IEEE Milestone Proposal: First Exploration and Proof of Liquid Crystals, 1889

Dear Ladies and Gentlemen,

I readily agree with and support the nomination and proposal by the Professors Dieter A. Mlynski and Peter M. Knoll of Karlsruhe Institute of Technology (KIT) for the IEEE Historic Milestone "First Exploration and Proof of Liquid Crystals, 1889" by Otto Lehmann in Karlsruhe. The KIT shall reimburse the IEEE Germany Section for the cost of the plaque.

Moreover, the State of Baden-Württemberg has given KIT the permission to place the IEEE Milestone Plaque on the KIT Campus outside of the old main building of Technische Hochschule Karlsruhe.

Yours sincerely,

Prof. Dr. Detlef Löhe
