synchronized phaseable sweep. Produces sub-audio sine waves, square waves, and modulated carrier signals for testing servos and other very low frequency amplifying or control systems. Transfer characteristics, frequency and phase response, and step-function response may be quickly evaluated. Hundreds of Servoscopes are saving their cost to our customers by speeding up otherwise tedious measurements.

Output 0-25 volts. Synchronized sweep 0-150 volts. Operates on 50 to 800 c.p.s. carrier.

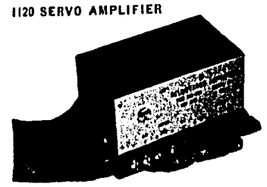
Accuracy, frequency 1½%, phase 1°. Input 115 V. 60 c.p.s.



Model 1100A—0.1 to 20 c.p.s.

Model 1100B—0.15 to 30 c.p.s.

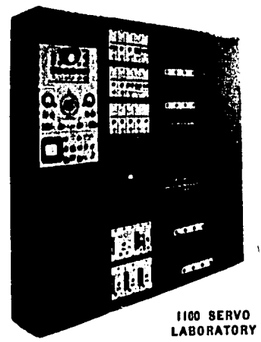
1110
SERVOBOARD



SERVOBOARD is a set of precision mechanical parts, including an ample assortment of gears, shafts, bearings, hangers and mounting plate, which, when coupled to the necessary motors, tachometers, synchros, potentiometers and amplifiers, rapidly builds a flexible experimental mechanical assembly of a servo system, computer or regulator. The Servoboard was developed as an aid to the design of servomechanisms by providing means for quickly synthesizing the electromechanical parts of the control system. Components may be located in an infinite number of positions because of the hairpin clamp method of assembly employed.

1120 SERVO AMPLIFIER

SERVO AMPLIFIERS with self-contained power supplies:



MODEL 1120 is a 60 c.p.s. amplifier with built-in 90° phase shift. Three matched inputs permit operation as a position servo with tachometer stabilization or as a rate servo. Output 10 watts.

1121 SERVO AMPLIFIER

MODEL 1121

A small and light 400 c.p.s. amplifier. Three inputs (two a.c. high gain and one d.c. low gain) are provided. Output, 10 watts continuous, 18 watts reversing or intermittent. Also available without cover for installation as a component.

1100 SERVO
LABORATORY

SERVO LABORATORY

This analysis and synthesis equipment includes a selected list of equipments required in the Servo Test and Development Laboratory. These equipments are grouped in a carefully arranged package to permit the servo designer readily to synthesize a wide variety of systems from standard components and test them with maximum efficiency and time economy. Complete flexibility is provided by standardized interchangeable, plug-in electronic components and efficient and versatile mechanical breadboards. Electrical interconnections are facilitated by terminating the various circuits in jack panels which can be quickly cross-connected by patch cards as desired. Many sizes and arrangements of Servo Laboratory equipment are available—write your requirements.

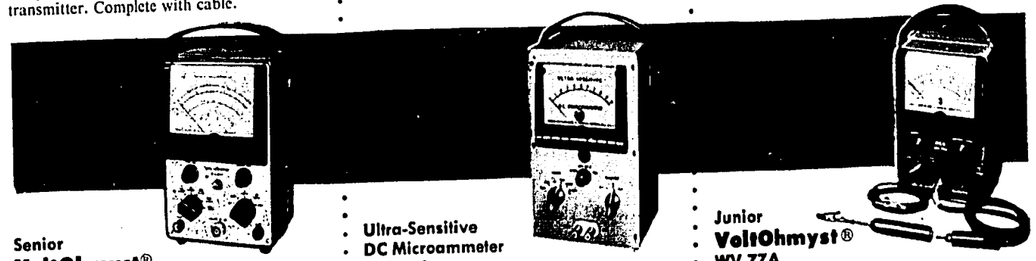
RCA Measuring Instruments

... for research, production, and servicing

Television Calibrator
WR-39C



Variable-frequency oscillator provides fundamental output over entire if and rf ranges, with crystal-controlled check points at 2.5-Mc and 0.25-Mc intervals. Provides 4.5-Mc crystal-oscillator signal for inter-carrier alignment and for dual markers at TV carrier frequencies. Harmonic output useful in the UHF range. The WR-39C is a heterodyne frequency meter, a crystal standard (with 3 crystals supplied), a bar-pattern generator, and a TV re-broadcast transmitter. Complete with cable.

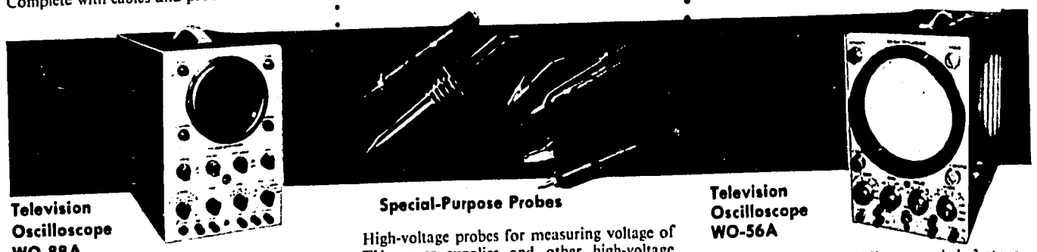
Television Sweep Generator
WR-59C

Covers all VHF TV channels on preset fixed positions. Continuous tuning range from 300 Kc to 50 Mc covers video and intermediate frequencies. Precision-type vibrating capacitor provides up to 12-Mc maximum sweep width, flat within ±1 db, with good linearity. Has balanced output dual-piston attenuator for varying output voltage from 0.1 volt to 5 microvolts. Includes blanking for zero-reference line on 'scope. Complete with cables.

Master VoltOhmyst®
WV-87A

Has big 7½" meter. Measures dc voltages accurately in high-impedance circuits, with ac present. Also reads rms values of sine waves and peak-to-peak values of complex waves or recurrent pulses, with dc present. Measures resistance from 0.1 ohm to 1000 megohms, current from 10 microamperes to 15 amperes. Features ±1% tolerance multiplier and shunt resistors, a meter movement having an accuracy within ± 2% and a tracking error of only ± 1%. AC operated. Complete with cables and probes.

Senior
VoltOhmyst®
WV-97A



Directly measures complex waves from 0.2 volt to 2000 volts, peak-to-peak. Has an over-all accuracy for dc measurements of ±3% full scale. Measures dc voltage from 0.02 volt to 1500 volts . . . rms values of sine-wave voltages from 0.1 volt to 1500 volts. Has 7 non-skip ranges for both resistance and voltage. Frequency response flat from 30 cps to approximately 3 Mc up to 150V range. AC operated. Complete with cables and probes.

Ultra-Sensitive
DC Microammeter
WV-84A

Reads from 0.0002 microampere to 1 milliampere in six ranges. Also useful for measuring extremely high values of resistance, or as a high-resistance voltmeter with a maximum sensitivity of 100 megohms per volt. Accuracy, ±5% or better . . . invaluable for conducting experiments involving minute values of direct current. Battery operated.

Junior
VoltOhmyst®
WV-77A

Measures dc from 0.05 volt to 1200 volts; ac from 0.1 volt to 1200 volts rms; and resistance from 0.2 ohm to 1 billion ohms; five overlapping ranges in each case. Uses electronic bridge circuit, 200-microampere meter movement and ±1% carbon-film multiplier resistors. Over-all accuracy, ±3% for dc measurements on plus setting. Frequency response flat from 30 cps to 3 Mc up to 60V range. AC operated. Complete with cables and probes.

Television
Oscilloscope
WO-88A

Uses 5" CR tube and direct-coupled, push-pull, vertical amplifier. Frequency-compensated and voltage-calibrated attenuators. Front-panel source of 1-volt peak-to-peak calibrating voltage. Graph screen scaled for direct reading of peak-to-peak voltage. Response flat to dc, less than 3 db down at 500 Kc. Deflection sensitivity, 25 rms millivolts per inch. Input resistance, with low-capacitance probe, 10 megohms shunted by 9.5 mmf. Complete with cables.

Special-Purpose Probes

High-voltage probes for measuring voltage of TV power supplies and other high-voltage sources. *WG-289* has microphone-type connector; *WG-290* has phone-tip connectors. *WG-264* Crystal-Diode Probe, for measuring ac voltages from 10 Kc to 250 Mc. *WG-291* Demodulator Probe, for observing envelope of modulated waveforms. *WG-222* DC/Direct Probe of slip-on type, with built-in 1 megohm resistor. Slide switch permits measuring resistance, dc voltage, and ac voltage without changing probes.

Television
Oscilloscope
WO-56A

Uses 7" CR tube and direct-coupled, 3-stage, push-pull, vertical and horizontal amplifiers. Dual controls for "coarse" and "fine" adjustments. Frequency-compensated and voltage-calibrated attenuators on both amplifiers. Response flat within —2 db from dc to 500 Kc, within —6 db at 1 Mc. Vertical deflection sensitivity, 10.6 rms millivolts per inch. Magnetic shield on CR tube. Cables included.

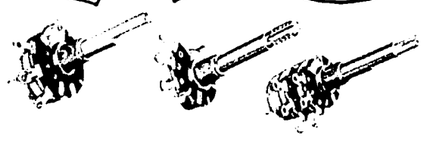
TEST EQUIPMENT
HARRISON, N. J.

STAC

FIXED RESISTORS



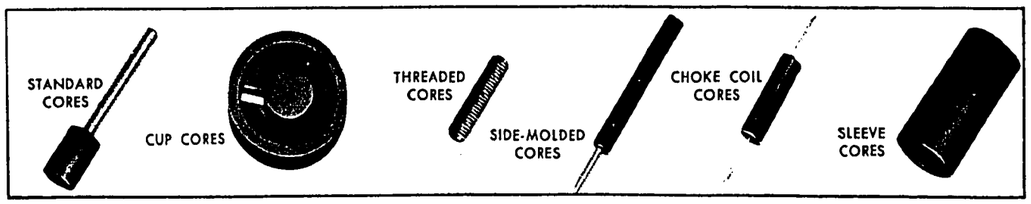
JAN-R-11 TYPES

Styles RC10, RC20, RC21, RC30, RC31, RC41, and RC42.

Write for Stackpole Bulletin J-2.

½-, 1-, and 2-Watt Sizes in all RTMA Preferred Values

Fully insulated and moisture-protected by phenolic sleeves, Stackpole resistors are available in all standard and many special values for radio, television, military and commercial uses. In addition, Stackpole offers special resistors for automotive, lightning arrestor, capacitor discharge, surge and other uses. *Write for Stackpole Catalog RC-9.*



VARIABLE RESISTORS

VERSATILE SWITCHES

Small, reliable line switches are made in ratings and circuitry for every need including auto radio applications.

Stackpole offers a dependable selection of volume and tone controls, potentiometers, etc. for radio, TV, instruments, and other equipment. Single, ganged, and concentric shaft designs are available in values from 500 ohms to 5 megohms and in ratings from .5 watt. Types range from the midget LR control for TV to the conservatively rated .6 watt Type LP for heavier duty wear. Special taps, extended bushings or other features can be supplied. *Write for Catalog RC-9.*

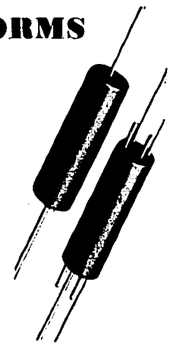
IRON CORE HEADQUARTERS

The widespread use of high Q coils with a consequent reduction in complicated circuitry has resulted in no small part from Stackpole engineering that has made new and better iron cores available at attractive prices. Stackpole production includes practically all types in common use—including cores for high- and low-frequency coils and transformers, chokes, and side-molded types for permeability tuning—as well as numerous types and adaptations made for special uses.

For all styles—standard or special—Stackpole manufacturing techniques assure iron cores of outstanding dependability and uniformity. *Write for Catalog RC-9.*

Fixed Composition CAPACITORS

47 TYPES



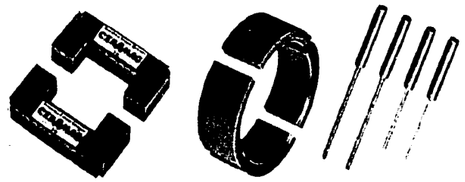
0.1 to 10.0 mmf. 5%, 10%, and 20% tolerances.

Type GA

Unmatched for low cost, high stability, and scarcely larger than ½-watt resistors, Stackpole "GA" capacitors are the most efficient way to couple or by-pass R-F circuits. Sturdily molded of high-dielectric constant material, these low-value capacitors have physical and electrical advantages that save assembly and testing time in virtually every R-F circuit. *Write for Catalog RC-9.*

MOLDED COIL FORMS

for fast, low cost assembly



Inexpensive Stackpole molded coil forms permit smaller coils and pave the way for simplified point-to-point wiring with a minimum of soldered connections. Either axial or hairpin leads, securely anchored, are available. Types can also be supplied with iron core sections, thereby increasing Q materially, decreasing the amount of wire for a given inductance, and reducing stray magnetic fields. Write for details and samples to specifications.

KPOLE

Ceramag®

THE REALLY UNIFORM FERROMAGNETIC CORES

Lower Losses with Higher Efficiency . . . Lighter Weight—Smaller Sizes Much Higher Permeability

Standard Stackpole Ceramag Cores provide permeabilities on the order of 10 to 1 or higher by comparison with conventional iron cores. In addition, they have less corona effect and operate much cooler due to eddy current losses resulting from their high resistivity.

The remarkable uniformity of Ceramag Cores has long made them first choice of leading television producers. Typical applications include use as cores for flyback transformers, cathode ray tube deflection yokes, width control; low-loss inductors; I-F pulse and coupling transformers; and various others where Ceramag offers distinct advantages. Details on standard and special Ceramag grades are covered in *Bulletin RC-9A.*

LOW COST SWITCHES

for instruments, radios, appliances, toys, small motors and similar uses

Dress up your product—add to its convenience and "saleability" with these sturdy, low-cost slide switches! Over 20 fractional amperage and new 3 amp. types for fractional HP motors are available. Most types can be supplied with or without detent, spring-return, or other features to match your specifications *exactly.* Modifications, including adaptations for rotary or plunger action, can be produced economically. *Write for new Stackpole Switch Bulletin RC-9B.*

CARBON & GRAPHITE SPECIALTIES

Solve Friction, Temperature, Corrosion, Shaft Sealing, Arcing, and many other problems

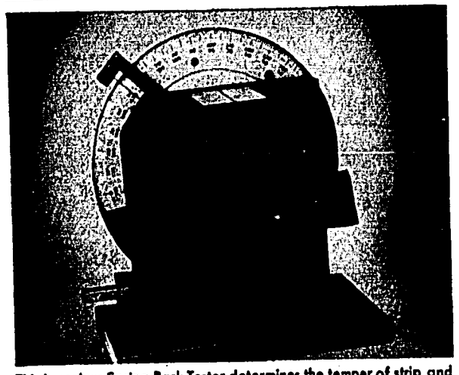
CARBON-GRAPHITE DATA BOOK

Newly revised and enlarged, Stackpole Catalog 40A contains helpful data on carbon, graphite, and carbon-graphite properties and their engineering uses.



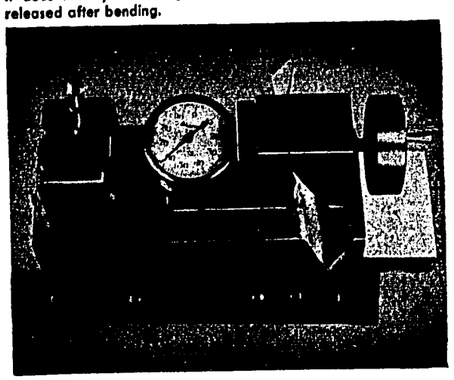
GET THIS BIG 48 Page CATALOG

Just out, the new Catalog RC-9 gives detailed specifications on the latest Stackpole Electronic Components described on these pages. Write on your business letterhead for your copy.

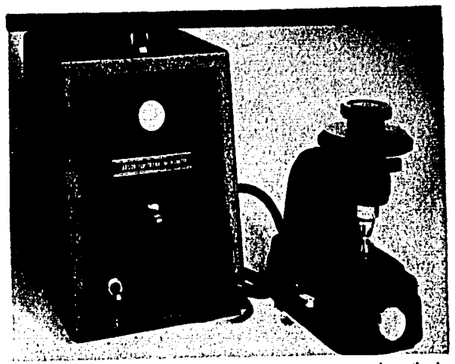
ELECTRONIC COMPONENTS DIVISION

STACKPOLE CARBON COMPANY, ST. MARYS, PENNSYLVANIA

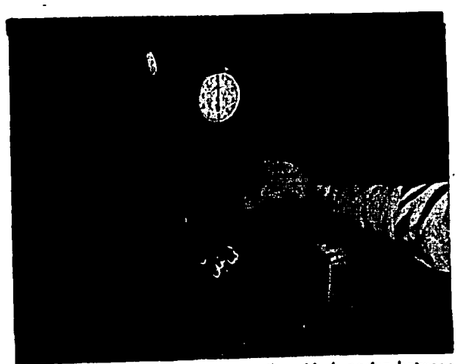
Superior TUBE COMPANY



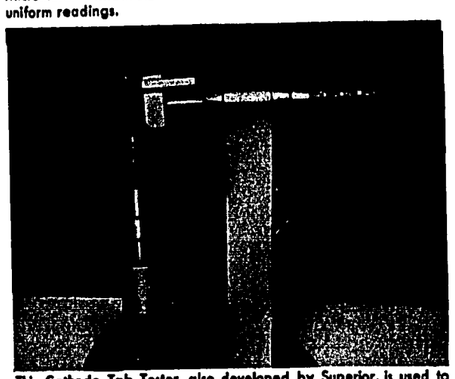
This ingenious Spring Back Tester determines the temper of strip and sheet metals for electronic parts in thicknesses of 0.020" or less. It does this by measuring the "spring-back" when specimen is released after bending.



A Few



Used to check bowed, bent and offset cathodes for degree of deformation, this Optical Comparator also checks the width and location of circumferential beads.



Cup-Testing Apparatus determines the amenability of very thin nickel strip to deep forming. The *combination* of temper, grain size, and ductility of the raw material is measured accurately.

Sensitive to .00005", this Electronic Micrometer reads cathode tolerances with repeated exactness. Light walls of Lockseam Cathodes tend to spring slightly when mechanical micrometers are used—and readings, therefore, are not exact. The Electronic Micrometer standardizes this measurement variable and supplies uniform readings.

The "E" Dimension Gauge measures the critical spacing between the ceramic surface and the surface of the emitting cap in Disc Cathodes. Tolerance limits must be accurate to ± 0.0005" since the dimension controls cut-off voltage and adds uniformity to the characteristics of cathode-ray tubes.

This Cathode Tab Tester, also developed by Superior, is used to "Production Control Test" the strength of tabs on Lockseam Cathodes. The tab is bent back and forth by the Tester until failure results. If it breaks before a specified minimum number of 90° bends are completed, the material is rejected.

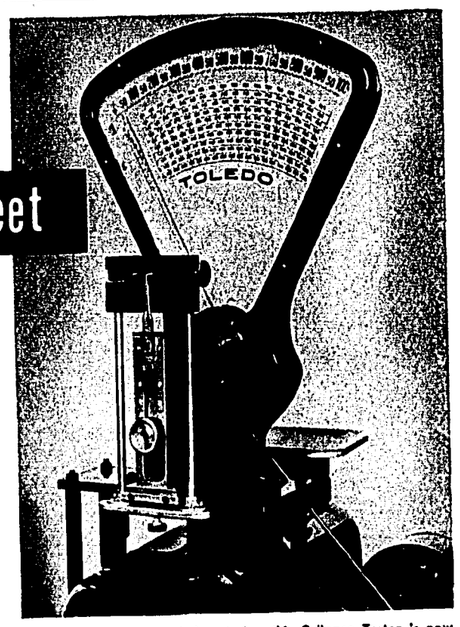
Superior Specialties: SEAMLESS AND LOCKSEAM NICKEL CATHODES, CATHALOY CATHODES, DISC CATHODES, ANODES AND GRID CUPS, FABRICATED TUBULAR PARTS.

Superior TUBE COMPANY

of the Critical Tests Superior Tubing Must Meet

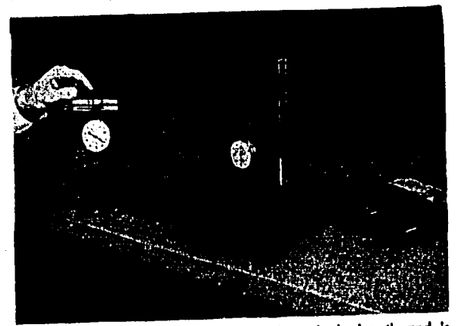
Every day we query these and other super-accurate machines about Superior tubing *and* the analyses from which we make it.

Answers—precise to the 3rd and 4th decimal place—enable us to deliver:



- **An eyebrow-raising assortment of tubular parts for the electronics industry.**
- **Unfailing quality and dependability in each of these products.**

Superior customers have often taken these things for granted. But Superior's Quality Control Program cannot take anything for granted! Rigid controls, beginning at the original melt, continue through every stage of drawing and fabrication. Result: Parts that stand up to the toughest and most precise electronics applications!



We could show only a few typical parts on these pages. So we've elected, instead, to detail our full line in literature which is yours for the asking.

If, however, you use cathodes in your work, we can supply Seamless or WELDRAWN† tubing for these parts or Lockseam* cathodes made from strip in either Nickel or Cathaloy** metals . . . round or shaped to specified lengths, plain or beaded (embossed). Also anodes, grid cylinders and cups, disc cathodes, and other tubular parts for cathode ray gun structures.

Superior will be glad to work with you in developing, designing and producing the parts you need. If you have a tubing problem, get in touch with us now. The handy coupon will bring you full information, and preliminary consultation costs you nothing. There's no obligation.

Developed in Superior Laboratories, this Collapse Tester is now accepted by A.S.T.M. The instrument is used to determine the degree of resistance to bending in finished cathodes.

The Flat-Faced Hand Micrometer checks cathode length and is accurate to .001". Conical Faced Barrel Micrometer checks wall thickness to tolerances of .0001". The Flat Faced Barrel Micrometer checks O.D. and bead dimensions, can be read to .0001". The Ultra Precision Barrel Micrometer measures shaped cathodes (O.D.) and beads and is readable to .00004". The "Go" and "No Go" pin gauges measure the inside diameter of round cathodes.

†Reg. U.S. Trademark, Superior Tube Co.
*Manufactured under U.S. Patents.
**U.S. Trademark applied for.

Superior
THE NAME IN SMALL TUBING

All analyses .010" to ⅝" O.D.
Certain analyses in Light Walls up to 2⅛" O.D.

CATHALOY is a new line of nickel cathode alloys for both Seamless and Lockseam type cathodes. It meets exacting requirements for low impedance, high emission and long life—assures tube reliability, increased mechanical strength, full service.

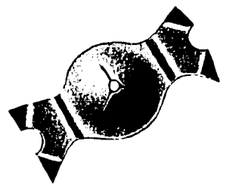
Tailor-Made Fasteners in Volume Quantities

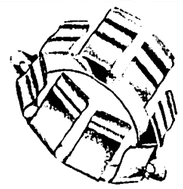
MINIATURE BATTERY CONNECTORS

For use with small "B" batteries; afford quick and positive polarized electrical connections and worthwhile space savings on such small equipment as portable radios or hearing aids.

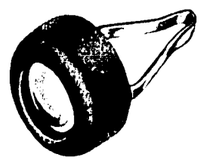


FEMALE ANODE CONNECTORS

Made from cold rolled steel and plated to specification, this part provides the high voltage connection to a metal picture-tube strap, or allied connections.

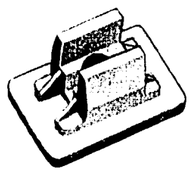


FISHTAIL RATCHET PLATE



Made in a wide range of sizes to hold on smooth metal, die-cast or plastic studs. For use on refrigerators, radio cabinets, washing machines and other products to hold medallions, nameplates, etc.

VIBRATOR GROUNDING FASTENERS



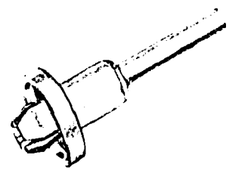
Holds 1 ½" dia. beaded or non-beaded vibrator in any position to radio chassis. Vibrator Can grounded to frame. Holding prongs designed to hold several types of Cans.

RUBBER FOOT

Snap-in Rubber Foot for Record Changers and Phonograph Mountings eliminates threaded member, lock washer and nut thereby speeding assembly time and reducing costs.

NYLON SNAP-IN NUT

Designed for the attachment of shelf supports or channels to porcelained sheet metal liners. Used with sheet metal screws they provide high pull-out values and no chippage.



INDICATOR-LIGHT PLUG BUTTONS

Snap-in type for electrical appliances. Removable. Jeweled or plain glass. Some plastic. Designed in a wide range of colors, shapes and sizes.

SHELF SUPPORTS

Plastic Shelf Supports designed to snap into porcelained hole. Driven pin expands Trimount section securing fastener without porcelain chippage. Variety of shapes and sizes.

PLUG BUTTONS

Made to snap into hole sizes ¼" to 3". Can be embossed with ornamental or functional designs Removable Supplied with various finishes, in a variety of shapes and sizes.

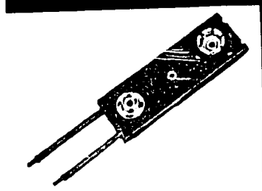
TUBING AND WIRING CLIPS

For use in electrical and hydraulic systems. Holds wires and tubing firmly, without chafing, under extreme vibration. Made in hundreds of sizes.

TRIMOUNT STUDS

Designed to hold two or more thicknesses of material together. Easily installed by hand Insure vibration proof attachment. Permanent or removable attachment Wide variety of shapes and sizes.

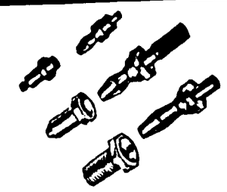
DOT



Parts illustrated are representative of the thousands of different specialized fasteners and allied devices designed and manufactured in volume by United-Carr and its subsidiaries for leading manufacturers of electronic equipment. United-Carr's wide and varied experience with special fastening problems in the automotive, aviation and appliance fields provides an unequaled background of technical knowledge which may well be applicable to your special needs.

UNITED-CARR

FASTENER CORP.

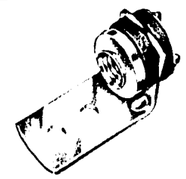


CAMBRIDGE 42, MASSACHUSETTS

Ucinite Electrical Assemblies

BATTERY CONNECTORS

Wired snap-on units for use with batteries equipped with United-Carr electrical snap fasteners. Wiring to customer's specifications.



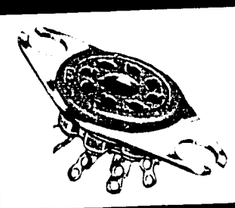
BANANA PINS

Four sizes of plugs with one-piece beryllium copper springs. Adaptable mounting ends in threaded, staking, or solder lug types. Similar Mating Jacks also available.

SHOCK MOUNTS

Offered in several sizes—brackets and durometer of rubber bushings can be varied. With threaded Teenuts or plain bushings. Insulated versions if needed.

ANODE CONNECTORS



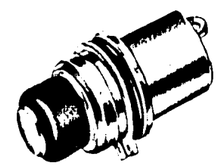
Plug button contacts for positive, firm connections. Corona resistant neoprene or silicon shields in straight or right angle types. Wiring to customers specifications.

TUBE CAPS

Positive gripping, heat treated steel springs in corona resistant metal housing. Insulated or non-insulated. Wired to specifications. Type shown has silicon shield for special application.

TUBE SOCKETS

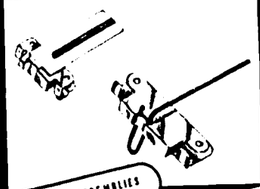
Ceramic octals and special types. Ring or saddle mounting. Open ended plates for shock mounting with rubber grommets. J A N types.



SWITCHES

Oak type switches manufactured as a licensee. Variety of rotary and push-button assemblies to specifications.

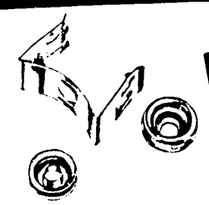
SNAP SWITCHES



Precision, momentary contact push-button switches. Small and dependable. Several circuit arrangements. Water tight version shown.

TEST JACK

Ucinite's quality jack for .080 probes. Beryllium copper contacts. Nylon insulation in colors. Metal shell for firm dependable mounting



POINTERS

Slide pointers. Two sizes of carriages adjustable to variations in rails and adaptable to any indicator design.

METAL STAMPINGS

Volume production in Metal stampings. Years of engineering and tooling skill available to solve your particular problem

ELECTRICAL ASSEMBLIES

Ucinite

RADIO AND AUTOMOTIVE

With years of specialized experience in the electronics field and complete facilities for the volume production of small metal stampings as well as the assembly of metal to plastic and ceramic components, Ucinite is fully equipped to supply you with special electrical parts and assemblies...designed, assembled, wired and marked to your specifications. For complete design, engineering and production service, call your nearest Ucinite field engineer.

DIVISION OF UNITED-CARR FASTENER CORP.

Newtonville 60, Massachusetts

Something New Has Been Added!

The 21 IRE Professional Groups show the expansion pattern of a modern engineering society in meeting the diversified needs of its members in the ever widening science of radio-electronics.

Membership in a Professional Group is open to any paid-up member of the I.R.E. The cost is only an annual extra publications fee, usually $2. This fee is shown in the descriptions that follow.

An IRE Member may join as many Professional Groups as serve his interest and wishes. Such membership serves to associate him with other engineers of the same specialized interests within the radio-electronic field.

The 21 Professional Groups are listed below, together with a brief definition of each, the name of the Group Chairman, and publications to date. * Means still available.

Aeronautical and Navigational Electronics

The application of electronics to operation and traffic control of aircraft and to navigation of all craft.

Dr. K. Charlton Black, Chairman, Polytechnic Research & Development Co., 55 Johnson Street, Brooklyn 1, N.Y.

Fee $2. 8 Transactions, 4 Newsletters. *4, 5, 6, & 8, and Newsletters.

Antennas and Propagation

Technical advances in antennas and wave propagation theory and the utilization of techniques or products of this field.

Mr. P. S. Carter, Chairman, c/o RCA Laboratories, Rocky Point, L.I., N.Y.

Fee $4. Four transactions published. *4

Audio

Technology of communication at audio frequencies and of the audio portion of radio frequency systems, including acoustic terminations, recording and reproduction.

Mr. Marvin Camras, Chairman, Armour Research Foundation, Chicago, Ill.

Fee $2. Published 14 Transactions, 4 Newsletters. *5, 7, 9 up.

Broadcast & Television Receivers

The design and manufacture of broadcast and television receivers and components and activities related thereto.

Mr. Dorman D. Israel, Chairman, Emerson Radio and Phonograph Corp., 111 Eighth Avenue, New York 11, N.Y.

Fee $2. Transactions *1, *2, *3

Broadcast Transmission Systems

Broadcast transmission systems engineering, including the design and utilization of broadcast equipment.

Mr. Lewis Winner, Chairman, 52 Vanderbilt Avenue, New York 17, N.Y.

Fee $2. *Convention Report.

Circuit Theory

Design and theory of operation of circuits for use in radio and electronic equipment.

Dr. Chester H. Page, Chairman, National Bureau of Standards, Washington 25, D.C.

Fee $2. *PGTC-1 Transaction.

THE INSTITUTE OF RADIO ENGINEERS 1 East 79th Street, New York 21, N. Y.

IRE's 21 Professional Groups

Communications Systems

Radio and wire telephone, telegraph and facsimile in marine, aeronautical, radio-relay, coaxial cable and fixed station services.

Col. John Hessel, Chairman, Signal Corps Engineering Laboratories, Fort Monmouth, N.J.

Fee $2. *Vol. CS-1, No. 1

Component Parts

The characteristics, limitations, applications, development, performance and reliability of component parts.

Mr. Floyd A. Paul, Chairman, Supervisor, Electronic Reliability Sec., Dept. 3230, Northrup Aircraft, Inc., Hawthorne, Calif.

Fee not yet established.

Electron Devices

Electron devices, including particularly electron tubes and solid state devices.

Mr. Leon S. Nergaard, Chairman, RCA Laboratories, Princeton, N.J.

Fee $2. Transactions *1, *2 and *3

Electronic Computers

Design and operation of electronic computers.

Mr. John H. Howard, Chairman, Burroughs Corp., 511 North Broad Street, Philadelphia, Pa.

Fee $2. Transactions 1, 2, and *Vol. EC-2, No. 2

Engineering Management

Engineering management and administration as applied to technical, industrial and educational activities in the field of electronics.

Brig. Gen. Tom C. Rives, Chairman, General Electric Company, Syracuse, N.Y.

Fee $1. *Convention Report

Industrial Electronics

Electronics pertaining to control, treatment and measurement, specifically in industrial processes.

Mr. Eugene Mittelmann, Chairman, 549 Washington Ave., Chicago 6, Ill.

Fee $2. *Convention Report

Information Theory

Information theory and its application in radio circuitry and systems.

Dr. William G. Tuller, Chairman, Melpar, Inc., 452 Swann Ave., Alexandria, Va.

Fee $2. Transaction 1.

Instrumentation

Measurements and instrumentation utilizing electronic techniques.

Mr. Ivan G. Easton, Chairman, General Radio Co., 275 Massachusetts Ave., Cambridge 39, Mass.

Fee $1. Transactions 1, *2. *Convention Report

Medical Electronics

The application of electronics engineering to the problems of the medical profession.

Mr. L. H. Mongomery, Jr., Chairman, Vanderbilt University Sch. of Medicine, Nashville, Tenn.

Fee $1. *Convention Report

Microwave Theory and Techniques

Microwave theory, microwave circuitry and techniques, microwave measurements and the generation and amplification of microwaves.

Mr. Andre G. Clavier, Chairman, Federal Telecommunication Laboratories, 500 Washington Ave., Nutley, N.J.

Fee $2. *Vol. MTT-1, #1

Nuclear Science

Application of electronic techniques and devices to the nuclear field.

Dr. Lloyd V. Berkner, Chairman, Associated Universities, Inc., Brookhaven National Lab., Upton, N.Y.

No fee established yet.

Quality Control

Techniques of determining and controlling the quality of electronic parts and equipment during their manufacture.

Mr. Leon Bass, Chairman, General Electric Co., Syracuse, N.Y.

Fee $2. Transactions *1, *2

Radio Telemetry and Remote Control

The control of devices and the measurement and recording of data from a remote point by radio.

Mr. Martin V. Kiebert, Jr., Chairman, Bendix Aviation Corp., Teterboro, N.J.

Fee $1. *Convention Report

Vehicular Communications

Communications problems in the field of land and mobile radio services, such as public safety, public utilities, railroads, commercial land transportation, etc.

Mr. W. A. Shipman, Chairman, Columbia Gas System Service Corp., 120 E. 41 St., New York, N.Y.

Fee $2. Transactions 1, *2, *3

Ultrasonics Engineering

Ultrasonic measurements and communications, including underwater sound, ultrasonic delay lines, and various chemical and industrial ultrasonic devices.

Mr. A. L. Lane, Chairman, 706 Chillum Road, Hyattsville, Md.

No fee established yet.

For the "Firsts" in Fluorocarbons

SEE U.S.G.

TEFLON* and KEL-F† STOCK and FABRICATED PARTS

The United States Gasket Company offers the most complete line of sheets, rods, tape, tubing, bars, cylinders and fabricated parts — custom-molded and machined to specifications.

This means one source for all your requirements—with uniform high quality assured by the most modern specialized facilities for low-cost, close-tolerance production. Ask for Catalog No. 300 and 500.

TEFLON "ALLOYS"

Chemelec Mixtures, which are "alloys" of Teflon, offer the product engineer a whole new family of materials. These alloys retain most of the outstanding qualities of pure Teflon and add new properties to meet particular material requirements.

If you want TEFLON "alloyed" with metal, glass, ceramics, carbon, mica, quartz, alnico, asbestos, silicate, calcium, or boron, etc., bring us your problems. Ask for Catalog No. MI-400.

SOLDERABLE TEFLON

Chemelec Multi-Bond Metal Faced Teflon permits the bonding and hermetic solder sealing of this dielectric material to metal components.

The bond between metal surface and the Teflon is microcrystalline in nature—an interlocking metal-permeated surface layer of the fluorocarbon.

Metal facings include practically all the ferrous and nonferrous metals, the ferro-magnetic group and the precious metals. Catalog No. MI-424.

CEMENTABLE TEFLON

Chemelec Multi-Bond Cementable Teflon is a specially prepared fluorocarbon which will adhere to metal, glass, wood, fibre, asbestos, plastics, leather, ceramics, or other substances by the use of suitable commercial cement.

A broad field of electrical, mechanical and chemical applications is opened to product engineers. Write for Catalog No. MI-443.

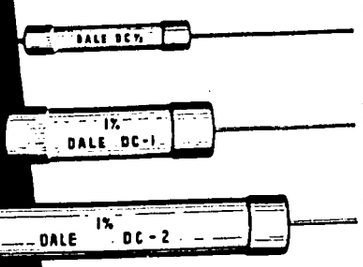
DALE PRODUCTS

CAREFULLY CRAFTED for MATCHLESS PERFORMANCE

DALOHM

DEPOSITED CARBON RESISTORS for ACCURACY and STABILITY



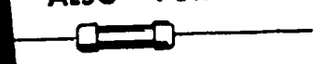
Years of intensive research and development bring you all the accuracy and stability of a wire wound resistor with the economy of a deposited carbon resistor.

Dalohm deposited carbon resistors are manufactured under rigid controls in a special furnace developed exclusively by Dalohm engineers. This process eliminates soot, insuring still greater stability.

Pure carbon in crystalline form is bonded to a selected ceramic core and then sealed against moisture with a special silicone coating material having a high dielectric strength, excellent thermal conductivity, and high resistance to abrasion.

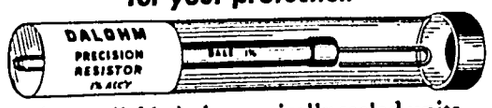
Temperature coefficient 200 PPM per degree C for the lower resistance ranges; up to 500 PPM per degree C for higher resistance ranges. 1% accuracy.

THREE RESISTANCE RANGES



DC-½ — ½ Watt
1 Ohm to 5 Megohms

DC-1 — 1 Watt
1 Ohm to 10 Megohms



DC-2 — 2 Watts
5 Ohms to 50 Megohms

ALSO—FOR MINIATURE INSTALLATIONS

DCS-½ — ½ Watt
1 Ohm to 2 Megohms

Individually packed in plastic tubes for your protection

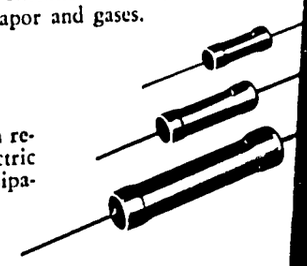
Also available in hermetically sealed units and special small sizes for transistor applications.

Write, Wire or Phone George Risk, 1318 28th Ave., Columbus, Nebraska, for price and delivery. Phone 2139.

CAREFULLY CRAFTED for MATCHLESS PERFORMANCE

DALE PRODUCTS

Silicohm

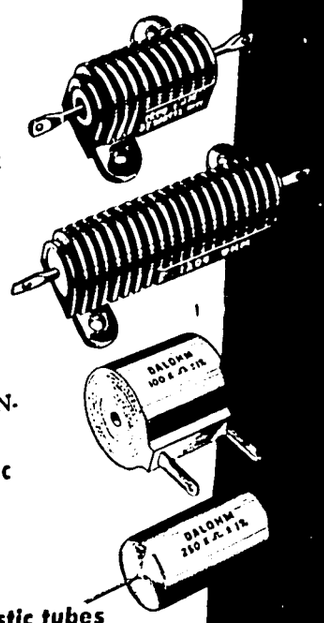


TM REG U S PAT OFF

MINIATURE POWER RESISTORS for those TIGHT SPECIFICATIONS

Silicohm miniature power resistors are carefully designed and skillfully made for all applications where the equipment must survive the most severe environmental, shock and vibration conditions. They are completely welded from terminal to terminal, coated with special silicone material, and impervious to moisture, salt ions, vapor and gases.

RS TYPES

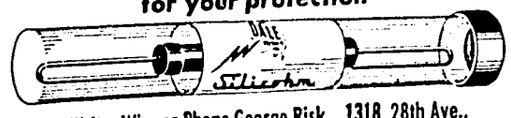


Silicone sealed offering maximum resistance to abrasion, high dielectric strength, and maximum heat dissipation.

RH TYPES

Silicone sealed in a die-cast, black anodized radiator finned housing and mounts on sub-panel for maximum heat dissipation.

- Temperature coefficient 0.00002/degree C
- Ranges from 0.1 Ohms to 55,000 Ohms, depending on type
- Tolerance 0.05%, 0.1%, 0.25%, 0.5% (above 1 Ohm); 1%, 3%, 5% (all ranges)



WW TYPES

For critical applications. Exceed JAN-R-93A or MIL-R-93A specifications.

- Temperature coefficient 0.00002/degree C
- Ranges from 0.05 Ohms (.05 to 1 Ohm on lug type only) to 3 Megohms
- Tolerances as low as 0.05%

Individually packed in plastic tubes for your protection

Write, Wire or Phone George Risk, 1318 28th Ave., Columbus, Nebraska, for price and delivery. Phone 2139.

NUCLEAR RESONANCE

HIGH-RESOLUTION SPECTROMETER

Research functions in the nuclear-resonance field are served by the Varian Model V-4300 High-Resolution Spectrometer capable of spectra identifications as illustrated below. These are derived from the variations in chemical bonding which result in slight shifts in the resonant frequency of the various protons present in a compound.

The standard instrument operates at a fixed crystal-controlled frequency of 30 mc and is used for studies of narrow lines, chemical shifts and fine structure in the resonances from hydrogen and fluorine nuclei.

VARIABLE-FREQUENCY SPECTROMETER

Varian Model V-4200 is also available. It operates over a range of frequency from 2 to 16 mc and with magnetic fields up to 14 kilogauss. This broad coverage permits observation of nuclear-resonance signals from practically every isotope possessing a finite magnetic moment.

HIGH-HOMOGENEITY ELECTROMAGNET

Large volumes of homogeneous magnetic field are provided for such applications as nuclear- and paramagnetic-resonance work, Zeeman studies, and beam deflection, by the Varian Model V-4012 Laboratory Electromagnet (center unit), which has 12-in. diameter pole pieces. Operating with a standard 1¾-in. air gap, the magnet provides a field uniform to at least 1 part in 50,000 throughout a volume not less than 1 cu. in. With a magnet input of 4 kw, various pole configurations give a range of field from 7,000 to 37,500 gauss.

Other Varian magnets include the V-4008, an 8-in. pole-diameter electromagnet and the V-4007, a 6-in. unit, both similar to the Model V-4012, as well as several types of large laboratory permanent magnets.

POWER SUPPLIES AND ASSOCIATED UNITS

Special highly-regulated power supplies are available for magnet operation. Illustrated (right unit) is the Model V-2100 Power Supply which is capable of holding magnet current to 1 part in 10^5 for a 10 per cent line-voltage change. This unit also features negligible long-time drift and circuitry for injection of (a) field sweeping voltages and (b) nuclear-resonance field-regulating voltages.

Varian also manufactures the Model V-4400 Magnetic-Field Meter and Stabilizer which utilizes the gyromagnetic properties of atomic nuclei to reduce measurement of magnetic field to a direct measurement of frequency—simultaneously providing an error signal which can be used to activate field-stabilization equipment.

COMPLETE LABORATORY FACILITIES

Further advances in the art are being explored in the Varian Nuclear Resonance Applications Laboratory. This advanced facility is staffed with experienced chemists and physicists and fully equipped with the most highly developed instruments.

KLYSTRONS

TUNABLE REFLEX TYPES FOR X-BAND RADARS AND BEACONS

Rugged construction for high-shock applications; integral leads for high-altitude unpressurized operation; low-voltage low-noise operation with rapid warmup—on frequency in 30 seconds—production lots, quantity prices.

Type	Local Oscillator Frequency, kmc	Local Oscillator Resonator Voltage, v	Local Oscillator Power Output, mw	High Power Resonator Voltage, v	High Power Power Output, mw	Terminations	Tuner
V-260	8.5-10.0	200	15	350	125	3-pin base	slotted shaft
V-270	8.5-10.0	200	15	350	125	integral leads	slotted shaft
V-280	8.5-10.0	150	12	350	140	3-pin base	lock-nut
V-290	8.5-10.5	150	12	350	140	integral leads	lock-nut

FOR MICROWAVE RELAY SYSTEMS

Long life; low distortion; low long-time drift in tubes for transmitter and local-oscillator microwave-relay service in the frequency bands tabulated.

Type	Frequency kmc	Power Output, mw	Resonator Voltage, v	Tuner
X-26 (A to F)	5.925-7.725	1000 25	750 300	slotted shaft
V-53	10.7-11.7	50	300	slotted shaft
V-54	10.5-12.2	100	350	lock nut

FOR LABORATORY MEASUREMENTS, SPECIAL USES

Excellent microphonic characteristics; smooth-operating shaft tuners have minimum chatter and backlash; X-13 in production lots, quantity prices.

Type	Frequency kmc	Power Output, mw	Resonator Voltage, v	Tuner
X-12	12.4-17.5	30	600	micrometer
X-13	8.2-12.4	250	500	micrometer
V-55	8.2-11.5	600	500	lock nut
V-58	8.5-10.0	620	500	slotted shaft

TWO-RESONATOR OSCILLATOR AND AMPLIFIER TYPES

Fixed-frequency x-band radar and beacon tubes for severe service. Non-microphonic characteristics; molded silicone-rubber connections and integral leads for high-altitude unpressurized operation (except X-21); power outputs as high as 8 watts c-w, 500 watts pulsed.

Type	Frequency kmc	Power Output, w	Resonator Voltage, v	Gain db
X-21 (oscillator)	9.1-11.0	5	1300	...
V-23 (oscillator)	9.1-11.0	5	1300	...
V-27 (amplifier)	9.1-11.0	8	1300	10
V-62 (amplifier)*	9.1-11.0	8	1300	10
V-63 (oscillator)	8.5-9.4	5	1300	..

*V-62 has control grid for amplitude modulation

MULTIPLIER AND MULTI-RESONATOR-AMPLIFIER TYPES

For high-power uhf transmitters, the V-42 series comprises six 15-kilowatt amplifiers covering the entire uhf television band. Linear operation up to 12 kw sync output with 60 watts drive. Gain is 27 db.

For high-power pulse transmitters the V-45 and V-82 in combination permit low-level crystal control with peak power of 8 kw at 2½ per cent duty cycle. The V-45 is a 5 to 1 frequency multiplier (1862 to 9310 mc) operating at a resonator voltage of 700 v. The V-82 is a pulse amplifier with a high-level power gain of 57 db operating at 9310 mc with a resonator voltage of 18 kv. (Total output presently committed, delivery 1954).

Special Varian klystrons are regularly being engineered to meet unusual application requirements. New types are constantly being developed.

For more detailed information on Varian products write Section ADCP, Varian Associates, Palo Alto, Calif., or your nearest field engineering representative.

FIELD REPRESENTATIVES IN 21 CITIES

Hello Again!

204 of the Advertisers in the 1953 IRE DIRECTORY have greeted you before as exhibitors in the 1953 Radio Engineering Show. To help you remember what you saw in their exhibits we have listed them below with the page on which their ad appears.

(Continued from page 451)

Firm	Page
Transformer & Electr. Specialties Co.	221
Triad Transformer Corp.	89
Truscon Steel Div., Republic Steel Corp.	126
Tung-Sol Electric, Inc.	94
Ulanet Co., George	211
U. S. Gasket Co.	450-451
United Transformer Co.	Catalog
University Loudspeakers, Inc.	105
Vacuum-Electronic Engineering Co.	294, 311
Varian Associates	454-455
Vector Electronic Co.	205
Vectron, Inc.	308
Victory Engineering Corp.	203
Wang Laboratories	230
Waterman Products Co.	386-387
Weston Electrical Instruments Corp.	172
Wind Turbine Co.	128
Workshop Associates Div., Gabriel Co.	112

Visit

How to Use Our Business and Product Sections

The Business and Product Sections of this Directory are included for the service of members so that this book will be complete as an index of an industry-distinguishing Engineers, the Businesses they have founded and the Products they have created for radio, television, communications, and electronics.

The following 4 Parts of the IRE DIRECTORY are:

Part		Page
	Pink Section—Guide to Products	i-viii
2	Company List of Radio-Electronic Manufacturers	3
3	Product Index of Engineering Equipment and Parts	97-360
4	Catalogs and Complete-Data-Spreads Section	361
	—Advertisers Index—Facing Cover III—	

Part 2

2570 firms have supplied us voluntarily with information about the components, equipment and services which they render the radio-electronic industry. The manufacturers are listed alphabetically in this section beginning on page 3 and ending on page 96. 1225 non-manufacturers such as distributors and representatives are listed under heading 10, a special directory. This index therefore gives the names of manufacturers of specific products available for purchase, with their addresses and code numbers indicating 100 types of products which they offer.

The completeness of this list depended on information voluntarily supplied us. Our most vigorous efforts may not have made it complete, but the excellent cooperation received from most of the industry is directly responsible for the up-to-dateness of our product data. We will welcome additions and suggestions for the 1954 edition.

Part 3

The Product indexes start on page 97 and continue through 359. In both the alphabetical and the product indexes advertisers who have made it financially possible to provide a really comprehensive Directory to IRE members, have been listed in bold face type with a cross index to the page on which their display advertisement appears—giving complete information on their products and services. Non-advertisers have been listed in the product indexes giving firm name and state only. For full address the reader must turn to the alphabetical index for these companies.

To find the advertisers of a given product, let us say "Amplifiers" look this product up in the Pink Section, just after Part 1—Members. You will see that it is classification Number 01. A full listing of Amplifier manufacturers starts on page 97. Turn to this classification in part 3.

As a service to engineers, both buyer and seller, we have included a list of 1225 firms and individuals who are distributors. Each name is further classified by number to indicate its place in the field—representative, distributor, exporter, etc. This is class #10, starting on page 343.

There are several other helpful indexes. Advertisers are given on the page facing the back cover, and an index to 1953 Radio Engineering Show Exhibitors is on pages 450-455.

To get a comprehensive picture of what a given firm manufactures for engineers in our field, you will find in the alphabetical index of companies that all their products are listed by code number after the firm's name and address. We have tried vigorously to make this truly a useful "Radio Engineers Directory."

Part 4

Part 4 is one of the most informative and valuable sections of this Directory. Here manufacturers are supplying engineers with the maximum amount of detailed information possible through the use of multiple page spreads of their products (see pages 361-455). This is followed by a complete catalog file supplied by 15 manufacturers. These catalogs are filed in alphabetical order. The purpose of this section is to give the engineer a complete and ever available catalog file right in his IRE Directory where he can always see it easily and quickly. We believe that the services of this section will be of the utmost help to you.

Please submit all changes, corrections, additions and classification questions to Industry Research Div., Institute of Radio Engineers, 1475 Broadway, New York 36, N.Y.

Why

are more and more industries

specifying Adlake Mercury Relays

for Timing and Control functions?

Because...

Every Adlake Relay gives you these PLUS Features:

- **HERMETICALLY SEALED**—dust dirt, moisture, oxidation and temperature changes can't interfere with operation.
- **SILENT AND CHATTERLESS**
- **REQUIRES NO MAINTENANCE**
- **ABSOLUTELY SAFE**
- **MERCURY-TO-MERCURY CONTACT**—prevents burning, pitting and sticking.

...and every Adlake Relay is tested...and guaranteed... to meet specifications!

For complete details of the broad ADLAKE Relay line send for your copy of the new ADLAKE Relay Catalog Address The Adams & Westlake Company 1953 N Michigan Elkhart, Indiana In Canada write Powerlite Devices Limited of Toronto

Here's Why Adlake Relays give SURE, POSITIVE ACTION!

When relay is energized, coil pulls plunger down. Mercury enters thimble, gradually displacing inert gas, which escapes through ceramic plug. When thimble has been filled, mercury-to-mercury contact is established . . . assuring positive snap action under all conditions!

5 Popular Models from the broad Adlake Line

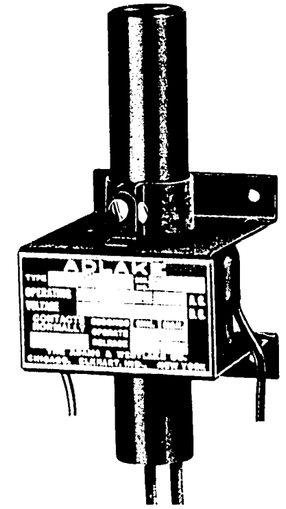
1040 MODEL

Contact arrangement:
Normally open or Normally closed
Single pole—Single throw

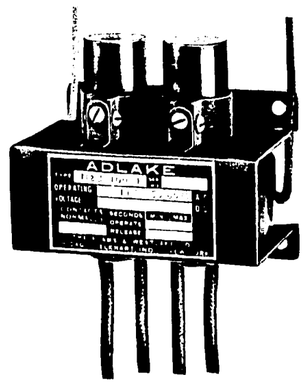
Available in:
Time delay types of { Slow operate—Quick release; Slow operate—Slow release; Quick operate—Slow release }

Load type: Quick operate—Quick release

Maximum time delay: 20 minutes



Contact rating: Time delay relays to 15 amps.
Load relays to 50 amps.
Non-inductive, 115 v, 60 cy.



Voltage Coil: Up to 440 volts A.C. (25-50-60 cy.)

1101 MODEL

Available with same features as Companion 1040 Model

Complete information on all relays illustrated available on request.

1123 MODEL

Double Pole Load Relay
(Also available with time delay contacts)

Contact Arrangement: { 2 contacts Normally open or; 2 contacts Normally closed; Double pole—Single throw }

Contact rating:
Time delay contacts up to 15 amperes.
Load relays to 50 amperes.
Non-inductive 115 v, 60 cy.

Voltage Coil:
Up to 440 v., 50/60 cy. or 220 v. d.c.

1140 MODEL

"MIGHTY MIDGET"

Contact Arrangement: Normally open or normally closed—Single pole—Single throw

Available in: Quick acting load type only.

Contact rating: { 30 amperes non-inductive; 115 volts, 60 cy. }

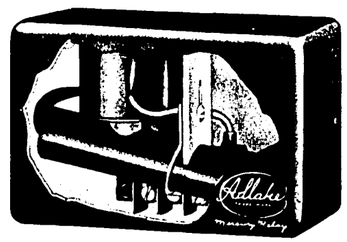
Voltage Coil: Up to 440 v, 60 cy. and 220 v. d.c.

Maximum Size: Height 3⅛"-4¼"—width 2 17/32—projection 2⅜".

Equipped with compression type terminals to simplify installation.

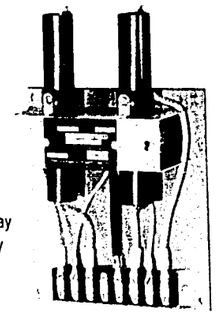
5000 MODEL ... SENSITIVE RELAY

(Designed for rapid operation under load conditions)



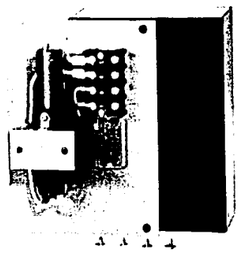
Contact Arrangement: Normally open or normally closed
Single pole—Single throw

Contact rating: 5 amperes, non-inductive, 115 volts, 60 cy.



Voltage Coil: Up to and including 230 volts, 60 cy.

Coil Input: 115 volts, 60 cy.—.007 amp., less than 1 watt



Maximum Size: Height 3 13/32"—width 5¼"—projection 2⅜"

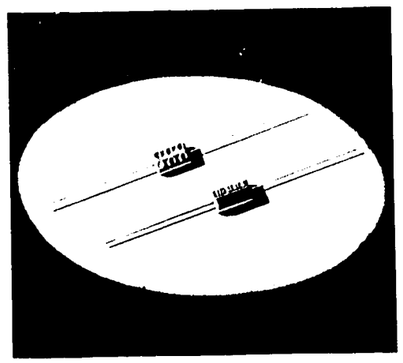
Manufacturers of ADLAKE Hermetically Sealed Mercury Relays

ELMENCO MOLDED MICA CAPACITORS



ANY VALUE—ANY TOLERANCE, AVAILABLE FOR IMMEDIATE DELIVERY!

ELMENCO fixed mica dielectric capacitors are compact, precision made. Manufactured in accordance with American military standards to meet Army and Navy JAN-C-5 Specifications. All impregnated and JAN, color coded unless otherwise specified. Standard specification limits are shown below.

Moulded in low loss bakelite, tested at double the working voltage. Tests for dielectric strength, insulation resistance, temperature co-efficient and capacitance drift, humidity and life tests according to JAN and RCM STANDARDS. All units are wax dipped for salt water immersion seal.

Known the world over for their reliability under all operating conditions, ELMENCO CAPACITORS are chosen by manufacturers who want successful performance and long life from their products.

CM 15 MINIATURE MICA CAPACITOR

"THE SMALLEST MOLDED MICA CAPACITOR MADE!"

ELMENCO TYPE 605

MAX. DIM.
½" x $\frac{3}{32}$" x $\frac{7}{16}$" thick*

*Thickness in capacities above 300 mmf is $\frac{7}{32}$".

CAPACITY RANGE
1 to 520 mmf 300VDCW
1 to 400 mmf 500VDCW

Tolerances as low as ±0.5%

Temperature and drift characteristics per JAN-C-5 characteristic "F" for most capacity values.

ELMENCO HI-VOLTAGE MICA CAPACITORS

FOR TELEVISION-TRANSMITTING & INDUSTRIAL

DC WORKING VOLTAGES: FROM 1000 TO 2500 VOLTS

Molded in CM-20, CM-35 and CM-40 Cases

Demand for smaller units in higher voltages designed to meet the requirements for TELEVISION, POWER AMPLIFIERS, LOW POWER TRANSMITTERS, and various INDUSTRIAL USES has increased. ELMENCO designed and produced units listed below are especially adaptable to compact circuits where space is an important factor. Their acceptance has been overwhelming by the various manufacturers of TELEVISION RECEIVERS.
In many cases, these units will do the work of capacitors molded in CM-45, CM-50, and CM-55 cases without breaking down. NO SPECIAL MOUNTINGS ARE NECESSARY; just wire right into the circuit.

The capacitors are molded in low-loss bakelite and tested at double the branded voltage. They are tested for dielectric strength, insulation resistance, temperature coefficient, capacitance drift, susceptibility to humidity, and length of life, according to RCM Standards. All units are wax-dipped for protection against salt water immersion.

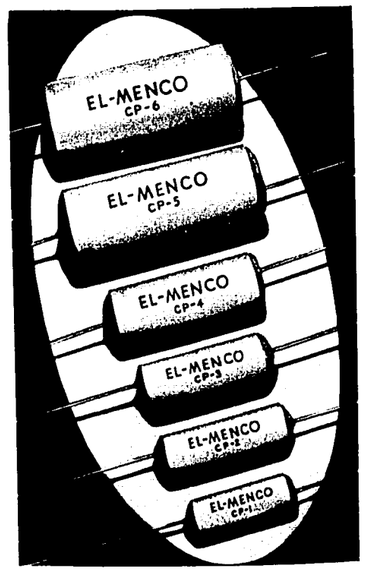
CASE SIZE	DC WORKING VOLTAGE	CAPACITY	RANGE MMF
VCM 20	2500	5	240
	2000	5	390
	1500	5	620
	1000	5	1000

CASE SIZE	DC WORKING VOLTAGE	CAPACITY	RANGE MMF
VCM 35, 40	2500	240	1600
	2000	390	2000
	1500	620	2400
	1000	1000	5100

ELMENCO PAPER TUBULAR CAPACITORS

ELMENCO CP type paper tubular capacitors are sealed in STEATITE TUBES which serve to insulate the capacitor electrically as well as against moisture and heat. The capacitor insert is impregnated with MINERAL OIL, thereby assuring long life at 85° C operating conditions. This feature insures successful operation at the high ambient temperatures existing in small, compact enclosures.
The NON-INDUCTIVELY wound paper and foil units are sealed in the CERAMIC TUBES by means of baked SYNTHETIC RESIN END FILLS which cannot melt at any conceivable operating temperature. The end fills will not dissolve in wax, permitting the capacitors to be potted without damage to the insert. Leads are of tinned copper 2¼" long.

Many of the large TELEVISION, TRANSMITTER and HIGH VOLTAGE AMPLIFIER manufacturers have found these capacitors to be of highest quality. Breakdown tests have exceeded the required standards.



DIMENSIONS FOR CP TYPE CAPACITORS

	DIAMETER	LENGTH
CP-1	⅜"	1 ⅛"
CP-2	⅜"	1 ⅜"
CP-3	⅞"	1 ⅜"
CP-5	⅞"	1 ⅝"
CP-5	⅝"	2 ⅛"
CP-6	⅞"	2 ⅛"

STANDARD TOLERANCE ON ABOVE UNITS IS ± 20%.

DC WORKING VOLTAGE	CAPACITY RANGE M F D
1000	.001 to .082
600	.001 to .25
400	.001 to .25
200	.001 to .5

VARIABLE COMPRESSION TYPE MICA CAPACITORS

SINGLE SECTION PADDERS

ELMENCO PADDING CONDENSERS have been acclaimed by engineers as the finest development in adjustable mica condensers.
The construction is such as to completely enclose and protect the delicate edges of the mica films, made of the finest quality clear India ruby mica. The phosphor bronze adjusting plates assure permanent resilience and freedom from mechanical fatigue. All parts are heavily plated to resist corrosion.

TYPE 30

350 Volts DC Flash-Test — 175 WVDC

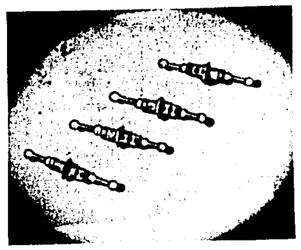
CERAMIC CAPACITORS



Silver High "K" disc ceramics are used primarily for coupling and by-pass in RF and higher frequency circuits, ELMENCO ceramic capacitors are wax impregnated with low-loss phenolic coating. Insulation resistance far exceeds the 10,000 megohm minimum requirements. Voltage rating is 1500VDCT, 500VDCW. 90% relative humidity test for 100 hours. Radial leads are 1¼" minimum No. 22 tinned copper wire.

Capacity and Tolerance Stamped on Capacitor

Maximum Dimensions:
.575" diameter
.150" thickness
General Purpose Disc
Capacity range 1000 to 12,000 mmf.
Neg. Temperature 750 Disc
Capacity range 47-150 mmf.

Temperature Co-efficient ±60 parts per million per degree C for most capacity values.
6-dot color coded.

MOLDED MICA KITS

JAN-C-5 SILVERED (ILLUSTRATED)

This kit contains the complete range of ELMENCO silvered molded mica capacitors from 5 mmf. to 10,000 mmf. manufactured in accordance with JAN-C-5 specifications. All units are of letters "C", "D" or "E" characteristics as specified and letter "J" (5%) tolerance and are JAN color coded.

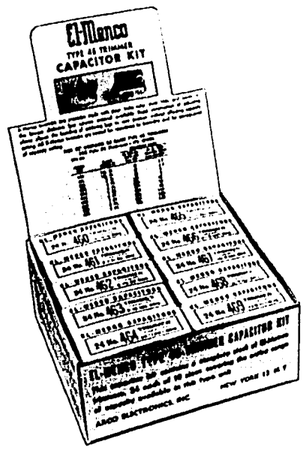
JAN-C-5 REGULAR FOIL

This kit contains the complete range of ELMENCO regular foil molded mica capacitors from mmf. to 10,000 mmf. manufactured in accordance with JAN-C-5 specifications. All units are of the letter "B" characteristic and letter "K" (10%) tolerance and are JAN color coded.

CM20 HIGH VOLTAGE

Contains 10 each of 50 capacity values ranging from 5-1000 mmf. in working voltages from 2500-1000.

PAPER TUBULAR KITS



STANDARD KIT (ILLUSTRATED)

Contains 5 each of 25 capacity values from .001 to .5 in working voltages from 600 to 200.

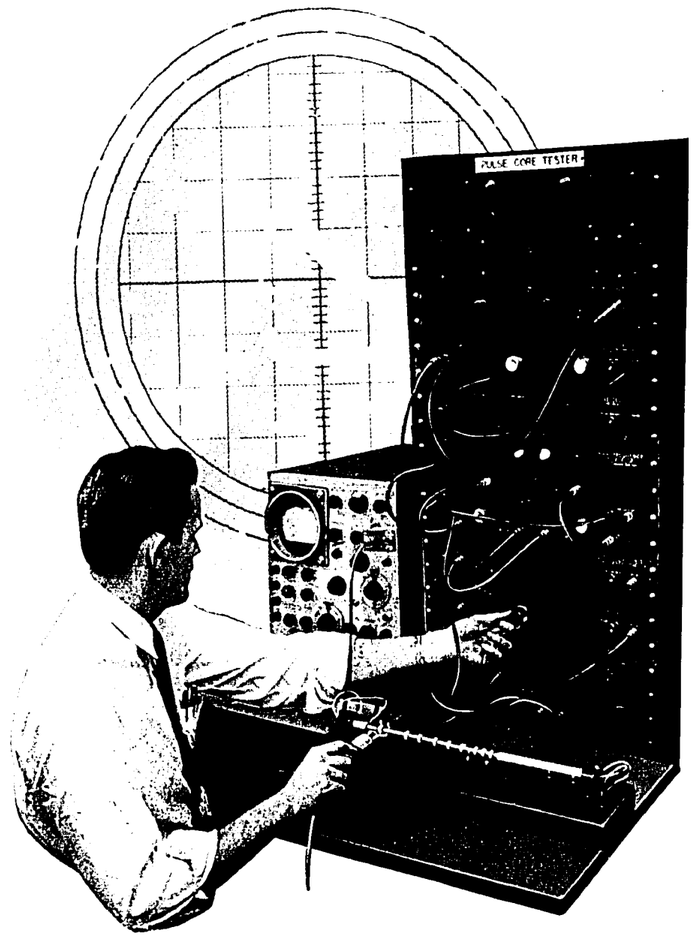
1000 VOLT KIT

Contains 5 each of 17 capacity values from .001 to .05 —working voltage 1000.

VARIABLE CAPACITOR KIT

TYPE 46 TRIMMER (ILLUSTRATED)

Contains 24 each of capacity values listed on previous page in table form.



TYPE 30 PADDER KITS

Contain 12 each of capacity values listed on previous page in table form.

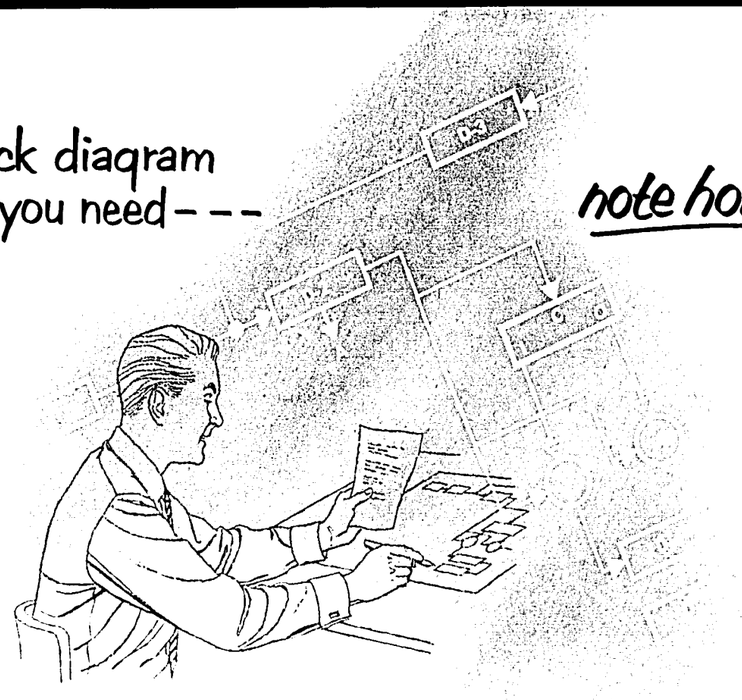
"UNITIZED" PULSE CONTROL EQUIPMENT

Saves valuable research and testing time

Always in the past, it has been necessary to custom design pulse test equipment for each individual application—this has proved a most costly and time-consuming engineering operation. But now the major portion of this work can be eliminated through the use of Burroughs "Unitized" Pulse Control Equipment. These standardized units are complete within themselves and each performs one basic operation, such as generating, mixing, gating, counting, etc. The units can be arranged and rearranged in almost any manner necessary to simulate actual conditions of usage for the component part being tested.

FOR APPLICATIONS IN RADAR, TELEMETERING DIGITAL COMPUTING, TELEVISION AND NUCLEAR PHYSICS



AS AN EXAMPLE—MEASURING THE BEHAVIOR OF MAGNETIC CORES

Pictured here is a Burroughs Core Tester BCT-300 designed to swiftly and accurately measure the "switching time" and "squareness ratio" of toroidal cores. The unit is made up of eight standard Pulse Control units (one Low Frequency Pulse Generator 1004C, a Flip-Flop 1101C, a Coincidence Detector 1201B, and five Pulse Delay units 1301C) mounted in a rack with other accessory equipment. The output of this unit may be observed on a standard laboratory oscilloscope. Power is supplied from a 9101C power supply.

This BCT-300 is typical of the many possible applications of Burroughs "Unitized" Pulse Control Equipment. Pertinent characteristics and specifications of the individual units will be found on the following pages.

ELECTRONIC INSTRUMENTS DIVISION
Burroughs

Plan a block diagram of the circuit you need - - -

note how

"UNITIZED" PULSE CONTROL EQUIPMENT

shown here can be mounted on a 19-inch rack and arranged to fit your specific requirements

PULSE GENERATOR

Type 1004C — Generates 0.1 microsecond pulses at frequencies continuously variable from 15 to 650,000 cycles per second, in five overlapping bands. Output circuit is designed to match 93-ohm RG-62/U cable.

A symmetrical multivibrator is used to control the frequency. The output amplitude, which is not affected by changes in frequency, can be varied from 10 to 32 volts and the polarity of the output pulse is reversible.

Type 1002B — Generates 0.1 microsecond pulses (approx.) at frequencies continuously variable from 0.2 megacycles to 4.5 megacycles in four overlapping bands.

A calibrated, L-C controlled, sine-wave oscillator controls the frequency. The output amplitude, which is only affected by frequency changes in the ranges above 2 megacycles, can be varied from 10 to 32 volts and the polarity of the output pulse is reversible.

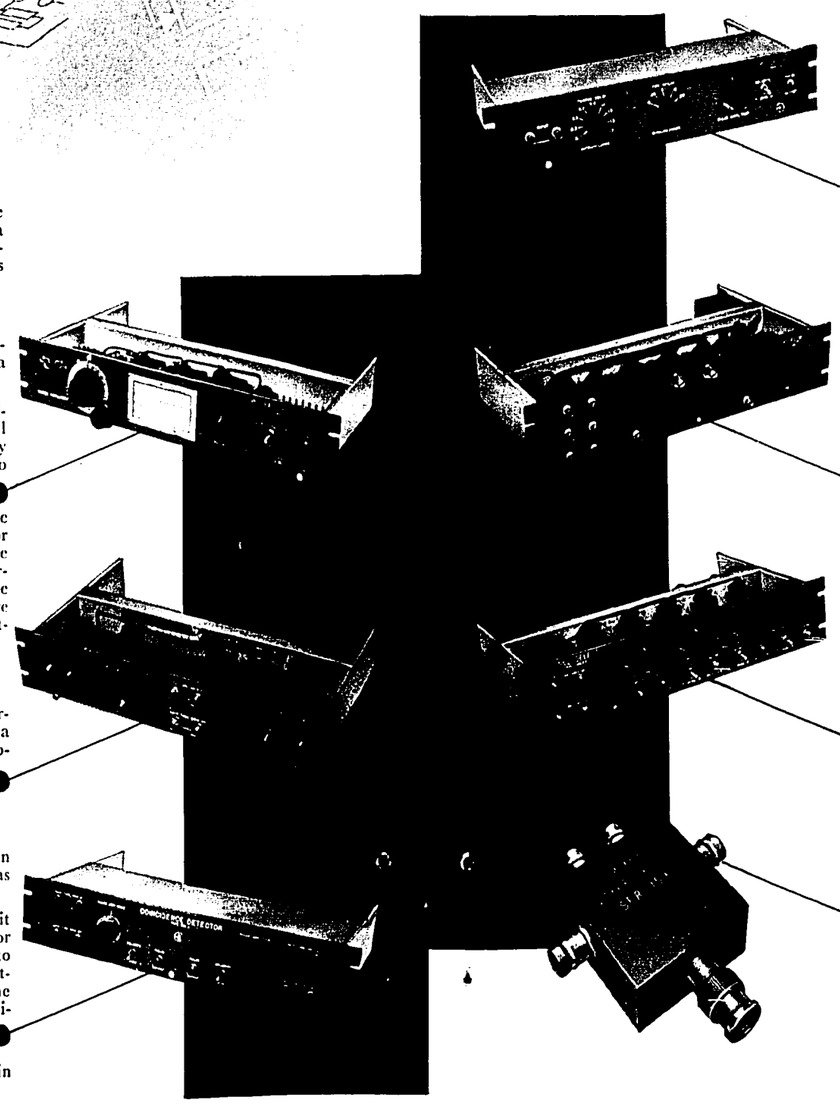
Type 1003A — This unit consists of three separate pulse generators mounted on a single panel, each section of which is capable of generating 0.1 microsecond pulses in three different ways.

1. Single pulse push-button operation.
2. The output pulse is generated by coincidence action of a push-button and a positive synchronizing pulse.
3. The output circuit acts as a pulse standardizing circuit when fed by external pulses. The output circuit is directly triggered by an input pulse with no push-button action.

Two inputs for each pulse generator are provided: one, "Synchronizing Input," for synchronization of push-button pulses; the other, "Low-frequency Input," for triggering the output circuit directly, without the use of the push-button. Positive pulses are available with output amplitudes adjustable from 0 to 35 volts.

PULSE GATER

Type 1501B — This unit comprises a gate generator with a manually adjustable gate length and an independent coincidence detector. The duration of a gating pulse is continuously adjustable from 0.3 microseconds to 5,000 microseconds in four overlapping ranges. The Pulse Gater replaces a Pulse Delay Unit, a Flip-Flop, and a Coincidence Detector for the purpose of generating pulse trains.



COINCIDENCE DETECTOR

Type 1201B — Two independent coincidence detectors are mounted on one panel. These units are designed to sense coincidence between the output signal of a flip-flop and 0.1 microsecond pulses. Two inputs are provided for each unit. Grid No. 1 is designed to accept 0.1 microsecond pulses with minimum amplitudes of 13 volts. Grid No. 3 is designed to accept the output of Type 1101C flip-flop or equivalent.

Type 1202A — Two separate coincidence detectors are mounted on one panel. Each is designed to sense coincidence between the output voltage levels of as many as five flip-flops.

The principal difference between this unit and the Type 1201B coincidence detector is that the Type 1201B is designed to sense coincidence between a flip-flop output and 0.1 microsecond pulses, while the Type 1202A is designed to sense coincidence between output of one flip-flop and as many as four other flip-flops.

As many as six inputs may be driven in parallel from a single flip-flop output.

PULSE DELAY

Type 1301C — In this unit, a 0.1 microsecond input pulse triggers a single-shot multivibrator of controllable period, and a 0.1 microsecond pulse of reversible polarity is regenerated at the end of the multivibrator period. The delay of the 0.1 microsecond output pulse is continuously adjustable in five overlapping ranges from 1 microsecond to a maximum of about 80,000 microseconds.

In addition, a rectangular pulse with a duration equal to the delay period between the 0.1 microsecond input and output pulses is brought out to a jack on the front of the panel through a d-c coupled cathode follower so that it can be used for observing the time delay oscilloscopically.

Type 1302A — This unit delays 0.1 microsecond pulses by means of a tapped delay line in 0.05 microsecond steps from 0.1 to 1.9 microseconds. Reversible output polarity of variable amplitude is also provided.

Type 1303B — This unit, which provides a fixed delay of 0.1 microsecond is designed to be connected in cascade with RG-62/U coaxial cable without mismatch. Input and output cable connectors are mounted on a flanged box 4½ x 3 x 1¾ inches.

FLIP-FLOP

Type 1101C — The flip-flop is a bistable circuit designed specifically to provide an output voltage level to be used as a gate in coincidence circuits. The unit contains a pentode Eccles-Jordan circuit capable of being switched at rates up to 2.5 megacycles per second with 0.1 microsecond pulses.

There are three inputs — zero, one, and complement—operating with minimum amplitudes of 12 volts. Two output jacks marked "Zero Gate" and "One Gate" supply either 0 volts or −23 volts at an impedence level of approximately 680 ohms.

There are two neon lights on the front of the panel which indicate the position of the flip-flop. There is also a terminal block on the rear of the unit which can be used to operate indicator lights installed at a remote point for visual monitoring.

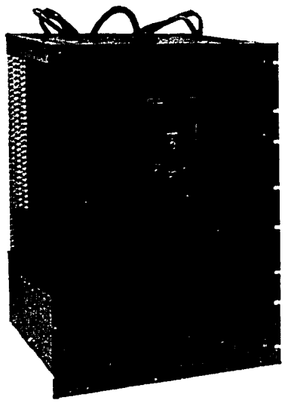
GATED CHANNEL SELECTOR

Type 1402C — This unit is designed to sense coincidence between the output signal of a flip-flop and 0.1 microsecond pulses and to feed the output to four separate jacks. The input section is similar in action to that of coincidence detector, Type 1201B. Each of the output pulse positions has its own amplitude control and three-position toggle switch which is used to select pulse polarity or reject the output pulse. The ability of the unit to select any or all of the four output circuits in any combination permits the unit to be set up for a parallel binary code, where each output can be used to represent a single binary digit. The unit is also useful for feeding as many as four terminated lines from a single source.

MIXERS

Type 1601A—This mixer has four input positions which feed a common output through crystal diodes. Four standard input connectors and one output connector are mounted on a box 2½ x 2½ x 1 inch.

Type 1602A—This mixer is a panel-mounted twin mixer functionally equivalent to two of Type 1601A except with five input connectors and one output connector for each mixer.

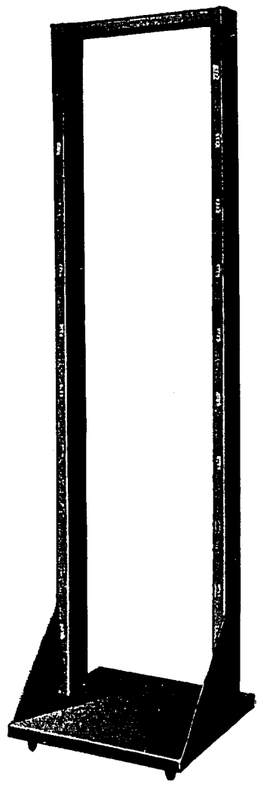


ELECTRONIC INSTRUMENTS DIVISION

Burroughs

Burroughs Accessory

PULSE CONTROL EQUIPMENT



-necessary for fast circuit assembly

◀ POWER SUPPLY—Type 9101C

This unit is a magnetically regulated d-c power supply providing the seven voltages necessary for the operation of several pulse generators, flip-flops, coincidence detectors, etc. Each d-c voltage is automatically regulated to within ±1 per cent of the selected voltage for load variations from 10 per cent load to full load, and for a-c line input variations of ±8 per cent. Two separate transformers, each with tapped primaries and two secondaries, supply a total of 50 amperes of heater current at 6.3 volts.

The unit, which is operated from a 115-volt, 60-cycle, 20-ampere single-phase power source, has each of the seven output voltages interlocked by relays, thus providing protection from loss of voltage in any of the supplies, and has fuses for over-current protection.

MOUNTING RACK—Type 7002A ▶

This is a standard 19-inch relay rack with plug-in power outlets available along each side. Approximately 70 inches of mounting space are available. Overall dimensions of the swivel-caster unit are 73¼ x 20 x 21. It is finished to match the remaining units in the line.

A few current users of "Unitized" Pulse Control Equipment

Massachusetts Institute of Technology
University of Michigan
Consolidated Engineering Corporation
National Union Radio Corporation
The Catholic University of America
Stanford Research Institute
Magnetics Research Company

Originally created to speed up and simplify the building of electronic test equipment at the Burroughs Research Center, "Unitized" Pulse Control Equipment is now being used by many leading organizations in electronic research.

More than 500 of these pulse control panels were used in the construction of the high speed digital computer now in operation at the Burroughs Research Center. They represent the primary reason why it was possible to complete this unique machine in only nine months.

Incidentally, the services of the Burroughs computer are now available, on a fee basis, to interested organizations, both public and private. Typical computer users and their solved problems are: Westinghouse Aviation Gas Turbine Div. —*Turbojet engine design and performance calculations*. Philco—*Antenna calculations*. Bell and Howell—*Optical ray tracing*. Hydrocarbon Research, Inc.—*Stresses in pipe*. Roger Bellows & Associates—*Correlation of psychological tests on personnel*.

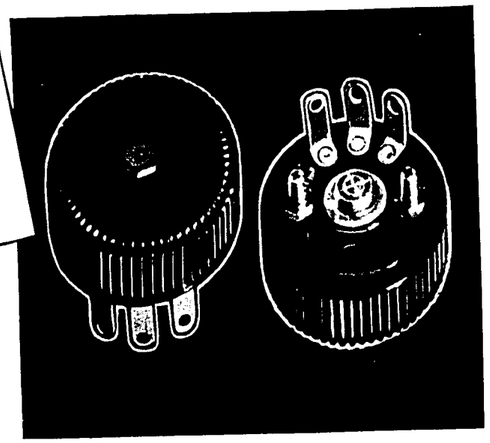
QUICK FACTS ON Centralab

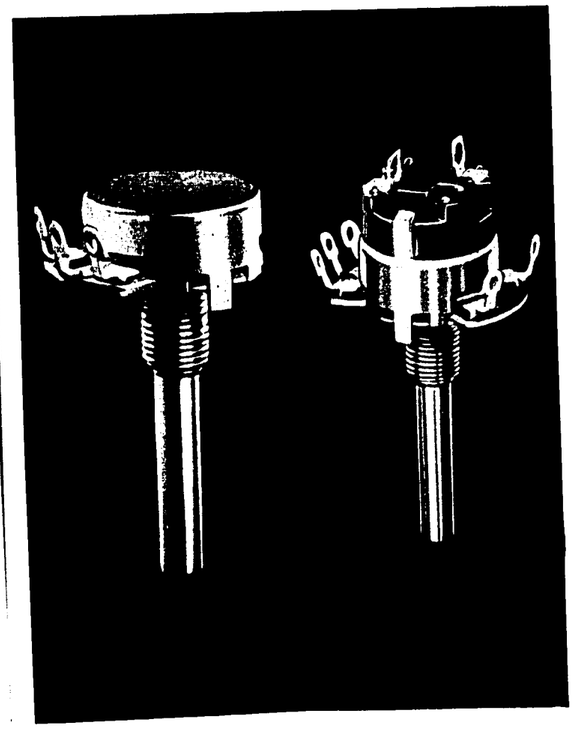
CRL ®



Electronic components that make a big difference in electronic design manufacture and performance

SEE NEXT 7 PAGES FOR DETAILS

1 VARIABLE



• Whatever your need in modern standard or miniature size variable resistors, switches, ceramic capacitors, printed electronic circuits or special ceramic products — you'll find Centralab your best source of supply. Use this quick reference guide for facts on standard or special adaptations. For free technical bulletins . . . see corresponding numbers covering each component. For engineering assistance, write factory direct — stating your problem.

Model 1 Radiohm® — world's smallest resistor with the longest list of uses

Widely used as standard for hearing aids plus many other commercial and military miniature applications. Its ⅝" diameter makes it no larger than a dime. Shielded from dust, lint, etc. Rated at ⅒ watt. Available in a resistance range of 500 ohms to 10 megohms, with 7 standard tapers. Plain or switch types. New Hi-Torque model has rotational torque of 3.0 ounce-inches. Knob or slotted shaft types.

For technical details ask for Bulletin 42-158.

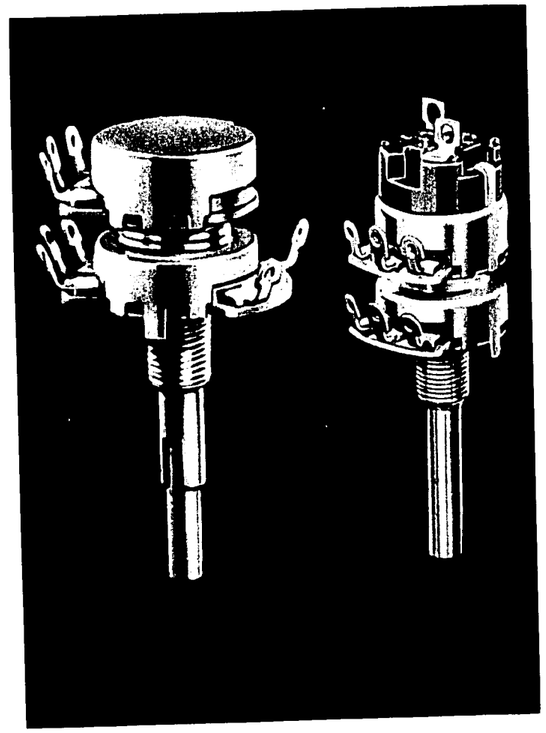
Model 2 Radiohm®

plain or switch types

Precision controls that are only 15/16" in diameter. Rated at ½ watt. Velvet smooth, low noise level operation. Shafts of various types and lengths to your specifications. Ratings from 500 to 15 megohms. Standard or special tapers. Resistance tolerances to meet your requirements. Plain or switch types, 1-5-8 amps. Phenolic base resists humidity. Many switch combinations provide wide variation at minimum cost.

Ask for Bulletin 42-164.

RESISTORS



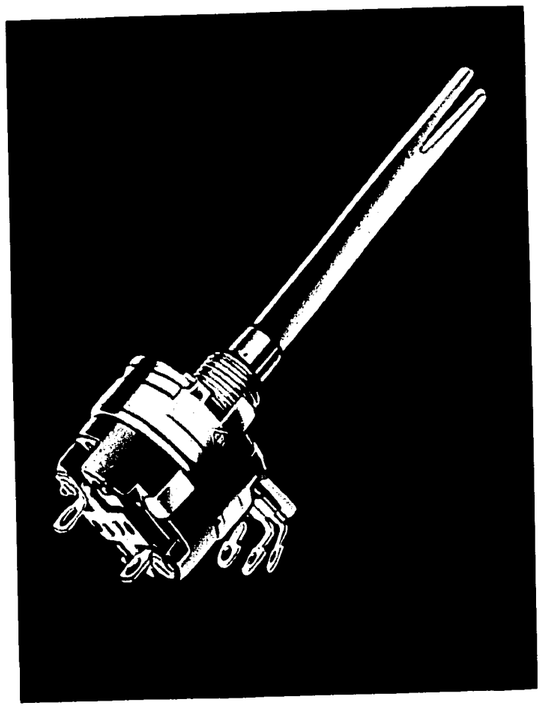
. . . most complete line to cut down size, weight and cost

Model 2 Radiohm®

dual and twin types

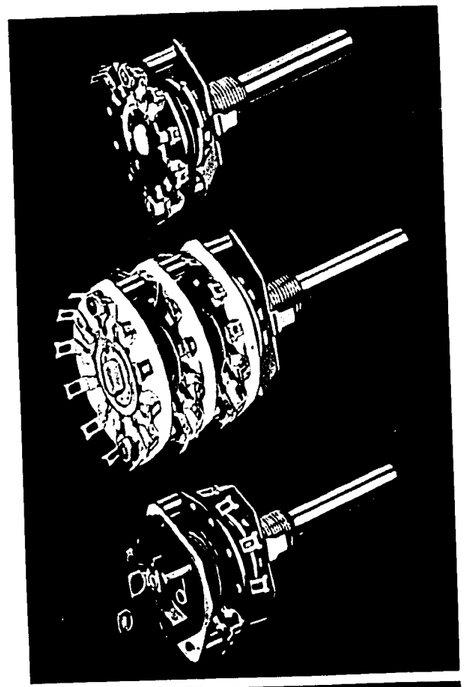
Size — 15/16" diameter. Rated ½ watt. Two- or three-ganged. Single or concentric shafts, of various types and lengths to meet your specifications. Tap or plain tapers. Ratings from 500 to 15 megohms. Resistance tolerances to meet your requirements. Plain or switch types, 1-5-8 amps. Many switch combinations provide wide variations for design and application. Meet JAN R9-1 characteristic U requirements.

Ask for Bulletin 42-164.

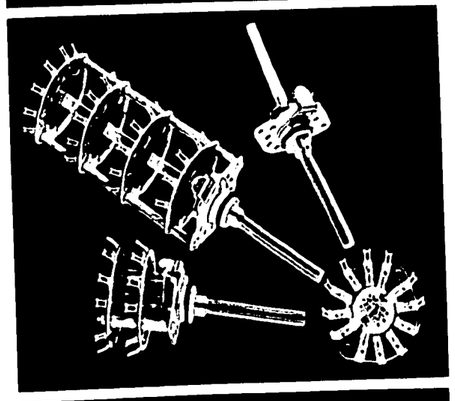


Quick delivery EXPRESS Radiohms®

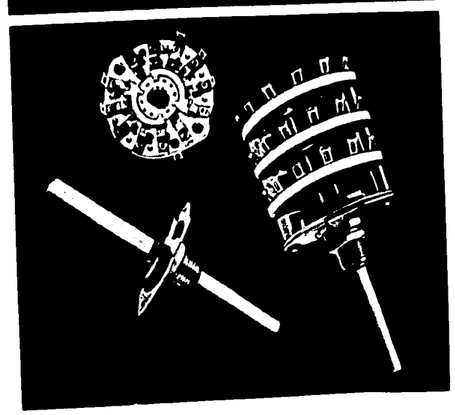
for immediate production needs



A real time saver! Ideal for the manufacturer needing variable resistors on short notice. Delivery in a few days. Control elements are stocked items. When order is received, desired shafts are staked directly to control elements. Shafts fit standard RTMA split-knurl and many spring-type push-on knobs. Rated ½ watt. Available in two values ½ and 1 megohm, audio taper (C2) with SPST a-c line switch. Values meet 75% of requirements for switch-type variable resistors.



Ask for Bulletin 42-163.



2 SWITCHES

. . . a lot more switch in a lot smaller package

Miniature Switches

for low-current, high-frequency applications

SERIES 20

Bolted-Construction type (20a)

Unusually small rotary switches. Only 1⁵⁄₁₆" dia. Give you quality and flexibility not heretofore available in miniatures. Available in multiple sections with phenolic or steatite insulation. Can be supplied in 2 to 12 positions. 30° positive indexing. Steatite is grade L-5. Meets JAN I-8 specs.

Staked-Construction type (20b)

Available in up to two sections with phenolic insulation. Same positions and size as bolted switch. Both types can be supplied with a a-c line switch, added as a rear section. Phenolic is grade LTS-E5 or JAN P-13.

For complete details ask for Bulletin 42-156.

Material specifications on clips, contacts, shafts, etc. and other hardware same as standard switches below.

Standard Switches

for a wide variety of electronic applications

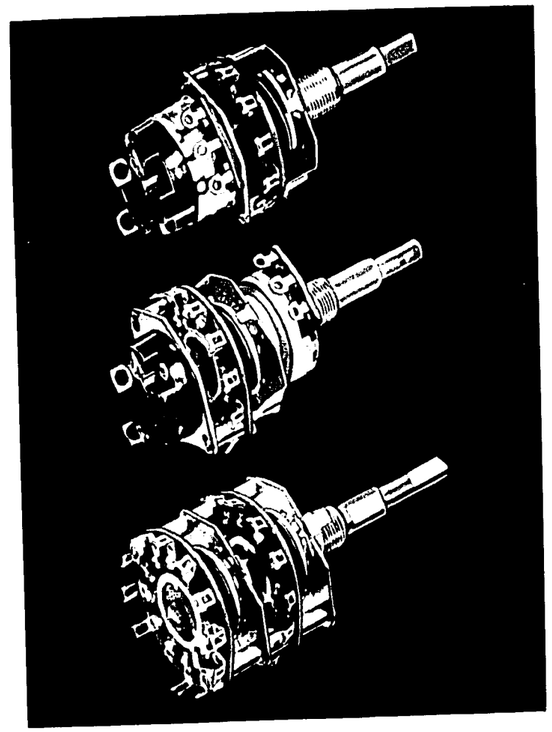
Available in standard or special switching combinations in single or multiple sections. Cadmium nickel plated parts as well as silver plated brass clips and contacts are standard. Silver alloy clips and contacts available on special order. Salt-spray specifications can be substituted on special order. Switches have double-wiping contacts. 30°-60° indexing. Various index and clip types for your specific application. Phenolic is grade LTS-E5. Ceramic has extra-heavy current carrying ability. JAN-approved grade L-5 Steatite insulation is non-hygroscopic.

Miniature Switches

for low-current, high-frequency applications

SERIES 30

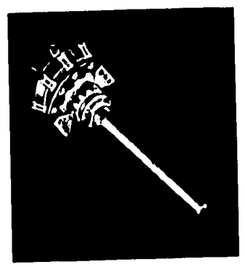
Last word in conserving panel and chassis space! Dual combinations of 1⁵⁄₁₆" diameter switches and ⁵⁄₁₆" diameter variable resistors. Furnished in three types. Same switching combinations as Series 20.



Series 30a — Rotary switch mounted in front, control mounted in rear.

Series 30b—Control mounted in front, rotary switch mounted in rear.

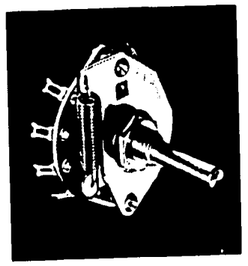
Series 30c — Two rotary switches independently operated by concentric shafts.



For complete details ask for Bulletin 42-157.

other hardware same as standard switches below.

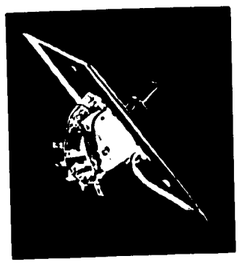
Tone Switches



Widely used in radio-phono and allied sound equipment. Available with 3-4-6-8-9 or 10 clips, in SPST, SPDT, DPST and DPDT Models. Shorting and non-shorting contacts. Positive index. Can be supplied with a-c line switch. Specifications same as standard phenolic switches.

Spring Return Switches

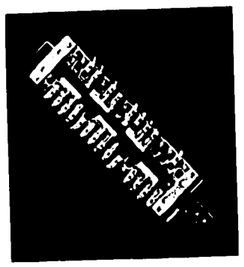
PA and intercom switch types. Coil spring design means smoother action, more positive indexing — longer life. Available with one or two spring return positions. 30° index. Index spring is tested for a minimum life of 150,000 cycles.



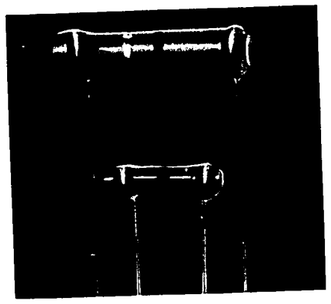
Ask for Bulletin 995.

Lever Switches

For smoother action, positive indexing on speech input equipment, etc. Spring tested for minimum 150,000 switching cycles. 8 basic indexing combinations. Available in positive, spring return or combination. Shorting and non-shorting types, 2 to 4 poles, 2 and 3 positions. Mounting plates available.



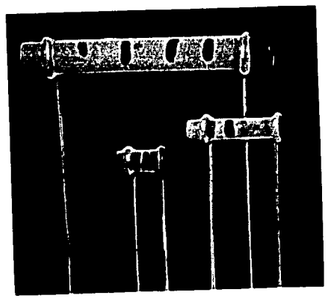
Ask for Bulletin 42-141.



Slide Switches

For improved performance. Flat horizontal design saves space, reduces lead inductance. Wide silver-plated brass contacts. Length variable from 5 to 20 clips per side. Double-wipe clips assure constant pressure. Positive coil spring index — with 2, 3 or 4 positions.

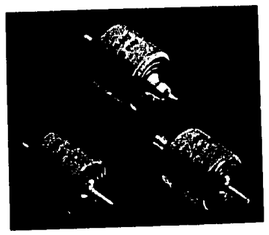
Ask for Bulletin 953.



3 CAPACITATORS

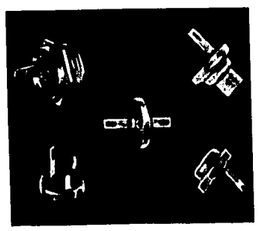
BC Tubular

Ideal for use in r.f. by-pass, audio coupling applications and general circuit use. Available from 1 mmf to 10,000 mmf. Centralab's own Ceramic-X body withstands temperatures to 2200° F . . . makes capacitor impervious to moisture and low power factor. Insulated or non-insulated.



Ask for Bulletin 42-3R.

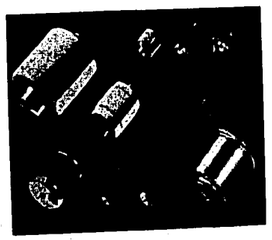
TC Tubular



Temperature compensating tubulars. Complete range of T.C. characteristics. Comply to preferred values as set up by RTMA. Meet JAN-C-20A specifications. Special values can be furnished, upon order. Temperature coefficient, voltages, capacity and tolerance match latest RTMA color codes.

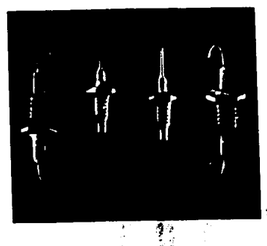
Ask for Bulletin 42-18.

HI-VO Kaps



Safest high-voltage capacitors available. Centralab's TV Hi-Vo Kaps are the standard for the TV industry, including UHF. 10 KV, 20 KV and 30 KV d-c. Will withstand continuous overload up to twice rated working voltage. Small diameter 1" to 1.4" maximum. Ask for Bulletin 42-10R.

Stand-Off and Button Style



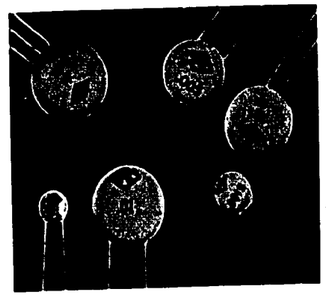
Type S1 Tubular Stand-Off (50 to 2500 mmf) by-passes r.f. to ground in many HF, UHF and VHF circuits. Type S2 (5000 to 10,000 mmf). One end threaded for panel mounting. Ask for Bulletin 42-121R.

Button style "Zippers" (•) — a long-life replacement for old-style mica "Buttons." Available in 5 different types. Used for by-passing in low-power, high-frequency applications. Ask for Bulletin 42-122R.

Transmitting and High Voltage, High Accuracy

Ideal for standard or mobile gear requiring close-held oscillator frequencies. Extremely low power factor and stable retrace characteristics. Eleven terminal styles. Capacitance: 3 to 1000 mmf, 5 KV to 40 KV d-c. Ask for Bulletin 42-102R.

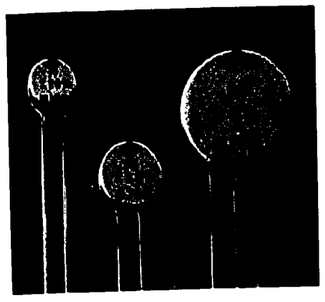
Feed-Thru (FT) and Miniature Feed-Thru (MFT)



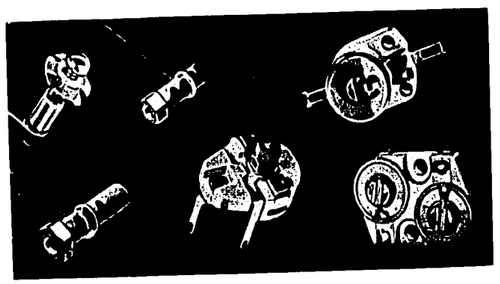
Designed for single-hole mounting with ground to chassis or shield. Type FT (500 to 2300 mmf) has .050" straight or hooked terminals for easy soldering. Bushing mounted. Type MFT (50 to 1000 mmf) eyelet-mounted. Smallest available in the widest capacitance range. Both types rated 500 v d-c.

. . . closer tolerances, greater choice of values

BC Discs



Ultra-compact — designed and pioneered by Centralab specifically to solve high-capacity, low-inductance, and small-space requirements. Available in single-non-shielded dual and shielded dual types. Tolerances to meet your requirements.



For complete technical data ask for Bulletin 42-4R.

TC Discs

Extremely thin — only .156" max. Available in sizes ¼", ⅜", 9/16" and ⅝" diameter. TC Tolerances— ± 30 PPM/°C or ± 15% whichever is greater, and in accordance with JAN and RTMA test procedure for values less than 10 mmf. Insulation resistance 10,000 megohms or greater.

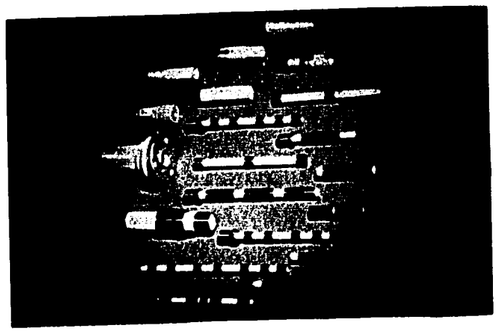
Ceramic and Steatite Trimmers

Several types designed for greater stability to shock or vibration. Smaller, lighter, easier to mount in any position. Readily adjustable with screwdriver to full capacity range in 180° rotation. Rated 500 v d-c w. Available in dual or gauged units. Built to JAN-C-81. Examples:

Type 821 Miniature Ceramic Trimmer
Capacity ranges: 2.5 to 50 mmf maximum.

Type 823 Ceramic Trimmer
Medium-heavy steatite base. Eight capacity ranges: 5 to 125 mmf maximum.

Type 822 Ceramic Trimmer
Medium weight steatite base. Five capacity ranges: 1.5 to 50 mmf maximum.

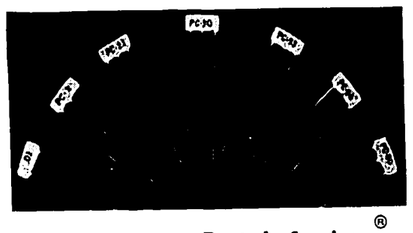


Type 829 Tubular Ceramic Trimmer
For TV and VHF. Body only .215" dia. Five capacity ranges: .5 to 10 mmf max. Bulletin 42-59.

Ask for Bulletin 42-101 on 821, 823, 822 types.

4 FINE CUSTOM CERAMICS

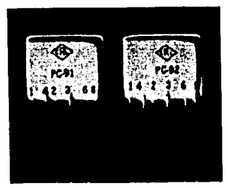
engineered to give you exact electrical and physical properties



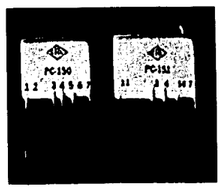
Centralab modern engineered ceramics are a *new* answer to old design problems. They simplify a great number of industrial and electronic applications. A great variety of forms can be extruded, molded or pressed . . . drilled, ground and tapped . . . even metalized. All operations can be done to measured tolerances and very economically. You can choose from many exact formulas — comprising three basic types of materials — Steatite, Centradite, Zirconite. Steatite meets JAN-I-8 and JAN-I-10 requirements for Grade L-5 without exception.

5 PRINTED ELECTRONIC CIRCUITS ...pioneered by Centralab
...more than 25,000,000 in use

Small Plate Components

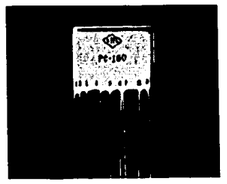


Smallest standard PEC's made by Centralab — excellent for miniature use. Immediately available. Minimum dimensions 1 7/32" x 7/32" x 7/64". Capacitors 150 v d-c w. Resistors ½ watt. Single capacitors; dual capacitors; single resistors; dual resistors — in combinations; resistor-capacitor in series; resistor-capacitors in parallel. "Filpec," balanced diode load filter — has two capacitors and one resistor. ...offers a new approach to radio and TV manufacturing. Ask for Bulletin 42-132.



Triode Couplates®

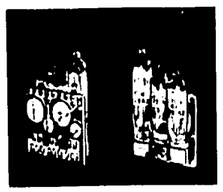
Require only 4 soldered connections. Replace 5 components normally used in audio circuits. Are complete midget assemblies of 3 capacitors and 2 resistors bonded to a dielectric ceramic plate. Resistors — ⅛ watt; Capacitors — 400 v d-c w. Ask for Bulletin 42-127.



Pentode Couplates®

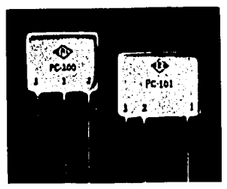
Require only 6 soldered connections. Completely new interstage coupling circuits of 3 capacitors and 3 resistors and a small 6-lead ceramic base. Compared with predecessors they actually reduce soldered connections 50%. Only 1 3/32" x 13/16" x 1 1/64". Three standard values available. Ask for Bulletin 42-128R.

AUDET®



Extremely popular for miniature use. Furnish all values of all components generally found in output stage of a-c, d-c radio receivers. Provide 4 capacitors and 3 resistors — with only 7 leads. Resistors ½ watt; capacitors, 400 v d-c w. Ask for Bulletin 42-129.

PENDET*



Another Centralab "first" in Printed Electronic Circuits. Consists of 5 capacitors and 4 resistors in a single plate with only 9 leads. Similar to the popular Audet. Couples the diodetriode and pentode tubes in output stage of a-c, d-c sets. Available in two standard values. Ask for Bulletin 42-149.

*Trade Mark

AMPEC®

Latest outgrowth of Centralab's constant research in PEC development. Excellent for subminiature high gain audio use. 3-stage speech amplifier smaller than cover of ordinary book matches. Size: 1 3/32" x 15/16" x 1 1/32". Capacitors, 100 v d-c w. Resistors, ½ watt. For data on Model 2 and Model 3 — ask for Bulletins 42-117R and 42-130R.

Vertical Integrators

Over 7,000,000 in use by major TV manufacturers. Assure big savings in assembly of TV vertical integrator networks. One type consists of 4 resistors and 4 capacitors brought out to 3 leads . . . reduces former 16 soldered connections to 3. Ask for Bulletin 42-126.

You can put your confidence in Centralab electronic components. Each is the result of more than 20 years' experience, research development, production and close cooperation between Centralab and leading manufacturers in the field. For complete information — including taper curves, physical dimensions, engineering, specifications, write direct, stating bulletins of interest. Or, if you prefer, contact your nearest Centralab representative. He will be glad to help you without obligation.

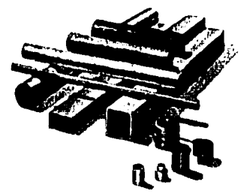
ONE SOURCE FOR ALL . . .

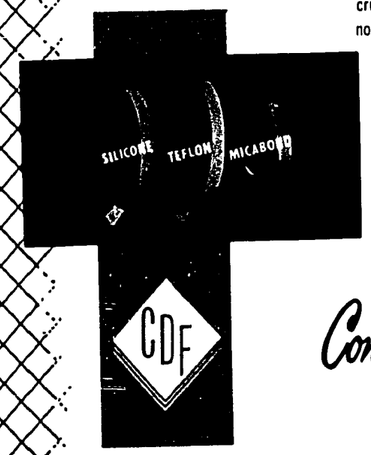


DIAMOND VULCANIZED FIBRE and VULCOID Low-cost, light weight electrical insulation of great mechanical adaptability. Fibre resists arc, can be drawn and formed. Vulcoid is an exclusive C-D-F resin-impregnated vulcanized fibre.

DILECTO LAMINATED PLASTICS

Sheets, tubes, rods made from a variety of base materials and resins. Laminated Dilecto is designed for your mechanical electrical application and is easily fabricated, by you or by C-D-F.

CELORON MOLDED INDUSTRIAL PRODUCTS



Macerated canvas or paper, skillfully molded into gears, insulators, structural parts. Sheet stock easily machined.

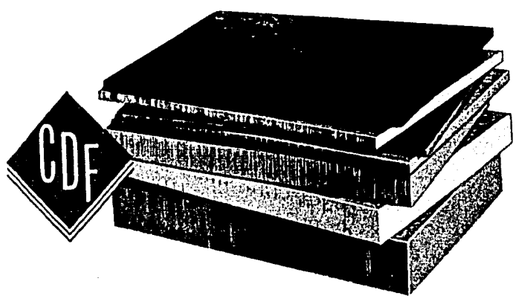
C-D-F SPIRAL TUBING

A complete line of round, square, rectangular kraft-paper spiral tubing for coil forms and transformers. Impregnated or plain. Stiff, sturdy, crush-resistant. Constant-torque grade now available.

MICABOND Plate, tape, segments, v-rings, fabricated parts of selected mica, the universal insulator against heat. C-D-F can help you build a better motor!

TEFLON Supported or unsupported sheets, tapes, specialties . . . developed by C-D-F from duPont's tetrafluorethylene resin. Resistant to high heat, corrosives, arc, moisture.

C-D-F INSULATING TAPES A complete line of high-heat, dielectric strength tapes including Silicone varnished fiberglas and rubber fiberglas, Teflon, Mylar Micabond combinations.



Continental-Diamond Fibre Company

NEWARK, DELAWARE, U.S.A.

C F–54

LOW COST | HIGH STRENGTH

DIAMOND VULCANIZED | FIBRE

C-D-F first made Vulcanized Fibre in 1895, today is a recognized leader in its widespread development. Fibre is made from pure cotton rag paper, chemically treated so that the fibres adhere completely and form a permanently solid mass. The finished sheets have a bonelike consistency, are tough, hard and smooth.

Vulcanized Fibre is an inexpensive, lightweight, electrical insulator of great mechanical adaptability. This hard, dense, bonelike material is tough, resilient and strong. Its great physical strength, high dielectric strength coupled with arc resistance, arc quenching characteristics and adaptability to machining and forming operations have found for it many applications in modern industry.

Machining and punching of Fibre are economical operations. Many C-D-F grades may be readily drawn and formed into a variety of shapes. Repeated moistening and drying during fabrication does not alter the nature or quality of the material.

3 IMPORTANT SHEET GRADES WITH GOOD INSULATING QUALITIES

BONE A high density (1.40 specific gravity) hard material used for intricately machined parts where dimensional changes must be minimized. Has high mechanical strength, resistance to wear and compressibility. Used in clutch discs, gears, slot sticks, rubbing blocks and for famous C-D-F Railroad Track Insulation.

Thickness	Sheet Sizes
1/32 to 3/16"	46" x 70"
over 3/16 to 3/8"	48" x 80"

Color: Gray

COMMERCIAL A tough, pliable, strong material for general use. Has medium density, with good mechanical properties and high dielectric strength under dry conditions along with excellent punching and machining characteristics. One of the strongest materials per unit weight known, this fibre can be used and formed into thousands of low-cost, dependable parts.

Thickness	Sheet Sizes
.004 to 2"	48" x 84"

Colors: Red, gray, black.

DIAMOND INSULATION A hard-surfaced fish paper for armature slot and field coil insulation. Easy to bend, form, punch. Made with extra strong fibres, this insulation has high dielectric strength, will stand extreme bending without cracking. Free from metal. Rolls and ribbon rolls for automatic machines made up to 1/32" thick in various widths to order.

Thickness	Sheet Sizes
.004 to 1/8"	48" x 84"

Color: Gray

3 FIBRE SPECIALTIES WITH LONG LIFE AND SUPERIOR VALUES

FIBRE TUBING is a strong, high density material of approximate Bone quality. Excellent machining, forming, spinning qualities. Used as lead cord plug insulators, fuse tube housings and liners, bushings, grommets, and for many screw machine specialties.
Standard lengths: 22 to 36"
ID: 1/8 to 4 3/8"
60" lengths with ID of 5/8 to 2", made in quantities.
Wall Thicknesses: 1/32 to 1/4". Over 1/4 to 1/2" made by telescoping process.
Colors: Red, gray, black.

FIBRE RODS are lathe-turned from sheet stock bars. Machined surfaces on edges are not as smooth as fibre tubing. Used for screw machine specialties, insulating handles, spacers.
Diameters to 1/2" supplied in Bone. Gray.
Diameters to 2" supplied in Commercial.
Colors: Red, gray, black.
Random lengths 60 to 72" in diameters 1/8 to 1".
36 to 72" in diameters 1 to 2".

RECEPTACLES Vulcanized fibre weighs half that of aluminum and provides an ideal material for the construction of sturdy, long-lasting materials handling equipment with a minimum of dead weight. C-D-F fibre is smooth, oil and grease proof; it will not crack or shatter under heavy impacts. Get trucks, trays, boxes, baskets, roving cans, barrels from C-D-F. Write for Vulcanized Fibre Receptacle catalog showing complete line.

	Thickness	Size	Colors
ABRASIVE: Medium density fibre with high tensile and tear strength. Excellent glue penetration. This tough, flexible, C-D-F fibre is widely used for abrasive discs.	.010 to .040"	47 to 52" wide, in rolls up to 1,000 lbs.	Blue, chocolate, gray, olive, and combinations
BOBBINS: A dense, hard, high impact product with excellent machining properties. Used for bobbin spool heads.	1/8 to 3/8"	45 to 50" wide, 84" long	Black, gray, red
FLEXIBLE: Medium density, flexible (glycerine or glycol plasticized) fibre produced in varying degrees of flexibility. Used for all types of washers, last tops, gaskets.	1/32 to 1/4"	48 to 54" wide, 84" long	Black, gray, red
FORMING: Medium density, lightly calendered fibre with mechanical and electrical properties comparable to Commercial, but with outstanding forming quality, high impact strength. Used for forming welders' helmets, athletic equipment.	.045 to 3/32"	46 to 52" wide, 84" long	Black, gray, red
PATTERN: Low density, smooth but very lightly calendered fibre tending to remain relatively flat. Used for patterns.	1/16 to 3/64"	48 to 54" wide, 84" long	Red
RUBBER BACKING: Low density, porous, uncalendered fibre with good flexibility and tear resistance. May be laminated to rubber for heel backing, etc.	.010"	54" wide rolls or 84" long sheets	Black, tan, white
SHUTTLE: Medium density, high ply adhesion fibre with excellent mechanical properties and good abrasion resistance. Suitable for surfacing wood shuttles and similar parts.	3/32 to 7/64"	48" wide 84" long	Black, gray, red
3 BT: Medium density bright, clean grade that may be formed. Used for spoons, forks, instrument parts and similar sanitary requirements.	.005 to 1/16"	50" wide 84" long or in rolls	High white
TAG: Medium density exceptionally smooth, clean fibre tag stock that may be written on with ink or printed. Will not feather.	.005 to .020"	50" wide 84" long or in rolls	High white
TRUNK AND CASE: Medium density, tough, high mechanical strength fibre with good bending, punching, piercing qualities. Surface adaptable to varnishing and lacquering. Smooth or embossed grain finishes. Used for trunks, suitcases, laundry cases, box and truck sidings.	.015 to 1/8"	47 to 52" wide, 84" long	Black, chocolate, light granite, gray, mahogany, olive red, russet, walnut
BUILT-UP: A laminated fibre that is well bonded under heat and pressure. Various grades of fibre may be used in the build-up. It has less tendency to warp, better dimensional stability than regular fibre of the same thickness.	3/8 to 2" 2 to 4 1/4"	39 x 46" 11 x 11"	Black, gray, red

VULCOID
RESIN-IMPREGNATED FIBRE

Only C-D-F supplies Vulcoid in sheets, tubes, rods, and fabricated parts. Made from Diamond Vulcanized Fibre that has been uniformly impregnated with a special resin, Vulcoid is a material approved and identified by the Underwriters' Laboratories as Class A Insulation. Natural greenish-tan in color, it is economical, easy to machine and punch. Property-wise, Vulcoid is an intermediate grade between Commercial Fibre and XX phenolic Dilecto.

USES

requiring arc resistance and mechanical strength
Contact and instrument panels, knife switch guides, arc deflector spacer bushings

requiring dielectric strength and moisture resistance
Electrical fixture insulation, wiring devices, plugs, receptacles

requiring moisture and arc resistance
Motor and transformer lead bushings and terminal blocks

LAMINATED PLASTICS

DILECTO

Dilecto, a phenol fibre manufactured by C-D-F, was developed to meet the need for a non-metallic light weight material that is moisture resistant, mechanically strong, and adaptable to all fabricating operations. Certain electrical grades have high dielectric strength, low loss factor and high insulation resistance. Other grades have high mechanical strength or superior arc resistance. Dilecto is made in numerous grades, each one with a combination of proven characteristics built into the material for the specific job.

Dilecto is a laminated material made from either paper; heavy or fine weave cotton cloth; asbestos paper, woven fabric or mat; or woven glass fabric. The base selected is coated with a synthetic resin (either phenolic, melamine, or silicone) which has first been dissolved in a solvent. Drying ovens remove the solvent and the resin-impregnated sheets are cut to size, piled to the required sheet thickness. Under heat and pressure the resin flows, cures into a homogeneous material resulting in a finished product that is infusible and insoluble.

The selection of the proper base material, the proper resin in the correct proportion, is C-D-F's job, but the end user must realize how important it is that *he* fully understands what dividend results can be gained mechanically, and electrically, and from a cost standpoint, by getting the very best C-D-F material for the project. Here is a brief yet complete listing of Dilecto sheet grades. Rod and tubing are similar to sheet stock in most properties.

X

For Mechanical Applications When Electrical Properties Are Secondary.

X-13—The highest mechanical strength of the paper base phenolic laminated materials. A general purpose grade with good impact strength, high tensile and flexural strength. Relatively non-hygroscopic and will not absorb oil. Not recommended for drilling and tapping parallel to laminations.

XK-70—A flexible grade X-13. Sheet stock used for wire wound core strips in controls.

XF—A paper base grade that can be post-formed into special shapes by reheating and molding, using inexpensive cold molds. Crepe paper base material adds greatly to formability. A substitute for formed fibre parts.

P

For Punching (Paper-based Grades).

XP-13—A fairly flexible (.015 to ¼") grade with good dielectric strength, easily cold punched up to 1/16". Dimensionally stable under normal atmospheric conditions. Not recommended for drilling and tapping parallel to laminations.

Uses: Washers, terminal boards, plug and socket bases, switch bases, panels.

XP-6—A combination of XP-13 with Diamond Insulation fish paper for superior arc resistant qualities. Known as "switch insulation".

XP-90—A stock that can be punched cold up to ⅛" thicknesses. Not as strong or moisture resistant as XP-13.

XXP-13—A paper base phenolic electrical grade with excellent punching qualities and good mechanical strength. Paper-based phenolic. Suitable except when low losses under high humidity are required. Used for washers, condenser and switch rotor and stator insulation.

XXXP-26—A hot punching grade with high insulation resistance and low dielectric losses under high humidity conditions. Green color.

XXX

For High Humidity Applications with Minimum Cold Flow.

XXX-13—A paper-based phenolic laminate with high resin content. Dimensionally stable, with excellent moisture resistance and low cold flow. Good machining qualities. High dielectric strength parallel to laminations. Used for radio frequency insulation, jack spacers, coil forms, high voltage switch gear, etc.

XXX-61—Special stock for jack spacers and other requirements where lowest cold flow is needed.

A

For Applications Requiring Resistance to Heat.

A-13—Asbestos paper bonded with a phenolic resin. Better flame resistance than cellulosic paper-based grades. Good dimensional stability under humidity. Not so good from a machining, punching, electrical standpoint. Not recommended for primary electrical insulation at commercial power frequencies for voltages in excess of 250 volts.

AA-13—Asbestos fabric bonded with phenolic resin. Better heat resistance plus greater moisture resistance, dimensional stability and impact strength than grade A-13.

FA-72—Felted asbestos mat base with phenolic resin. Better machining and punching than A-13 or AA-13. High mechanical strength with poor electrical properties.

XX

For Electrical Applications Requiring Mechanical Strength.

XX-13—A hard paper-based material, laminated with phenolic resin, possessing high dielectric strength, excellent moisture resistance, good machinability. Moderate mechanical strength makes XX grades suitable for radio and switch board panels, terminal blocks, relay insulation, coil forms, insulating support rings, bushings.

XX-26—Special grade made from high strength paper. Greater mechanical strength than XX-13.

XXHV-2—Higher dielectric strength parallel to laminations and lower 60 cycle power factor than standard grades. Used for high voltage applications, transformer tap changers and rectifier rotor insulation. At 80° C. in oil, XXHV-2 withstands 50KV for five minutes, 75KV for one minute without failure.

SPECIALTIES

LDC—A light weight fabric bonded with a maximum penetration resin. This sheet stock is recommended for greater dimensional stability under severe conditions of exposure to extremes of atmospheric temperatures and humidity. Used in pneumatic drill rotor blades, small gears, friction plates, wherever slight swelling would mar operation.

CBW—Combination black and white stock for engraved signs and name plates.

MEC-5—A medium weave staple filament nylon fabric base with stable electrical properties under high humidity. Fungus resistant. Good mechanical and impact strength. Used in radar and communications equipment.

C

For Mechanical Applications Requiring Toughness Plus Impact Strength.

C-313—Fine weave .315 canvas sheeting base.

C-813—Standard medium weave.

C-1513—Heavy weight canvas base with higher impact strength than C-313 or C-813.

CRD—Non-woven cotton fabric with random distribution. Good machining properties. Used in textile bobbin heads.

CF-1—Post-forming sheet stock. Canvas base. Non-after-glow.

C-855—Medium weave industrial gear stock.

C-1556—Heavy weight fabric base industrial gear stock.

For Chemical and Special Applications.

C-92—Special alkali resistant material with low water absorption. Used in plating tanks and oil refining equipment.

L-92—Fine weave grade fabric base with excellent machining qualities. Widely used for plating applications. Alkali resistant.

MC—Medium weave cotton fabric base, with melamine resin. Used as structural members in plating barrel tank panels. Good arc resistance.

CV-345—Fine weave fabric base. Valve stock. Used for pump valve discs or seats. Used under conditions less severe than exposure to steam, chemicals, abrasives. Widely used for paper machine parts, such as suction box covers and doctor blades.

CV-845—Same as above. Medium weave fabric base.

GB

For Applications Requiring Heat Resistance and High Mechanical Strength.

GB-112D—A fine weave continuous filament fiber glass cloth bonded with phenolic resin. High impact, tensile, flexural strengths. Excellent dimensional stability in humid surroundings. Fine machining possible. Withstands 300° F. continuous operating temperature. Uses: armature slot wedges.

GB-128D—Made with medium weave fiber glass cloth. Not recommended for threading.

GB-261D—A coarse weave staple fiber glass with a special phenolic resin. Superior electrical qualities. Material has better ply adhesion and can be threaded.

For High Heat Applications.

GB-112S—Fine weave continuous filament woven glass fabric and Silicone resin. High arc and flame resistance, low dielectric losses. Withstands 200° C. continuously or 250° C. intermittently. Recommended for high frequency applications under high humidity and arcing conditions.

GB-112M—High mechanical strength plus excellent arc and flame resistance. Melamine resin.

GB-28M—Medium weave glass fabric with melamine resin. Highest mechanical strength plus excellent arc and flame resistance. Self extinguishing.

GB-261S—Coarse weave. Same major qualities as GB-112S, with better bond strength. May be drilled parallel to laminations.

GM-PE—Glass mat filled polyester resin bonded laminate. A mechanically strong low-cost product with continuous heat resistance up to 300° F. (Class B Insulation)
Good arc resistance and non-tracking properties. Sheets only.

Diamond Dilecto—Thin layers of resin treated vulcanized fibre bonded under heat and pressure to form Diamond Dilecto. Better moisture resistance than vulcanized fibre plus high impact strength and good arc resistance.

GB-AL—Laminate made from special glass fabric base, bonded with polyester resin. Designed for high mechanical strength plus excellent ballistic properties. This is the material similar to that developed by C-D-F for the Marine Corps famed armor vests. It has civilian safety as well as military protective applications.

CE & LE

For Electrical Uses Requiring Greater Toughness than Paper-based Grades.

CE-300—Fine weave fabric base. Not recommended for primary electrical insulation at commercial power frequencies for voltages in excess of 600 volts.

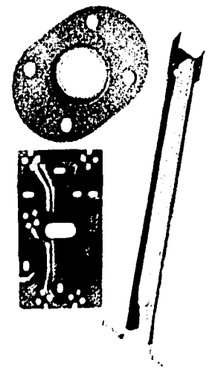
CE-313—Made with a purified cotton fabric base for superior electrical qualities, this grade has high moisture resistance and dimensional stability.

CE-800—Medium weave fabric base.

CE-815—Standard CE using purified fabric. Has lower cold flow than CE-800.

LE-13—Same fabric as L-400 but with improved electrical properties and appearance. Good in moisture resistance. (See CE-300)

L



For Mechanical Applications Requiring Fine Machining.

L-400—Fine-weave cotton fabric base with phenolic binder. Suitable for small gears; machines clean and to close tolerances particularly in thicknesses under ½".

ML—Light weight fine weave cotton fabric base, with melamine resin. Better arc resistance than phenolic laminates.

LV-445—Light weight fine weave fabric base. Standard valve stock.

POST-FORMING

Certain Dilecto grades may be formed to special shapes by heating and placing in an inexpensive cold mold. Outstanding is CF-1, a canvas-based laminate which has excellent mechanical strength, abrasion resistance, and is easily machined and punched. Special chemicals in the varnish give CF-1 no apparent after-glow once an ignited specimen has been extinguished (product complies with SAE-Aeronautical Material Specification AMS-3605, latest revision).

Other Dilecto post-forming grades include XF (paper-based); GB-SF with Silicone resin, supplied in semi-cured state; MEC-1F (nylon-based).

Write for technical bulletins, samples, engineering service.

METAL CLADS

For printed circuits C-D-F is a major supplier of metal clad stock with superior bond strength between laminate and copper foil. The C-D-F adhesive used does not degrade the electrical properties of the base laminate and has high heat resistance.

Grades available with metal foil, one or both surfaces:

GRADE XXXP-24
GRADE XXXP-26
GRADE GB-112T

Other grades may be supplied having copper or aluminum foils on one or both surfaces, as required by the applications.

Some grades, except glass fabric base Silicone and Teflon laminates, may be supplied with fire resistant additive.

Write for complete Technical Bulletin, samples, test information.

NOTES: Tests were conducted in accord with American Society for Testing Materials Methods for Sheet Electrical Insulation. All values shown are averages and should be used for comparison purposes only.

Flatwise impact test and bonding strength values are based on ½" thick material. All other tests are based on ⅛" thick material except where indicated.

Wet power, dielectric constant and loss factor values are based on samples immersed in fresh water for 24 hours at 25°C. Insulation Resistance values were based on samples conditioned for 96 hours at 90% relative humidity at 35°C. Dielectric Strength tests were made flatwise on 1/16" material at 60 cycles under oil. ST = Short-Time ASTM Test. For detailed specifications refer to publications of National Electrical Manufacturers Association which will be furnished on request.

SHEET SIZES

With the exceptions noted, all grades of Dilecto can be made at the following C-D-F plants in the sheet sizes indicated:

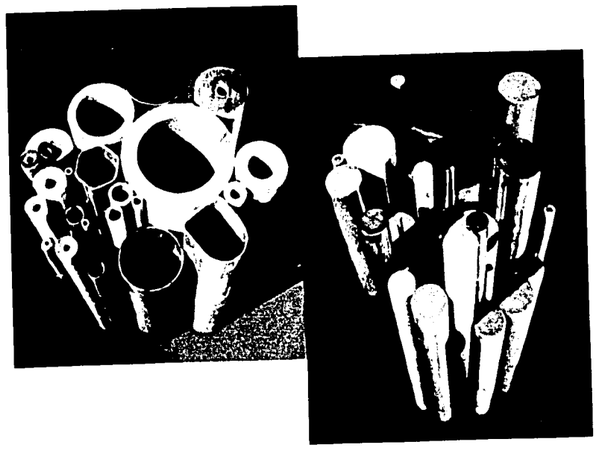
C-D-F Bridgeport, Pa. (B)
39 x 46"
46 x 70"

C-D-F Newark, Del. (N)
38 x 38" 38 x 42"

C-D-F Valparaiso, Ind. (V)
38 x 42" 38 x 96" 48 x 48"

Exceptions: Bridgeport: Grades LE-13, L-400, and other fine weave cotton fabric base grades are not available in sheet widths exceeding 39".

Newark: Grade A-13 is available only in 36 x 36" sheet sizes.



These are standard sizes regularly in production. Consult us about special orders.

* Natural is only color supplied for U. S. Military Type grades.

** Heavier thicknesses of glass base phenolic laminates are available in grade GB-28D. Consult Newark Sales Office.

DILECTO TUBES - RODS

TUBES AND RODS

Dilecto tubing finds wide usage in the radio and electrical equipment field because of its excellent insulating and mechanical properties. Impregnated paper or fabric is rolled on a mandrel between heated pressure rolls, then either oven baked or press cured in a heated mold to set up the resin.

MOLDED TUBING is dense and homogenous because of the heat and pressure applied throughout the molding operation. The hard smooth surface is easily machined and remains unaffected by excessive humidity. Dimensionally stable, C-D-F molded tubing has a low loss factor.

ROLLED TUBING is wound with the application of heat and pressure, but the final cure is effected with heat only. Because of the absence of mold seams it has even better dielectric strength than molded tubing. The high mechanical strength of rolled tubing permits its use for piping chemicals and gases when inside pressures are high.

RODS are made by rolling impregnated paper or fabric on mandrels, removing the mandrels and molding the material in hydraulic presses. Rods are also available from turned sheet stock.

*Rolled tubes with ID under ⅛" are supplied in lengths from 16 to 18".
**Available only in rods machined from sheet stock.

Above are representative grades of Dilecto tubing and rod. Since these and other C-D-F sheet grades are often available in a variety of forms and fabricated parts, write for complete Dilecto catalog.

ROLLED DILECTO TUBING WITH A DIAMOND FIBRE LINER

"Canite" combination tubing protects electric circuits and transmission lines from damage by current overload and line faults, gives high dielectric strength with sufficient strength to withstand impact shock from pressure developed by electric discharge. Weather and moisture resistant; are resistant and are quenching.

Naturally, skill is required to bond the Diamond Vulcanized Fibre liner to the rolled laminated Dilecto outer shell and Continental-Diamond Fibre's experience in manufacturing both materials results in an exceptional combination product. If you need a material like this combining certain electrical and mechanical properties, consult your C-D-F sales engineer. Write C-D-F, Newark, giving application and requirements.

SPIRAL TUBING

PAPER TUBES • FORMED AND NOTCHED

A high strength plastic made from paper or fibre that is spirally wound, available as plain untreated tubing, or impregnated with phenolic resin or insulating varnishes, and carefully cured at high temperatures. It can be used to replace rolled or molded laminated phenolics with the properties of Spiral Tubing often satisfactory enough to effect considerable cost savings. Small sizes and very thin walls are not a special problem. Excellent moisture resistance and dimensional stability for many applications. Write for 8-page Technical Folder ST-53.

PAPER → **SPIRALLY WOUND** → **THEN IMPREGNATED** → **AND CURED** → **PLUS FABRICATION AND INSPECTION**

Special kraft papers are first selected for chemical purity . . . freedom from metal. Diamond Insulation (made with extra strong fibres), chipboard, etc., can also be used.

Adhesives and proper paper tension now combine to give C-D-F Spiral Tubing its unique strength with a minimum of paper gap!

The finest electrical grades of phenolic resins are used. Controlled by C-D-F technicians, tube impregnation gives uniform electrical and machining properties.

Electronic regulators control the heat and time spent by the Spiral Tubing in C-D-F's huge ovens.

C-D-F's modern shops, staffed with top-notch machinists and inspectors, result in few rejects, greater precision, close adherence to tolerances.

GRADES

IMPREGNATED

1. General Electrical and Mechanical. Hard, rigid, round tubing for coil forms. Suitable for riveting if hole is punched or drilled.
1A. General Electrical and Mechanical with special punching qualities. Round.
2. Mild Stapling, Riveting, Forming. Medium hard round tubing that may be notched and formed by customer.
2A. Intermediate Fabricating and Stapling. Medium hard round tubing which has good resistance to moisture and action of solvents. Used in paint rollers.
3. Severe Stapling, Riveting and Forming. A softer tube for difficult fabricating. Readily notched or formed. Round.
5. Constant Torque and Formed and Notched. Formed and notched tubing, custom fabricated by C-D-F for use in coil forms with threaded iron tuning core. Tubing is threaded internally; three point contact with core prevents binding. Write for samples.
6. Special High Humidity. Hard, rigid tube with improved moisture resistance. Has better dimensional stability and rigidity in thin wall sizes.
6A. High-Strength Mechanical and Electrical. Very hard round tube with lowest water absorption under immersion conditions. High axial and radial compressive strength; used for bushings.
7. Soft Tubing. Very soft, varnished kraft round, square, rectangular tubing for coil forms.
7A. Hard, Rigid Rectangular Tubing. Similar to harder round tube grades in moisture resistance and dimensional stability. Rectangular and square.
8. Varnished Diamond Insulation. Used in television coil forms. Round.
9. "Deflection Coil" tubing. Soft, round tube for large size coil forms.
10. Mechanical Purpose. Large diameter, heavy wall round tubing. Phenolic resin impregnated.

UNIMPREGNATED

20. Special Wound. Round, square, or rectangular unimpregnated tubing to customer's B/P with any thickness, arrangement or number of plies. Wide choice of materials.
21. Plain Kraft. Round, rectangular, square.
22. Plain Diamond Insulation round tubing.
23. Plain Chipboard large-size round tubing.

SHEETS • TAPES • SPECIALTIES OF TEFLON*

*duPont trademark for tetrafluoroethylene resin

C-D-F molds, machines and processes Teflon into forms you need . . . tapes, sheets, metal-clads, diaphragm stock, gaskets, packing, release material.

A study of Teflon properties shows that this high strength plastic always deserves consideration where heat and moisture resistance plus low dielectric losses must be obtained. Write for 8-page Technical Folder T-52 with samples.

SHEETS Two classes are available: *Unsupported* or pure Teflon Sheet. Fiber glass cloth *supported* sheet with Teflon applied by dispersion, then dried and fused at elevated temperatures. Laminated glass supported sheets have greater mechanical strength while retaining low dielectric loss properties.

Weight — 12.8 cubic inches per pound.

SHEET SIZES (Approx.)*

Thickness Range	Unsupported	Glass Supported
0.008 to 5/8" inc. 0.002 to 1/16" inc.	up to 12" wide in sheets or rolls 24 x 24" 48 x 24" 48 x 48"	16 x 36"
1/16 to 1"		

*Other sizes to order.

Flexural Strength (Thousands of psi)	Lengthwise		13	30	48	24
	Crosswise		11	27	40	20
Water Absorption, %, 24 hours (1/16" thick)		Negligible	.03	.20	1.7	2.

*Will not form complete conducting path. Arc continues indefinitely but material gradually erodes away on full time continuous arc.

TAPES. For heavy duty, high heat cable and motor insulation. See back cover.

METAL-CLAD STOCK. For printed circuits that must withstand over 300° F. for extended periods. A special C-D-F bonding process results in higher bond strength, 5 to 9 lb. per inch of width.

OUTSTANDING PROPERTIES OF C-D-F TEFLON INSULATION

HEAT RESISTANCE

Due to the non-flammability and high heat resistance of Teflon, it easily meets both Class B and Class H, AIEE standards for maximum hot spot insulation temperature. Teflon coated glass fabric laminates withstand 250°C. continuously and up to 300°C. intermittently. One factor which influences the heat resistance of Teflon is that there is no apparent degradation from oxygen, which has a definite degrading effect on silicone materials.

ELECTRICAL

The dissipation factor and dielectric constant of Teflon laminates are both extremely low over a wide frequency range. From 60 to 100 megacycles, the dissipation factor range is between .005 to .0005 and the dielectric constant ranges from 2.8 to 2.5 when measured in a field perpendicular to laminations. As corona will slightly degrade Teflon, care should be taken in designing parts used at voltages over 2500. Sharp corners, and other contributing factors to corona should be avoided.

MOISTURE RESISTANCE

A Teflon laminate has practically zero water absorption and its electrical properties are little affected after long exposure to high humidity. Teflon is unaffected by fungus and temperature changes. Not only has it lower moisture absorption than any other laminate known, but it tends to repel water . . . retaining high surface insulation properties even under extremely humid conditions.

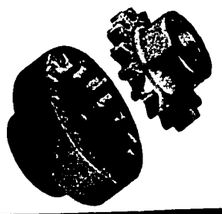
Celoron

CANVAS or PAPER-BASED MACERATED MOLDED INDUSTRIAL PLASTICS

C-D-F pioneered in molded industrial plastics, developed the famous Celoron timing gears for the automotive industry. Celoron is unaffected by rapid temperature changes, may be used continuously at 225 to 250° F. It has high impact strength, excellent resistance to heat, oil and water, many chemicals.

Typical Property Values

	Laminated Sheet Celoron (C-813)	*Molded Celoron (CFI-20)*
Specific Gravity	1.35	1.35
Rockwell Hardness, M scale	110	105
Tensile Strength, psi	10,000	6,500
Flexural Strength, psi	20,000	10,000
Compression Strength, psi	38,000	25,000
Shearing Strength, psi	12,000	8,500
Impact Strength, flatwise	4.0	2.3
Water Absorption, % 24 hrs.	1.25	1.25
Coefficient of Thermal Expansion, °C	2.5 x 10⁻⁵	2.5 x 10⁻⁵
Dielectric Strength, VPM—Short time (¼")	200	200



All values given are average values and should not be used for specification purposes.

SHEETS

From laminated stock, fabric-based phenolic impregnated Celoron can be furnished in sheets, cut pieces, blanks and rings machined from sheet stock. For gear applications (idler and spur gears, and cams), it is normally identified by two black lines. See Dilecto C grades for mechanical applications requiring toughness plus impact strength.

MOLDED

Celoron can be molded to close tolerances for both mechanical and electrical applications. Rugged, dimensionally stable, readily machined, Celoron is a dependable material; remember C-D-F has both the men and equipment to handle "big run" molding requirements. Colors: Golden mottled brown or black.

COUPLINGS

Flexible coupling molded from Celoron. Outside surface is smooth, every tooth is capable of carrying heavy loads. Low cost, resists repeated impacts. A good example of Celoron's strength and versatility.

GEARS

All these gears are Celoron which finds wide usage in textile and printing machinery. Build silence into your product with Celoron gears. Write for Celoron catalog with horsepower ratings.

INSULATION

This diesel contact controller drum assembly uses two C-D-F products: Celoron drum body, drilled and broached. Diamond Vulcanized Fibre between the brass contact plate.

BUILD A BETTER MOTOR
MICABOND

TAPES
PLATE
TUBING
SEGMENTS
"V" RINGS

C-D-F, expert in insulation, uses superior grades of mica, places it for complete leak-proof coverage, and applies strong, pliable electrical insulating binders. Micabond Tapes are hand laid; flexible sheets are both hand and machine laid; both retain their electrical insulating properties at elevated temperatures.

ALWAYS SPECIFY MICABOND but talk over your insulation requirements with your C-D-F sales engineer. To build a better motor, to get more insulation value, put C-D-F experience to work for you. America's largest users of mica products rely on C-D-F. Micabond Catalog, samples of Micabond materials, technical aid, all are yours on request.

TAPES

GRADE

20 **Paper both sides**
Made of selected India Mica splittings, all edges overlapped, faced on each side with strong, tough tissue paper. Flexible binder will not dry out under ordinary conditions.
Thickness .005"
.007"
¾" wide x 150' x .005" thick—.25 lb.

21 **Cotton cloth one side, paper one side**
Large India Mica splittings, bonded with flexible binder. Faced on one side with thin cotton insulation cloth, and tissue paper on other side. High tensile strength. Good tear resistance. Use where moderate high voltages are encountered, where space is not limited.
Thickness .006"
.008"
¾" wide x 150' x .006" thick—.31 lb.

22 **Cellophane both sides**
Large India Mica splittings are faced on both sides with .001 thick moisture-proof cellophane. Unusually high tensile and dielectric strengths. Not quite so pliable.
Thickness .005"
.007"
¾" wide x 150' x .005" thick— .6 lb.

24 **Silk one side, paper one side**
Large India Mica splittings, bonded with flexible insulating cement. Faced with .001" silk, with tough tissue paper on other side. Silk gives tape good tensile and tear strength. Good dielectrically, this tape meets all normal requirements.
Thickness .005"
.007"
¾" wide x 100' x .005" thick—.25 lb.

28 **Silk both sides**
Large book-form India Mica splittings, bonded with flexible, non-slipping binder. Thin silk is used for facing on both sides. High tensile strength. Fine tear resistance. Excellent dielectric strength. The ideal tape for ease of application . . . use where space is limited.
Thickness .005"
.007"
¾" wide x 100' x .005" thick—.23 lb.

SILICONE BOND **Fiberglas cloth one or both sides**
Class H insulation. This inorganic tape withstands temperatures 50°C.-75°C. higher than organic bonded material.
Fiberglas one side: .035, .004, .005, .006" and up.
Fiberglas both sides: .007" and up.

TUBING

Micabond can be made round, square, hexagonal, oval, etc. Diameters range from ⅛" ID to 24" ID in practically all wall thicknesses. Lengths are 12", 18", 24" and 36" depending on wall thickness and ID.

GRADES

100% Micabond
95% Micabond— 5% Paper
80% Micabond—20% Paper
50% Micabond—50% Paper
50% Micabond—50% Asbestos

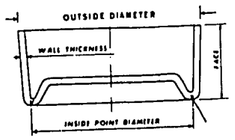
TOLERANCES

ID up to 2" + .015" / —.000"
ID 2" to 4" + .020" / —.000"
OD up to 2½" ± .015"
OD 2½" to 4½" ± .020"

SEGMENTS

Either Amber or India, may be punched or sawed, depending on dimensions and thickness as well as quantity. These four styles cover 95% of segments in use today:

Sawed or sheared except in smallest sizes.



Rectangle with riser at either end. Punched in small sizes.

Very popular design, without riser. Smaller sizes must be punched.

With riser. Smaller sizes must be punched.

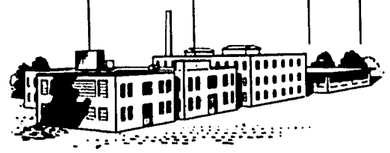
"V" RINGS

C-D-F punched "V" rings are reinforced with accurately centered discs which are formed into the taper, giving unusual mechanical and dielectric strength. Larger rings are molded in forms and set under heat and pressure. C-D-F Micabond rings are made in countless sizes and styles. For prices, send us a working drawing with all dimensions.

TOLERANCES

Nominal Thickness	Variation in Average of 10 Measurements	Variation in Individual Measurements
Up to .005"	±.001"	±.002"
0.005" and up	±.002"	±.003"

STANDARD LENGTH ROLLS
.0035 through .005"—150'
.006 through .009"—100'
.010" and over —50'



All tapes are shipped twelve ¾" rolls to a package, or their equivalent in piled height.

TOLERANCES FOR MICABOND "V" RINGS

	Up to 1"	1" up to 3"	3" up to 7"	7" up to 20"

Height (vertical)	+.010 —.000	+.015 —.000	+.025 —.000	+.032 —.000
Wall thickness	±.003	±.005	±.007	±.009

MICABOND PLATE

	Thickness (inches)		Max. Bond Content	Nominal Thickness	Average Thickness Tolerance	Max. Thickness Tol. in one plate or roll	Average Dielectric Strength, VPM: Short-time	Average Dielectric Strength, VPM: Step-by-step
101 INDIA MOLDING PLATE (NEMA 1) .082 lbs. per cu. in. Milled Sheets 18 x 36"								
Accurately milled molding plate. Used for "v" rings, commutator insulation and formed parts, troughs, angles, tubes, bushings, slot insulation. Heating makes No. 101 flexible and pliable, so that it is readily molded; becomes rigid and firm upon cooling.	.015 .020 .025 .030	.035 .040 .050 1/16	18%	.020 up to .036" .036 up to .625"	± .002" ± .002"	± .003" ± .003"	500 350	390 250
111 INDIA MOLDING PLATE (NEMA 2) .079 lbs. per cu. in. Rough Milled or Unmilled Sheets 18 x 36"								
The same grade of MICABOND as No. 101 Plate except that it is not milled to accurate thickness, and consequently is lower in price.	.010 .015 .020	.025 .030 1/16	18%	Up to .015" .015 up to .063"	± .003" ± .005"	± .008"	500 350	390 250
102 INDIA SEGMENT PLATE (NEMA 3) .093 lbs. per cu. in. Unmilled Sheets 18 x 36"								
Segment plate must be held to close thickness tolerances, retain its dimensions under most exact operating conditions. No. 102 meets these requirements, has a special binder, a minimum of which insures complete adhesion. Under pressure and heat No. 102 will not ooze, slip or otherwise give trouble.	.015 .020 .025 .030	.035 .040 .050 1/16	7%	.020" and over	± .001"	± .002"	600	390
104 AMBER SEGMENT PLATE (NEMA 4) .093 lbs. per cu. in. Milled Sheets 18 x 36"								
Milled plate with uniform mechanical and electrical properties. Resistance to abrasion about equal to copper, eliminating the need of undercutting when used as commutator segments. Punches and saws readily, will not shatter or flake.	.015 .020 .025 .030	.035 .040 .050 1/16	7%	.020" and over	± .001"	± .002"	600	390
122 INDIA SEGMENT PLATE (NEMA 5) .093 lbs. per cu. in. Unmilled Sheets 18 x 36"								
The same grade of MICABOND as No. 102 Plate except that it is not milled to accurate thickness, and consequently is lower in price.	.010 .015 .020	.025 .030 1/16	7% 16%	Up to .062" .062" and over	± .007" ± .010"		450 325	300 225
55 FLEXIBLE PLATE (NEMA 6) Sheets 36 x 36" .073 lbs. per cu. in.								
Specially selected splittings of India Mica bonded with a special binder developed by C-D-F to achieve extreme flexibility at normal room temperatures. Stays flexible after long storage. Does not readily dry out, is not and will not become sticky.	.005 .010 .015 .020	.025 1/32 1/16	20% 20% 20%	.005 up to .010" .010 up to .020" .020" and over	+.003"/—.001" ± .003" ± .005"	+.007"/—.003" +.008"/—.005" +.010"/—.008"	525 350 300	350 250 200
106 INDIA HEATER PLATE (NEMA 7) Shellac Bond. Sheets 18 x 36", 36 x 36" .089 lbs. per cu. in.								
Withstands constant temperatures of 600° to 700° F. without losing insulating value. Its mechanical strength is lowered due to the binder being consumed on the first heating. Must be mechanically supported on both sides.	.010 .015 .020		4%	.010 up to .020"	± .003"		400	300
107 AMBER HEATER PLATE (NEMA 8) Shellac Bond. Sheets 18 x 36", 36 x 36"								
Greater heat resistance than No. 106 Plate. Withstands constant temperatures of from 700° to 800° F. Should be used whenever higher than ordinary temperatures are encountered. No. 107 must be mechanically supported on both sides.	.010 .015 .020		4%	.010 up to .020"	± .003"		400	300
12 MICABOND PAPER SHEETS (NEMA 11) .071 lbs. per cu. in. Sheets 36 x 36", Rolls 36" wide								
Layers of large India Mica splittings cemented together with a special pliable insulating compound and faced on both sides with insulating tissue paper. Material is suitable for hand wrapping or machine wrapping of coils or compensator bars at room temperatures.	.005 .008 .011 .015		....	.005 up to .009" .009" and over	± .002" ± .003"	+.005"/—.003" +.008"/—.005"	325 300	225 200
12 MICAFOLIUM SHEETS .071 lbs. per cu. in. Sheets 36 x 36", not available in rolls								
Layers of large India Mica splittings faced on one side with thin shellac coated paper. Micafolium is not flexible at room temperature and is usually applied by machine application as a hot coil wrapper.	.005 .008 .011 .015		....	.005 up to .009" .009" and over	± .002" ± .003"	+.005"/—.003" +.008"/—.005"	325 300	225 200
17 MICABOND FISH PAPER (NEMA 13) Sheets 36 x 36" .058 lbs. per cu. in.								
Layers of India Mica bonded with a flexible insulating cement faced on one side with tissue and on the other side with Diamond Insulation (Fish Paper). Provides a tough, high quality insulating wrapper.	.010 .012 .015 .020		....	.007 up to .021"	± .003"	+.008"/—.005"	300	200
10 MICABOND CLOTH (NEMA 16) .061 lbs. per cu. in. Sheets 36 x 36", Rolls 36" wide.								
Layers of large India splittings faced on one side with tissue and on the other side with a specially prepared cotton cloth. A flexible cement is used.	.008 .011 .014		....	Up to .010" .010 up to .016"	± .002" ± .003"	± .003" +.008"/—.005"	250 250	200 200
120 MICABOND & CELLOPHANE .069 lbs. per cu. in. Sheets 36 x 36", Rolls 36" wide		Length of Roll						
Layers of large India Mica splittings cemented together with a special flexible insulating compound and faced on both sides with .001 moisture-proof cellophane.	.005 .008 .010 .015 .020 .025 1/32 & over	100' 100' 50' 50' 50' 50' 50'	....	.005 up to .010" .010 up to .016"	± .002" ± .003"	+.005"/—.003" +.008"/—.005"	325 300	325 200

Making exactly what you want, when you want it, is a routine part of your C-D-F Micabond purchase. For a new source for mica, call on C-D-F's modernized Valparaiso, Indiana plant.

FOR HIGH HEAT APPLICATIONS

SILICONE TAPES

Silicone Varnished Fiberglas
Class H Electrical Insulation. Resistant up to 250°C. Low dielectric losses, little affected by moisture. High tensile strength. Tape consists of single ply of glass fabric treated with Silicone varnish.
Color: Natural, clear white to yellow

	Nominal Thickness "
GB - 108SV	.003, .004, .005
GB - 112SV	.005, .007
GB - 116SV	.007, .010, .012
GB - 125SV	.010, .012
GB - 126SV	.012
GB - 127SV and 128SV	.010, .012, .015
GB - 141SV	.015, .020
GB - 162SV	.025, .030

Silicone Rubber Fiberglas
Class H Electrical Insulation. Recommended for many applications where abrasion and mechanical abuse is encountered. Good thermal conductivity. Extreme flexibility, but is not equal to Silicone Varnished Fiberglas in dielectric strength, dielectric losses, tensile strength. Normally furnished fully cured. Made in three grades:
E=Electrical G=General Purpose for high temperature applications.
ME=For applications requiring good mechanical and electrical properties.
Colors: Red, white

	Nominal Thickness "
GB - 113SR	.005
GB - 112SR	.007
GB - 116SR	.010, .012
GB - 128SR	.012, .015
GB - 164SR	.030

Tape Widths: ¼" minimum to 1½" maximum in ⅛" increments—Tolerances ± 1/64".
Length: Continuous up to 25 or 36 yards, 1 or 2 pieces in each multiple.
Grade designation number refers to glass fabric cloth number — Normally, all fabrics are heat cleaned before coating.

TAPES OF TEFLON*

Uniform, high strength tapes of unsupported Teflon and supported Teflon impregnated fiberglas cloth. Both are unaffected by moisture or fluctuating high temperatures, exposure to oils and greases. Unsupported tapes have a high elongation value and a "plastic memory" that causes insulation to fit tightly when temperature rises. Supported tapes have greater mechanical strength, are available in greater range of widths. Either form may be used with automatic wrapping machines.

UNSUPPORTED TAPES Widths	Width Tolerance ±
¼ to ½"	1/64"
over ½ to 1"	1/32"
over 1 to 3"	3/64"
3 to 12"	1/16"

Standard thicknesses up to 1/16"

SUPPORTED TAPES Widths: ¼ to 38" Standard Thicknesses up to .010"

Thickness Range	Thickness Tolerances ± Unsupported	Supported
.002 to .005 inc.	.0005	.0005
over .005 to .008 inc.	.001	.001
over .008 to .010 inc.	.002	.001
over .010 to .015 inc.	.002	
over .015 to .025 inc.	.0025	
over .025 to 1/32" inc.	.003	
over 1/32" to 1/16" inc.	.004	

*du Pont trade mark.

YOUR CDF SALES ENGINEER PUTS FIVE PLANTS TO WORK FOR YOU

The sales engineer in your locality can give you more than order-taking service. He has been trained in our fabricating shops and laboratories to help you develop wider uses for modern insulating materials. He understands plastics machining and can either help you on the spot or get the best information direct from the factory. Get to know him well . . . for he can give you countless examples of substantial savings in time, materials and money when C-D-F handles the complete fabrication job, from raw material to finished component. C-D-F has the latest high speed equipment for machining laminated and molded plastics, fibre and mica specialties. Use these facilities. Hire these trained, available specialists. Let C-D-F, through your nearby sales engineer, help you get superior insulation quality and quantity production.

NEWARK, DELAWARE
The executive, sales and manufacturing center of C-D-F. Laminated Dilecto and Spiral Tubing are made here. Large fabricating shops handle numerous special orders for the electrical industry.

MARSHALLTON, DELAWARE
Vulcoid, an electrical insulating material of resin impregnated vulcanized fibre, is made here. A C-D-F subsidiary, the Haveg Corporation, also uses this plant to manufacture molded plastic corrosion-resistant equipment.

BRIDGEPORT, PENNSYLVANIA
Diamond Vulcanized Fibre is produced in this completely integrated plant which includes a paper mill, resin plant, molded gear department, and testing laboratories.

VALPARAISO, INDIANA
A large plant making Micabond tapes, sheets and special forms. Mica is a universal insulator against heat, and C-D-F leads in its manufacture. Dilecto and Spiral Tubing are both made and fabricated here.

SPARTANBURG, SOUTH CAROLINA
Sales and service center for the textile industry in the South, this warehouse stocks Celoron gear stock and receptacles made of Diamond Fibre.

Continental-Diamond Fibre Company

WHEN YOU NEED POTENTIOMETERS THAT HAVE

... GUARANTEED EXTREME ACCURACY
... HIGH RESOLUTION
... LOW TORQUE
... LOW NOISE LEVEL
... LONG SERVICE LIFE
... SMALL SIZE

... your best choice is

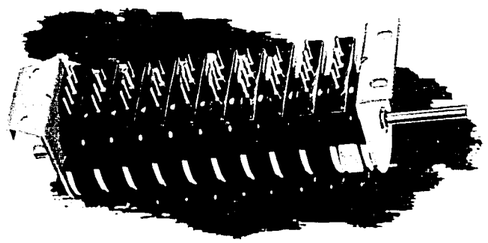
FAIRCHILD PRECISION POTENTIOMETERS

... and here's why

Products — Precision is literally designed and built into Fairchild Precision Potentiometers. Shaft, mounting plate, and housing are made to extremely close tolerances. Windings are custom-made by an exclusive technique.

Service — Each Fairchild Precision Potentiometer is custom-built with windings tailored to individual applications. Therefore, Fairchild engineers can help in solving many complex problems, and their recommendations are offered without obligation. Similarly, the services of the Fairchild Potentiometer Sample Laboratory are available at nominal cost.

Manufacturing Know-How — Fairchild originally made potentiometers for its own equipment because no units then available were satisfactory from the standpoint of precision. Present manufacturing practice is based on new knowledge gained since then, and constant refinement of this knowledge.



Experience — Over ten years of comprehensive experience in design, manufacture, and application are now behind Fairchild Precision Potentiometers. The first application was the Fairchild Computing Gunsight. Today's applications not only cover a wide range of military equipment, but extend to electrical computing systems for machine-tool controls, process controls, telemetering, and analog computers of all types.

SPECIFICATIONS OF FAIRCHILD PRECISION POTENTIOMETERS (Nominal Values)

	Type 736	Type 746	Type 756	Type 747	Type 748	Type D-C-P
Resistance Range, ohms						
Linear (standard), min.	680 ±5% a	680 ±5% a	800 ±5% a	1,800 ±5% a	2,250 ±5% a	2,250 ±5% a

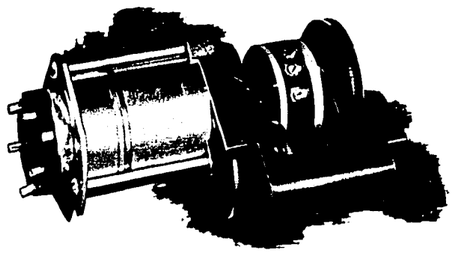
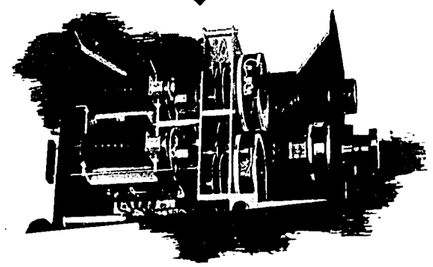
width, deg., max.	s	s	1.00 t	0.75 t	0.60 t	0.60 t
Ganging on Single Shaft, max.	5	20	20	10	10	—
Operating Ambient Temperature Range, deg. C	−55 to +71	−55 to +71	−55 to +71	−55 to +71	−55 to +71	−55 to +71
Service Life, cycles, max.	5,000,000 u	5,000,000 u	5,000,000 u	10,000,000 u	10,000,000 u	10,000,000 u
Dimensions, in.						
Diameter	1.899	1.750	1.750	2.093	3.093	3.093
Length (one cup), max.	0.795	0.800 ±0.009	0.800 ±0.009	1.156	1.156	1.219
Added Length Per Unit Ganged	0.609	0.580 ±0.002	0.580 ±0.002	0.594	0.594	—

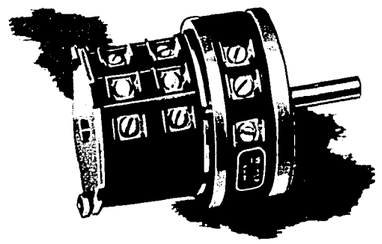
a Tolerance on both linearity and over-all resistance may vary or be improved, depending on resistance value required.
b Maximum resistance range will vary according to function. Tolerance on over-all resistance of non-linear windings is ±5%.
c Electrical function angles can be held to tolerance of ±1° by special order.
d No shorted section.
e Linearity up to ±0.30% on the higher resolution windings by special order.
f Linearity up to ±0.10% on the higher resolution windings by special order.
g Linearity up to ±0.05% on the higher resolution windings by special order.
h With maximum of 3:1 slope ratio in high resistance ranges.
i Centerless-ground stainless steel to 0.2500 in. (+0.0000, −0.0005).
j Machined to 0.5000 in. (+0.0000, −0.0005).
k Machined to 0.7500 in. (+0.0000, −0.0005).
m By adding dummy cup section, 19 taps can be provided.
n Two taps can be provided by slight design modification using terminal board clamp screw modified for wiper terminal.
p Two or more taps can be provided by slight design modification using additional boards. 13 taps can be provided by addition of terminal board sections.
q Depending on spacing requirements and without moving bridge or wiper terminal.
r No slip rings provided for taps, but within the cup 16 taps can be provided depending on spacing requirements and without moving the bridge or wiper terminal.
s One turn of wire.
t Varies with resolution.
u Life will be dependent upon specific potentiometer required.



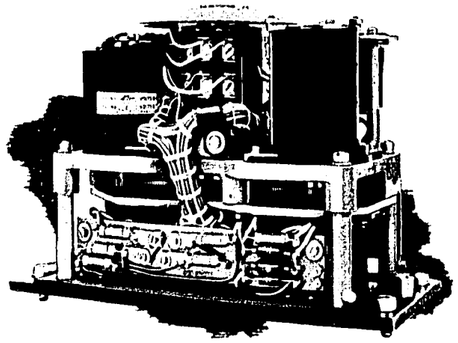
THESE SOLUTIONS TO PRECISION POTENTIOMETER PROBLEMS ARE TYPICAL OF FAIRCHILD'S PRODUCTS, SERVICE, AND KNOW-HOW



Quick and easy replacement of ganged precision potentiometers to simplify maintenance resulted in a series of packaged Fairchild plug-in units like this. Entire gang can be replaced in a few minutes because only end mounting plates are fastened down. No wires to disconnect or solder. Test points are provided on top of each potentiometer for quick checking.



Electrical accuracy of the Fairchild Precision Potentiometers in this radar control assembly must match the mechanical precision of the gears. All of the potentiometers are non-linear (single-cycle log) and, in addition to the 1% linearity tolerance, the units in each pair must track each other within a taper tolerance of 0.1 to 1.0%. This means that the potentiometers in each pair must be identical with each other almost turn-for-turn.

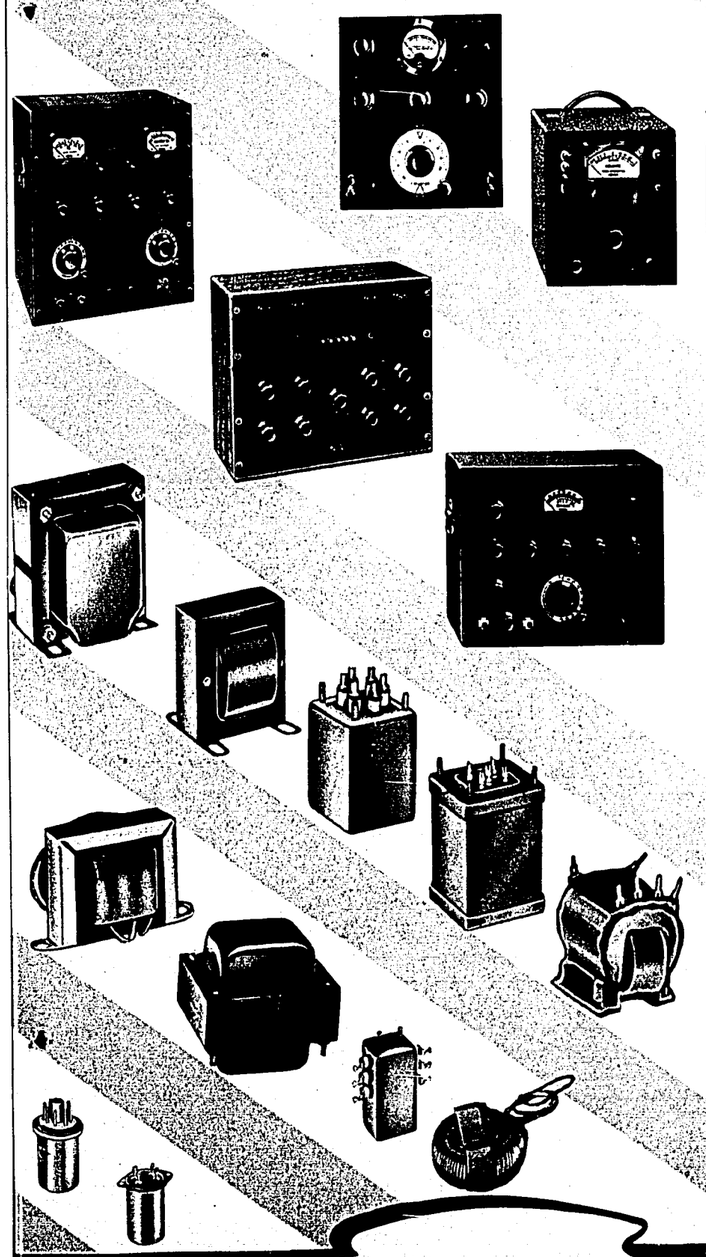


Low noise level, high resolution, extreme linearity, long life were the requirements that made engineers select the Fairchild Type 747 Precision Potentiometer for this computer assembly. These inherent qualities commonly result in the specification of Fairchild Precision Potentiometers for computer assemblies, calibration controls, servo mechanisms, and other instruments.

Accurate resetability in both the single-solution and integrating potentiometers was a prime consideration in this integrating computer application. Fairchild Precision Potentiometers can be accurately reset to any selected resistance or rotation angle, thereby eliminating hunting and carry-over errors.

Space saving and elimination of error accumulation resulted from ganging two Fairchild Type 736 non-linear potentiometers, specially wound to an empirical function, with a highly accurate Fairchild Type 747 linear unit on a common shaft.

Extremely high functional accuracy and mechanical precision that eliminates backlash and binding, which would cause serious errors in the computing system, are the principal reasons that Fairchild Precision Potentiometers were incorporated in this computer for a radar-gunfire control system.



• *FOR YOUR NEXT PRECISION POTENTIOMETER PROBLEM* be sure you have full information about Fairchild Precision Potentiometers and related services, including the Fairchild Potentiometer Sample Laboratory. You can get these details by writing today to *Potentiometer Division, Fairchild Camera and Instrument Corporation, Park Avenue, Hicksville, Long Island, New York, Department 140-38K.*

U-500 IMPEDANCES IN OHMS

50, 125, 200CT, 250, 330, 500CT
125 and 500 ohms can be used for 150 and 600 ohms

Modern high fidelity broadcasting and transcription apparatus require the utmost performance and reliability in the audio transformers used in their circuitry. The Freed "Quality Grade" audio transformers are wide band, high fidelity components featuring astatic construction, longitudinal balance, low harmonic distortion, uniform response, high efficiency, and constant impedance match throughout the audio frequency spectrum. Maximum neutralization of stray fields is accomplished by use of humbalanced coil structures and multiple alloy shielding. High fidelity is achieved on every tap of the universal impedance winding without line reflection or transverse coupling.
All Quality Grade Components are thoroughly impregnated in a special non-hygroscopic varnish, and fully encapsulated in a moisture proof, high melting point compound.

U-60 IMPEDANCES IN OHMS

HERMETICALLY SEALED PULSE TRANSFORMERS for use in blocking oscillators, low level interstage coupling, and modulator outputs. Made in accordance with MIL-T-27 specifications. These pulse transformers are designed for maximum power, efficiency and optimum pulse performance. Balanced coil structures permit series or parallel connection of windings for turn ratios other than unity. Pulse characteristics, voltages and impedance levels will depend upon interconnections made.

PROFESSIONAL MINIATURE AUDIO TRANSFORMERS

These high quality, miniature transformers feature hermetic sealing for maximum protection from moisture penetration with subsequent electrolysis and corrosion of fine wires. While primarily intended for non-military equipment, these units are constructed in a ccordance with MIL-T-27 Specifications.

FREED - PROFESSIONAL GRADE COMPONENTS

For popular priced high fidelity amplifiers, professional equipment and receivers, for home and public address service. Freed has developed this series of audio transformers using the latest design techniques and the best commercially available materials. Except for units carrying unbalanced direct current, the frequency response is better than ± 1DB from 30 to 15,000 cycles. All units feature excellent performance characteristics with minimum size and weight.

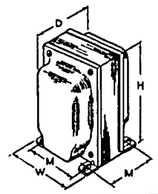
FREED - REPLACEMENT GRADE POWER TRANSFORMERS

The "Replacement Grade Components" are low price excellent efficiency transformers and reactors designed for radio, television, public address and low power amateur equipment.



Tapped audio transformers assure maximum impedance range together with optimum frequency response.

The performance characteristics of all filter reactors are given under full load conditions. Power transformers are conservatively designed for good regulation resulting in a temperature rise not exceeding 55°C.

All "Replacement Grade Components" feature low loss magnetic materials and vacuum impregnation for a moisture proof seal.

FREED TEST INSTRUMENTS

for QUALITY

LOW FREQUENCY "Q" INDICATOR

TYPE NO. 1030

USES

The Type 1030 Low Frequency "Q" Indicator measures directly the "Q" factor of coils. The instrument can also be used to measure the inductance of coils, distributed capacity, impedances, and dielectric losses. The "Q" Indicator can be used to study the magnetic properties of iron, such as stability of iron cores in function of applied voltages, and iron losses as a function of the frequency.

FEATURES

The main and essential feature of the instrument is that the "Q" factor is read directly without any complicated computations. The possibility of measuring "Q" through the whole audio and supersonic frequency range is provided. The setting up and the measuring of the "Q" of coils is practically instantaneous. The instrument is unaffected by line voltage variations, is entirely self-contained and A.C. operated. Both meters ("multiply-by" and "Q") are protected against overloads and cannot be burned out. The effective frequency range for "Q" measurements is 50 to 50,000 cycles. Due to the fact that the R.C. Oscillator frequency range is from 20 to 200,000 cycles, comparative "Q" Measurements can be made below 50 cycles and above 50,000 cycles. Since the "Q" factor appears as a relative quantity, i.e., a ratio of two voltages, the tracking of the two meters is such that a reasonably good accuracy of "Q" factors is obtained for frequencies above 50,000 cycles. The terminals of the variable decade condensers are available directly on the front panel of the instrument and can therefore be used as a high quality precision variable condenser. The R.C. Oscillator and variable impedance amplifier can be used as a separate low frequency generator with a maximum output power of five watts into a 50 ohm load. The "Q" scale is calibrated from 0 to 50. A high accuracy of measurement is obtained, since for any position of the multipliers, a total of "Q" variation from 0 to 50 is read on a 4 inch meter. "Q" factors of coils can be measured with up to 50 volts across the coil, and therefore makes it possible to determine the stability and the variations of the "Q" factor of coils in function of the applied voltage. The voltage fed into the series circuit is variable from 10 volts to 0.01 volt.

SPECIFICATIONS

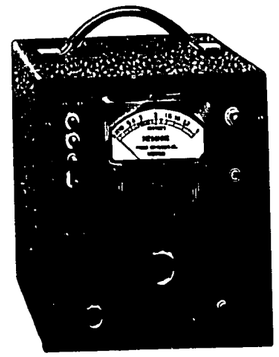
Range of "Q" Measurements: The range of "Q" factors is from 0.5 to 500 over the frequency range from 50 to 50,000 cycles. The accuracy of "Q" measurement is approximately 5% for frequencies up to 50,000 cycles.

Oscillator Frequency Range: Continuously variable from 20 to 200,000 cycles in four ranges.

Frequency Accuracy: 1% under normal temperature conditions. The frequency stability is better than 2% over a long period of time.

Output Impedance and Voltage: Four output impedances are available.

(a) 10 ohms impedance – 10 V Output Voltage
(b) 1 ohm impedance – 1 V Output Voltage
(c) 0.2 ohm impedance – 0.1 V Output Voltage
(d) 0.1 ohm impedance –0.01 V Output Voltage



Those Impedances are measured at 50,000 cy.

Variable Condenser: The variable condenser is composed of a 10 x 1 mf., 10 x 0.1 mf., 10 x 0.01 mf., 10 x 0.001 mf. decade condenser and a 0.001 mf. variable air condenser.

Power Supply: The instrument is entirely self-contained and A.C. operated. Total consumption 200 watts.

Dimension ..... 19¼" 14½" 23"
Weight .....120 lbs.

TYPE 1020-B MEGOHMMETER

USES: The Freed Type 1020-B Megohmmeter is a self contained and a-c operated instrument equally useful in the laboratory or for production testing of the leakage resistance of insulation materials, condensers, cables, motors and transformer windings.

FEATURES: Resistance values indicated directly on a four inch meter protected against over-load.

Rapid and safe to use, test voltage removed from terminals and capacitive component discharged to ground in all positions of multiplier switch. Low resistance in series with component under test provides very short charging time for even the very largest capacitors. Calibration position provided to check accuracy of 500 volts d-c potential. 500 volt test supply electronically regulated.

SPECIFICATIONS

Range: 1 megohm to 2,000,000 megohms in six overlapping ranges selected by a multiplier switch.

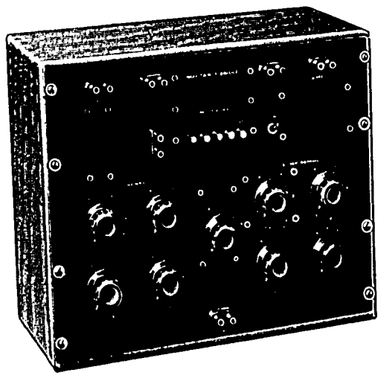
Accuracy: Plus or minus 3% on resistance values up to 100,000 megohms; plus or minus 5% from 100,000 to 2,000,000 megohms.

Voltages on Unknown: The voltage applied to the unknown terminals is 500 volts d-c and is independent (less than 1%) of the value of the unknown.

Stability: Line voltage variations from 105-125 volts will cause less than 2% variation in the meter reading.

Power Supply: 105-125 volts A.C. 50-60 cycles 30 watts.

Dimensions: 9½ x 10½ x 8 inches.



Net Weight: 18 pounds.

for PRECISION

FREED TEST INSTRUMENTS

for QUALITY

TYPE 1110-A INCREMENTAL INDUCTANCE BRIDGE

USES

The Incremental Inductance Bridge is designed for measuring the inductance of Iron Core components at any frequency up to 10,000 cycles. Inductors can be measured with a superimposed direct current, therefore, the bridge will measure the incremental inductance of coils. The bridge can be used for determination of storage factor, "Q", either at a given frequency in function of the applied voltage or at a given voltage in function of the applied frequency. The bridge can be used by the manufacturers of iron core components, such as filter chokes, high Q coils, and iron core audio and supersonic frequency components. Due to its very wide inductance range the instrument can be used as a general purpose laboratory inductance bridge.

SPECIFICATIONS

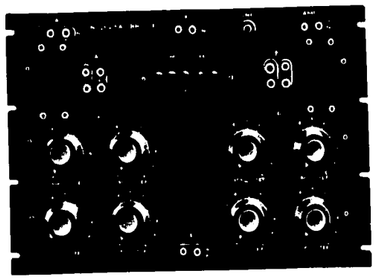
Inductance Ranges: One millihenry to one thousand henries in five ranges. Inductance values are read directly from a four dial decade and a multiplier switch. The last range may be extended to 10,000 henries through the use of an external resistance.

Conductance Ranges: One micromho to one mho in five ranges, read directly from a four dial decade and a multiplier switch. This conductance represents the reciprocal of the A.C. resistance of the coil.

"Q" Range: "Q" is measured as the product of Inductance (L) and Conductance (G). The range of "Q" measured on the bridge is 0.5 to 100. Measurement of inductance is independent of the values of "Q".

Accuracy: 1% through the frequency range from 60-1000 cycles 2% for frequencies from 1000 to 10,000 cycles. This accuracy is decreased for extreme positions of the multiplier. Conductance measurements 5% from 60-1000 cycles.

Frequency Range: The bridge is calibrated and adjusted at both 60 and 1000 cycles, but can be used at any frequency up to 10,000 cycles. Errors resulting from stray capacity increase with frequency. Coils having a high inductance should be measured at a low frequency to avoid resonance effect.



Range of Superimposed D.C.: On multiplier switch position L X 100, the D.C. is limited to 10ma.
On the position L X 10, the D.C. is limited to 250 ma.
On all other positions the D.C. can be one ampere maximum.

Mounting: The bridge is supplied in a walnut cabinet or on special order for standard rack mounting.

		W	H	D
Dimensions:	Rack:	19"	x 8"	x 14"
Dimensions:	Cabinet:	21"	x 8"	x 14 5/8"

Net Weight: Rack–37 lbs.; Cabinet–48 lbs.

TYPE 1150 UNIVERSAL BRIDGE

FEATURES

The Universal Bridge offers a variety of five possible bridge circuits. A wide range of capacitance, inductance, impedance, and phase angle measurement can be made throughout the frequency spectrum from 20 cycles to 20,000 cycles. By using decade resistors in the variable arms the unknown can be measured to four significant figures.

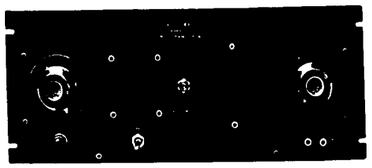
Operation is simple and both terminals and controls are arranged for convenience and ease of measurements.

SPECIFICATIONS

Frequency Range: The bridge can be used at frequencies from 20 cycles to 20,000 cycles.

Accuracy: All resistors of the bridge arms are adjusted to 0.1%. The absolute accuracy of measurement will depend upon the accuracy of standards used.

Inductance Range: The bridge will measure inductance of coils from 0.1 mh to 1000 henries with an accuracy of 0.5% at 1000 cycles.



Capacitance Range: Condensers from 0.001 mf to 1 mf can be measured to within 0.5% at 1000 cycles. Condensers below 0.001 mf should be measured by the substitution method.

Mounting: The bridge is supplied in a walnut cabinet or on special order for standard rack mounting.

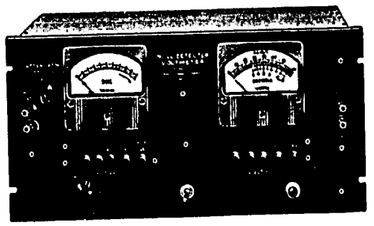
for QUALITY

TYPE NO. 1170 D.C. SUPPLY

USES

The Type 1170 Power Supply is intended to be used as a dependable source of direct current for the Incremental Inductance Bridge Type No. 1110A. The supply can also be used as a general laboratory substitute for a high voltage storage battery.



DESCRIPTION

The Type 1170 D.C. supply consists of an electronically regulated high voltage supply. Four independent control circuits provide four current ranges, namely 5 milliamperes, 25 milliamperes, 100 milliamperes and 500 milliamperes. The output current is indicated by a multirange 4" meter.

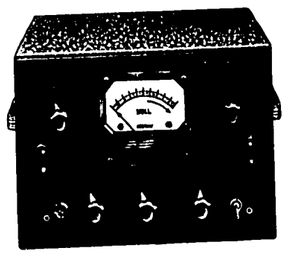
SPECIFICATIONS

Current Ranges: Four current ranges - 5-25-100 and 500 milliamperes.
Voltage Ranges: The maximum no load voltages corresponding to the four current ranges are the following: 500 MA – 270 volts, 100 MA – 270 volts, 25 MA – 55 volts, 5 MA – 25 volts. On both 500 MA and 100 MA range with the control set to zero, the output voltage is independent of the load.
Voltage Regulation: The unit operates from a 115 volts, 50-60 cycle line. For a line variation of plus or minus 10%, the output voltage shall not vary more than ± 1½%.
Power Consumption: Under 500 MA full load the power consumption is 360 watts. Under no load conditions the consumption is 150 watts.
Hum Level: On the 270 volt, 500 milliampere range the hum level under full load condition is 6 millivolts which corresponds to – 93 Db.
Mounting: The instrument is supplied for mounting on a 19 inch relay rack or for cabinet mounting.
Dimensions: Rack: 19"W. x 12 3/16" D. x 12¼"; Cabinet: 21½"W. x 15"D. x 14"H.
Net Weight: In Cabinet - 89 lbs Rack Mounted - 68 lbs.

NO. 1210 NULL DETECTOR AND VACUUM TUBE VOLTMETER

USES

The Type 1210 Null Detector and Vacuum Tube Voltmeter is primarily designed for bridge measurements. The Null Detector indicates the balance of the bridge, and the Vacuum Tube Voltmeter indicates the voltage across the unknown two terminal or four terminal network. The three selective circuits provide means for sharply tuning the instrument to audio frequencies commonly used for measurements. The Vacuum Tube Voltmeter can be used as a general purpose audio Vacuum Tube Voltmeter.



DESCRIPTION

The Type 1210 Null Detector and Vacuum Tube Voltmeter is a combination of the Model 1140A Null Detector Amplifier, and a modified model 1060 high input impedance Vacuum Tube Voltmeter. Both instruments are independent and feed two separate 4" meters.

SPECIFICATIONS

NULL DETECTOR
Input Impedance: 1 megohm in parallel with 25 mmf.
Frequency Response: 2 Db from 20 to 20,000 cycles – 5 Db at 50,000 cycles.
Null Detector Sensitivity: At 1000 cycles, 100 microvolts will give a 15% meter deflection.
Selective Amplifier: 23 Db second harmonic attenuation at 60 cycles, 400 cycles and 1000 cycles.
VACUUM TUBE VOLTMETER
Voltage Ranges: 0.01 volts to 100 volts in four ranges–(0.1–1–10–100 volts at ⅓ of scale.)
Accuracy: 2% of full scale on all four ranges.
Waveform Error: The instrument is a full wave average meter and is free of turnover effects. For small amounts of distortion the accuracy of the instrument is independent of the waveform.
Frequency Range: 20 cycles to 20,000 cycles (1 Db).
Input Impedance: Equivalent to 50 megohms resistance in parallel with a 15 mmf condenser.
Meter Scale: Voltage scale calibrated from 0 to 150. Decibel scale calibrated from–6Db to + 3Db.
Dimensions: Rack Mounting 19"x 9"x 11½".
Net Weight: 25 Lbs.

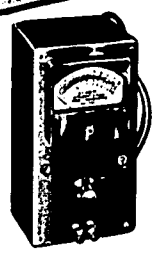
MODEL 1140A NULL DETECTOR-AMPLIFIER

USES

The Freed Model 1140A Null Detector Amplifier is a sensitive null indicator for bridge measurements, providing visual null indications or aural when used in conjunction with headphones. The unit may also be used as a high gain amplifier for general laboratory work.

DESCRIPTION

Functionally the instrument consists of a high gain linear amplifier with a 30 db. input attenuator in addition to the variable gain control. A four inch panel meter provides visual null indications, the response of the meter circuit is approximately logarithmic over a 40 db. voltage range. Resonant circuits tuned to 60, 400 and 1000 cycles limit the amplifier transmission characteristics to the three audio frequencies commonly used for bridge measurements.



SPECIFICATIONS

Input Impedance: 1 megohm in parallel with 25 mmf. GAIN: 98 db. with 1 megohm load (6 mmf. shunt capacity), down 1.5 db. at 25,000 cycles, down 5 db. at 50,000 cycles, down 2 db. at 20 cycles.
Null Detector Sensitivity: At 1 Kc. 100 microvolts will give a 15% meter deflection
Selective Amplifier: 23 db. second harmonic attenuation at 60, 400 and 1000 cycles.
Output Impedance: Approximately 50,000 ohms.
Output Voltage: 40 volts undistorted into 1 megohm load, 10 volts into 20,000 ohms.
Power Supply: 105-125 volts, 50-60 cycles, 35 watts consumption.
Mounting: This instrument can be supplied in cabinet model(Type No. 1140A) or in a standard relay rack mount with dust cover (Type No.1140AR)
Dimensions: (Type No. 1140A) 13½" x 8½" x 10" overall; (Type No.1140AR) 19"L. x7" W. x 9"D.
Weight: 24 lbs.

Helipo

Helipot — First in precision potentiometers

WHATEVER YOUR NEEDS in precision potentiometers, you know they will be met at Helipot. For the widest selection of types ... for the greatest choice of models ... for the largest number of in-stock items ... for the assurance of a precision potentiometer to meet your exact specifications ... come to Helipot ... first in precision potentiometers!

MULTI-TURN HELIPOTS Where highest accuracy and greatest resolution is required ... especially where space is limited ... a multi-turn potentiometer may be the answer. Helipot, originator of the helical potentiometer, makes multi-turn models in a variety of sizes and designs ... one for every purpose. Standard models are described in the following pages ... and as with *every* Helipot product, they may be modified to meet *your* specifications.

SINGLE-TURN HELIPOTS Where continuous rotation is needed, there is a single-turn Helipot to meet your requirements. In this type, too, Helipot offers a variety of sizes and designs ... one styled specifically for each use. See the following pages for characteristics of the several standard models ... and bear in mind that our large and expert engineering staff is always happy to work with you, whether your particular use requires an adaptation of a standard Helipot ... or an entirely new model.

NON-LINEAR HELIPOTS There is an increasing number of important applications for potentiometers which have non-linear (functional) characteristics. As with *every* Helipot product, we offer a variety of mounting arrangements ... and an almost unlimited number of non-linear functions may be reproduced. If your use requires a special empirical function ... or if it will be met by one of the more common trigonometric functions ... Helipot engineers can design the potentiometer best suited to your needs.

DUODIALS Helipot engineers have designed several models of multiple-turns-indicating Duodials ... for use not only with Helipots, but with *any* multi-turn device. Duodials add distinction to the finest instrument panels ... even more important, they provide the high degree of setting accuracy needed to complement the adjustment accuracy of the Helipot.

Naturally, the Helipot engineering staff is at your service [illegible] Helipot division is happy to [illegible] standard models to meet [illegible] or in adapting [illegible] to your particular requirements [illegible] in handling [illegible] new types to [illegible] your own special needs.

The various basic types of Helipots and Duodials are described in detail in the following pages ... note particularly the wide range of standard models which are carried in stock.

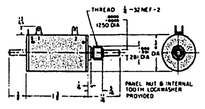
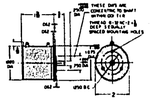
MULTI-TURN HELIPOTS



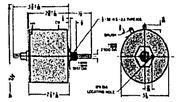
MODEL A SERIES

Successor to the first commercially manufactured helical potentiometer ... and still the one most widely used. A ten-turn unit of convenient size and compact design, offering resolution of twelve to fourteen times that of a single-turn unit of the same diameter. Threaded bushing mount.



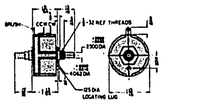
MODEL AJ SERIES

A miniature ten-turn unit ... no larger than a copper penny ... yet with a coil length of eighteen inches! Model AJ: threaded bushing mount. Model AJS: sleeve bearing servo mount. Model AJSP: ball bearing servo mount.



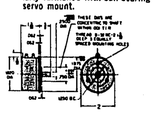
MODEL AN SERIES

Dimensionally similar to the Model A Series, but manufactured to such close tolerances that they have about a two-to-one advantage in linearity tolerance. Especially well suited to servo mechanism use ... regularly furnished with ball bearing servo mount.



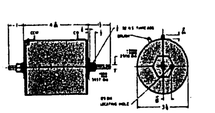
MODEL B SERIES

A larger diameter, 15-turn unit, offering the highest resolution and greatest adjustment accuracy available in a standard, mass-produced potentiometer. Model B: threaded bushing mount. Model BS: sleeve bearing servo mount. Model BSP: ball bearing servo mount.



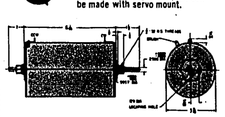
MODEL C SERIES

Generally similar to the Model A Series, but with only three helical turns of resistance wire. Especially suited to those applications requiring great accuracy, but where space behind the panel is limited.



MODEL CN SERIES

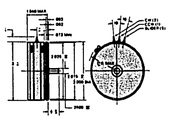
Dimensionally similar to the Model C Series, but manufactured to such close tolerances that they have about a two-to-one advantage in linearity tolerance. Especially well suited to servo mechanism use ... regularly furnished with ball bearing servo mount.



MODEL D SERIES

A larger diameter, 25-turn unit, affording extremely high resolution and accuracy. Usually furnished with threaded bushing mount, but can be made with servo mount.

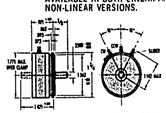
MODEL E SERIES



Generally similar to the Model D Series, but with 40 turns of resistance wire, affording even higher resolution and adjustment accuracy. Usually furnished with threaded bushing mount, but can be made with servo mount.

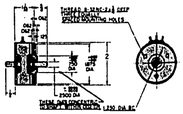
SINGLE-TURN HELIPOTS

MODEL L SERIES



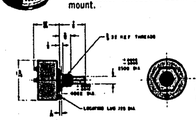
A continuous-rotation Helipot, three inches in diameter, offering high resolution, great versatility, and rugged construction. Model L: threaded bushing mount. Model LS: sleeve bearing servo mount. Model LSP: ball bearing servo mount.

MODEL Y SERIES



A continuous-rotation Helipot, only an inch and three-quarters in diameter, yet offering high resolution and great versatility. Model Y: threaded bushing mount. Model YS: sleeve bearing servo mount. Model YSP: ball bearing servo mount.

MODEL Y SERIES HELIPOTS ARE AVAILABLE IN BOTH LINEAR AND NON-LINEAR VERSIONS.



MODEL J SERIES

A continuous-rotation Helipot ... two inches in diameter ... the first mass-produced precision potentiometer with ball bearing servo mounting as a standard feature.

MODEL G SERIES

A continuous-rotation Helipot originally developed for aircraft servo mechanisms. A small, extra-rugged unit designed to "take it" even under adverse conditions. Threaded bushing mount.

Design details subject to change without notice. Certified drawings available upon request.

Helipot *First in precision potentiometers*

. . . originator of the helical potentiometer, Helipot is the largest organization devoted *exclusively* to the manufacture of precision potentiometers. Helipot leadership stems from advanced engineering . . . from insistence upon quality *first* . . . from careful testing and rigorous control . . . from engineering and production know-how developed over the years . . . from the application of mass-production techniques to the precision-manufacturing processes essential to the making of *accurate, rugged, versatile* precision potentiometers. Here are but a few of the reasons for Helipot pre-eminence:

Spot-Welded Connections. No pressure-type connections are used in *any* Helipot. Skilled workers accurately and *permanently* weld every electrical connection . . . using high-power microscopes and specially developed techniques.

High-Speed Coil Winding. Special machines quickly, accurately wind the carefully selected resistance wires which are the heart of every Helipot . . . at high speeds for maximum efficiency. This technique assures evenly spaced, permanently positioned winding for *every* Helipot.

Highest Quality Materials. Only the highest quality materials are used . . . the best *for the particular use.* Coil wires, resistance wires, housings, contacts, rotors . . . all are selected to insure long life and trouble-free performance.

Special Features. Helipot engineering makes it not only possible, but very practical, to take advantage of a number of special features. These include ganging several sections on a common shaft . . . spot-welding extra tap connections to *only a single turn* of the resistance wire, at almost any spot on the coil, with a high degree of accuracy . . . moisture and fungus-resisting treatment . . . rear-shaft extensions . . . and, of course, a wide choice of mounting styles.

DUODIALS— for every application

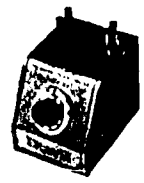
MODEL RA

This beautiful Duodial DeLuxe has an appearance and a "feel" that adds distinction to the finest instrument panels. Features novel "jump" outer dial; easy reading; positive shaft lock. Diameter 1-13/16". For use with ¼" diameter shafts. Available in 10:1 turns ratio only.

MODEL R

The standard Duodial, available in 10:1, 15:1, 25:1, 40:1 turns ratios, for use with the corresponding multi-turn Helipots. Diameter 2". For use with ¼" diameter shafts.

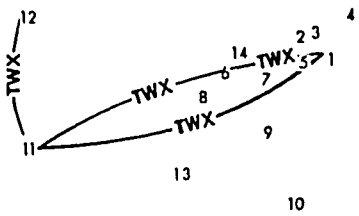
MODEL SR101



A miniature Duodial, for use with AJ Series Helipots. Polished aluminum dial with black numerals. Diameter 1-5/32". For use with ⅛" diameter shafts. Available in 10:1 turns ratio only.

MODEL W

A large Duodial, ideally suited for use as a primary control. Available in 10:1, 15:1, 25:1, 40:1 turns ratios, for use with the corresponding multi-turn Helipots. Diameter 4¾". For use with ¼" diameter shafts.



LABORATORY HELIPOT— **MODEL T-10A**

Combines a ten-turn Model A Helipot and a Model RA Duodial in a handsome walnut case. Three-way binding posts make it ideal for experiment or instruction . . . easy to set up or change . . . much faster to use than decade boxes . . . compact . . . rugged. Power rating 5 watts . . . Linearity tolerance ±0.1%. Carried in stock in 100, 500, 1K, 5K, 10K, 20K, 50K, and 100K ohms resistances.

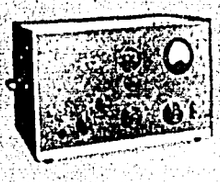
Oscillators, voltmeters, generators, analyzers, amplifiers—frequency counting, measuring and monitoring instruments, microwave coaxial or waveguide equipment—whatever your measuring needs, there's a precision-built *-hp-* instrument for the job. The *-hp-* line, world's most complete, includes over 200 tested and proved equipments for all types of measurement. Each gives you engineering economies of fast, accurate measurement, broad applicability, dependability, trouble-free service. Each has the traditional *-hp-* "family characteristics" of simple operation, minimum adjustment, independence of line voltage or tube changes, generous overload protection and highest quality design and construction. On these pages you'll find brief details of major *-hp-* instruments. For complete information, see your *-hp-* representative, or write factory direct.



Complete Coverage in Electronic Test Instrumentation

-hp- 200 SERIES AUDIO OSCILLATORS

Now four basic *-hp-* oscillators have been redesigned into two compact, lightweight instruments offering wider frequency range, more operating simplicity, highest accuracy and stability. New Models 200AB and 200CD replace Models 200A through 200D, retain the time-tested RC circuits that insure constant output, low distortion; require no zero set. In addition to these general test instruments, *-hp-* continues to offer Model 202D for sub-audio, audio, supersonic and carrier tests; and Model 200I, a spread-scale oscillator for interpolation or where frequency must be known precisely.

-hp- 650A TEST OSCILLATOR

Highly stable, wide band (10 cps to 10 mc) multi-purpose test oscillator for audio, supersonic, video, and rf measurements. Output variable 30 μv to 3 v. Frequency response flat ± 1 db. Output impedance 600 ohms, or 6 ohms with voltage divider. $475.00.

Instrument	Primary Uses	Frequency Range	Output	Price
-hp- 200AB	Audio tests	20 cps to 40 kc	1 watt/24.5 v	$120.00
-hp- 200CD	Audio, ultrasonic tests	5 cps to 600 kc	160 mw/20 v *	150.00
-hp- 200H	Carrier current, telephone tests	50 cps to 600 kc	10 mw/1 v	350.00
-hp- 200I	Interpolation and frequency measurements	6 cps to 6 kc	100 mw/10 v	225.00
-hp- 201B	High quality audio tests	20 cps to 20 kc	3 w 42.5 v	250.00
-hp- 202A	Low frequency measurements	01 cps to 1 kc	20 mw 10 v	460.00
-hp- 202B	Low frequency measurements	1 cps to 50 kc	100 mw 10 v	360.00
-hp- 202D	Low frequency measurements	2 cps to 70 kc	100 mw 10 v	275.00
-hp- 204A	Portable, battery operated	2 cps to 20 kc	2.5 mw/5 v	175.00

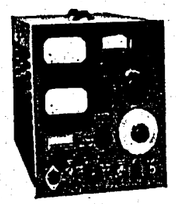
Precision-built -*hp*- instruments for every electronic measuring need

-*hp*- Vacuum Tube Voltmeters — 2 to 700,000,000 cps

-*hp*- 410B VACUUM TUBE VOLTMETER



Wide range, flat response ± 1 db, 20 cps to 700 mc. Convenient, simple to use, occupies minimum bench space. Handy compartment for probe and leads. Diode probe places approximately 1.5 μμfd capacity across circuit under test. This, plus high shunt impedance (10 megohms at low frequencies) means circuits under test are not disturbed, and true voltage readings are assured. Also measures dc voltage to 1,000 volts and resistances to 500 megohms. $245.00.

Instrument	Primary Uses	Frequency Range	Voltage Range	Input Impedance	Price
-*hp*- 400A	General purpose ac measurements	10 cps to 1 mc	.005 to 300 v 9 ranges	1 megohm 24 μμfd shunt	$185.00
-*hp*- 400B	Low frequency ac measurements	2 cps to 100 kc	.005 to 300 v 9 ranges	10 megohms 24 μμfd shunt	195.00
-*hp*- 400C	Wide range ac measurements. High sensitivity	20 cps to 2 mc	.0001 to 300 v 12 ranges	10 megohms 15 μμfd shunt	200.00
-*hp*- 404A	Portable, battery operated	2 cps to 50 kc	.0005 to 300 v 11 ranges	10 megohms 20 μμfd shunt	185.00
-*hp*- 410B	Audio, rf, VHF measurements; dc voltages; resistances	20 cps to 700 mc	.1 to 300 v 7 ranges	10 megohms 1.5 μμfd shunt	245.00

-*hp*- Voltmeter Accessories (not listed) include voltage dividers, connectors, shunts and multipliers to extend the useful range of your equipment.

-*hp*- Signal Generators — 10 to 10,800 mc

-*hp*- 612A SIGNAL GENERATOR

450 to 1,200 mc. Master oscillator-power amplifier generator for UHF-TV measurements including gain, selectivity, sensitivity, image rejection. Directly set and read; no charts, no interpolation. Low incidental fm, high-quality broad band video modulation to 5 mc. May be modulated internally or externally, amplitude modulated or pulse modulated. (Good rf pulses 0.2 μsec or longer.) $1,200.00.

Instrument	Frequency Range	Characteristics	Price
-*hp*- 608A	10 to 500 mc	Output 0.1 μv to 1 v into 50 ohm load. Pulse or CW modulation. Direct calibration.	$ 850.00
-*hp*- 610B	450 to 1,200 mc	Output 0.1 μv to 0.1 v into 50 ohm load. Pulse, CW or Square wave modulation. Direct calibration.	925.00
-*hp*- 612A	450 to 1,200 mc	Output 0.1 μv to 0.5 v into 50 ohm load. Pulse, CW or amplitude modulation to 5 mc. Direct calibration.	1,200.00
-*hp*- 614A	800 to 2,100 mc	Output 0.1 μv to 0.223 v into 50 ohm load. Pulse, CW or FM modulation. Direct calibration.	1,950.00
-*hp*- 616A	1,800 to 4,000 mc	Output 0.1 μv to 0.223 v into 50 ohm load. Pulse, CW or FM modulation. Direct calibration.	1,950.00
-*hp*- 618B	3,800 to 7,600 mc	Output 0.1 μv to 0.223 v into 50 ohm load. Pulse, CW, FM or Square wave modulation. Direct calibration	2,250.00
-*hp*- 620A	7,000 to 10,800 mc	Output 0.1 μv to 0.071 v into 50 ohm load. Pulse, CW, FM or Square wave modulation. Direct calibration.	2,250.00
-*hp*- 623B	5,925 to 7,725 mc	Output 70 μv to 0.223 v into 50 ohm load. FM or Square wave modulation. Separate power meter and wave meter section.	1,750.00
-*hp*- 624B	8,500 to 10,000 mc	Output 3.0 μv to 0.223 v into 50 ohm load. Pulse, FM or Square wave modulation. Separate power meter and wave meter section.	2,250.00

-*hp*- Distortion, Wave Form Analyzers — 20 cps to 20 kc

-*hp*- 330B DISTORTION ANALYZER

Measures distortion as low as 0.1% at any frequency, 20 cps to 20 kc. Measures noise voltages as low as 100 μv. High sensitivity, high stability, broad applicability for broadcast, laboratory or production problems. Wide band 20 db gain input amplifier. Built-in vacuum tube voltmeter usable separately. $395.00.

FM, AM-FM MODELS

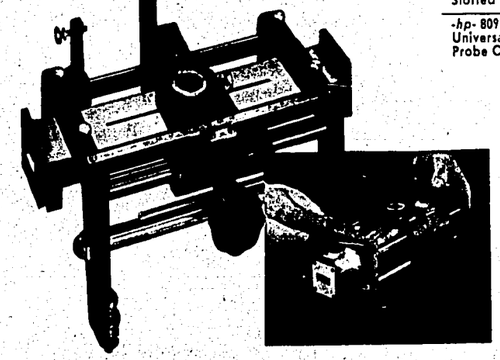
-*hp*- *330C*, for FM broadcasters, includes VU meter meeting F.C.C. requirements. -*hp*- *330D*, for AM-FM broadcasters, includes AM detector to rectify AM carrier, plus VU meter employed in model 330C. Model 330C, $425.00. Model 330D, $440.00.

Instrument	Primary Uses	Frequency Range	Characteristics	Price
-*hp*- 300A	Wave form analyzer	30 cps to 16 kc	Variable selectivity; measuring range 1 mv to 500 v	$625.00
-*hp*- 320A	Measures total distortion	400 cps and 5 kc	Requires external detector	75.00
-*hp*- 320B	Measures total distortion	50, 100, 400 cps, 1, 5 and 7.5 kc	Same as above	150.00
-*hp*- 330B	Measures total audio distortion	20 cps to 20 kc	Includes input amplifier, VTVM	395.00
-*hp*- 330C	For FM broadcast measurements	20 cps to 20 kc	Special VU meter to meet F.C.C. requirements	425.00
-*hp*- 330D	For AM-FM broadcast measurements	20 cps to 20 kc	AM detector and VU meter to meet F.C.C. requirements	440.00
SQUARE WAVE GENERATOR				
-*hp*- 210A	Transient and frequency response	20 cps to 10 kc	Output 50 v peak-to-peak 1,000 ohm impedance	150.00

Data subject to change without notice. Prices f.o.b. factory.

Microwave test instruments for coaxial & waveguide systems

-*hp*- 430B MICROWAVE POWER METER



No computations! Provides instantaneous, automatic power readings *direct* in db or mw at all frequencies for which there are suitable bolometer mounts. For CW measurements, uses either 1/100 amp. fuse or Sperry 821 barretter. Also measures CW or pulsed power with negative coefficient thermistor. Operates with -*hp*- 475B or 476A Bolometer Mounts; also 485B Detector Mounts. $250.00.

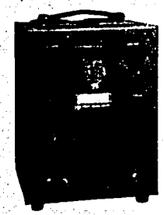
-*hp*- 803A VHF BRIDGE

Gives fast, direct readings of any impedance between 50 and 500 mc. Measures by sampling electric and magnetic fields in transmission line. Usable for comparative measurements 5 to 700 mc. Impedance range 2 to 2,000 ohms. Phase angle —90° to +90°, at 52 mc and above. Also measures SWR, % reflected power, VHF system flatness. $495.00.

Instrument	Primary Uses	Frequency Range	Characteristics	Price
-*hp*- 360A-D Low Pass Filters	Eliminates harmonic voltages from UHF systems	Cutoff frequencies A-700 mc. B-1,200 mc. C-2,200 mc. D-4,100 mc.	50 db rejection at 1.2 cutoff freq.	$ 50.00
-*hp*- 415A Standing Wave Indicator	VSWR indicator or null indicator	300 to 2,000 cps. Normal freq. 1,000 cps	0 to 60 db attn. Max. sensitivity 0.3 μv	200.00
-*hp*- 417A VHF Detector	VHF bridge detector (for -*hp*- 803A)	10 to 500 mc	Approx. 5 μv sensitivity	200.00
-*hp*- 430B Microwave Power Meter	Measurement of rf power	Depends on Bolometer mount	.01 to 10 mw ± 5% accuracy	250.00
-*hp*- 475B Tunable Bolometer Mount	Measurement of rf power (with 430B)	1,000 to 4,000 mc	Matches 50-ohm line to 100 or 200 ohms	200.00
-*hp*- 476A Universal Bolometer Mount	Measurement of rf power (with 430B)	10 to 1,000 mc	No tuning required VSWR less than 1.25	125.00
-*hp*- 803A VHF Bridge	Measurement of VHF impedance, VSWR	50 to 500 mc	2 to 2,000 ohms impedance — 90° to + 90° phase angle	495.00
-*hp*- 805A Coaxial Slotted Section	Measurement of VSWR	500 to 4,000 mc	For Type N Connectors, flexible cables	475.00
-*hp*- 805B Coaxial Slotted Section	Same as above	Same as above	For rigid ⅞" RG44/U line	475.00
-*hp*- 806B Coaxial Slotted Section	Same as above (Mounts in 809B)	3,000 to 12,000 mc	For Type N Connectors, flexible cables	200.00
-*hp*- 809B Universal Probe Carriage	Supports 806B section, also G, J, H, X and P 810 Waveguide sections		Accepts 442B and 444A probes	160.00

-*hp*- 809B UNIVERSAL PROBE CARRIAGE
-*hp*- 810 WAVEGUIDE SLOTTED SECTIONS

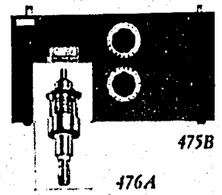
Convenient, all-purpose -*hp*- 809B carriage operates with six different -*hp*- slotted sections, waveguide and coaxial. Mounts sections covering frequencies 3,000 to 18,000 mc—*sections interchange in 30 seconds!* Precision-built carriage calibrated in mm to 0.1 mm; dial gauge may be mounted. Operates with -*hp*- 442B Broad Band Probe and -*hp*- 440A Coaxial Detector in combination; or with -*hp*- 444A Untuned Probe. (See preceding page for probe details.) -*hp*- 809B, $160.00.



-*hp*- *810A/B Slotted Sections.* -*hp*- *810B*, for mounting in 809B carriage, is a flanged waveguide section with accurately machined slot tapered at ends to minimize reflection. Available in 5 waveguide bands, 3.95 thru 18.0 kmc. -*hp*- *S810A*, complete slotted section assembly including probe carriage. Available for 2.6 to 3.95 kmc band only. (See table on preceding page for data, prices.)

-*hp*- 805A/B COAXIAL SLOTTED SECTION

Range 500 to 4,000 mc. High accuracy, high stability, negligible slope, minimum leakage. Exclusive parallel plane design, VSWR of basic section and connectors, 1.04. -*hp*- *805A*, 50 ohms, Type N coax-connector. -*hp*- *805B*, 46.3 ohms, for ⅞" rigid transmission lines. $475.00.



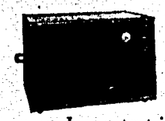
-*hp*- *806B Coaxial Slotted Section*, 3,000 to 12,000 mc. For use with -*hp*- 809B carriage. Section and connector VSWR 1.04 to 8,000 mc. 50 ohm impedance, negligible slope. Type N connectors, $200.00.

-*hp*- *417A VHF Detector* for use with 803A Bridge; or general laboratory use. Super-regenerative receiver, 10 to 500 mc. 5 bands. Approx. 5 μv sensitivity over entire band. Direct reading frequency control, thoroughly shielded. $200.00.

-*hp*- *415A Standing Wave Indicator* for all waveguide or coaxial slotted sections. Gives direct readings in VSWR or db. Single frequency operation; 300 to 2,000 cps. Low noise level, 0.3 μv sensitivity, 60 db calib. attenuator. $200.00.

-*hp*- *476A Universal Bolometer Mount* measures rf power 10 to 1,000 mc. No tuning or adjustment. VSWR less than 1.15, 20 to 500 mc; 1.25, 10 to 1,000 mc. $125.00. -*hp*- *475B Tunable Mount*, continuous 1,000 to 4,000 mc. $200.00.

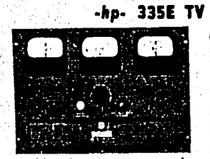
Data subject to change without notice. Prices f.o.b. factory.



Instruments for Complete Coverage

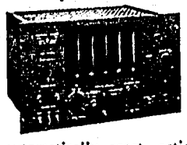
HEWLETT-PACKARD COMPANY

electronic measuring need. See your -hp- representative or write direct for details



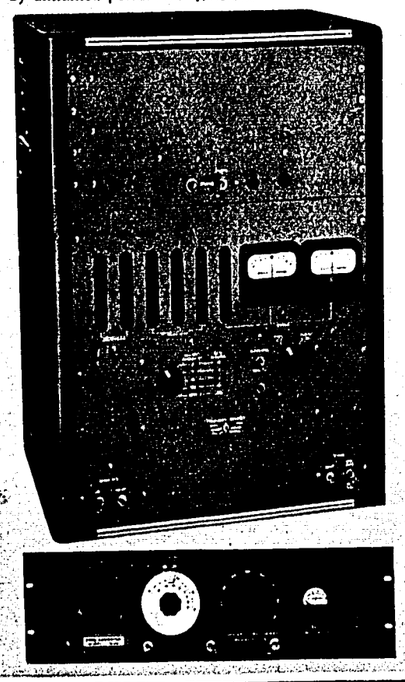
-hp- Frequency Measuring and Monitoring Equipment

-hp- 100D SECONDARY FREQUENCY STANDARD



Swift, sure frequency comparison, new convenience in standardizing with minimum external equipment. 100 μsec time markers, built-in oscilloscope, sine or rectangular waves. Low output impedance; short-time stability 1/1,000,000. Performs most functions of expensive primary standards in audio, rf or supersonic ranges. $600.00.

-hp- 335E TV MONITOR



Channels 2 through 83. Exceeds F.C.C. requirements. Compact, only 12¼" high, rack mounted. Low cost, all purpose, for visual and aural frequency monitoring, percentage aural modulation. Long-term dependability, precise accuracy, highest stability, no adjustment during operation. Forced ventilation, remote indication features. $1,950.00.

-hp- 522B ELECTRONIC COUNTER

Compact, low cost, versatile instrument for frequency, period *or* time measurements. Range 10 cps to 100 kc. Reads direct in cps, kc, seconds or milliseconds. Count automatically reset, action repetitive. Stability of time base 5/1,000,000. Display length variable. Automatic illuminated decimal. Performs all functions without extra-cost modification. Easily used by untrained personnel. $900.00.

Instrument	Primary Uses	Frequency Range	Characteristics	Price
-hp- 100C Secondary Standard	Audio, supersonic calibration	100 kc, 10 kc, 1 kc, 100 cps	Accurate within ± .001% Sine waves only	$ 450.00
-hp- 100D Secondary Standard	Frequency, time measurements	100 kc, 10 kc, 1 kc, 100 cps, 10 cps	Stability 1/1,000,000 (short-time) Sine or rectangular output. Marker pips	600.00
-hp- 335B Frequency Monitor	FM broadcast station monitor	88 to 108 mc	Frequency deviation ± 3 kc; accuracy ± .001%; modulation 0 to 100 kc	935.00
-hp- 335E TV Monitor	TV visual, aural and % mod. monitor	Channels 2 through 83	Indicates visual, aural carrier frequency deviation, % modulation aural carrier	1,950.00
-hp- 500A Frequency Meter	Rapid frequency measurements	10 cps to 50 kc	10 ranges ± 2% accuracy. Input 0.5 to 200 volts	210.00
-hp- 505A Electronic Tachometer	Measurements of high speed machinery	600 to 3,000,000 rpm	10 ranges ± 2% accuracy	300.00
-hp- 505B Electronic Tachometer	Same as 505A	10 to 50,000 rps	Same as 505A except calibrated in rps	300.00
-hp- 510A Mixer	Measure frequency continuously with -hp- 500A and 100 D/C	20 cps to 200,000 cps	Mixes two frequencies, delivers difference to -hp- 500A	200.00
-hp- 512A Frequency Converter	Extends -hp- 524A range to 100 mc	100 kc to 100 mc	Fast, direct readings of signals to 100 mc with 524A. No charts, interpolation. Min. input 0.01 v	350.00
-hp- 520A Decade Scaler	For counting high-rate pulses	Capacity 100 counts in 2 decades. 10,000,000 pps counting rate	100:1 divider for operation of low speed scalers	600.00
-hp- 522A Electronic Counter	Wide-range frequency, period measurements	10 cps to 100 kc	Frequency measuring gate time is 1 sec. or multiples; standard frequency counted for period measurement 100 kc	775.00
-hp- 522B Electronic Counter	Wide-range frequency, period, time interval measurements	10 cps to 100 kc	Measures rate of occurrences 0.00001 to 100,000/sec.; time interval 10 μsec to 27.8 hrs.; periods of frequency count 1/1,000, 1/100, 1/10, 1, 10 sec. and multiples. Direct readings in cps, kc, sec. and millisec.	900.00
-hp- 524A Frequency Counter	Frequency, interval, time measurements	.01 cps to 10 mc	Direct reading, no interpolation, accuracy about 2/1,000,000/week	2,000.00

Frequency measurement 0.01 cps to 100 mc . . . no computations or complex setups; usable by anyone!

-hp- 524A Frequency Counter. Measures instantly, automatically; presents results directly—determines any frequency 0.01 cps to 10 mc. Time of count 1/1,000, 1/100, 1/10, 1 or 10 seconds. Accuracy of measurement 2/1,000,000/week. For low frequency work, measures duration one cycle in μsec, based on 10 cycle sample. Accuracy 0.03%. External standards usable if desired. Min. voltage of unknown, 1 v peak. Simple operation, easily used by untrained personnel. $2,000.00.

-hp- 512A Frequency Converter. Operates with 524A Frequency Counter to extend counter's range from 10 mc to 100 mc. Makes possible fast, direct readings to 100 mc without interpolation, charts. Eliminates time-consuming setups, costly extra equipment. Operates *only* on 0.01 v input. Fundamental accuracy of -hp- 524A is maintained. $350.00.

Data subject to change without notice. Prices f.o.b. factory.

-hp- Waveguide Test Equipment — 2.6 to 18 kmc

Basic, low-cost elements offer utmost flexibility for assembly of exact instrumentation required. Each unit covers entire range of its waveguide size. Simple, sturdy mechanical design; accurate, multi-purpose operation.

Instrument	Coaxial Type N. Conn.	"S" 3" x 1½" 2.6–3.95 kmc.	"G" 2" x 1" 3.95–5.85 kmc.	"J" 1½" x ¾" 5.85–8.2 kmc.	"H" 1¼" x ⅝" 7.05–10.0 kmc.	"X" 1" x ½" 8.2–12.4 kmc.	"P" .702" x .391" 12.4–18.0 kmc.

†For use with bolometer or crystal. ‡For use with bolometer only. *Complete assembly including carriage. §Mounts in 809B Carriage—See next page.

Equipment below available for most waveguide bands. Table above shows data, prices.

-hp- 281A WAVEGUIDE-COAX ADAPTERS

For convenient transition between waveguide and coax systems. Each unit covers a full waveguide range with VSWR less than 1.25. Equipped with Type N connectors.

-hp- 750 CROSS-GUIDE COUPLERS

Directional couplers offered in 2 models with coupling factors of 20 or 30 db ± 1.5 db over full range of a waveguide. VSWR less than 1.15; directivity approx. 20 db. Available as a 4-terminal network.

-hp- 485B DETECTOR MOUNTS

To measure power over complete waveguide range in conjunction with -hp- 430B Power Meter and barretter. Also measures relative level, or detects rf energy using 1N21 or 1N23 crystal. Semi-tuned by movable short to VSWR 1.25.

-hp- X382A PRECISION ATTENUATOR

Precision broad band attenuation to 50 db. Completely independent of frequency; phase shift constant all attenuations. Calibrated range 0 to 50 db, maximum error ± 2% of db reading. Range 8,200 to 12,400 mc. VSWR less than 1.15 full range. Radical new design with rotating attenuator films.

-hp- 870A SLIDE SCREW TUNERS

For flattening waveguide systems. The position and penetration of a probe is adjusted to set up a VSWR which is used to cancel existing VSWR in system. VSWR values up to 20 can be corrected with accuracy of 1.02 VSWR.

-hp- 444A UNTUNED PROBE

A 1N26 crystal plus small antenna in a convenient, easy-to-use housing. Variable penetration depth, no tuning required. Sensitivity equal to single- or double-tuned probes. Frequency range: 2.6 to 18.0 kmc. Mounts in 809B Carriage. (See next page for carriage details.)

-hp- 375A FLAP ATTENUATORS

Simplifies adjusting power level in waveguide. Attenuation is quickly adjustable 0 thru 20 db. Approximate calibration. VSWR less than 1.15 over attenuation range. No leakage.

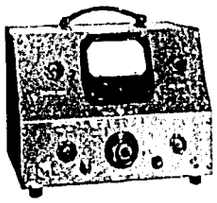
-hp- 752 MULTI-HOLE COUPLER

Directional couplers available in 2 models with coupling factors of 10 and 20 db ± 0.7 db over full range of a waveguide. VSWR better than 1.05. Directivity 40 db or better over entire range. Available as a 3-terminal network.

-hp- 914A MOVING LOAD

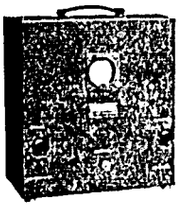
Low-reflection load covering full frequency range of guide. Load position variable at least ½ wavelength to reverse phase of reflection so that small residual reflections can be evaluated. Coefficient of reflection less than ½%.

Data subject to change without notice. Prices f.o.b. factory.



HEWLETT-PACKARD COMPANY

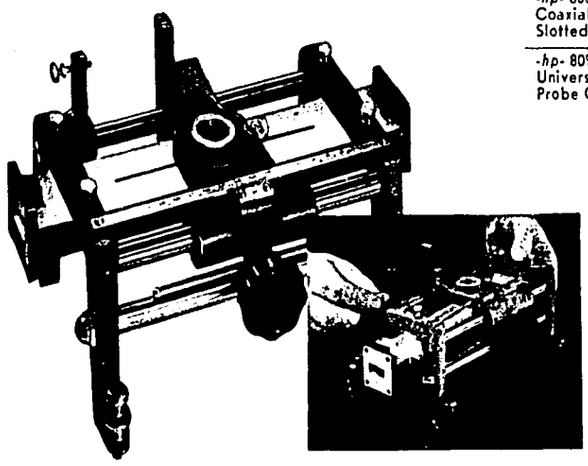
Instruments for Complete Coverage



electronic measuring need

Microwave test instruments for coaxial & waveguide systems

-hp- 430B MICROWAVE POWER METER



No computations! Provides instantaneous, automatic power readings *direct* in db or mw at all frequencies for which there are suitable bolometer mounts. For CW measurements, uses either 1/100 amp. fuse or Sperry 821 barretter. Also measures CW or pulsed power with negative coefficient thermistor. Operates with *-hp-* 475B or 476A Bolometer Mounts; also 485B Detector Mounts. $250.00.

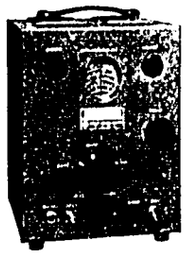
-hp- 803A VHF BRIDGE

Gives fast, direct readings of any impedance between 50 and 500 mc. Measures by sampling electric and magnetic fields in transmission line. Usable for comparative measurements 5 to 700 mc. Impedance range 2 to 2,000 ohms. Phase angle —90° to +90°, at 52 mc and above. Also measures SWR, % reflected power, VHF system flatness. $495.00.

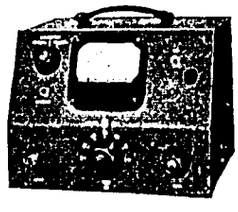
Instrument	Primary Uses	Frequency Range	Characteristics	Price
-hp- 360A-D Low Pass Filters	Eliminates harmonic voltages from UHF systems	Cutoff frequencies A-700 mc. B-1,200 mc. C-2,200 mc. D-4,100 mc.	50 db rejection at 1.2 cutoff freq.	$ 50.00
-hp- 415A Standing Wave Indicator	VSWR indicator or null indicator	300 to 2,000 cps. Normal freq. 1,000 cps	0 to 60 db attn. Max. sensitivity 0.3 μv	200.00
-hp- 417A VHF Detector	VHF bridge detector (for -hp- 803A)	10 to 500 mc	Approx. 5 μv sensitivity	200.00
-hp- 430B Microwave Power Meter	Measurement of rf power	Depends on Bolometer mount	.01 to 10 mw ± 5% accuracy	250.00
-hp- 475B Tunable Bolometer Mount	Measurement of rf power (with 430B)	1,000 to 4,000 mc	Matches 50-ohm line to 100 or 200 ohms	200.00
-hp- 476A Universal Bolometer Mount	Measurement of rf power (with 430B)	10 to 1,000 mc	No tuning required VSWR less than 1.25	125.00
-hp- 803A VHF Bridge	Measurement of VHF impedance, VSWR	50 to 500 mc	2 to 2,000 ohms impedance — 90° to + 90° phase angle	495.00
-hp- 805A Coaxial Slotted Section	Measurement of VSWR	500 to 4,000 mc	For Type N Connectors, flexible cables	475.00
-hp- 805B Coaxial Slotted Section	Same as above	Same as above	For rigid ⅞" RG44/U line	475.00
-hp- 806B Coaxial Slotted Section	Same as above (Mounts in 809B)	3,000 to 12,000 mc	For Type N Connectors, flexible cables	200.00
-hp- 809B Universal Probe Carriage	Supports 806B section, also G, J, H, X and P 810 Waveguide sections		Accepts 442B and 444A probes	160.00

-hp- 809B UNIVERSAL PROBE CARRIAGE
-hp- 810 WAVEGUIDE SLOTTED SECTIONS

Convenient, all-purpose *-hp-* 809B carriage operates with six different *-hp-* slotted sections, waveguide and coaxial. Mounts sections covering frequencies 3,000 to 18,000 mc—*sections interchange in 30 seconds!* Precision-built carriage calibrated in mm to 0.1 mm; dial gauge may be mounted. Operates with *-hp-* 442B Broad Band Probe and *-hp-* 440A Coaxial Detector in combination; or with *-hp-* 444A Untuned Probe. (See preceding page for probe details.) *-hp-* 809B, $160.00.

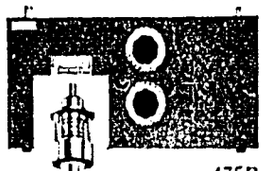


-hp- 810A/B Slotted Sections. -hp- 810B, for mounting in 809B carriage, is a flanged waveguide section with accurately machined slot tapered at ends to minimize reflection. Available in 5 waveguide bands, 3.95 thru 18.0 kmc. *-hp- S810A,* complete slotted section assembly including probe carriage. Available for 2.6 to 3.95 kmc band only. (See table on preceding page for data, prices.)



-hp- 805A/B COAXIAL SLOTTED SECTION

Range 500 to 4,000 mc. High accuracy, high stability, negligible slope, minimum leakage. Exclusive parallel plane design, VSWR of basic section and connectors, 1.04. *-hp- 805A,* 50 ohms, Type N coax-connector. *-hp- 805B,* 46.3 ohms, for ⅞" rigid transmission lines. $475.00.



-hp- 806B Coaxial Slotted Section, 3,000 to 12,000 mc. For use with *-hp-* 809B carriage. Section and connector VSWR 1.04 to 8,000 mc. 50 ohm impedance, negligible slope. Type N connectors, $200.00.

-hp- 417A VHF Detector for use with 803A Bridge; or general laboratory use. Super-regenerative receiver, 10 to 500 mc. 5 bands. Approx. 5 μv sensitivity over entire band. Direct reading frequency control, thoroughly shielded. $200.00.

-hp- 415A Standing Wave Indicator for all waveguide or coaxial slotted sections. Gives direct readings in VSWR or db. Single frequency operation; 300 to 2,000 cps. Low noise level, 0.3 μv sensitivity, 60 db calib. attenuator. $200.00.

475B

476A

-hp- 476A Universal Bolometer Mount measures rf power 10 to 1,000 mc. No tuning or adjustment. VSWR less than 1.15, 20 to 500 mc; 1.25, 10 to 1,000 mc. $125.00. *-hp- 475B Tunable Mount,* continuous 1,000 to 4,000 mc. $200.00.

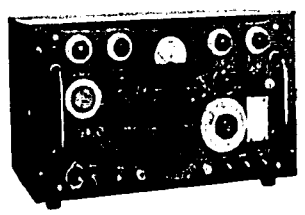
Data subject to change without notice. Prices f.o.b. factory.

HEWLETT-PACKARD COMPANY

ELECTRONIC TEST INSTRUMENTS

Other -*hp*- precision instruments

-*hp*- POWER SUPPLIES



-hp- 715A (illustrated) is a versatile source of regulated beam and reflector voltage for operating most test bench klystron tubes. Beam voltage 250 to 400 v; reflector voltage 0 to 900 v; 6.3 v filament. Internal, 1,000 cps square wave modulation, also 60 cps fm modulation, both on reflector voltage. $300.00.

-hp- 710A—Highly stable regulated dc supply, output variable 180 to 360 v at 75 ma, 6.3 v filament. Either terminal may be grounded. Total hum and noise less than 5 mv. $85.00.

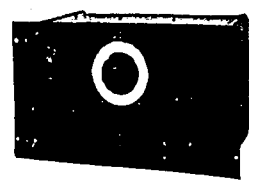
-hp- 712A. Stabilized, variable power supply providing 0 to 500 v at 200 ma and ½% regulation. Also variable bias voltages, 0 to 150 v at 5 ma, and 6.3 v filament at 10 amps. Main supply completely metered. Either terminal may be grounded. Hum less than 8 mv. For laboratory, production or general use. $250.00.

-*hp*- 624A X-BAND TEST SET

High level, direct reading, *portable* test set simplifies lab or field work at frequencies 8,500 to 10,000 mc. Rf output .223 v max. High stability attenuator reduces level by 100 db. May be pulsed or fm modulated. Separate section measures external rf power or external frequency. Ideal one-piece unit for measuring sensitivity and selectivity, tuning and power level of radar, gunfire and beacon systems. $2,250.00.

-hp- 623B SHF Test Set, like 624A but operates over frequencies determined by klystron installed. Three klystrons available (each with 600 mc band width) for frequencies between 5,925 and 7,725 mc. Fm modulated. Includes 1,000 cps square wave modulator. $1,650.00 *(with one Klystron).*

-*hp*- AMPLIFIERS



Complete instrumentation for distortion-free fast pulse measurement. *-hp- 460A Wide Band Amplifiers,* in cascade with *-hp- 460B Fast-Pulse Amplifiers* offer up to 90 db gain, 125 v open circuit output. This permits full deflection of 5XP CRT, or 2-inch deflection of 5CP tubes. Rise time 0.0026 μsec; can amplify milli-microsecond pulses; gives over 100 mc bandwidth to your standard oscilloscope. 460A, $185.00; 460B, $225.00. Connecting cables, plugs, accessories—prices on request.

-hp- 450A Amplifier—general purpose instrument, 20 db or 40 db gain, for use wherever wide frequency range and high stability are needed. 10 cps to 1 mc. Negligible phase shift, no spurious responses. $140.00.

-hp- 451A Bridging Amplifier. For connecting to high impedance circuits without disturbing circuits or affecting operating conditions. 83 megohms impedance probe readily connects to any point in circuit. Amplifier repeats this voltage accurately, without distortion, for operation of VTVM, distortion analyzer, oscilloscope, etc. Frequency 20 cps to 1 mc. $100.00.

-*hp*- 212A PULSE GENERATOR

Provides continuously variable, high power "fast pulses" of superior wave form. Combines broad general usefulness with 0.02 μsec rise and decay time to meet requirements of radar, TV and nuclear work. Pulse length variable 0.07 to 10 μsec; minimum overshoot; 50 watt peak power (50 v to 50 ohms load). Low impedance means accurate pulses can be delivered at a distance from the instrument. Repetition rate variable 50 to 5,000 pps; controlled internally or externally. Synchronizing pulses available in advance of, or following, output pulse. $550.00.

Data subject to change without notice. Prices f.o.b. factory.

-*hp*- offers COMPLETE COVERAGE

in convenient "next door" service!

-*hp*- has selected the best independent organizations in America to give you personal help with measuring problems. Electronics specialists—men trained by Hewlett-Packard—save you time by helping select exact -*hp*- instrumentation you need. These men are located in major business centers—as near as your telephone. Call them when you need personal help—in your plant—today!

INSULATED SOLDERLESS TIP PLUGS

Plug portion brass, nickel plated. Fits all standard phone tip jacks. Wire is wrapped around screw portion and tightened with knurled nut. Molded plastic handle available in Red, Black, Yellow or Green. Specify color.

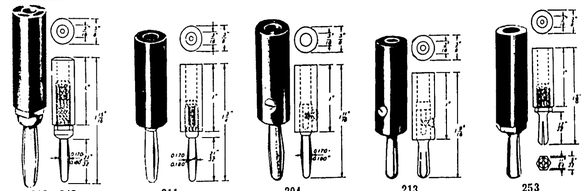
No. 200 Senior Type $23.00 Per C
No. 201 Junior Type $21.00 Per C

SOLDERLESS PHONE TIP PLUG

Signal Corps Approved. Steel, case hardened phone tip made to Signal Corps drawing and spec. Supplied with Bicld Thermoplastic handle to JAN spec. Available in Red or Black Specify color.

No. 250 $65.00 Per C

HEAVY DUTY INSULATED PHONE TIP PLUG



Plug portion brass, nickel plated, or sturdy one piece construction. Fits all standard phone tip jacks. Molded plastic handle available in Red, Black, Yellow or Green. Specify color.

No. 229 $28.00 Per C

SUB-MINIATURE PHONE TIP

Fits all standard phone tip jacks. For checking all types of subminiature equipment. Brass, nickel plated tip, $\frac{1}{16}$" O.D. handle of Red or Black bare fibre. Specify color.

No. 270 $20.00 Per C

INSULATED BANANA PLUGS

Plug portion brass, nickel plated. Fits all standard banana jacks. No. 212 beryllium spring retains resiliency after thousands of insertions. Wire can be soldered to brass stud or directly to plug itself. Molded plastic handle available in Red, Black, Yellow or Green. Specify color.

No. 242 Phosphor Bronze Spring $30.00 Per C
No. 242 Beryllium Copper Spring $50.00 Per C

INSULATED BANANA PLUG

Spring Type. Plug portion brass, nickel plated. Fits all standard banana jacks. Four heated phosphor bronze spring. Set screw provided for solderless connection. Molded plastic handle available in Red, Black, Yellow or Green. Specify color.

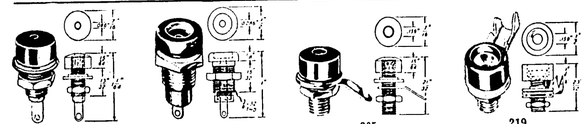
No. 211 $25.00 Per C

INSULATED BANANA PLUG

Spring Type. Plug portion brass, nickel plated. Fits all standard banana jacks. Four heated phosphor bronze spring. Wire can be soldered to stud or plug. Molded plastic handle available in Red, Black, Yellow or Green. Specify color.

No. 204 $25.00 Per C

INSULATED BANANA PLUG



Split Type. Plug portion brass, nickel plated, cross slotted set screw for solderless connection. Molded plastic handle available in Red, Black, Yellow or Green. Specify color.

No. 213 $20.00 Per C

INSULATED BANANA PLUG

Molded plastic handle. Plug portion brass, nickel plated. Wire can be soldered to stud or plug. Molded plastic handle available in Red, Black, Yellow or Green. Specify color.

No. 253 $25.00 Per C

INSULATED PHONE TIP JACKS

Accommodates all standard phone tip plugs. Body is brass, nickel plated. Sturdy phosphor bronze spring. Mounts in $\frac{3}{8}$" hole in panels up to $\frac{1}{8}$" thick. Molded plastic head available in Red, Black, Yellow or Green. No. 202 available in Blue also. Specify color.

No. 222 $\frac{1}{2}$" Head Diameter $20.00 Per C
No. 223 $\frac{3}{4}$" Head Diameter $35.00 Per C

ALL INSULATED TIP JACK

Accommodates all standard phone tips. Sturdy phosphor bronze contact. Mounts in $\frac{3}{8}$" hole in panels up to $\frac{1}{8}$" thick. Red, Black, Yellow, Green or Blue. Specify color.

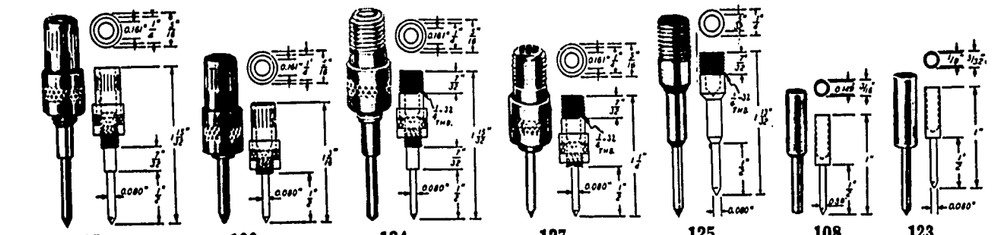
No. 240 $50.00 Per C

INSULATED BANANA JACK

Accommodates all standard banana plugs. Body is brass, nickel plated. Mounts in $\frac{3}{8}$" hole in panels up to $\frac{1}{8}$" thick. Molded plastic head, Red, Black, Yellow, Green or Blue. Specify color.

No. 205 $20.00 Per C

INSULATED BANANA JACK



Accommodates all standard banana plugs. Body is brass, nickel plated. Mounts in $\frac{3}{8}$" hole in panels up to $\frac{1}{8}$" thick. Plastic head Red, Black, Yellow or Green. Specify color.

No. 219 $22.00 Per C

105 106 124 127 125 108 123

SOLDERLESS PHONE TIP PLUGS

Brass, nickel plated. Wire is wrapped around screw portion, and tightened with knurled nut. Fits standard phone tip jacks.

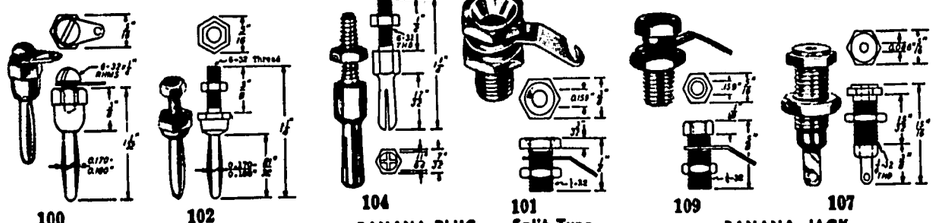
No. 105	Senior Type	$16.00 Per C
No. 106	Junior Type	$16.00 Per C

THREADED SOLDERLESS PHONE TIPS

Brass, nickel plated. Wire is wrapped around screw portion and tightened with knurled nut. Threaded for easy insertion in plastic handles. Fits standard phone tip jacks.

No. 124	Senior Type	$18.00 Per C
No. 127	Junior Type	$18.00 Per C

HEAVY DUTY PHONE TIP PLUG



This brass nickel plated phone tip is of extra sturdy construction, and fits all standard phone tip jacks.

No. 125 $16.00 Per C

SOLDER TYPE PHONE TIPS

Brass nickel plated.

No. 108	Standard Type	$ 30.00 Per M
No. 123	Large I.D. Type	$ 40.00 Per M

100 102 104 101 109 107

BANANA PLUG

Hexed brass, nickel plated. Spring is four-leave phosphor bronze, nickel plated. Plug supplied with screw and phosphor bronze tinned lug. Internal female permits use of this plug on all size panels.

No. 100 $20.00 Per C

BANANA PLUG

Hexed brass, nickel plated. Four-leaved phosphor bronze spring, nickel plated. 6-32 hex nut.

No. 102 $20.00 Per C

BANANA PLUG — Split Type

Hexed brass, nickel plated. Cross slotted for positive and lasting contact. Fits all standard banana jacks. One-piece construction. 6-32 hex nut.

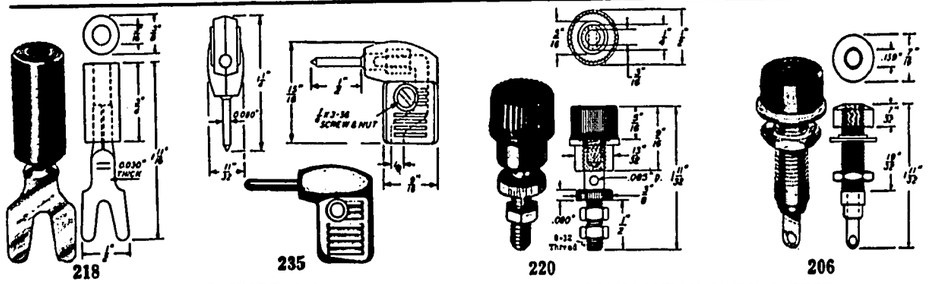
No. 104 $20.00 Per C

BANANA JACK

Hexed brass, nickel plated jack with recessed head. Recommended for use with No. 100 banana plug but accommodates all standard banana plugs.

No. 101 $15.00 Per C

BANANA JACK



Hexed brass, nickel plated. Mounts in ¼" hole and fits panels up to ⅜" thick. Accommodates all standard banana plugs.

No. 109 $15.00 Per C

PHONE TIP JACK

Body is brass, nickel plated, with internal phosphor bronze spring for positive contact. Mounts in ¼" hole in panels up to ⅜" thick. ¼-32 hex nut.

No. 107 $15.00 Per C

218 235 220 206

INSULATED SPADE LUG

Adapts banana plug to a spade lug. Steel hot tinned lug .080" thick for extra durability. Molded plastic handle in Red or Black. Specify color.

No. 218 Complete $18.00 Per C No. 129 Lug Only $20.00 Per M

MOLDED METER TIP PLUG

Molded in two halves for easy assembling. Brass nickel plated tip fits standard tip jacks. Available in Red and Black. Specify color.

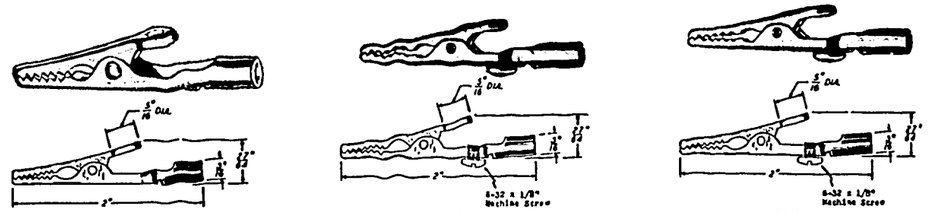
No. 235	Tip Plug	$0.45 Each
No. 235-D	Display of 24 Pairs	$21.60 Each

COMBINATION BINDING POST

Molded plastic free turning non-removable head. Accepts a phone tip plug, a spade lug, or a banana plug. Normally grounded; can be insulated by use of No. 2155 shoulder and 2163 flat fibre washers. Red or Black. Specify color.

No. 220 $40.00 Per C

INSULATED COMBINATION JACK



Accommodates all standard phone tip or banana plugs. Body is brass, nickel plated; contact is a sturdy phosphor bronze spring. Molded plastic head. Red, Black, Yellow, Green or Blue. Specify color.

No. 206 $25.00 Per C

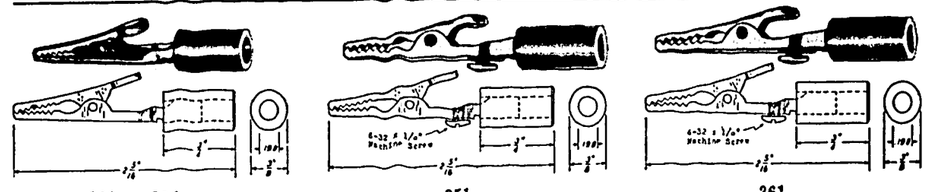
300 350 360

ALLIGATOR CLIP

Steel, cadmium plated. Jaws match accurately for firm grip. Banana plug fits in rear of alligator clip.

No. 300 $10.00 Per C

STEEL ALLIGATOR CLIP Screw Type



Steel, cadmium plated. Jaws match accurately for firm grip. Supplied with screw for solderless connection.

No. 350 $11.00 Per C

COPPER ALLIGATOR CLIP Screw Type

Solid copper. Jaws match accurately for firm grip. Supplied with brass screw for solderless connection.

No. 360 $15.00 Per C

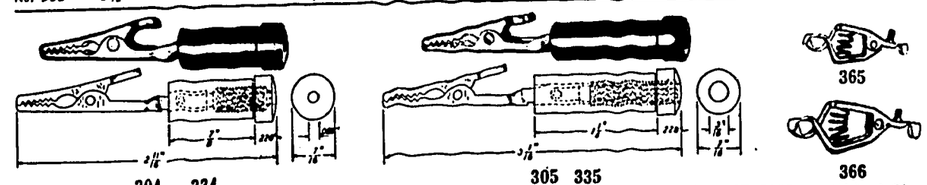
301 306 351 361

INSULATED ALLIGATOR CLIP

Embodies our No. 300 steel cadmium plated alligator clip with molded plastic Red or Black handle. Specify color.

No. 301	¾" Handle	$18.00 Per C
No. 306	1½" Handle	$35.00 Per C

INSULATED STEEL ALLIGATOR CLIP



Screw type. Embodies our No. 350 steel, cadmium plated screw type alligator clip with molded plastic Red or Black handle. Specify color.

No. 351 $19.00 Per C

INSULATED COPPER ALLIGATOR CLIP

Screw type. Embodies our No. 360 copper screw type alligator clip with molded plastic Red or Black handle. Specify color.

No. 361 $23.00 Per C

304 334 305 335 365 366

PHONE TIP TO ALLIGATOR CLIP ADAPTER

No. 300 Alligator clip with No. 202 tip jack in rear of handle, adapts phone tip plugs to alligator clips. Red or Black. Specify color.

No. 304 $50.00 Per C

Same, except with No. 360 screw type copper alligator Clip.

No. 334 $55.00 Per C

PHONE TIP OR BANANA PLUG TO ALLIGATOR CLIP ADAPTER

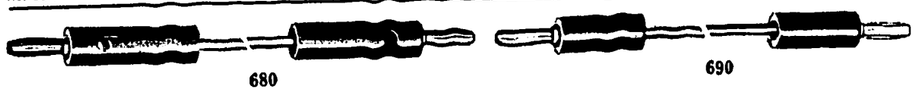
No. 300 alligator clip with No. 206 comb. phone tip and banana plug jack in rear of handle. Adapts phone tips and banana plugs to alligator clips. Red or Black. Specify color.

No. 305 $60.00 Per C

Same, except with No. 360 screw type copper alligator clip.

No. 335 $65.00 Per C

BATTERY TEST CLIP — Midget Size



Steel, cadmium plated, for radio and ignition work, etc. Jaws have meshing teeth. Jaw spread ½", 7 lb. spring, 1½" long, 5 amp. capacity.

No. 365 $9.50 Per C

BATTERY TEST CLIP — Small Size

For general testing and radio use. Steel, Electroplated. Jaws have meshing teeth. Jaw spread ¼", 10 lb. spring, 2" long, 10 amp. capacity.

No. 366 $10.00 Per C

680 690

"CROSS-PATCH" PATCH CORD

Provides a never-ending banana plug receptacle to interconnect an unlimited amount of multiple circuits. The cross hole is designed for positive contact of all standard banana plugs. Fits all standard banana jacks. Four-leaved phosphor bronze nickel plated spring. Red or Black assemblies. Specify color.

No. 680	8"	Wire Length	$1.45 Each
No. 681	12"	Wire Length	$1.55 Each
No. 682	24"	Wire Length	$1.65 Each
No. 683	36"	Wire Length	$1.75 Each

PATCH CORD

Embodies No. 211 banana plug and is used to interconnect circuits. Molded plastic handle. Plug portion brass, nickel plated. Fits all standard banana jacks. Four-leaved phosphor bronze nickel plated spring. Red or Black assemblies. Specify color.

No. 690	8"	Wire Length	$ .80 Each
No. 691	12"	Wire Length	$ .90 Each
No. 692	24"	Wire Length	$1.00 Each
No. 693	36"	Wire Length	$1.10 Each

SPERRY GYROSCOPE COMPANY

SPERRY KLYSTRON TUBES and *Microline*† INSTRUMENTS

Stemming from its sponsorship of the development of the klystron in 1938, Sperry has had vast experience in the manufacture of these tubes for low, medium and high power applications. As a result of Sperry's pioneering in microwave measuring techniques, this company has a complete line of *Microline* instruments which include every type of device essential to precision measurement, in the entire microwave field.

For further information on the equipment listed below or on new development of klystrons and microwave test units, write or telephone our Special Electronics Department or our nearest District Office.

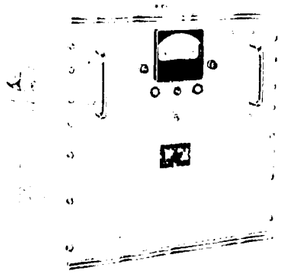
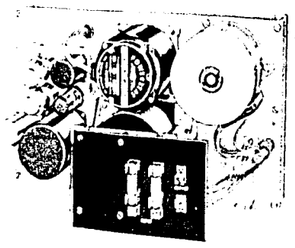
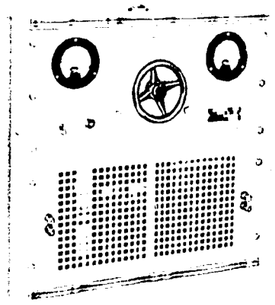
THE SUPERIOR ELECTRIC COMPANY

MANUFACTURERS OF



VOLTAGE CONTROL EQUIPMENT

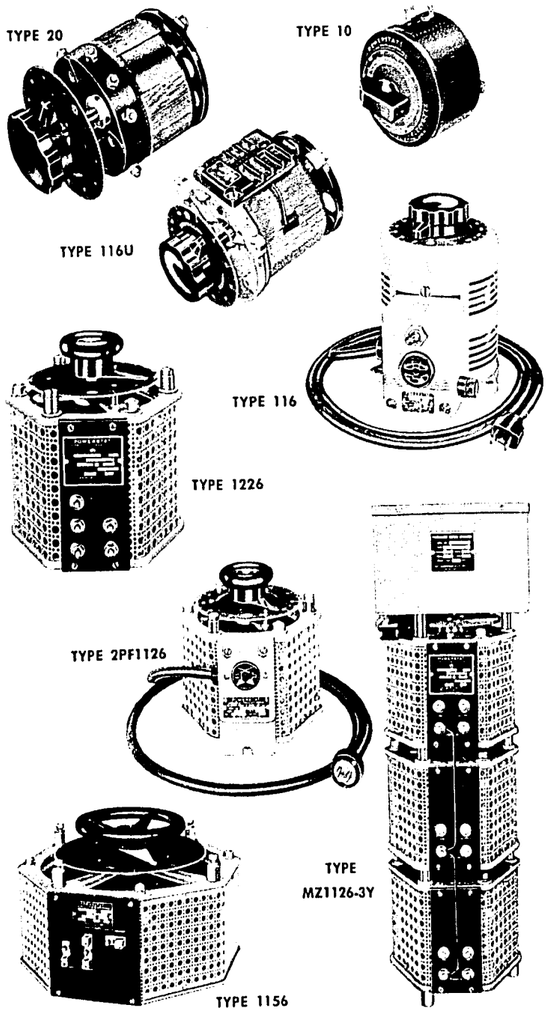




THE SUPERIOR ELECTRIC COMPANY

offers a complete line of voltage control apparatus of the highest quality . . . designed, engineered and manufactured to provide long, dependable service.

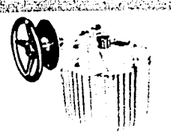
ONE MANUFACTURER—A COMPLETE LINE OF VOLTAGE CONTROL APPARATUS



POWERSTAT *Variable Transformers* to provide a continuously adjustable source of a-c voltages.

A COMPLETE LINE FROM 150 VA TO 100 KVA

POWERSTAT variable transformers are autotransformers of toroidal core design with a movable brush tap which is rotated to deliver any desired output voltage from zero to, or above, line voltage. Glass smooth commutator surfaces and advanced winding techniques assure smooth operation and permit adjustment to a fraction of a volt. Other important features include: excellent regulation, high efficiency, conservative ratings, zero waveform distortion and rugged construction.



A wide range of standard POWERSTAT variable transformers are available for 115, 230 and 460 volt, single and three phase operation. Both manually-operated and motor-driven types are offered. The rating chart lists some of the most-called-for standard POWERSTATS. Others — specifically designed to customer requirements — are available to fulfill each application. Consult us about your specific needs.

* These units are supplied with an "L" terminal which allows connecting in the field to limit the output voltage to the applied voltage. If "L" type connection is required on other models, the "L" must be included in the type number when ordering.
‡ When these POWERSTATS are "L" connected so that the output voltage does not exceed the applied voltage, the frequency range is 50/60 cycles.
** When a motor-drive is required, prefix the letter "M" together with the speed designation letter to the type number. Z — 6 seconds, Y — 14 seconds, X — 19 seconds and W — 45 seconds for full range travel. Since the driving motors are frequency sensitive, be sure to specify whether 50 or 60 cycles is required. Only manually-operated unit weights are listed. For motor-drives add 10, 11 and 14 pounds to the 116-216, 1126-1226 and 1156-1256 types, respectively.

STANDARD POWERSTAT TYPES for VARIED APPLICATIONS

OIL-COOLED OPERATION

TYPE 0-1126

Immersion in transformer oil increases ratings above normal air operation and protects against corrosive atmospheres. Various ratings and sizes are offered.

EXPLOSIVE ATMOSPHERES

TYPE X-1126

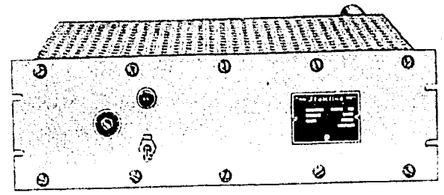
Explosion-proof POWERSTATS provide safe operation in explosive atmospheres. Standard models are Underwriters' approved for Class 1, Group D service.

POWERSTAT LINE CORRECTORS

TYPE 2106LC

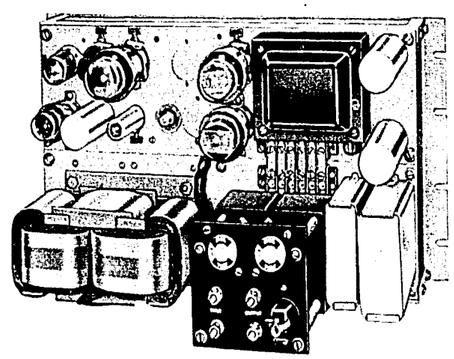
This combination of a POWERSTAT and a fixed-ratio transformer will control relatively high currents. It is used to correct line voltage variations or to supply a limited output voltage range. Numerous ratings are available.

STABILINE *Automatic Voltage Regulators* maintain constant output voltage regardless of line or load changes.



MADE IN 2 DISTINCT TYPES TO MEET EACH NEED

Because it is obviously impossible to produce any single type of electrical instrument that will fulfill all requirements for every application, STABILINE Automatic Voltage Regulators are manufactured in two distinct types to meet individual needs. These two are: TYPE IE (Instantaneous Electronic) . . . for the most exacting control — and TYPE EM (Electro Mechanical) . . . for controlling large industrial loads or for applications requiring zero waveform distortion. Both are designed and manufactured to assure precise correction and dependable operation over long periods of continuous use. They will meet the most rigid mechanical and electrical specifications. A wide range of standard models are available and are listed below. Special types and models will be engineered to meet your own specific requirements.



IE

Type IE is completely electronic with no moving parts. Providing instantaneous correction, it is ideal for laboratories, test lines, as a component of other equipment . . . and everywhere that the most exacting automatic voltage regulation is required. At no load, full load or any intermediate stage, constant output voltage is maintained regardless of line fluctuations. The output voltage is held to within ±0.1 volts of nominal for wide line variations and within ±0.15 volts of nominal for any load current or load power factor change from .5 lagging to .9 leading. Waveform distortion never exceeds 3%. Standard types are listed below.

Input Voltage Range	Output Voltage Range	Frequency In Cycles	Load Range in Amperes	Load Power Factor Range	Rated Output KVA	Type
95-135	110-120	60 ± 10%	0 - 2.2	.5 lagging to .9 leading	0.25	IE51002
95-135	110-120	60 ± 10%	0 - 2.2		0.25	IE51002R
95-135	110-120	60 ± 10%	0 - 4.5		0.5	IE51005

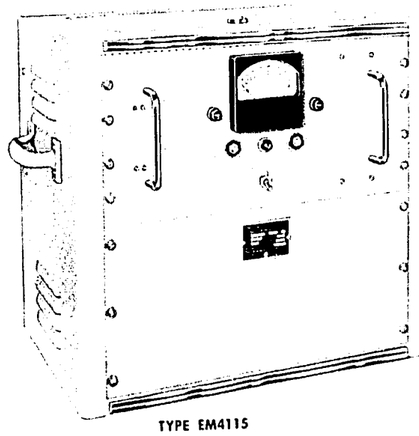
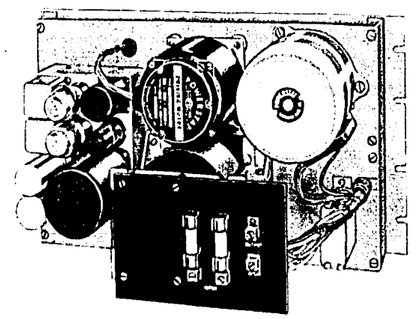
195-255	220-240	60 ± 10%	0 - 22.0		5.0	IE5205

TYPE IE51002R



TYPE IE5101R



EM

Type EM is an electro-mechanical device with a very sensitive detector controlling a motor-driven POWERSTAT variable transformer and auxiliary transformer. While not instantaneous, Type EM corrects faster than most other automatic voltage regulators. Highly efficient in operation, it finds widest application in controlling large industrial loads and also in electronic equipment where zero waveform distortion is essential. Features include: complete insensitivity to the magnitude and power factor of the load, no effect on system power factor, no critical adjustments and adjustable output voltage. Standard types listed below.

Nominal Output Voltage	Input Voltage Range	Output Voltage Range	Output Current (Amperes)	Output KVA	Type
Single Phase 115	95-135	110-120	17.5	2.0	EM4102
			52.0	6.0	EM4106
			130.0	15.0	EM4115
230	195-255	220-240	32.5	7.5	EM4207
			120.0	27.5	EM4228
460	400-520	420-460	15.0	6.6	EM4407
			40.0	17.6	EM4418
Three Phase 230	195-255	220-240	25.0	10.0	EM6210Y
			38.0	15.0	EM6215Y

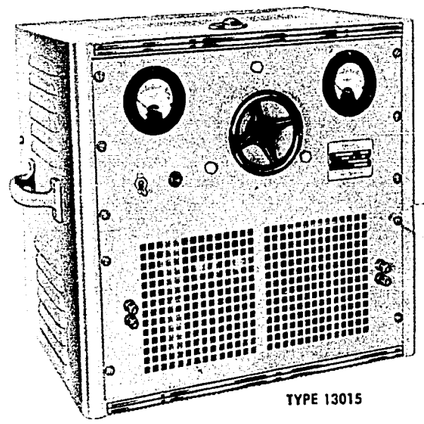
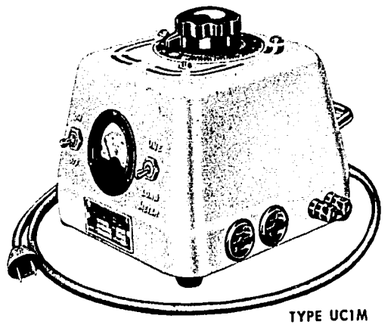
TYPE EM4115



TYPE EM4102R

and Also...



VARICELL

— A VARIABLE RANGE OF STABILIZED and REGULATED D-C VOLTAGES from an A-C SOURCE

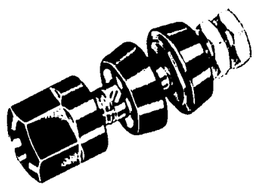
The ideal source of low d-c voltages, the VARICELL is simply plugged into any convenient, single phase a-c outlet supplying a nominal 115 volts at 60 cycles and it is ready to operate. Turning the handwheel provides any desired output voltage from 0-30 volts. Its load rating is 15 amperes. Any setting from 6 to 30 volts is unaffected by changes in line or load current. For any setting from 6 to 30 volts, R.M.S. ripple voltage never exceeds 0.1 volts, and stabilization and regulation is ±0.25 volts.

TYPE 13015

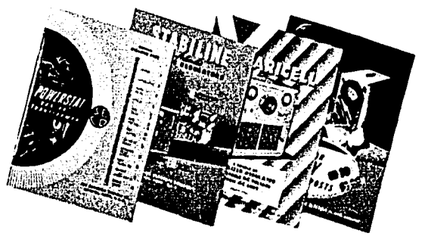
TYPE UC1M

VOLTBOX

A-C POWER SUPPLIES



— A COMPACT, PORTABLE SOURCE OF VARIABLE A-C VOLTAGE



This is a handy instrument widely used in chemical, physical, electrical and other laboratories and in inspection, testing and plant maintenance departments. It eliminates the need for collecting a variable transformer, voltmeter and connection leads when tests involve variable a-c voltages. All necessary components are housed in a compact, aluminum case. By turning the "On-Off" switch to "On"; snapping the line-load switch to "Load" and rotating the knob; the desired voltage is available at the output receptacles and binding posts. Ratings are available to meet every requirement.

SUPERIOR *5-WAY* BINDING POSTS

— ADDED VERSATILITY . . . SAFE, POSITIVE CONNECTIONS

This versatile binding post offers 5 different methods of connection . . . permanent clamping, spade lug, clip-lead, banana plug, or looping and clamping. Ruggedly built of the finest materials it provides complete insulation, a current capacity of 30 amperes and a working voltage of 1,000 volts. Two available colors, red and black, provide circuit identification where required.

FOR COMPLETE INFORMATION ON ANY EQUIPMENT...FOR ANY APPLICATION

Fully descriptive literature covering all of the voltage control apparatus shown here is available and will be sent at your request . . . without cost or obligation. The Superior Electric Company is well qualified to help with your specific requirements. We will be glad to recommend standard equipment exactly suited to your needs — or to engineer special types or new designs for unusual applications.

YARDNEY SILVERCEL*

WORLD WIDE PATENTS PENDING OR GRANTED

the world's
smallest
mightiest
lightest
storage battery

1/5 the size · 1/6 the weight

YARDNEY ELECTRIC CORPORATION
ENGINEERING DEPARTMENT: 10

TEL: WOrth 2-5500

*

The YARDNEY SILVERCEL* is up to 6 times lighter and up to 5 times smaller than other, more familiar lead-acid, nickel-cadmium or nickel-iron storage batteries of the same ampere-hour capacity. It is the lightest and smallest storage battery in the world.

brief history of the YARDNEY SILVERCEL

The culmination of more than 150 years of scientific research, the YARDNEY SILVERCEL* bears out Volta's oft-repeated statement that silver and zinc were the best materials for batteries. This opinion, held by many leading scientists since the beginning of the nineteenth century, advocated the use of these metals because of the great saving in weight and reduction in size which could be achieved thereby. For more than a century, numerous unsuccessful experiments were made to evolve a satisfactory silver-zinc battery.

After World War I, a French scientist, Mr. Henri André (now associated with Yardney International Corporation), devoted years to the same problem and finally succeeded in creating the first practical rechargeable cell of this type.

Michel N. Yardney, President of Yardney International Corporation, recognized the value inherent in Mr. André's work. Accordingly, he directed his own energies, as well as those of Yardney Laboratories in this country and associated laboratories in England, France, Germany, Sweden and elsewhere throughout the world, toward overcoming the difficulties Mr. André had encountered.

Long and intensive research by the engineers and scientists of these organizations resulted in the YARDNEY SILVERCEL* (manufactured in the United States by Yardney Electric Corporation, a licensee of Yardney International Corporation).

This revolutionary alkaline battery, known throughout the world as the ANDRE-YARDNEY SYSTEM, and manufactured in different countries under various trade names, marks an extraordinary advance in the field of storage of electrical energy.

Not only is the YARDNEY SILVERCEL* the smallest and lightest battery in the world, but—as can be seen from the following pages—it also possesses a number of other highly desirable features which cannot be found in any other type of storage battery.

The ANDRE-YARDNEY SYSTEM is represented by the most powerful scientific team in the field of silver-zinc storage batteries. This group of outstanding scientists and engineers is responsible for the continuous progress of the YARDNEY-SILVERCEL*.

*Registered U. S. Patent Office. Covered by one or more of the following U. S. Patents: 2,594,709; 2,594,710; 2,594,711; 2,594,712; 2,594,713; 2,594,714; 2,601,133; 2,610,219; 2,611,792; 2,635,127—Others pending.

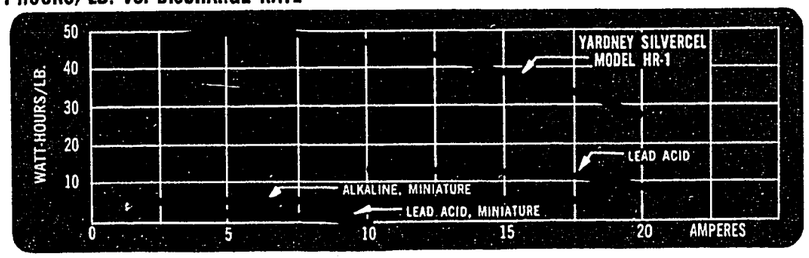

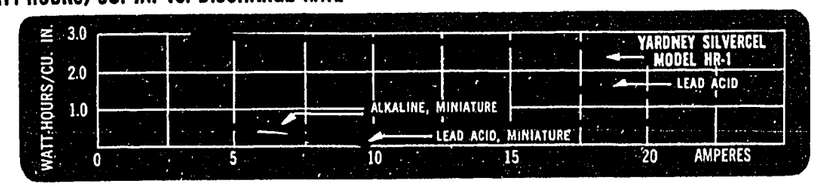

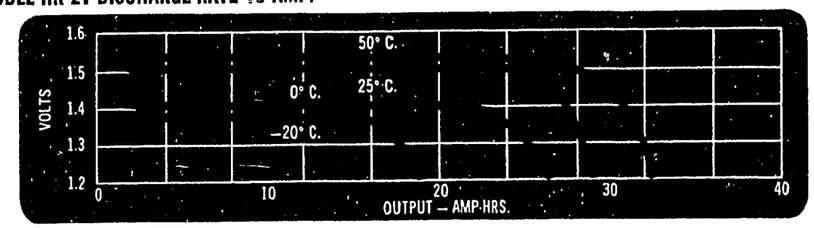

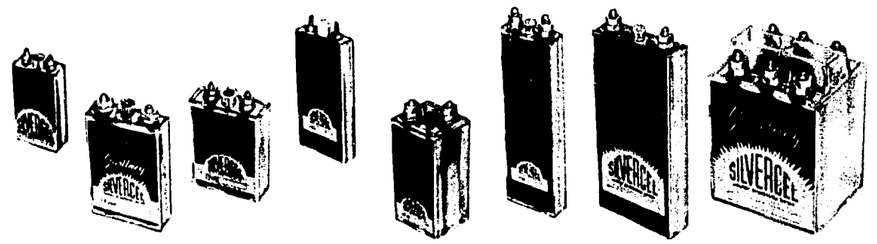

FIG. 3 WATT-HOURS/CU. IN. VS. DISCHARGE RATE

typical discharge characteristics at various temperatures

FIG. 4 MODEL HR 21 DISCHARGE RATE 15 AMP.

outstanding features of the YARDNEY SILVERCEL

light weight & small size

The most outstanding feature of the YARDNEY SILVERCEL is the extremely high capacity per unit weight and unit volume. This cell is up to 6 TIMES LIGHTER and up to 5 TIMES SMALLER than other storage batteries of the same characteristics.

As a consequence, WHENEVER SAVINGS IN SPACE AND WEIGHT ARE IMPORTANT, THE YARDNEY SILVERCEL OFFERS A UNIQUE OPPORTUNITY TO ACHIEVE NEW STANDARDS OF ECONOMY IN THE OVERALL SIZE AND WEIGHT OF BATTERY-POWERED ELECTRICAL EQUIPMENT.

The advantages of the YARDNEY SILVERCEL can best be understood by reviewing the Table shown below, in which ampere-hour per pound and per cubic inch values, as well as corresponding watt hour figures, are tabulated both for a typical YARDNEY SILVERCEL and a conventional lead-acid battery.

	YARDNEY SILVERCEL MODEL HR 100	CONVENTIONAL LEAD-ACID BATTERY	RATIO (YARDNEY SILVERCEL TO LEAD-ACID)
AH/lb.	37	approx. 5	7.4
WH/lb.	56	approx. 10	5.6
AH/cu. in.	2.25	approx. 0.43	5.2
WH/cu. in.	3.4	approx. 1.3	2.6

The above ratio values clearly demonstrate the striking superiority of the YARDNEY SILVERCEL.

cell reaction

As previously stated, the YARDNEY SILVERCEL is an alkaline storage battery based on the use of silver and zinc as the active materials.

The chemical reactions occurring in operation are entirely reversible, and can be expressed as follows:

$$\underset{\text{discharged}}{Ag + Zn(OH)_2} \quad \rightleftharpoons \quad \underset{\text{charged}}{AgO + Zn + H_2O}$$

high rate discharges

Owing to its exceptionally low internal resistance, due to its unique design, the YARDNEY SILVERCEL is ideal for extremely high discharge rates.

Since the maximum permissible current is limited solely by the heat generated within the cell, the YARDNEY SILVERCEL can be designed to meet practically any high current requirements.

It is notable that the ampere-hour efficiency of the YARDNEY SILVERCEL is only slightly affected at high discharge rates.

flat voltage characteristic

Another outstanding characteristic of the YARDNEY SILVERCEL is the EXTREME FLATNESS OF ITS VOLTAGE CURVE at all discharge rates.

THIS VALUABLE FEATURE MAKES THE YARDNEY SILVERCEL PREFERABLE FOR ALL APPLICATIONS WHERE A FLAT VOLTAGE CHARACTERISTIC IS REQUIRED.

safety, absence of corrosive and poisonous fumes

The unique construction of the YARDNEY SILVERCEL, in addition to the fact that the electrolyte is substantially absorbed into the active material, eliminates completely the hazard of spillage, and, in most models, the hazard of leakage.

The corrosive and poisonous fumes typical of other types of storage batteries are noticeably absent during charge and discharge cycles.

SILVERCEL

mechanical strength

The YARDNEY SILVERCEL exhibits a remarkable resistance to mechanical stresses such as shock, vibration and acceleration, since there are no rigid plates or separators to be damaged.

Tests during discharge under 10 g vibration and 100 g shock in various planes showed less than one-half percent variation in voltage and no loss in capacity.

Acceleration up to 1000 g was found to have no effect on cell performance.

life and shelf

The number of useful charge-discharge cycles and shelf life of the YARDNEY SILVERCEL compare more than favorably to those usually obtained with other batteries.

The reliability of the YARDNEY SILVERCEL is evidenced by the fact that THOUSANDS OF THEM ARE CURRENTLY IN SUCCESSFUL USE.

The application of the ion-exchange principle to cell separators, pioneered by Yardney International Corporation, is, after long and extensive experimentation, in the process of becoming a standard feature of the YARDNEY SILVERCEL, and will contribute still further to its long life and reliability.

performance at high altitudes

The YARDNEY SILVERCEL performs efficiently at high altitudes.

With proper packing, it has been used at altitudes as high as 85 miles.

performance at various temperatures

The capacity of the YARDNEY SILVERCEL is practically unaffected by temperature within the range from 0° C to 80° C.

For special applications, performance can be obtained outside the above temperature range.

Considerable research work is in progress on the subject.

flexibility and ease of servicing

The YARDNEY SILVERCEL can be charged at various rates. For best results, however, we recommend that the instructions supplied with each model be followed carefully.

All of the usual charging methods are applicable to our cells (which can be used either individually, or assembled into packs for series or parallel operation), and any of our models can be supplied assembled into battery packs to meet specific applications.

Unlike other types of storage batteries, the SILVERCEL requires very little maintenance or special care. It is only necessary to keep the cells clean and dry. For most models, it should not be necessary to add any electrolyte during the normal life span.

Unless otherwise specified, all models of YARDNEY SILVERCELS are shipped in a wet-discharged condition.

For further information on operation, maintenance and storage of SILVERCEL, see "General Operating and Maintenance Instructions for YARDNEY SILVERCEL."

physical and electrical characteristics of the YARDNEY SILVERCEL

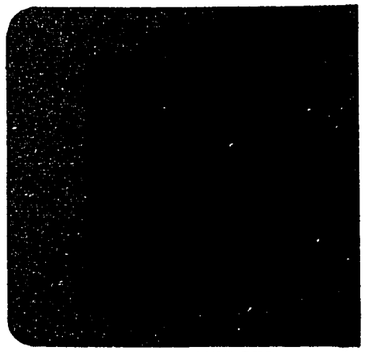
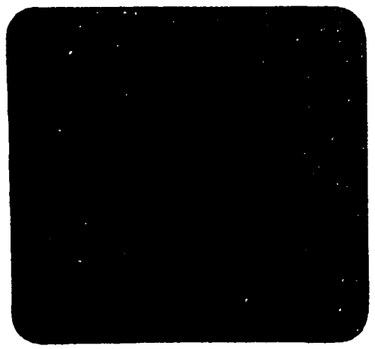
2 Special 15.0 Volt, 3 AH Pack
3 Fully encased 33.0 volt, 5 AH Battery — including automatic temperature control
4 Cell Model LR40 (and HR40)
5 Cell Model LR3 (and HR3)

applications

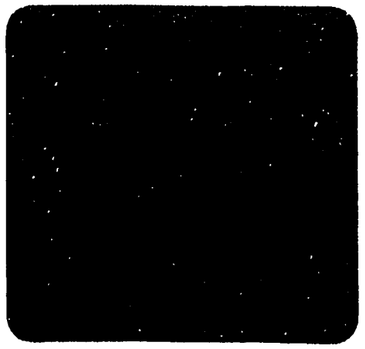


The YARDNEY SILVERCEL has, since its inception, been utilized in numerous and varied electrical and electronic devices. In aircraft and guided missiles activities, the SILVERCEL has proven itself a boon since its high ratio of energy to volume and weight more than met the miniaturization program.

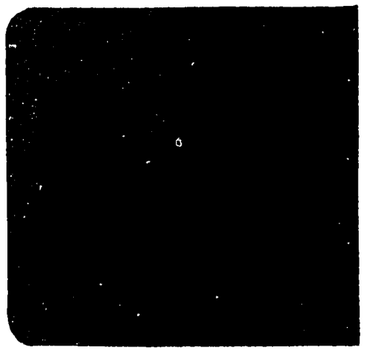
MANY THOUSANDS OF CELLS ARE CURRENTLY IN SUCCESSFUL OPERATION AND, IN A GREAT MANY CASES, HAVE OPENED THE WAY TO COMPLETELY NEW FIELDS OF APPLICATION HERETOFORE CONSIDERED IMPOSSIBLE. Some of them are:



Motion picture and television cameras and allied equipment; portable illumination, radio and sound apparatus; hearing aids; miners lamps; mobile and portable power installations; model planes and boats; battery-powered test instruments, and miscellany including electrical cigarette lighters, toys, etc.



"Walkie-Lookie" portable TV transmitter – built by R.C.A. for the National Broadcasting Company – using Yardney SILVERCEL batteries exclusively.



Experimental SILVERCEL powered pocket cigarette lighter.

Maurer professional 16mm. motion picture camera – another special application for SILVERCELS.

Radio-controlled model airplane utilizing SILVERCEL power for radio and servo operation.

Comparison of three miners' lamps showing the reduction in size made possible by the Yardney SILVERCEL.

Linear Standard Units..

THE ULTIMATE IN QUALITY...

UTC Linear Standard Audio Transformers represent the closest approach to the ideal component from the standpoint of uniform frequency response, low wave form distortion, high efficiency, thorough shielding and utmost dependability.

UTC Linear Standard Transformers feature ...

- **True Hum Balancing Coil Structure** . . . maximum neutralization of stray fields.
- **Balanced Variable Impedance Line** . . permits highest fidelity on every tap of a universal unit . . . no line reflections or transverse coupling.
- **Reversible Mounting** . . . permits above chassis or sub-chassis wiring.
- **Alloy Shields** . . . maximum shielding from inductive pickup.
- **Hiperm-Alloy** . . . a stable, high permeability nickel-iron core material.
- **Semi-Toroidal Multiple Coil Structure** . . . minimum distributed capacity and leakage reactance.
- **Precision Winding** . . . accuracy of winding .1%, perfect balance of inductance and capacity; exact impedance reflection.
- **High Fidelity** . . UTC Linear Standard Transformers are the only audio units with a guaranteed uniform response of ± 1 DB from 20-20,000 cycles.

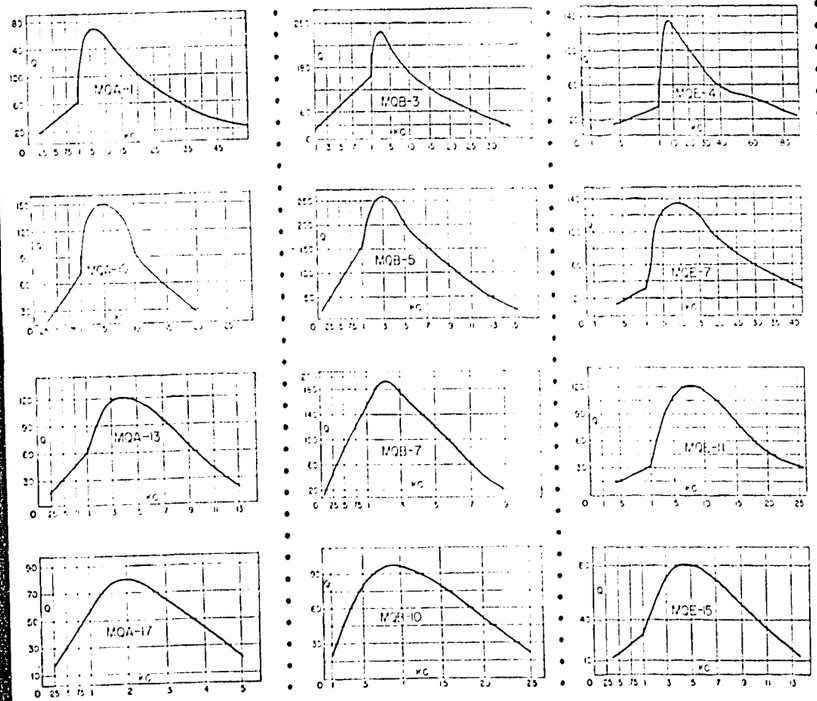
150 VARICK STREET NEW YORK 13, N. Y.
EXPORT DIVISION 13 EAST 40th STREET, NEW YORK 16, N. Y. CABLES "ARLAB"

NEW "M" TYPE TOROIDS Maximum Q Minimum Size



UTC (formerly Ward) Toroids have been the standard of the industry for over 15 years. The new "M" coils provide the highest Q factor in their class (see curves, below), with miniaturized dimensions of cases conservatively designed to MIL-T-27 specifications.

The inductance is constant for the MQE-7 the inductance change is less than 1% for variation from 1 to 5 volts. The MQB-11 change is less than 1% for applied voltages from 1 to 20 volts. The MQB-5 change is less than 1% for applied voltages from 1 to 50 volts. DC is permissible through the coil (values listed below) without appreciable change of inductance, Q, resonance and vibration.

Shield packaging is extremely low due to the toroidal winding structure, with windings centered around the core. The field is of high permeability, affording additional shielding such that close spacing of units can be allowed. The coupling between units will be approximately 80 DB.

Other values of inductance than those listed are available on special order at the price of the next lower listed value.

TYPICAL Q CURVES

MQA TYPES

Type No.	Inductance	*DC Max.
MQA-1	7 mhy.	250
MQA-2	12 mhy.	200
MQA-3	20 mhy.	150
MQA-4	30 mhy.	125
MQA-5	50 mhy.	100
MQA-6	70 mhy.	80
MQA-7	120 mhy.	60
MQA-8	.2 hy.	50
MQA-9	.3 hy.	40
MQA-10	.5 hy.	30
MQA-11	.7 hy.	25
MQA-12	1 hy.	20
MQA-13	1.5 hy.	17
MQA-14	2.5 hy.	13
MQA-15	4 hy.	10
MQA-16	6 hy.	9
MQA-17	10 hy.	7
MQA-18	15 hy.	5
MQA-19	22 hy.	4

*This value of D.C. (MA) will drop the coil inductance 5%. Values of D.C. below this will show proportionately (linear) less inductance drop. For example, MQE-1 will drop ½% in L with 13.5 MA.

MQB TYPES

Type No.	Inductance	*DC Max.
MQB-1	10 mhy.	400
MQB-2	30 mhy.	250
MQB-3	70 mhy.	170

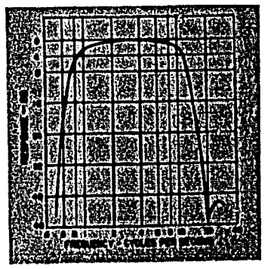
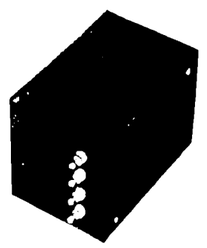
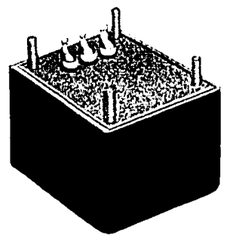
EXPORT DIVISION: 13 EAST 40th STREET, NEW YORK 16, N. Y.. CABLES: "ARLAB"

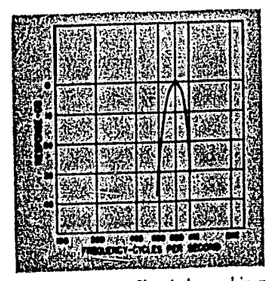


for SPECIALIZED FILTERS

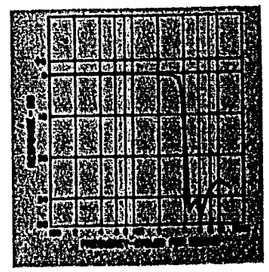


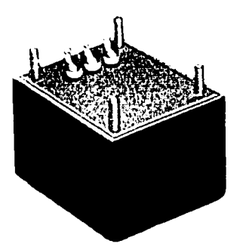
Decades of experience in the design and manufacture of [illegible] filters have resulted in UTC being one of the [illegible]. Fifteen years ago UTC was already the [illegible] dust toroids in the world (exclusive of the [illegible]). Present designs include a wide variety of [illegible] winding methods to provide maximum [illegible] requirements and stability. Illustrated [illegible] sands of special filter designs in process [illegible]



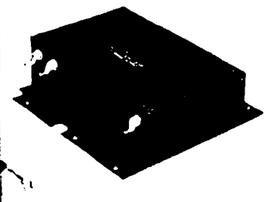


These low frequency band pass filters are held to 1 DB tolerance at the 3 DB crossover . . . 600 ohm . . . 4 filters per 7 1/2" rack panel.

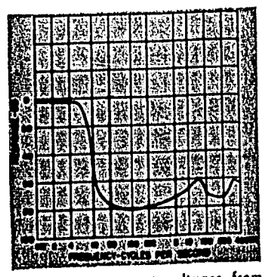


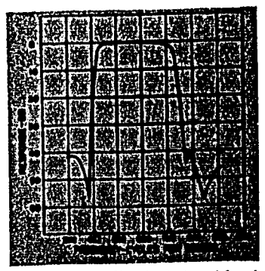


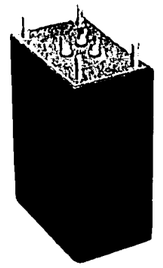
This ultra low frequency filter has a band pass range of one cycle to 10 cycles . . . 50,000 ohms . . . 700 cubic inches.



This 600 ohm miniaturized 1 KC band pass filter is housed in a case only 1" x 1 3/4" x 2 1/2".







This 600 ohm miniaturized low pass filter is housed in a case only 1" x 1 3/4" x 2 1/2".

This power line filter provides correct output voltages from sources of 50 to 400 cycles . . . noise attenuation is from 14 KC to 400 MC . . . 29 cubic inches.

This band pass filter is designed for sharp cut-off at both ends of the range . . . 10,000 ohms . . . case dimensions 1 5/8" x 2 1/2" x 3 1/4".

SPECIAL

ULTRA-MINIATURE UNITS TO SPECIFICATIONS ONLY

UTC ultra-miniature units are uncased types of extremely small size. They are made to customers' specifications only, and represent the smallest production transformers in the world. The overall dimensions are ½ x ½ x 7/16" ...Weight approximately .2 ounces. Typical special units of this size are noted below:

Type K-16949 100,000 ohms to 100 ohms...6 MW...100 to 5,000 cycles.
Type M-14878 20,000 ohms (1 Ma. DC) to 35 ohms...6 MW...300 to 5,000 cycles.
Type M-14879 6 ohms to 10,000 ohms...6 MW...300 to 5,000 cycles.
Type M-14880 30,000 ohms (.1 Ma. DC) to 3,000 ohms...6 MW...300 to 5,000 cycles.
Type M-14881 25,000 ohms (.5 Ma. DC) to 1,000 ohms...6 MW...300 to 5,000 cycles.

TYPE UM

* 200 ohm termination can be used for 150 ohms or 250 ohms. 500 ohm termination can be used for 600 ohms.
** can be used with higher source impedances, with corresponding reduction in frequency range. With 200 ohm source, secondary impedance becomes 250,000 ohms . . . loaded response is –4 db. at 300 cycles.
*** can be used for 500 ohm load . . . 25,000 ohm primary impedance . . . 1.5 Ma. DC.

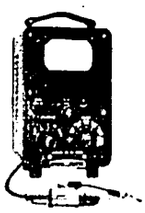
Oscillators—Signal Generators
.01 to 10,000,000 cps

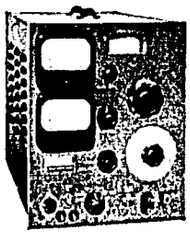


Instrument	Primary Uses	Frequency Range	Output	Price
-hp- 200AB	Audio tests	20 cps to 40 kc	1 watt/24.5 v	$120.00
-hp- 200CD	Audio, ultrasonic tests	5 cps to 600 kc	160 mw/20 v *	150.00
-hp- 200H	Carrier current, telephone tests	60 cps to 600 kc	10 mw/1 v	350.00
-hp- 200I	Interpolation and frequency measurements	6 cps to 6 kc	100 mw/10 v	225.00
-hp- 201B	High quality audio tests	20 cps to 20 kc	3 w/42.5 v	250.00
-hp- 202A	Low frequency measurements	.01 cps to 1 kc	20 mw/ 10 v	450.00
-hp- 202B	Low frequency measurements	½ cps to 50 kc	100 mw/10 v	350.00
-hp- 202D	Low frequency measurements	2 cps to 70 kc	100 mw/10 v	275.00
-hp- 204A	Portable, battery operated	2 cps to 20 kc	2.5 mw/5 v	175.00
-hp- 205A	High power audio tests	20 cps to 20 kc	5 watts	390.00
-hp- 205AG	High power tests, gain measurements	20 cps to 20 kc	5 watts	425.00
-hp- 205AH	High power supersonic tests	1 kc to 100 kc	5 watts	550.00
-hp- 206A	High quality, high accuracy audio tests	20 cps to 20 kc	+15 dbm	550.00
-hp- 230A	Carrier test oscillator	35 cps to 35 kc	+14 dbm/600 ohms	275.00
-hp- 233A	Carrier test oscillator	50 cps to 500 kc	3w/600 ohms	475.00
-hp- 234A	Carrier test oscillator	160 cps to 160 kc	+14 dbm/600 ohms	300.00
-hp- 650A	Wide range video tests	10 cps to 10 mc	15 mw/3 v	475.00

Precision-built -hp- instruments for every

-hp- Vacuum Tube Voltmeters — 2 to 700,000,000 cps

-hp- 410B VACUUM TUBE VOLTMETER



Wide range, flat response ± 1 db, 20 cps to 700 mc. Convenient, simple to use, occupies minimum bench space. Handy compartment for probe and leads. Diode probe places approximately 1.5 μμfd capacity across circuit under test. This, plus high shunt impedance (10 megohms at low frequencies) means circuits under test are not disturbed, and true voltage readings are assured. Also measures dc voltage to 1,000 volts and resistances to 500 megohms. $245.00.

Instrument	Primary Uses	Frequency Range	Voltage Range	Input Impedance	Price
-hp- 400A	General purpose ac measurements	10 cps to 1 mc	.005 to 300 v 9 ranges	1 megohm 24 μμfd shunt	$185.00
-hp- 400B	Low frequency ac measurements	2 cps to 100 kc	.005 to 300 v 9 ranges	10 megohms 24 μμfd shunt	195.00
-hp- 400C	Wide range ac measurements. High sensitivity	20 cps to 2 mc	.0001 to 300 v 12 ranges	10 megohms 15 μμfd shunt	200.00
-hp- 404A	Portable, battery operated	2 cps to 50 kc	.0005 to 300 v 11 ranges	10 megohms 20 μμfd shunt	185.00
-hp- 410B	Audio, rf, VHF measurements; dc voltages; resistances	20 cps to 700 mc	.1 to 300 v 7 ranges	10 megohms 1.5 μμfd shunt	245.00

-hp- Voltmeter Accessories (not listed) include voltage dividers, connectors, shunts and multipliers to extend the useful range of your equipment.

-hp- Signal Generators — 10 to 10,800 mc

-hp- 612A SIGNAL GENERATOR

450 to 1,200 mc. Master oscillator-power amplifier generator for UHF-TV measurements including gain, selectivity, sensitivity, image rejection. Directly set and read; no charts, no interpolation. Low incidental fm, high-quality broad band video modulation to 5 mc. May be modulated internally or externally, amplitude modulated or pulse modulated. (Good rf pulses 0.2 μsec or longer.) $1,200.00.

Instrument	Frequency Range	Characteristics	Price
-hp- 608A	10 to 500 mc	Output 0.1 μv to 1 v into 50 ohm load. Pulse or CW modulation. Direct calibration.	$ 850.00
-hp- 610B	450 to 1,200 mc	Output 0.1 μv to 0.1 v into 50 ohm load. Pulse, CW or Square wave modulation. Direct calibration.	925.00
-hp- 612A	450 to 1,200 mc	Output 0.1 μv to 0.5 v into 50 ohm load. Pulse, CW or amplitude modulation to 5 mc. Direct calibration.	1,200.00
-hp- 614A	800 to 2,100 mc	Output 0.1 μv to 0.223 v into 50 ohm load. Pulse, CW or FM modulation. Direct calibration.	1,950.00
-hp- 616A	1,800 to 4,000 mc	Output 0.1 μv to 0.223 v into 50 ohm load. Pulse, CW or FM modulation. Direct calibration.	1,950.00
-hp- 618B	3,800 to 7,600 mc	Output 0.1 μv to 0.223 v into 50 ohm load. Pulse, CW, FM or Square wave modulation. Direct calibration	2,250.00
-hp- 620A	7,000 to 10,800 mc	Output 0.1 μv to 0.071 v into 50 ohm load. Pulse, CW, FM or Square wave modulation. Direct calibration.	2,250.00
-hp- 623B	5,925 to 7,725 mc	Output 70 μv to 0.223 v into 50 ohm load. FM or Square wave modulation. Separate power meter and wave meter section.	1,750.00
-hp- 624B	8,500 to 10,000 mc	Output 3.0 μv to 0.223 v into 50 ohm load. Pulse, FM or Square wave modulation. Separate power meter and wave meter section.	2,250.00

-hp- Distortion, Wave Form Analyzers — 20 cps to 20 kc

-hp- 330B DISTORTION ANALYZER

Measures distortion as low as 0.1% at any frequency, 20 cps to 20 kc. Measures noise voltages as low as 100 μv. High sensitivity, high stability, broad applicability for broadcast, laboratory or production problems. Wide band 20 db gain input amplifier. Built-in vacuum tube voltmeter usable separately. $395.00.

FM, AM-FM MODELS

-hp- 330C, for FM broadcasters, includes VU meter meeting F.C.C. requirements. *-hp- 330D,* for AM - FM broadcasters, includes AM detector to rectify AM carrier, plus VU meter employed in model 330C. Model 330C, $425.00. Model 330D, $440.00.

Instrument	Primary Uses	Frequency Range	Characteristics	Price
-hp- 300A	Wave form analyzer	30 cps to 16 kc	Variable selectivity; measuring range 1 mv to 500 v	$625.00
-hp- 320A	Measures total distortion	400 cps and 5 kc	Requires external detector	75.00
-hp- 320B	Measures total distortion	50, 100, 400 cps, 1, 5 and 7.5 kc	Same as above	150.00
-hp- 330B	Measures total audio distortion	20 cps to 20 kc	Includes input amplifier, VTVM	395.00
-hp- 330C	For FM broadcast measurements	20 cps to 20 kc	Special VU meter to meet F.C.C. requirements	425.00
-hp- 330D	For AM-FM broadcast measurements	20 cps to 20 kc	AM detector and VU meter to meet F.C.C. requirements	440.00
SQUARE WAVE GENERATOR				
-hp- 210A	Transient and frequency response	20 cps to 10 kc	Output 50 v peak-to-peak 1,000 ohm impedance	150.00

Data subject to change without notice. Prices f.o.b. factory.

Instruments for Complete Coverage

A "Balanced" Promotion Package

. . . for selling Radio and Electronic Engineers is the marketing by-product of this great engineering society!

3 WAYS TO MARKET

The cube illustrated above is symbolic of the IRE Balanced Promotion Package, which is composed of a monthly magazine, a directory and a show, to do these three marketing jobs:

Product Promotion is the function of advertising in "Proceedings of the I.R.E." which reaches 34,894 net paid, ABC readers of which 31,286 are member engineers (including 4,059 student engineers). The publication is a month-by-month textbook of engineering and radio science, and its advertising keeps the engineer up-to-the-minute with product development. Thus its ads promote products to the "thinking and reading" engineers who design and set the specs for tomorrow's production.

Product Reference is the job of the IRE DIRECTORY. Engineers are highly literate, and what they do not know or remember themselves, they do know where and how to look up. The IRE DIRECTORY is their own reference book for men, firms and products—supplying an accurate source of information—in which advertising is an "insurance" that your facts will be found.

Product Presentation is accomplished economically through the Radio Engineering Show, which attracted 35,642 registered visitors, and served 405 exhibitors in 1953.

TYPICAL "PACKAGE" COSTS

Several types of balanced advertising programs which will provide your firm product promotion, reference, and product presentation are shown below, for different budget amounts.

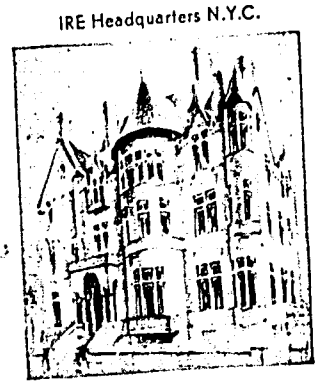
An economy plan costing $1830 a year.

12 one-third page ads in "Proceedings"	$1440
1 one-third page in IRE Directory	120
1 10′ x 10′ booth Radio Eng. Show	270

More space & display, less frequency for $2460 (figures about ¼ of a $10,000 budget).

1 page in color, Convention issue	$ 470
5 ⅔rd pages every other month	1300
3 one column ads in IRE Directory	390
1 standard booth (at 6 time rate)	300

A strong program costing ½ of a $10,000 budget.



12 pages, 1 a month in "Proceedings"	$4320
1 page in IRE Directory	360
1 standard booth in Radio Eng. Show	270
	$4950

A dominating campaign which costs but 1½¢ per impression, or less than 28¢ per qualified engineer a year to cover, total $8280.

12 full pages in color, Proceedings of IRE	$5280
8 page multiple unit in IRE Directory	1920
2 Preferred Position large booths in Show	1080

(Many flexible budget combinations possible.)

IRE Headquarters N.Y.C.

THE INSTITUTE OF RADIO ENGINEERS

Organized in 1913, the Institute of Radio Engineers is a non-profit organization of 31,286 members drawn together for self help through the exchange of information by meetings and publications. There are no company members.

New York 36, N.Y., BRyant 9-7550

Proceedings of the IRE • IRE Directory • Radio Engineering Show

GR TYPE 1183-T
TV Station Monitor

★ Now In Use By Nearly Every TV Station

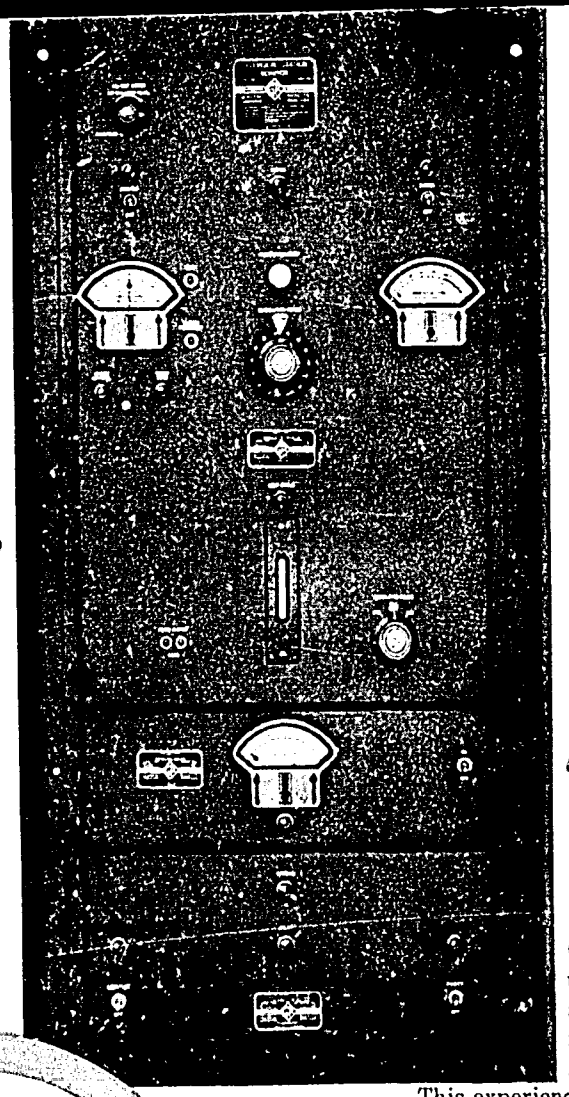
★ Standard Equipment with Transmitters of Such Leading Manufacturers as RCA, GE, DuMont

★ In Regular Production

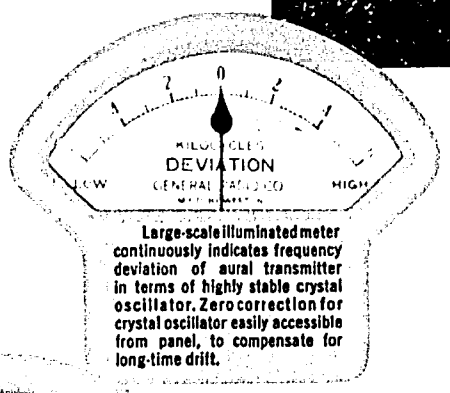
★ Highest Stability

★ Less Than 0.1% Distortion For 25 kc Swing

★ Accurate, Visual and Aural Carrier-Frequency Indication

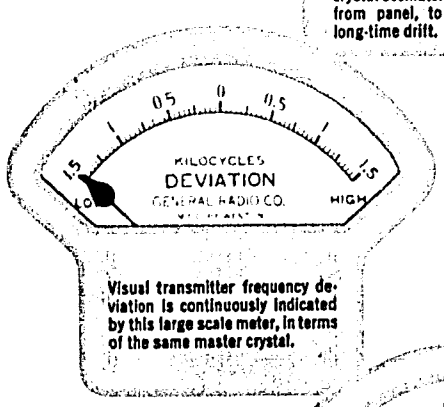


★ Reliable Modulation-Level Monitoring



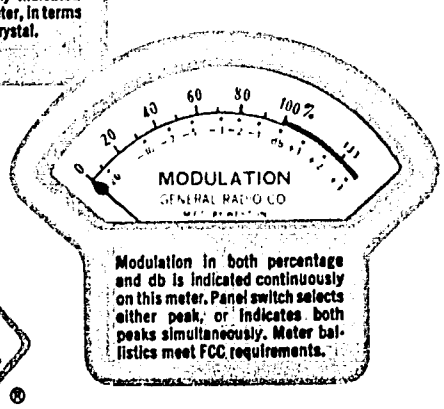
★ Only Routine Maintenance

★ Convenient to Use



in T-V Monitoring Equipment

The Type 1183-T T-V Station Monitor is in regular production—deliveries current to meet "on the air" schedules. Price: from $2830 to $2905 *depending on frequency bands.*



Large-scale illuminated meter continuously indicates frequency deviation of aural transmitter in terms of highly stable crystal oscillator. Zero correction for crystal oscillator easily accessible from panel, to compensate for long-time drift.

Visual transmitter frequency deviation is continuously indicated by this large scale meter, in terms of the same master crystal.

Modulation in both percentage and db is indicated continuously on this meter. Panel switch selects either peak, or indicates both peaks simultaneously. Meter ballistics meet FCC requirements.

it's Dependability that Counts!

Since the beginning of broadcasting, G-R has pioneered in the design and manufacture of monitors of all types. Almost all of the 242+ Radio Broadcast Stations now on the air are equipped with G-R Monitors.

This experience has provided the necessary engineering and manufacturing background to anticipate all of the station needs for high quality, dependable, accurate and trouble-free T-V Monitors. Months of "post-freeze" operation in all of the leading v-h-f and u-h-f stations has proven the reliability, accuracy and convenience of the new G-R Monitor.

★ *Two large-scale, illuminated meters continuously indicate frequency deviation of aural and video transmitters in terms of a highly stable crystal oscillator. Modulation in both percentage and db is shown on another meter; panel switch selects either peak, or indicates both peaks simultaneously*

★ *High Stability; Visual Monitor ±500 cycles*
Aural Monitor ±1000 cycles

On all VHF channels, the above accuracy is guaranteed for at least thirty days — at the lower UHF frequencies (channel 14), the period is over sixteen days — on channel 83, the period is ten days or more

★ *High-fidelity audio output for distortion and noise-level measurements, and for audio monitoring — residual noise level is down 70 db or better for 25 kc deviation*

★ *Overmodulation alarm for aural transmitter — lamp flashes when modulation exceeds predetermined level set by dial*

★ *Sensitivity for both Aural and Visual inputs. High Impedance Input (VHF) — 1 volt or better. Low Impedance (UHF) — 500 mw or less*

★ *Excellent signal-to-noise ratio through channel 83*

★ *Separate heater inputs allow direct connection of crystal oven to station standby power*

★ *Pilot lamp indicates adequate r-f input level*

★ *Terminals are provided for connecting remote center-frequency and modulation meters and over-modulation indicators*

★ *Counter-type discriminator has excellent linearity over ±100 kc range — overall distortion is less than 0.1%, insuring accurate distortion measurements and center-frequency indications even under heavy modulation*

★ *New cabinet arranged for maximum heat dissipation and easy installation or removal for servicing*
